Guildford Draft Local Development Plan

I object to all erosion of the green belt and in particular the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford. A vital lung for our congested and polluted town centres.

I object to the building on the Green Belt at Send at site cA34, Garlick’s Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded.

I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford’s urban brownfield areas much closer to existing transport hubs.

I object to all the proposed sites in Send because they were not included in the previous consultation in 2014. Unlike the rest of the borough Send has not been properly consulted and all its sites have been changed substantially. I object to the proposal for travelers sites in Send. They should be subject to the same requirements as for other council housing, in work, ability to pay rent, a named person to pay rates, utility bills, council tax, need. With their high social need these sites need to be located next to main conurbations in Guildford and not in Send where local services are overloaded, schools, Doctors Surgeries, banks, shops, groceries, and Public transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the large proposed development of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/540  Respondent: 8553761 / A Howlett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more. Where is your transport provision study.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough. Insufficient thought has been given to how the local infrastructure could cope with the additional traffic.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available. The office block on the Portsmouth road at Burnt common has remained unoccupied for 10 years.

I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding, with regular flooding on Portsmouth road where the river had to be diverted and culverted at the intersection with Send Marsh Road.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposed new interchange onto the A3 at Burnt Common because it would be disastrous for Send and the (A247) would be gridlocked all day, instead of just rush hours.

I object to the proposed new interchange onto the A3 at Burnt Common because the Transport Evidence is incomplete and unreliable and shows there will be congestion because Send would be used as a cut through to the A3/M25. The traffic light intersection is already a major hazard for pedestrians as the walkway is only wide enough for one person, and unsuitable for parents walking their children to the local schools.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.

I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.
Please register my objection to the Local Plan, we need to consider our children future. We cannot go on building forever over our green belt. Who will stand up and say enough is enough. Surrey Hills is a unique area, lets keep it that way.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/4504  Respondent: 8553985 / Alastair Knowles  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

My name is Alastair Knowles, I strongly objection to the new build at Blackwell farm, as this will impact on the failing infrastructure we have in place at the moment. The roads and volume traffic cannot cope now, so by adding to this will cause

More gridlocks up and down the A3, backing up into Guildford.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

3. Inadequate Infrastructure
The substantial number of houses proposed between the M25 and Burpham will result in merging and inevitable urbanisation of the villages. There is too much traffic in our villages already and this plan will cause more congestion in West Horsley, East Horsley, Ockham, Ripley, Send and Clandon, with no plans to remedy this. The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses in such a small area means dangerous and unsustainable traffic as well as a significant decline in air quality.

The A3 would need substantial improvements, including widening as well as rebuilding and improvement of multiple junctions before any development is allowed. Any planned development must not be allowed until such road improvements are completed. However it seems clear that Highways England has no plans to even start considering improving the A3 before 2020. Under the current economic climate post Brexit, it is unlikely any additional funding will be made available.
for new capital projects. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), should not take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2922  Respondent: 8554113 / Anthony Baker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A40

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposals for West Horsley would result in a massive increase in village size with consequent loss of character. Simply put, there are too many homes for a village without the necessary infrastructure and the proposals constitute a major assault on Green Belt land. The current settlement area does not need to be extended. Current housing is varied in size and style and is low density as befits a village of this character. It is ill-considered and inappropriate to build clusters of 100 or so houses at much higher density.

Over the years the number of households in East and West Horsley have increased slowly due to a few houses being built each year but spread throughout the two villages. To build the 500 houses proposed would overwhelm the villages and their facilities.

The Raleigh school is oversubscribed- even children living in the Horsleys cannot all obtain a place. This school and the two independent schools create high volumes of traffic at peak times with considerable congestion at the various pinch points throughout the village.

The proposed development of over 500 additional homes in East and West Horsley will result in hundreds of additional school-aged children in need of a school place. This is ill-considered and not supportable.

Both of the major roads running through the village (B2039 and East lane/The Street) are crossed by low, railway bridges and each have pinch-points where the roads very narrow. On East Lane, very close to proposed major developments, there is a very narrow section which does not permit twoway traffic flow. East Lane is therefore particularly unsuited to significant increase in traffic flow. The Street frequently floods and is impassable after heavy rain. Residents would have to commute to work via A3 or A246 or drive through East and/or West Horsley to get to the station or school.

Fields and gardens alongside Ockham Road North flood regularly and the water table is high for the majority of the year. The proposed development of site A40 would exacerbate flooding risk to neighbouring houses and roads. Flood mapping in the consultation document recognizes this problem but the site remains as one for potential development.

The proposed development site A40 also surrounds a successful and highly regarded campsite with some 130 pitches. Currently this is a quiet rural area with bountiful wildlife- deer, foxes, rabbits and a large variety of birdlife. The proposed development of site A40 would destroy this environment and most likely this successful local business.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1184  Respondent: 8554113 / Anthony Baker  Agent:
1. Green Belt
I strongly object to no changes being proposed since the 2016 consultation with regards to insetting of East and West Horsley from the Green Belt.

This is completely unacceptable and is against stated Government policy. No credible attempt has been made to demonstrate the exceptional circumstances which are required to allow the plan massive scale of development on Green Belt land around the Horsleys.

It makes better sense for large scale development to be allowed on brownfield sites in urban areas where there is established and sustainable transport. It is of note that planning permission for a 438-home mixed-use scheme at Guildford train station was recently refused, saying it would appear as a 'monolithic' and 'alien' feature in Guildford town centre. Why does Guildford Borough Council (GBC) consider the station plan unacceptable but would prefer the destruction of large swathes of greenbelt land?

At least 70% of the proposed housing is planned for land currently in the Green Belt. Housing need is not a reason in law for protected green belt land being used. It is perverse for so much housing to be planned for the green belt. Clearly, the green belt has not been used as a constraint as clearly set out in Government advice, planning policy guidance, the NPPF, case law, election manifestos and Ministerial letters to MPs.

Green Belt is precious and was established to confine development to designated areas and this concept is increasingly important in the south east of England. It is what protects London from urban sprawl; it preserves air quality and this is especially important for the villages of East and West Horsley which are also very close to the A3 and M25.

The Green Belt serves five legal purposes:
• To check the unrestricted sprawl of large built-up areas
• To prevent neighbouring towns merging into one another
• To assist in safeguarding the countryside from encroachment
• To preserve the setting and special character of historic towns
• To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. Housing Number
The proposed housing target of 12,426 is based on assumptions which have not been made public and doubtless would not withstand public scrutiny. A much lower figure of 400 per annum has been proposed as adequate to meet Guildford's overall needs by an acknowledged professional analyst, Neil McDonald of NMSS.

The proposed policy is flawed and should be amended. In the last consultation 97% of responses were against the proposed policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/829  Respondent: 8555041 / Adrian Platt  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object to the specific plan relating to my village, West Horsley. It seems utterly incredible that GBC could propose such a plan for a village which is probably the most rural village after East Clandon. Not only is the proposed increase of 385 houses over four sites unbelievable but it is also an increase of 35% which is more than any other location. Whilst I understand that any Neighbourhood Plan has to fit into the Borough Local Plan, a recent survey of the whole village showed that residents felt that only 40 houses were needed [or could be coped with sustainably- no shop, no Post Office, difficult parking in East Horsley, railway station parking at capacity and limited Bus Service] in the same period. Even allowing for the GBC needs, this shows just how distorted the numbers are in Local Plan.

- I object to the unacceptable density of the proposed housing for West Horsley. This is far higher than the current density and it is likely to lead to houses totally out of character with the existing village and no sustainability in terms of schooling, drainage, roads capacity, shops and public transport.

- I object to the early exhibition of a SANG in Longreach, West Horsley by a Company, Greenreach Ltd, which is totally owned by developers. How dare the GBC support the concept of this exhibition when we have many wonderful areas of country for recreation? To put this artificial plan forward before the Local Plan has completed its consultation is disgraceful, especially since it has been created by Developers who clearly expect the GBC to favour them.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1363  Respondent: 8555041 / Adrian Platt  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the proposed development of the Wisley site and am astonished that GBC has even considered including the site in the Local Plan, especially since planning has already been refused. Whilst I agree that the Wisley developers have included much needed extra infrastructure, the whole plan completely fails on the traffic issue. Our local roads are already very congested and the roads around the M25 and A3 junctions are mostly chaotic. It would be absolute madness for GBC to consider this plan unless it was for a very small number of houses which did not create the risk of further traffic chaos. Under no circumstances can this site be considered without careful and close discussion with local Wisley and Ockham residents, in particular.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the total lack of any substantial information on providing adequate infrastructure for the developments proposed. It is simply not good enough to make bland statements about infrastructure, since, before any development of the frightening level proposed is considered, fully costed and detailed infrastructure plans for items such as new schools, Medical Centres etc. must be clear.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I strongly **object** to the plan to inset several rural villages from the Green Belt. The GBC seem to have completely forgotten that people who live in the rural villages in the Borough have chosen a particular lifestyle to live in a rural community and the latest local plan would ruin many people's lives. The policy is grossly unfair to these people and the local plan should be completely altered so that development only occurs in brown field sites and on the urban edges of main towns. In addition the protection granted to residents for future development would be undermined giving villagers limited ways in which they could prevent unacceptable development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

---

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

My first comment is that I am deeply shocked to see that little or no attention has been paid to the comments made by a significant number of residents in the last consultation. The overwhelming local view that the Green Belt must be maintained at all costs, and that brown field sites should be used for a large part of the housing needs, has been completely ignored.

Once again the method of communicating to Home Owners and Occupiers is totally unacceptable. In January 2014, I had sent a suggestion of how the Borough might **directly** write to every Home Owner or Occupier so that they are fully aware of the proposals. This is because so many key people were not aware of the plan or the needed action. I had an email from the then Councillor in charge of the Local Plan agreeing that their consultation must be improved. This has not been done and so many people may be disenfranchised.

These points above show that the much needed democracy to progress such an important plan is destroying the credibility of the process.

Whilst I will leave official bodies, such as Parish Councils, to comment in more detail on the specific Policy Issues, I now set down my principal concerns.

First and foremost I **object** to the number of new homes proposed for the Borough. By every calculation this target would increase the population of the Borough at a rate higher than at the latest 10 year period as measured by the censuses. Furthermore this figure is totally unsustainable by any measure.

I strongly **object** to the use of the brown field sites for industrial or office development. There is no justification whatsoever to show that there will be an adequate demand for such space. Indeed it seems highly unlikely that such space would be able to be let or sold in our high cost area. Therefore the reassurances made by GBC officers, after the last consultation, to use brown field sites for housing have been ignored. This is of such importance that I find that this complete lack of attention to this point is insulting.
I object to the whole 2016 Local Plan since firstly the consultation process is undemocratic, secondly because much of the information is inaccurate or misleading, thirdly most of the plan has been shown to be unsustainable with inadequate addressing of the infrastructure needs, fourthly no convincing argument for "exceptional circumstances" has been made to wreck the Green Belt which is a vital feature of our Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I refer to your letter of the 7th June, inviting me to put forward comments on the new Local Plan.

After making an extensive visit to the “drop-in” event at East Horsley village Hall, my first and horrified comment is that the wider consultation that I referred to in my November 2014 has not been acted upon. If you refer to that letter, which I understand will be seen by the Government Planning Inspector, you will see that, after the 2013 consultation, I made a very strong point to the then Leader of GBC and the Councillor responsible for that plan that the most important stakeholders were not being adequate information in order to make their comments. I am specifically referring to house owners, house occupiers and people on the electoral roll. They agreed that the consultation was not good enough and, as I understand it from the Officers at the drop-in session, no general advice has been given. You may feel that it is not necessary because some may not comment or destroy the document. But that is not the point and, unless some very prompt action is taken to advise ALL households, many people are disenfranchised and the whole plan has no credibility. To illustrate my point we had an intelligent couple who own a house in the Borough and they were not aware of the existence of a new 2017 plan.

As long as the Government Planning Inspector will definitely see all the previous comments that I and others made for the 2014 plan, I will limit my comments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/85  Respondent: 8555041 / Adrian Platt  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
On Policy A35 about the proposed Wisley development, I strongly believe that it is still irresponsible to consider the high number of 2,000 houses. Whilst I am delighted about the infrastructure that the scheme would provide, the benefit of this is totally outweighed by the extreme traffic problems that this scheme would cause. One of you officers told me that there would be a bus every 15 minutes to reach East Horsley and its station. This was put forward as a solution for the traffic chaos but firstly the frequency and size of buses in our narrow lanes would be appalling and secondly the lack of frequency of use of buses in our area would not solve the problem. Whilst your latest plan does cover collaboration with National Highways to find smooth flow through the Wisley roundabout and onto the A3/M25, I really do not believe that your team understand what chaos there is on those roads at many times of day. In order to have an acceptable solution, a really massive investment would be needed. I generally support the concept of using Wisley for a good number of houses but believe that the acceptable number may be nearer to 1,000. I know that this may not be enough houses for the developers to provide their proposed infrastructure but let us remember that this would not just be for the benefit of new Wisley residents. All local residents will need this infrastructure before other houses in the Horsleys are built. I suggest employing a special expert to examine and advise on what is really practicable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A36

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Brownfield Development, where I understand that you feel that you have used up all GBC brownfield sites. Whilst I know that you are required to consult with neighbouring Boroughs, I would like to be categorically assured that GBC have examined with Waverley and other Boroughs the possibility of using their brownfield sites before encroaching on our Borough’s green belt.

Sites A36 and A41. I am in favour of the elimination of these potential sites in the plan.

I look forward to hearing from you again as the consultation progresses.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Development of these four sites is expected to put 445 new homes in a relatively small area of East and West Horsley, this is excessive and disproportionate, the density is inappropriate for the villages and I object to these policies.

Paragraph 2.22 of the draft Local Plan (Key Facts about the Borough: infrastructure) acknowledges that road and rail networks and local facilities in village settlements are facing increasing pressure. It is anticipated that smaller allocated sites will provide the majority of housing supply in the first five years so it can be expected that planning work will start immediately following the implementation of the Local Plan. An East and West Horsley traffic management and environmental improvement scheme is listed in the Infrastructure Delivery Plan (IDP) for delivery by Surrey County Council (SCC) between 2019 and 2023 but no details are given. Comprehensive information is needed now to explain how the Council intends to deal with the consequences of additional development so that residents can make informed comments.

Paragraph 1.23 of the IDP states that new or improved infrastructure to support development should be available when it is first needed; paragraph 5.25 states that the Horsleys are likely to be impacted by new housing planned for the first five years of the Plan and that primary school places will be available in Clandon and Ripley, SCC officers consider it most suitable to fill those schools before looking at expansions at other primary schools in the area; when the strategic aim is that primary schools should be within walking distance this statement will be a disappointment to the community and it does not inspire confidence in the Council’s ability to deliver other pledges in the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Although their planning application was refused, the developers continue to promote their proposed sustainable development “based on Garden City principles”. In my opinion this site will not deliver the concept successfully. As each phase of the development is completed the residents will find their promised quality of life degraded by the increasing frustrations of daily travel.

Being a popular London commuter area I would expect any major new development in the borough to have easy access to a railway station that is able to provide a service capable of handling a large increase in passenger numbers; only suburban stopping services are provided from the two nearest stations and peak time trains into the capital are already over capacity; the operators, South West Trains, have seen passenger numbers more than double in the 20 years that they have held the franchise and are currently running the maximum number of trains possible; there is no mention of the impact on rail services in the IDP.

The rural area means that many workplaces and schools will not be covered by any public transport offering so the car will be the only satisfactory method of transport. Although employment opportunities are proposed, the percentage of residents that will be employed there is difficult to predict and it is likely that a significant number of workers would commute from other districts by car. There will be a vast increase in traffic volumes in the villages, the promised significant bus network adding to the problem, gridlocked rush hour roads are inevitable. Many of the sustainable transport suggestions will remain unsuitable for safety reasons or will simply be incompatible with the busy lives of working families.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Council’s decision to remove villages from the Green Belt and alter boundaries is disappointing. The “exceptional circumstances” required to justify this action are stated to exist but are not explained.

In the case of East Horsley and West Horsley (North) the Green Belt and Countryside Study, which has also influenced the decision to inset, states “areas of open land within the wider Green Belt area are not frequently visible within the perceived village area due to the locations of surrounding woodlands and tree cover within private gardens”. There are protected woodlands and protection orders on trees in private gardens and photographic evidence shows how the villages exhibited a much more open character in the past but residents have been encouraged to allow hedgerows to thrive and have created their own tree planting schemes; unfortunately when we thought that this would preserve our rural villages we now find it will cause us to lose our Green Belt status.

The planning department has ensured that developments have been appropriate and without the Green Belt protection it will be very difficult to argue against plans which would have been deemed unsuitable in the past.

Please register my objection.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Solutions

To address these concerns the Local Plan must be amended to demonstrate a strong commitment to:

- implementation of the whole of the ‘Anticipated Improvements’ documented in the Guildford Borough Transport Strategy 2016 before any of the proposed additional development commences;
- implementation of the majority of ‘Aspirations’ documented in the Guildford Borough Transport Strategy 2016 within the first five years of the Local Plan period commencing (a specific ‘by date’ must be quoted). Crucially, this commitment must include all those ‘Aspirations’ shown under the ‘Local Roads and Parking Strategy’. A commitment to build the proposed A3 tunnel must be made within the first five years of the Local Plan period commencing but we are realistic enough to accept that completion will take rather longer;
- protecting land required for the proposed Sustainable Movement Corridor;
- protecting land required for the proposed A3 tunnel portals;
- protecting land required for a high quality and well positioned central bus facility in, or immediately adjacent to, the heart of the Town

In addition a new road bridge over the River Wey and railway must be built to help movement in our physically divided town and provision should be made for this in the Local Plan, otherwise the opportunity to provide this much needed infrastructure will be lost forever.

The Guildford Town Centre Transformation Package, referenced in the Guildford Borough Transport Strategy 2016, must include good access and priority for local buses serving all areas of the Town, not just those serviced by the proposed Sustainable Movement Corridor (SMC). For example, Guildford Park Road and Aldershot Road (to name but two of the areas Safeguard serves) will not benefit from the SMC.

Failure to make it clear in the Local Plan that these infrastructure developments must occur before developments starts is vital, otherwise we believe developers will take commercial advantage and undertake development without the necessary infrastructure being in place first which would be an unmitigated disaster for Guildford.

Summary

We are surprised and concerned at the scale of development proposed in the draft Local Plan, given its present deficit of transport infrastructure and the barriers to easy movement.

Traffic congestion and the consequent lengthening, and unpredictability, of journey times and the negative impact on customer experience is a major issue.

The revised draft Local Plan pays insufficient attention to the much needed transport infrastructure upgrades meaning that further proposed development will put more pressure on the existing transport systems, particularly the local and strategic road network, creating major difficulties for public transport, hampering economic growth in the area and damaging local businesses.

The Local Plan must be amended to demonstrate a strong commitment to implementing the whole of the ‘Anticipated Improvements’ in the Transport Strategy before any of the proposed additional development commences and to implementing the majority of ‘Aspirations within five years of the Local Plan period commencing.

Land required for the proposed Sustainable Movement Corridor, A3 tunnel portals, well positioned central bus facility in the heart of the Town Centre and a new road bridge over the River Wey and railway must be protected in the Plan.

Offer of Further Engagement
I will be pleased to engage with Guildford Borough Council officers and/or councillors to discuss our concerns in order to ensure that the Local Plan delivers a Guildford that works for all - residents, businesses and visitors alike - and is a Plan that we can all be proud of.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Safeguard Coaches' Response to Guildford's Revised Draft Local Plan**

**Introduction**

Safeguard Coaches is an award-winning family-owned bus and coach business which has been based in Guildford for over 90 years. It operates 10 local buses (on Routes 4 and 5 to/from Park Barn and the Hospital) and 30 coaches and employs over 60 staff, approximately half of which work in Guildford.

**Our Concerns**

Safeguard Coaches accepts that some development will be required in Guildford and its environs. **However, we are both surprised and concerned at the scale of development proposed in the draft Local Plan, given its present deficit of transport infrastructure and the barriers to easy movement created by the North Downs (Guildford is a 'gap' town), the River Wey and the main railway.**

Guildford is a wonderful, historic and vibrant town with a potentially great future ahead of it. However, there is a widely-held view that the Town's Achilles heel is its road transport system which lacks adequate capacity and resilience because very little investment has been made despite the Town growing substantially over recent years. Consequently the Town suffers appalling traffic congestion which blights the Town's economy and people's enjoyment of the Town's amenities.

For Safeguard Coaches traffic congestion and the consequent lengthening, and unpredictability, of bus and coach journey times and the negative impact on customer experience is a major issue.

There has been a noticeable worsening in the situation since September 2015, particularly at peak hours, perhaps as a result of reduced fuel prices encouraging greater car use and increased numbers and length of car-borne home-to-school journeys.

Over the last 10 or so years the time to undertake a single trip (with appropriate recovery time at Guildford Bus Station) on our Route 4 and 5 local bus route (‘Town Centre-Hospital-Park Barn Westborough-Town Centre) has increased from 40 minutes to 52/53 minutes in peak hours, a 30% increase (the equivalent increase in off peak periods is 5 minutes or 12%). Average peak hour bus speeds are now as little as 8 mph (10 mph excluding recovery time at Guildford Bus Station).

We are in danger of entering a spiral of decline with yet more resources (hence costs) required but with bus patronage reducing (due to increased journey times, unreliability etc) with all the adverse consequences this will have for sustainable travel in and around Guildford.
Safeguard Coaches believes that the revised draft Local Plan pays insufficient attention to the much needed transport infrastructure upgrades meaning that further proposed development will put more pressure on the existing transport systems, particularly the local and strategic road network, creating major difficulties for public transport, hampering economic growth in the area and damaging small local businesses like ours.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Consultation on the Amended Local Plan: Provision for Bus-based Public Transport

As well as (or as part of?) its consultation on the proposed Amended Local Plan, Guildford Borough Council is also consulting on the future of Guildford’s Friary Bus Station and alternative options as part of its plans to regenerate the ‘North Street Quarter’.

As a significant commercial bus operator in the Guildford area carrying in excess of 850,000 passengers per annum I write to explain our position concerning the options tabled by SYSTRA on behalf of Guildford Borough Council in March 2017 (report released 28 June 2017). This is highly relevant to the Local Plan.

Unleashing the Potential for Bus-based Public Transport in Guildford

With an estimated 7.5 million bus journeys[1] already being made annually in Guildford we believe that bus-based public transport has a vital role in supporting Guildford’s economy, addressing traffic congestion[2] and improving air quality, particularly in the Town Centre, and therefore that generous provision should be made for it, particularly within the heart of the Town.

This will be even more critical if further development of Guildford, as suggested in the draft Amended Local Plan, is to proceed without causing significantly greater amounts of traffic congestion and worsening air quality.

Bus networks are very flexible and responsive and consequently lead times for improvements can be fairly short. In contrast to other modes, investment in bus services is generally not expensive – and is capable of delivering relatively quick returns.

However, to be commercially viable and appealing to existing customers and current non-users alike, bus-based public transport must be more convenient than using the car.

Crucially this means that buses must be able to use direct, quick and efficient routes into and around the Town Centre and be able to drop off and pick up customers very close to where they want to get to. The vast majority of passengers wish to access the heart of the Town Centre which is why the location of current bus station is so appreciated.

These views are absolutely consistent with the tenor of ARUP’s Technical Note on Existing Conditions Commissioned by GBC and SCC dated 27 May 2016, the Guildford Town Centre and Hinterland Masterplan Report by Allies and Morrison (October 2015) and comments by Councillor Paul Spooner (as Leader of the Council), former Managing Director Sue...
Sturgeon and Councillor Matt Furniss[3]. The fact that, at 7.4%, Guildford already has a higher bus mode share than the national average (5%) suggests that there is already a solid (if small) base to build on.

Guildford cannot continue to grow and compete with other retail and employment centres without providing more sustainable and attractive means of accessing and moving around its Town Centre. Attractive-to-use bus-based public transport will, of necessity, play a key role in facilitating this as there is very limited scope to increase other modal provision in the short to medium term.

In summary, we believe that buses should be seen as the solution and not the problem and we would encourage you to think similarly.

Critique of the Options Tabled by SYSTRA on behalf of GBC

Neither SYSTRA’s Primary Option (relocation of stops to Leapale Road/North Street with some additional layover at Bedford Wharf) or the Secondary Option (relocation of stops to Leapale Road/North Street and provision of layover at Bedford Wharf along with some bus departure bays) will allow buses to fulfill their true potential. SYSTRA’s report on the stakeholder engagement exercise makes this quite clear. Consequently, we cannot support either Option as they stand.

Specifically, both Options would result in buses serving points South, West and North of Town (services in the latter two directions being the most frequent and heavily used) not being able to drop off and pick up customers and workers close to where they want to get to without significantly increased journey times which will reduce the appeal of the bus service to existing and potential bus users and increase operating costs. Terminating services at Bedford Wharf without first accessing the heart of the Town Centre is not an acceptable alternative.

Rather than facilitate the exciting vision outlined above, we believe that the resulting extended bus service routings will deter large numbers of existing and potential users from using the bus as their mode of travel to the Town Centre because a key selling point – that of convenient access to the heart of the Town – will be seriously eroded for the majority of passengers. Reduced bus use, together with increased operating costs, will result in higher fares and/or reduced frequency of service (impacting disproportionally on the more marginalized in society who are more dependent on bus services to access jobs and other facilities) and/or increase the call on scarce public funds through a greater need for bus service support.

We therefore consider that there is a real danger that the Options - as currently drafted – could cause bus transport to become marginalized and increasingly a mode of necessity rather than one of choice, reversing current positive patronage trends.

Failure to embrace the opportunity – already being taken by many towns and cities across the UK[4] – to harness the potential of buses to support sustainable economic growth in Guildford and its environs would be a huge opportunity missed to help address Guildford’s chronic traffic congestion and poor air quality[5]. This is because provision of excellent public transport as a viable and attractive alternative to the car would allowing a greater degree of restraint on car use to be considered politically, socially and economically acceptable, thereby helping to achieve the modal shift which is so often talked about when considering how to release Guildford’s town centre from the ‘vice-like grip’ of unfettered traffic volumes and congestion and make it a more attractive place to live, work, shop and relax.

What We Propose

Our natural preference would be the re-provision of a modern state-of-the-art central Bus Station as part of the North Street Quarter development, for example at the south end of a widened Leapale Road with excellent bus and passenger access via Leapale Road and the whole length of North Street.

However, we are not entirely dismissive of the concept of the relocation of stops to Leapale Road/North Street and provision of additional layover at Bedford Wharf along with some bus departure bays (effectively a hybrid of SYSTRA’s Primary and Secondary Options) but, crucially, to make this work we additionally require that:

- bus access to, and customer facilities in, the whole length of North Street is provided in order that:
1. buses serving the South, West and North of Town and beyond can follow a direct, quick and efficient route into and around the Town Centre viz North Street, Leopale Road, Onslow Street;

2. there is sufficient opportunity for buses to drop off/pick up customers in the heart of the Town Centre and have adequate opportunity for recovery time between journeys to ensure service reliability without buses on high frequency routes having to travel to the proposed Bedford Wharf bus layover facility as this would not be operationally or commercially viable;

- all other through vehicular traffic is removed from the whole of North Street and Leopale Road so that these roads become more pleasant environments for pedestrians, create space for buses and other sustainable modes and assist bus network reliability.

It is vital to appreciate that a central bus station and/or allowing buses to access the whole of North Street will not undermine the viability of the proposed redevelopment of the North Street Quarter. Rather it will enhance its viability (and that of the Town Centre as a whole) by allowing buses to bring large numbers of customers and workers close to these places and play an increasing part in resolving the chronic traffic congestion (and consequent unpleasantness evidenced by poor safety, air quality, pedestrian connectivity and visual intrusion) which is currently blighting the Town Centre, thereby making Guildford an increasingly desirable place to live, work, shop and relax.

In order to help create an attractive and sustainable Town Centre which is not blighted by traffic we also believe that:

- Bridge Street should be dedicated solely to buses, pedestrians and cycles (plus very limited vehicular access to premises) travelling in both directions following removal of the Gyratory system in order to speed up bus journeys (both in actual terms and viz-a-viz the car), allow better bus/rail interchange close to the main entrance of Guildford Railway Station and making Bridge Street a more pleasant and safer environment for pedestrians and cyclists;

- car parking provision should largely be located just outside the central core of the Town (eg Millbrook, Bedford Road[6], Guildford Park Road etc), as opposed to right in the centre (eg on-street in North Street, Leopale Road multi-storey car park, Portsmouth Road surface car park[7]). Much more emphasis should be placed on directing motorists, especially long stay and contract permit holders, to the Town’s Park & Ride facilities[8], all of which have spare capacity. This would help to remove traffic from the central core which would reduce congestion and visual intrusion, increase space for sustainable transport modes, improve safety and air quality and allow more public spaces and living streetscapes to be created;

- vehicular deliveries to Town Centre premises must be strictly limited to those times which do not interfere with peak travel demand or retail activity;

- provide additional road infrastructure, in particular an additional river/road crossing, to relieve the Town Centre and the existing Gyratory area and resolve the propensity of the A3 bottleneck to cause widespread congestion throughout the Town[9].

**Bus Routings**

Allowing buses to access the whole of North Street (as opposed to just the part east of Leopale Road) is essential to provide direct, quick and efficient bus services into and around the Town Centre for customers arriving from/departing to all points of the compass.

Inability to access (lower) North Street would result in buses (hence passengers) having to undertake a significant detour, presumably via York Road and (narrow) Chertsey Street to reach (upper) North Street and Leopale Road. This would add significantly to journey times and operational costs and reduce customer appeal.

A ‘sustainable modes only’ Bridge Street could also be served by buses using the proposed Sustainable Movement Corridor (SMC).

We have drafted provisional bus routings and recommendations for bus passenger infrastructure which we would be happy to discuss with you.
Reciprocal Commitments from Bus Operators

In exchange for excellent access into the heart of a relatively traffic-free Town Centre and provision of high quality bus stands as described above Safeguard Coaches would be pleased to discuss:

- an Enhanced Partnership arrangement (as provided for in the new Bus Services Act) between themselves, Guildford BC, Surrey CC and other stakeholders to promote bus-based public transport, achieve high standards of bus service reliability and coordinate initiatives (including common ticket products for the Guildford area);
- minimum bus service levels, including during evenings and Sundays/Public Holidays;
- even more attractive fares for young people and maximum adult/child fares according to distance travelled, M-ticket and contactless payment options;
- improved customer WiFi on all buses;
- minimum environmental standards of vehicles used in shared spaces (primarily Bridge Street, North Street and Leapale Road) by specified dates; and
- excellent staff training/management/control of driver behaviour when navigating shared spaces.[10]

Summary

Safeguard Coaches absolutely believe buses have a central part to play in helping to resolve the issues facing Guildford and in particular its Town Centre and maintains that, without excellent provision for this form of transport, the Council’s vision for an expanding Guildford (as indicated in the proposed Amended Local Plan) will not be realizable.

However, we cannot support either the options which were the focus of SYSTRA’s stakeholder consultation exercise on commercial and operational grounds and have already raised concerns over the impact of the proposals on the ability of Guildford’s bus network to support and enhance Town Centre retail and leisure activity, access to job opportunities, traffic congestion etc.

While our first preference would be a new, high quality bus station of the same size as the current facility built as part of the North Street Quarter, we think that other solutions could work and have developed exciting and workable ideas which have the potential to meet the requirements of both bus passengers and operators, in particular bus facilities in the heart of the Town Centre (where most people want to go) and quick and reliable access to them.

Re-provision of a central bus station and/or allowing bus access the whole of North Street will not undermine the viability of the proposed redevelopment of the North Street Quarter but rather will enhance it by allowing them to bring large numbers of customers and workers directly to it.

Key to success in this regard will be restraint on car use in the Town Centre through:

- implementation of a ‘drive to, not through’ policy for general traffic;
- removal of through vehicular traffic from the central area and restrictions on deliveries;
- relocating car parking to edge-of-centre locations;
- greater use of existing Park & Ride facilities, especially for long stay and contract parking;
- provision of additional road infrastructure to relieve the Town Centre road network.

We urge the Council to be ambitious in its aspirations to create a Town Centre that we and our children can be proud of and believe that, in this context, bus-based public transport will be able to help deliver much needed improvements in terms of connectivity, sustainability, air quality, safety and social inclusion at an affordable price and in a realistic timescale.

Safeguard Coaches urges GBC to engage meaningfully with us and the Town’s other principal bus operators and existing/potential bus passengers in a spirit of true partnership such that the very best solution for Guildford can be found and implemented. For our part, we are prepared to work with other stakeholders to achieve that outcome but will not accept ‘watered down’ versions.
I trust that this letter provides a helpful synopsis of Safeguard Coaches’ position, in particular making quite clear that we cannot support the proposals as currently tabled by SYSTRA but suggesting that there are other really exciting and more sustainable solutions available while offering to work in partnership with Guildford Borough Council and other stakeholders to deliver bus-based public transport that Guildford can be proud of.

[1] Information provided by Laurie James, Passenger Transport Section, Surrey County Council.

[2] Recent research by traffic monitor Inrix has revealed Guildford to be the most congested town in the country, only exceeded in this respect by the cities of London, Manchester, Aberdeen, Birmingham and Edinburgh (Surrey Advertiser, February 2017).

[4] According to Bus Users UK many towns and cities have seen significant growth in bus passenger numbers through highly-visible bus services that operate in close proximity to the main shopping areas.

[5] Poor air quality is particularly evident around the Gyratory and its approaches.

[6] Bedford Road car park could be linked to the Town Centre by a new larger and iconic pedestrian bridge across Onslow Street. Millbrook car park could be double-decked.

[8] Oxford, York and Winchester are great examples of how effective such a strategy can be. Winchester Crown Court will only refund jurors’ Park & Ride fees, not Town Centre car parking fees, thereby positively encouraging jurors not to drive into the centre of the City. We also recommended increase in town centre parking charges. We consider that reduced revenue from car parking will be more than compensated by the many benefits arising from parking policies designed to reduce town centre congestion and land take.

[9] Ideally by a tunnel.

[10] Evidence from other towns (High Street in Exeter, Fleet Street in Torquay, South Street in Worthing and Terminus Road in Eastbourne are good examples) would suggest that allowing bus access to otherwise largely pedestrianized zones can be achieved without compromising safety while enabling a much-improved streetscape.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
As well as (or as part of?) its consultation on the proposed Amended Local Plan, Guildford Borough Council is also consulting on the future of Guildford’s Friary Bus Station and alternative options as part of its plans to regenerate the ‘North Street Quarter’.

As a significant commercial bus operator in the Guildford area carrying in excess of 850,000 passengers per annum I write to explain our position concerning the options tabled by SYSTRA on behalf of Guildford Borough Council in March 2017 (report released 28 June 2017). This is highly relevant to the Local Plan.

**Unleashing the Potential for Bus-based Public Transport in Guildford**

With an estimated 7.5 million bus journeys already being made annually in Guildford we believe that bus-based public transport has a vital role in supporting Guildford’s economy, addressing traffic congestion and improving air quality, particularly in the Town Centre, and therefore that generous provision should be made for it, particularly within the heart of the Town.

This will be even more critical if further development of Guildford, as suggested in the draft Amended Local Plan, is to proceed without causing significantly greater amounts of traffic congestion and worsening air quality.

Bus networks are very flexible and responsive and consequently lead times for improvements can be fairly short. In contrast to other modes, investment in bus services is generally not expensive – and is capable of delivering relatively quick returns.

**However, to be commercially viable and appealing to existing customers and current non-users alike, bus-based public transport must be more convenient than using the car.**

Crucially this means that buses must be able to use direct, quick and efficient routes into and around the Town Centre and be able to drop off and pick up customers very close to where they want to get to. The vast majority of passengers wish to access the heart of the Town Centre which is why the location of current bus station is so appreciated.

These views are absolutely consistent with the tenor of ARUP’s Technical Note on Existing Conditions Commissioned by GBC and SCC dated 27 May 2016, the Guildford Town Centre and Hinterland Masterplan Report by Allies and Morrison (October 2015) and comments by Councillor Paul Spooner (as Leader of the Council), former Managing Director Sue Sturgeon and Councillor Matt Furniss. The fact that, at 7.4%, Guildford already has a higher bus mode share than the national average (5%) suggests that there is already a solid (if small) base to build on.

Guildford cannot continue to grow and compete with other retail and employment centres without providing more sustainable and attractive means of accessing and moving around its Town Centre. Attractive-to-use bus-based public transport will, of necessity, play a key role in facilitating this as there is very limited scope to increase other modal provision in the short to medium term.

In summary, we believe that buses should be seen as the solution and not the problem and we would encourage you to think similarly.

**Critique of the Options Tabled by SYSTRA on behalf of GBC**

Neither SYSTRA’s Primary Option (relocation of stops to Leapale Road/North Street with some additional layover at Bedford Wharf) or the Secondary Option (relocation of stops to Leapale Road/North Street and provision of layover at Bedford Wharf along with some bus departure bays) will allow buses to fulfill their true potential. SYSTRA’s report on the stakeholder engagement exercise makes this quite clear. Consequently, we cannot support either Option as they stand.

Specifically, both Options would result in buses serving points South, West and North of Town (services in the latter two directions being the most frequent and heavily used) not being able to drop off and pick up customers and workers close to where they want to get to without significantly increased journey times which will reduce the appeal of the bus service to existing and potential bus users and increase operating costs. Terminating services at Bedford Wharf without first accessing the heart of the Town Centre is not an acceptable alternative.
Rather than facilitate the exciting vision outlined above, we believe that the resulting extended bus service routings will deter large numbers of existing and potential users from using the bus as their mode of travel to the Town Centre because a key selling point – that of convenient access to the heart of the Town – will be seriously eroded for the majority of passengers. Reduced bus use, together with increased operating costs, will result in higher fares and/or reduced frequency of service (impacting disproportionately on the more marginalized in society who are more dependent on bus services to access jobs and other facilities) and/or increase the call on scarce public funds through a greater need for bus service support.

We therefore consider that there is a real danger that the Options - as currently drafted – could cause bus transport to become marginalized and increasingly a mode of necessity rather than one of choice, reversing current positive patronage trends.

Failure to embrace the opportunity – already being taken by many towns and cities across the UK [4] – to harness the potential of buses to support sustainable economic growth in Guildford and its environs would be a huge opportunity missed to help address Guildford’s chronic traffic congestion and poor air quality[5]. This is because provision of excellent public transport as a viable and attractive alternative to the car would allowing a greater degree of restraint on car use to be considered politically, socially and economically acceptable, thereby helping to achieve the modal shift which is so often talked about when considering how to release Guildford’s town centre from the ‘vice-like grip’ of unfettered traffic volumes and congestion and make it a more attractive place to live, work, shop and relax.

**What We Propose**

Our natural preference would be the re-provision of a modern state-of-the-art central Bus Station as part of the North Street Quarter development, for example at the south end of a widened Leapale Road with excellent bus and passenger access via Leapale Road and the whole length of North Street.

However, we are not entirely dismissive of the concept of the relocation of stops to Leapale Road/North Street and provision of additional layover at Bedford Wharf along with some bus departure bays (effectively a hybrid of SYSTRA’s Primary and Secondary Options) but, **crucially, to make this work we additionally require that:**

- bus access to, and customer facilities in, the whole length of North Street is provided in order that:
  1. buses serving the South, West and North of Town and beyond can follow a direct, quick and efficient route into and around the Town Centre viz North Street, Leapale Road, Onslow Street;
  1. there is sufficient opportunity for buses to drop off/pick up customers in the heart of the Town Centre and have adequate opportunity for recovery time between journeys to ensure service reliability without buses on high frequency routes having to travel to the proposed Bedford Wharf bus layover facility as this would not be operationally or commercially viable;
- all other through vehicular traffic is removed from the whole of North Street and Leapale Road so that these roads become more pleasant environments for pedestrians, create space for buses and other sustainable modes and assist bus network reliability.

It is vital to appreciate that a central bus station and/or allowing buses to access the whole of North Street will not undermine the viability of the proposed redevelopment of the North Street Quarter. Rather it will enhance its viability (and that of the Town Centre as a whole) by allowing buses to bring large numbers of customers and workers close to these places and play an increasing part in resolving the chronic traffic congestion (and consequent unpleasantness evidenced by poor safety, air quality, pedestrian connectivity and visual intrusion) which is currently blighting the Town Centre, thereby making Guildford an increasingly desirable place to live, work, shop and relax.

In order to help create an attractive and sustainable Town Centre which is not blighted by traffic we also believe that:

- Bridge Street should be dedicated solely to buses, pedestrians and cycles (plus very limited vehicular access to premises) travelling in both directions following removal of the Gyratory system in order to speed up bus journeys (both in actual terms and viz-a-viz the car), allow better bus/rail interchange close to the main entrance
of Guildford Railway Station and making Bridge Street a more pleasant and safer environment for pedestrians and cyclists;

- car parking provision should largely be located just outside the central core of the Town (eg Millbrook, Bedford Road[6], Guildford Park Road etc), as opposed to right in the centre (eg on-street in North Street, Leapale Road multi-storey car park, Portsmouth Road surface car park[7]). Much more emphasis should be placed on directing motorists, especially long stay and contract permit holders, to the Town’s Park & Ride facilities[8], all of which have spare capacity. This would help to remove traffic from the central core which would reduce congestion and visual intrusion, increase space for sustainable transport modes, improve safety and air quality and allow more public spaces and living streetscapes to be created;

- vehicular deliveries to Town Centre premises must be strictly limited to those times which do not interfere with peak travel demand or retail activity;

- provide additional road infrastructure, in particular an additional river/road crossing, to relieve the Town Centre and the existing Gyratory area and resolve the propensity of the A3 bottleneck to cause widespread congestion throughout the Town[9].

**Bus Routings**

Allowing buses to access the whole of North Street (as opposed to just the part east of Leapale Road) is essential to provide direct, quick and efficient bus services into and around the Town Centre for customers arriving from/departing to all points of the compass.

Inability to access (lower) North Street would result in buses (hence passengers) having to undertake a significant detour, presumably via York Road and (narrow) Chertsey Street to reach (upper) North Street and Leapale Road. This would add significantly to journey times and operational costs and reduce customer appeal.

A ‘sustainable modes only’ Bridge Street could also be served by buses using the proposed Sustainable Movement Corridor (SMC).

We have drafted provisional bus routings and recommendations for bus passenger infrastructure which we would be happy to discuss with you.

---

**Reciprocal Commitments from Bus Operators**

In exchange for excellent access into the heart of a relatively traffic-free Town Centre and provision of high quality bus stands as described above Safeguard Coaches would be pleased to discuss:

- an Enhanced Partnership arrangement (as provided for in the new Bus Services Act) between themselves, Guildford BC, Surrey CC and other stakeholders to promote bus-based public transport, achieve high standards of bus service reliability and coordinate initiatives (including common ticket products for the Guildford area);

- minimum bus service levels, including during evenings and Sundays/Public Holidays;

- even more attractive fares for young people and maximum adult/child fares according to distance travelled, M-ticket and contactless payment options;

- improved customer WiFi on all buses;

- minimum environmental standards of vehicles used in shared spaces (primarily Bridge Street, North Street and Leapale Road) by specified dates; and

- excellent staff training/management/control of driver behaviour when navigating shared spaces[10].
Summary

Safeguard Coaches absolutely believe buses have a central part to play in helping to resolve the issues facing Guildford and in particular its Town Centre and maintains that, without excellent provision for this form of transport, the Council’s vision for an expanding Guildford (as indicated in the proposed Amended Local Plan) will not be realizable.

However, we cannot support either the options which were the focus of SYSTRA’s stakeholder consultation exercise on commercial and operational grounds and have already raised concerns over the impact of the proposals on the ability of Guildford’s bus network to support and enhance Town Centre retail and leisure activity, access to job opportunities, traffic congestion etc.

While our first preference would be a new, high quality bus station of the same size as the current facility built as part of the North Street Quarter, we think that other solutions could work and have developed exciting and workable ideas which have the potential to meet the requirements of both bus passengers and operators, in particular bus facilities in the heart of the Town Centre (where most people want to go) and quick and reliable access to them.

Re-provision of a central bus station and/or allowing bus access the whole of North Street will not undermine the viability of the proposed redevelopment of the North Street Quarter but rather will enhance it by allowing them to bring large numbers of customers and workers directly to it.

Key to success in this regard will be restraint on car use in the Town Centre through:

- implementation of a ‘drive to, not through’ policy for general traffic;
- removal of through vehicular traffic from the central area and restrictions on deliveries;
- relocating car parking to edge-of-centre locations;
- greater use of existing Park & Ride facilities, especially for long stay and contract parking;
- provision of additional road infrastructure to relieve the Town Centre road network.

We urge the Council to be ambitious in its aspirations to create a Town Centre that we and our children can be proud of and believe that, in this context, bus-based public transport will be able to help deliver much needed improvements in terms of connectivity, sustainability, air quality, safety and social inclusion at an affordable price and in a realistic timescale.

Safeguard Coaches urges GBC to engage meaningfully with us and the Town’s other principal bus operators and existing/potential bus passengers in a spirit of true partnership such that the very best solution for Guildford can be found and implemented. For our part, we are prepared to work with other stakeholders to achieve that outcome but will not accept ‘watered down’ versions.

I trust that this letter provides a helpful synopsis of Safeguard Coaches’ position, in particular making quite clear that we cannot support the proposals as currently tabled by SYSTRA but suggesting that there are other really exciting and more sustainable solutions available while offering to work in partnership with Guildford Borough Council and other stakeholders to deliver bus-based public transport that Guildford can be proud of.

[1] Information provided by Laurie James, Passenger Transport Section, Surrey County Council.

[2] Recent research by traffic monitor Inrix has revealed Guildford to be the most congested town in the country, only exceeded in this respect by the cities of London, Manchester, Aberdeen, Birmingham and Edinburgh (Surrey Advertiser, February 2017).

[3] Matt Furniss: ‘Improvements to the bus services are key to achieving a modal shift in the town’ (Surrey Advertiser, 24 March 2017), ‘We remain committed to encouraging sustainable, integrated transport and quality passenger facilities’ (Surrey Advertiser, March 2017).

[4] According to Bus Users UK many towns and cities have seen significant growth in bus passenger numbers through highly-visible bus services that operate in close proximity to the main shopping areas.

[5] Poor air quality is particularly evident around the Gyratory and its approaches.
[6] Bedford Road car park could be linked to the Town Centre by a new larger and iconic pedestrian bridge across Onslow Street. Millbrook car park could be double-decked.

[8] Oxford, York and Winchester are great examples of how effective such a strategy can be. Winchester Crown Court will only refund jurors’ Park & Ride fees, not Town Centre car parking fees, thereby positively encouraging jurors not to drive into the centre of the City. We also recommended increase in town centre parking charges. We consider that reduced revenue from car parking will be more than compensated by the many benefits arising from parking policies designed to reduce town centre congestion and land take.

[9] Ideally by a tunnel.

[10] Evidence from other towns (High Street in Exeter, Fleet Street in Torquay, South Street in Worthing and Terminus Road in Eastbourne are good examples) would suggest that allowing bus access to otherwise largely pedestrianized zones can be achieved without compromising safety while enabling a much-improved streetscape.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objection to Guildford Borough Council Proposed Submission Local Plan

I am writing because I strongly object to the new Guildford Local Plan. Little consideration has been paid to your Council Taxpayers’ criticisms of the previous draft Local Plan.

The housing need figure seems to be based on a methodology which is unknown by the public and councillors alike. How can a plan be formed without any knowledge of how the figures were obtained? Surely before spending so much of our Council Tax on consultants and the whole Local Plan process it should have been agreed that the method used to determine the figures would be made available. It should now be reviewed also to reflect the consequences of Brexit; one widely expected consequence is a reduction in the number of overseas students through concern at their ability to continue their studies. I object to the housing need proposals.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Planning Department recommended refusal and the Planning Committee unanimously refused permission on 6th April 2016 for an Application for building 2068 houses and other aspects of the large development on the Former Wisley Airfield. After 14 months of negotiations by the developer in response to widespread serious objections raised by authoritative sources, including Highways England, Thames Water, NATS and the Environment Agency, resolutions could not be found. Since it has been established that there are sufficient brownfield sites and land not in the Green Belt available in the Borough, it cannot be argued that there are exceptional circumstances to justify taking the site 35 out of the Green Belt. I object to Site 35 being taken out of the Green Belt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The infrastructure in many of the areas specified is completely incapable of taking the large increase in the number of people and cars. Roads are already busy and often grid locked. drainage is unable to cope. and car parking at shops and stations is already saturated. The Plan does not adequately provide for the additional schools. doctor's surgeries. other medical care. libraries. policing. etc. Air quality is already at serious levels of pollution, particularly along the A3 corridor; recent research has shown the serious harm being done to the lungs. particularly of young children. by the high levels, in breach of regulations, of NOx gases and particulates. I object that all these considerations have been ignored.

Answer (if comment is on questions 1-7 of the questionnaire): ()
The policy on which the Conservative party councillors and Government were elected was to protect the Green Belt. Surely to ignore this pledge would be undemocratic and dishonest. The whole point of the Green Belt is to preserve open land and to prevent the sprawl of the metropolitan area. Your Council tax payers certainly did not give you a mandate to remove so many of the villages in Surrey from the Green Belt, with the detrimental effect on the Borough of Guildford FOREVER. I object to the re-designation of Green Belt Boundaries.

Comment ID: pslp172/4109  Respondent: 8555297 / Mrs G M Aish  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am disappointed that my previous objections to the draft local plan have not been reflected in the latest draft.

Please confirm that all of these comments together with all my previous comments are passed to the Inspector.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including the following:

1. No effort has been made to demonstrate exceptional circumstances for the removal of any land from the Green Belt. I object that the green belt has been preferred over brownfield land in the urban area without taking notice of the response to previous consultations.
2. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The Plan has not taken into account the associated daily traffic increase to and from the RHS as well as for the regular events at the RHS which attract 1000’s more visitors several times a year.
3. It is the least sustainable strategic site identified in this version and in previous versions of the plan because of the constraints on the site and the physical location.
4. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
5. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
6. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
7. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
8. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
9. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
10. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
11. It remains unclear when and if the Ockham DVOR/DME beacon will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
12. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate despite talking of “good urban design”
13. Opportunity (3) should be common to all sites and is not unique to this site.
14. I object to the increased area of the site as this now abuts and overlooks the Ockham Conservation Area.
15. I object to the fact that the increased area, being on the south of the site facing the North Down AONB will increase the negative impact of the views from the AONB.
16. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).
17. I object to the removal of additional 3.1 ha to be removed from the green belt without any justification.
18. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
19. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
20. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
21. I object to the fact that the council has failed to remove this site from the local plan despite receiving many thousands of objections from local residents and statutory consultees in two full consultations.
22. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
23. The changes to the plan can only be made if the previous plan was ‘unsound’ and the changes should explain how they will make the plan sound. I object to the absence of proper procedure, leaving an unsound plan not capable of being accepted.
24. I object to the Council wasting tax payers and residents’ time and money not following due process and in particular ignoring previous representations.
25. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
26. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
27. I object to the inclusion of Site A35 as it will not contribute to the 5-year housing projection due to many constraints including the provision of a new sewerage facility.
28. I object to the Housing number which is unsound and open to legal challenge.
29. I object to the disregarding for the impact on the Thames Basin Heaths SPA, particularly the damage caused by nitrogen deposition and high pollution levels.
30. I object to Policy S2 where it states: “4.1.9a The figures set out in the Annual Housing Target table sum to a total of 12,426 homes.” yet the figures in the table add up to 9,810. The difference of over 20% demonstrates the lack of understanding of the housing requirements of the Borough. It is also an example of why the Plan is not sound.

For the reasons listed above and numerous other reasons I consider that the plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Submission Local Plan seeks to achieve an appropriate balance between needs of protecting environmental qualities, including the historic environment, and the necessary growth and development to ensure Guildford’s continued vitality and economic, social and environmental sustainability. In its high incidence of references to heritage and the historic environment, and the role this plays in achieving sustainable development, the plan largely succeeds in this respect.

There are a few matters of detail that Historic England would like to see addressed in the final version of the plan, but we do not think these are fundamental impediments to its adoption.

The heritage evidence base, referred to as being contained in the GBC Historic Environment Information (April 2016) requires further work; we note this is still in draft form and could be enhanced by inclusion of assessments of significance and value of historic environment as a whole and constituent assets. It would be useful to identify any actions necessary to sustain and enhance the significances of the historic environment and, in particular, how issues affecting the long-term sustainability of heritage assets, such as this at risk, may be addressed.

A clearer explanation of how this evidence links to and underpins a positive strategy for the historic environment in the Local Plan should be included.

We support Policy P1: Surrey Hills Area of Outstanding Natural Beauty in particular the intention to protect objects of historical significance.

Re. Policy E7: Guildford Town Centre; we broadly support both the Vision (p 84) and policy for the town centre. A key characteristic of and a significant factor in its success is the historic environment, focussed on the setted High Street, and the range and concentration of heritage assets and features (ref. para 4.4.68). However, it will be important to proactively sustain these qualities and integrate their protection and enhancement into efforts to improve the retail and associated offer of the town, and we would like to see the wording of the policy strengthened in this respect; for instance, by the addition of an additional bullet point to this effect in the first paragraph of the policy or by explicitly connecting this policy to Policy D3.

We support Policy D1: Making better places.

We think that Policy D3: Historic environment is weak in its wording though supported by a good introduction and an appropriate reasoned justification. The weakness in the policy arises from its focus being reactive, and we would suggest a more proactive form of wording is sought that reflects some of the intentions set out para 4.5.45. As with other areas of policy, the NPPF requires the local plan to actively promote and support actions to sustain, enhance and enjoy the historic environment (ref. paras 126 and 157, final bullet) addressing, in particular, heritage at risk.

We support Policy D4: Development in urban areas and inset villages. In view of the proposed removal of a number of historic villages form the Green Belt it is suggested, where appropriate, that conservation area appraisals are updated and revised to ensure any new development respects and reinforces the character, distinctiveness and setting of the settlements (this could be linked to Policy D3).

Allocated Sites - with regards to allocated sites, Historic England will be pleased to advise on development proposals as they come forward in respect of any effects on the historic environment or heritage assets within or in proximity to the sites. Some of the more significant (strategic) sites will require archaeological investigation / assessment prior to development especially where there is known to be historical activities that may be retain structures or remains of heritage significance (e.g. at former Wisley Airfield, heritage assessment needed in relation to the sites historic association with aviation development/innovation).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Targeted consultation on Guildford Borough Council’s Proposed Submission Local Plan (2017)

Thank you for your email of 8 June 2017 inviting comments on the above document.

As the Government’s adviser on the historic environment Historic England is keen to ensure that the protection of the historic environment is fully taken into account at all stages and levels of the local planning process and welcomes the opportunity to comment upon this key planning document.

Historic England’s is content with the proposed changes to the draft Local Plan in as far as they relate to its remit. In our letter of 15 July 2016 we noted a number of issues that we believed should be addressed in future iterations of the plan and this has largely been done. We still have some concern that the link between the evidence base for the historic environment and the plans policies on heritage (see earlier letter) is not demonstrated as clearly as it might be but this is a matter for drafting rather than a fundamental deficiency.

Historic England would strongly advise that the Council’s own conservation staff are closely involved throughout the preparation of the Local Plan, as they are often best placed to advise on local historic environment issues and priorities, sources of data and, consideration of the options relating to the historic environment, in particular the requirement to set out a positive strategy for the conservation and enjoyment of the historic environment (NPPF para 126).

These comments are based on the information provided by you at this time and for the avoidance of doubt does not reflect our obligation to advise you on, and potentially object to, any specific development proposal which may subsequently arise from this or later versions of the plan and which may, in our view, have adverse effects on the historic environment.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site A29 - Land to south and east of Ash and Tongham;

I note the following comment re roads linking new estates to provide alternative distributor roads:

Proposed road layout or layouts to provide connections between both the individual development sites within this site allocation and between Ash Lodge Drive and Foreman Road, providing a through road connection between Ash Lodge Drive and Foreman Road, in order to maximise accessibility and to help alleviate congestion on the A323 corridor.
The reserved matters planning application (16/P/00980) for the 400 house development on land to south of Ash Lodge Drive is currently in the planning approval process. The plans for this development should include a link road between the estate distributor road and a made up Ash Green Lane West. This road would provide a link between the new and proposed developments accessed from Ash Green Lane West comprising a total of 60 + 26 + 55 + 14 units (total = 155 houses), in line with the proposed Local Plan policy statement.

(I have submitted this comment in respect of planning application 16/P/00980 - but the Local Plan team may wish to reiterate it as part of the planning application comments.)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A30

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have the following comments on Site A30 - Ash station railway bridge. The land on both sides of railway between the diverted road via the new bridge and the existing Guildford Road should be used for additional car parking for station users and a pick up/set down area plus relocated bus stops close to the station entrance(s).

Ash station could be developed as park and ride by train facility for commuters and others travelling to Guildford and Reading (and also London via Guildford). Car parking should be free (or a nominal amount as at Ash Vale - £1 per day), and not at the level of £3.50 weekdays as currently charged by South West Trains, which is a disincentive to use the car park when paid in addition to the train fares. This is shown by the current level of on-street commuter parking near Ash station and regular vacant spaces in the 22 space station car park.

Some of the surplus land in the A30 area could be used for a new convenience store (with some time limited parking) to serve the new developments already approved and built in south/east Ash and likely to be built in the areas in Site A29. By siting a convenience store close to the station, it would be a useful facility for rail users as well as local residents and could reduce the number of car journeys - i.e. a rail user could visit the shop before leaving the car park, instead of having to drive to a shop some distance away, and then onto their home. Existing shopping facilities in Ash - both in Ash Street, at Ash Vale (Wharf Road) and on Guildford Road depend on on-street parking with limited off-street parking with consequent congestion. The new Tesco convenience store close to Ash Vale station appears to be well used, and is in an area with a limited number of shops nearby.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A39
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site A39 - Land near Horsley Railway Station

Part of this land nearest to the main road through East Horsley should be reserved for additional car parking for Horsley station users. This land is within a short walk of Horsley station. Demand for car parking at Horsley station could exceed the capacity of current station car park, particularly as this station could be the preferred station by commuters from the proposed Wisley airfield development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford station - new road bridge over railway.

Land immediately to the north of the station should be left undeveloped to allow for a road bridge to be constructed as part of a link road between Guildford Park Road and York Road. This would provide an alternative route to Farnham Road bridge to connect the west and east sides of the town on either side of the railway and river. If the gyratory system is downgraded to reduce town centre congestion and traffic across Farnham Road bridge is restricted to buses and emergency vehicles (as I have read in some transport proposals), then there will be no alternative route for motorists to travel across Guildford apart from using the A3 between Woodbridge Road and the Cathedral junction. These traffic proposals assume that motorists from the west side of the town can park near the station (e.g. Guildford Park Road and Farnham Road car parks) and walk into the town centre. This may be acceptable if their destination is in the lower part of the town centre, but it is a significant distance to walk to the upper part of the town, particularly for those with impaired mobility. The withdrawal of the town centre free bus service a few years ago was a retrograde step.

For traffic in the opposite direction - e.g. residents from the east side of the town and the A281 corridor going to and from the Royal Surrey Hospital and the University, both significant destinations, would also have to use the congested A3 for one junction if access over Farnham Road bridge is restricted and there is no alternative road across the railway in the vicinity of the town centre. It is unsatisfactory that local traffic has to use the A3 for a short distance between the Woodbridge Road junction and the Cathedral / University junction, thus causing regular congestion at peak hours. It is therefore imperative that passive provision is made in the Local Plan for an alternative road bridge over the railway to relieve Farnham Road bridge.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Site allocation A29 (and the deleted A30)

Land adjacent to Ash Station needs to be reserved for car parking / pick-up and drop-off areas and local bus stops. As the road bridge and access roads (previously shown in deleted site allocation A30) have now been incorporated into site allocation, there is no distinction between the land for housing and the land for the road / bridge / station and transport purposes. By not segregating these two different land uses, there will be pressure from developers for housing right up to the station area, without leaving adequate land for the essential transport purposes. With a good rail service to Guildford, Ash station could become an effective transport interchange and provide a park and ride facility to Guildford for the 2000+ new houses approved or proposed in the Ash / Tongham area and for existing residents, thus relieving car use on the A31 and A323 roads. Once land close to Ash station is developed for housing it is no longer possible to use that land for transport services. In such a scenario there would be increased parking pressure on nearby residential roads, as there are at present due to the limited car park spaces at Ash station.

(Ash Vale station is an example where there is inadequate parking provision (all the available places are filled by 7.00am on weekdays) and because of close by housing there is no land available for additional parking.)

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Transport interchanges: (Ref Policy E2 = page 76, para 4.4.18)

I have reservations on the proposed designation of the on-street town centre bus stops (replacing the bus station) as an integrated public transport interchange. The distance between the furthest bus stops should not be more than (say) 250m - otherwise the fragmented bus stops spread across the town centre cannot really be considered as a reasonable and effective interchange. This will lead to reduced use of public transport.

Affordable Housing - As a local employer we constantly see young people moving out of the area due to lack of housing. The Council has had building targets for years which they have consistently missed. Until a target for affordable housing is set which is actually enforceable I do not see the position changing. My suggestion is to incorporate a higher target for affordable and introduce an incentive or penalty system to ensure the target is achieved.

Employment - Unfortunately, GBC has a generally poor reputation amongst businesses in the area for being unresponsive, slow to action and lacking understanding of businesses needs. Although this is improving there is still a long way to go. I suggest this section of the plan be enhanced to include response time targets and feedback systems from businesses.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to you with regard to the Proposed Local Plan, as I am the owner of [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998], which constitutes part of one sites in the plan allocated for development, namely of A37: Land at and to the rear of Bell and Co/vii, Epsom Road, West Horsley on pages 209 and 210 of the plan.

Whilst I am not educated in land development matters I feel is important you have input from a homeowner and village resident whose circumstances will be affected by the proposed plan.

Initially, I write to state that I wholeheartedly support the plan. Whilst my family and I enjoy living in West Horsley, and enjoy the delights of a semi-rural environment, we have long felt that the area should be sharing the national burden for housing and that is unacceptable to continue to "fight off development" and expect other locations to deal with the challenge. Furthermore if we are to sustain our rural villages into the future we need to ensure that there is sufficient and suitable housing that encourages young people and families to live in them.
It is clear to me that Guildford Borough Council's plan has been well researched and thought through, and offers the best solution for increased housing whilst protecting the rural feel of the borough. Infill between existing dwellings, on sites such as ours, are definitely more acceptable than extending village boundaries into large areas of open fields.

The plans to make West Horsley an inset village, and specifically the allocation of the site we form part of are both sensible and executable such that the majority of the site is away from pubic gaze, and can be developed in a sensitive way, in-keeping with the context of the village, to provide suitable additional housing required, and contribute to the Council's housing requirements.

As I am sure you are already aware, the site is made up of land owned by four different people. I have marked up the owners, including myself, on the diagram below:-

I am in dialogue with [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] and [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998], both of whom have confirmed that they are keen to develop their land either individually, or together.

I myself am agreeable to development [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998], individually or as part of the whole plot, including road access either through my plot from The Street, or via Bell and Colvill.

It should be noted, for reference, that I have a pre-emption agreement with Mr Witherby, since his land was originally part of [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998], that should he come to sell his land I have first option to purchase his land.

Since the publication of the draft plan, I have been approached by a number of "developers" and "land agents/consultants", all of whom have formulated plans which suggest between five and seven houses of three to four bedroom size and a similar number on the land adjoining [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] owned by [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] (red and green areas on the diagram above) could be built in line with planning regulations.

The houses' design and appearance would be in keeping with the village, thus retaining the village's integrity and character.

My current position is that I would look to move plans forward quickly in consultation with the Council planning department as soon as possible, within the confines of the Local Plan coming into force.

With specific reference to the National Planning Policy Framework, I am flexible as to whether the site falls within the 6-10 year timescale for the wider site development, or it can be developed on a smaller scale as either just [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998], or to include the adjoining land within the shorter timescales of 0-5 years.

Additional factors that make the site both suitable and attractive for development are:-

- It is not agricultural land
- It is not contaminated by previous use such as a former industrial site
- It would not require change of use as it has an existing dwelling and outbuildings
- Direct access to the public highway can be provided from The Street
- It does not represent a major site, and therefore will have minimal effect on biodiversity
- The site is solely under my ownership

In summary I firmly believe that the site can be developed quickly, and in keeping with the character of the village to support the Council's need to provide additional suitable housing in the Borough, and I would very much like to keep it in the plan as available for development.

I fully support the plan and the inclusion of our site and if I can be of any further assistance please do not hesitate to contact me.

With regard to site A37 in the plan. I am one of the landowners and would like to re-state my support for the proposed development of the site. I understand that the phasing has been amended for the site and is now due for delivery in the first 5 years of the plan. Again I am in full support of this and believe the site can easily be delivered in that timescale.

I object to the proposal to move the green belt boundary so that the open fields behind the Shalford village hall lose their green belt protection.

I also object to the proposal to move the village settlement boundary which has existed for several decades and there is absolutely no reason to move it in this part of the village. The boundary follows the readily recognisable boundaries of mostly residential properties on the edge of the village and a public footpath. The only possible change might be to include within the village the bowling green, upper village hall and tennis courts where there is an easily recognisable boundary that is likely to be permanent.

I am extremely disappointed that the council do not appear to be listening or supporting the local residents’ wishes, which was reflected when over 700 local residents signed a petition objecting to the proposed settlement boundary change last year. This issue has widespread support throughout the entire local community, with old and young, clubs and societies all uniting behind our passionate belief that these fields should be left as they are, outside the settlement boundary.
These fields contribute to the rather unique, open character of the village and lie at the heart of village life and our community facilities which are open for all to use. The elevation of this land is the highest in the area, rising to over 32 feet above Kings Road, and so any potential development on it would dominate the entire local area and tower over the local houses and village community facilities.

The proposal for ‘open space’ in the current version of the plan does not retain the same long term protection as if the fields were left as they are, both outside the settlement boundary and within the green belt. We know that developers have already been working on a plan to develop the land, so I therefore challenge why the council would then make the above proposed changes as this would then result in this precious land losing its protection and being open for development?

I appreciate the council are by this classification of ‘open space’ acknowledging that this land is of unusual significance to the entire village, but I would ask for your support in not making changes for the sake of it when the entire local community are united behind their desire to keep this attractive and open land protected, and the settlement and green belt boundaries left as they are in relation to these fields.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fields behind Shalford village hall being removed from the green belt and being included within the proposed settlement boundary.

I enjoy playing tennis at the Shalford tennis club with my friends and really like the fact that the open fields make the heart of the village feel like we are in the countryside, and not in a built up village.

Please do not move the green belt boundary or settlement boundary in the new version of the local plan- things are just fine as they are.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy I1: Infrastructure and delivery

and Appendix C- Transport infrastructure

This has been reviewed in detail by Richard Jarvis, a qualified civil engineer and expert in transport planning. His reports of the transport modelling and non road proposals are attached in Appendix 2. Also see comments on questions 1 to 3.

The transport infrastructure proposals are best summed up by “too little, too late”.

The Sustainable Movement Corridor is only shown as a concept. Its reliance on existing roads means its impact will need to be assessed and we do not have any indication of use. For example, will London Road traffic be deflected along Epsom Road and what will happen to queuing time at junctions for traffic that is not prioritised?

An appropriate site for a central bus interchange, so you can go in any direction from one point, has not been allocated.

There is no additional road bridge over the river and railway for our physically divided town.

We strongly welcome the Leader’s clear call that development should be contingent on infrastructure delivery and the policy that infrastructure should be available “when first needed”. However, policy I1 needs to be considered alongside the infrastructure proposals in Site Allocation policies A24, A25, A26 and A35 184-192, 211- 212 for strategic sites. These are discussed here to avoid duplication.

The following wording is of concern: “regard will be had to the delivery and timing of delivery of the key infrastructure requirements on which the delivery of the plan depends, set out in the Infrastructure Schedule in the latest Infrastructure Delivery Plan, or otherwise alternative interventions which provide comparable mitigation.”

We believe the weak wording “have regard to”, on which this policy hinges, needs to be tightened. Also the option of alternative mitigation could be used to justify a sticking plaster approach and to kick infrastructure provision into the long grass. We refer to our letter in Appendix 4 and the positive reply from the Council leader.

We are delighted to see reference to an A3 tunnel beyond the Plan period but we are concerned that land is not safeguarded for entrances or works areas. Even for projects within the Plan, it is not clear that all requisite land has been safeguarded (eg railways stations and sustainable movement corridor).

Object: Inadequate

[From appendices:]

Appendix 2: Transport Infrastructure Part 1 and Part 2

These reports, the first looking at highways and traffic, the second at transport other than the strategic and local road network, are prepared by Richard Jarvis BSc, MS, CEng, FICE, FCIHT.

Richard Jarvis is a retired planning and management consultant. He has many years’ experience as a transport planner, managing a wide range of projects in the UK and around the world. He led studies for highways, city planning and public transport. He has acted as an expert witness at public inquiries.
1. The highways network is under stress at peak times in many parts of the borough. Queueing is the daily experience of drivers going to and from work. The Plan recognises the problems in para 2.14. Much of the road network is single-carriageway, and junctions act as constraints.

2. The key evidence on future traffic conditions is provided in the Strategic Highway Assessment Report (SHAR) which summarises the results of the tests carried out by SCC at the request of GBC. Five scenarios were examined using SCC’s strategic traffic model. Scenario 1 contains all developments and planning permissions in the borough from 2009 to date. It represents today’s circumstances, with the addition of growth in traffic to 2031 outside the borough and in Waverley in line with their plan. The results for this scenario correspond to the current unsatisfactory traffic conditions in peak periods.

3. Scenario 5 represents the position at the end of the plan period, including all development and highways schemes in the Plan. The Scenario 5 results show that there will be widespread congestion in the morning peak hour across the network in 2031. The key strategic routes, the A3 through Guildford NE bound, and the M25 between Junctions 10 and 11 will be at or over capacity. The summary network statistics presented in the SHAR, while useful, require some interpretation because the analysis of vehicle-hours is derived from link speeds only, and does not reflect junction delays and queues. The tables that show the ratio of flow to capacity and level of service are especially helpful to gaining an understanding of the conditions on the network in the forecast. Where the forecast traffic volume is above or close to capacity, flow becomes unstable and there is congestion. The SHAR results provide evidence that congestion will be worse in 2031 than it is today on much of the network.

4. It is the case that the traffic modelling does not take into account the potential for increased use of other modes, but the trip rates used for developments already have built in the typical level of use of other modes, and services will be required to meet that need. It is also the case that the model does not allow for park and ride, which would improve matters in the town centre.

5. In order to gain an insight into conditions across the network, it is necessary to combine information from several tables in the SHAR. Table 4.5 shows that the M25 and A3 will be at capacity in Scenario 5. The other roads that will have poor levels of service include those in Table 4.5 but also those in 4.12 (except the A3), and those in Tables 4.3 and 4.4 with levels of service E and F that will not benefit from the improvement of the A3 in Scenario 5. Paras 4.10.3, 4 and 5 point out that there will be increased congestion. Given that the starting point is unsatisfactory, there can be no expectation that the schemes in the Infrastructure Development Plan will provide an overall improvement. There will be some local benefits, such as the Ash rail bridge for example, but in general conditions will be as bad and in many places worse. So the statement in the SHAR para 4.2.5 that ‘the combined mitigation as reflected in Scenario5...indicates that at the strategic level it accommodates the additional PSLP demand’ needs qualifying – ‘at the cost of a lot of queuing’.

6. The cumulative effect of the additional traffic generated by the developments in the Plan will be to increase congestion, even with the proposed highway schemes in place. More detailed analysis of the junctions and queuing is required. So we do not accept the conclusion that the developments would have ‘an acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF’.

7. Appendix 3 of the Transport Topic Paper shows the phasing of housing development and transport infrastructure. The major improvement scheme being studied by Highways England for the A3 between the A31 and the A320 is scheduled for delivery in the period 2023/24 to 2027/28. The strategic developments at Blackwell Farm and Gosden Hill Farm are shown as being phased in from 2021/22 onwards. The Garlick’s Arch development is shown as starting in 2019/20. Therefore there will be a period in which the existing A3 will have to carry additional traffic associated with those developments before extra capacity is provided.

The following comments regarding the strategic sites are taken from the SHAR:

- Blackwell Farm – there will be congestion at the A31 junction, and the problems at the Tesco junction, and the Egerton road /Gill Avenue junction (para 4.9.5). Traffic is likely to access the Surrey Research Park and the RSCH through the development (para 4.7.3)
- Gosden Hill Farm – there will be an increase in traffic through Burpham. There will be pressure on the A3100/B2234 roundabout (paras 4.7.6, 4.7.7 and 4.7.8)
Wisley Airfield—traffic will increase on minor roads to gain access to the A3 (N and S bound) and to other routes (para 4.7.11). The development will add more traffic to the A3. The Burntcommon slips help alleviate the traffic through Ripley according to the model, but queuing on the A3 could mean this does not happen (para 4.7.14)

Normandy/Flexford – the report has little to say about the impact of this large development. The increase in flow on Westwood Lane is noted (para 4.5.7). Tables 4.10 and 4.11 show junction delay reducing at the Westwood Lane, B3000 junction, but increasing at the Puttenham Hill/Millbrook junction

Ash – development in Ash is not specifically addressed, but there are large increases in traffic on a number of roads. The new rail bridge will bring relief (but traffic will move to the next junction)

Slyfield – there are no remarks relating to SARP, and as there are no additional trips shown in and out of the Slyfield residential zone in Tables 3.3 and 3.4, it is possible that this development has been omitted in error. There is a significant increase in trips to and from the Slyfield industrial zone, which will impact on the A320 and Clay Lane

Town Centre – the report has very little to say about the town centre. The model results forecast severe congestion on the approaches to the town centre, such as the A281, the A31 Farnham Road, and Woodbridge Road for example. There are no highway mitigation measures in the PSLP for the centre. In the Transport Strategy, GBC states that the intention is to adopt Allies & Morrison’s Scenario 2 which would have the effect of significantly reducing the capacity of the town centre road system. The implications have not been examined in the SHAR, but traffic using the A281 from Waverley, for example, would be affected. The PSLP does include a new park and ride facility at Gosden Hill and the Sustainable Movement Corridor, which is discussed in a separate note.

8. The PSLP does not state an objective for congestion. The two strategic objectives that are included for infrastructure refer to supporting sustainable development and delivering a balanced system. However, in para 2.15 there is an aspiration expressed about opportunities ‘to improve the performance of the road networks through transport infrastructure and service improvements’, which taken with the previous paragraph includes reducing congestion. The evidence so far shows that this will not happen.

9. The mitigation proposed is not sufficient to overcome the problems that will be caused by the level of growth in the PSLP. Congestion will worsen. The network will lack resilience and be vulnerable to disruption due to incidents. Minor roads will have to cope with a lot more traffic, to which they are unsuited. The model results show an increase of 47% over 2009 in Scenario 5.

Appendix 2: Transport Infrastructure Part 2

COMMENTARY ON THE PROPOSED SUBMISSION LOCAL PLAN AND TRANSPORT INFRASTRUCTURE — part 2

1. Appendix C of the Plan includes the following categories of transport infrastructure in addition to the Strategic Road Network and the Local Road Network which are discussed in a separate note:

- Park and Ride
- Sustainable Movement Corridor
- Bus Transport
- Active Modes

Each of these is considered below.

Park and Ride

2. There is one Park and Ride project in the Infrastructure Development Plan which is a new facility at Gosden Hill Farm. This is to be delivered by the developer of the site and the Transport Topic paper states that the intention is that it will operate without any public funding with 500-700 spaces. It is expected that the site will be use by drivers on the A3 southbound heading into Guildford town centre (TTP para 5.60). It is not clear how this ‘mitigates the traffic impact of the Gosden Hill Farm site’ (PLSP App C P&R1), though there could well be residents of the new development who may choose to use the P&R bus service. The Park and Ride facility is not related to the proposed new Merrow Station.

3. There is an absence of any park and ride proposal east of the town centre, which would surely benefit from one.
Sustainable Movement Corridor

4. This is an ambitious concept. Policy I3 in the Plan states that the SMC ‘will provide a priority pathway through the urban area of Guildford for buses, pedestrians and cyclists’. It will link the new developments in the west to those in the east via the town centre. It is estimated to cost £70-90m, with funding coming from developers and the Local Growth Fund. The recognition of the importance of sustainable travel is welcome. Connecting new developments to the town centre, as in the case of SMC1 and SMC2, is sensible, but the need for a ‘corridor’ is unproven.

5. The latest information on the project has been supplied in a paper ‘Progress Update on the SMC Scheme’ published by GBC on 6 June 2016. This explains that studies have been carried out for sections 1-5 of the proposed route, and further work is needed. The SMC will use existing roads for the majority of its length, so this means that it will affect the allocation of carriageway between road users. Two design formats have been identified, ‘type 1’ involving separate lanes for the SMC, and ‘type 2’ in which bus priority measures are introduced at congestion sections and interchanges. The majority of the route is likely to be ‘type 2’ according to Table 1 of the Progress Update. This will be challenging because the road width on several sections will limit what can be achieved without a major impact on other traffic.

6. The Plan states in para 4.6.24, that ‘journeys will be rapid and reliable by bus and safe and direct on foot and by bike’. The ability to deliver rapid bus services in peak periods has not been demonstrated. There has been no quantification of the potential demand to use the SMC. Securing funding from the Local Growth Fund requires an economic justification.

Bus Transport

7. There are two projects in the Plan relating to buses. The first is labelled ‘New Guildford town centre bus facilities’. This is essential and the absence of a site for a bus station in the Plan is a serious weakness. Delivering a focus for town centre bus services and the SMC surely should be a key feature of town centre planning. The improvement of bus connections to the station is also needed.

8. The second project is for bus/rail interchange at Effingham Junction station (or Horsley) is desirable if the Wisley Airfield development proceeds.

Active Modes

9. The schemes listed are welcomed.

Rail

10. There six projects listed in the Plan of which four will be delivered by Network Rail as part of their investment programme. The other two are the new stations, Guildford East and West, which will increase rail access to development sites, and the hospital in the case of the West station, and are to be welcomed for that reason.

11. The Plan does not deal with the fact that the Portsmouth/London main line is extremely busy in peak periods. Commuters from Guildford to London frequently have to stand, and this is in spite of longer trains having been introduced. Capacity is limited in the area between Surbiton and Waterloo and this is the focus of Network Rail investment (project NR5) that is scheduled to start in 2029. The growth proposed in the Plan for Guildford will undoubtedly mean more people will want to commute, adding to pressure on the congested services, in the period before the frequency of services can be increased.

**Policy D1: Making better places**

There is much to be welcomed in this policy and text.

4.5.5 and 3.5.6 We need a Local Plan Development Management Policies Document urgently. We will be vulnerable without development control and design policies in place. Can relevant policies in the 2003 Plan be saved, at least to fill the gap?

The policy to “provide convenient and safe routes through the development and to nearby areas for pedestrians and cyclists” is particularly welcome given experience of developers failing to provide this.
We warmly welcome the addition of promoting green approaches to 4.5.8 which reads “The relationship of the built environment to the landscape must be taken into account and the transition from urban to rural character will need to be reflected in the design of new development with the green approaches to settlements respected.”

However, this approach should go beyond respecting to promoting. We propose that green approaches – both soft green edges to settlements and greenery along roads into settlements - are such a valued, distinctive feature of Guildford that this should be in the policy itself to guide developers. For example, “green approaches to settlements and” could be inserted after “with” in the following:

“All developments will:...promote and reinforce local distinctiveness to create a sense of place, with green approaches to settlements and innovative architecture encouraged and supported in the appropriate context.” We suggest “and supported” is superfluous.

Green approaches to settlements are just as important as innovative architecture in Guildford. Promoting green approaches is a dynamic concept not a brake on development. It affects how you do things and applies equally well to the design of settlement extensions and to managing change in established areas. We rely so heavily on green approaches to shape change for the better at inquiries and when responding to applications. It will become more important during a period of growth if we want to retain the qualities that distinguish Guildford and prevent it being a “could be anywhere” town.

Monitoring Indicators

Again we are concerned to avoid perverse consequences, with the possibility of reluctance to refuse due to poor design to avoid the risk of unsuccessful appeals.

Object: seeking improvements

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E7: Guildford Town Centre

“a new retail-led, mixed-use development of 45,000 sq m (gross) of additional comparison goods floorspace on the North Street regeneration site within its primary shopping area.”

We question the wisdom of expanding retail floor space on this scale given the demand from competing priorities in our constrained town and given the need to ensure resilience for the high street in the face of trends in retailing.

“approximately 1,172 new homes, particularly on upper floors as part of mixed use developments;”
Homes should not be confined to upper floors and care needs to be taken to ensure development heights are stepped to reflect the rise of the land. Extensive residential storeys, all on one level on top of large retail units, should be avoided.

Vision

The objective of giving pedestrians priority needs to be qualified. The extent of pedestrian areas needs to be tempered by the reality that Guildford is a crossing point in the downs and that its geography is not amenable to a ring road strategy that normally accompanies extensive pedestrianisation. If central roads are closed to through traffic, vehicles will be displaced to more residential and rural roads with unacceptable consequences. Further, steep slopes mean there is a requirement for access to transport along the length of the main shopping streets to help those who cannot cope with the gradients. This means you cannot adopt an approach of bus stops around the periphery of the retail area with no central interchange.

Object: See comments on questions 1 and 3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H1: Homes for all

4.2.1 We question the wisdom of adding you want to meet “demand”. For example, there has been demand by foreign investors for homes to be bought as an investment and left vacant.

“Development that results in the net loss of housing or specialist housing, including sites allocated for housing within the Local Plan will not be permitted.”

This should be qualified with “normally”. It will be necessary to be able to make adjustments to the number of homes given permission “in principle” or in outline where a site survey shows that the envisaged number of units cannot be accommodated without causing unacceptable impact (eg space is needed for sustainable drainage). Also, within the context that some town centre properties are changing from business to residential, it may be appropriate to make some changes from residential to business. In some instances, it may not be inappropriate for a house in multiple-occupation to be reinstated as a family home.

Density- Policy and Justification

We strongly welcome this approach with an overall presumption and decisions taken on what is appropriate on a case by case basis. This has been a game changer in enabling positive schemes in Guildford. Previous targets were too blunt to be
useful having no relevance where higher densities could be achieved and driving harmful schemes and avoidable appeals in those instances where a lower density was appropriate.

Students

“We expect 60 per cent of the University of Surrey eligible student population (full time equivalent) to be provided with student bedspaces and accommodation on campus.”

This percentage is far too low given the mix of pressures on Guildford as a university, London commuter belt and constrained gap town. We have a thriving University that is an engine for our economy and also for population growth. With that comes responsibility. We ask the University to provide far more campus accommodation making it attractive so 80-90% of their students will want, and expect, to live on campus. This will free up much needed affordable homes in the town. (See comments on Soundness and Annex 3)

Object: seek changes and inadequate

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy I4: Green and blue infrastructure

We welcome this policy.

We propose that “slow the flow” and sustainable drainage schemes, intended to reduce flood risk, should be considered as also contributing to blue green infrastructure due to their wider benefits.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/18098  Respondent: 8556385 / Guildford Residents Association, EGRA (Amanda Mullarkey)
Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy P1: Surrey Hills Area of Outstanding Natural Beauty (AONB)

We very warmly welcome improvements to this policy which better captures the importance and value of the AONB.

We further suggest the following clarifications to avoid ambiguity:

- It is most important that “promote its enjoyment by the community and visitors to the area” specifies “enjoyment of its special landscape qualities”.
- After “proposals will be assessed on their individual merits, add, “as to whether they are consistent with conserving and enhancing the special landscape qualities.”.
- The text should note that potential AONB will be based on landscape assessment by Natural England on behalf of the Minister and may include land not currently designated as AGLV.

We suggest the monitoring indicator is inappropriate. It should track absence of major development (which is in principle harmful to the statutory purpose even when deemed in the public interest) not avoidance of appeals. The currently proposed indicator could encourage the perverse behaviour of avoiding appeals.

Object: seeking improvements

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S1: Presumption in favour of sustainable development

We appreciate that this is model wording. However, experience since this was first produced now shows that this wording is inadequate to communicate accurately to users of the Plan:

1) the concept of sustainable development including the five guiding principles
2) the policies in the NPPF as a vehicle for achieving sustainable development
3) the positive presumption in favour of sustainable development,

While fully appreciating that it is important the Local Plan does not duplicate the NPPF, the reasoned justification could usefully clarify the three components of policy S1.

Object: inadequate, unclear

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2: Planning for the borough - our spatial development strategy

“4.1.6 Our preference is to focus growth in the most sustainable locations, making the best use of previously developed land (including in the Green Belt if appropriate). “

Need to be clear that in Green Belt openness is the determinant. Hence, previously develop open land should not be preferred.

“4.1.8 Whilst these sustainable locations are our preferred locations for new development, they are unable to accommodate all of the new development we need. We will therefore release allocated land for development in other areas. “

This policy sequence moves too readily to allocating green field sites and omits to encourage efficient use of previously allocated land or initiatives to assemble brownfield sites. This reflects weaknesses, until recently, in the Council’s own approach. There is a risk the policy as drafted will also encourage developers to turn too readily to greenfield sites rather than to engage in redevelopment initiatives.

There are errors in the development need identified and the harmful consequences of meeting need have not been weighed in an appropriate assessment.

“13,860 new homes,” The OAN on which this is based is exaggerated.

“4.1.10 This is a higher level of development than experienced in Guildford borough during the previous Local Plan period, and represents an increase in new homes and employment floor space in line with the aims of NPPF, NPPG, our Economic Strategy, and the best available information on the likely levels of development required by 2033.”

Constraints have not been applied arising from an assessment weighing meeting needs versus harm. Need is exaggerated.

“4.1.12 Table 1 shows a number of new homes that is greater than the figure in the policy. This is to build flexibility into the plan and demonstrate that our strategy is capable of delivering the target. Further details of these and other sites are provided in the site allocations policy of the Local Plan.”

It in inappropriate to designate more land than required given the constraints.

Monitoring Indicators

There is no indicator to track the location of development and the objective that overall brownfield land will be developed first.

Object: departures from Green Belt policy including purpose 5, housing figure based on inaccurate and flawed assessment of need

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

GRA Comment: Key parts of the evidence are missing, flawed or based on withheld assumptions. The Strategic Housing Market Assessment overstates housing need, the Green Belt and Countryside Study uses a flawed approach and the Transport evidence is too late and incomplete to be relied upon to inform the Plan.

Strategic Housing Market Assessment

The “objectively assessed need” figure of **693 homes a year is too high**.

A professional review by NMSS (see Appendix 1) has concluded that, even basing the calculations on a period of stronger economic and student growth, **the housing need figure should be revised down to 510 homes a year**. It also advises the SHMA method should be changed to consider student housing need separately due to the distorting effect of students on the overall Objectively Assessed Need (OAN) forecast.

The current SHMA inflates the proposed housing figure due to

- failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability, and
- flaws in the method for estimating the number of homes needed to support job growth.

The SHMA needs to be revised, and the proposals based upon it reconsidered, before the Plan can be viewed as ready for submission to an Inspector. In addition, an immediate start should be made on calculating student requirements separately using a consultant with appropriate expertise. It is probable this exercise will reduce the OAN.

Revision of the SHMA to take account of the consequences of the vote to leave the European Union has been proposed by a number of consultees and the Council leader. The NMSS SHMA Review makes an important contribution to the way ahead in several respects by showing that:

- even with a relatively strong pre ‘Brexit uncertainty’ economy, and using a stronger trend period than the one used by GLHearn for migration flows within the UK, the GLHearn OAN figure was too high.
- simply making a few post ‘Brexit uncertainty’ adjustments to economic and demographic need, as currently calculated by GLHearn, would not be an adequate response because their approach to the economic data is flawed and they have not corrected for large errors in the historical data on international migration,
- student flows should be better understood and separated out to avoid distortion of the forecasts and, especially given the significance of flows of international students in Guildford, separate modelling of the student population will become more significant in future.
NMSS has advised that the new projections issued on 12 July 2016 should make little difference in Guildford as the household formation rates on which they are based are not significantly different from the 2012-based set.

It is most disappointing that demographic and economic model assumptions have been withheld by GLHearn so that the whole process cannot be cross checked. This means the OAN taken from their SHMA cannot be substantiated.

**Green Belt and Countryside Study**

This does **not value appropriately the “fundamental aim”** of Metropolitan Green Belt or look strategically at options for developing instead in major settlements beyond the Green Belt.

- The way Green Belt is parcelled up and scored is invalid: serving 2 Green Belt functions well is as legitimate as serving 3 to 5 functions. The Green Belt sensitivity analysis is not a valid basis for informing decisions. Eg It could be argued the sweep of open countryside rising up Gosden Hill, as you approach Guildford along the A3, is highly prized. So too is the role of Green Belt in preventing urban sprawl towards the Hog’s Back.
- Proposed removal from the Green Belt of a number of relatively small sites where development of an exceptional nature has taken place, plus adjoining land, has lost sight of the scale at which Green Belt is effective.
- Assessment of which villages to take out of the Green Belt does not adequately consider that villages contribute to the openness of the Green Belt as seen from surrounding AONB.

**Transport Evidence**

This has been produced very late and is incomplete and untested to the extent that the Plan is not ready for a Regulation 19 consultation.

- It is emerging that the **Strategic Highway Assessment** shows there will be congestion, even with all the highway schemes in the Plan. Many questions remain unanswered. We assume various inconsistencies are errors (eg 1000 homes on Slyfield generating no extra traffic). More information is needed to understand how much congestion will occur, and where. This has not been provided in time to inform Plan proposals or responses. The analysis points out problems across the network and does not support the claim that the highways network can accommodate the additional demand arising from the Plan.
- The available evidence shows that the **Sustainable Movement Corridor is in a preliminary stage of development.** The information provided indicates that it cannot achieve its intended objectives along much of its route due to narrow roads and pinch points. The original concept has had to be diluted and impact on other routes, demand and an economic business case are required. The very concept of a single linear route as appropriate for Guildford is unproven.
- Evidence on bus travel is fundamentally compromised because **no clear and workable location for a bus interchange** is proposed.
- No information has been provided on the demand for and capacity of rail services. The main line to London is already extremely busy in peak periods.
- Information about the **town centre** as regards traffic, buses and parking is lacking in the Plan. The Plan does not address the traffic issues in the town centre. The Council has announced its intention of implementing the Town Centre Master Plan which includes making better use of the asset of the river. We submit that the Plan should include the protection of a route for a new bridge connecting the east and west parts of the town across the railway to maintain accessibility and to provide greater resilience in this key part of the road network.

For more detail refer to Appendix 2.

[Please Note: Additional transport information has been requested which it was not possible for Guildford BC and Surrey CC to provide in time for this submission. A list of the relevant questions has been submitted. GRA wishes to reserve the right to follow up aspects of this submission where lack of transport information (data or model assumptions) or absence of clarification leads to gaps or errors in analysis and observations.]
Guildford Retail and Leisure Study

This is an improvement but the credibility of the case for massively expanding retail space is undermined by trends in retailing and by the repeated failure to implement the North Street development. The economic value of the green and historic character of Guildford is not adequately considered.

Air Quality and Noise

NO2 emissions need careful monitoring in view of some sites being close to limits, revised estimates of premature deaths, issues with vehicle emission controls and misplaced optimism regarding congestion. Traffic noise from the A3 should also be reported.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

GRA Comment: The Plan preparation process has had inadequate regard for national policy which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

Green Belt

It is unacceptable to treat Green Belt as a readily available source of development land during Plan preparation, notwithstanding that this is the time when any boundary review deemed necessary takes place. Any such review should be mindful of the “great importance”, “openness” and “permanence” of Green Belt and take a long term perspective towards this planning mechanism.

The Mayor of London intends to respect London’s Green Belt boundary.

The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level. Releasing Green Belt to fund infrastructure (eg “support delivery of A3 junction upgrades” or “facilitate delivery of new strategic infrastructure including a rail station, park and ride and a secondary school”) or to fully meet exaggerated need does not pass this test. Nor does building on open, previously-developed Green Belt.
Opportunities to channel development towards locations beyond the outer Green Belt boundary, linked to sustainable transport and the duty to cooperate, have not been adequately considered at a strategic level. This assessment should involve more than just looking at a small area of countryside within the borough immediately beyond the Green Belt boundary, or indeed the rather meaningless Housing Market Area.

In view of the extent of the Area of Outstanding Natural Beauty, Special Protection Area and Green Belt in Guildford Borough, which restrict the availability of land suitable for development, it is important that the potential for sustainable travel is considered. This needs to be balanced against the option of minimising distances between work and home which is usually treated as a more sustainable approach.

It is not credible to suggest the Green Belt is being treated as permanent when its boundary was changed as recently as 2003 as part of the last Local Plan review. Indeed, land released in 2003 is neither fully developed nor efficiently used. An approach of eroding the Green Belt at each Local Plan review without considering the bigger picture is not sustainable. Proposed erosion of Green Belt to development and “insetting” in this Plan should be put in the context of cumulative loss. Since the Metropolitan Green Belt was established, just over 6% has been lost (6.24%), noting that a modest proportion of Green Belt lost to “insetting” will be protected as open space in villages.

If there is a case for Green Belt development, this would need to have been proven through the application of policy. In addition, careful thought would need to be given to the pace at which Green Belt is developed using a long term reserve site approach. It would be unsustainable to release all potential last resort greenfield options within one plan period, denying future generations any such options.

The Green Belt and Countryside Topic Paper refers to the issue of Green Belt safeguarded for development. It suggests in paragraphs 4.64 to 4.71 that the Plan will not safeguard sites for future development because so little land can be identified and more strategic solutions will be required. It concludes that any further Green Belt development would result in ribbon development, a stretched urban area and merging of villages with the urban area*. In view of the fact that such ribbon development would be wholly unacceptable, the more strategic approach referred to in paragraph 4.70 is required now. The current Local Plan review should both constrain the overall scale of development in this Plan and also very carefully pace any releases deemed necessary over several generations.

---

*4.68 “Given the limited central ribbon within which development could potentially occur, safeguarded land in Guildford would result in an unsustainable pattern of development. It would create an oblong-shaped urban area...”

4.69 “there will inevitably be a limit to the extent that Guildford urban area can expand before it would begin to merge with surrounding villages. This would have a detrimental impact on the character of the countryside and our rural communities.”

4.70 “…a more strategic approach to growth or protection will need to be considered, in cooperation with our neighbours.”

**Sustainability Appraisal**

The extent to which the current Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way casts doubt over whether sustainability has been assessed. The report

- accepts the Council’s corporate objectives, which have not gone through proper consultation, as consistent with sustainable development when this has not been tested,
- treats various major development sites in Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”,
- fails to consider options that constrain development or that make greater use of brownfield or previously-released greenfield land,
• focuses on a range of options that involve developing on even more Green Belt around Guildford in order to protect countryside around Woking
• does not consider environmental limits or impact on the next generation in terms of weighing demand for homes alongside the use of all possible last resort greenfield options by one generation.

The National Planning Policy Framework requires that objectively assessed needs should be met unless:

• “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole;
• or specific policies in this Framework indicate development should be restricted.”

The specific policies described include several of particular relevance to Guildford including sites protected under the Birds and Habitats Directives, Sites of Special Scientific Interest, Green Belt, Local Green Space, Area of Outstanding Natural Beauty, designated heritage assets and locations at risk of flooding. In this situation, we do not consider it appropriate for the Appraisal to rule out not meeting needs in full from a sustainability perspective.

Notwithstanding that the Sustainability Appraisal should be proportionate, realistic, strategic, and look at significant matters, the assessment appears deficient and biased in the spectrum of alternatives it considers to the point that it is questionable whether it meets the requirements.

We note that the Government’s Local Plans Expert Group has advised (March 2016) that “Whilst we recommend significant reductions in other elements of the local plan evidence base…, we propose that a proportionate Assessment of Environmental Capacity should be an important part of plan making.” The group confirms that “Objectively assessed needs for all types of development are the starting point but it is then necessary for the authority to consider the extent to which the plan can meet those needs consistently with the policies of the Framework.” They continue, “Despite the clear test set by paragraph 14 of the NPPF, few authorities compile an assessment of the environmental capacity of their area, making it difficult for Planning Inspectors to apply the NPPF policy”. They go on to say “We recognise that the NPPF does not require authorities to meet the full identified need for development in all circumstances, even within the Housing Market Area, if there is insufficient environmental capacity but we encountered significant uncertainty about how the appropriate balance should be struck. We make recommendations to remove that uncertainty and to confirm the legitimacy of applying the tests set out in the NPPF to ensure that needs are met up to the point where the adverse effects of doing so can be shown to outweigh the benefit of meeting the need.”

An adequate Sustainability Appraisal, which considers environmental capacity alongside social and economic aspects of sustainable development, should enable reasonable alternative scenarios to be tested against environmental capacity. We suggest the alternative scenarios selected in the current Appraisal, ranging from fully meeting exaggerated need to also meeting all of Woking’s need that would be unmet due to the application of constraints, did not test a meaningful spectrum of options. Indeed, it seems bizarre to place such emphasis on developing Green Belt in Guildford to protect countryside in Woking.

The Expert Panel was concerned at the number of authorities that cannot demonstrate soundness because they have constrained development without adequately testing the point at which adverse effects of meeting need can be shown to outweigh the benefit of doing so. The concern is that Guildford has gone the other way: it has been so eager to get the Plan through that it has failed to give sufficient weight to harm to the environment from fully meeting need, such that it proposes an inadequately tested option that would constitute unsustainable development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

GRA Comment: It is unsound and unsustainable to develop on the scale proposed. The overall housing target (13,860 new homes) and 40% increase in retail space should be reduced to take account of the constraints of our gap town and growth in online retailing. Opportunities to provide greater accommodation on campus for university students, to provide more homes as part of the North Street development, to plan the river corridor achieving flood risk betterment, to promote sustainable commuting and to open up access across the railway for our physically divided town have not been considered positively.

We do not consider that the proposed housing target of 693 homes a year is soundly based, notwithstanding the intention that this should be skewed to later in the Plan period or the aspiration that this should be linked to timely delivery of infrastructure. We are also concerned that a target of “about 695” homes a year and a focus on strategic sites in the Green Belt were suggested very early in the Plan-making process and we would be concerned if the Plan had been prepared around these working assumptions.

Green Belt and Sustainability

The Council’s case set out in the Green Belt and Countryside Topic Paper paragraph 4,62, is as follows: “We consider that in general terms there are exceptional circumstances that justify the amending of Green Belt boundaries in accordance with the NPPF, paragraph 83. Our evidence base identifies a high level of need for market and affordable housing (including traveller accommodation) and employment. Given the extent of Green Belt across the borough (89 per cent) and the lack of sufficient suitable and deliverable sites located outside the Green Belt, to not amend boundaries would lead to a significant undersupply of homes compared to the identified needs – approximately half. The consequences of this within Guildford would be to exacerbate the existing affordability issues and have an adverse impact on economic growth in the area, which would lead to unsustainable commuting patterns. Each addition or removal to the Green Belt is also separately considered above and in the Housing Delivery topic paper.”

We do not accept this assessment.

- The NMSS SHMA review indicates that the evidence base exaggerates the level of housing need and that the employment housing need assessment is flawed. Increasing housing supply beyond the level suggested by the demographic OAN would not have a discernible effect on affordability but simply mean more people who can afford high prices moving to the area.
- We submit that the economic need should be tested on a sector by sector basis and that the priority given to retail expansion should be questioned.
- Suitable deliverable alternatives, such as significantly increasing campus accommodation, thereby freeing up homes in the town, and provision of more homes on North Street in lieu of a 40% increase in retail, have not been pursued.
- Options for meeting revised need in larger settlements beyond the outer Green Belt boundary linked to sustainable transport have not been fully explored.
- The option of not fully meeting needs in recognition of constraints, including Green Belt, has not been balanced against the positive and negative consequences of fully meeting need (as revised) as should happen in a meaningful Sustainability Appraisal that takes account of environmental capacity.
- Commuting by sustainable means, especially in the context of the current high levels of inward- and outward-commuting, should not be dismissed as an unsustainable option in all the circumstances.
- It would be irresponsible and unsustainable to use up all potential least-worst, last resort Green Belt sites within one plan period.
- High-added-value, knowledge-based businesses and homes should be given priority over expansion in retail land.

Constraints
Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and sewer flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach. High rise buildings would be inappropriate due to the important contribution views and the rise and fall of the land make to both urban and rural character, including the nationally significant Surrey Hills AONB. The river and railway divide the town and there are too few crossing points; a further constraint. Air quality and traffic noise are not insignificant considerations in some locations.

The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. GRA considers it would be harmful to rural, suburban and urban character, quality of life and the economy of Guildford not to reduce the new housing units delivered by 2033 to a number significantly below 13,860. We submit it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to develop on the scale currently proposed. We are concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site.

Transport infrastructure is also a constraint. Current congestion is severe by any meaningful definition and there is a backlog of infrastructure investment. Assessment of the very late and incomplete transport evidence by expert, Richard Jarvis, using the information made available to date, indicates that the overall effect of completing the proposed schemes and development in the Plan would be congestion to a level that makes it hard to conclude that the test in paragraph 32 of the NPPF is passed. See extract below and Appendix 2. Any notion that building 13,860 homes is going to deliver infrastructure that will overcome Guildford’s traffic problems seems misguided.

“The cumulative effect of the additional traffic generated by the developments in the proposed submission local plan will be to increase congestion, even with the proposed highway schemes in place. More detailed analysis of the junctions and queuing is required. So we question the conclusion that the developments would have “an acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF”.”

“The mitigation proposed is not sufficient to overcome the problems that will be caused by the level of growth in the proposed submission local plan. Congestion will worsen. The network will lack resilience and be vulnerable to disruption due to incidents. Minor roads will have to cope with a lot more traffic (47% more than in 2009), for which they are unsuitable. “

In view of the extent of physical constraints, protective designations and congestion, it is likely that even a more accurate, lower OAN housing target would need to be constrained.

We submit that Guildford BC should:

- revise the SHMA to make corrections and to better account for student need
- undertake a proper assessment of constraints, informed by a strategic Green Belt review and a Sustainability Appraisal that tests environmental capacity and considers meaningful alternatives to establish an appropriate balance between adverse effects and fully meeting (revised) need
- test the transport evidence that should inform the plan and which points to congestion.

Any housing figure adopted in the context of considerable uncertainty would need to be kept under regular review.

If any land releases were deemed necessary following a rigorous, strategic and accountable approach to Green Belt review, these should be measured and paced, arising from a robust assessment of the balance between benefits and adverse effects, taking full account of environmental capacity.

Guildford has not currently provided the evidence to derive a housing figure arising from such a process. It is notable that Woking has proposed constraining its OAN by 50%.

In Guildford, if one uses a revised OAN of 10,200 over 20 years (510pa) and assumes no Green Belt development and that 50% of need can be met through positive initiatives in the town, this results in a target of 255 homes pa which would be below the previous target of 322pa. This reinforces the extent to which Guildford is constrained. This would be broadly
consistent with the urban capacity assessment undertaken for the last Surrey Structure Plan and with the concern about the risk of town cramming in Guildford identified in the SE Plan.

If one uses a revised OAN of 10,200 over 20 years (510pa) and assumes 20% of all last-resort Green Belt land is released to development in each of the next three Plan periods, this results in a target of 340pa for the current 20 year Plan period.

More strategic solutions, such as development beyond the Green Belt linked to sustainable commuting or a tunnel for the A3, are required now. They cannot be left until the next Plan period as proposed.

**Neglected Opportunities**

A more sound and sustainable approach to planning positively in Guildford should include greater emphasis on the following:

- **Campus accommodation:**

  Higher priority should be given to providing attractive campus accommodation so a very high proportion of university students will want to live on campus thereby freeing up affordable homes in the town. Significantly, this could deliver homes within the challenging first five year period of the Plan.

There has been some late progress towards meeting the modest 60% student accommodation target agreed in the previous 2003 Plan as a result of residents expressing concern at the lack of progress in meeting the undertakings. However, the opportunity to increase significantly the proportion of university students attracted to live on campus has not been pursued. Neither nostalgia by decision makers for student days spent living in shared houses in the town, nor eagerness by the University to support a case for development on Blackwell Farm, should deflect attention from the opportunity to free up homes in the town for use by others. Nor is it adequate to reject the possibility of increasing campus accommodation by saying the percentage is at the higher end compared with other tertiary institutions or to be sceptical about uptake and funding. We need to plan positively to find sustainable ways to sustain a thriving university in a constrained, commuter belt gap town.

Appendix 3 provides more information on the opportunity.

- **Flood risk:**

  Higher priority should be given to work on integrating flood risk management and development in the town centre. The 2014 Draft Local Plan failed to include a Flood Risk policy and was not informed by a flood risk sequential test or Level 2 Strategic Flood risk Assessment. Subsequent application of the necessary tests has resulted in some residential allocations being removed and some zone 3 non-residential allocation proposed under the exception test.

Overall, progress has been painfully slow in planning positively along the river corridor in a way that achieves flood risk betterment and also enhances the natural and built environment. Time was lost with a first iteration Town Centre Master Plan that paid insufficient attention to the significant flood risk. The margin required for climate change reinforces the importance of factoring in flood risk and moving away from the old approach of seeking to justify development in even the functional zone 3 floodplain.

- **Sustainable commuting:**

  Far more attention should be given to the potential for enabling sustainable commuting recognising that Guildford has a high-value-added economy in a constrained gap town location. Rather than destroying the qualities that underpin the town’s economic success by overdeveloping, the scope for making it easy and affordable to commute by sustainable means from less constrained settlements should be pursued as a priority, both for the short and long term.

The context is that levels of both inward and outward commuting are extremely high. Almost half the working population commutes out to work and almost half of the workforce commutes in. In many households, occupants work in different locations and people do not necessarily move when they change jobs. In 2001, more people commuted out to Rushmoor than vice versa and more commuted in from Waverley than vice versa.
In a Guildford context, the aspiration that more people should live where they work needs to be balanced with other sustainability considerations.

- **All-direction, central bus interchange:**

Failure to identify a central location, and to allocate appropriate land, for an attractive all-direction bus interchange in the town is a grave failing that undermines the soundness of the Plan and should be addressed as a matter of urgency. A central interchange is needed in view of levels of congestion, the gradients involved in town centre journeys, the limited options for crossing the railway and river, and the need to provide sustainable transport options to support complex commuting and travel patterns.

- **Town centre plan:**

**Better progress, and a more joined up approach, in town centre planning is required.** The slow pace has meant opportunities for coordinated brownfield development are not available as part of this Plan. The need to have brought forward town centre options in a timely way should have been foreseen. Guildford had already used up its green field sites within its Green Belt boundary by the time of the 2003 Local Plan.

It is a problem that Guildford BC has chosen to tackle the town centre after the Plan via an Area Action Plan in which it intends to incorporate Scenario 2 from the Allis & Morrison /Arup proposals that will reduce highway capacity in the centre. This prevents joined up planning. For example, the Plan should face up to the implications of constraints being applied to roads such as the A281, A31 and A322.

- **New cross-town road bridge:**

An additional bridge over the river and railway is required to improve connections across the railways and river for our physically divided town. We want to see the townscape improved, with better use of the river. Achieving this, while maintaining accessibility, will be much easier with a new crossing.

**Sustainable Choices**

Given the scarcity of land arising from being a constrained gap town, the Plan should consider a wider range of sustainable strategies than simply expanding across the board.

- **Balance between retail expansion and town centre homes**

The Plan should weigh the case for a 40% increase in retail space, especially given trends in internet shopping, with the opportunity to provide accessible and sustainable town centre homes. Increased town centre housing provision for the elderly could also have the beneficial knock-on effect of freeing up existing family homes. All types of town centre housing would help support the evening economy.

The wisdom of such massive retail expansion, on top of already generous retail provision, needs to be challenged in view of the fate of the high street in many places. The mix of homes and retail, with its relatively low added-value, in the North Street development should be reconsidered. Residents were dismayed that the Bellerby theatre site was used for yet another supermarket rather than primarily homes.

- **Balance between high-value-added, knowledge-based economy and retail expansion**

Similarly, the mix between land allocated to the high-value-added, knowledge-based economy in the town and to retail expansion should be carefully reviewed. Knowledge-based enterprises yield returns between 3 and 4 times greater than retail.

**Planning ahead**

In order to deliver sustainable development, it is important to plan ahead. Sites for entrances and, in the shorter term construction areas, for an A3 tunnel through Guildford should be safeguarded. Land should also be allocated for more immediate projects such as an additional crossing over the railway for local journeys.
We welcome the approach adopted by local councils in Surrey of working together based on Memoranda of Understanding, although we note that neighbouring Waverley has not signed.

We are concerned that the Strategic Housing Market Area is not meaningful and omits nearby communities in Hampshire, such as Rushmoor, that are very important for planning housing, employment and transport in Guildford. Further, a strategic approach to Green Belt planning and commuting requires cooperation with more distant communities with transport and economic links. Aldershot, Frimley and Portsmouth are all relevant to Guildford.

Within the somewhat arbitrary Strategic Market Area, differences in approach have a distorting effect, as seen in Guildford’s Sustainability Appraisal.

Several large developments are proposed in neighbouring Plans that would have a very significant effect on Guildford and it is of concern that the impact of these has not been specifically addressed as part of Guildford’s Local Plan process.

There is no discussion in the transport papers about the traffic generated by Dunsfold or Cranleigh wanting to use Guildford’s roads. For example, the A281 is forecast to be far over capacity at Millbrook. Guildford BC is saying, in its views on the Town Centre Master Plan and the Transport Strategy, that it wants to opt for Scenario 2 which means a reduction of say 30% in capacity. So what will happen to traffic from Waverley that wants to go to the hospital or University? Will it try using the B3000? This does not appear to have been thought about.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Guildford Residents Association (GRA) has

- engaged positively in the Local Plan process from the outset,
- agreed “Aspirations for Guildford” and Local Plan consultation responses with the support of 26 Residents Associations and four Parish Councils,
- encouraged and supported residents to participate in the Plan-making process
- through contributions from residents groups, raised funds to commission an expert to review the SHMA, and
- drawn on the knowledge of environmental, planning, engineering, flood risk management, economic, commercial and transport experts to inform its contributions.

GRA does not consider the Plan to be sound for the reasons set out and we wish to make the case for changes we consider necessary to achieve this. These concerns, which relate to the overall approach, manifest themselves in policy throughout the Plan. Hence, our interest is overarching rather than confined to specific issues.

We would like to participate in all matters at the inquiry on behalf of the many residents who have worked together to establish a collective voice through the GRA. We would also like to be accompanied by an expert witness for the SHMA and for transport-related matters.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Residents wish to register concern and disappointment at the poorly judged decision to produce, promote and spend public money on a film to represent the views of “some residents”. A number of those “residents” represent institutions that have interests in proposed development that were not declared. There was no attempt to achieve balance. The film was inconsistent with the fair approach proposed in the Statement of Community Engagement. Use of the video on the Local Plan homepage could bias the Regulation 19 consultation. The suggestion that housing proposed will make a material difference to affordability or that congestion will be solved by development is to be tested. Indeed, the traffic evidence was not available when the video was produced and some of the data needed to assess congestion is not yet available.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Our vision and ambition

Strategic Objectives

“To deliver sufficient sustainable development that meets all identified needs.”

The wording should be refined. No service provider “meets all identified needs”. As expressed this is not sustainable development.

“To protect those areas designated as Thames Basin Heaths Special Protection Area, Special Areas of Conservation, Sites of Special Scientific Interest and Areas of Outstanding Natural Beauty for their biodiversity and landscape characteristics.”

An appropriate reference to Green Belt is required in line with the importance Government attaches to this.

An objective relating to being resilient to flood risk and climate change should be added.

“Reinforce Guildford’s role as Surrey County’s premier town centre destination whilst protecting and enhancing its cultural facilities and heritage assets.”

Wording should be refined to reflect the importance of adapting to technology-driven changes in retailing. We should signal this does not necessarily mean bigger is better. Premier is an odd word. Sustainable success is more important.

Key facts about the borough

The changes to paras 2.13, 2.14a, 2.14b and 2.15 are welcome. In para 2.15, the text now says that there are opportunities improve the capacity of the road network, rather than performance. This is more realistic and fits with the plans. However it does not match the ambition of the Transport Strategy to ‘address the historic infrastructure deficit’.

Reference to the extent of commuting, a notable feature of the borough, should be reinstated alongside the infrastructure references.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The policy itself should include promoting “green approaches”, which should apply to arterial routes into and through settlements not just to the outer edges of settlements. This feature is part of local distinctiveness in the borough.

The proposed monitoring target does not work. It will have the perverse consequence of discouraging opposing insensitive development to avoid appeal. Suggest annual assessment of indicators by a borough design panel.

If there is a desire to avoid duplication and bring all design, density and character policy into one place, it is suggested the sequence is changed so D4 becomes D 2. This would assist a user of the Plan to follow the logic more clearly. The linkage between D4 (as currently labelled) and D1 should be made clearer. The expectation larger schemes will apply both policies should also be clearer.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Even with the revisions, we question the wisdom of expanding retail floor space on this scale given the demand from competing priorities in our constrained town and given the need to ensure resilience for the High Street in the face of trends in retailing.

The retail allocation for North Street has not been reduced sufficiently to accommodate the desirable increase in housing. Six storeys along North Street, as required to achieve the proposed quantum of mixed use development, would have a harmful effect. The retail element should be reduced further, shops developed along North Street, a bus interchange retained and the potential for some flexible high tech business space considered.

Our previously stated concerns stand.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Net Loss - We oppose the proposed changes to H1 (2) as too inflexible. Exceptional circumstances will arise.

Density - We oppose the deletion of the section on density although we considered the last sentence on the town centre to be superfluous. We consider this section worked well as part of a policy that also looks at the range of types of home needed. The approach of an overall presumption in favour of efficient use of land and decisions taken on what is appropriate on a case by case basis has been very helpful locally in enabling positive schemes in Guildford. Previous
targets were too blunt to be useful having no relevance where higher densities could be achieved and driving harmful schemes and avoidable appeals in those instances where a lower density was appropriate.

Student Accommodation – We oppose the proposal that only 60% of “full time Guildford based” students should be on campus rather than of all students. In practice, this means far fewer than 60% which is already far too low given the challenges of identifying acceptable sites in Guildford. Change in this policy to at least 80% on campus would make a significant difference to affordable housing availability for others in the town and could transform Guildford’s ability to meet its housing need in the first five years.

Paragraph 4.2.3 This break down cannot be ‘known from the SHMA’ given the demographic and economic need errors.

Paragraph 4.2.8 We oppose deletion of this text which enables developers to appreciate the links between housing type and density when identifying an appropriate mix for a site. It supplements the NPPF well.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
4.6.18 We are troubled reference to an A3 tunnel beyond the Plan period has been deleted and that land is not safeguarded for entrances or works areas.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The change from ‘will expect’ to ‘will be required’ in point (2) is supported. The similar revised wording in point (7) is also supported.

The lack of specificity about the Sustainable Movement Corridor makes it difficult to make an informed comment on point (3).

It is very likely that the claims made for the SMC exceed what can be delivered, and the plan should be based on realistic forecasts and a sound business case.

Para 4.6.24 states the aim and means of implementing the SMC. The provision of the corridor should be ‘subject to a sound business case’.

We oppose the very open-ended new policy on new public car parks without assurances on design and character or clarity on whether this relates to expansion of existing or conversion from another use. Interceptor car parks could be close to residential areas or landscape features and not all sites will be suitable. They could require careful siting and design.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The introductory text has improved a little but the policy itself remains inadequate and lacks the joined up thinking required. The policy launches straight into “biodiversity” obligations.

We welcome the proposed SPD to set out opportunities and shape delivery of integrated multifunctional Blue Green Infrastructure.

We propose that “slow the flow” and sustainable drainage schemes, intended to reduce flood risk, should be considered as contributing to blue green infrastructure due to their wider benefits.

The addition of 4.6.49a is out of place here. It puts inappropriate focus on a specific proposal. It is already covered by national policy so an application can be considered with reference to this. Planners are well placed to balance and weigh different policy objectives when considering any application where the public interest requires a trade-off. Once you start referring to specific proposals in plan policies, where do you draw the line? Legitimate transport or health or flood risk management needs?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We welcome inclusion of AGLV and the clarification of this policy apart from two issues:

• the addition “as designated on the Policies Map”. Natural England is the designating body not GBC and it has emerged that there are errors in the boundary used by GBC in the 2003 Local Plan. We propose deletion of this reference or reference to the statutory map.
• the need to add “and views” at the end of P1 (2).

Paragraph 4.3.10 could usefully refer to the importance attached to:

• conserve wildlife, historic objects or natural phenomena within it
• promote its enjoyment by the community and visitors to the area
• support the rural economy of the Surrey Hills area
• provide or maintain public access to the AONB.

These are enduring features, if not statutory purposes, that will survive any update of the Management Plan. Development will benefit from this steer.

We sustain our objection to the Monitoring Indicator which could encourage the perverse behaviour of avoiding appeals.

Answer (if comment is on questions 1-7 of the questionnaire): ()
In 4.3.50c, it should be clear that mitigation requires a new opportunity for recreation in natural greenspace or an improvement to the natural qualities available to be enjoyed in an existing green space. It is not acceptable to repackage, overly manicure or introduce intrusive recreational features in an area of natural beauty already enjoyed by the public.

In line with our evidence and soundness comments, we do not support the revised figures for housing.

In line with our evidence and soundness comments and our previous response, we do not support the revised retail figures.

We welcome the realism that some sites will not be able to deliver until later in the plan period and the link to infrastructure. However, we do not accept that many of the sites in the SHLAA are appropriate for development.
Constraints have not been applied arising from an assessment weighing meeting needs versus harm. Need is exaggerated.

It is inappropriate to propose a large development buffer given the constraints.

**Monitoring Indicators**

There is no indicator to track the location of development and the objective that overall brownfield land will be developed first.

**Question 1: The evidence base and submission documents**

**West Surrey Strategic Housing Market Assessment: Guildford Addendum Report 2017**

The revised “objectively assessed need” figure of **654 homes a year is too high and not based on sound evidence.** This GLHearn number is derived from a demographic need for 558 homes a year, a figure which analysis of the evidence shows should be reduced to 404. The economic need assessment uses a flawed methodology.

GRA commissioned Neil McDonald, a respected national expert who used to work for the Government, to undertake a review of the 2015 West Surrey SHMA as it relates to Guildford. This assessment concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure for Guildford should be revised down. Neil McDonald also advised that a separate SHMA should be produced for student housing requirements in Guildford due to the distorting effect of student flows on the overall Objectively Assessed Need (OAN) forecast.

Neil McDonald has now undertaken a review of the 2017 West Surrey SHMA Guildford Addendum Report. See Appendix 1 for a copy of this which forms part of our response. (The Executive Summary is also reproduced in a text box for convenience.) As part of this review of the addendum report, he undertook a more detailed assessment to identify what causes the very large discrepancies between projected population growth in Guildford and actual growth as recorded in the census.

Neil McDonald has concluded that the demographic and economic need figures are fundamentally flawed to the extent that GBC cannot make an informed, evidence based decision on the housing figure. His analysis of the big gap between demographic projections and census figures in Guildford identifies under-recording of students moving away as the most plausible explanation. The ONS recognises that there are significant issues. His analysis also shows that if you correct for this recording error by making plausible adjustments for the outflow of students in the period 2001-15, this reduces the demographically-based estimate of the number of homes needed from 558 to 404 homes a year in the period 2015-34.

**Executive Summary**
i. This report reviews key elements of GL Hearn’s report, “West Surrey Strategic Housing Market Assessment: Guildford Addendum Report 2017” that relate to Guildford’s objectively assessed need for housing (OAN). It follows up an NMSS report in June 2016 on the aspects of the West Surrey SHMA that related to the Guildford OAN.

Producing projections for Guildford is challenging due to the large number of students and errors in the historical data

ii. Guildford presents many challenges to those seeking to project its future population and household growth. This is because it has a large student population and the historic population data for the district contains sizeable inaccuracies. The latter point is clear from the Office for National Statistics’ own data which shows that the population increase between 2001 and 2011 estimated using the ONS’s figures for births, deaths and migration flows (i.e. 15,000) is more than 90% larger than the increase suggested by the difference between the 2001 and 2011 census counts (i.e. 7,800). This is an exceptionally large discrepancy and indicates that there were large differences between how the ONS thought the population of Guildford was changing between 2001 and 2011 and what was actually happening.

It is probable that out-migration from Guildford has been under-recorded and, as a result, the DCLG projections have over-estimated the likely increase in households by a large margin.

iii. A detailed examination of the discrepancies between the various ONS datasets has shown that the only plausible explanation is that net migration into Guildford has been over-estimated, most probably as a result of a sizeable under-recording of migration out of Guildford.

iv. It seems probable that the under-recording of out migration has continued after 2011. This has major implications. In particular, the ONS’s 2015 population estimate for Guildford may be too large and DCLG’s 2014-based population projection may overstate the likely increase in housing by a substantial margin. An alternative calculation making plausible and logical adjustments to the estimated outflows in the period 2001-15 would reduce the demographically based estimate of the number of homes needed from 558 homes a year (2015- 34) to 404.

Student housing needs are probably already catered for in the DCLG projections but a much fuller separate analysis is needed.

v. An examination of the DCLG projections for the growth of households of the type and age formed by students renting in the general housing stock in Guildford suggests, contrary to GL Hearn’s conclusion, that those projections include more than enough additional housing to meet the projected growth in the student population. However, there is a need for a fuller analysis which separates out student housing needs from other housing needs as the DCLG household projection methodology is not suited to estimating the needs of students and the inclusion of students in the statistical base used for the projections may have distorted the projections made for non-student housing.

The estimates of the number of homes needed to support forecast job growth need to be re-worked.

vi. The GL Hearn estimates of the number of homes needed to support economic growth are flawed as they use economic activity rates which are different from those used in the job forecasts on which they have based their estimates. This can have a large impact on the estimate made of the number of homes needed to support job growth, sometimes producing absurdly large figure. For example, if, when assessing the housing implications of a jobs forecast, GL Hearn assume that fewer people over 55 will be part of the labour force than was assumed when the forecast was produced:

a. GL Hearn will estimate that a bigger population would be needed to supply the workforce assumed by the forecaster – implying a need for more homes than are necessary.

b. The forecast will not be consistent with GL Hearn’s view of how the labour market will change. Indeed, had the forecaster used GL Hearn’s assumptions they would have concluded that the available labour force will be smaller and as a consequence forecast a smaller increase in jobs.

vii. The SHMA Addendum does not provide sufficient detail of the jobs forecasts for others to re-work the estimates of the homes needed to support economic growth. The unwillingness by some parties to release data assumptions is also an issue. Hence the only option is to invite GL Hearn to redo the analysis.

Affordability adjustment
viii. The earlier NMSS report showed that Guildford did not stand out from other Surrey districts in terms of affordability. It is a highly desirable place to live being surrounded by very attractive countryside yet with both a strong local employment base and good commuter links to London. Increasing housing supply beyond the numbers suggested by the demographic analysis would not have a noticeable impact on house prices: it would simply attract more be to live in the area.

Further work is needed before we will have a sound basis on which to estimate Guildford’s housing needs.

ix. This review has shown that attempting to estimate Guildford’s housing needs using the DCLG projections with little or no adjustment has introduced large errors. Considerable further work is needed before there will be a sound basis on which to estimate Guildford’s objectively assessed need for housing.

x. In view of the desire to make timely progress with the Local Plan, it is proposed that an early meeting is sought with Guildford Borough Council and GL Hearn to discuss these findings and consider a way forward.

The Guildford SHMA needs to be revised, and the proposals based upon it reconsidered, before the Plan can be viewed as ready for submission to an Inspector. We trust that GBC will now pursue this as a matter of urgency.

Neil McDonald proposes a meeting with GL Hearn in order for this matter to be resolved in the most timely way possible.

Housing Delivery Topic Paper

Paragraph 3.11 should not be construed as suggesting residents’ concerns were met. The sensitivity map still used the questionable approach that land meeting several criteria is more valuable than an area of Green Belt that plays a pivotal role in one respect.

This should refer to Woking applying Green Belt as a constraint and that it would be perverse to harm the Green Belt in Guildford to protect the Green Belt in Woking. Delay in the proposed Woking Site Allocations DPD is not a credible basis for meeting their unmet need in a place that is as constrained as Guildford.

Paragraph 4.10 lists constraints and suggests they were applied but gives no detail to show that they were and how. This is only described later in the context of Woking need. Paragraph 4.11 moves straight to seeking to meet need without setting out that transport, landscape, flood risk and Green Belt constraints represent major issues. These paragraphs should set out clearly at the outset the constraints and their application. You can expand subsequently that initially, as a result of paying insufficient attention to constraints in draft version of the Plan, you had advocated some development that you came to appreciate was unacceptable in planning terms.

