The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to Gosden Hill development being in the Local Plan The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.
Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/678  Respondent: 8875233 / Richard Hiam  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
**Answer (if comment is on questions 1-7 of the questionnaire):**

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

   Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

   The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

   Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

   National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

   The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

   This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

   The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

   It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

   Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1350  Respondent: 8875233 / Richard Hiam  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.  I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPP16/1363  Respondent: 8875233 / Richard Hiam  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.  POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1.  To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2.  To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3.  To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.
4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/1358  Respondent: 8875233 / Richard Hiam  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. POLICY H3 – Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.
1. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1356  Respondent: 8875233 / Richard Hiam  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/1357  Respondent: 8875233 / Richard Hiam  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/1347  Respondent: 8875233 / Richard Hiam  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment on questions 1-7 of the questionnaire): ()

1. I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsustainable due to
being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I open my response by stating that over 20,000 responses were received by you objecting to the 2014 draft plan, and therefore I object that this plan is not materially different, and that the Consultation Process has not been properly followed. I object to building on the Green Belt because its essential characteristic is its openness and permanence (National Planning Policy Framework paragraph 79). I object to the fact that infrastructure has not been properly assessed and is inadequate to deal with current housing levels - roads, schools and doctors will not be able to cope. In the case of roads, the volume of traffic which currently uses the A247/The Street at peak times makes exiting both from Oak Grange Road and from Clandon Station a difficult and often hazardous occupation. The road itself is narrow in parts, and absolutely not suitable for large vehicles. Yesterday a significant jam was caused by two such vehicles endeavouring to pass each other. The pavement was mounted, emphasising the danger to pedestrians that such vehicles present on this road. The damaging and dangerous effect of the increased volume of traffic which will use the road as a result of the appalling plan that has been presented does not bear thinking about.

I object specifically to proposed building on Gosden Hill Farm on Green Belt designated to prevent West Clandon being swamped by a sprawling urban environment four times its size. I object also to all other strategic sites in the Local Plan. Blackwell Farm, 3 Farms Meadows, Garlick’s Arch, West Horsley and Hog’s Back. All are wholly out of proportion to the surrounding area and none qualify for the exceptional circumstances required for them to be taken out of the Green Belt. Therefore

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I OBJECT to the Borough Wide Strategy (Policy S2)

1. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.
2. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.
3. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work,
shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Answer (if comment is on questions 1-7 of the questionnaire): ()

A37, 38, 40, 42, 44 & 45 – My Objections

Some 295 houses in various smaller developments in West Horsley, 100 in Send and 15 in Ripley. These will generate traffic on the A 247 to access the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: pslp172/2077  Respondent: 8875233 / Richard Hiam  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Gosden Hill development of 1700 houses. Reference to a potential link road from the development to the A247. The clear implication is for an access from the development to the A247 with enormous traffic implications for the A247.

South bound off- and on- slip roads to service the development and replace the existing off- slip road to Burpham. The only North bound access to the A3 will be via the existing slip road off Clay Lane. (See later, Burnt Common).

A 4-entry form secondary school, a primary school, a retail centre and a park and ride for up to 700 cars.

When developed, the new employment site at the north side of Gosden Hill Farm (site allocation A25) will be treated as an Office and Research & Development Strategic Employment Site (7000sq.m). This could mean several hundred employees.

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/2079  Respondent: 8875233 / Richard Hiam  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
4. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
5. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
6. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
7. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
8. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
9. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
10. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
11. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy 11). Our villages are already suffering from severe congestion for much of the day, for
example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists pass through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Burnt Common strategic industrial employment site for light industry, storage and distribution activities. It is to be designated an Industrial Strategic Employment Site which means that it is a preferred site for industrial development including waste management facilities. The site is 9ha which it is stated allows for considerable future expansion. This will generate large amounts of traffic including heavy vehicles on the A247.

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site.
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.
13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.
14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Although much is made of the need for new infrastructure to support these developments and for this to be in place as needed, the Plan admits …“we forecast that there will also be an absolute increase in overall traffic volumes” and this is assuming all the infrastructure (listed in App. C to the Plan) is in place in a timely fashion. GBC has little or no control over the plans of Surrey County Council as the local highways authority and Highways England for trunk roads. Worryingly, the Plan now has less substantive information about improvements to the A3 South of the M25 from Highways England and it appears that their plans are not yet formed (Policy ID2). In the absence of such information, the infrastructure proposed is specific to each proposed development and does not address cumulative effects. What would be the case with regard to planning approval if SCC and /or HE do not provide timely infrastructure?

The Plan now calls for nearly all infrastructure to be funded by developers (see APP. C). We question how realistic it is to expect developers not only to pay for all the infrastructure but also to have it in place in a timely fashion. The Plan says that planning permission will be refused if timely provision of infrastructure cannot be secured. Such refusals will almost certainly be settled in the courts. Developers’ business models are based on building and selling houses to create the cash to provide infrastructure. People will be living on the sites well before infrastructure is complete. Will GBC prevent development of Gosden Hill until slip roads etc. are provided off and onto the A3? Again, the infrastructure is site specific and does not address cumulative effects.

If development were to be refused the land would still have been removed from the green belt and its future rendered uncertain.

Residents are being asked to accept very large amounts of development with little or no detail being provided on measures which would relieve existing congestion and limit future problems. The cumulative effects of the developments listed below are certain to have a devastating effect on the A247 through our village (and of course on Send) and it is hard to see how any of the infrastructure proposed in the Plan (App. C) will do anything to mitigate the effects of these developments on the A247 and hence our village.

Summary of the Impacts on the A247 – My Objections

All of these developments will draw additional traffic to the A247 through the village. It would be naïve to think that the employment sites and schools will serve only the developments themselves. Apart from the normal movements of residents to and from the new sites there will be considerable additional traffic on the A247 generated by:

- children from elsewhere being delivered to schools and collected

- the employees of the offices and industrial sites getting to work and returning home

- the vehicle movements generated by distribution and storage activities
- traffic from Wisley wishing to travel South and returning
- traffic from Gosden Hill wishing to travel South and returning
- traffic from Slyfield wishing to travel South and returning
- private and commercial traffic originating in the South and accessing Gosden Hill, Burnt Common or the A3 and returning (including traffic from Dunsfold)

The A247 although an A road:
- is less than 2 vehicle wide in places
- does not have continuous footpaths
- has several sharp bends
- has a hump-backed bridge with poor site lines
- has a very difficult junction to access the station
- is largely unlit
- has a primary school
- is already very congested at times

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp17q/70  Respondent: 8875233 / Richard Hiam  Agent: [8875233 / Richard Hiam]

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Non-plan Items– My Objections

Surrey County Council’s business plan for Newlands Corner (not referenced in the Local Plan) to attract 100,000 more visitors a year. A significant proportion of these can be expected to use the A247.

Cumulative impact of changes – My Objections

Changes to the Plan have done nothing to alleviate the problems (particularly of traffic and congestion) raised in residents’ previous responses. Indeed it is now clear that the problems will be made much worse. There do not appear to be any changes which would be of benefit to the Clandons and indeed the cumulative effect of what is in the Plan and some external factors not in the Plan will have a much worse impact on the A247 through West Clandon and Send than the 2016 draft. Note that the A247 is the only road over the Guildford to Waterloo railway, North of Guildford that doesn’t involve travelling through the town centre.
Duty to Cooperate – My Objections

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

The overall effect of the current proposals will be nothing less than devastating to the whole area, and must be rejected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2778  Respondent: 8875265 / Wendy and Peter Donaldson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing because I object strongly to the Local Plan for West Horsley. The number of houses in your proposed plans will completely change the nature and character of the village. It will lead to many more thousands of cars on our local roads some of which are narrow, flood easily and are poorly maintained.

Your plan involves building on and reducing the Green Belt land which has always been protected for very good reason. If your plans for the area succeed, West Horsley and all of the surrounding areas will become urban sprawl spreading out from Guildford. This area does not have the infrastructure required to cope with the scale of the developments. West Horsley has one local Infant & Junior School which is full to capacity. There is one medical centre in East Horsley. From September there will be no local shops requiring a journey to either East Horsley or elsewhere. Again this will increase the traffic on our local roads.

The Street has become a rat run for traffic and at peak times carries the traffic to two private schools.

This building will put additional strain on the A3 which is already heavily congested and the M25 which is completely congested for the majority of the day.

At weekends and even during the week, the roads are used by many hundreds of cyclists. At times it is impossible to overtake them and this causes frustration and delay. The whole area receives hundreds of visitors enjoying the local green spaces and consequently additional traffic. The burden that will be placed on local recreational facilities such as Sheepleas which is already heavily used at weekends will overwhelm the nature and the character of such a beautiful resource.

The local plan offers no solution to these issues and seems intent on fulfilling a need for additional housing without considering the problems that already exist or solutions to the problems this will create. The need for housing should not override the need to protect the Green Belt land.
The proposed development at Wisley to build another 2000 homes has not been removed from the local plan causing great concern, again for the pressures on our infrastructure and the huge increase in volume on main and local roads.

The scale of building new homes in West Horsley should be kept to a level which respects the infrastructure and local facilities (A requirement of The National Policy Framework).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The fact that the 2000 home development on Wisley Airfield remains on the Local Plan with extreme implications for West Horsley, the surrounding area, the A3 and the M25 is of great concern.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

THE NATIONAL PLANNING POLICY FRAMEWORK REQUIRES THAT NEW RESIDENTIAL DEVELOPMENT MUST RESPECT THE CHARACTER AND DENSITY OF HOUSING IN THE AREA AND BE LIMITED IN QUANTITY BY THE AVAILABILITY OF INFRASTRUCTURE AND LOCAL FACILITIES. The number of proposed homes for West Horsley will not fall within that framework! The proposed developments will adversely impact on our area and the lives of its residents. The nature of our village will be critically altered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14002  Respondent: 8875265 / Wendy and Peter Donaldson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
I am writing to object strongly to Guildford’s local plan for West Horsley and and planning for the surrounding areas which also affects West Horsley.

Reasons for objection:

The lack of infrastructure that already exists. We only have one infant and junior school, one medical practice and a few local shops. The school is already full to capacity. The Local Plan does not consider or propose expanding any of these services. Other resources will also be swamped.

The roads are already busy and the country roads are poorly maintained. There are few parking facilities. At weekends the roads are crowded with cyclists who delay traffic and cause endless frustration to drivers. The impact of the additional traffic caused by the proposed developments for West and East Horsley and other villages will increase the chaos and danger on the roads. Already the traffic has increased through West Horsley Village. Larger vehicles are starting to use the road, particularly when the M25 is blocked (quite a frequent occurrence). The A3 already carries too much traffic causing endless delays around the Guildford area for most of the day. The M25 is stop/start traffic or traffic is at a complete standstill, again for a lot of the day. This must already be polluting our environment.

If public transport was increased this would impact on severely on the current traffic situation.

Our local roads, particularly Ripley Lane are subject to flooding when there is heavy rain. Thames Water has already advised Guildford Borough Council that the wastewater network is unlikely to be able to support the demand from all of the proposed developments.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Paul Beresford our local MP states clearly that the Local Plan is not fit for purpose and that housing need, and I totally agree with this, is not a good or sufficient reason for building on the Green Belt. It is outrageous that it is even being considered.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4600  Respondent: 8875329 / Katherine Cornwall  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding
is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site
will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

15. I object to the potential impact of para 4.4.23a on Burnt Common with its over allocation of industrial zoning is subterfuge for a waste management facility which is a dishonest and underhand approach to planning and proper consultation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to cooperate with the wishes of its own electorate.

Despite the thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Comment ID: PSLPS16/1075  Respondent: 8875361 / P A Clarke  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT most strongly to the late addition of Garlick's Arch at Burntcommon (site no A43) to the above plan. Guildford Borough Council has not followed the correct process in adding Garlick's Arch at a very late stage to the new Draft Local Development Plan, and also by adding the new A3 road junction by the A247. They are trying to pass this under the short cut of Regulation 19, but it requires another full consultation under Regulation 18. This invalidates the whole process.

Garlick's Arch is an area of unspoilt Green Belt agricultural land of some 70 acres, which includes about 12 acres of ancient woodland (some of it dating back to the 16th century) and it should not be sacrificed for housing and industrial units. This site is an entirely unacceptable proposal. Any further industrial space required could easily be accommodated at Slyfield.

Quite apart from losing Green Belt land, an estate of the proposed size of 400 houses plus 2 acres of industrial units, will generate extra traffic of about 800 cars and many HGV's. This will put an unbearable pressure on all the roads around the Burntcommon roundabout especially at rush hour.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal to create extra entry and exit slip roads from A3, London bound, off the A247 Clandon Road which will add to further congestion on the Burntcommon roundabout. Also the A247 which runs through Send village would be used as a major artery into Woking destroying the village would be used as major artery into Woking destroying the villages with almost constant gridlock and health issues in respect of exhaust emissions.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to policy A58, Land at Burnt Common, London Road. The change of the size of the area has been changed from a MAXIMUM of 7,000 sq m to a MINIMUM of 7,000 sq m when the demand for industrial land is falling. There is no need to build industrial units here when there are still empty brownfield industrial sites in the borough. The word MINIMUM implies there is no ceiling on amount of land that will be developed. The impact of additional car and HGV traffic generated by this scheme will place an additional burden on the already overcrowded local roads: the Burnt Common Roundabout at the junction of the B2215 and A247 being difficult enough to navigate now in the rush hour without any additional traffic.

Answer (if comment is on questions 1-7 of the questionnaire): ()

In spite of many thousands of public objections raised against previous versions of the plan regarding building on the Green Belt in such high numbers when the local infrastructure cannot cope, no effort has been made to address these concerns in this the latest version. In fact the number of houses and travellers pitches has increased together with a potentially large increase of industrial space. We need to keep the Green Belt sacrosanct as stated in government policy.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this local plan for the same reasons as my last letter. The housing number is too high (appx d), we need to protect our greenbelt for future generations (p2). The infrastructure is not good enough and Guildford's roads are already so busy and can come to a standstill during peak time.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is brownfield land in the urban areas which could be regenerated, without the need to encroach on protected Green Belt land. **We have seen no plans for the use of brown field sites.**
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than **double the figure used in previous plans.**
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, the roads are narrow and unsuitable for walking and cycling and the development itself is too spread out, the demographic constitution of proposed houseowners is likely to contain disabled, young children and older residents – all of whom will need private cars and therefore it is impossible to anticipate a reduced reliance on private cars

2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
17. I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

18. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The "objectively assessed need" figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting
- The current SHMA inflates the proposed housing figure due to
- failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability and
- flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA). landscape areas (Surrey Hills AONB), Green Belt. flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

14. I OBJECT to Gosden Hill development being in the Local Plan The land in Gosden Hill does exactly what the Greenbelt was designed to It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A31 00, 82215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham's sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.
The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England's requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an "aspiration" in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

Answer (if comment is on questions 1-7 of the questionnaire): ()

6. I OBJECT to the location for new employment floorspace at Garlick's Arch - Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B 1 c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick's Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/3468  Respondent: 8875457 / Mark Ground  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

15. I OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
### Question 16

**I OBJECT to the inclusion of the land for new on/off romps at Burnt Common (A43a)**

The addition north facing romps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clondon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Pion does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

### Question 8

**I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)**

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick's Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

5. I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick's Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B 1 c), general industrial (B2) and storage and distribution (B8) at Garlick's Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick's Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

7. I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Gorlick's Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Answer (if comment is on questions 1-7 of the questionnaire): ()

20. POLICY E6 -The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor "attractions" and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/"Disneyfication". Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many "leisure and visitor attractions" already. The case for creating more is not made and no examples are given. Instead, the plan's explicit priorities should be:

1. To protect the borough's prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford's river landscape less off-putting and support town break packages for high-value To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An "English town break" (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

1. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
13. I OBJECT (POLICY H1 -Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council's timidity is a case of "regulatory capture" by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog's Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Answer (if comment is on questions 1-7 of the questionnaire): ()

19. POLICY H3 - Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the "mix" this can include "market" housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

9. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

10. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents' in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick's Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

11. I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainly that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

12. I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

3. **OBJECT** to not protecting the Green Belt (Policy P2)

I **OBJECT** to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a 'special circumstance' and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC's Green Belt & Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Answer (if comment is on questions 1-7 of the questionnaire): ()
4. I OBJECT to development in areas which are at risk of flooding (Policy P4

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Comment ID: PSLPP16/7616  Respondent: 8875457 / Mark Ground  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to
increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/7621  Respondent: 8875457 / Mark Ground  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. I OBJECT to the Borough Wide Strategy (Policy S2)

1. The borough wide strategy is poorly It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

2. The Housing number is based on pre-Brexit data for economic and population growth, including These now need to be revised downwards, possibly quite seriously.

3. The housing number is based on an arbitrary Housing Market Area (HMA): the "West Surrey" tri-borough area of Guildford, Woking and An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, "West Surrey" is much too small. Half of Guildford borough's residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside "West Surrey". Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make "West Surrey" reliable. The area is artificial and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour's "need". Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey's 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick's Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of
the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

As a resident of East Horsley I am greatly concerned about the extent of the proposed development in the village (and apparent proposed widening of the boundaries of it and removal of the land from the Greenbelt) particularly when the planned development of the Wisley airfield is taken into account.

There appears to be a shortage of housing in the Guildford area and the Horsleys must bear some of the burden to remedy that. However, the addition of circa 533 new houses appears obviously unsustainable if the current nature of the village is to be maintained. That is, Horsley is to remain a pleasant, community-spirited environment in a rural location.

Adding over 500 new homes will inevitably destroy much of what people moved to the village to enjoy. Perhaps more importantly though, the current services and amenities in the village - roads, schools, medical facilities etc - simply couldn't cope.

Has anyone involved in the proposed plan actually spent any time in the village centre at weekends? The centre is already almost comically busy at times and the addition of several thousand additional people will create real traffic and safety issues. As for the roads, I hardly need to comment on the risk that material additional local traffic will have. Have the authors driven along The Drift recently? It is horrific and getting worse and additional traffic can only have a detrimental effect. Similarly, has anyone involved tried to get a prompt appointment at the medical centre recently? With all those additional people the health service provided to villagers will plainly take a further dive.

As things stand the revisions to the Local Plan do not take account of the practical impact that the proposals will have on the community. Add to that the knock-on effect of up to 2000 homes at Wisley and the Council faces destroying the way of life of much of the current community. What is particularly bizarre is that the evidence supplied doesn't appear to justify a need for anything like the number of new homes being proposed.

More homes in Horsley? Yes, of course. The number being suggested? Absolutely not.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
We are writing to strongly object to the Horsley and Ockham proposed new housing sites and ask you to re-consider the Guildford Local Plan!

Whilst we realise there might be a need for some new houses we would ask you to re-investigate fully the number of new houses really needed and take into account all the brown field options! Our objections to the proposed Guildford Local Plan also include the lack of adequate local infrastructure:- Horsley schools, medical centre and transport links are already fully stretched - if in the future there were to be an additional 533 + new houses how could they conceivably be expected to fully accommodate the needs of the then Horsley population?!! We also are very concerned indeed that the 'exceptional circumstances' required before removing the Horsleys from the Green Belt have not been demonstrated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing to strongly state my opposition to the proposed local plan in which you intend to transform the village of Normandy into a smalltown with hundreds of new homes and schools.Totally destroying the heart of the village,with a huge impact on roads, services and the lives of the residents many of whom have lived here most of their lives because they have chosen a rural area to live, which you intend to destroy,ignoring the wishes of the people of Normandy.