Your suggestion in paragraph 4.11 that GBC can work to meet (supposed) need can only be made by not applying Green Belt protection, and by accepting traffic congestion will continue to be a major problem. Yet paragraph 4.11 even proceeds to suggest a big buffer can be provided in addition to an inflated need figure. The only concession is transport constraints in that some development will need to await transport infrastructure later in the plan period. Paragraph 4.12 is also weak, especially in the context of the failure to set out the application of Green Belt as a constraint in the preceding text. The logic behind “prior to removing sites, we first explored whether they could potentially be retained” is perverse. The focus should be on justifying removal from Green Belt not “removal from removal from” the Green Belt! The sites were inappropriate for removal from Green Belt in the first place for sound planning reasons. Similarly, there are strong planning reasons why Green Belt loss cannot be justified at various other proposed development sites within the Draft Plan.

In paragraph 4.15, the deficit from 2015 is overstated because need is overestimated.

Paragraph 4.36 is welcome, especially in view of the very large number of 798 permissions granted in 14/15.

From paragraphs 4.39 on Green Belt, please refer to our comments in the Green Belt topic paper.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Green Belt Topic Paper**

This document provides the thinking behind relevant plan policies and proposals alongside the Housing Delivering topic paper. The approach to Metropolitan Green Belt lacks appropriate assessment at a more strategic scale.

The **Local Context** section is inadequate as a basis for applying policy.

Paragraphs 2.10 - We challenge the assertion that the Corporate Plan sets out an overarching local approach to Green Belt and countryside. These corporate objectives were not subject to consultation appropriate for determining planning policy. The current Local Plan is the relevant local policy context.

The fact that there was a boundary review as recently as 2003, the amount of land released at that stage, and the extent to which it has been developed, including how efficiently the land is being used, should be recorded. Green Belt reviews should be infrequent.

Paragraph 2.11 - The reference to our Green Belt being designated to function as part of a wider Metropolitan Green Belt needs expanding. The objective of providing an effective open area around London maintained in perpetuity requires a different scale of strategic approach than would be appropriate had this Green Belt been designed to serve Guildford uniquely. The 1987 Local Plan defined the Guildford part of the Metropolitan Green Belt not the Guildford Green Belt.

The section should also refer to the Mayor of London’s commitment to respecting Green Belt boundaries, including in the London Plan review.

The **evidence base** section relies on the approach adopted in the Green Belt and Countryside Study. We sustain our previous objection and register concern that remaining flaws in the approach to Green Belt purposes are being carried through into new documents. As a consequence, the new evidence does not value appropriately the “fundamental aim” of Metropolitan Green Belt or look strategically at options for developing instead in major settlements beyond the Green Belt.

**Inset villages** - Assessment of which villages to take out of the Green Belt does not adequately consider that villages contribute to the openness of the Green Belt as seen from surrounding AONB.

**Replacement buildings** – We welcome refinement of this policy.
Inset major previously developed sites - Proposed removal from the Green Belt of a number of relatively small sites where development of an exceptional nature has taken place, plus adjoining land, has lost sight of the scale at which Green Belt is effective. We do not agree with the assessment in 4.32 for relatively small sites and consider any planning applications should be considered on a case by case basis as exceptional development rather than pock-marking the designated area with inset sites.

Amending Green Belt boundaries

The way Green Belt is parcelled up and scored is invalid: serving 2 Green Belt functions well is as legitimate as serving 3 to 5 functions. The Green Belt sensitivity analysis is not a valid basis for weighing the value of Green Belt and taking decisions.

Exceptional Circumstances

Paragraph 4.73 - This assessment is contested. The third sentence moves straight from need (based on a flawed OAN assessment) to amending boundaries without consideration of other options. It also refers to unsustainable commuting patterns.

The potential contribution of sustainable commuting should be considered positively. Green Belt is inextricably linked with making good use of the urban area it encircles, and also with commuting. Half of Guildford’s working population commutes outwards and half of the workforce commutes in. The pattern of locations is complex and includes places beyond the Green Belt. Building homes in Guildford will not change that pattern to any significant degree. The key is to make commuting sustainable and it should be embraced as part of Guildford’s strategy just as it is for London.

Paragraph 4.74 – The logic is flawed. It suggests development “would not fundamentally harm the main purposes of the Green Belt”. This is hard to sustain given the main purposes of openness and permanence. It then suggests Green Belt constraint is being applied a little bit and further that in some instances this will take account of how many Green Belt functions a parcel of land serves. The focus should be the strategic importance of each part of the Metropolitan Green Belt. As has been mentioned, Green Belt that serves fewer functions well, eg providing a strategic gap, should be valued.

GRA is concerned that Guildford is allocating more Green Belt sites than it can justify and Green Belt constraint should be applied far more rigorously. The draft Plan is advocating a string of development along the A3 which is inconsistent with achieving a ring of open countryside around London. The minimum possible, least harmful loss of the Green Belt sites should only be considered after all other options have been pursued. That is not the approach that has been taken. Failure to apply Green Belt as a constraint only to be required to assess whether we can meet the unmet need of Woking, which did apply constraints, is perverse.

Local Plan Policy Approach – Paragraph 5.1 is tantamount to an admission that political decisions have been a major driver.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Transport Evidence and Submission Documents

Assessment of the revised evidence leads to the conclusion that there will be congestion, even with all the highway schemes in the Plan. Many questions remain unanswered and further work is being undertaken. There will be problems across the network and analysis does not support a claim that the highways network can accommodate the additional demand arising from the Plan.

It is becoming ever more evident that the Sustainable Movement Corridor cannot be delivered as proposed or achieve its intended objectives along much of its route due to narrow roads and pinch points. Cycle provision can be improved but along much of the route bus improvements will be confined to a little easing at junctions leaving buses to sit in queues with other vehicles during peak traffic. The impact on other routes needs to be assessed.

Evidence on bus travel is fundamentally compromised because there is still no clear and workable location for a bus interchange to inform the evidence, policies and sites and to provide a basis from which bus routes can be planned.

More generally, uncertainty over transport planning for the town centre continues to be a problem. The Plan does not adequately address the traffic issues in the town centre including a route for a new bridge connecting the town across the railway to maintain accessibility and to provide greater resilience in this key part of the road network.

The following comments are provided by transport expert Richard Jarvis.

Doc Ref T12a Addendum to 2016 Strategic Highway Assessment Report: high level review of potential key changes in the Guildford Borough PSLP: strategy and sites June 2017

This presents a qualitative assessment of the effect of the changes made to the 2016 plan on traffic forecasts. Essentially, because the amount of development in the plan has been reduced, GBC’s argument is that things will be better than estimated in 2016.

We can readily agree that where development sites have been removed, notably as in the case of the Normandy/Flexford strategic site, the forecast traffic level will be lower in the vicinity of the development. However, there are some sites where the planned development is now greater than in 2016.

There are also potential changes to plans outside the borough to be taken into account, such as Dunsfold Park, which may have significant consequences for Guildford, as was pointed out by SCC and GBC in their submissions to Waverley in response to that planning application.

The trip rates used in the forecast assume a level of public transport use and an appropriate level of bus services.

On the evidence provided by the SHAR based on the 2031 traffic forecasts using the SCC traffic model, congestion will be widespread in peak periods across much of the highway network, including on strategic routes. The A3 and M25 are forecast to be at or over capacity. The cumulative effect of the additional traffic generated by the developments in the plan will be to increase congestion, even with the proposed highways schemes in place.

Interpreting the model results is not straightforward, as was pointed out in response to the 2016 consultation. Table 4.12 is significant – showing the roads with the ten largest ratios of flow to capacity for Scenario 3, which includes all the planned development but not the major strategic route improvements on the A3 and M25. There is no equivalent for Scenario 5 (i.e. with the strategic improvements), but we can infer that all the roads in Table 4.12 will be at or over capacity in Scenario 5.

With regard to the comments on Policy A6: North Street redevelopment (page 9), the model used for the Strategic Highway Assessment is not sufficiently detailed to provide a satisfactory assessment of conditions on the town centre road network. This has been recognised by GBC and has led to the commissioning of more detailed analysis using a simulation model. Added to which, there is uncertainty over the highway capacity implications of the Sustainable Movement Corridor in the town centre and possible changes to the town centre gyratory, as discussed in the draft Town Centre Regeneration Strategy, which indicates that the intention is to reduce the capacity of the town centre network. The experimental closure of Walnut Tree Close is already being planned. Taking into account the demand forecast on the A281, the A322 and A31 in Table 4.12, the consequences of such a reduction will be far-reaching.
Policy A26: Blackwell Farm has been amended and now the proposed development includes a secondary school with up to six form entry. This will add to morning peak hour traffic which was not included in the 2016 modelling. The SHAR findings indicate that there will be congestion in peak periods on the network that will serve this development. The A3 will be at or over capacity which means that the network will lack resilience, as it does today. The roads connecting to the town centre will continue to be under pressure. The SMC concept is more advanced on this section than elsewhere, but the effect on capacity has yet to be established. There will be queuing on the A31 on the approach to the new signalised junction that will give access to the Blackwell Farm site. The A31 is regarded as a key route by the LEP and LA partners.

The improvement to the A3 is obviously critically important to the Gosden Hill Farm development. We do not have the benefit of analysis of the proposed new slip roads giving access off and on to the A3 S-bound carriageway, nor an understanding of the implications of the SMC for the allocation of highway capacity on the local roads. What is self-evident is that the pressure on local roads in Burpham is already intense in peak periods, and these roads are not suited to carrying large volumes of traffic. Under the plan, congestion is very likely to be worse than today. The proposed Policy A24 Slyfield development will also add demand to the A320 and roads in Jacob’s Well.

The change to Policy A29: Land to the south and east of Ash and Tongham involving more houses means that there will be more traffic locally. While this will not be ‘major’ in terms of the borough as a whole, it will be significant locally. Ash and its surroundings will be impacted by the large Wellesley expansion in Aldershot. It is not clear to what extent the modelling reported in the SHAR allowed for this development. The pressure on the A331 and the roads connecting Aldershot to Guildford and Woking will increase.

The M25 is forecast to be at capacity after the planned improvements have been introduced, as shown both in the SHAR and also in the recently published DfT/HE report on the South West Quadrant. This is relevant to Policy A35 Wisley airfield. It should be noted that RHS Wisley is expanding its facilities with the aim of significantly increasing visitor numbers. The DfT/HE Stage 3 report concludes that the focus should not be on widening the existing road further beyond currently planned schemes but on how to reduce pressures and provide parallel capacity to relieve this part of the network. If the M25 and A3 are at capacity, then the Wisley development will add pressure on local roads that are not well-suited to carrying higher volumes of traffic. This is also relevant to the proposed developments at Burnt Common. The consequences for Ripley are likely to be serious. It is noted that Policy A35 now includes a requirement for mitigation of impacts in Ripley and on surrounding roads, which is some recognition that there will be a problem.

A comprehensive up-to-date analysis is required to inform decision-making. This should include analysis of the mid-term stage of the plan, before the A3 improvement is complete, as well as 2034.

Doct Ref T13 Transport Strategy

Section 1 Overview. The description of existing conditions and challenges is broadly correct and welcome.

Section 2 Surface access to airports. The problem is that the improved A3 will be at or over capacity in peak periods under the Plan, and the M25 SW Quadrant study has concluded that the M25 will be overloaded. So surface access to Heathrow from Guildford will continue to be affected by the weaknesses listed in this section.

Section 3 Rail. This section is welcome. However, it is noted that Crossrail 2 has not yet been secured. We had previously commented information on the demand for and capacity of rail services is needed and that the main line to London is already extremely busy in peak periods.

Section 4 Strategic roads. Surely the strategy should be aligned with the position of Highways England set out in the Topic Paper on Transport, where it is evident that the improvement of the A3 will not be completed until 2026/27, or even 2027/28? The removal of schemes SRN1 and SRN6 from the list of key infrastructure for the plan, and redesignating them as ‘aspirational’, is inconsistent with the safety objectives of the borough and surely of Highways England and Surrey County Council as the highway authority. Under the strategy and the Plan, the issues for Beechcroft Drive and the weaving and merging issues on the existing A3 will not be addressed until half way through the plan period.
Section 5 Local roads. While welcoming the aspiration to transform the town centre, the traffic implications have not been dealt with in the strategy or the Plan. Section 1 correctly included the issue of “severance of the town and its constituent neighbourhoods resulting from a combination of the A3 trunk road, railway lines and the River Wey”. The case for a new crossing of the river and railway relieving pressure on the Farnham Road railway bridge should be taken very seriously and examined in depth. There is a real risk that a significant reduction in capacity in the town centre, both the gyratory and Walnut Tree Close, and on routes carrying the SMC, will lead to road users transferring to minor roads around the town that are unsuited to carrying more traffic.

The M25 SW Quadrant study report recommends that alternative routes are developed to carry orbital traffic, and this could mean more use of the A31/A331 in Guildford. There are local roads where capacity is already an issue and planned growth will add to problems that are not mentioned in this strategy. The scope of this element of the strategy is not wide enough.

The bus transit strategy is welcome. However, there is insufficient information on the Sustainable Movement Corridor to gauge either what it might deliver and its potential impact on road capacity. The statement under ‘Anticipated improvements’ that the New Sustainable Movement Corridor provides rapid and reliable bus journeys in Guildford urban area and links...’ has not been demonstrated. Consultants have been carrying out studies but the results have not been made public in time to inform this consultation.

A high quality bus station in the town centre is critical for the future of the town.

There is a lack of park and ride on the east of the town and not even an aspiration for future provision.

The active modes strategy is welcome. However, many roads in the borough are two-lane carriageways of restricted width, with little scope for allocating space for cyclists, and this has to be either accepted or addressed over the long term.

Section 6 Air quality. If traffic is going to increase in aggregate, as the forecasts show, even with the measures being proposed, then air quality will continue to be a concern.

Section 7 Road safety. The proposals are welcome, but as stated above, the schemes SRN1 and SRN6 should be reinstated in the Plan for safety reasons.

Section 8 Programme and funding. See comments on Topic Paper: Transport and the Infrastructure Schedule (App C).

Topic Paper: Transport

This is a helpful paper providing context and background to the transport aspects of the Plan.

The fact the new supplementary technical work is planned to be carried out prior to the submission of the plan to the Secretary of State (para 3.18) is welcome, but it would have been better if the results had been available for this consultation.

It is recommended that the wider evidence base should be expanded to include the following:

- Local Enterprise Partnerships and Local authorities: Influencing Strategic Transport in the South East, WSP, 2016
- Surrey County Council: Response to Waverley borough Council on WA/15/2395 Dunsfold Park, Dec 2016
- Guildford Borough Council: Guildford Town Centre Highway assessment –Town Centre Highway Layout Concept Testing, WSP, April 2016

Air Quality Assessment

We welcome this new evidence, especially given revised estimates of premature deaths and health impact, issues with vehicle emission controls and misplaced optimism regarding congestion reduction in 2011.
The air quality effects of anticipated increased congestion on roads around the town centre should be carefully modelled and monitored. The cumulative effects of more development, rerouting buses, traffic displacement including pedestrianisation and interceptor car park expansion should all be considered. For example, York Road continues to be a sensitive site having experienced NO2 exceedances over several years. It has vulnerable school children in the vicinity and is expected to cope with much diverted traffic even though it is already beyond capacity and congested at peak times.

The air quality impact of increased traffic from Dunsfold coming into the gyratory should be monitored.

Traffic noise from the A3 should also be reported.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**Retail and Leisure Study addendum (2017)**

The update is welcome but still appears to lag behind the pace of change in retail space demand. In an era when people will seek a mix of technology alongside retail venues that offer an agreeable “leisure experience”, the characterful shops that make use of old buildings can become an increasing draw, an asset that cannot be replicated in many places nationally. For leisure more generally, insufficient attention is paid to environmental character and quality as part of the attraction of Guildford.

In order to inform priorities, evidence should consider the relative merits of adding further retail space, that risks relegating the High Street to a secondary zone, versus using more of sites such as North Street for high tech incubator businesses linked to 5G and for housing. Would confining new shops to the North Street frontage and providing for these other uses (and a bus interchange) behind be more appropriate. If a new department store is added, is an existing one likely to fail?

**Land Availability Assessment (LAA) (2016) and addendum (2017)**

Green Belt protection, landscape impact, flood risk and transport constraints should be applied to establish more appropriate sites and housing figures. Sites that need safeguarding for future infrastructure requirements such as a tunnel also need adding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp17q/473  
Respondent: 8556385 / Guildford Residents Association, EGRA (Amanda Mullarkey)

Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

It is unsound and unsustainable to develop on the scale proposed.

There is evidence Guildford’s population growth is overestimated by about 40% because of under-recording of students leaving at the end of their studies.

Even taking account of all the proposals in the 2017 Plan, including skewing of development to later in the plan period and linking development to infrastructure, congestion which is already severe is set to get worse over the plan period.

In view of flawed new housing evidence and the implications of emerging transport evidence, Guildford’s proposal for more than 12,426 homes (plus a buffer of 1,155 homes) is excessive and will result in needless loss of Green Belt and green character, sprawl along the A3 and increased congestion, that cannot be justified in our heavily constrained borough.

If the Council fails to apply Green Belt protection or constrain expansion to reflect widespread, legitimate environmental and transport constraints, the 2017 Plan will cause harm to the qualities that underpin the economic success of Guildford and aggravate congestion.

The overall housing target and increase in retail space should be reduced to take account of the constraints of our gap town, growth in online retailing and potential for sustainable commuting.

Opportunities to provide greater accommodation on campus for university students and to open up access across the railway for our physically divided town have not been pursued sufficiently positively.

The revised proposal that only 60% of full time Guildford based University students will be provided with accommodation on campus puts unnecessary pressure on housing stock in the town. An 80% target could help by freeing up affordable homes relatively quickly.
Allocating too much land for development in the 2017 Plan will also result in Guildford being required to assess whether it can provide homes for Woking on our Green Belt. This is folly given the constraints in Guildford, a gap town with constricted roads set in the Surrey Hills AONB.

**Green Belt and Sustainability**

We do not accept the assessment the Council’s case for exceptional circumstances.

- The NMSS SHMA review indicates that the evidence base exaggerates the level of housing need and that the employment housing need assessment is flawed. Increasing housing supply beyond the level suggested by the demographic OAN would not have a discernible effect on affordability but simply mean more people who can afford high prices moving to the area.
- We submit that the economic need should be tested on a sector by sector basis and that the priority given to retail expansion should be questioned.
- Suitable deliverable alternatives, such as significantly increasing campus accommodation, thereby freeing up homes in the town, and provision of more homes on North Street in lieu of a large increase in retail, should be pursued.
- Options for meeting revised need in larger settlements beyond the outer Green Belt boundary linked to sustainable transport have not been fully explored.
- The option of not fully meeting needs in recognition of constraints, including Green Belt, has not been balanced against the positive and negative consequences of fully meeting need (as revised) as should happen in a meaningful Sustainability Appraisal that takes account of environmental capacity.
- Commuting by sustainable means, especially in the context of the current high levels of inward- and outward-commuting, should not be dismissed as an unsustainable option in all the circumstances.
- It would be irresponsible and unsustainable to use up all potential least-worst, last resort Green Belt sites within one plan period.
- High-added-value, knowledge-based businesses and homes should be given priority over expansion in retail land.

**Constraints**

Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and sewer flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach. High rise buildings would be inappropriate due to the important contribution views and the rise and fall of the land make to both urban and rural character, including the nationally significant Surrey Hills AONB. The river and railway divide the town and there are too few crossing points; a further constraint. Air quality and traffic noise are not insignificant considerations in some locations.

The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. GRA considers it would be harmful to rural, suburban and urban character, quality of life and the economy of Guildford not to reduce the new housing units delivered by 2034 to a number significantly below 12,426. We submit it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to develop on the scale currently proposed. We are concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site.

Transport infrastructure remains a constraint. Current congestion is severe by any meaningful definition and there is a back log of infrastructure investment. Assessment of the transport evidence by expert, Richard Jarvis, using the information made available to date, indicates that the overall effect of completing the proposed schemes and development in the Plan would be congestion to a level that makes it hard to conclude that the test in paragraph 32 of the NPPF is passed. Any notion that building over 12,426 homes is going to deliver infrastructure that will overcome Guildford’s traffic problems seems misguided. He writes:
“In terms of its transport aspects, the Plan cannot be regarded as sound. GBC has provided vivid descriptions of the conditions on the network today and the evidence is that these will be as poor, and in some cases worse, at the end of the plan period, even with the mitigation measures. Growth and infrastructure have to be better aligned. While the level of growth in homes in this latest draft plan is somewhat lower than that in the 2016 version, it is still substantial and growth is also planned outside the borough. The evidence provided indicates that congestion will be widespread on much of the highway network in peak periods, even with the proposed highway schemes and with the measures to encourage the use of public transport in place.”

In view of the extent of physical constraints, protective designations and congestion, it is possible that even a more accurate, lower OAN housing figure, once it has been identified, would need to be constrained.

We submit that Guildford BC should:

- revise the SHMA to make corrections and to better account for student need
- undertake a proper assessment of constraints, informed by a strategic Green Belt review and a Sustainability Appraisal that tests environmental capacity and considers meaningful alternatives to establish an appropriate balance between adverse effects and fully meeting (revised) need
- continue to improve the transport evidence which points to congestion and work up transport proposals such that both can better inform the plan.

Any housing figure adopted in the context of considerable uncertainty would need to be kept under regular review.

If any land releases were deemed necessary following a rigorous, strategic and accountable approach to Green Belt review, these should be measured and paced, arising from a robust assessment of the balance between benefits and adverse effects, taking full account of environmental capacity.

Guildford has not currently provided the evidence to derive a housing figure arising from such a process. It is notable that Woking applies constraints to its OAN.

More strategic solutions, such as development beyond the Green Belt linked to sustainable commuting or a tunnel for the A3, are required now. Such alternative strategies cannot be left until the next Plan period. Indeed, it is troubling that the proposal for an A3 tunnel has been dropped as an aspiration. This should be being planned now and any necessary land at Gosden Hill and Compton safeguarded.

Neglected Opportunities

A more sound and sustainable approach to planning positively in Guildford should include greater emphasis on the following:

- **Campus accommodation:**
  Higher priority should be given to providing attractive campus accommodation so a very high proportion of university students will want to live on campus thereby freeing up affordable homes in the town. Significantly, this could deliver homes within the challenging first five year period of the Plan. We need to plan positively to find sustainable ways to sustain a thriving university in a constrained, commuter belt gap town. Just as if you provide attractive cycle facilities they are used, if you provide attractive student accommodation, it is used.

- **Sustainable commuting:**
  The revised plan evidence describes commuting as “unsustainable”. This need not be the case. Far more attention should be given to the potential for enabling sustainable commuting recognising that Guildford has a high-value-added economy in a constrained gap town location. Rather than destroying the qualities that underpin the town’s economic success by overdeveloping, the scope for making it easy and affordable to commute by sustainable means from less constrained settlements should be pursued as a priority, both for the short and long term.

  The context is that levels of both inward and outward commuting are extremely high. Almost half the working population commutes out to work and almost half of the workforce commutes in. In many households, occupants work in different...
locations and people do not necessarily move when they change jobs. In 2001, more people commuted out to Rushmoor than vice versa and more commuted in from Waverley than vice versa.

In a Guildford context, the aspiration that more people should live where they work needs to be balanced with other sustainability considerations.

- **All-direction, central bus interchange:**

  The current site has been declared available for development in an agreement with a developer without an appropriate alternative location being identified in the revised Plan. Failure to identify a central location, and to allocate appropriate land, for an attractive all-direction bus interchange in the town is a grave failing that undermines the soundness of the Plan and should be addressed as a matter of urgency. A central interchange is needed in view of levels of congestion, the gradients involved in town centre journeys, the limited options for crossing the railway and river, and the need to provide sustainable transport options to support complex commuting and travel patterns.

- **Town centre plan:**

  Better progress, and a more joined up approach, in town centre planning is required. The slow pace has meant opportunities for coordinated brownfield development are not available as part of this Plan. The need to have brought forward town centre options in a timely way should have been foreseen. Guildford had already used up its green field sites within its Green Belt boundary by the time of the 2003 Local Plan.

  GBC’s decision to tackle the town centre after the Plan is preventing joined up planning. The implications of an approach of constraining cross Guildford movement has major implications that need to be understood.

- **New cross-town road bridge:**

  An additional bridge over the river and railway is required to improve connections across the railways and river for our physically divided town. We want to see the townscape improved, with better use of the river. Achieving this, while maintaining accessibility, will be much easier with a new crossing.

**Sustainable Choices**

Given the scarcity of land arising from being a constrained gap town, the Plan should consider a wider range of sustainable strategies than simply expanding across the board.

- **Balance between retail expansion and town centre homes**

  The Plan should weigh the case for a major increase in retail space, especially given trends in internet shopping, with the opportunity to provide accessible and sustainable town centre homes. Increased town centre housing provision for the elderly could also have the beneficial knock-on effect of freeing up existing family homes. All types of town centre housing would help support the evening economy.

  The wisdom of such massive retail expansion, on top of already generous retail provision, needs to be challenged in view of the fate of the high street in many places. The mix of homes and retail, with its relatively low added-value, in the North Street development should be reconsidered.

- **Balance between high-value-added, knowledge-based economy and retail expansion**

  Similarly, the mix between land allocated to the high-value-added, knowledge-based economy in the town and to retail expansion should be carefully reviewed. Knowledge-based enterprises yield returns between 3 and 4 times greater than retail.

**Planning ahead**
In order to deliver sustainable development, it is important to plan ahead. Sites for entrances and, in the shorter term construction areas, for an A3 tunnel through Guildford should be safeguarded. Land should also be allocated for more immediate projects such as an additional crossing over the railway for local journeys.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

We sustain our previous comment about the need to cooperate with settlements beyond the Green Belt and outside the supposed HMA.

We are concerned the impact of development at Dunsfold needs to be better planned and managed.

Please refer to our comments on unmet need from Woking under evidence and soundness. Cooperation is only meaningful if all parties apply policy on a common basis and GBC is failing to apply constraints appropriately to prevent sprawl and congestion.

Strategic Objectives
Concerns upheld

Spatial Vision
In line with our evidence and soundness comments, we do not support the revised figures for housing.
In line with our evidence and soundness comments and our previous response, we do not support the revised retail figures.

The last paragraph in the Spatial Vision statement refers to ‘early targeted improvement schemes to deliver road safety and some congestion relief on the A3 will be delivered within the plan period’. While it is correct that funding has been committed for two improvement schemes – SRN7 (£1.6m) and SRN8 (£2.5m), but the two safety related schemes SRN1 and SRN6, previously regarded as urgent, have been removed from the infrastructure schedule. The final sentence of the Spatial Vision should be changed to read as follows: The rate of delivery of housing in the plan period is conditional on major improvement of the A3 through Guildford and the other highway improvement schemes listed in the Infrastructure Schedule.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

• No provision, either in terms of land or finance, has been made for the required increase in primary and secondary school provision that this would entail and yet the existing local schools are fully subscribed;
• The existing infrastructure in East and West Horsley would be unable to cope with the significant growth in the village settlements, particularly where site development is incremental. This includes the existing village shopping provision, roads, public transport (particularly the local train network) and utilities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

GUILDFORD BOROUGH COUNCIL DRAFT LOCAL PLAN

I am writing to object strongly to the revised Draft Local Plan and, in particular, the scale and density of development in West Horsley and the surrounding area. The grounds for my objection are set out below.

Policy S1: Presumption in favour of Sustainable Development

A total of up to 385 houses have been proposed on four separate sites in West Horsley, together with an additional 100 houses right on the parish boundary in East Horsley. There are a number of reasons why this is not in line with existing planning policy:

• The proposed housing densities for these sites is well in excess of existing densities in either village;

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
More generally, it appears that the objectively assessed housing need appears to have outweighed any consideration of the damage that the plan does to Guildford’s existing Green Belt protection, particularly in the East of the Borough. Appropriate constraints to development, such as the need to retain Green Belt except in exceptional circumstances and the demands on existing infrastructure appear to have been completely overridden by housing need. There do not appear to be any circumstances under which the overall housing numbers would have been constrained, regardless of how high they were. I do not believe that is a correct interpretation of Government planning guidance.

I do not wish to argue that there should be no development on any part of the Borough’s (or indeed, West Horsley’s) Green Belt. I recognise that there is real pressure on the Borough to increase its housing provision in the face of a rising population, increasing birth rate and other demographic trends. However, it is the scale of development proposed in the immediate area that is unacceptable. Growth in the village of around 10% over the plan period, resulting in a release of one or two of the proposed Green Belt sites for development during the plan period would allow the village to grow organically and accommodate some much needed affordable housing. That would also balance the demands on the infrastructure, while going some way to accommodating housing need. However, proposals on this scale, all of which are scheduled in the plan’s first five years, will transform the face of the village forever and not for the better, which is why I wish to make a strong objection.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPS16/5377  Respondent: 8557217 / Mrs Angela Gray  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

To The Planning Inspector of Guildford Borough Council

- I object to the 1100 homes that GBC want to build on A46 (between Glaziers Lane and Westwood Lane in Normandy and Flexford). This site gets water-logged as we have natural springs at Wanborough that flow through Flexford and Normandy, not helped as the soil type here is clay. This land has always historically been agricultural and therefore ‘greenbelt’. The greenbelt is there to STOP urban sprawl. We already have low water pressure and this will only worsen.

- The approach to Wanborough station (in Normandy and on the edge of A46) gets flooded on numerous occasions each year. Rail commuters now keep a pair of wellingtons to hand as it is the only way to get through to the platforms as it gets to 15 cm deep in places and that’s more than a shoe full of dirty water. Plus there are only 8 spaces for cars to park at the station. Do not be fooled in thinking the 2,000 odd residents (average of 2 per household) will be using the ever expensive train to get to work as we know from residents currently living in Flexford and Wanborough only a small proportion use the train.

- How is the Victorian railway bridge on Glaziers Lane going to cope with an extra 1,500 plus cars going over it twice a day? There is already a crack in the brickwork.

- I object to even more cars on our busy roads. The improvements that are talked about are just not enough for such a busy area. At peak times we cannot get out at the crossroads with the A323 and Glaziers Lane. The traffic piles down Wanborough Hill in the mornings and evenings plus anytime there is an accident on the A31 and A3.

- I object to the burden that will be added to the Doctor’s surgery where already we have to wait for 2 weeks for an appointment to see the doctor. This will also have an enormous knock on effect at the Royal Surrey where waiting times will get even longer to see a consultant or have an operation, goodness knows how A&E will cope with sites like Blackwell Farm and Slyfield possibly being developed.

- I object to having a Secondary School built on land A46 which is red sensitive land. It is ludicrous as we only have around 50 children of secondary school age currently in Normandy and Flexford. So this can only mean it is developer led as the other 1000 odd spaces will be for children outside of our village. Currently Ash Manor and Kings College are under subscribed. The thought of children being driven by parents and bused in to Normandy is going to put even greater pressure on our roads around the village, don’t think they’ll cycle as their parents will not let them go the distance on our dangerous busy pot holed roads.

- People currently living in Normandy and Flexford chose to pay a premium to live here because of the rural setting in the greenbelt. As all know who live in the village at peak times it is difficult to get up Wanborough Hill, and turn (especially right towards Guildford) out of the village from Glaziers Lane and Westwood Lane. As soon as there is an accident on the A3, A31, A331 and the A323 the village becomes gridlocked. This would only get worse with 1,100 new homes with an average of 2 cars per house (taking into account some may only have one car and others may have children living with them driving). It is an unthinkable thought. Anyone living at the Flexford end of the village has to cross Glaziers Lane 3 times, where footpaths disappear (before and after the railway bridge and on the bend where the stream goes under the road). So mums with pushchairs and toddlers have to negotiate this traffic problem to get to the nursery school on Glaziers Lane, the doctors surgery and village hall.

- Looking at the plan for the area of SANG provision on a field that sits on clay so in the winter it is soggy underfoot and would soon get all churned up from dog walkers. Did you know that 24% of homeowners have dogs and 17% cats (Found on PFMA Pet food manufacturers website)? I am a dog owner and I do not walk the fields around the village between October and March due to clay becoming claggy so difficult to walk in and my dog getting filthy. I go to the Normandy part of the Ash Ranges which happens to be SSSI where I can walk my dog on lovely drained heathland. I love it so much over there that I actually walk it throughout the year. If these houses get built it will not take long for the owners who have dogs to work out that 1 km away there is a lovely dry walk. With all these additional dog owners trampling over the SSSI that has the following red listed birds
dartford warbler, woodlark, tree pipit and nightjar (all ground nesters) plus linnet and lesser redpoll and migrants
cuckoo, whinchat and hen harrier. Our heath land is also important for the rare smooth snake, sand lizard and
heath tiger beetle (all are only found on Surrey, Hampshire and Dorset heathland). It would be the fault of GBC if
numbers in these rare species start declining due to this huge housing estate being built far too close to a SSSI
site.

- Our bats use the land in question to forage and nest in the trees and barn owls use the fields to hunt prey. Plus
there is likely to be the arboreal dormouse in the Ancient Woodland on sites at Pussey’s and Walden’s Copse.
Normandy has a good population of hedgehogs a heavily declining species which needs up to 2 km of foraging
with interconnecting garden routes to roam, they will not survive such a huge development taking place and then
the gardens of new homes are so small that many tend to just deck or patio over which has zero habitat for them
and other wildlife.

- My husband and I bought our house 23 years ago in the village when there were 5 shops and 3 pubs. These were
never used enough to make viable businesses so they all eventually closed. Those who have not got cars can now
use the village mini bus for shopping trips, internet shopping/food deliveries is huge in Normandy and Flexford.
So there is no point in providing any new shops/pubs as we didn’t use them before.

- I object to yet more traveller pitches on site A46. What can I say, do the numbers and you will see that
Normandy has a large community already living off the A323 and travellers site at Cobbett Hill plus Palm Nurseries

- To conclude there is only one thing that is pushing this and that is greedy developers who by all accounts has
written and made phone calls to residents backing onto Glaziers Lane to try and get them to sell their houses and
gardens so they can be knocked down for new road access entrances onto the proposed site. GREED is pushing
this development and it’s about time that us villagers have our voice’s heard. GBC have been heard to say they
would prefer to be dealing with one large developer than lots of smaller ones which will take up more time. Well
what an excuse, for something that will ruin the villages and approach to Guildford. I feel that if every village
took a small number of housing say between 50 and 100 each it is a much fairer way.

- Has GBC thought about using the brownfield sites in Guildford to build affordable flats or apartments that those
living there can then either walk to their place of work in Guildford or walk to the Guildford Mainline station that
then opens up to get them to Woking, London, Portsmouth etc for work? I feel that Guildford does not need any
more retail shops it has plenty and we have enough businesses. Really and truly businesses should be looking to
move up north where sites are cheaper to buy and there is high unemployment so gives communities a chance for
work again.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Firstly, I am very relieved to see the removal of sites A46 and A47 (however very disappointed that a private application has been submitted for this site and I will send a separate objection letter shortly about this).

I object to the Insetting proposed in Normandy and Flexford. What are the exceptional circumstances needed for removing this from the green belt? The openness of this area is very important to see and for our wildlife who need corridors of land to move freely in and not squeezed into small areas where they can’t flourish.

With regard to the Palm House Nurseries (A49) travellers site and Showmen of Whittles Drive (A50) I feel this should remain in the greenbelt and not ‘inset’ and they should not be given permanent status. In respect of Palm House nurseries the travellers set up illegally on that land and in my view should never have been given temporary status as it is going to be difficult to ever move them on.

My biggest worry is the 10,000 or so houses being built within a 10 mile radius of Normandy. Where is the new road infrastructure? I think this area will become gridlocked as it does every time there is an accident on the A3 or A31 in the Guildford area.

Blackwell Farm is a beautiful open site of Agricultural land as you leave Guildford to climb the Hogs Back it is an AONB. The thought of seeing this full of housing horrifies me. It will be the start of Guildford merging with Aldershot. This is prime agricultural land and should remain so in the green belt. It is the fault of the University that own this land that there is such a shortage of family homes in Guildford. Many have been bought up and made into bedsits for thousands of students which I have heard are 80% foreign. If the university had not become so large there would be more housing left in Guildford.

I attended a meeting in Normandy a couple of years ago were Matt Furness said GBC are proposing a tunnel like that at Hindhead for Guildford to help with the dreadful traffic problems on the A3. I don’t think you can begin to think about building on Blackwell Farm until such a tunnel is in place. What with The Royal Surrey Hospital with an A+E department so close to this site plus the Surrey Business Park. Traffic has improved since the new traffic light system has been in operation but if building goes ahead it will be chaos in that area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Proposed local plan (June 2016) and to continued inclusion in the plan of former Wisley Airfield, now known as three farms meadows. Allocations A35 – for the phased development of new settlement of up to 2100 dwellings.

I object to the above plan for many important reasons.

1. I object to the removal of (FWA/TFM) from the green belt. This serves a vital road in stopping urban sprawl from London
2. I object to the disproportionate allocation of houses in this particular part of the borough. It is not the right area for such developments because of the infrastructure.
3. I vehemently object to the ruining of a historical rural village namely Ockham. It is just not suitable for large amounts of traffic which would be needed to contain all these houses. There are very narrow lanes which flood when under a lot of rain. No street lights and all these this would be a blight on a very lovely village representing English heritage, also included are many listed houses.
4. I object because these roads will be hazardous to cyclists and pedestrians alike
5. I object also on the grounds of air pollution which I gather is already very high in the area.

**Comment ID:** PSLPS16/7413  **Respondent:** 8557761 / Nigel Farley  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
**Former Wisley Airfield**

The Wisley new settlement proposal is contrary to relevant legal provisions and NPPF guidance. It should not form part of the delayed Local Plan when adopted.

In summary, this is because:

**General evidence base is inadequate to support the proposal**

- There is no proportionate evidence base to support such a large and poorly located major allocation which has emerged very late in the LDF. Quite apart from the specific legal deficiencies in the plan-making process relating to this proposed major new settlement (see below), the information provided as the basis for the new settlement proposal is inadequate and at times inconsistent with the guidance and information contained or referred to in the evidence base.

- For example, the application of the "critical mass population of 4000" in section 24 of Volume V of the Green Belt Study (April 2014) does not appear to be justified by the reference works and guidance listed in paragraph 6 of that Volume and it is not justified in relevant paragraphs of the NPPF.

- Appendix B to the Interim SA Report (August 2014) is extremely difficult to read and/or understand. It is illegible unless printed on a scale too large for A3 printers and the electronic version is difficult to understand. This appendix should also be supplemented by fuller narrative text to explain and justify the conclusions pithily reflected in the detailed appraisals. It also needs to be expanded to look at possible options on other sites within the relevant settlements that could be sustainably redeveloped to provide the homes and facilities needed.

- Volume V of the Green Belt Study appears to have been prepared on the basis of justifying the Wisley new settlement proposal rather than providing an objective comparison of the green belt impacts of this proposal compared to other more sustainable green belt releases in areas which have existing services and The unexplained application of "critical mass population of 4000" as a cap for this purpose (see above) may be related to the desire to promote the Wisley new settlement instead of the expansion of more sustainable locations in the larger villages.

- Despite the remaining runway and hardstanding areas, the former Wisley airfield site provides a large and tranquil area of countryside, with a network of public access routes, both within and around it, to enable it to be enjoyed by wildlife and the public and affording satisfying public views across the surrounding countryside as well as attractive natural features on the site. The following photographs show views within the Wisley and Ockham Commons area (immediately to the north of the proposed new settlement site) and across the proposed Wisley new settlement. It takes little imagination to see that, even with the proposed SANG, the openness and natural tranquillity of this essentially rural area will be dramatically harmed by the proposed new settlement. (Image 1) (Image 2)

- There are no visual assessments or ecological assessments providing a sound basis for such a radical and unsustainable development proposal.

- There is also no clear evidence in the LDF evidence base to demonstrate that sustainable delivery of the proposed new settlement will be viable or that the timescales within which the necessary public transport and other infrastructure needed to make the new settlement sustainable (if that is even remotely possible) will be deliverable. The unsubstantiated claims to sustainability and the timescales set out in the site schedule for this site and the related evidence base lack credibility, bearing in mind that this is a privately-owned site with no direct rail connection, no existing services or community infrastructure and no meaningful programme for its funding and this is a long way from meeting the principles identified in the studies and guidance referred to in paragraph 21.6 of Volume V to the Green Belt study, as the following quotations illustrate:

  "Securing transport links that are public - rather than private transport-based will clearly be a major factor in ensuring that such places advance the cause of reduced carbon emissions."

  "It hardly needs stating that excellent public transport is essential to a networked cluster".

"Securing transport links that are public - rather than private transport-based will clearly be a major factor in ensuring that such places advance the cause of reduced carbon emissions."

"It hardly needs stating that excellent public transport is essential to a networked cluster".
• It is also a long way from fulfilling the Core Principles set out in paragraph 17 and paragraphs 29-39 of the NPPF.

• The case studies cited in the Volume V of the Green Belt study show that transport issues have arisen where settlements identified for growth did not have existing access to public transport. The former Wisley airfield site does not adhere to the well-known "beads-on-a string" concept of growth in the south-east and the London hinterland. However, in contrast with the Wisley new settlement proposal, the expansion of other settlements in the district, including Horsley and Effingham, could function very effectively as networked growth areas in accordance with that concept and with strong sustainable transport links to Guildford, London and other centres of employment, facilities and community services. The rejected draft Guildford Local Plan (due to be re-written after the election in May 2015) and the related evidence base did not appear to have examined properly the opportunities for linked settlements with a "connecting thread of public transport".

• The information presently contained in the LDF evidence base lacks the detail and clarity needed to enable sound comparisons of the impacts and sustainability of the options being considered across a range of This means that local communities are being denied a genuine opportunity to participate on an informed basis in the plan-making process.

• All potential belt releases require properly detailed quantitative and qualitative information to enable sound decisions to be made as to what is the best opportunity for providing sustainable development in the district. Such assessments should be made objectively and on a consistent basis, having proper regard to the principles of sustainability. It is impossible to see how the Wisley new settlement proposal can be justified on the basis of such an approach and there is currently no reliable or proportionate evidence base to justify it or (equally important) to justify rejecting alternative potential allocations in more sustainable locations in favour of the Wisley new settlement proposal.

Unlawful to allocate without a proper assessment under the Habitats Directive and related UK regulations

• There has not been an adequate appropriate assessment in accordance with the Habitats Directive to show that there will be no significant impact on the ecological integrity of the important European Site which is located immediately to the north of the proposed new settlement, albeit with an area of SANG proposed as a buffer.

• The site schedule for Site 66 states:

"Appropriate assessment required at project level to consider impact on the Thames Basin Heath Special Protection Area (SPA) and Environmental Impact Assessment to consider impact on the Site of Nature Conservation Interest".

• A similar statement appears in Table 6 ("HRA Screening of Guildford Site Allocations") on page 45 of the HRA (July 2014).

• These are clear acknowledgements that the proposed new settlement is likely to have significant impacts on the important protected ecological assets in this SPA and that they have not yet been properly addressed. This is an issue that should be properly addressed in an appropriate assessment under the Habitats Directive and a strategic assessment under the SEA Directive before the Local Plan is adopted rather than at the subsequent project stage. This major allocation (and therefore the Local Plan as a whole) cannot be considered to be legally compliant or sound unless and until this has been properly undertaken.

• The proposed new settlement will include development for uses other than residential. In accordance with the specific terms of the Thames Basin Heathlands Special Protection Area Avoidance Strategy 2009-2014, the other uses contemplated in this proposed allocation for a mixed use new settlement is not "exempt" from the need for an appropriate assessment, even if such an exemption could conceivably be claimed for a 2500 residential development on a land so close to the SPA (which is highly doubtful).

• The mix of uses proposed on the site, together with the necessary infrastructure works (on-site and off-site) are likely to have significant impacts on the ecology and wildlife in and around the site, with direct and indirect effects on the ecological integrity of the SPA and its ecological.

• For example, the country lanes that would serve the proposed Wisley new settlement are already dangerous for pedestrians and cyclists to use -the widening and other "urbanising" works needed to make them safe (as a means of sustainably accessing good public transport and other facilities in Guildford, Effingham, Horsley and other existing settlements) will have serious impacts on habitats, as well as in terms of "urban" encroachment into the countryside, with the likely loss of hedgerows and woodland as well as other valuable habitats and open There is
no sign that such impacts have been meaningfully addressed in the Interim Sustainability Appraisal Report (August 2014) or in the HRA (July 2014) or in the Green Belt Study (April 2014).

- The proposed new settlement will occupy land and habitats that are likely to be functionally related to the European If so, there would be significant direct and indirect impacts on the ecological integrity of the European Site (which also comprises the SSSI) and the species it supports. Such impacts must be assessed before any such allocation could be promoted. On the basis of the current information in the evidence base there can be little doubt that the proposed new settlement may cause significant ecological harm to these internationally valuable habitats and to the Priority species that they support, despite the proposed SANG area which is to address principally the human intrusion impacts on ground-nesting birds. Other aspects of harm have not yet been described or assessed.

- Such harm would not be justified under Article 6 of the Habitats Directive or the UK regulations transposing the Directive into English law, bearing in mind the Annex 1 species and other important flora and fauna identified as being supported by the This attaches a particularly onerous obligation on the LPA in terms of permitting development which might harm the ecological integrity of the site. It is likely that the harm identified in an appropriate assessment will not be capable of being overridden or mitigated to enable the proposed Wisley new settlement to proceed.

Unlawful to allocate without a Sustainability Appraisal, including a proper assessment under the SEA directive and the related UK regulations

- There has not been an adequate Sustainability Appraisal or Strategic Environmental Assessment in accordance with Section 19(5) of the 2004 Act and/or the SEA Directive and/or the 2011 SEA Regulations.
- For example, the ecological impacts referred to in the preceding section are likely significant impacts in their own right and the failure to carry out an SEA on the project (including an appropriate assessment) would undermine the lawfulness of the Local Plan on that ground alone.
- In addition, there are other likely significant impacts of the Wisley new settlement proposal, as generically identified within the SA scoping report, which have not been assessed in any systematic and comprehensive Environmental Report for the purposes of the SEA Regulations.
- This appears to be the result of a last-minute retro-fit of this major and anomalous If the LPA wishes to pursue this development proposal further then the SEA and Sustainability Appraisal of all proposed allocations should be re-visited so as to ensure that an objective and unbiased assessment of all reasonable options is taken before the forthcoming draft Local Plan is adopted. For example, the provision of significantly increased services and facilities is presumed not to be practicable or deliverable in the context of the larger villages identified for growth in the Settlement Hierarchy, whereas in relation to the Wisley new settlement proposal their provision is presumed to be viable and deliverable with minimal (if any) economic or viability appraisal or programming.
- The question of whether sustainable transport objectives will be fulfilled has not been properly assessed or Judged by the SA objectives relating to sustainable transport and climate change, this proposal for a new settlement should be rejected because the site is remote from public transport facilities and the level of services and facilities needed to encourage sustainable transport choices. It is unlikely to be other than a highly car-dependent development. The level of development proposed will inevitably generate large numbers of car trips which will use the rural roads in this area which are not adapted for safe pedestrian or cycle trips. There has been no attempt to describe or assess these proposals (or the necessary mitigation measures and the likely impacts of such measures) in the context of these important policies or to compare these impacts with the benefits and impacts of reasonable alternatives which are better located to avoid or mitigate such impacts, including expansion of the existing urban areas or the larger villages or sustainable networks of settlements.
- Recent studies by Surrey County Council and Guildford Borough Council in relation to traffic congestion and air quality point to the inappropriateness of the proposed allocation of a new settlement close to an already heavily congested trunk road and junction (M25/A3 Junction 10) and in a location which is unlikely to encourage sustainable travel Such studies add to the strategic importance of ensuring that Guildford’s growth is capable of being achieved on the basis of a sustainable transport strategy rather than encouraging a large-scale, car-dependent scheme such as the proposed Wisley new settlement.
- The last minute and superficial assessments in the Interim SAR (August 2014), the HRA (July 2014) and Sections 22 to 24 of Volume V of the Pegasus Green Belt Study (April 2014) are inadequate and provide scant justification (if any) for the harm to the green belt and environment that will inevitably be caused in this attractive and environmentally valuable part of the green belt. Whilst the site undeniably bears the signs of its past airfield
use, the remaining structures are almost all surface level (runways and hard-standing areas) with virtually no above-ground built structures or other features which undermine or harm the openness of the green belt. There are also clear signs of the runways being "naturalised" over time by vegetation and the rural character and beauty of the areas around site is predominant.

National Planning Policy Framework (NPPF) and the importance of community engagement

- There is clearly massive community opposition to the proposed allocation of the former Wisley airfield as a new settlement and such opposition is based on sound sustainable planning principles.

- The Habitats and SEA Directives (and the regulations transposing them into English law) require such assessments to be carried out and to be properly consulted upon (including public consultation as well as with the relevant statutory bodies) before the relevant plans and programmes are Failure to do so is unlawful.

- Paragraphs 165 - 167 of the NPPF also require these matters to be dealt with in the plan preparation process and it is clearly inappropriate to promote a major new settlement before the necessary assessment, appraisal and consultation procedures have been completed and consulted upon.

- Reference is made above to the lack of transparency and consistency of approach in the site appraisals at Appendix B to the Interim SAR report (August 2014). Also to the unjustified "cap" on the critical mass level when evaluating the potential for expansion of larger villages which, in contrast with Wisley airfield do have good public transport connections and significant physical and community It is unclear why other sites within such larger villages (other than those specifically promoted in the plan) are not considered as "reasonable alternatives" for the purposes of the Interim SAR, including sites which might be available for sustainable development if the Horsley inset map were to extend up to the corner of Long Reach and Green Lane (and other possible extensions of the inset boundary). There are likely to be other opportunities for sustainable development in Horsley and other larger villages as reasonable and more sustainable options than the Wisley new settlement proposal.

- Failure to consider and consult upon these reasonable alternatives undermines the LPA's promotion of the Wisley new settlement proposal, in the light of the following guidance in paragraph 52 of the NPPF:

"The supply of new homes can sometimes be best achieved through planning for larger scale development, such as new settlements or extensions to existing villages and towns that follow the principles of Garden Cities. Working with the support of their communities, local planning authorities should consider whether such opportunities provide the best way of achieving sustainable development."

Summary and Conclusion

The LPA should abandon the proposed Wisley new settlement allocation and refuse permission for this application because:

- It has not been properly assessed in accordance with Section 19(5) of the 2004 Act and/or the Habitats Directive and/or SEA Directive and/or paragraph 165-167 of the NPPF and the relevant regulations as referred to above;

- It is in an unsustainable location which is likely to result in a very large car-dependent community causing serious harmful impacts on road safety (particularly pedestrians and cyclists using the rural lanes around the site), traffic congestion and air quality;

- Its proximity to the SPA, SSSI and SNCI and the scale and character of the proposed mixed-use development will seriously harm the ecological value of these important sites and other valuable ecological assets in the area;

- The large-scale development of this attractive, large and tranquil part of the green belt will be inconsistent with the objectives of green belt policy and will harm the public interest in maintaining and enhancing the valuable network of public ways and routes through and around the site and the attractive countryside views and experiences they provide.

In the light of this, the LPA should seriously reconsider drawing village inset boundaries and making additional residential and other allocations to provide for sustainable development in larger villages and settlements which will:

1. encourage sustainable transport choices, including walking, cycling and public transport;
2. strengthen the well-located larger villages to achieve "critical mass" populations of 4000-5000 (or sustainable networks of larger villages and settlement) in accordance with the guidance and studies referred to in paragraph 6 of the Green Belt Study (April 2014) to enable them to sustain and increase the quality and range of services and community facilities that they could provide and in the interest of a better environment and the well-being of the communities that live there; and

3. allocate suitable sites for development within and on the edges of such settlements so as to enable such settlements to be master planned to ensure that high quality and integrated designs produce developments to improve the overall quality of the settlements and the well-being of the communities living there, whilst properly protecting the landscapes and rural environments in which they exist.

I trust that these representations will be of assistance to the Local Plan consultation process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: [IMAGE 1.jpg](591 KB)  [IMAGE 2.jpg](131 KB)

---

2. At no stage in the previous draft Local Plan process and subsequent consultation did this site appear for consideration, now suddenly it has been included in the present draft Local Plan Strategy & Sites increasing the development burden within West Horsley.

2. The site to the south of East Lane, adjoining Lollesworth Lane is an important green space to be viewed and enjoyed when traversing East Lane in either direction.

1. This site is unsustainable and unsuitable for the proposed density of development due in part to its green belt status; in part to infrastructure fragility and incapacity (drainage and road surfaces - both of which are already failing due to lack of ongoing investment to improve capacity)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to object to the proposed draft Local Plan on the following grounds:-

Policy P2: Green Belt and the Countryside
1. The first line of Policy P2 states, "We will continue to protect the Metropolitan Green Belt against inappropriate "
2. The residents of West Horsley are totally opposed to the village's removal from the Green Belt by insetting.
3. The Green Belt & Countryside Study is flawed.
4. West Horsley Parish is one of a rich and varied mix of well-established low housing density settlements with a considerable number of historic buildings.
5. Positioned on the north side of the North Downs, partly in the Surrey Hills AONB, it attracts a considerable number of recreational visitors (walkers and cyclists) through the seasons each year.
6. The Key Evidence document "Guildford Borough Economic Strategy 2013-2031" made no case for locating large numbers of homes in West and East Horsley or neighbouring villages.
7. Proposed new economic development site proposals are on the opposite side of the Borough to West Horsley

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policies S1 Presumption in favour of Sustainable Development, 52 Borough Wide Strategy, H1 Homes for all, H2 Affordable Homes

1. Policy S2 states that provision will be made for 13,800 new homes over the Plan Period 2013 to The number of homes is too high and unsustainable in Guildford's villages. The Site Allocations list totals 12,698.
2. Village expansion is With only one small shop, no post office,a very limited weekday only bus service through the village, it is clearly unsustainable for the proposed high volumes of new housing development.
3. The development of 385 homes on the 4 proposed sites are at much higher densities than currently exist in the village settlement and will be totally out of character with the existing mix of different housing styles and layout of the village.
4. The homes building proposals are unsustainable in terms of schooling,drainage, roads capacity, shops, parking in East Horsley (shops and station), public transport.
1. The need for so many houses to be built in West Horsley over the first 5 years of the Plan period 2018 to 2033 is totally unproven.

2. The West Horsley Parish Council and Surrey Community Action Housing Survey conducted in May 2015 identified a limited need for some 20 affordable homes for local people who want to remain in the village, i.e. for young people and for elderly people who wish downsize to a smaller home.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Home Farm, Effingham Page 402

We are pleased to see that sites earlier proposed for development at Home Farm, Effingham have been removed from the submission local plan as these developments are now in hand.

Maps, Appendix H Effingham Page 12

We note that the revised inset boundary is an improvement on the previous plan. However, we note it does not meet our previous submission which should be re-considered at examination.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Paragraph 2.10a Page 14

It is one thing to recognise the pressure on existing rural infrastructure and the additional stress that will be caused by planned growth but quite another to resolve this problem for local residents and businesses. There is little flexibility in the narrow rural road systems that serve the many villages, especially in Effingham and Horsley, where the rural roads are too narrow to take the development traffic from the planned development of Wisley. The Parish Council is concerned that the safety of road users will be unacceptable and that further consideration needs to be given to reduce the housing targets for the villages.

Paragraph 2.14a Page 15

Our concerns over traffic congestion link closely to our concerns over the pressure on the infrastructure. We recognise that there are plans to improve the A3/M25 road junction but cannot see how improving the flow between these roads will make an overall cost effective improvement, as it is the traffic density that results in the roads having the reputation for being “car parks”. At peak times the two roads are barely operating and we are concerned that the extra traffic from the Wisley development and more generally will pass the tipping point for gridlock.

As acknowledged, most local rural roads are single carriageway and whilst mainly adequate for cars to pass in opposite directions, lorries often have difficulties in passing. We are particularly concerned about site traffic for the development of Wisley on roads, many of which do not have footways. We believe this to be a serious safety issue.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Section 3.1 Wisley Page 383-4

We do not consider the Green Belt inset should be expanded at Wisley. Indeed, we believe it would be better to reduce the inset to ensure more defensible boundaries and more sustainable development. Guildford Borough Council is defending a current appeal for development at Wisley as an overdevelopment and disproportionate attempt to locate 2068 dwellings within the ancient village of Ockham. The planned inset would result in a similar overdevelopment of the site.

We welcome the reduction in the housing target to 12,426 by 2034. However, we believe greater weight should be given to the constraints of infrastructure and Green Belt resulting in a further reduction in housing numbers. We note that our neighbouring Mole Valley District Council are consulting on a very much lower housing commitment which we believe takes more account of these constraints.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Arlington Parish Council response to the draft Guildford Local Plan with regards to the Strategic Housing Market Assessment (SHMA)

Arlington Parish Council’s (APC) comments on the Borough's proposed housing numbers are dealt with separately in this letter from those matters particularly affecting Artington, which are dealt with another letter of today's date.

The draft Plan proposes building 13,800 new homes based on a 25% increase in the Borough's population over the Plan period to 2033, necessitating 693 houses per annum to be built, 70% within the Green Belt. The use of the Green Belt for this purpose would be irreversible.

A PC objects to the lack of reliable up-to-date evidence to support the population increase and the pivotally interconnected housing need numbers. Inevitably, by reason of the passage of time, the Strategic Housing Marketing Assessment (SHMA) published in September 2015 has no regard not only for the significant findings of three well researched studies received during the consultation period, but also for Britain’s decision to leave the EU following the referendum on 23rd June.

The three studies are those undertaken by GBC Cllr Reeve, Mr Niels Laub and Mr Neil McDonald. GBC will be familiar with these studies, so no useful purpose is served by reciting their findings here other than to note that the 693 houses per annum proposed in the draft Plan is at least 35% greater than the number evidenced by the studies. This material potential overstatement of housing needs is even before taking into account the decision to depart from the EU, expected to have significant economic and immigration consequences, both nationally and locally. These consequences were all unforeseen when the SHMA and draft Plan were published and approved by GBC. They are likely to conspire to reduce the need for new dwellings in the Borough.
While APC is sympathetic to the difficulties and inconvenience involved in revisiting the draft Plan at this stage, normal professional standards require that any important exercise such as the preparation of the draft Plan should be revisited in the light of significant new information and/or subsequent events, e.g., those which call into question key features of the evidence on which the draft Plan is based. Accordingly, APC considers that the SHMA and the draft Plan should be reviewed by GBC and its advisers to address these important issues before the draft Plan is submitted to HM Inspector.

Concern has repeatedly been expressed by borough councillors that failure to move forward on the basis of the higher number of houses being built may well result in HM Inspector unilaterally imposing an even higher number. Particularly in the exceptional circumstances that have arisen since the preparation of the SHMA and the draft Plan, APC considers it both alarming and wholly unacceptable that this should be regarded as a valid concern or a justification for not revisiting the draft Plan.

Re-development of Mount Browne

Mount Browne has been assessed as an area of ‘high sensitivity’. The potential development of 116 houses or of commercial redevelopment on Mount Browne would constitute a major development for this site. Paragraph 116 of the NPPF states that planning permission should be refused for major developments in AONB designated areas unless exceptional circumstances are demonstrated. The plan and GBCS Volume V provide no evidence of exceptional circumstances to support such major development or removal from the Green Belt.

The re-development of this rural site could have a major impact on the open character of the area that lies between the North Downs and Farncombe and also between Guildford and Godalming. This area is clearly visible from adjacent areas and is treasured by local residents, the larger community and visitors to the area.

Mount Browne and the adjacent University of Law are regarded as an essential part of the green lung which separates Guildford and Godalming. They represent the first line of defence against the risk of urban sprawl.

It is crucially important to ensure that it remains essentially open in character and be protected by AONB and Green Belt planning guidelines and constraints.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The University of Law, also assessed as of "high sensitivity," merits similar consideration to the neighbouring Mount Browne site. The University of Law and Mount Browne are almost connected and should not be considered in isolation.

In the GBCS Volume V justification for in-setting discusses the whole University of Law site but then in-sets just the car park in the Local Plan. APC finds this incongruous.

In the Local Plan the site is potentially allocated for student accommodation to be located on the site of an existing car park. This car park currently provides an open vista from the footpath to the north which would be lost if development was above ground level.

To provide protection to the essentially open character the site must be protected by AONB and Green Belt planning guides. Its removal from the Green Belt would not accord with Paragraph 85 of the NPPF. There is no exceptional circumstance, justification or need for The University of Law car park to be in-set.

APC believes the case to in-set has not been made and, accordingly, objects to the proposal to in-set the University of Law car park from the Green Belt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Artington's contribution to the Borough's heritage

Residents passionately believe that Mount Browne and The University of Law sites should be considered as an integral part of the wider environmental setting. This setting represents a unique feature of the Borough's heritage, yet disappointingly is not recognised as a separate entity in the Draft Local Plan.

Broadly, the setting covers the area contained within the boundaries of the small parish of Arlington, other important features of which include:

- to the north, the historic North Downs Way and also Sandy Lane, the latter with several houses of great architectural interest;
- to the east, the River Wey crossed by North Downs Way, with St Catherine's Hill and its chapel;
- to the south, outstanding views over a rural landscape and more houses of architectural
interest along the Old Portsmouth Road.

With its interconnecting network of footpaths, the whole of this area is very attractive and accessible to visitors, with the attendant benefits they bring to the Borough.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Major external development and its impact on local minor roads

The draft plan contains little information on local infrastructure. Artington parish and neighbouring communities have particular concern that the proposed neighbouring major developments would have a serious impact on the fragile local network of minor roads, especially the B3000.

Although not within Arlington parish, Blackwell Farm has been identified as a potential new 'Urban Local Centre' with a potential for 1800 homes. In addition there is the potential for 100 homes at Broadford Business Park and the major development of Dunsfold New Town. If implemented, these major developments would have a significant impact on existing communities such as Puttenham, Compton, Famcombe, Peasmarsh, Shalford and Artington, particularly with regard to the local road network. Of particular concern is the already overloaded and inadequate B3000 rail bridge, which has been risk-assessed as being unsafe and in urgent need of replacement. This hazardous nature of this narrow humpbacked rail bridge on the 83000 is compounded by its limited visibility. There are no plans or available funding to provide separate provision for cyclists and pedestrians, nor update the bridge to make it suitable for today's volume of traffic, which exceeds 5 million vehicles per year, a number being driven by the opening of the Hindhead Tunnel and the A3 bottleneck moving to Guildford resulting in drivers seeking alternative routes to the A3. This number is likely to be greatly exceeded if the potential developments mentioned above proceed resulting in gridlock on the already overloaded local minor roads.

The existing infrastructure simply does not support the proposed house build, particularly having regard for Guildford's exceptional 'gap town' characteristics, and the draft Local Plan does not recognise the problem. This is clearly untenable. Going forward, the supporting infrastructure must be commensurate with the future housing population. It is crucially important firstly to demonstrate the feasibility of implementing the necessary infrastructure improvements and then, where appropriate, the cost of providing such needs to be factored into the overall development cost. Not to do so would be irresponsible.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
**Relationship between Green belt and Surrey Hills AONB**

In his foreword Councillor Spooner stresses that the Local Plan will conserve and enhance the unique qualities of our natural and built environment, especially in the Surrey Hills Area of Outstanding Natural Beauty'. However, the plan proposes to in-set from the Green Belt parts of Mount Browne and The University of Law sites, both of which lie within the Surrey Hills AONB. Paragraph 115 of the NPPF makes it clear that AONBs should be afforded the highest level of protection in relation to landscape and scenic beauty, indeed AONB has equal statutory protection to a National Park.

Development proposals within and adjacent to the AONB should conserve and enhance its special qualities. The proposal to in-set removes a level of protection and is contrary to Councillor Spooner's stated goals.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Arlington Parish Council response to the Draft Guildford Local Plan and its direct impact on the Parish Arlington Parish Council (APC), after due consideration of the Draft Guildford Borough Local Plan, would like to comment on those aspects which directly impact Arlington Parish. In particular:

APC strongly objects to the in-setting from the Green Belt of the Mount Browne and the University of Law sites as the case is not made.

APC strongly objects to the adverse impact that the proposed neighbouring major developments would have on the local minor roads and in particular the B3000, for which there are no mitigating proposals in the Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The Save Hogs Back response to the June 2016 Pre-Submission Consultation (Regulation 19) provided a comprehensive set of reasons why the Blackwell Farm strategic development allocation was so unacceptable that the Council should not proceed with it. Apart from the serious environmental damage it would do, we questioned whether it was practicable. The June 2017 Consultation indicates both the determination of the Council to press ahead with this extraordinarily inappropriate scheme and also that it is trying to deny the implausibility of the development proceeding, if at all, without appalling consequences. Modest amendments have been made to various policies in the Plan, but collectively they demonstrate that after another 12 months of searching the Council has still found no solutions to the problems we identified.

2. The unresolved problems centre on access and egress. Although pitched as an urban extension to Guildford (in the Spatial Vision, in Policy A26 and in paragraphs 4.1.8 and 4.6.24), Blackwell Farm has proved impractical to integrate into the town despite its physical proximity. There are many facets to this, the main ones being:

- the Blackwell Farm development cannot proceed without the capacity of the A3 trunk road being increased to bolster the strategic route in and out of Guildford, and the possibility of this happening is unknown;
- movement between the development area and Guildford, which is already extremely congested, would be substantially more impeded by the development;
- alternative means of access to the development area would have both significant practical problems and significant adverse consequences for the highway network;
- the ‘Sustainable Movement Corridor’ to tackle that congestion is most unlikely to be effective on the scale necessary to resolve access issues and will fail in its key role of reducing congestion;
- the combined effect of the Blackwell Farm development and the A3 widening through Guildford (itself needed in part because of Blackwell Farm) would be to raise substantially the Nitrogen Dioxide levels in Compton on the B3000 still further above legal limits at the most polluted point in the Borough.

In each case the Proposed Submission Local Plan has wholly failed to show that the Blackwell Farm development is practicable. We examine these in more detail below, after showing that the pressure on the road network in the vicinity of Blackwell Farm will be discernibly greater than forecast only one year ago.

Traffic generation in relation to road capacity

3. Mouchel have pointed out, in advice submitted by Highways England in response to the Proposed Local Plan 2016, that there are significant limitations in the evidence presented in the Strategic Highways Assessment Report (SHAR) accompanying the Proposed Submission Plan in June 2016 which affect Blackwell Farm:

- the traffic generation model used in the Local Plan allows no merge delay at junctions: this is clearly not the case at present and is not claimed by GBC to be the case even after new road infrastructure has been built. As Mouchel point out, the effect of the model is to make the A3 and A31 particularly attractive roads because they are assumed to be readily accessible and to draw traffic towards them, whereas in reality there will be less ready access and greater use of the local road network;
- the model uses average peak period traffic movement figures across the three hour period 07.00-10.00, which will tend to understate movements in the true peak hour (circa 08.00-09.00). That will have a significant impact on congestion during periods when the network is most heavily used and, in the vicinity of Blackwell Farm, overloaded.
4. The SHAR indicated that the total vehicle generation anticipated by the whole Blackwell Farm development would be 717 vehicles leaving in the weekday average morning peak hour (Table 3.3, zone 576). How these vehicles would get out of Blackwell Farm has still not been properly resolved. Policy 26 includes a Plan showing an access to the development site (indeed the only access to the development site) from the A31 at its junction with the very minor road called Down Place. In June 2016 the Local Plan stated that this would be the “Primary vehicular access to the site allocation”. This would “provide a new route to the Surrey Research Park, the University of Surrey’s Manor Park campus and the Royal Surrey County Hospital.”

5. The Local Plan 2016 identified that a “Secondary vehicular access is required from the site to Egerton Road, preferably via Gill Avenue”. The word ‘preferably’ is instructive because it indicates that it was unclear in June 2016 how Blackwell Farm would be connected into Guildford. It is important to appreciate that, after another year of investigation, the Council is no closer to finding a workable means of channelling traffic out of Blackwell Farm towards Guildford or back into it, let alone linking this access with the proposed new access to the A31. On the assumption that a means of direct access would be found, the SHAR identified distribution of Blackwell Farm traffic to the network of 342 trips eastbound towards Guildford and 375 trips southbound to the A31 in the morning weekday peak hour.

6. Figure 4.3 of the SHAR estimates traffic on the principal arms of the local network with Blackwell Farm development in place including the link to the A31. This Figure shows that 1,803 vehicles would attempt to enter the Egerton Road/Gill Avenue crossroads by the Hospital in the peak morning weekday hour (one every two seconds). The 342 eastbound vehicles generated by the Blackwell Farm development would account for 19% of the post-scheme traffic on the junction (23% growth on pre-scheme traffic), neglecting the impact of any rat-running traffic. Users of the road would consider this scale of traffic growth implausible and unacceptable given the high level of congestion there at present. The SHAR confirms that the level of congestion on Egerton Road in the morning peak will be substantially worse than at present and will exceed its capacity with the development and its access roads in place (Scenario 3). Table 4.4 (Row 25) shows that Egerton Road eastbound will have a ratio of flow to capacity (RFC) of 0.92 resulting in a level of service with ‘unstable flow operating at capacity’. Table 4.12 (Row 8) shows that Egerton Road westbound will have a RFC of 1.21 (compared with about 1.04 now) resulting in the worst possible level of service with ‘forced or breakdown of flow’. In other words, it simply won’t work. The figures already smooth the morning peak hour figures over a three hour average, as Mouchel noted, so actual congestion in the peak would be worse than these indicators, even assuming zero rat-running traffic.

7. The network effects described in Figure 4.3 of the SHAR omit potential rat-running in the morning peak hour from the A31 through Blackwell Farm to Egerton Road. Drivers passing through Guildford northbound might try to miss the existing substantial queues on the A3 by leaving the A31 just before its junction with the A3 and taking the new link road which allowed them to join the A3 at the Tesco roundabout. Other drivers eastbound on the A31 aiming for Guildford could try to avoid the existing substantial queues both on the A31 and on the A3, as the new road would give them a new means of entry into Guildford from the west. The pressure for rat-running could be considerable if the link was built. Figure 4.7 in the SHAR shows that even after the A3 has been widened there will still be overcapacity and congestion on the A31 close to the A3 junction (and on the A3 through Guildford): this is likely to encourage significant numbers of drivers to dodge the queues on these roads through the Blackwell Farm development. The issue is reviewed in paragraphs 30-35 below, which show that the constraint on rat-running is most unlikely to be effective.

8. In the 12 months since the 2016 Proposed Submission Consultation by the Borough Council (working with Surrey County Council as Highways Authority and Highways England responsible for the A3), the prospect of adequate network road access to Blackwell Farm has not only made no progress but deteriorated. There are some indications of this in the alterations in the June 2017 Proposed Submission:

- the proposed link with the A31 has been downgraded from its ‘primary’ status and by default the link with Guildford is now presented as of equal significance (Policy A26 Infrastructure Requirements item 1); there are various reasons for this, explored below, but fundamentally the Council has been unable to find a way of making the link with the A31 work as it wanted;
- a major new secondary school with six form entry must now be provided on the Blackwell Farm site, which was previously sited elsewhere (Policy A26 Allocation item 9): a school of this size (circa 900 students comprising 180 students in each year group for five school years) would generate a very substantial amount of additional traffic, bringing in about 600 students daily from outside Blackwell Farm, much of it attracted from Guildford, but there have been no changes at all to the proposed capacity of the road network to accommodate this, which can only mean still worse congestion on Egerton Road and the surrounding network than inevitable anyway;
• proposals in principle are now included for limiting the road users on the new route linking to the A31 (Policy A26 Infrastructure Requirements item 3), but these are deliberately left vague as the Council has been unable to find a way of achieving this despite trying to do so for the last year;
• the developer of Blackwell Farm (ultimately University of Surrey) must contribute to funding improvements to the local road network necessitated by the scheme, but this must now have “regard to the Sustainable Movement Corridor Supplementary Planning Document”: as this SPD has not yet been published even in draft, the policy change demonstrates a remarkable lack of clarity about the role of the SMC in relation to Blackwell Farm (where it will go, how it will be built, who pays for it and how it links into the wider network) and creates an open-ended commitment which could affect the viability and deliverability of Blackwell Farm;
• the new Policy A59 has given a clearer specification of the need for a new railway station at Park Barn near the northern end of Blackwell Farm, with access from both the north and south sides: the access from the south will generate additional traffic affecting the roads to Blackwell Farm, especially in peak periods, which has been neglected in the calculation of traffic generation and the modelling of its distribution to the road network, again placing additional stress on already massively overloaded roads in peak periods.

These changes are additional to the increased traffic on Egerton Road and the surrounding network arising in any event from development planned or under construction at Manor Park and at the existing Research Park.

Traffic on the A3

9. Guildford Borough Council has adopted conflicting positions regarding its intentions for traffic on the A3 through Guildford.

10. The Council has endorsed a study commissioned in 2014 from Arup Guildford Town and Approaches Movement Study, a vision statement on transport in Guildford to 2050. This is the basis for the Sustainable Movement Corridor now promoted through the Local Plan by the Council (see paragraphs 51-53 below). However, the Arup study was clear that the purpose of the A3 should be to concentrate through-Guildford movements on this road, assisted by inhibiting its use for local movements. The study recommended:

“Interventions in this strategy that reduce roadspace in the town centre should serve to deter through traffic in the town; they should also reduce short journeys on the A3 within the town (for example, trips from the Surrey Research Park to the town centre via the A3) that will free up capacity for longer distance trips on the A3 trunk road”.

11. The Arup study was clear that there should be no capacity increase on the A3 trunk road through the town:

“In the appraisal of interventions undertaken for this study, all potential interventions that increased road capacity, including A3 interventions (widening, northern bypass, tunnel) and additional road links in the town centre, resulted in increased traffic levels in the long term over and above business-as-usual changes (i.e. in 2031 compared to the 2031 Business-As-Usual). Vehicle mileage increased by up to 2% across the borough and highway delay increased by up to 16%, with associated deterioration in air quality, noise impacts, land use impacts and severance. These interventions are therefore not included in the strategy as they do not strongly support the multi-faceted headline vision for sustainable mobility in the town of Guildford identified to guide the development of the strategy.”

12. However, this study is increasingly being compromised. Arup’s limitation on using the A3 is wholly at odds with the approach which Guildford BC is taking in practice. The Council has decided that the Blackwell Farm development cannot proceed without substantially increased capacity on the A3. The last sentence of the 2017 Local Plan’s ‘Spatial Vision’ states: “The delivery of housing in the later stages of the plan period is dependent upon major improvement to the A3 through Guildford”. This is due to existing major peak hour congestion on the A3 (Local Plan paragraph 2.14a). The June 2016 Strategic Highway Assessment Report concluded that “the results of this assessment indicate that should the [DIT’s] Road Investment Strategy schemes [which include major A3 capacity increases through Guildford] not be forthcoming then the residual cumulative impact of the Proposed Submission Local Plan on the highway network could be considered severe…. To avoid this occurring in such circumstances of the RIS schemes not being forthcoming, then the quantum and location of development as proposed may have to be amended” (page 63, emphasis added). This was confirmed in the 2017 Addendum for the revised Proposed Submission Local Plan (Conclusion, page 2).
13. The Local Plan therefore aspires to a very substantial increase in the capacity of the A3, not least to facilitate car-borne travel to and from the major developments planned at Blackwell Farm (and Gosden Hill Farm). The Spatial Vision states:

“The Department for Transport’s Road Investment Strategy includes schemes for the A3 Guildford and the M25 Junction 10/A3 Wisley interchange. Early, targeted improvement schemes to deliver road safety and some congestion relief on the A3 in Guildford will be delivered within the plan period.”

Paragraph 4.6.14 specifically explains the intention of Policy ID2 ‘Supporting the DfT’s “Road Investment Strategy”’ as including the identified:

“Scheme with construction anticipated to commence in Road Period 2 (2020/21 to 2024/25):
• A3 Guildford – improving the A3 in Guildford from the A320 to the Hogs Back junction with the A31, with associated safety improvements.”

14. In the last twelve months, the likelihood of any of this happening has been slipping away. The Local Plan has now been altered with the deletion from paragraph 4.6.18 of the option of a tunnel under Guildford, so that a road widening scheme is now the most likely option (even if a tunnel remains the Borough Council’s preferred option – see Topic Paper: Transport paragraph 5.101). Exactly what is intended is still hugely unclear: the Infrastructure Schedule for this project in Appendix 3 shows that what is proposed is so vague that it may cost anything between £100m and £250m (project SRN5). Only a brief examination of the A3 through Guildford will in any event show just how difficult, costly and enormously environmentally damaging would be any attempt to add significant extra capacity in each direction to the A3.

15. Also deleted is paragraph 4.6.17 which had stated “Guildford Borough Council and Highways England are in the process of agreeing a Statement of Common Ground which sets out assumptions regarding both the performance and safety outcomes that the RIS schemes can be expected to realise”. This is said to be because an SoCG is likely to be agreed closer to the Examination (Topic Paper: Transport paragraph 5.14), but we would not be surprised if Highways England is unable to make the commitment the Borough Council seeks.

16. Highways England itself is doubtful about how much can be achieved on the A3 and by when. Its response to the Proposed Submission LP on 18 July 2016 stated: “There is still a level of uncertainty on precisely what improvements on the A3 can be delivered and the quantum of growth any potential improvements will facilitate during the Local Plan period.” A Technical Note supporting that submission, prepared by Mouchel, was more precise:

“It should be noted that the A3 RIS 2 scheme is not a committed scheme and no funding has been allocated at present. The details of the RIS 2 A3 Guildford scheme itself are not yet known and so the modelling and testing of an A3 scheme at this stage is considered premature. As such Highways England's view is that this scheme cannot be relied upon by Local Plans to form mitigation for the development proposals.”

17. So far as we are aware, this remains the position in July 2017. The response subsequently advised that the inadequate evidence base meant that the Plan was considered unsound.

18. Guildford BC found this response hugely inconvenient and persuaded Highways England to withdraw this statement after a meeting on 1 September 2016. Highways England’s letter on 5 October 2016 doing this stated instead (with our emphasis added):

“You will be aware that Highways England is currently developing options for a potential scheme on the A3 in Guildford, capable of being delivered in the next roads period (2020-2025), subject to the normal value for money being applied. The scheme proposes widening the existing carriageway to provide additional capacity and safety improvements between the A31 Farnham Road and the A3/A320 Stoke Road. The design of such a scheme is complex and needs to consider a number of potential options, a process which takes time to complete. We will continue close working with Guildford Borough Council and Surrey County Council to progress the development of the potential scheme.

We note that the delivery of housing in the later stages of the plan period is dependent upon a major improvement to the A3 through Guildford. It is essential that the Local Plan provides the planning policy framework to ensure development does not come forward in advance of critical infrastructure. As a result of clarification received at our
recent meeting, it is now understood how the Local Plan intends to do this. Therefore we wish to formally withdraw our representation to this policy.”

19. While Highways England is urging caution, Guildford’s Local Plan continues to make highly questionable assumptions. On timing, Appendix C claims that the A3 capacity increase will be ‘delivered’ between 2023 and 2027. This conflicts with paragraph 4.6.14 of the Plan (above) which expects construction to begin three years earlier. Delivery in 2023-27 is itself barely consistent with the Council’s own Topic Paper: Transport at paragraph 5.88, which reports that “Highways England has advised that, if a scheme is approved with funding agreed, construction is unlikely to be start[ed] until 2024 at the earliest, with construction taking 2½ years.” This would mean that the capacity would only become available in 2027 at the earliest, in effect postponing by some years the Plan’s aspiration for A3 widening.

20. On funding, there is no clarity where the money for A3 widening would come from, even if it did surprisingly pass the value-for-money test. The proposed submission Local Plan has been amended from one year ago in the Infrastructure Schedule in Appendix C to give the impression that developers are now expected to foot more of the bill, further adversely affecting the viability and deliverability of Blackwell Farm. The change states the funding source will be ‘Highways England and developer contributions’.

21. Finally, the exorbitantly expensive, damaging and disruptive widening of the A3 cannot be expected to achieve its objective of alleviating traffic flows sufficiently to accommodate effectively traffic from Blackwell Farm. Congestion will, remarkably, be worse with the A3 widened than without it. The SHAR reports in paragraphs 4.8.4-6:

“4.8.4 Table 4.1b shows in the PM peak that while the network performs better in Scenario 5 [i.e. with the A3 widening in place] compared with Scenario 3, it is still worse than in Scenario 1 with vehicle hours higher and vehicle speeds lower by 12% and 2% respectively.

4.8.5 As noted above in Section 4.5, the capacity increases on the M25 and A3 result in some high flow increases as trips re-route to make use of the improvements. In turn, this affects roads approaching the A3, such as the A320, A31, A25 and B3000. These also see high flow increases with some, such as the A320, experiencing a significant deterioration in the Level of Service.

4.8.6 It should be noted that despite these improvements, Figure 4.7 shows the A3 is still operating overcapacity with resulting impacts on congestion.”

22. The Borough Council’s own evidence in both the SHAR and Arup report is that widening the A3 will increase congestion in the town rather than relieve it, with associated deterioration in air quality, noise impacts, land use impacts and severance. Blackwell Farm would damage the whole of Guildford. The likelihood of the A3 capacity being increased is less now than it was one year ago. So far as we can see, the ‘do nothing’ option for the A3 remains squarely on the table and is an increasingly likely outcome.

23. In summary, the evidence on the A3 consolidated during the last year shows that it is currently simply not known:

- if a suitable widening scheme can be designed and if so how much it would cost;
- whether the scheme would meet ‘value for money’ tests;
- whether the money for it could be found;
- whether the A3 capacity could be increased in time to assist the development of Blackwell Farm during the Plan period, as the earliest provision date would be 2027 (and probably later).

Finally, even if built, the widening of the A3 would generate congestion in Guildford rather than relieve it and would itself be even more over-capacity than it is now. The Borough Council’s reliance on the A3 capacity improvement is foolhardy in the extreme. Not proceeding with the Blackwell Farm development would be a far superior option.

24. The Council recognises that the Blackwell Farm development cannot proceed until the A3 has been widened, but realises that this cannot be achieved until, at best, near the end of the Plan period. As a result of the lack of progress in agreeing A3 capacity increases, the rate of provision of houses in Policy S2, which was back-end loaded in the 2016 Proposed Submission, is now in the 2017 Proposed Submission still more heavily skewed towards the end of the plan period. The 2019-20 provision has been dropped from 500 to 450, while the annual provision in the last three years of the Plan has been raised from 790 to 850. There is insufficient evidence to show that 850 dwellings per annum could be
constructed and sold in the Borough in those last three years: the numbers reflect not how the housing market works, but the contortions which the Council has gone through to square its housing provision numbers with the aspirational timetable for the widening of the A3. A far superior option in both housing and transport terms would be to abandon both the Blackwell Farm development and the A3 widening (which in part is justified by Blackwell Farm as well as facilitating it).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

[Text continuing from previous comment]

Access from the A31 Hogs Back

Junction with the A31

25. The principle of a new signalised junction on the A31 to facilitate access to Blackwell Farm is project LRN3 in the Infrastructure Schedule. The Plan accompanying Policy A26 Blackwell Farm is unchanged from June 2016. It continues to show a road access at a widened junction of Down Place with the A31, passing over the A31 slip road onto the A3 northbound. Our response to the June 2016 Consultation demonstrated, in a commissioned report from transport specialists, that the proposed signalised junction at Down Place with the A31 would be most unlikely to function effectively. Furthermore, Surrey County Council’s Strategic Highway Assessment Report June 2016 shows that the new junction would cause all users on average a 35 second delay compared with no junction (Table 4.11). In the last twelve months the Borough Council has been forced by a Freedom of Information request to release a sketch map provided by the University of Surrey showing the latest proposals for this access. This involves a junction slightly west of the site originally intended but shows no distance measurements. It shows too an extra westbound lane for traffic on the A3 over-bridge but no bridge widening. Further proposals exist for this junction but have been denied to Save Hogs Back on weak excuses. Also, there appears to be no proposal to co-ordinate this junction with improvements to the Down Lane junction on the opposite side of the A31 slightly to the east, even though the creation of the Down Place access could ordinarily be expected to generate significant additional use of Down Lane.

26. The lack of transparency by the Council is significant: unless demonstrated otherwise, we consider that the proposed access at Down Place is likely to remain impractical for the following reasons.

- There does not appear to be sufficient road width for the proposed junction.
- A signalled junction is likely to be over-capacity at peak periods.
- Travellers leaving Blackwell Farm this way in the morning peak will suffer major tailbacks due to the overloaded A31 eastbound inhibiting left turns (the peak flow direction).
- Widening of the A3 over-bridge may well still be necessary at vast cost.
• Only a very environmentally damaging roundabout in the AONB on the top of the Hog’s Back (previously opposed by Borough Councillors) could be sure of accommodating likely flows.

Access road between the A31 and Blackwell Farm

27. Project LRN4 in the Infrastructure Schedule is an access road at Blackwell Farm with a through link to Egerton Road. The Plan continues to give the misleading impression that “The design of the improved Down Place access road or a new adjacent parallel access road will be sympathetic to its setting variously within the AONB and AGLV” (Infrastructure Requirements item 2). A significant road connecting to the A31 could not possibly be achieved by an “improved Down Place access road”, the route of which is narrow, lined by mature trees on both sides, and includes a significant sharp bend, while any alternative could not possibly be sympathetic to the AONB and AGLV. The construction of an access road through an AONB to a new urban extension would be major development in its own right. This could only be justified in AONB policy terms if there were exceptional circumstances. There are none of these and none are claimed or demonstrated.

28. The principal difficulty which has arisen in the last year regarding the new link road is that the Council has been unable to find a workable solution for the local road network. The Council wants residents of Blackwell Farm and employees at the Research Park and its proposed extension to be able to enter and leave either in the Guildford direction or the A31 direction, but it does not want most other drivers to use the same roads if they don’t really need to be there. There appear to be two intentions: to constrain drivers who are just passing through – so as to avoid rat-running (especially necessary if a direct through route can be found south of Manor Copse) – and to avoid attracting drivers who currently use Egerton Road. In both cases the intention is to avoid causing adverse network effects if drivers divert onto the new link, e.g. rat-runners overloading Egerton Road still further, or the new access prompting more traffic on the A31.

29. Policy A26 in the June 2017 Proposed Submission Local Plan sets out its solution: to provide a new route “between the A31 Farnham Road and Egerton Road” for “employees and emergency vehicles” (only) to the Surrey Research Park, the University of Surrey’s Manor Park campus and the Royal Surrey County Hospital. We address in this section the practicability of selecting users for the public highway. However, the matter is also linked to the separate issue of how to link Blackwell Farm into Egerton Road, the main road into Guildford (see paragraphs 47-50).

30. We have tried for the last year to obtain from Guildford BC and the County Highways Authority an understanding of exactly how users of the proposed new road network would be restricted to those people deemed suitable, with everyone else barred. No credible explanation has been provided. The matter is completely ignored in the Borough Council’s Topic Paper: Transport (June 2017) and Strategic Highway Assessment Report Addendum (June 2017), and is restated but not explained in Guildford Borough Transport Strategy 2017 (June 2017). This is an issue which cannot be brushed under the carpet because it lies at the heart of the credibility of the link to the A31.

31. The local authorities have been thinking about the issues raised but failed to find an answer after another year of investigating. Surrey County Council has indicated that its preferred option is the use of Automatic Number Plate Recognition (ANPR) coupled with a permit system. However, there is a general right of public access on the public highway without the State snooping on who uses it by means of cameras, so the legality and practicality of any control system remains to be resolved. For this method to function, therefore, we anticipate that cameras would have to monitor passage on private roads, raising the prospect that Blackwell Farm might not be fully accessible on the public road network. It remains unclear what would happen to drivers whose number plates were not ‘authorised’ to use the road, or how they could be discouraged from arriving in the first place. If there was a system of fines for unauthorised use of the road link, this would require the co-operation of public authorities in perpetuity (which would need to have ongoing funding from the development). With private roads, control of the network would be lost to a private interest whose priorities might not always be the same as those of a public authority. Rights of access to the private roads could at any time be changed by the landowner by reference to which vehicles were allowed passage, when, at what cost, or in other ways. We would expect an urban extension to Guildford reliant on access and egress by private roads to be fundamentally unacceptable.

32. It is unclear whether Guildford BC appreciates the impracticability of the proposed differentiation between acceptable and banned users of the road. There will be thousands of ‘legitimate’ drivers resident in the Blackwell Farm housing development. There will be many hundreds of employees in the Research Park and its proposed extension. There will be hundreds of staff on the Manor Park campus and at the Hospital. Identifying these individuals and, specifically, the cars they will be driving would be a nightmare, made worse by staff turnover and churn in the occupancy of the housing
development. Legitimate individuals may have good cause to use alternative cars. The newly introduced secondary school would be largely (two thirds) for the benefit of non-residents of the Blackwell Farm development, so large numbers of drivers can be expected to arrive from elsewhere using the link road, and would need to be registered. Many others will claim legitimate cause for registration on the ANPR system, such as staff at the Nuffield Hospital as well as the County Hospital, employees of shops and services in the area, taxi drivers and so on. The system of registration would become very large and unwieldy, requiring continual (and rapid) update, at real cost. A reliable and effective appeal system would be needed, but the frustrations of both registered and especially non-registered users of the road are still entirely foreseeable.

33. As the transport consultant to Compton and Worplesdon Parish Councils notes, the inevitable complexity of an ANPR process raises a series of questions related to site deliverability such as:

1. Will the developer provide for the financial enforcement costs of the link road restrictions in perpetuity? Is this included within the £20 million cost for LRN4?
2. Will Surrey Police provide the enforcement of the ANPR in perpetuity?
3. How will all of the people who will be granted access to use the road be differentiated from through traffic?

34. Answers to these questions and resolving other practical concerns are fundamental to the successful deliverability of the vehicular link road and the urban extension as a whole. The road must not attract unwanted road users, but must still achieve the aim of serving all of the desired users. So far the Council has offered no commentary at all on how these awkward issues might be resolved, or on how the use of private roads to achieve a public purpose can be made to function without unacceptable risks of unilateral action by the landowner.

35. The outcome seems to us clearly inevitable if a link road is built. It will not be workable. Instead of a costly system of registration, fines, appeals, etc., the greater likelihood is that the foreseeable cacophony of opposition to a system which appears indiscriminate, unfair and ineffective will cause the system of ANPR and registration to be abandoned in a short order of time. All the disadvantages of the link road to the wider network would then be realised.

**Impact of the link road on air quality in Compton**

36. New information on air quality has become available since the consultation on the Proposed Submission Local Plan in 2016. In particular, Guildford Borough Council has issued an admirably brief and clear 2016 Air Quality Annual Status Report, September 2016. This shows that a specific area of the B3000 road through the village of Compton (in whose parish Blackwell Farm partially lies) has one air quality monitoring position which consistently reveals concentrations of Nitrogen Dioxide (NO2) well in excess of the legal limit adjacent to a dwelling (and the highest figure in the Borough). This is the only location in the Borough where this combination arises. (There were two other places with lesser exceedance of the legal limit, but one was located well away from dwellings and the other was unreliable having only 33% data capture rather than the 75% required.) Other monitoring positions nearby in Compton had NO2 pollution approaching the legal limit.

37. There is no doubt whatever about the cause of the pollution problem: through traffic passing through the village. Large numbers of cars pass through and lorries on the relatively narrow road can cause additional congestion. Further monitoring and modelling is taking place to ascertain whether any further action is required, notably using Advanced Dispersion Modelling Software (since June 2016). The Guildford Borough Transport Strategy 2017 reports that in respect of Compton “The Council is considering whether to declare an Air Quality Management Area and, working with Surrey County Council, will use the results of an ongoing study looking at the pattern of daily exposure to design and implement appropriate mitigating measures” (page 19). The Council has proposed no means of achieving in the short term a permanent reduction in traffic volumes through Compton. On the face of it, an AQMA may well therefore already be needed: under its legal duties the Council must designate one if it is unlikely that the objective values (i.e. less than 40g/im3) will be met in a given timescale, and the Council must then prepare an Air Quality Action Plan (AQAP) with the aim of achieving value objectives.

38. The vehicle count through Compton will rise alarmingly if the Blackwell Farm development and the associated A3 widening are built, inevitably necessitating an AQMA and with little or no prospect of an AQAP being effective. For vehicle impacts, the SHAR treats development of Blackwell Farm and accesses to it as a two-stage process: ‘Scenario 3’ involves the construction of key highway schemes providing access to large development sites (incl. Blackwell Farm) and local highway schemes, while ‘Scenario 5’ involves the widening of the A3 at Guildford (A320 Stoke interchange junction
to A31 Hog’s Back junction). The traffic consequences of each are modelled separately. In practice, as established in paragraph 12 above, there is common ground between the Borough Council, County Council and Highways England that the Blackwell Farm development cannot proceed until the A3 has been widened, so in practice the highways impacts of the site access road and A3 widening are additional if Blackwell Farm is to proceed.

39. The SHAR shows in Figure 4.3 for the morning peak hour that 275 vehicles will leave the A31 at Down Place (for Blackwell Farm, the Surrey Research Park and County Hospital). Paragraph 4.7.5 suggests that these are trips which primarily have their origin in the west, (though the likelihood is that many of them will have actually their origin in the south: traffic from Godalming and Farncombe, for example, could access the A31 at the Puttenham junction and then head for the Research Park or Hospital while avoiding Guildford.) In short, a proportion of the 275 vehicles using the Down Place junction under Scenario 3 will have passed through Compton. Unfortunately, the network effects diagram shown in Figure 4.3 does not extend southwards to Compton to identify an indicative number.

40. The SHAR then indicates the impact of Scenario 5 compared with Scenario 3. This is reported for Compton in Table 4.5, showing that the B3000 through Compton will have one of the highest absolute increases in flow arising from the widening of the A3, with an additional 145 vehicles per hour in the morning peak, representing a further 16% increase in traffic through Compton. The Table notes that both under Scenario 3 (even without the A3 widening) and under Scenario 5 the Level Of Service on the road would be category E: ‘Unstable flow operating at capacity’. The outcome could be even worse: the SHAR notes at paragraph 4.7.5 that potentially the number of drivers attracted to use the new Down Place to Blackwell Farm link could be somewhat higher as the model cannot accurately reflect the queuing that occurs on the nearside lane of the A31 as it approaches the merge with the A3. If so, the numbers passing through Compton could be expected to increase proportionately.

41. The evidence is clear that the combined effect of the Local Plan’s proposals for the Down Place link road to Blackwell Farm and the A3 will greatly increase traffic through Compton which in turn will have an inevitable and appalling impact on air quality (which already exceeds legal limits at one location). Despite this, the Council is in denial about the air quality impacts of its Proposed Submission Local Plan 2017. Aecom have prepared for the Borough Council an *Air Quality Review of Guildford Borough proposed Submission Local Plan: Strategy and Sites “June 2017”*, but this completely fails to appreciate the relationship between the Blackwell Farm development, the proposed road infrastructure developments and air quality at Compton. It provides a series of unwise statements:

(i) “it is predicted that if little development takes place within the area and vehicles emissions are reduced by technological advances these objective exceedance should reduce to below the objective in to the future, without additional measures being required locally” (section 2.3). The reference to little development in the area is absurd: a major urban extension is proposed in the Parish. The suggestion that technological advances in emissions will solve the problem is fanciful in anything other than the long term, whereas there is an immediate need for action to reduce vehicle passage through Compton.

(ii) “The assessment identified a risk of exceedance if traffic flows, primarily on the B3000, increased. The area was not declared as an AQMA as the assessment noted that emissions from traffic were expected to decrease into the future which should lead to a decrease in NO2 concentrations measured in the area” (section 4.1). This finding is simply wrong: Table 4.5 of the SHAR anticipates a 16% increase in traffic in Compton from the A3 widening, not counting any increase generated along the Down Place link road.

(iii) A review of Policy A26 Blackwell Farm (section 5.2.2.1) recognises that “A large development such as this is likely to have an impact on local air quality as there are likely to be large changes to traffic flows on nearby roads and thus impacts on pollutant concentrations”, but failed to realise the consequences for Compton, even though this is nearby and clearly the place with the worst NO2 pollution recording in the Borough (which should obviously be one of the first places to examine for air quality consequences).

(iv) A review of the air quality impact of the Local Plan on Compton (section 5.2.4) similarly fails to appreciate the evidence. This states in full: “There is one large land allocation within the parish of Compton, A26 Blackwell Farm, discussed above. The additional traffic flows predicted to be generated by this development are not predicted to have a significant adverse effect on air quality in the area of the village of Compton. There are no other large allocations local to Compton Village. As a result the implementation of the GBC Draft Local Plan should have little effect on future traffic flows through the area and thus negligible impact on local air quality.”
Rather than address the air quality consequences of Blackwell Farm at the Local Plan stage, when decisions can still affect air quality in Compton, Aecom choose to defer any consideration of the issue until a time when little can be done about it. On four occasions in the Executive Summary the issue is recommended as a matter which can be dealt with ‘through the planning application process’. Once allocations of land are made for development, strategic reasons for resisting them (e.g. on air quality grounds) are typically overruled as matters which should have been resolved at the plan-making stage. Leaving air pollution consequences of proposed development until the planning application stage is an exercise in trying to sweep the issue under the carpet.

42. Aecom’s recommendations in section 5.4 recognise that “The increase in traffic flows associated with the implementation of the Draft Local Plan are predicted to be in the region of 12,500-17,000 vehicles per day on the Guildford Bypass [A3]”, but seem to assume – extraordinarily – that no extra vehicles will pass through Compton (despite the evidence in the SHAR). In our view, the Aecom report and its recommendations represent a significant failure to respond to clear evidence of the air quality damage that the Blackwell Farm development as a whole and the associated A3 widening would inflict upon Compton, about which little could then be done in the short term. We wholly disagree with its approach, which could threaten life-expectancy in Compton.

43. It is hardly surprising that air quality is barely mentioned in the Sustainability Appraisal and treated as a minor issue, as Aecom also prepared this for the Borough Council: paragraph 10.7.1 final indent merely recommends that ‘detailed modelling’ is undertaken close to where very large increases in traffic flows are expected. Paragraph 10.7.7 concludes “Proposed changes to the spatial strategy have little or no implications for health, whilst proposed changes to site specific policy (particularly regarding air quality; see discussion above), responding to the Air Quality Review (2017), are supportive of good health.” Again key decisions are to be left until too late until the planning application stage, with both the SA (at paragraph 10.7.1) and the Air Quality Review (at page 5) recommending that ‘potential air quality issues’ should be added to the list of ‘key considerations’ at the end of the main urban development allocation policies, including Policy A26 Blackwell Farm. This has been taken up by the Borough Council. However, the SA fails to address the key issue that needs resolution now: how to stop additional traffic being attracted through Compton or reduce it.

**Connection to Guildford**

**Linking the Research Park Extension to the road network**

44. The expansion of the Surrey Research Park and the creation of the Blackwell Farm estate are treated as part of the same development in Policy A26. In access terms it is more sensible to consider them separately. The Research Park proposal is for an Extension of 10-11ha, which would be to the north-west of the current Research Park. Access would be straightforward from Guildford: via Egerton Road and Gill Avenue, via the roundabout serving the Research Park by the Occam Road/Priestley Road loop, and by making an extension to Stephenson Way. A road serving the Extension could be taken through the mature hedgerow separating the existing Research Park from Blackwell Farm at a point close to and parallel to the railway line. Stephenson Way has been constructed to allow further extension of the roadway in this location (also giving access to some of the last remaining large vacant sites on the current Research Park). Proposals for the Sustainable Movement Corridor in the June 2016 ‘Progress update’ as part of the evidence base for the Proposed Submission Local Plan at that time were consistent with this. They showed in Figure 5 a schematic route for the SMC. This is reproduced on page 16 of the Guildford Borough Transport Strategy 2017. At its western end this turns north from Gill Avenue, apparently to follow Occam Road and Priestley Road, before making a westward thrust into the Research Park extension area (though whether north or south of Surrey Satellite Technology is difficult to say from the scale of the plan provided). So far as the Research Park Extension is concerned, that would seem to be an understandable direction in which to take the Sustainable Movement Corridor.

45. However, this arrangement would introduce development into Green Belt and the setting of the AONB at Blackwell Farm, breach the excellent existing screening of development from the west, add substantial additional traffic to the heavily congested Egerton Road, and in all likelihood be opposed by existing users of the Research Park who would be unlikely to want a significant thoroughfare in their midst. We therefore consider this proposal unacceptable. We note, too, that the proposed SMC may now stop short of the Research Park Extension (at the roundabout on Gill Avenue at the top of the hill), as indicated in the Sustainable Movement Corridor – Update 20 February 2017 in Figure 4. How or whether the SMC would link into Blackwell Farm or the Research Park Extension has become a mystery.
46. We do not accept that the sensibilities of existing staff in the current Research Park should dictate the most appropriate access route to a Research Park Extension. However, if the intention (and this is unstated in the Local Plan) is that the Research Park Extension could only proceed if a new road link was made to it from the A31, to avoid access only through the existing Research Park, there would be even less justification for the development going ahead. Not only would the scheme still intrude into Green Belt and the setting of the AONB at Blackwell Farm. It would also be partly responsible for requiring major development of a road in the AONB and so could only be justified in ‘exceptional circumstances’ (which it has neither claimed nor demonstrated). Given that the Extension would now be physically separate from the existing Research Park, it would be unable to claim Blackwell Farm as an essential location. So far as we can see, the Extension does not need to be in this location at all, and a more fundamental review of its future location would be in order. That would also help avoid traffic growth on Egerton Road.

Linking Blackwell Farm to Egerton Road and the Tesco roundabout

47. How the Borough Council and the County Highways Authority propose to link the Blackwell Farm development into Egerton Road preferably via Gill Avenue, in accordance with the Proposed Submission Local Plan 2017 Policy A26, remains unclear. It is important to appreciate that, after another year of investigation, the Council is no closer to finding a workable means of channelling traffic out of Blackwell Farm towards Guildford or back into it, let alone linking this access with the proposed new access to the A31. One option has recently been lost by the construction of the substantial School of Veterinary Medicine on the line of one possible access road. We consider the Proposed Submission Local Plan to be derelict in its duty to demonstrate how such a major urban development on the edge of Guildford can in reality be linked into the fabric of the town. The Borough Council is plainly having great difficulty finding a suitable access route. We strongly recommend that the Local Plan should not be submitted for Examination unless this route can be clearly identified first.

Impact of Blackwell Farm and the Research Park development on the local road network

48. Egerton Road is one of the worst congestion hotspots in Guildford and the wider area. Egerton Road provides the main access to the Surrey Royal County Hospital and a superstore, and the only access to Surrey University’s Manor Park student village, Surrey Sports Park and the entirety of Surrey Research Park. The demand for access to all these destinations is growing, notably with building programmes at Manor Park and the Research Park. The high level of existing congestion will therefore get worse, even before Blackwell Farm is contemplated. Egerton Road is accessed principally from Guildford to the east but its capacity is fundamentally constrained by the pinch-point of the A3 underpass, which is a single-carriageway road capable of providing for two lanes of cars each way (but not wider vehicles). Overloading of the roundabouts at either end of the underpass, which both have links to the A3 and other destinations, also act as pinch-points for traffic from numerous sources and cause traffic to back up onto the roads into them (even onto the A3). The likely additional traffic generation at the Egerton Road/Gill Avenue crossroads, immediately west of the Tesco Roundabout, was noted in paragraph 6 above.

49. The concept of adding the major Blackwell Farm estate and a 10-11ha Research Park extension, both accessed from Egerton Road, without any significant vehicle capacity increase on Egerton Road itself, seems astonishing to the point of being hardly believable. The Strategic Highway Assessment Report June 2016 accompanying the Proposed Submission Local Plan a year ago states of the Blackwell Farm development: “in Scenario 2, without either new highway schemes or specific access arrangements, trips from Blackwell Farm load onto the A31. But with the access arrangements modelled together with an access road through the development to the Surrey Research Park, this assessment indicates that significant pressure could be placed on Gill Avenue, the Hospital junction and other parts of the network in that area” (paragraph 4.5.4). Paragraph 4.9.5 of the SHAR specifically identifies that “the additional access to and from the Blackwell Farm development via Gill Avenue results in a significant increase in trips on this part of the network. This is, in turn, impacting on junctions for which there are no schemes proposed at the moment, highlighting where additional improvements may be necessary. An example of this is the Egerton Road/Gill Avenue junction adjacent to the Royal Surrey County Hospital.”

50. In addition to this, in the last twelve months, the Proposed Submission Local Plan 2017 has upgraded the importance of Egerton Road to the purpose of providing access to Blackwell Farm, compared with the 2016 Plan, in that the alternative proposed access to Blackwell Farm via the A31 is no longer designated as the ‘primary’ access and Egerton Road is no longer designated the ‘secondary’ access. They now have equal status. Whereas this properly reflects the implausibility of an acceptable link to the A31, no change whatever has been proposed to Egerton Road to accommodate such extra traffic as
may now be expected to take this route (which is unspecified). In our view, the additional traffic congestion impacts on an already overloaded local network are so foreseeably dire that we strongly recommend the Blackwell Farm development should not be taken forward.

**Sustainable Movement Corridor**

51. Back in 2014 Arup prepared a report *Guildford Town and Approaches Movement Study* for the Borough Council, a vision statement on transport in Guildford to 2050, which included a very broad indicative route at a scale that was difficult to apply on the ground. This has been endorsed by the Council. The purpose was to facilitate sustainable movement, strongly emphasising public transport, walking, cycling and demand management at the expense of travel by private car. The centrepiece of the scheme was a corridor segregated to be available to fast buses (and possibly trams), cyclists and pedestrians, linking the key existing areas of the town that are drivers of growth. There would be new bridges over the railway (in the town centre) and over the River Wey (across the floodplain near Stoke Lock). The estimated total cost was broadly £75-100 million though clearly not costed in detail. Cars would be banned from the Corridor which, because it would be based on using existing roads, some of them major roads, would represent a highly significant reallocation of space away from cars to buses, cycles and walkers, with consequent impediments to car usage. Car parking charges would be increased, 20mph zones introduced, some roads be closed to through traffic and others pedestrianised. The Proposed Submission Local Plan supports this kind of corridor but, strikingly, none of these intentions and assumptions is made clear in the 2016 or 2017 Consultations.

52. The 2016 Consultation proposed a Sustainable Movement Corridor, included in the Plan at the last moment (Spatial Vision, Policy I3 and paragraph 4.6.24). Various land allocation policies required co-ordination with the Corridor. Paragraph 4.6.24 explained that the Sustainable Movement Corridor would link major developments to Park-and-Rides, including Blackwell Farm (at its western end), and stated that the Corridor would be ‘largely on existing roads’. ‘Route sections’ were listed in the Infrastructure Schedule (Appendix C) with six itemised segments with some broad cost figures suggested (£80-90m in total). No route for the Corridor was included in the Plan, but instead the evidence base included a Progress Update on the Sustainable Movement Corridor scheme (GBC, June 2016). This showed a revised indicative route and possible road layouts at some key junctions and sections. It showed variations from the Arup study, notably with: a spur to Slyfield based on the existing A320 rather than a river crossing further east and also a lengthy new corridor up the A3100 to Gosden Hill Farm. The Arup Corridor would be downgraded in many lengths to shared roadspace with existing traffic (i.e. normal roads) but with bus priority measures. A land bridge over the A3 to provide a connection to the Research Park was downgraded to using the existing Egerton Road underpass: the recommendation was ‘to consider further the potential for tidal bus lane on Egerton Road as it passes under the A3 trunk road, with signalised control at either end controlling its use by buses, whilst retaining two working lanes of general traffic. It would be anticipated that the tidal bus lane would be used westbound in the morning peak period and eastbound in the evening peak period.’ Changes to the Tesco roundabout would also be needed. Development would begin in the town centre and be phased later for other sections (to 2033).

53. The 2017 Consultation has made little progress on the Sustainable Movement Corridor. Policy ID3 now mentions a Supplementary Planning Document on the topic, but there is no sign of this even in first draft despite the passage of another year. This is an unacceptably inadequate basis upon which to plan for major urban development at Blackwell Farm. However, a further report Sustainable Movement Corridor – Update published in February 2017 does for the first time include a published small-scale street map on which the Sustainable Movement Corridor (SMC) is superimposed and clearer proposals for an initial western section. However, the Council clearly have insufficient confidence in this to include it in the Local Plan. The 2017 Update shows changes from the 2016 Update, notably with an additional crossing of the railway beside Yorkie’s Bridge and an additional north-south corridor along Woodbridge Road and Onslow Street between the A25 and the gyratory.

54. The Sustainable Movement Corridor will measure its effectiveness by a substantial degree of modal shift away from cars and towards sustainable transport modes. The starting point for analysis is that the Strategic Highway Assessment Report 2016 assumes no modal shift to sustainable modes, and so is a ‘worst case’ in respect of cars (paragraph 4.1.8). Paragraph 4.6.28 of the Proposed Submission Local Plan 2017 now states that “the site allocations and proposals in this Plan – including the significant programme of schemes to provide and improve opportunities to use active modes, bus and rail – are intended to result in a modest modal shift over the period to 2034”. However, the Council has accepted that this is unlikely to be enormously effective: the same sentence continues “we forecast that there will also be an absolute increase in overall traffic volumes.” Instead the paragraph proposes to ‘increase highway capacity’. This is a downgrading from the
intentions just a year ago, when paragraph 4.1.8 of the SHAR stated “The impact of these sustainable transport schemes is expected to be significant”. What, therefore, is the Council’s objective?

55. The key section of the SMC for Blackwell Farm is the western section. At the key pinch-point of the A3 underpass, the Sustainable Movement Corridor can only function if the existing four lanes for vehicles are reduced to three, with one of these lanes taken up as a bus lane based on tidal flow routing. Space for other vehicles would be halved. The Proposed Submission Local Plan 2017 together with the main transport documents supporting it (the Guildford Borough Transport Strategy 2017 and Topic Paper: Transport, June 2017) are silent on whether this will be implemented, but as it is a key feature of the SMC, which could not function without it, we assume that this is what is proposed. Furthermore, the Tesco roundabout diagram in the 2017 Update document shows no roadspace at all reallocated to the Corridor west of this point.

56. The Council does not appear to have modelled the network consequences of creating the western section of the SMC (or any other section). With the Blackwell Farm development completed, the SHAR forecasts (Figure 4.3) that, in the morning peak hour, there would be 837 movements westbound and 636 movements eastbound along Egerton Road through the underpass (one vehicle about every 4 seconds and 6 seconds respectively). The underpass is highly unlikely to have the capacity to accept this level of traffic on a single lane each way. That would still be the case after modest modal shift had reduced the vehicle counts somewhat. It seems to us unrealistic to believe that all traffic inhibited by denial of road space will divert to sustainable modes. The more likely effect is that the SMC will simply add greatly to the predicted overcapacity on Egerton Road, with knock-on effects through the network. The principal effect of the SMC in the Blackwell Farm area is therefore likely to be to make traffic congestion worse rather than better if the development is built.

57. The footpath and cycleway on the north side of Egerton Road, segregated from traffic but not from each other, would be maintained under the proposals in the 2017 Sustainable Movement Corridor – Update, though the current design is cramped and mostly unattractive. The footpath and cycleway cease east of the Tesco roundabout, so walkers and cyclists have to fend for themselves when crossing the Ashenden Road arm of the Tesco roundabout. No improvement even to this basic problem is proposed in the Plan. The Plan needs to be clearer about what if anything it is actually proposing in order to encourage walking and cycling to and from the Blackwell Farm development.

58. If the modal shift fails to happen, the level of congestion in Guildford will become significantly worse. Modal shift is the only means by which the Council can find any practical means of moving additional people at scale into and out of Blackwell Farm (and the associated 10-11ha expansion of the Research Park). Even so, given the existing very high levels of congestion and over-capacity on Egerton Road and Gill Avenue, especially in peak periods, there is no certainty that there will be sufficient roadspace for vehicles, people and goods to reach the Blackwell Farm development even after the Sustainable Movement Corridor has taken a proportion of travellers (itself taking up roadspace).

59. The Council has not demonstrated a credible strategy for actually achieving modal shift in practice, notably by removing both roadspace for cars and destination car parking spaces. Modal shift is not mentioned in Policy A26, despite its imperative importance to the delivery of Blackwell Farm. The strong impression given by the Plan is that the SMC has been greatly downgraded from the original proposals by Arup to which the Council subscribed, and is therefore unlikely to deliver the modal shift which is essential for the development proposals in the Plan to be feasible. It seems to us that the likelihood is that the Sustainable Movement Corridor in the Blackwell Farm area will be massively inadequate. As the Council’s heart does not appear to be in modal shift, we consider that the Blackwell Farm proposal will be undeliverable and we recommend that the proposed allocation in Policy A26 is withdrawn.

60. The purpose of the SMC can only be achieved by upsetting car drivers. However, the Plan strongly emphasises accommodating traffic generation from proposed development with figures apparently incorporating: no modal shift at all; a sustained aspiration for a major increase in capacity on the A3; and continued investment in local road capacity improvements. We conclude that the Sustainable Movement Corridor has already been compromised, will fail to make discernible impacts on existing congestion, and will therefore not have anything like enough impact on travel patterns to accommodate the people and goods movements arising from 1,800 houses at Blackwell Farm. We recommend that the Local Plan should not be submitted for Examination without deletion of the Blackwell Farm proposal in Policy A26.

Funding the transport infrastructure necessary for Blackwell Farm

61. We pointed out in our submission a year ago that the scale of financial support expected from the developers of the Blackwell Farm site for the delivery of road infrastructure alone was far above the amounts normally expected. In the last
year the obligations upon them have increased. The Proposed Submission Local Plan has now been amended in the Infrastructure Schedule in Appendix C. Proposals affecting the A3 were noted in paragraph 20 above, to which Blackwell Farm developers will be a party. Other new financial commitments specific to Blackwell Farm are:

- Project BT6 ‘Significant bus network serving the Blackwell Farm site and key destinations including the existing western suburbs of Guildford and the town centre to be provided’ is a new requirement in 2017, which must be entirely funded and delivered by the developer, at a price which is still to be confirmed, and therefore an open-ended commitment at present;
- Project LRN5 ‘Interventions to address potential highway performance issues resulting from development at Blackwell Farm site’, which must be entirely funded by the developer, has seen its cost increase from £5m to £10m;
- The developer rather than Surrey County Council will now be responsible for the delivery of Project LRN3 ‘New signalised junction from Blackwell Farm site to A31 Farnham Road (to principally serve Blackwell Farm site)’, which is likely to increase financial obligations on the developer;
- The developer rather than Surrey County Council will now be responsible for the delivery of Project LRN4 ‘Access road at Blackwell Farm site with through link to Egerton Road (to principally serve Blackwell Farm site)’, which is likely to increase financial obligations on the developer;
- The developer rather than Surrey County Council will now be responsible for the delivery of Project LRN5 ‘Interventions to address potential highway performance issues resulting from development at Blackwell Farm site’, which is likely to increase financial obligations on the developer;
- A “Necessary and proportionate contribution to delivering Guildford West (Park Barn) railway station” towards the estimated £10m cost of Project NR2 will still be required from the Blackwell Farm developer (the only named developer required to contribute) in accordance with Policy A26 Infrastructure Requirement (7); this assumes greater importance now that the station merits its own Policy A59 (see paragraphs 63-64 below);
- The funding arrangements for SMC1 Sustainable Movement Corridor: West have been amended slightly. The change states the funding source will be ‘Developer funded and Local Growth Fund’ instead of ‘Developer contributions and Local Growth Fund’, suggesting that the developers will have to fund somewhat more than previously expected. The Blackwell Farm development will be the principal contributor to this section of the SMC.

62. Transport consultants advising Compton and Worplesdon Parish Councils calculate that the transport infrastructure alone for the Blackwell Farm development will cost about £60 million, most of it up-front. This is around £35,000 per dwelling. There will be other major costs which the developer will be required to fund, including new primary and secondary schools and affordable housing (none of which were included in our previous costings), all of which can be very expensive, and numerous other mitigation costs from such a major development. There is, therefore, a real risk that the proposed development will not be viable and deliverable. If still included, the Local Plan would need to ensure that the Blackwell Farm development complies with paragraph 173 of the NPPF on this point. In reality, in the absence of other funding sources to provide money which the developers may be unable or unwilling to provide, the Blackwell Farm scheme would have to fail and be deleted from the Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Save Hogs Back supports this railway station in principle, irrespective of the Blackwell Farm development. It is important to appreciate that its contribution within the Local Plan period will be limited, probably not being operational until at least 2029. The Topic Paper: Transport explains at paragraph 5.31 that Guildford West (Park Barn) railway station is likely to be brought forward only in 2024-2029 because “August 2024 corresponds with the anticipated start date of the South Western franchise period subsequent to the recently awarded franchise for the 2017-2024 period. Delivery from or subsequent to 2024 allows for the servicing of the new rail stations to be included within that new South Western franchise covering the period from 2024”. On this basis, progress with the construction of a station is feasible but far from assured. In particular, although the Plan recognises the need to deliver the project by working with Network Rail, there is no indication in the Plan that Network Rail has identified the technical feasibility and cost of the project or formally committed to it. It may simply not be in a position to deliver this project.

The new railway station will create a new destination for traffic. On the south side of the railway line, behind the hospitals, there will be a requirement for disabled parking together with access for buses, taxis and passenger drop-off. This will add to the congestion on local roads, notably Egerton Road. However, the anticipated vehicle activity associated with the new station has not been included in the traffic model for the area, and this needs to be rectified urgently. This is yet another contributor to excess congestion on Egerton Road if the Blackwell Farm development were to proceed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

65. Save Hogs Back welcomes the proposed changes to Policy P1. In particular we support the more positive approach to sustaining AONB qualities and the greater attention given to protecting the setting of the AONB in paragraphs (3) and (5). We also particularly welcome the retention of the AGLV designation in the manner set out in paragraph (5).

66. We also welcome the updated clarification of the status of Areas of Great Landscape Value in paragraph 4.3.8 of the Reasoned Justification.

67. Unfortunately, the policy (particularly as amended) is not always applied through the Plan as a whole. The strategic allocation of land for housing in Policy A26 at Blackwell Farm is in direct conflict with Policy P1 as amended and is the most significant proposed release of a greenfield site that has major adverse impacts on the AONB. A small part of the allocation is also included within the AGLV. The Blackwell Farm site allocation conflicts with Policy P1 and should be removed from the Plan.

68. The proposal in Policy A26 would in summary involve:

– constructing major development in the form of a significant new access road to the Blackwell Farm development and the extended Research Park, by crossing the AONB down the steep northern face of the Hog’s Back, causing immense damage to the AONB (and increasing the impact of the development on those passing through the AONB);
– major development in the immediate setting of the AONB, in an area which (apart from some University expansion) has been relatively little-damaged to date;

Save Hogs Back & Compton PC 22 by Green Balance

– taking land for major development which ought to be included within the AONB and has a real prospect of being so
included following the Surrey Hills AONB boundary review to be carried out by Natural England (paragraph 4.3.8 of the Plan refers): an independent landscape consultancy working for Compton and Worplesdon Parish Councils applied the AONB boundary evaluation methodology in detail, recommending that Down Place and much of Blackwell Farm should also be designated as AONB.

More information on the impact of Policy A26 on the AONB was set out in section 3 of our submission in 2016. 69. We consider that the monitoring arrangements for Policy P1 are unwise as they are limited to the outcomes of appeals, over which the authority has no control. The measure is also pointless: we doubt that the Council is really saying that it would change its policy on protecting a nationally important landscape if a few Inspectors made different judgements (how many, how often?) about the application of the policy in particular cases.

70. The Guildford Borough Proposed Submission Local Plan: Strategy and Sites June 2017 is unsound for the following reasons, which are additional to those we reported in July 2016:

(1) The Plan is not consistent with national policy, in the following respect:

- Policies ID2 and A26 particularly would cause substantial deterioration in air quality in Compton, where air quality monitoring shows that NO2 pollution is already (and has persistently been) in breach of legal limits, by attracting additional vehicular traffic through the village to access both the A3 and Blackwell Farm/Surrey Research Park via a new road link from the A31: this is in breach of NPPF paragraph 109 policy for “preventing both new and existing development from contributing to…. unacceptable levels of…. air…. pollution”.

(2) The Plan will not be effective, in the following respects:

- Policy ID2 is unlikely to be deliverable within the Plan period in respect of widening the A3 through Guildford, which is a precondition for implementing Policy A26. Even if it was, it would not meet its own objective of providing appropriate access to the strategic road network to accommodate future planned growth in the form of the Blackwell Farm development – by virtue of generating congestion rather than alleviating it.
- Policy A26 will not be effective because the volume of traffic the proposed Blackwell Farm development would generate on Egerton Road (even if a link road to the A31 is also in place) would cause levels of congestion so high that the network flow would break down in this area, and the Plan proposes no remedy for this.
- Policy A26 will not be effective because the Plan has failed to identify a means of access from Blackwell Farm onto Egerton Road (Infrastructure Requirement (1)), even though this access has been upgraded in the Plan and is no longer ‘secondary’ to the link to the A31; the 1:10,000 plan accompanying the Policy shows no link at all into Guildford.
- Policy A26 will not be effective because Infrastructure Requirement (3) for a controlled road link through the Blackwell Farm development to limit the users of the road will not be implementable in practice.
• Policy A26 will not be effective because the additional road capacity needed to serve the newly proposed secondary school (Allocation item (9)) within the development has not been provided in the Plan and the road network in the area is already modelled to be well over-capacity when Blackwell Farm is developed.

• Policy ID3(3) on developments having regard to the Sustainable Movement Corridor will not be effective in its western section, because either the modal shift will not be pursued vigorously enough to make a significant difference (which appears to be the Local Plan’s preferred strategy), or, if applied with determination (such as by reducing private vehicle lanes in the A3 underpass from four lanes to two) could not be expected by itself to change driver behaviour significantly; in either case the result would be greater congestion on the local road network than it could take after the development of Blackwell Farm.

(3) The Plan is not justified, in the following respects:

• Policy S2 relies on the completion of the widening of the A3 in sufficient time for the proposed numbers of dwellings to be constructed before the end of the Plan period, but this cannot be a justified proposal because there is no certainty at all that the A3 widening will be completed by 2027, if ever; given the difficulty of finding alternative locations likely not to be dependent on capacity increases on the A3, the most appropriate strategy would be to abandon Policy A26.

• Policy A26 would cause the generation of so much traffic (both by itself and by the construction of the A3 without which Policy A26 cannot be implemented) that the local road network could not possibly cope with it, and documents supporting the Plan acknowledge that local roads would be put seriously over-capacity: such an arrangement cannot reasonably be the most appropriate strategy and the Plan is therefore not justified.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/882  Respondent: 8558305 / Boughton Hall Avenue Residents Association (Mr Alan White)
Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to OBJECT to the 2016 Draft Plan in as much as it affects the areas of Send, Send Marsh and Burnt Common. I also OBJECT to the massive developments at Wisley Airfield and Gosden Hill Farm, Burpham as both sites will impact on the Send area.

I find the Plan to be misleading and contradictory in its presentation and fundamentally flawed.

The Summer "About Guildford" newspaper states that you have reduced the total number of development sites. Yet you have ENLARGED the Send inset area thereby permitting and encouraging larger developments. You also say Will there be any development along the A3 from junction 10 M25 to the Hogs Back. NO, but then you go on to say that there will be, spaced well apart. NO MEANS NO, NOT YES.

I OBJECT to the removal of some 128ha of Green Belt in the area of the Send, Send Marsh, Burnt Common, and Gosden Hill Farm, Burpham.

I OBJECT to the insetting of the Send area which removes some 38.8 ha. from the Green Belt which would enable residential and industrial development in an area where no perceived need has been proven.
I OBJECT to the destruction of 30 ha. of Green Belt farmland (identified as paddock) at Policy A43 Garlick's Arch. No housing need has been proven in the plan and if approved would stretch existing education and medical resources.

I OBJECT to the destruction of 7000 square metres of Green Belt farmland (identified as paddock) for industrial development at Policy A43 Garlick's Arch when the need for industrial development has been dramatically reduced in Guildford's own statement. Guildford B.C. has 40 ha of developable brownfield land at Slyfield. "About Guildford" states that the Plan rejects any schemes that would have a detrimental effect on the Green Belt. So why has this been included? I find Guildford Council's double standards and apparent falsification of evidence to be alarming.

I OBJECT to the destruction of 4.5 ha. of Green Belt farmland (referred to as paddock) at Policy A43a for the provision of the proposed new junction at Burnt Common. This proposal will attract additional traffic to the area from further afield in a misguided hope that they will be possible to "leap frog" the existing traffic jams on the A3. Residents of the area all know that any so-called highway improvement of this size will gridlock the A247 from Woking through Send to Burnt Common and similarly gridlock the winding A247 through West Clandon with its narrow pinchpoints. The A247 was not designed for such increased traffic volume and is incapable of improvement without much compulsory purchase of property. AND, in the off chance that neither Guildford's planners or consultants have noticed, the A3 northbound is already gridlocked and has been for some 25+ years. A new junction that attracts additional traffic is a very strange miracle cure.

I OBJECT to the removal of 2.4 ha. of agricultural Green Belt at Policy A42 Clockbarn Nursery. The development for 45 dwellings along with the 65 dwellings already approved, will create severe traffic congestion. Tannery Lane is narrow and winding and already has to accommodate large vehicles serving the industrial units. There will be major traffic problems at the Tannery Lane/Send Road Junction.

I OBJECT to the removal of 1.9 ha. of Green Belt amenity area at Policy A44 Winds Ridge and Send Hill. This site was not included in any other Plan and has had no previous consultation. The 40 dwellings will increase the traffic at the narrow Send Hill/Send Road junction, already a local traffic "blackspot" at rush hour and school times. Whilst the Plan acknowledges former quarry workings the description at A44 makes no reference to contaminated land following landfill. Neither does it refer to current venting of the site to disperse underground gasses.

It is evident that the Send area has been targeted by Guildford B.C. to lose some 38.8 ha. of Green belt due to its proximity to the A3. No account has been taken of the social and environmental damage that would occur and it does not appear that any prolonged traffic flow studies have been carried out.

I OBJECT to the lack of any form of infrastructure support for the Send area. The existing schools were at full capacity for the 2014 Draft Plan and still are, as is the Villages Medical Centre.

I OBJECT to the inclusion of this site Policy A35 in the Draft Plan when development of this land has been refused, other than for a waste transfer station.

I OBJECT to the removal of 89 ha. of Green Belt farmland environment at Policy A25 Gosden Hill Farm. Despite proposed road improvements, such massive development will have a major impact on the existing area of Burpham and will also adversely affect Merrow. The Allocation box on Policy A25 sheet clearly shows the destruction that Guildford Council intend to allow to happen to this land. Add together all the proposed uses and it is easy to understand that despite the outlined highway and junction improvements and the railway station, the sheer volume of traffic movements throughout the day for housing, shopping, schools, Park and Ride and general employment will extend the existing daily tailback from Stag Hill/Cathedral Hill almost certainly to the new junction at Burnt Common! This will be gross traffic mis-management.

Summary

I find that the Guildford Borough Council Local Plan for 2016 is illconsidered and fundamentally flawed in its assessment of the needs of area of the Borough to the West of the town centre.

I am appalled that the Send area has been targetted by Guildford Council to satisfy un-substantiated housing and industrial need. Why should the Send area be subjected to such an increase in traffic? Wasn't the A3 Ripley By-Pass built for the express purpose of removing vehicles from the villages?
Finally, WHY is Guildford Borough Council encouraging developers to progress housing proposals as soon as possible to help boost housing supply in the early stages of the Local Plan? By its very wording it appears that Guildford Borough Council is attempting to present a series of "fait accompli" to the Inquiry Inspector and pre-judge the outcome of the Public Inquiry and the Inspector's Report?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

PLANNING POLICY EAST & WEST HORSLEY

This is to lodge my objections to the proposed future development of East & West Horsley.

Whilst I accept more housing is needed in the country I do not think we should have this much in East & West Horsley. A lot of people worked very hard in years gone by to obtain Green Belt status for this area and now it would appear to be taken away. We who have lived here for many years and do not want our villages turned into Surbiton.

Many of the green fields proposed are water logged in the winter. With housing built on them where will the water go?. The local roads get flooded now due to the building that has happened in the last forty years.

Any development that takes place will need the infrastructure to be in place before building. In the past the infrastructure has not been developed enough. The Medical Centre is not big enough, to obtain an appointment with a doctor of your choice in less than a week is very difficult. The car park is often full. The East Horsley Village Hall car park has a notice to say only parking if on Village Hall business.

Yesterday I tried to park at the doctors, the car park was full, two ladies were on duty at the village hall stopping parking if you were not attending the village hall. I therefore could not go to the doctors. The parking at the East Horsley shops is very difficult. There is not enough at the present time, when the camp site is occupied in the Spring and Summer months it is worse. All this is now, what will it be like if this development is allowed?

I notice in the proposed housing there will be Affordable Housing. Can you tell me what is affordable? If the housing are more than £300,00 young local people working locally would not be able to afford them and this surely is what the idea is and what the developer would hope to get the local people on his side.

The local schools are already over subscribed. The nursery school at the Raleigh School is full until the end of 2014. The Raleigh and the Howard of Effingham Schools is full and not everybody who applies can get in.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/5  Respondent: 8558785 / Beechcroft Drive Residents Association (Mark Payne)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Dear planning - I have read the local plan and am shocked to see that although there is substantial development in my area there is no commitment to providing an access for Beechcroft Drive.

As you are aware the access to Beechcroft Drive is direct into the A3 and is a dangerous junction. This was a commitment in the previous plan that was not delivered and it is essential that the borough includes it in this plan.

Comment ID: PSLPS16/2440  Respondent: 8559041 / Beverley Mussell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A19

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A19 relating to the development of the old Puttocks car park - "Land off Westway etc..." Conditional support for this proposal.

This vacant piece of land is adjacent to the Northern boundary of the Aldershot Road allotment site. It is an area once used as a truck dealership. It housed a large building and bitumen car park. The building has been demolished leaving a concreted area. The bitumen car park contains the vehicular right of way to the Aldershot Road allotment site and the six allocated parking spaces for tenants as mentioned in Policy 21.

This will be a difficult and costly development to deliver. The concrete needs to be removed. The land is at the base of the hill of the allotment site and pile driven supports will be necessary to stop the proposed dwellings from sliding into the school below.

Already there have been “behind closed doors” negotiations to enhance the development delivery of this land. These have involved the suggested loss of the lower vehicular access to the allotment site and also the relocation of its lower parking spaces. The retention of this lower access for vehicles is crucial for the viability of the allotment site as 80% of tenants use this access. The safety of tenants is also a major concern as this is the only safe access for emergency vehicles.

The key considerations as defined in Policy A19 need to be adhered to.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A21 Strong support

Land at Westborough Allotments – correct title – Aldershot Road allotments according to Leasing Agreement between landowners Guildford Borough Council and managing agents Guildford Allotments Society.

This allotment site should be returned to its original use as all allotments.

Allotments have proven health benefits. They promote healthy exercise and outdoor activity. They encourage the growing of fresh produce and its consumption. This helps combat obesity.

They also promote social cohesion as plot-holders are an eclectic mix of ages, religions, nationalities and personalities. All are bound by a common love of gardening. Loneliness and isolation are disturbing factors in modern society but there’s always someone to talk to on an allotment site and inhibiting factors such as wealth and class are missing.

Westborough is officially described as a deprived area and Project “Aspire” has been started to address this. This allotment site has its own in site association - Westborough Allotments Self Help Association) - (WASHA) - which co-operates,agrees and helps with the aims of ”Aspire”.

. Aldershot Road site has an educational program set up with funding by Big Lottery Local Food - WASHA Family Food Mentoring Program in 2009. This is on going and Local Food monitors have commended WASHA on its successful implementation. It teaches newcomers how to grow food. It provides mentors for management and teaching for 90 plus children each year on the St Joseph's school plot. Children are taught that food has to be grown. It doesn't just appear in a supermarket. They realise by the end of their school year of working on their plot, that it is not easy to grow food and food should never be wasted. They also get a chance to sample the wide variety of produce which they grow and harvest on their plot.

The whole site is an island of biodiversity set amongst the urban sprawl of Guildford. Allotment holders are keen conservationists and there are many plot-holders with specialist knowledge of butterflies, bats, birds, insects and wild-flowers. A wide variety of cultivation methods are used including organic and Permaculture from which others can learn sustainable agriculture principles.

UK has a large food deficit and every allotment site should be valued for its contribution to the UK's food production. Surpluses from this site go out to the local churches, North Guildford Food bank as well as feeding the families of the plot-holders themselves. It has no “food miles” and its production is sustainable.

The decision to return the whole site to allotments is correct and nothing should be done to put the survival of this site in jeopardy. It has been used as allotments since before the First World War.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy 14 (Green and Blue Infrastructure) – strong support for its aim of enhancing biodiversity. Paragraph 4.6.31.- For all the reasons mentioned above, please include the word “allotments” in the definition of Green Infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. There is a failure to correct errors in the historical data for international migration flows. There has been an overestimate of 90% in births, deaths and migration flows in the years between 2001 and 2011. This has been exposed by the two latest censuses. Real numbers versus estimates! Surely this should have caused an adjustment in the OAN?

2. Most residents who live in close proximity to the University know that houses with good gardens, built for families, have become HMOs to accommodate students. This has reduced many neighbourhoods to seedy university dormitories. The Plan makes some recommendation for housing on campus but as the university expands this is inadequate.

3. The plan to include “affordable” houses is wishful thinking. GBC cannot enforce their designation of percentage of affordable homes per development as witnessed by the Methodist church development. Where are the plans to build more council houses? These are the only affordable homes.

4. Building more houses to promote growth is a flat contradiction in terms. More housing results in more traffic congestion resulting in man hours lost to employers and more pollution for residents. Huge uncertainty hangs over the practicability of all of the schemes to alleviate Guildford’s horrendous traffic congestion. Will money be available to implement these post Brexit?

5. Why have no constraints been applied? The incursion into the Green Belt is unacceptable. The division into Blue and Green Infrastructure can’t gloss over this and expressing the loss of green belt land as a percentage is a sham. More houses, more traffic, more pollution less green belt – all in the name of growth. Where does it end? No one wants to live in a ghetto!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Please take the time to check the "evidence" on which your housing need is based.

The growth in Guildford's population is overestimated by 40% because you have under recorded the number of students leaving Guildford at the end of their studies.

You stressed that you would consider the restraints that should limit Guildford's expansion but you haven't. Guildford's economy is already affected by continuous traffic jams which block the main roads in and out of the town area and affect traffic movement in surrounding roads. The pollution this causes is damaging the health of all residents but particularly those who live in proximity to a main thoroughfare.

Green Belt should be sacrosanct otherwise there is no point to it at all. Nibbling it away a bit at a time as you intend with this plan, will still result in its eventual loss. This is to the detriment of future generations.

Has there been any consideration to the effects of the Brexit vote? Why plan for more housing when it may not be needed. Will developers risk housebuilding for an uncertain future?

We have enough good family homes in Guildford for our population. Unfortunately many of these are used by students who could be housed on campus. Why haven't you raised the target for this? Whole areas of Guildford are blighted by use of family houses for student lets.

Your proposal for 12,426 homes (plus a buffer of 1,555 homes) is excessive. We will lose green belt. The character of Guildford will alter for the worse. Those of us who live here will have increased pollution, noise and congestion while the pressure on amenities, health care and education - already severe - will reach breaking point.

Lastly, what is the point of costly window dressing consultations if you take no notice of the responses?

Para. 2.12. Our rail network and connections are here ** underrated**. They are in fact exceptionally good, giving easy connections to anywhere in the country, in most cases without travelling via London. A commitment is needed to better exploit this considerable asset.

Para. 2.13. It is not correct that “There is a reasonable network of cycle routes”; there must be an objective of creating **new routes**. Existing cycle lanes are also inadequate: they disappear just when the cyclist needs them most. While it is true that there is a “reasonable” network of footpaths the **poor quality of these** is a major problem, and there is a lack of basic facilities such as road crossings, and pedestrian priority; this discourages people, particularly the old and handicapped, from using this sustainable mode of transport.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**A12 Bright Hill Car Park.** P151 - 152

We note the statement “Opportunities - Improvements to landscaping and biodiversity given the full extent of hardstanding on this site”. It will be impossible to do this, or provide the special high quality development that this site, which is in the Town Centre Conservation Area, requires, with a development of 60 homes. The current plan proposed 33. **We ask that the target be reduced to 45 or less homes.**

**The Robin Hood pub** is excluded from the development although it is prominent within the site. We ask that the pub be acquired to allow it to become part of, and to enhance, the development as a reminder of the previous Victorian development on the site, and a suitable use found for this locally listed building. We also ask that a feasibility study is made of the design options for underground parking, to maximise the potential of the site.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Town Centre Riverside Sites, Open Space.

We welcome the designation of protected open space for the immediate riverside on site A2 (Cinema) and ask that this be continued along Bedford Wharf, and applied wherever possible in the centre, including the Portsmouth Road Car Park.

The designation of much of this area is as “Strategic Employment Site (Office and Research and Development); as above this town centre area may not be suitable for R and D which often requires spacious layout and a low density employees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

D2. Sustainable design, construction and energy. P97.

The designation of areas where new developments must make provision for connection to CHP networks needs clarification. Some of our established residential area, including Charlotteville, fall within the designated town centre “Heat priority Area”. Only isolated new developments, and extensions, are expected in these areas, and it does not make sense to impose connection requirements on these. No mention is made of provision of Solar PV Power; this needs to be included as an objective, particularly for large business buildings. Where good quality buildings are demolished to allow larger or more “contemporary” buildings to be built the loss of the embedded energy needs to be included in the energy assessment of proposals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/11414  Respondent: 8559297 / Holy Trinity Amenity Group (Robert Bromham)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
E1. Sustainable Employment. P63

While the town centre can be a suitable location for Offices (use B1a) – assuming that journeys to it are not made by car - it may not be so for Research and Development (B1b), which requires spacious sites and usually some industrial equipment and has comparatively low employee numbers. We ask for suitable qualification of this policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11415  Respondent: 8559297 / Holy Trinity Amenity Group (Robert Bromham)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

E2. Location for new employment floorspace. P67

We are concerned that the policy is to “direct” B1b use to the town centre, and ask that this is qualified as above.

We disagree with the policy for second choice new employment sites to be within 500m of the “transport interchange” of London Road station. The station is a means of joining a train on a linear route, and it cannot be described as an interchange. The 500m radius would mainly cover an established residential area, including part of ours, which should not be converted to business use.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

E7. Guildford Town Centre, P85.

The 45,000sqm of retail (comparison) shopping proposed for the N Street site is too much. The priority need is for more residential use.

In addition it is essential to increase day to day convenience-shopping in the centre for residents like us who have nowhere to do this shopping except the centre – unless we drive out of our area. The decline in convenience and service shopping facilities continues, despite the arrival of Waitrose.

We do not wish to see evening and night-time activities located along the immediate riverside. This would require railing in of the river for safety purposes, and provisions made to safeguard clients during a flood event when the area can be quite frightening. The genuine attractive and green riverside, with its green banks and important biodiversity would be lost. There is no objection to such activities in the area providing they have a reasonable set back from the river and are outside of the flood zone.

There is concern about promoting additional “active” use of the riverside and river. The river is a comparatively narrow navigation, and does not have the capacity to take more boating activity than at present. The attractive towpath is already well used by walkers, runners and cyclists. Commercialisation would degrade the riverside as a key asset of the town.

While supporting the intent behind the banning of new food takeaways within 500m of schools we question whether this is practical. There are a number of schools close to the centre including the RGS and Pewley Down Infants, and this rule would ban takeaways from much of the centre.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
E9. Local Centres 

We have no “local centre” to provide our local community with everyday shopping and service facilities. It is suggested that a part of the upper High Street and the adjoining parts of Epsom and London Road be given a suitable designation to encourage the location of everyday retail and service facilities there, together with Council intervention to ensure rentals are affordable. An indoor market might also help address the problem.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Provision of a “shoppers bus” that would serve all of the town centre and the adjacent residential area is vital to reduce car journeys to the centre. Drastic improvement to pedestrian facilities for those walking to the centre is also needed.

We support provision of off-street parking for residential developments; this ought also to be an objective for the established areas of older small houses that have no on-site parking of their own. However for non-residential developments located in and around the town centre this is not appropriate; it negates the whole objective of location to allow use of sustainable transport by employees and clients.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Some requirements are unclear, in particular “Measures must be based on a combination of SAMM and the provision, improvement and/or maintenance of SANG”; this appears to be at odds with the other requirement to provide a minimum of 8ha of SANG land per 1,000 occupants. We consider that the only genuine mitigation measure is the provision of new public access land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Para 3.2.

**Housing Target Number.** This remains too high, and is unjustified; it could result in a degradation of our area and our town centre. We fully support the analysis commissioned by GRA that predicts a need of 510 houses per year. We also request that the legitimate further constraints on this number, particularly that due to the Green Belt, be applied.

**Public Open Space.** The commitment to 250ha of new open space is welcome; our area, and the adjacent town centre is seriously short of open space. To ensure that this objective is pursued the mechanism for providing it needs to be set out, in particular the connection to SANGS. The need to provide more open space within easy walking distance of residential areas, including our own, needs to be part of the objective; the riverside frontage is an obvious area for more open space.

**Additional Retail Provision.** The proposed expansion of comparison-shopping floorspace (65,000sqm total, 45,000 sqm in North Street) is too high. There is no demand from residents for this magnitude of expansion, nor does it reflect current retailing trends. In creating more jobs it will also increase housing demand; there is clearly a housing / employment imbalance which needs addressing. The priority must be to use land for housing, and to increase the everyday convenience-shopping provision needed by residents.

**Transport Strategy.** This must not be just aimed at encouraging visitors to use sustainable modes of transport, but also at residents and employees.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**P156. “North Street redevelopment”.**

Retail (A1) and food and drink (A3 and A4) target space needs to be reduced to allow a quality redevelopment to be obtained, as for P22 above.

- **P157 “North Street redevelopment, Transport. Mitigation measures, including those achieving modal shift to sustainable modes of transport, to accommodate the increased travel demand from the development, and changes to the town centre network for private traffic, deliveries, and buses”**

Add. Key routes across the site for pedestrians and cyclists are to be adopted by the Highways Authority to ensure they are an integral part of the town’s network.

- 

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to removing Ripley and surrounding villages including Clandon from the Green belt and well as objecting to plans for Garlicks Arch. There are no bus/train services in this area and as the council knows, car traffic is almost at a standstill at peak times. There are no exceptional reasons for these sites to be removed from green belt protection and there is insufficient infrastructure for the plan which is itself unnecessary in many locations in Surrey.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the building of 400 houses and 7000sq metres of industrial space at Garlicks Arch. This was sprung on the village at the last moment, only 2 weeks notice and without any prior consultation. The infrastructure requirements have not been properly considered and are inadequate to deal with the proposed housing levels. Our roads, doctors and schools will be unable to cope. Industrial space is not needed and if it was could be accommodated on the Slyfield industrial estate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to a new interchange with the A3 at Burnt Common, this would be disastrous for Send and the A247 which is already overloaded and jammed at peak times will become gridlocked. Already noise and pollution levels are excessive and this would certainly worsen to the point of being intolerable.

Send would be taking traffic from the proposed new houses at Wisley, Gosden Hill, Burpham and Blackwell Farm. Much of it would come through the village to and from the A3, M25, Woking and Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the development of 40 houses and 2 travellers pitches at Send Hill there is insufficient access and it would spoil a high amenity area in beautiful countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Having already objected to the 2016 plan I'm staggered to see that the latest draft has completely ignored the tens of thousands of objections submitted and has now come up with another draft that is even far worse for the village of Send than previous.

It would seem that the GBC has a predetermined agenda to build on the green belt regardless.

I would therefore like to raise the following objections to the latest changes to the plan.
I object to Policy A42 change at Clockbarn in Tannery Lane because an increase to 60 homes is just too big for this area it will make surface water flooding which is already bad in this area even worse and will worsen access and traffic problems in Tannery Lane and at the A247 junction.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58 at Burnt Common because it was previously deleted from the 2014 draft because of all the objections made at the time and there is no need to build an industrial site in the middle of Green Belt when Slyfield and Guildford still have empty sites and industrial units.

Such a development will further impact the surrounding roads and environment, creating traffic congestion, noise and pollution issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/164  Respondent: 8559745 / Mr Brian East  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy P2
I object to the proposal to inset Send Business Park from the Green Belt because it's an old non-conforming user in an area of outstanding countryside adjacent to the Wey Navigation and vehicle access is restricted in both directions along Tannery Lane.

Expansion or development at this location detracts from the openness of the Green Belt and is inappropriate.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Vision and objectives

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Spatial Vision
1.20 The comments raised on behalf of Our Clients in representations to the previous Local Plan in relation to the shortcomings of the Spatial strategy remain relevant.

1.21 With the current significant deficiencies in the provision of housing in the Borough it is essential that the Adopted Plan provides the necessary support to ensure both the timely development and maximisation of the potential of all Site Allocations.

1.22 Notwithstanding the adjustments to planned delivery, 5,200 of the additional 9,400 homes (55%) are still to be delivered on urban extensions and the planned new settlement at Wisley.

1.23 A number of the strategic sites are dependent upon the delivery of Highways England’s A3 Guildford scheme. As this scheme is only expected to be completed by 2027, a large proportion of housing supply is assumed to be built after this date (Para 4.11 Housing Delivery Topic Paper, June 2017).

1.24 The strategic releases will, therefore, take a significant time to come forward, and accordingly this places greater onus on the need, particularly in the short to medium term, to support the delivery of smaller sites which will often be easier and quicker to bring forward. The amendments to village boundaries (including Ripley), their insetting from the Green Belt and the specific support and encouragement for the early delivery of allocated sites, including Site A45, continues to be essential.

1.25 The Spatial Strategy must also be realistic in terms of what may be achieved from smaller sites in order to ensure that overly ambitious objectives do not stifle growth or provide a brake on development.
1.26 The Council cannot rely solely on new development to meet infrastructure needs and both the Council and statutory providers will also need to contribute in order to address existing deficiencies.

1.27 It makes sense to focus initial growth in the plan period within and on the edge of existing settlements. Smaller pockets of development of up to 50 units can be subsumed within existing settlements and help to reaffirm their vitality and viability.

1.28 Such development will not normally trigger a need for significant investment in new infrastructure, beyond any site-specific requirements, and will thus be more deliverable earlier in the Plan period and can contribute at an early stage to addressing the Council’s current housing supply deficit.

1.29 It is important that the vision is viewed holistically and that no one component is to be afforded any greater or overriding weight. This point should be made explicitly within the Vision text.

1.30 The Plan Vision should also adopt a holistic approach to new growth which maximises the opportunities to group together wherever possible; new housing with jobs and supporting services. Ripley is a prime location to fulfil this objective. Site A45 offers the potential for housing development during an early stage of the Plan Period and will also satisfy in part the objective of developing on previously developed land.

1.31 The potential of Site Allocation A45: Land to the rear of the Talbot, High Street, Ripley, should be maximised.

1.32 The conclusions raised in previous representations remain valid and have not been addressed by the amendments.

UNSOULD: The Plan Vision should be more flexible and should stand alone as a vision for the entire plan period. Given the failure over ten or more years to deliver the necessary levels of housing to satisfy demand it is essential that the plan provides the conditions for ALL of the identified Site Allocations to come forward as quickly as possible. The vision should be amended to specifically refer to the key role of growth in the villages (particularly in the early years of the plan) and the need for a flexible approach to development standards.

Recommended Additions:

We suggest the inclusion of the following text additions to the Plan Vision:
• Confirmation that the Vision is a holistic strategy and component parts are equally weighted;
• Jobs, growth and services should wherever possible be grouped together;
• A clearly stated priority for the redevelopment of previously developed land AND sites within or on the edge of existing settlements prior to the wider expansion of less sustainable sites.
• A less rigid approach to the application of development standards.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Guildford Borough Planning Policy

I write to strongly object to the Guildford Borough Draft Local Plan to remove the village of West Horsley/East Horsley from the Green Belt as follows.

No sound case is made justifying changing Green Belt boundaries laid down many years ago by national legislation.

The main purpose of Green belt is to keep a sense of openness between built up areas, in this case around London. The Green Belt also provides opportunities for people to access the country to keep land for agriculture, forestry, and similar land uses, and for nature conservation.

It would be totally irresponsible for the council in that removing the Green Belt would totally destroy it now and for future generations.

Housing

I strongly object to the number of proposed houses, 485, for the Horsley’s the large number of homes would be totally out of character with the existing character and layout of the village.

The village settlement is comprised of low density housing with a considerable mix of ages and housing styles.

West Horsley does require some affordable housing for young people.

Affordable housing for elderly residents to be near the village facilities as many would be unable to walk a great distance to the medical centre, chemist, shops, library or transport.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Schools

I am concerned and object to the issue that more families moving into the village would create fewer places for families already with children approaching school age.

The Raleigh (no room on the site for expansion) is the only primary state school in the village and has been full every year for many years.

Secondary school places are limited in number at the Howard of Effingham and other secondary schools, also full are a greater distance from the village.

Village facilities

West Horsley is a small village with very few facilities, which are not enough for the current population.

Parking is very difficult most times of the day for people using the shops and library.

The village does have three disabled parking spaces close to the shops and a small car park.

It is very difficult getting appointments and parking at the single Medical Centre serving East and West Horsley plus areas beyond the village.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Transport

West Horsley bus service through the village is extremely limited and only operates twice a day Monday to Friday.

Horsley, inadequate parking spaces, and Effingham Junction have frequent trains to London and Guildford 7 days a week. The early commuter trains are usually full from Guildford on arrival at Horsley and returning from London evening rush hours. You could be standing the entire journey.

Traffic generation from the proposed housing plan would be considerable affecting station traffic movement to/from Horsley and children getting to school. There is no land available for more car park spaces.
I walk; lead walks in the Surrey villages and green belt area often meeting and talking to schoolchildren during May & June from Surrey and the London area taking part in the Duke of Edinburgh Award for all young people to develop skills for life and work, fulfill their potential and have a brighter future.

The London children enjoying opportunities never experienced before are so excited all so keen marveling at seeing the beautiful Surrey villages and countryside, often asking questions about the area.

**Infrastructure - Roads**

Green Lane and most of the roads in and around West Horsley are very narrow, full of potholes often perilous, particularly when large GBC vehicles collecting refuse, garden rubbish, large lorry’s buses and tractors passing through.

The council has failed to properly maintain the roads. Occasional attempts are made to’ make do and mend some of the potholes, but they are beyond the state which could support a significant increase in traffic.

To increase such traffic which would result if the proposed developments were to proceed would be wholly irresponsible.

**Conclusion**

Our generation must not leave a legacy such as this of a concrete jungle.

When the next generation can only look in books and see green fields, character historic Surrey villages - as history and say:

**THIS IS HOW IT WAS IN THE OLDEN DAYS.**

Answer (if comment is on questions 1-7 of the questionnaire): ()

Green Lane - Flooding & drainage

I have lived in Green Lane, 30 years’ since August 1986.

I strongly object to the planned 120 houses Waterloo Farm and 135 houses on Manor off Ockham Road North.

The land slopes significantly from East Horsley and during periods of heavy rainfall causing flooding on Ockham Road North and Green Lane.

Every year this is a problem having personally witnessed the flooding each year during periods of sustained rainfall. See attached photos June 2016

The building of roads and 255 houses on the two green fields currently absorbing the heavy rainfall during the winter and now summer months as experienced June 2016 would increase the flooding by creating a surface that would impact on the already major flood risk in the area.

The proposed 120 houses, A40, and would create a huge risk with increased flooding which was previously experienced when the current property, Oakland Farm was built a few years ago.

In addition the heavy rainfall during June 2016 Green Lane experienced heavy flooding in the road and overflowing the essential ditches. Again the land slopes significantly from Long Reach.

The proposed access via Green Lane to include Waterloo Farm is totally unacceptable, would create massive disruption to the local community along with the lack of drainage and infrastructure in the extremely narrow lane.

The the large lake on the National Camping Club of Great Britain site overflows into the ditch which in turn causing flooding in Green Lane running down towards our property, flooding our front garden. We have had flooding right up to the front door.

The gardens in the smaller private Green Lane previously Bungalow Lane adjacent to Watersmeet all flood during heaving rainfall. Four new properties’ two houses and two bungalows have been built in the lane late 1980/1990. A natural spring on the area of land to build the two bungalows was built over causing flooding to the gardens on the opposite side of the lane resulting in a land drain having to be built the complete length in all of the opposite gardens in the lane.

This involved massive intrusive disruption, months of work digging up gardens, taking down fences, trees and new manhole covers in the garden where we would rather not have had them.

Surrey Country Council/National Rivers Authority, built culverts in Green Lane and Thames Water Flooding, installed a non-returned valve on our property.

Both have made a slight improvement but not solved the flood risk.

The manhole covers have water pumping out along with sewage into the lane and our garden.
During heavy rain the water in the toilets in our house rises to almost overflowing. We are unable to use the toilet or pull the chain, as it would certainly flood the house. The gurgling from the toilet is very alarming also keeping you awake during the night.

Thames Water Sewer Flooding Mitigation arranged a survey to be undertaken by WERM Ltd to help with the sewage and manhole overflow. In 2007 a non-return valve fitted to help the situation. This has not helped as the toilet still overflows during heavy rainfall.

Severe flooding frequently occurs in Green Lane and Long Reach during heavy rain. Running along the eastern boundary, for the full length of the smaller Green Lane adjacent to our property, there is a ditch, which extends beyond the southern point of the private small lane and continues along the eastern boundary. This ditch is a land drain and specifically takes the overflow from the large lake to the south of the land, which is under the ownership of the National Camping Club of Great Britain.

On the front boundary, there is a further ditch which the ditch on the eastern boundary discharges. This is an important drainage ditch. Works of improvement were carried out by National Rivers Authority, two brick culverts were constructed, one of which discharges under Green Lane into a further ditch on the northern side of Green Lane.

John Faithfull originally purchased Watersmeet.now Oakland Farm about 1965 and subsequently purchased three of the adjoining sub-standard bungalows, and re-built these in the late 1960s.

He had his own company specializing in plumbing and flooding having a lot of dealings with Surrey County Council and National Rivers Authority over the ditches and flooding area in Green Lane.

Although considered eccentric by some people, as he got older, he was an extremely knowledgeable man qualified in Hydraulics’ Research, building and flooding risks working tirelessly with and alongside National Rivers Authority.

My husband was employed by The National Physical Laboratory (NPL) at Teddington

The Hydraulic Research Organization department. Predicted the risk of heavy flooding that would result from the indiscriminate building of roads and housing on fields and water meadows. This has now been proven with annual increased rainfall (predicated increased future rainfall) in many parts of England.

The photographs’ of the recent flooding were taken in June 2016.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: [IMAGE 1.jpg](3.0 MB) [IMAGE 2.jpg](2.7 MB) [IMAGE 3.jpg](3.5 MB) [IMAGE 4.jpg](3.0 MB)
Please bear the following in mind when considering applications to develop the land around the Cathedral:

1. This side of Guildford has recently become much more developed, eg the Research Park, Manor Park, the Sports Park and needs to retain some open green space. Wasn't it given to Guildford to be an open green space to be enjoyed by all?
2. Traffic congestion down The Chase and Madrid Road can be very heavy and not just in the rush hour.
3. The back entrance to the station is wholly inadequate and adds to this congestion, due to two bus stops and cars and taxis picking up and dropping off rail passengers.
4. The entrance to any development would be best taken off the road which leads up to the Cathedral rather than off Ridgemount, which in part has a pavement only on one side. This already feels hazardous as pedestrians frequently walk in the road which is difficult for vehicles. There is also a bus station at the bottom of the road and there are often buses reversing into the five way junction and also parked in the road. (do they have permission to park in the road?).
5. There is instability in the hill. As residents of Ridgemount we, and several of our neighbours, have had to have our homes underpinned.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A25 Gosden Hill:

The documents imply that there is a reduction to 1,700 new homes (from the earlier figure of 2,000). But it now appears this is misleading and that the lower figure is still a minimum. In any event, this scale of new homes planned is, in my opinion, so large as to inevitably damage the whole infrastructure of the area.

Infrastructure: The proposed changes to the access to the A3, together with other recent and proposed road system changes will, in my opinion, have such a large negative impact on Burpham as to inevitable cause major traffic disruptions and should be entirely reconsidered.

The proposed development will generate a daily movement of thousands of vehicles the vast majority of which will pass through Burpham. This Plan represents yet another ill-conceived planning proposal, with insufficient thought given to the infrastructure needed.

The last few decades have seen two major housing estates, a considerable number of smaller garden grabbing developments, one super store and, recently, one very inappropriately sited supermarket. Both because of the volume and reduced speed of traffic, these changes regularly lead to severe air pollution which damages the quality of our lives in Burpham. The current Plan represents a major worsening in an already unacceptable traffic and pollution situation.

Traffic at the Burpham roundabout is regularly brought to a standstill with cars and delivery vehicles queuing to get into Aldi's inadequate car park. New Inn Lane and London Road are already subject to long traffic queues at all times of day. Extra traffic will inevitably cause even worse delays and pollution.

**Policy S2: The Plan as a whole is undermined by massive errors in the housing need figures.** The housing need has been reduced from 693 per annum last year to 653 per annum, giving a total build over the period of the Plan of 13,893. On the one hand, a reduction of around 5% has minimal impact on concerns about the scale of the housing development’s enormous and negative impact on the Borough as a whole. Equally, I now understand that an over-inflated housing need figure has been used in the Plan. As this affects every aspect of this Draft Local Plan; this one particular renders the whole Plan unsustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Gosden Hill (policy A25)**

The scale of the development proposal and its potential impact on the A3 and other local roads is a major concern. The provision of a rail link may help to partially alleviate the problem, but the number of houses proposed is far higher than is suitable for the location and unless the development is invisible from the A3 then it will detrimentally affect the appearance of the borough as a predominantly rural area.

I object to the large proposed development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.

I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.

I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

Policy A42: Clockbarn Nursery, Tannery Lane, Send (page219)

I object to this development because the additional traffic from that development coupled with the traffic from the new marina with 80 berths which you have agreed further down Tannery Lane which is mainly a single lane with passing places.

The Marina was identified as a high priority requirement and something the village apparently ‘had to have’. Having spoken to many locals, it would appear that this would have been so far down their list of requirements to actually not be on the list at all! It was a travesty the development was voted through by GBC when clearly there were valid objections.

These same objections remain and will be compounded by the inclusion of the Clockbarn nursery site. This additional traffic will be unable safely to join the much overused main road through Send. This road is the main through road from Woking to the A3 and M25 which is already used to capacity especially by articulated trucks and heavy vehicles for which the road was never designed. Additional traffic joining from Tannery Lane would have great difficulty and any attempt to ease the problem with a roundabout or traffic lights would simply exacerbate the situation.

The access point is so narrow it would clearly be a safety hazard and a potential accident black spot. Vehicles would not be able to join the main road and so would back up along Tannery Lane at peak times. This would be really dangerous and if there was an emergency then the necessary services would be unable to gain access to the site and attend the incident and this could have serious consequences.

GBC has a responsibility to its residents to ensure proposed developments meet highways safety standards and I fail to see how an access point at a narrow junction of Send Road and Tannery Lane will meet this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43: Land at Garlick’s Arch (page 221)

I object to this proposal because the number of homes proposed would add to local traffic congestion which is already excessive at peak travel periods.

This was a sleight of hand by GBC in slipping this application into the Plan at such short notice. The site has never been proposed before and has not undergone a proper and full evaluation.

This site is also located underneath one or more pylons carrying power cables which constitute a health hazard for anyone and especially children living in such close proximity to them. There is evidence suggesting a link between cancer/Leukaemia and power lines and this has not been considered.

I also object to the location of any form of industrial activity which would increase traffic movements in that area leading to even greater traffic congestion. If additional industrial space is needed the ideal location is Slyfield which has the space to cater for it and there is a symbiotic relationship between the various activities on such a site. Slyfield has room to expand and accommodate extra capacity and is well located on the edge of the town.

If Garlick’s Arch proceeds it will create traffic chaos in all the approach roads through the villages of Send, Send Marsh and Ripley. There is simply no proven need to consider this site for industrial or housing, on any scale planned.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan.

If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

The proposal to build 400 houses and 7,000sq.m. employment space (light industrial/storage, warehousing) on virgin Green Belt land, lying outside the Send Marsh/Burnt Common village boundary, defies all logic. This area which includes ancient woodland is a refuge for deer and other wildlife. It was never considered as a Potential Development Area within the Council’s ‘Issues and Options report’ or identified for development in the 2014 consultation.

In 2014 the Council rejected a planning application from ‘Oldlands’ to build 25 houses in this location on sound planning grounds, so how is can now be considered apt to construct 400 houses and 7,000sq.metres of employment space there?

Apart from the fact that this is all Green Belt land, the infrastructure just cannot support such a development. Send Marsh/ Burnt Common has one just shop (Waitrose), no doctors’ surgery, no schools and the local roads are already filled to capacity.

Any development at all in this area would be totally inappropriate and would be to the very substantial detriment of Send Marsh/Burnt Common as a village. The housing proposal alone would add 960 to the existing population of 2,341, an increase of 41%.

The proposed light industrial/storage facility would significantly detract from the open countryside aspect and add dramatically to the existing road use. It is totally inappropriate and would destroy the village’s demarcation from Ripley, creating urban sprawl.

This very late and very major change to the Local Plan proposals does appear to have not followed the correct due process and therefore shall, if approved by your Council, be subject to immediate legal challenge.

Policy A43 : Land at Garlick's Arch (page 221)

I object to this proposal because the number of homes proposed would add to local traffic congestion which is already excessive at peak travel periods.

This was a sleight of hand by GBC in slipping this application into the Plan at such short notice. The site has never been proposed before and has not undergone a proper and full evaluation.

This site is also located underneath one or more pylons carrying power cables which constitute a health hazard for anyone and especially children living in such close proximity to them. There is evidence suggesting a link between cancer/Leukaemia and power lines and this has not been considered.

I also object to the location of any form of industrial activity which would increase traffic movements in that area leading to even greater traffic congestion. If additional industrial space is needed the ideal location is Slyfield which has the space to cater for it and there is a symbiotic relationship between the various activities on such a site. Slyfield has room to expand and accommodate extra capacity and is well located on the edge of the town.

If Garlick's Arch proceeds it will create traffic chaos in all the approach roads through the villages of Send, Send Marsh and Ripley. There is simply no proven need to consider this site for industrial or housing, on any scale planned.

I object to the proposed industrial development of 7,000 sq m at Garlick's Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 800;6 in required employment floor space from the previous draft plan.

If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

The proposal to build 400 houses and 7,000 sq m employment space (light industrial/storage, warehousing) on virgin Green Belt land, lying outside the Send Marsh/Burnt Common village boundary, defies all logic. This area which includes ancient woodland is a refuge for deer and other wildlife. It was never considered as a Potential Development Area within the Council's 'Issues and Options report' or identified for development in the 2014 consultation.

In 2014 the Council rejected a planning application from 'Oldlands' to build 25 houses in this location on sound planning grounds, so how is can now be considered apt to construct 400 houses and 7,000 sq metres of employment space there?

Apart from the fact that this is all Green Belt land, the infrastructure just cannot support such a development. Send Marsh/Burnt Common has one just shop (Waitrose), no doctors' surgery, no schools and the local roads are already filled to capacity.
Any development at all in this area would be totally inappropriate and would be to the very substantial detriment of Send Marsh/Burnt Common as a village. The housing proposal alone would add 960 to the existing population of 2,341, an increase of 41%.

The proposed light industrial/storage facility would significantly detract from the open countryside aspect and add dramatically to the existing road use. It is totally inappropriate and would destroy the village's demarcation from Ripley, creating urban sprawl.

This very late and very major change to the Local Plan proposals does appear to have not followed the correct due process and therefore shall, if approved by your Council, be subject to immediate legal challenge.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Fields around Danesfield, Send Marsh (GU23 6LS)

I refer to this area because it is not currently high profile but it is a significant site for other reasons.

I wish to object to this site although it is not specifically mentioned. However, I understand this site is regarded as 'safeguarded' and therefore could come into play should some of the sites drop out.

If you look at the maps then you will see that the far end and sides of Danesfield have had their boundaries inset and now the back gardens of these houses now are the proposed greenbelt boundary. As we are surrounded by open fields then this suggests that everything the otherside, ie open fields, would be redesignated as non greenbelt and therefore will be developed.

My comments on this site are as follows:

1. This site is on a flood plain. Over 37% of the site is in flood zones 2 or 3, with over 25% in flood zone Therefore, this land is clearly not suitable for development and this was borne out whenever there is heavy rain and the land floods. I am reliably informed that the area becomes almost a large lake when there is a heavy downpour and this can be seen from the road and footpaths.

1. GBC policy and the Environment Agency are against developing on flood zones and so for this reason the land should not be built on or devel GBC could face legal action from the Environment Agency if they were to go against this and spend tax payer's funds to defend such a claim. This would be an irresponsible use of tax payer's money.

1. I know photographic evidence showing the effect of flooding on the site have been sent to GBC and they have accordingly downgraded the site from a Potential Development Area to a Safeguarded Area.
1. Any building or hard standing will reduce the land available to absorb the run off from heavy rain falls and this will exaggerate the flooding. This could cause flooding and damage to adjoining property in Danesfield which may lead to future insurance claims.

1. There are many bats on this site which are protected under The Conservation of Habits and Species Regulations.

1. The access into the site is limited to only two points of One entry is onto the busy Send Marsh Road which is narrow and unsuitable to carry more traffic. This entry point is near to a blind bend so there would be a safety concern and a potential accident black spot with approaching traffic from the direction of Send. The other entry point is into the side of Danesfield where the access is deliberately narrow as it is a residential road where many families live with young children. There is only just enough room to get two cars passing so a massive increase in traffic would be totally impractical as well as dangerous for all the small children who play in the road. Furthermore, there is an old established oak tree on the entry point which would have to be cut down and I believe this has a TPO on it.

1. As a resident of Send for 50 years, and with my family living here and our garden backing onto this site, I am very concerned about what is being discussed regarding potential building on the. It would be an absolute travesty if this land were to be lost to building. This corner of Send Marsh is of an open rural nature and therefore totally unsuitable for insetting from the green belt.

1. Our village is loved and cherished by all those of us who live Send Marsh has a long history of generations of families living here and we all love the open countryside, the lovely walks, the beautiful views and the village life atmosphere. To commence on such a thoughtless and aggressive building program would bring this to an end and would mean that we could never go back to what we once had.

1. The site should not be termed "safe guarded" as the meaning of 'safe' does not seem to As I understand the term as used here, this site could be back on the table as a possible contender for consideration for planning permission if other sites do not get their planning granted. There would not be a democratic process for this site to then have a further round of public consultation as the date will have been passed. We would then be at the mercy of GBC and the planners.

1. Send Marsh has already seen a dramatic increase in the traffic flowing through it and into Send village at peak hours with long tailbacks from the traffic lights at Mays Send Marsh regularly sees delays getting onto the Portsmouth Road at Send Dip with long queues of traffic going towards Ripley and Burnt Common.

1. This site is at the back of Danesfield has limited access onto Send Marsh Road and if this was the only way out then this would put a lot of strain onto an already congested road. If the access was through Danesfield then this would seriously congest our road as it is very narrow and difficult to pass cars at various points.

1. This site should not be removed "inset" from the green belt as this would mean planning permission would surely be granted for the.

1. The field behind Danesfield is a beautiful open space with much wildlife including deer and foxes as well as lots of The field is enjoyed by those in the village who walk and take their dogs by the adjoining footpaths.

1. Send Marsh Road has a very narrow and dangerous bridge which would need to be widened to make it safer and the whole of the Send Marsh Road would need to be There is no mention of this in the plan.

1. Send Marsh does not have any infrastructure. There are no local shops, no school, no doctor's surgery and no public park. It comprises if mainly all houses and so the addition of so many new houses will put huge pressure on the infrastructure on Send and Ripley, both of which can hardly cope with the current pressures. You would have to walk a considerable distance to access any of these services and so this would mean owners would have to use a car. This would seem contrary to the governments' policy for us all being green and reducing pollution.
1. The bus routes to and from both villages are very poor and infrequent, about one per hour. Again it is essential to have a. The roads are too narrow and dangerous for cyclists so this is not really an option.

1. By proposing greenbelt sites in the area means this land will be gone. It is essential we protect the greenbelt or we will simply be a concrete jungle joined to Guildford and Woking with no green space in between. These greenbelt areas are essential to everyday living to provide clean and open space for everyone to enjoy.

1. There are plenty of brownfield sites available which should also be considered. In addition, there are sites which have been given planning permission but builders are refusing to build on as presumably, they are waiting for house prices to increase so they can maximise their profits. I feel time limits should be placed on planning permissions granted to encourage building in any economic climate.

1. Send Marsh is poorly served by schools, particularly the secondary. It has become increasingly difficult to get children into George Abbot which is the closest school to the village. With the amount of houses to be built set to increase, where will the children go to school if we don't have a plan to build schools?

I would like to place on record my objections which I would like to be seen by the Inspector

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43a: Land for new north facing slip roads (page 223)

I object to this proposal because it would do nothing to ease the density of traffic on a road which already suffers from long tailbacks at peak times. The A3 regularly has blocked traffic and adding a slip road which only serves the purpose to access a specific site and no other will only make things worse.

This proposal would encourage additional traffic along the very narrow, winding A247 Clandon Road and the Send Barns Lane/Send Road leading to Woking, the traffic along both of which are already at capacity. Send village is a ribbon development of housing along both sides of Send Road, so there is no scope to widen it, and where it ends at the Old Woking roundabout none of the connecting roads can be widened to ease congestion because of the existing surrounding buildings.

This ill-conceived plan to enable major development at Gosden Hill and Wisley completely fails to take account of the serpentine configuration of the Clandon Road and of the inability to improve the traffic flow along it and the Send Road because of the proximity of existing housing.

The suggestion that the land for the slip roads may be gifted should the Wisley airfield development proposal be accepted means that this is really no gift at all, merely an undisguised attempt by that developer to gain approval to build on protected land.

As such it will, if approved, be subject to legal challenge

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy A44: Land west of Send Hill (page 225)

I object to the inclusion of two travellers pitches on this site which would be in contravention of your own stated policy of having a ratio of two such pitches for every 500 houses.

It is possible that the widening of the Send Hill road would encroach on the area of the site thus reducing its capacity for 40 houses assuming it could even accommodate as many as that which is doubtful. Two pitches among so few houses would certainly have a negative effect on the value of any houses built there and would certainly not secure the best return on the tax payers investment on the land.

Send Hill is certainly not a suitable location for travellers anyway access being difficult from the traffic lights especially with cars parked on one side opposite the school and on the brow of the hill making the approach quite hazardous.

In addition, there is a school at the bottom of Send Hill and at peak school times it is very congested with parents dropping their children. By travellers driving their vehicles with caravans making a long vehicle with potential blind spots then this will only heighten the risk of safety for parents and children.

However, a much smaller development without traveller pitches and in keeping with the surrounding properties could be a possibility. This would be a natural extension of the housing building line up Send Hill and could provide a development in-keeping with the rest of the area.

Traveller issues have arisen in Send several times over the years and Send residents and our Parish Council have expressed their views many times to you the Guildford Borough Council and GBC do not seem to heed our views and now again insist on trying to locate two pitches in a most unsuitable location. These pitches appear to have been randomly dropped into this area as they were originally in the centre of the village in Wharf Lane, which was another equally ill conceived area to site them.

[Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it] and they should be housed in areas where I understand they prefer which are typically more rural and away from the housing developments.

The Local Plan is lacking evidence and detail

I feel there is a big disconnect between the requirements most residents feel they need and the locations they would sight developments against the methods employed by GBC and the seemingly alarming developments proposed.

The plan is considerably lacking in details which does nothing to help the residents who ultimately will determine the plan as a collective. For example

1. There is no explanation of why so much housing capacity is required in this area and who it is for.
2. There are no artist’s impressions of how a development might look or any idea given of what an “affordable house” looks like
3. What is a traveller’s pitch?
4. Are there any conditions attached to the allocation of travellers pitches?
5. How are they to be managed? How are services arranged and paid for?
6. What term do the travellers stay for? Is there a minimum or maximum?

I feel if these questions could be answered then I would be better informed and could make a better decision.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Specific Comments about Policy A44: Land west of Send Hill (page 225)

I know this area well and I grew up nearby. Whilst I recognise there may be some people who wish to object to this site I would like to put forward a more positive viewpoint in respect to possible development, although I offer some reservations as well.

1. The plan suggests the total site may be able to support approximately 40 houses but looking at the area and allowing for access roads to be built within the site, I feel this is a little optimistic. A figure of between 15 to 20 homes could be more realistic.

2. The development of the site should not aim to be high density or high rise. It should be in keeping with the rest of Send Hill and Winds Ridge which would mean either chalet bungalows and smaller houses, with maybe one or two large 4 or 5 bedroom houses added on slightly larger plots to enhance the overall appearance of the site.

3. The proposal to incorporate two traveller pitches as part of a mixed development would seem to be questionable. This site is the ONLY proposed mixed site in the whole of the Draft Local Plan for the Borough and in this regard would seem to be out of context in terms of mixed use compared to the other proposed sites.

If GBC were to develop the site as a mixed site then this would seem to contradict their main directive which is to ensure the best return on assets owned by the tax payer. This is because a close proximity mixed site would potentially mean a lower overall return on the final selling prices achieved for such a development. If this were the case, and was reflected by the mood of potential buyers, and borne out by final house sale prices, then this would be potentially a loss to the tax payer of several hundred thousand pounds. This could be interpreted as ill-conceived and irresponsible of GBC if this were to be reviewed at a future date and questions could be sought.

Considering the site overall, it would seem a better solution overall to not make this a mixed site and transfer the traveller sites to a more suitable location and one where it is concentrated on a traveller site only on one of the other proposed sites.

1. I object to the inclusion of two travellers pitches on this site which would be in contravention of your own stated policy of having a ratio of two such pitches for every 500 houses
2. Traveller issues have arisen in Send several times over the years and Send residents and our Parish Council have expressed their views many times to you the Guildford Borough Council and I find it very disappointing that you do not seem to heed our views and now again insist on trying to locate two pitches in a most unsuitable location. [Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]
3. If the development was on a smaller scale then the impact on Send Hill would be considerably reduced. Send Hill and the roads off it are very quiet and this is the main appeal of the area. The addition of 15 to 20 more homes would not represent a large increase in road traffic or impact the existing residents.
4. It is true that that Send Hill is a single track country road but with sensible planning and a low density development I do not see this as causing any problems to the existing residents or making a dramatic impact. By contrast, if it were to be a high density development then I think the opposite would be true.
5. The land is in greenbelt and I am a big supporter of keeping the greenbelt and not allowing wide scale development. However, this site when viewed on the map could be considered as an extension of the existing housing line of Send Hill. The site is surrounded by mature oak trees which should remain and is bound on two sides by a footpath which should also remain. This means that the surrounding open fields are all kept intact and the views are unaltered, so residents, dog walkers and members of the public can continue to enjoy the amenity.
6. The sensible development of this site, being at the top of the hill and the highest point, means it would not be subject to flooding and would not be detrimental to the community and increased flood risk.

7. I understand that the land has been infilled over time and it has laid fallow for over 30 years. At one end of the field, the land owned by Guildford Borough Council, which is the main area of infill, there are methane vents. Further environmental tests may need to be reviewed to determine the exact position of any possible continued contamination.

8. By contrast, the far end of the field, closest to the cemetery, and not owned by GBC, this land has not been infilled as I understand it and recent environmental reports (dated as recently as 2015) seem to suggest that there is no contamination on this land. If this is the case, then perhaps this area could be considered for responsible, small scale development, to be in keeping with the current housing line.

I would like to place on record my objections which I would like to be seen by the Inspector.

If this is the case, then perhaps this area could be considered for responsible, small scale development, to be in keeping with the current housing line.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the Green Belt realignment which will take Send outside the settlement boundary when there are still brownfield sites available for development in urban areas which will have much less impact on local environment and infrastructure. It has never been made clear by GBC why there is a need for such a vast amount of additional housing in the next 20 years for an area which is primarily residential and not industrialised.

I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford.

I am concerned that GBC is not calculating their requirements correctly and is mixing up the temporary student requirements at places such as Surrey University, with that of the needs of the local Guildford population. At no point in the 50 years I have lived in the area, have I experienced a supposed demand for such an enormous amount of homes required. I have not witnessed this demand from local people or companies, so I can only assume that all these homes will be lived in by people who are outside the GBC area and will be shipped in to live and work. If so, I object to this principal.

The number of homes proposed for Send (693p.a.) is completely disproportionate in the context of a village like Send. The extensive development proposed for Send and elsewhere in this locality such as Garlick’s Arch, Gosden Hill and Wisley Airfield means that, in effect, it will become a ribbon development from Guildford almost as far as Cobham and transform a pleasant rural area into suburbia.

The Green Belt policy has always been very clear. It is to stop urban sprawl and prevent joined up developments. This plan seems contrary to this policy and would appear to work in contravention of this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
By having such a tightly inset area around the village then the greenbelt will be completely lost forever and urban sprawl will ensue.

With a presumption for development within these ‘inset’ areas, the proposed enclosures would encourage over-development and expansion of the villages in the future and completely ruin their essentially rural nature.

**Fields around Danesfield, Send Marsh (GU23 6LS)**

I refer to this area because it is not currently high profile but it is a significant site for other reasons.

I wish to object to this site although it is not specifically mentioned. However, I understand this site is regarded as ‘safeguarded’ and therefore could come into play should some of the sites drop out.

If you look at the maps then you will see that the far end and sides of Danesfield have had their boundaries inset and now the back gardens of these houses now are the proposed greenbelt boundary. As we are surrounded by open fields then this suggests that everything the otherside, ie open fields, would be redesignated as non greenbelt and therefore will be developed.

My comments on this site are as follows:

1. This site is on a flood plain. Over 37% of the site is in flood zones 2 or 3, with over 25% in flood zone 3. Therefore, this land is clearly not suitable for development and this was borne out whenever there is heavy rain and the land floods. I am reliably informed that the area becomes almost a large lake when there is a heavy downpour and this can be seen from the road and footpaths.
2. GBC policy and the Environment Agency are against developing on flood zones and so for this reason the land should not be built on or developed. GBC could face legal action from the Environment Agency if they were to go against this and spend tax payer’s funds to defend such a claim. This would be an irresponsible use of tax payer’s money.
3. I know photographic evidence showing the effect of flooding on the site have been sent to GBC and they have accordingly downgraded the site from a Potential Development Area to a Safeguarded Area.
4. Any building or hard standing will reduce the land available to absorb the run off from heavy rain falls and this will exaggerate the flooding affect. This could cause flooding and damage to adjoining property in Danesfield which may lead to future insurance claims.
5. There are many bats on this site which are protected under The Conservation of Habits and Species Regulations.
6. The access into the site is limited to only two points of entry. One entry is onto the busy Send Marsh Road which is narrow and unsuitable to carry more traffic. This entry point is near to a blind bend so there would be a safety concern and a potential accident black spot with approaching traffic from the direction of Send. The other entry
point is into the side of Danesfield where the access is deliberately narrow as it is a residential road where many families live with young children. There is only just enough room to get two cars passing so a massive increase in traffic would be totally impractical as well as dangerous for all the small children who play in the road. Furthermore, there is an old established oak tree on the entry point which would have to be cut down and I believe this has a TPO on it.

7. As a resident of Send for 50 years, and with my family living here and our garden backing onto this site, I am very concerned about what is being discussed regarding potential building on the site. It would be an absolute travesty if this land were to be lost to building. This corner of Send Marsh is of an open rural nature and therefore totally unsuitable for inserting from the green belt.

8. Our village is loved and cherished by all those of us who live here. Send Marsh has a long history of generations of families living here and we all love the open countryside, the lovely walks, the beautiful views and the village life atmosphere. To commence on such a thoughtless and aggressive building program would bring this to an end and would mean that we could never go back to what we once had.

9. The site should not be termed “safe guarded” as the meaning of ‘safe’ does not seem to apply. As I understand the term as used here, this site could be back on the table as a possible contender for consideration for planning permission if other sites do not get their planning granted. There would not be a democratic process for this site to then have a further round of public consultation as the date will have been passed. We would then be at the mercy of GBC and the planners.

10. Send Marsh has already seen a dramatic increase in the traffic flowing through it and into Send village at peak hours with long tailbacks from the traffic lights at Mays Corner. Send Marsh regularly sees delays getting onto the Portsmouth Road at Send Dip with long queues of traffic going towards Ripley and Burnt Common.

11. This site is at the back of Danesfield has limited access onto Send Marsh Road and if this was the only way out then this would put a lot of strain onto an already congested road. If the access was through Danesfield then this would seriously congest our road as it is very narrow and difficult to pass cars at various points.

12. This site should not be removed “inset” from the green belt as this would mean planning permission would surely be granted for the future.

13. The field behind Danesfield is a beautiful open space with much wildlife including deer and foxes as well as lots of birdlife. The field is enjoyed by those in the village who walk and take their dogs by the adjoining footpaths.

14. Send Marsh Road has a very narrow and dangerous bridge which would need to be widened to make it safer and the whole of the Send Marsh Road would need to be overhauled. There is no mention of this in the plan.

15. Send Marsh does not have any infrastructure. There are no local shops, no school, no doctor’s surgery and no public park area. It comprises if mainly all houses and so the addition of so many new houses will put huge pressure on the infrastructure on Send and Ripley, both of which can hardly cope with the current pressures. You would have to walk a considerable distance to access any of these services and so this would mean owners would have to use a car. This would seem contrary to the governments’ policy for us all being green and reducing pollution.

16. The bus routes to and from both villages are very poor and infrequent, about one per hour. Again it is essential to have a car. The roads are too narrow and dangerous for cyclists so this is not really an option.

17. By proposing greenbelt sites in the area means this land will be gone forever. It is essential we protect the greenbelt or we will simply be a concrete jungle joined to Guildford and Woking with no green space in between. These greenbelt areas are essential to everyday living to provide clean and open space for everyone to enjoy.

18. There are plenty of brownfield sites available which should also be considered. In addition, there are sites which have been given planning permission but builders are refusing to build on as presumably, they are waiting for house prices to increase so they can maximise their profits. I feel time limits should be placed on planning permissions granted to encourage building in any economic climate.

19. Send Marsh is poorly served by schools, particularly the secondary school. It has become increasingly difficult to get children into George Abbot which is the closest school to the village. With the amount of houses to be built set to increase, where will the children go to school if we don’t have a plan to build schools?

I would like to place on record my objections which I would like to be seen by the Inspector.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2 on page 48

I object to the Green Belt realignment which will take Send outside the settlement boundary when there are still brownfield sites available for development in urban areas which will have much less impact on local environment and infrastructure. It has never been made clear by GBC why there is a need for such a vast amount of additional housing in the next 20 years for an area which is primarily residential and not industrialised.

I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford.

I am concerned that GBC is not calculating their requirements correctly and is mixing up the temporary student requirements at places such as Surrey University, with that of the needs of the local Guildford population. At no point in the 50 years I have lived in the area, have I experienced a supposed demand for such an enormous amount of additional housing in the GBC area and will be shipped in to live and work. If so, I object to this principal.

The number of homes proposed for Send (693p.a.) is completely disproportionate in the context of a village like Send. The extensive development proposed for Send and elsewhere in this locality such as Garlick's Arch, Gosden Hill and Wisley Airfield means that, in effect, it will become a ribbon development from Guildford almost as far as Cobham and transform a pleasant rural area into suburbia.

The Green Belt policy has always been very clear. It is to stop urban sprawl and prevent joined up developments. This plan seems contrary to this policy and would appear to work in contravention of this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the new boundaries proposed for insetting the villages of Send and Send Marsh/Burnt Common from the Green Belt (policy P2).

The boundaries drawn enclose huge areas of open spaces that should be retained as Green Belt land and not developed at any time in the future. The village boundaries should be much more closely circumscribed to prevent urban sprawl and retain their village identity.

By having such a tightly inset area around the village then the greenbelt will be completely lost forever and urban sprawl will ensue.

With a presumption for development within these 'inset' areas, the proposed enclosures would encourage over-development and expansion of the villages in the future and completely ruin their essentially rural nature.

I object to the number of homes that the Plan intends to deliver over the 20 year period 2013-2033 (policy S2).

The annual target of 693 is significantly higher than the 652 that the Council proposed last year and disregards the constraints which should have been imposed by the high proportion of the borough’s designated Green Belt land and the capacity of the roads, schools, doctors, hospitals and other infrastructure to support such an increase in the population.

There is no further evidence provided as to why so many more houses are required.

Comment ID: PSLPA16/4320  Respondent: 8561377 / The Guildford Society (Julian Lyon)  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The primary concern of the Planning group is that the method of calculation of the Objective Assessment of Need (OAN) for housing - the SHMA - fails to reassure us of the robustness of the process, and the absence of an ‘open source’ interpretation of population and household formation forecasts cannot be helpful to Guildford Borough Council’s cause.

75.1. A recent analysis by Neil McDonald shows that there have been several anomalous assertions and conclusions drawn by GL Hearn, that the SHMA is not sound and does not represent a suitable basis for determining the Object Assessment of Need and, consequently, the housing target in the Local Plan.

75.2. The Society was already concerned that, within the SHMA, there is little justification for the large additional economic need for homes that have been taken into the OAN number. Neil McDonald has shown that the GL Hearn approach double counted the employment-related housing need.

75.3. The failure to properly and comprehensively analyse the impact of transient student numbers on the underlying population growth forecasts (not to mention the flaws in the 2011 census treatment of students highlighted in our original response) has led to an incomprehensible report by GL Hearn, promoting irreconcilable numbers with an arrogance that would be breath-taking were it not so potentially damaging to Guildford.

75.4. The Council should take note of the Neil McDonald report and consider rethinking its Objective Assessment of Need and housing target numbers.

Policy S2 sets out a phased increase in housing target from 500 to 700 homes per year over the first five years and to 790 homes per year by the end of the plan period. This phasing is predicated on the delivery of infrastructure.

The Society is concerned that this will not be manageable in practice and development will come forward faster than the associated infrastructure – the infrastructure needing to be provided across the Borough and beyond, and the developers needing to demonstrate a non-severe impact locally.

The Society notes the potential to have a review process for the Local plan and comments as follows:

78.1. The proposed Local Plan has a long period, 2013 to 2033, twenty years. The previous 2003 Plan had a period of only three years (to March 2006), though it is till current after thirteen years. Much can change in thirty years, and one would expect the Plan to include cognizance of that.

78.2. The proposed Local Plan is premised on certain predictions of population and economic growth. Such predictions are
always subject to error, and the likelihood of error grows the further the predictions extend into the future. Indeed, the certainty of predictions thirty years ahead must be very low indeed.

78.3. Because the proposed Local Plan has such a long time scale, one would expect it to include specific review dates or mechanisms. Paragraph 153 of the NPPF states “Each local planning authority should produce a Local Plan for its area. This can be reviewed in whole or in part to respond flexibly to changing circumstances”. Circumstances are bound to change considerably over thirty years, and may change significantly over much shorter time scales.

78.4. The only reference in the proposed Local Plan to review is paragraph 1.19 in the chapter on Monitoring Indicators. It says: “We will review the Local Plan, if required, by using the outcomes of the Annual Monitoring Report(s). As part of a review, we will consider the proposed level of new homes and employment land. We will examine all available information and, if necessary, undertake further work to develop our evidence base. Should evidence suggest that we are not meeting our objectively assessed need, various options, including identifying potential new site allocations and requesting assistance from neighbouring authorities, will be considered.” This statement covers any need to make upward adjustments, but makes no reference to any need to make downward adjustments.

78.5. The most contentious issue in the proposed Local Plan is the housing target, which has been set equal to the Objectively Assessed Need (OAN). The OAN is taken from the West Surrey Strategic Housing Market Assessment (SHMA), Guildford, Waverley and Woking Borough Councils, Final Report September 2015. The chapter on Monitoring and Review in the Final Report states:

78.5.1. “10.58 Through a proactive monitoring process it will be possible to maintain and develop understanding of the housing market, building on the outcomes of the SHMA. It will allow the implementation of policies to be tailored to evolving circumstances and inform future policy development.

78.5.2. “10.59 Long-term monitoring which addresses indicators of housing need, market signals relating to supply-demand balance, and the housing supply trajectory can inform future development and implementation of planning policies for housing provision.”

78.6. The SHMA therefore foresees a need to review, and makes no presumptions as to what adjustments, upward or downward, may be necessary.

78.7. The Draft Guildford Borough Infrastructure Delivery Plan 2016 is much more positive than the proposed Local Plan as regards review. It states:

78.7.1. “1.2. This draft IDP will be subject to change up to and potentially during the Independent examination of the draft Local Plan. The IDP Infrastructure Schedule is a ‘living document’ that will be reviewed and modified as required throughout the plan period as further information becomes available in order to ensure that it remains up to date.”

78.8. As noted above, the Society’s judgement is that the OAN predictions are fragile and too high. They depend greatly on predictions of population growth, and much of this is ascribed net international immigration. In the present political climate predictions of immigration must be subject to much uncertainty.

78.9. We judge that the proposed Local Plan should include an explicit commitment to review its key targets, especially the housing target, every five years, say. This commitment should use positive wording and should cover all eventualities be they upward or downward.

78.10. At the very least, the wording of paragraph 1.19 should be amended to take this properly and fully into account.

The Reg19 Consultation plan would be more effective if there were more focus on types of housing and allocations—these may come forward in the technical part of the plan in due course but we remain to be convinced that the plan will deliver the types of homes we need.

The Society, fresh from the Solum application where a development of 438 apartments was supposedly not capable of meeting viability tests with more than 10% affordable housing, is concerned to understand how the Council will achieve (and retain) the desired 40% affordable housing. We would like to see stronger words to ensure that legal agreements can secure the amount of affordable (including social) housing in the long term.

We are concerned that imported demand from, say, London could take up as many homes as we can provide and, to the extent possible, we would like to see some priority to provide homes for local residents (especially affordable housing) before new demand is catered for.
Policies should encourage quality town centre housing for local down-sizers to enable the market to be effective and efficient.

We are keen to avoid the insidious pressure where town urban area developments seem to apply a density factor governed solely by the desire to maximise numbers of dwellings.

The Society remains to be convinced that the evidence is strong enough to justify greater retail development at the expense of other town centre uses. The caveat applied by Carter Jonas in their report as part of the Evidence Base is hardly emphatic.

85. Notwithstanding the Town Centre will be the subject of further master planning, the relocation of non-retail uses may free up sites for town centre housing.

86. We note reports of a recent increase in interest in town centre locations from large employers in office accommodation. The Society recognises that a major barrier to large employers is the toxic combination of traffic congestion and a shortage of housing that is affordable for key workers.

87. The Guildford Society has great concern about last paragraph of the Vision statement – ‘Delivery of housing in the later stages of the plan period is dependent upon major improvement to the A3 through Guildford’. This implies that early approval of large schemes will not require improvement to A3. Also concern about the letout clause in each of the four strategic site allocations: ‘...or otherwise alternative interventions which provide comparable mitigation’. We find it difficult to understand how this will work in practice.

88. There is also general concern that without very strong wording in the plan developers will find defensible excuses for not providing infrastructure, especially given the urgency of meeting housing targets. The Plan’s wording and drafting needs to be carefully checked and we fear it could be exploited. Much of it is somewhat too weak, for example, "having regard to..." is too non-committal, and there are many places where we need to see “Require” in place of “expect”.

89. The Guildford Society also has continuing concerns about cumulative impact. How will the Borough decide when the limit has been reached with respect to particular constraints and, therefore, at what points lack of major infrastructure investment will prevent approval of schemes?

90. We are concerned to ensure the Council has a strong capability (in policies and supporting skills) to contest developer claims that they are unable to deliver 40% affordable housing on the grounds of viability.

91. The Guildford Society is concerned to ensure that individual site allocations should refer to the need for sympathetic development to preserve local character—particularly because the qualitative part of the Local Plan (Development Management Policies) is lagging some distance behind this Site Allocations Local Plan. We would have preferred to have at least some idea of the likely detailed policy environment in which development of many of these sites will be brought forward. By way of an example, compare 2003 Policy HE4 on Listed Buildings, which has no let-out clauses, with the let-out in the new draft Policy D3.

92. We are concerned, therefore, to highlight the need for ‘saved’ policies in the 2003 Plan which have not specifically been superseded to be preserved and given currency pending adoption of the Local Plan (Development Management Policies).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
95. There is more within the transport aspirations to commend than to condemn.
96. LEP3 and Enterprise M3 input is good news. These may be subject to EU funding, and, following the ‘Brexit’ vote on 23rd June, there may be some doubt as to whether it will come forward.
97. The sustainable movement corridor is welcomed in principle but this also needs to extend southwards towards Shalford and Artington to achieve the greatest modal shift.
98. The Guildford Society has doubts that much of this will not be confirmed to be deliverable without having funding in place quickly—this may affect the soundness of the Local Plan.
99. We need a strategic plan to achieve affordable and sustainable commuting to better service our physically constrained gap town.
100. The Transport Group doubts that sufficient thought has been given to flexibility in sustainable inter-modal transport planning especially for Guildford Railway Station, where The Guildford Society strongly believes a transport interchange should be located. The considerable modal shift demanded puts the onus on the rail network with which Guildford (town and Borough) is richly endowed.
101. The Guildford Society strongly supports and advocates Guildford Vision Group’s proposed bridge linking York Road to Madrid Road to free up the town centre.
102. The Transport Group acknowledges that parts of the Transport Evidence Base are essentially work in progress, but show worthwhile application of analytical resources.
103. This applies particularly to work on the sustainable movement corridor, and the time is ripe for early consultation with the teams involved.

Local Economy Group Comments
119. The Guildford Society is concerned that the Plan lacks a proper economic statement, that the Evidence Base does not appear to link coherently to the Borough’s Economic Strategy and that some of the crucial messages are absent from the Draft Local Plan.
(www.guildford.gov.uk/economicstrategy)
120. Owing to the missing references to the Economic Strategy, there is no mention of Gross Value Added (‘GVA’) arising from the University, the Research Park, the technology sector generally, etc.
121. We are aware that the Council has received economic reports and that these highlight all economic sectors and a SWOT (Strengths, Weaknesses, opportunities and Threats) analysis of the local economy. This needs to be available alongside the Draft Plan.
122. The Plan provides insufficient focus on housing constraints for skilled workers as distinct from the shortfall of affordable homes.
123. There is an important decision to be taken about retail expansion—which has a low impact on GVA and typically lower skill levels—versus higher GVA sectors of the economy. This is reflected in a general shortfall in specified areas in the Plan for high quality town centre office space to attract large companies and head offices.
124. We strongly believe the Plan needs to have sufficient teeth to change attitudes where developers typically supply viability assessments for all major developments to show that affordable housing thresholds cannot be met. The viability report in the Evidence Base needs to be given much more prominence and the Plan Policy should refer to the need to rigorously apply the RICS Guidance Notes to viability assessments.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix F: Policies overview map

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Across the Borough as a whole under the Reg19 Consultation plan, there are several strategic sites (shaded in red on the plan below):

<see attachments for complete document>

These sites effectively form a broken chain of developments (whether urban extensions, village extensions or new settlements) as highlighted below at Figure 5.

The constraints imposed on the Borough through national and European Union guidelines, directives, laws and regulations such as Special Protections Areas (Thames Basin SPA) and Areas of Outstanding Natural Beauty (Surrey Hills AONB) serve to squeeze development allocations into a narrow corridor of largely disconnected settlements.

To the north east of Guildford, the sites are strung along the ribbon of the A3 – a failing part of the Strategic Highway Network – and to the west of Guildford, the sites sit largely between the A323 and the A31 – mostly with impaired access to either or both.

These constraints are unlikely to ease substantially during the plan period and, particularly the AONB, can be expected to endure into the next plan period. It is almost inevitable, following the logic of the site allocations in the Reg19 Consultation plan, that this chain will be further developed in subsequent plan periods.

In Figure 5 below, the blue dots show the broken chain between the strategic sites.

In Figure 6 below, the threat to the 5.1km rural gap between the conurbation of Aldershot (including the Ash & Tongham Urban Area), as extended to the east, and Guildford as extended to the west is plain to see.

Figures 4 & 5 show the future vulnerability to coalescence of settlements in the north eastern sector.

The Local Plan must provide for future development and it must regulate for the long term protection of the Green Belt boundaries to preserve the openness and prevent coalescence.

The allocation of sites currently in the Green Belt for development must not fly in the face of the fifth purpose of the Green Belt (to encourage regeneration of brownfield sites). Figure 7 below shows the strategic town centre sites that are allocated in the Reg19 Consultation plan.
The land allocated for development must be used better – Guildford cannot afford sprawling (garden village) developments that use a lot of land. The density of developments needs to be such that:

11.1. Allocated land is not wasted;
11.2. Development creates or enhances sustainable communities;
11.3. The developments must not create or aggravate imbalances within existing communities;
11.4. Densities and quantities of development are such that public transport can be provided efficiently;

On the other hand, Guildford needs to understand how to preserve key views, restrict height of developments to ensure strong and interesting rooflines, and to recognise the key landscape characteristics of the town and its surroundings.

Allocations of land are likely to be required within two local plan periods and suitable safeguards need to be put in place to ensure that sites are released and consented in such a way as to ensure that urban area regeneration can take place to resolve relative deprivation issues in many parts of the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: 20160717_GSOC_Response_to_ConsultationDraftReg19LocalPlan_FINAL.pdf (4.2 MB)

Comment ID: PSLPS16/7990  Respondent: 8561377 / The Guildford Society (Julian Lyon)  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

125. We reserve our comments made in respect of the Reg18 Consultation, and have attached a side-by-side analysis of the respective 2014 proposed allocations, our comments at the time and the Reg19 Consultation Draft.
126. Specifically, however, we identify below our comments in respect of Gosden Hill which has a larger land allocation than previously promoted.
127. GOSDEN HILL FARM:
127.1. In the deposit draft Local Plan, the area shown allocated for development at Gosden Hill Farm is estimated to have the potential to accommodate some 2,000 homes.
127.2. Whilst, in principle, the Society would regret the loss of open land forming part of the Green Belt, the Society acknowledged that there was potential to develop of a substantial area of land at Gosden Hill Farm and, if development was to take place, the development should provide for a new railway station at Merrow (on the site of the Surrey County Council Depot).
127.3. However, the Society’s position on what was proposed in the draft local plan was clearly set out in our response where we said, inter alia, “The Society does not support any development including P&R north of the east-west tree line dividing the site. (GBCS Potential Development Area C2) Development north of the line would impact adversely on the openness of the views on the approach to the town”.  
127.4. The Society’s full response to Reg18 Consultation is set out below:
“The Society does not support any development including P&R north of the east-west tree line dividing the site. (GBCS Potential Development Area C2). Development north of the line would impact adversely on the openess of the views on the approach to the town. There are substantial pluvial flooding issues that already affect Burpham and the land at C2 often ponds at its lowest points in heavy rain. The development of any of this land needs to have improved overall access to and from the A3. There consequently needs to be a reservation of land and policy support in the Local Plan for a 4-way all movement A3 junction. Without improved access the impact on traffic in Burpham and on London Road will be severe and no development should be permitted. Development of the southern half of the site should include a railway station and the land should be reserved for that purpose The openess of the site in the Green Belt fronting the A3 will be seriously harmed by development which will adversely affect the soft green edge of Guildford on the north side. The Society strongly believes development of this portion of site 59 (C2 in the GBCS Report) should be resisted. To the extent that the area designated C1 in the GBCS Report is not viable or would cause irreconcilable issues in Burpham – and having regard to the emerging Neighbourhood Plan for Burpham – the site should not be allocated and the Green belt boundary left as it is today. The formation of a four-way junction (subject to Highways Agency confirmation and all technical due diligence) should be created so as to give access to the Slyfield area and the A320 without adversely impacting the main population centre of Burpham, and so as to relieve traffic on both the A320 at Slyfield and on the London Road between Burpham and Guildford.”

127.5. The Society’s concern on this issue remains as stated. One of the purposes of the Green Belt is to preserve the distinctiveness of towns and settlements which lie within the designated Green Belt area. At present the approach to Guildford down the A3 from London is that one is not aware of the existence of the built up area of the town until one crosses Woking Road and begins to see the commercial development at Ladymead. If the north facing slope of Gosden Hill Farm is to be developed with housing a key setting of the town will be forever lost. This will have a major impact of the perceived attractiveness of the town.

127.6. Furthermore, the objections we raised at the time of the draft local plan have been given increased cause for concern when, as shown in our side-by-side comparison document annexed to this response, the site at Policy A25 includes an additional area of frontage onto the A3 when compared to the Reg18 Consultation site 59. The impact of that increase in area is that even more housing development will spread alongside the south side of the A3. The impact of further development will be reinforced even further in consequence of the proposal in the deposit draft Local Plan to allocate for housing the triangle of land formed by the ‘new’ A3, the old A3 and Clandon Road at Burnt Common (i.e. the area currently partly occupied by Eubanks Auction Rooms).

127.7. On the 19th January 2015 the Burpham Community Association held a Public Meeting. The guest speaker was Councillor John Furey, SCC Cabinet Member for Roads, Traffic and Flooding. His brief was to consider any planned or proposed road construction or improvements that would impact on Burpham, especially the A3 and the Slyfield/Clay Lane link road.

127.8. It is interesting to note that the plan of the Gosden Hill site as displayed at the Burpham Community Association meeting (see below) shows a greater area of the wooded area being part of the proposed site compared with the deposit draft local plan (see plan on page 5) which shows a greater extent of development alongside the A3.

127.9. In respect of Gosden Hill Farm, the notes of the Burpham Community Association meeting stated. “Mr Furey noted the proposal to build an urban extension comprising 2,000 dwellings, some employment land, a local retail centre, community hall, primary school and GP surgery. The developer, Martin Grant, intend it to be “transport sustainable” with a need for a park and ride, a new railway station at Merrow and a new southbound slip onto the A3 (as shown on the map above). These proposals are subject to the SCC Transport Assessment process and GBC is co-ordinating assessment work in connection with the three main strategic development sites (Gosden Hill, Blackwell Farm and Wisley) to assess whether the wider reaching impacts of the total developments combined with their proposed mitigation will be acceptable. There are no time scales for Gosden Hill – the draft local plan is on hold – so it is possible for a developer to submit an application prior to any formal local plan designation.”

127.10. The note of the Burpham Community Association meeting continues: - “If this development were to go ahead, the impact on Burpham would be horrendous. 2,000 dwellings are likely to lead to 4,000+ extra cars on the road plus any generated by commercial/business activities and people travelling to and from the proposed station at Merrow. The lack of north bound access to the A3 means that traffic will travel through Burpham to the Clay Lane slip road. Traffic wanting to access the south bound A3 at present has to use the old bypass (invariably congested) or go north to Burnt Common and
pick up the south bound there (adds mileage). With a new south bound access at Gosden Hill, people are far more likely to use that – passing through Burpham. If the proposed Wisley development goes ahead, even more traffic will be travelling through Burpham”.

127.11. The Society’s analysis and comment is set out below: 127.11.1. The BCA analysis of the traffic impact is generally correct.

127.11.2. Certainly if the (notional) junction arrangements with the A3 as shown on the plan displayed at the Burpham Community Association meeting are implemented, all traffic from the proposed new development seeking to access the A3 northbound will need to travel through Burpham to access the existing slip road from Clay Lane.

127.11.3. Additionally, all traffic coming off the A3 from the south and seeking to access the proposed new development will tend to leave the A3 at the Cathedral interchange and travel via Ladymead, Parkway and London Road thus putting further pressure on these sections of the already overloaded town road system, albeit traffic could exit at Ripley northbound and double back from the Clandon entry slip.

127.11.4. There needs to be a sensitive solution to the A3 junctions at Burpham and Burntcommon to ensure a workable solution.

127.11.5. If a new Park and Ride facility (planned to provide between 500 and 700 spaces) is incorporated into the proposed development, this facility will be used by drivers from the north of Guildford and, on their return journey, those drivers will also need to travel through Burpham to access the A3.

127.11.6. The proposed new railway station at Merrow will attract traffic. Whilst provision of a new station is supported, the cumulative impact of the traffic generated by the extensive area of new housing and from the proposed Park and Ride facility is of serious concern for the area of Burpham and Merrow.

127.11.7. In addition to the above, residents from the 2,000 dwellings will also seek to travel into the centre of Guildford and whilst many people will no doubt use a new Park and Ride facility (and perhaps also the railway station), inevitably there will be increased traffic on London Road.

127.11.8. In this respect it is interesting to note the Policy for the proposed designation (Policy A25) which states the intention, as part of this development, to provide “associated infrastructure on the A3100 corridor within Burpham” (i.e. along London Road).

127.11.9. Just how the resulting increased traffic levels will be accommodated on London Road – particularly bearing in mind our understanding that London Road is to become part of a ‘sustainable transport route’ favouring cycling and buses – is, as yet, unknown.

127.12. In addition to the impact of additional traffic the issue of visual impact remains as a key issue of concern. If the Borough Council succeeds in securing approval to the principle of development of this extensive area of land then, as an absolute minimum, the Society considers the development must provide a significant depth of tree planting alongside the A3 in order to help minimise the serious adverse impact of this development.

127.13. Figure 8 (above) highlights (yellow) the area of the Bushy Hill LSOA, which, from the CABE analysis we have demonstrated could accommodate almost 1,800 homes. This illustrates that the southern part of the Gosden Hill site (closer to the proposed railway station) could accommodate this number of homes without needing to develop the slopes down to the A3, save as required for properly-designed road infrastructure to and from the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
104. The Guildford Society response to this consultation will include both the Town Centre and Urban Guildford.

105. The Guildford Society has a well-publicised suite of policy documents seeking to protect and enhance the character of Guildford, which depends considerably upon its Heritage Buildings, its Conservation Areas and its Topography as a Gap Town within an Area of Outstanding Beauty and our aspirational policy of “Greening the Approaches”.

106. The Local Plan is very dependent on the provision of infrastructure, which if it is delivered at all, will be towards the end of the plan Period. The Design & Heritage Knowledge Group reiterates the concern to ensure that development does not take place until the necessary infrastructure is approved.

107. Constraints cannot be managed on a site by site basis. Good or bad, early proposals will succeed and later proposals will fail—without control, this will not provide the degree of control or predictability that would be expected from a Local Plan process.

108. Large infrastructure projects and modal shift will take many years to achieve, and the plan does not seem to allow for this delay.

109. Once again, the D&H Group echoed that Social Housing is needed throughout the Borough and is concerned about how to enforce the 40% aspiration.

110. Section 3.2 in the LP Document refers to "exemplary design". This reads well, but, “Exemplary Design” means very good and suitable to be copied. It does not require designs to be fit for purpose or respect the character of the area. This is an example of weak language creating loopholes for inappropriate development. [see also comments under Planning Group regarding the South East Regional Design Panel]

111. It also says "All development within the town centre will need to respect and enhance the unique setting and historical character of the town and be of the highest design and environmental standards.” This is welcome; But what about respecting the setting and historical character of the rest of Guildford Borough. It is not just Conservation Areas that need respect. Where people live is also important.

112. Policy P1 uses the phrase “conserve and/or enhance the setting and views of the AONB” is weak, especially to someone not familiar with the topography of Guildford. Parts of the AONB are visible from the Town Centre and there are views from the AONB across Guildford Town, in particular the views from Henley Fort, the Chantries and through the Wey Gap. I would suggest that “conserve and/or enhance the setting and views into and out of the ANOB” would be clearer and therefore easier to manage.

113. The Local Plan does make reference to the Central Government’s “Planning Practice Guidance on Natural Environment – Landscape”, published in March 2014. But only by saying that the AONB Management plan is a material consideration in determining planning applications within and adjacent to the AONB.

114. The Local Plan should emphasize the importance of protecting the setting of AONBs. There is a statutory duty imposed upon planning authorities by the Countryside and Rights of Way Act 2000, Paragraph 3, to have regard to the purposes of AONB designation when considering development proposals situated outside an AONB.
115. These words from the Rights of Way Act 2000 should be included in the Local Plan. “The duty is relevant in considering development proposals that are situated outside National Park or Area of Outstanding Natural Beauty boundaries, but which have an impact on the setting of, and implementation of, the statutory purposes of these protected areas”.

116. Policy D3 4.5.42 states that “Non designated heritage assets are identified by the local authority; the borough’s Local List includes over 200 buildings and structures and the Register of Historic Parks and Gardens includes 52 sites”.

117. Policy D3: Key Evidence lists the Local List, conservation area character appraisals and management plans and existing Conservation Area Character Appraisals. The Local Plan does not, however, provide any protection to these 252 heritage assets or reference any plan to get them designated.

118. In particular, many existing Conservation Areas, particularly in the town centre have no “existing Conservation Area Character Appraisal” or at least none published and accessible on the Council Website. Without a Character Appraisal it is difficult or impossible to judge the merits of a planning application in a Conservation Area, or to uphold decisions at appeal. The Local Plan should include a commitment for every Conservation Area to have a published and accessible Character Appraisal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford has had very low unemployment figures and in recent surveys has emerged as one of the wealthiest and best educated communities in Britain with successful high economic growth rates.

This successful development has been largely due to skilled worker inputs with very high value-added labour, especially around a cluster of economic activities outside the traditional town centre based on the Surrey Research Park, the University and hospital.

There is now a serious scarcity of housing for skilled workers who are key to the maintenance of existing facilities and enterprises such as schools, hospitals, public administration and of course highly specialised technical enterprises who not only make a great contribution to the Guildford economy but are also important to the British economy.

There are reliable reports that new companies are now reluctant, due to high housing costs, to establish themselves here.

While there is a need for welfare housing, recently the Office of National Statistics reported Guildford as the least deprived community in Britain.
This does not mean there are no problems in this area, but it needs to be seen in perspective with the need to sustain and encourage an efficient economy without which welfare social and environmental improvements cannot be sustained.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The majority of infrastructure (excluding transport and traffic) has not been assessed by the Society in this response.

The traffic and transportation studies are (in many parts) very detailed and these were issued on the same day as the consultation commenced.

The plan at Figure 12 [Figure 4.9 from the Surrey County Council Waverley & Guildford Model Validation Report] shows various routes assessed for journey times.

Given the scope and scale of development in other neighbouring authorities (especially Rushmoor), impact from these other authorities’ land allocations should be taken into account in assessing the Borough’s roads.

The link from the station to the University, Hospital, Research Park, Park Barn and proposed further development at Blackwell Farm among others, is excluded from the plan on Figure 12 because it is not a classified road.

This means that some of the analysis fails to take into account the extent of use of ‘secondary’ roads by the employment, infrastructure and residential sectors.

Figure 13 shows the same plan but with Guildford Park Road, Madrid Road, The Chase, etc., marked on it.

The Guildford Society supports Guildford Vision Group’s proposed linkage by new bridges (‘the GVG Crossing’) of the York Road and Madrid Road routes (see Figure 14, below).

The proposal would avoid east-west traffic having to use the riverside and town centre road network – enabling greater pedestrian priority in that area. This, coupled with one of the Town Centre Master plan solutions, would derive substantial benefits for the town.

If the new road were treated as an extension of the A246 to the hospital, university and Park Barn, this would allow more comprehensive planning of the Integrated Transport Network.

Furthermore, at Figure 15, below, we have superimposed the Town Centre Master Plan Scenario 1 solution onto the GVG Crossing to further illustrate the deflection of traffic away from the core town centre area.

The Society recognises that the Town Centre Master Plan is still work in progress and does not form a settled part of the Reg19 Consultation Draft.

The Society does believe, however, that the modelling of traffic scenarios must include the proper weighting for the linkage of York Road to Madrid Road.
Part of the solution needs to be an understanding of the roles and interaction between the railway station and the bus network.

Position Statement 3 - Infrastructure

The Society fears there is an infrastructure funding circle that may never be closed, but that developers will continue to require their sites to be assessed on the local impacts of their scheme (development being allowed as long as that impact is not ‘severe’).

The Society believes that the Local Plan must be configured to reflect the constraints where funding commitments have not been made, and where it is either not within the Council’s control (eg., Strategic Highway Network, Network Rail, etc), or beyond its the financial reach. Consequently, the Society believes the Council should:

64.1. Constrain the development within the Local Plan to that level that can be supported by existing infrastructure and through new or improved infrastructure where funding and delivery are either within the gift of the Council or firm commitment and all necessary approvals have been received. 64.2. Establish within the Council’s Corporate Plan the intent to deliver additional infrastructure and to obtain the necessary approvals and funding to be in control of its delivery;

64.3. Relax constraints in the Local Plan as part of the regular review process to enable further delivery of development based upon the prior delivery of infrastructure.

The Society is concerned that essential elements of the Transportation Evidence Base (launched on the same day as the Reg19 Consultation) show that some roads (notably Guildford Park Road, Madrid Road and The Chase) are not adequately analysed as they do not form part of the A-road classification network in Guildford. This is a major route which only stands to become more heavily used as proposed land allocations to the west of Guildford (inside and beyond the Borough) have an effect on this route.

Position Statement 5 – Town centre

The Society is keen to see the comprehensive and aspirational regeneration of the town centre.

The Society believes this should be broadly along the lines of the vision and subsequent study prepared by Allies & Morrison but with some crucial comments as follows:

67.1. The absence of provision (in the Reg19 Consultation Draft) for most uses (including the expected traffic generated by those uses), infrastructure requirements and housing numbers makes the overall Draft Local Plan somewhat unrealistic;

67.2. The reliance on a subsequent Area Action Plan is understandable but, as it is not at all envisioned in the Reg19 Consultation Draft, the Local plan itself may be unsound – for example as it relates to commuter parking versus a presumption in the infrastructure evidence base of a reduction of generation of traffic movements in the town centre;

67.3. There is a risk that the Council is standing across the gap between two railway carriages (the Local Plan and the Town Centre Master Plan); the carriages are not yet coupled together, and Guildford risks being torn apart as the gap widens.

67.4. The Society (along with many other residents’ groups and businesses) strongly supports the principle of the GVG crossing, but this option has not even been fully modelled as part of the wider traffic and transport analysis – largely because the route from the Farnham Road Bridge (A31) to the Cathedral, University, Hospital, Research Park and in the region of 7,500 households, is not classified as an A or B route.

The Society would regret this Local Plan process if it fails to deliver regeneration of the town centre and riverside and so the Plan must include sufficient comfort that this will happen.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPP16/17680 **Respondent:** 8561377 / The Guildford Society (Julian Lyon)  **Agent:** 

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Society recognises that we need to develop more homes than we have in recent years. We recognise that there is likely to be an impact on the Borough’s Green Belt.

The Society recognises that some substantial strategic developments will be necessary in order for the infrastructure to come forward (through development) to ensure the development can be implemented sustainably.

In Annex 6 of the Society’s original response, we highlighted the land uses and densities of all of the Lower Super Output Areas (‘LSOAs’) across the Borough.

Figure 8, below, shows the allocations nearest to Guildford Urban Area with the LSOA boundaries and with the Bushy Hill area highlighted in yellow.

The details of LSOA Guildford 008E are set out in full in Annex 6 of the original response but some are set out below in Figure 9

The Bushy Hill LSOA is 25.5Ha and comprises 649 households at 25.4 dwellings per hectare.

The Blackwell Farm allocation of 78Ha if developed at the same density would yield 1,985 homes, whereas the allocation is for 1,800 homes.

The development of Blackwell Farm, however (if it is even considered suitable for final allocation), would need to be concentrated nearer to the railway at the lower end of the site so as to protect the openness of the remaining Green Belt, and the views into and out of the AONB.

This example serves to demonstrate that our planning of residential settlements needs to be different from our previous urban extensions.

There are many academic papers referring to the application and implications of higher density development, and it is important for us and our communities to understand this.

An example of typical built densities is at Figure 10 (below), taken from CABE’s report on Better Neighbourhoods – used here because of its simplicity. [http://www.mae.co.uk/assets/pdfs/better-neighbourhoods.pdf](http://www.mae.co.uk/assets/pdfs/better-neighbourhoods.pdf)

The Society’s Annex 6 summary of areas identifies, in the same place for each LSOA, the built densities and the relative deprivation indices.
There are clearly areas of the Guildford Urban Area which would benefit from positive planning policies towards simultaneous densification and the creation of stronger communities and better infrastructure.

To a great extent the Reg19 Consultation Draft is silent on these areas (notably Park Barn, Westborough, Bellfields, Slyfield) where relative social deprivation is particularly poor on a local, regional and even national scale.

Figure 11 (below) shows that the Park Barn area is at approximately 20 dwellings per hectare, but that the relative deprivation (particularly for young people) is in the poorest 3% in the country.

These issues are not without solutions in the long term but the plan must facilitate development in new settlements that does not repeat spatial planning problems of the past and that the emerging Local Plan provides the policy support it can to enable a development-led solution in these areas.

Turning to the Housing target, we fully endorse the study, analysis and findings of Neil McDonald on behalf of GRA, and reject the GL Hearn SHMA in its approach, methodology (especially where this has not been provided for critical analysis), and findings.

The GL Hearn study is merely one professional opinion. It should not be read as a factual or empirically accurate forecast. GL Hearn’s report fails to demonstrate it is more than an educated guess and, in this case, the guess appears to be both poorly founded and wildly inaccurately formed.

GL Hearn has failed to understand the impact of Guildford’s University and wider further education institutions upon the overall demographic make-up of the Borough.

It is unfortunate that the ONS has failed us and the professionals in its own inability to screen for student communities and in the poor structuring of questions in the 2011 Census.

The measurement of inter-census immigration by reference to GP registrations, and the failure to recognise the effect of overseas students leaving their studies without deregistering from GP surgeries, has been completely missed.

The Society’s population analysis (part of the response to the 2014 Draft SHMA, annexed to the Society’s Reg18 Consultation response) highlighted the ineffectiveness of the question to students in Houses of Multiple Occupation (‘HMOs’) relating to non-term-time residence. There was only one area for the nominated head of household to record non-term-time address, where the HMO may have had three to ten students who were resident at the time of the census.

The Society has set out the following POSITION STATEMENT on housing:

Position Statement 1 - Housing

Whilst supportive of the stated intention, The Society is very nervous about the proposed structure of the Local Plan whereby land allocations are made at the outset, where timings are targeted towards infrastructure delivery, and where such control of the pipeline may not be controllable in that way over the course of the Plan.

The Society would like to see:
38.1. a constrained plan with a lower target housing number, an early review and frequent subsequent reviews to establish that there can be no development without the infrastructure;
38.2. allocation of several of the sites for future development beyond the plan period, but with the acceptance that, if the housing need requires AND the infrastructure has been put in place or is already committed, these sites could be brought forward within the plan period – otherwise they would serve (in accordance with NPPF) as identified sites for development beyond the plan period;
38.3. a clear process and commitment by the Council to collect and analyse local household formation rates and population flows to ensure that any distortive effects of the University’s transient population can be taken into account alongside specific structural shortcomings in our local economy’s employment base. This will ensure that the proposed plan reviews are objective and relevant, taking full account of the Office for National Statistics (‘ONS’) background data and local conditions;
38.4. the progressive improvement of key areas of the Evidence Base many parts of which remain incomplete, underwhelming, or simply ineffective and not fit for purpose (this applies particularly to the Settlement Profiles – in particular as it applies to the Guildford Urban Area – which should form part of a strong basis for land allocation decisions and regeneration plans in settlements across the Borough;

This Position Statement is at odds with the Council’s approach but is a pragmatic interpretation of the anticipated ability of the Council (in the context of planning legislation and regulation, and the unpredictability of interpretation of policies in practice).

Position Statement 2 – Housing Numbers

Whilst recognising the need for Guildford, where possible and subject to very real constraints, to provide sufficient housing to meet our needs, we do not have faith in the West Surrey SHMA (for Guildford, Waverley and Woking) prepared by GL Hearn for the combined commissioning authorities.

The Society has studied the SHMA, has observed the evidence, has read the analysis prepared for the Guildford Residents’ Associations (‘GRA’) by Neil McDonald (June 2016) and has studied the census and ONS data.

We have concluded that there is a very high likelihood that the SHMA substantially overstates the Objective Assessment of Need because:

The West Surrey SHMA shrinks from analysis of the underlying population data which show a statistical error in ONS estimates for Guildford far in excess of that for surrounding authority areas. Two charts below show an illustration of the population age ranges where the errors occur, and the corresponding population profiles. It is absolutely clear that GL Hearn has failed to question its data effectively and the Society believes it has made a serious error of professional judgement in its analysis for this important University Town:

The proposed ‘affordability uplift’ is flawed;
45.1. The (usually transient) student population needs to be separated out from the remainder of the population in order to ensure the Local Plan provides appropriately for both groups;
45.2. Housing estimates for economic growth are essentially double-counting and should be removed (or at least properly validated);
45.3. An adjustment is likely to need to be made in the near term depending upon the outcome of post-Brexit decisions (personal, economic and political);
45.4. Consequently, the Society believes our Objective Assessment of Need (‘OAN’) is in the region of 510 homes per year, and that this should be the basis of the Local Plan (with the proposed reviews and analytical approach proposed in Position Statement 1).

In the event the Local plan overstates the OAN, the existing shortfall of infrastructure will come under additional strain, the pressure to develop housing will probably outweigh any delay in or failure to commit funds to infrastructure, and planning policy does not allow for development to finance pre-existing deficiencies in infrastructure.

Housing Density

Using the CABE figures, and planning an urban extension or settlement to have, say, 50% Urban Village, 33% Garden Suburbs and 17% Suburban Semis would generate an overall density of circa 65dpH in masterplanned sites. A development of 1,800 homes would require a land take of around 28Ha and, with a concentrated village core, services (including buses) would become more viable – all the more so if this were concentrated around a new transportation hub such as a railway station.

With this in mind, an area the size of Bushy Hill could accommodate almost three times the number of homes, and a large portion of, say, Blackwell Farm and Gosden Hill Farm (notwithstanding our separate comments about these proposed allocations) could be retained and made a permanent Green Belt boundary and/or Sustainable Area of Natural Greenspace.
The Guildford Society remains seriously concerned about the robustness and accuracy of the Strategic Housing Market Assessment.

An independent review commissioned by the Guildford Residents’ Associations has uncovered flaws in both the principal modelling and the application of the numbers in reaching the consultant’s recommendations.

Despite representations prior to and as part of the 2014 consultation, the Settlements Profiles Report falls a long way short of the necessary standard – it is still full of errors and fails to take any sensible account of the 50% or so of the Borough which lies in the Guildford Urban Area.

There is considerably more traffic data sitting behind this draft. It was unfortunate that this was delivered so late, leaving insufficient time to review it fully. The initial studies of it show there to be several fundamental and yet unexplained assumptions about future traffic use. The detail provided so far in relation to the Sustainable Movement Corridor is not sufficient to support or reinforce the wider traffic assumptions for the town centre, local road network and strategic road network.

The Society still has reservations about the approach to land parcelling and consequent findings arising from the Green Belt and Countryside Report. We recognise there is a need to plan to use some Green Belt land to achieve the Plan Objectives (which are in part predicated by the flawed SHMA).

More detail about our concerns about the Evidence Base are in our original submission of 2014 and, where additional emphasis is required, in the submission in response to this Regulation 19 Consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Guildford Society recognises that Guildford Borough Council has taken legal advice in preparing the Local Plan, whereas we and other charitable bodies do not have access to such advice.

The Society expects there to be a legal challenge from some groups in the Borough who object to the removal of land from the Green Belt.

Whilst we regret the need to remove some areas from the Green Belt, we have taken the view in our previous submissions and in our submission in response to this Regulation 19 Consultation, that we will support the notion (noting our concerns about the reliability of the SHMA) that we will need to use some Green Belt land in this plan period to meet our housing need and to allow the time to properly regenerate our urban brownfield sites.

We do not propose to comment on legal compliance for itself, but rather to make the judgement that IF the plan is legally compliant, we wish to ensure it is the best it can be.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/2023  Respondent: 8561377 / The Guildford Society (Julian Lyon)  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Guildford Society questions the soundness of the Draft Plan on several grounds, not the least of which are: the shortcomings of the SHMA, the Green Belt report, and the highways assumptions.

The Society condemns the failure to provide for a new link between the west of Guildford which will be expanded substantially under the planned site allocations (in the region of 10,000 homes plus the growing university, the hospital, the expanding research park and other centres of employment by the end of the Local Plan period).

Of greater importance is the notion that the plan does not adequately provide for development beyond the plan period. The Society’s full submission highlights the restrictive nature of the Borough and illustrates the likely future pressures to sprawl along a narrow corridor of the Borough as we have to plan for future pressures to grow.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/2024  Respondent: 8561377 / The Guildford Society (Julian Lyon)  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Guildford Society is concerned that the Duty to Co-operate has not been shown to be applied evenhandedly.

The impact of developments beyond the boundaries of Guildford Borough have not been fully assessed for impact on Guildford’s infrastructure, and, in providing for an inflated Objective Assessment of Need number in full (GL Hearn’s target), it is likely Guildford will have to take additional development from our neighbours who we expect to restrict their development by applying greater emphasis to maintaining Green Belt boundaries.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Guildford Society has

- engaged positively in the Local Plan process from the outset,
- held public meetings (free of charge) to explain elements of the evidence base, plan and process so as to ensure as objective as possible an approach to responding to the Local Plan consultations.
- requested and obtained acceptance from the Director General of the Office for National Statistics that the population projections contained anomalies arising from the (important) transient student intakes in Guildford,
- provided a contribution of some funds to help GRA commission an expert to review the SHMA, and
- drawn on the knowledge of our four knowledge groups, planning, transport, design & heritage and local economy – all of which includes respected experts – to inform its contributions.

The Society would like to participate in all matters at the inquiry. We reserve our position in respect of independent experts we would wish to accompany us be accompanied by an expert witness for the SHMA and for transport-related in respect of specialist matters.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Where possible, the Guildford Society wishes to support Guildford Borough Council’s attempts to adopt a new, sound, progressive and regenerative Local Plan.

We do not agree with some fundamental points – noted herein and in our full submission – and we are concerned that misguided public relations stunts such as the publicly-funded video may skew responses or underpin objectors’ scepticism so as to make the Local Plan process more challenging.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Guildford Society
The Society started life as the ‘Old Guildford Society’ in 1896, spurred into action by the celebrated designer William Morris who wrote a letter to a prominent local art historian, George Williamson, urging him to form a ‘watching committee’ to guard against threats to Guildford’s unique High Street. It engaged in a number of campaigns, disbanding in 1902.

Re-formed as ‘The Guildford Society’ in 1935, campaigning restarted to protect Guildford’s unique character. The issues then are as now – how to preserve the best whilst accommodating growth and development in a gap town, bisected by a river and surrounded by beautiful Green Belt countryside of which there are grand views from within the town’s centre and boundaries.

By 1960, 57 listed buildings had been demolished (11 in the High Street) to make way for a growing population, increased road traffic and the town’s prominence as a commuter rail hub. The Society itself flagged up 160 buildings it deemed at risk.

The late Lord Onslow, in his role as The Society’s President, noted: ‘There is one thing that we must look out for. Planners have become too frightened of boldness in design. There are some wonderful old buildings and complexes in our town and it must be the object of all of us that what is built in the future lives up to the best of the past…We conserve a town as a living entity and not in aspic.’

Our present Constitution enshrines all these issues in its aims, which can be distilled down to our modern strapline: ‘Speaking up for Guildford’s Past, Present & Future.’

Today, The Society, numbering over 400 subscription-paying members, monitors all aspects of town (and sometimes, Borough) life through three principal Groups – Planning, Transport and Design & Heritage. These are manned by
volunteers, most with appropriate professional and business experience, beneath an umbrella Executive Committee responsible for the overall direction and health of The Society. Members of the 12-strong Executive stand for election for a 3-year term at the AGM, and elect a chairman annually from amongst their number.

The Planning Group screens all planning applications, picking out and examining those it sees as meriting comment. Comment inevitably has to be lodged as an ‘objection’ as that is the way the public planning system works. On larger schemes there is often pre-application discussion with the developer.

The Transport Group monitors road, rail, cycle and pedestrian issues, involving debate with County Council and Highways authorities. There are various public consultation bodies, into which the Transport Group feed its views, often as an established member.

The Society is organised with four quasi professional groups of experienced volunteers with a wealth of relevant expertise (the Planning Group, the Transport Group, the Design & Heritage Group and the Local Economy Group) forming a combined ‘Knowledge’ Group.

This combined expertise has helped us to form an objective response to both the Society’s Reg18 Consultation and the Reg19 Consultation responses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**APPENDIX A1 – Maps showing 500m Buffer of Public Transport Interchange**

A. The Guildford Society welcomes the inclusion of this map. We do feel it should show all of the areas within 500m and 1km of each of these transport interchanges and all other railway stations in the Borough to show prime opportunities for sustainable development, providing other national and regional planning policies (notwithstanding special circumstances) permit

[ Guildford Stations Map]

[ Ash Station Map]

[ Ash Vale Station Map]

[ Clandon Station (with Guildford East (Merrow) Station]

[ East Horsley & Effingham Junction Stations]

[ Gomshall Station (entirely surrounded by Surrey Hills AONB)]
B. It is very significant that the Surrey Research Park currently falls well outside the 500m (and even a 1500m buffer from any station. The desirability of the Guildford West Station is self-evident from an employment perspective.

C. Another major employment centre, Slyfield Industrial Estate, also falls outside the range from any station, identifying the benefit that would be derived from the Sustainable Movement Corridor extending to the Estate and a new Park & Ride for business and shoppers at the northern edge of the Estate (as previously proposed in the Guildford Society representations.

D. There remains no solution in the local plan for connecting the town to Guildford Business Park and Cathedral Industrial Estate close to the A3 at the Dennis Roundabout (Wooden Bridge).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp173/546  Respondent: 8561377 / The Guildford Society (Julian Lyon)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix B: Town Centre Shopping Frontages

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
F. The Guildford Society by and large accepts the hierarchy as shown.

G. It is a pity the Settlement Profiles Report does not provide greater clarity in respect of the quality, role and accessibility of Local and District Centres, as this would allow a more informed policy that also had regard to the state of local public houses and other A3 community uses. This should also extend to farm shops and should provide some clarity in respect of petrol filling stations with associated shops, farm shops and garden centres. There is apparently no clear policy on food retail and out-of-town retail such as the Ladymead Retail Park and car showrooms, all of which have a part to play in our economy and communities as employers and service providers.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** pslp173/549  **Respondent:** 8561377 / The Guildford Society (Julian Lyon)  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Appendix C: Infrastructure Schedule

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

H. The Infrastructure Schedule has most substantially been changed to place the burden of providing infrastructure onto developers with a change from ‘Developer Contribution’ to ‘Developer Funded’

I. We have tallied up the given costs for developers as £1.169 billion for which developers will be partly or wholly responsible; we also note 46 further lines where developers are either solely or in part required to fund infrastructure works.

J. There has not been (to our knowledge) any adjustment made to the Viability Assessments to establish whether or not the plan remains viable, the strategic objectives of delivering affordable housing and infrastructure will be achieved and, indeed, with development ‘contingent’ on infrastructure, whether there will or even should be any development in the Borough. This is a very poor position from which to judge the soundness of the plan.

K. The most significant comments, however, are that a. there are no accompanying plans for the works that would show what is proposed to be done and allowing us to evaluate or estimate the effect on the remaining infrastructure; and b. there is no indication of the dependencies that are implicit in the statement that developments are ‘contingent’ on infrastructure.

L. Although already committed, we believe that the replacement of Walnut Bridge between 2017 and 2021 may prove to be premature if its design does not take account of both expected development on the Bedford Wharf site to the east and its relationship with any Railway Station development on the west as well as considerations for crossing Walnut Tree Close.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Appendix D: Evidence base
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

AIR QUALITY ASSESSMENT (AECOM JUNE 2017)

M. In the Introduction to this report, Aecom note that “The air quality review presented in this report has considered the potential effect of the proposed Draft Local Plan on annual mean concentrations of NO2, PM10 and PM2.5 for sensitive receptor locations within the GBC administrative area. These pollutants have been considered as these are the key pollutants associated with exhaust emissions and these are the pollutants of greatest concern generally within the UK... In summary the findings of the air quality review suggest that the effect of the Draft Local Plan on annual mean NO2 concentrations will be negligible and not a key constraint on development in the majority of the GBC administrative area. However, further detailed modelling would be advisable around roads where notable changes in traffic flows are predicted, at locations in close proximity to sensitive receptors…”

N. It is difficult to understand how modelling could have been carried out in the town centre where there simply is no plan.

O. The study finds there will be ‘negligible change’. This means there will not be any significant improvement, which, given the modelling carried out in Guildford by Goel and Kumar (Annex 3), is frankly disappointing.

P. Changes in traffic flows that may lead to a significant change in air quality include where annual average daily traffic (“AADT”) flows will change by 1,000 vehicles.

Q. In a response to an enquiry made under the Environmental Information Regulations (attached at Annex 4) ref: FOI2016/00440, Guildford Borough identified that the expected impact of the proposed development of 1800 units around 11 miles from Guildford town centre would generate 331 vehicles entering the gyratory during the three hours of the morning peak.

R. It is difficult to believe the development over the plan period of 12,426 homes in the Borough, added to many thousands of homes in neighbouring boroughs, will not, therefore, have an impact of many times the 1,000-vehicle threshold for a likely significant change in air quality.

S. Air quality in the town centre is already poor due to the volume of standing traffic on the gyratory and approach roads at peak hours. It will inevitably get worse.

T. Guildford does not have many electric vehicle charging stations and there is no clear guidance in the local plan – and a general shortfall in electricity infrastructure – to encourage many more charging stations to be built.

[Image]

U. Bizarrely, the Aecom report makes no significant reference to the town centre. The Guildford Society believes that makes this part of the evidence base not fit for purpose.

ASSESSMENT OF THE VIABILITY OF CARBON EMISSIONS TARGETS FOR NEW BUILDS (2017)

V. We have nothing particular to add to the study by Evora Edge, and support the aspiration to reduce our carbon footprint in development.

EMPLOYMENT LAND NEEDS ASSESSMENT (AECOM UPDATE MARCH 2017)

W. On page 5 Aecom has cited the plan period as 2016 to 2034, reducing the period by a year. This time period translates to the employment targets used in the local plan and the figures in the plan may, therefore, be inaccurate.
X. We note the comment made by AECOM: “Where sites are available the Council could seek to encourage office/R&D development in town centres. The town centre is a more sustainable location and there is evidence of demand from potential occupiers which currently do not necessarily have town centre offices that match their needs. The lack of supply of office/R&D premises in town centres is exacerbated by the loss of offices to residential from the prior approval permitted development regime.” We tend to support the approach Guildford Borough Council have taken to direct employment to locations that are easily accessible by public transport as well as cycling and walking.

Y. By our calculations, the local plan as drafted, will have an impact on GVA in the borough of circa £100m per annum in terms of new employment in the borough once all development is completed. We note that by optimising uses of planned buildings, this could be increased by another £70m by focussing on supporting high value employment in preference to relatively low value retail employment.

Z. We also note that if a comprehensive town plan was implemented as proposed by Guildford Vision Group, the gain in GVA in the borough would be even higher, probably at double the gain from the current Guildford Borough Council plan. This again highlights the strategic failings and lack of ambition in failing to bring forward a town centre plan contemporaneously with the local plan.

ENVIRONMENTAL SUSTAINABILITY AND CLIMATE CHANGE STUDY

AA. The document in the Evidence Base is undated and we are not certain as to whether this has been amended in any way.

BB. We have no reason to consider the information is accurate or not. It is clear that greater attention should be paid in the plan to master-planned flood risk management in the town centre.

EQUALITIES IMPACT ASSESSMENT SCREENING (2014)

CC. Out of scope for the consultation

GREEN BELT AND COUNTRYSIDE STUDY, VOLUMES 1-6 AND SUMMARY (2013 - 2015)

DD. Out of scope for the consultation, however, we can find no particular indication in the GBCS report to explain why Wanborough should be deleted from the plan (A47) and Send, for example, should remain in the site allocations.

STRATEGIC HIGHWAY ASSESSMENT FOR THE PROPOSED SUBMISSION LOCAL PLAN (SURREY COUNTY COUNCIL, JUNE 2016) - DELETED

EE. We assume the deletion relates to the incorporation of a different impact assessment document. [Transport Group?]

GUILDFORD TOWN AND APPROACHES MOVEMENT STUDY: STRATEGY REPORT (ARUP, MARCH 2015)
GUILDFORD TOWN AND APPROACHES MOVEMENT STUDY: SCENARIO ANALYSIS AND APPRAISAL OF INTERVENTIONS REPORT (ARUP, MARCH 2015)
GUILDFORD TOWN AND APPROACHES MOVEMENT STUDY: VISION, OBJECTIVES, BASELINE AND BUSINESS-AS-USUAL REPORT (ARUP, MARCH 2015)

FF. All out of scope for the consultation

GUILDFORD STRATEGIC PARKING STRATEGY: STAGE 1: PARKING DEMAND (STEER DAVIES GLEAVE, AUGUST 2013)
GUILDFORD STRATEGIC CAR PARKING REVIEW: STAGE 2: CAR PARKING MANAGEMENT PROPOSALS (STEER DAVIES GLEAVE, AUGUST 2013)

GG. Both out of scope for the consultation although note our comments on the parking policies. We have (at Annex 4) included a paper, published recently by INRIX, showing the social and economic cost of town centre parking, where drivers spend time and fuel looking for vacant parking spaces. The Council should improve both access to and from car parks, but also informative signage and remote applications to direct drivers to the nearest available parking space(s).

GUILDFORD BOROUGH TRANSPORT STRATEGY (JUNE 2016)
HH. We are puzzled as to why the Evidence Base cites the 2016 report when there is a June 2017 version of Guildford Borough Transport Strategy. Our comments, therefore, relate to that document.

II. We note especially some of the comments on our transport networks, notably:

a. The adverse impacts of localised traffic congestion and/or high traffic volumes on the setting and amenity of communities, including in relation to road safety, severance, noise, air quality and the demand for parking, and also the discouragement to walking and cycling.

b. Severance of the town of Guildford and its constituent neighbourhoods resulting from a combination of the A3 trunk road, railway lines and the River Wey.

JJ. The Transport Strategy in respect of the Local Road Network includes (for the town centre) describes as Committed Improvements: Guildford Town Centre Transport Package including vehicle-targeted schemes (whatever those may be); Revised access to Millbrook car park; Experimental closure of Walnut Tree Close. It describes as Anticipated Improvements: None. It describes as Aspirations: Guildford Town Centre Transport Transformation Package, including vehicle-targeted schemes. These packages are hardly enough to keep the town moving without any development. They do not indicate that the town centre will be ready for the level and scale of development envisioned in the local plan – ‘contingent’ upon infrastructure delivery.

KK. There is a helpful schedule at the back of this report that bears at least some resemblance to Appendix C (see above) but is by no means identical.

GUILDFORD DRAFT LOCAL PLAN: EDUCATION REVIEW (MAY 2016)

LL. We have no particular reason to dispute this document excepting that the population numbers are not generally accepted and are being challenged by Guildford Residents Associations (GRA). We support their analysis.

MM. We note the reference to education provision in Guildford town centre:

a. In-fill development in and around the town is likely to require mitigation between three and ten years of the plan. There are limited options for further primary expansion in Guildford Town. Alternative sites and options will be considered with local schools, alongside provision with strategic sites.

NN. We note there is provision for education in the Guildford Vision Group master plan for the town and we support their approach.

WEST SURREY STRATEGIC HOUSING MARKET ASSESSMENT (SHMA), SEPTEMBER 2015 - DELETED

OO. We note the deletion of the 2015 SHMA. Comments in respect of the up to date version are at the Housing Section, towards the beginning of this response.

PP. We have no specific comments on this update, save to stress our comments relating to the provision of SANG for town centre sites made earlier in this response.

HISTORIC ENVIRONMENT INFORMATION (2016)

QQ. We welcome this document although we do not understand why it still watermarked with ‘DRAFT’.

RR. As noted in our responses to the plan itself, we consider that the plan would benefit from a map of heritage assets and, in particular, an indication as to which sites are likely to require archaeological investigations.

SS. Out of scope for the consultation.

TT. The Land Availability Assessment Addendum does provide some insight into changes in allocation but does not explain why, for example, Flexford – Site Allocation A47 – is more sensitive than, say, Send.

UU. The housing trajectory in the plan (especially given the mathematical requirement to build 653 homes per year from 2015 to 2018 inclusive, looks to be unachievable from the graph in the LAA Addendum:

[Table]

VV. The supply trajectory in the LAA Addendum is as follows:

[Table - Five-year housing requirements at 1st April 2017]

[Table - Housing supply at 1st April 2017]

LANDSCAPE (AND TOWNSCAPE) CHARACTER ASSESSMENT (2007)

WW. Out of scope for the consultation.

LOCAL HOUSING NEEDS SURVEYS

XX. As we have pointed out previously, the local plan would benefit from a much more robust (and accurate) Settlement Profiles Report. In this category, there is no assessment of local housing need for the entire urban area of Guildford, covering more than 50% of the Borough’s population.

LOCAL PLAN AND AFFORDABLE HOUSING VIABILITY STUDY (2014)

YY. Although as a 2014 document this is out of scope for the consultation, we are concerned that this document is out of date, cannot possibly take account of the additional burden of developers’ costs (Appendix C) and increases in construction costs in the meantime, and may make Affordable Housing much more difficult to deliver in the sort of numbers called for in the assessment of need.

MONITORING REPORT 2015/16 (2016)

ZZ. This document demonstrates the historic shortfall in housing delivery, and calls into question the robustness of the housing targets when considering the short term (four year) target of 653 homes per year implicit in the local plan.

OPEN SPACE, SPORTS AND RECREATION ASSESSMENT 2016

AAA. This document is out of the scope of the consultation.

RENEWABLE ENERGY MAPPING STUDY 2015

BBB. This document is out of the scope of the consultation

RETAIL AND LEISURE UPDATE STUDY (2014)

CCC. This document is out of the scope of the consultation

RETAIL AND LEISURE STUDY ADDENDUM (2017)
DDD. The Carter Jonas Addendum highlights demand for comparison retail floorspace and food and beverage at circa 47,000 sqm and 9,500 respectively, whereas the amounts in the draft local plan are at 41,000 sqm and 6,000 sqm – all of which is projected to be accommodated in the North Street development.

[Table 4.3: Forecast Food and Beverage Floorspace (sqm gross)]

EEE. Whilst the Guildford Society has a different view of both the prospects for and the desirability of retail space over the plan period, we do expect that the figures need to be consistent between evidence and plan.

FFF. Carter Jonas conclude that 32,665 sqm of comparison shopping is identified during the plan period to 2034 when food & drink (A3) is netted out.

RURAL ECONOMIC STRATEGY 2017

GGG. We have read the Rural Strategy (published during the course of the consultation) and, whilst it makes relatively little mention of the Local Plan, it does not seem to be inconsistent with it.

SETTLEMENT HIERARCHY (2014) AND PROFILES (2013)

HHH. Whilst these documents are notionally beyond the scope of this consultation, we have commented consistently, in every local plan consultation since they were first published, that they need to be corrected. They ideally need to be rewritten and the Guildford Urban Area needs to be broken into local communities to ensure the local plan is providing for local need across the Borough.

III. The local plan is deficient in many areas simply because there is not enough information for plan-makers to provide solutions and much-needed development and infrastructure.

SITES OF NATURE CONSERVATION IMPORTANCE (SNCIS)

JJJ. This document is out of the scope of the consultation.

STRATEGIC FLOOD RISK ASSESSMENT SFRA (2016) – LEVEL 1 AND LEVEL 2

KKK. Although these documents are out of the scope of the consultation, we are disappointed that much of the content of these documents has been passed over in creating the Flood Risk Topic Paper (2017) and, as a consequence, the plan does not deal comprehensively enough with resolving the flood risks from various different sources.

STRATEGIC HIGHWAY ASSESSMENT FOR THE PROPOSED SUBMISSION LOCAL PLAN (SURREY COUNTY COUNCIL, JUNE 2016)

LLL. Although this document is out of scope, it is also out of date. We do understand the Council’s rationale for retaining the older document because the amount of development is reduced, and so the effect on infrastructure is likely to be reduced too. On the other hand, a plan that is ‘contingent’ on infrastructure should have an updated account of the impacts of the developments in order to be able argue effectively the case for the infrastructure before development.

SURFACE WATER MANAGEMENT PLANS

MMM. Although these documents are out of the scope of the consultation, we are disappointed that much of the content of these documents has been passed over in creating the Flood Risk Topic Paper (2017) and, as a consequence, the plan does not deal comprehensively enough with resolving the flood risks from various different sources.

NNN. We note the Sustainability Appraisal Addendum settles on Guildford town centre to the effect that housing provision greater than is expressed in the local plan would be unstable:
“6.6.4 In-line with the sequential approach, there is a need to maximise growth in Guildford town centre, which means allocating or supporting land (henceforth ‘supporting’) for 1,150 dwellings. Whilst there are additional sites that could conceivably be supported in order to deliver a higher number, there is little to suggest the potential to do so sustainably, and so 1,150 dwellings was identified as a ‘given’ for the purposes of developing spatial strategy alternatives. N.B. the figure of 1,150 is 22 homes lower than the equivalent figure in 2016 (1,172 homes). The change reflects A) planning permissions; B) removal of the Telephone Exchange, Leapale Road (100 homes), on the basis that it is unavailable in the plan period; and C) addition of 200 homes at the North Street redevelopment, which is now understood to be suited to higher density development, given its central location.”

OOO. We believe Guildford Vision Group has illustrated a plausible solution for the town centre which could accommodate two thousand more homes. We firmly believe this should be investigated.

PPP. Significant for The Guildford Society Transport Group is the statement, as in 2016, that: “It is difficult to draw strong conclusions in the absence of detailed transport modelling evidence (a new Strategic Transport Assessment is in preparation, which will take account of proposed mitigation measures, e.g. junction upgrades); hence uncertain effects are predicted.”

QQQ. The vulnerability of the plan with respect to the Sustainable Movement Corridor being developed by Guildford Borough Council is revealed by the lack of any quantifiable benefit.

RRR. The proviso “leads to concerns” keeps recurring, and the conclusion is that the report does little to reassure as to the overall “sustainability” of the Plan.

SSS. The document itself seems to give a reasonable summary of the process and thinking behind it. We may disagree with the treatment by Guildford Borough Council of the town centre and its infrastructure in developing the local plan, but the appraisal itself seems to be complete and broadly supportive of the plan itself.

THAMES BASIN HEATHS SPECIAL PROTECTION AREA AVOIDANCE STRATEGY 2009-2016 (2010)

TTT. This document is out of the scope of the consultation, although please note our comments about SANGs for the town centre housing at various stages throughout our representation.

TRAVELLER ACCOMMODATION ASSESSMENT (20172)

UUU. We have no particular comment to make about this document.

WATER QUALITY ASSESSMENT

VVV. This document is out of the scope of the consultation

WEST SURREY STRATEGIC HOUSING MARKET ASSESSMENT (SHMA), SEPTEMBER 2015

WWW. This document is out of the scope of the consultation although we would draw attention to our response to the 2014 and 2016 consultations.

WEST SURREY STRATEGIC HOUSING MARKET ASSESSMENT: GUILDFORD ADDENDUM REPORT 2017

XXX. We do not accept GL Hearn’s methodology and consider the approach taken on behalf of the Guildford Residents Associations (GRA) to be more robust, considered and capable of interrogation. A copy of the report for GRA is attached (Annex 2)

WEST SURREY FUNCTIONAL ECONOMIC MARKET AREA (FEMA)

YYY. [We do not have any specific comments to make other than to note it varies from the previous Travel-to-Work Area and may not have enough reference to Aldershot, Farnborough and the Winnersh triangle.]
FUTURE RESEARCH
Rural Economic Strategy

Answer (if comment is on questions 1-7 of the questionnaire): ()

APPENDIX G – Policy and Monitoring
We have not cross-checked with the individual policies to establish whether these are complete and accurate, and where we have made comments about monitoring, these have been made in the sections on the policies themselves.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  pslp171/3260  Respondent:  8561377 / The Guildford Society (Julian Lyon)  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Key facts

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Forward

a) In the Foreword to the plan we note the use of the word ‘CONTINGENT’ in paragraph 4. We agree that infrastructure should come first but we suspect this will act as a brake on development when regard is had to the failure to reach agreement with external agencies such as Highways England, failure to identify how to deliver greater power and water (supply and drainage), and a reliance in the amended Infrastructure Delivery Schedule (Appendix C) on developer funding for most infrastructure.

Key facts

b) The Guildford Society agrees the introduction of paragraph 2.10a: “Pressure on existing infrastructure and additional stress caused by planned growth must be addressed if we are to maintain and enhance the borough’s prosperity and quality of life. Many people are attracted to Guildford by the quality of life and environment...”
c) It is also worth noting that the IMD subdomain data (as illustrated by The Guildford Society in our 2014 response) points to some major areas of relative deprivation across the Borough. As a result, the Society has rerun the data for the Lower Super Output Areas (Annex 1). The Settlement Profiles Report should highlight these issues and the evidence should point to solutions rather than simply justifying policies and strategies.

d) The enhanced wording at 2.13 is somewhat complacent in its generic treatment of ‘most local roads in the urban areas’. Again, these should be informed by a robust and comprehensive Settlement Profiles Report, and solutions identified to ensure that health and social infrastructure is accessed by adequate footpaths, cycle ways and crossing points.

e) The Guildford Society welcomes the strengthening of 2.10a, 2.14a and 2.14b compared with the deleted 2.22:

a. Paragraph 2.14a correctly highlights the impact of the A3 on Guildford and approaches. It also points to urban congestion and highlights that “it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” There is, however, a general failure in the plan and evidence base to highlight the problem with the gyratory system caused by so many junctions in short distances with no co-ordination of signals in the town centre. There is also a failure to seek, in a twenty-year plan, to reduce the number and restrictions of junctions in the town centre or even to recognise it is a major constraint for the growth of the Borough and region.

b. Paragraph 2.14b identifies the challenges faced by bus operators and we don’t believe there is enough in the Local Plan (Sustainable Movement Corridor notwithstanding) to make much difference to most bus services.

f) In clause 2.15 there is an implied criticism of Surrey County Council in considering the poor state of the road surfaces. There is no mention, however, about the extent to which this poor state of road surfaces translates into a failure to provide safe conditions for cyclists. Nor is there reference to the poor quality of pavements (including widths of footpaths both by design and from poorly maintained boundary hedges), leading to a more challenging environment for walkers.

g) In paragraph 2.18 there is reference to the West Surrey SHMA: Guildford Addendum Report in 2017. We will refer to this separately elsewhere in this response.

h) Paragraph 2.21 refers to house prices across the Borough, and the information is not disputed, but there is no granularity to the data – the Indices of Multiple Deprivation point to areas where price differentials are much greater, and other areas where property is more affordable but where there are other Social challenges. The Guildford Society has called for a more detailed review of the settled areas particularly the Guildford Urban Area – to ensure that local planning is plan-led and that the plan is evidence based.

i) The reference to the quantity of Council housing stock begins to highlight the shortfall in affordable housing in general and the paragraph also highlights the need for a strong affordable housing policy with a robust up-to-date viability assessment. The viability analysis dates from 2014 and The Guildford Society is very concerned that the amount of affordable housing will fall a long way short of aspiration. For this to be the case even before the plan is adopted is deeply worrying.

j) The deletion of 2.22 is replaced at 2.10a.

k) In paragraph 2.3, the forecast of population growth from 145,473 in 2015 to 167,126 in 2034 will be contested by the Guildford Residents Associations (GRA). We have seen their analysis and agree with their conclusions. A copy of the critique on the SHMA is attached to this document (Annex 2). This echoes the critique made by GRA and by us in response to the previous consultations.