The intention to build a secondary school is totally unnecessary with the number of children that age in Normandy, especially as there are very good secondary schools within easy reach with spaces available in all age groups. The area
which you plan to build on is Green belt, and you cannot claim exceptional circumstances, there are none, as this whole project is totally commercially driven without proper consultation or even honestly notifying the residents of Normandy the scale of the building plans which you propose to do.

You were elected to represent the best interests of the people of Normandy which you are totally failing to do by even putting forward this horrendous plan.

The local roads will not be able to cope with the impact of the huge increase in the volume of traffic which this proposed plan will bring and it will totally disrupt the lives of all residents and destroy the character of the village of Normandy for ever.

I totally and strongly oppose your building plan for Normandy and ask you to reconsider.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to air my grievance at the proposed development in Normandy. I have been visiting the area and appreciate the quintessential qualities of an English village set in the Surrey Hills. The high school development along with 1500 units of housing plus a row of retail outlets would destroy this.

And what about the environmental impact upon wildlife. Those fields are home to dear, rabbit, grass snakes, hedgehogs, woodpeckers, and many more dangers. I have been making good use of walking in those fields and have come to appreciate how much significance it plays upon the quality of life for people in the area to be able to have such open spaces available.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I write again following my letters to the Guildford Borough Council in November 2013 and September 2014.

I do not see any radical new proposals in your latest planning submission, so my objections raised previously still stand. I will summarise below.

Objection 1: ONS figures (May 2014) do not support GBC's estimate in the Draft Plan. So the basis for this major building plan are flawed.

Objection 2: Green Belt policy is to protect land around larger urban centers from urban sprawl, and maintain the designated area for forestry and agriculture as well as to provide habitat to wildlife. I strongly object to the proposed removal of Green Belt status (in an Area of Outstanding Natural Beauty) from the Horsleys and the other 14 local villages.

Objection 3: We already suffer major development (largely infill) during the building stages, and then the increased traffic (on inadequate roads with dangerous pavements) from 2 houses where previously one small bungalow used to stand. So even more traffic generated by the new housing proposals will not be ideal on the B2039 through the Horsleys. It is bad enough when the M25 blocks and traffic totally unsuited (too heavy, too fast) decides to re-route through our village.

Objection 4: I continue to object to the piecemeal jigsaw of 'land opportunities' contained within your document; I am not convinced, despite the document's length, that the infrastructure implications have been fully considered. In my area, schools (already full), medical facilities (no short-term appointments), roads (narrow and pot-holed with collapsing drains and increasing amounts of other traffic, and of course numerous bicycles), drainage (rainwater ditches unknowingly filled in on new developments), and train services (already full at peak times) all struggle with the current capacity today; so a proposed housing increase of over 70% in the Horsleys? Have any surveys been undertaken by GBC?

I appreciate there may well be a need for extra housing in the Southeast - but why ruin the rural areas? Have all possibilities in the more urban areas been looked at?

So yet again we suffer a further attack on the rural villages of England, with the usual consequences: reduced quality of life, loss of many leisure opportunities - or too sites destroyed along with our national heritage, and increased vehicle numbers bringing increased pollution.

Clearly a lot of work has gone into this Plan, for which I am paying. I find myself in total disagreement with it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPA16/2143  Respondent: 8875841 / J James  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
As you are aware Send is a small Surrey village that is surrounded by "Green Belt" land and I most vehemently object to the Council's plan to remove Send from the "Green Belt". This Green Belts permanently protected by the NPPF which prevents the merging of settlements. There are no exceptional circumstances to overturn this. The green space around Send acts as a buffer separating the towns of Woking and Guildford giving them their own Identity. Further development within the area will lose this identity completely.

I object to the proposals A42, A43 and A44 for a total of 485 homes and 2 travellers pitches in Send on the following grounds:

1. This site is New and was NOT included in the regulation 18 draft and has not previously been consulted
2. The increased housing will bring with it at least 1-2 cars per household which will add further traffic to the small village roads particularly at peak times These roads already struggle to cope with current traffic levels.
3. The subsoil of the existing site contains documented unsafe landfill waste which is currently vented.
4. The increase in population of Send will impact on school places in both Ripley and Send and services such as the Villages Medical Centre whereit is already difficult to arrange appointments with the Doctors.
5. The industrial development is not required as the latest Employment Land Needs Assessment of 2015 shows a reduction of 80% in required employment floor space from the previous ELNA undertaken by GBC in 2013.

I also strongly object to the ridiculous proposal (A43a) of a new on/off slip road for the A3 at Burnt Common on a number of grounds:

1. The destruction of Green Belt land this proposal will use including ancient woodland containing trees that have existed since the 16th
2. The fact that the north-bound access will join an already busy section of the A3 particularly during the rush hour, with the potential of an increased risk of accidents as the traffic joins the A3
3. Access from Send Marsh Road to the 82215 can be difficult enough during peak times as traffic comes off the A3 using the B2215 as a 'rat run' to re-join the A3 at Ripl
4. The A3 corridor is such a busy route already so further development anywhere along its length is a ridiculous

I trust you will view my concerns and objections favourably and drop the proposals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I wish to object to the New Local Plan.

It would appear that the objections raised by residents during 2014 have been ignored. Once again plans have been produced for over 500 houses in our area with no provision for improved roads, bus services, schools or medical services.

In addition the boundaries of the villages will be enlarged and removed from the Green Belt. To date the proposals for Thatchers Hotel and Bell and Colvill have been rejected, but still appear on the New Plan, as does the development of Wisley Airfield which has also been rejected.

I consider these proposals to be the work of countryside vandals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the removal of Former Wisley Airfield (FWA/TFM) from the green belt as no exceptional circumstances have been established to remove the land from the Metropolitan Green Belt.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

object to the continued inclusion of FWA site on this Local Plan....as the plan was unanimously rejected by GBC planning on April 8th 2016 ,when a broad number of authoritative agencies such as Highways England,Thames Water,the Environment Agency,And NATS all shared the views expressed above. The environmental essentials will be threatened,SPA,SSSI,SNCI,by any further development in this area

8 I also wish to object to the major new development ,as I am concerned about our ability to provide Health Care to any major increase in the population to this area. The local hospitals are working at capacity already ,and the A&E departments at over capacity for much of the time to accommodate an ageing population and increased demand . There are no future plans to address a massive expansion in the current numbers of people living in this catchment area ,,mentioned in the Guildford plan,on our hospitals.I wish these concerns to be represented for the local population.

I trust these objections will be fully considered and that the Former Wisley Airfield,AllocationA35 will be removed permanently from the Local Plan immediately.

I support Wag in all their views to support this vital issue for the future of this area,and for the future quality of Guildford life for the generations to come.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity.

5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.

7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).

8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4675  Respondent: 8875969 / Sean Gilchrist  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of
development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are
already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

### Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY A25; GOSDEN HILL FARM, MERROW LANE, GUILDFORD (PAGE 178)**

As an addition to the two areas referred to above this proposed development would represent the merging of villages from the M25 to Guildford, leading to creeping suburbia with associated degradation of the rural nature of the existing villages in the area.

In conclusion, my further objection with reference to the sites identified above is; Insetting of villages will make them the "sacrificial lambs" of this proposed planning process, with significant harm to air quality, increased traffic on already overcrowded roads, and attendant noise levels. There will be loss of wild-life habitat and loss of rural character in general. This proposal would cause unthinkable damage to the Conservation Area of Ripley Village.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Site A58 Burnt Common:-

This is designated as a strategic employment site with potential for further industrial floorspace to meet future borough needs. This phrase is too open ended. To assess the stresses which industry would place on the local infrastructure more detail about potential size of operation, size of workforce (i.e traffic-car/lorry journeys) is needed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

To put no finer point on the above but to say I OBJECT to the above on the following points:

Nobody from Guildford Borough Council (GBC) has ever contacted in any shape or form the residents of Normandy to ask their opinion of what they feel is their rights as locals living in the area and how their lives will be totally changed – for the worse. Why? That is not democratic.

We do not require any school either primary or secondary and there are so many places still available in all local schools and they even have enlargement facilities if required. Now Brexit is upon us this will totally change on migration, enlargement of families and financial requirements of businesses and councils and property developers, and the restraints that perhaps will ensue could last for years. It is not cheap to pay for schools that are not required and waste our taxes.

We also do not require (obviously Cllr Spooner does not live in Normandy or Flexford) any shops or pubs. These are not frequented enough to make them a viable proposition for any owner. We have had these in the past and they have gone out of business through lack of customers. Nearly everybody has a car and goes to a local supermarket and if they do not, they either have items delivered directly to home or neighbours assist. We have not had a shop of pub for years and everybody is getting on with life extremely well. The Royal Oak and White Hart are only minutes away and gone are the days of frequenting pubs daily. They are now more used to eat in.

There are plenty of brownfield sites already with services provided that a smaller developer could build upon.

We also do not require any more showman pitches as I feel Normandy has all the traveller sites for GBC.

Housing is required in Guildford town centre and the University campus.

The council have used Normandy and Flexford as one area when it suits them and two areas again when more advantageous results are required. You cannot do this – is it even legal?

Residents now cannot concrete their front drives how on earth can the council justify concreting a complete field. Normandy is used by dog walkers, ramblers, cyclists, leisure and competitions, horse riders and tourist to Guildford. With what the council propose no tourist will have these pleasures.

Normandy is the countryside for Guildford for people to come and enjoy and relax and although I agree some housing is required in smaller pockets I do not agree that a “Milton Keynes” needs to be built doubling the footfall, the terrible congestion on both Westwood Lane and Glaziers Lane, the air quality, the noise level, the services overload, the loss of agriculture, fauna, animal and insect habitation, the peaceful and quiet lifestyle that is my human right. The lack of places at the local doctors surgeries that is now running at over two weeks for an appointment. The threat to the Thames Basin Heath Special Protection Area, the risk of flooding, the lack of consideration of the countryside view of urbanisation near the Surrey Hills.

Finally, I hope that Taylor Wimpey and GBC are not negotiating a Section 106 Agreement which is a way which makes a development proposal acceptable in planning terms that would otherwise not be acceptable – just for the sake of money at the detriment of those living in Normandy as this would make it morally illegal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

With reference to my previous letters on the subject of GBC plans for housing developments in East and West Horsley, which I draw your attention to and repeat all my objections and reservations contained therein.

Further I object to East and West Horsley being removed from the green belt. The councillors we voted for promised to protect the Green Belt, especially in East and West Horsley.

There is no mention regarding the provision of the infrastructure (schools enlarged medical centre parking facilities etc)- that will be necessary to cope with the increase in population and the absence of available space to cope with the additional traffic and parking facilities.

I object to the building of houses on land to the north of west Horsley on which 120 houses are proposed – this land is a flood zone area and was so designated but subsequently removed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2283  Respondent: 8876513 / Tony Forrest  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I feel strongly, along with my family that this proposal to desecrate our local greenbelt land for a massive development to which there is no proven need is abhorrent to us.

The proposed site falls in the sight line of the Surrey Hill Area of Outstanding Natural Beauty and the rural landscape is probably the main reason that we chose to live in this beautiful hamlet. I really thought when we moved into Ockham nearly thirteen years ago that our concern would be disappointment if local neighbours were given permission to build properties out of line with the area and ruin the landscape for future generations. I never contemplated that we would be contesting a whole additional enormous development close to us on green belt land.

I object primarily that this site should be included in the plan at all, as far I can see, no exceptional circumstances have been established to warrant removing it from the Metropolitan Green Belt. It is only very recently that Guildford Borough Council unanimously refused a planning application for this area.

My understanding of a Local Plan was to enhance the quality of life of our Borough's resident population not to actively encourage urban sprawl. I have to have hope and faith that the many bodies involved in providing the detail behind our concerns will be able to convince that you that the above area of inclusion is impracticable but totally unjustified.
I look forward with great interest to hopefully learn soon that this site will remain out of the Plan and in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT to the lip service paid in these policies to issues that need genuine attention and policies that achieve these desirable outcomes

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT to proposals for increase in retail space when the weight of evidence is that more and more shopping will be done on the internet and the need for shops will reduce rather than increase. The available brownfield sites should be used to develop homes where they are most needed and where the occupants genuinely could be expected to walk or cycle rather than using cars. The opportunity is being missed to develop up to 4,000 homes on brownfield land in the River Wey/Walnut Tree Close area.

It is also a pity that the issues raised by the Town Centre Master Plan, the Guildford Group's proposal for new river and rail crossings and the redevelopment of Guildford station are not addressed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H2 Affordable Homes

I OBJECT to the idea that the Plan will meet the need for affordable homes. The homes that will be built by developers on the land released by the Plan are unlikely to be genuinely affordable even if sold or let for less than 80% of market value. The plan will result in large houses built on Green Belt land which will be occupied by wealthy commuters since it is the large houses that make profits for developers. There is no meaningful policy to build council owned homes nor to make land available to housing associations. I agree that there is a real need for affordable homes for key workers throughout the Borough but this Plan will destroy our environment without providing the affordable homes.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy 11 Infrastructure and Delivery

I OBJECT to the proposals for huge developments such as the 2,001 homes planned for Wisley Airfield and the many smaller ones such as the 533 homes planned for West Horsley without detailed and deliverable plans for infrastructure improvements. The Plan assumes that infrastructure improvements will follow the development of new homes even though it is clear that transport, educational, energy, water, drainage and communications services are already inadequate. The only likely source of funding for the necessary improvements is the generation of CIL which encourages greenfield rather than brownfield sites being developed. This is the opposite of sensible rational planning and is in danger of creating a collapse in essential services.
Finally I would like to comment on the sites in East and West Horsley where I live. My comments above on Policies in the Plan will make clear that I think it unreasonable and grossly bad planning to propose a 35% increase in the number of homes in West Horsley. Certainly the Horsleys need some new affordable homes but they do not need 533 new homes a vast number of which will be large houses for commuters. There are inadequate bus services and the trains are already full.(it is impossible to park at Horsley or Effingham stations some days) The medical services are at full stretch and the Raleigh Primary School and Howard of Effingham Secondary School are already turning pupils away. Both villages already suffer from flooding and the addition of 533 new homes will exacerbate the problem.

Of the six major sites proposed, the Manor Farm site (RefA 38) and the Ockham Road North site (RefA 39) are perhaps the least objectionable since the Manor Farm site is fairly self-contained and presents little scope for further expansion while the Ockham Road site is close to the shops, medical centre and station, so offering the possibility of reduced car use and a suitable sit for smaller homes for people wishing to down size (always assuming the drainage problems on that site could be overcome). The East Lane site (A41) is the most objectionable since it would destroy an open area of countryside and potentially lead to much further development. West Horsley is a rural village. It is not semi urban and it would be madness to develop a semi urban village five miles from Guildford with no viable proposals regarding infrastructure.

Guildford does not really need 13,860 new homes. The Plan should be put on hold and reviewed post Brexit with a view to determining a reduced target based on updated assumptions that can be disclosed and debated. We could then hopefully identify a sensible number of homes to be developed in the villages without destroying the Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

PolicyP2 Green Belt

I OBJECT to the insetting of 14 villages and the proposed infilling within a further 11 villages. The Green Belt was created to protect London, not just Guildford and once it is lost it will be gone forever.

There are pious policies to protect the heritage and develop tourism but they count for nothing if the Green Belt setting of the Town and the heritage sites is destroyed, the roads clogged, and large areas put at greater risk of flooding.

Rural exception homes are proposed to be built anywhere near a settlement. This is a further insidious attack on the Green Belt. At the very least the policy should be limited to genuinely exceptional circumstances where LOCAL NEED cannot otherwise be met.

Developing homes shops and businesses in the Green Belt will put intolerable strains on infrastructure that is already overstretched. In particular it will increase traffic movements and car parking requirements; the idea that thousands of people will walk or cycle five miles or more to get to school or work is ludicrous; some able bodied people might do so in fine weather but a large number of journeys have to be made by children or by the elderly or the infirm. Even those who are fit to walk or cycle significant distances are unlikely to do so in bad weather in the winter. Developing 8,086 homes in the...
Green Belt will not only be an unnecessary environmental disaster but create social and logistical problems. The number of planned homes should be reduced and more of them should be planned for Guildford Town Centre.

The NPPF paragraph 17 requires local plans to allow local people to shape the plans. The consultations that have been carried out clearly show that the citizens of Guildford overwhelmingly support preservation of the Green Belt and the draft Plan shows complete disregard for this.

Policy P3 Countryside (beyond the Green Belt)

I OBJECT to proposals that seem to give Ash and Tongham additional Green Belt that has stronger protection than other parts of the Borough. Coupled with the disproportionate weighting of development in the East of the borough compared to the West it inevitably leads to the suspicion that politicians who live in the West are adjusting plans to their own advantage.

I am writing to comment on the revised local plan which has been issued for consultation. I will comment specifically on a certain number of Policies but I OBJECT overall to a plan which is based on unsubstantiated data as to the number of dwellings needed and which on the vital issue of infrastructure offers nothing but pious hopes.

Policy S1 Presumption in favour of sustainable development

I OBJECT that although this appears to be based on the NPPF it fails to give a guide to the resolution of inherent conflicts between economic growth, social justice and environmental protection. In particular it fails to recognise that development in rural areas with inadequate infrastructure (especially transport) is unsustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Policy S2 Borough Wide Strategy

I OBJECT to the proposal to build 13,860 homes in the Borough over the Plan period which leads to a necessity to build in the Green Belt

The figure of 13,860 has not been properly scrutinised and is based on calculations carried out by consultants whose assumptions are kept secret and are not therefore open to debate. Guildford Borough has 89% Green Belt and a woefully inadequate infrastructure but these constraints on development are completely ignored in setting the figure of 13,860 homes. The figure also ignores homes for which planning permission has already been granted and expected windfall sites.

Since the projected need for new homes is based to a large extent on projected immigration during the Plan period, the figures clearly need to be revised following Brexit.

Many of the new homes are said to be required to accommodate projected student numbers. The University already has planning permissions dating back to 2004 which it has failed to utilise. If accommodation was built in accordance with these existing permissions and if underground car parks replaced surface car parks, students could be accommodated on the university campus and not only would the need for development of Blackwell Farm become redundant but large numbers of affordable homes in the urban area of Guildford would be released where they are most needed.

Answer (if comment is on questions 1-7 of the questionnaire): ( )
I refer to the draft local plan with regard to further housing development on the site of Garlick's Arch between Kiln Lane and Burnt Common, with 400 residential units and industrial use.

This plan will trap the historic village of Ripley and also the village of Send between the entry from and exit to the already totally overcrowded A3. The village of Ripley is already overloaded with traffic from the A3, and Newark Lane as a consequence is becoming a death trap. The villages will be totally submerged in fast traffic racing through day and night.