A1. The Plaza, Portsmouth Road Guildford – we note the increase from 70 to 90 dwellings (contrasted with the current planning application for 104 homes) at a density of 237 dpH. We are concerned that, at this density there is likely to be very little amenity on site and/or the massing of development will intrude inappropriately on the skyline. We do welcome the addition of the words “and views into and out of surrounding conservation areas.” We hope ‘innovative design’ does not translate into a design which is out of place on the site or in the heart of an ancient market town.

Land for Sustainable Movement Corridor Town Centre Phase 2, Off Walnut Tree Close, Guildford – We have no comment with regard to the amendment of this Policy, but we have some lack of clarity as to where the remaining parts of the proposed corridor are provided for in the land allocations. Surely the entire corridor should be allocated (to the extent possible).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Kernal Court, Walnut Tree Close, Guildford – We are keen to see development of a number of sites on Walnut Tree Close as a consolidated master-planned exercise including flood management systems. It is not clear why a development on this site should be obliged to facilitate the Sustainable Movement Corridor when many of the prospective residents may make relatively little use of the new corridor that they could not already have done via Yorkie’s Bridge and Walnut Tree Close.

Answer (if comment is on questions 1-7 of the questionnaire): ()

A2. Guildford Cinema, Bedford Road, Guildford – we understand the rationale for the amended wording here but we do consider that GVG’s plans for the riverside are vastly superior and would create a fine addition to the town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Slyfield Area Regeneration Project, Guildford – Whilst the Guildford Society was involved in early iterations of the proposed development of this site, there has been relatively little dialogue with the Council for many months and years. The allocation for 1500 homes (half as many again as previously proposed) is hard to comprehend without an indicative master plan of the project. We broadly agree with the amendments to the requirements and recognise the opportunities as realistic. If the density of residential is lower than 75 dpH for the area of the site allocated for housing, we would consider this as a suitable reallocation site for business uses from Walnut Tree Close and Woodbridge Meadows, where a density of 150 to 250 dpH can probably be accommodated.

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Gosden Hill Farm, Merrow Lane, Guildford – Notwithstanding and without prejudice to our previous comments in respect of this site, we broadly accept the amendments made to Policy A25. We do think land should be considered for the relocation of employment uses from Walnut Tree Close and Woodbridge Meadows which can accommodate homes at a much higher density than an urban extension site. We are also sorry to see the release of Green Belt land, largely as an admission of failure, on the part of decades of successive Councils, to comprehensively evaluate and regenerate brownfield sites. Allocation of Gosden Hill must also bring with it a commitment on the part of the Council to seek out planned densification opportunities in existing urban areas so as to ensure the redrawing of the Green Belt boundary is and remains permanent. We are concerned (Other Issues (22)) to see a Strategic Employment site divorced from the station and transport infrastructure, and occupying a site that very nearly coalesces with the south-western reaches of Send.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Blackwell Farm, Hogs Back, Guildford – Notwithstanding and without prejudice to our previous comments in respect of this site, we broadly acknowledge the amendments made. We do not accept, however, the provisions for access to the A31, a signalised junction within the AONB and any enlargement to the existing lane, Down Place access road. The developers should bring forward ideas to improve the existing strategic local road network to accommodate the development, including working with Highways England and Surrey County Council to reconfigure both the Farnham Road slip road and Beechcroft Drive into an improved junction on the A3 – only an ‘Aspiration’ in the infrastructure schedule.

Answer (if comment is on questions 1-7 of the questionnaire): ()

A4. Deleted – Telephone Exchange, Leapale Road, Guildford – We had hoped this site could be included in the Local Plan (even if it was aspirational and represented extra homes over and above the housing target). We understand the lease expires in 2025 and BT may need to identify an alternative (or smaller) facility nearby. The Local Plan should help to facilitate this. The quantum of development, if emulating Printing House Square but, perhaps with an additional floor or two, could in reality, accommodate 150 homes.

A5. Jewsons, Walnut Tree Close, Guildford –

We are not sure how the boundary of the site marries up with the Sustainable Movement Corridor and the extension of Station View. There may be some scope to introduce a little more height on this gateway site, but the configuration of development has been somewhat stymied by the Taylor Wimpey development recently completed next door. Access to the pedestrian and cycling corridor is noted and welcomed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

North Street Redevelopment, Guildford – The Guildford Society is engaged with the developers and the Council in discussions around this important strategic site. We are concerned about the allocation of uses and areas when compared to the total stated need for the town. We welcome a successful development of this site and we have already articulated our concern that the future of retailing is by no means assured, the GVA generated from retail trails far behind other uses, and there is a need to ensure the development is successful. We would be keen to see a policy direction that looks towards space that can easily be brought into alternative uses – particularly a greater amount of residential use. The use of some of the development to displace the Odeon cinema would help to increase the overall amount of residential development in the town centre. We have already stressed that retail development has a low GVA. A principal concern on this geographically-constrained site is difficult traffic access The amount of retail development proposed, some 39,000 sm, is close onto 40 % of current retail and far too great for an already constrained town centre. More specifically the retail forecast used is based on a Consultant’s report by Carter Jonas which has four basic flaws.

1. the retail data used is national data which ignores Guildford’s access problems.
2. internet shopping has had a huge growth in Guildford and many shops have closed.
3. the plan itself does not appear to take into account the existence of an already well established retail centre (The Guildford Society recognises this and urges the Council to assess the impact, which it does not appear explicitly to have done).
4. finally, and most important this is a retail forecast for private development to the exclusion of other uses and assuming land is plentiful for all competing uses rather than constrained as it is in Guildford town centre. Guildford, in our judgement, needs a much better-balanced solution with housing and town centre employment playing a much larger part.

---

**Comment ID: pslp171/1863  Respondent: 8561377 / The Guildford Society (Julian Lyon)  Agent:**

**Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy D1**

*Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )*  

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

nnnn) The title to Policy D1 has been amended from ‘Making better places’ to ‘Place Shaping’. This seems to be a positive step inasmuch as the policies have been tightened up, but there must also be a recognition of the scope for major regeneration to transform areas and this would be properly described as Place Making. We would like to suggest this heading be ‘Place Making and Place Shaping’

oooo) At 4.5.1 there is an amendment from ‘urban areas’ to ‘settlements’ which we agree with as the original was too restrictive. We are concerned, however, that the Settlement Profiles Report is so poor that it provides little or no support to this policy and the character assessments are hopelessly out of date.

pppp) The Settlement Profiles Report lets down the Guildford Urban Area the most as it comprises a facile agglomeration of the entire urban area – more than 50% of the residents in the Borough – into a collection of general comments that do not ring true for any Residents Association area or even for the Town Centre.
qqqq) We approve of the strengthening of Policy D1(1) with the use of ‘must’ but we disagree with the substitution in Policy D1(2) of ‘must’ with ‘should’.

rrrr) We agree with the introduction of Policy D1(2)(e).

ssss) We are concerned about the deletion of the section of Policy D1 that commences ‘All developments will…’ and paragraph 4.5.8, which have largely been moved to Policy D4. This deals with new development which, on the face of it, seems more appropriate, but our concern remains that this does not cover changes of use and may not cover refurbishments. We would like to see some safeguards, perhaps by including such works in a definition of new development at Policy D4.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In Policy D2 there are four instances where ‘must’ has been deleted and replaced with ‘are required to’. If this is a Statutory obligation, the legal instrument should be quoted. Otherwise, we would prefer the use of ‘must’.

The Guildford Society is very concerned about the availability of energy infrastructure in Guildford Borough and also the lack of provision for the generation of renewable energy and the shortage of facilities for charging electric vehicles.

Policy D2 (9) refers to a reduction in carbon emissions in new developments, but does not take account of existing building stock. There is a target of 20% for carbon reductions for new developments but no indication is given in the policy as to the baseline for this measure, albeit this is explained at 4.5.30. It would be helpful if the baseline were included in the policy itself.

We do not understand why there is a blanket exemption in Policy D2(10) for retail developments in the Town Centre, and although this is partly explained in paragraph 4.5.37a, there should be a recognition in these paragraphs rather than a specific policy exemption (after all, exactly the same argument could have been applied to Affordable Housing). We would recommend the removal of Policy D2(10).

At 4.5.30a there is reference to a financial viability test. There must be some form of hierarchy of viability tests to establish the sequence in which policy requirements (subject to viability) are withdrawn. For example, does the energy requirement come before or after Affordable Housing? It would be helpful to have a specific, clear policy on Viability as part of the Local Plan.

Otherwise we broadly agree with the amendments to Policy D2.

[Evidence Base – Viability Assessment]

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We would recommend the removal of Policy D2(10).
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

### POLICY D3 – Historic environment

aaaaa) We agree the amended wording of Policy D3.

bbbbb) Paragraph 4.5.42 is acceptable but the character assessments are ten years old and should at least be reviewed to confirm they are current and defensible.

cccc) In paragraph 4.5.42a, there is reference to ‘sites of archaeological significance’. There needs to be a plan showing where it is considered archaeological remains may be discoverable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

### POLICY D4 – Planning for development

dddddd) With the reservation expressed above (under Policy D1), we are generally very happy with the proposed newly worded Policy D4 which should serve the Borough well. We are, however, concerned that the height, bulk and massing of buildings is not well covered in this section and, in the absence of a Development Management Local Plan, we feel this needs to be expressed in more robust terms here – including the retention and protection of key cross-town views and views to the surrounding AONB.

eeeee) On the whole, the new paragraphs 4.5.49a and 4.5.49b are acceptable to the Society.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
ddd) The Guildford Society agrees that Guildford has been one of the most economically successful towns over the past 30 years, and supports the importance of the University, Surrey Research Park and The Pirbright Institute as key enablers of the growth of high value enterprises with high value jobs. The Society also supports efforts to expand and retain existing corporate and professional services operations, particularly in the town centre.

eee) Employment provision is under threat from infrastructure deficit, there is evidence that businesses are put off by congestion, and a lack of high quality commercial space and affordable housing.

fff) The Guildford Society also notes the emerging desire, via LEPs and County Councils, to collaborate in an arc of towns around London, stretching from Cambridge via Oxford to Reading, Guildford and Ashford. This is a major opportunity for high tech businesses to collaborate. Guildford, with the right vision and leadership, can build on Guildford’s strengths. The Guildford Society believes the plan should have clear proposals to participate in this LEP driven strategy to ensure the town attracts high value employment to the town.

ggg) We are concerned the council has yet to plan for changes in the need for Retail space. Recent developments indicate retail is moving either to mega shopping centres e.g. White City Westfield type developments and to on-line shopping. It is also noted that the Gross Value Added of Retail employment is low. The Guildford Society believes the local plan needs to be built on an explicit aim to bring high value employment to the borough with retail development being restricted to local requirements e.g. supermarket expansion, and expansion of small retail offers or market space and restaurant space to support leisure in the town centre. The local plan makes no mention of these strategic choices, assuming ‘business as usual’.

hhh) The current Plan proposes a Guildford with a quantum leap in shopping space, in the town centre that will be inaccessible due to inadequate transport provision. New housing is scattered around the edges of the town centre, also with inadequate transport and other facilities. Proposed employment centres may exacerbate transport difficulties e.g. more cross-town commuting.

iii) Policy E1 has been revised to reflect the change in the lifetime of the Local Plan. However, as a result, the number of class B1 jobs has been increased from 3,200 to 4,100. The reason for this increase is unclear and has not been referenced within the summary of changes to the Local Plan which accompanies the document. However, in direct contradiction to this increase, the amount of floorspace allocated for these jobs has decreased from a range of 37,000-47,000 sq m to a range of 36,100 - 43,700. Again, the reason for this change remains unclear and requires further clarification.

jjj) The Guildford Society believes in enabling economic growth but it should be high quality, high value whilst delivering environmental quality for the community. The current draft Local Plan fundamentally fails to consider how this can be achieved in the planning area as a whole.
jjj. a) There needs to be a statement on employment priorities which highlights that professional workers with high GVAs have been largely responsible for Guildford’s impressive economic growth.
jjj. b) Due to high housing costs, many of these types of employees cannot afford to live here.
jjj. c) Companies and Government utilities, hospitals and schools cannot recruit skilled staff.
jjj. d) Priority should be given to the provision of skilled worker housing. This does not eliminate the need for supporting less skilled workers, or for welfare housing, but recognises the need to strike a balance between them. Without promoting the most productive labour skills the others will not prosper.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

kkk) We have already highlighted that Policy E2 has a sequential test that the land removed from the plan at Flexford and Normandy would have passed (E2(1)(b)). We note at 4.4.15 Wanborough Rail Station has been deleted. Sequentially, in the context of this Policy E2, development of part of the site at A47 (deleted) would be better than some of the other sites included (e.g., at Send), and we do not understand the explanation given.

III) Policy E2(1) and paragraph 4.4.14 give priority to the town centre, but this is not reflected in the site allocations. The issue of specific town centre uses is discussed in 4.4.22 but not resolved.

mmm) Policy E2(2) should continue to include reference to the Research park (Policy E4) because of its importance to the Borough and its economy.

nnn) Policy E2(1) sets the sequential approach which needs to be followed to determine where new office and research & development floorspace will be located. Guildford Town Centre has preference then it is given to areas within 500m of a transport interchange, and then to strategic employment sites.

ooo) Policy E2(2) has been changed to now state that the sequential approach does not apply to proposed floorspace included in the site allocations in the Local Plan.

ppp) The inclusion of this part of the policy significantly undermines the overall strategy for the provision of floorspace in the borough. The addition of this wording is in direct contradiction to the first part of the policy which directs development to the town centre. It now demonstrates that there has been little rationale to including employment space on the strategic allocations other than to meet the need specified in Policy E1.

qqq) Paragraph 4.416 within the definitions section of Policy E2 states that: “When developed, the two new rail stations, Guildford East (Merrow) and Guildford West (Park Barn), will each be treated as a transport interchange.”

rrr) Guildford West (Park Barn) as a transport interchange would, if additional land is made available for employment uses nearby, reinforce the rationale of promoting the provision of high density, residential units on Woodbridge Meadows in close proximity to the town centre.
ss) Guildford East (Merrow) station as a transport interchange would, if additional land is made available for employment uses nearby, reinforce the rationale of promoting the provision of high density, residential units on Woodbridge Meadows in close proximity to the town centre.

ttt) Whilst Woodbridge Meadows is zoned for Employment Uses in the Plan, there is no specific allocation or strategic site. This is despite a) the freeholds being in the Council’s ownership, b) significant amounts of land being vacant or underused and c) the need for a comprehensive flood protection scheme to hold water upstream of the constraint caused by the 1930s A25 Guildford Bypass southbound bridge which is low over the river.

EMPLOYMENT - TOPIC PAPER (2017)
We broadly agree with the summary of other sources in the Topic Paper.

At paragraph 4.28, Wanborough is missing from the list of stations – it should, according to the local plan, be in the second list (excluded stations), although the Guildford Society is not convinced by the arguments for removing allocation A47 from the plan whilst retaining less well-connected places in the land allocation schedule.

At paragraph 4.35, there is reference to a solitary 3,000sqm office (B1a) site in the town centre by 2034. We consider this to be a matter of planning choice rather than of fact. In adopting an approach like the Guildford Vision Group plan, it would be possible to generate significantly more office space, albeit some of it would be a like-for-like replacement of demolished buildings.

We have identified the benefits of displacing employment land at, say, Walnut Tree Close and Woodbridge Meadows to one or more of the well-connected urban extension sites.

By allocating more employment at each of Blackwell Farm and Gosden Hill Farm proposed urban extension sites, employment uses can be relocated to sustainable locations and the vacated land used for higher density homes.

The Guildford Society was in support of the use of land to the north of Slyfield Industrial Estate (with a suitable permanent buffer and screen to Jacobs Well) for employment land (rejected in Paragraph 4.63) and also for a Park and Ride facility at the end of the Sustainable Movement Corridor which could be for commuters, shoppers and also serving a SANG at Burpham Court Farm.

We recognise the plans to retain strategic employment sites – although we were of the understanding that some parts of the Bell Court complex were in residential use.

We would like to see special, specific policies in the plan to encourage apprenticeships in areas particularly where the LSOA relative deprivation score for the subdomain ‘Young Persons Education and Skills’ is particularly poor.

Answer (if comment is on questions 1-7 of the questionnaire): ( )
uuu) The Guildford Society is in broad support of the amendments to Policy E3. We agree that care must be exercised with converting commercial to housing use as it may significantly reduce commercial opportunities in the town centre. We would like to see some encouragement to and provision for apprenticeships in the Borough, particularly in the rural areas and near to those LSOAs which score particularly poorly in the relative subdomain deprivation indices relating to young person skills and education.

Answer (if comment is on questions 1-7 of the questionnaire): ()

vvv) The Guildford Society supports the protection of the Surrey Research Park in Policy E4, and recognises the need to expand the park by 10Ha, even though we regret the incursion onto Green Belt land. We believe there needs to be sufficient expansion space for the Research Park in this plan and safeguarded for subsequent plans.

www) The Society agrees that Surrey Research Park is a critical economic resource for the borough. It is aware that the Research Park is in danger of suffering from limits being placed on its growth due to infrastructure issues, e.g. access to A3, difficulties getting to airports etc. We believe it is important to ensure the park is well linked to high quality space in the town centre, Pirbright and other centres. We therefore support the Guildford West station as one means to create a sustainable transport link to the town centre. We note the plan is silent on how Surrey Research Park to Pirbright links might be supported.

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY E5 – Rural Economy

xxx) The Guildford Society has no objection in principle to the amendments to Policy E5.

yyy) We agree the Council’s plans to support the local economy. We note, however, that the plan is silent on the planned frequency increase on the North Downs Railway Line which we believe provides an opportunity to bring small scale enterprises in the Dorking to Guildford and Ash to Guildford corridors into good contact with the Town Centre and Surrey Research Park on a sustainable basis. The plan highlights that stations such as Shalford will not be transport interchanges, whereas we believe some minor development of bus services and parking may be desirable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E6 – The leisure and visitor experience

zzz) The Guildford Society agrees with the draft policy on economic grounds. It is recognised that retailing is undergoing a major transition and complementary leisure experiences are essential in order to extend dwell times.

aaaa) Guildford is clearly well placed to bring forward the River Wey navigation as a visitor experience, complementing amenities such as the Castle, Sports Centres, and surrounding Green Belt. The introduction of pedestrianisation and removal of traffic from the town centre, which are not provided for in the plan, can produce additional benefits.

bbbb) It is noted that better rail services complemented by re-aligned bus services if planned would make the Surrey Hills more accessible in a sustainable manner. The post-Olympic cycling boom in the Surrey Hills shows no sign of abating and better transport plus local business support e.g. cycle repair could support this long term.

Answer (if comment is on questions 1-7 of the questionnaire): ()
LEISURE AND TOURISM – TOPIC PAPER (2017)

We recognise the benefit of leisure and tourism uses in Guildford and in the context of the local plan. We would have preferred to see a comprehensive approach within the plan to the regeneration of the town centre and riverside. This would provide a more vibrant place (think Richmond Riverside) and increase dwell time, benefitting our retailers, our arts and heritage offerings. By and large there is insufficient prize in the local plan as drafted.

POLICY E7 – Guildford Town Centre

At Policy E7 – Guildford Town Centre we consider the retail amounts are wrong and relate only to the North Street site rather than the town centre as a whole.

a) Guildford has traditionally been a market town with a prosperous commuting labour force. This has changed in the last few decades and retail only employs around 10% of the labour force compared with professional services over three times that. The GVA from professional services employees averages out at around £ 75,000 pa compared with retail GVA on an equivalent basis of less than £25,000.

b) This has important planning implications in determining which areas are most important for development, what housing and infrastructure requirements need to be met. The current emphasis on retail development needs to be reconsidered in view of these changing needs, with greater emphasis on the cluster of high-value activities around the University Research Park and hospital. Housing, especially for skilled workers, should have a higher priority over retail development.

cccc) We strongly welcome the inclusion at 4.4.54 of the phrase: ‘The historic built environment also significantly contributes to Guildford’s appeal.’ We would like the Council to add reference here to the setting in a gap in the North Downs, and to the importance of cross-town views.

dddd) The Society is very disappointed that the Vision (between 4.4.72 and 4.4.73) has been deleted – albeit parts of the vision do appear elsewhere. This was a fine statement of intent and the additional words in 4.4.74 do not adequately compensate for its loss. Not only should it be retained, but the Vision should also include the new strategic infrastructure necessary for the good functioning of the town – especially the future of the gyratory and bus interchange provision. We would advocate the new bridge proposed by Guildford Vision Group.

eeee) The Society is also devastated to see the removal of the part of Policy E7 that calls for ‘more varied uses during the evening and night time, including along the riverside, with residents and visitors feeling safe; active use of the riverside and the river; more effective routes within and across the town centre for pedestrians and cyclists; new public squares and other informal meeting areas.’ We request that these aspirations be reinstated as part of Policy E7.

ffff) We do, however, agree with the added wording at paragraph 4.4.74 although it does not by itself make up for the loss referred to above.
At least some of the deleted paragraph 4.4.86 should be reinstated as an indication of intent. We recommend rewording rather than deleting 4.4.86 as follows: “River flooding risk is currently a significant constraint in redeveloping Guildford town centre. Several prominent riverside sites that have no building footprint cannot be allocated for redevelopment because of river flooding without a comprehensive plan to try to resolve these flooding issues, including technical solutions to remove the sites from the floodplain.”

Under Monitoring Factors, there is a target for A1 Retail space and A3 Food and Beverage space of 41,000sqm and 6,000sqm respectively – exactly the same as the revised Policy A6 provision at North Street. This implies no other new A1 or A3 space anywhere else in the town centre for twenty years. Many of our members (including our Local Economy Group) believe that a major retail development at North Street should be rejected on the grounds of the scale of retail provision, where the Carter Jonas report seems to struggle to justify the quantum, and where there is a recognised need for more residential units. Planning decisions on this site, where the Local Planning Authority has a landed interest, should be made based on public benefits not commercial ones.

The Guildford Society is concerned for the future of retail, and is keen to point out the relatively poor contribution retail space makes to Gross Value Added (GVA) when compared to business space and residential accommodation. The use of GVA needs to be introduced to assist in determining better resource allocation, especially between housing versus retail development, and helping identify optimum locations.

This Policy E7 should include a clause on the provision of employment floor space (see our comments on Policy E2(1) above). As it stands the plan is inconsistent here. There should also be a Monitoring Indicator for the amount of net employment floorspace provided.

The Guildford Society strongly believes that it is misguided to strike out the Allies & Morrison Vision and Town Centre Master Plan as Key Evidence, and to qualify the Town Centre Regeneration Strategy as carrying no weight. The result is that there is no strategic spatial evidence for this, the most important part of the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

ABSENCE OF TOWN CENTRE PLANNING

Our first observation and comment, therefore, is about the absence of planning for a most critical part of the Borough’s infrastructure – Guildford Town Centre.

The Evidence Base is lacking in crucial detail and the plan is silent on most planning matters relating to the town centre. The Local Plan suggests 931 homes for an area of the town centre where the Guildford Vision Group has identified scope for 3,367 homes. The Local Plan allocates some sites, but is missing others. The almost complete absence of detail puts at risk the entire Local Plan – for instance (and by no means exhaustively):

• how do we know what the town centre infrastructure can cope with when it already grinds to near-gridlock at peak hours?

• there is relatively little remedial traffic infrastructure proposed in the town centre
• we know from Council minutes that it is intended that the bus station will be relocated – Compulsory Purchase Order notices may well have been served by the time the Local Plan consultation draws to a close – and yet there is no reference to the potential impact of such a relocation on any of the settlements who rely on buses, nor for the propensity to introduce modal shift.

• on the basis the delivery of homes in the town centre is uncertain, how can we know whether the housing numbers in the remainder of the Borough are (a) correct; and (b) not going to overburden the fragile town centre infrastructure?

Guildford Vision Group, a voluntary group of mostly retired professionals, in their own time and with very limited financial resources, have managed to develop a comprehensive growth-based town centre plan – largely in the face of apparent resistance (or at least obstruction) from the Borough Council. The Guildford Society is in broad support with the objectives and approach adopted by the Guildford Vision Group, and, consequently with its emerging plan. We recognise that there would be some need for reallocation of land uses, such as the displacement of Employment Land around Walnut Tree Close and Woodbridge Meadows, but these could easily be accommodated by commuting an equivalent amount of (low density) residential land near both of the proposed new railway stations for use for employment (in accordance with Policy E2)(1)(b)) in order to unlock higher density urban land for housing development.

Irrespective of whether the housing numbers are correct, this strategy would displace about 10Ha of employment land to one of the new urban extensions with proposed rail and bus connections, where housing would have been developed at circa 40dpH (dwellings per Hectare) and replace it in the northern section of the town centre with housing at a density of, say, 160dpH, leading to a potential reduction of the need for Green Belt development of around 30Ha. We recognise that this area may need to be safeguarded for a subsequent plan.

Clearly, failure to include an operable plan for the Town Centre (one that optimises land uses, can deliver assured development volumes and can resolve transport and traffic infrastructure shortcomings) represents a core and crucial missing element of the proposed submission Local Plan which, the Guildford Society fears, makes the whole Local Plan unsound.

This is a hugely disappointing example of the Council failing to understand the notion of efficient and effective spatial planning, and the need for clarity and plan-led regeneration of the town centre, despite the amount of effort put in by the community over many years.

(Refer to Diagrams on uploaded Rep)

Answer (if comment is on questions 1-7 of the questionnaire): ( )
RETAIL AND TOWN CENTRES - TOPIC PAPER (2017)

The Guildford Society largely recognises the context and content of this report. We are concerned that the Settlement Profiles Report is so poor that much of the retail hierarchy has been arrived at without the benefit of a solid local evidence base. The lists of retail centres (town centre, district and local) ignore key leisure facilities such as pubs and restaurants, omit out-of-town retail facilities like supermarkets and retail warehouses (several of which have automatic A1 use) – these two classes are major traffic generators and have been expressly excluded (4.26 and 4.27) – and fail to identify trade counters and motor dealerships in the retail mix. The retail and food and drink floorspace targeted in the local plan do not seem to bear much relationship to the tables in the Topic Paper and underlying evidence base. There is no reference to the relatively low GVA contribution made by retail uses relative to other economic activities. The long-term impact of internet is barely mentioned (although in the underlying paper by Carter Jonas, this is given as a key factor that would result in major changes to the forecast need). Very little attention is paid to the need to change focus from ‘retail and footfall’ to ‘retail and dwell time’. A fantastic town centre will be one of the best ways to ensure the success of our retail developments and businesses. The Madrid Road, Guildford Park local shopping centre is adversely affected by peak hours traffic, and delivery lorries are often parked up at peak hours, causing further traffic delays.

Policy E8 – District Centres

The Guildford Society has no comment to make on the amendments to Policy E8 except to note the introduction of ‘Main town centre uses’ and to question whether these should not also have similar relevance to Policy E7. We wonder also why the marketing approach in Policy E9 is not also relevant to Policy E8.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY E9 – Local Centres and isolated retail units

The Guildford Society has no specific comment to make on the amendments to Policy E9, although it is a pity the Settlement Profiles Report does not provide greater clarity in respect of the quality, role and accessibility of Local and District Centres, as this would allow a more informed policy that also had regard to the state of local public houses and other A3 community uses. This should also extend to farm shops and should provide some clarity in respect of petrol filling stations with associated shops, farm shops and garden centres. There is apparently no clear policy on food retail and out-of-town retail such as the Ladymead Retail Park and car showrooms, all of which have a part to play in our economy and communities as employers and service providers.

**bb)** In Policy H1, the reference to Density has been removed. There always was a difficulty with the general wording provided but the remedy should have been more qualitative and should have avoided a potential battle with developers to respect existing fabric and structures in our built environment – this will inevitably be unsatisfactory unless or until the Development Management Local Plan is brought forward and adopted.

**cc)** We support the inclusion of Accessible Homes (H1(3)) but it should be noted that some of our topography may make sites less well suited to providing accessible homes, in which case there should be some provision for commuted sums to enable other homes to be adapted.

**dd)** We broadly agree the policy in respect of Student Accommodation (H1(5)) but note that not all further education establishments are in a position to comply with this policy, and there will need to be some pragmatism required to implement it fairly and reasonably. We accept the 60% threshold as a starting point but note there are no policies in the plan to prevent students from renting homes off campus in the local property markets.

**ee)** We note the inclusion a policy for self-build homes and we broadly welcome this policy.

**ff)** We note the definition of active and comprehensive marketing at Appendix A2 and recognise it is broadly in accordance with market practice.

**gg)** Paragraph 4.2.3 refers to the SHMA Addendum Report 2017 – we have commented about that elsewhere in this document.

**hh)** Paragraph 4.2.18 contains a reference to windfall sites for student accommodation. Windfall sites will also contribute to meeting general housing need and the local plan should take account of this.

**ii)** The requirement at 4.2.27c for ‘the delivery of a significant proportion of self-build or custom build plots [to be] expected within the first phase of development’ may need to be rethought due to potential conflicts of viability (leading to a slower and perhaps lower provision of Affordable Housing) and delivery (especially where developer funded infrastructure may also be front-loaded). Early delivery may also result in self-builders being required to sign up to s106 and CIL obligations in planning agree.
The Guildford Society recognises the need to increase our housing stock. This is particularly the case for down-sizers, first-time-buyers and those needing affordable homes (see comments to separatetopic paper). We also fail to comprehend and agree with the obscure and obtuse GL Hearn Strategic Housing Market Assessment and subsequent amendments. We have attached to our response a copy of the report carried out by Neil MacDonald (Annex 2) on behalf of the Guildford Residents Associations (GRA). This fundamental disagreement notwithstanding, we recognise that Guildford Borough Council has settled on a housing target of 654 homes per year. We have made our site-specific comments in response to this and earlier iterations of the plan and do not propose to repeat these here. We do believe the approach outlined in this document, and the local plan itself, demonstrates a signal lack of planning in the town centre which could (as the Guildford Vision Group has shown) accommodate substantially more dwellings than the local plan suggests. We are concerned by the figures in sections 4.190 to 4.193.

The proposed housing trajectory must surely be a mathematical error. It places the local plan and the Borough at great risk from aggressive developers – not least Solum seizing on it as an opportunity to press for reversal of the planning refusal on appeal due to a monumental shortfall in five-year housing supply against the target of 654 homes per year. On the whole, we understand the approach taken by Guildford Borough Council to phase development contingent upon infrastructure and of allocation of sites (notwithstanding our concerns about the relatively small numbers of housing units planned for the town centre).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

ffff) Paragraph 4.6.1 refers to the Guildford Borough Infrastructure Delivery Plan which we considered at the previous Regulation 19 consultation in 2016.

gggg) Policy ID1(1) has clearly been carefully reworded to act as a handbrake on development, but the NPPF test to hold back development is calibrated on the basis of Severe Impact. It is not clear that Guildford Borough Council’s approach is defensible and it is likely the course of development would be uncertain and unpredictable. For a plan to set out to be uncertain and unpredictable suggests to the Guildford Society either a gambler’s game of chance or negligence towards the borough and its current and future residents.

hhhhh) So much of our infrastructure is a legacy of past failures over several decades. Development controls, such as Section 106 Agreements and Community Infrastructure Levy, are typically intended to mitigate incremental impacts of development and not to have to fix past issues. Policy ID1(2) may not be lawfully enforceable by planning condition or planning obligation due to, at least in part, the need to fix historic problems.

iiiii) Policy ID1(4) refers to the criticality of infrastructure listed in Appendix C, which has been changed for the most part to require developers to fund in full many elements. There is no indication of the impact on other parts of the plan if individual developers demonstrate that they cannot or will not finance infrastructure.

jjjjj) At 4.6.2 we agree the use of the Planning Act 2008 definition of infrastructure. We also think that the Town Centre and District and Local Centres should be listed as core infrastructure for the community, area and Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

kkkkk) We are concerned that Policy ID2 is not sufficiently robust as to require works to be carried out as part of such developments in the neighbourhood of the A3 and M25.

lllll) We note at 4.6.18 reference to A3 widening and/or a tunnel option have been deleted. There needs to be a statement of intent to work towards a long-term solution to the A3 past Guildford which, in the opinion of the Society, will require a new alignment or approach.

mmmmm) No major resolution is likely to be forthcoming during the plan period. It is entirely likely that adding the proposed new four-way junction at Send will increase traffic and rat-running until a permanent solution to the A3 is found. The proposed Ockham junction will have a similar effect.

nnnnn) A more significant characteristic of the A3 past Guildford is that it climbs almost 100 metres in around 3.5km from the point at which it crosses the River Wey to the cutting at the top of the Hog’s Back.

[Image]
ooooo) The turning off towards Farnham at the apex of a long steep climb causes problems due to slow-moving, nose-to-tail traffic in the inside lane conflicting with traffic in the outside lane wishing to exit onto the A31.

ppppp) Widening the A3 will not especially help solve the problems associated with the 1 in 35 climb that quickly lead to a build-up at the Dennis Roundabout junction where traffic joins from the town, and then backs up quickly beyond that to the A320 turn.

qqqqq) Showing an extended line to near the Compton roundabout demonstrates the impact of crossing over the North Downs in either direction.

[Image]

rrrrr) Whilst these graphics are very basic and approximate, they do show part of the challenge caused by the current configuration of the A3 that has been running at capacity for around 20 years at peak hours, the overspill traffic rat-running through the town and neighbouring villages and residential areas.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

TRANSPORT – TOPIC PAPER (2017)
In addition to points made elsewhere in our response, we are concerned that Guildford Borough Council seems to be putting far too much emphasis on the A3 improvements (and an aspirational tunnel) to solve all their problems. Traffic (and its knock-on effect on other forms of transport) will get a lot worse in the interim in the town centre, however much they attempt to delay development. The net effect will be strangulation rather than encourage it.

DUTY TO COOPERATE – TOPIC PAPER (2017)
Guildford Borough Council has, by and large, made good efforts to cooperate with other Boroughs and agencies, and it takes two to cooperate in each case. We are disappointed at the number of references to third parties (such as Highways England) that have been removed from this draft plan because agreement has not been reached. We also believe the duty to cooperate should apply to cooperation with residents’ groups and community organisations such as the Guildford Society. There are too many loose ends that prevent the plan being satisfactorily completed, but we recognise that Guildford Borough Council wishes to press ahead towards adoption of its plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
opportunities to use active modes, bus and rail – are intended to result in a modest modal shift over the period to 2034, we forecast that there will also be an absolute increase in overall traffic volumes. ’

And then in 4.6.30a: ‘Roads in Guildford town centre carry high volumes of traffic and are subject to recurrent traffic congestion during peak periods, especially the gyratory and its immediate approaches. Over the weekday hours of 07:00-19:00, around a quarter of car trips passing through the Guildford gyratory either begin or end at a public car park in the town centre.’

xxxxx) These two statements accurately describe not only the dire existing situation with traffic in Guildford but also recognise that volumes are expected to increase to make matters worse. The last underlined sentence, though, is totally misleading, as is the suggestion, later in the paragraph, that increasing peripheral parking capacity will make a significant difference, thus diverting attention from the main issue.

a. Firstly, the statement refers to cars only, and
b. secondly, it refers to an average over the 12 hours of a weekday. As stated below, under Parking, peak hour behaviour is totally different, so it can be expected that a large proportion of the Town Centre parking would be by shoppers at off-peak times.
c. Thirdly, it identifies this behaviour with 25% of car trips through the gyratory, totally omitting any data or measures to deal with the remainder, to total over 2500 vehicles per hour, including heavy goods vehicles, at peak in 2011.

yyyyy) We believe that, by including Bridge Street, Onslow Street and Woodbridge Road -where these traffic flows occur - as part of the SMC, its objective to: ‘provide a prioritisation pathway through the urban area of Guildford for buses, pedestrians and cyclists, . . . and. . . for journeys to be rapid and reliable by bus and safe and direct on foot and by bike’ is unlikely to be achievable without significantly more serious investment aimed at diverting major through traffic away from this artery.

zzzzz) We do not believe the wording of Policy ID3(4) is workable or able to promote goodneighbourliness, and we consider a more appropriate way to address this is to promote the use of car clubs where there are limited resident parking bays available, with all new developments required to establish a car club or join an existing one which is or will also be available to existing residents. This can supplement or replace ID3(6).

aaaaaa) In terms of Policy ID3(5), the Guildford Society considers there needs to be a completerethinking of the way town centre parking (on street and in car parks), park & ride and public transport interact. For example: A return bus fare from Onslow Village costs £4.50 per person (assuming no pensioners); a return fare (including parking) from Onslow Park & Ride costs £1.50 per person return; Parking in York Road car park costs £2 for 2 hours plus £1 per hour thereafter. For a family of three, there is no point getting the bus at £13.50 return; the Park & Ride would cost £4.50; for £4.00 the family could drive into town and park in the York Road car park for up to four hours and still save money. If the price of rail travel from the proposed new Guildford West railway station is similar to travelling from Shalford, a fare of around £2.60 per person before railcard discounts, would suggest that the similar journey would cost £7.80. This illustrates the complete lack of a coherent transport and parking strategy, which will fail to alleviate the traffic and transport problems in and around Guildford.

bbbbbb) We strongly urge the Borough Council to consider expanding the Park & Ride network and to consider running services through the town centre from one Park & Ride facility to another so as to enable a greater number of stops in the town centre to be serviced by a single bus.

cccccc) We commend Guildford Borough Council’s Parking Strategy. However, as we commented to them in August 2016, when the draft was first published, no analysis has been made of the timing of off-street parking usage. We believe that it is important to distinguish between activity during peak times, when travel to and from work and schools is key, and other times when visitors and shoppers display totally different patterns of behaviour and are more likely to use town centre car parks.

dddddd) The wording of Policy ID3(7) needs some greater clarity. We think we understand what the policy is driving at but we are not sure. This indicates a need for a rethink, although we believe the substance is broadly appropriate.

eeeeee) We have already highlighted issues we have with the change from ‘Developer Contributions’ to ‘Developer Funded’ in the Infrastructure Schedule at Appendix C. We note the requirement of Policy ID3(8) and reiterate our caution that this may be part of a gamble intended to avoid development altogether rather than to enable it.
We broadly agree with the amended wording of Policies ID3(9), ID3(10) and ID3(11).

We broadly support the content of most paragraphs following the Policy.

We are concerned about the apparent finality of the text in paragraph 4.6.28 which seems to suggest both that there is a need for more infrastructure and that all necessary infrastructure has already been identified in Appendix C. We fundamentally disagree with this notion because planning for the entire town centre (infrastructure included) is missing from the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/2030  Respondent: 8561377 / The Guildford Society (Julian Lyon)  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The first point to make regarding infrastructure is that there is a colossal amount of additional or revised evidence referred to in the Local Plan directly, and the evidence base indirectly, which makes like-for-like comparison very difficult and which should place additional burden on the Council to explain the impact, and to ensure the remainder of the evidence and the plan in general relates well to the amendments. The Council has done none of these things.

Consequently, the Society has attempted to review the entire infrastructure evidence.

TRAFFIC & TRANSPORT

As part of the process of understanding the proposed infrastructure framework and its place in (a) justifying the level of development, and (b) enabling it, the Guildford Society organised a transport open day in the Guildhall in Guildford High Street.

The pivotal problems with the town centre’s traffic infrastructure, and, to a substantial extent this ripples out into the alternative road transportation network, stem from the limitations of the gyratory system.

Traffic data is generally inconsistently gathered and presented, and there is no long-term Data capture that is publicly available other than monitoring by Google, TomTom and INRIX. The latter have identified the following:

INRIX REPORT EXTRACT and Source – Attached at Annex 4

Academic environmental studies demonstrate the way this impacts the air quality in the town centre – in particular those below where data was collected in Guildford:

KUMAR REPORT EXTRACT and Source – Attached at Annex 3

In terms of the gyratory system, we have read many reports and Council papers relating to the congestion and shortcomings of the system, particularly at peak hours – not many of these documents have been retained as part of the evidence base which, therefore, has the impression of a selective exercise designed to justify the plan and not the other way around.
As a consequence, there is no cohesive plan for the town centre traffic in the Draft Submission Local Plan. Guildford Borough Council seem to be gambling on an outside bet – namely, that (a) the A3 will be fixed soon enough in the Plan period; and (b) most traffic will use the A3 instead of travelling through the town centre.

The Guildford Society recognises that there is at least some sense in the premise that the A3 has been at or near peak capacity at rush hours for the past twenty years or so, and that some traffic will rat run through the town centre and other surrounding roads. It is desirable that the A3 be urgently addressed.

The Society does not, however, believe that failing to tackle the town centre in the meantime is in any way sustainable, and that any development in the Borough might be considered unsustainable in the context of NPPF in the absence of a proper plan to fix the traffic in the town centre.

From the Society’s perspective, there is a major long-term issue in the town centre, namely, that the traffic canyon and so-called ‘concrete collar’ making up the gyratory system in Onslow Street and Friary Bridge, Park Street and Bridge Street respectively.

One of the key challenges for the gyratory system is the fact there are several short lengths of road between traffic lights which do not accommodate any reasonable capacity.

Another challenge to analysing the system is that, despite there being several lanes in places, it is often the case that one lane is gridlocked whilst others are all but empty. At various times of day, it is a different lane that is full by comparison to the others.

There is much that could be done in the short term to alleviate the traffic problems by co-ordinating traffic lights and reorganising lanes. It is hard to see that any short-term measures will enable a better and safer environment for cycling. They will also not do much to allow for more efficient scheduling of buses, and will not enable capacity in the town centre to facilitate the proposed Sustainable Movement Corridor.

Consequently, the Council has put forward a Draft Submission Local Plan that does not show that it can be delivered comprehensively. A plan in which only some parts are viable cannot in reality be considered a sound plan.

The Guildford Society endorses the Guildford Vision Group approach to traffic in the town centre and its accommodation of increased freedom of bus and cycle movement to enable modal shift and to redistribute traffic away from the heart of the town and riverside.

There would need to be careful design and co-ordination of signals for the junctions but there seem to the Society, given all we have read and studied over many years, to be very real merits and ample reasons to safeguard the route in order to at least bring more of the traffic and transport infrastructure within the control of the Local Planning Authority.

On Saturday 15th July, the Guildford Society – with invitations to, and rejections from the Deputy Leader of Guildford Borough Council who is the lead member for infrastructure, and the Head of Strategic Projects – held a public workshop in the Guildhall in Guildford High Street, aimed at exploring alternative transportation options in the town. This was intended to begin a public conversation about the issues and canvass views of the bus station, cycling, bus routes and trains.

The information displays and stands included:

1. A ‘best guess’ at the proposed location of the relocated bus station (discussed and approved at an ‘in camera’, closed session of a Council meeting a couple of weeks previously):

2. A display showing concepts for the bus station relocation – largely ignored by the ‘stakeholder exercises’ conducted ARUP and Systra:

3. Guildford Vision Group’s plan and images – including its fly-through model:

4. Guildford Bike User Group (GBUG)

5. Guildford’s Bus Companies, represented by Compass and Safeguard
6. Guildford Borough Council’s Sustainable Movement Corridor plan (in the absence of Guildford Borough Council we adopted plans from the Local Plan and Evidence Base.

7. Illustration of future rail options.

8. An aerial photo of Guildford for attendees to put post-it notes with any location-specific comments.

Looking in greater detail at the GVG plan, we have the following observations as this relates directly to (a) the absence of Town Centre planning in the Regulation 19 Submission Draft Local Plan; and (b) as it relates to the ability to quantify development in the town centre in the context of the Regulation 19 plan.

Assuming traffic at 11th June 2011 levels (when the Sky High Traffic Studies were undertaken for Surrey County Council), we have no better information other than consider it reasonable to assume that the origins and destinations onto and off the town centre road system would be broadly the same.

Looking at the existing gyratory system, we have allocated the traffic to lanes based on the current layout (diagram on the next page):

We have then calculated the traffic through each lane (table below): [Table]

The key lanes from which the table was compiled are set out below, followed by two traffic graphs and a summary of the traffic on each short stretch of the gyratory: [Image]

The main finding from this exercise is the disparity between lanes, for example between the four lanes on Friary Bridge. Lane 4 is for traffic heading for the A31 where there is a dysfunctional pedestrian and vehicular traffic light that does not interact with its fellow traffic signals, causing a back-up onto the gyratory: [Table]

Equally, in Onslow Street, there is a considerable volume of traffic throughout the day (lane 28 is heading towards the A281 where there is a dysfunctional pair of pedestrian crossings that cause a build-up of traffic on the gyratory: [Table] [Image].

The volume of vehicles in morning and evening peak traffic is substantial and it is not clear how such volumes can be accommodated alongside the proposed town centre stretch of the Sustainable Movement Corridor.

Along Friary Street (needing to run in both directions) the traffic is never lower than 450 vehicles per fifteen minutes – 1,800 per hour – and currently peaks in the morning and evening at 2,500 vehicles per hour.

We have attempted to understand the data and apply it to the local plan proposals. We do agree this will improve by implementing the proposed changes to car park access at Millbrook. A similar approach to Bedford Road Car Park would improve this still further.

In the absence of any real impact assessment on town centre traffic, we really only have one other alternative to model the traffic against, and that is the proposal by the Guildford Vision Group. In the model below, it is clear that traffic on Park Street (A-B) and the new road B-C and C-D will be at a similar level to the current two-direction traffic on Onslow Street, but it will be the junctions that determine whether the town centre can keep moving.

The Guildford Vision Group plan will allow the town centre portion of the Sustainable Movement Corridor to be implemented and would route traffic away from the area.

Working through the analysis and the Guildford Vision Group draft master plan, it seems the road network can work well, given the following assessment:

First, here is the layout proposed by GVG marked with the four junctions that replace seven junctions on the existing gyratory system with much longer legs between junctions than the current arrangement: [Image]

We have assessed the junction movements for the above as set out below: [Image]
We have then assessed the anticipated traffic flows for each traffic movement (recognising that (a) there is no
differentiation between vehicle types in the original survey, (b) changed layouts will almost certainly change behaviours,
(c) there is no data for traffic stopping at town centre car parks, and (d) the data was zeroed out for vehicles using the
gyrotary to effectively make a U-turn). [Table]

This table is calculated from data for each 15-minute slot from 7am to 7 pm on 11th June 2011. [Image]

The most traffic-intensive stretches of road are the new roads and Park Street – the highest volume is southbound alongside
the station between 4.30 and 5.30pm at 1589 vehicles per hour (26.5 vehicles per minute). There will inevitably still be
peak hours congestion but the greater simplicity of the system and junctions should allow this to be minimised in a way the
current system cannot.

The Guildford Society believes this is a critical component of enabling the town to accommodate growth and to cope with
the growth in surrounding areas. It will be possible to mitigate some of that growth by resolving issues on the A3 and by
encouraging modal shift.

GUILDFORD TRANSPORT STRATEGY 2017

This declares itself as an aspirational document and we consider its objectives to be commendable. The substance,
however, relies heavily on the delivery of the Sustainable Movement Corridor (SMC). We entirely support the concept of
the SMC but have serious concerns about its ability to function effectively as currently conceived alongside existing
unmitigated traffic volumes (especially when adjusted to accommodate for growth). See our comments specifically at
Policy ID3(3). We broadly agree with the traffic analysis carried out by the Guildford Residents’ Associations (GRA).

From a FoI response (Annex 5) we are aware that analysis of the impact of 1,800 homes at Dunsfold showed an increase of
an average 110 cars per hour in the three-hour morning peak. A planned increase in housing in the plan period of 12,426
homes in the borough plus fifteen to twenty thousand in the influencing neighbouring boroughs will mean (mathematically)
we may need to plan for an additional 1,800 cars per hour in the absence of suitable transport alternatives. Even if a fraction
of this number actually reaches the current gyratory system, Guildford will fail to cope and the town will lose ground to
Woking and other centres.

(Please Refer to Diagrams on uploaded Rep)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  pslp171/2041  Respondent:  8561377 / The Guildford Society (Julian Lyon)  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The first and most important point to make is that the Guildford Society has supported, and does support the intent of Guildford Borough Council to adopt a Local Plan for the Borough as soon as possible that protects and enhances our past heritage and urban and rural character, whilst promoting and enabling sustainable growth. We do not seek to frustrate this process, but we do need to see a robust, reliable and effective Local Plan: a sound Local Plan.

There is much to like about the revisions to the plan. In some places, the draft plan has been strengthened with greater emphasis on and preservation of heritage, countryside and visual amenity, notably in the following policies and paragraphs:

Contents List Policy P1: paragraphs 2.1, 4.1.1, and 4.1.4; Policy P1 (inclusion of Areas of Great Landscape Value); paragraphs 4.4.56, 4.4.59, 4.4.67, and 4.4.68; several items in Policy D1, and many in D4. We welcome all of this.

There remain areas about which we are particularly concerned, not least of which is the omission of any real planning for the regeneration of and infrastructure in the town centre.

We have been, and remain, concerned that we have not seen the second part of the Local Plan: the Development Management Local Plan in any shape or form and we are not sure (a) what protections that plan will afford, nor (b) how effective reliance on parts of the Local Plan 2003 will be in the meantime. This second part of the local plan will be an important document, and many of our comments on this first part of the plan may be dealt with in the second part.

We recognise the amount of hard work the Officers and Lead Councillors have done to get the plan to this stage and the several million pounds paid on consultants to help inform the plan.

We have, however, been disappointed by the lack of interaction Guildford Borough Council with groups like the Guildford Society during the process of getting the draft plan to this second Regulation 19 consultation (in contrast to the Local Plan Forum which was convened following the 2014 consultation and disbanded in 2015), and we are struck by the amount of red ink on the amended plan and, moreover, by a substantial reorganisation and rewriting of key parts of the evidence base. Our response has been prepared as a community group without recourse to professional advice. We have responded as a suite of documents due to the complexity of making our comments through the online portal. We believe there is no reason why such a response made in this way should receive any less consideration than comments received through the portal. For ease of reference, (but not to the exclusion of any part of this document) we have attempted to provide responses, in the next section of this document, to the questions provided.
There have been substantial and substantive changes to the Local Plan and its Evidence Base. The Guildford Society’s team of volunteers have tracked each successive consultation (including its associated evidence base at the respective times) and these are available to view on the Guildford Society website and at:

http://wp.me/p3KMtD-64

2014: Regulation 18 Consultation Documents

http://wp.me/p3KMtD-8Y

2016: Regulation 19 Consultation Documents

http://wp.me/p3KMtD-iN

2017: Regulation 19 Consultation Documents

http://wp.me/p3KMtD-nc

The Guildford Society has held several public meetings to help explain to our members and wider public about the various evidential documents and consultations, and feedback from those sessions have informed our responses to each successive, respective consultation:

2013: Issues & Options Consultation Response

http://wp.me/p3KMtD-6M

2014: Regulation 18 Consultation Response

http://wp.me/p3KMtD-dG

2016: Regulation 19 Consultation

http://wp.me/p3KMtD-mH

Whilst the 2017 Regulation 19 draft submission plan has tracked changes and the scope of the consultation is required by Guildford Borough Council to be limited to the changes, there are sufficient alterations to the evidence as to throw the integrity of the plan itself into question, and so this response is not restricted to the red lines in the plan. We have attempted, however, to restrict our comments and responses to the changes in plan and evidence base since the previous Regulation 19 consultation in 2016.

We would also like to point out that a considerable amount of this commentary could have been provided informally to Councillors and Officers have been managed accordingly, had the leadership of Guildford Borough Council (Leader, Deputy Leader and the then Managing Director) not decided to restrict access by the Guildford Society and the Guildford Vision Group to officers and Councillors.

The Guildford Society has recognised the urgent need for a Local Plan and has sought to be firm but objective. We have been concerned from the beginning of the process (well before any consultations, and bearing in mind this plan has been in gestation for about ten years) that the Plan was developed first, followed by the evidence. There remain gaping holes in the draft Local Plan itself, not least in the Town Centre, where there is an almost complete absence of plan making.

The Society has formally pointed out errors and omissions on three separate occasions (upon publication of the evidence base as part of the Issues and Options consultation, and the R18 and R19 regulation consultations in 2014 and 2016 respectively). For example, the errors strewn throughout the Settlement Profile Report – e.g., Peasmarsh still shows as having as its nearest convenience shopping the parade at East Horsley, a substantial distance on the opposite side of Guildford! This is a Council-generated document, and could have been corrected at any stage. Far worse, in that same document, is the lazy treatment of the Guildford Urban Area (including more than half of the Borough’s residents) as a single settlement – making it much more difficult to plan proactively and proactively for much of the urban area. Our most comprehensive response was to the initial Regulation 18 consultation in 2014.
We do not intend to repeat the representations made at that time. We are, however, disappointed that, three years later, many of our commentshave gone unresolved and unrecognised for example, lan in a timely manner, that may have been understandable in 2014. It beggars belief in 2017 that the evidence has not been completed and suitable adjustments made. There is much to like about the revisions to the plan. In some places, the draft plan has been strengthened with greater emphasis on and preservation of heritage, countryside and visual amenity, notably in the following policies and paragraphs:

I. Contents List Policy P1;
II. paragraphs 2.1, 4.1.1, and 4.1.4;
III. Policy P1 (inclusion of Areas of Great Landscape Value);
IV. paragraphs 4.4.56, 4.4.59, 4.4.67, and 4.4.68;
V. several items in Policy D1, and many in D4.

We welcome all of this.

This response is extensive as we recognise the amendments are also substantial when the updated evidence base is taken into account. It may often seem as though our comments are negative or obstructive. That is not our intention. We aim to help Guildford Borough Council to settle on the best plan we can achieve, and we stand ready to work with Guildford Borough Council to achieve it.

The evidence base itself points to work streams (for example on flood risk management) that are ongoing but incomplete. We recognise there will always be ongoing work to better understand and plan for the town and borough, and it is likely, therefore, that we will be asked to adopt an incomplete plan. It is, however, very hard to respond to this plan without highlighting areas in which it is incomplete or deficient. We fear some of these areas may in themselves make the plan unsound, and we highlight those areas.

We hope, should the plan be submitted in more or less the form we have commented on, that there will be constant and early reviews to enable key topics such as the town centre, infrastructure and flood risk to form a comprehensive, firm basis for planning the borough’s spaces and places.

tt) We welcome the addition of ‘Area of Great Landscape Value’ to Policy P1.

uu) At Policy P1(2)The Guildford Society does not perceive that a new junction on the A31 linking to Blackwell Farm, etc, is compliant with the ‘presumption against major development in the AONB except in exceptional circumstances and where it can be demonstrated to be in the public interest’, although we suspect this form of words has been introduced as a Trojan Horse to seek to achieve such development. We consider the paragraph should end at AONB

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

xx) The section on Flooding (Policy P4) does not provide much support for development or for a cohesive, comprehensive solution. We do not see that the policy is helpful enough and, read with the Infrastructure Delivery Plan at Appendix C, provides very little comfort to developers or local communities.

yy) The Guildford Society is adamant that the SANG policies – administered as an interpretation of the European Birds Directive – will bring about a massive failure to deliver Affordable Homes, particularly in the town centre. We believe that Policy P5 should be amended so that homes in the town centre are not required to deliver contributions to SANG because there is ample undesignated alternative natural greenspace (at Pewley Downs, The Chanters, the River Wey, Guildown, The Mount and the Hog’s Back) within walking distance and this should be sufficient to avoid harm to ground-nesting birds.
zz) Such an approach would need the cross-boundary co-operation of several local authorities but will enable Guildford to increase its yield of sustainable town-centre affordable housing.

aaa) We note the new references to climate change in 4.3.37, 4.3.43, 4.3.46 and Policy P4(C).

FLOODING AMENDMENTS

The Topic Paper ‘Flood Risk’ (June 2017) is a new addition to the Evidence Base.

Section 2.3 sets out the categories of Flood Risk zoning and notes that 3b is known as the ‘functional floodplain’ where water has to flow or be stored in times of flood.

The failure to identify in the plan suitable arrangements for managing flood water in any better or more organised way than hitherto is an opportunity missed and belies the importance of plan-led regeneration in the context of a brand new Local Plan aimed at providing for the next 16 years or so.

The Guildford Society has greater confidence in the comprehensive planning advocated by the Guildford Vision Group in aiming to store water and provide for greater areas of floodplain within less sensitive areas such as undercroft parking, terraced public areas and retention reservoirs below public squares.

The GVG plan also has the benefit of seeking to create walkways that should allow dry access for pedestrians to homes and business premises during a flood event.

There is no such plan or comprehensive aspiration in the Local Plan.

The Paper also cites the sequential testing in NPPF 101. This generates a circular argument in the Local Plan inasmuch as there is insufficient alternative land allocated for development to enable flood plains to be avoided, creating an increased likelihood that there will need to be development in the floodplain, and yet there is no specific flood mitigation plan in the town centre in the absence of any town centre planning within the Local Plan.

At 3.5 i) there is part of sentence missing – it is by no means clear what this is meant to be.

The local context identifies past flooding events and pays relatively little attention to pluvial flood risk which must become more prevalent with the greater areas of hard landscaping and buildings envisaged by the plan. This is equally true of developments where sustainable drainage systems pass water more effectively into the ground but which by nature may increase the level of the water table.

The Settlement Profiles – which still lump the entire Guildford Urban Area together as a single Settlement of wards, communities, amenities, convenience stores, differing levels of service provision (as witnessed by the Indices of Multiple Deprivation (2015) for each Lower Super Output Area, and as demonstrated by the Society in Annex 6 of our 2014 response) – do not adequately cover areas of local flooding, and could not highlight pockets of surface water stress, for example around Guildford Cathedral where run off affects local households in Ridgmount even before the allocated 100 homes are built there.

It is not clear that the Flood Risk Topic Paper has taken full account of the Section 19 Flood Investigation Report (2015) - [https://www.surreycc.gov.uk/__data/assets/pdf_file/0018/71910/4-Guildford-Borough-S19-Report.pdf](https://www.surreycc.gov.uk/__data/assets/pdf_file/0018/71910/4-Guildford-Borough-S19-Report.pdf) - that highlights some of the risks, and it is by no means clear that a detailed assessment has been made of the local hydrology and the impact of the various development proposals.

Full account needs to be made of the existing and modelled instances in local communities of fluvial flooding, surface water flooding, groundwater flooding, sewer flooding and any other sources of flooding (including the fragility of water supply pipework).

In the town centre, there are pinch points that lead to an unplanned for build-up of water, for which major strategic planning will be required both upstream and downstream. Upstream there should be some water management infrastructure
– probably at both Shalford and at Shalford Meadows. In town there needs to be better water retention and water capacity management, and it is our contention this can only realistically be achieved as part of a master-planned regeneration of the riverside and town centre.

[Map]

In the above diagram, the width restrictions are illustrated by a dark blue circle, whereas those with height and width restrictions are in lighter blue. North is to the right of the map.

The Topic Paper does not provide any solutions to flooding, and does not really inform policy in the Local Plan.

The image below is taken from: https://flood-warning-information.service.gov.uk/long-term-floodrisk/map and allows a quick view of flood risk, including, in this instance, surface water flood risk in Guildford town centre.

[Map]

It will be important to increase the catchment upstream but there is not a lot of upstream in Guildford Borough. It seems Waverley has completed its flood plan, and that it does not increase catchment to benefit Guildford. It seems, anecdotally at least, that this is substantially due to a lack of cooperation by Guildford Borough Council.

There is also a need to address the water catchment increase beyond Waverley and in tributaries such as the Tillingbourne. This, and consequent impact on developable sites, are absent from the Topic Paper and the Plan. We understand that Guildford’s flood plan is still in development, and that it has 16 options including upstream catchment.

As there is so much missing from the plan itself and Topic Paper, we are at a loss to understand if the plan is anywhere close to being sound in terms of flood risk management. This is a shame because there is considerably more detail in the Key Evidence documents that have not been carried forward into this strategic planning document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

Presumption in favour of sustainable development

m)Amendment to 4.1.1 is broadly acceptable, but makes the plan a little less predictable in its delivery and in its development promotion and protection.

n)We are unfamiliar with the proposed suggested wording at 4.1.2a which could, as referred to above at (m), lead to unpredictable outcomes, there being no measure of ‘gains’ against which to assess projects.

o)Paragraph 4.14 seems to be an attempt to determine that no development proposals in Guildford Borough should be subject to national policy under NPPF, as the entire Borough falls within the exceptions listed: veiw Map.
HOUSING TYPE, TENURE AND MIX – TOPIC PAPER (2017)

We broadly agree the background to this paper (excepting any analysis in the SHMA). The section on student accommodation needs to be read in the knowledge that there are various further education colleges and universities in the town, not all of which have campuses in which students do and can live. The SHMA miscalculates inward migration as a result of a failure to properly understand the student population and the processes for registering and deregistering with GPs which acts as a proxy for census data.

Comment ID: pslp171/1768  Respondent: 8561377 / The Guildford Society (Julian Lyon)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

p) Whilst not strictly an amendment, Paragraph 4.1.6 looks out of place in a plan that does not include any substantial town centre allocations.

a. The Local Plan suggests 1,151 homes for an area of the town centre where the Guildford Vision Group has identified scope for 3,787 homes. The Local Plan allocates some sites, but is missing others. The almost complete absence of detail puts at risk the entire Local Plan.

q) The Guildford Society welcomes, on the one hand as it is a Green Belt site, the removal of the site at Flexford and Normandy from the plan; on the other hand, however, we are mystified as to why it is more appropriate to include development in the Green Belt at, say, Send, whilst removing a Green Belt site which includes land (deleted Policy A47) of which a substantial portion is within 500m of Wanborough Station, which would place it second only to Guildford Town Centre in the sequential test in Policy E2(Note that this station is not included in newly provided Appendix A1). This suggests that the Council sees sites accessing the already-congested A3 as superior for development to a site meeting its needs for available land.

r) We note at 4.1.9 that North Street is now included as a Strategic Site.

s) In Policy S2 we note the deletion of the jobs forecast, the reduction in proposed office space from 47,200 to 43,700 sqm (GVG’s town centre plan envisages 51,000 sqm of new offices and civic space, although it does propose to demolish some office areas to achieve this). We note there is a proposed reduction in industrial land allocation by at least a Hectare.

t) In Policy S2 – Annual Housing Target, we note the increased back-loading of housing provision and the explanation for this. We do not see a connection between the Infrastructure Delivery Plan and the propensity to deliver housing in this ‘contingent’ plan (see (a) above). This is surely an omission in such a contingent plan, where there should be a detailed timescale for the provision of infrastructure, against which a timeline for housing delivery should be mapped out.

u) From the housing numbers, we can see these rising from 450pa to 850pa over the fifteen-year period 2019 to 2034, totalling 9,810 homes. The total stated target for the plan period is 12,426 homes. Mathematically, this leaves 2,616 homes to be delivered in the four years from 2015 to 2018 inclusive – an average of 653 homes per year. From the 2015-2016 Monitoring Report, completions in recent years (including 2015, where there was a shortfall of 265 homes) were:

16/17  297  

[2016/17 Information from Housing Topic.]

Paper Please see the table in our review of the Topic Paper – Housing Delivery (2017)

v) Paragraph 4.1.9a notes that ‘strategic greenfield sites...[are] dependent upon the delivery of necessary infrastructure expected to occur towards the end of the plan period’ (the emphasis is ours).

w) There is no such requirement cited in the plan for town centre infrastructure, and Table 1 (Paragraph 4.1.12 has been deleted so we cannot see where the Council anticipate its development will actually occur.) Please see our comments with regard to the serious shortcomings of the SHMA and the Objective Assessment of Need.

y) Paragraph 4.1.9b says that the Council is demonstrating a rolling five-year supply but the deletion of Table 1 does nothing much to demonstrate explicit supply throughout the plan. It is, therefore, far from clear where the crucial evidence is for the rolling five year supply in the short term. If not a clearly-produced table such as has been deleted, there should be at least a clear diagram showing a broad-brush picture of how the housing target will be delivered over time.

z) At 4.1.11 the plan points to further details of sites key to delivering the strategy, and yet these policies do not include timetables that would then give confidence of the delivery of both homes and infrastructure (together with economic, environmental and social gains – Paragraph 4.1.2a) in accordance with the Annual Housing Target.

aa) Every document in the Key Evidence box has been amended and the Housing Needs Assessment deleted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
The Guildford Society has reviewed the thousands of pages of the Evidence Base and, to the best of its ability and, with limited (voluntary) resources, has considered the content and context of each.

We have some concerns about documents that are not up to date (for example the Affordable Housing Viability Report (2014) – although we note AECOM have commented in their updated Sustainability Appraisal (2017) that they believe this to still have currency) and some updated documents that we consider to be inaccurate (such as the 2017 Addendum to the Strategic Housing Market Assessment).

Our response are partly linked to the specific policies and paragraphs of the draft plan where they have been amended, and partly in our response to Appendix D, where changes to the evidence base may have altered the effect, efficacy and appropriateness of unamended paragraphs in the plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

### Comment ID: pslp17q/511  Respondent: 8561377 / The Guildford Society (Julian Lyon)  Agent:

**Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 2: Legal Compliance**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We have not engaged any legal advisors and, as such, are not in a position to determine that legality of the plan. We are concerned about the nature of gamble being undertaken to make all or most development ‘contingent’ upon infrastructure, much of which is beyond the power and control of the Council to bring forward. We have commented on this at many of the individual policies, the evidence base and also in a section entitled ‘Issues and Topic Papers’

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

### Comment ID: pslp17q/512  Respondent: 8561377 / The Guildford Society (Julian Lyon)  Agent:

**Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 3: Soundness**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
We have genuine and serious concerns about the soundness of a plan that fails to deal proactively and comprehensively with the town centre – a critical part of the regional infrastructure for Guildford and surrounding boroughs. We have commented on this in our response to Policy E7 among others and also in our section entitled ‘Issues and Topic papers’.

The housing target numbers are, we believe, mathematically flawed (even after the SHMA which we do not agree with). The tabulated calculation of housing from 2019 to 2034 leaves a 2015-2018 target inclusive of 653 homes per year. Our five-year housing supply falls well short of these numbers. We have commented on this in our response to the Policy S2, the Housing Policies and also in relation to the Housing Delivery Topic Paper (June 2017)

There is no doubt in our minds that Guildford Borough Council has attempted to co-operate with numerous agencies and neighbouring boroughs. There is relatively little evidence (including in the Duty to Cooperate Topic Paper (2017)) to suggest there has been much tangible or useful response, which is deeply disappointing when the plan depends so much on external organisations.

Spatial vision

1) Chapter 3 includes the Spatial Vision.

a. The 40% affordable housing target is unchanged. So is the viability report (2014)– somewhat outdated and written before the change in Appendix C of most infrastructure from ‘Developer Contribution’ to ‘Developer Funded’ which suggests it is achievable. There is insufficient strength in the policy and no definitive test for assessing developments for affordable
housing, and The Society remains very concerned that the actual proportion that will be delivered will be substantially lower.

b. The Spatial Vision spells out the housing target of 12,426 homes over the nineteen-year currency of the proposed plan, at an average of 654 homes per year. The Guildford Residents Associations (GRA) will contest the need for so many homes and we have seen their analysis and believe it to be substantially more robust than that of GL Hearn in their SHMA – not least because the basis of calculation and underlying assumptions of GL Hearn (in the original SHMA and the recently 2017 update) have not been available to the community despite several attempts to obtain it by FoI requests and EIR. We, therefore, support the analysis commissioned by GRA and reject the target proposed in this Regulation 19 draft submission local plan.

c. The third paragraph of the Spatial Vision is somewhat challenging. The Vision calls for the ‘preferred location for [housing] development is existing brownfield sites’. It says 3,000 units will be located in the urban areas and approximately 1,200 dwellings on non-strategic sites within and as extensions to existing villages. By definition, 8,226 homes will need to be on sites that are not urban, village nor village extension– almost twice as many. This is an indication of major planning failure in Guildford over the past twenty or so years. We see good signs of improvement, but the current Council remains hamstrung by its predecessors’ failures.

d. There are opportunities to densify housing on existing estates in the urban area. The evidence of Indices of Multiple Deprivation suggests there are some clear target areas for regeneration but the Council has shown no clear plans in this Plan period to bring any such development forward – even if the lead time is likely to take much of the Plan period. Failure to identify areas for substantial regeneration in the plan and during the plan period will inevitably lead to a need to raid the Green Belt again in the next Plan. This means that the redrawing of the Green Belt cannot be considered permanent and so fails the NPPF test for designating Green Belt land, which, as a legal requirement for development to take place, would make the proposed plan unsound.

e. The Spatial Vision identifies the ‘required provision of 240Ha of additional new open space. We are not clear that this is specifically allocated anywhere in the plan or on the proposals map – this is surely an omission which would make the local plan unsound.

f. Paragraph 8 of the vision refers to the rural economy and, a few weeks into the consultation process the Council published a strategy document for the Rural Economy. The Guildford Society does not understand why this was not ready for the Regulation 19 consultation.

g. Paragraph 9 refers to a reduction in retail area (The Society remains unclear that the evidence base is robust in its assessment of need). The evidence base notes that there is a need across the Borough for 6,000 sqm of food and drink uses. This paragraph points to all of the Borough’s need being met on the single site at North Street. We suspect the evidence base is wrong but the plan does not seem to be correct, and so is probably unsound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I would like to place on record my comments and concerns regarding the New Local Plan.

Over 60% of the proposed new houses are to be built in the Metropolitan Green Belt. In my view this represents a massive incursion into the Green Belt within the borough which is completely contrary to its whole concept. It was of course established by law to be the lungs of London and to prevent urban sprawl. It should be open and permanent and not subject to inappropriate development except in very special circumstances. I understand that Government advice is quite clear that housing need alone is not an adequate ground for building in the Green Belt. I therefore object to this proposed invasion of the Green Belt.

I also object to the proposed removal of East and West Horsley from the Green Belt. One result of this would no doubt be to make back garden development easier. This would lead to a creeping urbanisation of the two villages from within which would eventually destroy or severely harm their existing semi-rural nature. This characteristic is one reason why many residents chose to live here in the first place. No exceptional circumstances have been put forward to justify the insetting and the adjustment of the settlement boundaries.

It seems to me that West Horsley has been singled out for special attention and I object to the proposals for our village. The main development site proposals (all in the Green Belt and outside the existing settlement boundary) if agreed and implemented would add up to 385 new dwellings in the village, an increase of 35% on the current number. The resulting housing density would be drastically higher than the current level and would fundamentally alter the character of the village for the worse. Policy D4 stated that proposals for new development within an inset village will have particular regard to the distinctive settlement pattern of the village and the important relationship between the built environment and the surrounding landscape. What is being proposed for West Horsley, a small semi-rural village with 43 listed buildings seems to me to be quite contrary to this policy. It would be completely overwhelmed by development on the proposed scale and its existing character significantly damaged. There were a very large number of objections to similar proposals in the 2014 daft plan and these appear to have been almost completely ignored in drawing up the latest proposals.

Another key issue here is that the local infrastructure is already under considerable strain. 385 new dwellings could mean an increase in village population of over 1000 people and one has to ask where the extra children would go to school or where any of them would obtain medical care. The primary school is full and the medical centre struggles to cope with existing demand. The draft plan does contain a proposal to expand the medical centre in East Horsley, but only within a 5 to 15 year time scale. This could be long after the new houses have been built.

Local public transport is very limited and the residents of these new dwellings would be heavily dependent on the use of private cars. The local roads are already in places in distinctly poor condition. One example is East Lane which carries a considerable volume of both through, school and local traffic and Northcote Road which leads to the Raleigh primary school. I have reported the badly broken surface of East Lane to SCC Highways, but little so far seems to have been done to improve matters. I also regularly have to report large potholes in Northcote Road (which do usually get patched up, but open up again within months). I question whether the local road network could realistically cope with the increased traffic levels.

Some of the new inhabitants would no doubt want to commute towards or into London by rail. It is doubtful whether the existing service could accommodate many more commuters, as trains in the rush hours are already very crowded. In addition the car park at Horsley station is close to full on weekdays. Furthermore car parking for the Station Parade shops is quite often full or close to capacity.

I was surprised and dismayed to note that the proposed 2000 dwelling development of the Wisley Airfield site has been included in the draft plan. This has of course already been refused planning permission by the Borough Council. Many of the transport infrastructure factors in the Horsleys mentioned above would be considerably exacerbated if this were to go ahead. Inevitably the numbers using Horsley Station would increase and traffic levels would rise still further as the inhabitants and those providing services to them drove to and from the new settlement through the two villages. I therefore wish to object to the inclusion of the Wisley Airfield in the draft plan.

Site A38 (Land to the west of West Horsley) is designated for 135 new houses. This would load both East Lane and Long Reach with considerably more traffic than at present. As mentioned above East Lane is already a busy road in poor surface condition in places. Long Reach is a narrow unclassified road with some sharp blind bends towards its northern end and is...
not well suited to significantly to increased traffic volumes. Almost every Saturday in the season there are a large number of cars parked on the verge by those using Horsley Football Club grounds and Tom’s Field. This reduces it to a single lane.

The map for this site shows its eastern boundary as the end of the back gardens of the houses on the western side of Northcote Road. It needs to be noted that Bens Wood, which I understand is likely to be proposed as a SANG, extends to the south along the back of some of these houses. Permissive access is available to Bens Wood from all properties backing onto it and this is a valuable local feature. This part of the Wood would be destroyed and access lost to the rest if the entire site were to be built up. Bens Wood is also an important wildlife habitat as well as being an asset to the village and the development of Site A38 would inevitably have an adverse impact on this natural environment. I therefore object specifically to the inclusion of this site in the draft plan.

In conclusion I readily accept that the borough needs more housing, but I fell very strongly that this should be provided in a far more sensitive, measured, balanced and sustainable way than proposed in the draft plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3159  Respondent: 8562081 / C Scarlett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removal of West Horsley from the Green Belt as do the National Trust, West Horsley Parish Council and Horsley Countryside Preservation Society. This seems to ignore the NPPF stipulations that the planning system should fulfil a role which contributes to the protection and enhancement of our natural environment and that all available urban resources should used before any development of the Green Belt is considered. The Surrey Hills AONB should also wash over the village.

The proposed increase in housing of 35% above current levels is completely out of line with developments in other villages and especially in Guildford Town. This inflated number of new houses apparently arises from a Strategic Housing Market Assessment that was generated by a consultant’s mathematical model. The need for more houses in West Horsley should be limited to providing small dwellings for first time buyers and the elderly who wish to downsize, not the 385 new houses proposed.

The infrastructure in the Horsleys is already overloaded; the local schools are full, medical facilities are stretched, roads and trains are overcrowded, roads are badly maintained, car parks are frequently full, and drainage is inadequate.

I object to the proposed development of a large estate of 135 houses on the land designated A38 at Manor Farm West Horsley (site reference 15) to be located between East Lane, Long Reach and Northcote Road. This last named road is not mentioned in the address of site reference 15, but should be. This development would not respect the current character and density of housing in the village. 135 houses would involve at least 270 more cars using the narrow lanes in the area and commuters to and from the A3 would use Long Reach which is quiet and rural with right angled bends at the northern end in Ockham village. Although the site is designated Flood Zone 1 (low risk) there were large amounts of standing water present last winter in spite of the presence of many deciduous trees which take up water.
The amount of new broadleaf woodland created in England has fallen to the lowest level in at least 45 years according to the Forestry Commission and Woodland Trust. Any loss of woodland is highly undesirable given its ability to absorb carbon.

I have lived in properties adjoining the land at Manor Farm for 44 years and our garden and a number of others on the western side of Northcote Road back directly on to Bens Wood, which is a nature reserve and a bespoke SANG. The end of our rear gardens is the current settlement boundary and its relocation and the proposed development would destroy the rural nature of this part of the village. We enjoy direct access to the all weather permissive footpaths in the Wood, which would be lost if the southern extension is taken by development as shown in the site map.

The presence of the Bens Wood nature reserve and its pond has improved the environment and the amount and variety of wildlife species has increased greatly. There are now far more animals and especially birds including migrants, woodpeckers, owls, buzzards and red kites which give interest and pleasure to local residents who walk in the area. The noise and disturbance caused by large scale building works nearby will frighten away this wildlife from the whole of the wood.

The amendments made in the latest draft unfortunately do nothing to allay my concerns and I must therefore maintain my objections. The proposed scale of new building still does not in my view represent sustainable development for the Horsleys and would irretrievably change the semi rural nature of the villages. I also have little confidence in Surrey County Council’s ability or willingness to provide a suitable road system – I refer particularly to East Lane West Horsley whose surface is badly damaged in several places and which would have to carry a considerably increased volume of traffic if the proposed developments were to go ahead.

I OBJECT TO THE PLANS OUTLINES IN POLICY A25 This massive development, coupled with POLICY A43, would transform the rural nature of the villages of Send and Ripley to a sprawling suburb of Guildford. Our Green Belt lost forever!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2892  Respondent: 8562145 / Mr Christopher Last  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO THE PLANS OUTLINED IN POLICY A43 on the grounds that this area is Green Belt and is therefore protected from development. It is a wildlife habitat. What does The Council propose to do about this? The brownfield industrial site at Burnt Common is large enough for the 7,000 sq. m. suggested for further development. If the Council builds on this area, the small, beautiful country villages of Ripley and Send will become suburbs of Guildford in no time at all and their uniqueness and beauty will be lost forever. Please don't touch our Green Belt! This why we moved to this area, because it is unspoilt! I also object to the plan for 400 new homes, on the grounds that there is insufficient infrastructure to maintain this level of development, viz: health centres, schools etc. I also strongly object to the manner in which this plan was put forward at the last moment, without consultation.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. The Council was entitled to consider constraints before determining the housing number. We believe that as well as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as well as infrastructure (most notably roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First we believe constraints should have been applied. Secondly we believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Having properly applied constraints if there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the Plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25
### POLICY A25 - Gosden Hill Farm

We object to Policy A25 Gosden Hill Farm.

1. The Green Belt at this point serves the important function of separating the parish of West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce, defeating one of the objectives of the Green Belt. If this development proceeds we believe the narrow strip of Green Belt remaining between Guildford and the houses along The Street in West Clandon (owned by the same developer as Gosden Hill Farm) will come under enormous pressure.

1. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

1. The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

1. The development will overburden the local road network and increase congestion on the A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement (see also below).

1. We object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon—a road which is already under traffic stress (see also below) and which Surrey County Council say cannot be improved.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

### POLICY A43 AND A43a – Garlick’s Arch

We object to Policy A43 and A43a on Garlick’s Arch.

This site had been previously considered and rejected before the previous draft of the Plan. The site was then inserted in this draft only hours before its publication without any consultation. We have seen no evidence that exceptional
circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

This is a cavalier approach to public engagement by the Council.

1. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

1. The site is susceptible to flooding and development will cause harm to the ancient woodland on and by the site.

1. The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

1. The Council appears to view the development as an enabling site to obtain land and developer funding for slip roads on/off the A3. This is not an exceptional circumstance to justify taking Green Belt land. The slip road land if needed could be safeguarded in the Plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham school was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

1. The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, a primary school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

1. Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY D3 - Historic environment

We object to this policy as it is very weak and we do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets. Taken together with the current Council policy of “sweating assets” we fear this policy leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

POLICY D4 - Development in urban areas and inset villages

We object to this policy:

1. The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.
2. The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately and is not sustainable.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY E1 - Meeting employment needs

We object to this policy.

1. We object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

1. The site is in any event subject to frequent flooding and contains ancient woodland and is unsuitable for development.

1. We object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E2 - Location for new employment floorspace

We object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. We also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY E6 - The leisure and visitor experience**

We object to this policy. The policy should acknowledge that much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly, the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY E7 Guildford Town Centre**

We object to this policy.

1. The policy "vision" describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. We suspect the Vision wording is effectively of little or any force. These principles should be explicit in the statement of policy.

2. There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development in, for example the Walnut Tree Close /Woodbridge Meadows area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the Plan period without harming the countryside.

3. There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

4. The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

5. The policy also fails to provide guidance on design requirements, as required by the NPPF.

6. The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. Above all, the retail development proposals must not damage the viability of the High Street.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**POLICY H1 – Homes for all**

We object to this policy.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinized or evaluated. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the Plan period. It fails to set rules on important issues such as constraints and density and is not specific enough to provide a practical framework for planning decisions.

A much higher proportion of Surrey University students should be housed in university accommodation. The University has proved to be recalcitrant in providing accommodation in spite of outstanding Planning permissions. The policy does not do enough to rectify this.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

**POLICY H2 – Affordable homes**

We object to this policy on the grounds that it should be more firm and explicit on “unviability” in paragraph 4.2.40. The possibility of avoiding or reducing the affordable housing obligation through use of unviability arguments is likely to inflate land values and lead to appeals.
In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

Guildford's popularity and location in the Green Belt, with the Surrey Hills, close to others towns and within the London Commuter belt mean that demand is virtually unlimited and no amount of affordable housing will meet it. The real need is for social or “council” housing but that will not be provided by current developer-led models.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPP16/6171  **Respondent:** 8562273 / The Clandon Society (Christopher Dean)  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

**Do you consider this section of the document; complies with the Duty to Cooperate? ( )**  **is Sound? ( )**  **is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**POLICY H3 – Rural Exception Homes**

We object to this policy for a number of reasons:

1. The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the Planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

1. The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations were available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

1. The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

1. The policy wording should define small, either in land size or number of units. We are concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the Plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

1. The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular, we believe adding the concept of “safe and easy walking distance” extends the potential radius within which sites will be argued to be “closely related”. Many people would regard a mile or so as an easy walking distance and school children are expected to walk further than that before being eligible for free school travel.
1. The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. The supporting text includes this point, but it is not part of the policy itself and may carry little weight at appeal.

1. The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfulfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY I1 - Infrastructure and delivery

We object to this policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the Plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this Plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the Plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local Plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This Plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. Implementation is critically dependent on providers outside the Council’s control and CIL income. Instead of recognizing this as a key constraint, the Plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY I2 - Supporting the Department of Transport’s “Road Investment Strategy”

We object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft Plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network.

Road infrastructure represents a major constraint that should have been applied to the OAN at a much earlier stage in the Plan process and not left as an unresolved difficulty in the draft Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P1 – Surrey Hills Area of Outstanding Natural Beauty

We object to this policy as we are concerned it weakens existing protection when it should strengthen it. It is dependent on the Surrey Hills Management Plan. This welcomes housing development. Even major (undefined) development in the AONB would be permitted if exceptional (undefined) circumstances could be demonstrated. The policy should be tightened up.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY P2 – Green Belt

We object to this policy.

1. It does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local Planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development. Green Belt was last taken in the 2003 Plan and now it is again proposed to move the boundaries.

1. The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the Plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

1. Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

1. The Countryside Study was a simplistic exercise based on the erroneous principle that ranking Green Belt land would identify candidates for development. The Council has not carried out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently Planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

1. We object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt (a term which neither the Plan nor the NPPF defines) and there is no need to inset them. We also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. In effect, each village will become a nucleus for further development. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development.

1. To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. We cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need and has caused intense opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

1. Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” We believe this should be deleted as an untruth.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

SITES - POLICIES A1 TO A57-sites in the Green Belt

We object to each of the proposals to remove sites in this list from the Green Belt on the following grounds:

1. The identification and allocation of sites in this Plan is made without regard to Green Belt, infrastructure or other constraints. The Plan now proposes even more housing in the Green Belt than at the Section 18 consultation. The Plan says that “allocating these sites does not grant Planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council has received about individual sites ever since the Issues and Options consultation in 2013.

POLICIES

It is our understanding that only the text in blue constitutes “policy”. All the remaining text is not. If the accompanying text does not have the force of policy when planning decisions have to be made then a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little and provide little guidance for planning decisions. It is certainly not possible in many cases to read across from the non-policy wording to the policy itself.

POLICY S1 – Presumption in favour of sustainable development

We object to this policy. The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both Plan-making and decision-taking.” The policy calls for “development that secures the economic, social and environmental conditions in the area”.

As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead there is no definition of “sustainable development” and no principles for balancing economic growth, social justice and environmental protection in practice to local Planning decisions are given. However, apparently, all excursions into the Green Belt constitute “sustainable development”. It is clear that economic growth has trumped the other considerations in breach of the NPPF’s requirements.
Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections as required by the NPPF. This would set one clear boundary to Planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve Planning applications “wherever possible” and “without delay” seems to fly in the face of the NPPF presumption in favour of sustainable development and becomes a presumption in favour of any development at all. It also seems at odds with public statements from the Leader of the Council to the effect that including a site in the Plan does not mean that permission will be given for development.

The policy ignores the 12 Core Planning Principles set out in NPPF paragraph 17.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S2 – Borough Wide Strategy

We object to Policy S2 on a number of grounds.

1. Almost every element of the Plan is predicated on the OAN adopted as the housing number. We believe this number to have been seriously overstated before the referendum but it is utterly without foundation now.

1. It is unreasonable to embark on the most extensive transformation of the borough on the basis of an unclear housing target. The scale of the development proposed increases the onus for it to be seen to be sound. The first line of the policy states that it will make provision for 13,860 dwellings or 693 p.a. over the period 2013-2033. The number given in Table 1 is 13652 for the 2018-2033 period or 910 p.a. and this is said to be an overprovision to demonstrate that the “target” can be met. The numbers given in the policy as targets for each of the years 2018-2033 add to 10,395 or 693 p.a. and this is said to be an overprovision to demonstrate that the “target” can be met. The numbers given in the policy as targets for each of the years 2018-2033 add to 10,395 or 693 p.a. and this is said to be a shortfall against the provision stated in the first line of the policy, or perhaps 2,200 allowing for those that will be built in the period 2013-2017. There are references in the evidence base documents to the possible need to make up shortfalls in Woking’s provision and the “Sustainability Assessment” carried out for the Council came up with a preferred figure of 15,860 houses. This is very confusing.

1. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The Plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get Planning permission. Constraints in the supply chain and maintaining profit levels have been more important.
1. The Plan in general and this policy in particular do not address the point that Guildford exists as part of London's commuter belt. In this area the demand for housing is, in practical terms, unlimited. The increase in the supply of housing in Guildford will simply result in a shift of population into the area. “Affordability” is not a fixed sum but is dependent on market prices. The Plan will not reduce prices or increase affordability except at the margins.

1. This policy does not take proper account of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. We believe the Council is under a duty to properly consider applying these constraints and that this has not happened. This approach differs from the other boroughs in Surrey. The Plan is based on the assumption that “growth is good”. More consumption, more congestion, more Green Belt being taken-this is not a sustainable strategy.

1. The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon, Ripley and Send in particular. The developments at Garlick’s Arch and Gosden Hill Farm will put severe strain on the road infrastructure in and around West Clandon which will be unable to cope. The proposed A3 slip roads at Burnt Common will make matters much worse. The edge of urban Guildford will be moved much closer to West Clandon. It will be built on Green Belt land which was to safeguard the countryside from encroachment and check the sprawl of large built up areas.

1. The Plan is out of balance in proposing 65% of housing on the Green Belt and 36% in the three wards of Lovelace, Send and Clandon and Horsley. These are rural areas whose identities will be greatly and detrimentally changed by these proposals.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

RESPONSES TO 2016 GUILDFORD PROPOSED SUBMISSION LOCAL PLAN STRATEGY AND SITES

The Clandon Society is the residents’ association of East and West Clandon. We have serious concerns about many elements of the draft Plan.

24A. Question 1: Evidence Base. We do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

- The evidence base documents are self-evidently not up-to-date in that they take no account of the radically changed environment and outlook following the referendum. This is hardly the fault of the Council but is nevertheless a serious flaw.
- The Transport Assessment was published at the same time as the Plan leaving little time for study and analysis. The projections contained appear to be quite inadequate in that 1) they average congestion over 3hr time bands thus materially reducing the impact of congestion and 2) they do not model junctions.
- The “Assessment” shows that congestion will worsen significantly over the period of the Plan even if all the proposed infrastructure is built.
- The SHMA attempts to justify an OAN based on a very aggressive desire for growth in the borough. No case is made that such growth is sustainable. The assumptions and estimates are not transparent and have not been adequately scrutinized by Councillors so that people have to take on trust the work of a consultant. In any case events have overtaken the SHMA.
- The number and complexity of the documents in the evidence base make reading, understanding, analysis and assimilation extremely difficult.

<td></td>
<td></td>
</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

24C. Question 3: Soundness. We do not agree that the Plan is sound for the following reasons:

- “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
- The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
• The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
• The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites - which amount to 65% of the proposed housing number.

• Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
• The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
• Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
• The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of the green belt.
2. If this development proceeds, it leaves a narrow strip of Green Belt remaining between Guildford and West Clandon. The same developer who is promoting Gosden Hill has several times tried to develop this land for housing. The current policy on treating green belt land as a developable resource means that it is only a matter of time before the village is joined up with the urban area.
3. The development will be highly visible from the A3 when approaching Guildford.
4. Together with the developments at Garlick’s Arch and Burnt Common there will be an almost uninterrupted ribbon of development along the A3 extending 5 miles from the centre of Guildford.
5. The development of this site will cause massive congestion in surrounding roads. It will generate many thousands of vehicle movements onto the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel large amounts of traffic onto the narrow, winding road through West Clandon and Send.
6. The proposal for a link road to bring traffic from the Gosden Hill development to a 4 way junction at Burnt Common has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon and Send - a road which is already under traffic stress.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Wisley development of a new village / town with at least 2000 houses, 4-entry form secondary school and employment land will generate large amounts of additional traffic onto the A3. If the slip roads at the A3/A247 junction to relieve the impact of this development on Ripley do get built, traffic on the A247 will increase dramatically. There are no plans to alleviate the effect of this development on the A247.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3424   Respondent: 8562273 / The Clandon Society (Christopher Dean)   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58
This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously. The Plan calls for a minimum of 7000sq. m (previously in the 2016 Plan a maximum figure) but will take 9.26 hectares out of the green belt. There is no proper justification given for taking the additional land.

1. The evidence base does not support this scale of additional industrial space and the justification for placing it in the green belt is not made out. The 2017 Employment Land Need Assessment shows a demand for about 4 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Burnt Common in the green belt.

2. If the quality of some existing industrial provision is not adequate this should cause re-development of it not a large encroachment into the green belt.

3. The reference to waste management facilities mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and should not be so casually included for this site.

1. The A247 through West Clandon and Send is likely to experience large volumes of additional traffic including heavy vehicles generated by the proposed light industry, storage, distribution and waste management activities at Burnt Common. There is also the likelihood of commercial vehicle traffic between Slyfield and Burnt Common particularly when the Clay Lane access is built which will impact the same road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Residents are being asked to accept very large amounts of development with little or no detail being provided on measures which would relieve existing congestion and limit future problems. Much is made of the need for new infrastructure to support developments and for this to be in place as needed (listed in App. C to the Plan). Even if this happens the Plan admits …”we forecast that there will also be an absolute increase in overall traffic volumes” and also that congestion at junctions will increase (but this is not modelled so we don’t know by how much or where).

The cumulative effects of the developments in the north east of Guildford are certain to have a devastating impact on the A247 through West Clandon (and of course on Send) and it is hard to see how any of the infrastructure proposals in the Plan (App. C) will do anything to mitigate this impact. GBC has little or no control over the plans of Surrey County Council as the local highways authority and it is well known that they have no money available.

The Plan now calls for nearly all the proposed infrastructure to be funded by developers (see C). We question how realistic it is to expect developers not only to pay for all the infrastructure but also to have it in place in a timely fashion. The Plan says that planning permission will be refused if timely provision of infrastructure cannot be secured. Such refusals will
almost certainly be settled in the courts. Developers’ business models are based on building and selling houses to create the cash required to provide infrastructure. People will be living on the sites well before infrastructure is complete.

If development were to be refused the land would still have been removed from the green belt and its future rendered uncertain.

All of these developments will draw very large amounts of additional traffic to the A247 through the village and there is no reference to this in the Plan. It would be naïve to think that the employment sites and schools will serve only the developments themselves. Apart from the normal movements of residents to and from the new sites there will be considerable additional traffic on the A247 generated by:

- children from elsewhere being delivered to Gosden Hill schools and collected
- the employees of the offices and industrial sites getting to work and returning home
- the vehicle movements generated by distribution and storage activities
- traffic from Wisley wishing to travel south and returning
- traffic from Gosden Hill wishing to travel south and returning
- traffic from Slyfield wishing to travel south and returning
- private and commercial traffic originating in the south and accessing Gosden Hill, Burnt Common or the A3 and returning (including traffic from Dunsfold)
- SCC’s business plan for Newlands Corner

We point out that although the A247 is classified as an A road it has none of the characteristics and ideally should be downgraded. The road is a well-known problem and a number of domestic planning applications have been turned down on highways objections. It is quite unsatisfactory to even consider putting more traffic on a road that:

- is less than 2 vehicles wide in places
- does not have continuous footpaths
- has several very sharp bends
- has a hump-backed bridge with poor sight lines
- has many properties with very poor exit sight lines
- has a very difficult and dangerous junction with the station access road
- has a dangerous junction with the southbound A3 on-slip road
- is largely unlit
- has a primary school
- is already very congested at times

In summary, the A247 is quite unsuited to coping with additional traffic and it is very clear that the developments proposed in the 2017 Local Plan will increase the amount of traffic on this road over and above that in the 2016 draft to which residents strongly objected. There is nothing in the Infrastructure Schedule which addresses this issue. Indeed several of the infrastructure proposals will themselves lead to significant increases in traffic on the A247.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Plan states: “4.3.16 National planning policy requires that Green Belt boundaries are only amended in exceptional circumstances and that this must be undertaken as part of the Local Plan process. We consider that exceptional circumstances exist to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of development.”

1. The Plan fails to demonstrate that exceptional circumstances have been identified for each site that is to be taken from the green belt. The scoring system used to classify pieces of green belt was deeply flawed and assumed that because the housing number could not be accommodated on brownfield or previously developed land in the green belt, it is therefore legitimate to move the boundaries. The Plan implies that it is legitimate to have a blanket change to green belt boundaries to meet the housing number. That is not in accord with the NPPF or ministerial statements.

2. The Plan claims that in fact more housing could be delivered than the OAN which implies that excess land is being taken from the green belt. Doubtless some of Woking B.C’s shortfall will be built in Guildford.

3. The green belt appears to be functioning as a resource to be developed whenever the borough claims it is short of development land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp17q/305  Respondent: 8562273 / The Clandon Society (Christopher Dean)  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

The Local Plan is not sound.

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no evidence of a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land, this latest version has as much, if not more, building on the Green Belt and will bring increasing traffic congestion, pressure on other infrastructure, noise and pollution and a reduction in the quality of life of residents.

There cannot be a collective vision about critical matters on which there is no detail available—e.g. any future plans for alleviating congestion on the A3 between the M25 and the town. There is little or no recognition of the cumulative impacts of the concentration of development in the north east of the town centre.

The Plan does not consider the implications of Surrey County Council’s business plan for Newlands Corner to attract 100,000 more visitors a year. A significant proportion of these can be expected to use the A247.

The Plan does not consider the implications for the A247 of the large number of developments which have the potential to generate traffic on it:
- slip roads to the A3 off the A247
- Wisley
- Garlick’s Arch
- Gosden Hill
- Slyfield
- Burnt Common
- 4-way junction near Send/Burnt Common
- diverting traffic from the south to go around and not through Guildford

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford.

I OBJECT to the building on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded.

I OBJECT to the exaggerated “housing need” figure of 13,860 which is far too high and results in the completely unnecessary development of the Green Belt. The way students, economic need and affordability are calculated inflates the housing need.

I OBJECT to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford’s urban brownfield areas much closer to existing transport hubs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

I OBJECT to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

I OBJECT to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Answer (if comment is on questions 1-7 of the questionnaire): ()
OBJECTION: The following are comments from Send Parish Council about the proposed Local Plan 2016:

Insetting of the Green Belt behind Heath Drive and Send Road and in the vicinity of St Bedes Junior School Send Hill

Taking the villages out of the Green Belt leads to windfall sites which could mean Send Village could have even more developments than are currently set out in the proposed plan.

Much of this land forms part of the Wey Navigation Corridor which should be protected. This land in turn provides habitation for a great deal of wildlife - foxes, bats, birds etc. It provides a beautiful green backdrop to walkers on the tow path and for distant views from Old Woking and Pyrford.

The statement on page 116 4.6.39 states that “The River Wey Navigation is owned and managed by the National Trust (NT) and is a highly valued asset of borough wide significance, both as an important element of our borough’s biodiversity and as a very significant public space. The NT has compiled a set of guidelines for what it considers important characteristics of the river, and how this should be managed.

These include the importance of the river as a ‘visually important open corridor’ and ‘an important leisure asset’ as well as a Conservation Area.

Insetting land at St Bedes Junior School, Send Hill will go against what was stated in a recent Planning Permission granted which stated when the St Bedes School was demolished the land would be returned to Green field. Removing the Green Belt status would present this land to developers.

Removing the Send Lakes from the SNCI designation

This means that there is the potential for these lakes not to be so well tended and the risk of flooding in the area to rise. At present a dedicated team tend the lakes, which is a joy for all the villagers to appreciate. It is an area that is a magnet for wildlife.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: fish lakes.jpg (20 KB) wey navi.png (350 KB)
As stated many times previously, this narrow lane does not lend itself to accommodating more traffic. It should also be noted that planning permission for 63 apartments is already granted at the Tannery under reference 14/P/00575 and 00576 as amended. An additional 45 houses on Clockbarn Nursery would increase the number of dwellings in Tannery Lane by nearly 400%.

The junction with Send Road (A247) is busy and has poor sight lines. In the other direction it enters Papercourt Lane which is even narrower. The land currently floods, despite the recent improvements to the road drainage from digging out ditches. A planning application for a large Marina in the same lane was recently granted and the spoil from this development was to be placed on this land. These actions will only exacerbate this flooding problem for everyone in the lane, and for properties in Send Road and Wharf Lane.

Clockbarn Nursery is designated as agricultural land within the Green Belt. The fact that it has been allowed to deteriorate should not be a passport to changing its status. It is a nesting habitat for bats which are a protected species.

Answer (if comment is on questions 1-7 of the questionnaire): ()

This would involve loss of one of the very few remaining areas of woodland in the vicinity. Ancient woodland is irreplaceable. Much of the woodland was planted hundreds of years ago, in fact many of the oaks show great age.

400 Houses is an outrageous number for any small village to accommodate. It would virtually raise the number of residences in the villages by 25%. The implications for traffic are dramatic. Every day Portsmouth Road is stacked back from the M25 to the Send Road traffic lights from 8.00am to about 9.15am and then the flow is reversed in the evening. There is serious concern about air pollution from the cars that sit in the roads with engines running. The access to the Portsmouth road is poor from the proposed development. It is very near to the Burnt Common Lane junction.

The addition of the industrial buildings so close to housing is undesirable and perfectly good sites are available at Slyfield Industrial area. There are also electric pylons on this land which must be addressed in the event of development.

This Garlick’s Arch site abuts the East Clandon Stream. The stream frequently floods onto the Portsmouth Road and the A3. Furthermore, with so many buildings being added the run off the land onto the stream will be aggravated. We understand that the site is built on London Clay. This means that every time there is the potential for the stream to rise, the land floods. (see attached photograph) In addition the trees that are being removed will also exacerbate the problem. The copse is home to and regular visiting place for deer, foxes, owls, bats, rabbits, hares not to mention having a carpet of bluebells in spring.

Much of the Garlick’s Arch area is used for country pursuits in varying ways. The large field abutting Burnt Common Lane is still farmed which is rare in the borough. Pheasants are raised in this and the adjoining wooded area. There is a Clay pigeon shooting syndicate which use the land to the end of Kiln Lane. Dog walkers are regular users of the lanes and surrounding fields.

We understand from the Guildford Lead Councillor for Infrastructure, Matt Furniss, that the 400 houses proposed is the pay back required by the landowner for the land gift being offered for the four way junction to the A3. We are of the opinion that the payment is disproportionate to the benefit for our Village.

The infrastructure needs to be in place before the site is considered for development because the pressure on the current roads is too great. Parking in the village is already stretched. There is no bus service at all to the Villages Medical Centre which is already oversubscribed.
The large field mentioned in this application was subject to a planning application for 25 houses on the Oatlands side site a couple of years ago but was turned down but yet here it is again with a suggestion of 400 houses this time.

In a more recent planning application for the land at Oldlands Field Yard which is adjacent to this current development, permission was refused by Guildford Borough Council and the following two extracts are from the letter of refusal. Surely the same reasons would apply to the land now proposed for 400 houses and an industrial development.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

A 43a The proposed Northbound and Southbound slip roads

The proposed slip roads do have some merits, offering the residents of Send and West Clandon quicker access. However, this would come at a very high price in terms of noise and upheaval for neighbours adjacent to the slip roads in Burnt Common Lane and Wood lands.

Another difficulty with this development is that the access to the northbound slip road would run over Manorial land which is at the site. It is apparently owned by the Lord of the Manor or his heirs. The proposed slip road also runs up land that is currently farmed.

The A247 and other feeder roads in the area are already heavily congested at peaks periods. The proposed slip roads to and from the A3 at Burnt Common interchange would make this congestion even heavier. The villages of Send, West Clandon and Ripley already carry very heavy traffic morning and even ing with vehicles going or returning from the A3 and M25. The A247 Clandon Road and the Street in West Clandon are very narrow in places as are many of the lanes and feeder roads around the area as a whole.

In Send Road adjacent to the junction with Tannery Lane and Sandy Lane is the Send Recreation Ground. This recreational area was Gold Rated by Guildford Borough Council and is one of only about ten in the Borough. It is used by children from the Village and surrounding areas, youth sports teams and personal trainers throughout the week. Increased housing and industry will bring further vehicles and increased pollution to this vulnerable area. Parking in the area is always a problem. In addition to this the local school is advocating children should be walking to school wherever possible. The pavements are very poor and narrow in places. Any increase in traffic would aggravate this problem and the physical danger to children.

In the event of this re-organised junction being included and planned the Parish Council would insist that Potters Lane junction must be closed as it causes many accidents with its poor placement so close to the exit at Burnt Common. There is currently no northbound slip road from Potters Lane and traffic on the A3 is travelling at high speeds which make entry from this point very dangerous.
This is the house called Oatlands, Burnt Common Lane which was refused planning permission for 25 houses about three years ago. It is now proposed to build 400 houses in the vicinity.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
A 44 Land west of Winds Ridge and Send Hill

The land in question is in the Green Belt and outside the current settlement boundary. This land was previously used as a gravel pit and then infilled and it is still monitored judging by the various manhole covers on the land.

The exit from this land onto Send Hill is very narrow and not suitable for the access for a small estate. This might also be described as backland development. The distant views from Potters Lane which are beautiful would be totally altered. Some of this land is farmed and, or grazed.

The site is unsuitable for a traveller site as it is away from the Village centre and approximately one mile from the shops and the nearest bus stops. The road Send Hill at the entrance to this site is 2.3 metres wide, very narrow and additionally unsuitable for long vehicles and on the opposite side of this narrow road is the multi-denominational Send Cemetery. It is a quiet area and an additional 40 houses and two traveller pitches would be detrimental to the surroundings.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Insetting of the Green Belt behind Heath Drive and Send Road and in the vicinity of St Bedes Junior School Send Hill

Taking the villages out of the Green Belt leads to windfall sites which could mean Send Village could have even more developments than are currently set out in the proposed plan.

Much of this land forms part of the Wey Navigation Corridor which should be protected. This land in turn provides habitation for a great deal of wildlife - foxes, bats, birds etc. It provides a beautiful green backdrop to walkers on the tow path and for distant views from Old Woking and Pyrford.

The statement on page 1 16 4.6.39 states that "The River Wey Navigation is owned and managed by the National Trust (NT) and is a highly valued asset of borough wide significance, both as an important element of our borough's biodiversity and as a very significant public space. The NT has compiled a set of guidelines for what it considers important characteristics of the river, and how this should be managed.

These include the importance of the river as a 'visually important open corridor' and 'an important leisure asset' as well as a Conservation Area.

Insetting land at St Bedes Junior School, Send Hill will go against what was stated in a recent Planning Permission granted which stated when the St Bedes School was demolished the land would be returned to Green field. Removing the Green Belt status would present this land to developers.

Removing the Send Lakes from the SNCI designation
This means that there is the potential for these lakes not to be so well tended and the risk of flooding in the area to rise. At present a dedicated team tend the lakes, which is a joy for all the villagers to appreciate. It is an area that is a magnet for wild life.

would exert on the village’s infrastructure and the flooding concerns of the site. Other information, such as with the marina application, emphasised other aspects, such as the importance of the area to flora and fauna, such as bats. Further information on these concerns can be seen in greater detail in Send Parish Council’s representations made in July 2016.

6.03 The 2017 draft Local Plan once again includes a residential allocation on the site of Clockbarn Nurseries. However, despite the site not changing in size, this allocation has been altered to increase the allocation from 45 new homes to 60 new homes. It is not clear on what basis the plan has deemed an increase to be acceptable.

6.04 Send Parish Council view this increase in the proposed number of homes on the Clockbarn site to be unacceptable. The stretch of Tannery Lane that connects the site to the Send village is narrow and it is difficult for vehicles to pass, especially large commercial vehicles that would be involved in the construction process. Short term parking along this stretch further limits accessibility to this site. Pedestrian infrastructure would be required in order to create a safe environment that pedestrians can use. Furthermore, the consented Marina scheme on the adjacent land and any proposed intensification of Send Business Centre (see also 5.07 – 5.13 above) would significantly increase vehicular flow along Tannery Lane, past the Clockbarn Nursery site. The increase in the number of proposed homes from 45 to 60 would simply exacerbate this problem, making the issues of accessibility and pedestrian safety even more acute.

6.05 The parish council are also concerned that the cumulative, strategic picture regarding transport and the impact on Send Road is not clear enough in the current plan.

6.06 Changes sought to make the Local Plan sound:

• Remove Allocation A42.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3207  Respondent: 8563169 / Send Parish Council (Debbie Hurdle)  Agent: Tibbalds Planning and Urban Design (Richard Crutchley)

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The parish council made objections to the site at Garlick’s Arch in 2016, and the objection to the residential element is maintained.

The changes introduce a provision for travelling showpeople into this allocation. Policy H1 provides the strategic policy for the provision of plots for travelling showpeople and seeks to secure such plots where provision is being made for 500 homes or more. Garlick’s Arch is proposed for only 400 homes, and the parish council therefore question the suitability of the site to accommodate such plots. Whilst there is no detail of how these sites might be accessed, neither Burnt Common Lane nor Kiln Lane are suitable for the sort of vehicles that might be expected at such plots.

The changes to policy H1, sub-section (6), remove reference to the impact upon the visual amenity of such provisions. The parish council would wish this wording to remain. Whilst the site allocation text introduces reference to visual amenity in para (7) of policy A43, this is not felt to be equivalent to the wording lost from H1.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
5. Employment Land Allocations in Send, Send Marsh, and Burnt Common.

5.01 Send Parish Council object to the following proposals related to employment designations and allocations included within the 2017 draft Guildford Local Plan:

- Send Business Centre – designation changed from “Locally Significant Employment Site” to “Strategic Employment Site”.
- Site A58 – Land around Burnt Common warehouse – “Strategic Employment Site” providing a minimum of 7,000sqm employment floorspace.

The reasons for objections are set out below.

Send Business Centre – changed designation

5.02 As discussed in Section 4, the 2014 draft version of the Guildford Local Plan proposed to inset the Send Business Centre and the adjacent employment land, Site Allocation 67, from the Green Belt. The employment land proposed at Site Allocation 67 would have effectively extended the existing Business Centre by approximately 1.4ha. However, despite this proposed enlargement, in the 2014 draft Local Plan Policy 13 did not include Send Business Centre in the list of new Strategic Employment Sites.

5.03 The 2015 Employment Land Needs Assessment [ELNA], prepared as part of the evidence base for 2016 draft Guildford Local Plan, includes Send Business Centre in its list of Non-Strategic Employment Sites. The 2015 ELNA states that Send Business Centre has “indirect” strategic road access, “poor” access to amenities and facilities, and “very poor” access to public transport [see Table 4.2 of the 2015 ELNA]. The report also states that there is no identified potential for intensification and/or additional floorspace. It is clear from this assessment that Send Business Centre is not an appropriate site for the development of further employment land.

5.04 In the 2016 draft version of the Local Plan, employment land Site Allocation 67 was removed, as was the proposal to inset Send Business Centre from the Green Belt. As discussed in Section 4.04 of this document, the reason for this was the allocation’s location in high sensitivity Green Belt. The removal of Send Business Centre’s proposed extension and insetting from the Green Belt reflected the findings of the 2015 ELNA, which correctly identified the shortcomings of the site with regard to further employment land development. In line with this, Policy E1 of the 2016 draft Local Plan included Send Business Centre in its list of Locally Significant Employment Sites.

5.05 The 2017 ELNA was prepared as part of the evidence base to the 2017 draft Guildford Local Plan and now includes the Send Business Centre in its list of Strategic Employment Sites. The 2017 ELNA states that Send Business Centre has
“indirect” strategic road access, “good” access to amenities and facilities, and “good” access to public transport [see Table 4.1 of the 2017 ELNA]. The report also states that there is potential for intensification and/or additional floorspace to be provided.

5.06 Send Parish Council contest that the findings of the 2017 ELNA are completely unfounded and mark a significant departure from the findings of the 2015 ELNA published just two years previously.

5.07 Firstly, Tannery Lane, which forms the main access point to the Business Centre from Send village, is a rural single-track road with only irregular passing places for vehicles and as such is not appropriate for significant use by commercial vehicles. It provides no street lighting or infrastructure for pedestrians or cyclists and, as is correctly stated in the 2015 ELNA, constitutes poor access to the local amenities available in Send village. There have been no significant alterations to this road since the publication of the ELNA and, thus, it is unclear why the classification of access to amenities from Send Business Centre has changed from “poor” to “good” within two years. It is the opinion of Send Parish Council that a single-track country lane with no street lighting and no pedestrian or cycling infrastructure does not constitute the “good” access to amenities stated in the 2017 ELNA. In fact, it represents an unsafe environment for non-car users wishing to make use of local amenities and an inappropriate environment for a significant increase in vehicular traffic due to the characteristics of the road. As an access route for a Strategic Employment Site, Tannery Lane is fundamentally inappropriate, and as such the findings of the report need to be re-examined with relation to Send Business Centre.

5.08 In light of the changed designations at Send Business Centre, and the increase in housing numbers at Clockbarn Nursery, we would also suggest that the 2016 Strategic Flood Risk Assessment is revisited to include Send Business Centre in order to consider the impact of development on Tannery Lane’s flooding issues. The susceptibility of the area to groundwater flooding was clearly set out in the environmental statement [Volume 8, Water, prepared by Johns Associates.] submitted with the marina application.

5.09 Secondly, as correctly stated in the 2015 ELNA, access to public transport provision at Send Business Centre is very poor. The closest bus stop, which has only hourly bus services to Guildford and Woking, is located in Send village centre and is accessed by a ten-minute walk along the aforementioned Tannery Lane, lacking pedestrian infrastructure, cycle infrastructure, or street lighting. For the 2017 ELNA to refer to this situation as constituting “good” access to public transport does not make logical sense. It represents an unsafe environment for non-car users and, as such, would put increased traffic pressures on Tannery Lane. Send Parish Council calls on the findings of the report related to Send Business Centre to be re-examined.

5.10 Finally, the 2015 ELNA states that there is no potential for intensification and/or additional floor space at the Send Business Centre. This reflects the constrained nature of the site in light of its setting within high sensitivity Green Belt. In the 2017 ELNA, it is stated that there is potential at Send Business Centre for intensification and/or additional floor space. The report does not give an indication as to why this stance has altered in the two years that passed between the 2015 ELNA and the 2017 ELNA, nor how potential intensification and/or additional floorspace would be catered for at the Centre. It does not explain why such growth could not be accommodated in more appropriate locations.

5.11 There are no explanations readily available in the 2017 ELNA which seek to justify why Send Business Centre is proposed to be enlarged and re-classified as a Strategic Employment Site, nor why the classification of its access to public transport and local amenities have been upgraded so significantly when no improvements or alterations have occurred with regard to these matters between 2015 and 2017. Send Parish Council believe that these changes are unfounded in available facts and represent a questionable approach to assessing the Borough’s current and future stock of employment land.

5.12 Policy E1 of the 2017 draft Local Plan includes Send Business Centre within its list of Office (B1a) and Research & Development (B1b) Strategic Employment Sites. No explanations for this change of designation are included in the Local Plan document itself. The Employment Topic Paper, prepared as part of the evidence base for the 2017 draft Local Plan, identifies the 1.4ha Tannery House site adjacent to the Send Business Centre. It states, “Although it [the Tannery House site] remains in high sensitivity Green Belt the unique nature of the site and the existing infrastructure in place means it is considered appropriate for development” [paragraph 4.43 of the Employment Topic Paper]. The TopicPaper goes on to state that significant investment, which has already been secured, will help create an estimated 400 new direct and indirect jobs [paragraph 4.47]. In addition to this in states that “longer term there is potential for significant expansion of 6-7,000sqm on the land adjacent [paragraph 4.49], although it is unclear where this expansion would occur.
5.13 Send Parish Council deem this change of Send Business Centre’s designation and its proposed enlargement wholly inappropriate and unjustifiable. Send Business Centre is located in high sensitivity Green Belt unsuitable for significant development and accessed via infrastructure that is simply unsuitable for supporting the proposed changes at the Centre.

5.14 The Employment Topic Paper states that funding in the Send Business Centre could create an estimated 400 new direct and indirect jobs. Assuming that at the very least 300 of these are direct jobs, this would mean 300 additional employees accessing the Centre. Given the inadequacy of the public transport offer, the likely means of accessing the site is by private car (even if we assume that some employment could be generated locally). The existing car park at the Centre is insufficient for such demand. The single-track Tannery Lane appears unable to deal with such an increase in traffic stress that these movements would bring, without factoring in any additional commercial vehicles visiting the centre. As discussed above, access to local amenities and local public transport provision is similarly inappropriate, with no street lighting provided on Tannery Lane and no pedestrian and cycling infrastructure. Furthermore, the Topic Paper states that there is potential for a significant expansion of 6-7,000sqm of employment space on the land adjacent to the Centre, yet it is unclear whether the jobs created from this floorspace is included within the aforementioned 300+ jobs. If not, then this would mean even greater stress on infrastructure that seems simply unable to cope.

5.15 Changes sought to make the Local Plan sound:

- Remove the proposal to change the designation of Send Business Centre from Locally Significant Employment Site to Strategic Employment Site;
- Remove the proposal to enlarge Send Business Centre by insetting Centre and adjacent land from Green Belt

5.16 The 2014 draft version of the Local Plan included Site Allocation 74, which proposed employment-led mixed-use development on the land around Burnt Common warehouse. This allocation was subsequently removed from the 2016 draft version of the Local Plan, with proposed housing and employment development relocated to the newly created Site Allocation 43 – Garlick’s Arch. This allocation proposed 400 new homes and up to 7,000sqm of commercial (B1c/B2/B8) uses (our emphasis). During the consultation process for the 2016 draft Local Plan, Send Parish made representations against this proposal, which was inappropriate for the site.

5.17 The draft 2017 Local Plan removes the allocation for commercial development from Garlick’s Arch and relocates it back to the land around the Burnt Common warehouse site. Policy E1 includes the land around Burnt Common warehouse within its list of proposed Strategic Employment Sites, while Policy A58 outlines the allocation for the site for a “minimum of 7,000sqm of either or a mix of light industrial (B1c), general industrial (B2), and storage and distribution (B8) with a potential for further industrial floorspace to meet future borough needs” (our emphasis). No residential element is included in this site allocation.

5.18 Send Parish Council does not object to the principal of employment land development on this site. Indeed, in representations made to the draft 2016 version of the Local Plan, Send Parish Council proposed that Guildford Borough Council re-instate the previous allocation for industrial development on Land around Burnt Common Warehouse. However, Policy A58 does not provide an appropriate limit to the scale of industrial development to take place on this site. The previous allocation for employment land at Garlick’s Arch stated that up to 7,000sqm of employment floorspace would be created. No such maximum exists within Policy A58, with at least 7,000sqm of employment land proposed on Land around Burnt Common Warehouse. Send Parish Council deem this approach unacceptable as it opens the door to a significant intensification of employment uses on the site which would not be suitable for the site.

5.19 Proposed changes to make the Local Plan sound:

- Provide an upper limit for the amount of employment floorspace to be created within Policy A58 – Land around Burnt Common warehouse.

Summary of Employment Land Provision within Send

5.20 Send is a village of approximately 2,300 people, while Send Marsh/Burnt Common has a population of approximately 1,900. In the May 2014 Settlement Hierarchy Document prepared by Guildford Borough Council as part of the evidence
base for the 2014 draft Local Plan, Send, Send Marsh/Burnt Common are considered to be large villages. Chapter 4 of this
document recognises that Send Marsh/Burnt Common is only identified as a large village due to its proximity to Send’s
services. Send itself has modest public and commercial amenities, with few additional amenities provided in Send Marsh/
Burnt Common. Both villages have limited access to public transport – served only by hourly bus services which pass
through the villages en route between Woking and Guildford – but have good links to the strategic road network.

5.21 The draft Local Plan proposes the creation of two Strategic Employment Sites in the Send Parish. On Send’s current
designated Employment Sites, there exists 7,800sqm of employment floorspace. The creation of two Strategic Employment
Sites in the Send Parish would increase the employment floorspace within designated employment sites within the Parish to
at least 21,000sqm should only the minimum 7,000sqm be provided at Burnt Common. This figure is likely to rise should
further employment land be developed at Burnt Common.

5.22 While Send Parish Council recognises the importance of developing a strong rural economy, this significant increase
in employment land within the Parish is unsustainable and uncalled for. Send Parish does not have the requisite amenities,
facilities, and infrastructure to support two Strategic Employment Sites within its boundaries.

5.23 Changes sought to make the Local Plan sound:

- Maintain existing designation of Send Business Centre as Locally Significantly Employment Site.
- Provide an upper limit for the amount of employment floorspace to be created within Policy A58 – Land around
  Burnt Common warehouse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Introduction

1.01 Tibbalds Planning and Urban Design is the appointed planning consultant acting on behalf of Send Parish Council.
These representations relate to the June/July 2017 consultation of the Proposed Submission version of the Local Plan:
Strategy and Sites document, which is open for consultation until Monday 24 July 2017. Representations made by the
Parish Council to the Local Plan consultation which took place in 2016 are assumed to remain valid.

1.02 This statement challenges the level of proposed housing provision in the parish, and focuses specifically on draft
housing, employment and transport allocations in Send, Send Marsh and Burnt Common. It sets out objections to the
following issues, designations, and allocations:

- Send Business Centre – inset from the Green Belt;
- Send Business Centre – designation changed from “Locally Significant Employment Site” to “Strategic
  Employment Site”;
- Site A58 – Land around Burnt Common warehouse – “Strategic Employment Site” providing a minimum of
  7,000sqm employment floorspace;
2. Proposed Allocations for Housing Provision

2.01 During the previous consultation in 2016, Send Parish Council set out that it considered the proposed level of housing provision to be unsound due to the number of allocated homes being significantly greater than the identified need. Table 1 of Policy S2 set out the planned delivery of housing between 2018 and 2033. Sufficient allocations were made to deliver 13,652 homes in this period; an average of 910 dwellings per annum (dpa), or 131% of the requirement identified in the SHMA. Paragraph 4.1.12 of the Proposed Submission Local Plan (2016) acknowledged that the number of homes set out in table 1 is greater than the number of homes required by policy S2 and that this is deliberate in order to build in flexibility. This, however, was well beyond the objectively assessed need of 693 dpa or 10,395 dwellings over the course of the plan period.

2.02 Send Parish were concerned that this resulted in the allocation of sites that were not suitable for development.

2.03 The proposed modifications rely on updated information in respect of housing need in the form of an addendum to the West Surrey SHMA. This has resulted in a reduced requirement; the objectively assessed need has fallen to 654 dpa. As a result, the proposed modifications remove some allocations and reduce the capacity of others. Whilst flexibility remains in the sites listed in the Site Allocations section of the plan, this appears to be at a more acceptable level of 9%.

2.04 However, Send parish specifically has not seen any reduction in the demands made upon it to deliver the housing needs of the borough and, in fact, the number of dwellings proposed in the plan has increased. Send parish also sees changes in respect of employment provision, and consequential changes to the green belt. These matters are dealt with in sections 4, 5 and 6 below. Distribution of housing 2.05 Send Parish Council also made comments during the 2016 consultation regarding the distribution of housing with reference to the 2014 Settlement Hierarchy document. There is no further evidence presented in respect of the Settlement Hierarchy in this consultation. Equally, nothing has materially changed in the settlements of Send and Send Marsh / Burnt Common that would warrant an update and, therefore, these comments remain relevant.

Distribution of housing

2.05 Send Parish Council also made comments during the 2016 consultation regarding the distribution of housing with reference to the 2014 Settlement Hierarchy document. There is no further evidence presented in respect of the Settlement Hierarchy in this consultation. Equally, nothing has materially changed in the settlements of Send and Send Marsh / Burnt Common that would warrant an update and, therefore, these comments remain relevant.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
4. Green Belt Boundary

4.01 Send Parish Council object to the following alteration to the Green Belt boundary:
• The insetting of the Send Business Centre and adjacent field from the Green Belt.

The reasons for the objection are set out below.

4.02 The 2014 draft version of the Guildford Local Plan proposed to inset the Send Business Centre from the Green Belt. This proposed insetting of the Business Centre from the Green Belt was included at this time on the basis that it formed a logical extension to the two site allocations located on Tannery Lane. These allocations were as follows:

• Site Allocation 67 – Tannery House and land adjacent to Tannery Lane – B1 employment uses;
• Site Allocation 75 – Land at Tannery Lane, Send (including Clockbarn Nurseries) – C3 uses, 215 homes.

The proposed Site Allocation 67 would have enabled an extension to the adjacent Send Business Centre. During consultation on the 2014 draft Local Plan, Send Parish Council made representations in respect of Allocation 75.

4.03 After consulting on the Local Plan in July 2014, the Council drafted an updated version of the Local Plan. This draft version was submitted for consultation in Summer 2016. In this version of the Guildford Local Plan, the proposal to inset Send Business Centre was removed and the Green Belt washed over the site.

4.04 The Tannery Lane allocation (Site Allocation 67) was removed due to its location within high sensitivity Green Belt. The allocation at Send Business Centre was also removed [see paragraph 4.38 of GBC Topic Paper: Green Belt & Countryside for further details]. In addition to this, residential Site Allocation 75 was also removed from the draft Local Plan, replaced by Site A42. Site A42 allocated 45 homes on the site of Clockbarn Nurseries, a much smaller site than had previously formed Site Allocation 75.

4.05 Despite these reasons for removing the proposal to inset Send Business Centre from the Green Belt, the 2017 draft version of the Guildford Local Plan once again proposes to inset the site from the Green Belt. The area proposed to be inset from the Green Belt is significantly larger than the existing extent of Send Business Centre. In addition to the existing site of Send Business Centre, the area to be inset also includes the Business Centre car park and the adjacent undeveloped site previous proposed in the draft 2014 Local Plan as employment land Site Allocation 67.

4.06 Send Parish Council feel that the proposed insetting of Send Business Centre from the Green Belt is unjustified. Firstly, it is unreasonable to expect that the high sensitivity of the Green Belt in this location has altered since the Tannery House site allocation was removed from the 2016 draft local plan for this very reason. In addition to this, the River Wey Navigation Corridor, which sits adjacent to the Business Centre, is designated as a Conservation Area. The openness of this conservation area, and the setting of the River Wey within the Green Belt is an important feature of this high sensitivity Green Belt. Nothing has changed in the last year to the nature of either the Green Belt or the River Wey Navigation, thus it is not immediately clear why Guildford Borough Council have overlooked the ‘high sensitivity’ Green Belt designation in order to inset Send Business Centre and the adjoining land from the Green Belt.