It is an unviable plan when further out there is land available to such development without ruining the lives of innocent people who reside in these beautiful villages. We must preserve our history at all costs. I am also totally opposed to the frightening plan for development of the old Wisley Airfield. I travel on the A3 regularly, and the danger posed by more traffic joining the road at the Ripley turn-off does not bear thinking about. Please register my opposition to both plans.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Draft Local Development Plan - Send, Send Marsh & Burntcommon

I wish to OBJECT strongly against the addition of Garlick's Arch at Burntcommon (site no A43) to this Plan.

This area of unspoilt Green Belt agricultural land of some 70 acres .. which includes about 12 acres of ancient woodland (some of it dating back to the 16th century) is far too precious to be sacrificed to concrete and tarmac in the form of 400 houses and nearly 2 acres of industrial buildings and warehousing.

Quite apart from losing lovely Green Belt land, the extra traffic generated by an estate of this size, which will consist of about 800 cars and many HGV's, will put an unbearable pressure on all the roads around the Burntcommon roundabout (A247/B2215), especially at rush hour times. The proposal to create extra entry and exit slip roads from the A3, London bound, off the A247 Clandon Road will add grossly to the congestion.

As well as the roads being unable to cope with such huge population growth, neither will the local schools or the Villages Medical Centre.

This site is an entirely unacceptable proposal.

Please ensure that the Government's Planning Inspector sees this letter

**Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Transport:** Inevitably a substantial number of people who will occupy new houses will commute to either London or Guildford. The car park at Horsley Station is already at full capacity, but there is no provision of increasing the size of the car park.

I therefore **object** to the proposed numbers of houses GBC are planning.

Drainage: I asked GBC's representatives at the Open Evening about the provision of water supply and drainage & sewerage to be constructed for the proposed houses. The answer was that the house builders will be responsible for drainage and water. Of course this was stating the obvious, but it only referred to the actual houses to be built. I could get no answer to the main point which was what happens when the new houses water and sewerage systems are joined to the existing Victorian network. There are already people who's water supply suffers from low water pressure and others where sewerage backs up from time to time.

There is no strategic plan as far as I could see for upgrading of the networks which are necessary for GBC's staggering housing numbers. One of the responsibilities of the Conservative Party and GBC is to provide 'joined up government' and the coordination of our infrastructure. In addition to the new housing, and the associated services which need constructing, the existing pipes need clearing and maintaining as many are broken or blocked.

I therefore object to the proposed numbers of houses GBC are planning.

Education: When we moved to West Horsley 30 years ago there was enough capacity for local children to go to the Raleigh School and thereafter to the Howard of Effingham. Both schools are now at their capacity limit and rely on temporary school room 'containers' to accommodate current numbers. The additional strain on the system which will arise has not be addressed by Surrey CC nor does GBC seem to have allowed suitable land area for addition of schools and playgrounds.

I therefore object to the proposed numbers of houses GBC are planning.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I have reviewed the Guildford BC plan and attended the open evening at East Horsley Village Hall. I find several matters contained therein unacceptable to me as a resident of West Horsley.

BREXIT: Since the publication of the Guilford BC Local Plan the nation has voted to leave the EU. As a result the number of migrants to England will be substantially reduced. This means that the proposed number of houses to be built within the borough are inaccurate and most probably an overestimate of the numbers that will now be required. The local plan is in effect void and should therefore be put on hold until the negotiation of UK's exit from the European Community has been completed and the future migrant policy and immigrant numbers known.

I therefore object to the proposed numbers of houses GBC are planning.

**The National Planning Policy Framework (NPPF):** This national policy requires GBC to address and take into consideration the character of our village, West Horsley, and see that future expansion does not spoil the existing quality of residential surrounding in which we live. The proposed density in all the areas on which housing is proposed is totally out with this national policy.

I therefore object to the proposed numbers of houses GBC are planning.

In conclusion it would seem that the estimated requirement numbers for housing are based on an out of date European position and assume that Guildford needs to expand industrially or commercially. That is not the case, Guildford is a viable borough as it stands and its residents would be better served by building starter homes and flats in the centre of the town of Guildford itself.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to lodge objections relating to the Guildford Borough Council New Local Plan 2016 in respect of:

- the scale of the house building programme that appears to be excessive;
- the proposal to build some 65% of developments on land that is currently Green Belt: and,
- the infrastructure proposals that are inadequate even to meet the needs of what is required at present, let alone developments proposed in the Local Plan.

My rationale for the objections listed above is articulated in the letter sent by East Horsley Parish Council Local Plan Response dated 13 June 2016 to which I respectfully direct your attention. Their letter contains additional observations that address many other particulars contained in the Local Plan and these, too, I endorse.
Please consider all that East Horsley Parish Council has stated in their Response to represent my views also, and include these in your survey of responses as emanating from my address too.

I observe with deep misgivings the totality of house-building that is proposed for the corridor that follows roughly the line of the A246 Guildford to Leatherhead road insofar that if authorised this volume of dwellings within and between villages will change for ever the character of the land in which I reside, and it will turn a rural environment into one that is essentially urban. If permitted, this Plan would ruin all that I and many others enjoy about residing in this village (East Horsley).

I therefore object most strongly to plans: to remove from East Horsley: the protection currently provided by its inclusion in the Green Belt, to extend the existing boundaries of the Settlement Area, and to describe it as a 'District Centre'.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to lodge objections relating to the Guildford Borough Council New Local Plan 2016 concerning land at former Wisley Airfield, Ockham in respect of:

- the proposed development represents a fundamental breach of Metropolitan Green Belt rules;
- the site does not meet acceptable levels of sustainability;
- the site will have a severe impact on local traffic and infrastructure;
- there are damaging health and safety implications arising from development of this site;
- the environmental impact on protected wildlife will be substantial; and,
- the proposed development is totally out of keeping with local character, context and distinctiveness.

My rationale for the objections listed above is articulated in the letter sent by East Horsley Parish Council Local Plan submission on Policy A35 dated 4 July 2016 to which I respectfully direct your attention. Their letter contains additional observations that address other particulars contained in the proposed Policy A35 and these, too, I endorse.

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]

adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to express my views as to the local plan regarding Normandy.

I am in complete agreement with the removal of sites A46 and A47, as these have very poor access and one interferes with a public footpath which would be hemmed in instead of being open, a space accessible to those who live in the area , providing a place for well being and walking, the open air and an area away from traffic.

A47 is an area which is liable to flooding having a stream from Flexford running through it and in some winters, the area has been under 3ft of water. Access is also limited and narrow.

These two sites would exacerbate the amount of traffic in these narrow lanes, detrimental to health and local wildlife.

I see that a part of Normandy has been [illegible word] from the Green Belt, including homes in Guildford Rd, the northern end of Glaziers Lane, Flexford, Walden Cottages and Palm House Nurseries.

None of these places is suitable for housing. The access is small, [illegible word] too narrow and the whole [illegible world] become a place of traffic pollution, another green lung taken out of the surrounding area of Guildford.

The infrastructure required to make this work and the traffic to flow is not very feasible in This area as the only real [illegible word] road is the A3 which already is overloaded at rush hour times and can cause great problems when accidents occur. The A31 fares no better. From Normandy one can see the traffic [illegible word] to tail along its length and this would be made even worse.
No doubt the homes built would lack anywhere other that the drive to park the car and children have nowhere to play in a garden. All most homes seem to have these days is the minimum of a square of grass at the rear of the property.

All in all this area is not conducive to such a large number of homes being built as the infrastructure, just is not there to take the additional volume of traffic. I therefore object to this Local Plan, as it will also affect the “openness of the Green Belt.” The Green Belt is there as a safety net that we may all enjoy some open space in our surroundings. It should not be reduced of “whittled away”.

The place to build is on brownfield sites and these must be identified and used instead of denying the surrounding area its “green lungs” for the enjoyment of all residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the Proposed Submission Local Plan: Strategies and Sites June 2016 particularly the negative impact it would have on West Horsley.

I am totally against the removal of West Horsley from the Green Belt and the scale of the proposed developments. Your plan suggests a 35% increase in the number of houses in this village which would totally change the rural nature of the community and overwhelm the infrastructure which is already under strain.

The local road system is in appallingly bad condition and would need very major upgrading to cope with the massive increase in population planned. I do not see any realistic prospect of this happening.

Local schools are already full or nearly full and could not cope with the planned population increase. Surrey CC apparently do not plan to provide any additional local school places but blithely expect parents to drive their youngsters to schools out of the village putting a huge extra strain on the already inadequate road network.

There is a drainage problem already in West Horsley and concreting over large areas of currently undeveloped land will cause huge extra problems.

This plan makes a mockery of your own Green Belt and Countryside policy and demonstrates contempt for the quality of life of the residents of West Horsley.

The current Guildford Plan has been very poorly thought through and I urge you to scrap it in its entirety.

The local road system is in appallingly bad condition and would need very major upgrading to cope with the massive increase in population planned. I do not see any realistic prospect of this happening.

Local schools are already full or nearly full and could not cope with the planned population increase. Surrey CC apparently do not plan to provide any additional local school places but blithely expect parents to drive their youngsters to schools out of the village putting a huge extra strain on the already inadequate road network.

There is a drainage problem already in West Horsley and concreting over large areas of currently undeveloped land will cause huge extra problems.

This plan makes a mockery of your own Green Belt and Countryside policy and demonstrates contempt for the quality of life of the residents of West Horsley.

The current Guildford Plan has been very poorly thought through and I urge you to scrap it in its entirety.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s draft Local Plan proposals to build 1800 houses, an industrial park and a highway on the slopes of the Hog’s Back at Blackwell Farm, which will:

- Destroy views form the Hog’s Back ridge – a nationally designated Area of Outstanding Natural Beauty
- Remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- Increase tailbacks on the A31 and traffic congestion
- Result in rat-running through local roads
- Add to Guildford’s pollution

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In response to your call for comments on the draft Local Plan I wish to submit the following:

The Key Evidence document ‘Guildford Borough Economic Strategy 2013-2031 makes no case for locating large numbers of homes in West and East Horsley or neighbouring villages. The number of new houses proposed for West Horsley is totally out of proportion to the existing number of dwellings and totally disproportionate to the number of new homes allocated to other villages. No reason has been provided for this level of new houses to be allocated to West Horsley. It is even more illogical considering that most new employment opportunities are to the west of Guildford. (West Horsley is east of Guildford)

The development of 385 homes on the four proposed sites is at much higher densities than currently exists in the village settlement and will be completely out of character with the existing mix of different housing styles and layout of the village.

Infrastructure such as schools, medical facilities, drainage, both surface and foul, road capacity, shops, parking, are already stretched. Adding another third to demand would make the situation intolerable. The proposed homes building programme is totally unsustainable. This is especially so as there is no absolute requirement for additional infrastructure to be in place before the proposed development takes place. The surface drainage is already inadequate to deal with heavy rain.

I suggest that the proposed plans should be rejected.

West Horsley has specific and differentiating characteristics from East Horsley in that it benefits from a semi-rural nature and the loss to development of the sites being considered would change the village’s characteristics forever. I particularly STRONGLY OBJECT to the addition of a new proposed site for 90 homes on land to the south of West Horsley (Policy A41) which is along East Lane, in completely rural surroundings. Throughout West Horsley, one of the defining characteristics of the village is that where there is settlement on one side of the road, there are green fields or woods or open spaces on the other side, thereby giving the village its rural nature. The site covered by Policy A41 is inconsistent with the aims of the National Planning Policy Framework (NPPF) and the nature of the village of West Horsley. It does not adjoin any existing Local Plan 2003 settlement boundary and would seriously affect the rural character of the main arterial route through the village.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Infrastructure and Sustainability:

• The Station Parade group of shops in East Horsley, which is also used by most residents of West Horsley, is designated a “District Centre” in the Local Plan, which is a classification that results from a complete misunderstanding of what these facilities are and how they are used by the local population. The shops are already fully utilised and car parking is at a maximum. Such an incorrect reference means the area is likely to be inappropriately targeted for future urban developments, where no opportunity exists.

Answer (if comment is on questions 1-7 of the questionnaire): ()
State educational provision, both at junior and senior school level, is already under strain and has been a problematic issue for Surrey County Council and the local community for The Raleigh School, which serves both West Horsley and East Horsley, is full every year. Its site is already fully developed and the opportunities for further expansion are limited. Even the two private schools in the villages of East Horsley and West Horsley, Glenesk and Cranmore, are either at, or near, full capacity.

Secondary school places are already restricted in number and The Howard of Effingham School, which currently takes children from West Horsley, is at full capacity. All other secondary schools are considerably further afield in either Guildford or Woking but even those like the George Abbott in Guildford are over-subscribed.

Surrey County Council has published no plans for creating further school places for children of all ages in the H So if hundreds of new families move to the village, where exactly will their children go to school?!

The Horsley Medical Centre is already at capacity, as it serves both East and West Horsley, and any additional development will require an expansion of this. There is scant mention in the proposal for a small increase in the medical facility to serve an increased population in the villages.

Further housing development would also mean that the existing utilities infrastructure in the area would be stretched, probably beyond acceptable limit. Water pressure in the area is already poor and surface water drainage along East Lane is a continual problem, with regular flooding after heavy rain. The addition of further built environment and associated hard landscaping would only exacerbate these problems. Thames Water has advised Guildford Borough that the current wastewater network in the areas of West Horsley are unlikely to be able to support the demand that would be expected from all of the proposed developments. The entire foul drainage system in the area would need to be upgraded to cope – this is neither proposed nor allowed for in the proposed Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/8390  Respondent: 8878241 / Janet O'Hara  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

So in essence, with regard to the villages of East Horsley and West Horsley, the Guildford Local Plan imposes an unsupportable burden on drainage infrastructure, schools, the roads network, medical services, shopping provision, parking facilities and public transport. Therefore, I STRONGLY OBJECT to the Guildford Local Plan, as currently drafted, on the basis that allowances for these issues are barely addressed and there is no consideration whatsoever for the need to expand local utilities and services to accommodate the proposed increase of residents in East and West Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8387  Respondent: 8878241 / Janet O'Hara  Agent:
Transport and Roads:

- Many of the traffic routes in and around the Horsleys are only lanes, often with pavements on one side of the carriageway. The roads are already busy, with queues at rush hour and the state of potholes on most roads is atrocious. Considering many households now have two cars, the potential increase in traffic from so many proposed new homes would overwhelm the existing infrastructure and lead to serious, and potentially life-threatening, safety concerns.
- Car parking at Horsley railway station is already limited and usually full during the working week. There is no adjacent land available for additional car parking provision. A significant increase in the villages’ population will increase pressure on station car parking and increase traffic movements to and from the station, which already has a terribly dangerous intersection at its access junction. There is little or no scope for improvement to this situation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

The Environment:

- The village of West Horsley, including all the major Development Sites, is currently ‘washed’ over by the Green Belt. I strongly object to the policy in the current document which seeks to remove East Horsley and West Horsley villages from the Green Belt, by altering the Green Belt boundaries by the procedure known as insetting.
- The Green Belt within Guildford Borough is a Regional and National asset and should be protected in so far as is absolutely possible. Removal of land from the Green Belt should only be allowed in “exceptional circumstances” after detailed consideration of the individual sites concerned. Otherwise removal will forever change the nature of these villages and the character will be lost, an approach that our generation will live to regret. The proposed Guildford Local Plan does NOT demonstrate that these “exceptional circumstances” exist, which renders the action unsound. I therefore OBJECT to the Guildford Local Plan where it proposes East and West Horsley being inset from the Green Belt and ask that the villages remain washed over by the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to you with objections in regard to the above and request that the following points be taken into account when you are considering the matter.

I have lived in West Horsley for over 20 years and therefore the majority of my comments relate to the specific issues for this particular village.

The points made in this letter are in addition to the points made by Porta Planning in their separate submission on behalf of myself and a group of neighbours.

Density, Quantity and Location of Proposed Homes in West Horsley:

- I appreciate the pressure on Guildford Borough Council to adopt a deliverable Local Plan for the Borough for the plan period but believe that such housing provision should ideally be located on existing brownfield sites and be located as near as possible to the centres of employment, such as Guildford. The Green Belt is a defining character of Guildford Borough and there should be an insistence that it must be protected as once the Green Belt has gone it can never be reinstated.

- The existing village settlement of West Horsley consists of 1,111 homes, currently low density housing with a considerable range of ages and housing styles. The density of the proposed developments with 385 homes proposed on the four Parish sites within West Horsley and 100 homes proposed on a fifth site in East Horsley, but abutting the West Horsley Parish boundary, will be significantly greater than anywhere currently existing. The Local Plan will considerably enlarge the two village Settlement Areas, as defined in the GBC Local Plan 2003, and the quantity of proposed homes in West Horsley combined with its increased density, is completely out of character with the existing village, where a density of 10 – 15 homes per hectare is much nearer to the norm and more appropriate. I therefore OBJECT to both the quantity of homes and the density proposed for West Horsley in the Guildford Local Plan.

- No sound reasons have been given for the proposed changes for extending the boundaries of the Settlement areas of both East Horsley and West Horsley, which seem to be at the whim of local land owners who are clearly prepared to sell for a traitorous profit and thereby increasing the land available within, and adjacent to, the settlements for the proposed and future additional developments.

- The scale of the increase in proposed new houses, which is an increase of up to 35% on existing West Horsley households, is greater than any other single area in Guildford Borough. This inflated number of new houses proposed arises from a Strategic Housing Market Assessment (SHMA) that was generated by a consultant’s mathematical model. This consultant’s model is not revealed in the plan, nor, apparently, has it been revealed to GBC. However, this SHMA target for housing number has then been taken without question and further increased by GBC to give a proposed population increase which is almost 70% higher than official national estimates for population growth in the Borough. I therefore question whether the SHMA is sound and OBJECT to the housing numbers proposed within both the Borough generally and specifically in West Horsley.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In summary, the National Planning Policy Framework (NPPF) requires that new residential developments MUST respect the character and density of housing in the area and be limited in quantity by the availability of infrastructure and local facilities. Taking into consideration the points I have raised in my objection, it is clear that NONE of this is being taken into account, particularly with regard to West Horsley, and the proposed high density developments are unbalanced and unsustainable and will dramatically change the character of our village forever. All of this is combined with the dubious legality of removing the villages from being washed over by the Green Belt.

I therefore STRONGLY OBJECT to the Proposed Submission Local Plan: Strategy and Sites June 2016 as many aspects are, in my opinion, unsound and damaging to the villages of East and West Horsley and our community.

Please consider my comments and revise the Proposed Submission Local Plan accordingly.

Answer (if comment is on questions 1-7 of the questionnaire): ()

New Local Plan 2016 – The Horsleys Development Sites

With the few exceptions noted below I object to overall proposal regarding the Development Sites contained in the New Local in respect of the Horsleys for the following reasons:

1. To build nearly 600 houses in the Horsleys within the next few years is quite out of proportion to what the local area needs or can cope with. I believe the average number of houses built in East Horsley for many years averages around nine. So what is being proposed for East Horsley is nearly three times that rate. And where is the need for these numbers coming from? In 2015 the UK population increase by 291,000 – less than half a percent. Apply that to the current number of houses in the Horsleys and it works out a 14 houses a year. And with with Brexit now a reality that increase in population should fall signicantly.

2. The larger developments will tend to be out of character with the two villages which have been around for hundreds of years and grown organically. New houses have tended to be built singularly or small multiple units and therefore, over time, have fitted in – but the estates being proposed will inevitably be of a “pack-em-in and get the most profit” style, will not.

3. The local roads are unable to cope with the existing traffic. Ockham Road North and South are narrow and windy, with only one pavement in some places which is often just 2-foot wide and which at times vehicles need to mount for large vehicles to pass in the opposite direction. The additional traffic generated by these new developments will exacerbate an already intolerably dangerous situation.

4. The transport requirements of residents of the new developments can only be met primarily by private cars and the existing train station at Horsley. The junction between the Ripley roundabout and the A3 heading northbound is already crowded with cars during the rush hour – adding more cars with lengthen the delays currently faced. The car park at Horsley station is already close to capacity – last winter when I went there at 10.00am there were only six available spaces. Where I live, about a mile from the station, there is a layby next to the side of my property which is used by the customers of the local butchers Connisbees and I already see cars parked there all day with the owners walking down to the station. If the car park becomes full, so will the layby and then we’ll have cars parking on Ockham Road itself creating even more traffic problems.

1. The additional population created by the new developments is likely to be around 2,000 or more with perhaps 400-500 children of school age. There are not the medical or educational facilities available to cope with these additional residents.

2. And perhaps most important of all the plan contravenes the Green Belt regulations in that the requirement for the development does not meet the “special circumstances” set out.

The only exceptions to my objection are in respect to:

1. The five smaller developments proposed of between 5-15 houses could, if carefully planned and executed with consideration for the local ambience, fit in well and the total number of 60 houses would represent a reasonable growth rate.

2. The Thatcher’s Hotel development if restricted to retirement housing. The residents would benefit from the facilities at the southern end of the village with Church and shops and also the nearby location of other retirement properties. There would be little impact on commuter transport or road usage generally and none on schooling.

So with the exception of points (7) and (8) above I object to all the sites proposed in the New Local Plan and trust the Council will remove them from the local plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I strongly object to the use of this land as a SANG. These fields are used to raise cattle and there is already a Public Footpath across the fields.

I understand that the biodiversity of this land will be lost if it is made into a SANG – currently there are skylarks who use the disturbed ground (disturbed by the cattle) for nesting, without this land disturbance we will lose the skylarks which are on the red list of endangered birds. Egyptian Geese are also known to have nested on this site.

If this land is used for a SANG what will become of the farmer and his son who currently graze their cattle here – are they to be made ‘jobless’. We should be doing more to protect our Farmers and they land they farm for arable crops or livestock. As a country we need to provide more of our own food and not be importing from around the world.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

As above I strongly object to this use of working farmland.

This land has had a total of 1266 homes allocated against it – is this not predetermination? At the time of writing this objection this site has not been before the Planning Committee or decided. This application has been with the Planning Department for 3 years and is still not decided.
The largest number of homes allocated to this site are in Ash/Tongham – which is a few miles from this site – people are hardly likely to travel that distance just to walk their dog or use it for recreation.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Policy A46 (Page 229) – Land to the South of Normandy and North of Flexford.

I object to the inappropriate size of this development. The roads surrounding this site are unclassified rural roads, and would be unsuitable for the increase in traffic from such a development. Much of the increased traffic from the site would have to use the Aldershot Road – this road is already extremely busy. I understand that there are spaces at Secondary schools in the area, so the need for a new school is doubtful.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H1: Homes for all

I agree that there should be a wide variety of homes to meet a range of accommodation needs.

Student Housing: The University already have planning approval for a large number of student bedsaces on campus and should be persuaded to build them. This would release some family homes that are currently HMOs onto the open market, thereby reducing the number of new build family homes. I agree that the University should be doing more to house their students on campus, particularly when they plan to grow their student numbers.

Older People: Not all older people want or need to live in ‘sheltered’ type accommodation, but should be able to downsize into small bungalows or apartments. Currently there is little protection for small bungalows to remain small – they are often extended into the loft space, perhaps they could be afforded some protection from expansion through the planning system.

People with Disabilities: Like the elderly, not all people with disabilities want or need to live in ‘group’ type housing so some provision of smaller, easily accessible bungalows/homes should be made available.

My final comment would be that unless the infrastructure of the roads, sewage, water and power supplies are improved, then much of this local plan will cause more problems than it solves.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

From looking at the latest plans I feel strongly that no consideration to the village infrastructure has not been taken into consideration.

Travel no regular us service and a station that has a very small car park facility that has no more room to grow. The local children have to rely on school buses to get them to an oversubscribed school and an increase in property would add to the heavily used A246 and village roads already this was very apparent when some roads in Horsley were closed and traffic was directed.

The local school is oversubscribed and the local secondary Howard that asked to move to an adequate site was refused.

There is no true village centre and an increase in properties would not find adequate services with a doctors practice struggling to meet demands.

Also the road systems on the proposed sites are poor and would cause traffic congestions. Also very surprised to receive a flyer from Dandara through our door saying how they are intending to build houses at the bottom of Shere Road which has never been mentioned in the plan before !!!! the school Cranmore already causes congestion and this would add to it.

We are told that this road is in the Surrey Hills AONB and the land around here is home to slow worms which are a protected species.

Overall I do not feel that the villages are capable of accepting the changes and to take them out of the green belt would affect the area which has got AONB attached to it, not adequate infrastructure and schools and roads to support these unnecessary changes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3150    Respondent: 8879553 / Sheila Lauchlan    Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am not a resident of Guildford, but being a Cobham resident, I am more interested on what goes on, on the doorstep, than those Guildford residents living further away.

• I would like to object to the proposal to remove the former Wisley Airfield from the Green Belt. This area provides amenities for local people and prevents the urban sprawl from London. A development would create a corridor stretching from London to Guildford.
There are no reasonable arguments for removing this site from the Green Belt.
Guildford has ample brown field sites.
The surrounding area is composed of very small villages and narrow roads, and the proposed development would change the nature and character of these communities. It would overwhelm them.
The villages in the area are historic rural settlements, and the proposed draft plan would have an adverse effect on them.
Ockham is a hamlet of 159 houses. The proposed development would subsume this village, with 2000 houses and other buildings, some being 5 storeys high. This would provide a density greater than some London Boroughs.
Hatchford would be greatly affected by this development.
The impact on the local area, where the roads are already congested, would be unbearable, and I would like to object to projected number of cars i.e. 4000 plus extra traffic servicing the area. The roads are little more than farm tracks and will not cope.
The increased traffic would be dangerous on the narrow local roads. Cobham is the nearest the nearest shopping centre, and parking and traffic are already problematic.
As there are no cycle paths or footpath, the roads are totally unsuitable for walking and cycling.
There would be an increased congestion, on the already congested A3 and M25, especially at the junctions. The proposed secondary school and the proposed application currently submitted by Wisley RHS would significantly increase traffic numbers, adding to an already congested area.
There is inadequate public transport and the local railway stations would not cope with additional cars needing to be parked and the trains are already used to capacity at rush hours.
Air pollution is already in the area already exceeds EU permitted limits, due to the major roads in the area, and I would like to object to any increase in the level of pollution, caused by increased traffic numbers.
I would also like to object to the fact that there has been insufficient consideration given to the damage that such a development would cause to the ecological and environmental aspects of this special site, (Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI)).
The area is a haven for wildlife, some of which is already endangered. The introduction to this number of residents, along with there pets would have a devastating effect on the wildlife. Protected species on and near the site and wildlife corridors would be destroyed. I would particularly like to object to this issue.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/404  Respondent: 8879841 / Jonathan and Theresa Hulford-Funnel  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the plan due to the impact upon local schools and our medical facilities.

Our local schools in the area are already full and oversubscribed. There doesn’t appear to be any extra school places planned to accommodate the extra children that would move into these new houses.

It is a similar situation in our medical centre. Unless you are extremely unwell and in need of immediate medical attention, it is currently almost impossible to get a timely appointment.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/400  Respondent: 8879841 / Jonathan and Theresa Hulford-Funnel  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to plan from a traffic and parking perspective.

Most of the new houses will have at least 2 cars, which means 6,000 more cars within a three mile radius of the villages. The roads and major junctions already have considerably heavy traffic at peak times and cannot cope with more. Sometimes it takes 15 minutes to queue and then get onto the Epsom Road from Ockham Road by the Duke of Wellington. Parking is already very tricky at times in the village, as it is at the railway stations and medical centre.

I object to the plans from a commuting perspective.

Trains to London at peak times are already at capacity. They simply cannot take any more people. More commuters will mean misery for us on daily basis.

I object to the plan due to the impact upon the local Road Network.

In respect of the proposals for development at Wisley Airfield and for an upgrade the current A3 junction at Burntcommon to a full 4-way junction, SCC traffic modelling anticipates increased use of three routes accessing the A3 at Burntcommon in order to travel to Guildford and beyond. The SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”. It appears that the Plan is proposing a strategic site at Wisley Airfield without even knowing what improvements to the local road infrastructure will be required. If that is the case for Wisley Airfield, then it is almost certainly true for the proposed developments in East and West Horsley as well.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to comment on Guildford Borough Council's new draft Local Plan, which is now open for consultation until 18th July 2016, and to strongly object on several areas.

I object to the plans due to the loss of Green Belt land.
The green belt was put in place for a reason – to stop urban sprawl and protect our countryside. If we continue to build on our countryside it won’t be long before we have none left. Is this a legacy we want to leave for our children?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the plan due to the impact upon flooding.
Ockham Road North and East Lane floods periodically, as do the gardens in this area. Building on this land is only going to make the situation worse. Our drains can’t cope with what we have already.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2119  Respondent: 8879841 / Jonathan and Theresa Hulford-Funnel  Agent:
The changes in the Guildford Local Plan 2017 are minimal, four of the original housing sites remain, plus sheltered/care homes, employment/retail space and two schools on the former Wisley Airfield.

1. The developments will put further pressure on the already overburdened infrastructure of both East and West Horsley.
2. The road through East Horsley (Ockham Road North & South) is inadequate and there is no scope for expansion. Normal cars have to slow down just to pass each other in certain parts, and climb onto the pavement when a truck passes through.

The development plans for 2,000+ new dwellings plus considerable related infrastructure on the Wisley Airfield, is only two miles from East Horsley, and will add considerable traffic to the area.

1. We do not have sufficient facilities, schools, surgeries and other services to cope with the increased population. Gas, electricity and telephone services in the area are already operating at full capacity on very old pipes, wires and exchanges. Local roads are too narrow and winding to take the existing traffic, and there is insufficient parking anywhere, even in front of most homes. The local roads were built in the 1930s or before, and are mostly no more than narrow lanes where cars have to slow down to pass each other. The access roads to East Horsley are narrow and winding and are not sufficient to handle even today’s traffic.
2. The scale of the proposed Wisley Airfield development is way out of proportion and way out of character to the existing infrastructure and the space available in this small, picturesque old village. The new town will completely destroy the special character of our historic village.
3. The Green Belt is a policy for controlling urban growth. The idea was developed so as to have a ring of countryside where urbanisation would be resisted, maintaining an area where agriculture, forestry and outdoor leisure could be expected to prevail. The fundamental aim of a Green Belt policy is to prevent urban sprawl by keeping land permanently open, and consequently the most important attribute of Green Belts is their openness.

The 2012 National Planning Policy Framework (NPPF) issued by the Government clearly sets out the following purposes (amongst others) for including land with the Green Belt:

- To check the unrestricted sprawl of large built-up areas
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns

How do you reconcile the Wisley Airfield proposal, and the removal of the Horsleys from the Green Belt, with the NPPF’s guidelines above?

I do hope that this time, GBC will listen to the very strong objections to the local community.

<tr>
<th>Objections to Guildford Borough Council Proposed Local Plan (June 2016) and specifically to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings</th>
</tr>
</thead>
<tbody>
<tr>
<td>I object to the Plan’s key proposal that over 70% of new housing be built within the Green Belt. There are many brownfield sites in the urban areas and no need to encroach on protected Green Belt land.</td>
</tr>
<tr>
<td>I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and is more than double the figure used in previous plans.</td>
</tr>
<tr>
<td>I object to the continued inclusion of the former Wisley Airfield, a Green Belt site, where the planning application has already been unanimously rejected by GBC’s Planning Committee. No exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.</td>
</tr>
<tr>
<td>I object to the threat this proposed development within the Local Plan poses to the historic rural villages of Ockham, Ripley and Wisley and the blight on properties there. The Plan calls for the tiny village of Ockham, with narrow lanes, no streetlights, very few pavements and many listed houses to be overwhelmed by a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.</td>
</tr>
<tr>
<td>I object to the hugely detrimental impact this development would have on local roads and road safety through the massive increase in the volume of road traffic it would create. Walking or cycling safely on local lanes is difficult already and local public transport is inadequate even for the needs of the present population.</td>
</tr>
<tr>
<td>I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).</td>
</tr>
<tr>
<td>I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of acid deposits on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.</td>
</tr>

I object removing Send Business Park from the Green Belt (4.3.15). Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for its removal from the Green Belt, and GBC have not even attempted one. Therefore no exceptional circumstances, as required by the NPPF can be claimed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to removal of Brownfield sites (A4) from the Plan. This is a perfectly good housing site, within the town centre and therefore with existing infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is unacceptable.

I object to the extended development in the Green Belt (Policy P2, Site A43) I object to the already large Garlick’s Arch (A43) site being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy. The increase in housing allocation here will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages. Indeed the inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch.

| I object to the hiding of development by “deferment” (A24, A25, A26, A43)
This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have the effect of hiding the number of housed actually being built and giving an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed. |

| I object to the unfair imbalance of the Plan across the borough.
With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11,350 homes proposed in the Plan, 40.6% (4613) are within 3 or 4 miles of Ripley, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough. |
| What changes (2016)/further amendments (2017) do you suggest should be made to the document? |
| Attached documents: |
I object to the proposal for a Waste Management Facility in Green Belt (A58). The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object the change in policy on affordable homes (Policy 4.2.23). The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”. The 2017 version says: “Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.” So the developer doesn’t even have to provide any affordable homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There is no evidence provided in the local plan information to suggest that the significant investment to increase the capacity of services such as drainage and infrastructure has been planned for.

Clear and sustainable improvements to the local infrastructure and facilities need to be put in place through the Local Plan to demonstrate that the Council can manage the impact of these new sites to allow them to be fully supported.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objection to The Guildford Borough Proposed Submission Local Plan – Strategy and Sites Consultation June 2016

I object to the proposed insetting of the green belt in the West Horsley Area for the for residential properties. It would have a long-term detrimental effect on the quality of life in the village and surrounding area.

The proposals are not sustainable. The green belt will be adversely affected. The long-term impact has not been modelled or considered.

The transportation and communication links would be severely affected resulting in detrimental effect to the environment.

The local state school is over-subscribed and therefore families moving in to the area in larger numbers than is sustainable by the natural ebb and flow into and out of the area would not receive schooling for their children in the local catchment area.

Sewerage and drainage is a specific issue that the Council has been advised on and no further plans or investment has been developed to overcome these issues.

The Green Belt boundaries should only be altered in exceptional circumstances and Guildford Borough Council proposals do not present exceptional circumstances. There is not enough detail in the proposals for the impact on infrastructure, schooling, health and well-being, environmental impact.

The proposal does not represent a sustainable approach to housing need for the area

The wider area proposals again do not appear to have a coordinated approach

The proposal is weakened by the lack of vision for the significant investment and community building required in adding such large numbers of housing units to an essentially rural village area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Guildford Borough Council has not sought to consult or manage the relationship with West Horsley Village as to what sort of development might be appropriate for the village and the mix of residential units that the village might need. The proposal does not represent an organic, sustainable approach to housing need but rather sacrifices for future generations the right to enjoy the amenity and environmental benefits that being within the green belt affords. The increase in the number of residents living in West Horsley Village arising from the development would overwhelm local services such as the health centre, the local school (full) and drainage features. Indeed, GBC has not sought to consult and coordinate the approach amongst the parishes such as Ripley, Send, Wisley and around to achieve sustainable development. Rather it is taking a chance on

The proposal to site large scale high density residential development in the West Horsley Village comparison to are far in excess of what the local infrastructure can accommodate. The local roads, health facilities and schools are already at full capacity.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objection to The Guildford Borough Proposed Submission Local Plan – Strategy and Sites Consultation June 2016

I object to the proposed insetting of the green belt to satisfy the arbitrary need for the construction of residential properties. The proposals prejudice the green belt in the areas proposed and would compromise the locality of the openess experienced by those existing residents living next to the proposed developments.

The NPPF paragraph 88 states:

Local planning authorities with Green Belts in their area should establish Green Belt boundaries in their Local Plans which set the framework for Green Belt and settlement policy. Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period.

Guildford Borough Council proposals do not present exceptional circumstances and it is not easily apparent that the Council has considered in enough detail the re-use of existing already developed and previously developed sites within the borough. A hitherto unmet need for housing does not qualify as exceptional circumstances in order to satisfy the need to achieve permission to change the green belt boundary.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** PSLPS16/4354 **Respondent:** 8880225 / Jennifer Rankin **Agent:**
When Wisley Airfield was created there was a condition that when its use as an airfield ceased the land would return to farm land and building a new town there is not in sympathy with that promise.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Firstly, the whole idea behind the introduction of a Green Belt was to prevent exactly what is being proposed now. The Green Belt protects land and, in so doing, protects people, the quality of their lives and their communities. There are people who are content or even prefer to live in crowded cities but this does not mean that all people should be made to do the same, the people who live in the Horsleys and in other Surrey villages made a choice to live in a semi-rural atmosphere not a city or developed suburb and it is wrong for the Government and Local Authorities to attempt to remove Green Belt status in this random fashion.

I particular, I am opposed to the removal of any part of the Green Belt protection that exists in the Horsleys and the former Wisley Airfield. The environment that the Horsleys enjoy exists simply because of the Green Belt protection.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to object to the proposed New Local Plan regarding the snatching of our very precious Green Belt especially in the villages of Wisley, Effingham and East and West Horsley.

After the war, the Green Belt was set up to safeguard areas of countryside to protect small towns and villages against the urban sprawl of London and individual villages being merging into one another. These areas of green allowed people who chose to live outside London to enjoy the freedom to walk, breathe fresh air and enjoy the wildlife that these areas offered.

There are many brown field sites that could be used for housing, commercial businesses and other uses without touching our precious green belt. It is proposed to build homes and to provide cheap houses for young people and key workers but in all honesty, they would not be able to afford to live in the Surrey villages or have work to pay for living in these areas. Also our infra structure, schools, doctors, roads, local shop parking would not support any large development in our villages.

As we chose to live in the beautiful Surrey countryside and paid a huge premium to do so, we wish our precious green areas to be left intact.

In writing, we particularly wish the field called The Menage at the joining of Norrels Drive and High Park Avenue to be reinstated back into the Green Belt immediately. This should never have been withdrawn in the first place.

Unmet housing is not a justification for changing the Green Belt boundaries and no evidence of exceptional circumstances has been offered by the Guildford Borough Council to alter the existence of the Green Belt.

We urge the Guildford Borough Council to please uphold our views and concerns with regard to our very precious Green Belt areas and stop the urban sprawl that we are currently threatened with.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object.

The SHMA figure of 693 houses per annum is extremely high and has not been independently verified. This population growth is excessive and unsustainable.

At least 70% of the proposed housing is planned for land currently in the Green Belt. I understand that housing need is not sufficient reason in law for protected green belt land being used.