4.07 Secondly, the Green Belt and Countryside Topic paper published as part of the evidence base for 2017 draft version of Guildford Local Plan states that the “unique nature of [Send Business Centre] and the existing infrastructure in place means it is considered appropriate for development”.

4.08 However, Send Business Centre is a small collection of buildings which enjoys a rural setting alongside the River Wey. It has consistently been regarded as contributing to the openness of the green belt by virtue of the designation washing over it. The existing infrastructure in place at Send Business Centre represents that typical of a Green Belt setting, namely single track roads with passing places and no pedestrian or cycling infrastructure. This does not constitute infrastructure ready to support an area inset from the Green Belt that, following removal from the Green Belt designation, will not be subject to the same restrictions as are currently in place.

4.09 No evidence is provided in the literature accompanying the 2017 draft local plan that justifies removing the Send Business Centre and adjacent land from its Green Belt designation. The Parish Council considers removing this area from the Green Belt an unsustainable precedent and could pave the way for significant inappropriate development in a rural area of high sensitivity Green Belt.
4.10 The proposed insetting of Send Business Centre and adjacent land is directly linked to the proposed change of designation of the Business Centre from “Locally Significant Employment Site” to “Strategic Employment Site”. Send Parish Council’s representations regarding this change of designation are laid out in Section 5.

4.11 Changes sought to make the Local Plan sound

• Remove proposals to inset Send Business Centre and adjacent land from the Green Belt. Restore the green belt wash over Send Business Centre.

8. Summary of Proposed Changes and Conclusions

8.01 In summary, Send Parish consider the following changes to be necessary to make the Proposed Submission Local Plan sound:

• Remove proposals to inset Send Business Centre and adjacent land from the Green Belt.
• Remove the proposal to change the designation of Send Business Centre from Locally Significant Employment Site to Strategic Employment Site;
• Remove the proposal to enlarge Send Business Centre by insetting Centre and adjacent land from Green Belt.
• Provide an upper limit for the amount of employment floorspace to be created within Policy A58 – Land around Burnt Common warehouse.
• Maintain existing designation of Send Business Centre as Locally Significantly Employment Site.
• Remove Allocation A42.
• Reconsider the suitability of the Garlick’s Arch site for travelling showpeople given the site allocates a number of homes that is below the policy threshold.

8.02 Send Parish Council are pleased to have the opportunity to respond to the draft Local Plan and request that they are informed of any future consultation events.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

4.11 Changes sought to make the Local Plan sound

• Remove proposals to inset Send Business Centre and adjacent land from the Green Belt.

8. Summary of Proposed Changes and Conclusions

8.01 In summary, Send Parish consider the following changes to be necessary to make the Proposed Submission Local Plan sound:

Remove proposals to inset Send Business Centre and adjacent land from the Green Belt.
Remove the proposal to change the designation of Send Business Centre from Locally Significant Employment Site to Strategic Employment Site;
Remove the proposal to enlarge Send Business Centre by insetting Centre and adjacent land from Green Belt.
Provide an upper limit for the amount of employment floorspace to be created within Policy A58 – Land around Burnt Common warehouse.
Maintain existing designation of Send Business Centre as Locally Significantly Employment Site.
Remove Allocation A42.
Reconsider the suitability of the Garlick’s Arch site for travelling showpeople given the site allocates a number of homes that is below the policy threshold.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICIES I1, I2 & I3

These three policies cover Infrastructure & Delivery, Supporting the Department of Transport’s ‘Road Investment Strategy’ and Sustainable Transport for new developments. Whilst WHPC supports the general policy statements as presented in each case, it is the detailed infrastructure proposals for Guildford Borough or lack of for the Horsleys, which are the real issue.

WHPC believes there are serious deficiencies and shortcomings in the infrastructure of Guildford Borough as it is today. The aggressive house building policy advanced by GBC in the Proposed Submission Draft Local Plan will substantially exacerbate many, if not all, problem areas.

WHPC puts forward the following specific comments regarding infrastructure in West Horsley today:

• Thames Water has sent very clear advice in 2014 to stating that their current facilities, i.e. pipelines to the Ripley North Treatment Works and the Treatment Works, are unlikely to have the capacity to cope with one or possibly all the developments proposed for West and East Horsley. A 2 to 3 year lead-in period Thames Water say will be necessary to expand capacity following the granting of planning permission for a development Site.
• Roads across the parish are in poor condition with many potholes. Many roads are unable to sustain their current levels of traffic, particularly the increasing levels of HGV traffic along the B2039.
• Principal through roads traversing West Horsley are narrow and winding, have a series of pinch points, have sections without any pavements and are generally unlit. As a senior SCC councillor remarked at a recent public meeting in the village hall: “West Horsley has lanes, not roads.” West Horsley’s ‘lanes’ are totally unsuitable for high volumes of traffic.
• Many of the drains are blocked or otherwise in extremely poor condition, giving rise to frequent surface water flooding when it rains. The southern edge of the Horsleys Area lies on the ‘spring line’ at the foot of the North Downs and is recognised in the GBC Infrastructure Delivery document as a Surface Water Flooding Hot Spot, viz:

Surface Water Flooding Hot Spots Map â€“ Horsleys (extracted from GBC Infrastructure Delivery document page 22)

• The pavements are in poor condition. As well as being narrow, they are often uneven and/or cracked making it difficult, for example, for people with pushchairs or prams or disabled persons in wheelchairs.
• There are insufficient school spaces for the number of local children needing them, with the result that children are allocated to schools a significant distance away such as Dorking or Woking
• The Medical Centre in East Horsley is already at capacity in terms of its number of patients.

It is recognised that, as stated in the Proposed Submission Local Plan, the maintenance of adequate infrastructure and its expansion to meet growing needs is the responsibility of the relevant infrastructure provider. This is often not GBC itself but rather, for example, Surrey County Council or utility companies.

In respect of West Horsley, there are only four proposals mentioned in Appendix C:

LRN 22 - East Horsley and West Horsley traffic management and environmental improvement scheme. It is not clear what is proposed here, and its timing and funding have to be considered uncertain. It is stated that funding will, at least in part, come from developer contribution. However, it is not at all clear what development is likely to give rise to such a contribution, but it certainly implies that funding could only come if there were a development; and
HSC 5 - Expansion of East Horsley Medical Centre to provide additional capacity and services for future population in years 5 – 15 of the plan.

SANG 8 – Strategic Alternative Natural Green Space, Long Reach Farm, West Horsley. Years 1-5. Delivered by Landowner at cost of £7,573,822 from Developer contributions. NOTE: Long Reach Farm does not appear on any map. WHPC Comment: SANG 8 would result, if granted permission, in the loss of open agricultural land in the Metropolitan Green Belt. The land contributes greatly to the openness of the Green Belt.

SANG 9 – Bespoke Strategic Alternative Natural Green Space, Ben’s Wood, West Horsley. Years 1-5. Delivery by Developer with Developer contributions.

There are no proposals in respect of all the existing problems with for example drainage, roads, pavements and schools.

Furthermore, it is inevitable that the proposed developments in West Horsley itself and nearby, in East Horsley and the proposals for Wisley, will put enormous strain on the existing infrastructure. There are no proposals at all to cater for this.

Although an expansion of the Medical centre is proposed in the Infrastructure Schedule, this is not until years 5 – 15 of the Plan. Given that it is already at capacity, WHPC submits this needs to be done much earlier.

Local primary schooling is also a very pertinent issue. There are 11 housing development sites identified in the LAA for West and East Horsley which, if taken together, would result in the building of 593 new houses in the two parishes that today are served by a single primary school - The Raleigh, in West Horsley. Planning guidance suggests that this number of new homes will require the provision of around 150 additional primary school places to accommodate such an increase in population. Today there is no spare capacity at The Raleigh, yet no proposals are made in the Proposed Submission Draft Local Plan to provide for any more school places in the Horsleys.

WHPC submits that the failure to address the inadequacies of the existing infrastructure, never mind GBC’s proposed growth in housing, is a serious deficiency in the Proposed Submission Draft Local Plan. The Plan is therefore UNSOUND.

WHPC OBJECTS to the lack of detailed infrastructure proposals to not only cater for development in West and East Horsley but also throughout the Borough. As drafted the proposals do not meet the stated objective of providing infrastructure to support the proposed developments.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents: WHPC Draft Local Plan response July 2016.pdf (2.2 MB)
2. the extension of current village Settlement Areas to encompass Sites A37, A38, A39, A40 and A41 and additional areas of land for which no ‘exceptional circumstances’ are advanced to justify their being removed from the Green Belt;

3. the scale and density of new housing proposed on the 4 parish based development Sites and Site A 39 adjacent to the parish boundary with East Horsley Parish;

4. the Objectively Assessed Number (OAN) proposed by the West Surrey SHMA of 693 new homes per annum (13,860 total for the Plan Period) which represents a 25% increase in the housing stock of the Borough. [NOTE: An independent Review of the OAN in the West Surrey SHMA by N McDonald (Appendix 1) concludes that there are significant errors in the West Surrey SHMA adopted by Guildford Borough, without scrutiny, and the OAN should be 510 homes per annum not 693]. Another review of the West Surrey SHMA prepared by Guildford Borough Clandon & Horsley Ward Councillor David Reeve, totally independently of the Neil McDonald Review, found similar errors to those reported on by Mr McDonald;

5. West Horsley’s proposed share of Guildford’s growth which equates to a 35% increase on the current housing stock of 1120 homes. Such proposed growth for the village is grossly disproportionate and unsustainable;

6. the total absence of detailed and deliverable infrastructure proposals to support the proposed local developments. The existing infrastructure is overloaded and insufficient for the needs of today’s village population, let alone the proposed developments set out in the Local Plan. Thames Water in particular has indicated a lack of capacity to absorb just one, never mind all, of the housing developments proposed for West and East Horsley.

Like many of the Borough’s rural villages, WHPC has noted in Policy P2 the opening sentence, “We will continue to protect the Metropolitan Green Belt ... against inappropriate development”. The Parish Council and the village it represents, fully support this policy. Regrettably however the proposed delivery of some 65% of the OAN unconstrained housing need on Green Belt land, coupled with the proposed insetting of villages from the Green Belt, flagrantly ignores this most important part of the Policy. No Exceptional Circumstances are advanced for ignoring the requirements of the National Planning Policy Framework (NPPF) by the Borough to justify the removal of current Green Belt land to meet GBC’s questionable growth targets.

Part 2 of this Submission is A Planning Assessment Report on Sites A37, A38, A40 and A41 in West Horsley and Site A39 adjacent to the boundary with West Horsley, prepared by ADN Planning Ltd, the Parish Council’s appointed consultant. The Conclusions at Para 4.9 state:

In conclusion, all of the Sites allocated for development within West Horsley have been singularly and cumulatively, found to be inappropriate for development. The basis of the Settlement Hierarchy, in which West Horsley has been placed, has to be seriously questioned, and the adverse impact of each site upon the village on an economic, social and environmental scale, as demonstrated in this statement, provides a compelling case demonstrating that they would not deliver sustainable forms of development, nor would their inclusion be justified as exceptional circumstances for them to be removed from the Green Belt. It is therefore recommended that Guildford Borough Council remove all five sites from their Local Plan and re-assess their proposals to extend the Green Belt boundary within the village as potential future sites for future residential development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:  

- WHPC Draft Local Plan response July 2016.pdf (2.2 MB)  
- GRA Report FINAL.pdf (1.6 MB)
Guildford Open Space, Sport and Recreation Assessment 2016 – 2033

General Comments:
Informative, clear aims and objectives.
Will help inform West Horsley’s emerging Neighbourhood Plan.
It is right to reference the old Planning Policy Guidance (PPG 17), as there is no clear replacement for this.
Methodology clear and well referenced – a transparent document.
How will you monitor the implementation of the policies? Is this going to be the remit of Parish Council’s or will this be the planning officers at GBC?
This is especially important as each Ward has been identified as having some form of typology deficiency which will be exacerbated should the scale of development proposed in the new draft Local Plan go ahead.

2.0 Methodology
The report states that it is based on a thorough understanding of local needs as detailed in the Community and Stakeholder Consultation.
However, I would query how representative the local need data is. If Guildford Borough has a population of 141,009 (mid ONS figures), then why was the online survey only sent to 3000 households as this is just over 2% of the Guildford population and is probably therefore too small a sample to produce justifiable evidence?
It transpires that only 411 surveys were actually completed by residents. Although it is mentioned that the survey was sent on a random basis, it would be helpful to see the results broken down by Ward, to ensure fair representation of the people who actually use the facilities, as well as a cross section of age and frequency of use.

3.0 Strategic Context
There are many references to the EU, especially when it comes to protecting Biodiversity, and adherence to many EU policies.
How will this be affected now that we are no longer a member of the EU?
Biodiversity 2020: A Strategy for England’s wildlife and Ecosystem services – how will the measures that are put in place be monitored? This is of particular concern as there is reliance on developers to deliver specific targets within their planning applications that protect our wildlife and green spaces. How will this be enforced?

3.3. Local Context – reference to the new Local Plan.
It is stated that a Local Plan Development Management Document will be produced to support the new Local Plan, if adopted. What would be the non-strategic, development management policies that are mentioned? Will you be working with Parish Councils and Neighbourhood Planning teams to identify these?

4.0 Local Needs Assessment
It is noted, and encouraging that the themes of need are consistent between GBC and Parish Councils regarding provision and deficit of Open Spaces.

5.0 Audit of Existing Open Space Assets
I note that there is no inclusion of Local Green Spaces. My understanding from our conversation is that this has not been included because LGS is a planning designation, and that LGSs will be designated through Development Management Policies which are to follow at some point.

6.0 The Development of Standards

6.2 Allotments

Although I don’t have figures to back this up, I feel that I must point out that West Horsley would be different in this area because of our thriving Grace and Flavour Community Gardens and Allotments. I believe this is reflected in the detailed analysis of need and deficit there we clearly do not have a deficit.

6.3 Amenity Green Space

Why have GBC reduced the Fields in Trust recommended standard of 0.6ha/1000 population of amenity space, to 0.4 hectares per 1000? I can see that the average current level of provision exceeds the recommendation, but that will not be consistent across the Borough.

We need to ensure that it does not become less, especially with the scale of development proposed for West Horsley and the East of the Borough in general, where these figures would be far from correct should the new draft Local Plan be adopted.

FIT do recommend that local circumstances are considered, but what are the circumstances that necessitate a reduction for Guildford Borough? Is this simply based on the fact that we have more of what we need already? But then how do we protect what we have, and ensure that there is more consistency of provision across the Borough? Food for thought…

The design requirements are good – how will they be enforced with developers? This applies to all typologies.

7.0 Applying Local Standards

It is recognised in the study that there is an under supply of the majority of typologies across the majority or Wards.

This is based on the ONS data for 2011. What will the picture look like for the East of the Borough in particular in five, ten, and fifteen years’ time, should the housing development recommended in the new draft Local Plan be accepted?

I do not see any reference to this, but believe that if there is already an under supply across the Borough, then this will become much greater with another 13,860 homes delivered by 2033. Surely these projections need to be factored into this report?

Although it states that Natural green Space is in sufficient supply across all wards, again what will this picture look like if you factor in all the development proposed?

8.0 Strategic Options, Policy and Management recommendations

It is noted that the issues are highlighted within this section, but not how they would be addressed going forward.

The Open Space Policy recommendations for the four key areas (protecting open space, enhancing open space, re-locating/re-designing open space, and new provision of open space) are detailed within the document and I would be interested to know when and how these proposed policies are likely to be adopted. There is no time frame within the document that I have found to confirm the next stages, and these would be helpful.

It would be interesting to note planned future engagement with Neighbourhood Planning teams across the Parishes, as this could be key to delivering the policies proposed.

Finally, although I pointed this out when we met, I do need to check that the maps in the Assessment of sites for Amenity Value produced by ethos have been corrected, as follows:
Page 47 – the land identified is in West Horsley, not East Horsley as written on the map.

This also applies to page 48 Weston Lea, also in West Horsley, not East, pages 53/55/56 Waterloo Farm, again in West Horsley, not East, and page 54 Manor Farm in West Horsley, not East.

I am sure the misnaming is a genuine mistake, and not reflective of GBC’s possible future vision to merge the two villages through the new draft Local Plan!

I hope that these comments are helpful, and I will await to see what happens next in terms of policy adoption. If there is further consultation planned, and the opportunity for Neighbourhood Plan Groups to be involved, then I hope you will add West Horsley to your consultation group.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
WHPC OBJECTS to the Proposed Submission Draft Local Plan: strategies and sites June 2016

West Horsley Parish Council (WHPC) has reviewed the Proposed Submission Draft Local Plan: strategies and sites, published by Guildford Borough Council (GBC) for a 6 weeks public consultation to 18th July.

WHPC requests that the objections and comments contained in this Submission are put to the Inspector appointed by the Secretary of State to review the Guildford Borough Submission Draft Local Plan: strategies and sites following this Regulation 19 Consultation. The Parish Council will appoint and retain a representative to speak on its behalf at the Examination in Public on the following issues:

1. Proposals for new Green Belt boundaries and the ‘insetting’ of villages from the Green Belt.
2. The use of an unconstrained OAN figure of 693 homes per annum throughout the Plan Period
3. The unsustainable characteristics of proposed development sites A37, A38, A39, A40 and A41.
4. The unsoundness of the Local Plan.

Part 1 of this Report sets out the Parish Council’s comments and objections to the proposed Policies.

Part 2 presents the Planning Assessment Relating to Sites A37, A38, A39, A40 and A41 prepared by the Parish Council’s planning consultant ADN Planning Ltd. WHPC endorses the Planning assessment conclusion that all five sites should be removed from the Draft Local Plan. The proposals to bring in new Green Belt boundaries within the village must be withdrawn as no ‘Exceptional or very special circumstances’ have been presented by the Borough to justify their removal from the Green Belt.

The Appendix section includes 3 other documents referred to within this Submission.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:  WHPC Draft Local Plan response July 2016.pdf (2.2 MB)
In brief: Development sites A37 to A41 have been determined unsustainable. Thus there is no justification for the proposed new boundaries of which many are not defensible.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

SITES POLICIES (referenced A1 to A67)

The proposed West Horsley development sites A37 to A41 are reviewed in Part 2: Planning Assessment Relating to Sites A37, A38, A39, A40 and A41 prepared by ADN Planning Ltd, the Parish Council’s appointed consultant.

CONCLUSIONS

West Horsley is a rural village with some 1120 homes and just under 3,000 residents, whose Parish Council and residents do not share the same vision for the future of the Borough, as put forward in the Draft Local Plan by Guildford Council.

GBC’s desire to pursue a ‘Forced Growth’ policy results in highly aggressive, poorly justified and questionable targets being set for economic growth and housing development in the Borough. The excessive targets – particularly the proposed 25% increase in housing stock – will add to the current heavy strain on overloaded infrastructure in the already over-stretched county of Surrey.

Guildford is a constrained borough by the reality of having 89% of its land classified as permanent Green Belt and an out-of-date road network already suffering over capacity at peak times.

The Proposed Submission Draft Local Plan, if approved, particularly in respect of the excessive housing growth proposed (more than any other Surrey Borough by a considerable margin) will have a permanently damaging impact on the Metropolitan Green Belt across the Borough, particularly on the eastern side where West and East Horsley are located. The test of “exceptional circumstances” that might justify allocating Green Belt land, thereby creating new Green Belt boundaries, for development in a Local Plan has not been rigorously and transparently applied at a strategic level. In reviewing the proposals to put forward new Green Belt boundaries and locate new development on unsustainable sites, it appears to this Parish Council, Guildford Borough decided, at some point, not to be guided by and observe the National Planning Policy Framework. Local Plan Policy P2 which starts with, “We will continue to protect the Metropolitan Green Belt... against inappropriate development” does not fool any of the parishes in the Borough.

Additionally the Sustainability Appraisal does not seem to fit with the concept of Sustainable Development as written in the National Planning Policy Framework, to the extent that it is questioned whether it complies with those requirements.

WHPC submits that it is quite achievable for realistically prepared and identified development needs to be accommodated in Guildford’s urban areas and villages. The NPPF Plan Making - Local Plans paras 150 to 157, sets out clear advice on objectives and procedures a Local Authority should adopt. WHPC was not asked by Guildford Borough to take part in “Early and meaningful engagement and collaboration with neighbourhoods, local organisations... is essential” (NPPF 155).
WHPC believes no parish council was invited to engage in early essential collaboration - a serious flaw for a Borough with 23 Parish Councils.

West Horsley totally rejects the housing proposals to add 385 more dwellings to the village housing stock (a grossly disproportionate 35% growth) on unsustainable sites in the first 5 years of the Plan Period.

WHPC is concerned that GBC have, without proper scrutiny, adopted an inflated OAN of 13,860 homes as a housing target for the Plan Period without any application of constraints as required by the National Planning Policy Framework and National Planning Policy Guidance. The Parish Council subscribed, with other parish and residents organisations, to funding A Review of the West Surrey SHMA as it relates to the Objectively Assessed Housing Needs of Guildford", June 2016 prepared by Neil McDonald. This Review, included in Appendix 1, found significant errors in the OAN West Surrey SHMA, the effect of which, if accepted as correct, would lower the OAN to 510 homes per year from the 693 homes per year adopted, without constraint, by Guildford Borough. The findings of Neil McDonald’s thorough and substantive Review, if correct, mean the Proposed Submission Draft Local Plan 2016 is UNSOUND.

West Horsley Parish Council on behalf of all its residents calls upon Guildford Borough Council to:

1. have the West Surrey SHMA completely checked either by a joint working party comprising Neil McDonald (for parishes and residents groups), 4 Borough Councillors (one from each political group), under the chairmanship of a retired judge or similar independent professional or by an appointed independent expert who is accepted by all the interested parties.
2. review and re-assess its growth and housing policy objectives rather than force through the Council a Local Plan which unequivocally does not have the support of the majority of residents in Guildford Borough.
3. remove all five West Horsley Sites A37 to A41 from the Proposed Submission Draft Local Plan and re-assess proposals to create new Green Belt boundaries, the effect of which would remove the village from being ‘washed over’ by the Metropolitan Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

### E1 – Meeting employment needs

**Report page:** 15

**WHPC view:** Supports

**In brief:** Proposed new office and industrial land area are located on western side of Borough, remote from West Horsley

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Policy E1: Sustainable employment**

WHPC supports the general policy statements made in this policy. However sustainability is not served by the location of the new office space and industrial land area proposed being on the opposite side of the Borough to West Horsley, giving rise to more to / from work car journeys for residents of the proposed new housing developments in the village. This does not fit with sustainable development as set out in NPPF para 7.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** PSLPP16/17438  **Respondent:** 8563201 / West Horsley Parish Council (Sam Pinder)  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY E2: Location for new employment floorspace**

Under this policy, areas within 500 metres of a "public transport interchange" play a key role.

Proposals for new office and research and development floor-space are to be directed to firstly Guildford town centre and then to areas within 500 metres of a public transport interchange (PTI).

East Horsley has two railway stations, Horsley Station and Effingham Junction Station, but currently the Draft Local Plan only proposes that Horsley Station should have PTI status.

WHPC is neutral on this Policy but notes that East Horsley Parish Council has submitted detailed comments on this policy.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY E6: The leisure and visitor experience**

West Horsley is a rural and historic village with over 40 Listed Buildings. The village is located between the railway stations of Horsley to the east and West Clandon to the west.

West Horsley is a jewel and gateway for the many visitors to the Surrey Hills Area of Outstanding Natural Beauty, through its network of footpaths, bridleways and lanes leading to the upland areas in the south of the Parish, where The Sheepleas (an SSSI) and Woodcote hamlet, once frequently visited by Beatrix Potter, are located.

The southern part of the village has two well-used historic inns, which host walking and cycling groups plus occasional classic car and motorcycle rallies.

Following Guildford Boroughâ€™s approval in Spring 2016, West Horsley Place (Grade 1 Listed) and its magnificent estate is to be home to a prestigious Opera House development (lauded by the Head of Surrey County Council); it is even more desirable to preserve the rural character of the village and maintain its openness in the Green Belt.

E8 - District and Local Centres

Report page: 16

WHPC view: Neutral with comment

In brief: The 2 Horsley Centres have no room for expansion and are already overloaded in terms of parking cars

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
**POLICY E8: District centres and POLICY E9: Local centres**

WHPC notes EHPC supports these 2 policies, which include the designation of Station Parade, East Horsley, as a District Centre and the designation of Bishopsmead Parade, East Horsley as a rural Centre under the draft Local Plan. It is observed that there is virtually no room for expansion of the mix of retail units, post offices / newsagents, estate agency, charity shops, restaurants and café facilities at each location. Parking of cars becomes more and more difficult each week and is likely to become near impossible if even a proportion of the proposed housing is built.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY H1: Homes for all**

WHPC supports the general policy statements made in this policy, which mainly repeat NPPF polices. Our primary concerns, as set out above, are with the scale of new housing being proposed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
H2 – Affordable Homes

Report page: 9

WHPC view: Objects

In brief: Fails the test of sustainability and should be radically revised.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICY H2: Affordable Homes

WHPC Objects to Policy H2

WHPC supports the general principle that developers should be required to contribute part of their development profit towards the cost of social housing in the borough. However, this ‘one-size-fits-all’ policy is seriously flawed and likely to prove highly inefficient, if not unworkable, in the longer term. Readers of this submission should note that the average 2016 market price for a 3 bedroom semi-detached house in West Horsley is £581,031 well above the average price of £432,580 for a semi-detached house price in Guildford. The 2016 average price for flats in Guildford is £282,070.

In this policy GBC sets out no strategy to recognise and deal with the differences in affordable housing need and price across the borough. In West Horsley, there is some demand for affordable housing but other factors, e.g. transport to
workplace considerations, lack of transport and shopping facilities, are key influencers for persons on low incomes. A Summary of the West Horsley Housing Needs Survey May 2014 is included in Appendix 2.

Under Policy H2, 40% of all but the smallest development sites in West Horsley will be required to have affordable housing built upon them, irrespective of whether there is actually demand for more affordable housing in the parish. Moreover, the affordable housing targets proposed in the Proposed Submission Local Plan indicate that the biggest component of affordable housing (40%) should be built as 1-bed dwellings despite the fact that GBC’s own studies show that the strongest affordable demand in the borough is actually for 2 to 3 bed dwellings.

As a result of this flawed affordable housing policy, a significant volume of social housing is likely to be built in places where it is not needed and offered to tenants who do not want to live there, nor have jobs near that location.

Policy H2 thereby fails the test of sustainability and should be radically revised. If not, the outcome will be serious inefficiency in the provision of social housing in the borough.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICIES I1, I2 & I3

These three policies cover Infrastructure & Delivery, Supporting the Department of Transport’s ‘Road Investment Strategy’ and Sustainable Transport for new developments. Whilst WHPC supports the general policy statements as presented in each case, it is the detailed infrastructure proposals for Guildford Borough or lack of for the Horsleys, which are the real issue.
WHPC believes there are serious deficiencies and shortcomings in the infrastructure of Guildford Borough as it is today. The aggressive house building policy advanced by GBC in the Proposed Submission Draft Local Plan will substantially exacerbate many, if not all, problem areas.

WHPC puts forward the following specific comments regarding infrastructure in West Horsley today:

- Thames Water has sent very clear advice in 2014 to stating that their current facilities, i.e. pipelines to the Ripley North Treatment Works and the Treatment Works, are unlikely to have the capacity to cope with one or possibly all the developments proposed for West and East Horsley. A 2 to 3 year lead-in period Thames Water say will be necessary to expand capacity following the granting of planning permission for a development Site.
- Roads across the parish are in poor condition with many potholes. Many roads are unable to sustain their current levels of traffic, particularly the increasing levels of HGV traffic along the B2039.
- Principal through roads traversing West Horsley are narrow and winding, have a series of pinch points, have sections without any pavements and are generally unlit. As a senior SCC councillor remarked at a recent public meeting in the village hall: “West Horsley has lanes, not roads.” West Horsley’s ‘lanes’ are totally unsuitable for high volumes of traffic.
- Many of the drains are blocked or otherwise in extremely poor condition, giving rise to frequent surface water flooding when it rains. The southern edge of the Horsleys Area lies on the ‘spring line’ at the foot of the North Downs and is recognised in the GBC Infrastructure Delivery document as a Surface Water Flooding Hot Spot, viz:

  Surface Water Flooding Hot Spots Map â€“ Horsleys (extracted from GBC Infrastructure Delivery document page 22)

  - The pavements are in poor condition. As well as being narrow, they are often uneven and/or cracked making it difficult, for example, for people with pushchairs or prams or disabled persons in wheelchairs.
  - There are insufficient school spaces for the number of local children needing them, with the result that children are allocated to schools a significant distance away such as Dorking or Woking.
  - The Medical Centre in East Horsley is already at capacity in terms of its number of patients.

It is recognised that, as stated in the Proposed Submission Local Plan, the maintenance of adequate infrastructure and its expansion to meet growing needs is the responsibility of the relevant infrastructure provider. This is often not GBC itself but rather, for example, Surrey County Council or utility companies.

In respect of West Horsley, there are only four proposals mentioned in Appendix C:

LRN 22 - East Horsley and West Horsley traffic management and environmental improvement scheme. It is not clear what is proposed here, and its timing and funding have to be considered uncertain. It is stated that funding will, at least in part, come from developer contribution. However, it is not at all clear what development is likely to give rise to such a contribution, but it certainly implies that funding could only come if there were a development; and

HSC 5 - Expansion of East Horsley Medical Centre to provide additional capacity and services for future population in years 5 – 15 of the plan.

SANG 8 – Strategic Alternative Natural Green Space, Long Reach Farm, West Horsley. Years 1-5. Delivered by Landowner at cost of £7,573,822 from Developer contributions. NOTE: Long Reach Farm does not appear on any map. WHPC Comment: SANG 8 would result, if granted permission, in the loss of open agricultural land in the Metropolitan Green Belt. The land contributes greatly to the openness of the Green Belt.

SANG 9 – Bespoke Strategic Alternative Natural Green Space, Ben’s Wood, West Horsley. Years 1-5. Delivery by Developer with Developer contributions.

There are no proposals in respect of all the existing problems with for example drainage, roads, pavements and schools.

Furthermore, it is inevitable that the proposed developments in West Horsley itself and nearby, in East Horsley and the proposals for Wisley, will put enormous strain on the existing infrastructure. There are no proposals at all to cater for this.
Although an expansion of the Medical centre is proposed in the Infrastructure Schedule, this is not until years 5 – 15 of the Plan. Given that it is already at capacity, WHPC submits this needs to be done much earlier.

Local primary schooling is also a very pertinent issue. There are 11 housing development sites identified in the LAA for West and East Horsley which, if taken together, would result in the building of 593 new houses in the two parishes that today are served by a single primary school - The Raleigh, in West Horsley. Planning guidance suggests that this number of new homes will require the provision of around 150 additional primary school places to accommodate such an increase in population. Today there is no spare capacity at The Raleigh, yet no proposals are made in the Proposed Submission Draft Local Plan to provide for any more school places in the Horsleys.

WHPC submits that the failure to address the inadequacies of the existing infrastructure, never mind GBC’s proposed growth in housing, is a serious deficiency in the Proposed Submission Draft Local Plan. The Plan is therefore UNSOUND.

WHPC OBJECTS to the lack of detailed infrastructure proposals to not only cater for development in West and East Horsley but also throughout the Borough. As drafted the proposals do not meet the stated objective of providing infrastructure to support the proposed developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICIES I1, I2 & I3

These three policies cover Infrastructure & Delivery, Supporting the Department of Transport’s ‘Road Investment Strategy’ and Sustainable Transport for new developments. Whilst WHPC supports the general policy statements as presented in each case, it is the detailed infrastructure proposals for Guildford Borough or lack of for the Horsleys, which are the real issue.

WHPC believes there are serious deficiencies and shortcomings in the infrastructure of Guildford Borough as it is today. The aggressive house building policy advanced by GBC in the Proposed Submission Draft Local Plan will substantially exacerbate many, if not all, problem areas.

WHPC puts forward the following specific comments regarding infrastructure in West Horsley today:

- Thames Water has sent very clear advice in 2014 to stating that their current facilities, i.e. pipelines to the Ripley North Treatment Works and the Treatment Works, are unlikely to have the capacity to cope with one or possibly all the developments proposed for West and East Horsley. A 2 to 3 year lead-in period Thames Water say will be necessary to expand capacity following the granting of planning permission for a development Site.
- Roads across the parish are in poor condition with many potholes. Many roads are unable to sustain their current levels of traffic, particularly the increasing levels of HGV traffic along the B2039.
- Principal through roads traversing West Horsley are narrow and winding, have a series of pinch points, have sections without any pavements and are generally unlit. As a senior SCC councillor remarked at a recent public
meeting in the village hall: “West Horsley has lanes, not roads.” West Horsley’s ‘lanes’ are totally unsuitable for high volumes of traffic.

- Many of the drains are blocked or otherwise in extremely poor condition, giving rise to frequent surface water flooding when it rains. The southern edge of the Horsleys Area lies on the ‘spring line’ at the foot of the North Downs and is recognised in the GBC Infrastructure Delivery document as a Surface Water Flooding Hot Spot, viz:

  Surface Water Flooding Hot Spots Map â€“ Horsleys (extracted from GBC Infrastructure Delivery document page 22)
  - The pavements are in poor condition. As well as being narrow, they are often uneven and/or cracked making it difficult, for example, for people with pushchairs or prams or disabled persons in wheelchairs.
  - There are insufficient school spaces for the number of local children needing them, with the result that children are allocated to schools a significant distance away such as Dorking or Woking
  - The Medical Centre in East Horsley is already at capacity in terms of its number of patients.

It is recognised that, as stated in the Proposed Submission Local Plan, the maintenance of adequate infrastructure and its expansion to meet growing needs is the responsibility of the relevant infrastructure provider. This is often not GBC itself but rather, for example, Surrey County Council or utility companies.

In respect of West Horsley, there are only four proposals mentioned in Appendix C:

- LRN 22 - East Horsley and West Horsley traffic management and environmental improvement scheme. It is not clear what is proposed here, and its timing and funding have to be considered uncertain. It is stated that funding will, at least in part, come from developer contribution. However, it is not at all clear what development is likely to give rise to such a contribution, but it certainly implies that funding could only come if there were a development; and

- HSC 5 - Expansion of East Horsley Medical Centre to provide additional capacity and services for future population in years 5 – 15 of the plan.

- SANG 8 – Strategic Alternative Natural Green Space, Long Reach Farm, West Horsley. Years 1-5. Delivered by Landowner at cost of £7,573,822 from Developer contributions. NOTE: Long Reach Farm does not appear on any map. WHPC Comment: SANG 8 would result, if granted permission, in the loss of open agricultural land in the Metropolitan Green Belt. The land contributes greatly to the openness of the Green Belt.

- SANG 9 – Bespoke Strategic Alternative Natural Green Space, Ben’s Wood, West Horsley. Years 1-5. Delivery by Developer with Developer contributions.

There are no proposals in respect of all the existing problems with for example drainage, roads, pavements and schools.

Furthermore, it is inevitable that the proposed developments in West Horsley itself and nearby, in East Horsley and the proposals for Wisley, will put enormous strain on the existing infrastructure. There are no proposals at all to cater for this.

Although an expansion of the Medical centre is proposed in the Infrastructure Schedule, this is not until years 5 – 15 of the Plan. Given that it is already at capacity, WHPC submits this needs to be done much earlier.

Local primary schooling is also a very pertinent issue. There are 11 housing development sites identified in the LAA for West and East Horsley which, if taken together, would result in the building of 593 new houses in the two parishes that today are served by a single primary school - The Raleigh, in West Horsley. Planning guidance suggests that this number of new homes will require the provision of around 150 additional primary school places to accommodate such an increase in population. Today there is no spare capacity at The Raleigh, yet no proposals are made in the Proposed Submission Draft Local Plan to provide for any more school places in the Horsleys.

WHPC submits that the failure to address the inadequacies of the existing infrastructure, never mind GBC’s proposed growth in housing, is a serious deficiency in the Proposed Submission Draft Local Plan. The Plan is therefore UNSOUND.
WHPC OBJECTS to the lack of detailed infrastructure proposals to not only cater for development in West and East Horsley but also throughout the Borough. As drafted the proposals do not meet the stated objective of providing infrastructure to support the proposed developments.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

POLICY P2: Green Belt

Policy P2 states that: We will continue to protect the Metropolitan Green Belt … against inappropriate development”

WHPC only supports this opening statement.

Regrettably, despite such forthright words, GBC appears to be in breach of this policy itself, through the housing policies set down in the Draft Local Plan. Analysis of the breakdown included under Sites (p122), reveals that around 65% of the developments, some 8,202 dwellings, are proposed to be built on land currently within the Metropolitan Green Belt (see pie charts above). These inappropriate development proposals flagrantly ignore the opening statement of Policy P2 as well as the stipulations set out in NPPF paras 83 to 87. No ‘exceptional circumstances’ are advanced to justify the introduction of new Green Belt boundaries to enable the land at the many locations in the Borough to be used for building homes on.

Under NPPF policy, a Local Authority may impose constraints on the delivery of new dwellings, e.g. through the need to protect the Metropolitan Green Belt or the protection of the Surrey Hills Area of Outstanding Natural Beauty (NPPF protection comparable to that of a national park) or for other reasons such as lack of necessary infrastructure. Notwithstanding that proposed Green Belt areas to be built on, account for a significant percentage (over 6%) of the land area of the Borough, GBC has stated on several occasions to full Council Meetings that “no constraints will be applied to the OAN” to reduce the need to deliver dwellings on Green Belt land through the Plan Period.

WHPC, like other parish councils, finds this approach inexplicable, irresponsible and unsound.

WHPC objects to GBC’s proposed imposition of new Green Belt boundaries and the extensions to current village Settlement Areas boundaries proposed under this policy. These are responded to in sections (a) “insetting” and (b) “Settlement Areas extensions” below. The two sections are mutually interdependent in terms of NPPF policies.

Paragraph 4.3.13: Proposal to inset West Horsley from the Green Belt
Response: WHPC strongly Objects to the proposal to inset West Horsley from the Green Belt and requires this proposal to be removed from the Local Plan

Policy P2 proposes that West Horsley should be inset from the Green Belt, instead of being ‘washed over’ as it is today. Currently development is permitted within the Settlement Area, although it is still Green Belt with particular planning policies being applicable.

West Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving that character. Moreover, being ‘washed over’ by the Green Belt has not been a serious constraint on development within the village. Today West Horsley is a picturesque and lively rural community, which has and continues to experience incremental growth, despite the continuing lack of sufficient infrastructure. The parish of West Horsley’s open, semi-rural character makes an important contribution to the openness of the Green Belt in this part of the borough. This is a specific and differentiating characteristic of West Horsley over its neighbour, East Horsley, which the Council and its consultant Pegasus Planning has failed to recognise.

The assessment of sensitivity in the context of the five purposes of Green Belt set out in GBC’s Green Belt and Countryside Study is flawed. The land parcels used to assess sensitivity are ill considered and mask significant variations in function and character of different areas within each land parcel. As a consequence, the conclusions drawn are subjective and inconsistent and do not provide a robust basis from which objective decisions can be made. The inconsistent conclusions about the extent to which different land parcels can be seen in the Green Belt Purposes Schedule and Green Belt Sensitivity Map (ref Vol. III Appendix 1 and Appendix 2). To be specific: land parcels are scored against four of the criteria laid out in NPPF para 80 and then categorised by their resulting land parcel score as follows: 3/4 = High Sensitivity, 2 = Medium Sensitivity and 1 = Low Sensitivity Green Belt. Based on their Green Belt sensitivity grading villages were then targeted for ‘insetting.’ The selection or targeting of villages to be ‘inset’ and those not to be ‘inset’ when scrutinised against their land parcel score and grading is demonstrably very inconsistent. For example:

West Clandon: no insetting proposed for south of railway line - Land parcels D1, D2 High Sensitivity, score 4 Settlement north of railway / west of main road - Land parcel C4, High Sensitivity, score 3 (similar to West Horsley South).

Housing area, north of railway / east of main road. Land parcel C4 Medium Sensitivity, score 2 with no enlargement of the Settlement Area or insetting proposed, despite being close to a railway station on Guildford to London line.

East Horsley: Land Parcels D6, D7 High Sensitivity score 3. Insetting proposed.

West Horsley: the whole village, both to the north (Land Parcel C14) and the south (Land Parcel D6) of the railway line that divides the village, passes the test for remaining ‘washed over’ as the village makes an important contribution to the openness of the Green Belt. (see also 2.13, 2.14 and 3.0 Sites Critique - Planning Assessment - Appendix 2). Inside the northern Settlement Area there is an average housing density of 9.9 dwellings per hectare (dph).

Woodlands and large residential gardens make a vital contribution towards biodiversity, provide wildlife corridors, and furnish those open spaces which are vital to the character of the Green Belt. Visit the village of West Horsley and appreciate how the Green Belt has preserved the rural character and openness of the village.

The case put forward in the Local Plan Evidence Base proposing the insetting of the villages of West and East Horsley, both predominantly located in High Sensitivity Green Belt Land Parcels is inconsistent, weak and non-compliant with NPPF policies. No Exceptional Circumstances are demonstrated.
Paragraph 4.3.16 and Proposals Map: Settlement Areas extensions in West Horsley

GBC are proposing to make a number of changes to the Current Settlement boundaries of West Horsley and so expand the Settlement Area, as set out within the Green Belt & Countryside Study prepared by GBC’s consultants, Pegasus Planning.

WHPC Objects to the Settlement Areas extensions changes proposed. Each is dealt with below:

1. There is a proposal to move the West Horsley settlement boundary westwards from behind the houses on the west side of Northcote Road to Long Reach, to include all the dwellings in East Lane, Greta Bank, Woodside, Farleys Close and the east side of Long Reach. The new northern boundary of this extended settlement area would be a post & rail fence with hedge, the southern edge of Ben’s Wood, both of which are NOT highly defensible Green Belt boundaries. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. The non-sustainability of site A38 and its importance to the openness of the Green Belt is reviewed in detail in the ADN Planning Assessment Report submitted in Part 2. Overall therefore, the proposal to extend the current Settlement Area westwards cites no ‘exceptional circumstances’ and is an invalid proposal.

2. There is a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Ockham Road North to the Western boundary of Lollesworth Wood, to create site A39. This proposal removes over 5 hectares of agricultural fields from the Green Belt. The present boundary line is clearly defined by a deep and well-maintained drainage ditch which is classified by the Environment Agency as a ‘main river line’ and therefore represents a highly defensible Green Belt boundary. Moving this boundary west to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. The proposal cannot be considered as an exceptional circumstance and the only reason for this change is to bring a large agricultural field within the settlement area to provide more housing land. However, under NPPF rules this is not a sufficient justification for changing a Green Belt boundary.

3. There is a proposal to move the West Horsley settlement boundary northwards and westwards to take in the existing houses on the west side of Ockham Road North, houses on Green Lane and the private Close off Green Lane (sometimes referred to as ‘Bungalow Road’) to the proposed western boundary of site A40. This proposal removes over 8 hectares of paddock, garden land (Oakland ‘Farm’) and an established line of mature trees along the eastern edge of the Oakland Farm land from the Green Belt. The present boundary line on the southern edge of Site A40 is the hard northern edge of housing along Nightingale Avenue. The proposed western boundary on the edge of woodland and around the Camping & Caravanning site’s lake does not improve its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. The proposal cannot be considered as an ‘exceptional circumstance’ and the only reason for this change is to bring the field within the settlement area to provide more housing land. Under NPPF rules this is not sufficient justification for changing a Green Belt boundary.

4. A further proposal is for the addition of Green Belt land on the south side of East Lane and to the east of Lollesworth Lane to the West Horsley settlement area to enable Site A41 to be created. The proposed eastern boundary along the western edge of a former tree nursery (sic: now woodland) and hedging to an area of grazing land is not defensible and lacks permanence. The southern edge of this proposed piece of settlement area goes beyond the indicated Site A41 to woodland adjacent to the northern edge of the railway line. An existing paddock between A41 and the woodland would result from the proposal and be potential land for infill development. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. The proposal cannot be considered as an ‘exceptional circumstance’ and the only reason for this change is to bring the field within the settlement area to provide more housing land. Therefore under NPPF rules there is not sufficient justification for changing a Green Belt boundary.

5. The existing West Horsley South Settlement Area (where no major PDAs are proposed) is wholly within High Sensitivity Green Belt Land Parcel D6, with a number of extensions proposed along its eastern and western boundaries. The largest extension proposed to this South Settlement Area is at the south-east corner, where Cranmore School and its grounds plus woodland on the west side of Little Cranmore Lane would be taken into the Settlement Area. WHPC submits that extension of the existing South Settlement Area at all the various locations, is purely being proposed in order to add land for potential inappropriate infill development. No justification is provided for these Settlement Area extension proposals and under NPPF rules ‘exceptional circumstances’ need to be advanced to justify Green Belt boundary changes. Further, most of the
new boundaries proposed have poor or nil defensibility. Therefore under NPPF rules there is not sufficient justification for the proposed enlargement of the Settlement Area.

In the Green Belt & Countryside Study and accompanying Topic Paper, GBC attempts to justify its rationale for making changes in settlement boundaries in order to meet unfulfilled housing need in the Borough. Green Belt rules, however, are clear that unfulfilled housing need is not “an exceptional circumstance”.

The NPPF is clear that all changes to or movement of settlement boundaries must be justified by ‘exceptional circumstances’. GBC have offered only a generic justification in their Topic Paper of meeting unfulfilled housing need. No case by case justification has been provided. Thus WHPC believes strongly the settlement boundary changes referred to above (plus many others) are invalid without individual detailed justification.

**Paragraph 4.3.17: Proposal to remove Wisley Airfield from the Green Belt**

WHPC OBJECTS to the proposal to remove Wisley Airfield from the Green Belt. The only justification for this proposed change is unfulfilled housing need which is not considered an exceptional circumstance. Without wishing to extend this letter, WHPC unequivocally supports the views of East Horsley Parish Council re Wisley Airfield, set down in their letter of 4th July 2016 to Planning Policy GBC (copy attached).

**POLICY P2: Limited In-filling**

Response: WHPC Objects to this Policy

A new planning designation has been introduced called ‘the identified boundary of the village’.

Though not applying to West Horsley, nevertheless WHPC finds it difficult to reconcile Policy P2’s opening statement that “We will continue to protect the Metropolitan Green Belt” with any further reduction in effective Green Belt status. Where this policy is proposed to be applied (e.g. East Horsley south of A246) it represents a de facto extension of the Settlement Boundary and a substantial reduction in the operational effectiveness of the Green Belt.

**Policy S1: Presumption in favour of sustainable development**

**Response:** WHPC Objects to this policy

**Key reasons:**

1. The presence and strategic importance of the Metropolitan Green Belt forming 89% of the Borough area, is not mentioned, though WHPC considers that this is the single most important sustainable development issue that Guildford faces in preventing urban sprawl from surrounding towns in Surrey and from Greater London. Protecting Green Belt is mentioned as one of the 12 Core Planning Principles (refer NPPF 17)
2. Policy S1 states “When considering development proposals we will take a positive approach that reflects the presumption in favour of sustainable development contained in the National Planning Policy Framework. We will work pro-actively with applicants jointly to find solutions that mean that proposals can be approved wherever possible, and to secure development that improves the economic, social and environmental conditions in the area”.

Planning applications that accord with the policies in this Local Plan (and, where relevant, with policies in adopted neighbourhood plans) will be approved without delay, unless material considerations indicate otherwise.

The policy wording is non-compliant with NPPF 10 which states that "plans and decisions need to take local circumstances into account so that they respond to the different opportunities for achieving sustainable development in different areas". Further it does not fit with NPPF 14 which notes that specific policies within the
framework may require development to be restricted, and in this context, decision taking should not imply development proposals should be approved in all circumstances.

3. Non-compliance with NPPF 17 which sets out 12 core planning principles to underpin both plan-making and decision-taking. The wording of Policy S1 disregards a number of the 12 principles. All of these principles have equal weight and importance and the Proposed Submission Draft Local Plan 2016 must reflect such in its wording.

4. The Policy wording is flagrantly open and unenforceable where the last paragraph states, “Where there are no policies relevant to the application or they are out of date at the time of making the decision then the Council will grant permission unless material considerations indicate otherwise.” In addition the presumption in favour of all applications, as stated in this policy, totally overlooks the NPPF requirement for constraints which should be agreed and implemented as part of the Local Plan process. Most, if not all, development in the AONB should be severely restricted, and the Metropolitan Green Belt must remain a substantial constraint to development.

5. NPPF 7 states that there are three dimensions to sustainable development (i) an economic role (ii) a social role and (iii) an environmental role and at NPPF 8, “These roles should not be undertaken in isolation, because they are mutually dependent.” The Monitoring Indicators section to Policies S1 and S2 does not acknowledge that all three dimensions to sustainable development need to be applied to have a correct and acceptable monitoring procedure.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Policy S2: Borough Wide Strategy**

Response: WHPC Objects to the borough housing targets set out in Policy S2.

The policy sets out an objective of adding 13,860 new homes to Guildford Borough over the 2013-2033 period of the Proposed Submission Local Plan, equating to an annual build of 693 new homes per annum (NOTE: the tabulated Annual Housing Target list in the Policy totals only 10,495 homes).

WHPC has serious concerns about the enormous scale of this building programme, which represents a net increase of 25% in the housing stock of Guildford Borough, a remarkable rate of increase for a borough in the English Home Counties. The growth rate differs substantially from that projected by the Office of National Statistics (ONS) which projects a population increase of some 15% for Guildford Borough over the same period.

WHPC has analysed the Land Availability Assessment (LAA) February 2016, and has identified a disproportionate bias in the location of homes proposed for Guildford's Green Belt villages. The results of the analysis are summarised in the histogram and pie charts below. The data for these charts is drawn from all the development sites detailed in the LAA and/or the Sites table in the Draft Local Plan.

The histogram shows the grossly disproportionate 35% growth proposed for West Horsley, compared to other parts of the Borough.

The two Pie Charts show by location the number of homes that will be built in the first 5 years of the Plan period and then over the full fifteen year period. The number of dwellings proposed for development on Green Belt land at 8,202 is extremely high (65% of the total no of homes set out on DLP pages 123 to 126), with 45% of these proposed dwellings to be built east of Guildford.

Supports Contrary to national trends, too much potential development land within the town centre is being allocated for retail or commercial development rather than housing. High added value businesses are welcome in the borough, but much of the employment land is designated for retail or low added value employment floorspace, which only exacerbates the current issue of lack of low cost housing.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. Introduction

The Parish Council OBJECTS to the Proposed Submission Draft Local Plan: strategies and sites June 2017

West Horsley Parish Council (WHPC) has reviewed the Proposed Submission Draft Local Plan: strategies and sites, published by Guildford Borough Council (GBC) for a 6 week public consultation to 24th July.

The Parish Council’s primary objections are to

(i) proposals for new Green Belt boundaries within the existing area of Metropolitan Green Belt and the ‘insetting’ of several villages from the Green Belt, including West Horsley and East Horsley.

(ii) the use of an unconstrained OAN figure of 654 homes per annum throughout the Plan Period.

(ii) the unsustainable characteristics of proposed development sites A37, A38, A39, A40.

The Proposed Submission Local Plan 2017 pack of consultation documents contains no proposals for provision of infrastructure for the proposed development Sites in West and East Horsley

(iv) the unsoundness of the Local Plan in many of its proposed policies and the flawed evidence base upon which policies are being promoted.

WHPC requires that the objections and comments contained in both this and our 17th July 2016 Submission are submitted to the Planning Inspector appointed by the Secretary of State to review the Guildford Borough Submission Draft Local Plan: strategies and sites following this Regulation 19 Consultation. The Parish Council will appoint and retain a representative or representatives to speak on its behalf at the Examination in Public of the Submission Local Plan.

The Parish Council also reserves its right to join with other parish councils to put forward their objections and case against many aspects of the Submission Local Plan at the Examination in Public when held by the Planning Inspector.

This submission focuses on changes made to the Regulation 19 Proposed Submission Draft Local Plan 2016. In the case of Sites A37-40, changes are minimal, thus ignoring the high volume of serious objections submitted by the majority of residents of the Horsleys to those Site proposals. The Removal of Site A41 from the Plan is welcomed.

The Proposed Submission Draft Plan Policies put greater emphasis on the need for adequate facilities and infrastructure to underpin development. However, this is not reflected in any new wording or proposals for the Horsley sites, thus leaving local objections unaddressed. This failure to address objective responses by residents and the Parish Council, curtails the plan’s usefulness as a sensible and respected planning tool at a site level and further adds to its lack of credibility with residents. The Plan fails to mention most of the known sustainability issues and infrastructure constraints affecting the Horsley sites, including public transport, traffic, road safety, shops, parking, schooling, medical facilities, sewage and flooding/surface drainage.

Section 2 sets out the Parish Council’s comments on and objections to the revisions to proposed Plan Policies. These are set down in tabular form alongside WHPC’s 2016 Consultation comments.

Section 3 focuses on the widespread criticism and concern expressed, not just by many West Horsley residents, but by the thousands of objectors to the proposed Local Plan at every Consultation since 2013. The dominant theme of objections since 2013 remains one of too many homes being proposed for building in the Green Belt.

The number of new homes has been promoted by the West Surrey SHMA and Objectively Assessed Number (OAN) prepared under a contract awarded by Guildford Borough Council to G L Hearn. GBC’s refusal, in response to many requests (Foi and other) to release details of the methodology and assumptions used by G L Hearn, on alleged commercial confidentiality grounds has been blatantly obstructive, falling far short of the requirements of NPPF Plan Making paras 155 and 157 in particular.

Along with a number of other parish councils, WHPC decided in 2016 to contribute financial assistance to Guildford Residents Association (GRA) to enable the appointment of Neil McDonald to undertake a critical review of the West
Surrey SHMA and the OAN recommended by G L Hearn. Neil McDonald’s 2016 Review Report which uncovered errors in GL Hearn’s work, has been followed in May-June 2017 by a further Review of Hearn’s 2017 Addendum to the West Surrey SHMA.

McDonald’s Review of this Addendum to the West Surrey SHMA has revealed serious issues with Hearn’s data interpretation, resulting in an OAN that is too high. **MOST SIGNIFICANTLY the Office for National Statistics endorses Neil McDonald’s findings.**

Neil McDonald’s Review of the Addendum to the West Surrey SHMA is reproduced in entirety (with GRA permission) in Section 3.

[see attached document]

2. Parish Council comments on Sites, Amended Policies and Strategies

a) West Horsley Sites A37, A38, A40 and A41 and East Horsley Site A39

**Lack of infrastructure / poor sustainability**

WHPC and its appointed Planning Consultant put forward their reasoning in the Parish Council’s Submission Report on the 2016 Consultation, that the selection of these Sites in Green Belt locations without ‘exceptional circumstances’ having been proven, fails to satisfy the requirements of NPPF chapter 9.

Further, the sustainability of all the Sites was seriously questioned and found wanting, particularly in terms of the distance of each from Horsley station, shops, schools, medical centre, library and other services. The absence of a regular daily bus service through those parts of West Horsley that contain the Sites, was identified as a further factor that will generate considerable car use by residents of the proposed new homes on Sites A38, A39 and A40.

Referring to Table C of the AECOM Sustainability Appraisal SA Report Update June 2017, the Parish Council takes issue with a number of the Site Appraisal performance criteria, e.g. the distance from a Site to a Railway Station being measured on a straight-line basis. This is a nonsense for Sites A38 and A40, i.e. unless crows are going to buy / reside in the dwellings and fly to the station!

For Site A38 the distance to a Secondary School is categorised ‘Orange’ (less than 2km) yet A38 is further from a secondary school than Sites A39 and A40, both of which are categorised ‘red’(more than 2km),

The Land Availability Assessment 2016 review of each of Sites A38, A39 and A40 includes the following statement (or similar) on Utilities:

**Utilities**

In response to the consultation on the draft Local Plan (2014), Thames Water advised that current wastewater network in this area is unlikely to be able to support the demand anticipated from this development. Drainage infrastructure is likely to be required to ensure sufficient capacity is brought forward ahead of the development. In the first instance, a drainage strategy would be required from the developer to determine the exact impact on the infrastructure and the significance of the infrastructure to support the development. Thames Water will work the planned housing into their investment programme only once a site has planning permission.

Wastewater treatment provision will therefore be a delivery restraint for the proposed dwellings on this Site. WHPC met with Thames Water in May 2017 who confirmed that there were capacity issues at Ripley Sewage Treatment Works.

As a further and timely reminder of the lack of facilities in West Horsley (North and South), Appendix XII Greenbelt & Countryside Study Settlement Hierarchy is reproduced on the next page as a Summary Table with **the Settlements shown in ranking order**, rather than as the somewhat confusing alphabetical listing in the original Evidence document. Villages proposed for insetting from the Green Belt are highlighted in light red. West Horsley is ranked well down at 17th but regardless of that position was targeted (note: not selected) to receive more new dwellings than any other village, before the sustainability of each site and the cumulative impact on East and West Horsley had been properly, if ever, considered.

346
Though two sites have been dropped from West Horsley since the initial Local Plan Consultations were started in 2013, the Parish Council, along with many of the village’s residents, has a strong belief that a proper evaluation of sustainability has been fudged, simply to allow the remaining West Horsley Sites into the Submission Local Plan in a desperate attempt to producing a Plan that is able to deliver a sufficient number of homes in the first 5 years, i.e. 2019 to 2024.

Local Plan first 5 years Housing Supply - comment

With the very obvious lack of infrastructure in West Horsley, recognised by the Parish Council and residents but seemingly not or simply ignored by GBC’s Local Plan Team, the deliverability of all 255 homes planned for Sites A38 and A40, as stated in 2017 LAA Addendum by 2024 in the Plan Period’s first 5 years is seriously questioned. Why? The housebuilders who hold the option on both Sites will adopt a steady building development programme which involves the release of new homes in Phases that match the house build rate to what the market can take, without depressing the prices of the various house types that will be offered. The new homes will not be cheap and that includes so-called affordable units which will be priced at 80% of the local market average. West Horsley Parish Council will be surprised if each site releases more than 15 units per annum for sale. Thus an 8 -9 years long building programme is highly likely, if realistic housebuilding market criteria are applied to Sites A38 and A40.

Access to and beneficial use of the Green Belt, NPPF para 81

Collectively, the three sites in West Horsley North fail to meet NPPF paragraph 81’s encouragement of providing access to and beneficial use of the Green Belt and its amenity and recreation value. This has been an outstanding success story in the Horsleys. Assets, to name just a few, include a dense public footpath network visited and used by many walkers from Greater London, parish parks, sports fields, a caravanning & campsite of international standard, Britain’s newest rural opera theatre ‘Theatre in the Woods’ and the now, since the Local Plan process commenced, popular Olympics cycle route. These examples of positive planning stem from a Local Plan that protects the Green Belt, maintains its openness and beauty and avoids urbanisation and traffic congestion. Sites A38 to 40 are aggressively hostile to openness and the character of the area, with a density of new housing that is completely inappropriate, being greater than anywhere in the locality at present.

Proposed housing delivery trajectory 2019 to 2034 - illustrated

The housing delivery figures set out in LAA Addendum 2017 (page 8) have been plotted as two pie-charts, shown on the next page, the key purpose of which is to illustrate very openly the very large percentage of housing proposed for Sites in the Green Belt. No exceptional circumstances or reasoned justification is put forward by Guildford Borough on a Site by Site basis.

A Histogram follows the pie-charts illustrating the housing figures from the 2016 and 2017 Consultation Local Plans for (i) the Guildford town and urban Area (ii) Ash & Tongham (iii) the Eastern Rural area and (iv) the western rural area. The histogram illustrates how the Rural Areas are disproportionately targeted for new homes, all of which are proposed on Green Belt Sites without any justification being put forward.

Land Availability Assessment Addendum 2017 - Corrections

i) Site A37 and its entry in the LAA Addendum 2017 is incorrect. The Bell & Colvill planning approval is for 9 homes, not 6 as listed.

ii) It is not understood how in the Housing Trajectory – Sites with provision and phasing table on page 8, on the 3rd line Outstanding capacity (Commenced) figures are filled in for the years for years 11 to 15 of the Plan Period.

[see table on attached document]

East Horsley District and Local Centres – Station Parade and Bishopsmead

Station Parade and Bishopsmead are explicitly identified as being suitable for “main town centre uses” which include amongst other uses “cinemas, drive-through restaurants, night clubs, casinos and bingo halls”. Clearly such uses are unsuitable and must be excluded from the proposed Local Plan by statements in Policies E8 and E9
b) Amended Plan Policies and Strategies

WHPC has chosen to tabulate its position on the 2017 Consultation alongside what it stated in its Executive Summary in the 2016 Submission Report -

<table>
<thead>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

General Comment – the term ‘Identified Boundary of the Village’ is misleading, as it fails to clarify the significance for infill development.

We note that the National Planning Policy Framework (NPPF) states:

“89. A local planning authority should regard the construction of new buildings as inappropriate in Green Belt. Exceptions to this are:

...... limited infilling in villages, ....”

We consider that the NPPF is referring only to villages where development could take place that can be described as infilling, and thus the existing level of development must be of relatively high density. We also consider that any local policies must stay within the limitations of the NPPF by only allowing new development in Green Belt villages (under this provision) that is limited infilling. Local policies cannot, under this provision in the NPPF, designate areas that are not inherently appropriate for infilling.

We consider that the boundaries drawn up for this local policy in the Draft Local plan include areas that are not appropriate for limited infilling, and that the designation of them as within a village settlement will open them up for development pressure beyond that which can reasonably be seen as limited infilling.

We consider that in designating land as being within villages when that land is not inherently appropriate for infilling, the Local Plan is going beyond that which is allowed by the NPPF and is therefore unsound.

We also feel that in defining the designated areas with the term “Identified Boundary for Village” the Local Plan is misleading as it appears simply to describe the limits of the villages whereas the requirement for designation is for those parts of the village that are inherently appropriate for infill development.

We also note that the National Planning Policy Framework (NPPF) states:
“89. A local planning authority should regard the construction of new buildings as inappropriate in Green Belt. Exceptions to this are:

….. and limited affordable housing for local community needs under policies set out in the Local Plan; ....”

We consider that affordable housing that has been built under the NPPF and its predecessors on rural exception sites should not be considered as appropriate for infilling and thus not included within the “Identified Boundary for Village”. This inclusion also seems contrary to the intent of the NPPF and, as it risks generating distrust of the process of creating affordable housing, undermines the effective working of the NPPF. In this respect the Local Plan is again unsound.

In the light of this we have enumerated all the changes in boundaries compared to the Settlement Areas in the 2003 Local Plan and indicated which are inappropriate in terms of our objections defined above. Please see attached comments on specific proposed changes to the Settlement Areas within Shere Parish’s wards.

SITE ALLOCATION A39. In terms of centrality to East Horsley's shops, medical centre and railway station this is a prime EH site for development. Indeed it is - or could be made - so central that arguably it would be an ideal site for the new primary school that the Horsleys will need if housing is developed on the scale proposed. In that case the Raleigh would be completely inadequate in scale and on far too small a site. The site behind Ockham Road North could be used to build a new much larger primary school right next to the Raleigh's existing grossly under used Playing Field. The over crowded old Raleigh School site could be used for housing.

Any development on this site, whether housing or school, will have to solve the flooding problem. Much of the site is in the flood plain, There is already regular flooding of the western ends of the gardens on Ockham Road North that abut this site and regular severe flooding of Ockham Road North itself near the railway bridge. According to Surrey Councillor John Furrey (Cabinet Member for Highways and Flooding) the problem is that "drainage networks have never been mapped" and "the system is old and owned by many different agencies". These problems will need to be solved before either a large estate or a school can be built on this site.

One other site problem is the poor sight lines for traffic attempting to leave this field and join Ockham Road North. The local Speed Watch regularly records vehicles traveling north under the railway bridge at speeds in excess of 50 miles an hour. As the one footpath on this part of ORN runs alongside the new site and is much used by children going to the Raleigh and Glenesk schools there will also need to be controls on the traffic coming out of site A39.

As implied by the number of houses proposed (100) this could be a good location for housing aimed at elderly people and those only able to afford "low cost housing". A development like "Frenchlands Hatch" (on Ockham Road South) would be particularly appropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5660  Respondent: 8563489 / Mr Christopher J Norman  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

We object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. We object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. This land has been farmed for many years and is good quality farmland.

3. We object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
4. We object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC). The local infrastructure simply cannot support additional traffic and required facilities.

5. We object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. We object to the detrimental impact on transport, local roads and road safety, and specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity. There is no parking elsewhere near the stations

7. We object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. We object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9. We object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10. We object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) – where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58 at Burnt Common because the impact on the small surrounding roads will add to already overstretched roads in the area. There have been no appreciable improvements to the local infrastructure in the last forty years. Roads are gridlocked every time there is a problem at the M25 Junction 10. In one recent week that was on three days. This is damaging businesses locally.

Send Road is at maximum capacity every rush hour. The road through West Clandon cannot take two lorries passing each other without one having to mount the pavement. The narrowest part of The Street is close to a junior school. There is no chance of widening these roads without having to purchase local private property.

The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough, not a huge over allocation of 10 hectares in the Green Belt in Send.

It is quite clear that the whole basis of your plan for the Send area is politically motivated as neither of our councilors are Conservatives. This is totally unacceptable and has been noted by the electorate locally.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. Removal from Green Belt of homes in Guildford Road, Northern end of Glaziers Lane, Flexford, Walden Cottages & Palm House Nurseries traveller site

I object to this as placing these homes outside of the Green Belt could enable development within these areas at much higher density and will give greater success for planning applications.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the proposed redevelopment plans north of Keens Lane for 140 new houses and the additional 14,000 new homes in and around Guildford.

1. The proposed area north of Keens Lane is Green Belt and should not be built on in accordance with Surrey County Councils guide lines.
2. Exits to Keens Lane are via Worplesdon Road or Aldershot Road currently with both junctions at a stand still during the rush hour.
3. Keens lane is not wide enough to carry additional traffic and cannot be widened because of Chittys Common at one end and existing housing the other end.
4. Additional housing and traffic etc would have detrimental effect on the wildlife and tranquillity of Chittys Common.

I believe that it is the Councils plan to build 14,00 new homes in and around Guildford. The CURRENT infrastructure is insufficient to handle the existing level of housing yet alone more houses.

The existing road system cannot cope with the current level of daily traffic in and around Guildford with so many “A” roads converging on the already inadequate Guildford Town centre one-way system It would take a new major ring road to overcome this problem. What plans are in place to support the additional traffic that any development will bring?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO the late inclusion of site A43 Garlicks Arch. This has been slipped in at the very last moment without proper consultation. The added 400 houses will cause overcrowding of our schools and doctors surgery. Our Villages Medical Centre is already over subscribed and difficult to get doctors appointments. Another 800 minimum people would completely swamp this facility. The 7000 sq mtrs of industrial area would also increase the amount of Commercial Vehicles in the area using the local roads. We hardly need industrial buildings, as past developments have stood empty for years.

I OBJECT TO site A43A the on and off ramp at Clandon/Burnt Common. This will cause complete chaos in the area, as all roads leading to the junction are country roads leading from Clandon, Ripley and Send. At present it only takes an incident at Wisley/Junction 10 of the M25 and our villages are swamped with traffic. This junction will make the whole situation worse as the local roads are so narrow and are unable to be widened to suit increased traffic flow. The Send Road only leads to similar narrow roads in Old Woking and Hoebridge areas, which are also unable to be widened.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO the disproportionate amount of development on the A3 between Burpham and the M25 at Wisley. With 2000 houses at Wisley Airfield, 2200 homes at Gosden Hill Farm and 400 houses at Garlick’s Farm Send. This will make an urban sprawl in this part of Surrey and will completely change the environment for all the residents and who live here as well as increased air pollution from all the additional vehicles. There is a lack of evidence for the alleged housing need numbers.

Evidence on infrastructure

The draft Local Plan seems to have again been assembled with insufficient proposals or research on the infrastructure needed to accompany proposals for housing development. There must be proper infrastructure planning for transport, educational, medical, energy, water and communications services before additional housing is contemplated. It does not seem to be understood that, for instance, bus transport is wanting and there are few facilities in the borough for any transport to rural parts except by car. There is no guarantee that the A3 will be improved in the way suggested.

Housing Target

Setting a housing target for Guildford Borough is a vital function for the Local Plan. The Trust is reluctant to get involved in the method of reaching a figure for an adjoining borough but, given what is at stake locally, considers that it has an obligation to comment and object to the figure put forward.

Paragraph 158 of the NPPF 158 provides that "Each local planning authority should ensure that the Local Plan is based on adequate, up-to-date and relevant evidence". The starting point for that is a Strategic Housing Market Assessment (SHMA).
The SHMA does not take into account any of the constraints to development such as Green Belt, AONB, woodland, heathland, protection of flora and fauna etc. in determining an “Objectively Assessed Needs” (OAN) figure for the Local Plan. It is for the local authority to take these constraints into consideration and apply them to what is provided in the SHMA.

There has been nationwide concern, especially from local residents and community groups, even about the figures emerging from the SHMA process. In many instances the figures are considered to be inflated or otherwise inaccurate. Such inflation can occur in the hands of consultants who are inclined to favour developers. Guildford Borough Council have used G.L.Hearn as consultants and that company’s website shows that their work for developers could provide motive for bias. Local authorities can succumb to those in the planning industry acting on behalf of developers who advocate that the “presumption in favour of sustainable development” means that growth must be looked for across the board and in doing so have less regard to where there should be constraints. If local authorities overlook proper scrutiny it can also be because that development can generate income from Community Infrastructure Levy, taxes and bonuses.

For the purpose of a Local Plan it is necessary to have underlying data that is used to back up propositions. In the case of the West Surrey Housing Market Area (SHMA) for Guildford, Woking and Waverley, and prepared by G L Hearn, requests for that have met with resistance. Incredibly Guildford appear to have told the Information Commissioner that consultants have refused to give it the formulae and assumptions in the model because of ‘intellectual property’ in the model used. The Trust understands that in consequence neither the administrators nor councillors at Guildford Borough Council have had an opportunity of scrutinising vital basic information. This makes it all the more important that Inspectors test SHMAs and OANs against properly provided methodology.

The Trust understands that the process toward determining targets for future housing numbers starts with the Office for National Statistics (ONS) projection of the likely local population change for the borough due to natural change (births, deaths), net internal migration within the UK and finally net international migration.

The Trust understands that based on natural change and net internal migration recent ONS data projected that the borough population to 2031 would shrink and that it would increase only on projected net international migration based upon the abnormally high increase in the number of foreign students attending the University of Surrey (as was experienced in recent years). The ONS themselves state that this latter figure is less reliable and anyway stress that before its projections are turned into predictions their basic statistics should be reviewed in detail, with changes made based on whatever factors are deemed important in that review.

G L Hearn have assessed the housing need for Guildford at 693 dwellings per year, (13,860 overall) for the next 15 years (the result bring to add 25 per cent to the stock of dwellings in the borough with increased pressure on existing infrastructure. It is based predominantly on international migration, itself based on an increase in students. Even if desirable this is implausible particularly in a post-Referendum climate with further education being more expensive in the UK compared with other countries, evidence this week of students no longer wishing to study in the UK and a trend to distance learning. This issue should also be considered in the type of housing required. If based on any realistic forecast the University, with unused planning permissions for student accommodation on campus, should take responsibility to enable this factor to be removed from the equation for projected household numbers. This would free up affordable housing for local people, particularly the young. In any event, a separate detailed assessment should be made of the need for and type of student housing required.

This aspect of the SHMA reveals that the basis for it is severely flawed.

There is also a need in looking at housing targets to distinguish between need and demand. The latter could be limitless as in Guildford house prices and therefore demand are dictated and dominated by London house prices. The outward movement of population from metropolitan London is incapable of being satiated and was an important reason for the creation of the Green Belt.

In looking at the OAN there would appear to be insufficient evidence of the residences that Guildford town can accommodate (windfalls, reuse of empty housing, switch from office accommodation and use of student accommodation). A substantially lower number would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.
Additional observations

The Trust makes the following general observations on the draft Local Plan.

Policy S1 should go in full through the principles for sustainable development in the NPPF in full including the 12 Core Planning Principles set out in paragraph 17.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Sites in East and West Horsley

There is considerable concern locally that Effingham, the Horsleys, Ripley, Wisley and the Ockham and Hatchford areas are protected from unwarranted development. But the changes to settlements that would have most effect on the Cobham area in terms of increased traffic and call for amenities, if the draft Local Plan were implemented, would be the Horsleys. Implementing proposals for Sites A36-41 would destroy the nature of the villages that make up the Horsleys. The new building suggested for these villages is excessive and disproportionate relative to the rest of the borough. It has to be asked why it is suggested that the Green Belt is sacrificed here where the protection of the Metropolitan Green Belt is highly relevant when on the other side of the borough in the Ash and Tongham areas the draft Local Plan looks to expand the Green Belt.

The reclassification of East Horsely to a Rural District Centre would allow less desirable uses such as factory outlets, warehouses, clubs etc. to be the subject of applications for planning permission. Development in these villages should not be other than from small windfall sites.

**Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Objections to the Guildford Borough Council Draft Local Plan (June 2016) and in particular to inclusion in the plan of Site Allocation A35 - the former Wisley Airfield - for a new settlement with 2,000 dwellings,

The Trust writes to object to aspects of the draft Local Plan.

The Trust has approximately 1,100 members, some from within the Borough of Guildford including Ockham. Most of that membership that resides in the Cobham area uses the resources of the Borough of Guildford, including the villages and the countryside for recreational purposes. The Trust submitted objections to applications relating to the Former Wisley Airfield site numbered 13/P/02165, 14/P/01664 and 15/P/00012, all of which were refused. It also filed comments on the draft Local Plan submitted for consultation in 2014, when it objected to the inclusion of the former Wisley Airfield site for consideration for development. That draft was subsequently withdrawn and the Trust is concerned that the large number of objections to that may not be replicated here because of the frequency that these have had to be made in the planning process.

While, therefore, the majority of our members may not live in the Borough of Guildford they have a greater interest in much of what goes into the Guildford Local Plan for their local area than those living on the far side of the borough.

The draft Local Plan now submitted for consultation has many of the flaws that were in the previous draft. In this response the Trust has felt that it should lead on and give most attention to the Plan’s approach to the Green Belt and inclusion of the former Wisley Airfield site (Policy A35).

The site of the former Wisley Airfield

The Trust does in particular object to the inclusion in the draft Local Plan of Policy A35 relating to the site of the former Wisley Airfield and surrounding area and involving 2000 dwellings, and other building. It is said that the evidence for need for this is in the SHMA being used.

The size of the development that might be achieved at the site actually makes it unsustainable.

The Trust points to the South East Regional Plan not being revoked as to preventing new residential development close to the Thames Basin SPA, part of which lies just north of the site.

This is a much loved open area by those living in the south of Elmbridge that is Hatchford, Downside, Cobham and Stoke D’Abernon. The proposal for 2000 dwellings is not sustainable for many reasons. The site is in some beautiful countryside that would be devastated by the development. It is too close to the SPA and would result in the destruction of the Site of Nature Conservation Interest (SNCI). Proposals for this housing resulted in the unanimous refusal of application no.15/P/00012 which showed that it would have been delivered by apartment blocks up to 5 storeys, alien to the area and with a density higher than most London boroughs. Openness and important views would be marred from a number of directions including that from Painshill Park Landscape Gardens

The proposals for 2000 dwellings with other buildings, involving the introduction of some 5,000 new residents, are not sustainable for many reasons. To place them in context as to the increase in population, it would result in an increase of the equivalent of 50% of the population of nearby Cobham, having a significant adverse effect on the infrastructure of the southern part of the Borough of Elmbridge as well as the northern part of the Borough of Guildford. There would be significant wider effects on strategic infrastructure not only in Guildford but also Elmbridge, Mole Valley, Woking and further afield.

A settlement here would create, on presently open country, a line of building that would start to merge settlements to become the urban sprawl that the Green Belt exists to prevent.

Green Belt
The site is entirely in the Green Belt. It was not contemplated for development for the existing Guildford Borough Council Local Plan 2003 or the South East Regional Plan. The Green Belt was established by and is protected by Acts of Parliament.

The starting point for consideration of taking any site out of the Green Belt is Paragraph 83 of the NPPF which confirmed that Green Belt boundaries can only be altered in exceptional circumstances through the preparation of the Local Plan. The only exceptional circumstance suggested in the draft Local Plan is the pressure to build more dwellings and that arises from flawed housing target figures. The proposed development would clearly impact negatively on the openness of the Green Belt and would be considered inappropriate development within the Green Belt under paragraph 87 of the NPPF. Inappropriate development is by definition harmful to the Green Belt and should not be approved except in very special circumstances. Under paragraph 89 those very special circumstances will not exist unless the potential harm to the Green Belt, is clearly outweighed by other considerations. The proposals for development at the site clearly fail at these hurdles.

There have been assurances by the government that unmet housing need, even if provable, is unlikely to outweigh the harm to the Green Belt and constitute exceptional circumstance (Ministerial Statement on the 17 January 2014 and letter from Brandon Lewis mentioned above).

There has been a tendency to portray this site as if it were a previously developed brownfield site (including emphasis on the remnant of the old runway) and it is worth noting that the runway and hardstanding are but a small part of the site. If the hard-core that is the runway were not to be removed for whatever reason such as viability, in due course, like the remains of many such sites in other parts of the country or the world, the runway would eventually disintegrate and return to agricultural land or nature, as was promised when it was requisitioned during the last world war. The vast majority of the site is good quality agricultural land recently advertised by the owners as Grade 3 and being arable land that has been farmed for many years.

**Wildlife**

The Trust is very concerned about protecting, and indeed expanding, Special Protection Areas (SPAs) and Sites of Special Scientific interest (SSSIs). The Trust supports the position of Natural England and the Campaign to Protect Rural England (CPRE) that studies show the need for the Green Belt to be protected as an integral component of England’s ecological network and the additional views of the RSPB as to protection of biodiversity. While there may be scope for a developer to suggest Suitable Alternative Natural Green Spaces (SANGs) in an area, it is impractical to find any sufficient such sites in the borough or adjoining boroughs that are not already protected in some way. Already agricultural or wooded land should not be used as recreation land in order to justify building on other green spaces nearby.

In the application no. 15/P/00012 the applicants sought to include an onsite SANG in supposed mitigation. That was illogical as it would create an additional multi space car park and would only have increased visitor numbers to the nearby SPA rather than draw them away.

The introduction of residences would mean the import into an ecologically sensitive area not only of humans, and increase in their footfall, but also of pets. Studies of the effect of dogs and cats in particular have shown just what a devastating effect this would have on wildlife. There is no answer to the effect of the introduction of humans and of pets would have on wildlife and wildlife corridors and damage to habitats of the protected and endangered rare species in contravention of the EU Birds Directives and Habitats Regulations.

**Local Roads and transport**

Looking at how the proposal to have a settlement of 2000 at the site would impact on transport, there would still need to be reliance on vehicles for work and other needs and for delivery. It would be impossible to provide enough jobs for residents in the area of the development which would result in a substantial increase of traffic on the local road network. This suggested site for development is far removed from local stations and has no existing access to public transport. It is unrealistic to assume that residents will not rely on the private car and reliance on private car or buses cannot meet requirements for a low carbon, sustainable economy. It is impossible to provide safe walking and cycling routes to the nearest station particularly in winter as the surrounding lanes are narrow and unlit. Further, public transport would itself be limited by the weight restrictions imposed on surrounding roads which are narrow and unsuitable for Public Service Vehicles.
In application no. 15/P/00012 the applicants incredibly suggested that stations are within easy cycle distance. Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).

Given how main roads (and in particular the M25 and A3) become jammed at various times, adding to the number of motorists, development in this rural area would result in the use of more local roads as rat runs. The Trust would be particularly concerned for the additional traffic on the very narrow and winding Ockham Lane and Plough Lane locally.

Cobham is the closest shopping centre to the proposed development. It already serves many from the areas of Ockham, the Horsleys and Effingham with traffic along Horsley Road and Downside Road, Ockham Lane and Plough Lane. Cobham is only 4.5 miles from the proposed development whether one used Old Lane, Horsley Road and Downside Road or the A3 and the A245 - Guildford is by comparison 7.5 miles from the proposed development. The village could not cope with the additional traffic and car parking involved in serving an additional 5,000 residents at the site and would experience a significant increase in traffic from the development. Cobham would experience increased stationary traffic at junctions. Traffic congestion has an impact on health and Cobham High Street is an Air Quality Management Area arising in part from the proximity of the A3 and M25 and there are identifiable health problems already arising from this. To add to the traffic here would exacerbate that.

One of the stations that in application no. 15/P/00012 the applicants claimed would adequately service the increased population (much of which is likely to commute) is Cobham & Stoke D’Abernon (the local rail stations of Effingham and Horsley could not cope). The route to that station is either by way of Downside Road or by way of the A3 and A245. Additional pressure would be placed on parking at this station and overcrowding at peak hours would increase, quite apart from the impact of vehicles using local roads for the purpose of getting there. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.

In that application the Trust supported Elmbridge Borough Council’s objections on the grounds that the development would have a significant impact on the highway network.

There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic.

**Air quality**

There would be an increase of around 5,000 residents at the proposed development site with possibly an additional 4,000 vehicles. The air quality surrounding the site of the suggested development already causes concern, for instance levels of NO2 already exceed the EU limit due in part to the proximity of the M25, the A3 and Cobham Services on the M25. Additional traffic would worsen the situation, affecting the health of all current and future residents in the area.

**Summary of objections to this site**

Objection is supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers. The Planning Report identified the serious concerns now being highlighted.

The only exceptional circumstance that might be advanced, with all other matters were discounted, is housing need. Insofar as that may rely on evidence tendered for that it does not bear any extensive examination and the government has anyway made it clear that housing need alone is not sufficient.

There would be a loss of Green Belt and countryside used for leisure purposes and an immense effect on biodiversity. The development would affect not only the surrounding natural land but add to the danger of losing rare species that need protection.
The land is close to the M25 and A3 junction and would increase the number of vehicles using these busy roads on a daily basis, cause further extensive use of inadequate local roads and cause further pollution. Surrey is very poorly served by public transport and any new residents would be reliant on private transport.

A new settlement here would absorb the hamlet of Ockham. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford. There is no realistic account taken of general organic growth and other proposed developments and impact on traffic and infrastructure.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Affordable homes and homes for those on low income and the young

Market prices in the South-East mean that homes designated as affordable are just not that. That makes it even more important that developers are given no leeway from the requirements to provide a proportion of a development to be built as such. In this area there is no excuse to plead viability as a reason not to comply with guidelines. The Trust is keen that in the North Surrey area Local Plans should be formulated in a way that will provide accommodation for local people, to the young and those on low pay and that a good stock of starter homes and social housing are made available.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Urban Development

The Trust supports higher density development in the urban area where there is existing infrastructure, although that should of course avoid over intensification. Guidelines should avoid spoiling the environment and causing congestion but much can embrace fresh thinking on urban life including pedestrianisation, cycling lanes, home zones and underground parking.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to the Guildford Borough Council Draft Local Plan (June 2016) and in particular to inclusion in the plan of Site Allocation A35 - the former Wisley Airfield - for a new settlement with 2,000 dwellings.

The Trust writes to object to aspects of the draft Local Plan.

The Trust has approximately 1,100 members, some from within the Borough of Guildford including Ockham. Most of that membership that resides in the Cobham area uses the resources of the Borough of Guildford, including the villages and the countryside for recreational purposes. The Trust submitted objections to applications relating to the Former Wisley Airfield site numbered 13/P/02165, 14/P/01664 and 15/P/00012, all of which were refused. It also filed comments on the draft Local Plan submitted for consultation in 2014, when it objected to the inclusion of the former Wisley Airfield site for consideration for development. That draft was subsequently withdrawn and the Trust is concerned that the large number of objections to that may not be replicated here because of the frequency that these have had to be made in the planning process.

While, therefore, the majority of our members may not live in the Borough of Guildford they have a greater interest in much of what goes into the Guildford Local Plan for their local area than those living on the far side of the borough.

The draft Local Plan now submitted for consultation has many of the flaws that were in the previous draft. In this response the Trust has felt that it should lead on and give most attention to the Plan’s approach to the Green Belt and inclusion of the former Wisley Airfield site (Policy A35).

Green Belt - POLICY P2

The Metropolitan Green Belt covers 89% of the borough. Its existence and retention should be one of the fundamental bases of the Local Plan. Policy P2 does not have any proper assessment of the Green Belt’s value. Building on the Green Belt means a loss of agricultural production, open space, biodiversity, natural heritage, rural views, rural leisure amenities (with benefits to public health and wellbeing as aimed for in paragraph 81 of the National Planning Policy Framework (NPPF)), water catchment and flood control. It also means an increase in air pollution by loss of carbon and particulates being captured by vegetation.

There is insufficient commitment in the draft Local Plan to the permanence of the Green Belt. Surrey County Council have voted unanimously to protect the Green Belt. The draft Local Plan suggests that the Metropolitan Green Belt would be
defended but then goes on to propose extensive changes to the Green Belt. The pressure for such proposals comes primarily from flawed housing figures as outlined below and fails to take account of how much more difficult it is to deliver infrastructure to support development outside urban areas. The draft Local Plan looks to impose development where wider consultation could have resulted in acceptance of limited development by communities if it were genuinely for the benefit of local people. The Trust believes there should be more emphasis on the aims of the NPPF and in particular the aim in paragraph 17 of “empowering local people to shape their surroundings”.

With an increase of 13,860 new dwellings suggested during the duration of the Plan, only 2,800 are in urban areas. Urban planning in a number of London boroughs and other authorities provides a good model for urban revival, and in particular in bringing brownfield sites back into play, but many of the planning advances from those areas have not been sufficiently taken into account in the draft Local Plan. The number of homes planned in the urban area is too low – there is a need for regeneration in some areas, but this is ignored and instead the plan concentrates on building homes on green field sites, which does not meet the needs for housing within the town.

The insets of two thirds of the borough’s rural villages appears to involve the straightening boundary lines rather than considering how the nature of the Green Belt protects countryside. The proposals extend the power of developers out of all proportion to genuine local needs. In any event until such time that the evidence is robust enough to be considered sound, no consideration should be given to changing boundaries of the Green Belt. It should continue to wash over settlements close to Cobham such as the Horsleys, Effingham and Ripley.

It is also noteworthy that the South East Regional Plan, as challenged in 2009, had suggested that development on Green Belt land was to be between West Clandon and Burpham. While not advocating any extensive building on Green Belt land, that area was at least closer to the infrastructure that Guildford town offers than development sites now suggested on Green Belt land.

Research available shows that there should be no need to build on the Green Belt. The Green Belt has saved precious countryside from urban sprawl, saved village life and conserved wildlife. Once any part of it is destroyed it is lost for ever and letting any part go in other than in very exceptional circumstances, risks opening the floodgates for further encroachment. It is owed to succeeding generations to preserve it. There is no justification to build on the Green Belt until all alternatives in the more sustainable urban areas have been used. Insofar as there is a demand for new housing there are brownfield and other sites in and around urban and semi-urban Guildford that must be looked at and used first.

The Trust considers that all Green Belt development sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Trust makes further points on the Green Belt in dealing with the inclusion of the Former Wisley Airfield as a development site but, in summary, the Local Plan should commit more to uphold Green Belt boundaries and protections.

In the context of considering any alteration of Green Belt boundaries the Trust has had sight of a letter dated 7th June 2016 from Brandon Lewis the Minister of State for Housing and Planning to MPs which states “We have been repeatedly clear that demand for housing alone will not change Green Belt boundaries”.

**The site of the former Wisley Airfield**

The Trust does in particular object to the inclusion in the draft Local Plan of Policy A35 relating to the site of the former Wisley Airfield and surrounding area and involving 2000 dwellings, and other building. It is said that the evidence for need for this is in the SHMA being used.

The size of the development that might be achieved at the site actually makes it unsustainable.

The Trust points to the South East Regional Plan not being revoked as to preventing new residential development close to the Thames Basin SPA, part of which lies just north of the site.

This is a much loved open area by those living in the south of Elmbridge that is Hatchford, Downside, Cobham and Stoke D’Abernon. The proposal for 2000 dwellings is not sustainable for many reasons. The site is in some beautiful countryside
that would be devastated by the development. It is too close to the SPA and would result in the destruction of the Site of Nature Conservation Interest (SNCI). Proposals for this housing resulted in the unanimous refusal of application no.15/P/00012 which showed that it would have been delivered by apartment blocks up to 5 storeys, alien to the area and with a density higher than most London boroughs. Openness and important views would be marred from a number of directions including that from Painshill Park Landscape Gardens.

The proposals for 2000 dwellings with other buildings, involving the introduction of some 5,000 new residents, are not sustainable for many reasons. To place them in context as to the increase in population, it would result in an increase of the equivalent of 50% of the population of nearby Cobham, having a significant adverse effect on the infrastructure of the southern part of the Borough of Elmbridge as well as the northern part of the Borough of Guildford. There would be significant wider effects on strategic infrastructure not only in Guildford but also Elmbridge, Mole Valley, Woking and further afield.

A settlement here would create, on presently open country, a line of building that would start to merge settlements to become the urban sprawl that the Green Belt exists to prevent.

Green Belt

The site is entirely in the Green Belt. It was not contemplated for development for the existing Guildford Borough Council Local Plan 2003 or the South East Regional Plan. The Green Belt was established by and is protected by Acts of Parliament.

The starting point for consideration of taking any site out of the Green Belt is Paragraph 83 of the NPPF which confirmed that Green Belt boundaries can only be altered in exceptional circumstances through the preparation of the Local Plan. The only exceptional circumstance suggested in the draft Local Plan is the pressure to build more dwellings and that arises from flawed housing target figures. The proposed development would clearly impact negatively on the openness of the Green Belt and would be considered inappropriate development within the Green Belt under paragraph 87 of the NPPF. Inappropriate development is by definition harmful to the Green Belt and should not be approved except in very special circumstances. Under paragraph 89 those very special circumstances will not exist unless the potential harm to the Green Belt, is clearly outweighed by other considerations. The proposals for development at the site clearly fail at these hurdles.

There have been assurances by the government that unmet housing need, even if provable, is unlikely to outweigh the harm to the Green Belt and constitute exceptional circumstance (Ministerial Statement on the 17 January 2014 and letter from Brandon Lewis mentioned above).

There has been a tendency to portray this site as if it were a previously developed brownfield site (including emphasis on the remnant of the old runway) and it is worth noting that the runway and hardstanding are but a small part of the site. If the hard-core that is the runway were not to be removed for whatever reason such as viability, in due course, like the remains of many such sites in other parts of the country or the world, the runway would eventually disintegrate and return to agricultural land or nature, as was promised when it was requisitioned during the last world war. The vast majority of the site is good quality agricultural land recently advertised by the owners as Grade 3 and being arable land that has been farmed for many years.

Wildlife

The Trust is very concerned about protecting, and indeed expanding, Special Protection Areas (SPAs) and Sites of Special Scientific interest (SSSIs). The Trust supports the position of Natural England and the Campaign to Protect Rural England (CPRE) that studies show the need for the Green Belt to be protected as an integral component of England's ecological network and the additional views of the RSPB as to protection of biodiversity. While there may be scope for a developer to suggest Suitable Alternative Natural Green Spaces (SANGs) in an area, it is impractical to find any sufficient such sites in the borough or adjoining boroughs that are not already protected in some way. Already agricultural or wooded land should not be used as recreation land in order to justify building on other green spaces nearby.
In the application no. 15/P/00012 the applicants sought to include an onsite SANG in supposed mitigation. That was illogical as it would create an additional multi space car park and would only have increased visitor numbers to the nearby SPA rather than draw them away.

The introduction of residences would mean the import into an ecologically sensitive area not only of humans, and increase in their footfall, but also of pets. Studies of the effect of dogs and cats in particular have shown just what a devastating effect this would have on wildlife. There is no answer to the effect of the introduction of humans and of pets would have on wildlife and wildlife corridors and damage to habitats of the protected and endangered rare species in contravention of the EU Birds Directives and Habitats Regulations.

Local Roads and transport

Looking at how the proposal to have a settlement of 2000 at the site would impact on transport, there would still need to be reliance on vehicles for work and other needs and for delivery. It would be impossible to provide enough jobs for residents in the area of the development which would result in a substantial increase of traffic on the local road network. This suggested site for development is far removed from local stations and has no existing access to public transport. It is unrealistic to assume that residents will not rely on the private car and reliance on private car or buses cannot meet requirements for a low carbon, sustainable economy. It is impossible to provide safe walking and cycling routes to the nearest station particularly in winter as the surrounding lanes are narrow and unlit. Further, public transport would itself be limited by the weight restrictions imposed on surrounding roads which are narrow and unsuitable for Public Service Vehicles.

In application no. 15/P/00012 the applicants incredibly suggested that stations are within easy cycle distance. Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).

Given how main roads (and in particular the M25 and A3) become jammed at various times, adding to the number of motorists, development in this rural area would result in the use of more local roads as rat runs. The Trust would be particularly concerned for the additional traffic on the very narrow and winding Ockham Lane and Plough Lane locally.

Cobham is the closest shopping centre to the proposed development. It already serves many from the areas of Ockham, the Horsleys and Effingham with traffic along Horsley Road and Downside Road, Ockham Lane and Plough Lane. Cobham is only 4.5 miles from the proposed development whether one used Old Lane, Horsley Road and Downside Road or the A3 and the A245 - Guildford is by comparison 7.5 miles from the proposed development. The village could not cope with the additional traffic and car parking involved in serving an additional 5,000 residents at the site and would experience a significant increase in traffic from the development. Cobham would experience increased stationary traffic at junctions. Traffic congestion has an impact on health and Cobham High Street is an Air Quality Management Area arising in part from the proximity of the A3 and M25 and there are identifiable health problems already arising from this. To add to the traffic here would exacerbate that.

One of the stations that in application no. 15/P/00012 the applicants claimed would adequately service the increased population (much of which is likely to commute) is Cobham & Stoke D’Abernon (the local rail stations of Effingham and Horsley could not cope). The route to that station is either by way of Downside Road or by way of the A3 and A245. Additional pressure would be placed on parking at this station and overcrowding at peak hours would increase, quite apart from the impact of vehicles using local roads for the purpose of getting there. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.

In that application the Trust supported Elmbridge Borough Council’s objections on the grounds that the development would have a significant impact on the highway network.

There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic.
Air quality

There would be an increase of around 5,000 residents at the proposed development site with possibly an additional 4,000 vehicles. The air quality surrounding the site of the suggested development already causes concern, for instance levels of NO2 already exceed the EU limit due in part to the proximity of the M25, the A3 and Cobham Services on the M25. Additional traffic would worsen the situation, affecting the health of all current and future residents in the area.

Summary of objections to this site

Objection is supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers. The Planning Report identified the serious concerns now being highlighted.

The only exceptional circumstance that might be advanced, with all other matters were discounted, is housing need. Insofar as that may rely on evidence tendered for that it does not bear any extensive examination and the government has anyway made it clear that housing need alone is not sufficient.

There would be a loss of Green Belt and countryside used for leisure purposes and an immense effect on biodiversity. The development would affect not only the surrounding natural land but add to the danger of losing rare species that need protection.

The land is close to the M25 and A3 junction and would increase the number of vehicles using these busy roads on a daily basis, cause further extensive use of inadequate local roads and cause further pollution. Surrey is very poorly served by public transport and any new residents would be reliant on private transport.

A new settlement here would absorb the hamlet of Ockham. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford. There is no realistic account taken of general organic growth and other proposed developments and impact on traffic and infrastructure.

Sites in East and West Horsley

There is considerable concern locally that Effingham, the Horsleys, Ripley, Wisley and the Ockham and Hatchford areas are protected from unwarranted development. But the changes to settlements that would have most effect on the Cobham area in terms of increased traffic and call for amenities, if the draft Local Plan were implemented, would be the Horsleys. Implementing proposals for Sites A36-41 would destroy the nature of the villages that make up the Horsleys. The new building suggested for these villages is excessive and disproportionate relative to the rest of the borough. It has to be asked why it is suggested that the Green Belt is sacrificed here where the protection of the Metropolitan Green Belt is highly relevant when on the other side of the borough in the Ash and Tongham areas the draft Local Plan looks to expand the Green Belt.

The reclassification of East Horsely to a Rural District Centre would allow less desirable uses such as factory outlets, warehouses, clubs etc. to be the subject of applications for planning permission. Development in these villages should not be other than from small windfall sites

Housing Target

Setting a housing target for Guildford Borough is a vital function for the Local Plan. The Trust is reluctant to get involved in the method of reaching a figure for an adjoining borough but, given what is at stake locally, considers that it has an obligation to comment and object to the figure put forward.

Paragraph 158 of the NPPF 158 provides that "Each local planning authority should ensure that the Local Plan is based on adequate, up-to-date and relevant evidence”. The starting point for that is a Strategic Housing Market Assessment (SHMA).
The SHMA does not take into account any of the constraints to development such as Green Belt, AONB, woodland, heathland, protection of flora and fauna etc. in determining an “Objectively Assessed Needs” (OAN) figure for the Local Plan. It is for the local authority to take these constraints into consideration and apply them to what is provided in the SHMA.

There has been nationwide concern, especially from local residents and community groups, even about the figures emerging from the SHMA process. In many instances the figures are considered to be inflated or otherwise inaccurate. Such inflation can occur in the hands of consultants who are inclined to favour developers. Guildford Borough Council have used G.L.Hearn as consultants and that company’s website shows that their work for developers could provide motive for bias. Local authorities can succumb to those in the planning industry acting on behalf of developers who advocate that the “presumption in favour of sustainable development” means that growth must be looked for across the board and in doing so have less regard to where there should be constraints. If local authorities overlook proper scrutiny it can also be because that development can generate income from Community Infrastructure Levy, taxes and bonuses.

For the purpose of a Local Plan it is necessary to have underlying data that is used to back up propositions. In the case of the West Surrey Housing Market Area (SHMA) for Guildford, Woking and Waverley, and prepared by G L Hearn, requests for that have met with resistance. Incredibly Guildford appear to have told the Information Commissioner that consultants have refused to give it the formulae and assumptions in the model because of ‘intellectual property’ in the model used. The Trust understands that in consequence neither the administrators nor councillors at Guildford Borough Council have had an opportunity of scrutinising vital basic information. This makes it all the more important that Inspectors test SHMAs and OANs against properly provided methodology.

The Trust understands that the process toward determining targets for future housing numbers starts with the Office for National Statistics (ONS) projection of the likely local population change for the borough due to natural change (births, deaths), net internal migration within the UK and finally net international migration.

The Trust understands that based on natural change and net internal migration recent ONS data projected that the borough population to 2031 would shrink and that it would increase only on projected net international migration based upon the abnormally high increase in the number of foreign students attending the University of Surrey (as was experienced in recent years). The ONS themselves state that this latter figure is less reliable and anyway stress that before its projections are turned into predictions their basic statistics should be reviewed in detail, with changes made based on whatever factors are deemed important in that review.

G L Hearn have assessed the housing need for Guildford at 693 dwellings per year, (13,860 overall) for the next 15 years (the result bring to add 25 per cent to the stock of dwellings in the borough with increased pressure on existing infrastructure. It is based predominantly on international migration, itself based on an increase in students. Even if desirable this is implausible particularly in a post-Referendum climate with further education being more expensive in the UK compared with other countries, evidence this week of students no longer wishing to study in the UK and a trend to distance learning. This issue should also be considered in the type of housing required. If based on any realistic forecast the University, with unused planning permissions for student accommodation on campus, should take responsibility to enable this factor to be removed from the equation for projected household numbers. This would free up affordable housing for local people, particularly the young. In any event, a separate detailed assessment should be made of the need for and type of student housing required.

This aspect of the SHMA reveals that the basis for it is severely flawed.

There is also a need in looking at housing targets to distinguish between need and demand. The latter could be limitless as in Guildford house prices and therefore demand are dictated and dominated by London house prices. The outward movement of population from metropolitan London is incapable of being satiated and was an important reason for the creation of the Green Belt.

In looking at the OAN there would appear to be insufficient evidence of the residences that Guildford town can accommodate (windfalls, reuse of empty housing, switch from office accommodation and use of student accommodation). A substantially lower number would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.
Additional observations

The Trust makes the following general observations on the draft Local Plan.

Policy S1 should go in full through the principles for sustainable development in the NPPF in full including the 12 Core Planning Principles set out in paragraph 17.

Evidence on infrastructure

The draft Local Plan seems to have again been assembled with insufficient proposals or research on the infrastructure needed to accompany proposals for housing development. There must be proper infrastructure planning for transport, educational, medical, energy, water and communications services before additional housing is contemplated. It does not seem to be understood that, for instance, bus transport is wanting and there are few facilities in the borough for any transport to rural parts except by car. There is no guarantee that the A3 will be improved in the way suggested.

Urban Development

The Trust supports higher density development in the urban area where there is existing infrastructure, although that should of course avoid over intensification. Guidelines should avoid spoiling the environment and causing congestion but much can embrace fresh thinking on urban life including pedestrianisation, cycling lanes, home zones and underground parking.

Affordable homes and homes for those on low income and the young

Market prices in the South-East mean that homes designated as affordable are just not that. That makes it even more important that developers are given no leeway from the requirements to provide a proportion of a development to be built as such. In this area there is no excuse to plead viability as a reason not to comply with guidelines. The Trust is keen that in the North Surrey area Local Plans should be formulated in a way that will provide accommodation for local people, to the young and those on low pay and that a good stock of starter homes and social housing are made available.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Lack of road and rail capacity

We object to this scale of growth when there is already insufficient road and railway capacity in Guildford. Locally, one effect of this level of growth (together with that in Waverley) will be to place an undue burden on the single-track lanes in the Tyting area, which is designated as an Area of Outstanding Natural Beauty. Additional traffic will be very unwelcome and change the character of the AONB.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Some 40 hectares of the Tyting farmland is proposed as a potential location for a SANG. In principle the Tyting Society is prepared to accept this proposal subject to a number of considerations.

- Maximising the agricultural use
  For over ten years the local community has been interested in securing the long-term future of the Tyting farmland in agricultural use. The most promising development over this long period has been the tenancy with Surrey Wildlife Trust who has successfully begun to restore this land since 2014. We therefore wish to encourage GBC to enter into an agreement for SWT to run the farm for a long period. We believe a way forward can be agreed whereby the grazing and conservation objective can be best met and be a good fit with SWT’s mission.

- Minimising footpath disruption
  From the initial plans seen to date, there are concerns regarding the extent and location of the paths in the farm and the proposed footpath accesses from White Lane and Halfpenny Lane. Both households adjacent to the path off White Lane are concerned about intrusion. The only mandatory element from Natural England is the circular route and so we support steps to minimise the interaction of cattle and free roaming dogs through a reduction is planned footpaths.

- Handling traffic and car parking
  Car parking for the SANG and additional traffic on White Lane and Halfpenny Lane are important safety and environmental issues. We are pleased to understand that no additional car park is being proposed to that currently enjoyed by walkers in the Tyting area.

- Management of SANG monies
  The Tyting Society cares about the future management of the SANG designated land as the farmland is central to
the whole Tyting area. We are keen to find a mechanism with GBC for the management and use of SANG funds involving the local community on a regular basis.
We look forward to working with Guildford Borough Council to implement the proposed Tyting Farm SANG.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Tyting Society is a Residents Association (RA) representing 88 local households. It is a member of the Guildford Residents Association (GRA), which represents 26 RAs and 4 Parish Councils. The Tyting Society endorses the response and objections that the GRA is providing to this current consultation.
The Tyting Society is also a member of CPRE. We support CPRE’s objections to the high level of housing building and that the constraints such as Green Belt and lack of adequate infrastructure have not been taken into account.
We have two specific objections to the draft Local Plan

Level of House building

We object to the average annual target of 693 houses planned to be built over the period until 2033. The evidence for this is not soundly based lacking transparency and credibility. There are also significant infrastructure constraints that need to be recognised today and not at some ill defined moment in the future.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Traffic implications for the Tyting area

The lanes of the Surrey Hills are only suited to carrying a low level of traffic, often being narrow single track roads, as is the case for Halfpenny Lane and White Lane/Guildford Lane in the Tyting area.

The combination of the scale of growth proposed in this 2017 plan and a reduction of capacity in the town centre (as indicated by the plans for the Sustainable Movement Corridor and the Town Centre Regeneration Strategy) threatens to lead to much more peak hour traffic on minor roads around the town as drivers find alternatives routes.

This potential impact on the lanes should be avoided and the character of the lanes protected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Excessive Level of House building

We object to the average annual target of 654 houses planned to be built over the period until 2034. The evidence in the Guildford Addendum Report (March 2017) is not soundly based. This high number is modelled from the demographic needs within the Borough representing some 85% of the overall projected increase.

The new evidence from GRA’s independent expert shows there is an over estimate of population growth of about 40%. The GBC proposal will result in needless loss of Green Belt and increased congestion.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
This iteration of the Draft Guildford Local Plan is an improvement on the previous draft however it still has serious flaws.

It does not provide for the pedestrianisation of Guildford from the station to the High Street.

It does not satisfactorily address the gyratory traffic congestion, traffic accidents and air pollution. Preferred Scenario 2 of the Allies and Morrison plan will reduce traffic capacity by over 30% in the town centre thus reducing accessibility and the commercial success of the town with little environmental gain.

The hypothetical reliance on the idea of the sustainable movement corridor is seriously misplaced. The narrow approach roads the Guildford cannot accommodate dedicated bus lanes and the route is such that it will be unlikely to serve more than 20% of the Guildford catchment area. There has been no research or evidence of the likely demand for this service or comparison with other routes or the effect on the existing bus services or the detrimental effect it will have on other traffic flows that will be vital to Guildford proper functioning. The £90 million budgeted for this chimera will be a waste of money.

There has been no fully comprehensive origin and destination study of traffic into and out of Guildford that should form the basis for traffic infrastructure requirements.

The proposal that I made to Guildford Borough Council over 4 years ago for a bridge over the river and railway from York Road to link to Madrid Road and Guildford Park Road together with a tunnel under Bright Hill to link York Road to Millbrook has not been properly investigated.

There has been no comprehensive plan for the future of the town centre.

There has been no proposal to comprehensively plan the Walnut Tree Close area to maximise its’ residential potential.

The housing requirement figure is excessive and more than double the historic increase in housing in Guildford and is unsustainable bearing in mind the current traffic congestion.

The A3 is already seriously congested particularly at the Dennis/Cathedral junctions due to the function of this section of the A3 trunk road as a local road. Proposals to repeat this error with a new all directions junction near the Clandon Road Junction will perpetuate this folly and make the A3 congestion a real handicap to Guildford’s successful functioning.

I attach some plans and ideas that would help give Guildford town centre a better quality environment and give some relief to traffic congestion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I have been studying the outline proposals by Guildford Borough Council for the Send area. With reference to the proposals in principle, I OBJECT to the constant change of plans which have been published over past months, both in fundamental terms as well as in detail. As an example, I have seen no earlier reference to the Garlick's Arch site, which at this late stage has become a major feature.

I OBJECT to the inevitable large increase in road traffic which would pass through Send, which is already overloaded on a daily basis. Send Road would inevitably become the main link route between Woking and the A3 trunk road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I further object to the proposal for this development in the Horsleys and to the proposal to build 2000 houses, with shops and churches, at Ockham on the former Wisley Airfield because the infrastructure is insufficient to cope with these developments and there appears to be neither the scope, the money nor the plans to develop the necessary sewage removal and treatment, the schools, doctors’ surgeries, roads and car parking. Horsley roads are narrow, unlit, often without pavements, never more than one lane in each direction, and some roads are actually single track lanes with and without passing places. The foul water sewers are old and unmapped and will need considerable investment for improvement and enlargement to cope with the proposed scale of development. There is no provision for this investment.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Station Parade East Horsley being designated a District Centre because this misunderstands the facilities provided here. For example, the grocery stores do not have the full range of groceries and vegetables that the usual household will require. I have to travel to Ripley for a green grocer’s, shop at Sainsbury’s and also have to go to Guildford for the many items that are not available in the Horsleys eg paint and hardware, clothes and shoes, dress fabrics and knitting wools.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Guildford Local Plan 2017 in particular to the plans to build on the Wisley Airfield and fields.

The site is a valued part of the Green Belt and it is therefore not legally available for development.

In addition:

I consider the site is not suitable or sustainable as a residential area because it is dangerous to walk or cycle from the site to the local train station. This is due to the lack of street lights and pavements along this narrow road which is regularly used by large and heavy vehicles causing all other traffic to pull into the verge.

Proposals for new road access to the station for cars and for cycle paths will undermine the rural identity of the surrounding area which is characterised by its unlit, pavementless, narrow country roads through fields and small villages.

I understand that a bus service is proposed but the narrowness of the road and the lack of anywhere safe for passengers to catch or alight from the bus makes this an unrealistic proposition.
The site is adjacent to the A3 road which carries very heavy traffic. The air pollution level is already very high and will become even higher if this planning application is allowed. Inevitably the levels will be greater than the levels currently allowed and thus in breach of the law. The pollution will be increased even further if residents have to use their cars to reach the station where there is already insufficient parking.

Within the time frame proposed for development of this site the access for construction traffic will heavily impact the surrounding roads which are not suitable for sustained use by heavy vehicles and will cause unacceptable disruption to the lives of local residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A12, SITE 174

The Council is underestimating the importance of short stay car parking which is essential if Guildford Town Centre is to prosper, befitting its status as the Country Town in Surrey and resist the competition posed by online shopping. Retailing is the principal function of Guildford and it needs to be protected. Bright Hill car park is ideally located to serve the shops in Upper High Street which will otherwise suffer.

Answer (if comment is on questions 1-7 of the questionnaire): ()

A35, WISLEY AIRFIELD

Wisley Airfield has been vacant for decades. All the buildings associated with its previous function have been removed. The runway is not visible from beyond its boundaries. It is located some considerable distance from any meaningful settlement within the wholly inadequate infrastructure for a development of this scale and is served by narrow winding country roads with no footpaths. It is not served by public transport. It, therefore, constitutes a wholly unsustainable
development in an unsustainable location. A recent outline planning application for its development was refused unanimously by the Council’s Planning Committee.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)
Too many rural and Green Belt sites are proposed within settlements and, in many cases, outside settlements with inadequate infrastructure, including public transport. Such sites constitute unsustainable development contrary to government advice as set out in the National Planning policy Framework. The redevelopment of Town Centre car parks for residential use will irreparably damage Guildford's function as the principal shopping centre in Surrey.

Comment ID: PSLPP16/7773  Respondent: 8566529 / Derek Corden  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I confirm that I act on behalf of the tenants of No. 4 Kernel Court, Walnut Tree Close, Alifabs Design & Construction Limited and Aluminium Building Products Limited and am instructed by them to submit comments in respect of The Local Plan.

Background

The site is presently in industrial/warehouse use and under Policy A13 on Page 153, the allocation is for 100 homes.

Para 2.8: Under paragraph 2.8 of the draft Local Plan, it is pointed out that the number of jobs in the Borough continues to grow and that new employment land is required to sustain such growth. Employment land is categorised as Bla & Blb (in effect offices) and then Blc, B2 & B8 which is, in effect, industrial and warehousing.

Notwithstanding the acknowledgement that new employment land is required, The Local Plan does not provide sufficient Blc, B2 & B8 to meet the employment needs, with a mere 4.7 - 5.3 hectares being allocated over the plan period. This
would account for a new supply of approximately 1,500 sq m per annum, which does not comply with Policy E1 in which it is stated that "we will support the retention, creation and development of small local businesses by encouraging a range of types and sizes of new premises, including incubator units, managed workspace and serviced office accommodation."

The opening paragraph of Policy E1 states that the purpose of the Policy is to "ensure an adequate supply of land is available for employment purposes".

Firstly, the allocation fails to support existing businesses, but secondly fails to make provision for employment for the new population which will arrive with the additional houses that are to be built. Thirdly it is proposed to remove this and other sites from employment use without adequate replacements. We believe that that Borough Council has a duty to provide sufficient land for Blc, and it has failed to do so.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

Page 20 sets out a vision and ambition and in particular, proposes an extension to The Surrey Research Park of approximately 11 hectares, to comprise 35,000 sq m of business premises.

The Property & Transport side of the Guildford Business Forum considers the University and The Surrey Research Park to be tremendous assets to the town and their expansion should be encouraged. However, the University is not an organisation that is prepared to build speculatively and therefore, reacts to a relatively small number of organisations who are able to plan, say two years ahead. This represents only a fraction of the market place for new occupiers, the vast majority of whom rely on premises being available in a three-six month period.

In the existing 2003 Local Plan, the Borough Council allocated their own property holdings at the Slyfield Industrial Estate as the new land supply. Once again, the land was placed in the hands of an organisation who would not build speculatively and therefore, did little to assist in providing expansion facilities for existing companies, let alone new ones. We believe that you cannot put all your eggs in one basket and this is, therefore, a flawed policy.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy E2 states that ‘proposals for new office and research and development [Use Class B1(a) and B1 (b)] floor space will be directed first to Guildford town centre, then sequentially to -

- Locations within 500 metres of a public transport interchange
- Office and research and development strategic employment .............”

Under Policy E1 an average of 5 hectares is being provided over the plan period for B1c, B2 & B8 amounting to approximately 1,486 sq m per annum. We consider this allocation to be totally insufficient to cater for existing businesses, let alone an expanded workforce and a balanced economy.

Furthermore, this document proposes losing existing B1c, B2 & B8 sites and the allocation is not adequate for their replacement, let alone expansion of the economy or catering for the needs of local businesses.

Under the section headed "B Class Uses" and in particular strategic employment sites, there are sites that are missing from here that are of major significance. For example, whilst you have identified the Guildford Business Park, you have not included nearly 16,000 sq m of offices known as G2000 and G3000 where Regus and Avaya are.

Under the heading "Industrial (Blc, B2 & BB) Strategic Employment Sites" you have noted The Guildway on the Portsmouth. This, in fact, is an office site not industrial. Within the same Policy, there is a heading "Locally Significant Employment Sites". Specific sites are mentioned at 32 Chertsey Street and 1-7 Stoke Road, Andrews House, College Road, College House, Stoke House, Leapale House and Bell Court and 65 Woodbridge Road. However, all of these sites are located within the proposed town centre boundary and therefore, surely should fall under the definition of Strategic Employment Sites in the Guildford Town Centre Employment Core.

Another site described as a locally significant employment site is The Courtyard at Wisley. It would be surprising if this totalled more than 1,000 sq m, but significantly the Plan seeks to remove a site several times larger at Broadford Park, Shalford. This provides an unusual mix of light industrial and office accommodation, which is not typically provided elsewhere in the Borough and therefore, represents a scare resource. We wonder why this is being taken away from employment use. We believe that it falls within the definition set out in 4.4.7.

Under the section "Monitoring Indicators", the source for monitoring is Planning Applications and Appeals. However, these are simply pieces of paper and not buildings within which people can obtain jobs. The Monitoring Indicators should, therefore, be buildings constructed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We believe that this is a highly restrictive policy with sequential tests originally being designed more for retail purposes than office. If you were to apply this policy to sites which have already been developed within the Borough, the vast majority of supply would not exist today. Guildford Borough Council created an SPD for Woodbridge Meadows, which was predicated on this becoming an office location. It is not within 500m of a public transport interchange and therefore, it would fail a sequential test if there were a site closer into the town centre that could be developed. Walnut Tree Park, upon which consent has been given for redevelopment as offices, would also fail this test, as would the consent granted for a fifth building at the Guildford Business Park, as this falls second in the hierarchy of sequential testing. The policy will, therefore, stagnate development.

Again under Policy E2, there is a heading "All B Class development". Encouragement will be given to business units less than 50 sq m. In reality, this is a tiny amount of accommodation and unlikely to ever be built. Consideration should be given to increasing the size of this.

Page 68 - Reasons justification

Under Clause 4.4.22, the Employment Lands Needs Assessment, concludes that there was not enough capacity to accommodate all of their growth in the town centre and on existing strategic employment sites. However, this contradicts the concept of a sequential test where, if there was a site available to be developed in the town centre, nothing outside that could be built.

Para 4.4.23 also contradicts the restrictive policy behind the sequential test, given that there is a desire to ensure that buildings are available. Whilst development in the most sustainable locations is a laudable target, we do not live in a perfect world where this can be created and flexibility within the Local Plan is an important factor.

Monitoring Indicators

Under the monitoring indicator for Bl©, B2 & BS, the target is to have 100% of permitted development on industrial strategic employment sites. This is too restrictive. Under the section for small business units, the target simply states "percentage of B Class development proposals incorporating units of less than 50 sq m". This is not actually a target as a target has to be a proposed figure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
D2 use, and sui generis uses. To have to market a building for potentially over 2 years to create say 10 jobs, when say 50 jobs could be created tomorrow by an alternative use in the above categories, would seem not only ludicrous but also render the Borough uncompetitive and fail to provide opportunities for not only the existing residents in the Borough, but also those in the new houses that are to be developed during the planned period.

Land is being taken away from employment uses without adequate provision for their replacement and the Borough is putting all its eggs in one basket with its allocation of land at the Research Park.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

This states that GBC would maintain employment capacity and improve employment floor space. As stated above, this is not catered for in the B1c, B2 & B8 categories. Policy E3 strengthens retention of employment land, but the loss of Kernel Court to residential flies in the face of this new Policy. This is notwithstanding that the Policy against loss of employment land is undertaken on a sequential test; i.e. those closest to the town are protected most. Kernel Court is on the border with the town centre and close to the major transport interchange of the railway station.

There has been no attempt to market the site for employment purposes, nor to offer the premises to the tenant who wishes to remain.

The site is in a sustainable position allowing the employer to recruit staff using public transport.

I trust that the above comments will be taken into account when considering changes to The Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Para 4.4.25 states that the Policy "seeks to protect floor space to accommodate existing and future demand". This is contrary to many of the proposals to take employment sites away in the town centre and examples such as Broadford Park at Shalford.

Within Policy E3, any change of use on a strategic employment site has to be backed up by marketing "for a continuous period of least two years". This effectively is discretionary by virtue of the words "at least". The Borough Council are, therefore, in total control, whether this is 3, 4 or indeed 5 years or indeed even more. We suggest that the words "at least" should be removed.

In relation to locally significant employment sites, the same comments apply, where there is a requirement for at least 18 months and in relation to general floor space again the words "at least" should be removed.

The penultimate paragraph in the greyed out section of Policy E3, reference is made to "once the period of comprehensive and active marketing is achieved, any other suitable employment use should be considered before change of use to residential or other use will be permitted".

We are advised by Guildford Borough Council that the definition of employment use is specific and limited to B1(a), B1(b), B1(c), B2 & B8. In reality, therefore, there are no other suitable employment uses.

However, this is an area in which we have highlighted a serious practical concern over the Local Plan. In reality, there are multiple Planning Applications each year for sui generis uses which, by definition, fall outside the definition of employment land and examples of which include all of the car showrooms located on the Slyfield Industrial Estate. A warehousing building on the Slyfield Industrial Estate would need at least 2 years’ marketing, could be 3, could be 4, could be 5 and could be 10, depending on an individual Planning Officer’s view. There is no specific allocation for sui generis uses in the Local Plan and yet they typically come from employment land and typically employ large numbers of people. Their loss from their technical use of employment land to the sui generis use, does not, in our view, create issues. The buildings are likely to be capable of re-use for alternative employment uses in the future and this requires to be dealt with under the Local Plan.

Similarly, the Borough has always accepted the importance of the leisure industry. There are numerous buildings which are dedicated to health and fitness and entertainment, which have come from previous employment uses. Examples of these include the Borough Council’s own building in Midleton Road, which is now a trampolining centre, the Rock Climb on Cobbett Park on the Slyfield Industrial Estate, the gymnastics facility at Pew Corner on the Portsmouth Road and various private fitness gyms and pilates premises in the town centre. In a world where obesity is described as a huge problem, these facilities should be actively encouraged and specific provision made for a change of use from employment land. Other examples include The Guildford School of Acting and PPA (Performance Preparation Academy), both of whom employ large numbers of people and the provision of which is regarded as good for the Borough.

Further examples would include medical uses, which we have seen on the Research Park and which surely must be an increasingly important part of the UK’s future. There is no specific allocation of land for these uses and they will occur on an ad hoc basis, but will need to be derived from employment land. Again, large numbers of people are employed in such facilities and they have to be regarded as good for the town. Why, therefore, is the Local Plan lacking in consideration of such matters?

There seems to be a desire for Guildford to aim for higher added value jobs. On paper, this is fine, but you do not have the tools within this Local Plan to facilitate that.

Within the Guildford Business Forum, we believe that the UK following the vote to leave the European Union must be flexible and adaptable and buildings and land should not remain empty whilst owners seek tenants that may not exist when demand for other uses that will employ people does exist. How can this possibly be in the interests of the Borough and critically, the residents within this Borough? The use categories do not reflect fully the world we live in and do not have the flexibility to cater for not only today’s real world uses, but also future uses.

Para 4.4.27

In relation to evidence of active marketing, there is a requirement to offer premises at a competitive rate and a reasonable market rate. Who is to decide what is competitive and what is a reasonable market rate? The Borough should also bear in
mind that owners of buildings will very often have mortgages where the lender's view and the Borough's view may be at odds.

There is also a requirement to demonstrate that there has been flexibility in space offered, including dividing up larger areas of floor space where this is possible and making alternative layouts. If you take Guildford Borough Council's own building at Midleton Road, which was let to a non employment use by the Borough, this would have required them to divide this space up, to let off offices separately at the front of the building. The Policy goes even further advising that Guildford Borough Council in that above example should have looked at alternative marketing strategies, including management of the space by specialist third party providers. The suggestion behind this, therefore, is that if a 20,000 sq ft building could attract demand from a 1,000 sq ft tenant, then the land owner would be expected to make that space available on competitive terms and potentially prejudice the rest of the building. This is draconian as a policy.

Given how restrictive and demanding this Policy is, it should be very carefully considered in terms of implications.

Policy 4.4.31 advises that "employment floor space would be protected and the release of existing sites would be managed". The word managed has huge implications. Firstly, please advise how the Borough intends to manage the release of sites, as this implies a controlled process and also it advises that the Borough Council will ensure, by this management, that there is sufficient supply to accommodate existing and future demand. We do not believe that the Borough Council has the ability to do this and would wish to understand what their proposals are.

Para 4.4.32 advises that "there is no specific guidance on an appropriate period for marketing.....".

The Policy on the previous page no. 70 does give specific guidance on the appropriate period of marketing and we feel that this clause is, therefore, contradictory.

Answer (if comment is on questions 1-7 of the questionnaire): ()

It was noted during the meeting that policies in the draft Local Plan are predicated upon confirmation by Highways England that the M25 will be widened between Junctions 10 and 16; the A3 M25 Junction 10 will be improved and the congestion associated with the Guildford by-pass will be resolved. Whilst the Borough Council cannot be blamed, the fact that Highways England are unable to confirm this at the present time, or indeed under any short-term timetable, we feel leaves the Borough in a very uncertain environment and those parties relying on the policies somewhat in no man's land.

We believe that a clear statement is required to understand whether the policies in the existing 2003 Local Plan will apply under such circumstances or whether the new policies proposed in this document will apply.

This policy specifically relates to land previously developed and under Para B there is the need for a sequential test. Whilst this may be a Government requirement, it is nonsense if the existing buildings on the site flood already. There should be total encouragement to redevelop such sites, almost above all others, to ensure that those buildings are taken out of flooding, given that there is inevitably betterment. To put obstacles in the way of betterment can make no sense whatsoever and will prejudice the ability to create a vibrant town centre which already has a paucity of land for development.

It has also been pointed out by this Group that there are no proposals in this Local Plan to seek to create additional flooding capacity upstream of the town centre in order to either reduce or completely eradicated town centre flooding. We have suggested lowering the Shalford Flood Plain to protect the town and wish to understand if this is a suggestion that has been fully explored. If it has we wish to understand the reasons why it has not been implemented.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I wish to object most strongly to the proposed change to the Shalford Green Belt and Settlement Boundary contained within the new version of the Guildford local plan.

These changes, to which over 700 residents signed a petition objecting to the proposed settlement boundary change last year, will destroy the open character of our village. The fields provide a wonderful setting for the local community facilities, the tennis club, the bowls green and the village halls. The elevation of the land, some 32 feet above King’s Road, if built upon would tower over these community facilities and the surrounding area.

Access to the proposed site is via Chinthurst Lane, an already a very heavily congested country lane, where parking is currently unrestricted. During the daytime there is nose to tail parking from King’s Road along to Ashcroft and access along the lane is at best difficult, and at worst, a fatal accident waiting to happen.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

It is not clear if the housing actions achieve the housing objectives. There should be a table showing housing mix and total unmet housing need today and at, say, 5 year intervals for the life of the plan so that the outcomes can be compared with the objectives.