The green belt has not been used as a constraint as clearly set out in Government advice, planning policy guidance, the NPPF, case law, election manifestos and Ministerial letters to MPs.

For West Horsley this is reflected in close to 40% increase in the number of houses within 3-5 years of a plan being adopted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3577  Respondent:  8880321 / Elizabeth Baker  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Given the current size of East and West Horsley, the areas identified for enlargement of the settlement areas and village boundaries are disproportionate in the extreme. Proportionately more houses are proposed for West Horsley than anywhere else in the borough. Developing even one site to its declared potential based on target housing density would have a significant and negative effect on the village services and character. Development of all sites would rapidly increase the number of homes in West Horsley by over 35% very likely doubling the population which would destroy the existing character and put pressure on transport and societal facilities that cannot be managed. The sites are on the outlying boundaries of the village so they will inevitably increase the use of car(s) even for facilities in the village. There are very few shops in West Horsley and most people use the shops in East Horsley. However to describe East Horsley as a “Rural District Centre” is incorrect. The shops (with limited parking) meet essential needs but are small and have limited opening hours with the exception of Budgen’s food store - which cannot be described as “supermarket”. These shops are appropriate for the villages of East and West Horsley as they now are. The shops in West Horsley are meagre with even more limited opening hours and even more limited parking (5 cars in total at most).

Sites identified in West Horsley are agricultural land and once lost that land cannot be reclaimed. The sites are important for wildlife, the open character of the village as well as some being close to areas designated as SSSI, SPA or SNCI. Land and roads in West Horsley are prone to flooding especially those on the lower lying side of the villages such land alongside Ockham Road North. The site there near Waterloo Farm and surrounding properties has a very high water table and development of that land will impact on the drainage of surrounding land and property in wet weather and on water...
retention in times of drought – conditions which the consultation admits will become more challenging. Wildlife there is abundant with common and less common wildlife seen

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. Potential Sites for Development in East and West Horsley.

The proposals for West Horsley are abhorrent and would vastly increase village size with loss of character. Too many homes for a village without the necessary roads/infrastructure constitute a major and needless assault on protected Green Belt land.

The proposed 500 new homes would overwhelm the villages and their facilities.

Local schools are oversubscribed and barely cope with the existing population. Existing schools create high volumes of traffic at peak times with considerable congestion on narrow village roads. At one point East Lane is not wide enough to allow 2-way traffic.

The draft local plan is ill-considered and not supportable.

Proposed site A40 is very wet and prone to flooding after rain. Doubtless this would be much worse and would impact upon nearby properties and roads if development is allowed to take place. I note that the consultation document recognizes this problem but nevertheless the site remains as one for potential development.

Site A40 also surrounds a very popular and highly rated campsite with 130 pitches. The site is chosen by campers because of its quiet, sheltered and rural location with a lake and wildlife including deer and interesting birdlife. Development of site A40 would have a profoundly negative impact on this environment and lead to the decline of this local business.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1443
I object.

Commercial brown-belt land in the urban area should be used for housing wherever possible and it is difficult to see how an additional 45,000 sq m of additional retail space can be justified, especially in the light of rapid increasing in on-line shopping.

The council should plan to utilise key brown-field opportunities within central Guildford for new housing instead of the proposed large scale building on protected green-belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14982  Respondent: 8880321 / Elizabeth Baker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The consultation document is flawed in that it does not set out what assumptions have been used to calculate the housing need. Nor does it review the currently available capacity for providing additional housing from (a) brownfield sites, (b) empty properties (c) use of sites where planning permission has already been granted but development has not begun. It is therefore not possible to establish how many additional homes are really needed. The council should review the likely impact of the UK leaving the EU which is predicted to have a significant effect on jobs in London and therefore on housing needs in commuter towns in the South East including Guildford and surrounding villages.

I particularly support the aim of providing housing for the elderly; this needs to be close to facilities in the centre of villages and towns, thereby releasing other properties for family use and is preferable to the development of high density family homes. Based on my local experience, provision for the elderly is likely to have been underestimated. However, planning policy and decisions to date have shown little evidence that this is a real priority for Guildford Borough Council. Take for example the relatively recently permissions to build several properties in Station Approach in East Horsley on a site previously occupied by a single dwelling. This development featured on a national television property programme and revealed the property prices and the approximately £2m profit made by the purchaser/developer. That site was ideal for the provision of affordable homes especially for more elderly residents as it is right in the village centre, very close to shops, surgery, station and bus stop, so why was there no condition to build accordingly? The properties now built and sold are not suitable for the elderly and with a price tag of £650k for a small semidetached house with virtually no garden, are not affordable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14983  Respondent: 8880321 / Elizabeth Baker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The consultation does not deal adequately with infrastructure demands, solutions to which are needed in advance of, not following, development. Anyone who has travelled along the A3 in the morning and afternoon rush hours will know how inadequate that road now is around Guildford. The A246 is similarly congested, especially at school times, and the additional housing in areas that use this as an artery will make short journeys intolerably slow. Trains between London and Guildford and the intermediate stations are overcrowded, parking at stations is inadequate and expensive.

Potential Sites for Development
Sites in East and West Horsley:
Scoles
There are 3 primary age schools in the Horsleys already (two independent and one state), these cause considerable traffic problems and a further increase in school population cannot be supported. The local primary school (The Raleigh School) serves East and West Horsley and is oversubscribed - even children living in the Horsleys cannot all obtain a place. It’s location creates long tailbacks because it is accessed from 2 roads both of which are cul-de-sacs. At secondary age the Howard of Effingham School is oversubscribed and the Horsleys are not in the catchment area for the George Abbott School in Merrow. The council has recently refused an application to rebuild the Howard of Effingham at a nearby site so there is little prospect of expanding the school without further compromising the facilities provided. The Surrey County Council is very aware of the problems there have been in allocating Horsley children to places for secondary education. Even halving the proposed development of over 500 additional homes in East and West Horsley will result in hundreds of additional school-aged children in need of a school place. This is simply unrealistic and unsustainable.

Road and Rail Transport
The two roads through the Horsleys are narrow and in many places are without pavements but are appropriate for the size and nature of the villages as they currently are. Both roads are crossed by low narrow railway bridges and both suffer from other pinch points. As the majority of additional residents would have to commute to work either by driving through the villages to the A3 or A246 or to get to the station, a significant increase in population would exacerbate transport problems. Already access to, and progress along, the A3 and A246 is very slow especially during school term times. The consultation document identifies A3/M25 access problems in relation to development of Wisley airfield and the same would apply to further development in East and West Horsley.

Whilst there is reasonable rail transport to London or Guildford and a less efficient service to Leatherhead and Epsom, due to rail congestion the service between Horsley and London now takes longer than it did in the 1920s. Even with more home-working than was the case some years ago, at peak times it is necessary to stand for much of the journey from London and when there is disruption, passengers may not even be able to board the train due to overcrowding. Although Southwest trains is extending capacity this will quickly be overwhelmed. The 500 homes could create an equal number of additional passengers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15583  Respondent: 8880321 / Elizabeth Baker  Agent: 

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object.

There will be significantly increased congestion to local village roads resulting from proposed development and there is no plan for road infrastructure.

Over 5000 new homes are proposed between the M25 and Burpham. There is too much traffic in our villages already and this plan will result in substantially increased congestion with no plans to remedy this. Roads are narrow and mostly without footpaths. 5000 more houses in this area, coupled with pollution from the correspondingly busier A3 and M25, will have a profound impact upon declining air quality.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object.

The A3 needs widening and many new junctions. This work must be completed before any planned development but there seem to be no plans to consider improving the A3 before 2020. The recent Brexit decision is likely to prevent any additional funding for new capital projects. Clearly no real improvements are possible in the timeframe of this plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )
I object.

I have serious concerns about declining air quality

The huge developments being proposed, particularly in the north east of the borough, will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health. Wisley already has NOX levels above the EU legal limits rendering it unsuitable to locate a new school in this area as proposed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Even though the council’s own SHMA admits (summary para 1.7) that the government attaches great importance to the Green Belt, the strategy continues to go against government policy on maintaining the Green Belt and 65% of the new houses proposed are to be built on Green Belt land.

The far-sighted concept of the Green Belt was established to confine development to designated areas and this concept is increasingly important in the south east of England, especially for villages such as East and West Horsley which are close to, but separated from, major routes such as the A3 and M25.

According to government the green belt serves five purposes:
• to check the unrestricted sprawl of large built-up areas;
• to prevent neighbouring towns merging into one another;
• to assist in safeguarding the countryside from encroachment;
• to preserve the setting and special character of historic towns; and
• to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

In its 2012 Planning Policy guidance the government said “The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.” It also made clear that the construction of new buildings should be regarded as “inappropriate” for the green belt. Although some exceptions were set out none cover the nature or extent of the proposals made by GBC in its Local Plan.

Note that the government position explains that one of the characteristics of the green belt is its ‘permanence’ and it is precisely under circumstances in which there is temptation or pressure to provide more homes that the concept of the green belt is crucial. If it is not strictly respected, in time to come it will be whittled away until it is not worth protecting. You only need look in the direction of Leatherhead to see how contiguous development out towards Epsom and Carshalton has resulted in urban sprawl and the effect that the Green Belt was intended to prevent.

Once built on, the land has gone forever, and with it, the character and benefits that it provides. Proposals to move other areas of land into the Green Belt or otherwise protect countryside to compensate for any that is removed is a cosmetic veneer which undermines its purpose and leaves this classification open to abuse. Therefore I object vehemently to the insetting of 14 villages from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object.

We must continue to protect the Green Belt because it is precious and was established to confine development to designated areas. It is important to me that we do all in our power to preserve the countryside and wildlife and prevent encroachment of urban sprawl. It is also vitally important to preserve air quality and this is particularly important for the villages of East and West Horsley in view of their proximity to the A3 and M25.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object.

The proposed development as detailed in the Local Plan is not sustainable

13,860 new houses is a huge number and is neither appropriate nor sustainable. A number of established villages around Guildford would be changed beyond recognition and the planned misuse of existing Green Belt land is unacceptable.

More of the large scale development should be planned in urban areas where there an existing transport network.

If the local plan is adopted, my village West Horsley would be increased in size by 40% within 3-5 years. The number and density of housing is not in keeping with the local area and is therefore against policies within the NPPF.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The overwhelmingly negative comments made by residents in response to the 2014 local plan have not been taken into account. The plan documentation claims to have addressed objections on the themes of Environment, Infrastructure and Society but the plan does not do this. It does not minimize the impact on the environment, it does not protect the identity of individual settlements and it does not meet the needs of an ageing population. Building on the green belt in the absence of exceptional circumstances, focusing disproportionate development on East and West Horsley and claiming unrealistic provision for housing to meet the needs of the elderly and other special populations is evidence of this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. Settlement Areas and Extent and Nature of Housing Need

I object to the number and location of houses to be built in the borough and in West Horsley in particular; 70% of new housing development will be in the countryside, of which, 58% will be in Greenbelt. It is noted and welcomed that the number of houses proposed for East and West Horsley has been reduced but the reduction does not go nearly far enough. The impact on the Green Belt, on the character of the villages and on local infrastructure remains unacceptable.

The proposals still recommend development sites on the outlying boundaries of the West Horsley village so they will inevitably increase the need for use of car(s) even for facilities in the village. Sustainability has not been addressed. The idea of a shuttle bus to the station from any development in Wisley is clearly impractical and obviously so for anyone who is familiar with the location of, and access to Horsley station or Effingham Junction station. This is paying lip service to sustainability.
Unlike other councils, GBC has not attempted to limit its growth to protect the Green Belt and the projected growth of 25% if the plan is adopted is at least double the estimate of what might be needed set out by the Office for National Statistics. The scale of development is therefore without justification and the assumptions used by GBC for their projected need remain unexplained.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

My objections are as follows:

1. Green Belt

It is still proposed to inset (remove) East and West Horsley from the Green Belt. I object strongly to this. It is unacceptable and is contrary to the stated policy of the government. Respect for the Green Belt is increasingly important in the south east of England, especially for the villages of East and West Horsley which are close to major routes such as the A3 and M25.

In its 2012 Planning Policy guidance the government said “The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.” It also made clear that the construction of new buildings should be regarded as “inappropriate” for the green belt.
Note that the government position explains that one of the characteristics of the green belt is its ‘permanence’ and it is precisely in times of pressure to provide more homes that the concept of the green belt is crucial.

Comment ID: PSLPS16/1850  Respondent: 8880353 / Judith Allen  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the continued inclusion. Of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's(WPIL) planning application was unanimously rejected by GBC on 8th April, 2016 of the recommendation f GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Answer (if comment is on questions 1-7 of the questionnaire): ()

5) I object to the threat that the Local Plan poses to the historic village of Ockham and the blight on its properties. The Plan calls for a village of 159 residences (with narrow lanes, no street lights, very few pavements and many listed houses) to be subsumed into a 2000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London Boroughs.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4000  Respondent: 8880353 / Judith Allen  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the threat the Local Plan poses to transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking, the development is too isolated and, even within the development itself too spread out to anticipate a reduced reliance on private cars.

1. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the local roads.

1. The congestion this traffic will cause on the narrow rural roads on Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HVG movements.

1. The danger this traffic will cause to local cyclists and pedestrians, due to the absence of any cycle paths and the lack of pedestrian footpaths (and the space to provide them).

1. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the fact that the proposed development plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are 1) access to the countryside and clean air and 2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

| Comment ID: | PSLPP16/4001 | Respondent: 8880353 / Judith Allen | Agent: |

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated without the need to encroach on protected Green Belt land. Election manifesto promises are being ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Interest (SSSI), and Site of Nature Conservation Interest (SNCl).

8) I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions I-7 of the questionnaire): ()

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as being far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to object to the inclusion of the policy A35 in the Draft Local Plan on two grounds, the physical constraints of the site and the fact that it is the least sustainable site.

It is not near any railway line, is close to the heavily congested site J 10 of the M25, adjacent to the polluted and already, at times gridlocked A3.

The narrow surrounding lanes are unsuitable for an increase in the flow of traffic and the proximity to cyclists.

It is near Wisley RHS where there are increasing visitor numbers, events and consequently increased traffic.

There is no local employment thereby increasing the need to commute.

I object to the increase in site boundaries, not on the original plan (AppendixH p16) which will now have an adverse impact on the Listed Upton Farm.

Ockham DVOR/DME is not due for removal for approximately 5 years and building restrictions in the vicinity are in force.

I object to the visual impact that this applications will have on the protected landscape of the AONB.

I object to the unjustifiable removal of the Green Belt status and the impact on the archeology of the site.

I object to the fact that the Borough Council has not used any constraints such as the Green Belt, air quality, infrastructure and AONB considerations.

The Council has submitted inaccurate housing numbers.

For these reasons, I consider that this Plan is neither sound nor fit for purpose.

I require confirmation that this and all of my other comments are passed to the Inspector. I also reserve my right to attend any planning hearing meetings.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the use of "693 houses per annum" as a determinate of demand for development. This statistical source has been deliberately kept secret from council tax payers; as a consequence we have no confidence in these assertions and question the correct use of Council funds to pay for unaccountable Consultants when a planning department already exists.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to any further development at Clockbarn Nursery, Tannery Lane. The lane and junction are too narrow and tortuous for any additional traffic. In my view it was a mistake to grant permission for a marina and flats despite overwhelming local objections - not a good example of local decision policy.

I object to any proposed development of Garlic's Arch land because it was included too late at the planning meeting in contravention of Regulation 18, drafted to prevent last minute additions without due time for consultation. The site is totally unsuitable because it is further loss of Green Belt, liable to flooding, contains several ancient protected trees, and too near to the A3 -causing excessive noise and pollution -and difficulty of access. The linked "gift" of land for an enlarged roundabout and slip roads is obviously a device offered by the owners to encourage the Council to give planning permission, otherwise the improvement proposed would worsen traffic flows through Send, Ripley and Clandon.

I object to further development because there is no demonstrable improvements to the infrastructure either with plans or sources of funding of programmes. The proposed development will place a disproportionate strain on existing resources which cannot really cope with present requirements.

I object to any further proposed developments at Send Hill and the other proposed significant developments at Gosden Hill Merrow and Wisley Airfield, all of which will involve the destruction of vast areas of the Green Belt and other reasons at all.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object totally to the proposed Local Plan 11 2016 and resurrected remnants of the earlier Local Plan I for the following reasons.

I object to the withdrawal of any further areas of Send, Ripley, Clandon or Ockham from the permanent provisions and principles of the Metropolitan Green Belt legislation. Local Councillors and MPs gave clear promises to the Green Belt and Local Plans clearly renege on these promises. There are several brown-field sites available and these should be developed as a priority.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

At the Clockbarn Nursery, Tannery Lane I object to Policy A42 changes by the increase if 33% more homes i.e. 60 new proposed from 45. This proposal ignores all the previous objections, worsens traffic problems at the junction with A247 (Send Road) which is already heavily congested with vehicles going from Woking to Burnt Common roundabout and to Ripley, Guildford and M25.

The lane is so narrow in places two cars cannot comfortable pass and is also the access route to the proposed marina.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the developments proposed on land at Garlick’s Arch policy A43 for 400 homes and 6 or 8 Travelling Showpeople plots. Again it ignores thousands of previous objections. There is no proven demand for Travelling Showpeople plots. This Green Belt land is covered in ancient trees and intended to be a space between Ripley and Send, and “exceptional circumstances” have not been demonstrated. There is also a number of electrical pylons across the site and a corridor must be made for maintenance of high tension transmission lines. The site is prone to flooding hence considered a flood zone 2. This scheme will again add to traffic congestion and air pollution along the old A3 and affect adjoining roads and put massive unwarranted pressure on existing infractures.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to changes to land at Burnt Common Policy A58 because in 2016 the plan stated a maximum area of 7000m² of industrial building and changed to a minimum of 7000m² i.e. eventually the whole area of 9 hectares of land could be covered by industrial buildings. I don’t think that is the real intention of the council planners. Again there is no demonstrable need or demand for such industrial building because there are empty plots at Slyfield Green.

Furthermore, the 2017 Employment Lane Need Assessment anticipates a reduction to 3.9 hectares for the whole borough. Again the access will be from the old A3 causing yet more vehicular congestion with additional heavy lorries and plant.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Green Belt Policy 2 at paragraph 4.3.15 that the Business Park be taken out from the Green Belt provisions. Picking out bits and pieces will eventually destroy it for the future amenity because each exclusion will become precedents, and the Council and Residents will be unable to resist unwanted development because the Developer has the right of appeal but not the Residents who have to live forever with those decisions.

Conditions placed upon Developers in given planning approval are legally and contractually unenforceable. Time was the local authority dictated planning densities, standards of quality construction, competitive bids abstained and a legally enforceable contract existed. Leaving these matters to the goodwill of developers is unsustainable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am particularly concerned about the proposed development of land north of Keens Lane. The transport infrastructure cannot cope with current traffic, and there appears to be no plan to improve this now, let alone if more houses are built. The loss of Green Belt land is totally unacceptable. Where is all the water going to go? Where is the natural habitat (both flora and fauna) going to go? What about the health implications for current residents of this area?

Comment ID: PSLPA16/2880  Respondent: 8880769 / Margaret Keepence  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The plan entails the removal of East and West Horsley from the Green Belt and the allocation of seven sites for the building of 533 houses. The removal of areas from the Green Belt can only take place in exceptional circumstances, but evidence of such circumstances is not given in the plan nor is justification of the perceived excessive number of new houses.

The amenities of the area could not cope with the subsequent increased population. The schools and health facilities are already struggling to meet existing demand. The local roads are overcrowded and without scope for improvement.

The proposed building of 2000 new houses on the former Wisley Airfield would further impinge upon the road and rail facilities.

The proposed New Plan 2016 will destroy the beauty and character of the area riding roughshod over the provision of the Green Belt legislation thereby defeating the very purpose of its creation.
I write to register my objection to the draft Local Plan with regard to Normandy and Flexford.

The planned development is quite out of proportion and would lead to a massive increase in the population of this rural area and would radically change its character. It requires the destruction of green belt land which, I understand, should only be contemplated in exceptional circumstances. The need for additional housing is a perennial problem which has not been effectively addressed for a good many years. It is not exceptional.

The plan is in direct contravention of the concept of green belt land.

There is no need for a new secondary school in this area and its inclusion in the plan is puzzling unless it is being used in some way to justify the large population expansion.

Such a development will have a negative impact on the natural environment to the detriment of many species which are already under threat.

The local infrastructure is not adequate to sustain this plan. The traffic is already heavy in this area. The bridge over the railway in Glaziers Lane is already damaged, probably contributed to by the excessive number of heavy lorries which already use this route, and that in Westwood Lane forms a constriction to the flow of traffic.

This area is already subject to flooding, in places, at times of high rain fall; the proposed development can only aggravate this problem.

I do not believe that the ramifications and consequences of a development on this scale in this area, both in the process of its construction and in its impact on the communities involved once it is completed, have been adequately considered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Strategic Housing Market Assessment provides inadequate evidence concerning the need for new housing in the borough. I refer you to the analyses carried out on behalf of Guildford Residents’ Association and the Council for the Protection of Rural England and the review written by the Councillor for East Horsley, Mr David Reeve. All these analyses highlight very serious shortcomings which suggest that the housing need has been exaggerated. Moreover it appears that the Council has not carried out its oversight role of scrutinising this third party report and is not even in possession of the underlying demographic housing model.

The other documents in the evidence base are either out of date or unsatisfactory. For example the analysis in the Green Belt and Countryside study is not intellectually honest and seeks to justify an a priori conclusion that large parts of the Green Belt should be discontinued.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

5. Policy A35 - land at the former Wisley airfield

This site cannot sustain a new town. Building a new town is contrary to the stipulations in the NPPF that Heritage and Environment must be protected and enhanced. Building a SANG immediately beside a Special Protection Area is guaranteed to attract more visitors to the SPA - the very opposite of the purpose of a SANG. Building a new town in the heart of the parish of Ockham will destroy its heritage. The promotion of this site has involved serious misrepresentations of the facts. For example it is stated that the site is brownfield- when at most less than 25% of the site could be considered previously developed and of that area 60% is already allocated for a waste disposal site. The garden hedge of Yarne is not a defensible permanent Green Belt boundary

Comment ID: PSLPP16/14930  Respondent: 8880865 / Jane Paton  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
A local plan which proposes to increase the stock of houses in the borough by 13,860—an increase of over twenty percent—is irresponsible. Local road, health and education infrastructure is already over-stretched. Adding this quantity of new housing will have negative effects on the living standards of all who live in the borough. There is no convincing evidence that new infrastructure to accommodate even the needs of current residents will be forthcoming—let alone the massive investments required to accommodate the largest housebuilding programme in the history of the borough.

I object to building on the Green Belt at Garlick's Arch in Send, Clockbarn Nurseries and Send Hill because it is not justified by special circumstances and after all the Green Belt is meant be permanent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposed industrial development of 7,000 sq m, at Garlick's Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If in fact there really is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

I object to the development at Garlick’s Arch because it is covered in ancient woodland with trees going back to the 161 century and furthermore a risk of flooding.

---

We are grateful for all the work that has been put into providing the draft Local Plan. We consider it to have been undertaken thoroughly and commendably well, in the face of many different pressures – and including the unsuccessful efforts for a Local Plan in and around 2014.

We are also glad of this opportunity to comment on the draft. We ask that this response is taken fully into account as the draft Local Plan is considered further.
We are concentrating on the Blackwell Farm/Hog’s Back proposals, which also inevitably affect other parts of the Borough. We have lived in Manor Way, Onslow Village, since 1972.

We recognise the need for much more housing in the Borough, and especially small and affordable types of housing.

Regarding Policy A26, we fully acknowledge the restrictions proposed, particularly those proposed to limit the number of homes. We are especially pleased about the exclusion of the southern part of the site from the Proposed Submission Local Plan (except for the new access road). In our view, 1,800 homes is significantly more acceptable than figures like 2,000, 2,250 and even 3,000 plus -- which have been mentioned or proposed in recent years by certain parties.

Even so, we oppose such a large number as 1,800 houses and other properties being built on such a site. It is a site which has a major effect upon an AONB, and which is widely recognised for its beauty. It is highly visible, from many directions and to a great number of people walking and driving nearby, with the best views (from a long way off) towards the Cathedral. Some of the views from the Hog’s Back ridge would be seriously spoilt.

The whole site provides views into, and out of, the AONB; National Policy lays down that it therefore needs the protection afforded to the AONB itself. Additionally, Blackwell Farm should itself be included within the AONB, as demonstrated by the expert land evaluation study published last month.

We are also still disturbed at the proposal to take land out of the Green Belt. This would involve permanent loss of irreplaceable Green Belt land. It would also spoil an area of Great Landscape Value.

We fear that there would be a real danger of increased pressure for further development, in the area between the new road and development, on one side, and Manor Farm, on the other side.

If these proposals, and those at the Normandy/Flexford area, go ahead, we also have a concern that it would lead to Normandy in due course being joined to Guildford.

We are extremely concerned about the traffic access. Neither proposed access route is really adequate for the likely number of vehicles for the new village and for the already heavily trafficked locations. The tailbacks on the A31 would increase. Local roads, including several in Onslow Village, would be used as rat-runs. There would also be significant through traffic from the Hog’s Back to the Research Park and RSCH, spoiling the new village. These traffic problems are unlikely to be met by avoidance work. There are serious traffic problems in the area already, as is well-known.

One additionally fears that such a large building programme would affect low-lying areas a little to the North – especially bearing in mind likely climate change effects.

Such a large development on land, which has long been mainly farmed, would remove land which will really be needed for food production for long into the future. There are also concerns about the impact on wildlife, especially birds – as regular walkers in the area can confirm.

We also fear that over-development there would be likely to do harm to Guildford’s character.

Thank you for your consideration. If we can try to assist further, please let us know.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We are grateful for all the work that has been put into providing the revised draft Local Plan. We consider it to have been undertaken thoroughly, in the face of many different pressures – and including the unsuccessful efforts for a Local Plan in recent years.

We are also glad of this opportunity to comment on the draft. We ask that this response is taken fully into account as the proposed Local Plan is considered further.

We are mainly concentrating on the Blackwell Farm/Hog’s Back proposals, which also inevitably affect other parts of the Borough. We have lived in Manor Way, Onslow Village, since 1972.

We are mainly concentrating on the Blackwell Farm/Hog’s Back proposals, which also inevitably affect other parts of the Borough. We have lived in Manor Way, Onslow Village, since 1972.

We recognise the need for much more housing in the Borough, and especially small and affordable types of housing.

Regarding Policy A26, we fully acknowledge the restrictions proposed, particularly those proposed to limit the number of homes. We are very pleased that the number of houses proposed for that area has been considerably reduced from previous figures. We are especially pleased about the exclusion of the southern part of the site from the Proposed Submission Local Plan (except for the new access road). In our view, 1,800 homes is significantly more acceptable than the much higher figures which have been mentioned or proposed in recent years by certain parties.

Even so, we oppose such a large number as 1,800 houses and other properties – including a school (or two schools) – being built on such a site. Even with the reduced number, it would fundamentally alter that side of Guildford, from a lovely rural countryside into a suburban housing estate, sometimes causing (and having) severe traffic problems.

At present the area has good quality farmland, bounded by an AONB to its South, a Site of Nature Conservation Interest to its North, with an ancient woodland on its East and countryside to its West. The whole site provides views into, and out of, the AONB; National Policy lays down that it therefore needs the protection afforded to the AONB itself. Additionally, Blackwell Farm should itself be included within the AONB, as demonstrated by the expert land evaluation study published a year ago.

It is a site which has a major effect upon an AONB, and which is widely recognised for its beauty. It is highly visible, from many directions and to a great number of people walking and driving nearby, with the best views (from a long way off) towards the Cathedral. Some of the views from the Hog’s Back ridge would be seriously spoilt.

It would involve moving the permanent Green Belt boundary for the second time in under 15 years. We are also disturbed at the proposal to take land out of the Green Belt. This would involve permanent loss of irreplaceable Green Belt land. It would also spoil an area of Great Landscape Value.

Regarding traffic: the plan would require a new access road. Bearing in mind both the current considerable amount of traffic in most of the area covered, but also the new traffic created under the Plan, the new road would be inadequate – leading to demands for a wider road or another road. It would also endanger Wanborough and Wood Street Village. It could easily slow down emergency transport to the RSCH. It would have a knock-on effect on alternative routes around Artington and Compton, and Onslow Village. The new road would also go through the AONB and through an area of Great Landscape Value.

It is significant that the previous Local Plan included a 5% cap on traffic increases in the area – which has long since been broken. On outcome would be increased air pollution in neighbouring areas – which is already over the safe EU limits.

We are extremely concerned about the traffic access. Neither proposed access route is really adequate for the likely number of vehicles for the new village and for the already heavily trafficked locations. The tailbacks on the A31 would increase. Local roads, including several in Onslow Village, would be used as rat-runs. There would also be significant through traffic
from the Hog’s Back to the Research Park and RSCH, spoiling the new village. These traffic problems are unlikely to be met by avoidance work. There are serious traffic problems in the area already, as is well-known.

One additionally fears that such a large building programme would affect low-lying areas a little to the North – especially bearing in mind likely climate change effects.

**Regarding Policy E4**, we consider that extending the Business Park would do further damage to existing traffic and environmental problems.

**General**: Such a large development on land, which has long been mainly farmed, would remove land which will really be needed for food production for long into the future. There are also concerns about the impact on wildlife, especially birds – as regular walkers in the area can confirm.

We fear that there would be a real danger of increased pressure for further development, in the area between the new road and development, on one side, and Manor Farm, on the other side.

We also fear that over-development there would be likely to do harm to Guildford’s character.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

---

We object to Guildford Borough Council's draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:
- destroy views from the Hog's Back ridge - a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green belt increase tail backs on the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford's pollution.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council's draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:
- destroy views from the Hog's Back ridge - a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green belt increase tail backs on the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford's pollution.

---
I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.
I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/7159  Respondent: 8881345 / Lynne Ground  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.
I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable
forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Comment ID: PSLPP16/7166  Respondent: 8881345 / Lynne Ground  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy I1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.
Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.
The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/7162  Respondent: 8881345 / Lynne Ground  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: PSLPP16/7154  Respondent: 8881345 / Lynne Ground  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/7152  Respondent: 8881345 / Lynne Ground  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

I OBJECT to the Borough Wide Strategy (Policy S2)

1. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

2. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

3. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Goshen Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.
The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently...

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object most strongly to the proposed plan submitted by Guildford Borough Council, riding roughshod over the published commitment to protect the Metropolitan Green Belt against inappropriate development. Why would West Horsley be expected to increase its number of new homes by such a large percentage compared with Ash & Tongham and Guildford? We simply do not have the infrastructure to cope, already our Medical Centre in East Horsley is stretched, an appointment to see a nominated doctor can take well over a week. School places are at a premium, East Lane continues with flooding during the winter months and we have barely two busses a day to Guildford, there seems no consideration to service our existing requirements before embarking on the madness of this proposed plan. If it were to proceed it would be the ultimate destruction of these important rural villages and the destruction of our cherished environment to the eternal shame of our council. I urge you to reconsider your plans and forgo short term gains and reflect on the harm that future generations will inherit.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2762  Respondent: 8881537 / Jean Baptist  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix F: Policies overview map
I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.
The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council’s eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.
Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11601  Respondent: 8881537 / Jean Baptist  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.
I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11606  Respondent: 8881537 / Jean Baptist  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6
I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University,
which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

**Comment ID:** PSLPP16/11604  **Respondent:** 8881537 / Jean Baptist  **Agent:**
I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy 11. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure
will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have
considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public
consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of “About Guildford” (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt.
There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11573  Respondent: 8881537 / Jean Baptist  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.I OBJECT to development in areas which are at risk of flooding (Policy P4)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

<td>Answer (if comment is on questions 1-7 of the questionnaire): ()</td>
<td></td>
<td></td>
</tr>
<tr>
<td>I OBJECT to the Borough Wide Strategy (Policy S2)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
| These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For
instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the
local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

2. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.

2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound.

4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018.

5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.

6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

<td>Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The total number of the proposed new build houses in West Horsley amounts to an increase of 35%. The need for such a massive increase has not been demonstrated. There is no indication of any formula used or assumptions made. In the absence of such it looks someones best guess. It would destroy the character of this beautiful village which all parties have a duty to preserve.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy A35 Land at Former Wisley Airfield Ockham

I am writing to register my objection to the proposals for the above site. I object on the following grounds:

1. The proposal represents a gross over development in terms of scale and quantum of housing when compared with surrounding settlements.
2. This land is not brownfield. As I understand it the last time it was used as an airfield was over 50 years ago and the arrangement was that it would revert to agricultural use thereafter. The landing strip remains but there has been no commercial activity on the land at any time other than the emergency use as an air strip during WW2.
3. The site is very poorly served with transport. There are no reasonable means of access to any stations within the vicinity and certainly practically every journey to and from this proposed development would have to be by car. I thought the planning departments and central government were looking for sustainable development solutions? This site is served by narrow country lanes none of which even has a pavement, with the exception of the A3 which pedestrians should not use.
4. All the local South West Trains stations in the area, although not nearby, are operating at pretty much capacity in terms of car parking at present.
5. The land is of importance as an agricultural/wildlife site. There must be numerous better located sites on which to develop housing – ideally within reach of transport networks and places to shop and work. This is an isolated spot surely not suitable for the huge number of homes and with them people anticipated.

Whilst I understand that pressure has been put on Guildford planners to find room for additional homes, surely any additional housing developments of any significant size need to sited closer to public transport and at least with access to pavements and lit roads.

For these reasons I object to the proposals and I hope my views will be taken into account when the matter is considered.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- Allowing Green Belt development to pay for transport schemes will simply generate yet more traffic from more homes, fuelling congestion.
- We oppose unjustified Green Belt development.
- It is irresponsible to squander every last resort greenfield site in a single Plan, robbing future generations.

Brownfield opportunities are being ignored – we need homes in the centre (not 40% more shops), much more accommodation on campus for students, and homes for the elderly to free up family houses.

We object to Guildford Borough Council’s draft Local Plan proposals 10 build 1,800 houses, an industrial park and a highway on the slopes of the Hog’s Back at Blackwell Farm, which will:

- destroy views from the Hog’s Back ridge – a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green bell
- increase tailbacks on the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford’s pollution.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the expansion of commercial land in the urban area losing the potential for further housing.

There are sites available in Guildford Town Centre earmarked for further commercial and retail development which could instead support affordable small houses and flats for young buyers, close to the town’s amenities and existing infrastructure.

Answer (if comment is on questions 1-7 of the questionnaire): ()

There are sites available in Guildford Town Centre earmarked for further commercial and retail development which could instead support affordable small houses and flats for young buyers, close to the town’s amenities and existing infrastructure. The council have not demonstrated a need for further retail space when increasing numbers of shoppers are buying online and the need for first time buyer’s properties is much greater.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to development without improvements to local infrastructure

Local facilities eg doctors, schools, transport facilities in Horsley are already stretched. Any development planned must take account of required improvements to local infrastructure. The number of homes currently planned for West and East Horsley is entirely unsustainable.

I would like to end by saying I appreciate it would be naïve and unrealistic to expect the villages of our borough to stay exactly the same. I would support limited new development in West and East Horsley, WITHIN the existing village boundaries and on existing developed sites like the Ramada Thatcher’s Hotel (Ref A36, ID 2044) and the Bell and Colvill Garage (Ref A37, ID 16) as long as the local infrastructure is improved to cope.

I would NEVER support the building of homes on the Green Belt and I object to the village boundaries being extended to increase the availability of land for housing. However, I would support the building of a new Raleigh School in East Lane (Ref A41, ID 2063) as I believe this need to be exceptional (the current site is not sustainable for the existing population of the village) and there is no other local site previously developed which would be large enough or suitable for a new school.

In conclusion, I urge the council to revise the local housing needs and amend the Local Plan so that development of Brownfield sites is undertaken and the Green Belt protected for future generations.

I copy in my local councillors here who were elected on their promises of protecting the Green Belt and supporting their local communities. I hope they do so.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the congestion that development will cause to the local village roads and the lack of planned road infrastructure

The A3 and the village roads around Horsley are already congested. Many of the roads in Horsley are narrow, without pavements for pedestrians. To add more vehicles into the mix would be dangerous and would have a damaging effect on the character of our rural areas.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to not protecting the Green Belt

Our Green Belt was put in place to protect the countryside and provide space and enjoyment for all. To infringe on the Green Belt between the borough’s existing settlements will lead to a merging of towns and villages, removing open space and robbing future generations of our beautiful rural areas.

I understand over 70% of the proposed development is on Green Belt and I STRONGLY object to this. I feel completely let down by the local council even putting forward a proposal of this nature and can only feel suspicious of their true motives.

The presence of Green Belt should be considered a major constraint in any planning proposals and the need for more houses should NOT be considered an ‘exceptional circumstance’ to allow development on the Green Belt

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I wish to register my objections to the Local Plan.

I object to the size of the development proposed

The need for the 13,860 new houses proposed is not supported by research or scientific study. In fact the figures supplied by the council appear flawed in many respects and to this day serious questions are yet to be answered on the validity of the model used to calculate the area’s housing need.

I am especially concerned about the damage that will be caused to small local communities, in particular, West Horsley, East Horsley, Normandy, Ockham, Ripley, Send and Clandon. These villages have a rural character with low density housing, which should be protected to differentiate the countryside from the town. The number of new houses proposed for these villages is out of all proportion to the existing settlements.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to object to the above plans.

I live in Horsley and am extremely concerned that the huge developments will have a massive impact on the surrounding villages of Ockham, Horsley and Ripley in particular.

I live in Horsley (School Lane) and the traffic going up and down 'The Street' is bad enough, without adding the impact of a further 2,000 cars minimum to the area.

Horsley is an area of great beauty and I am concerned that the building of this new town will negatively impact Horsley, and the surrounding villages, for ever.

Also the train, doctors and schools cannot cope with the current population, heaven knows what will happen if this is increased.

I object to this planning strategy in the strongest way.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the revised new local plan for Wisley Airfield.

I live in Horsley, and you already can't get into the local school, park at the station, get an appointment at the doctors, or park near the shops.