There are no apparent quantified objectives for why the plan creates 69,800m2 of employment space and 3,200 jobs rather than any other number. Is the plan to create opportunities for local people or to encourage more people to move to or commute to Guildford? Will development concentrate on high salary employment and if so in what proportion?

The assessment of the soundness of the infrastructure plans appears to rely on a model. It is not clear how the model has been validated. Looking at plans for Flexford, for example, it is hard to see how extra road traffic could be accommodated even with improvements. A better rail service would help but access to the area is already difficult and dangerous at peak periods.

The plan hopes development can be kept in line with infrastructure improvements but it takes longer to improve infrastructure than to permit development. It is not clear how this objective can be achieved.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

There is a suggestion of a road tunnel for through traffic. The entrance and exit points are not known, the route and full cost are not clear. It is not certain who would pay and how much risk indecision might bring. In principle, however, a road tunnel would reduce costs for everyone trying to get past Guildford and make it easier for Guildford to develop and should be supported.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

17. I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
18. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology I believe is inaccurate; inflating the needs of the borough by distorting student numbers. It is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. **This is not democratic and is not appropriate for consultation of the Plan.**

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

---

1. **I OBJECT** to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land: all requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow,
winding road through West Clandon, a road where large lorries mount the pavement every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
15.1 OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site.

Why was a brownfield site removed and replaced with a Greenfield site?

There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites.

Development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
16.I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition of north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

8.I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

8 OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3161  Respondent: 8568193 / Miss Edwina Attwood  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
5.1 OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3162  Respondent: 8568193 / Miss Edwina Attwood  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

6.1 OBJECT to the location for new employment floor space at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floor space will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floor space to be located at Garlick’s Arch, when just to the south, at Burnt Common, there is existing industrial development, with surplus land that could accommodate further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3163  Respondent: 8568193 / Miss Edwina Attwood  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
7.I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. POLICY E6 - The leisure and visitor experience

I OBJECT Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for “overdevelopment”. Heritage sites and the Green Belt are particularly vulnerable.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travel card for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust the objections made above are fully considered and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford Borough already has a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. POLICY H3 – Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

9.1 OBJECT due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages already suffer from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on local roads.

Many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, West Clandon included, already suffer from traffic congestion. Development around these villages will result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become ever popular, particularly at weekends with hundreds of cyclists passing through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements, as they often need to.

10.1 OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
Despite the Garlick’s Arch site (A43) being significant for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents will see their quality of life significantly deteriorate.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send, will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is not sustainable.

There is no provision for the increased capacity of Guildford hospital, where is this assessed and remedied?.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

11.1 OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I worry that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situation worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
12.1 OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Answer (if comment is on questions 1-7 of the questionnaire): ()

3.1 OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’) and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and neighbouring villages merging into each other. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Answer (if comment is on questions 1-7 of the questionnaire): ()
4.I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. I am aware that this site often floods during winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

1.I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

1.1 OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a lasting detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will not be able to cope with the proposed level of development. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s
Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3157  Respondent: 8568193 / Miss Edwina Attwood  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2.1 OBJECT to the Borough Wide Strategy (Policy S2)

1. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

2. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

3. The Housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any commonsense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of
the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4527  Respondent: 8568193 / Miss Edwina Attwood  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4528  Respondent: 8568193 / Miss Edwina Attwood  Agent:
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon.
The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send, and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send, and Ripley, the roads serving the village will become even more congested. Cycling has become a popular pastime, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Answer (if comment is on questions 1-7 of the questionnaire): ()
This is green belt land and suggest you concentrate on re-using brown field sites in the area, such as the whole of the Wisley airfield site. The road of Send Hill is far too narrow and is congested to the point of being impassable during school morning and afternoon traffic periods to the point of already being a “no go” area to the existing residents during those times. Why does the Council persist in these lines of thought when obvious brown field sites should be used more readily and legally, without the need for pointless consultation when brown field sites are available to such an extent as they are in this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the above Policies A42, A43,A58 and Green Belt Policy 2 at paragraph 4.3.15 since I consider any encroachment on Green Belt areas is morally and environmentally wrong - given the Brown Field Sites available in the area (including, for example, most of the vast Wisley Airfield site).

Local Plan 2017 is a clear failure of the proper planning process which was the basis of all the tens of thousands of objections to it in its previous guise of Local Plan 2016. However, local Plan 2017 has ignored all those earlier objections and proceeded with even worse schemes, bearing in mind the clearly inadequate surrounding social infrastructure and road links.

Please desist from wasting tax payers' money on such pointless anti-social planning exercise and listen to the wishes of those tax payers in the future.

1. **Evidence. I OBJECT** Data presented by GBC is suspect and estimates of required housing is exaggerated. I object to excessive development in green belt for housing that may not be needed and the effect on infrastructure of this development. If the council needs to provide 'affordable homes' this will need to be high density on possibly brown field sites to have a chance of being 'affordable'.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

| 1. **Policy A 43.30 Land at Garlick's Arch:** I object This is A NEW INCLUSION and whilst I see some merit in improving A3 access the effect on Send and the A 247, which cannot be sufficiently improved, would be likely to create 'gridlock' This doesn't seem to have been thought through! Garlick's Arch is again a massive incursion into the green belt to which I object. This seems to have replaced the Burnt Common site which would have had less impact on the area and I understand is classified as a brown field site. |
| Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( ) |
| Answer (if comment is on questions 1-7 of the questionnaire): () |

| 1. **Policy A44.1.9 Land to the west of Winds Ridge and Send Hill.** |
| This site was not included in the draft and has not been consulted on previously. I object as this is part of the green belt and part of open countryside. In past years substantial land fill has taken place and it is still vented. Access is by narrow lanes which cannot cope with extra traffic generated. I believe part of this site or adjacent land is already owned by a Traveller family, which if site were developed far more than 2 traveller pitches would appear. 40 Homes, if needed, would be better provided on the burnt common site which seems to have disappeared from the latest version of the plan. |

As a resident in both West and then East Horsley for many years I wish to record my Strong OBJECTIONS to the current Plan for the area as a whole and my Villages in particular.

My main reasons are as follows :-

1) The vast increase in houses proposed, of various types. bears no relationship to the very modest needs of this virtually rural area

2) The proposal to adjust the Green Belt area, attacks the original grand concept in its development as a “breathing space” for London.

3) The Horsleys have an important heritage status and lie within the Surrey Area of Outstanding Natural Beauty.

4) The Villages already suffer from the overload of their Schools, Shops, Doctors Surgeries, Roads and Parking. It is ALWAYS the case that such vital facilities are the very last to be increased within Housing Developments of the scale proposed.

Any change to aspects such as these would affect the everyday life of current and potential new members to an unacceptable degree, in my view.

Please give my opinion consideration in your proposed study of Plan

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• Woking Borough Council will be concerned if there are any unmitigated traffic implications of the development proposals in the Guildford Local Plan that would have adverse impacts in the Borough. The development of some of the strategic sites identified in the Local Plan such as the Former Wisley Airfield would potentially have significant traffic implications in Woking if the impacts are not addressed. The implications of developing the proposals in the Plan on the road network such as the A3 corridor would be severe if appropriate mitigation is not identified and delivered as part of developing the sites. Appendix C of the Local Plan sets out the transport infrastructure projects identified to support the delivery of the Plan. This includes a number of projects to improve the A3 corridor and other road networks with indicative costings and funding sources. Woking Borough Council is aware that Highways England is still in the process of testing various options for A3 corridor improvements. The outcome of this work is not yet known. It is expected that the outcome of the work will be reflected in the Local Plan and if necessary used to refine the projects set out in Appendix C. Any adverse impacts should be appropriately addressed to ensure the sustainable delivery of the Local Plan without exacerbating the existing traffic conditions in Woking.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1923  Respondent: 8569857 / Woking Borough Council (Ernest Amoako)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

• The Local Plan should be supported by adequate infrastructure, in particular, educational facilities. This is necessary to avoid any additional pressure on existing infrastructure in Woking Borough. Appendix C sets out the education facilities identified to support the Local Plan. However, unlike the early years and primary school provision, the provision of secondary schools has no delivery timetable and who is likely to deliver. It is clear from the evidence that to deliver the housing requirement, the education infrastructure in Appendix C will be necessary. Consequently, it will be helpful if indicative dates for their provision are provided and are aligned to when development are likely to come forward.

• On a minor point, the Local Plan would be further enhanced if it includes a section on how it will be implemented and the conditions for its review.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8114  Respondent: 8569857 / Woking Borough Council (Ernest Amoako)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The protection of the Thames Basin Heaths Special Protection Area (SPA) is a strategic issue of significant interest to all the local authorities with SPAs within their boundaries. A Joint Strategic Partnership Board has been set up to ensure that a strategic approach is taken for its protection. In accordance with the relevant legislative guidance, it will be helpful if the policy is drafted to avoid harm to the SPA rather than its current focus on mitigating identified adverse impacts. In this regard, an indication in Policy P5 of whether Guildford Borough Council has identified sufficient SANGs land to meet its development needs would be helpful.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Overall, it is acknowledged that the Guildford Local Plan has made a significant attempt to identify sufficient land to meet the full objectively assessed housing need for the Borough for the entire plan period. In particular, the Plan makes provision for the delivery of 13,860 new homes between 2013 and 2033. This is equivalent to 693 new homes a year. In additional, the Plan identifies land to deliver about 1,984 new homes as a buffer to ensure early provision, flexibility of delivery and the deliverability of the housing requirement. This will make a significant contribution to housing provision in the Housing Market Area, and is commended. However, the Council would like to make the following detailed comments:

- Paragraph 47 of the National Planning Policy Framework (NPPF) emphasises that local authorities should use their evidence base to ensure that their Local Plans meets the full objectively assessed needs for market and affordable housing in the housing market area. Paragraph 179 goes on to say that joint working should enable local planning authorities to work together to meet development requirements which cannot wholly be met within their own areas. The Council is aware of the information that Guildford Borough Council has provided to demonstrate that the unmet need from Woking cannot be met in Guildford. Once this evidence is agreed at the Examination, the Council is willing to cooperate with Guildford and Waverley Borough Councils to find ways of how the unmet need in the Housing Market Area can be addressed. It is recognised that discussions have already started between the three authorities on this particular issue and it is envisaged that this will continue. The three authorities should also monitor housing delivery against their housing requirements to see whether any measures will be necessary to facilitate housing delivery.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Thank you for giving Woking Borough Council the opportunity to comment on the Guildford Borough Proposed Submission Local Plan: Strategy and Sites. Woking, Guildford and Waverley Borough Councils are in the same Housing Market Area and Functional Economic Market Area and as such have common strategic cross boundary issues of interest to be considered as part of the plan making process. Under the Duty to Cooperate, Woking Borough Council has already worked in partnership with Guildford Borough Council to scope the common strategic issues of interest, including housing, transport and infrastructure provision, and in particular, the traffic implications of your plan in Woking. Officers from both authorities have signed a Memorandum of Understanding to work together to address both current and future strategic cross boundary issues. So far, the partnership working between the two authorities is positive and purposeful. It is important to highlight that Woking Borough Council is also in the process of preparing two Development Plan Documents, and the Duty to Cooperate discussions have been and should continue to be a two way dialogue between the two authorities to the mutual benefit of our respective Plans.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Overall, it is acknowledged that the Guildford Local Plan has made significant attempt to identify sufficient land to meet the full objectively assessed housing need for the Borough for the entire plan period based on the addendum Strategic Housing Market assessment undertaken by your Council. In particular, the Plan makes provision for the delivery of 12,426 new homes between 2014 and 2034. It is noted that the original figure in the West Surrey SHMA is 13,860 new homes. This is equivalent to 654 new homes a year. In addition, the Plan identifies land as buffer to ensure early provision, flexibility of delivery and the deliverability of the housing requirement. This will make a significant contribution to housing provision in the Housing Market Area, and is commended.

However, the Council would like to make the following detailed comments:

- Paragraph 47 of the National Planning Policy Framework (NPPF) emphasises that local authorities should use their evidence base to ensure that their Local Plans meets the full objectively assessed needs for market and affordable housing in the housing market area. Paragraph 179 goes on to say that joint working should enable local planning authorities to work together to meet development requirements which cannot wholly be met within their own areas. It is therefore expected that Guildford Borough Council will use the Local Plan process to meet the unmet housing need arising from Woking Borough. The Council is aware of the information that Guildford Borough Council has provided to demonstrate that the unmet need from Woking cannot be met in Guildford. Once this evidence is agreed at the Examination, the Council is willing to cooperate with Guildford and Waverley Borough Councils to find ways of how the unmet need in the Housing Market Area can be addressed. Waverley Borough Council has just been through their Local Plan Examination and the unmet need from Woking was a key topic for discussion. It is recognised that discussions have already started between the three authorities on this particular issue and it is envisaged that this will continue. The three authorities should also monitor housing delivery against their housing requirements to see whether any measures will be necessary to facilitate housing delivery.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The maps have different ratios which can be rather misleading in terms of comparing one with another.

The map for Compton suggests that the dotted pink line is the boundary line for the village when in fact this is just the village settlement area. The wider village includes Priorsfield Road and The Avenue and Down Lane and parts of New Pond Road and the Hog's Back and Blackwell Farm, all of which are missing. Common land should ideally be marked up. Blackwell Farm is currently shown on a map called 'Guildford Urban' which of course does not exist and hence this could be misleading.

Policy A55

I object to the removal of land from Greenbelt for the provision of two traveler pitches on Puttenham Heath Road to 'enable delivery'. The area warrants Greenbelt status and should remain in Greenbelt. Removal is a big step towards the eventual development of permanent accommodation, which would result in loss of the two pitches. I understood that temporary approval for one was given due to the exceptional circumstances put forward by the traveller's solicitor at the hearing. On this basis there is absolutely no need to remove greenbelt status.

I object to policy A26 Blackwell Farm There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints. Blackwell Farm is located entirely within the green belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Blackwell Farm performs all five functions of green belt, and fulfils purposes 1, 3 and 5 very strongly. Purpose 1 - “checking the unrestricted sprawl of large built-up areas”. There is huge pressure to develop on the western edge of Guildford; the University of Surrey has stated publicly that its key objective is to develop the whole of its landholdings, stretching west to Flexford Farm. This, combined with the indefensible boundary being proposed (a hedgerow rather than the existing belt of ancient woodland), will put more of the green belt and the Surrey Hills Area of Outstanding Natural Beauty (AONB) at risk of future development. Purpose 3 “assists in safeguarding the countryside from encroachment” - the proposed movement of the green belt boundary on the west of Guildford to allow for development of the University in 2004 resulted in the encroachment on countryside and the loss of working farmland (including some Grade 2) at Manor Farm. The proposed future change in the boundary would result in further encroachment and the loss of farmland including further Grade 2. The proposed road development with access road from the A31 would also effectively cut off farm access to the south of the development area leading to further urban influence on this countryside. The University’s stated key objective is to develop land, which includes Chalkpit and Wildfield farms leading to the risk of further boundary change and further encroachment in future years. Purpose 5 - “assists in urban regeneration by encouraging the recycling of derelict and other urban land” Whilst all green belt assists towards this purpose, the ownership of this land by the University of Surrey with its extensive landholdings within the urban boundary (including land it leases to the Hospital and Holiday Inn, the Surrey Research Park, Hazel Farm as well as two large campuses) means that the location of Blackwell Farm within the green belt plays an even greater and direct role in encouraging the more efficient usage of urban land. Stopping development on Blackwell Farm would result in the University of Surrey investing in, and regenerating, land in its ownership and delivering its commitments following the 2003 boundary review (including 270 homes for key workers, 3,125 student residences and releasing further accommodation at Hazel Farm). The University has 17 hectares of surface car parking that could be built over with offices and flats. This is a more sustainable option than building over open farmland (largely grade 2 and 3a) within the green belt. The Blackwell Farm development would result in harm to the Surrey Hills Area of Outstanding Natural Beauty (AONB), harm to an Area of Great Landscape Value (AGLV), and harm to the setting to the AONB. (Blackwell Farm forms the views into and out of the Hogs Back ridge). The NPPF is clear that AONBs should be afforded the highest level of protection in relation to landscape and scenic beauty. All development proposals within and adjacent to the AONB must conserve or enhance its special qualities. The NPPF also makes it clear that applications for major development in the AONB will be refused unless exceptional circumstances are demonstrated and the development is proven to be in the public’s interest. Guildford Borough Council has not shown that the proposed housing development or the extension of the Research Park, or the proposed link road from the A31 to Gill Avenue, is in the wider public interest. Indeed, the increased traffic through the already congested Egerton Road/Gill Avenue junction, which would result from the development, would impede emergency vehicles travelling to the Hospital and this would be very much against public interest. GBC’s Policy P1 states that, “The Surrey Hills Area of Outstanding Natural Beauty (AONB) will be conserved and enhanced to maximise its special landscape qualities and protect it from inappropriate development. All proposals will be considered against whether they conserve and/or enhance the setting and views of the AONB”. I question how the proposal to carve a new two-lane carriageway through the AONB fits this policy, or meets para 115 of the NPPF? Finally, nearly the whole site has been identified as a “candidate area” for AONB status in the Landscape Evaluation Study commissioned by Compton, Worplesdon and Wanborough parish councils. Therefore, the entire site should be treated as though it is within the AONB during this local planning process. The access to the proposed Blackwell Farm site will put additional peak hour pressure on two of Guildford’s worst congestion “hot spots”: the A31 (Hog’s Back) and the Tesco Roundabout on Gill Avenue. GBC’s proposal to create a new major route into Guildford from the west at, or close to, the Down Place private driveway, and to make this the main access to the planned Blackwell Farm development, does not appear to have been thought through. There are queues stretching back from the Farnham Road Bridge as far as the Down Place driveway entrance most weekday mornings and any traffic generated by the new development would not be able to clear the junction. In order to accommodate the volume of traffic using the new junction (generated by residents of the new housing estate, employees at the Surrey Research Park, Hospital and University, and visitors to the new school/supermarket), there would almost certainly need to be a roundabout (rather than the proposed traffic-light controlled junction) and GBC has ruled out a roundabout on grounds of landscape impact and traffic. The secondary access to the site at Gill Avenue also presents problems, and as GBC states in its Transport Assessment (14.9.5), changes planned for the Tesco roundabout will not mitigate against the increased level of traffic through the junction as a result of the Blackwell Farm development, and this in turn will impact on the Egerton Road/Gill Avenue junction, which serves the Royal Surrey County Hospital. I question whether it is responsible to allow a development that would impede
emergency access to an A&E department and a major incident unit. The traffic impact resulting from the development of Blackwell Farm on the strategic road network would not appear to be properly assessed but it would be alleviated in part (but not completely) by widening the A3. However, timing and funding for this work is unclear so there would be many years of traffic chaos before any widening took place (if indeed it does). More significantly, the widening of the A3 would create noise and environmental impact on the neighbouring residential areas of Onslow Village and Beechcroft Drive and a six-lane highway would cause greater severance between Guildford and Blackwell Farm and areas to the west. The NPPF states in Section 6 para 47 that local authorities should “identify a supply of specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15”. In a footnote to this, it further adds, “To be considered developable, sites should be in a suitable location for housing development and there should be a reasonable prospect that the site is available and could be viably developed at the point envisaged.” I consider that the proposed access arrangements to Blackwell Farm are wholly inadequate for a development of this scale and thus the site cannot be “viably developed”.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of Blackwell Farm in this Local Plan, for the following reasons:

- The southern slopes of the Hog's back are AONB and views in and out of that area should be protected and this is not possible if the development goes ahead.
- Blackwell Farm has recently been assessed by an independent expert as being of AONB quality and we anticipate that it will be included within the Surrey Hills AONB as part of the forthcoming boundary review.
- The South Downs is National Park and there has been a call for the North Downs to be considered in the same light. This would make Blackwell Farm a great asset to Guildford and a tourist attraction (particularly as it is home to one of the few Model Farms in the South East) and would fit in well with the rural ventures such as Greyfriars Vineyard, Mane Chance horse sanctuary and Watts Gallery, all of which are in close proximity.
- Blackwell Farm is very effective in fulfilling the functions of Green Belt.
- Blackwell Farm land which has been categorised as the best and most versatile (Grades 2 and 3a) and there is strong demand for local food production.
- More people objected to the inclusion of this strategic site than to any other strategic site, its inclusion is not supported.
- The 4-way access to the site on the A31 (Hog’s Back) is highly unlikely to be viable, and would harm to the AONB for miles (due to the need for lighting and its elevated position). The suggestion that rat running could be deterred through the use of automatic number plate is unrealistic. What about visitors and deliveries and changes of vehicle? Likewise, a barrier would cause chaos and possibly increase the volume of traffic wishing to use the A31. If no restrictions were put into place, the route will become a rat run, then there is nothing from stopping traffic on the A31 from using it if it is indicated as the shortest route. If the A3 were congested traffic could also come off at the Compton roundabout and take this route via Down Lane, which would add to congestion in this busy village and would negatively impact the tranquil lane, which is the home of Watts Gallery and Chapel.
- Maps, tables and results from assessments such as traffic impact all refer to the Blackwell Farm site as in “Guildford urban area” and refer to non-existent boundaries as if they are current. There is nothing urban about this area of countryside as the independent landscape assessment reveals.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy D1 Making better places

I would support this if this were about regeneration which is what it should be about. Instead GBC would like us to think that building 3 sites of approx 2000 homes and two of approx 1000 can be considered 'better places than the countryside they currently occupy? The only site of the 5 that I would support as a form of regeneration is Slyfield.

The monitoring indicator might be better served to take on board the number of objections based on poor design rather than appeals?

I am pleased to see a policy that acknowledges older people in Guildford but I am concerned about the blurring between urban and rural living and design. It is not appropriate to create better living spaces in town at the expense of villages whose character and quality of life is being eroded due to coalescence and traffic. Better places is not just about bricks and mortar, it must allow village life to remain just that and not become urbanised. The policy is one-sided and narrow, it does not take on board the many aspects of life that create 'better places', but instead concentrates on the appearance of buildings. I believe this is a good start but this policy needs developing.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Policy D2 Sustainable design, construction and energy Sustainability should be an overarching ambition, conditioning the whole local plan and running through it, as claimed in the NPPF, “like a golden thread”. It should be set out clearly in Policy S1, not buried away as a minor detail in Policy D2. This policy amounts to “greenwashing”, expounding aspirational environmental targets while ignoring the plan to build dormitory towns across the Green Belt that are environmentally and socially unsustainable. These settlements will bring vastly increased car use and will lead to unacceptable traffic congestion, overstretched social infrastructure, and more greenhouse gas emissions, noise and light pollution. This policy should not be just about saving energy but about preserving the borough’s stock of natural capital, especially the countryside, from attempts to rig the housing market. This policy’s emphasis on Combined Cooling Heating and Power and communal heating networks is difficult to understand, since no such networks are available locally.

I am unsure of how 4.5.27 will apply to strategic sites with mixed development without a pool? Surely by their very nature ie 1000 houses plus, they will use a lot of energy and create a lot of waste?

Future proofing some houses for independent living for elderly should also be built into new builds at the planning stage. Given the ageing population, this would appear to be a serious omission. Elderly relatives can be looked after by relatives if a percentage of smaller bespoke homes are built for this purpose. This might also free up much needed family homes. The introduction of technology to new homes such as telecare / medicine would also help future proof homes and as Surrey is a leader in faster broadband applications this should be viable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This policy doesn't go far enough. I, therefore object to policy D3 Historic Environment.

This policy clashes with the strongly pro-development agenda of the rest of the plan and fails to address the contradiction. History is unamenable to improvement, so the policy should commit the Council firmly to protecting and preserving our heritage assets from development. Instead, the specific policy pledge to “support development” that might “enhance” heritage assets leaves wide scope for abuse in the form of destructive commercialization and financial leveraging of relevant sites. This policy is based on the false premise that Guildford’s heritage is inherently in decay. This is a developer’s charter – a short step away from the idea that the historic environment needs to pay its way to be preserved. The Council’s reviews of Guildford Museum and the Electric Theatre support this interpretation. Whatever the “reasoned justification”, the actual policy wording in the blue box leaves too many loopholes. Development close to historical assets is harmful and should be expressly prohibited. This policy fails to meet the requirements of NPPF paragraphs 126 and 131-133.

We are very lucky as we have several noted historians in Guildford who really do understand history and its relevance and importance and not just in terms of buildings or how to make money from it. They are however not listed or even consulted (according to them). Indeed, their opinions are often unwelcome which does not give me faith in the sincerity of this policy.
History is more than just buildings, it can apply to gardens and aspects that have influenced the changes in the town and villages. The area next to the fire station in Guildford has one of the biggest prehistoric finds of flint weaponry, yet few know about it. GBC was given the opportunity to purchase the home that Lewis Carroll stayed in but did not, this was a lost opportunity. Quarry Street is awash with offices, yet could be a unique historic quarter if it were conserved rather than exploited.

4.5.45 I disagree that GBC meets NPPF requirements. The Conservation dept. at GBC is so small (1 permanent member of staff and possibly a part-timer, I think), that it cannot work effectively. If GBC wishes to take this policy seriously it must put adequate resources in place to make it workable. I recently notified the department of a house that met Grade II listing requirements but was pointed to the English Heritage website and hence completed all the forms and site visits and justification, myself. The Rectory in Compton is now Grade II listed, but simply stating that you support such endeavors is not good enough. Resources must be in place to permit timely and adequate response and action.

4.5.42 There is a historic monument in the grounds of Blackwell Farm, this area is completely neglected and any visitor or walker would not even know it was there as it is covered in weeds and bushes. I have seen this for myself and if GBC had the resources to send someone out on a site visit they would have to concur. Blackwell Farm is also the site of a Historic Park and given its close proximity to Watts Gallery and Limnerslease and Greyfriars, the entire area could become an area of local and National importance but instead, the University wishes to build 1,800 houses on it? How does that comply with this policy?

Attached documents:

Comment ID: PSLPP16/2198  Respondent: 8570273 / Fiona Curtis  Agent: Fiona Curtis

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy D4 Development in urban areas and inset villages.

This policy that does not address the opportunity for building in the urban area. The plan envisages that 40% of homes built will be “affordable”, but this does not provide any accommodation for low-paid workers, for example, those on the minimum wage, who cannot afford to buy so-called “affordable” homes or pay an “affordable” rent. There is a need for some expansion in social housing, especially in urban areas, where there is a greater concentration of low-paid workers such as those employed in the retail, warehousing and distribution sectors (all of which this plan aspires to expand). The number of homes planned in the urban area is much too low. There is a glaring need for regeneration in many urban areas, particularly Guildford Town Centre but this is ignored in favour of building homes on greenfield sites instead. This will not address urban housing needs. It is also unsustainable, since building outside the town does disproportionate harm to road traffic, air quality and overstretched infrastructure. The plan envisages a large expansion of the retail sector, but this is hard to justify because the sector is in rapid and continuous decline.

In Compton conservation area one house is currently being built. Having experienced dust, noise, vibration, traffic lights, traffic congestion etc it is hard to see how building many more houses in other areas can avoid the same? Is policy D4
workable? Building houses is a noisy messy business or is this policy just paving the way to build the vast majority of houses on green fields?

Does planning in other areas including conservation areas have such protection? I agree that it should, but this level of protection should apply to all areas and not just in the town and inset villages.

Some areas may conduct their own landscape character assessment and this should be permissible.

Building is permitted in settlement areas in way of infill and this should be subject to the same level of protection.

Given the need for up to date design, I would say that anything written in 2004 is probably dated in terms of design (pink box)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy E1 sustainable employment

I note that there is a significant reduction of between 71% and 79% in the previous job target and resultant 79% reduction in employment space in response to the many objections lodged in 2014 against an unsubstantiated agenda for economic expansion in the last draft and based on new findings by Aecom in the latest ELNA 2015. I have concern as to the ill-informed clustering of all B classes in terms of the clarity of market evidence required to inform effective planning and a failure to provide a clear understanding of business needs required under Section 160 of the NPPF. I also note the dramatic reduction in assessed demand by two Employment Land Needs Assessment Reports carried out under the same terms of reference within a period of 2 years which calls into question the general reliability of the process of collection and interpretation of data in the overall forward planning process by GBC. I am concerned however that the research undertaken by Aecom is generally superficial and lacks sufficient detail and analysis between B1a, B1b, B1c, B2 and B8 use classes and that no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of office, research and development, light industrial, general industrial and warehousing and distribution floor space. No proper analysis has been made of data held by GBC in respect of different B classes in terms of planning applications granted or evidence gathered by the economic development function at GBC and no robust assessment of local market demand apart from fairly brief references to freely available market research undertaken by commercial estate agents such as Lambert Smith Hampton covering a much wider area. GBC appear to fail to appreciate the fundamental rationale of the Use Classes Order as a planning tool in terms of useful property market research or forward planning. What we are left with is a fairly clumsy and poorly informed plan which clusters B classes without any appreciation of widely different employment impact and economic sustainability. E.g. B1 generates at least 5 times as much employment as B8. The lack of appreciation as to the opportunity for widely different uses being generated within B class clusters defeats the whole point of proper planning of employment uses and can significantly endanger previously good planning put forward in the previous 2003 plan. E.g. the creation of a research and development park linked to the University but now has the threat of being downgraded into a general business park (see below). Little regard has been given in the plan to the
economic reality of falling demand for B2 industrial space which is clustered with other B classes almost randomly throughout the plan. Little regard is given to the opportunity of B1b space as an opportunity for research and development which needs to be nurtured and preserved without the detrimental and confused clustering with other B classes both in terms of planning and promotion of a research hub. I note that the past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 derived from VOA analysis and that the calculated annual floor space demand is 0.7% over the plan period up to 2033. I support the concept of seeking increased investment in our local knowledge-based, high technology economy. This will provide well paid, creative jobs and generate the funding necessary to pay for the infrastructure and environment this sort of industry requires. We need to distinguish between wanting to increase the added value of the economy and physical expansion, especially given the scarcity of land in Guildford. Guildford is not the place for large space hungry businesses. So I should target high added value small and medium sized enterprises rather than the headquarters of larger corporations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy E3 maintaining employment capacity. I object to the ill-informed policy of resisting change of use from B1a to residential because it flies in the face of positive property market solutions for the regeneration of brownfield land. It is also contrary to current government policy which has recently been reaffirmed and permits a change of use from B1a (offices) to C3 (residential). I believe that the existing government policy which has recently been made permanent of allowing change of use from B1a to C3 is sound. Many office buildings reaching an age of more than 30/50 years become redundant in terms of energy compliance making them illegal to occupy for employment purposes and the cost of refurbishment makes them redundant and uneconomic. The reality of market demand is that the gross development value of refurbished residential space is in excess of the gross development value of refurbished old office space in many locations (this gross development value assessment is supported by the analysis by property consultants GVA in the supporting evidence within the Allies and Morrison Masterplan for Guildford dated 2015). To resist change from B1a to C3 is contrary to the concept of brownfield first for residential development schemes. To resist change from B1a to C3 in Strategic or Significant Employment Sites is contrary to the concept of integrated mixed use communities whereby the journey to work is minimised.

London has led the way with significant residential schemes being created from redundant office stock. A good example is the South Bank in London adjacent to Waterloo Station where in 2005 the Shell Centre has been converted into flats. Another early example is the 2000 scheme at Metro Central Heights at Elephant and Castle where the old Alexander Fleming House was converted to 435 flats by St George.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I hope the Surrey Research Park in Guildford remains focussed on a broad spectrum of scientific research including
computer science, bio-chemistry, design, space-science, eco-science, health science, software development, laser
technology, media-science, artificial intelligence, robotics and super-manufacturingMonitoring indicators should include
new start-ups and new patents createdFacilities should be provided whereby new small businesses can secure premises
under subsidised licence fee arrangements with no onerous rent or lease commitmentsI support the idea of a variety of sizes
of unit including some small units (between 15 – 80 sq m) bearing in mind one workstation is 10 sq mConsideration should
be given to the concept of shared “enterprise hubs” where individuals can take pay as you go workstations in shared spaces
similar to touch down business centres similar to the “enterprise village” conceptI object to the policy of any new extension
of the research park more than the existing 14% already provided for within the park or within the footprint of the parkThe
Surrey Research Park currently extends to 65,000 sq mThere is already granted consent to expand to a further 9,000 sq m
(14%) This space has been available for 10 years and is still to find a takerThe past trend of expansion of Office/R &D is
0.43% pa over the period from 2004 to 2012 based on ELNA 2015 derived from VoA analysisThe ELNA 2015 calculated
annual floor space demand is 0.7%The data point for our analysis is today in 2016 so we have 17 years to go to the end of
the plan period.The necessary growth in floor space over the plan period is therefore 17 years x 0.7 = 12% which is less
than the current expansion space of 14%.The research park is developed at a plot ratio of 25%. This could be increased to
50% within the same footprint of the existing park without damage to its amenity. The actual current land use for
development in the park is in fact only 12.5% because most buildings are 2-storey.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2191  Respondent: 8570273 / Fiona Curtis  Agent: Fiona Curtis
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy E5 Rural Economy. In my opinion, this policy should only apply to small-scale development in rural
areas which means development of less than 100 sq m (gross) which is in keeping with and the permanence and amenity of
the green belt.Use of rural areas for town centre uses without applying the sequential approach is against the principles of
localism that require local people to be consulted and heeded, not ignored. Villages need protecting in terms of both design
and scale and character.Previous commitments to improved high-speed broadband and mobile phone coverage have now
been diluted, despite general support. This disregards the responses from the 2014 public consultation.

The consultation process was not well publicized; many Parish Councils had no idea of this. The emphasis on voluntary
efforts and greater community efforts is far removed from reality for this 'solution' was presented for almost every aspect of
rural life from managing crime to looking after elderly to education and more besides. Villages by nature are usually small
and the percentage of the population who are able to do voluntary work is smaller still. The solution is therefore
unworkable. The results of the consultation were not publicized but were instead collated and summarized and bore no
resemblance to the submissions I had sight of.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2193  Respondent: 8570273 / Fiona Curtis  Agent: Fiona Curtis
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy E6 the leisure and visitor experience. I believe that the importance of a visitor attraction hub could be much better articulated. Guildford has great potential to become a “must see” destination for tourists and visitors. Surrounded by the natural beauty of the Surrey Hills, it is already distinguished as an historic county town. The historic part of the town should be exploited to the full creating a real sense of vibrancy and atmosphere. This should be linked to the attractions of the Museum, the Castle, the Wey and the historic High Street including its views of the Hogs Back.

The economic impact would create big advantages for both the leisure and the niche speciality retail sectors in the town. Given the local and wider catchment of the town Guildford should strive for high quality definition making it a great centre for people to live in and visit. Guildford the historic “Gateway to the Surrey Hills” has far more potential than Guildford just any other stereotypical centre found anywhere around London. Re-branding walks, such as a new “Pilgrims Trail” similar to the Patriots trail in Boston USA with marked yellow footsteps leading from the station to the River and up through the historic heart of the town. There is a need to make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms. There is a need to help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to RHS Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently bypass Guildford to go to Bath, Oxford or Cambridge instead.

Norfolk relies heavily on its tourist trade and yet has preserved and enhanced its golden egg (landscape, views, quaintness, history) and this is why people visit. To enjoy the peace and quiet and unspoil vista, nature at its natural best. I would like to see more made of what we actually have (our rivers, canals, views, walks, history, wildlife) and less man-made intrusion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2194  Respondent: 8570273 / Fiona Curtis  Agent: Fiona Curtis
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The omission of the Town Centre Master Plan from the Local Plan invalidates much of the Plan, especially the impact on traffic. I understand that option 2 of the traffic re-routing exercise is favoured yet we have no details and this has not been included in the Highway Assessment. Whether option 1 or 2 are elected, there will be a knock-on impact to the suburbs and surrounding villages as reducing capacity whilst increasing footfall and traffic in a town that is already congested can do nothing but harm.

I do not consider that the target of 1,172 homes in the town centre takes account of the need and demand for housing or the opportunities that brownfield sites present for increasing the residential development in the core of the town which will in itself help to sustain the retail core by increased economic impact. What the town centre needs in terms of urban regeneration and to attain a thriving night time economy is more residential development. The Town Centre policy needs to maximise the potential for residential development on brownfield and include as an absolute minimum the 2,551 units proposed in by Allies and Morrison for the town centre included in the masterplan 2015. The reality is that the Town Centre and other areas of brownfield in the borough has the capacity to provide significantly more than this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy H1 Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set any rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions. The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated. I support higher density development but not high-rise development (ie over 10 floors) in the urban area close to transport hubs to facilitate modal shift e.g. 20 minutes’ walk of Guildford railway station. Student accommodation should provide for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and underused surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back. Surrey University has 17 ha of car parks that could provide all the student accommodation required above it, with parking beneath. Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Overprovision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to policy H2 Affordable homes. “Affordable” homes, under national definitions, means homes that are sold or rented at 80% of market value. Even if 70% of these are rented as proposed, the level of market prices in the South-East means (even post-Brexit) that these homes will remain well beyond most people’s means and that starter homes will not become available for local people. In addition, the viability clause (4.2.40) means that in practice the policy could be unenforceable. Private financial viability has no place in a public policy and should be removed. It is a get-out-of-jail-free card for developers that will sacrifice countryside for no local benefit. I question the assumptions that seem to underlie this policy: that people have a right (rather than a legitimate aspiration) to own a home; that they should be encouraged to live locally (contradicting the Government’s policy of encouraging labour mobility and development in poorer regions, where homes are cheaper anyway); that increasing local house-building will reduce overcrowding and congestion (rather than simply suck more people into the borough); and that it will stem the rise in house prices (even though 13,860 new homes will be a drop in the ocean, given that prices are determined by an infinite demand-pull from London, whose population is increasing by 100,000 a year, and by the currently low cost of capital for overseas and other buyers). The weak mechanisms proposed in the plan might influence the market in a more remote part of the UK, but not here. This policy’s version of “affordability” is just a smokescreen for pushing through more development generally. Building more homes in Guildford cannot increase real affordability given the overhang of the London market.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to policy H3 Rural Exception Homes This is a type of Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix”, this can include “market” housing – i.e. normal commercial development which in Guildford usually means expensive executive homes. This policy means building anywhere, and ignoring all historic planning restrictions. The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to policy I1 Infrastructure and delivery.

Most of the borough’s infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. Yet this plan’s commitment to building housing estates across the Guildford countryside will mean either major infrastructure investment that no-one is prepared to pay for or else a catastrophic and simultaneous collapse in transport, educational, medical, energy, water and communications services. The plan targets greenfield sites – requiring heavy infrastructure investment – in order to generate CIL income necessary to meet an infrastructure shortfall that is already serious. The current draft CIL scale also encourages development on greenfield sites rather than brownfield and will reduce or negate developer's obligation to sell a percentage of homes at 20% below market value. The policy wording says nothing about roads and traffic. The Council’s methodology for assessing infrastructure needs in this area is inadequate, identifying only the tip of an iceberg of existing congestion. Compton Village is already close to tipping point, yet it will see a significant increase in traffic volume, will be completely congested and yet no plans exist to mitigate the problem. The schemes referred to in this policy barely solve existing congestion and are inadequate when development takes place. The full impact on local road networks has not been fully considered. Some proposed development locations would require highway schemes that involve demolishing property and road-widening in residential areas to solve the resultant congestion. The A3 improvements are not guaranteed to take place but they are being used to justify removing large areas from the Green Belt before detailed traffic assessments have taken place. These detailed investigations are being deferred until the planning application stage and will be left to developers to prepare. If a site then proves to be unsustainable its Green Belt protection will have been lost for no reason and unsuitable development will take place by a more insidious process. Compton Village will actually incur increased traffic flow as a consequence of A3 widening according to the study, yet as was pointed out above, no solutions are in place to improve the situation. Adequate infrastructure provision is a pre-condition of sustainable development. But in this

Compton Village is already close to tipping point, yet it will see a significant increase in traffic volume, will be completely congested and yet no plans exist to mitigate the problem. The schemes referred to in this policy barely solve existing congestion and are inadequate when development takes place. The full impact on local road networks has not been fully considered. Some proposed development locations would require highway schemes that involve demolishing property and road-widening in residential areas to solve the resultant congestion. The A3 improvements are not guaranteed to take place but they are being used to justify removing large areas from the Green Belt before detailed traffic assessments have taken place. These detailed investigations are being deferred until the planning application stage and will be left to developers to prepare. If a site then proves to be unsustainable its Green Belt protection will have been lost for no reason and unsuitable development will take place by a more insidious process. Compton Village will actually incur increased traffic flow as a consequence of A3 widening according to the study, yet as was pointed out above, no solutions are in place to improve the situation. Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritising greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognising this as a key issue, the plan makes too many assumptions, not least being the verbal promise that development will not take place without infrastructure preceding it. It is not clear how this will happen and is not in the Plan, as it should be, if it is achievable. The highways network is under stress at peak times in many parts of the borough. Queuing is the daily experience of drivers going to and from work. The local plan recognises the problems in para 2.14. Much of the road network is single-carriageway, and junctions act as constraints. The key evidence on future traffic conditions is provided in the Strategic Highway Assessment Report (SHAR) which summarises the results of the tests carried out by Surrey County Council at the request of GBC. Five scenarios were examined using SCC’s strategic traffic model. Scenario 1 contains all developments...
and planning permissions from 2009 to date. As such it corresponds to today’s circumstances, and describes the current unsatisfactory traffic conditions in peak periods. Scenario 5 represents the position at the end of the plan period, including all development and highways schemes in the local plan. The results of the analysis show that there will be widespread congestion in the morning peak hour across the network. The key strategic routes, the A3 through Guildford NE bound, and the M25 between Junctions 10 and 11, are shown to be at or over capacity. The summary network statistics presented in the SHAR, while useful, require some interpretation because the analysis of vehicle-hours is derived from link speeds only, and does not reflect junction delays and queues. The tables that show the ratio of flow to capacity and level of service are especially helpful to gaining an understanding of the conditions on the network in the forecast. Where the forecast traffic volume is above or close to capacity, flow becomes unstable and there is congestion. The SHA results provide evidence that, in 2031, congestion will be worse than it is today on much of the network. It is the case that the traffic modelling does not take into account the potential for increased use of other modes, but the trip rates used for developments already have built in the typical level of use of other modes, and services will be required to meet that need. It is also the case that the model does not allow for park and ride, which would improve matters in the town centre, as discussed below. In order to gain an insight into conditions across the network, it is necessary to combine information from several tables in the SHAR. Table 4.5 shows that the M25 and A3 will be at capacity in Scenario 5. The other roads that will have poor levels of service include those in Table 4.5 but also those in 4.12 (except the A3) and those in Tables 4.3 and 4.4 with levels of service E and F that will not be given some relief by improvement of the A3 in Scenario 5. Paras 4.10.3, 4 and 5 point out that there will be increased congestion. Given that the starting point is unsatisfactory, there can be no expectation that the schemes in the Infrastructure Development Plan will provide an overall improvement. There will be some local benefits, such as the Ash rail bridge for example, but in general conditions will be as bad and in many places, such as Compton Village, worse. So the statement in the SHAR para 4.2.5 that ‘the combined mitigation as reflected in Scenario 5 indicates that at the strategic level it accommodates the additional PSLP demand’ needs qualifying – ‘at the cost of a lot of queuing’ and makes no mention of the impact this will have on pollution, which is already a known problem at the A3 end of Compton. The cumulative effect of the additional traffic generated by the developments in the local plan will be to increase congestion, even with the proposed highway schemes in place. More detailed analysis of the junctions and queuing is required. So we question the conclusion that the developments would have “an acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF”. Appendix 3 of the Transport Topic Paper shows the phasing of housing development and transport infrastructure. The major scheme being considered for the A3 between the A31 and the A320 is scheduled for delivery in the period 2023/24 to 2027/28. The strategic developments at Blackwell Farm and Gosden Hill Farm are shown as being phased in from 2021/22 onwards. The Garlick’s Arch

By prioritising greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding. It is also the case that the model does not allow for park and ride, which would improve matters in the town centre, as discussed below. In order to gain an insight into conditions across the network, it is necessary...
There is an aspiration expressed about opportunities for infrastructure refer to supporting sustainable development and delivering a balanced system. However, in para 2.15 there is an aspiration expressed about opportunities ‘to improve the performance of the road networks through transport infrastructure and service improvements’, which taken with the previous paragraph includes reducing congestion. The evidence so far shows that this will not happen. The mitigation proposed is not sufficient to overcome the problems that will be caused by the level of growth in the local plan. Congestion will worsen. The network will lack resilience and be vulnerable to disruption due to incidents. Minor roads will have to cope with a lot more traffic, for which they are unsuitable.

The local plan does not state an objective for congestion. The two strategic objectives that are included for infrastructure refer to supporting sustainable development and delivering a balanced system. However, in para 2.15 there is an aspiration expressed about opportunities ‘to improve the performance of the road networks through transport infrastructure and service improvements’, which taken with the previous paragraph includes reducing congestion. The evidence so far shows that this will not happen. The mitigation proposed is not sufficient to overcome the problems that will be caused by the level of growth in the local plan. Congestion will worsen. The network will lack resilience and be vulnerable to disruption due to incidents. Minor roads will have to cope with a lot more traffic, for which they are unsuitable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy i2

Supporting the Department of Transport’s “Road Investment Strategy” This policy is too vague and unrealistically optimistic. Decisions by Highways England on improving the strategic road network (the M25 and A3) are still years off. The Council has suggested a very expensive tunnel under Guildford, but there is no evidence to show that this is a realistic option. Even if Highways England accepted this (which is highly unlikely in the post-Brexit public spending climate) it would not be built until the end of the plan period at the earliest. Other, less expensive A3 improvements, and changes to the Junction 10/Heathrow stretch of the M25, will also take years to agree and complete. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is foolhardy. Surrey is the most congested county in England, with 683 people per square kilometre, compared with an English average of 413. This policy will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone). This is a major development constraint that should have been applied to the OAN to constrain the housing target.

Public bus services have been cut and housing is proposed outside the town with a hugely expensive sustainable corridor so that people can walk or cycle in. Why not save money and build the houses in the town where people want them? This policy is in some ways ageist as elderly and infirm and those with small children are unlikely to benefit from this proposal as Guildford is very hilly!

Much of the funding is from development which will limit if not negate the implementation of affordable housing, which was originally a key driver of the Plan?

The 3 schemes are insufficient to prevent severe congestion on our highways and this is using a traffic model that has probably underestimated the issue. Constraints must be applied to the development levels or development needs to be put where infrastructure already exists and improvements can be considered rather than new infrastructure?

If the tunnel is a genuine consideration then land needs to be safe guarded or the notion should be removed. the same applies to railway stations which have been mentioned to pave the way for sustainable development but Network Rail has not agreed to them, even in principle (lacking the duty to cooperate).

The infrastructure proposals lack sufficient detail.'Improvements' to x junction is inadequate. Details should outline exactly where and what the proposal is and what improvements will transpire?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy I4 green and blue infrastructure. This policy is confusing. It sits oddly with the plan’s onslaught on the Green Belt. The plan to build on large areas of countryside and to inset 15 villages will cancel out any benefits from extending the principle of enhancing biodiversity beyond Biodiversity Opportunity Areas. There is no mention of the value of wildlife gardening to biodiversity or the important role that larger gardens play in a village setting. Land designated as ‘open space’ appears to be protected whereas land that IS actually open space (ie Blackwell Farm, Wisley, Gosden Hill and Normandy strategic sites) is proposed for development? It would be useful to understand who will monitor this policy and how Independent will they be? Will biodiversity be their prime concern or will all concerns be secondary to development?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy P1 Surrey Hills Area of Outstanding National Beauty This policy weakens existing protection when it should strengthen it. It is dependent on the Surrey Hills Management Plan. The latter welcomes housing development. Even major (undefined) development in the AONB would be permitted if exceptional (undefined) circumstances could be demonstrated. Much of my concern stems from the loose wording of the Policy, which in some places renders the policy ineffective, for example: “All proposals will be considered against whether they…” “All development proposals within and adjacent to the AONB will be expected to conserve or enhance its special qualities” Terms such as “considered” and “expected” are not strong enough in prohibiting development proposals that do not conserve and enhance the AONB, and it is likely that developers will be able to use this loose wording to their advantage.

Of particular concern is the paragraph 3, which begins: “Whilst the AONB designation does not preclude specific types of development in the Surrey Hills and proposals will be assessed on their individual merits…” This whole opening clause is unnecessary and almost invites development proposals. I believe that it should be deleted, and the sentence should, therefore begin: “There is a presumption against major development in the AONB in accordance with NPPF.” In addition to the weakness of the language, I am also concerned that the AONB criteria listed in the policy are not the most important ones in determining whether a planning application should be approved. Aside from the one outlined in the first bullet point (which relates to the AONB setting) none of these criteria is concerned with the key characteristics of AONB, ie landscape character, scenic beauty, important views, tranquility etc.

Whether or not a development supports the rural economy or provides public access are of far less national importance than preserving the quality of the landscape itself. I believe that the AONB Policy in the Draft Plan 2014 provided greater protection to the AONB, and would like to see the following sentences reinserted: “The national significance the AONB
will be afforded the highest level of protection and only proposals which can be sensitively amalgamated into the area and which complement and enhance the character of the AONB will be considered. “Proposals within the AGLV which would have a negative impact on views into and out of the AONB and which do not respect the setting, will not be acceptable.” In accordance with the most up to date Minerals and Waste Plan, safeguarding of applicable land within the AONB and/or AGLV may be necessary and deemed appropriate.

Finally,

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy P2 green belt

This policy states, “the general extent of the Green Belt has been retained.” This is a misleading statement. The policy wording is weak in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. Once gone it is gone forever. It is not the Council’s to give away. Policy P2 completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world. Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

1. Agricultural production
2. Rural leisure and tourism amenities
3. Water catchment
4. Flood control
5. Biodiversity
6. Natural heritage
7. A carbon sink for air pollution
8. Room for public facilities such as parks and burial grounds
9. Profitable film locations (e.g. Shere)
10. Future economic potential such as mineral extraction (even fracking)
11. Natural beauty, landmarks, open space, rural views and sight lines
12. Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF) As a matter of law and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive
development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations. It is quite incorrect to argue, as the Council

This is in breach of party manifesto commitments and contrary to previous responses to public consultations. It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. I object to the “insetting” of 14 villages from the Green Belt. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat. I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors.

To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead.

I object to the removal of over 400 hectares of Green Belt land in and around Blackwell Farm to facilitate further development of Surrey Research Park and for 1800 homes. Over 60 hectares were removed from Green Belt 12 years ago for the same developer (Surrey University) who has yet to fulfill their planning obligations. This valuable land has been squandered with over 17 acres of surface car parking and as one of the key features of Green belt is its 'permanence' this second request for yet more Green Belt land to be released in such a short space of time, with all the outstanding issues that remain makes this all the more objectionable.

Furthermore I object on grounds of the impact this development will have in terms of congestion on our highways, these issues have been highlighted under ‘infrastructure’.

Exceptional circumstances have not been demonstrated for the removal of Green belt land which in my view, makes this policy unsound.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to ALL Green Belt sites allocated for development in the local plan. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses.” This ignores the tens of thousands of detailed comments the Council has received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established.

I object to the inclusion of Greenbelt sites where exceptional circumstances have not been given. Housing need alone has in case law, been overturned and the housing need is highly questionable. We question the soundness of 66% of almost 14,000 homes being proposed on Greenbelt land and whether any circumstances could warrant this.

I object to policy P3 Countryside (i.e. beyond the Green Belt) This is more protective – as a policy – than the proposals for the AONB and the Green Belt, so is anomalous. I am not in favour of building on this area, since urban, brownfield areas are sufficient to meet all reasonable housing targets. There is no need to build on any green fields if brownfield, previously developed land is used efficiently (without garden-grabbing). This policy refers to the countryside near Ash and Tongham (see paragraph 4.3.28). This area does not justify stronger policy protection than any other part of the borough. The fact that the current and previous Council Leaders represent it should not give it preferential status: “we will seek to limit any development in the countryside unless it can be demonstrated that it is necessary in that location”. Green Belt and AONB areas should by definition have higher levels of protection than non-Green Belt areas. It should also be noted that Ash and Tongham lie beyond Guildford far away from London and therefore make no contribution to controlling Metropolitan urban sprawl, that is presumably why Ash and Tongham are not in the Green Belt already. This policy, however, attaches higher priority to preventing the “coalescence between the Ash and Tongham urban area and Aldershot” than it does to the primary purpose of the Metropolitan Green Belt, which is to stop London sprawl. I agree to the prevention of coalescence but this should apply to all villages including East and West Horsley and Flexford and Normandy.

I would agree to additional Greenbelt if it is merited and if an area on the same stretch that actually warrants AONB status were not under threat of massive development (Blackwell Farm 1,800). The treatment of different areas lacks parity.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy P4

Flood risk and water source protection zonesUrban development on existing hardstanding would not create additional flood risk, especially where there is scope for improved flood resistance measures to be included in the design. Sites such as Woodbridge Meadows Industrial Estate and the Arriva bus depot, on the River Wey bank, are potential high-value brownfield sites that would not be available for housing if this policy is implemented. It is not the footprint of existing buildings that should limit future development, but the extent of existing hardstanding. Tarmac and concrete do not act as functional floodplain, and some land with hard standing close to the river, within the town centre and within easy walking distance of the railway station, provides an excellent opportunity for real urban regeneration that could protect the surrounding countryside.

I strongly believe that this policy should not be used as a convenient excuse not to build on the extensive area of brownfield sites between the station and Ladymead. Any new development in this area could easily be built on stilts with flood resistant ground floor parking in areas that are identified as high flood risk. This area has been built over successfully over the last 50 years. We do not need to stop now.

I do not support building directly on (as opposed to over) flood plain as the land is effectively a soak away, but intelligent architecture has been dealing with this problem for many decades in other parts of the UK and the globe.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to policy P5 Thames Basin Heath Special Protection Areas

This policy is not robust enough. The mitigation (cash compensation) offered for development in the special protection area is so small as to be meaningless. SANG (Suitable Alternative Natural Greenspace) is not beneficial since the sites identified or targeted are already green space. This is just using agricultural or wooded land as recreation land in order to justify building on other green spaces nearby. There is no actual increase in open space or environmental protection; instead, it is a ploy designed to permit building on otherwise protected areas. SANG – in part used to prevent dogs and cats attacking nesting birds – must also ensure that it is not using land which is adjacent to the Special Protection Areas.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy S1 as stated and the presumption in favour of sustainable development. The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” Policy S1 ought to set a clear framework. No definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts. The promise “to secure development that secures the economic, social and environmental conditions in the area” omits to recognise that economic growth, social justice and environmental protection often conflict. It does not say how each element is to be weighted or conflicts resolved. As a practical guide to the tough choices Councillors will face, it is without value. Under this policy, any development will qualify as “sustainable”, thereby failing to apply the NPPF’s most important guideline. The most gaping hole in Policy S1 is the Green Belt. As an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity, the Green Belt is a living example of sustainable development in practice. It is the envy of the world. Policy S1 should commit to uphold Green Belt boundaries and protections, setting at least one clear boundary to planning decisions. The plan’s contempt for Green Belt constraints is amply demonstrated in later policies. The commitment to approve planning applications “wherever possible” and “without delay” reveals this draft plan’s pro-development bias. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all. This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.3.

Do you consider this section of the document; complies with the Duty to Cooperate? (No), is Sound? (No), is Legally Compliant? (No)

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy S2 the Borough Wide Strategy and the commitment to build 13,860 homes based on the Strategic Housing Market Assessment (SHMA) 2015 prepared by GL Hearn. The OAN “objectively assessed need” figure in the SHMA of 693 homes a year is far too high! I am very surprised and concerned that GBC have adopted the OAN of 13,860 homes as the housing target without any application of constraints as required under the National Planning Policy Framework and the National Planning Policy Guidance. The scale of the housing number proposed, inevitably increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole. Other local planning authorities appear to take a more balanced view in their approach to planning. The Woking Core Strategy 2012 applies a constraint of 50% from the 594 new homes identified in their own SHMA. It should be noted that local evidence (Strategic Housing Market Assessment - SHMA) highlights a need for an additional 499 new affordable homes every year in the Borough and a total of 594 new homes every year when taking into account demand. Given the level of environmental constraints present in the Borough, it is considered that the provision of an average of 292 dwellings per annum represents a reasonable level of housing growth for Woking and is deliverable. "Historically GBC have correctly applied constraints on housing numbers to protect the Green Belt. The Surrey Structure Plan 1994 advocated a general slowing down in the rates of development “because of the environmental constraints which exist in the County, including Green Belt”. This slowing down was reflected in the requirement that Guildford Borough should accommodate a net increase of 3,800 dwellings between 1991 and 2006. This was a lower rate of development than in previous years. It is interesting to note that the Structure Plan at that time expected sufficient land to arise within the urban areas to accommodate this requirement. However it would appear that today GBC have effectively ignored the real potential of the urban area to provide for housing. At the same time GBC have adopted a radically different approach to the policy of the Council over the last 20/30 years and are now ignoring government policy in relation to the Green Belt. A detailed and comprehensive professional review of the SHMA dated June 2016 by NMSS an independent expert firm dealing with housing and demographics procured by Guildford Residents Association (GRA) has concluded that the OAN figure should be revised down from 693 homes per annum to 510 homes per annum. The 41 page report by NMSS which can be found on the GRA website entitled “A Review of the West Surrey SHMA as it relates to the Objectively Assessed Housing Needs of Guildford”.

It was a real community effort. It was paid for by over separate 20 Guildford Residents Associations and Local Parish Councils none of whom were convinced that the SHMA report procured and presented by GBC was accurate or transparent or accessible in a meaningful way. So they clubbed together and collected contributions from many hundreds of Guildford residents to try to find out the truth of the housing need figure presented in the Local Plan. The NMSS report includes detailed analysis and financial modelling and was prepared by Neil McDonald. He is an independent adviser and commentator on housing demographics. He works with local authorities and others on the estimation of housing need and related issues. He was a civil servant and policy adviser to Ministers for over 30 years, the last 10 advising on housing and planning issues within the Department of Communities and Local Government. His 7 years as a Director at DCLG included a posting as Director, Planning Policy and a period as Chief Executive of the National Housing and Planning Advice Unit. NMSS found that the SHMA used in the Local Plan incorrectly adds extra homes to its basic demographic projection to allow for improving affordability of housing, increased student numbers and economic growth. The report found that none of these additions were justified based on the evidence presented within the SHMA. The report concluded amongst other matters that: The affordability of housing in Guildford is no worse than in other Surrey districts and boosting supply beyond the demographic OAN would not result in a noticeable improvement in affordability but simply in more people moving to the area. There are reasons for believing that the SHMA’s estimate of the number of homes needed for students may be too high and that an adequate provision for students is already included in the demographic OAN. The report advises that the Council should commission a separate student housing need figure for Guildford given the distorting effect of students on our overall OAN. It envisages that, once this exercise is undertaken, improved accuracy means the overall OAN would be likely to reduce still further. The SHMA seeks to estimate the number of homes needed to support employment growth using employment rate assumptions that are inconsistent with the employment forecasts. This produces misleading results. An analysis of the Cambridge Econometrics and Oxford Economics forecasts using employment or economic activity rate assumptions consistent with the forecasts suggests that in neither case is there a need to provide more housing than suggested by the demographic analysis. Indeed, in both cases a smaller population growth (and hence fewer homes) could support the jobs growth that is forecast. A further independent report was procured in 2016.
by the Campaign for the Protection of Rural England CPRE from Richard Bate of Green Balance, an independent consultancy with expertise in demographic and housing matters to carry out a review of the GL Hearn SHMA. The report by Green Balance runs to 37 pages and its findings are that the OAN for homes in Guildford should be reduced from 693 per annum to 481 because:

1. the vacancy rate figures should be taken from local government annual records rather than from the 2011 Census. This would reduce vacancy rates to 2.9% in Guildford.
2. there should be no increase for affordability above basic demographic change.
3. there should be no increase for Student housing and it was considered unrealistic that the University should be allowed to exert such substantial pressure on the domestic housing market. 4. the use of employment-led forecasts should be abandoned using purely household projections instead which are more reliable as a form of prediction. Two completely independent expert reports are surprisingly consistent in their findings.
4. the use of employment-led forecasts should be abandoned using purely household projections instead which are more reliable as a form of prediction. Two completely independent expert reports are surprisingly consistent in their findings. In broad terms a figure of approximately 500 homes per annum would appear to be a correct estimate of OAN for Guildford. However, this is before constraints are applied to arrive at an acceptable housing target. The SHMA is based on pre-Brexit projections for economic and population growth, including migration. These now need to be revised downwards. It is unacceptable that demographic and economic model assumptions have been withheld by GBC and cannot be checked making the process unaccountable. The figure of 13,860 new homes is unsubstantiated. It has not been scrutinised by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by commercial sub-contractor used in preparing the SHMA. Both the National Planning Policy Framework and National Planning Policy Guidance provide a clear policy direction that the overall housing target should be reduced by a variety of constraints to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors. I have corrected this omission below. Infrastructure policies should be planned at the same time as Local Plans but in this case they have effectively been left out and are not sufficiently developed. The Framework also makes clear that, once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. Unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development on a site within the Green Belt.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

Key parts of the evidence are still missing, flawed or based on withheld assumptions. The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach, and the Transport Assessment is too late and incomplete to be relied upon to inform the Plan.

The Plan excludes the Town Centre Master Plan, which plays a pivotal role and fails to address the results of infrastructure difficulties, or use these and Greenbelt to constrain the level of development.

The Employment Land Needs Assessment

I object

This document omits many important points that are to be addressed at a future stage. The information is, however, very relevant and necessary and without it the document is weak on evidence. The overview given does not assess the capacity of existing supply to accommodate future growth. The paper acknowledges that almost 9% of commercial premises are empty and this somewhat flies in the face of arguments to vastly increase the volume until the reasons are understood. Around 30% of businesses are considering leaving Guildford (congestion being cited as a reason). There are also issues with planning permissions being granted to convert office space to residential, whilst at the same time it is argued that more offices are needed? The contradictions appear to indicate that policies related to this need firming up and that the evidence is incomplete.

I disagree with 40% of land in the town centre being given over to retail as there is no evidence that Guildford will 'buck the national trend' in terms of declining high-street sales, as has been suggested by Cllr Furniss. Guildford urban area ranks no 1 in terms of being the most sustainable location in the borough and, as housing is a priority, there should be more than 1,172 residences in the town centre.

I object to Policy E4 (expansion of the Surrey Research Park into the Blackwell Farm) The existing Research Park has been built at a very low density (25% plot ratio), which is very low for an urban extension. The majority of existing buildings are 2 storeys giving a developed floor space plot ratio of only 12.5%.

The existing Research Park has acres of surface car parking, which provides it with the opportunity to markedly increase its density without infringing any Green Belt land nearby. Any density increase would be cost effective for the use of all existing infrastructure and would also have the potential to match the existing density of the neighbouring academic buildings on the university campus at Manor Park, which is five times higher.

Together with the existing expansion of 14% through existing consents and the opportunity to increase its density, the Research Park has ample capacity to expand to embrace new demand for B1b uses linked to the university, without utilising additional land.

Infrastructure

I object

The infrastructure schedule makes reference to' improvements' without saying what they are. It includes a junction at the Guildford end of the A31, and another junction at Tongham. No evidence or traffic modelling data is available to demonstrate whether these 'improvements' will indeed improve anything at all given the additional traffic that will be generated by the new developments included in the plan. The Highways Assessment indicates that, even with these
'improvements', the level of congestion on the A3, A31, the B3000 and A25 will leave these roads over capacity and congested.

Constraints should be applied to the housing need/number as a full application of the overinflated number will have a severe detrimental impact on our road network. Smaller housing estates may be more difficult financially, but they would have less impact on infrastructure and could be considered where infrastructure already exists. The borough has many acres of surface car parking which, if replaced by multi-storey versions, and combined with current Brownfield sites, would free up enough land to build housing where it is wanted and needed and not on valuable Green Belt. There would be no need to build high-rise style development in Guildford town, which we don't support, but we do believe that buildings of 6-10 storeys (with underground parking) would be in keeping in some urban areas (where they don’t impinge on important vistas). [Some existing buildings already reach 5-7 levels in height].

The traffic maps omit the area south of Guildford borough completely and the lack of detail about impact on the B3000, a strategic route, is highly questionable, particularly as there are no solutions in place to deal with the impact. I am particularly concerned that, after the main highways routes of M25, A25, and the A320, the B3000 will incur the greatest increase in flow as this road is already close to capacity, with tailbacks at peak times. The road is no longer fit for purpose and modelling shows that developments planned, and the introduction of a new westerly route through Blackwell Farm, will severely worsen the situation, whether major work takes place on the A3, or not.

The Highway Assessment

I OBJECT

The strategic highway assessment requires a great deal more work and hence I OBJECT to the inclusion of this as evidence.

The B3000 runs through Compton, a small village with many listed buildings, most of which are very close to the road. The road already carries in excess of 5 million vehicles a year with average flow rates exceeding most A roads. It is the only settlement area in the borough where pollution levels exceed EU regulations and it is close to capacity now, with tailbacks at peak times, which add to the pollution problem. [see legal section]

The study is highly misleading. It refers to a figure of zero additional traffic from scenario 3, which includes the traffic from the strategic sites, one of which is partly in Compton. The assessment does not make it clear that the modelling is extremely limited and only includes impact on developments within the immediate area. Blackwell Farm is excluded from Area 107 (part of Compton) as false boundaries have been set. I believe that the impact from the strategic sites will be far-reaching and will most certainly impact Compton and beyond. Each village needs to be able to see the impact that development will have.

The Highways Assessment concentrates on peak time traffic only and gives no indication of overall volume increases or traffic type using specific routes outside peak hours. Understanding of the overall increase is important, as there is a bridge on the B3000 between Artington and Compton, which has a width restriction and may also require a weight restriction as it needs replacing within the next 2 years and no funding has been set aside for this. Instead Network Rail, SCC, GBC and Waverley BC continue to battle over responsibility for, and scope of, the project.

It appears that traffic data has been collected at different times of the year and over varying time scales in order to provide averages. This method of data collection can underestimate measurements by at least 30%.

Furthermore, I have been told that the person responsible for ratifying traffic data at Surrey County Council (SCC) has been off sick for over a year and that, whilst the daily data boxes continue to collect data, that data has not been collected or analysed for 2015. The data put forward for Compton's B3000 was based on a 3-week period in January and, as this was not representative, we understand it was removed. That said, the year-on-year data is for different periods and different times, varying from a few weeks in winter to longer periods over many months. I would like a more robust approach to traffic data collation.

The cumulative effect of the additional traffic generated by the developments in the proposed submission Local Plan will be to increase congestion, even with the proposed highway improvement schemes in place. More detailed analysis of the junctions and queuing is required. We question the conclusion that the developments would have An
acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF". We do not believe that the impact on the B3000 will be acceptable, as it is already operating beyond capacity, and this situation will be made much worse following the mitigation proposed for the A3.

The Highways Assessment is limited to 30 results. Roads have been omitted from the report and it is unclear whether findings for the B3000 (also referred to as The Street B3000) are in fact from the Street or the roundabout from which there is a feeder road to Godalming via Priorsfield Road.

The table comparing scenarios and the impact on traffic is difficult to decipher. Scenario 1 includes current planning permissions plus Waverley's strategic sites. This shows an increase of just 9 vehicles per hour at peak times on the B3000. The next scenario 2 is the same, but includes GBC's strategic sites. Given that there is a strategic site in Compton of 1,800 homes and another of 1,000 at Normandy, the expectation would be for the volume to be not only higher, but considerably higher. The result is however, ZERO. We understand that this is because the impact measured is only from the immediate area and, as Blackwell Farm has been removed from the village for modelling terms, this does not give a realistic result. The omission of the Town Centre Master Plan and its impact on the roads further diminishes the integrity of this Highways Assessment.

Even without the full impact being understood, it is clear from the scale of development on the west of Guildford (1,800 homes at Blackwell Farm, 1,000 homes at Normandy, 1,300 homes at Ash, 3,800 homes in the Aldershot urban area, 1,200 homes at Borden) that the increase in traffic on the B3000 and other main routes would be severe.

The Highways Assessment shows that as a result of the proposals put forward in this draft of the Local Plan the B3000 will suffer the highest increase in flow rates at peak times (after the M25, A320 and A25. It also reveals that traffic flows would increase if the A3 was widened, as the A3 would then attract more traffic via the B3000. Despite this, there are no solutions planned to mitigate the situation and we are therefore strongly objecting to the level of development and in particular strategic development at Blackwell Farm as outlined in the Local Plan.

The proposal to introduce a new route to Guildford town centre from the west via Blackwell Farm has been ill thought out. The volume of traffic that will use this new ‘rat run’ through the new development and the university campus/business park, has been underestimated. There will be problems for traffic wishing to exit the new development in both directions during peak hours - traffic is frequently queueing for miles along the A31, and the Tesco roundabout is one of the worst bottlenecks in Guildford. The knock-on effect on the Egerton Road/Gill Avenue junction would impede emergency vehicles getting to and from the hospital.

The 4-way junction on the A31 has no detail at all and the concern is that permission in principle will be given to the site in the hope that these problems are surmountable. If they are insurmountable, which I believe they are, then enormous amounts of Green Belt land within the setting of the Surrey Hills AONB will have been sacrificed for nothing. The 4-way junction, if it goes ahead, is likely to be huge and, due to its elevated position, will cause significant harm to the AONB in terms of landscape and light pollution.

The Highways Assessment has many limitations, not least being the absence of the Town Centre Master Plan, which includes potential road closure and re-routing. Compton is likely to be very much affected by any reduction in road capacity in the town centre and it is important that we are presented with the whole the picture.

The Assessment acknowledges that not all impacts of proposed Blackwell Farm development have been modelled and that, due to the emphasis on the A31 and the A3, not all roads were included.

The report concludes that the improvements to the A3 are necessary to maintain adequate flow rates on the strategic network. Further work is needed to determine what impact any widening or junction improvements will have on local roads, and what will be done to mitigate against the increased flows through Compton, particularly given that a section of the B3000 though the Village is anticipated to become an Air Quality Management Area. GBC has resisted requests by members of the PC to have the northern end of The Street made an AQMA, but readings of nitrous oxide in this area are well above EU legal limits.

There is little information about the tunnel but the map indicates that one access / egress point will be in Compton near the A3, although no land has been safeguarded for this purpose. This is likely to have the same impact as the improvements to the A3, i.e. increased traffic (and pollution) through Compton.
The Spatial Hierarchy

The spatial hierarchy, which outlines Guildford's preferred strategy, does not match up with the proposed plan. The hierarchy places Brownfield sites (including those on Green Belt) as a priority, but the Plan has 66% of development on Greenbelt and only 34% on Brownfield. The hierarchy lists Guildford town and urban areas as a priority followed by inset villages and identified Green Belt villages. A relatively small percentage of housing is allocated for Guildford town (the most sustainable location) and Green Belt areas, such as Blackwell Farm, with high sensitivity have been classified as within the 'Guildford urban area' when they are in fact in the open countryside. We are told that only 1.6% of the 89% Green Belt has been earmarked for removal and that the 6% removed via insetting doesn't count as these villages are already developed. If this is the case, why list them in 4.1.16 of policy s2 - Spatial Strategy?

4.18 The preferred options cannot accommodate all that Guildford 'needs'. This is untrue. Two specialist consultants have independently critiqued the OAN and both question the level of uplift and the use of ONS data without full correction for changes and anomalies. They refer to 'double accounting' as the uplift is introduced at several stages and the assumptions that result in the final OAN are not explained. See comments on Strategic Housing Market Assessment (SHMA).

Strategic Housing Market Assessment (SHMA)

I Object

The “objectively assessed need” figure of **693 homes a year is too high**.

A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, **the housing need figure should be revised down to 510 homes a year** and the SHMA method should be changed to consider student housing need separately due to the distorting effects of students on the figures.

The current SHMA inflates the proposed housing figure due to:

- failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability, and
- flaws in the method for estimating the number of homes needed to support job growth.

It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

Two additional reviews of the SHMA reach similar conclusions, one having been produced by CPRE and the other by Cllr. David Reeve.

The Land Assessment

I object

The exclusion of sites of 5 dwellings or fewer from the list might make administration easier, but the addition of these sites plus windfalls and outstanding (but current) permissions gives rise to a higher number of dwellings than is actually needed, thus reducing justification for release of the Green Belt put forward.

The criteria used to include or exclude sites because of this study lack consistency, with many sites excluded as 'unsuitable' with no further explanation offered (many of which were in the urban area of Ash). The assessment lacks objectivity and detail.

Green Belt & Countryside Study

I object
GBC’s Green Belt & Countryside Study does not value appropriately the “fundamental aim” of Metropolitan Green Belt or look strategically at options for developing in major settlement areas beyond the Green Belt. It is pointless for London to apply constraints to protect its Green Belt if areas within it, such as Guildford, choose to ignore this option. It is the same Green Belt and serves the same purposes, all of which are acutely valuable.

The way Green Belt is parcelled up and scored is invalid: serving 2 Green Belt functions well is as legitimate as serving 3 to 5 functions less effectively. The Green Belt sensitivity analysis is not a valid basis for informing decisions. This method also omits purpose one, on the basis that all Green Belt sites encourage regeneration of urban sites. This should not be excluded for it is valid and could even be argued to be particularly valid in areas close to the town. Boundaries used for Blackwell Farm were neither permanent nor defensible.

Proposed removal from the Green Belt of a number of relatively small sites where development of an exceptional nature has taken place, plus adjoining land, has lost sight of the scale at which Green Belt is effective.

Assessment of which villages to take out of the Green Belt does not adequately consider that villages contribute to the openness of the Green Belt, as seen from surrounding AONB.

A key principle of Green Belt is its permanence. The University Consultants stated this 13 years ago when seeking permission to take Manor Farm out of the Green Belt to create Manor Park. They reassured residents that the boundary would not be frequently moved and that Blackwell Farm would be opened up to the public for “informal recreation”. The same Consultant has now repeated this promise in putting forward the University plans to develop on Blackwell Farm, saying that the new boundary would be permanent for at least 25 years!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: SQLP16/397  Respondent: 8570273 / Fiona Curtis  Agent: Fiona Curtis

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

The Plan preparation process has had inadequate regard for national policy, which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

The report states that there are no pollution issues in Guildford. This is not true. The A3 end of the B3000 exceeds Eu regulations and this should be flagged in the 2015/16 air quality report which the Council has yet to publish.

I object
The 2015/2016 air quality management report has not yet been published and this will/should include an area at the A3 end of Compton, which exceeds the recommended max NO2 reading. One year results for NOx are 48.728 with high's of 68 using National bias adjustment.

Cllr Furniss indicated that the location of the test tubes may have made them invalid, but measurements show that they were positioned correctly and monitored for over a year by GBC environment officers, who have now added additional monitoring devices (See Annex 2 – Correspondence between Cllr Curtis and Cllr Furniss). This area qualifies as an air quality management area (AQMA) and it is disingenuous to omit this from the report or to use an old report on the basis that the 2015 report is not yet published, as the problem is known and recognised by the environment department within GBC.

The traffic survey shows increases in overall flow at the B3000 monitoring point, of values between 5.6% and 16.5%. This would severely impact flow, which is not in line with National Policy as further congestion would exacerbate the current air quality issues as the A3 end of the Street.

I do not believe that a regulation 19 consultation is appropriate. Whilst few changes have been made, additional sites have been included without opportunity for regulation 18-consultation input.

The video used and paid for by GBC and taxpayers is biased towards development, and hence raises questions over the validity and legality of such marketing campaigns. All the individuals featured in the video, with the exception of one nurse have previously spoken in the Council Chamber in favour of house building/building on Blackwell Farm; and there is not a single voice representing protection of the Countryside or outstanding landscapes.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:** [Air Quality correspondence.pdf](#) (408 KB)
concluded that most of the 265 hectare farm was of a landscape and scenic quality that merited inclusion within Natural England’s revised Surrey Hills AONB boundary.

It raises serious question about the soundness of the evidence base when Surrey CC says that it only has to account for evidence submitted and not for that omitted? The area within the proposed development site at Blackwell Farm should now be considered by Surrey Hills as part of the AONB boundary review and land to the west should remain undeveloped, as it is important to the setting of the AONB.

The plan is not justified. Residents groups have suggested other strategies but these have not been tested or considered against the current trajectory, which has remained largely unchanged since day one.

Many aspects of the Plan were strongly objected to in 2014 and not only have these points been ignored, they have in fact been embellished or made worse. I refer to the points that GBC referred to in their own summary, which stated that most people objected to the scale of development and the harm to the Green Belt. At that time there were 4 strategic sites and now there are 5. At that time approx 50% of development was in Green Belt and now it is 66% with only 34% on previously developed sites. 58% of development is on just 5 sites.

A more realistic appraisal of the town centre with more multi-storey car park development and less retail would make way for a greater percentage of housing in the town centre, which is after all the most sustainable and sought after area. Additionally, greater pressure must be placed on the University to house more students at Manor Park in order to free up affordable rented accommodation in the town for key workers.

There is a conflict of interest when the developer (University) drags its feet over the provision of promised student accommodation (thereby putting pressure on the housing market) whilst at the same time seeking permission to build 1,800 new homes to help Guildford’s need? The University is at least five years behind with programme of building student residences and staff housing. It is widely agreed among residents groups that the University must fulfil all of its current building plans and substantially increase the proportion of students on campus. If the University built the outstanding units, the housing need would reduce substantially yet much of this is omitted from the outstanding permissions list?

GBC has approached development without applying constraints that are applicable such as Green Belt and infrastructure. It is wholly inappropriate to build a Plan without constraints when there is widespread opposition to this approach. Furthermore, there are serious doubts over the validity of the objectively assessed housing need. Housing need underpins the entire plan, and we are being asked to accept the figure of 693 on trust. Without an understanding of the methodology behind the OAN, the public cannot 'buy into' this figure, especially as it has been illustrated by two reputable professionals that there have been errors such as ‘double accounting’, which has resulted in uplift. Both consultants have concluded that a more accurate figure would be around 500 new homes pa and the most recent one, which was done in pre Brexit -June 2016 acknowledges that due to the high number of International students here in Guildford a student SHMA would better inform this plan. Both consultants feel that the current SHMA is flawed and that the OAN of 693 is too high. These reviews will be submitted by CPRE and the GRA and we support the findings of both.

Putting 58% of development on 5 sites, which are within the Green Belt, or largely within the Green Belt, is not consistent with national policy. The definition of 'exceptional' is forming an exception or rare instance; unusual; extraordinary. What possible exceptional circumstances can justify 3 sites of approx 2,000 each and two of 1000 each, on Greenbelt. This makes a mockery of the term 'exceptional'?

The plan has a maximum number and a hefty buffer. It has underestimated windfalls and overestimated need. It is likely therefore that if one of the major sites fails to come through, the Plan could still succeed in terms of numbers, but would fail in terms of impact on infrastructure and reliance on aspirational, but distant 'yet to be discussed' schemes such as railway stations, making the plan undeliverable. If more people are not given the opportunity to live in Guildford town, the night time economy cannot grow and if the gamble to use 40% of the land for retail fails, shops will close and we will have created a leafy green ghost town, whilst the villages outside the town will have changed beyond all recognition as the impact of urban sprawl takes its toll.

The plan puts many eggs into 5 baskets with 58% of all development on just 5 sites. If these are not deliverable, the plan will fail. This strategy has been roundly criticised by Inspectors in other parts of the country.
Taking on such a high OAN without scrutinising it and then taking land out of Green Belt to fulfil it, and using developer funding to secure infrastructure (which reduces significantly the proportion of affordable housing delivered) is destructive and risky.

It is inconceivable that 5 sites between 1,100 and 2,000+ each can be built on Green Belt land without affecting the purposes of the Green Belt.

AONB should be given the highest protection. Despite being put forward for AONB review Blackwell Farm was omitted and an independent consultant had to be commissioned by local parish councils. The findings showed that the area met Natural England’s latest criteria for AONB and should not therefore be developed but should instead be properly recognised.

The proposal at Blackwell Farm has been reduced from 2100 to 1800 to take account the impact on future AONB or for views in and out of the existing and future AONB from public areas as determined by planning policy. It is feared that if this site were approved and if access could be made possible without causing serious problems to the surrounding road network, that the AONB in this location would undoubtedly be destroyed.

GBC argues that it is necessary to remove more than 1.6% of its 89% Green Belt and to remove more than 6% of its Green Belt from villages (by way of insetting) in order to meet its need, yet at the same time the Council advocates making an additional area Green Belt? The area of land being put forward for inclusion within the Green belt is on the same ridge as two areas of Green Belt it wishes to remove (Normandy & Blackwell Farm). This approach lacks consistency.

Cllrs Paul Spooner and Matt Furniss have stated clearly that there will be no development without supporting infrastructure and that the infrastructure must come before, or alongside, development. It is difficult to see how this will materialise as developers’ CIL contributions (which will fund infrastructure) are paid from profits made from the development. This statement appears to be unenforceable and could offer false reassurance to residents who may support the Plan on this basis.

Developers are being asked to fund large amounts of infrastructure. They will offset this against any agreement for affordable housing and it is highly possible that affordable housing will not be built or that only a small proportion will be built. This was one of the key drivers and is factored into the housing need, yet may not be delivered. Where is the general analysis to see what level of affordable housing might actually be delivered given the level of infrastructure needed to implement this level of development on new sites?

The omission of the Town Centre Master Plan (on the basis that this has different timescales) invalidates two key components of the Plan - the Infrastructure and Highways assessments. The suggested road closures in the town centre and the resulting re-routing of traffic should be factored into the highways assessment, but they are currently omitted. The consequences of this could render the whole Plan undeliverable and I don’t believe the Plan can be approved without factoring in the Town Centre Master Plan.

GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA), which CPRE and GRA consider unsound. The methodology for the uplift and assumptions made have not been made available and thus the openness and transparency required for public understanding as outlined in the NPPF has not been adhered to.

I understand that Highways England will not start to consider its intentions as regards the A3 in the vicinity of Guildford until 2018. It is difficult to see how plans can be approved without the inclusion of this information.

Network Rail has not made available for the public consultation any plans for a new railway station at Merrow, nor have we been told where the station car park would be situated nor how the railway bridge between Merrow and Burpham would be re-constructed to take the additional traffic. Likewise, there are no detailed plans for the railway station at Park Barn and Network Rail has not confirmed the status of either. These schemes must have a sounder footing to be included in the Plan if they are to be used to justify major developments nearby.

The access to, and from, Blackwell Farm (via the A31) has not been thought through. There proposed new route will likely be used as a rat run to the A3/Guildford, but this will put pressure on a congestion hot spot, and result in increased traffic at the Compton turn-off and Down Lane (home to Watts Gallery). It is also recognised that congestion at the Tesco
roundabout will be made worse and this area is already subject to considerable problems. Additional traffic via the business park from Blackwell Farm will add to congestion at the Egerton roundabout and impede access for emergency services to the hospital.

The proposal at Blackwell Farm has been reduced from 2100 to 1800 to take account of the AONB, but this does not account for views in and out of the AONB from public areas.

The greenbelt sensitivity study is not objective. The reference to Blackwell Farm as 'South West Guildford Urban' is totally misleading as it is unadulterated countryside that fulfills all the purposes of Green Belt. I consider this Study, which was the subject of much criticism in the last plan, to be flawed, yet it remains in this Plan. Why?

The damage caused to the Green Belt by the addition of Blackwell Farm would outweigh benefits gained from development, as there is ample space and lapsed planning permission on the existing Manor Park land for development for student accommodation, which would free up affordable rented accommodation in the town.

The proposal for Garlic Arch was added to the draft Local Plan without any consultation under Regulation 18.

No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Guildford citizens.

No land has been safeguarded for a tunnel, which would show a real intent.

This consultation included 'significant changes' according to GBC, although most residents would strongly dispute this. Some key reports were added and 6 weeks was not long enough to properly digest the information and impart this to residents. Many additional questions had to be asked and many points required clarification, which essentially meant adequate information, was not made available until two-thirds of the way through the consultation.

The level of objection at the 2014 consultation was considerable - these objections have NOT been dealt with, but have been carried through to a regulation 19 consultation, undeterred. This is not in the spirit of Localism or the NPPF.

See annexes included with Q1 - ie Independent SHMA reports and land assessment report

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
both Woking and Waverley (and indeed London as it is the Metropolitan Green Belt) prefer to protect their Green Belt then the question must be asked as to why Guildford is happy to relinquish its Green Belt land, especially in the face of strong public opposition.

Many also question the choice of just Woking and Waverley as partners in the SHMA as there are considerable links with Aldershot and Farnborough in Rushmoor, which have very different needs and their inclusion could have provided a better balance.

| Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 5: The examination |
| Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments? |
I object to the inclusion of Blackwell Farm in this Local Plan, for the following reasons:

- The southern slopes of the Hog's back are AONB and views in and out of that area should be protected and this is not possible if the development goes ahead.
- Blackwell Farm has recently been assessed by an independent expert as being of AONB quality and we anticipate that it will be included within the Surrey Hills AONB as part of the forthcoming boundary review.
- The South Downs is National Park and there has been a call for the North Downs to be considered in the same light. This would make Blackwell Farm a great asset to Guildford and a tourist attraction (particularly as it is home to one of the few Model Farms in the South East) and would fit in well with the rural ventures such as Greyfriars Vineyard, Mane Chance horse sanctuary and Watts Gallery, all of which are in close proximity.
- Blackwell Farm is very effective in fulfilling the functions of Green Belt.
- Blackwell Farm land which has been categorised as the best and most versatile (Grades 2 and 3a) and there is strong demand for local food production.
- More people objected to the inclusion of this strategic site than to any other strategic site, its inclusion is not supported.
- The 4-way access to the site on the A31 (Hog’s Back) is highly unlikely to be viable, and would harm to the AONB for miles (due to the need for lighting and its elevated position). The suggestion that rat running could be deterred through the use of automatic number plate is unrealistic. What about visitors and deliveries and changes of vehicle? Likewise, a barrier would cause chaos and possibly increase the volume of traffic wishing to use the A31. If no restrictions were put into place, the route will become a rat run, then there is nothing from stopping traffic on the A31 from using it if it is indicated as the shortest route. If the A3 were congested traffic could also come off at the Compton roundabout and take this route via Down Lane, which would add to congestion in this busy village and would negatively impact the tranquil lane, which is the home of Watts Gallery and Chapel.
- Maps, tables and results from assessments such as traffic impact all refer to the Blackwell Farm site as in “Guildford urban area” and refer to non-existent boundaries as if they are current. There is nothing urban about this area of countryside as the independent landscape assessment reveals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment - Localism

The Plan is supposed to be informed by residents and by parish councils and residents' groups and their input used to formulate the Local Plan, not for it simply to be presented to them and objections and subsequent input ignored. Despite a great deal of effort from these groups and many like-minded responses, the Plan has not taken their concerns on board. The Plan has barely changed since day one and residents feel their views have been ignored and that the consultations have not been genuine. To add insult to injury, some of the key points raised have actually been exacerbated or made worse, such as the scale of development and harm to the Green Belt and issues over infrastructure.

The NPPF is open to interpretation, but it is my belief that GBC has chosen to interpret it in a way that lacks objectivity in an effort to appease developers in order to avoid costly court cases at a later stage. GBC has cited cases where development has been granted in an effort to justify this pro-development stance but has failed to balance this against the many sites where development has been refused.

To gain true public reaction, material presented has to be factual and unbiased and written without jargon and acronyms. This has not been the case. A degree of 'double speak' has led to absurdities such as 'affordable housing' which is over £300,000 i.e. ten times the average salary; 'safeguarding' which does not mean protection of land as most people would think, but rather potential future development and 'insetting' which means removal? It is recognised that these terms are not locally derived but all the same they are confusing for most of us.

Some Councillors have shown a lack of knowledge about environmental matters. Cllr. Gunning - webcast 24th May section 7 - 3:39

'About ancient woodlands, of course they are very attractive things, but they are ancient and trees don't last forever, so can we be practical about ancient woodlands and consider their value or their life, I should say, their life'

May 11th - Cllr Ellwood announced that he couldn't understand what all the fuss was about pollution as his Mother had lived (presumably unaffected by it) under the flight path at Heathrow?

Whilst people have been encouraged to take part in consultation, objectors have been subjected to name calling and public humiliation. There are too many examples to list and so I am listing the most recent. http://www.guildford-dragon.com/2016/07/10/letter-not-surprised-mr-patons-comparison/#comment-157440

The Local Plan has divided communities and highlighted weaknesses and alliances, which have resulted in a breakdown of trust between residents and those whose job it is to implement the Plan.

The Plan has been roundly criticized and objected to and yet it is presented to us once again. Many feel the consultations to date have been worthless and feel they have already made their points, which were ignored and will not therefore be making them again as they fail to see the point?

It simply is not possible to address infrastructure shortfalls by building in the hope that developers contributions will cover the costs as the level of development needed negates any benefits gained and in many cases, the situation is made worse.

Central government funding is needed to address current problems so that funding from development can be used to implement additional infrastructure needed to make new sites viable without damaging their surroundings. It must be accepted that geography and lack of previous investment leaves some areas with less opportunity to do this than others.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Applying Constraints

Ministerial guidance in relation to building on the Green Belt is clear: 1. “the single issue of unmet need - is unlikely to outweigh the harm to the Green Belt and other harm to constitute the "very special circumstances" justifying inappropriate development in the Green Belt” - Nick Boles to Sir Paul Beresford MP 7th February 2014. 2. “we were always very clear that we would maintain key protections for the countryside, and, in particular, for the Green Belt. The Framework makes it clear that a Green Belt boundary may be altered only in exceptional circumstances and reiterates the importance and permanence of the Green Belt” – Nick Boles to Sir Michael Pitt, Planning Inspectorate 3rd March 2014. 3. “Planning Guidance, updated in March 2014, also states that unmet housing need is unlikely to outweigh the harm to the Green Belt to constitute the very special circumstances justifying inappropriate development within the Green Belt” – Nick Boles to Sir Paul Beresford MP 18th June 2014 70% of the sites put forward in the Local Plan are in the Green Belt which flies in the face of current government planning policy. The National Planning Policy Framework (NPPF), National Planning Policy Guidance and case law make it clear that Green Belt is an absolute constraint on housing supply. Exceptional circumstances need to be shown to adjust boundaries. Other constraints under the NPPF include assessments of sustainability, strategic flood risk assessment, physical constraints on land use and infrastructure constraints (this can include road congestion, schools, drains, power supply and medical requirements). Constraints should be applied to the Objectively Assessed Housing Need (OAN). However this itself is overstated and should be reduced from 693 per annum to 500. In view of the comments above it would appear logical to apply CONSTRAINTS in line with government policy to a corrected OAN of approximately 50% to account for the fact that 89% of the borough is in the permanent Green Belt and development is not supported by adequate major infrastructure. This reduction is in line with the constraints percentage of 50% applied by Woking Borough Council. This would result in a more acceptable and practically achievable HOUSING TARGET of 250 homes per annum which over a 20-year period would be 5,000 homes. All of these homes could be built in the existing urban brownfield areas of the borough and would in part satisfy the 20,000 objections made by residents to the 2014 draft plan and also relieve the additional problems of inadequate infrastructure. It would also mean that there is currently 8.5 years supply of housing (2131/250) which is made up of existing permissions granted (1,518) and completions made (613) during 2013/2015. (Monitoring Report by GBC 2015) The Brexit vote may have strengthened government policy further. Theresa May, the new prime minister, announced on 11 July that she is personally committed to protecting the Green Belt once she takes office. Whilst I have many significant objections to the GBC Local Plan I applaud the policy statement by GBC in their Monitoring Report, “We will continue to monitor the use of previously developed land, and continue to identify as many opportunities as possible for redevelopment of previously developed land.” I believe it will be to the benefit of all residents if GBC can apply themselves vigorously to this endeavour in order to protect the Green Belt.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
SHMA • reduced total housing target by 1,400 units until end of plan period in 2034

This is not a reduction, but a postponement or a delay

• reduced housing need from 693 to 654 units per year – revised Objectively Assessed Need (OAN) for housing in updated Strategic Housing Market Assessment (SHMA): Guildford Addendum

• sites removed completely from the plan – primarily for homes in rural areas such as a large site in Normandy and Flexford for 1,100 residential units

The Normandy site was not in the regulation 18 consultation or the Issues and Options and hence it was only removed from the most recent plan. It was also added at the last minute despite being safe guarded since the last plan and many doubt the intention to ever seriously consider this site but feel that this was added with a view to removing it, to demonstrate that the authorities are listening to communities.

• updated sites with reduced numbers of homes during the plan period – primarily in green belt areas such as Gosden Hill Farm and Blackwell Farm, with 300 fewer residential units at each site, due to phasing of delivery expected beyond 2034

Again, the numbers are NOT reduced at all, they are merely delayed or phased and hence their whereabouts is inconsequential.

• updated sites with increased numbers of homes – primarily brownfield in the town centre such as 200 more residential units on the North Street redevelopment

• updated sites for student accommodation and Travelling Showpeople – such as Guildford College changing from 100 homes to 200 student accommodation units instead and land at Garlick’s Arch site that is now accommodating six Travelling Showpeople plots

• new sites for employment floor space/industrial land – such as land around Burnt Common warehouse is the new site for 7,000sqm of industrial land moved from the site at Garlick’s Arch

• new rail station at Guildford West, Park Barn -- is now included as a site allocation

• reduced total growth requirements from last year’s Local Plan period in 2034

This is not a reduction, but a postponement or a delay
• **reduced housing need from 693 to 654 units per year** – revised Objectively Assessed Need (OAN) for housing in updated Strategic Housing Market Assessment (SHMA): Guildford Addendum

• **sites removed completely from the plan – primarily for homes in rural areas** such as a large site in Normandy and Flexford for 1,100 residential units

*The Normandy site was not in the regulation 18 consultation or the Issues and Options and hence it was only removed from the most recent plan. **Answer (if comment is on questions 1-7 of the questionnaire):** ()

<p>| 2.10a | New comment on infrastructure needs | I particularly support the recognition that villages and village networks are affected by poor infrastructure. | I support parts of the comment BUT <strong>object</strong> to this being the only comment relating to infrastructure. This does not go anyway near clarifying necessary details. |</p>
<table>
<thead>
<tr>
<th>2.13</th>
<th>There is also a network of footpaths and bridleways forming a Rights of Way network which includes various routes that can be used by off-road cyclists.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Comment</strong></td>
<td>Cut backs have resulted in issues for both horses and cyclists. In the summer months encroachment and in the winter months, flooding makes many routes impassable. Comments about communities being served by a bus route should be amended as this is subject to constant change as bus services are being cut and others are running subject to review only (ie 46).</td>
</tr>
<tr>
<td>2.14a</td>
<td>Note on congestion 'whilst most local roads are single carriageways with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods'</td>
</tr>
<tr>
<td><strong>Object</strong></td>
<td>This is true, however this omits to say that road widths in villages and parts of the town are often inadequate for the size of vehicles which results in lorries using pavements or more than one lane. This affects traffic flow. Off street parking also places restrictions on busy roads. This is used in Waverley (Chalk Rd Godalming and parts of Binscombe) and creates issues with flow, forcing high volume traffic through the B3000 which already has high pollution readings. It also omits to take into account the possibility that some roads have reached capacity, especially at peak time. The b3000 in Compton has reached capacity at peak time and is close to maximum capacity for most of the day during the week. It does not acknowledge the knock-on effect of congestion on A3 / A31, which is rat-running which results in congestion on minor roads (B3000 Compton) and pollution.</td>
</tr>
<tr>
<td><strong>Comment</strong></td>
<td>The policy does not fully recognize the impact on rural roads.</td>
</tr>
<tr>
<td>2.21 - Shortage of affordable housing</td>
<td>The para notes a shortage of affordable housing without putting this into context. That is to say what percent of people in Guildford find themselves unable to afford 'affordable' housing and omits to mention the shortage of 'social housing' or the impact that 'right to buy' has on social housing stock.</td>
</tr>

Answer (if comment is on questions 1-7 of the questionnaire): ()

Inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9]:

1) disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]

2) directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E

– and will also encourage rat–running through residential areas
3) ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]

4) adds to air pollution in neighbouring areas, which already exceeds safe EU limits for nitrogen oxides [Policy A26].

Policy A26: Blackwell Farm has been amended and now the proposed development includes a secondary school with up to six form entry. This will add to morning peak hour traffic which was not included in the 2016 modelling. The SHAR findings indicate that there will be congestion in peak periods on the network that will serve this development. The A3 will be at or over capacity which means that the network will lack resilience, as it does today. The roads connecting to the town centre will continue to be under pressure. The SMC concept is more advanced on this section than elsewhere, but the effect on capacity has yet to be established. There will be queuing on the A31 on the approach to the new signalised junction that will give access to the Blackwell Farm site. The A31 is regarded as a key route by the LEP and LA partners.

I fully endorse all the comments made by Richard Bate of Green Balance in the response he produced for Compton Parish Council and include this as annex 13.

Northdowns Housing Ltd

GBC has given considerable amounts of taxpayers money to a company called Northdowns Housing Ltd, where the Directors are Councillors or Ex councilors or are connected to GBC. The company is based at GBC yet when it was agreed that £22m of tax payers money be diverted to this company it was not to add to the housing number by building social housing, but to buy affordable housing to rent and to be profitable. This does not help those most in need and directly competes with first time buyers. Financial details of the company and salaries of directors were not published with the reports pack and whilst exceptions can be applied to information held with Companies House, this is not at this stage.

This direction is not one I feel comfortable with and I am not sure that all other GBC councilors are comfortable with it either.

I support building social housing but do not support this modus operandi and hope that the Local Plan can clearly identify the purpose of this company and how it plans to operate.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I endorse the submission by WAG

WAG commented in its 2016 representations that the over-allocation of housing meant that there was no justification for including the former Wisley Airfield (A35) given the harm it would cause. That case is strengthened by the reduction in the housing requirement.

There are issues concerning pollution levels due to its proximity to the M25 and A3 and proximity to SPA, and sustainability, none of which have been addressed.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy D3 Historic Environment

Adequate resources must be given to ensure the policies can be carried out. Conversely, to the statement that conservation and economic sustainable growth are complimentary objectives, this is not always the case and policies must be put into place to better define outcomes where the two do not co-exist. For instance, there is an ancient monument within Blackwell Farm that is overgrown and completely neglected. In what way will policies that support economic growth also support the restoration and setting of this monument and its surroundings (historic royal park)?

Many conservation reports/assessments are 20–30 years old and to date resources are not in place to keep up to date with this.

Last year I suggested that the Arts and Craft building (1912) that was the former Rectory in Compton, should be listed. It was agreed but again due to lack of resources it was necessary to source and provide all the evidence that was needed myself.

The policy does not provide a framework for the enjoyment of the historic environment and in order to fulfill 4.5.45, resources must be put into place to fulfill the programme.

Key Evidence

Planning practice guide has been removed as has the NPPG, without any justification? These should remain in place unless justification is supplied for their removal.

<table>
<thead>
<tr>
<th>Policy E1</th>
<th><strong>Replacement of 'Sustainable employment needs' with 'Meeting employment needs'</strong></th>
<th><strong>Object</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Policy E1</td>
<td>I object to this omission. It is up to local authorities to balance the economic guidance received with the need to provide a sustainable plan. It is therefore important to retain sustainability at the heart of the plan and not forget that LEPs are one of many formal consultees. Failure to balance the needs of all could result in a plan that is LEP / economy driven and balance would be lost.</td>
<td></td>
</tr>
</tbody>
</table>

| Indicators | The criteria used to determine the significance of an employment site appears to be based on space and the amount of land it takes up and does not account for value / number of people it employs? This means farms with relatively low turn over and staff numbers are mapped whilst their contribution to the economy is relatively small? All sites meeting the criteria are added to the list, which currently only lists 9 sites? Protection of sites must surely be based on a much wider remit than space alone and I would recommend that this policy be reviewed to encourage efficient use of space and monitoring indicators based on the contribution to our economy. | **Object** |

| Indicators | I am concerned that the emphasis on B8 class jobs (storage & distribution) will lead to land hungry warehousing and increases in large trucks and lorries on our roads which are already amongst the most congested roads in the UK. Very few jobs are generated from warehousing and the salaries commensurate with this business class add to pressure on affordable housing. I would prefer to see a greater emphasis on A2 and B1 | **Comment** |

I object to the ongoing poor quality of the updated research undertaken by Aecom. The Employment Land Needs Assessment 2017 is superficial and lacks sufficient detail and analysis between B1a, B1b, B1c, B2 and B8 use classes and no reliable analysis has been undertaken of the widely different supply and demand dynamics of the
categories ie. office, research and development, light industrial, general industrial and warehousing and distribution floor space.

The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

38,357sqm of B1c, B2 or B8 use class is quite sufficient supply for the plan period and does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced in part by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

| 4.4.23 | I object to the change in policy E2 under paragraph 4.4.23a in relation to development involving waste management facilities to be directed to the Industrial Strategic Employment Sites. This fails to provide sufficient public consultation in relation to access and traffic flows. It also fails to provide sufficient public consultation in relation to unpleasant aspects of waste management Waste sites should, in my view, not be developed near residential areas and if this is followed through, their presence will of course prevent development in the area in the future. | Object |
| 4.4.14 | This policy omits Park and Rides as integral to linking business and transport | Comment |

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I believe that proof of a business being non viable before change of use, should remain (this has been removed) as easing the way to change of use increases value and restricts stock. This should not prevent business premises from being re-housed, where housing is a priority or where new transport hubs improve economic viability.

I can see no reason why restrictions on change of use should not apply to other classes of business?

<tbody>
<tr>
<td>4.4.34</td>
<td>The NPPF: A sentence is included from the NPPF that supports local business. This however must be balanced with all other parts of the NPPF, including the protection of the Greenbelt, historic environment and development or growth must be sustainable. I strongly object to the use of what was Greenbelt land being used for 'low density' business. Permitting low rise office and research space with vast levels of landscape and surface car park puts huge pressure on the borough to release more Greenbelt and this is not sustainable.</td>
<td>Strongly object</td>
</tr>
<tr>
<td>4.4.38</td>
<td>Omission: The plan notes the Park's location in relation to the A3, Sports centre and Holiday Inn but omits to include two key sites that lead to high volume traffic, namely the Tesco super store and the Hospital.</td>
<td>Comment</td>
</tr>
<tr>
<td>4.4.40</td>
<td>removal of detail relating to the new extension: The plan could retain this information. 'Mixed use' development is far too generic.</td>
<td>Object</td>
</tr>
<tr>
<td>4.4.40</td>
<td>I would like to see further detail relating to floor space used, density and use of other space such as car parks and landscaping. I am concerned that this land is not being used efficiently. The Local Plan must include policies that ensure space is well used i.e multi-storey or subterranean car parking, medium density building and type of business. Failure to do so, could see the research park being used for other types of business which would not necessarily be in keeping with the overall ethos and direction that Guildford aspires to.</td>
<td>Object</td>
</tr>
<tr>
<td>4.4.37</td>
<td>omission: The original planning permission also stipulated that traffic should not increase by more than 5%. An independent review is needed to verify traffic flows as data produced by the University is not impartial and has manipulated results by removing sections of traffic deemed to be excluded? I attach a clip from Surrey mail 1988 in which the University seeks to prevent planning permission for the Tesco development on the basis of traffic issues. In almost 30 years, traffic is markedly worse than it was then and forecasters of congestion at this point have been proven correct. Traffic is a major issue at this point and failure to effectively deal with it as well as deal with future growth will affect the integrity of the whole Plan and put other businesses at risk (as many will leave due to congestion) as was proven by the evidence base.</td>
<td>Object</td>
</tr>
</tbody>
</table>
complement and enhance the existing Research Park setting.

<table>
<thead>
<tr>
<th>4.4.1</th>
<th>The density usage of 30,000 sq m in 10 hectares is an outrageous waste of space. 30,000 sq m could be incorporated into existing space whilst maintaining its character and without releasing more Greenbelt land at this stage. The existing site is now brownfield and must be optimally utilized before spread is permitted. I strongly oppose plans for low lying sprawl especially for commercial use. Land must be used wisely. Any plan that focuses on delivering timescales as a mark of success but does not monitor the quality or quantity against the wider plan and NPPF cannot be sustainable. Permitting sprawl on this scale will reduce scope for development and ability to enjoy our countryside setting for future generations. This is against the principals of sustainability and the NPPF</th>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

<table>
<thead>
<tr>
<th>Rural Economy</th>
<th>Throughout this policy there is an assumption in favour of sustainable rural development in order to support economic need, as stated in the NPPF. It should also be noted that the NPPF guidance states</th>
</tr>
</thead>
<tbody>
<tr>
<td>• support sustainable rural tourism and leisure developments that benefit businesses in rural areas, communities and visitors, and which respect the character of the countryside. This should include supporting the provision and expansion of tourist and visitor facilities in appropriate locations where identified needs are not met by existing facilities in rural service centres</td>
<td></td>
</tr>
<tr>
<td>• promote the retention and development of local services and community facilities in villages, such as local shops, meeting places, sports venues, cultural buildings, public houses and places of worship</td>
<td></td>
</tr>
</tbody>
</table>

This policy is driven by rural businesses. The main stakeholders are rural businesses and even the forum at which findings are represented is at a paid ticket event for local business. Communities have been largely removed from the policymaking, and tourist's views are represented by a relatively small and select sector. Parish Councils were contacted very late in the day and hence had little time to respond. On gathering their submissions, I am able to see that their views were not included in the summary findings and neither were views of residents groups (as they were not included at all). | Object |
<table>
<thead>
<tr>
<th>I believe that the consultation process fell short of what would be expected and hence I object to this policy.</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.4.46 The creation of new business opportunities must be balanced with the needs of the farming industry.</td>
</tr>
<tr>
<td>I support this statement but feel it should also include the <strong>rural community</strong>. It seems that residents have been completely disenfranchised under this strategy. Whilst I agree with the need for balance, I fail to see how this is reflected when 3 very large good grade agricultural sites (Wisley, Blackwell Farm &amp; Gosden Hill) have been put forward for development?</td>
</tr>
<tr>
<td>Support but needs extending.</td>
</tr>
<tr>
<td>The Council will also work with partners to support the provision of small-scale business incubation centres in rural areas.</td>
</tr>
<tr>
<td>I support the ethos behind this, however new business ventures must be truly sustainable and this means on a regular bus or train route to avoid the introduction of more cars into rural areas that are ill equipped to cope. The buildings must also be in keeping with the vernacular and on an appropriate scale.</td>
</tr>
<tr>
<td>Support but needs greater definition</td>
</tr>
<tr>
<td>(5) Proposals that would result in the loss of shops and services that provide for everyday needs (within Use Class A1) located in rural areas but outside of Local and District Centres, will only be acceptable if evidence is provided of active and comprehensive marketing of the site for its current use for a minimum of 12 prior to submission of a planning application.</td>
</tr>
<tr>
<td>I agree with this in principal but cannot see why this does not also apply to local or district centres? The policy has omitted to say 12 what? Ie weeks, months?</td>
</tr>
<tr>
<td>comment</td>
</tr>
<tr>
<td>4.4.51a In May 2017 the Council has adopted a new Rural Economic Strategy aimed at protecting our natural and built heritage, sustaining our rural communities, and enabling enterprise and diversification in our changing countryside. This Rural Economic Strategy focuses on five policy priorities for the period 2017 to 2022:</td>
</tr>
<tr>
<td>The strategy is most definitely not aimed at protecting natural and built heritage.</td>
</tr>
<tr>
<td>If it were it would make more of the ancient monument at Blackwell farm and the enormous amount of history and heritage that accompanies the area. The area has a vineyard a horse sanctuary and of course Watts Gallery, Limnerslease and Chapel. It was once a royal park and much more could be made of the combined heritage assets, yet this has not been considered. If it has been looked at and rejected, then please send the report to Compton Parish Council and to me.</td>
</tr>
<tr>
<td>Object</td>
</tr>
<tr>
<td>I put forward this suggestion in my written feedback as part of this very limited consultation (as Chair of Compton Parish Council), to which I received no feedback.</td>
</tr>
<tr>
<td>I object to the lack of consultation on this policy.</td>
</tr>
</tbody>
</table>
Most Parish Councils knew nothing about it and I had to request an extension to the deadline to enable them to take part. As the launch date for the publication of the policy had already been set (only weeks away from the deadline at a ticket only conference) it is likely that many felt this policy was a 'fait accompli'.

The Strategy covers the River Wey catchment and will link Parish Councils, businesses and other local organisations in rural Guildford, for example, Surrey Hills AONB, Surrey Wildlife Trust, University of Surrey, and also the neighbouring boroughs of Waverley and Woking. Key to the strategy is continuous engagement between all these organisations on aspects of policy, planning and delivery. Delivery of the Strategy will be monitored by Guildford Business Forum's Rural Group whose members include environmentalists, farmers, landowners and producers.

I am concerned about the lack of impartiality when those with a financial interest become directly or indirectly involved in conservation matters. This does not result in 'balance' but in 'imbalance' as policies have been weakened and the strategy is not reciprocated ie businesses such as the University do not have conservationists on their team?

I cannot find any details about the Guildford Business Forum? Who are they, how were they elected, are the meetings public and if so where are they advertised and where are the minutes? If the group is tasked with shaping the development of the rural economy then decisions must be public and inclusive of the rural community.

4.4.51b
These provide low cost, flexible office space for start-up businesses and nomad working and may be able to provide faster internet than at residential properties along with the benefits of interacting with other local entrepreneurs.

Fast broadband for businesses should be widely available and hence they should not need access to special units for delivery.

</table>

3.22 The findings of the retail section of this report should be read in line with the economic paper.

If forecast floorspace cannot be accommodated within existing or proposed town centres policy consideration may be required to support out of centre retail facilities. However, new out of centre floorspace should only be directed to existing locations that are well served by public transport and other sustainable travel modes, and where it can be demonstrated that there will be no ‘significant adverse impact’ on the vitality and viability of existing centres in accordance with the NPPF (paragraph 26).

Table 4.2 Does not indicate whether this table includes internet shopping?
1.15 Lack of growth in Guildford's nightlife may not be due to people choosing to go to places closer to home, but could also be due to poor night time public transport, expensive taxis and lack of diversity (venues are largely for younger people and older people often have more disposable income).

Is Surrey Sports Centre missing from the report?

<tr>
<td>4.4.86 Removal of section on 'flooding'</td>
</tr>
<tr>
<td>I hope the removal is because preventative measures will be put into place and / or development designed for floods is used. There is however no mention of either.</td>
</tr>
</tbody>
</table>
The Regeneration Programme has not been consulted on, on the basis that it bears no weight, as it is purely aspirational. The projects included are far from aspirational as they cross over into other parts of the evidence base. A balance is needed between good design and appropriate levels of development and meeting needs as the majority of people would like to live in the town, close to amenities. The outcome falls short of this with the majority of new housing proposed for the countryside. The Regeneration programme should see all brownfield and urban sites (outside conservation areas) optimally developed. This must include more multi-storey car parks and increased density in certain areas. This would go a long way towards taking the pressure off the Greenbelt. This document should also be open to formal consultation and have input from all Councillors, not just the Executive.

Who are the internal and external stakeholders?

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

| 4.2.30 | There is no mention of proximity to London and is THE KEY reason why Guildford is sought after and highly priced. | Object due to omission |
| 4.2.32 | The affordability ratio for Surrey is more relevant than that of the whole of England. I therefore object to the removal of the comparison to Surrey in favour of England. | Object |

We will seek at least 40 per This policy has been weakened by removal of 'must be' to 'we will seek'. Object
Gaining 40% affordable homes is important and every effort must be made to attain this. Weakening this policy at this stage is a clear indication that the volume of affordable homes is expendable. This is amplified by the removal of 'Developers will be expected to provide land for affordable homes at nil value'.

I am concerned that the number and type of home needed as identified by the SHMA will be built irrespective of the affordability aspect and this is the deciding factor for many people and is more important than having a spare bedroom or even a garden. Given the cost of housing in Guildford and the belief by most that building will not reduce the price of housing, it might be more helpful if the emphasis were on building more starter homes and smaller well designed flats and truly affordable homes rather than percent of market value.

4.2.41 How can failure to use land efficiently be measured if density requirements are removed from policy? They must be added.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

H3 Rural Exception Homes

I believe that affordable homes should retain this category for at least the length of the plan / as long as possible but appreciate that in perpetuity is a long time. They should however be affordable for as long as possible and hence this phrase should, in my view, remain.
4.2.49 I do not agree with the categorization for rural exception housing. I agree that there should be provision for exceptional circumstances ie when a family member needs care and the carer is unable to afford housing, but I believe that the criteria needs more thought. My concern relates to the number of college courses that bear no resemblance to employment opportunities and the inevitable consequences. Equal opportunity should ensure that everyone has the chance to take a path in life where they can stand independently. Where this fails at a local level, I do believe that housing should be made available, but it should be, as its name suggests, an exception. I do not agree that people who have recently left the locale should be considered unless their reasons for leaving are linked to cost of housing and they fulfill the criteria otherwise set.

I also believe that Parish Councils should be able to write and carry out their own surveys.

<tr>
<td>Doc Ref T12a Addendum to 2016 Strategic Highway Assessment Report: high level review of potential key changes in the Guildford borough PSLP: strategy and</td>
<td></td>
</tr>
</tbody>
</table>

A
This presents a qualitative assessment of the effect of the changes made to the 2016 plan on traffic forecasts. Essentially, because the amount of development in the plan has been reduced, GBC’s argument is that things will be better than estimated in 2016. We can readily agree that where development sites have been removed, notably as in the case of the Normandy/Flexford strategic site, the forecast traffic level will be lower in the vicinity of the development. However, there are some sites where the planned development is now greater than in 2016. The software chosen would also have resulted in an underestimation of volume. There are also potential changes to plans outside the borough to be taken into account, such as Dunsfold Park, which may have significant consequences for Guildford, as was pointed out by SCC and GBC in their submissions to Waverley in response to that planning application. The trip rates used in the forecast assume a level of public transport use and an appropriate level of bus services.

B
On the evidence provided by the SHAR based on the 2031 traffic forecasts using the SCC traffic model, congestion will be widespread in peak periods across much of the highway network, including on strategic routes. The A3 and M25 are forecast to be at or over

OBJECT
To each of the policies or comments stated.
capacity. The cumulative effect of the additional traffic generated by the developments in the plan will be to increase congestion, even with the proposed highways schemes in place. Interpreting the model results is not straightforward, as was pointed out in response to the 2016 consultation. Table 4.12 is significant – showing the roads with the ten largest ratios of flow to capacity for Scenario 3, which includes all the planned development but not the major strategic route improvements on the A3 and M25. There is no equivalent for Scenario 5 (i.e. with the strategic improvements), but we can infer that all the roads in Table 4.12 will be at or over capacity in Scenario 5.

C

With regard to the comments on Policy A6: North Street redevelopment (page 9), the model used for the Strategic Highway Assessment is not sufficiently detailed to provide a satisfactory assessment of conditions on the town centre road network. This has been recognised by GBC and has led to the commissioning of more detailed analysis using a simulation model. Added to which, there is uncertainty over the highway capacity implications of the Sustainable Movement Corridor in the town centre and possible changes to the town centre gyratory, as discussed in the draft Town Centre Regeneration Strategy, which indicates that the intention is to reduce the capacity of the town centre network. The experimental closure of Walnut Tree Close is already being planned. Taking into account the demand forecast on the A281, the A322 and A31 in Table 4.12, the consequences of such a reduction will be far-reaching and must be accounted for.

D

Policy A26: Blackwell Farm has been amended and now the proposed development includes a secondary school with up to six form entry. This will add to morning peak hour traffic which was not included in the 2016 modelling. The SHAR findings indicate that there will be congestion in peak periods on the network that will serve this development. The A3 will be at or over capacity which means that the network will lack resilience, as it does today. The roads connecting to the town centre will continue to be under pressure. The SMC concept is more advanced on this section than elsewhere, but the effect on capacity has yet to be established. There will be queuing on the A31 on the approach to the new signalised junction that will give access to the Blackwell Farm site. The A31 is regarded as a key route by the LEP and LA partners.

E

The improvement to the A3 is obviously critically important to the Gosden Hill Farm development. We do not have the benefit of analysis of the proposed new slip roads giving access off and on to the A3 S-bound carriageway, nor an understanding of the implications of the SMC for the allocation of highway capacity on the local roads. What is self-evident is that the pressure on local roads in Burpham is already intense in peak periods, and these roads are not suited to carrying large volumes of traffic. Under the plan, congestion is very likely to be worse than today. The proposed Policy A24 Slyfield development will also add demand to the A320 and roads in Jacob’s Well.

F

The change to Policy A29: Land to the south and east of Ash and Tongham involving more houses means that there will be more traffic locally. While this will not be ‘major’ in terms of the borough as a whole, it will be significant locally. Ash and its surroundings will be impacted by the large Wellesley expansion in Aldershot. It is not clear to what extent the modelling reported in the SHAR allowed for this development. The pressure on the A331 and the roads connecting Aldershot to Guildford and Woking will increase.
G

The M25 is forecast to be at capacity after the planned improvements have been introduced, as shown both in the SHAR and also in the recently published DfT/HE report on the South West Quadrant. This is relevant to Policy A35 Wisley airfield. It should be noted that RHS Wisley is expanding its facilities with the aim of significantly increasing visitor numbers. The DfT/HE Stage 3 report concludes that the focus should not be on widening the existing road further beyond currently planned schemes but on how to reduce pressures and provide parallel capacity to relieve this part of the network. If the M25 and A3 are at capacity, then the Wisley development will add pressure on local roads that are not well-suited to carrying higher volumes of traffic. This is also relevant to the proposed developments at Burnt Common. The consequences for Ripley are likely to be serious. It is noted that Policy A35 now includes a requirement for mitigation of impacts in Ripley and on surrounding roads, which goes some way to recognising that there will be a problem.

H

A comprehensive up-to-date analysis is required to inform decision-making. This should include analysis of the mid-term stage of the plan, before the A3 improvement is complete, as well as 2034.

<table>
<thead>
<tr>
<th>Doct Ref</th>
<th>Transport Strategy</th>
</tr>
</thead>
<tbody>
<tr>
<td>T13</td>
<td></td>
</tr>
</tbody>
</table>

B

Section 2 Surface access to airports. The problem is that the improved A3 will be at or over capacity in peak periods under the Plan, and the M25 SW Quadrant study has concluded that the M25 will be overloaded. So surface access to Heathrow from Guildford will continue to be affected by the weaknesses listed in this section. The unofficial East-West route south of Guildford is the B3000 and traffic counts and air quality stats show that the route is over capacity at peak times and close to capacity at all times during the working day. Links permitting travel East-West must be addressed especially if benefits of the proximity to both Heathrow and Gatwick are to be realized. C Rail. This section is welcome. However, it is noted that Crossrail 2 has not yet been secured.

D

Strategic roads. Surely the strategy should be aligned with the position of Highs England set out in the Topic Paper: Transport, where it is evident that the improvement of the A3 will not be completed until 2026/27, or even 2027/28? The removal of schemes SRN1 and SRN6 from the list of key infrastructure for the plan, and redesignating them as ‘aspirational’ is inconsistent with the safety objectives of the borough and surely of Highways England and Surrey County Council (the highway authority). Under the strategy and the Plan, the issues for Beechercroft Drive and the weaving and merging issues on the existing A3 will not be addressed until half way through the plan period.

E

Section 5 Local roads. While welcoming the aspiration to transform the town centre, the traffic implications have not been dealt with in the strategy or the Plan. Section 1 correctly included the issue of “severance of the town and its constituent neighbourhoods resulting from a combination of the A3 trunk road, railway lines and the River Wey”. The case for a new crossing of the river and railway relieving pressure on the Farnham Road railway bridge should be taken very seriously and examined in depth. There is a real risk that a significant reduction in capacity in the town centre, both the gyratory and Walnut Tree Close, and on routes carrying the SMC, will lead to road users transferring to minor roads around the town.
that are unsuited to carrying more traffic. Detailed analysis is needed to assess the impact of changes in the town and development outside the town on the network as a whole. I appreciate that the task is huge but it is necessary. Prevention of traffic issues has to be better than trying to cure them afterwards?

F

The M25 SW Quadrant study report recommends that alternative routes are developed to carry orbital traffic, and this could mean more use of the A31/A331 in Guildford. There are local roads where capacity is already an issue and planned growth will add to problems that are not mentioned in this strategy. The scope of this element of the strategy is not wide enough.

G

The bus transit strategy is welcome. However, there is insufficient information on the Sustainable Movement Corridor to gauge either what it might deliver and its potential impact on road capacity. A high quality bus station in the town centre is critical for the future of the town. There is a lack of park and ride on the east of the town and not even an aspiration for future provision.

H

The active modes strategy is welcome. However, many roads in the borough are two-lane carriageways of restricted width, with little scope for allocating space for cyclists, and this has to be either accepted or addressed over the long term.

I

Section 6 Air quality. If traffic is going to increase in aggregate, as the forecasts show, even with the measures being proposed, then air quality will continue to be a concern. The Aecom paper states that Guildford is not in need of an AQMA, but officers and councillors know that this is not true as a site on the B3000 has exceeded EU legal limits for NO2 since monitoring began in 2013. The point has been reached where 'further monitoring' or further delay tactics cannot go on and an AQMA must be implemented in order to form a plan of action.

J

Section 7 Road safety. The proposals are welcome, but as stated above, the schemes SRN1 and SRN6 should be reinstated in the Plan for safety reasons.

<th>Paragraph</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.3.37</td>
</tr>
</tbody>
</table>

Flooding from rivers is not necessarily linked to climate change but can be due to poor management and drainage. It should be noted that flooding from surface water is also a major issue in parts of the borough and that due to fear of blight, areas subject to manageable damage from flooding often do not report this as it affects insurance and ability to sell.
Evidence

Should include professional independent assessments for specific sites. This is particularly relevant for Worplesdon and parts of Ash as well as the town centre and Shalford.

Flood zones are based on previous events without development. Large scale development on porous ground will naturally increase flood risk as any natural soak away is removed. A professional independent opinion would be needed to verify the real risk.

</table>
When implementing Policy S1, local circumstances will be taken into account to respond to different opportunities for achieving sustainable development. In accordance with the NPPF, the presumption will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.

I support the statement however I object to the fact that in practice this has not been put into practice.

The plan is not so much positively prepared as avariciously prepared. I do not consider that it is reasonable to take on unmet need from neighbouring authorities, which have applied permitted constraints i.e. given greater protection to their Green Belt, if it means our own is compromised on the scale being put forward.

I believe that constraints should be applied to the housing target, which we understand equates to the objectively assessed need (OAN). Flooding issues (particularly in the town) have been accounted for but those around Greenbelt and infrastructure are wholly inadequate. The solution suggested to accommodate inordinate levels of growth are both inadequate and costly and the net result will be serious debt for many years if not generations. The impact has still not been fully assessed to determine whether the plan is sustainable or whether its impact will blight the future of future generations. The traffic modelling underestimates issues, but remains unaltered / uncorrected. The SHMA has been amended BUT includes fundamental errors, which have been independently verified by three independent commissions. A) By Cllr. David Reeve B) by Neil McDonald and c) Green Balance (B and C are attached).

It was recommended by landscape consultant Alison Farmer Associates that the area known, as Blackwell Farm should be considered in the AONB boundary review, yet it was omitted in Surrey CC’s landscape evaluation. This meant the Parish Councils of Worplesdon, Compton and Wanborough had to fund an independent review to ascertain whether the area was a contender for AONB classification. The survey was carried out by in May 2016 by Land Management Services Ltd, which concluded that most of the 265 hectare farm was of a landscape and scenic quality that merited inclusion within Natural England’s revised Surrey Hills AONB boundary. No comment has been made about this assessment report, which I believe is a significant piece of evidence.

The air quality assessment (10.1.1) relates to increases in pollution caused by additional development and its impact on SPA. The impact on human life is not included and neither is the B3000 where Nox readings at the A3 end have consistently exceeded recommended safety levels and where an AQMA is now expected. The B3000 would be affected by the Blackwell farm development in particular and possibly by Dunsfold.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

| 4.1.6 | The direction given prioritizes development in Guildford town centre and urban areas, yet only 30% of housing is in these areas. It might be the 'preference' as stated in 4.1.6 but the reality does not match up with this and efforts to achieve growth in the preferred urban areas is lacking. The enormous level of objection to removal of 15 villages from Greenbelt (insetting) has been ignored and Greenbelt villages should be removed as a priority. | The policy must deliver and this one does not. |
| 4.1.8 4.1.9 | Whilst these sustainable locations are our preferred locations for new development, they are unable to accommodate all of the new development we need. We will therefore release allocated land for development in other areas. These include: (followed by changes / Ash / Tongham) The NEED has not been properly established as the SHMA produced by Neil McDonald shows. The need must be accepted before a plan can be formed / accepted by residents. This statement is NOT in line with the NPPF which affords some Greenbelt protection. No exceptional circumstances have been demonstrated to justify this level of development on these protected areas. It would be useful to add numbers to all sites and status ie Blackwell farm 1500 (in plan period) 300 after -- Greenbelt | Object |
| Policy S2 1 | to help meet the needs for new homes, support the economy and supply 3,200 additional class B jobs. The justification has been removed. Whilst I agree that the plan as it stands is not justified, I do think an attempt should be made to justify the growth proposed. | comment |
| 4.19a | I object to the Annual Housing Target on a number of grounds It is too high and uses opaque methodology that focuses on the highest outcome. Known flaws in the SHMA have not been corrected and had they been, the annual housing | Object |
number would be more like 400 a year, a figure that would be far more palatable to residents.