Even the local Football club is full!

The new development at Wisley would be an absolute disaster for the village and the surrounding villages in the area.

I absolutely object to the plan for this development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I object to the draft Local Plan for the following reasons:

FWA/TWM latest planning application has only recently been *unanimously* rejected by Guildford Borough Council but it still remains in this plan as a significant strategic site. How can this be?

I am writing again as a homeowner in Ockham who bought our property here because of a desire to be in the heart of the countryside in a quiet hamlet. I cannot believe that there has suddenly become a need for over 2,000 houses which need to be built here. Apart from a lack of evidence that all the brownfield site have been fully explored and all regeneration options fully considered, there is just not the place for such a vast scale development. It is Green Belt land and 70% of new housing is proposed to be built on it! I still have yet to see the exceptional circumstances which warrant it this area being removed from the Metropolitan Green Belt.

Above objections aside, apart from the FWA with other very large sites under consideration there is potential for us and the Horsley’s to be battling the narrow roads with potentially thousands and thousands more cars. Even if adjustments can be made to the A3/M25 the inevitable local traffic chaos here would be intolerable.

Our historic village of not many more than 150 households to be made to be swallowed up into a 2,000+ dwelling development is completely abhorrent on every level.

The frustrations that we have an already existing Flood Plain issue, the fact that are railway stations are already at full capacity and that most of our local roads are by nature single lane or very narrow makes this proposal seem ludicrous.

We can but hope that we as residents have been consulted because our views matter but if not, please do heed the serious concerns raised by the Highways England, Thames Water etc.

I obviously await reassurance that this area will be removed from the plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I wish to comment on the new Guildford Local Plan with specific reference to the Horsleys.

The main objections are listed on the attached paper and with which I totally agree.

I would underline two objections in particular. Firstly the Green Belt should be totally protected, not only for the benefit of local residents, but also for visitors from urban areas, Secondly the infrastructure in place at present is wholly inadequate. Ancient drainage facilities can hardly cope at present, roads and car parks are overloaded and medical facilities would not be able to cope - it is hard enough now to get an appointment. I think brownfield sites should be the priority for new housing and that protection of the Green Belt is essential.

**Major Objections and Concerns for the Horsleys:**

- **Proposal to remove the Horsleys from the Green Belt**
  The "exceptional circumstances" required before taking this action have not been demonstrated.

- **Extension of the boundaries of the Settlement areas of the Horsleys**
  No sound reasons have been given for the proposed changes, which seem to be aimed solely at increasing the land available within the settlements for future additional development.

- **Infrastructure already in overload.**
  The local Schools are full. Medical facilities stretched. Drainage is inadequate, roads and car parks are overloaded with little or no scope for improvements.

- **Station Parade is designated a «District Centre»**
  This 'classification' results from a complete misreading of the nature of the facilities in the village centre and would inappropriately target the area for future urban developments.

--Development of over 2,000 houses at Ockham village (former Wisley Airfield)

The impact on the Horsley villages of such a huge mixed housing, retail,commercial, traveller and schools development, under 2 miles away, would be enormous.

The plan also includes extensive developments at Burnt Common (400 houses & commercial developments) and Gosden Hill Farm, Burpham (2000 houses & mixed use developments).

- **Major doubt concerning housing numbers**
  The inflated number of new houses proposed arises from a Strategic Housing Market Assessment (SHMA) that was generated by a consultant's mathematical model which is not revealed in the plan. Nor, apparently, to Guildford Borough Council, GBC.

  This SHMA target housing number is then further increased by GBC to give a population increase which is almost 70% higher than the official national estimates for population growth in the Borough.

  The scale of this increase has alarming results e.g. an increase of up to 35% in existing West Horsley households - greater than any other single area in the Borough.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There is limited employment in the area which will mean that people will commute to other areas to work necessitating car journeys which exacerbate congestion and can hardly be described as sustainable. Local employment and infrastructure considerations should be a key factor in development decisions of this scale and this has clearly not been addressed in the local plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There is no infrastructure to support large housing developments - limited shops, medical facilities and schools, the proposal would bring several thousand more people to the area with attendant cars - the Guildford area road systems and major transport links such as the A3 and M25 are already full to capacity during the day and there is very limited public transport. Train services and parking at the local station is at capacity and the proposed development sites would in any case involve car use to get to the station.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I write to formally object in the strongest terms to the proposal in the local plan to build 500+ houses on green belt land in West Horsley village.

I object for the following reasons:-

- West Horsley is in the green belt and should not be developed. It goes against the statement in the Green Belt and Countryside policy which says ‘we will continue to protect the Metropolitan Green Belt against inappropriate development’ - it is clearly inappropriate to volume build large housing estates in a rural environment.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Furthermore, there is the option of using the Ockham Airfield as a last resort for some limited development should the brownfield sites aforementioned not be sufficient for the number of properties finally agreed. It should also be added that any such development that is finally agreed and located on such brownfield sites, should reflect a good percentage of affordable housing, enabling first time buyers to remain in their locality.

Much of Surrey and Guildford in particular is now far too expensive for first time buyers, and a distortion in a true demographic mix of the population is becoming more evident. This must be taken into consideration with any such development in the brownfield opportunities our local area can offer.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

DRAINS, WATER SUPPLY, FLOOD RISK, CONGESTION

Our drains, our water supply, our medical facilities and our roads cannot cope with the proposed number of new homes. Building this number of homes will lead to flood risk here and downstream (leading towards Ripley and further afield towards and along the Wey and Thames). The planned development on Green Belt is therefore unsustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

GREEN BELT

The proposal to remove these two villages from the Green Belt is devious, ill-thought out and has not recognised the requirements necessary to reflect this within the village’s infrastructure. Our Green Belt is not only precious to us locally, it is also a key element to any responsible environmental strategy we take on a wider scale. It is what protects London from urban sprawl. It preserves air quality; it prevents flooding; it is our city’s and other urban areas’ playground. It is for us to
conserve and protect it. Green Belt development should not in any circumstances be considered until all Brown belt options have been utilised and exhausted. It is clearly evident in the Guildford Borough area that this has not been the case.

There are 5 legal purposes for Green Belt, and it meets them all:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns
- To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

NO EXCEPTIONAL CIRCUMSTANCES

This revised local plan covering Guildford Borough Council, still proposes over 8,000 new homes to be built on Green Belt land, which is over 60% of all planned development.

The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is NOT an exceptional circumstance in law. In addition the existence of the Green Belt/AONB is a reason for NOT meeting objectively assessed housing need (i.e. such protected land is a legal constraint against any such development) No exceptional circumstances have been disclosed. So the Green Belt boundaries should NOT be changed. To remove the two Villages from the Green Belt would change the nature of this area of countryside forever and would eventually merge historic and separate villages. It would be an environmental mistake that could never be reversed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

BROWNFIELD AVAILABLE

There is brownfield land available in Guildford town centre which is being earmarked for commercial development rather than for housing. This is enough to meet our real needs for affordable local homes. There are enough vacant commercial sites to cope with genuine business need, and we have enough retail capacity already, so urban brownfield/derelict land should be used for housing. I understand that Surrey University is sitting on permission for 1500+ accommodation units on its own brownfield campus. If the University fulfilled its obligations much Town Centre affordable accommodation would be available for rental/purchase

<td>To propose fairly extensive building and an increase in the local population without considering the infrastructure is a gross error of planning. The schools are full and there is, apparently, no money for school building. The station car parks are full. there is no obvious room to expand shopping facilities or parking areas to shops. The doctors' surgery is at capacity also the roads are frequently clogged up. If anything, expansion of the infrastructure is almost a greater problem than expanding housing provision. Hence, I object most strongly to the new local plan.</td>

I strongly object to the change in status of the Green Belt.

The Green Belt is there to protect the rural land surrounding the villages and on a larger scale a ring of green land circling London. The proposed changes are a blatant ploy to allow more urbanisation in a rural landscape. A thoroughly retrograde manoeuvre. What "exceptional circumstances" justify this?

I am a resident of West Horsley, having lived in this village for 5 years, I am strongly objecting to the potential removal of West Horsley from the Green Belt, leading to the insetting and extending of the 2003 Local Plan Settlement Area boundaries, in particular with regard to the proposed development site at Manor Farm.

Whilst I understand there is increased pressure on local housing, I feel that there are better sites that do not impinge on the Green Belt. The potential of 135 new homes (given that the majority of households on average have 2 + cars and 4 family members) to be built on the Manor Farm site, will only increase the pressure where the facilities, such as schools, the road network, drainage, medical services and local parking are already under resourced.

I believe an increase in housing at Manor Farm will fundamentally not work and irrevocably change the balance in the village to a completely unsupportable and unsustainable level.

**I OBJECT to the proposal for Manor Farm laid out in the Local Plan**

Proposed Submission Local Plan : Strategies and Sites June 2016

OBJECTION (WEST HORSLEY)

I want to object to the Guildford Borough Proposed Submission Local Plan : Strategies and Sites.

I am writing to object in the strongest way to the proposal to build 385 new high density homes in West Horsley – our infrastructure schools, roads, doctors are already at capacity. I am totally shocked that this represents a huge 34.7% increase, with a total 533 new houses in the Horsleys. There are no local jobs so people moving here would need to commute and this will put massive additional strain on the roads and the rail service into London.

The plan to build in the Green Belt is fundamentally flawed and I am totally opposed to removing the village from the Green Belt and do not believe there is any justification for doing so – indeed the plan does not even include any ‘exception circumstances’ which would support such a change. I have lived in Horsley for most of my adult life and want to continue to live here and raise my family in the semi-rural environment that we love.

West Horsley is characterised by mixed housing all at low density with many historic buildings and this maintains its rural village character. The Green Belt was introduced to protect villages like East and West Horsley to ensure the urban sprawl of London and surrounding towns had an outer limit and green ‘lungs’ were maintained to preserve rural character, nature, ecology, clean air etc.

As I note above this needs to be maintained with very limited in-fill development, to preserve the character of the village and ensure the population can be adequately serviced by the local amenities, rather than the high density inappropriate development proposed.

I feel that the wishes and need of local people are being ignored and we are being bullied into submission by local land owners with vested interests, local government and large developers.

The key evidence document ‘Guildford Borough Economic Strategy 2013-2031’ makes no case for locating large numbers of homes in West and East Horsley – there are many other ‘brownfield’ sites located much closer to where significant jobs, schools, shops, transport links etc are namely around Guildford and Woking. It makes no sense to site lots more families away from these towns and this approach is clearly unsustainable. It is almost impossible to park in the village at times to shop and children’s clubs such as football and cubs etc are already over-subscribed and have long waiting lists.

The local survey on the need for homes identified the need for 20 affordable homes to enable local people to stay in the village – I am happy for this to be implemented. I believe the siting of mass housing developments in West Horsley is more to do with monetary reward for developers as selling prices will be maximised in West Horsley as opposed to existing Brownfield sites, and not sound planning logic.

I have lived most of my adult life in West Horsley and because of the rural character of my village I have chosen to bring my family up here. If the proposed development is allowed to progress our village will be spoilt with high density development and once instigated it will be impossible to restore the charming character of this typical English village.

I feel very strongly that the proposals are flawed from a planning perspective, and are being undertaken for the wrong reasons namely for developers profit.

Please, please do not destroy my lovely village by removing it from the Green Belt and over-developing for the reasons noted above. This density of housing will ruin the current character of West Horsley forever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have lived with my wife and family in West Horsley for the last 18 years and am extremely concerned in respect of the proposed developments. Horsley is a lovely village that is recognised nationally as being one of the best places to live in this country due to open spaces, countryside, and heritage. I am extremely concerned and very strongly object to the fact that Guildford Borough Council propose to inset West and East Horsley from the Green Belt, and I consider that no meaningful, substantive, or effective changes to their proposals have been included since the 2016 consultation.

I believe the council has ignored the mass objections from over 30,000 residents. It feels as the intention is to gradually wear us down and this is totally unacceptable. Local opinions must be considered and the heritage of the Horsleys, should be maintained for future generations.

In my opinion nothing has been included since last year’s Consultation to improve the sustainability of the West Horsley development sites. Each new home on the proposed West Horsley development sites will need a minimum of one car, and probably two or more per household and I consider this will cause real safety issues for our children using the local roads. If you know and live in the village it is clear that the current infrastructure and amenities are fully utilised already. The schools, shops, medical centre, roads, parking and Horsley Station are already full to capacity and the proposed development plans will cause major issues for all of the above services.

In summary, I strongly object to the fact that Guildford Borough Council propose to inset West and East Horsley from the Green Belt, and that there have been no substantive or effective changes to their proposals since the 2016 consultation regarding proposed developments and supporting infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
4. The proposal to extend the boundaries of the Settlement areas of the Horsleys.

No sound reasons have been given for these changes, the only objective seems to be to increase the land available within the settlements for future additional developments.

1. **The designation of Station Parade as a District Centre.**

Classifying it in this way has resulted from a misreading of the nature of the facilities in the village centre and I fear that this would result in it being the inappropriate target for future urban development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

6. **The development of the former Wisley Airfield.**

The inordinate number of houses planned for this area would have a massive negative and unsustainable impact on the Horsley villages. The nature of the mix of houses, retail, commercial, traveller and schools development just under 2 miles away could not fail to have many problematic consequences for the Horsleys. The extensive developments at Burnt Common and Gosden Hill Farm, Burpham are also problematic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
2. The congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages. There is too much traffic in our villages already and this plan will cause more congestion in West Horsley, East Horsley, Normandy, Ockham, Ripley, Send and Clandon, with no plan to improve that. The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses in such a small area means dangerous and unsustainable traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

9. The congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Under the current economic climate post Brexit, it is unlikely any additional funding will be made available for new capital projects. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
9. Poor air quality concerns (Policy I3)

The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health. It has been shown that Wisley already has NOX levels above the EU legal limits and by law a school cannot be located in this area as a result.

There is brownfield land available in the town centre which is being earmarked for commercial development rather than for housing. This is sufficient to meet our real needs for affordable local homes.

There are enough vacant commercial sites to cope with genuine business need and we have enough retail capacity already. The argument for urban brownfield/derelict land being used for housing is clear, extremely compelling and, I’m sure, would meet with widespread approval.

I would therefore ask you revise the housing number and amend the Local Plan to utilise brownfield land rather than green field sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to register my objections to the new Guildford Local Plan. These refer mainly to the Horsleys but also to the surrounding area which will impact so adversely on our villages.

Whilst I can fully understand the need for ‘some’ new housing, the number proposed, the inadequate infrastructure to support the increase in population that would result and the location of the same are all quite unacceptable.

I object to all of the following:

1. **The proposal to remove the Horsleys from the Green Belt (Policy P2)**

   My understanding is that there have to be exceptional circumstances for this to be considered and this has not been demonstrated.

   Our Green Belt is precious. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding; it is the city’s playground. It is for us to conserve and protect it. There are 5 legal purposes for Green Belt, and it meets them all:

   - To check the unrestricted sprawl of large built up areas
   - To prevent neighbouring towns merging into one another
   - To assist in safeguarding the countryside from encroachment
   - To preserve the setting and special character of historic towns
   - To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

   This policy is flawed and should have been amended. In the last consultation just six individuals, out of the c. 7,000 of those who took part in the consultation, supported the policy. Another 20 comments of support were from organisations such as: the University of Surrey, local councils (including Guildford), consultants (e.g. Savills) or landowners. But of the 1,371 who commented on the green belt policy 1,332 (97%) were against.

   **What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

   **Attached documents:**

---

**Comment ID:** PSLPP16/3330  **Respondent:** 8883489 / N & B Hinchliff  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

8 . **Drains, Water Supply, Flood Risk, Congestion:**

Our drains, our water supply, our medical facilities and our roads cannot cope with the proposed number of new homes. Building this number of homes will lead to flood risk here and downstream (along the Wey and Thames). The planned development on Green Belt is therefore unsustainable.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
2. Local Plan as the development proposed is not sustainable (Policy S1)

13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially West Horsley, East Horsley, Normandy, Ockham, Ripley, Send and Clandon. The local communities don’t need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The development should be in urban areas where there is sustainable transport. West Horsley for example will see the number of housing increased by 35% within 3-5 years of the plan being adopted. The number and density of housing is not in keeping with the local area and is therefore against policies within the NPPF.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

17. I OBJECT to the proposed Infrastructure Schedule

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1431  Respondent: 8883841 / Pamela French  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high

   • The “objectively assessed need” figure of 693 homes a year is too high.
   • A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
   • The current SHMA inflates the proposed housing figure due to
     o failure to correct for errors in the historical data for international migration flows,
     o issues with the way it considers students and affordability and
     o flaws in the method for estimating the number of homes needed to support job growth.
   • It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2577  Respondent: 8883841 / Pamela French  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.
Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.
Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

16. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

7.  I OBJECT to the loss of rural employment

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

13. I OBJECT Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

**Rural Exception Homes**

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

10. I OBJECT to the lack of proper infrastructure planning for sites

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1) 

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

Answer (if comment is on questions 1-7 of the questionnaire): ()

11.  I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Answer (if comment is on questions 1-7 of the questionnaire): ()

12. I OBJECT to poor air quality concerns

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. I OBJECT to not protecting the Green Belt

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to development in areas which are at risk of flooding

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1. I OBJECT to the Local Plan as the development proposed will not be sustainable

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. I OBJECT to the Borough Wide Strategy

a. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

b. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

c. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.
The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- Housing at Site A43 Garlicks Arch would be on Greenbelt Land. The potential increase from 400 houses at site A43 Garlicks Arch is extremely harmful to the rural nature of the surrounding villages of Clandon, Ripley and Send and will cause an unnecessary coalescence of these villages.

I am objecting for the following reasons.

- The land is Green Belt and should be protected, not built. It is the home to a multitude of flora and fauna and an essential "green corridor" which connects or lies close to other protected areas close by, such as Wanborough and Normandy Woods Site of Nature Conservation and The Thames Basin Heaths Special Protection Area. Only last week, I was walking across A46 in the late evening and saw a stag beetle clumsily flying in front of me and heard baby owls screeching in the woods. Where will these creatures go once their habitat has been destroyed and the land covered with concrete?

- Guildford Borough Council has cited the need for a new seven form entry secondary school in the west of the borough as the "exceptional circumstance" that allows this land (A46) to be removed from the Green Belt, but the case for such a new school has not been Guildford County School and St Peter's are both expanding. King's College is more than 50% undersubscribed and desperate for pupils. Ash Manor and King's College are both able and willing to build extra classrooms on their sites. In addition, in 2014, Surrey County Council proposed that 'Il site within the proposed urban extension at Blackwell Farm, with all necessary access infrastructure built in and a catchment surrounding the site, would be a more sustainable location in transport termfor a new secondary school to serve the western side of Guildford." Given SCC's advice, the under subscription of neighbouring schools and the potential for growth in these already established schools, why has GBC ignored all the evidence? Perhaps it is because it is easier to manage a few large scale developments across the county than many small ones, and so GBC has decided to dump one of its large developments in Normandy at the last moment (and without prior consultation of the residents of Normandy) and use the supposed need for a school to support its ill thought through proposals.