No exceptional circumstances have been demonstrated to justify the level of development on Greenbelt land.

The lower figure of 400 could perhaps be achieved with the parameters of the NPPF by focusing on pre-developed sites.

4.1.9a The figures set out in the Annual Housing Target table sum to a total of 12,426 homes. This is lower than the total supply of homes identified in the Land Availability Assessment as having potential to be delivered over the plan period. This buffer builds flexibility into the plan and demonstrates that our strategy is capable of delivering the target. It also adopts a phased target that gradually increases over time rather than the same annualised target of 654 homes each year. This is due to the likely rate of delivery, particularly on the strategic greenfield sites, which is dependent upon the delivery of necessary infrastructure expected to occur towards the end of the plan period.

Buffers are already built into the housing number; this figure should therefore be reduced.

Land identified includes a very large percentage within Greenbelt; this should be removed rather than included to act as a buffer that is not needed. Deliverability is dependent on a number of factors in addition to whether the landowner would like development (including access). Access for Blackwell Farm is over AONB and there are serious traffic and pollution issues all of which make it difficult to see how this land can be considered 100% deliverable?

I am pleased to see the phased delivery but object to additional targets outside the plan period, for reasons, which have been explained. When Manor Park was removed from Greenbelt, it was with a caveat that no further land would be taken out during the period of the plan. This has been overturned and any importance given to the permanence of Greenbelt, ignored.

4.1.9b 20% buffer

I do not understand how the buffer is calculated, especially when it has been built in for different reasons throughout the SHMA too. Given that Guildford seeks to meet an OAN that is more than 20% too high in the first place it is difficult to understand an additional 20% buffer can be justified?

4.1.4 KEY EVIDENCE

Refers to the addendum, in which it states that the reduction in housing will not have an impact on the results of the traffic study and that in scenario 5, no significant impact will be seen providing the RIS works are carried out. It notes that without the RIS works impact will be severe.

This is NOT true for the B3000 in Compton which will be severely impacted by increased traffic levels whether the A3 is improved / altered or not. In fact it will see MORE traffic if the A3 is improved as more traffic will use the B3000 to reach the A3. As the B3000 is likely to be recommended for an AQMA, it is important that this is highlighted and accounted for in the plan.

Object

Object & Omission
The traffic modeling also underestimated traffic levels and hence it may NOT be true to say that changes in site allocation will reduce impact on traffic, although it may do. The traffic modeling should be done again, with the sites that will go forward and should input the suggestions by Mouchel to get more accurate readings.

My understanding is that areas were split into zones and traffic modeled within the immediate zone. Blackwell Farm was in a zone of its own and hence the impact on Puttenham or Compton may not be properly reflected. Likewise, major routes such as the A3, A31, A281, A25, A320 etc would all be affected by development outside Guildford (ie Dunsfold, Farnham, Woking, Sussex). It is hugely important that regional modeling be carried out by Highways to ensure our main routes can cope with the growth proposed.

There is no explanation as to why the Housing Needs Assessment and the Traveller Strategic Housing Land Availability docs have been withdrawn from the Key Evidence?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

First past the post

The hearing for the Waverley plan appeared to adopt a first past the post strategy, whereby Woking decided to protect its Greenbelt and hence declared it would not meet its OAN and the Inspector appears to have decided that this should be split between the two remaining authorities, who each have constraints of their own? Surely each should be considered on its own merits and constraints, otherwise the last one to touch base could end up with everyone elses unmet need, irrespective of whether it makes sense or not?

Comment ID: pslp17q/658  Respondent: 8570273 / Fiona Curtis  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents
The extent to which the Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way casts doubt over whether sustainability has been assessed. The report treats various major development sites in Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”, fails to consider options that constrain development or that make greater use of brownfield or previously released greenfield land, focuses on a range of options that involve developing on even more Green Belt around Guildford in order to protect Green Belt around Woking does not consider environmental limits or impact on the next generation in terms of weighing demand for homes for the young alongside the use of all possible last resort greenfield options by one generation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. The plan does not appear to be led by the evidence base, instead the evidence base is used to influence and justify decisions which have been part of a trajectory from day one. This includes the decision to build on Greenbelt, which was decided before any assessment into land availability or housing need had been conducted. Detailed plans for Blackwell Farm were seen long before the Greenbelt & Countryside study produced its controversial study, that marked down the openness of areas with trees yet set random boundaries in mid-field. The scoring of the area was entirely subjective and bore no resemblance to independent work by Land Management Services (attached Annex 1). The work was omitted from the evidence base and should be included or at least acknowledged with some rationale given for its exclusion. Residents felt that some of the evidence was weak and subjective (Greenbelt & Countryside) and comments around lack of justification for the classification of the RAG system have not been addressed. It is totally unacceptable to simply state that 'the page was lost' in answer to the question to see the assessment that led to the 'medium sensitivity' classification given to Blackwell Farm for instance.

2. Housing targets have remained much the same despite changes in ONS, removal of some retail sites, professional challenges to the SHMA and Brexit. This raises concerns over pre-determination. At the last consultation, independent reviews of the SHMA were carried out. All suggested the OAN put forward by G L Hearn was too high. Whilst further work has been carried out by G L Hearn to bring their 2016 up to date, they have once again failed to fully account for errors and market changes. I support the review, commissioned by GRA and carried out by Neil MacDonald (attached as annex 2) which should be considered as new evidence. It should be noted that the work conducted by the same consultant for Waverley Borough Council was recently upheld by the Planning Inspector. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2020. This is too late for this plan and hence the infrastructure constraints must push large sites out of this plan. If the OAN of 8,000 is adopted, this would mean that all the strategic sites could be removed from the current plan and the additional 500 or so could be dissipated over brownfield sites by increasing the density (especially within the University grounds where land is wasted on acres of surface car parking).

3. It is concerning to see that targets are now minimum requirements rather than firm targets. The presumption being a need for upwards adjustment within the plan period rather than general flexibility which would be more acceptable as Brexit for example could result in Internationals leaving the UK. Numbers are also greater than indicated as proposals such as Blackwell Farm already include large numbers planned for after the plan period of 2034. Development that is not planned within the plan period should not be taken out of Greenbelt. It is also very risky to take land out of Greenbelt now for development that cannot take place for at least another 10 years due to limitations with infrastructure. Doing so, risks piece meal development and hence should not be supported.

4. The traffic survey underestimates congestion levels and impact and no attempt has been made to correct this, instead comment is made in the plan that traffic modeling looks at worst case scenario, but in fact it does not. Account must be taken of the comments made by Mouchel (annex 3) which still stand and which remain a concern for Highways. It is misleading to present traffic impact in the way that it has been presented as part of the evidence base. It should also be noted that Highways withdrew their objection following a meeting at which it could be said that some pressure was applied and they did so in order to cooperate. It must be noted from their letter of October 2016 that improvements appear to be conceptual as funding for some and feasibility for all, have yet to be confirmed. This is particularly true of Garlick's Arch which was introduced very late in the last consultation (annex 4). The sound bite that 'there will be no development without infrastructure' to some degree supports the issues raised by Highways in this annex. The Local Plan should however have some detail around this statement. Ie what infrastructure and which developments and what proof exists to endorse the impact and has it been subject to scrutiny?

5. The impact of development is far reaching yet modeling concentrates very much on the impact of specific zones in relation to one another. New evidence by RGP (attached annex 5 and annex 6), appears to be in line with comments...
made by Mouchel (see comment 4) and shows that the impact has been underestimated. It is known that Blackwell Farm and other major developments cannot go ahead without major improvements to the A3, to assist traffic flow. These same improvements will draw traffic and this will include the B3000. It is not thought that a number plate recognition scheme will work through the Blackwell Farm development and if it fails, as is predicted, this will become a legitimate route to bypass Guildford and once again will draw more traffic through smaller routes in order to access it. These include the B3000 which already exceeds NO2 legal limits and should be made an AQMA. Account should also be taken of existing AQMA’s in Godalming in Waverley, when considering developments that will increase traffic volume and lorries in particular, on the A3. The same must apply in Farnham (which also has an AQMA) when considering development that will increase traffic on the A31.

6. It has been known for some time that the B3000 warrants an AQMA. Recent results confirm that, yet reports continue to boast that Guildford has no AQMA’s (true) but also that Guildford does not require any AQMA’s (false). The Aecom report stating this, is misleading. It would be quite untenable to knowingly increase traffic levels on the B3000 given the safety issues that exist. I wrote to [Officer] and Planning Policy and received a joint response from both to a report that was sent by me on behalf of the Compton Traffic Committee (a sub-committee of Compton Parish Parish Council). It was suggested that I include the report in my submission to the consultation (attached annex 7). No answers to any of our questions were given on the basis that this would not be a good use of council resources (attached annex 8). It would seem that the council does not have enough resources to ensure that people wishing to respond to the consultation, do so, fully informed. This is born out by comments made in the survey I conducted recently (annexes 9 and 10).

7. The removal of plans to improve access and safety at Beechcroft Drive. This project has been prioritised and dropped for many years and for safety reasons, it is time it was addressed.

8. The vast majority of people in Guildford do not support the plan. A survey was carried out (by me), details of which are attached (annex 9 and 10) which showed that 81% of respondents objected to the plan in its current form versus 19% who supported it. The survey is on-going but interim results were sent to groups with substantial email databases. Comments were collected as to what changes would facilitate support for the plan. These comments are included in the attachment. Whilst I endorse many of them, I do not agree with them all, but in the interests of impartiality have included them all, save a couple that were modified for legal or data protection reasons. In the last consultation many residents and Parish Councils stated that their comments had not been accounted for and that they had significant issues with the process. The process has however rolled onto regulation 19, without, it would seem, not only valid but submittable. There are also several comments about concerns over the deliverability of the 5 year supply, that I share and hence am submitting this to support my own views on this and also to confirm concerns over procedural weaknesses.

9. Changes to the plans for Blackwell Farm were presented as an example of having listened to the public outcry at the scale and location of the site. This was disingenuous as the number is the same except 300 houses have been deferred beyond the plan period. Concerns over access and impact (particularly to the A31, Egerton roundabouts and the B3000) have not been addressed and evidence by RGP that suggested the site was unviable has been ignored. Issues relating to the inclusion of this site are compounded by the addition of a school, that was not deemed necessary for the site from which it was removed at Normandy but has been added to Blackwell Farm, without evidence supporting the need for it?

10. Lack of consistency -- key areas off the Hog's Back have been dealt with differently. Countryside near Tongham has been put forward for additional Greenbelt status to prevent coalescence with Ash, whilst 78 hectares or 192 acres of land at Blackwell Farm will be removed from Greenbelt despite the fact that only 13 years ago, 64 hectares (158 acres) were removed on the basis that this would not be repeated. This will permit coalescence with Guildford and Onslow, Park Barn, Flexford, Wanborough and Wood Street. These figures exclude land that will be needed to facilitate access, much of which is within AONB. The area known as the Hog's Back that stretches alongside the A31 is iconic, it stretches for many miles and provides a fabulous open rural view across land that is good agricultural land as well as Greenbelt. It serves the purposes of Greenbelt by preventing urban sprawl from Guildford into nearby villages. The plan takes the view that sprawl is 'inevitable' which presumes a need to build on Greenbelt without fully exploring all Brownfield possibilities.

11. The strategic site at Normandy (1000) which was safeguarded from 2003 plan, was excluded from the Issues and Options & initial consultation, it was added at regulation 19 stage, which would appear to be against due process and then removed as part of these amendments, for reasons that could equally apply to Blackwell Farm. Neither Blackwell Farm nor Wisley 'Strategic Sites' have ever been safe guarded. The selection of areas to be included or dropped appears ad-hoc and
late additions and speedy removal reminds me of retail 'SALE' tactics, which should not be deployed in plans which will have an irreversible impact on people’s lives.

12. 20 years ago the University argued against the Tesco development on the basis that it would exacerbate an existing traffic. It is incomprehensible therefore that Blackwell Farm can be considered as viable on the location mentioned, some 20 years on, when congestion is already a daily occurrence before development traffic is added. (annex 12)

13. The Rural Economic Strategy and policies have not been subject to proper or open consultations. I do not believe that due process was followed. Parish Councils were not aware of the consultation, which was a tick box affair, over a very short space of time. On finding that the majority of Parish Councils knew nothing about it, I informed the officer in charge and a short extension to the deadline was given. No feed back was given on submissions and comments were not referenced in the strategy, which was produced and published at a paid conference (£60 a ticket or thereabouts) within such a short time frame that one would be forgiven for thinking it had already been written. Parishes have had little to no involvement in this policy and they should have been key stakeholders.

14. In terms of its transport aspects the Plan cannot be regarded as sound. GBC has provided vivid descriptions of the conditions on the network today and the evidence is that these will be as poor, and in some cases worse, at the end of the plan period, even with the mitigation. Growth and infrastructure have to be better aligned. While the level of growth in homes in this latest draft plan is somewhat lower than that in the 2016 version, it is still substantial and growth is planned outside the borough. The evidence provided indicates that congestion will be widespread on much of the highway network in peak periods, even with the proposed highway schemes and with the measures to encourage the use of public transport in place.

15. Regulation 19 - The Council report for 16th May 2017 says that ‘comments made to parts of the plan that are unchanged should be considered not duly made’ (para 6). The local development scheme and the Council report (para 4.4 to 4.6) refers to this as a ‘targeted Regulation 19 consultation’. That is incorrect. A regulation 19 consultation is on ‘the local plan’ (see regulations 17, 19 and 20) not parts of it, which have changed from an earlier regulation 19 consultation. A number of consequences follow:

  (i) The local plan which is intended to be submitted to the Secretary of State is the 2016 submission local plan;

  (ii) The changes proposed in the 2017 document can only be made if:

      (a) The Inspector finds that the 2016 local plan is unsound;

      (b) The Council asks the Inspector to recommend modifications to cure the unsoundness; and

      (c) The Inspector exercises his or her discretion to recommend the changes which the Council have proposed rather than any other changes to make the plan sound;

  (iii) The 2017 changes proposed by the Council have the same status as any other changes proposed to remedy unsoundness in the 2016 plan;

  (iv) Representations can be made seeking changes, which are consequences of or alternatives to the 2017 proposed changes.

Whilst the buffer over the plan period has been reduced to 10% from 14%, it is unnecessary as GBC confirms that it can provide a 5 year supply. The only requirement for a buffer is for the five year housing land supply and that draws forward housing from within the plan period. There is no justification for any buffer over the plan period.

16. It is noted that there is no explanation in the 2017 local plan document or the Council report as to why the 2016 plan is unsound, the ways in which it is unsound, why the proposed changes would render the plan sound and why they are the best changes to make. I consider the plan 'unsound' as do action groups against Wisley and Blackwell Farm developments.

17. There is no justification for moving the end date of the plan back by a year. The 2016 plan was not unsound because of its duration. This raises concerns that the change was to increase the housing requirement (by adding a year) and to delay
the delivery of new housing (by proposing 850 houses, so above the annual requirement) in that final year. This goes
towards a solution for Guildford’s housing needs of strategic sites which may take a long time to come forward rather than
promoting smaller, sustainable sites within urban areas with infrastructure or on existing Brownfield sites (which can be in
countryside) to enable earlier provision of homes.

18. Additions and removal of sites. No exceptional circumstances have been given for the inclusion of sites on
Greenbelt and there is no explanation as to why some sites remain in the plan whilst others have been removed.

19. Information -- Throughout the plan it has been a given that Greenbelt sites MUST be included with threats that it would
be worse for everyone if the larger sites were not supported as planners would have less control and they would likely be
approved after a costly appeal. An FOI shows that this is not the case. To date only one Greenbelt site of the size of the
strategic sites put forward in Guildford has been approved at appeal. This was in Tewkesbury. It was also confirmed that
planning regulations apply irrespective of how permission is given. It cannot be considered sound to mislead the public in
this way?

20. The plan has failed to account for the many thousands of comments made in the previous consultations. The survey
(annex 9 and 10) helps to demonstrate how powerless residents feel and the genuine sense of despair that is felt by many
who try to engage with the process but feel the plan and the OAN is predetermined and not really evidence based at all.

Overall issues

In my view, the overall plan is in contravention of the basic principles of good development and the NPPF. Expansion on
the scale purported should see development where infrastructure exists to facilitate urban regeneration and promote
sustainable living.

Information appears to be held all over the place and it is difficult to know what exactly we are being asked to do in this
consultation. There are different ways of accessing the consultation documents and then there are additional papers and
appendices. Some are marked up with the changes but some are not. There is not enough time to read all the documents
within the 6 week period.

The survey (attached annex 9&10) confirms the issues many are having with understanding the process and getting
adequate information and answers to questions in order to make an informed submission. This in itself must impact the
soundness of the consultation.

This plan makes a mockery of Greenbelt policy and the NPPF which states that Greenbelt retain its openness and
permanence and development can only be considered (and removed from Greenbelt) if it is appropriate and in exceptional
circumstances. No exceptional circumstances have been demonstrated and it is widely thought that the scale of
development proposed is to enable highways and infrastructure improvements without due consideration of permissible
constraints or impact from the growth proposed.

Comments concerning missing evidence and subjectivity of the Greenbelt study that led to the flawed sensitivity results
(red, amber, green) resulted in Blackwell Farm being given medium sensitivity rather than high sensitivity. This in turn has
resulted in it being moved forward as 'given' without seeking to address the professional independent evidence submitted in
the last consultation, that contradicts this.

It was initially stated that the figure for Blackwell Farm had been reduced from 1800 to 1500 in an effort to reflect public
opinion. It was later acknowledged that this 'reduction' was untrue, the extra had been phased for outside the plan period.
The same was said of Gosden Hill, which also has housing planned after the plan period.

Language used reflects the direction GBC wish to take the plan whether policies are consistent or not. Page 30 of the
AECOM report Box 6.9 Greenbelt around the Guildford urban area, notes that Clandon Golf area is red rated Greenbelt and
that it borders AONB and is within AGLV. Blackwell Farm also abuts AONB and is partly within AGLV and access would
be via both. This however goes unmentioned.

The employment needs assessment, previously stated that 30% of employers consider leaving the area due to problems with
congestion and lack of affordable housing for employees. It also stated that 9% of commercial outlets were empty. The
reduction applied to employment land is still therefore insufficient.
Traffic study

Compton and Worplesdon Parish Council’s have jointly agreed to fund an addendum to the professional Technical Note, which identified problems with the proposed link road from the A31 to Egerton Road (which will form the sole access to the Blackwell Farm site). The addendum will look at the impact of this new road (and of the entire development) on the surrounding road network in the light of changes to the Local Plan. The planned new road will cross the Surrey Hills Area of Outstanding Natural Beauty, an Area of Great Landscape Value, and historic parkland. It will also pass through, or very close to, a belt of ancient woodland.

Question over housing need number

A review of the Strategic Housing Market Assessment commissioned by Guildford Residents Association has identified a flaw in the way that the housing need figure has been calculated. This is outlined in the two paragraphs below:

“A review of the latest ONS population estimates and projections has found compelling evidence that there are substantial errors in past estimates of student migration flows. It is probable that migration flows out of Guildford, both to other parts of the UK and abroad, have been under-estimated by sizeable amounts.

"Owing to the way in which migration estimates are used to construct population and household projections, the errors in past migration estimates are likely to mean that the latest demographically-based housing need estimates by GL Hearn overstate the number of homes needed by over 25%.”

Note that it is important to distinguish between a “demographic need” (births, deaths, migration), an adjusted need figure (which takes into account economic growth and affordability), and the “housing figure” used in the Local Plan (taking account of constraints and ambition). The GRA review is saying that it is a fundamental demographic building block that is wrong.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp17q/421   Respondent: 8570273 / Fiona Curtis   Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Significant updates to the Draft Local Plan These were made for good planning reasons -- based on past consultation comments or changes in circumstances or the supporting evidence -- including:

If changes are truly 'significant' then doesn't this merit a regulation 18 consultation rather than regulation 19? If they are not significant in terms of real outcome, then they should not be referred to as significant.

I object to the wording of the press release, which I believe is misleading for the reasons stated in blue.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 6: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Blackwell Farm and Gosden Hill are listed under Guildford Urban -- It should be noted that this is aspirational and is not current. It is misleading to list these greenbelt fields in this category. Those without an in depth knowledge of the plan may not realize that these are not currently urban sites.

Wisley is listed as a 'new settlement' a description that does not do justice to its size. Blackwell Farm and Gosden Hill are also new 'settlements' and should be listed as such rather than as 'urban extensions'.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

### Answer (if comment is on questions 1-7 of the questionnaire):

<table>
<thead>
<tr>
<th>3.1 Spatial Strategy</th>
<th>The plan aims to deliver a minimum of 12,426 over 19 years (654 a year) rather than 13,860 over 20 years. (793). The figure per year in real terms remains much the same and has done throughout, despite suggestions that it has been changed to account for residents comments as some now falls outside the 'plan period'. Essentially change has been obfuscated to appear more pronounced than it actually is.</th>
<th>Object</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1 Spatial Vision at least 12,426</td>
<td>I strongly object to the addition of the words 'at least' as this is non-specific and disingenuous particularly when accompanied by news bites referring to a reduction.</td>
<td>Object</td>
</tr>
<tr>
<td>3.1 Spatial Vision The plan therefore focuses on some development on large strategic greenfield sites</td>
<td>This is preceded by the statement Not all of the borough’s development needs can be met within Guildford’s urban areas. The SHMA figures are flawed and hence the OAN is far too high. This combined with the lackluster approach to surface level car parking and other Brownfield sites as well as not applying permitted constraints has forced development outside Brownfield. The decision to build on Greenbelt was taken long before the evidence base or results of the SHMA were known, which could be seen as pre-determination. If GBC placed equal emphasis on finding ways to gain an OAN that was not inflated but met actual need and on revitalizing brownfield sites and implementing policies for appropriate densities in urban area, the need to build on Greenfield or greenbelt would be limited or non-existent. Only 30% of development is urban based and 58% is currently on Greenbelt. The statement about the need to preserve the character of Guildford would appear to apply to the town and not to the borough. The Hog's Back is an iconic landmark that can be seen and appreciated for miles by users of the A31 as well as walkers and riders. All the Greenbelt sites serve a useful purpose and the validity of the 'sensitivity analysis' is questionable given its 'tick box' approach to analysis.</td>
<td>I strongly object to this and the way in which it is presented without caveat.</td>
</tr>
<tr>
<td>3.1 Spatial Vision Over 240ha, equivalent to more than 330 football pitches, will be provided in perpetuity</td>
<td>This relates to land that will be used as green space for residents in new housing but makes no reference to the level of countryside that will be lost and what the net figure will be (the countryside is for the benefit of everyone and not just residents in new homes).</td>
<td>Object</td>
</tr>
<tr>
<td>3.1 Spatial Vision</td>
<td>I object to incredibly low density of this urban facility, which wastes more space than it actually uses. There are 10,000 square meters to 1 hectare and an area</td>
<td>Strongly object</td>
</tr>
</tbody>
</table>
Up to 11 ha, comprising 30,000 sq m of premises for business use (including offices, research, development and design activities in any science) will be provided within the plan period. Such as this could facilitate units that are 2--5 levels high, without compromising surroundings. This begs the question as to why 11 ha is required for what could fit on 1 or 2 hectares, if landscaped? The bigger question however is why density policies have been removed and why better has not been made of the Manor Park facility?

3.1 Spatial Vision

The role of Guildford town centre as the largest retail, service, administrative and commercial centre in Surrey will be maintained and enhanced. The major town centre redevelopment of North Street will include 41,000 sq m of comparison retail floorspace together with 6,000 sq m of food and drink uses and up to 400 flats.

The reduction in land / space given over to retail is insufficient given the national and indeed global trend to internet shopping. It is good to see that the number of flats has increased from 200 to 400, but this is not nearly enough. Small affordable units in a town centre setting are hugely desirable and more, could allow older people to down-size thus releasing much needed family homes onto the market.

3.1 Spatial Vision

The transport strategy and Local Plan policies will be aligned to encourage residents, employees and visitors to use alternative modes of transport and to seek to reduce car traffic especially through the town.

The transport strategy does not include any traffic re-modeling despite the note by Mouchel that points out that traffic volumes are UNDERESTIMATED due to 3 flaws in the paper, none of which have been corrected. The use of traffic averages obfuscates peak time data. Issues relating to merging and X are also mentioned but have not been dealt with.

The Transport Strategy (page 19) states that there are NO requirements for AQMA in Guildford and that air quality improvements will be made ‘where feasible’.

Despite our leaving the Eu, government policies should remain in line with the Eu and ‘where feasible’ for what should be a legal requirement is not good enough.

It should also be noted that it is likely that the environment dept. will recommend the implementation of an AQMA at the A3 end of Compton village in the near future. The transport strategy should be in line with the most recent Air Quality Report and be mindful of the consequences of traffic systems that push more traffic out into the villages where residential properties abut busy streets.

It is of great concern that the transport report makes no reference to Compton's problems and that the village had to fight for many years to gain access to equipment due to lack of resources in the department and that many other villages are still awaiting to be listed for monitoring. It is somewhat
presumption therefore to say that Guildford has no requirement for AQMA’s, although I would hope very much that this is the case.

It is of even greater concern that the lead councilor for infrastructure, Cllr. Furniss, publicly denied that Compton had an air quality issue and attempted to invalidate the initial results by suggesting the monitoring carried out by the environment dept. was erroneous. This claim was not endorsed by the environment dept. and when evidence was sent to Cllr Furniss to demonstrate the error in his way of thinking, he declined to comment.

I can see no evidence to demonstrate how some of the infrastructure proposals put forward to address concerns over congestion, will actually deal with the current problem and more traffic from growth? Minor tweaks of junctions appear to be wholly insufficient particularly bearing in mind the data used underestimates the scale of the problem.

3.2 Spatial Vision 13 objectives

I note the following:

Unemployment is not a key issue in Guildford.

Cost of homes is influenced by proximity to London & coast and strategic position. Providing more facilities is likely to INCREASE the cost of homes not decrease them. There is ample space on Manor Farm to house more students and the University should take responsibility for its growth programme and this should include the provision of adequate housing.

The plan FAILS to balance growth with protection as 70% of housing development is on Greenfield.

An independent report commissioned by Parish Councils shows that the 4 way junction on the A31 will not work and that congestion on the A31 will not be solved by this junction. Add several thousand extra vehicles to this and the impact will not only impact Guildford town but all surrounding villages, and Puttenham and Compton in particular. This was clearly demonstrated recently when the A31 west route was closed due to use of sub-standard materials and hot weather. Despite diversions being set up, traffic took the shortest route and Compton (an area that is likely to be within an AQMA very soon) saw traffic at a stand still from the A31 to the Withies at the far end of the village. The last paragraph in the Spatial Vision statement refers to ‘early targeted improvement schemes to deliver road safety and some congestion relief on the A3 will be delivered within the plan period’. While it is correct that funding has been committed for two improvement schemes – SRN7 (£1.6m) and SRN8 (£2.5m), the two safety related schemes SRN1 and SRN6, previously regarded as urgent, have been removed from the infrastructure schedule.

The final sentence of the Spatial Vision should be changed to read as follows: The rate of delivery of housing in the plan period is conditional on major improvement of the A3 through Guildford and the other highway improvement schemes listed in the Infrastructure Schedule, following an impact assessment of any proposed changes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I strongly object to the housing number SHMA as feel this is too high. This seems to account for a lot of students which could be housed on the University. The calculation for the SHMa have still not been disclosed so this is hardly a clear process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I strongly object to the inclusion of site A35. It should be removed from the Local Plan for all the reasons that the recent unsucessful planning application was rejected.

To name a few: proximity to the Thames Basin Special Protection Area, RHS at Wisley Gardens, and the already polluted gridlocked A3/M25.

I strongly object to the former Wisley airfield being removed from the Green Belt. I strongly support the Green Belt and feel that the large proposals within the local plan for building on the Green Belt is wrong.

I strongly object to the idea of an increase of 5,000 cars into the small rural country lanes of Ockham.

I strongly object to Allocation A35.

Just recently the council refused permission for numerous reasons, none of these have changed, SO WHY IS THIS SITE STILL IN THE LOCAL PLAN???
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

On reviewing the proposed local plan, I object to Policy 43 - land at Garlick's Arch.

The land suffers from being a Flood Zone, I understand it is Zone 3. Looking at recent flooding I consider this should be reviewed. There are electric pylons on the site which would put development into the second five year period. The site has Ancient Woodland dating back to the 16th Century!

The addition of 400 new home is a major increase in the local population is this wise?

The need for schools, Doctors surgeries, transportation and with only one shop in the locality.

At the last meeting the Garlick's Arch replaced the Burnt Common Nurseries site which had been in since the beginning had been thoroughly reviewed. The site already has three industrial units totalling 5000 square metres and is logical to extend. The proposal is for small industrial units to met the local requirements.

The site can also handle 100 new houses which would not put undue pressure on local facilities.
Policy A43a - Land for new north facing slip roads to/from A3 is dependent on the owners of Garlick's Arch gifting the land for the slip road on condition of receiving planning permission for housing. Use of slip roads will have a severe impact on the population of Wisley, Send, the Clandon's and other local populations.

The decision was made before they built the Wisley bypass not to have slip roads to/from A3. With the increase in traffic why should this have changed?

The central purpose of the National Planning Policy Framework is to plan for sustainable future development and economic growth. That sustainability is partly defined as the ability to clearly demonstrate a contribution to protecting and enhancing the natural environment, including to “improve biodiversity, use natural resources prudently, minimise waste and pollution, and mitigate and adapt to climate change.” We are pleased therefore to see the environment placed so prominently as one of the four core themes for implementing the Plan’s Spatial Vision for Guildford Borough. With respect to Policy S1: **Sustainable development**, we also welcome the addition of para. 4.1.2a; “Sustainable development will be achieved by seeking economic, environmental and social gains jointly and simultaneously through the planning system.”

Plans to expand Guildford by 20 to 25% appear to be based on an error.

Compelling evidence by a respected national expert, who worked for the Government, shows Guildford has greatly over-estimated its population growth.

This means we do not need to sacrifice so much Green Belt or to allow town cramming.

If the Council persists in releasing so much Green Belt for development, we will be asked to provide for Woking’s unmet housing needs – sacrificing our Green Belt to protect Woking’s!

The revised proposal that only 60% of full time Guildford based University students will be provided with accommodation on campus puts unnecessary pressure on housing stock in the town. An 80% target could help by freeing up affordable homes relatively quickly.

Even taking account of all the proposals in the 2017 Plan, congestion which is already severe is set to get worse over the plan period. Whilst there are expressions like “modal shift” in transport being the solution to the problem. However, the is no clarity about how on earth this is to be achieved. I would have expected to see the necessary radical solutions like mega park & rides at Gosden Hill Farm, and towards Elstead, with a high-tech automated transport solution to the town and Research Park (such as autonomous PODS on an elevated track).

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
In view of flawed new evidence, Guildford’s proposal for more than 12,426 homes (plus a buffer of 1,155 homes) is excessive and will result in needless loss of Green Belt and green character, and increased congestion, that cannot be justified in our heavily constrained borough.

There is evidence Guildford’s population growth is overestimated by about 40% because of under-recording of students leaving at the end of their studies.

If the Council fails to apply Green Belt protection or constrain expansion to reflect widespread, legitimate environmental and transport constraints, the 2017 Plan will cause harm to the qualities that underpin the economic success of Guildford and aggravate congestion.

The Council completely ignores the objective of Green Belt to avoid urban sprawl. For example, the development of Gosden Hill Farm simply perpetuates the sprawl of Merrow Park Eastwards. At the very least, the plan should skip a few fields, develop Wisley Airfield first, and then work back towards Guildford if the high numbers of houses are required post this plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Allocating too much land for development in the 2017 Plan will also result in Guildford being required to provide homes for Woking on our Green Belt which is folly given the constraints in Guildford, a gap town with constricted roads set in the Surrey Hills AONB.

Answer (if comment is on questions 1-7 of the questionnaire): ()

GUILDFORD NEW LOCAL PLAN 2016

POLICY A22: Land north of Keens Lane Guildford – LAA reference: Site 126

I would like to strongly object to the above proposal North of Keens Lane as a resident of Keens Park for the last 28 years.
Firstly, this is Green Belt land, which I thought was protected from this type of development?.
The infrastructure and road system surrounding this area is highly unsuitable if this were to go ahead.
Keens Lane itself is mainly a single lane road and would have to be upgraded from a leafy (one vehicle in most part) lane to a new two lane road completely destroying the hedgerow and many trees along it.
I was under the impression that this site was part of a vital wildlife corridor between Whitmoor and Broadstreet Commons and these very important corridors are already of strong concern by the Government?.

Answer (if comment is on questions 1-7 of the questionnaire): ()
• A principal driver in this is the Strategic Housing Market Assessment (SHMA) commissioned by GL Hearn and calculated to be 693 per annum or a total of 13,860 houses to be built across the borough. In the previous draft Local Plan of 2014, a figure of 652 p.a. was arrived at giving a total of 13,040 houses, while four years ago it was approximately half this figure. There seems little logic or accountability in all of this. The calculation behind how this housing need is arrived at has never been explained and therefore there is a lack of transparency unacceptable in any serious consultation. An independent report commissioned by Guildford Residents’ Association has arrived at a much lower figure of 510 dwellings per annum. Now in the light of the recent Brexit vote to leave the EU this must radically affect many of the underpinning assumptions that were deployed in arriving at the 693 figure. This basic tenet of the draft Local Plan can only therefore be considered to be unsound.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We strongly oppose the planned development of Gosden Hill Farm with the second largest number of homes (2,000), eight traveller pitches, a new railway station, a park and ride, shops, primary and secondary schools, all situated in the Green Belt that includes an area of ancient woodland. As currently proposed this will have a devastating impact on Burpham, Merrow and other communities within this locality. Burpham is a victim of being at a major portal into Guildford. Already the traffic situation here is notorious and does the town no service; indeed it is a positive distraction. Access to the proposed development at Gosden Hill is by a new A3 southbound off/on slip road with the present southbound slip road to Burpham and Merrow becoming two-way. Thus all traffic from Gosden Hill going north to the M25, London and Heathrow will be forced to drive through Burpham to the Clay Lane Slip. How mad is that?

The only sensible solution is a four way intersection around Potters Lane as proposed three decades ago, providing north and south bound access to the A3. Yet here is the rub. A tunnel underneath Guildford is once again being supported by GBC as a way to alleviate pressure on the road network. It would cut out more than 6 miles of the A3, from Ripley to Compton and is part of the Borough Transport Strategy 2016. If it is decided that a tunnel is the only answer to Guildford’s traffic problem, it is short sighted in the extreme to dump homes and all associated infrastructure on land that would be used for a tunnel entrance. There seems to be a lack of consistency and joined up thinking and therefore we can only conclude that as presently formulated the Gosden Hill proposals are deeply flawed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

If implemented they would have a dramatic and devastating effect on Guildford and destroy many of the fine aspects that make the town and its immediate environs such a good place to live, work and bring up a family. One of us has been a resident since 1960. While change is inevitable and must be accepted in a controlled, logical and sustainable fashion, this plan provides too much land for development. Further it does not do enough to tackle a major blight on our community, traffic congestion. This is strangling the life out of our communities. Ultimately the appropriate and essential long term infrastructure must be decided upon and put in place first.

Answer (if comment is on questions 1-7 of the questionnaire): ()

In the Sunday Times (10.07.2016) Guildford was extolled as a marvellous place to live “surrounded by glorious and protected countryside – but the A3 runs through it like an ugly scar- that gets annoyingly busy though there is talk of burying it in a tunnel”. However in this plan so much of the countryside in the Green Belt is now apparently being offered up for development while little is being done to ease congestion and prevent the town from becoming crammed. Given there is only limited time to make specific comments we wish to make the following points.

Answer (if comment is on questions 1-7 of the questionnaire): ()
The development of nearly 14,000 homes over a 20 year period is unsustainable without a complete loss of character to those centres included within the proposed extensions to various urban areas and villages. This policy does not appear to recognise these existing regions simply do not have the necessary road and other infrastructure capable of coping with expansions on this scale or magnitude and is therefore unsustainable. This excessive development appears skewed towards the northern sector of the borough. While Woking and Waverley are willing to apply constraints to their housing growth, Guildford is not and the uniqueness of villages such as Clandon, Ripley and Send appear destined to be enmeshed in an urban sprawl.

We wish to express our concerns over the Draft Local Plan, currently out for public consultation and formally register our objections to what is being proposed very strongly indeed. It has been an extremely elusive and difficult document to try and get to grips with in order to understand the implications for the borough and our locality in particular. While it is essential to have a sound and robust Local Plan in place, the policies being put forward currently appear unsound and unsustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Draft Local Plan raises many other issues but time constraints preclude us from making further detailed comment. However we have been party to the carefully crafted response prepared by the Burpham Community Association (BCA) and viewed the extensive critique undertaken by the Burpham Neighbourhood Forum (BNF). We have also been given access to the extensive documents written by both the Merrow Residents Association (MRA) and the Campaign to Protect Rural England (CPRE). In conclusion we would wish to endorse the views, analysis and comment contained within the above replies that are being sent out to GBC. The scale of the draft Local Plan with its dense and difficult presentation makes it a daunting task for just one or two individuals to give a comprehensive response and where necessary rebuttal to many of the facets contained within this consultation. However it is apparent that much of what is proposed jars badly with the people of Guildford. Therefore essential the Council not just hears but listens carefully and make real improvements to the plan before irreparable damage is done to an historic town and its surrounding countryside.

Answer (if comment is on questions 1-7 of the questionnaire): ()
As a resident initially of Merrow from 1960 but having lived in Burpham for the last 34 years my principal concerns are with issues that impact on these areas. In particular we refer to Policy A25, Gosden Hill Farm. Here it is proposed there will be developed at least 1,700 homes within the plan period as well as a new local centre, primary and secondary schools, a park and ride facility with 500-700 car parking spaces and a railway station. To accommodate this new village, the infrastructure requirements propose a new improved junction on the A3 comprising a relocated southbound off-slip, a new A3 southbound on-slip connected via a new roundabout to the A3100 with an associated corridor within Burpham.

This is a totally inadequate response that completely ignores the impact it will have on the wider community. Burpham is already the recipient of a traffic overload resulting from a lack of joined up planning decisions over many years with scant regard for the essential long term infra-structure necessary to accommodate what has already been developed. The daily outcome is a steady slow-moving column of traffic that winds its way from the A3 around and into the centre of Burpham while in the opposite direction vehicles of all types endeavour to access the north bound A3 via Clay Lane. There has been a big increase in HGVs and large diesel cars journeying to access residential and commercial properties and most notably for the two superstores at the village centre. Indeed on 6/12/2016 the Planning Inspectorate gave Aldi approval to increase HGV deliveries from one to seven per day despite local concerns, a simple example of another apparently “small” incremental effect with no regard as to the long term consequences.

Now add to this the residential traffic from the proposed Gosden Hill Village which at an absolute minimum is (1,700 x1.8 cars per house) = 3,060 vehicles daily. Under the proposals of the improved junction, unless travelling south down the A3 from the proposed new roundabout, they must travel along the A3100 (London Road) and into Burpham in order to access Guildford/Woking/Dorking/northbound slip of the A3. It is not unrealistic to suppose that this extra traffic including commercial vehicles will be of the order of 4,500 vehicles per day, morning and evening. Also local traffic wanting to access the south bound A3 and avoid Guildford centre will be making a bee-line through Burpham and up the A3100, now two-way, to the new roundabout at the Gosden Hill site. On this basis alone the scheme proposed is deeply flawed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We are writing to express our grave concerns about the revised Local Plan for Guildford that has now gone out to public consultation. That we need more homes, particularly of the right kind is undeniable. The first challenge for planners is to formulate realistic targets that local people can understand and be persuaded to accept with a fair degree of confidence as at least being both reasonable and sustainable.

GBC is proposing the total housing need can now be revised downwards from 693 to 659 per annum i.e. a reduction of 4.9%. Such precise figures imply specific calculations have been deployed against clear assumptions. However there is a complete reluctance to explain the thinking and methodology that has underpinned such an analysis. In any professional, technical or scientific document that goes out for peer scrutiny, there is a pre-requirement to provide some account of underlying principles used in reaching a particular conclusion. Otherwise the validity of the result must be considered suspect, flawed or inaccurate. This now has to be the view that any rational person must take over the figure of 659 new homes p.a. It is further reinforced when an independent analysis undertaken by GRA has concluded 404 houses p.a.would meet Guildford’s projected needs. There is a 38.7 % discrepancy, which should set alarm bells ringing! Perhaps as a
university town, the statistics can easily be distorted by the inclusion of student numbers whose residency is at best transient and should not be included in any assessment of housing need for the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

In the last year there has been a seismic shift and concern by government at all levels as well as the public over roadside pollution. A decade ago it was just greenhouse gases. Today it is nitrogen dioxide and ultrafine particulate matter (PM2.5), emitted by car engines and thrown up by brakes and road wear, that is making the headlines. Thousands of people die each year as a result of breathing air that is officially considered safe. While WHO recommend a cap of 10 µg/m³ and the EU set legal limits at 25µg/m³, very low levels of air pollution can shorten lives while tiny changes equivalent to taking a few cars off each road could save many lives. What is being proposed by the local plan in Burpham and it environs does nothing to alleviate the existing threat of traffic pollution, congestion and gridlock. In fact it conspires to make the situation far worse. Intelligent local planning should recognise the consequences of such action and respond with a scheme that is not simply one of expediency at the expense of the electorate.

Villages do need new housing if they are to survive, renew and thrive. This should not be to the almost exclusive advantage of big developers and volume housebuilders who relish the prospect of putting estates on the green belt because of its favoured position and the ability to sell units at a thumping profit. This does not meet the community need for decent affordable housing. Such a situation seems to be planned for Gosden Hill. Here a residential mixed use development is to be built on an agricultural site that is predominantly Grade 2 and 3a farm land. However the Guildford Borough Transport Strategy 2017 document refers to the potential of an A3 Guildford Tunnel. Should this come about, Gosden Hill is an obvious choice to begin such a venture and this conflicts with the current proposals.

In conclusion we object strongly to Policy S2, Policy H1 and Policy A25 for the reasons set out above. The changes proposed have done nothing to mitigate the concerns expressed in our previous letter of 16/07/2016. The case for more houses of the right kind cannot be denied and suitable developments are quite possible as long as realistic targets are set and supported by local government. The current proposals are driven by an over inflated housing need figure and an inability to create the necessary infrastructure to deliver a sustainable quality of life for both existing and future residents. We can only trust that it is not too late and planners will consider carefully the concerns of local people who have on a daily basis to deal with the consequences of their actions.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Responses to Evidence provided

Strategic Highway Assessment Report

1. I am not suggesting that a Borough-wide transport assessment is by any means easy to accomplish but **the current approach commissioned by Guildford Borough Council is not fit for the purpose of Local** It is a high-level strategic model with a severely understated baseline. Various issues were raised by me in the previous consultation and these seem to have been ignored in the consultation responses given by Guildford Borough Council.

2. The Transport Assessment was held back until the start of the consultation period and **was issued incomplete - much PM peak hour data being excluded.** Requested the PM peak hour evidence from Guildford Borough Council but they delayed for ten working days before stating that they would not provide it and that it can only be requested as a response to Evidence. This is unsatisfactory and there is no reason why it should not have been published for the consultation. Residents are every bit as concerned about their journey home as their journey to work. I can only speculate as to why the evidence was not published.

3. The evidence that is available in the Transport Assessment suggests that **congestion on the local road network will be worse** following completion of the proposed developments and assuming that all the highways schemes
are delivered. More congestion means that the Borough will be less attractive to businesses and visitors, and a less desirable place to live with higher levels of stress and pollution.

Here are some quotes from the Report:

"4.5.10 Currently it is unclear why some minor roads in or just outside Guildford town centre are showing increases. These include roads such as Nightingale Road, Denmark Road and Tormead Road. However, it could be related to re-routing occurring as a result of the improvements to the A3 through Guildford attracting drivers to both join the A3 and remain on the A3 at Guildford and weaving through local streets."

"4.8.3 At the same time, average vehicle speeds increase not just on the A3 but across the network within the borough as a whole. However, despite this it should be noted that although the average speed across the network in Scenario 5 is higher than in Scenario 1 (the Do-Minimum), there are differences within the network with average speeds on A roads and minor roads lower than in Scenario 1."

(In other words, traffic congestion on the local road network is predicted to be worse under this draft Local Plan even though existing traffic flows have been understated. With understated traffic flows, many roads and junctions would have some capacity to absorb additional traffic. If realistic current flows were used the impact of additional traffic would be far greater as junctions are already overloaded and additional traffic simply adds to queue lengths.)

"4.8.6 It should be noted that despite these improvements, Figure 4.7 shows the A3 is still operating overcapacity with resulting impacts on congestion.

4. The source of baseline data appears to be incomplete and, where it is available, seems to rely on single day or one week surveys conducted at various times over the last few years.

5. The Transport Assessment understates existing traffic levels by using a process of averaging over the three peak hours.

Averaging leads to a very substantial understatement of existing traffic levels. I was able to identify the source of some of the "observed" data (listed in the validation report) for my local roads and this shows that the effect of averaging can be to produce a flow rate that is very significantly lower than the peak hour flow.

It is clear from the recent Wisley Airfield planning application that Highways England find the averaging approach unsatisfactory for the strategic road network and there is no justification for using it on the local road network.

Guildford Borough Council's attempt to justify averaging on the grounds that the actual peak time varies across the network is a red herring. An obvious way round this would be to carry out the modelling for each hour, or half hour, separately. My understanding is that this was not considered possible due to lack of resources.

The very major reduction from observed to modelled flow for Forest Road in the north-east bound direction may suggest that other roads in the vicinity, or on related origin destination routes, may have even more severely understated flow rates which have been "shared" across the road system by the modelling process.

Other examples nearby are Validation Report Count Numbers 2617 and 2618 - B2039 Ockham Road South where averaging severely understates the AM peak hour and modelling further reduces the baseline to between 40 and 50% of observed data.

On another local road, Old Lane, the PM flow northbound for one link is stated to be 86 vph but the modelled flow is only 1 vph!

It appears that the Ockham and Horsley area has been very poorly modelled with the consequence that the very severe congestion and infrastructure failure that would result from the proposed developments has not been recognised.

Similar issues are likely to exist elsewhere in the Borough.
I would add that reliance on a single day survey is not good enough. Week long surveys, demonstrate how much traffic can vary from day to day and, to test the resilience of the road network, highest daily flows should be used - with proper allowance for the effects of queuing at the survey point. The surveys should be carried out when traffic is not reduced by holiday periods, school closures or other events such as roadworks that might divert traffic away from the road in question.

6. The result of modelling understated baseline flow rates is a failure to fully identify existing congestion hot spots. Given that, despite this, the transport assessment shows that congestion will be worse on the local road network it is clear that the reality will be far worse, and widespread, and that the highways infrastructure requirements have been severely underestimated.

7. Guildford Borough Council intend to reduce road space in the town centre in order to tackle congestion there. It is clear that they cannot apply the same approach across the Borough as that would deter businesses from operating in Guildford and discourage visitors. The Plan proposes massive levels of growth outside the town centre and that will lead to highway infrastructure changes that require demolition of property, road widening through villages and residential areas and, in all likelihood, demand for by-passes that would have to run through countryside including the AONB. In fact, it is difficult to envisage where such by-passes would be put without serious damage to the environment and the existing tourism economy. I object to planning for such massive growth in the Borough where such dire consequences would be inevitable.

8. My requests for details concerning the way junctions are dealt with in the model, and the details for three local junctions, went unanswered by Guildford Borough Council and Surrey County. It is my belief that SINTRAM uses only a very crude approach to assessing issues at junctions and concentrates only on link capacities and the associated ratios of link flow to capacity (RFC approach). The separate “Level of Service” (LOS) approach appears to be limited to just a small selection of the many congested junctions across the Borough.

An example of the effect of averaging is given below:

Validation Report Count Numbers 2513 and 2605 - Forest Road

A single day Surrey County Council traffic survey was carried out on 6th November 2012 at the junction of Forest Road, Horsley Road and Howard Road with the results for peak hours subdivided into half hour periods. The average peak hour figures (AM) from this survey were 278 vehicles per hour (vph) and 142 vph and these correspond exactly with the observed flows in the validation report.

However, the corresponding peak hour flows (08.00 to 09.00) on that day were 371 vph and 187 vph. The observed flows have been taken as 75% and 76% of the peak hour due to averaging. The alternative way of expressing this is that peak hour flows were 33% (and 32%) higher than the chosen observed flow.

This is by no means the most extreme example and the effect varies but it should be obvious to anyone that averaging always reduces the peak hour flow and, in many cases, very significantly. Averaging can only make little difference in the town centre and on roads such as the M25, for example, where peak hour queuing is prolonged and results in lower measured flow rates spread more evenly (traffic that can flow rather than traffic that wants to flow). To obtain a clearer picture in these circumstances it is necessary to take account of changes in queue length - but this is not practical when the queues stretch back to affect other junctions. Questions also arise as to where the end of the queue (or queues) is defined to be.

Furthermore, in this example, the modelled flows are only 38% and 67% of the peak hour flow (observed peak hour flow is 2.63 times greater than modelled flow in one direction) - meaning that the methodologies described in the report as "fixed trip equilibrium assignment and method of successive averages" have had the effect of further reducing the flows modelled for this road link making it far less likely to register as congested.

Very long queues develop on a road that meets Forest Road at a junction and these are related to the flow rates on the road that has priority. If the priority road has an understated flow rate in the model then any technique that it uses to identify delays at its junctions with lower priority roads will also be understated. My questions related to the technique used by the model remain unanswered at the time of writing.
At non-signalised junctions the capacity of an approach arm on a road that does not have priority reduces as the flow on the priority arm increases. There is a "tipping point" at which the flow on the approach arm exceeds the capacity, queuing begins and increases indefinitely until this variable capacity exceeds flow.

At signalised junctions the capacity of an approach arm is determined by the proportion of "green" time available to it. This may be fixed or variable depending on the sophistication of the traffic light system and the way in which it shares time between the approach arms and any filter lanes.

At any junction, the tipping point for any arm may not be exceeded in a model that has understated flow rates. A simple case of "rubbish in, rubbish out".

9. The Link capacities used in SINTRAM are too high in my opinion having regard to local knowledge concerning the effect of pinch points and considering the implied gap between vehicles (bearing in mind that traffic does not flow evenly spread and weather and road conditions are not always ideal).

10. The proposed town centre road changes could have a substantial impact but they have not been incorporated in the model. A concern here is the impact of traffic diverting onto other routes following the proposed reduction in town centre road space.

11. Waverley and Guildford were modelled together but it is not clear whether other adjacent Boroughs have been dealt with adequately as they appear to rely on general growth factors rather than proposed site developments near Guildford that could have a very significant impact on our road network.

12. More traffic congestion means an increase in local air pollution with significant adverse effects on the health of Guildford's residents.

13. More traffic congestion will increase journey times for emergency vehicles making good outcomes for life-threatening incidents less likely.

14. The local road network is required to provide alternative routes for traffic when the strategic road network is temporarily closed or providing a severely reduced capacity. The existing local road network suffers major congestion and delays when this happens under current conditions and this will become far worse under the proposed increases in flows on strategic road network and the massive increase in local traffic that will be generated under this draft Local Plan.

15. I consider that the traffic evidence is inadequate for the purposes of Local Planning and my requests for information concerning the evidence that was provided were largely unanswered at the time of writing despite initial requests being made within a few days of the start of the consultation period. Please provide full answers to the following questions and requests:

16. I request full details of the TEMPRO factors actually used in taking the model from 2009 to Scenario 1 (Please do not just refer me to a website as you did in the consultation period). I want to know what was actually used in the model).

17. I request that the missing PM evidence be provided without further delay.

18. Why was the missing PM evidence not published at the same time as the rest of the report?

19. I request the number of nodes, number of links and number of origin-destination pairs included in the Guildford model.

20. Please list the origin/destination pairs used for trips in the Guildford model.

21. It has been suggested that SINTRAM allows for junction geometry and opposing flows. Is this the case for all junctions on the local road network?

22. Please explain what aspects of "Junction geometry" are used in the model.

23. Please explain what data items you put into SINTRAM to allow for the details of each junction.
24. Section 4 appears to imply that SINTRAM has junction capacities. **Please advise** the junction capacities used in SINTRAM for the following junctions, for each arm:

- Effingham A246/The Street/Beech Avenue
- West Horsley A246 Bell&Colvill roundabout
- B2039/East Lane/The Drift

25. How were the delays in Table 6 determined?

26. If SINTRAM uses a "mathematical" function to determine delays, **please advise** the function employed and the data items that it Please note that your initial answer "calculated in the model" is not an adequate response.

27. Table 3.1 includes some negatives - the most extreme being for the Boxgrove I have been trying to think why this might be. **Please advise** the reason for this.

28. I **request** a clear description of the LOS assessment process and a list of the junctions for which this assessment was carried out.

29. I **request** that detailed junction modelling (with realistic data) be carried out across the Local and Strategic Road Networks before sites are included, and that it is not left to developers to provide data and modelling as they have a vested interest in the results.

Model Development Validation Report

30. This appears to indicate that the model contains 408 road links. However, **certain roads seem to be missing.**

For example, a highly significant commuter route has developed across the AONB using Ranmore Common Road, Crocknorth Road and Greendene. This route, which crosses the Borough border, does not seem to appear in the list of road links in the validation report.

This particular traffic flow seems to consist of traffic taking a shorter route between the A24 at Dorking and the A246 at East Horsley as an alternative to main roads that involve regular, and frequently excessive, queuing at peak times. Much of this traffic travels at dangerously high speeds, cutting corners on a narrow, winding and hilly road with the occasional slow-moving cyclist commuter on uphill sections with blind bends. Some sections of the route can be very treacherous in damp or icy conditions. It is also used increasingly by HGVs including some that seem lost.

One possibility is that the model contains other links for there was no observed data and so it was not possible to validate them. My questions on this aspect were unanswered at the time of writing.

31. Some observed/modelled **flows seem very low.**

32. I requested more detail on the road links so that I could understand which section of a road was described and the direction **This information has not been provided** at the time of writing. I was able to infer the detail for certain links through some time consuming effort.

33. Please provide full answers to the following questions and requests in relation to the validation report:

34. It is good to see a list of validation data (Appendix A of the validation report) but for many links it is not clear which stretch of road the data relates to. Also, the direction of travel is given in some, but not all cases.

I **request** that fuller detail be provided on the road links to indicate section, direction, capacity, trip origins and destinations that apply to the link (i.e. the first choice route for those origins and destinations), and the date (or date range where applicable) of the survey used for the "observed flow".
35. Are Greendene and Crocknorth Road included in the model?

36. Please provide a complete list of road links included in the model for which there is no observed flow data, together with the baseline modelled flows that are included for them.

37. Is the baseline modelled year 2009?

Green Belt and Countryside Study

38. This was not a true re-assessment of Green Belt land, was not requested with general consent, and no exceptional circumstances exist for making changes to the boundaries. Rather than consider the purpose and value of the Green Belt in restricting urban sprawl the study was driven by a consideration of where developers wanted to build and then made up reasons for moving the boundaries in order to accommodate them. The study was prepared by a company that represents the interests of developers.

39. The subsequent use of a "traffic light" system of sensitivities is a bogus attempt to justify erosion of the Green Belt when there are no exceptional circumstances for doing so.

40. I object to the Green Belt and Countryside Study request that it be excluded from the evidence and that no changes are made to Green Belt boundaries.

41. I object to the changes to settlement boundaries.

42. I object to the entirely new concept of "village boundaries" (introduced in this latest version of the draft plan) designed to encourage development in the Green Belt and request that they be scrapped. Furthermore, the boundaries chosen were inappropriate, and this aspect is dealt with in further detail for a local example under "Appendix H Maps" later in this letter.

43. I object to the insetting of villages. It will destroy their character by an insidious process of inappropriate development. Inssetting will also have an adverse impact on biodiversity in villages where the relatively low density of housing makes them permeable to wildlife. For example, East Horsley makes an important contribution to the openness of the Green Belt due to its low average housing density, woodlands, open space and large residential gardens. It passes the NPPF test for remaining "washed over" in contradiction to the conclusions reached by the development industry study.

44. The Government and Guildford Borough Council have no mandate to undermine the integrity of the Green Belt and have broken election promises made at a time when they were fully aware of what they intended doing.

SHMA

45. The West Surrey SHMA cannot not be regarded as objective and residents were denied access to the underlying details. Guildford Borough Council even refused to scrutinise it. The referendum result has further undermined its credibility and I request that it be withdrawn from the evidence. The result of the EU referendum changes the future of migration to and from the UK. It is not simply a matter of government policy and one possible scenario is a net outflow of economic migrants for a number of years.

It makes no sense whatever to release countryside and Green Belt for development, against residents' wishes and with no mandate, when any development genuinely needed could be met using brownfield sites in sustainable locations.

The adoption of a grossly inflated housing number will result in forced growth - encouraging inwards migration that will consist mainly of commuters.

The student population has a highly significant impact on occupancy and the local market and should be dealt with separately for projection purposes. In my view this is essential in trying to understand Guildford's future population and the options for accommodating it.

The underlying ONS data reveals that the fertility rate is well below replacement level and this means that, once the effect of improved mortality has worked through, the population will only rise a little before declining in the absence of net inwards migration.
46. The ONS trend-based assumption that mortality rates will continue to improve significantly could be considered optimistic. In effect they are assuming that the trend will not be broken by any of the many events that could upset this rosy viewpoint.

47. A revised SHMA is needed, followed by the application of constraints for infrastructure, Green Belt and to protect our landscape and biodiversity.

**KEY EVIDENCE**

2. Additional evidence should include:

   - Existing SNCI surveys, including those that took place in 2004-2007.
   - Biodiversity evidence emerging from Neighbourhood Plans.
   - Evidence obtained by requests to local naturalists and natural history societies including those with a specialist interest / expertise.

**Concluding comments**

As stated at the beginning, I require that the points that I have raised be included in the Examination process and that they are responded to.

In summary, this draft Local Plan would have an adverse impact on quality of life, biodiversity, agricultural production, and on local businesses through increased traffic congestion, loss of countryside and destruction of village communities. It will fail to provide genuinely affordable housing or meet genuine local needs. The evidence is weak, poor, misleading and, in some cases, absent. It is an attack on the quality of life, wellbeing and health of the residents of Guildford. The identified infrastructure requirements are merely the tip of the iceberg that will sink Guildford if this plan goes ahead.

Our Government and local authority will be failing in their duty if this plan is approved.

**Appendix H Maps**

194. The introduction of a "Village Boundary" to an area described as "Horsleys - East Horsley (south)" is an unacceptable weakening of planning restrictions in this gateway to the It includes two areas of countryside - Wellington Meadow which is managed as a wildflower meadow and known for its special biodiversity - and private chalk grassland fields on the south-western side. These fields belong to residents of Chalk Lane and, in some cases, the boundary between field and garden is no longer evident on the map. At least one of these fields, under favourable management, has nine species of orchid recorded and several rare invertebrate species. The invertebrate species include at least two that are not recorded at The
Sheepleas SSSI close by as far as I am aware. A colony of the Small Blue butterfly, which is a Surrey Biodversity Action Plan species, persists in one these fields but became extinct on the SSSI many years ago. The Greater Butterfly Orchid, *Platanthera chlorantha*, reaches population densities that are unlikely to be achieved on the publicly accessible Sheepleas SSSI.

196. I can see no justification for including these areas within the new designation of "Village Boundary" - the purpose of which is to encourage "limited infilling" in the Green Belt.

197. One of the roads within the "Village Boundary" is Chalk Lane - an ancient sunken drove road now surfaced as a single lane. It is tree-lined with the branches meeting over the lane and creating a picturesque "green tunnel" that can also serve as a corridor for the movement of dormice (which move in the tree canopy). Traffic using this lane has to pass oncoming vehicles by using residents' driveways. Adding further residences that would use this lane makes no sense whatsoever.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Responses to Sites**

**Various Sites**

1. I object to greenfield development, especially development on countryside that is designated for protection such as Green Belt (before the Council’s proposed changes), or is quality agricultural land, or is making a valuable contribution to biodiversity without any statutory designation. If the housing number had been calculated realistically and brownfield sites allocated for genuinely affordable housing rather than retail or business expansion there would be no need to hand over our countryside and villages to developers. This can be taken as a general objection to greenfield sites.

2. I am concerned about the implications of the Housing and Planning Act 2016 - particularly Section 150 and Planning in Principle. Planning matters such as detailed traffic assessment and sustainability are not being covered by the site selection for the Local Plan and are being left to the planning application stage. Under “Permission in Principle” it seems that these matters will be beyond public scrutiny and comment. Traffic assessments will be carried out by developers with a view to proving acceptability. Scrutiny by local residents is highly valuable in ensuring probity in the planning process.

Even if a site (within the current Green Belt) were subsequently found to be unsustainable it will have been released from the Green Belt, through the Local Plan, for no sound reason.

I have some additional comments on specific sites - mainly local to me and where I have some knowledge of the circumstances.
Site A25 Gosden Hill Farm, Merrow Lane, Guildford

161. I object to this site being included. It is Green Belt and there are no exceptional circumstances. These fields and woodland separate Burpham from West Clandon. Taken with other sites proposed it will form part of a ribbon development along the A3. The site would generate large volumes of additional vehicle traffic onto roads that are already congested.

Site A26 Blackwell Farm, Hogs Back, Guildford

162. I object to this site being included. It is Green Belt and there are no exceptional circumstances. It will put further pressure on the Thames Basin Heaths SPA and other remaining areas of high biodiversity such as Broadstreet Common.

163. The proposed development would ruin the setting of the AONB at this end of the Hog's Back and create major traffic problems.

164. The Strategic Highway Assessment Report indicates that the issue of traffic using the site as an alternative route to locations in Guildford, and to avoid congestion on the main road, has been recognised along with the serious problems it will generate in the vicinity of the hospital including increased use of the dangerous slip onto the A3 near the Tesco I understand that possible solutions might be to use a discouraging winding route through the site or a number plate recognition system (ANPR).
165. A winding route will add to all legitimate users' journey times, carbon emissions and air pollution times for emergency vehicles will be impaired. Legitimate users include delivery vehicles that may want to continue on a route into and through the site for efficiency reasons.

166. An ANPR solution sounds like a bright idea that has not been thought it would be a "Big Brother" solution fraught with difficulties - legal and administrative. Consider visitors choosing to leave by the opposite route and delivery vehicles continuing through the site and out the other side. Keeping up with changes in residents' and other legitimate users' vehicles would be difficult and create problems. Who would profit from fines or bear the cost?

167. Additional traffic congestion in the vicinity of the Accident and Emergency access is highly undesirable for Guildford residents due to the increased time it will take to receive emergency treatment - it is a life-threatening issue.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**Site A35 Land at former Wisley Airfield Ockham**

168. **I object** to this site being i It is a large open space in the Green Belt and there are no exceptional circumstances. The site has extensive views to the AONB. It is an SNIC next to an SSSI and the Thames Basin Heaths SPA. The recent planning application was turned down for many very good reasons that will not go away. There are serious and wide reaching traffic issues arising from the proposed development and these will impact on The Horsleys, Effingham, Cobham, Ripley, Send, the A3 and the M25 and further afield. The proposal is unsustainable and environmentally destructive.

169. With so many negative aspects, and grounds for rejection, the site should not have been included in the draft Local Plan and it appears that undue favour is being given to its developers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A36

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**
Site A36 Hotel, Guildford Road, East Horsley

170. I object to this site being included.

171. This site is an example of extension of the settlement boundary, along with insetting, to encourage building on the greenfield part of the site as well as the existing built area and car park.

172. I do not accept the proposed change to the settlement boundary and any future development should be restricted to the brownfield part of the site.

173. The hotel is a valuable component of the local tourist industry and non-viability has not been proved and the main Chown-built building at the front of the site is a local icon and part of the local heritage.

174. A change of use to housing would lead to increased traffic movements from the site on to the busy A246 at peak time. In particular, this would involve commuters attempting to turn right, to travel to Guildford, Horsley Station, local schools, the A3 and the M25. These right turns across a busy road are in close proximity to other junctions, a petrol station and bends in the road.

175. If non-viability of the existing hotel use is proved satisfactorily then an alternative use, that does not generate commuter traffic, should be a care home, or smaller homes for retired people (freeing up larger homes elsewhere for families), could be sensible alternative options. The existing green space would provide a useful open space area for these alternative developments.

176. The recent planning application for this site identified the need for a pedestrian crossing on the A246 on sustainability grounds - so that residents could have safe access to the infrequent bus service. However, past discussions have suggested that a crossing is not viable at this location for a number of reasons given by SCC appear to be suggesting that a pedestrian island refuge will be sufficient but I am not convinced that there is room for this or that it will be safe.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/4300  Respondent: 8573793 / Harry Eve  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site A41 Land to south of West Horsley

186. I object to this site being included. Guildford Borough Council have proposed moving the settlement boundary and insetting the enlarged village in order to allow a development for which there are no exceptional circumstances. This is a very obvious intrusion into the openness of the Green Belt.

187. Strangely, the "opportunities" include "Green Corridors and linkages to habitats outside of the site" when the proposal represents a major reduction in these features.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4301  Respondent: 8573793 / Harry Eve  Agent:
Sites A36 to A41 - general reasons for objection

188. These sites and some smaller sites identified with densities that are very much higher than, and out of proportion with, the nature of this locality represent a massive increase in the population of The Horsleys and will destroy their character. Further development in the form of infilling and inappropriate development will take place as a result of the proposed insetting.

189. No genuine consideration has been given to the traffic impacts (the baseline traffic flows modelled for this area were severely understated) or adequacy of local services to support this growth. Public transport is very poor and these sites will generate a large volume of additional car journeys on roads that already have queuing. The site proposals are unsustainable.

190. The Infrastructure Development Plan largely ignores this area of the Borough with a token £1m added at the last minute, apparently as an afterthought, for an "East Horsley and West Horsley traffic management and environmental improvement scheme". Residents have been given no indication as to what this entails and I suspect that it has been given no real consideration. Residents have no idea whether the scheme will be acceptable in terms of any undesirable impacts that it might have or whether it will be effective.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4302  Respondent: 8573793 / Harry Eve  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Site A43 Land at Garlick's Arch

191. I object to this site being included. The inclusion of this site is a major change from the previous draft and has not been consulted on previously. It is a large development that was not included in the strategic highway assessment. There are no exceptional circumstances to justify the removal of the site from the Green Belt.

192. Ancient woodland will be put at risk and, strangely, the "opportunities" include "Green Corridors and linkages to habitats outside of the site" when the proposal represents a major reduction in these features.

193. The site is unsustainable as its location will generate a large volume of car journeys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
79. This policy is all very well in relation to new developments but the Plan overall will not make Guildford a better place – quite the opposite. A major constraint on the housing number is needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

80. This policy is another example of hypocrisy. While it says many fine things it ignores the fact that the Plan involves putting housing estates in the countryside generating a huge amount of additional traffic and greatly increasing carbon emissions. A major constraint on the housing number is needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
81. It is worth pointing out here that this policy could come into conflict with highways infrastructure developments that will be found to be necessary to keep traffic moving at junctions in limited space in built-up areas where there are historic buildings. Examples of two such locations are Ripley and Effingham. A major constraint on the housing number is needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13054  Respondent: 8573793 / Harry Eve  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

82. This policy is another example of hypocrisy.

The proposal to inset villages will completely change them and nowhere is this more so than the Horsleys which appear to have been singled out for change from a low density village to an urban sprawl regardless of local concerns. A major constraint on the housing number is needed and the proposal to inset villages must be removed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object

67. I am not satisfied that the evidence is sound and it appears to me that, rather than meet existing employment needs in an area of low unemployment and concentrate on what Guildford is good at (i.e. high tech), this is a policy to create more employment needs to justify excessive housing growth in an area that cannot support it. The second paragraph – “The Plan aims….” Seems contrary to the likely outcome if this plan goes ahead. The Plan is likely to create conditions that make Guildford less attractive to businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object

68. I am not convinced that the permitted area of the Research Park needs further expansion and the policy appears to involve a weakening of the range of permitted uses that could undermine the appeal of the site for the type of business enterprises for which it is intended.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object

69. This appears to be a policy to encourage growth in rural areas regardless of actual local needs and opinions. The last sentence appears to apply small-scale town centre uses to rural areas but with less consideration regarding location. This rather sums up Guildford Borough Council’s current unsatisfactory attitude towards its rural areas.

70. I am concerned about the emphasis on accepting agricultural developments regardless without consideration for their impact on the natural environment. The North Downs is an extremely important area for biodiversity but this policy could encourage landowners to destroy our chalk grasslands in favour of vineyards and other crops. Chalk grassland is a scarce habitat in international terms and Guildford has a duty to conserve what is left in the Borough.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

71. **I support** the recognition of the value of tourism and leisure to Guildford and support the intention to resist change of use where appropriate. Non-viability might sometimes be used as an unjustified excuse to profit from a change of use to the detriment of the local tourist and leisure economy and I appreciate that Guildford Borough Council recognise this.

72. **I object**, however, to the encouragement of more development in the countryside. It should be appreciated that the undeveloped countryside is an asset to the tourist and leisure economy and it is all too easy to ruin the appeal of an area through further inappropriate development.

73. The sentence “proposals which promote greater use of the River Wey as a leisure and recreational resource.” Should be heavily qualified by the need to protect the River Wey environment, biodiversity, and its value as a wildlife corridor.

74. This policy has been constructed without reference to the Surrey Nature Partnership which will inform a Countryside Vision and Green and Blue Infrastructure Supplementary Planning Document **neither of which have been published**.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

75. **I object** to the emphasis on retail at a time when it is declining. More use should be made of the town centre for housing instead. Housing in the town centre is a sustainable solution whereas the proposed sites in the countryside are not.

76. I do support the last sentence – at least children will get some exercise by having to walk further for their unhealthy food preferences!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
77. I object to the designation of Station Parade, East Horsley as a District Centre as this is based on an incorrect assessment of the facilities in the village centre. This would result in appropriate development in East Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

78. I object to further retail development adjacent to Bishopsmead Parade, East Horsley. It is unnecessary and inappropriate. The same objection is likely to apply to some or all of the other sites mentioned.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

53. Student accommodation in town has damaged the provision of “Homes for all”. A much higher level of student accommodation should be on campus.

54. While the policy requires that density should “respond” to local character, context and distinctiveness, this is not being adhered to in certain proposed site allocations in villages (example – site A36 (Hotel, Guildford Road, East Horsley) where the proposed density is exceptionally high in relation to the locality).
I object to greenfield development, especially development on countryside that is designated for protection such as Green Belt (before the Council’s proposed changes), or is quality agricultural land, or is making a valuable contribution to biodiversity without any statutory designation. If the housing number had been calculated realistically and brownfield sites allocated for genuinely affordable housing rather than retail or business expansion there would be no need to hand over our countryside and villages to developers. This can be taken as a general objection to greenfield sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object

55. No consideration has been given to where affordable housing is most needed and current Government policy does not support the retention of affordable housing stock such as social housing. The definition of “affordable” means that such housing in the Borough will not be genuinely affordable while, in parts of the Borough with very high market prices and rents this will simply be used as an investment opportunity by those who can afford to buy at a high, but discounted, price.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object

56. This policy fails to protect against market housing being used to pay for “affordable” housing and fails to protect against development in inappropriate locations (sites of high biodiversity, landscape value, and Green Belt for example). The definition of “affordable” and the issue of viability will lead to this policy being used as an excuse to profit from development in the countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

83. I have commented at length on the failings of the Strategic Highway Assessment Report. The full impacts of traffic generated by this Plan have not been recognised and so the highway development proposals are inadequate. It would lead to a need for new roads through the countryside (including the AONB), road-widening and enlargement of junctions including within residential areas, and may require compulsory purchase and demolition of existing buildings some of which may be of historic interest or local character. The cost in financial and environmental terms would be immense and the alternative scenario of greatly increased congestion, unacceptable levels of local air pollution, and deterrent to business and visitors, is likely to persist well into the future affecting future generations as well as current residents and businesses.

84. Much of the infrastructure required is outside the control of Guildford Borough Council in relation to funding, timing and design. The schedule of proposals gives little detail and very broad brush estimates of cost suggesting that little detailed thought has gone into the requirements.

85. As elsewhere in the Plan this policy includes weak wording such as “should” and the “Reasoned justification” suggests (at 4.6.8) that the Council will be prepared to negotiate on infrastructure requirements – implying that significant developments may be delivered without the required infrastructure.

86. Guildford Borough Council should have applied a very significant constraint on the housing number but has refused to do so.

87. The highway aspects of the Infrastructure Development Plan were developed using hotspots identified in “OGSTAR” (the previous Transport Assessment used for the 2014 consultation) as a starting point. However, the site list used for OGSTAR was not even compatible with the former draft Local Plan let alone the current one. Despite this, the Key
Evidence mentions the June 2016 Highway Assessment but not OGSTAR. Key developments such as Garlick’s Arch, added at a late stage, are not included the Highway Assessment.

88. I have not investigated other infrastructure requirements in any detail but I do have concerns that over-development in the south-east, including Guildford, will lead to serious water shortages in the near future. The solutions could be very expensive and damaging to the environment. It is only a few years ago that the water table was severely depleted and this is more likely to be repeated as over-development continues.

89. Monitoring should be concerned with delivery and any change in infrastructure adequacy rather than CIL receipts.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/13056  Respondent: 8573793 / Harry Eve  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object for the following reasons.

90. This policy is concerned only with the strategic road network – the A3 and M25 for which the responsibility and decision-making lies with Highways England. It is only reasonable that the council will work closely with Highways England to ensure that the Local Plan does not utilise land in a way that limits the scope for future improvements.

91. However, the proposals for the A3 are undecided and the council has suggested a very expensive tunnel proposal that, even if Highways England decided to go ahead with it, is unlikely to be delivered until the end of the plan period. Less expensive alternative A3 improvements would not be delivered before implementation of the current draft Local Plan and would deliver a massive growth in traffic.

92. The result of the EU referendum must raise uncertainties about existing budget provision and priorities for Highways England projects.

93. The road improvements are likely to lead to significant disruption to traffic during the construction phase on top of an already overloaded road network. It would be folly to make matters worse by committing to such a large housing number and the only logical conclusion is that a very significant traffic constraint should be applied to the housing number for this Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/18536  Respondent: 8573793 / Harry Eve  Agent:
Policy I3: Sustainable transport for new developments

I object for the following reasons.

94. I support the general idea of sustainable transport but have the following criticisms and comments on this policy and certain criticisms also apply to the proposals for the Sustainable Movement Corridor.

95. Guildford Borough Council hope that far more residents will prefer to ride bicycles, walk much longer distances, or make greater use of buses and park and ride. This is totally unrealistic and ignores residents’ actual needs and the deteriorating state of bus service provision.

96. The proposed provision of two new railway stations could have unintended consequences such as increased commuter traffic nearby and a need for onerous parking restrictions or inconvenience for local residents from commuter parking. It might also lead to impacts on the housing market local to the station, driving up prices with adverse consequences on affordability and any social housing.

97. I am concerned about proposals to move cyclists off the road and into space shared with pedestrians. This simply replaces one risk with another and is likely to be the cause of accidents – particularly where pedestrians, including schoolchildren and mothers with toddlers, need to cross the path of cyclists to reach a pedestrian crossing. Pedestrians should not have to worry about cyclists approaching from behind at speeds approaching 30mph (as many cyclists on modern machines are easily capable of). Children, in particular, can make unexpected moves across a shared area without thinking about other pavement users in the vicinity. Conflicts over who has priority are also likely to arise whatever signage is in place. Pedestrians are being seriously disadvantaged by this approach.

98. If the policy is successful in generating more trip choices by bicycle the immediately obvious environmental advantages have to be weighed against the impact on those parts of the Local Road Network where cycle lanes do not exist. The impact is that safe driving will lead to reduced average motor vehicle speeds and gap development in the traffic stream. Both these effects act to reduce the capacity of our local road network. This loss of capacity has not been recognised in the Transport Strategy.

99. The benefits of park and ride for the town centre have to be weighed against the traffic that they may generate elsewhere and the vast area of tarmac needed to accommodate them in a Borough where space is under great pressure. In particular, it is not acceptable, and does not fit in with the principle of sustainability, to tarmac over large areas of greenfield land for this purpose - or to use brownfield sites without putting building uses over the top of them. We cannot go on wasting precious space in this way.

100. Insetting of villages and the proposed relaxation of planning restrictions anywhere inside or outside settlements (Green Belt or not), implied in P2, will lead to substantial infilling that will not require traffic assessment but will contribute a highly significant amount of additional car journeys overall - by a more insidious process than the large developments proposed.

101. The obvious site choice for sustainable development would be on brownfield sites in the town but the Local Plan proposes allocating those sites to the declining retail industry instead.

102. Paragraph 4.6.21 suggests that sustainable transport is promoted. Far from providing sustainable transport this Plan will generate a massive increase in motor vehicle journeys. The Plan cannot force residents to ride bicycles or walk everywhere and most of the proposed housing sites will generate large numbers of vehicle journeys due to their greenfield locations. Wisley (Site A35) is a classic example of traffic generation through inappropriate location.
103. Paragraph 4.6.26 refers to reviewing existing transport facilities and likely transport generation as part of assessing the amount of incremental travel demand. That consideration should have taken place in a robust and detailed manner on a site-by-site basis before the sites were allocated in the Local Plan. It is not sufficient to leave that until the planning application stage, as intended by Guildford Borough Council and Surrey County Council, given that all sites will be subject to “permission in principle” under the Housing and Planning Act 2016 and so will not be capable of subsequent rejection on these grounds.

104. Paragraph 4.6.27 notes that Development must mitigate its transport impacts. The measures described rely entirely on residents responding positively to their travel information packs rather than dumping them in the nearest bin. It seems that Guildford Borough Council, in response to concerns about elderly and disabled people failing to be coerced into riding bicycles are now suggesting tricycles to overcome this obstacle to their aspirations. They should be aware that while tricycles may help with balance issues they are heavier and harder to ride uphill. While the policy (unusually) notes that mitigation must be provided, in fact this is then diluted to suggest that facilities for electric car charging points and encouragement to car-share can be sufficient; all are optional and therefore meaningless.

105. However well designed a development is it will make matters worse during construction and, if on a greenfield site, it is hard to see how it will achieve environmental benefits. On the other hand, replacing inefficient buildings on a brownfield site could lead to benefits in the long term.

106. Paragraph 4.6.28 notes “Developers should have regard” to the “Infrastructure Schedule at Appendix C”. The only thing that developers have regard for is forcing their application through and maximising their profit – that is the business they are in.

107. Appendix C is lacking in detail. It notes, for example that there will be new town centre bus facilities at a cost of £5-10 million – such vagueness make it clear that no real costing or analysis of proposals has been prepared, and that the Infrastructure improvements proposed have not been properly considered. Having regard to fluid and uncertain proposals is effectively meaningless as a constraint or a requirement.

108. Paragraph 4.6.29 requires that applications need to address the transport implications of the proposed development. Experience with recent planning applications suggests that developers will do everything in their power to understate transport impacts and I have no faith in Guildford Borough Council and Surrey County Council taking a sufficiently robust line on this.

109. Key Evidence is missing or inadequate.

I described the inadequacies of the transport assessment earlier in this letter.

Some examples in connection with sustainability from the Guildford Borough Transport Study 2016:

110. The decision on Heathrow or Gatwick has yet to be taken but airport expansion in the south-east cannot be regarded as sustainable development and, although Guildford Borough Council has no control over such external decisions, its own forced growth agenda will drive a need for that expansion.

111. Benefits are claimed from projects such as Crossrail 2 which are highly unlikely to be delivered within the plan period – if at all.

112. The Southern Rail Access to Heathrow is still in its early stages and would have significant impacts on open space beyond our Borough. For example, all options in the feasibility study would use Staines Moor SSSI and Option 4 would use Bedfont Lakes Country Park (a Local Nature Reserve and SNCI). The various options would use existing commercial, residential and highways land in varying degrees. It seems unlikely that a solution will be delivered within the Plan period and removal of highly valued open space with high biodiversity (wherever it is in South-east England) cannot be regarded as sustainable. So Guildford Borough Council appears to hope to benefit from unsustainable projects elsewhere that will destroy important areas of open space and biodiversity.

113. There is a stark contrast between the plans for the town centre which involve encouraging a reduction in traffic by reducing road space and the plans for the Strategic Road Network and parts of the Local Road Network which involve increasing capacity. While increasing capacity may reduce some areas of congestion in the short term, history suggests that
traffic will rapidly grow until the improved roads are congested once again. This can hardly be regarded as sustainable. A sustainable option would be to apply a very substantial traffic infrastructure constraint on the housing number.

114. While the A3 Guildford Tunnel aspiration has some environmental advantages over widening (in particular for residents living close to the A3), the environmental burden of the construction phase is likely to be far higher and aspects such as location of ventilation stacks and their local effect (in all weather conditions) do not appear to have been considered.

115. Under “Weaknesses” the point about A roads in Guildford Town also applies to surrounding areas in the Borough and beyond. The anticipated improvements ignore existing congestion to the south and east of Guildford – presumably because Surrey County Council’s strategic highway assessment methodology has an understated baseline and only identifies the tip of the iceberg. The current Plan will see increased congestion and a resultant reduction in air quality in many areas beyond the town centre.

116. “Largely commercial bus services” is seen as a strength whereas it should be seen as a weakness with a trend to reduced subsidies and the provision of bus services, especially in rural areas, being increasingly dependent on commercial gain. It is difficult to see this changing under the current Government cuts philosophy. The point “Subject to business case including funding” under Aspirations demonstrates this point.

117. Guildford is well behind other areas in monitoring air quality let alone attempting to reduce it. The study talks about reductions in some pollutants. This may be the case for pollutants such as Sulphur Dioxide, which contributed to the visible London smogs, but it is not true of diesel vehicle emissions which have increased as a result of Government policy including its aggressive growth agenda, and population increase through immigration.

118. The study mentions an aspiration to provide 30 accessible electric vehicle charging points but this will be nowhere near enough if there is a real shift to electric vehicles.

119. It is clear from the “Strategy outcomes” that GBC would prefer not to follow other areas in pro-actively tackling air quality.

120. The timescales indicate that the main rail improvements (Including the two new stations) are unlikely to be delivered until the end of the Plan period or even later. The sites that are supposedly justified by their inclusion will generate a major increase in road traffic in the interim and it may be more difficult to achieve this aspect of modal shift in the longer term. The same can be said about the other traffic infrastructure proposals. Residential development is being scheduled before the infrastructure that it will need.

121. Monitoring – “Increase” needs to be in proportion to population growth as otherwise failure will be taken as success. “An Increase in average vehicle speeds” is inconsistent with the desire to reduce the number of persons killed or seriously injured. For example, some A roads pass through residential areas where pedestrians, including schoolchildren, are trying to cross the road at peak times. It is noted that increase in vehicle speeds is only desired in the morning. Going home from work does not seem to matter!

Monitoring Indicators for the policy:

122. Ten years is far too long to wait for information on whether the approach is working or not. The target requires only an increase. This would permit an increase less than that in line with any population growth to be regarded as success. The bar has been set well within the failure range given the proposed forced growth in local population.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy I4: Green and blue infrastructure I object for the following reasons.

123. This policy has been constructed without reference to the Surrey Nature Partnership which, I understand, is supposed to inform a Countryside Vision and Green and Blue Infrastructure Supplementary Planning Document neither of which appear to have been published or consulted on.

124. The Policy shows concern for conserving and enhancing biodiversity, which I welcome. I also note and welcome the intention to extend the principle beyond Biodiversity Opportunity Area However the current plan to build on large areas of countryside, inset villages and create new village boundaries to encourage infilling in the Green Belt will have the opposite effect. The Policy appears to be a box-ticking exercise with no real teeth to it.

125. There is no mention of the value of wildlife gardening to biodiversity or the important role that larger gardens play in a village setting.

126. There is no mention of the impact of the plan on food production, or monitoring the loss of agricultural land.

127. Some quotations from relevant documents regarding the importance of biodiversity:

"The natural world, its biodiversity and its constituent ecosystems are critically important to our wellbeing and economic prosperity, but are consistently undervalued in conventional economic analyses and decision-making" (Biodiversity 2020 page 11)

"As a public authority in England you have a duty to have regard to conserving biodiversity as part of your policy or decision making." (Government Planning Guidance)

Part of the problem is that "Biodiversity benefits are unpriced" and so not valued by those who look only at the more obvious and simplistic economic benefits.

128. I am concerned that "enhancing" the River Wey in the town centre will avoid using the available brownfield land around Walnut Tree Close and Slyfield for urban regeneration and sustainable housing that could otherwise be Why should the Walnut Tree Close/Woodbridge Meadows industrial area not be regenerated from bus garages, urban car parks and empty factories to offer sustainable, well designed, urban homes which are medium height, and can meet almost all of Guildford's real housing needs? It is vitally important for the town as a whole that the run-down Walnut Tree Close area is used for well-designed housing.

129. The plan involves an aggressive desire to push development on to the Green Belt at all costs, ignoring, or eliminating for other reasons, sites which could be used in the town for residential purposes. This has informed recent planning decisions (both the Aldi site and the Waitrose site were originally zoned for residential purposes and were eminently suitable for this) and this bias seems to be informing the ocal Plan to the detriment of our countryside, biodiversity and villages.

130. It is not clear what form the "parkland" along the River Wey will take but the images available in the Town Centre Master Plan suggest mown grass similar to the area around Millmead. This misses an opportunity to enhance biodiversity and enable town centre residents to engage with wildlife. Engagement with wildlife should mean much more than throwing bread at ducks, chasing pigeons and antagonising swans. To achieve a wildlife corridor through Guildford, that can also benefit the health and well-being of residents living close by, the green space retained beside the river should be managed with the needs of wildlife in mind as well as people.

MONITORING
1. Simply maintaining open space will not be enough for a significantly enlarged population.
2. Providing more open space to meet existing shortfalls or the needs of a much larger population will reduce the area of land currently in food production or providing wildlife habitat.
3. SANG delivery is harming existing biodiversity.
4. It is not clear how you will measure a change in biodiversity just by looking at planning applications. “Net gains in biodiversity provided by development” is a contradiction in terms. There may well be a few examples in England where low density housing has been combined with manufactured habitat at the expense of loss of agricultural land with no surrounding habitat damage - but I see no evidence of that in the Local Plan. Even when a housing development replaces agricultural land, it increases pressure on the surrounding countryside. A simple example is where houses border woodland and residents dump their garden rubbish (and often worse) over the garden fence. Increased leisure use on nearby countryside also has an adverse effect on biodiversity.
5. There is no guarantee that mitigations listed in an application will be carried out and their effectiveness is not guaranteed either. Guildford Borough Council would need to carry out follow-up ecological surveys on all sites. Who would pay for these? Are there enough consultants to carry out the work in sufficient detail? What aspects of biodiversity will be measured?
6. How frequently are surveys by Natural England intended to take place? How will Guildford Borough Council ensure that Natural England carry them out? A baseline of existing surveys against which changes will be monitored should be included within the plan and it must be comprehensive for monitoring to be effective.
7. How frequently will SNCI surveys be carried out? At what expense? The last survey published in 2007 made recommendations for an increase in the size of the Wisley Airfield SNCI and stated that this should be taken into account for planning purposes. This was overridden in the recent planning inspector’s report and the Local Plan includes this particular SNCI as a building site. This is clearly a case of hypocrisy and suggests that the Council has no genuine intention to maintain biodiversity let alone enhance it.
8. My understanding is that a survey of SNCIs is currently taking place but that it is limited in scope to the previously known sites. This prevents other sites, where genuine biodiversity enhancement has taken place (often as a result of volunteer community effort), from being recognised in this way. While every stone is being turned over in the quest to find green space to build on, no genuine effort is being made to identify biodiversity hotspots that may have been overlooked in the past. In other words the approach being taken is one that intends to make no net gain, and possibly even reduce, sites of nature conservation interest – in contradiction to the stated aims.
9. If an existing SNCI (or one proposed on grounds of biodiversity but not formally accepted in a Local Plan) is found to be in poor condition the action taken should be to bring it back into good condition – not to remove its status and build on it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

149. Additional evidence should include:

Existing SNCI surveys, including those that took place in 2004-2007.

Biodiversity evidence emerging from Neighbourhood Plans.

Evidence obtained by requests to local naturalists and natural history societies including those with a specialist interest / expertise.

**MONITORING**

150. Simply maintaining open space will not be enough for a significantly enlarged population.

151. Providing more open space to meet existing shortfalls or the needs of a much larger population will reduce the area of land currently in food production or providing wildlife habitat.

152. SANG delivery is harming existing biodiversity

153. It is not clear how you will measure a change in biodiversity just by looking at planning applications. “Net gains in biodiversity provided by development” is a contradiction in terms. There may well be a few examples in England where low density housing has been combined with manufactured habitat at the expense of loss of agricultural land with no surrounding habitat damage - but I see no evidence of that in the Local Plan. Even when a housing development replaces agricultural land, it increases pressure on the surrounding countryside. A simple example is where houses border woodland and residents dump their garden rubbish (and often worse) over the garden fence. Increased leisure use on nearby countryside also has an adverse effect on biodiversity.

154. There is no guarantee that mitigations listed in an application will be carried out and their effectiveness is not guaranteed either. Guildford Borough Council would need to carry out follow-up ecological surveys on all sites. Who would pay for these? Are there enough consultants to carry out the work in sufficient detail? What aspects of biodiversity will be measured?

155. How frequently are surveys by Natural England intended to take place? How will Guildford Borough Council ensure that Natural England carry them out? A baseline of existing surveys against which changes will be monitored should be included within the plan and it must be comprehensive for monitoring to be effective.

156. How frequently will SNCI surveys be carried out? At what expense? The last survey published in 2007 made recommendations for an increase in the size of the Wisley Airfield SNCI and stated that this should be taken into account for planning purposes. This was overridden in the recent planning inspector’s report and the Local Plan includes this particular SNCI as a building site. This is clearly a case of hypocrisy and suggests that the Council has no genuine intention to maintain biodiversity let alone enhance it.

157. My understanding is that a survey of SNCIs is currently taking place but that it is limited in scope to the previously known sites. This prevents other sites, where genuine biodiversity enhancement has taken place (often as a result of volunteer community effort), from being recognised in this way. While every stone is being turned over in the quest to find green space to build on, no genuine effort is being made to identify biodiversity hotspots that may have been overlooked in the past. In other words the approach being taken is one that intends to make no net gain, and possibly even reduce, sites of nature conservation interest – in contradiction to the stated aims.

158. If an existing SNCI (or one proposed on grounds of biodiversity but not formally accepted in a Local Plan) is found to be in poor condition the action taken should be to bring it back into good condition – not to remove its status and build on it.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Some comments on the policy notes:

131. 4.6.33 Villages are generally permeable to wildlife. The lower density of housing and presence of gardens (especially larger gardens) provides a corridor for movement across the residential area. Insetting of villages and the relaxation of planning restrictions in the Green Belt implied by Policy P2 will lead to infilling, “garden grabbing” and consequent loss of biodiversity. It will replace connections and corridors between habitats with barriers and lead to further fragmentation of our natural infrastructure.

132. 4.6.34 In the past Guildford Borough Council recognised the role that wildlife gardening and management of parks and open spaces for wildlife could play in enhancing biodiversity. There seems to have been a shift away from this. These aspects should be recognised in the Plan as well as the importance of Biodiversity Opportunity Areas and although 4.6.35 goes part way towards this we have yet to see the Green and Blue Infrastructure Supplementary Planning Document or have an opportunity to comment on it.

133. 4.6.36 This is long overdue and should include the way that our lanes are managed. The current approach is unsympathetic, sometimes damaging tree roots and scarce native plants. It seems to be oriented towards encouraging faster traffic rather than recognising the traffic-calming effects of natural vegetation (See the original Quiet Lanes Initiative).

134. 4.6.38 I agree with this statement but public access is frequently damaging to biodiversity – the more obvious examples being dogs out of control in the vicinity of ground-nesting birds and trampling of grassland habitats. Public open space must be protected for the reasons given but wildlife needs undisturbed (or at least less disturbed) space too if it is to thrive.

Policy definitions:

135. This section starts with a definition that is not a proper definition and is followed by statements that are not definitions at all, apart from the last – suggesting that this part of the document has not been thought through or checked.

136. 4.6.42 “Biodiversity creation and/or enhancement” is not a definition – it requires definition.

Do you mean that you will create new species or encourage them to evolve? Or do you mean that you will increase the number of species living in the Borough, or the population of each species, or both?

137. The points made are aspirational that have no enforcement to back them.

138. I support the use of green roofs and walls.
139. Building on the countryside and increasing the population by such a large amount will not help vulnerable species. It will put added pressure on remaining habitats and increase light and air pollution, degrading the ability of the borough to support wildlife.

140. 4.6.44 This appears to be saying that you will deliberately put playing fields, sports facilities and other leisure activities in BOAs – but these are land uses that reduce biodiversity!

141. 4.6.43 Arrangements with developers have no guarantee of success or longevity. They involve partial mitigation and overall loss of the original biodiversity interest of a site.

142. 4.6.45 My understanding of SANG is that it is intended to reduce pressure on Special Protection Areas by providing an alternative area for people to walk their dogs – and hope that they do not prefer to use the SPA. In other words they are intended to attract the type of use that is damaging to vulnerable species such as ground-nesting birds. In the desperation to find SANG land Guildford Borough Council are making use of existing open space that will not attract people away from the SPA and they are ignoring the impact on existing wildlife. For example – Guildford Borough Council decided to include the towpath in the Parsonage Meadows SANG as a way of also facilitating a cycle route. Encouraging cyclists and dog-walkers to use the same narrow path will not encourage dog-walkers to use it rather than the SPA. At Effingham Common Guildford Borough Council plan to designate an important area for wildlife and ground-nesting Skylarks as SANG. The Council is riding roughshod over the opinions of the Commoners and local residents. The Council used to put up signage warning dog-walkers not to disturb the Skylarks during the nesting season – but these signs were not put up until well into the nesting season this year and only then after complaints and harassment of Skylarks by out-of-control dogs.

143. In allocating sites as SANG, Guildford Borough Council has ignored the requirement to consider existing biodiversity and clearly have little or any knowledge or understanding of the issue. The issues relating to Russell Place Farm have been pointed out by a qualified Biologist. Many invertebrates are dependent on the dung of grazing animals and this aspect of our countryside is being steadily driven out of our Borough.

144. 4.6.46 I welcome this acknowledgement of the damaging effects of the proposed building developments. This also has relevance to the manner in which the green spaces next to the River Wey are managed.

145. 4.6.47 I welcome the proposals but I am concerned that these may be no more than good intentions. How will Guildford Borough Council ensure that they are carried out fully – and paid for by the developer?

**Reasoned Justification:**

146. 4.6.50 As the emerging strategy for Surrey and the Green and Blue Infrastructure Supplementary Planning Document are not yet available, or consulted on, the plan should not be proposing sites that will jeopardise them. The implication is that this aspect of the plan is not being taken seriously and will carry no weight in site selection despite the guidance in the NPPF.

147. 4.6.51 In fact some Guildford Borough Council contract mowing and lane management is not in line with a strategy that is meant to protect biodiversity.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object

57. While I fully support protection of the AONB from inappropriate development I am not convinced that the current
wording will achieve that. The recent proposals for Newlands Corner indicate one way in which this wording could be used
to justify inappropriate development in the AONB.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object

58. I place a very high value on the Green Belt and the contribution that it makes to public health and wellbeing, physical
and psychological, not only for the current residents of Guildford but also for Londoners and for future generations. This
policy extends the destruction of Green Belt land proposed by the flawed Green Belt and Countryside Study and proposes
allowing infilling in the Green Belt through the creation of “village boundaries”. This is a major change from the earlier
draft local plan that has not been consulted on previously. Far from being a “Protecting Policy” it is a policy aimed at
weakening planning restrictions in the Borough’s countryside.

59. This policy appears to be an invitation to developers to seek to infill anywhere in the Borough regardless of Green Belt
designation.

60. I object to the insetting of villages. For example, East and West Horsley are low density village areas that do contribute
to the openness of the Green Belt and there are no exceptional circumstances for removing their Green Belt status. I object
to the extending of their settlement boundaries which has been proposed simply to accommodate the wishes of developers
to build on the Green Belt in an area that attracts high prices for market housing.

61. Guildford Borough Council have tried to overcome residents’ opposition to Green Belt removal by spinning their
messages, introducing a subjective sensitivity assessment and using misleading statistics including a major understatement
of the area of Green Belt to be removed.

62. I have a particular objection to the proposed village boundary described as Horsleys – East Horsley (south) and this is
dealt with below under the heading Appendix H Maps.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object

63. While I support the protection of countryside from development and the creation of additional Green Belt, this policy is inconsistent with the plan to remove large areas of Green Belt elsewhere and increase the physical and visual coalescence of other parts of the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

64. I support the need for a policy to protect the SPA but,

I object to the manner in which it is approached.

65. As a naturalist I place a very high value on the protection of the Thames Basin Heaths and other areas important for wildlife. In my opinion the SANG approach is unsound and existing biodiversity at the chosen SANG sites is being ignored despite a requirement to take it into account. One example is Effingham Common which is a breeding site for ground-nesting Skylarks. This year, warning signs to inform dog-walkers of nesting Skylarks were not put up until complaints were made and Skylarks had been chased off their nest by an out-of-control dog (I was an unhappy witness to this).

This is an example of an existing valuable site for biodiversity being used erroneously to justify building near the SPA. It is wrong to claim that SANG is creating new open spaces and enhancing biodiversity. SANG is only created by using existing open space that may or may not have public access but does have existing biodiversity or agricultural use that will be...
harmed or removed by the change of use. Its effectiveness in drawing people away from the SPA is also highly questionable.

66. Throughout this process, Guildford Borough Council have demonstrated that they place no genuine value on biodiversity or have any real understanding of it. They merely see biodiversity and the SPA as obstacles to be overcome in their quest to impose a forced growth agenda on the residents of Guildford. I believe they underestimate the value that residents place on wildlife and fail to recognise its contribution to our wellbeing.

This policy is unsatisfactory in its current form.

Concluding comments

As stated at the beginning, I require that the points that I have raised be included in the Examination process and that they are responded to.

In summary, this draft Local Plan would have an adverse impact on quality of life, biodiversity, agricultural production, and on local businesses through increased traffic congestion, loss of countryside and destruction of village communities. It will fail to provide genuinely affordable housing or meet genuine local needs. The evidence is weak, poor, misleading and, in some cases, absent. It is an attack on the quality of life, wellbeing and health of the residents of Guildford. The identified infrastructure requirements are merely the tip of the iceberg that will sink Guildford if this plan goes ahead.

Our Government and local authority will be failing in their duty if this plan is approved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object

50. This requires a clear definition of what is regarded as “sustainable” that has the acceptance of residents. Building on greenfield sites is not sustainable because, even now, our country cannot feed itself without relying on a high proportion of imported food and our wildlife is diminishing under the pressures of agricultural intensification, increasingly damaging leisure uses of the countryside and loss of habitat to development. Development of the sites allocated for housing outside the town centre, together with the proposed insetting and general weakening of planning restraints enshrined in draft Policy P2, would result in large amounts of additional vehicular traffic and that cannot be regarded as sustainable. This policy fails to address the core planning principles set out in NPPF 17.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I am concerned about the implications of the Housing and Planning Act 2016 - particularly Section 150 and Planning in Principle. Planning matters such as detailed traffic assessment and sustainability are not being covered by the site selection for the Local Plan and are being left to the planning application stage. Under “Permission in Principle” it seems that these matters will be beyond public scrutiny and comment. Traffic assessments will be carried out by developers with a view to proving acceptability. Scrutiny by local residents is highly valuable in ensuring probity in the planning process.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object

51. Guildford Borough Council has no mandate to pursue such an aggressive growth strategy which uses an artificially inflated “housing target”. Constraints such as Green Belt and infrastructure have not been applied. I have commented on the SHMA earlier in my letter.

52. Why has Guildford Borough Council failed to apply constraints when it is happy to suggest that it values environment and separation of settlements?

I quote from the Strategy and Sites document:

“2.2.4 Guildford has its origins growing up where the River Wey flows through the North Downs ridge. This constrains development and creates a clear sense of separation between the town and outlying settlements, protecting the highly valued environment that is a distinctive part of the borough’s character.”

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

The infrastructure schedule falls a long way short of the requirements that would be generated by this draft Local Plan.

The earliest dates for the railway stations at Park Barn and Merrow are not expected before 2024 (six years later than first anticipated).

Two road safety schemes for the A3 have been abandoned.

SCC appear to have washed their hands of involvement in the delivery of a number of highway developments on the local road network (which is their responsibility) - e.g. those in LRN7.
LRN7 (For Wisley Airfield) is an example of inadequate infrastructure requirements to address the problems that would be created by a strategic site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to retail developments being excluded from the carbon reduction requirement. The justification in 4.5.37a makes no sense and simply reflects GBCs attempt to increase town centre retail development, unnecessarily, and push housing into the countryside. This is the opposite of sustainable construction. It means that brownfield town centre sites will be wasted when they could be used to meet housing need in a much more sustainable way than the proposals in this draft local plan.

4.5.38 admits to the “particular issue of increasing pressure on water stocks in an area already classed as being under serious water stress” but seems to imply that improvements in standards of the way we use water will happen one day and that will be sufficient. Any improvement in standards is likely to be very small in comparison to the massive increase in domestic water consumption, locally, that will arise under this draft local plan. I object to the lack of a constraint based on water consumption and supply. This is an issue for planning in South-east England in general as well as for Guildford.

Answer (if comment is on questions 1-7 of the questionnaire): ()
4.4.3(a) mentions the role of the Enterprise M3 LEP in determining local priorities. The LEP is an unelected body covering a wide area and should have no power or influence over planning priorities in Guildford especially as they are focussed on growth for their area regardless of consequences for local people. **I object** to the influence that the LEP is having on the local plan process.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The current definition of “Affordable” does nothing to help key workers in Guildford.

The policy has been further weakened in favour of developers’ profit (policy item (2)).

The issue is partly a problem of Government policy concerning the affordability definition and the right to buy (continually eroding the social housing stock) - and partly due to GBC’s reluctance to subsidise sufficient genuinely affordable housing for key workers (exacerbated by cuts to local authority budgets).
The wording has been amended to give an impression that provision of adequate infrastructure will be enforced. However, the reality is that GBC will not determine the required infrastructure. It will be determined by Surrey Highways for the local road network and they are required to support development – not put obstacles in the way. If the SHAR (2016) and its predecessor are anything to go by, the requirements will be understated or not even recognised. Transport assessments supporting planning applications will be prepared by consultants acting for, and remunerated by, the applicant. Improvements to the strategic road network (e.g. A3) will be determined by Highways England, budget constraints, and ministerial decisions.

A lead Councillor has stated that the proposed Blackwell Farm development will not depend on A3 widening (in response to a question put to the Executive Advisory Board meeting held on 20 April 2017). It seems likely that Highways England have felt the need to offer a reality check on the likelihood of major work on the A3, such as widening or a tunnel, in the foreseeable future – apart from improvements to two slip roads.

The policy states that infrastructure will be secured by planning condition and/or planning obligation but this will require enforcement and I doubt the ability and willingness of GBC to overcome developers’ viability arguments. For the permissions that require a longer timescale there could be non-delivery issues if the original developer abandons the project without fulfilling all the conditions and obligations. Item 4.6.8 still indicates that GBC will be prepared to reduce infrastructure requirements by negotiation; i.e. viability for the developer will take precedence over infrastructure.

No change has been made to the monitoring requirement which is based on CIL receipts and spending alone. This is not sufficient. The actual delivery of specified infrastructure, before a particular development takes place, should be monitored and enforced.

The Transport Topic Paper and associated letters from Highways England suggest to me that further modelling will be undertaken before the Examination and it also seems unlikely that it will be consulted on. I consider that any further modelling should include more detailed information than SHAR (2016) so that it can be subject to scrutiny by GBC and by the public under a consultation process. Failure to do this will further undermine the credibility of the evidence gathering process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The removal of item 4.6.17 is puzzling. In the rationale for changes it is described as a potential statement of common ground with Highways England. GBC believe that it is likely to be agreed nearer to the plan Examination – but once again it highlights the lack of control over key roads infrastructure in formulating the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Item 4.6.20 makes a statement that is clearly at odds with the actual choice of sites which will generate a major increase in private motor vehicle journeys. For example, the lead Councillor for Planning seems to be alone in believing that a sustainable plan for Wisley Airfield will be found.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

While there has been some improvement in the wording it is clear that the selection of Biodiversity Opportunity Areas (BOAs) has been no more than a desktop exercise influenced by the proposal of new identified settlement boundaries, in this draft local plan, that were not fully thought through and which threaten landscape and biodiversity.

The addition of the words “where possible” is a let-out clause that demonstrates the reality that biodiversity will be greatly reduced by the many greenfield development sites proposed.
Important habitats for biodiversity (outside BOAs) are not restricted to those which are adjacent to BOAs. The policy appears to abandon them.

4.6.45 is misleading. The primary role of SANGs is to divert recreational use, and dog-walkers in particular, away from the TBHSPA. This requires making it more attractive in terms of access and lack of restrictions. It is extremely doubtful whether SANG will achieve its primary purpose. Existing biodiversity and recreational use is being ignored by GBC and developers in selecting sites. For example, dog walkers are being encouraged to use sites occupied by ground-nesting Skylarks. It is wrong to claim, in effect, that SANG will produce net gains in biodiversity when it will be used to justify the destruction of existing wildlife on greenfield sites by building on it.

I am suspicious of the introduction of 4.6.49a which appears to be an afterthought to weaken the policy. It could be taken as an indication of pre-determination in relation to certain local school proposals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The changes seem to weaken protection of the AONB and may be used to facilitate inappropriate non-major development. I object to removal of the tests.

It is not at all clear what will be regarded as major development.

There are areas of high landscape and heritage value that are not within the AGLV and AONB and that are placed under additional threats by this draft plan. They have no such protection despite being “areas of outstanding natural beauty and great landscape value” in fact (if not by designation) and in the opinion of those who visit them for that reason.

The scope of the review should be re-considered to include areas not within the AGLV and the scope should be open to consultation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposed changes. Far from protecting the Green Belt and scrapping the seriously flawed Green Belt and Countryside Study, Guildford Borough Council is undertaking further insetting and weakening Green Belt protection by also adding another “identified settlement boundary”. There is no genuine justification for removal of Green Belt protection or weakening protection of areas that remain within the Green Belt.

Guildford Borough Council has no mandate to reduce its area of Green Belt but proposes doing so on a massive scale. Most of the proposed housing development has been assigned to Green Belt sites.

I object to the “identified settlement boundary” of “East Horsley (south)” which includes a number of large fields and areas of special biodiversity. Access to much of it is only by a narrow single-track lane of high landscape value. It is clear that no serious thought was given to the areas designated or to the boundaries.

There is an anomaly between the approach taken here and for Policy P3. The new identified settlement boundaries will allow unnecessary development in the Green Belt countryside in the form of infilling.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

4.3.37 now highlights the need to take account of the effects of climate change. This should include the potential effect of a prolonged period of below average rainfall on the water supply in South-east England. Encouraging further net inwards migration into the region, as reflected in this draft local plan, will lead to even more pressure on water supplies and the need for expensive and undesirable solutions that may take many years to implement or prove impossible. Questions that should be asked are:

- Where will new reservoirs be located?
- How much energy will be required by desalination plants?
- What are the issues and costs involved in delivering water from desalination plants to inland locations such as Guildford?
- How much will water bills rise as a result of the solutions required.

Continuing to add more pressure on water supplies is clearly unsustainable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

No.

The housing number is still significantly overstated and the Council Executive has refused to reveal the full details of the underlying calculations to those who have requested them. The Scrutiny Committee has refused to scrutinise the SHMA.

As part of the previous consultation I raised a number of issues, questions and requests for further detail concerning the SHAR (2016) and its associated Validation Report. This followed criticisms of the previous SHAR that were not addressed in the 2016 version. No attempt has been made to address the issues, my questions remain unanswered, and the details have been withheld.

The modelling choices and assumptions made mean that current traffic levels have been severely understated. The result is that forecast traffic levels resulting from the plan are far less likely to indicate levels of congestion requiring roads infrastructure development, and the current infrastructure development plan is just the tip of the iceberg of what would actually be needed. The Council Executive seems willing to plunge Guildford Borough into traffic chaos in pursuit of population growth, rather than face up to reality and apply a traffic constraint.

I note the criticisms raised by Highways England in their representations dated 18 July 2016 and find it extraordinary that GBC were prepared to rely on a high-level strategic model that did not even allow for back-blocking. Any resident of Guildford will be aware of the back-blocking issues that arise in the town.

Highways England is only concerned with the Strategic Road Network and the impacts on the Local Road Network should be a concern for SCC. However, as SCC carried out the modelling exercise it seems clear that, between them, GBC and SCC have no interest in identifying the real roads infrastructure needs that would arise from this aggressive growth plan.

It is not sufficient to say that detailed work on traffic impacts will take place as part of a planning application. Green Belt land will have been released for development, for no good reason other than to remove planning constraints, before viability has been demonstrated. Furthermore the transport assessments carried out by developers are not independent and are aimed at seeking approval. I doubt the ability and willingness of GBC and Surrey Highways to scrutinise them with sufficient diligence.

There was no mandate to carry out a Green Belt and Countryside Study and it is seriously flawed since it suggests the release of Green Belt land without providing genuine justification.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 2: Legal Compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)
I am not a member of the legal profession but I consider that much of the proposed plan should fail under legal challenge.

The consultation for the 2016 draft local plan was poorly executed. When the comments were published many of mine were missing (later found under a different name whose own comments had been excluded). I answered “Yes” to the question concerning interest in participation at the examination. This was recorded as “No”.

When I raised these points the errors were gradually corrected but, the last time I checked, there were still issues with the way in which some of my comments had been recorded with words left out or incomplete.

It is not clear how many errors exist for other respondents but the majority may not have checked that their views have been recorded correctly.

There has been a lack of transparency, lack of scrutiny, and failure to act on errors pointed out by residents and consultees. The GBC Executive has undermined confidence in local democracy and the planning system.

The housing number is overstated, constraints have not been applied, and various parts of the evidence are unsound. I do not consider the plan to be justified.

The plan will create major problems in the future without solving local social housing needs or achieving affordability for those who currently live and work in the Borough. The continued use of appeals as a monitoring indicator will encourage the Planning Committee to allow applications rather than run the risk of losing an appeal. This is a particular concern given the recent changes to the structure of the Planning Committee.

In my opinion the plan goes against national policy in failing to apply (or even to recognise) constraints with regard to Green Belt and infrastructure.

I reserve my right to participate at the examination.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I OBJECT to GBC withholding from residents their consultant's and sub-consultant's calculations of housing need, which is what is driving this whole issue. It would appear that even some individual councillors are not privy to the calculations or how the total has been reached but are blindly accepting a figure produced without workings or explanation. There are strong grounds for believing that GBC, aided and abetted by their consultants, have overstated by a wide margin what the figure should be. There are also grounds for believing that the numbers have been exaggerated as a result of pressure from developers. As the grabbing of Green Belt land is predicated on the need for a particular number of houses, a good starting point would have been to get the number right and to show transparently how it was reached.

Other submissions will provide supporting statistics and there are authoritative figures online to show the escalation of housing need in Guildford Borough has been about 5% per year for the last ten years. The draft plan provides no proper data which proves that it is increasing significantly more at the moment or that in future years it will rise by so much more. Guildford's projected number in the last draft local plan was challenged by the Office of National Statistics which is a more reliable source since it is not driven by developers. Since the current set of figures was published other underlying data has changed; for example it was too late to take into account the effects on housing demand of changes to the population which could arise from Brexit. Nor has GBC applied the normal constraints to their maximum projections. For a proper professional assessment of housing numbers I refer the reader to the submission from Andrew Procter on behalf of the Save Send Action group.

Applied specifically to Send, although it is the largest village in the borough it should not have to take a significantly higher proportion of new houses than the borough. It should also not have to take a significantly higher proportion of new houses on account of its current size which arises as a result of a disproportionate volume of housing previously being located in Send, Send Marsh and Burnt Common. When the Wimpy Estate of several hundred houses (Linden Road, Maple Road and all adjacent "tree" roads) was built in Send some 40 or more years ago it represented a massive increase in the size of Send Marsh which increase at the time was disproportionate to the size of the village and its amenities. A further massive increase now, which relates numbers proposed to numbers existing, compounds the offence. It would be more equitable to say that as Send accepted a very large number previously, it should not be expected to do so again.
The housing number calculations also have to take into account the constraints, in particular those resulting from the Green Belt. Therefore, I repeat the points made in paragraph 11 above which cannot be over emphasised. The NPPF states that in their local plans local authorities are required to meet objectively assessed housing needs “as far as is consistent with the policies set out in this Framework”. The policies referred to include Section 9 - Protection of the Green Belt. The Court of Appeal has clarified the interpretation of this by stating categorically that there may be nothing very special about a housing shortfall in an area, which has very little undeveloped land outside the Green Belt.

The key question is not “is there a shortfall in housing land supply?” You have to ask “have special circumstances been demonstrated to outweigh the Green Belt objection?” And such circumstances are not demonstrated simply because there is a less than five year supply of housing land. Special circumstances will not exist unless the potential harm to the Green Belt is clearly outweighed by other considerations. Given the large amount of Green Belt in Guildford Borough, the council can legitimately argue that it does not have to match the housing targets of boroughs with less Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Wisley Airfield, which is classified as a brownfield site on a spurious technicality when everybody can see that it is not what is understood by brownfield, being included in the Local Plan as a development site for 2000 houses when Guildford Planning Committee have just refused the planning application relating to it. Either the left hand does not know what the right hand is doing or this is a devious diversion. I object for all the reasons identified by GBC Planning Committee when it rejected the application.

I OBJECT to building 2000 houses at what GBC calls Wisley but is actually at Ockham, because it would massively and detrimentally overwhelm Ockham village, East and West Horsley and the entire neighbouring area. The proposal is ill conceived, showing scant regard for the Green Belt, infrastructure requirements, transport, or pollution and lacking nearly all the evidence that is needed to show that such a development would be sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the building of 45 houses on the Clockbarn site in Send (ref A42) which is designated as agricultural land within the Green Belt. The fact that it has been allowed to deteriorate should not be a passport to changing its status. It is not suitable because it has poor access and the road cannot take the additional vehicular traffic which 45 houses would generate.

I OBJECT to the Building of 45 houses on Clockbarn because the road already suffers from serious overload, as previously accepted by Surrey County Council. An additional 45 houses would increase the number of dwellings in Tannery Lane by nearly 400% because planning permission already exists for 63 apartments at the Tannery business centre site under reference 14/P/00575 and 00576 as amended. It is disingenuous for GBC to express the belief that these may not be built. GBC gave permission and the owner has the right and locally it is understood the intention of building them. Indeed work has commenced. Added to this would be the traffic generated by building and servicing the new narrow boat basin or “marina” under reference 14/P/00289. The road cannot cope with the traffic volume it currently has and could not possibly accommodate the massive increase in vehicular traffic consequent on these three developments. In simple terms if the number of dwellings increased by 400% so would the volume of domestic traffic in addition to an increase in commercial traffic. This does not bear thinking about.
I OBJECT to the building of 45 houses on Clockbarn because this massive increase in traffic would severely impact the junction of Tannery Lane and Send Road where there is a problem every day because of poor visibility for traffic emerging from the side road causing danger and congestion to traffic on the main road. The suggestion that this would be alleviated by traffic lights is completely wrong as the installation of temporary traffic lights in Send Road earlier this month demonstrated. When traffic has to stop in either direction, as it does for traffic lights, Send Road quickly gets gridlocked.

I OBJECT to the building of 45 houses on Clockbarn because it fails to take into account the cumulative impact on traffic volumes in the rest of Tannery Lane. Tannery Lane is very narrow, twisty and dangerous for its entire length. Much of it is single track with passing places and blind spots. There is a problem all the way down with vehicles trying to pass each other. When they meet they very often have to reverse in order to find a passing place. The problem is exacerbated by the high proportion of HGVs and large commercial vehicles currently going to the business centre, and destined to increase when the narrow boat basin is built. Tannery Lane is also very long. The biggest problem, which is often overlooked because planners fail to go there, is the stretch beyond the business centre going north. The final stretch of Tannery Lane before it joins Polesden Lane is only 9 feet wide for a distance of nearly 400 metres and cannot be made wider because of the nature reserve. A significant proportion of the traffic, estimated at about one third, enters Tannery Lane via Polesden Lane or Papercourt Lane which are themselves extremely narrow, especially Papercourt where some of the front garden boundaries on either side of the road are within little more than three metres of each other. There is also the extremely dangerous blind bend to the right when joining Newark Lane. These lanes were not meant for the high number of cars, vans and lorries which currently use them and could not possibly cope with an increase of the amount which would follow from this development, on top of the others.

The suggestion sometimes made that Tannery Lane could be widened totally fails to appreciate the constraints which exist. Any attempt to widen it would be defeated by the fact that the entrance from Send Road does not provide space for any significant widening; the Papercourt Lane exit is so narrow that front gardens on both sides of the lane would have to be compulsorily purchased; the stretch from Prews Farm Cottages to Papercourt Farm runs immediately alongside Papercourt Marshes so there is no scope for widening and in any event further traffic would damage Papercourt Marshes; the stretch from Papercourt Farm to the junction with Polesden Lane is single track nine feet wide which also runs alongside Papercourt Marshes. In any event a widening of Tannery and Papercourt by itself would be insufficient - because of the bends it would need to be straightened as well, a hugely expensive and well-nigh impossible task. In the whole of the Borough of Guildford, if one set out to find somewhere to build houses, Tannery Lane would be close to the bottom of the list of potential sites from the point of view of road access.

I OBJECT to the building of 45 houses on Clockbarn because there are virtually no pavements. The increase in traffic would therefore mean that pedestrians would face much greater risk. The only surfaced pavement in Tannery Lane is the first short section from Send Road confined to the north side. The other side is unsurfaced. After Peasblossom Cottage (about 80 metres from the junction with Send Road) there are no further pavements on either side for its entirety. Pedestrians walk in the road and have to dodge the traffic as best they can.

In addition to vehicular traffic it is used by residents and their visitors on foot: residents from Send Road and adjacent roads walking their dogs; walking groups and ramblers (on their way to Newark Priory, Ockham Mill and the Pyrford Water Meadows); equestrians; sports and recreational cyclists (because it is in the guide books as part of the cycling network based on Ripley); and anglers who fish in the Wey Navigation. It is therefore enjoyed by a lot of people whose safety should not be further jeopardised, and for whom a village amenity should not be ruined completely, by increasing any more the excessive number of vehicles the road already has to cope with.

Tannery Lane is an ancient rural road which is rich in wildlife which should not be damaged by pollution caused by increased traffic volumes. Clockbarn itself is a nesting habitat for bats which are a protected species, making it not only unsuitable to build there but a criminal offence to do so. Additional traffic pollution and noise alongside Papercourt Marshes will be detrimental to wildlife there too.

I OBJECT to building 45 houses at Clockbarn because all the land in that area is prone to flooding. Although the Environment Agency maps include the area in flood zone 1 the reality is different, as a great deal of photographic evidence and local testimony can show.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. I OBJECT to 400 houses and 7000 sq metres of industrial space at Garlick's Arch being brought forward as a last minute proposal without any warning and without it having been mentioned at all in the earlier Draft Local This attempt to push it through under Regulation 19 instead of Regulation 18 and thereby deny residents a proper process of consultation is a further manifestation of the contempt in which Guildford Councillors hold the electorate. This is a clear breach of administrative law.

2. I OBJECT to building 400 houses and 7000 sq metres of industrial space at Garlick's Arch because the site includes ancient woodland, too valuable to The site floods as photographic evidence and local testimony can confirm as a result of the East Clandon stream overflowing and surface water being trapped.

3. I OBJECT to building 400 houses and 7000 sq metres of industrial space at Garlicks’ Arch since this would increase the number of dwellings in Send (including Send Marsh and Burnt Common) by about 25% without a commensurate increase in services and infrastructure. There is already severe pressure on doctors surgeries, school places and other essential facilities which would seriously worsen. Infrastructure issues are substantially the responsibility of Surrey County Council but there is no evidence that SCC has formulated an infrastructure plan, or the means by which the infrastructure would be paid for, in respect of this site or any other site. What we were told at one public meeting, that the council thinks about infrastructure afterwards, is typical of a woefully inadequate approach to the whole Local Plan.

4. I OBJECT to 7000 sq metres of industrial space at Garlick's Arch because the space is not needed since there is inadequate take up of existing space in the area, but if it were needed it would make very much more sense to locate it at In any event Garlick's Arch is an unsuitable location for industrial space given the proximity of existing houses.

5. I OBJECT to a new interchange with the A3 at Burnt Common because Send would have to take traffic from the proposed 2000 houses at Wisley Airfield, 2000 at Gosden Hill and 1850 at Blackwell Farm as well as 485 from Send itself. This is in addition to what it takes at the moment. Much of this traffic to and fro the A3, M25, Woking and Guildford would go through Send. Send Road, which is already overloaded, would face gridlock. This would exacerbate noise and pollution levels which are already excessive and is wholly unacceptable.

6. I OBJECT to the new interchange with the A3 at Burnt Common because it is being presented as a way of facilitating the movement of a massive increase in vehicles whereas in reality it would cause havoc on the A247 and the many feeder roads in Ripley and Clandon in addition to Send.

7. I OBJECT to the fact that Guildford Councillors approved the Local Plan before the Transport Assessment had even been published which indicates what scant regard they had for the traffic implications which are at the forefront of residents’ They have to contend with the problem every day in terms of delays, pollution and noise which are already destroying our villages as decent places in which to live.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to the development of 40 houses and 2 travellers’ pitches on Send Hill because the location is unsuitable. The subsoil of the proposed site contains unsafe landfill waste dating back to the 1960s when it was shown on Ordnance Survey maps as “refuse and slag heap”. The date of the landfill pre-dates the EU Landfill Regulations in 1999 but it was registered at GBC from 2005 onwards. Any disturbance could be a health hazard due to unknown substances which are also described as “unrestricted”. It would be dangerous to local residents for this hazardous waste to be disturbed. The site should, therefore, never have been brought forward for consideration. It would definitely not be sufficient to “condition” it as GBC is prone to doing.

I OBJECT to the proposed development at Send Hill since it does not appear to be in accordance with The Government’s 2015 guidelines on traveller sites. GBC’s Traveller Accommodation Assessment of 2012 is acknowledged in their 2016 Sustainability Appraisal as being out of date which has resulted in an over allocation of traveller sites. GBC needed to re-examine its evidence base before coming forward with this proposal in the Local Plan. It seriously failed in its duty of care by not doing so.

I OBJECT to the proposed development at Send Hill because it is on a narrow country road with inadequate on road parking, it is in the Green Belt, near a nature reserve and an amenity area of beautiful countryside. It is an unsuitable location which has been introduced into the Local Plan at the last minute without first doing proper research on the history and characteristics of the site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to the Local Plan because it seeks to build on Green Belt land unnecessarily. The work of Professor Anne Power at the London School of Economics, amongst much other expert research, clearly demonstrates that there is more than sufficient land to build all the houses that are needed without taking any of the Green Belt. In our area several studies show that unused brownfield sites in Guildford Town itself are capable of yielding most of the required land. GBC has not properly explored the capacity which is available there or on brownfield sites elsewhere in the borough, which would have provided a sensible starting point since GBC own many of them.

I OBJECT to the Local Plan in that GBC’s approach to the Green Belt introduces a concept of grading its quality. This is an alien concept, not recognised in law. Of course some Green Belt is seen to be better than other Green Belt but the law does
not make any distinction, nor should it. It depends who is looking at it and from what standpoint they are looking. Green Belt is Green Belt and it is not for GBC to stand in judgement on what bits it thinks are worth keeping and what are not.

I OBJECT to proponents of the plan representing those against it as “nimby’s”. Those against are not against building houses. They recognise the need for them. They are against building them in unsuitable, unthought out locations which damage existing amenities. This relates particularly to building them on Green Belt land, thereby destroying an existing amenity, when it is not necessary to do so.

I OBJECT to the Local Plan because it seeks to promote sites for houses with woefully inadequate attention being paid to the infrastructure to support those sites. Without proper infrastructure none of the identified sites will deliver what is claimed for them. No detailed thought has been given to the form of the infrastructure required, still less to how much it would cost and, it would appear, none at all to where the money for it would come from.

I OBJECT to removing Send and other villages from the Green Belt. The Green Belt was intended to be permanent, and its permanence was enshrined in law through the National Planning Policy Framework, reinforced by the NPPG and a succession of Ministerial guidance statements. For all of this to be overridden requires “special circumstances” which do not exist in the case of Send.

I OBJECT to all four proposed sites in Send because they are all in the Green Belt and not one of them displays the very special circumstances which would be needed in order to outweigh the substantial harm caused by reason of inappropriateness. There is abundant legal authority but I would cite the Court of Appeal cases of City of St Albans v Hunstan Properties and Gallagher Homes v Solihull Metropolitan Council. These precedents, which have been ignored by Guildford Council before, show that it is necessary to demonstrate that harm to the community at large, by taking the Green Belt, would be less than if it was not taken. The crucial words are “to the community at large”. Paragraph 47(1) of the NPPF advises local authorities “to ensure that their local plans meet the full, objectively obsessed, needs for markets and affordable housing in the housing market area as far as is consistent with the policies set out in this framework”. As the Court of Appeal has made clear one cannot rely on objectively assessed needs without having regard to the policy constraints. The qualification in this clause “as far as is consistent with” is not qualifying housing need; it is qualifying the extent to which the local plan should go to meet those needs. It is quite clear from the precedents that exceptional circumstances will not exist unless the potential harm to the Green Belt has been shown to be clearly outweighed by other considerations. In other words harm to the Green Belt is included in the factors which the NPPF requires to be taken into account.

The NPPF further states that in their local plans local authorities are required to meet objectively assessed housing needs “as far as is consistent with the policies set out in this Framework”. The policies referred to include Section 9 - Protection of the Green Belt. The Court of Appeal has clarified the interpretation of this by stating categorically that there may be nothing very special about a housing shortfall in an area which has very little undeveloped land outside the Green Belt.

The key question is not “is there a shortfall in housing land supply?” You have to ask “have special circumstances been demonstrated to outweigh the Green Belt objection?” And such circumstances are not demonstrated simply because there is a less than five year supply of housing land. Special circumstances will not exist unless the potential harm to the Green Belt is clearly outweighed by other considerations. The draft plan has not begun to demonstrate that there are exceptional circumstances and indeed offers very little to suggest that the authors have even read what the Court of Appeal has said about the provisions in the NPPF.

It is noted that the Court of Appeal precedents have been ignored before by GBC, which appears to regard itself as over and above the law. GBC seems willing to expend residents’ funds on counsel’s advice, in support of what its client developers want to do, but cannot bring itself to get a QC’s opinion in order to guide it on understanding the case law that actually exists, which manifestly it does not understand.

Given the large amount of Green Belt in Guildford Borough, the council can legitimately argue that it does not have to match the housing targets of boroughs with less Green Belt. But if Guildford wants to match the housing target which would apply if it was not constrained by the Green Belt, it can still do so using brownfield land which is in plentiful supply. It is difficult to avoid the conclusion that it has not taken either of these legitimate routes because it finds the allure of developers’ propositions on green field sites more attractive. GBC should also note that the Green Belt was created not just for the benefit of local residents. It came to be known as the Metropolitan Green Belt because it was intended to be of
benefit to a much wider range of people, especially Londoners visiting open spaces outside but near to London. It is beyond the remit of GBC to arrogate to itself the power to override Parliament’s intention.

I OBJECT to any sort of diminution of Send’s Green Belt because it provides an essential buffer stopping Woking and Guildford becoming one conurbation. It has served this purpose effectively since its inception and should continue doing so for the benefit of subsequent generations living here. No group of councillors, especially without a mandate, has the authority to impose a different future on residents.

I OBJECT to any reduction in Send’s Green Belt because so much land in Send provides the setting for the beautiful Wey Navigation corridor, which is a conservation area that enhances biodiversity, is visually important, provides a valuable leisure facility and combined with the surrounding lakes an exceptional habitat for a wide range of bird species and other wildlife.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to GBC withholding from residents their consultant’s and sub-consultant’s calculations of housing need, which is what is driving this whole issue. It would appear that even some individual councillors are not privy to the calculations or how the total has been reached but are blindly accepting a figure produced without workings or explanation. There are strong grounds for believing that GBC, aided and abetted by their consultants, have overstated by a wide margin what the figure should be. There are also grounds for believing that the numbers have been exaggerated as a result of pressure from developers. As the grabbing of Green Belt land is predicated on the need for a particular number of houses, a good starting point would have been to get the number right and to show transparently how it was reached.

Other submissions will provide supporting statistics and there are authoritative figures online to show the escalation of housing need in Guildford Borough has been about 0.5% per year for the last ten years. The draft plan provides no proper data which proves that it is increasing significantly more at the moment or that in future years it will rise by so much more. Guildford’s projected number in the last draft local plan was challenged by the Office of National Statistics which is a more reliable source since it is not driven by developers. Since the current set of figures was published other underlying data has changed; for example it was too late to take into account the effects on housing demand of changes to the population which could arise from Brexit. Nor has GBC applied the normal constraints to their maximum projections. For a proper professional assessment of housing numbers I refer the reader to the submission from Andrew Procter on behalf of the Save Send Action group.

I OBJECT to the combined total of 2000 (Wisley) + 485 (Send) + 2000 (Gosden Hill) + 1850 (Blackwell Farm) houses all alongside a short stretch of the A3 between the M25 and the university. To concentrate 6335 of the borough’s assessed need for housing of 13860, that is close to half of it, in such a small area of the borough is by any standards unreasonable. If GBC wants to build this number of houses, which has more to do with developer pressure than properly calculated need, it should spread them more evenly throughout the borough, which it is manifestly failing to do. This would help to alleviate excessive traffic congestion and pollution which is a certain consequence of GBC’s current proposals.
Applied specifically to Send, although it is the largest village in the borough it should not have to take a significantly higher proportion of new houses than the borough overall. It should also not have to take a significantly higher proportion of new houses on account of its current size which arises as a result of a disproportionate volume of housing previously being located in Send, Send Marsh and Burnt Common. When the Wimpy Estate of several hundred houses (Linden Road, Maple Road and all adjacent “tree” roads) was built in Send some 40 or more years ago it represented a massive increase in the size of Send Marsh which increase at the time was disproportionate to the size of the village and its amenities. A further massive increase now, which relates numbers proposed to numbers existing, compounds the offence. It would be more equitable to say that as Send accepted a very large number previously, it should not be expected to do so again.

The housing number calculations also have to take into account the constraints, in particular those resulting from the Green Belt. I therefore repeat the points made in paragraph 11 above which cannot be over emphasised. The NPPF states that in their local plans local authorities are required to meet objectively assessed housing needs “as far as is consistent with the policies set out in this Framework”. The policies referred to include Section 9 - Protection of the Green Belt. The Court of Appeal has clarified the interpretation of this by stating categorically that there may be nothing very special about a housing shortfall in an area which has very little undeveloped land outside the Green Belt.

The key question is not “is there a shortfall in housing land supply?” You have to ask “have special circumstances been demonstrated to outweigh the Green Belt objection?” And such circumstances are not demonstrated simply because there is a less than five year supply of housing land. Special circumstances will not exist unless the potential harm to the Green Belt is clearly outweighed by other considerations. Given the large amount of Green Belt in Guildford Borough, the council can legitimately argue that it does not have to match the housing targets of boroughs with less Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Local Plan because Guildford Borough Council (GBC) has no mandate to destroy areas of the Green. The overwhelming majority of Guildford Councillors who voted for the Local Plan reneged on specific promises they made when seeking election to preserve the Green Belt. Conservative Councillors stood in the name of the Conservative Party whose official policy was and still is to preserve the Green Belt. This policy has been reaffirmed regularly. Guildford Councillors are therefore acting both unethically and ultra vires.

1. I OBJECT to the Local Plan because it does not reflect "localism" or "local decision making". It begs the question why any self-respecting councillor would choose to vote for the Plan, still less support it through public statements, when they know full well that they are not representing the wishes or expectations of electors who put them into office, that is local. It is a dereliction of democratic duty to squander hundreds of thousands of pounds of residents’ money on such an ill conceived project which runs manifestly contrary to local opinion. Every councillor who voted for it should be considering their position and answerable for the money they have wasted.

1. I OBJECT to the Local Plan on procedural Two of the sites in Send, Garlicks's Arch and Send Hill, were not variations based on the earlier draft plan but completely new sites. Both should therefore have enjoyed a full new consultation under Regulation 18. This opportunity has been denied residents. In the case of Garlick’s Arch, which is a very large site, this was introduced into the Local Plan absolutely at the last minute. GBC effectively
sprung a surprise on everybody by producing it out of a hat having given no indication, as late as two weeks before publication, that it was even being considered. This quite definitely needed to go to a full Regulation 18 public consultation and GBC is in breach of administrative law in failing to do so.

1. I OBJECT to the Local Plan because on so many issues the evidence base is questionable, defective, or totally The many examples of this are set out in great detail in the submission from Andrew Procter on behalf of the Save Send Action Group to which the reader is referred.

</table>
1.1 This is an objection under Regulation 19 to the Guildford Borough Council (GBC) Draft Local Plan 2017. I specifically request that my earlier objections to the 2014 and 2016 versions of the plan are also submitted to the Inspector. The change in reference numbers and the fact that sites have been brought in and taken out of the plan and then brought in again has caused unnecessary confusion. But the substance of earlier objections still applies even though in some cases to sites are now referred to differently, both by name, reference number and specification. The earlier objections remain relevant.

1.2 I would like an acknowledgement from GBC please confirming that the whole of this submission and my ones in 2016 and 2014 will be submitted to the Inspector.

Green Belt Policy 2 at paragraph 4.3.15 Send Business Park

2.1 I object to the proposal to inset Send Business Park from the Green Belt without any evidence being offered to justify it. Send Business Park is for historical reasons in an inappropriate location even for its existing operation and totally unsuited to become a “strategic employment site” as opposed to a “locally significant employment site”. It is an old non-conforming user in a Green Belt location adjacent to the beautiful Wey navigation, which is a conservation area. Any further development there is inappropriate and will detract from the openness of the Green Belt.

2.2 Although this proposal was included as part of site 67 in the 2014 draft plan, it was removed in 2016 following representations. It has now been put back in, which is a good example of why earlier objections are highly relevant and must be included in the material received by the Inspector. Since it was removed last year because it was considered to be in an area of high Green Belt sensitivity, it is difficult to fathom why, a year later, it is not regarded as being Green Belt sensitive at all.

2.3 I specifically object to the undeveloped field (currently separating the end unit at Send Business Park and the Narrowboat Basin Site currently under development) from losing its Green Belt status. Despite action over the last few years which has made it look steadily more derelict, by parking old vehicles on it and leaving them there for months, that Green Belt field still affords views over the Wey Navigation and the countryside beyond. The openness of the Green Belt would be severely damaged by further development on this site. It has also been noted by a frequent walker that over the last two years the car park has been stealthily increasing in size at the expense of another field. Such encroachment without planning permission is to be deprecated.

2.4 The site lacks adequate access for a strategic employment site because Tannery Lane is very narrow, twisty and dangerous, in parts single track and completely unsuited to commercial and industrial traffic. Given that there are many potential employment sites in Guildford Borough with good access it is to say the least perverse to try to promote one which in so many respects is manifestly unsuitable.

2.5 The Employment Land Needs Assessment 2015 recognised that Send Business Park has poor access for traffic and public transport and other serious shortcomings for an employment site. The volte-face shown in the 2017 ELNA, where without explanation completely opposite conclusions are reached, requires some explanation. Given that neither the site nor the attendant infrastructure has changed in that period how can “very poor access to public transport suddenly become “good” access to public transport when the available public transport has not changed?

Clockbarn Nursery, Tannery Lane, Policy A42

3.1 I object to the Policy 42 change at Clockbarn Nursery in Tannery Lane. It is regrettable that notwithstanding the hundreds of representations explaining to GBC why this site was unsuitable for 45 houses, they have chosen to increase the number by one third to 60 houses. All the reasons previously advanced against 45 are still relevant only more so. Building 60 houses would exacerbate even more than 45 the extremely dangerous road junction where Tannery Lane joins the A247 Send Road. The road is narrow, there are no pavements beyond the first 100 or so metres and pedestrians, cyclists and country ramblers are currently at considerable risk. Increasing the concentration of houses and therefore of cars would be contrary to common sense.

3.2 I object to 60 houses because it would erode the Green Belt in Send village even more than 45. Clockbarn is within sight of the conservation area of the Wey Navigation and no exceptional circumstances have been shown. Before Green Belt land is used for housing it is necessary to show that exceptional circumstances exist. As a series of Court of Appeal cases have shown it has to be demonstrated that the harm to the community at large by taking Green Belt for housing would be less than if it were not taken. The crucial words, which the last version of the local plan ignored and this one continues...
to ignore, are “to the community at large”. As the Court of Appeal has pointed out one cannot rely on objectively assessed needs for housing without at the same time having regard to the policy restraints. Exceptional circumstances will not exist unless the potential harm to the Green Belt has been shown to be outweighed by other considerations. Harm to the Green Belt is one of the factors which the NPPF requires to be taken into account.

3.3 I object to the building of 60 houses on this site because of the presence of common and soprano pipistrelle bats all over the site and their roosts on the adjacent plot. This would be in danger of breaching the Wildlife and Countryside Act 1981 (Section 5), the Conservation of Habitats and Species Regulations 2010 (Schedule 2)

3.4 The site is full of other wild life too including some rare birds. Since it is within 5 km of the Thames Basin Heaths Special Protection Area development on this site could be contrary to Guildford Council’s own SPA Avoidance Strategy. As such it should not be included in the local plan.

3.5 The NPPF makes it clear that “the planning system should contribute to and enhance the natural and local environment by… minimising impacts on biodiversity and providing net gains in biodiversity where possible” (Para 109).

Since this objective will be virtually impossible to realise on this site it should not be included in the local plan.

3.6 GBC must be aware that the recent Surrey Wildlife Survey of flora and fauna showed that Surrey has suffered a very much higher rate of loss in species than the UK as a whole – 12% as compared to a national loss of 2%. Of a total of 404 priority species almost 31% are already locally extinct in Surrey while 37% are threatened or in worrying decline. When considering developments GBC should have regard to their obligations in this direction. If they are prepared to ignore them they should be asking themselves whether they are acting responsibly.

3.7 We are asked under Regulation 19 to restrict our comments to changes in the local plan. My objection to 60 houses should not be interpreted as an acceptance of 45. As made clear in 2016 my objection is to any houses at all on what I consider to be an unsuitable site. So my comments this time should be read in conjunction with what I said in 2016 and 2014.

Objections relating to both Send Business Park, Green Belt Policy 2 at paragraph 4.3.15 and Clockbarn Nursery, Policy A42.

4.1 I object to both developments on the grounds of susceptibility to surface flooding. There is considerable surface water flooding risk in Tannery Lane, as residents know only too well from their experience almost every year. It does not appear from their evidence base that GBC has explored this adequately in the same way as they did not do so in respect of last year’s narrowboat basin application to which they could usefully refer. GBC’s level 2 Strategic Flood Risk Assessment 2016 makes no reference to Tannery Lane at all. It may be that they are relying on wet spots data from Surrey County Council but this is known to be inadequate. Primary sources, such as Envirocheck, whose work is based on the British Geographical Survey Flood Data, show ground water at 0.4 metres below ground level on the bend in the road near Maybankes. This is at the eastern corner of the Clockbarn site.

4.2 Local testimony asserts that some of the buildings at Send Business Park suffer from ground water flooding affecting their foundations which appears to be exacerbated by proximity to the Wey Navigation. This makes the site unstable and unsuitable for further development.

4.3 GBC’s Strategic Flood Risk Assessment needs updating. The aggregate effect on flood risk of the Narrowboat Basin, plus Clockbarn plus Send Business Park would contravene paragraph 100 of the NPPF, that inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk. At the very least all sources of flooding need to be correctly assessed which GBC has not done.

4.4 There is no recognition of the impact of these developments on sewage facilities which are already at full capacity.

Land at Garlick’s Arch, Send Marsh Policy A43

Now 6 travelling show people plots in addition to 400 houses
5.1 I object because there is no proven demand for travelling show people plots in this location and GBC has produced no tangible evidence to support their claim that there is. Such a site needs to have parking and turning for lorries and trailers, a service and cleaning area, on site storage and accommodation for show people and their families. Access for this from Kiln Lane or Burnt Common Lane would be very difficult, if not impossible.

5.2 By objecting to this, which I am permitted to do under Regulation 19, I am not implying that I prefer what was proposed before. I do not favour any development at Garlick’s Arch for all the reasons given.

5.3 I object to the policy change at Garlicks’ Arch which now includes some custom and self-build accommodation because:

5.4 The site is contaminated by lead shot which cannot easily be cleaned up because it has accumulated over 50 years

5.5 It is subject to frequent flooding (for which photographic evidence can be provided) and is in flood zone 2 making it an unsafe and unsuitable site choice.

5.6 It ignores the thousands of objections made previously to the previous proposals.

5.7 It is permanent Green Belt Land and no exceptional circumstances have been demonstrated.

5.8 It would destroy ancient woodland dating back to the time of Elizabeth 1

5.9 The site is not near any public transport so residents would be obliged to rely on their cars.

5.10 There are six rural businesses currently on the site and I object to the destruction of rural employment which would result from GBC’s proposals.

5.11 It passes belief that in the whole of Guildford Borough this inaccessible, contaminated, ancient woodland site in the Green Belt, largely unserved by public transport, is the best location that can be found for houses and travelling show people plots.

**Land at Burnt Common, London Road, Policy A58**

Now a new allocation for a minimum of 7000 sq metres of industrial or warehousing

6.1 The 2016 draft plan referred to a “maximum” of 7000 sq metres. This has been quietly changed to “minimum” in a period when the demand trend for industrial land has declined. This is serious over-provision.

6.2 It makes no sense to put industrial and/or warehouse development in the middle of the Green Belt when Slyfield Industrial Estate in Guildford still has plenty of unused capacity.

6.3 The potential inclusion of a waste management facility mentioned at paragraph 4.423a lacks enough detail for proper consultation but would appear to be completely inappropriate.

6.4 There can be no sensible basis for allocating almost 10 hectares of industrial and warehouse facilities in a small village like Send when the latest ELNA 2017 shows only 3.9 hectares are required for the whole borough. This can only be interpreted as a serious over concentration in one unsuitable place for which there has been no declared explanation.

**Objections relating to both Garlick’s Arch A43 and Burnt Common A58**

7.1 I object to both of these proposals separately but also to their combined effect.

7.2 They will join up Ripley and Send destroying the purpose of the Green Belt.

7.3 They will increase the totality of residential and commercial traffic on the small roads in our villages very substantially. It needs to be appreciated that the main road A247 is absolutely at capacity already and these developments added to those proposed at all the other sites in neighbouring villages will hugely impact on the traffic on Send Road, and also on side..
roads as people make attempts to avoid traffic gridlock on their way, for example, to Woking Station. A very much more
detailed analysis is needed of the traffic impact because the A247 at Send is the one place where nearly all of it will
converge.

7.4 Roads are but one of the infrastructure implications which the combined impact of all these developments will have.
Others are covered in my 2016 objection.

Conclusions

8.1 In aggregate the above proposals combined with the ones we are not allowed to comment about, amount to excessive
over-development in a small village.

8.2 I object to the mechanics of Regulation 19, restricting comments to new proposals only, as it is being applied by GBC.
In the context of GBC’s proposals, where site allocations have been changed and then changed back again, sometimes at
the last minute, there is a risk, of which GBC cannot be unaware, that an objection may be interpreted as a preference for
what was proposed before. It is almost as if some of the changes have been designed to garner positive feedback and skew
the numbers. The Inspector will no doubt be alert to this risk.

8.3 The proposals as they stand are intended to be a draft local plan for the whole of Guildford Borough. It is very
disconcerting therefore that somewhere around 40% of the development is contained within a geographical area of about
11% of the borough, all within less than five miles of Send village.

8.4 It is also disconcerting that in addition to the 8 travelling show people plots, Send has also been allocated 2 traveller
pitches, the only village in this position.

8.5 This looks like unjustified, unfair and unreasonable concentration in one area to the benefit of other areas which are
escaping almost completely. One can only speculate as to the reasons underlying this bias. The Inspector will no doubt
wish to make his own enquiries as to the reasons for the imbalance, although one does not have to look very far to find
them.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1571  Respondent: 8574369 / Douglas French  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A42 change at Clockbarn Nursery in Tannery Lane because the increase to 60 homes in place of 45
homes will overcrowd the site and result in even more traffic on Tannery Lane, which is a long, narrow and twisting lane
with few passing places and many blind corners. I do not understand why Guildford Councillors cannot see the dangers
that this poses to drivers, cyclists and pedestrians alike. The A247 junction with Tannery Lane is already a dangerous
crossroads with poor lines of sight which will become even busier.

Surface water flooding in the area is already bad, will be worsened by the concreting over of this land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Clockbarn Nursery, Tannery Lane, Policy A42

3.1 I object to the Policy 42 change at Clockbarn Nursery in Tannery Lane. It is regrettable that notwithstanding the hundreds of representations explaining to GBC why this site was unsuitable for 45 houses, they have chosen to increase the number by one third to 60 houses. All the reasons previously advanced against 45 are still relevant only more so. Building 60 houses would exacerbate even more than 45 the extremely dangerous road junction where Tannery Lane joins the A247 Send Road. The road is narrow, there are no pavements beyond the first 100 or so metres and pedestrians, cyclists and country ramblers are currently at considerable risk. Increasing the concentration of houses and therefore of cars would be contrary to common sense.

3.2 I object to 60 houses because it would erode the Green Belt in Send village even more than 45. Clockbarn is within sight of the conservation area of the Wey Navigation and no exceptional circumstances have been shown. Before Green Belt land is used for housing it is necessary to show that exceptional circumstances exist. As a series of Court of Appeal cases have shown it has to be demonstrated that the harm to the community at large by taking Green Belt for housing would be less than if it were not taken. The crucial words, which the last version of the local plan ignored and this one continues to ignore, are “to the community at large”. As the Court of Appeal has pointed out one cannot rely on objectively assessed needs for housing without at the same time having regard to the policy restraints. Exceptional circumstances will not exist unless the potential harm to the Green Belt has been shown to be outweighed by other considerations. Harm to the Green Belt is one of the factors which the NPPF requires to be taken into account.

3.3 I object to the building of 60 houses on this site because of the presence of common and soprano pipistrelle bats all over the site and their roosts on the adjacent plot. This would be in danger of breaching the Wildlife and Countryside Act 1981 (Section 5), the Conservation of Habitats and Species Regulations 2010 (Schedule 2)

3.4 The site is full of other wild life too including some rare birds. Since it is within 5 km of the Thames Basin Heaths Special Protection Area development on this site could be contrary to Guildford Council’s own SPA Avoidance Strategy. As such it should not be included in the local plan.

3.5 The NPPF makes it clear that “the planning system should contribute to and enhance the natural and local environment by… minimising impacts on biodiversity and providing net gains in biodiversity where possible” (Para 109).

Since this objective will be virtually impossible to realise on this site it should not be included in the local plan.

3.6 GBC must be aware that the recent Surrey Wildlife Survey of flora and fauna showed that Surrey has suffered a very much higher rate of loss in species than the UK as a whole – 12% as compared to a national loss of 2%. Of a total of 404
priority species almost 31% are already locally extinct in Surrey while 37% are threatened or in worrying decline. When considering developments GBC should have regard to their obligations in this direction. If they are prepared to ignore them they should be asking themselves whether they are acting responsibly.

3.7 We are asked under Regulation 19 to restrict our comments to changes in the local plan. My objection to 60 houses should not be interpreted as an acceptance of 45. As made clear in 2016 my objection is to any houses at all on what I consider to be an unsuitable site. So my comments this time should be read in conjunction with what I said in 2016 and 2014.

Objections relating to both Send Business Park, Green Belt Policy 2 at paragraph 4.3.15 and Clockbarn Nursery, Policy A42.

4.1 I object to both developments on the grounds of susceptibility to surface flooding. There is considerable surface water flooding risk in Tannery Lane, as residents know only too well from their experience almost every year. It does not appear from their evidence base that GBC has explored this adequately in the same way as they did not do so in respect of last year’s narrowboat basin application to which they could usefully refer. GBC’s level 2 Strategic Flood Risk Assessment 2016 makes no reference to Tannery Lane at all. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58 at Burnt Common because it was deleted from the 2014 draft because of the many objections made previously and there is no proven need for so much industrial development locally. This is Green Belt land and should not be used for industrial development with no proven need when there is plenty of land available at the Slyfield site. Why would anyone build industrial units in the middle of a village when other sites are available? Again this development would join up the existing villages and clog up the local roads with heavy traffic.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Burnt Common, London Road, Policy A58

Now a new allocation for a minimum of 7000 sq metres of industrial or warehousing

6.1 The 2016 draft plan referred to a “maximum” of 7000 sq metres. This has been quietly changed to “minimum” in a period when the demand trend for industrial land has declined. This is serious over-provision.

6.2 It makes no sense to put industrial and/or warehouse development in the middle of the Green Belt when Slyfield Industrial Estate in Guildford still has plenty of unused capacity.

6.3 The potential inclusion of a waste management facility mentioned at paragraph 4.423a lacks enough detail for proper consultation but would appear to be completely inappropriate.
6.4 There can be no sensible basis for allocating almost 10 hectares of industrial and warehouse facilities in a small village like Send when the latest ELNA 2017 shows only 3.9 hectares are required for the whole borough. This can only be interpreted as a serious over concentration in one unsuitable place for which there has been no declared explanation.

**Objections relating to both Garlick’s Arch A43 and Burnt Common A58**

7.1 I object to both of these proposals separately but also to their combined effect.

7.2 They will join up Ripley and Send destroying the purpose of the Green Belt.

7.3 They will increase the totality of residential and commercial traffic on the small roads in our villages very substantially. It needs to be appreciated that the main road A247 is absolutely at capacity already and these developments added to those proposed at all the other sites in neighbouring villages will hugely impact on the traffic on Send Road, and also on side roads as people make attempts to avoid traffic gridlock on their way, for example, to Woking Station. A very much more detailed analysis is needed of the traffic impact because the A247 at Send is the one place where nearly all of it will converge.

7.4 Roads are but one of the infrastructure implications which the combined impact of all these developments will have. Others are covered in my 2016 objection.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Green Belt Policy 2 at paragraph 4.3.15 Send Business Park**

2.1 I object to the proposal to inset Send Business Park from the Green Belt without any evidence being offered to justify it. Send Business Park is for historical reasons in an inappropriate location even for its existing operation and totally unsuited to become a “strategic employment site” as opposed to a “locally significant employment site”. It is an old non-conforming user in a Green Belt location adjacent to the beautiful Wey navigation, which is a conservation area. Any further development there is inappropriate and will detract from the openness of the Green Belt.

2.2 Although this proposal was included as part of site 67 in the 2014 draft plan, it was removed in 2016 following representations. It has now been put back in, which is a good example of why earlier objections are highly relevant and must be included in the material received by the Inspector. Since it was removed last year because it was considered to be in an area of high Green Belt sensitivity, it is difficult to fathom why, a year later, it is not regarded as being Green Belt sensitive at all.

2.3 I specifically object to the undeveloped field (currently separating the end unit at Send Business Park and the Narrowboat Basin Site currently under development) from losing its Green Belt status. Despite action over the last few years which has made it look steadily more derelict, by parking old vehicles on it and leaving them there for months, that Green Belt field still affords views over the Wey Navigation and the countryside beyond. The openness of the Green Belt would be severely damaged by further development on this site. It has also been noted by a frequent walker that over the
last two years the car park has been stealthily increasing in size at the expense of another field. Such encroachment without planning permission is to be deprecated.

2.4 The site lacks adequate access for a strategic employment site because Tannery Lane is very narrow, twisty and dangerous, in parts single track and completely unsuited to commercial and industrial traffic. Given that there are many potential employment sites in Guildford Borough with good access it is to say the least perverse to try to promote one which in so many respects is manifestly unsuitable.

2.5 The Employment Land Needs Assessment 2015 recognised that Send Business Park has poor access for traffic and public transport and other serious shortcomings for an employment site. The volte-face shown in the 2017 ELNA, where without explanation completely opposite conclusions are reached, requires some explanation. Given that neither the site nor the attendant infrastructure has changed in that period how can “very poor access to public transport suddenly become “good” access to public transport when the available public transport has not changed?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Conclusions

8.1 In aggregate the above proposals combined with the ones we are not allowed to comment about, amount to excessive over-development in a small village.

8.2 I object to the mechanics of Regulation 19, restricting comments to new proposals only, as it is being applied by GBC. In the context of GBC’s proposals, where site allocations have been changed and then changed back again, sometimes at the last minute, there is a risk, of which GBC cannot be unaware, that an objection may be interpreted as a preference for what was proposed before. It is almost as if some of the changes have been designed to garner positive feedback and skew the numbers. The Inspector will no doubt be alert to this risk.

8.3 The proposals as they stand are intended to be a draft local plan for the whole of Guildford Borough. It is very disconcerting therefore that somewhere around 40% of the development is contained within a geographical area of about 11% of the borough, all within less than five miles of Send village.

8.4 It is also disconcerting that in addition to the 8 travelling show people plots, Send has also been allocated 2 traveller pitches, the only village in this position.

8.5 This looks like unjustified, unfair and unreasonable concentration in one area to the benefit of other areas which are escaping almost completely. One can only speculate as to the reasons underlying this bias. The Inspector will no doubt wish to make his own enquiries as to the reasons for the imbalance, although one does not have to look very far to find them.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

A44

I wish to object on a number of grounds to the propose development identified above, as the access will be via a narrow country road which despite being unsuitable is also part of a high amenity area set in beautiful countryside which would be ruined by such a development. It is also my understanding that the area is documented as unsafe landfill. Moreover, the proposed number of houses potentially could result in many extra cars in Send Hill which is already suffering from congestion, particularly at school run time. This proposal, taken together with the many other proposals, eg Clockbarn Nursery, Burnt Common, Garlick Arch are swamping the character and identity of the village and placing far too high demands on infrastructure, schools and amenities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to an area that at present has only 0.3% of the population of GBC).

I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Appendix C: Infrastructure Schedule

SRN2 to 4 are highly relevant, but there is no detail to assess impact.

LRN1 is a major complex and untidy package of considerable significance to those of us who live near the town centre and have to cross it (there being no other way round) to go about our business. It presumably includes the consequences of whatever is decided about the "Town Centre and Hinterland Masterplan" of Allies and Morrison 2015.

Yet there is no detail. It is understood from the odd account, for example, that a major restructuring of the Gyratory is under consideration, with consequential significant or highly significant reduction in capacity --which will have a serious impact on my mobility { eg getting to my surgery or the RSCH or the M25}. I cannot accept this unseen, and would be grateful if you would take this as a formal objection to the present consultation procedure

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1476  Respondent: 8575585 / Ian Macpherson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix G: Policy and monitoring
Appendix G: Policy and Monitoring

Following the Brexit Vote and substantial changes in the UK Government, we can expect a period of national economic and political uncertainty and change, and that this will impact on Local Plan Policies. For two obvious examples, there may be a period of financial retrenchment, and funding for works from Highways England, other grants and from developers, which will curtail or delay projected works. And there may well be a slow-up in immigration (tighter controls) and in the formation of new households (normally held to be dependent on rising incomes) which will reduce or alter demand for new houses.

It would now seem essential that the Local Plan establishes space for a series of deep, and in the early years frequent, reviews to assess what this impact might be and to make any necessary changes. The papers seem uncertain about this.

A2: Guildford Cinema, Bedford Road

This is potentially a major development site of some significance, more particularly because the owner of the 'Casino' building adjacent to Bridge Street is reportedly very interested in redevelopment also. The total site - Cinema, ground level car park, 'Casino', is of some significance in itself. More importantly, it bridges between the Railway Station and The Friary, which is an entry point to the town centre as a whole. Decades ago, the then planners identified the need for a high level route from the Station to the town, removing the pedestrian problems of Bridge Street and the at-grade flights crossing of Onslow Street. The opportunity to have a high level platform of size enough to be an attraction in its own right (shops, entertainment, and the luxury hotel that Guildford so badly needs) while providing a most attractive route into town [in contrast to so many walkways], is unique and should be seized. That does not emerge here.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

A25 : Gosden Hill Farm

This is a most unfortunate proposal, presumably initiated by developers who, I have been told, has been 'banking' the land for some decades, and now taken up by GBC.

There are a number of specific issues which have been, I read, identified by the local Residents Association, such as traffic flow into town.

However the key issue for me is a Green Belt issue - the potential change in nature of the entry into Guildford along the A3.

At the moment, it is open fields, with a long view up to the North Downs, as far as the Burpham Slip Road, where a tree line provides a hard edge to the town. The A3 itself then continues south in an artificial cutting, making a sharp contrast from open countryside to the urban character of a landscaped town road. Although the details of the urbanisation of the Farm are not yet available, it is difficult to see how the long view can be retained, and Guildford not be seen as building significantly further towards London. This would seem to cut across the principles of the NPPF, in loss of valued views and in gradual coalescence [ribbon development, if you like] towards London - a marked loss of openness.

Refer - NPPF 80-3, 80-4, 88 and 109, and appeals such as - Spurstow, Tarporley, Cheshire East,- Aylestone Hill, Hereford

The fact that the A3 is a notional highway, almost of the importance of a Motorway, carrying large numbers of people, from commuters to holidaymakers and country lovers, each day, compounds the significance of this proposal. While landscape appraisal normally gives a low rating to views from cars, the number of cars is so significant here that this becomes a very high and major 'material' matter.
It would be difficult to find a place where more damage would be done to the Green Belt environment.

Answer (if comment is on questions 1-7 of the questionnaire): ()

A26: Blackwell Farm

I note and appreciate major representations from others as to Green belt and AONB. Interestingly, while there are major landscape considerations, the site is visible but not very visible from the A3 at that point, nor from a number of other likely viewpoints. It has been observed that the most significant external viewpoint is the upper wards of the RSCH.

A7 and at Guildford railway station,

This account is limp.

The major contribution to a key transport interchange appear to be the replacement of Walnut Tree river bridge. It is not entirely clear how necessary this is, since the present serves reasonably. The real problem on the route to town is the Onslow Street at-level-lights pedestrian crossing -see commentary on A2 above for resolution. Meanwhile, there is no discussion of the potential for interchange with the buses or kiss-and-ride. This is a once-for-all opportunity for serious benefit to the town, and needs positive planning.

A8: Land west of Guildford railway station

This account is limp.

At the present moment, it is understood that comparably as many people exit from this side as the main side. Yet the station facilities are grossly inadequate for the traffic. In particular - and this does touch on matters within GBC control, there is grossly insufficient space along Guildford Park Road for the service buses to pick up or drop off, the taxis to wait for the passenger numbers, and the access to different routes from the main station, this facility should be substantially enhanced, and private cars to drop off or pick up. As a result, and with the best will, Park Road is frequently obstructed. As the long term proposals for the University, Science Park, and housing developments appear likely to generate a considerable increase in traffic this needs early addressing, regardless of the issue of expansion of railway operational facilities.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy D2: Sustainable design, construction and energy

" - reasonably achievable - ".Building regulations uses the term 'reasonable' against requirements, as otherwise trouble can be caused, and it should be used here.

It would really be much more sensible and in line with Governmental thinking to aim at compliance with national legislation, Building Regulations [ and national and NH BC technical requirements as developed], and leave it there. This can be done by way of referencing such sources.

There is a sort-of 'arms race' between Local Authorities [ the 'Merton effect ' - though I understand that Merton has withdrawn from its extreme position] to demonstrate they are more 'sustainable' than their neighbours. The intention is wholly admirable. However a mass of experience is building up to show that premature or ill advised 'sustainable' works do not save the energy suggested in the original calculations and create expensive problems for the future. Solar electricity is now a well known example - the essential inverters tend to fail after about ten years [ eg through degradation of capacitors], 'spares' for that model of installation are then no longer available, and Fire Brigades are reportedly very cautious about entering to extinguish if such house do catchfire, due to the risk of roof collapse.

Another area fraught with disasters is dry lining of elderly houses.

GBC has insufficient expert scientific industry knowledge to evaluate highly technical schemes of this kind. Apart from disappointing performance, there is the side risk of GBC being sued over future failure if the works were installed as a result of formal requirement. Much better left to the Building Regulations Advisory Committee and et al, as the Government then carries the risk.

It should be noted that the Government is becoming uneasy about the over-enthusiastic application of European legislation, and we may see changes following Brexit.
I have commented to this effect in the last 2014 round of consultation, and see that no notice has been taken. Would it be helpful if I gave references to technical articles?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E1: Meeting employment needs

One unlisted locally significant employment site uses and supplements former pig rearing sheds on Manor Farm alongside the old Portsmouth Road at Artington. It has achieved its present position by stealth. It is most unsightly [fly boards and other tat along the road, as well as the unattractive hoardings on the sheds] but occupies very high amenity land - Green Belt and River Valley. Now quite inappropriate. It would be good to have it removed or reverted to agriculture or used for car parking behind trees and hedges [as the existing Artington P&R, which now is quite well hidden and so not inappropriate for its placing].

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E6: The leisure and visitor experience

Agree with the commentary. The existing hotel provision is neither sufficient in quantity or quality. There have been suggestions for a luxury hotel or hotels in the general vicinity of Bedford Road - Bridge Street. This could usefully be combined with a high level walkway -see later.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H1: Homes for all

While homes for all is a worthy objective, it would be better if it were established in the context of the sub-region. Guildford, because of its inherent attractiveness and the quality of the countryside, can conveniently establish itself as a provider of high and very high value homes. The sub-regional housing market indicators suggest that Aldershot and places west such as Alton are already providing market affordable homes for the sub-region. A step towards this is indicated elsewhere in the draft by promised improvement of the rail service from Alton and from Farnborough to Guildford. This is not explored at all, due to arbitrary limitations to the SHMA Housing Market area.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H2: Affordable Homes

The recent Government policy on affordable housing [ eg starter homes for first time buyers, and sale of Housing Association properties] is recognised by most commentators as a mess. However, there-it-is [ until amended] and this is not reflected in the commentary here, which seems to be based on previous practice. Perhaps it should be re-considered?

Viability calculations should be based on the latest SPD from Islington London Borough Council, which seems generally accepted as sensible by other LBs, and by reason of their position in the Development world have been up the forefront of the debate over viability.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Policy 11: Infrastructure and delivery

The issue of funding is supported in principle.

HOWEVER I am not at all clear how the issue of town centre infrastructure fits into this Local Plan. LRNI gives a listing of sorts, but no more.

Where is a consistent plan for the non-railway activities of the Railway Station? Surely here there should be some statement of policy related to transport interchange and its relationship with the town centre.

There is potentially a very major opportunity, more particularly because the owner of the 'Casino' building adjacent to Bridge Street is reportedly very interested in redevelopment also. The total site - Cinema, ground level car park, 'Casino: is of some significance in itself. More importantly, it bridges between the Railway Station and The Friary, which is an entry point to the town centre as a whole.

Decades ago, the then planners identified the need for a high level route from the Station Overbridge to the Friary Centre, removing the pedestrian problems of Bridge Street and the at-level-lights crossing of Onslow Street [which current leading proposals fail to do]. The opportunity to have a high level platform of size enough to be an attraction in its own right [shops, entertainment, and the luxury hotel that Guildford so badly needs] while providing a most attractive route into town [in contrast to so many walkways], is unique and should be seized. That does not emerge here.

The various proposals for the gyratory presumably will go out for consultation in another document. But it has to be said that the present favoured packages are unhelpful. The closing of Bridge Street to vehicles does nothing to tackle the Onslow Street Crossing, or open up the river, while reducing the capacity of the road system [from where I live, any journey going North, eg Woking or the M 25, will be greatly handicapped]. The same result in terms of pedestrian safety can be achieved by reducing Bridge Street to two lanes [a solution that was accidentally trialled when building work was recently undertaken], and it is uncertain why anyone should see Bridge Street [which is pretty tatty] as a prime candidate for full pedestrianisation. The visionary solution must be the high level platform!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy 12: Supporting the Department for Transport's "Road Investment Strategy"

While the M25 proposals are of some interest, the A3 proposals are in principle of central importance to Guildford, as they will unlock much. But what are they? We are told in the vaguest terms, but either proffered alternative will affect much on the ground. To not have some detail does undermine the transport section of the draft Local Plan.

Note that one particular issue that arises is Compton. This is a pretty valuable Conservation Area, but the road through has become what is in effect a 'South Guildford By-pass '-a situation that will get worse with A3 improvements. How is this to be tackled -for tackled it must be!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Policy 13: Sustainable transport for new developments

Presumably there is some threshold for some at least of the expectations set out in the list. The (legal) drafting of the policy makes the requirements absolute.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy 14: Green and blue infrastructure

I have not looked recently at the Water Framework Directive [blue infrastructure], but if it follows the normal pattern of Directives, then it is up to the member state to implement [mainly by way of national Regulation] and not directly by individuals. Revisit the drafting? In any case this will presumably be affected by Brexit?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2: Planning for the borough - our spatial development strategy

This restates the 13K new homes target, for which see below.

This section also effectively gives an expansion target for the Research Park. This commentator understands that the Research Park is a very high value contributor to the economy, and this is to be supported.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Question 1 The evidence base and submission documents

Unfortunately the evidence used is not wholly adequate, up to date or relevant. This is as much the result of recent external events as matters within GBC’s control.

The key areas are * cooperation, * housing and * transport.

* COOPERATION

Set originally for reasons stretching far back into mediaeval history, the local authority boundaries do not any longer reflect real market boundaries. The Guildford work, shopping and housing areas stretch over the County boundary into Rushmore and far beyond. For one example, the ‘market’ pool of cheap housing for Guildford is in Aldershot. The draft shows signs of discussions with Waverley and Woking but little evidence of in-depth cooperation with Rushmore and beyond - instead, Rushmore and beyond authorities are cooperating with authorities to their west, but not to the east. THE ORIGINAL 1944 SPECIFICATION FOR GREEN BELT POSTULATED THAT EXPANSION WOULD LEAP THE GREEN BELT. That is Rushmore, not Gosden Hill Farm.

* HOUSING

That the Hearne calculations for housing demand are substantially flawed appears to be a common view, now apparently visibly based on an alternative expert calculation. However, since these original calculations were attached to the Plan documents there has been the major event of ‘Brexit’. It is expected that Brexit will lead to a considerable decline in immigration from the EU, and, since criteria are likely to be tightened, of some immigration from outside the EU. Not so much of a decline as a simple look at the crude national figures, or the relevant pages in Hearne might suggest, but nevertheless a considerable decline is said to be likely. At the same time it is expected that there will be a period of economic stagnation or low growth, which will lead to a decline in the setting up of new households. So it looks as if the Hearne figures will have to be re-visited, regard less of views as to their original validity. It is understood [ verbal] that GBC has this in hand. However it would seem to be demonstrably premature to proceed to acceptance in advance of re-visited and agreed figures.

It is customary in estimating work to publish conclusions that give a mean estimate with a sub estimate of upper and lower tolerances. The Hearne tables appear largely not to do this - instead to put forward a single integer estimate refined to the last digit [ as eg 693]. This is surprising, and a word of explanation as to the level of accuracy in the head line figures would be helpful.

TRANSPORT

The sections on transport are the most difficult. They are really quite vague, promising events that are not within the ability of GBC or SCC to deliver.
The lead promise is, of course, the improvement of the A3, where all is vague as to exactly what is to be done. It is not clear how much of the road and transport system can be sorted.

But there are many other examples, improvements and changes in the bus and rail services being one.

Bus and rail services are provided at the will of the relevant operators, and a service exists only where the operator anticipates a profit or, in the case of rail, is required by central government. There are a few exceptional bus services that are subsidised, but the relevant Authorities only have very limited funds for this purpose - funds that are being cut and will probably be cut further. Moreover, it seems possible that the Senior Bus Cards will be withdrawn or severely limited, which will reduce the profitability of the existing services further and lead to consequent substantial reductions in the services for all.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Question 3: Soundness

The response following repeats the response to Question 1. If the evidence is not wholly satisfactory then it follows that the submission as a whole is not sound.

Unfortunately the evidence used is not wholly adequate, up to date or relevant. This is as much the result of recent external events as matters within GBC's control

The key areas are *cooperation, *housing and *transport.

* COOPERATION

Set originally for reasons stretching far back into medieval history, the local authority boundaries do not any longer reflect real market boundaries. The Guildford work, shopping and housing areas stretch over the County boundary into Rushmore and far beyond. For one example, the pool of cheap housing for Guildford is in Aldershot. The draft shows signs of discussions with Waverley and Woking but little evidence of in-depth cooperation with Rushmore and beyond - instead, Rushmore and beyond authorities are cooperating with authorities to their west, but not to the east.

THE ORIGINAL 1944 SPECIFICATION FOR GREEN BELT POSTULATED THAT EXPANSION WOULD LEAP THE GREEN BELT. That is Rushmore, not Gosden Hill Farm.

* HOUSING

That the Hearne calculations for housing demand are substantially flawed appears to be a common view, now visibly based on an alternative expert calculation. However, since these original calculations were attached to the Plan documents there has been the major event of 'Brexit'. It is expected that Brexit will lead to a considerable decline in immigration from the EU, and, since criteria are likely to be tightened, of some immigration from outside the EU. Not so much of a decline as a simple look at the crude national figures, or the relevant pages in Hearne, but nevertheless a considerable decline is said to be likely. At the same time it is expected that there will be a period of economic stagnation or low growth, which will lead to a decline in the setting up of new households.

So it looks as if the Hearne figures will have to be re-visited, regardless of views as to their original validity. It is understood [verbal] that GBC has this in hand. However it would seem to be demonstrably premature to proceed to acceptance in advance of re-visited and agreed figures.

It is customary in estimating work to publish conclusions that give a mean estimate with a sub estimate of upper and lower tolerances. The Hearne tables appear largely not to do this - instead to put forward a single integer estimate refined to the last digit [as eg 611]. This is surprising, and a word of explanation as to the level of accuracy would be helpful.

TRANSPORT

The sections on transport are the most difficult. They are really quite vague, promising events that are not within the ability of GBC or SCC to deliver.

The lead promise is, of course, the improvement of the A3, where all is vague as to exactly what is to be done. It is not clear how much of the road and transport system an be sorted

But there are many other examples, improvements and changes in the bus services being one. Bus services are provided at the will of the bus operators, and a service exists only where the operator anticipates a profit. There are a few exceptional services that are subsidised, but the relevant Authorities only have very limited funds for this purpose -funds that are being cut and will probably be cut further. Moreover, it seems possible that the Senior Bus Cards will be withdrawn or severely limited, which will reduce the profitability of the existing services further and lead to consequent reductions.
**Question 4: Duty to cooperate**

The response following repeats the relevant part response to Question 1.

* COOPERATION

Set originally for reasons stretching far back into mediaeval history, the local authority boundaries do not any longer reflect real market boundaries. The Guildford work, shopping and housing areas stretch over the County boundary into Rushmore and far beyond. For one example, the pool of cheap housing for Guildford is in Aldershot. The draft shows signs of discussions with Waverley and Woking but little evidence of in-depth cooperation with Rushmore and beyond - instead, Rushmore and beyond authorities are cooperating with authorities to their west, but not to the east.

**THE ORIGINAL 1944 SPECIFICATION FOR GREEN BELT POSTULATED THAT EXPANSION WOULD LEAP THE GREEN BELT. That means Rushmore, not Gosden Hill Farm.**

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

A39 East Horsley

A38, A40, A41 West Horsley

Object

EPC objects to the over-development of our neighbouring parishes of East and West Horsley. These four proposed site selections will add approximately 445 housing units in what is presently Green Belt. We see this as over-development of these two neighbouring villages. There is also the impression that land is being inset from the Green Belt for the sole purpose of meeting housing targets, and not for the reasons allowable for insetting set out in the NPPF. If development of...
these areas of land is permitted it will lead to the increasing erosion of the Green Belt between the Effingham/Bookham boundary and Guildford.

There are over 120 Effingham residents who live within the East Horsley settlement area and these residents will be particularly impacted by the increased traffic these site selections will generate. Many residents believe the narrow rural roads in the area are inadequate to support, safely, the construction traffic that will use these roads over many years.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

(A35) Wisley

Object

EPC objects to the approximately 2000 units proposed for the former Wisley Airfield. It is an over-development of the site and will adversely affect already heavily congested local roads and lead to much worse traffic congestion at the Forest Road, Effingham Common Road junction. Additionally, EPC is concerned about the usage of the car park at Effingham Junction station. This is already full, on most working days, with cars spilling out to park on Effingham Common Road, in contravention of highway regulations.

Many residents of Effingham commute to London to work. The extra pressure on rail services from the site allocation at Wisley will mean that Effingham residents may find there is only standing room on the Effingham Junction to Waterloo service during rush hours.

Effingham residents are also concerned about the inadequacies of the road infrastructure if Wisley were given planning permission. The route from the Forest Road, Effingham Common Road junction, via Old Lane, to the A3 is heavily used and any closure, or restriction, of this road during development of the site would have a severe effect on traffic through the area as well as causing great inconvenience and added pollution.

There are over 120 Effingham residents who live within the East Horsley settlement area and these residents will be particularly impacted by the increased traffic along Forest Road if Wisley were developed, especially in the morning rush hours when new Wisley residents would drive through the area to park at Horsley and Effingham Junction stations.

EPC has previously objected to the planning application at this site and maintains this objection.

Answer (if comment is on questions 1-7 of the questionnaire): ()

P2 Protecting - Green Belt

Support (but on the condition that the proposed inset boundary for Effingham is amended.)

EPC supports the insetting of Effingham in so far as it is consistent with the NPPF and Effingham’s emerging Neighbourhood Plan. However, we believe that the insetting boundary shown in the LP is incorrect and should be amended. This applies to the inset boundary to both the east and west of the village.

Requested inset boundary change to the east of the village.

EPC propose the following amendments to the inset boundary to the east of the village. The requested inset boundary change starts at the A246/Browns Lane junction. Instead of turning into Browns Lane it continues down the A246 to the traffic lights and the junction with The Street. It then continues along The Street until Chapel Hill. It turns into Chapel Hill and at the junction of Chapel Hill and Church Street continues straight across the road (Church Street) onto footpath FP118. This footpath, which goes to the north of the St Lawrence Church, joins up with the LP proposed inset boundary at the north west of the KGV fields, where it also intersects with FP118.

EPC propose this amendment as it follows a more clearly defined and permanent boundary – based on roads and footpath FP118. It also excludes the historic centre of the village and removes and protects important historical buildings and assets:

- St Lawrence Church,
- Browns (a former residence of the Lord of the Manor),
- Browns Field which is used by the Rugby Club minis for sport and is also a field of historic importance,
- Dormers and Old Stantons on Church Street, two period and historically attractive houses
- Silver Jubilee Garden, the former village green – opposite the entrance to St Lawrence Church.
EPC sees this amended inset as a clearly defined and permanent boundary following roads and a footpath. It also protects a public amenity space (Silver Jubilee Garden on Church Street) and several historic buildings including St Lawrence Church.

The inset boundary proposed in the LP does not follow a clearly defined boundary. It goes straight through the centre of the Barnes Wallis Close development where there are no defined or permanent boundaries, and if this inset boundary were to be applied it would be likely to cause confusion in the future.

EPC attaches a map, herewith, that shows the amendments in detail.

Requested inset boundary change to the west of the village.

To the west EPC proposes the following change to the inset boundary. At the back of Middle Farm Place the inset follows the road edge in front of 37, 39 and 41 Middle Farm Place and then follows the back gardens of Wychelm, Lavender Hill and Woodstock on Orestan Lane. This removes Middle Farm Place field from the inset. This amended inset boundary provides a clear, defensible and permanent boundary.

In addition Middle Farm Place field is a public amenity space and should not be included in the inset. The map attached shows the requested amendment to the inset.

EPC request GBC to add a paragraph to page 122, Sites, that states that GBC will support, in principle, sites brought forward by Neighbourhood Plans.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

P5 Protecting– Thames Basin Heaths SPA
Object

EPC strongly objects to a car park on Effingham Common. The proposed car park location would damage the ecology and habitat of the Common, and would be sited very close to one of the few parts of the Common where Skylarks (now on the Red List in the UK) breed.

EPC believes that the car park would be full of commuters’ vehicles, from early morning to late afternoon, whose owners would be using Effingham Junction Station.

Effingham Common is already very accessible from Effingham Junction station; and the popular Horsley Jubilee Trail, which crosses the Common, has a starting point at Horsley station. Many people use public transport to visit and enjoy the Common.

The Local Plan is proposing two additional SANGs in West Horsley and Wisley. If these are accepted there is no longer a requirement for the SANG at Effingham Common to have a car park situated on the Common.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/7230  Respondent: 8575617 / Effingham Parish Council (Ian Symes)  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Object.

Over 80% of Guildford borough land is situated in the Green Belt and the Proposed Submission Local Plan (LP) housing numbers fail to take into account allowable constraints on new builds in the borough, caused by the green belt. Due to such a high housing target, over the plan period, the only way such large housing numbers can be accommodated is by taking too much land out of the Green Belt. A smaller housing target could have protected the Green Belt and been allowable under NPPF constraints based on the high proportion of Green Belt in the borough. Effingham Parish Council objects to the housing target – it is too high.

In addition, it is necessary to review the Strategic Housing Market Availability Assessment (SHMAA) concerning:

1. The part of the housing target driven by economic growth. Is this housing target still appropriate for the borough following the referendum result and the expected slower growth in the future? Given that an average of 125 new builds per year are due to economic growth this figure needs reviewing.
2. Whether student figures for the University of Surrey are still appropriate? Following the referendum result student numbers at the university are expected to decline as students from Europe are now expected to have to pay the full fee Russell Group universities are predicting a decline in student numbers from Europe in the future due to the higher fees.
3. EPC regards the 14% housing buffer to be higher than necessary and should be reduced. The 14% buffer is forcing GBC to identify sites in the green belt that would not be needed if there were no, or a lower, buffer.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to object to the latest Guilford Local Plan which is not sustainable. In particular I object to:

The late inclusion of the site A43 Garlick’s Arch opposite the Send Marsh Road. This is a Green Belt area covered by ancient woodland and prone to flooding. The industrial space planned of 7,000 sq. metres is not needed and mis-placed. If it were needed it should be at Slyfield. In addition the need to build 400 houses on this site is based on dubious calculations which the Council have refused to disclose. With proper use of Brownfield sites the building on this Green Belt site is not needed. There are no exceptional circumstances to build on this or any other Green Belt site in this area. Furthermore, these houses will generate more traffic for our already over busy roads and place even more pressure on local services such as Doctors and Schools especially with the other very large local developments included in the Local Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I also object to the new interchange with the A3 at Burnt Common, site A43a, which will add severe pressure to traffic in the Send and Send Marsh area. This area is already overloaded with traffic and would become gridlocked with the added pressure from the proposed 2,000 new houses at Wisley Airfield, 2,000 new houses at Gosden Hill, Burpham and 1,850 at Blackwell Farm. The local roads are incapable of taking this pressure and noise and pollution levels, already excessive, would become unbearable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In overall terms I object to the disproportionate amount of planned development in this area of the Borough, the 'in-setting' of local villages from the Green Belt and the Councils complete lack of consideration for the local residents whose lives will be severely affected not just because of the scale of the problems listed above but also the building construction itself and the mayhem that would be associated with these large scale developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Finally I object to the Green Belt Policy 2 paragraph 4.3.15 I object to the proposal to inset Send Business Park from the Green Belt because:- Further expansion or development at this location would not only detract from the openness of the Green Belt it would cause severe problems along the restricted vehicle access of Tannery Lane.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2457  Respondent: 8575649 / Ian Reeves  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the Policy A43 change at Garlicks's because:- It ignores my and thousands of other previous objections made by the local population.

How can you justify the need for Travelling Showpeople plots here?

This is Green Belt and Ancient woodland and no ‘ Exceptional Circumstances ’ exist.

It is over development of our villages and number of homes is excessive.

This will exacerbate the already problem of flooding in this location.

It will severely add to the already congested roads of Send and Ripley.

Furthermore I understand that it is contaminated with lead shot.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
**Land at Clockbarn Nursery, Tannery Lane, Policy A42**

**Objection**

Send’s contribution has been increased at this site with no justification despite a reduction in overall housing numbers in the borough and the large number of previous objections.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Land at Burnt Common, London Road, Policy A58**

**Objections**

Why has the “up to” 7000 sq m of employment floorspace, which appears to have moved from Garlick’s Arch, been changed to “minimum of 7000 sq m with a potential for further industrial floorspace to meet borough needs”? I understand the 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for Industrial land for the whole borough, not a huge over allocation of over 9 hectares potential development at Send in the Green Belt. The impact of substantial development on the surrounding roads, environment and life of the Residents would be serious and would virtually join up existing villages and defeat the purpose of the Green Belt.

I object to the projected plan for new north facing sl~ roads to/from Send March/Burnt Common. The A247 from Old Woking through to Clandon is already over crowded with cars, etc, and this can only be exacerbated by increased traffic from all the new projected housing areas, ie A25, A35, A43, A43 and A44 a total of 4,484 houses, the majority of which will have at least one car. The Send, Send Marsh, Burnt Common and Ripley along with the A3 and the M25 are already very heavily used by traffic coming to and from Woking and Guildford. When these become congested for whatever reason, the problem is greatly exacerbated. On a regular basis it can take me up to five minutes to get out of my small road. The A247 is not a road that can be widened due to the housing on both sides of the road and is already subject to severe gridlocks during rush hours and school times.

I object to the fact that the plans show no immediate provision for new schools, doctors' surgeries and ancillary needs. The infrastructure should be in place before any future development transpires.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I strongly object to the latest addition to the local plan for Send Marsh/Burnt Common and Ripley development for the following reasons:

I have lived for many years in the lovely Green Belt area of Surrey and am extremely concerned that you could be considering taking any of the Green Belt area away.

The definition of Green Belt is that it is a policy for controlling unreasonable urban growth. It should be a part of the countryside that will be sacrosanct for the foreseeable future, maintaining an area where agriculture, forestry and outdoor leisure should prevail. The fundamental aim of green belt policy is to prevent urban spreading by keeping land permanently open and consequently the most important aspect of green belts is the openness.

According to the NPPF there are five purposes of including land within the green belt:
To check the unrestricted sprawl of large built up areas
To prevent neighbouring towns to merge with each other
To assist in safeguarding the countryside from encroachment
To preserve the setting and special character of historic towns
To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

It seems to me that if you remove the Green Belt label from all the local villages you have listed in your plans, this will give anyone ad hoc rights to build as and when they like. Once lost, green belt can never be got back.

I feel that little thought has been given to the preferences of local inhabitants and while I can understand that affordable housing is necessary for many people I do not feel that country villages with poor transport facilities, overfull schools, considerable lack of medical facilities and constant traffic problems is the right way forward.

I look forward to your comments.

5. POLICY A25 - Cosden Hill Farm
I object to this revised proposal as although the previous intention to construct 2000 homes on this site has been reduced to 1700 homes this does not reduce the appalling effect that the scheme would have on the surrounding local roads and the A3. I object that the number of house proposed is still far too high and unless the development is hidden from the A3 will once again affect the appearance of the borough as a predominantly rural area.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. POLICY A 43— Garlick's Arch.
This policy would increase the population of the Send Marsh/Burnt common vilage by 49% and completely destroy its rural character. The new policy adds 8 travelling/show people pitches to this development making it even more inappropriate for the area. How can the Council incorporate this Policy into the plan when less than 3 years ago it refused a planning application from "Oldlands" to build only 25 houses in the same location. How can it then insist it that it applies consistent and good practice.
I therefore object to the revised proposal as:
* the village has no shops or infrastructure to support this development.
* there would be considerable additional extra traffic onto roads already congested throughout the villages of Send, Send Marsh/Burnt Common and Ripley.
* no exceptional circumstances have been informed to us that would exist to destroy this Green Belt area or the area of ancient woodlands.
* No proven demand has been shown for travelling/show people pitches in this area
* it would completely destroy the rural character of the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. NEW POLICY A58 - Land around Burnt Common warehouse, London Road, Send P&A58.
I objected to the original proposal to enclose large areas of Green Belt open space within inset boundaries around the villages of Send and Send Marsh/Burnt Common where there will be a presumption in favour of development. The new policy A58 increases the area of land to the extracted to a minimum of 7,000 square metres of "employment floorspace". I therefore object to this proposal as there is no proven need to allocate any Green Belt land within the Borough for industrial/warehouse development. This is particular location would have a severely adverse environmental effect not just on the two villages but all the surrounding area creating major traffic problems and overdevelopment of the local rural communities.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S2 - The 654 homes per year (total 12,426) number of homes the Plan intends to provide over the 19' year period 2015— 2034. I understand that the target for housing has been reduced from 693 to 654 per year, but it is still much too high and does not take into account any of the constraints which should have been imposed due to the high proportion of the borough's designated Green Belt and the capacity of the roads, schools, doctors and other infrastructure to support such an increase in population. I object to the recalculation of assessed need for housing and other development and the grossly disproportionate impact of the Local plan's proposals on the more northerly communities of the borough.

Re: Sites numbered:
A25 – Gosden Hill
A43 and A43a - Land at Burnt Common – known as Garlick's Arch
A35 – Former Wisley Airfield

in the revised draft local plan.

I would like to object to the inclusion of these sites in the draft local plan for the following reasons:

1. The number of houses needed in the Borough was changed between the first and second issues of the draft plan indicating that there is considerable uncertainty in this figure and the basis and method of calculation. In view of the recent EU referendum vote and its impact on future immigration, the number of houses required is likely to reduce further.
   With smaller house numbers the need for any loss of the Greenbelt should be reassessed as 'special circumstances' necessary for reclassification have not been established.
2. Sites 43 & 43a were introduced at the last minute and there has been insufficient time for consultation before its inclusion in the draft plan.
3. Wisley/Ripley/Send/Burnt Common/Send Marsh is a semi-rural area and development on this large scale will lead to urbanisation and permanently change the nature of the area. In particular this could provide the starting link in connecting Guildford to the M25.
4. These developments place a disproportionate burden on the north east of the Borough.
5. Traffic will increase significantly and the access and exit roads to and from the A3 are too narrow to cope with the resultant increase in traffic - particularly at peak hours.
6. Other infrastructure.
   Is there adequate power, drainage and sewage provision for industrial development and is there sufficient school, medical and similar provisions for domestic expansion?
7. Light and sound pollution.
   The area enjoys fairly dark skies for its proximity to London. Any additional development will add to the light pollution unless provisions are made to ensure strict control of any additional lighting. Please consult Guildford Astronomical Society.
   It already suffers from noise pollution from the A3. Traffic noise pollution seems inevitable if development proceeds

   If included in the plan, provision should be made for strict control of noise and light pollution emanating from the site – particularly at nighttime.
8. The sites contain a substantial number of trees many of which are quite mature and must make a significant contribution to the Borough's carbon reduction target. It seems perverse that planning permissions have been refused because of the impact on the individual trees whilst the wholesale destruction of woods seems inevitable if these sites are included.
   It seems difficult to reconcile these two extreme positions.

   If included in the plan preservation orders should be placed on appropriate trees as a minimum requirement.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Re: Sites numbered:
A25 – Gosden Hill
A43 and A43a - Land at Burnt Common – known as Garlick's Arch
A58 Land around Burnt Common warehouse
A35 – Former Wisley Airfield

in the revised draft local plan.

I would like to object to the inclusion of these sites in the draft local plan for the following reasons:

1. There is considerable uncertainty in number of houses needed in the Borough. In view of the recent EU referendum vote and its impact on future immigration, the number of houses required is likely to reduce further.
2. Any loss of the Greenbelt should be reassessed as 'special circumstances' necessary for reclassification have not been established.
3. Wisley/Ripley/Send/Burnt Common/Send Marsh is a semi-rural area and development on this large scale will lead to urbanisation and permanently change the nature of the area. In particular this could provide the starting link in connecting Guildford to the M25.
4. These developments place a disproportionate burden on the north east of the Borough.
5. Traffic will increase significantly and the access and exit roads to and from the A3 are too narrow to cope with the resultant increase in traffic - particularly at peak hours.
6. Other infrastructure.
   Is there adequate power, drainage and sewage provision for industrial development and is there sufficient school, medical and similar provisions for domestic expansion?
7. Light and sound pollution.
   The area enjoys fairly dark skies for its proximity to London. Any additional development will add to the light pollution unless provisions are made to ensure strict control of any additional lighting. Please consult Guildford Astronomical Society.
   It already suffers from noise pollution from the A3. Traffic noise pollution seems inevitable if development proceeds.

   If included in the plan, provision should be made for strict control of noise and light pollution emanating from the site – particularly at night time.
8. The sites contain a substantial number of trees many of which are quite mature and must make a significant contribution to the Borough's carbon reduction target. It seems perverse that planning permissions have been refused because of the impact on the individual trees whilst the wholesale destruction of woods seems inevitable if these sites are included.

It seems difficult to reconcile these two extreme positions.

If included in the plan preservation orders should be placed on appropriate trees as a minimum requirement.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The part of the policy relating to Building for Life 12 is unsound because it is unjustified.

The policy requires applicants to demonstrate how they have had regard to Building for Life 12 (BfL12) and that they must show that they have performed positively against this. This is a condition of planning permission. This is unsound because it is unjustified. BfL12 was devised by the HBF and others as a tool to assist developers in helping to create better designed schemes. It was never intended to operate as a mandatory development management tool. BfL12 does not work as a scoring system since it is a collection of guiding principles. The Council can refer to BfL12 in the supporting text but it cannot make this a requirement of local policy.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Parts of the policy conflict with national planning policy.

- Sustainability statements

The first paragraph of the policy is contrary to national policy set out in the Written Ministerial Statement of 25 March 2015. Applicants for planning permission are not required to provide ‘sustainability statements’ in terms of the construction, internal layout and performance of dwellings. Applicants now need only meet the Building Regulations and the three optional technical standards relating to water, access and space if these have been adopted by the council. As the WMS states:

“local planning authorities (will) also need to review their local information requirements to ensure that technical detail that is no longer necessary is not requested to support planning applications.”

As stated, applicants need only demonstrate to the Building Control department that they satisfy the Building Regulations. They do not need to do more than this. Other than the optional standard relating to space (the Nationally Described Space Standard) this is not a planning area and the council cannot intrude into this area.

There are many things wrong with the first part of the policy. For example (but not exhaustively), the Council cannot require that an applicant demonstrates that the “lowest level of carbon emissions” has been achieved since the applicant is only required to meet Part L 2013. Similarly, the applicant does not need to show how the highest levels of water efficiency have been achieved since the applicant is only required to meet the optional technical standard for water efficiency that the council has elected to adopt which is 110 litres per person per day (paragraph 4.5.20). The Council cannot require more than this because national policy in the WMS does not allow for this (“local planning authorities should not set out in their emerging Local Plans...any additional local technical standards or requirements relating to the construction, internal layout or performance of new dwellings”).

CHP

The policy also requires that all new developments must connect to (C)CHP distribution networks where they exist, or incorporate the necessary infrastructure for connection to future networks. We consider this to be contrary to national policy. The Government’s Productivity Plan (Fixing the Foundations, HM Treasury, July 2015) announced the government’s decision not to proceed with its zero carbon Allowable Solutions carbon offsetting scheme, or with its proposed 2016 increase in on-site energy efficiency standards (page 46). The purpose of this announcement was to reduce the burden of regulation on housebuilders which was “hindering competition by raising barriers to entry, adaptation and expansion” (page 43). The government is concerned that the growing burden of demand is inhibiting the growth of smaller housebuilders (page 46). It is the HBF’s view that having suspended the Allowable Solutions scheme and the 2016 increase in energy efficiency standards, developers are only required to meet Part L 2013 of the Building Regulations. This will not require provision of or connection to CHP systems. Generally, meeting Part L 2013 does not require providing or connecting to CHP systems or contributing to other offsite energy efficiency measures.

The announcement in the Government’s productivity plan post-dates the NPPF. We are aware that paragraph 96 of the NPPF allows local authorities adopt local policies for the support of decentralised energy schemes but we consider that the direction of Government policy has been set by the Productivity Plan. It would not be appropriate for the local authority to specify the manner by which developers achieve their energy requirements under the Building Regulations.

Aside from the question as to whether the Council’s approach accords with national policy, there are potentially viability implications associated with this policy requirement. The DCLG document Housing Standards Review: Cost Impacts (for the DCLG by EC Harris, September 2014) provides the latest costs associated with building to the new Part L 2013. We note that the Council’s Viability Assessment has modelled the cost of building to current Part L 2013 (see paragraph
5.3.20). However, it is hard to know whether this would cover the costs associated with building CHP systems, or connecting to these. The EC Harris report referred to above does conclude that there are costs associated with renewable technologies. Since this is a local plan policy requirement the Council should calculate what it might cost for all schemes to provide CHP systems or to connect up to these.

Carbon reduction

- 

The Council requires a reduction in carbon emissions of at least 15%. This is unclear. Firstly, it is unclear what the baseline measurement is. Secondly, and more importantly, the policy is unsound because applicants are only required to achieve Part L 2013. The Council is unable to set any other standards relating to the performance of new dwellings other than the three optional technical standards (WMS, 25 March 2015).

Applicants are not required to demonstrate how they have achieved Part L 2013 through energy statements. As the WMS states:

“local planning authorities (will) also need to review their local information requirements to ensure that technical detail that is no longer necessary is not requested to support planning applications.”

In paragraph 4.5.16 the Council refers to zero carbon development. The Government, however, has determined that zero carbon development is unfeasible for the time-being, hence its suspension of the 2016 zero carbon homes requirement. This reference should be deleted from the Local Plan.

Water efficiency

- 

We note paragraph 4.5.20. If the Council wishes to adopt the optional standard for water efficiency then it needs to put this in policy. It cannot introduce this via SPD. It will also need to address the tests set out in the NPPG. One of those tests is viability. It is unclear from the Viability Assessment that has been published (December 2014) whether the Council has assessed this cost.

Paragraph 4.5.21

The Council indicates within this paragraph that it may impose other requirements on developers, and lists what these might be. It proposes to decide these on a case-by-case basis. This is contrary to the NPPF in paragraphs 15, 17 and 154 and the underlying principle of the plan-led system. The Local Plan ought to provide clarity for applicants so that decisions can be made without delay. The local plan should not to be starting point for negotiation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
We consider that the first part of the policy is unsound in relation to allocated sites because it is unjustified, ineffective and contrary to national policy.

The first part of the policy places conditions on the residential development of sites in the urban areas of Guildford, Ash and Tongham. We consider that these conditions are unnecessary in connection with allocated sites since it is the function of the local plan to weigh-up whether development in these locations is appropriate. If development is inappropriate, or there is doubt as to whether it would be, then they should not be allocated. We are concerned that the vagaries of the policy will allow the principle of residential development in these locations to be revisited. This would not provide the certainty for applicants required under our plan-led system.

We appreciate that in the case of non-allocated sites it would be necessary to stipulate these conditions. Allocated sites – those which are deemed sustainable by virtue of being allocated in the local plan – should be able to come forward without delay (NPPF, paragraph 15).

Answer (if comment is on questions 1-7 of the questionnaire): ()

Traveller accommodation

- The Council must provide for the needs of the traveller community. To ensure that the needs of the traveller community can be met, we would question why this policy is proposed for development sites of 500 units and upwards and why the provision of traveller pitches should be allowed on smaller schemes. We note the wording to Policy H3: Rural exception homes. This allows for traveller pitches on rural exception sites but the wording in Policy H1 would appear to contradict this policy.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The policy is unsound because it does not accord with national policy.

The Council requires that all sites of five or more dwellings, or 0.17 hectares or more, should provide at least 40% affordable homes. The Council should amend the policy to reflect the national policy as set out in the Written Ministerial Statement of 28 November 2014. The Council may implement a lower threshold whereby schemes of six or more dwellings can contribute cash payments towards affordable housing and tariff style items, but only in designated rural areas under Section 157 of the Housing Act 1985. If the Council wishes to adopt this lower threshold in these areas it will need to specify which areas these are in the local plan.

These changes in national planning policy will not apply to Rural Exception Sites.

The policy should also be amended to refer to the Government’s intention to introduce Starter Homes. The tenure split that is proposed whereby 70% of the units would be provided as rented would probably not work alongside the Government’s stated intention that 20% of the affordable housing should be provided as Starter Homes on each qualifying site (see page 13 of the Starter Homes Regulations, Technical Consultation, DCLG March 2016). Schemes of 9 units and fewer and less than 0.5 ha will be exempt from making Starter Homes contributions (see page 12 of the DCLG paper).

The use of the words ‘at least’ is unjustified. It is unclear how an applicant should respond to this wording. This does not provide the precision required from development plan policies to enable applications to be determined quickly (NPPF paragraphs 15, 17 and 154).

The words “the tenure and size of affordable homes provided” should be amended to read instead: “the tenure and number of bedrooms in the affordable homes provided”. This is necessary to avoid the possibility of any confusion that the Council is intending to adopt the Nationally Described Space Standard. We note that the Council does not intend to adopt the Nationally Described Space Standard through this Local Plan. If it did mean to do so, it would need to ensure that it had meet the various tests set out in the NPPG. The Nationally Described Space Standard can only be adopted as policy through the Local Plan. It cannot be introduced via SPD.

Housing land supply

We note the composition of the housing trajectory on page 43 of the Housing Delivery Topic Paper. We understand the reasons for the stepped trajectory although we feel a flatter trajectory may be more prudent to ensure that the Council is not faced with needing to provide too many completions towards the end of the life of the plan.

5 or 20% buffer

The Plan is unsound with regard to the buffer because the Council’s approach is unjustified in terms of national policy.
We note the discussion on page 42 of the Housing Delivery Topic Paper. Unfortunately, it is not altogether clear which percentage rate the Council has determined that it is appropriate to apply. We think that the Council is arguing in paragraph 4.171 that it is unrealistic to apply a 20% buffer, even though its track-record has been a poor one if one chooses to measures performance against the SEP target of 422 dpa or the DCLG household projections.

We are not sure that the Council’s argument that expecting it to deliver the deficit and a buffer of 20% is ‘unreasonable’ should carry much weight, especially since we have already conceded that the Council may need to adopt a back-loaded trajectory (with the backlog accrued since 2013 being addressed over the full plan period) to reflect how in which its strategic sites will come to the market. The Council has been a poor performer in the past and it must do more to correct that failing and its consequences for those in housing need, by releasing more readily developable sites now.

Although the new local plan represents a much more positive strategy by the Council than had been its approach hitherto, to some extent the Council has forfeited its right to be a 5% authority owing to its poor track record. The purpose of the 20% buffer is to provide a realistic prospect of achieving the planned supply as well as providing more choice and competition in the housing and land market. Evidence from the past suggests that there is a risk that Guildford Council may default on delivery.

It is the HBF’s view that a 20% buffer should be applied in every local authority area in order to help boost housing delivery and to provide more competition in the short-term. Small housebuilders cannot wait. They need to be supported by the plan-led system now. We note that LPEG report recommends the universal application of a 20% buffer.

Dealing with the deficit

On the basis of the housing trajectory provided, we assume that the Council intends to address the deficit accrued to date over the life of the plan (Liverpool), rather than in the first five years (Sedgefield). It would be helpful if the Council clarified whether this is the case.

We assume that the five year supply will be calculated on the basis of the figures provided on page 43 of the Housing Delivery Topic Paper. We note that the Council will be providing fewer homes each year in the first four years following adoption than the annual average monitoring figure of 693 dpa. Only in year five does the trajectory show completions exceeding the annual average monitoring figure. The consequence of this is that completions will need to sharply escalate towards the end of the plan (back-loading). We have some reservation about this.

The Council considers that an emphasis on earlier delivery may compromise its highly sensitive green belt sites (see paragraph 4.171 of the Housing Delivery Topic Paper). We disagree. If a site is considered suitable for residential development and is allocated as such, then the question of insensitive development should not arise because the site has been assessed as being one suitable for development.

We consider that there is a case for providing more by way of a contingency by allocating some of the other green belt sites with low sustainability scorings. This would provide some lee-way for the Council: the more sites you have, across a wider number of areas, the greater is your chance of sustaining delivery in line with the trajectory. There is always a risk that some of the larger strategic sites may not yield all the units required. Identifying some additional sites would help avoid the risk of under-delivery.

Windfall

We consider that the Council’s windfall expectations are realistic. The Housing Delivery Topic Paper (June 2016) in paragraph 4.139 states that the allowance for windfall is 50 dpa for years 6-10 and 11-15 and only 25 in years 1-5. This is quite modest compared to many other south east authorities who typically operate allowances of 100 dpa upwards. We note that this relatively modest windfall reflects the national policy presumption against the development of residential gardens which the Council tells us had previously formed an important component of past supply (see paragraph 4.136).

The windfall allowance is realistic and the Council’s policy towards in-setting a number of villages from the green belt (Policy P2) will help to ensure that these windfalls will materialise.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The green belt review is unsound because it is unjustified.

Generally the HBF is very supportive of the Council’s approach to the green belt and its review to accommodate the OAN in full. The Council’s approach is very positive and we consider that the Local Plan provides a benchmark of good practice for other authorities in Surrey to follow, including Woking and Waverley Councils. We note the insetting from the green belt of several villages to allow for some limited infilling if appropriate sites can be located. This reflects national planning policy (NPPF, paragraph 86). This approach is necessary to ensure that the Council’s windfall expectations will materialise in sufficient number and it will also help to enable the required number of affordable homes (Policy H2) and rural exception homes that are needed to come forward (Policy H3).

However, while we applaud the decision to undertake a detailed green belt review we are concerned that the review is not entirely comprehensible in places and that there may be additional sites available that could contribute towards the housing land supply. The rationale as to why land in some locations will be removed from the green belt and not in others is not altogether clear.

We understand the rationale for the release of land around some of the settlements. These are sustainable locations for growth especially as some like Guildford and Normandy benefit from train connections which could help to reduce private car use. The concentration of housing development around transport hubs reflects emerging Government policy (Consultation on proposed changes to national planning policy, DCLG 2015). However, given this emphasis in national policy on existing settlements, it is unclear why some of the green belt options around the settlements were rejected when in terms of their contribution to the purposes of the green belt they appeared to perform no better that some of the selected sites.

We have noted the Volume 1 and 2 Green Belt studies. We note that the table showing the Achieving the Purposes of the Green Belt Designation scoring exercise in Volume 2 shows that some land parcels around Guildford have scored quite low (there are some 0s and 1s). It is unclear why these sites have been discounted in favour of the allocated sites.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In terms of the housing requirement element of the policy we consider the figure to be unsound because it is unjustified. We are not persuaded that it fully reflects the objectively assessed need over the plan period.

The plan will make provision for 13,860 homes over the period 2013-2033. This is an average of 693 dwellings per annum (dpa) over the 20 year life of the plan.

We have considered the West Surrey SHMA of September 2015 and the Guildford SHMA Summary Report of October 2015. In general we consider this to provide a very robust assessment of the future housing needs of Guildford. The report very clearly explains the method that has been followed and the justification for the various adjustments. We would take issue on two aspects of the assessment. We concede, however, that the effects of these issues on the overall OAN may be quite limited. The overall conclusion that the OAN is 693 dpa seems reasonable.

We support the use of the DCLG 2012-based household projections as providing a sound starting point (see Key Messages on page 56 of the main SHMA report). This would be in keeping with the advice in the NPPG. Comparison with the latest DCLG 2014-based household projections which were published on the 12 July 2016 shows little movement in the underlying demographic component of the assessment.

We also agree that it would be sensible to adjust for the 2013 Mid-Year Estimates while retaining the 2012-based Headship Rates (see table 20 on page 66 of the main SHMA report).

This results in a starting point figure of 517 dpa for Guildford (table 20 of the main SHMA).

We note however, that the new 2014-based projections show that 12,000 households could form between 2013-2033 compared to 10,000 or so projected by the 2012-projections (see DCLG Live Table 406: Household projections by district, England, 1991-2039). This would suggest a new starting point of 600 households per annum. The difference may not be material since the adjustments made by the Council to the basic demographic projection would lift the level of supply to 693 dpa. Nevertheless, it is possible that the new 2014-based projections are suggesting a higher starting point for Guildford. This should be considered by the Council.

12 year migration trend

The HBF strongly endorses the decision not to apply a 12 year migration trend. We are becoming very concerned by the growing use of a 12 year migration trend elsewhere in the wider south east of England. As the SHMA Summary Report for Guildford argues on page 5, the problem with this scenario is that it would fail to account for changes in the age structure over time. These are changes captured by the latest 2011 Census and reflected in the new projections produced by the ONS and DCLG. The 2012 SNPP is likely to be more robust.

Unattributable Population Change (UPC)

We strongly support the decision not to adjust for UPC (page 6 of the summary SHMA for Guildford). It is unclear if UPC is related to migration, and the discrepancy may be because the way that the ONS measured migration was less robust in the past than now. A UPC adjustment for more recent data would be inappropriate.

London Migration
We welcome very much the Council’s acknowledgement of the potential impact of migration from and into London, including the Mayor of London’s own migration assumptions underpinning the new London Plan (adopted in 2015). As the SHMA explains the new London Plan was based on the 2011-interim household projections but assumed a 5% increase in out-migration and 3% decrease in inward migration (i.e. fewer younger people moving to London).

The Council has modelled a scenario that reflects these assumptions and this results in a starting point figure of 568 households per annum. While we accept that there is great uncertainty associated with the migration dynamics with London (see paragraph 2.9 of the SHMA summary), we consider that this will exert an effect on Guildford owing to the affordability problems in London. Relatively affluent households will be able to buy more space in Guildford than they can afford in London. Housing delivery in London is also averaging at only half of what is needed, and while Guildford is not responsible for this poor performance, the fact is that the dearth of supply may increase an outward migratory tendency that Guildford would be wise to prepare for.

For this reason we consider that it would be sensible to plan on the basis of the London migration scenario set out in Table 25 of the main SHMA: namely 568 dwellings per annum (table 25, page 72). We consider that the London migration scenario should be used as the basis for the demographic starting point to which the other adjustments should be made (affordable housing need, students, market signals).

It is interesting that this London migration scenario is closer to the new 2014-based household projection of 600 hpa. This suggests that the baseline demographic need before any other adjustments are made, may well be about 570-600 dpa.

Economic needs

- As recommended by the NPPG we support the modelling by the Council to ensure that its new housing supply aligns with the employment needs of the Borough. This is a welcome and necessary measure. We note that the analysis has concluded that to support the projected growth in jobs in Guildford would require a housing supply of 637 dpa compared to the 517 dpa indicative figure in the trend-based projections (see paragraph 3.7 of the summary SHMA). The Council has concluded that the demographic need is around 120 dwellings lower than the forecast economic need and so has increased the housing need to 637 dpa (paragraph 3.7 of the SHMA summary).

We note that the adjusted figure of 637 dpa corresponds more closely to the new 2014-based household projection of 600 hpa. This suggests that an OAN figure that was any lower than the 600 dpa suggested by the DCLG 2014 projections would probably be flawed.

Affordable housing need

- We support the uplift that has been made to cater for the affordable housing needs of the HMA. This results in an uplift of 59 dpa for the HMA, of which 20 dpa would be required in Guildford (paragraph 3.16 of the SHMA summary).

Student housing

- The assessment of student needs is a very welcome and valuable part of the OAN assessment. The HBF has become very concerned by the failure of many authorities with higher education institutions to assess the projected growth of student bodies. This is because institutional needs are generally assumed to remain constant by the DCLG household projections. Therefore, a failure to account for a planned expansion of the student body could result in an under-counting of future housing needs. The SHMA avoids this by including an allowance for the growth of student numbers and a calculation of how this may impact on the need for C3 homes.
This is a most welcome and necessary adjustment. We support the approach taken and the adjustment that has been made to account for the growth of the student body. The adjustment adds a further 25 dpa to the demographic projection (paragraph 3.20 of the summary SHMA).

We refer to the Local Plans Expert Group’s discussion of this issue following the Government’s announcement in 2012 that C2 use class dwellings could be counted towards the housing completions. It invites the Government to clarify its advice on assessing institutional needs.

**Market signals**

We observe and support the adjustment for market signals. An adjustment for market signals is warranted in Guilford where the affordability to earnings ratios are extreme. The Council has made this adjustment by adjusting the household formation rates for the 25-34 age group. This results in a further addition of 11 dwellings per year. This is one way of accounting for market signals. The LPEG report has recommended an alternative approach, which if followed in Guildford, would require a 25% uplift to be made the baseline demographic projections because the lower quartile house price to lower quartile income ratio is 10.92 (paragraph 3.33 of the SHMA summary). However, the LPEG recommendation is made in the context of a far more simplified approach to the calculation of the OAN which removes the need for many of the adjustments currently suggested by the NPPG. In the case of Guildford we note that effect of the other adjustments made by the Council for employment, affordable housing, and for students would cancel out the effect of the 25% uplift which if applied to the base need of 517 dpa would only add 129 more dwellings per annum. This would result in a figure of just 646 dpa which is lower than the recommended OAN of 693 dpa.

**Backlog**

The NPPG invites local authorities to consider how past performance will have affected the household projections. As the NPPG states “formation rates may have been suppressed historically by under-supply and worsening affordability of housing” (NPPG, ID 2a-015-20140306).

Page 19 of the Viability Study illustrates the number of net completions achieved since 2006/7. Net completions in the period prior to this new Local Plan (2006 – 2013) were generally poor compared to the South East Plan’s annual average monitoring figure of 422 dpa. The SEP figure was achieved only once in 2007/2008. Although we recognise that the green belt review implicit in the SEP figure was the subject of a legal challenge and subsequently deleted, this was not necessarily the case with the SEP housing target for Guildford. In any case, this is the only benchmark available against which to assess performance unless one used whichever DCLG household projection was current at the time (all of which would have pointed to much higher levels of need). Table 3.1 shows that the average figure for the period was 250 completions per year. This figure is very much lower than any of the DCLG household projections so it is possible to infer that had completions been in line with the SEP then the DCLG household projections may have been higher.

The purpose of drawing attention to this is to lend further weight to our argument that the Council would be wise to plan on the basis of its London migration scenario since the baseline DCLG projections is likely to provide an under-estimation of future needs.

**Conclusion**

The HBF is broadly very supportive of the assessment made. We consider this to provide a realistic assessment of the future housing needs of the Borough. The only quibble we have is in the treatment of migration with London. We consider that there is a good case to substitute the London Migration scenario figure of 568 dpa instead of the 2012 SNPP based figure of 517 dpa as the initial starting point figure. This results in a difference of 51 dpa (see also paragraph 4.33 of the
Duty to Cooperate Topic Paper). This should be rounded down to 50 dpa. After factoring in the other adjustments, the overall OAN should be increased by 50 dpa to 743 dpa. A requirement of 740 dpa (rounded down) should be considered.

We recognise that in using this increased initial starting point this would not necessarily that has require the same increase for employment that has been made (120 dpa) except that it would be sensible to keep the same upward adjustment for employment as people moving from London to Guildford will probably still be employed in London – i.e. the adjustment for employment is necessary for those who will need to live and work in Guildford, not necessarily to cater for those living in the borough but commuting to London.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Thank you for consulting with the Home Builders Federation (HBF) on the submission version of the Guildford Local Plan.

The HBF is the principal representative body of the house-building industry in England and Wales. Our representations reflect the views of our membership which includes multi-national PLC’s, regional developers and small, local builders. In any one year, our members account for over 80% of all new “for sale” market housing built in England and Wales as well as a large proportion of newly built affordable housing.

We would like to submit the following representations on the Local Plan and we would welcome, in due course, participating in hearings of the Examination in Public.

Paragraph 1.9, page 9: Duty to Cooperate

The HBF has some concerns that the Guildford Local Plan is unclear about how any potential unmet housing needs in the Housing Market Area arising in Waverley and Woking will be accommodated. As such the Local Plan is not positively prepared.

There are many very positive aspects to the new Local Plan that are supported by the HBF. However, we feel the Local Plan could say more about the cross-boundary strategic question of housing. It would have been useful, for example, to know whether an unmet housing need is expected to arise in either Waverley or Woking and how this situation is going to be dealt with. It would be helpful to know whether it is anticipated if the three HMA authorities will collaborate to address any unmet need. We have noted the Duty to Cooperate Topic Paper of June 2016. Even though Guildford is to be applauded for planning to meet its own OAN in full, it is possible that the other two authorities of the Housing Market Area (HMA) – namely Waverley and Woking – may be faced by a shortfall in supply. While the collaboration on a joint SHMA is strong evidence of effective cooperation, the paper does not say much about the housing land supply situation in either Waverley or Woking.
It seems highly likely in the case of the borough of Woking that Woking will not be able to address its OAN in full. We say this because Woking’s current Core Strategy – examined and found sound back in 2012 (Woking was one of the first authorities in the country to have a local plan found sound under the new NPPF-based regime) – did have an identified undersupply of potentially circa 300 dwellings per annum (dpa). It is difficult to be conclusive about the size of the unmet need since the provisions of the NPPF were not strictly applied in the case of Woking since the plan was devised under the auspices of the South East Plan and submitted prior to the publication of the new national policy. Nevertheless, on the basis of the evidence that was available, it was judged that the plan did not meet its OAN in full: the OAN was judged to be potentially about 594 dpa. This was not a conclusive verdict, as explained in paragraph 81 of the inspector’s report (dated 26 July 2012), but it seemed likely on the basis of the evidence that had been submitted. As the inspector concluded:

“Whilst the submitted CS does not plan to meet the objectively assessed housing needs of the Borough, I am mindful that the NPPF indicates that the aspiration to meet housing need is dependent upon consistency with other parts of the Framework. With this in mind and as evidenced by the SA, the Council has considered alternative levels of housing provision, for example, its Option 3[1] which considered the provision of 594 new dwellings per year.”

Furthermore, the affordable housing need in Woking was assessed to be 499 dpa (see paragraph 78 of the inspector’s report). Provision was made in the Core Strategy for only 292 dpa. This figure was derived from the South East Plan target. Therefore, whatever the OAN figure might have been, it was likely that Woking was not be able to meet its OAN in full. There is, consequently, a question about the unmet need that has accumulated in Woking since 2011 (the difference between the possible OAN of 594 dpa and the supply of 292 dpa) as well as the ability of Woking to accommodate its newly assessed OAN figure of 517 dpa.

We are concerned that despite the assurances made at the time by Woking Council, little concrete action has been taken to resolve the problem of this shortfall. When Woking’s Core Strategy was assessed by the examining inspector back in 2011, the inspector had concluded that the other authorities of the HMA, would quickly come to the assistance of Woking. As the inspector commented:

“It will be incumbent upon the Borough and its neighbours to ensure that the processes and outcomes related to the Duty to Cooperate are honed further to maximise the sustainable delivery of suitable housing.” (paragraph 82).

For various reasons this did not happen. While it is possible that Woking may be able to recycle sufficient previously developed land to accommodate the new figures contained in the SHMA September 2015 study, this seems unlikely. We note that the new OAN figure for Woking of 517 dpa is more-or-less similar to the potential OAN figure of 594 dpa of the current Core Strategy. This would suggest that Woking will still be confronted by a problem which is at least comparable to the one it faced back in 2011. The difference is that while parties were assured that the problem of the unmet need would be addressed in the subsequent two years, this did not occur.

Woking’s ability to address its OAN in full probably depends on a green belt review. This is what the SEP envisaged and what the examining inspector referred to in his report. These are matters that may have a bearing on the Guildford Local Plan.

Ideally a joint or aligned plans for all three authorities would be produced, setting out a strategy for addressing the unmet need in either Waverley or Woking (assuming there is one) and probably incorporating a coordinated green belt review. We recognise, however, the difficulties associated with preparing plans and coordinated efforts with other authorities. This is not necessarily a cooperation failing of the Guildford Local Plan but we are concerned that there is potentially an issue in Woking that the Guildford Local Plan will not be able to help resolve.

We have noted the discussion on pages 11 and 12 of the Duty to Cooperate Topic Paper about the housing situation. We note that a memorandum of understanding (MoU) has been agreed and signed committing the three councils of the HMA to reviewing the SHMA in three years. We note that the review of the SHMA is linked to a review of the local plans, but only if such a review is deemed necessary. We feel that the intentions of the three authorities on this question needs to be clarified better. An early review may become necessary if there is an unmet need in the HMA is discovered that needs to be accommodated. We have considered the MoU in appendix 4. The key thing that is missing from this document is any confirmation that there is an unmet need that might need addressing. We accept that it may be too soon to confirm this, because Waverley and Woking are still doing work on their own local plans which will include identifying housing land
capacity within their own areas. Nevertheless, a commitment by all three authorities to finding a way to accommodate a potential unmet need would have been welcome. We feel this would have demonstrated full compliance with the duty to cooperate. The MoU is a too vague on this question.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Saved but not superseded 2003 Plan policies

Paragraph 1.3 of the ‘Proposed Submission Local Plan: strategy and sites’ states that the Plan contains overarching planning policies. Appendix E of the Plan lists the policies and against most of them gives corresponding policies in the 2003 Plan. It is thus clear that the policies listed in Appendix E are the overarching policies, and that they will supersede the given corresponding policies in the 2003 Plan.

What is not so clear is the fate of the 2003 policies which are not superseded. Paragraph 1.3 referred to above states that the Submission Local Plan will be followed by the ‘Local Plan: Development Management Policies’, which will include detailed development control policies. It does not relate these policies to the 2003 policies which are not superseded.

It is not clear that all the ‘saved’ 2003 policies which are not superseded will be covered by policies in the ‘Development Management Policies’?

Some help is given by Appendix 1 of the ‘Guildford Local Development Scheme 2015’, which is given on the ‘New Local Plan’ page of the GBC website. The Appendix 1 states: “The Local Plan: strategy and sites will include a list of the extant Local Plan policies identifying which policies are to be replaced by the Local Plan: strategy and sites DPD and which will continue to be applied alongside the Local Plan: strategy and sites DPD”. Unfortunately the Proposed Submission Local Plan does not give a list of all the extant 2003 Local Plan policies and does not identify the 2003 policies which will continue to be applied alongside the ‘Local Plan: strategy and sites’. Thus there is a double inconsistency between the current LDS and the Executive draft Plan.

This inconsistency should be removed. The neatest way of doing this may be for the new Plan to have a further Appendix giving the 2003 policies which have been saved but not superseded and a note they will be included in the ‘Development Management Policies’. The above Appendix 1 states that the ‘Management Policies’ ”will supersede any remaining policies in the Local Plan 2003”. The remaining ones are presumably those which have been saved but not superseded.

This matter is important because decisions by Councillors and Officers on planning applications are usually justified by reference to specific planning policies. I would like to be able to cross check that in this regard the strengths of the 2003 Plan have been carried through to the new Plan

In addition Surrey Heath Borough Council is concerned that no other land designation appears to be given to the areas to be removed from the Green Belt. The sites are described as major previously developed sites inset from the Green Belt in Paragraph 4.3.15 of the Submission Local Plan. This leaves the status of these sites quite unclear with no policy direction as to how they could be developed in the future. Pirbright is a large site and sits immediately adjacent to the Council’s strategic housing site at Deepcut. Keogh Barracks abuts Surrey Heath.

In light of the above concern, Surrey Heath objects to the Local Plan as currently drafted.

The Council would welcome the opportunity to engage with Guildford via the duty to co-operate processes with a view to resolving these concerns and thus facilitating sound and effective plan making.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Surrey Heath Borough Council does raises and objection regarding the lack of duty to co-operate with respect of removing both Pirbright Barracks and Keogh Barracks from the Green Belt. As set out in our 2014 response Surrey Heath indicated that it is important that the plan-making process of both Surrey Heath and Guildford recognise these sites and that engagement and dialogue in relation to them is constructive and on-going.

Answer (if comment is on questions 1-7 of the questionnaire): ( )
Proposed Submission Local Plan: strategy and sites 2016

Site A41 – Land South of West Horsley

SUPPORT FOR LAND ALLOCATION

It is considered the site allocation meets the requirement of the National Planning Policy Guidance (NPPG) in that the Council undertook a Land Availability Assessment (LAA) which assessed land available for housing development. The LAA assessed sites in terms of suitability and sustainability. Site (A41) was identified as part of that exercise, and therefore was fully explored in terms of its suitability. The assessment and ultimate inclusion in the LAA 2016 illustrates that the site is suitably located for development.

In terms of availability, the land is open grass land with no impediment to development. Furthermore, in terms of ownership it is immediately available and in this respect also meets the requirements of NPPG.

It is recognised that the site lies outside the identified West Horsley settlement boundary and within the Green Belt. However, within the Councils ‘Green Belt and Countryside Study’ the site is identified as a potential development area under reference C14-D. The findings of the study indicate that the land scores ‘One’ against the purposes of the Green Belt. Accordingly Volume 4 of the Green Belt and Countryside Study suggests that this land could be inset from the Green Belt.

The site is categorised in the Landscape Character Assessment as falling within Rural Character Area E2 – ‘Wooded Rolling Claylands’. This requires that new development needs to respect the landscape and townscape character and local distinctiveness of the area. Given the allocated site area of 4.8 hectares, there will be sufficient space to develop the land for both housing whilst also providing sufficient landscaping, (tree and shrub planting) appropriate to the identified character area.

In all respects I support this proposal as Site A41 is able to meet all the requirements of the NPPG in respect of allocations and, and can be appropriately developed to meet the Councils identified housing shortfall.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

A 37, 38, 39 and 40

I object to these policies. No exceptional circumstances are cited to justify the removal of these sites from the Green Belt. None of these developments is large enough to provide infrastructure to ease the strain on existing facilities such as the primary school, medical facilities and congested narrow rural roads. A small scheme (£1m to include environmental improvements) appears in the Infrastructure Schedule for improvements to roads in the area but there are no details of this small scheme and no details of funding, so its implementation is unlikely.

These policies involve a 35% increase in the number of houses in the characterful village of West Horsley, a quite disproportionate increase which will irretrievably compromise its character.
Both A38 and A39 have areas in flood zone 3, in the case of A39 around one third. A sequential test would suggest that there are more suitable sites in the Borough for development than these.

Site policies

A25

I object to this policy. No evidence is put forward to justify ‘exceptional circumstances’ for removing it from the Green Belt.

Gosden Hill currently defines the edge of the urban area and prevents the coalescence of Guildford with the village of West Clandon. It also checks the unrestricted sprawl of urban Guildford into what is quite clearly the rural area beyond and safeguards the countryside from encroachment.

Development here will represent undesirable ribbon development along the A3 and will add significantly to traffic flows on the A3 at this point.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to this policy. Again no evidence is out forward of exceptional circumstances to justify its removal from the Green Belt.

In fact, of all the sites proposed in the Plan, this is the one which most contributes to checking the outward sprawl of the London conurbation.

It is difficult to see how a sustainable development could be built here. Narrow, unlit, rural roads lie between the site and the nearest two railway stations (which have no spare parking capacity), so walking and cycling to public transport are extremely unlikely and the new settlement would be predominantly car dependent at the already over-trafficked junction of the A3 and M25.

A 41

I object to this policy. Added only at the Regulation 19 consultation stage, (so without the early and meaningful engagement and collaboration with neighbourhoods required as essential by the NPPF) inclusion of this site produces a strange bump in the smooth line of the settlement boundary. It does not have natural, defensible boundaries. It lies in a part of the village where open, sweeping views along this side of East Lane define its character.

Answer (if comment is on questions 1-7 of the questionnaire): ()
A43 and 43A

I object to these policies

These sites are remote from transport links except the A3, so the business activity and the residential units will add to the traffic on this congested route. Traffic from Woking which currently finds a number of different ways to access the A3 and M25 will now all be channelled through the unsuitable narrow road through Send to Burnt Common which already has long queues in the rush hour, which will be exacerbated when the new primary school building, which has its entrance on this road, is completed soon. Similarly traffic from Albury, Shere and Gomshall, Chilworth and Shalford will now be channelled along the A247 through West Clandon to access the A3 at Burnt Common. The A247 is a most unsuitable narrow road for heavy traffic, too narrow in places for two wide vehicles like HGVs to pass each other without routinely mounting the narrow pavement which runs on one side of the road only. Pedestrians have to cross and re-cross the road as the footpath is not continuous on one side of the road.

These sites were introduced at a late stage (Regulation 19) as a very late addition to the draft plan. This does not accord with para 155 of the NPPF which requires ‘early and meaningful engagement and collaboration with neighbourhoods………A wide section of the community should be proactively engaged’. This clearly did not happen in relation to these sites.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E2

I object to this policy because revision of the SHMA to take account of flaws identified in it and the post-Brexit economy will reduce the need for new employment floorspace.

I also object to the inclusion of Garlick’s Arch as a strategic employment site. It is remote from any facilities and has very poor public transport links. Employees are likely to travel by car, adding to congestion on local roads and the A3. It has been described as an ‘enabling development’ for construction of A3 slip roads, but it is not at all clear that Highways England want more junctions on the already very congested A3, or who is going to pay for the road construction.

I also object to Gosden Hill Farm being a strategic employment site. Such sites should be sited in more sustainable locations with good transport links. This proposal will lead to additional congestion in Burpham and on the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy E7

I object to this policy because it should be possible to build higher numbers of homes in the town centre than this. Amenities and infrastructure already exist and it is a very sustainable location. In an age of increasing internet use it would be sensible to reduce somewhat the retail and office elements and increase the residential element. It should also be possible, with good design, to have a modest increase in the height of buildings in this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/18719  Respondent: 8581089 / Jenny Wicks  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Policy H1

I object to this policy

Students occupy a significant amount of accommodation which could be used by others. 60% of students on campus is too low an aspiration, especially in view of the slow pace of building out existing planning permissions for student accommodation. GBC should look at policies in for example Oxford, which relate expansion of student numbers to delivery of new student accommodation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy H3
I object to this policy because it should define ‘small’ to provide clarity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Attached documents:

---

Policy I1
Much of the infrastructure in Guildford Borough is already overstretched. Developments in villages will not be large enough to bring any significant infrastructure and so adding to housing in villages such as the Horsleys (where there is inclusion of a small, £1m, road improvement scheme of unknown financing and no detail) will only add to existing pressures. The local road network, at least in the east of the Borough, has not been given adequate consideration. Nor have the effects of village developments on schools and medical facilities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Attached documents:

---

Policy I2
I object to this policy since it is too vague and optimistic. Action by Highways England on improving the strategic road network is a long way off and, apart from schemes already identified for funding, is unlikely to happen. The building of a tunnel is so unlikely it hardly merits mention.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy P2

I object to this policy.

I do not consider that it gives the protection to the Green Belt intended by the NPPF. When 65% of the new development is proposed to be on land in the Green Belt it is not credible to claim that this is justified by ‘exceptional circumstances, not including housing need alone.’ No exceptional circumstances are specified.

The introductory text for this policy asserts it is required that exceptional circumstances should exist to promote sustainable patterns of development, whilst in truth the proposed new settlements at both Wisley and Gosden Hill would be dormitory settlements largely dependent on the car. Neither of these locations is near to where jobs growth has been in recent years, which is largely to the west of the Borough.

The Green Belt and Countryside Study which underlies this policy is a flawed document which rests on subjective judgements and not precise scientific evidence. The rating of areas depends on which boundaries you choose to give to the plots under consideration- alter the boundary even slightly and you can get a different assessment. The scale used in the assessment process is small, so that small differences in judgement can have a radical impact on the final assessment. A scale from 1-10 would have had much more sensitive results.

I consider that each of the Green Belt sites should be assessed individually for whether there are exceptional circumstances to justify their removal from the Green Belt.

I think the statement in 4.3.17 that the ‘the general extent of the Green Belt has been retained’ is highly misleading. In my ward the proposed development of Gosden Hill Farm(78 hectares) for 2,000+ houses and other development removes a very large area of Green Belt. Within a few hundred yards of the ward boundary the building of 400 houses plus an industrial estate at Garlick’s arch(34.5 hectares) and the development of 2,000+ houses at Former Wisley Airfield(93 hectares) , together with sites for 600 houses in the Horsleys(30 hectares) means a very large (235 hectares), and completely disproportionate, loss of Green Belt in this part of the Borough. All this development and loss of Green Belt is near the A3, the length of which is only six miles from Burpham to Wisley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
**Policy P3**

I object to this policy. The NPPF gives no special protection to this area, this policy effectively gives more protection to this area than to the Green Belt, which, according to the NPPF, is supposed to be protected against development. The NPPF says that new Green Belt should only be established in exceptional circumstances, for example when planning for larger scale development such as new settlements or major urban extensions. Neither of these forms of development is planned for the Ash and Tongham area, whilst the areas of Green Belt in the east of the Borough proposed for removal in fact protect against the ever sprawling London conurbation and the encroachment of urban Guildford into the countryside.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In summary I object to the proposed Submission Local Plan because

- The housing target is too high, based on a flawed SHMA
- The number has not been reduced to take account of Green Belt and infrastructure constraints
- Green Belt has been treated as a bank of developable land rather than given the protection expected under the NPPF- 65% of proposed housing is on Green Belt and only 35% on urban and brownfield land
- The number of houses (over 5,000) proposed for a small area in the east of the Borough, around six linear miles between Burpham and Wisley, is disproportionate and will radically change the character of this part of the Borough.

In more detail-

**Policy S1**

I object to this policy as its wording is too vague. It provides no guidance on how conflicts between economic, social and environmental considerations (conflicts between economic and environmental issues are frequent in Guildford Borough) are to be resolved, and which factors have priority.

In more detail-
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2

I object to this policy. The housing number of 13,860 homes is excessive and the SHMA, from which the number is derived, seriously flawed, as demonstrated by critiques submitted by Guildford Residents Association and by Cllr David Reeve. In any event housing numbers and the employment land requirement need to be revised in the light of Brexit which reliable forecasters show will slow economic activity below levels previously expected.

The OAN has become the housing target because it is regarded as deliverable because, contrary to the NPPF, Green Belt (other than AONB) has not been regarded as a constraint, but rather as a bank of developable land, with 65% of the proposed homes being on Green Belt. The NPPF requires that established Green Belt boundaries should be changed only in exceptional circumstances and recommends, in the interests of sustainability, chanelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary. Proposing 65% of housing on the Green Belt is not consistent with this.

Also, it is clear that the lack of infrastructure, especially in the villages where individual developments will not be large enough to generate significant infrastructure, has not been properly taken into account in assessing the housing target.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The revised OAN is too high. The proposed 22% increase in housing stock is double the 10.4% ONS projection for population growth over the plan period. The provision for students still seems unrealistically high as most will not stay in the Borough after graduation and the economic growth assumptions post-Brexit seem over optimistic.

No account has been taken of the special status of the Metropolitan Green Belt in limiting the ability of Guildford to meet its OAN. The Green Belt land proposed for development is predominantly in the land closest to London, in the north east of the Borough, of crucial importance in limiting the sprawl of the London conurbation.

The development proposed is proportionately (around 50%) too much concentrated on Green Belt sites in a small area in the north east of the Borough. Brownfield sites, particularly in the town centre, should take a greater proportion of the housing. With the growth of on-line sales, some of the area proposed for retail in the town centre should be used for housing

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
My objection is to the density of housing and employment use planned for this site. The traffic generated by the proposed buildings will enormously increase the present congestion in this area and in the village of Ripley where parking space is at a premium. Traffic on narrow roads in the surrounding area, already used as 'rat runs' will increase, and there will be great pressure on the local schools and doctor's surgeries.

Answer (if comment is on questions 1-7 of the questionnaire): ()

This refers to a map disassociated with this document and fails to provide a version number, location or name of the file. There are, at least, 220 separate documents associated with this plan. There should be an electronic link to this map. Either within the main document, or leading to a website where it can be found (see above in section 4).

The ‘Green Belt Boundary’ on the assumed map, at Local Plan Appendix 7, fails to identify the ‘prime’ boundary of Guildford Town itself. By implication there is no ‘Green Belt boundary’ around the Guildford urban area. Thus making this map incomplete and unsound.

The base map fails to identify with any accuracy where these lines are, and fails to provide hyperlinks to the associated Policies (areas) identified on the map. Reference A25 bears no resemblance to Sites C1 and C2 on the Green Belt Traffic Light map provided at Reg. 18.

The map fails to identify the Site of Archeological Interest behind Pimm’s Cottages, Burpham Lane in Burpham, which is a registered historic site and also designated Local Green Space Land in the Burpham Neighbourhood Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

A poorly thought-out project in its current form. The site has no indicated main access point to provide for the proposed 2000 vehicles coming on or off the site daily.

This entrance should be displayed in this Plan. The Project is moving forward without the community involvement of a Local Plan Process. Moving on a whim the sewage treatment works, which is the most important piece of infrastructure in the whole community, to build houses fails basic logic and soundness tests.

It is noted that a highly sensitive Green Belt is adjacent to this site, bounding Clay Lane. In the infrastructure aspirations the non-essential Link Road is proposed to cross this area. This Link Road aspiration, being non-essential, should be removed in total from the Plan, as it is against the flood plain requirement that only ESSENTIAL INFRASTRUCTURE should be built on any Zone 3B Active flood plain. The fact that this road was never essential means that it should be removed from the Plan.
A key consideration is missing, namely ‘Contaminated Land’. No borehole information has been released for this site, all such information being labelled ‘confidential.’ As the land owner, it is assumed that GBC has these records, but GBC has chosen not to make them public during this Plan process. It is known from local evidence (malformed premature lambs) that the land is contaminated.

This project is therefore unsound in its current format.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This Policy is unsound as it proposes land usage policies of park and ride, railway station and housing.

It is the potential site for the suggested tunnel under Guildford. If the tunnel is accepted as the cure for the traffic problems through Guildford, then this site is in effect sanitised against housing until that decision is made.

Note: There are previous comments in full earlier in our representation [Section 7].

As it stands the timing and proposal for this site are unsound.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
This site has been turned down for development in the past three to six months.

It is difficult to follow the historic logic of this site as Surrey County Council want to use it as a waste ‘transfer site’ in their plan, whilst Guildford want housing, and the residents wish it to remain as is.

The pollution levels [CO2 NOx] at this site exceed acceptable levels for asthma sufferers. On health considerations (air pollution) and being so close to the overloaded M25 can, or should, this site be considered for residential use?

This Policy must be considered as unsustainable and unsound in respect of healthy residential use.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This site has appeared only at Reg. 19 stage. It was not been disclosed previously at Reg. 18. There has been little time to assess and comment on this proposal. In fact the Policy simply offers Green Belt land for ‘development’ which could mean, if accepted, anything from a sewage farm, refuse tip, office buildings, housing, warehousing with vast numbers of HGV’s onto a B road to even a scrap yard.

The policy is so ‘open’ and ‘vague’ it simply cannot be judged on its merits. It is currently open land which also happens to be Green Belt land. No mention of this is included in the Policy. It is of major concern that it is extremely close to the Policy A25 site (Gosden Hill), also Green Belt land. The removal of both sites from the Green Belt destroys the very basic principles of the Green Belt purpose by permitting ribbon development alongside the A3.

Thus the inclusion of this site is unsound as it destroys Green Belt principles of openness and separation of communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7948  Respondent: 8581505 / Burpham Neighbourhood Forum (Jim Allen)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a
The Policy A43a has been slipped into the Plan at Reg. 19 stage, with:-

- no previous public consultation at Reg. 18
- no official documented consultees’ consultation
- no apparent traffic modelling to discover its effects on local traffic patterns. No consideration has been given to:-
- south of this proposed junction. The south bound ‘on’ directly affects the south ‘off’ at the Policy A25 site, which is less than 2km from the Policy A43a site. One or other will need to be dropped from the plan.
- in respect of potential four way just north of Policy A25 site, this will be in direct conflict with Policy A43a site.
- the only village to benefit from this proposal is Ripley. All other villages will see an increase in traffic. The A3 traffic route changes, as proposed, are detrimental to remaining routes to the A25 and Woking areas.
- No solution to the traffic south of this location would be found by building these slip roads determined by Policy A43a. An expensive waste! The money could be used to solve 5 villages’ traffic problems, if the four way is built south of the current north off exit to Burnt Common as per Policy A25.

It is therefore a non starter for the community, interfering with traffic flows in a detrimental way and will increase traffic in West Clandon. The ‘ability’ to miss out Guildford for large commercial vehicles will lead to West Clandon on the A247 becoming a rat run for vehicles heading to the A25 and A246.

The increasing pollution would cause distress to the residents.

The proposal solves nothing, therefore is illogical and unsound.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Residential developments ‘of 25 or more dwellings’ fail to make mention of suitable space ‘off road’ for parking of all vehicles.

The ‘over 25 homes sites’ are all some distance from the main employment centres. As there can be no provision for multi location destination public transport, personal transport is a must to get to work.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy D2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This policy contains a FLA (4 letter acronym) (C)CHP, which is indecipherable.

This is a thirty year document so FLA’s and TLA’s should be spelt out early in the text so in 25 years time it is still understandable on the first read.

“Combined Cooling, Heat and Power (CCHP)
Combined Cooling, Heat and Power (CCHP), or trigeneration as it is also known, is the most economical and environmentally sound way to generate electricity, heat and cooling, making it the ideal solution for organisations which have significant cooling requirements.

CCHP energy schemes integrate Combined Heat and Power (CHP) systems with absorption chillers.

Waste heat provides energy to produce chilled water which is then used for cooling.”

While this policy is ‘admirable’ in thought, in ‘UK practice’ the proposal would work in large factories and barracks style / student accommodation where one central supplier has a responsibility for the whole operation.

For domestic houses (owner occupied) - this ‘communist style’ communal power and heating process is highly contentious. This type of system requires a central ‘boiler/engine/generator’ to feed a number of properties and thus requires a central service provider ‘on site’. We do not believe the policy itself is ‘sustainable’ as it will require the setting up of an ‘independent’ power station with associated company and staff. None of this is mentioned within the overall plan.

As there is no Plan Policy, Proposal, or Aspiration within the plan for such CCHP infrastructure this Policy fails the basic soundness test of being integrated with the rest of the Plan or in fact being deliverable in the life of the Plan.

CCHP for commercial premises is a sound policy, and is welcomed. However for disconnected owner occupied properties, the implications are a challenge. The distribution of hot and cold(chilled) water is unsustainable over wider ranges.

Web research has shown that this ‘new version’ of the old idea has less than 1,000 units worldwide. It is an unproven project notwithstanding the principles are excellent.

This policy needs seriously re-wording to make development sustainable and energy efficient, but not overly onerous on developers never mind the owner occupiers.

Answer (if comment is on questions 1-7 of the questionnaire): ()

This Policy fails to encompass ‘artefacts’ and fails to provide ongoing a location where artefacts are stored and made available to the public.

The Plan is lacking inclusion of an Archaeology Policy in respect of these virgin Green Belt development sites. Noting that Gosden Hill, while having been ploughed in recent times is the second hill and adjacent hill to where the Simian Pot was found in 1892 implying potential archaeological remains could exist on this site.

This is a short coming in the Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

This policy is another indication of illogical thinking. The only ‘Sustainable Employment’ is in the food supply chain, no other jobs can be considered ‘sustainable’ – they are simply here for the present and gone in the future.

Stagecoach manufacture, busy in the 1700’s, vanished in the 1800’s, when trains arrived. These were destroyed in the 1960’s by Beeching. Now we have the motor car.

This policy should have the wording changed to reflect the transitory nature of the work place over the next 20 years. The word ‘Sustainable’ should be removed from its title

Answer (if comment is on questions 1-7 of the questionnaire): ()

The allocation of potential work places is an admirable aspiration.

As can be seen in Walnut Tree Close – the allocation of the land for employment and the building of the units lasted around a decade before they were demolished. Since no company has asked for new land, it is presumptuous to guess the need for work floor space, until it is asked for and type determined. It is also illogical to demolish ‘in use’ work space simply to build workers’ housing on the land. Such process destroys current jobs without creating or replacing the jobs destroyed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

This policy is misguided in that expecting one place of education (University of Surrey) to provide 60% of its own accommodation while failing to require a similar proportion for the other degree level education establishments in the town. It promotes segregation of students from town life and no one can be “forced” to live anywhere. Even if 100% of accommodation were provided on campus there will always be students who do not wish to live there! The student problem needs to be revisited. The policy should require all education establishments to provide affordable (low cost) accommodation for all non-local students such that during their educational period they do not automatically by default ‘absorb’ local housing stock.

This section of the policy is unsound

The wording is weak, in this policy. The first line text “.........Infrastructure needed to support development should be provided...........” needs re-wording to read ‘.........Infrastructure needed to support development MUST be provided...........’.

In respect of CIL in Burpham and other Neighbourhood Plan areas it is a requirement that 25% of the CIL is allotted to the Ward or Parish, whilst non Neighbourhood Plan areas get only 15%. Therefore the third paragraph is incorrect in its terminology and definition.

In the last paragraph it implies that the Thames Basin is the ‘be all and end all of legal responsibilities’. In fact air pollution and noise pollution are also legal responsibilities of GBC.

This must be re-worded.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Supporting Highways England’s Road policy is actually a legal responsibility.

It should be noted their [Highways England] time scale for meeting infrastructure requirements does not start until 2020. Any development alongside the A3 cannot (due to lack of infrastructure) start until or after that time.

Thus this Plan is undeliverable within the time schedules laid out.

It should also be noted that road intersections deemed as a requirement at the numerically lower traffic levels of the late 1970’s / early 1980’s have not been included within the plan. Those deemed as a requirement were:

- A320 south bound on and off the A3. [Ref. Documents Surrey History Centre for completion of the Burpham Ladymead bypass 1978-1982]
- Four way inter section A3 with Gosden Hill [see document Gosden Hill plan 1982.]
- Link Road from the bullet point immediately above to the A25. [see document Gosden Hill plan 1982.]

Target for Policy I2
Note: There is currently a £1.5 billion Surrey Infrastructure budget deficit prior to these proposals.

The Target actually reads: ‘the three schemes on the strategic road network (locations not identified) within Guildford Borough as identified in the 2015-2020 period to be implemented by 2033!!!’

That means 28,000 vehicles, with 30% increased pollution level, will be on the roads of Guildford before the roads needed to serve the new homes are even planned to be built.

THIS IS UNSUSTAINABLE UNSOUND and UNTENABLE.

Note: Pollution level taken from the EA Spread sheet giving base level pollution calculations for given local traffic levels, speed and composition of vehicles

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Policy I3: Sustainable transport for New Developments**

As no new road completions are planned for any development until post 2030 – nothing can be considered sustainable, as all roads are currently running above capacity.

This policy also fails to understand that the average travel to work distance is 14 miles to over 50 locations. The only sustainable method to get people to work is push bikes or motorised low capacity transport utilising free running roads.

Road obstructions and little used bus lanes, buses which fail to follow routes required by people travelling to work and journeys with higher per mile costs than a private vehicle are unsustainable. This has been proved in Liverpool where bus lanes have now been removed, reducing pollution and traffic queues.

None of the proposed housing sites are within walking distances, even in good weather, to or from places of employment, shopping or major transport hubs. A walking distance criterion is irrational for normal people’s lives.

**The policy is unsound because of the existence of policy I2.**

Answer (if comment is on questions 1-7 of the questionnaire): ()

This policy is in direct conflict with the Slyfield re-generation site situated in the 1901 flood plain. It is intended to ‘directly affect’ and cause material harm to the nature conservation interests of local sites (Riverside Nature Reserve). There can be no justification clear or otherwise to install 10 metre high lamp standards and disturb a landfill site or to move a waterworks which has been situated on ‘the perfect’ site for over 100 years to a location of ‘made land’.

Thus while commendable it fails the soundness test and is in conflict with other policies within the Plan.

Open Space

There is little point in saving 500 sq metres in the Town Centre when multiple 100’s of hectares are removed from the Green Belt.

SANG’s

Suitable Alternative Natural Green Spaces, these are ‘irresponsible’ designations of land. These paper designations do not physically change the sites from that of pre-designation and, save for the odd fence, gate and walk way, does nothing other than rename a location and become effectively Green Belt or Local Green Space by another name.

If an enclosed site is 100 hectares it is madness to label 50% SANG and 50% not SANG. It is only a designation on paper that changes rather than the sustainability of the site within Mother Nature. If the site was returned to Mother Nature from a farm yard or industrial site – this is fair designation. Designating open fields as SANGS is a meaningless paper exercise.

An unsound practice in the real world.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Contains several abbreviations which are not defined such as ‘AGLV’. To avoid confusion and doubt these should be either expanded in the text or identified in a note below on the same page and in the glossary.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy 9. Protecting Green Belt land

…The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence….

We are concerned that any change to the current 1940’s Green Belt line destroys its very purpose and refer to GBC High Court Action to successfully remove this site from the South East Plan. See extract from item 11, 18th June 2009

The Plan wording is weak:

Extensions and alterations:
Should have a specific sizing as the word ‘disproportionate’ could mean anything.

Replacement buildings:
Should only be within the footprint of the original building.

Limited infilling
Should only be within the building line of the nearest adjacent existing properties within the development line confines of the village.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

From the NPPF:

The policy P4 is far too wordy and long – it grants permission for anything in ‘a Zone 3b flood plain’ contrary to the NPPF.

The second paragraph is unsound, irrational and illogical.

No development should be contemplated in the ‘Wey Valley Flood Plain’ as its’ area has been reduced by nearly 50%, since the flood of 1902 swept the Guildford town bridge away. The policy should positively prevent development under these circumstances.
Introducing further reduction of land area in times of climate change is unsound.

The Policy should not include the word ‘Permitted’ within it.

It should be worded

“NO New Development will be permitted within the Zone 3b flood plain which is bounded by the ‘flood line (Zone 3b)’ on the 2009 generated flooding maps of the River Wey.” Except in accordance with the NPPF.

Repairs to structures already within the Zone 3b Flood Plain will be permitted for maintenance.

Should replacement or rebuilding of the structure be required - every effort should be made to remove it from the Zone 3b flood plain.

Whilst this will not compensate for the loss of the flood plain since 1902 it should prevent further disasters.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This policy, while welcome, demonstrates the irrational approach to this plan and its policies. Policy P4 permits development in a flood plain – which in the worst case means that people could die – yet this policy is protecting (quite rightly) the SPA.

Policy P4 is therefore unsound and irrational.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
We object to this policy on the basis that the strategic numbers vary from the calculations in Appendix 3, indicating that additional and independent calculations need to be completed. This is needed to confirm that such a large discrepancy above the national average is conclusively proven prior to acceptance of these figures.

It is also identified in Appendix 4 that there are insufficient skilled tradesmen in the area to complete the task of meeting housing numbers in this and adjoining Boroughs.

This policy is unsound as a basic Principle.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Personal representations in Respect of the Guildford Local plan submission at Reg. 19 Stage

Dear Sirs

1. I object to the Suite of documents identified in General as ‘A Guildford Local Plan’ in that there has never (as required Reg 17 of the Town and Country Planning act ) been a survey of the peoples of Guildford, asking them what they wanted in ‘their’ local plan – thus the whole suite of documents are legislatively ‘unsound’ from its inception

1. The LPA has failed to observe or act on any representations made by the community in response to the Reg. 18 submission for comment, merely continued their trajectory no matter what logical legal and common sense points have been put forward by highly qualified members of the Borough community.

1. They have acted in Secrecy while constructing the suite of documents – only disclosing ‘after the fact’ agreements with developers for the developers owned land to become part of the housing allotted land. They have failed to act in a manner which demonstrates Open Government and Localism – failing to consult in a meaningful way, merely going through the motions ignoring rational and sensible comments.

1. They have attempted to plan for the goal of rapid development max Houses, no matter the detrimental effects on the existing community, rather than planning for the future, no infrastructure has been included as a ‘must or Shall’ merely a ‘should or maybe’- this is totally unacceptable. To me and from comments across the Borough unacceptable to literally everyone who has actually thought through the Process.

1. Ignored ‘history’ in respect of known requirements in respect to transport infrastructure, while trying to bring in previously undisclosed schemes which are to the detriment of the community being poorly thought out and failing to consult with the communities affected. They have Ignored the need for always junctions at Potters lane and the A320 and link road to the A25, yet attempted to include a road across a flood plain without numeric or logical justification while failing to identify a sensible and rational route to Exit the site (Slyfield)
1. They have produced documents without proper consultation with the community, thus reaching proposals and conclusions which would not have been reached had the community been consulted and their views taken into account. Thus Failing Reg. 18 Process

1. The Document suite is not indexed despite it consisting of over 220 plus documents many duplicate documents with differing names. Some unfinished some clearly not changed since reg 18 despite notification of errors within them.

1. Thus the ability to comment on the plan is like fishing for Iron with a magnet in 50,000 Fathoms... you never quite know if the document you have found is the ‘latest document’ or a previous one, or simply a renamed identical document. – This makes the whole consultation process unsound.

1. Knowing many residents and Community organisations have commented at length – I formerly support their concerns objections and comments, and reserve all their submission at Reg 18 within the Reg.19 process such that the whole process can be challenged and assessed for its weakness of approach to this extremely serious requirement of having a Local plan for the Next 20 years.

I make no observations on the actually documents, as the actual process used to generate them fails the test of following legislative procedure (in respect of involvement of the community) and Soundness. The process has been development based not community based and at Reg.19 they have introduced documents and policies which would have been soundly rejected at Reg. 18 stage due to content and proposals, using half finished ideas and lacking in Numerical or Studious detail expected of such a plan.

I thus consider the plan unsound and failing to follow legislative procedures and formerly request it is sent back to Reg 17 stage for correct method of process namely Asking the community what they want, drawing up a plan to meet those requirements, submitting that plan to the public for comment, taking notice of those comments prior to pacing the plan before and inspector.