- The proposed developments of A46 and A47 are bounded by rural roads and a railway: Glazier's Lane is an unclassified road, Westwood Lane is a C-class road and both of these have dangerous junctions with Guildford. In addition, there is a dangerous hump back bridge over the railway on Glazier's Lane and a one lane Railway tunnel on Westwood Lane, both of which have impaired visibility. I live in Beech Lane and turning left out of it (to go under the railway bridge) is always difficult to do safely because the "kink" in the road does not give you a clear view of what is the other side of the bridge. With the increased traffic that will result from the proposed development there will inevitably be more road traffic accidents. There will also be more traffic jams and commuters having to wait in traffic. During rush hours, the traffic backs up along both Westwood Lane and Glaziers Lane where they meet the Guildford road and this would increase and cause more congestion if there was a large housing development in Normandy.

- Normandy is prone to flooding as it is very low lying and because the underlying soil structure does not drain. For instance, the fields in A46 backing onto the railway line can become covered in a misty fog after heavy rain, showing just how sodden the land there is, and Wanborough Station floods so badly that passengers cannot get to it without wading through water up to their knees. I Building over the land on A46 would exacerbate these and other flooding problems in the village.

The development of A46 is developer-led, with the developer making huge profits out of the destruction of the Green Belt. Where is the due process of town and country planning in this? I completely understand that new housing is required in the borough but believe it should be more fairly spread out amongst all the parishes. I reiterate that I strongly object to large scale development in Normandy and Flexford.

Comment ID: PSLPS16/2248  Respondent: 8884225 / Ken Marchant  Agent:
Further to my previous comments, I strongly object to the proposal policy of building some 1000 houses and a 1,500 place secondary school on the Green Belt land between Normandy and Flexford for the following reasons:

1. It would totally destroy the rural environment of both villages. The sustainability and damage to the environment is certainly not properly assessed in the proposed plan.

2. The justification for a 1,500 place secondary school including where they are coming from, how they are being transported etc etc has not been fully investigated.

3. Traffic is already a major problem on the local village roads and on the A322 and A323, the latter would be totally grid locked at normal rush hour.

4. The plan does not cover who actually requires all these 1000 houses and will they be sufficiently qualified to fill the current availability of jobs in the area of Surrey.

5. The disposal of sewage would almost certainly be a major problem totally overloading the current village fragile system.

6. The area is prone to flooding and has a high water table level particularly in winter.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

view when I am trying to pull out of my drive and, given the speed and volume of the traffic, there is an accident waiting to happen. If 2000 houses are built on Wisley Airfield the traffic will be overwhelming. People who live in the new town will use Old Lane to reach Cobham and the surrounding area. The roads are already full to capacity with traffic. For example trying to join the A3 by Wisley Airfield in the morning rush hour, to then join the M25 at Junction 10. This section of the M25 already crawls along. A new town will make this impossible. Local services such as doctors’ surgeries, local shops and parking already seem unable to cope with the number of people living in the area. If these plans go ahead it would be a very short-sighted tragedy, not just for this area, but for the whole South East of England.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Creating the Green Belt was an act of wonderful foresight for future generations to come. The Green Belt benefits everyone in London and the South East, not just the people who live in it. One example is the hundreds of cyclists who visit the area every weekend to enjoy the green space. Reducing the Green Belt around East and West Horsley and Effingham would set a precedent, making it easier for the Green Belt to be reduced elsewhere. The whole point of the Green Belt is that it is sacrosanct. If we gradually remove some villages here, then more villages somewhere else, it will disappear. Once these green spaces are lost, they will never be regained. The Green Belt aims to contain the outward spread of London and retain the open nature of the countryside. Reducing the Green Belt to build the currently proposed homes will open the way for more and more homes in the future. The villages will simply merge into one large built up town. The National Planning Policy Framework requires any change of Green Belt boundaries to demonstrate exceptional circumstances. I understand that ministerial guidance has made it clear that unmet housing need should not be taken as exceptional circumstances.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

3 General comments

Medical facilities. The current medical centre in Kingston Avenue, East Horsley is always extremely busy and it is difficult to make appointments. If the population increases there will be a shortage of GPs, which is already a national problem. An increase in the size of the medical centre will put corresponding pressure on local hospitals particularly the Royal Surrey County Hospital in Guildford.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Roads and infrastructure. There is a regular service on trains to and from London and Guildford from Horsley station. Parking at the station car park is becoming an increasing problem for both commuters and later travellers. There would be an increase in traffic movements from West Horsley to the station for dropping off and collecting passengers. This is particularly noticeable at school times and for commuters.

There would also be a large increase in car usage on already busy roads as for each new house there is often another 1 or 2 cars using the roads.

To summarise, the facilities and infrastructure of West Horsley cannot support anything like the scale of development which is proposed. There appear to be no plans to expand the infrastructure before new homes are built.

I hope these comments are of assistance in your deliberations.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to record my concerns and objections to The Guildford Plan with particular regard to the village of West Horsley.

These are as follows:

1  Green Belt

There are no special circumstances which justify taking the village of West Horsley out of the Green Belt. This is an ancient village set in beautiful countryside set at the foot of the North Downs but within commuting distance of London. If this area becomes developed further, the South East and in particular Surrey, will become a suburban area with no countryside which benefits both residents and visitors alike.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3745  Respondent: 8885217 / Rupert and Claire Jackson  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2
2 Sustainable development.

Expansion of our village is unsustainable. We have only one small shop, no post office and a very limited weekdays only bus service. In the 28 years we have lived here, the post office has closed, the local grocery shop is likely to close and there has been a corresponding increase of traffic.

The proposal for 385 properties on the proposed sites is at a much higher density than at present. The number of residents would increase putting extra strain on local services such as roads capacity, drainage, shops parking in East Horsley (both for the station and shops) and schools.

There does, however, continue to be a need for smaller properties as older people want to downsize within the village and young people want to buy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• I object to the number of houses being planned for the Horsleys, particularly West Horsley. It would completely change the character of these quiet villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1196  Respondent: 8886497 / Quentin Bradshaw  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

• I object to the continuous replacement of small houses for the elderly, (bungalows etc) with large 5 bedroom houses. The Council should stop pandering to the developers and take back control of the countryside.
• We have enough large houses for millionaires. Building should be for affordable homes. The planning seems to be completely out of control. Recent “affordable houses” in East Horsley were offered for sale for the ridiculous prices of nearly £700,000. What young person can afford that?
• It is virtually impossible for people earning the average salary or less to buy property in this area, so our police, teachers, shop and light industry staff, all have to travel long distances. The Council should be developing its own stock of housing for rental.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1194  Respondent: 8886497 / Quentin Bradshaw  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

• The roads, schools, drainage, trains and internet simply cannot cope with this planned level of increased population. Whoever is suggesting these new houses clearly does not live here, drive on our local roads, nor try to commute by train.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Guildford Borough Proposed submission Local Plan: Strategy and Sites: June 2016

I am writing with regard to the consultation on the Guildford Plan. I am totally appalled and so disappointed that my elected officials could be so cavalier with the precious inheritance that is Surrey’s countryside. We may own this land legally, but we are all just custodians for our descendants. Without this green land, Surrey becomes just another empty, faceless, concrete, urban wilderness.

My specific objections are:

- I object to the withdrawal of the Horsley villages from the Green Belt. The Horsleys are classic examples of “the Surrey Village”. Your role is to protect these not to destroy them.
- I object to building in the Green Belt more generally, particularly in Surrey. I do not think this is necessary; houses can be built on brown field land.
- I think there is sufficient brown field land in Guildford and Woking for the necessary houses.
- Building on the Green Belt should be a last step of desperation, when all other sites are exhausted. We are a long way off that.

I strongly urge the Council to rethink these plans. Once the Green Belt is destroyed, it can never be recovered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ) , is Sound? ( ) , is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- We are already on the edge of experiencing serious flooding. In the recent storms, the roads have been like rivers. We need open land to soak up the rain.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/7606  Respondent: 8886849 / Marjory Arnold  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to building on the green belt. I want space between Guildford and nearby villages
2. I object to changes being made to green belt boundaries
3. I object to the scale of new building throughout the borough. I feel it is unnecessary for the needs of Guildford. Guildford should not be used for London overspill.
4. I object to brownfield sites being used for yet more commercial properties instead of for housing
5. I object to the fact that infrastructure has not been properly assessed and is inadequate to deal with government housing levels – roads, doctors, schools will not be able to cope.
6. I object that housing on the green belt will increase traffic bringing increased danger and pollution and slower journey times on already crowded roads.
7. I object to all other strategic sites in the local plan, Blackwell Farm, 3 Farms Meadows, Garlick’s Arch, West Horsley and Hog’s Back. All are out of proportion to the surrounding area, and none qualify for the exceptional circumstances required to take them out of the green belt.
8. I object specifically to proposed building on Gosden Hill Farm on green belt designated to prevent West Clandon being absorbed into a sprawling urban environment four times the size of West Clandon village. I have lived in the village for 47 years and do not want it to lose its identity. Guildford roads are unable to cope with the present volume of traffic. They need to be improved before any more properties are built. The area is congested enough already. Do not encourage more building in this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I should like to express my concerns in regard to some of the issues raised in the Plan.

1. Housing requirements. The Plan is based on growth predictions which have been acknowledged to be incorrect. Surely this should be the basis for a strategy which should also identify housing requirements ie how many and what type eg single person dwellings, family homes, starter homes, single storey etc The proposed density of the developments proposed in the Horsleys are much higher than the average for the area which would be out of keeping and put a huge strain on the local facilities. They are also on flood plains and would be a strain on the sewage systems which are already inadequate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. The Wisley development has been turned down by the Guildford councillors on the advice of the planning committee and many comments from local residents on the unsuitability of the site. The site should no longer be in the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1301  Respondent: 8886913 / Rosamund Bovill  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Infrastructure We understand that some infrastructure plans outlined in the last Guildford Plan have still not been implemented. This does not give us much confidence that the 2016 Plan will be able to achieve its goals for schools, roads, drains, surgeries etc. No Plans have yet been published to reassure residents that these have been considered and funds are available.

1. Transport. The transport to support more housing is not sufficient. The roads are not suitable for more buses. The Station Car parks are full and there are no safe cycle paths. Many roads do not have pavements for pedestrian access to public transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Green Belt The proposals for the redefining of the Green Belt boundaries is alarming. From an environmental point of view it is the residents of London who will suffer as much as those living in this borough. It provides green lung around the capital to help reduce the pollution within the city. As residents, we moved here from Blackheath, South London to these green spaces as a deliberate choice to bring up a family, despite the breadwinner having to face a daily commute. The fields, open spaces and forested areas should not be put at risk of housing development. Agricultural land may be needed in the long term to feed the increasing population.

2. Settlement Areas We would like to see these communities keep their rural status. Many Surrey villages which have been highlighted as examples of picturesque English country areas. These are worth preserving and not
expanded into ‘urban villages’ by an expansion of the village boundaries. There is a danger of developers doing battle with local residents and costly legal confrontation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  pslp172/3775  Respondent:  8886913 / Rosamund Bovill  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have written before to object to the inclusion of Three Farms Meadows in the local Plan and I object to the issue being included in the new plan after it was turned down previously by all councillors.

The local roads are not suitable for more traffic and are not suitable for pedestrians or cyclists travelling to stations.

Local station car parks are already at full capacity.

Wisley gardens have increased their visitor numbers hugely and they are planning a further increase. During their special events the A3 is already blocked at peak times and will inhibit traffic flow in both directions.

Part of the site is in Green belt and there is no case for building to take place here. The proposed buildings will impact on the local villages and areas designated AONB.

Changes to the original plan do not make sufficient change for there to be a new submission. It is a waste of our council tax to pursue a new enquiry.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPA16/2698  Respondent:  8886945 / Brian Osborn  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I do not agree that the Local Plan is sound, that the evidence base is up to date or that the plan is legal compliant for the following reasons:

1). GL Hearn’s Strategic Housing Market Assessment (SHMA) proposes building 693 Dwellings Per Annum (DPA). However representations made by Tibbalds Planning and Urban Design consultants on behalf of Send Parish Council illustrate that this number accounts for a buffer of more than 20%. In reality this means allocations are made to provide 910 Dwellings Per Annum (DPA) or 131% of the requirement of the SHMA. The housing figures in the SHMA are therefore inaccurate and unreliable.

2). Guildford Borough Green Belt and Countryside Study is tailored around the Settlement Hierarchy Report and the Strategic Housing Market Assessment Report (SHMA). The Settlement Hierarchy is based on a subjective spatial strategy of large/medium and small villages. With regard to the SHMA, I have detailed my concerns as in point 1 above.

3). Guildford Borough Green Belt and Countryside Study is used to rule out sites in GBC Flood Risk Sequential and Exception Test (May 2016) but these sites would otherwise meet the GBC Flood Risk Sequential and Exception Test (May 2016). See Appendix 1 stages 1, 2 and 3.

4). Guildford Borough Council’s Surface Water Management Plan (SWMP) was produced prior to the approval of planning application 14P02289: Land to the north of Tannery Lane and east of Wharf Lane. This planning application required a drainage strategy to mitigate surface water. This development borders site A42 Clockbarn Nursery. As the SWMP preceded approval of this planning application the SWMP it is now outdated as an evidence base document to manage flood risk as required by the NPPF- with regard to A42 Clockbarn Nursery.

5) Each and every site in Send Parish has been added since the Regulation 18 consultation, including a major development of 400 homes at Garlick’s Arch and on/off slip roads on to the A3.

6) The introduction of Garlick’s Arch and on/off slips roads on to the A3 have been added so late within a Regulation 19 document that statutory consultees such as Highways England have not had a chance to comment.

7) The Transport Assessment was provided during the consultation period and was not available to inform Councillors at the full Council meeting on the 24th May 2016.

8) Councillors have not been able to scrutinize all documentation, including the OAN figure for the SHMA.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1356  Respondent: 8886945 / Brian Osborn  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I writing to object to the 2016 Regulation 19 Draft Local Plan. I find the plan has not addressed my concerns regarding infrastructure capacity and traffic on the A247. Infact the introduction of Garlicks Arch and on/off slips roads to the A3 at Bumtcommon (sites A43 and A43a) will only add to these problems. I re-send with this letter my original objection.

I object to site A43 Land at Garlick's Arch, Send Marsh, Bumtcommon and Ripley and building 400 houses on this site as this site was not included in the initial consultation of the Draft Local Plan in 2014. This number of houses is out of scale and all proportion for a village settlement.

I object to A43a Burnt Common on and off slip roads to the A3. The traffic impact on the A247 through Send and Clandon and surrounding B roads would be immense. Many of these roads are already in a poor state with potholes. The roads at the Clandon traffic lights are already in a terrible condition. I am concerned at more NOISE from traffic and AIR POLLUTION as I live on the main A247.

I object to the proposed housing figure for the Local Plan to build 13,000 plus homes at 693 homes per year for next 20 years (2013-2033). This figure is not sustainable for local infrastructure to cope with.

I object to building 485 homes in Send Parish. The population will increase will lead to congestion on roads, pressure on local schools, the Villages medical centre and hospital facilities.

I object to removing the Send Lakes from SNCI status. More should be done through policies in the Local Plan to ensure and protect SNCI status as a basis for environmental sustainability of the plan.

I object to building houses at site A42 Clockbarn Nursery Tannery Lane. I visit friends in Brook Lane, Tannery Lane frequently and Tannery lane and its junction with Send road are hazardous and the Papercourt Lane end of Tannery Lane is very narrow. The business centre and

the now approved planning permission for a Narrowboat basin in Tannery lane will combined put a lot of pressure on this lane and to add a further 45 houses would really add to those problems. I

also would like to see Nurseries, and Farms remain as such and be used for growing crops/produce as local industry - not become housing developments.

I object to site A44 Send Hill. This site is within the Green Belt and development of this site would harm the amenity of the surrounding countryside.

I object to removing villages from the Green Belt. I moved to my bungalow in the 1960s to live in a village and I would like Send to remain a proper village.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to removing the Send Lakes from being a (Site of Nature Conservation Interest) SNCI status. Bats, Herons, Kingfishers and Hedgehogs are all part of the wildlife that can be seen in and around the lakes. The local plan should encourage this through policies aimed at preserving the lakes SNCI status as a part of the local plan’s environmental sustainability. It should not be removing them from SNCI status. The lakes act as an important “green lung” and wildlife corridor for the village.

I object to site A42 Clockbarn Nursery Tannery Lane. In recent documentation for planning application 14/P/02289 - Land to the north of Tannery Lane and east of Wharf Lane Send, surface water was considered an issue (see item 4.3 Non technical Drainage report by Stilwell Partnership. In response a drainage strategy was submitted by Johns Associates proposing - Surface water run off is to be managed by digging deeper ditches around boundaries of the site, infiltration and attenuation ponds. This land adjoining site A42 Clockbarn Nursery. The building of houses on Clockbarn has potential to add pressure to land drainage and increasing the risk of surface water flooding. This scenario is not covered in GBC’s Surface Water Management Plan (SWMP) as this plan preceded approval of application 14/P/02289. The SWMP is a necessary part of the evidence base to ensure that Local Plans manage flood risk as required by the NPPF - but with regard to site A42 this is not covered by SWMP and this site is not compliant with NPPF requirements to manage flood risk from all sources.

Moreover, in the case officer report for approved application 14/P/02289 - Land to the north of Tannery Lane and east of Wharf Lane Send it is noted that the nursery to the west of this site (i.e. Clockbarn Nursery, site A42) provides foraging habitat for bats. This would appear as a mitigation measure for approval of application 14/P/02289 and it would not now be appropriate to destroy this wildlife corridor to the west of the Marina development by building houses on the site.

I object to site A43a Burnt Common on and off slip roads to the A3. The traffic impact on the A247 through Send and Clandon and surrounding B roads would be immense. Air quality monitoring has not been undertaken on the A247 ahead of this proposal. This new road junction is a significant change between the Regulation 18 and Regulation 19 consultation and people have not had opportunity to be involved or consulted accordingly.

I object to site A43 Land at Garlick’s Arch, Send Marsh, Burntcommon and Ripley and building 400 houses on this site as this site was not included in the initial consultation of the Draft Local Plan in 2014. This number of houses is out of scale and all proportion for a village settlement. Moreover, this area of land is identified as Green Belt within the evidence base document, Guildford Borough Green Belt and Countryside Study - Volume IV (2014). See page 62. This site is a significant change between the Regulation 18 and Regulation 19 consultation and people have not had opportunity to be involved or consulted accordingly.

I object to site A44 Send Hill. This site is a significant change between the Regulation 18 and Regulation 19 consultation and people have not had opportunity to be involved or consulted accordingly. Moreover, this area of land is identified as Green Belt within the evidence base document, Guildford Borough Green Belt and Countryside Study - Volume IV (2014). See page 59.

I object to Gosden Hill site A25 (building 2000 houses) and I object to land at former Wisley Airfield site A35 (building 2000 houses) Both these developments are at odds with the sustainability corridor and the impact on junction 10 of the M25 would be enormous.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11152  Respondent: 8886945 / Brian Osborn  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2
I strongly object to Policy H2 Affordable Homes or that this Local Plan addresses building affordable housing for local need. Current guidance on producing SHMA’s lacks a meaningful needs-based definition of affordability - such as for example the proportion of income allocated to housing costs. OAN figures alone therefore cannot tackle affordability or need (defined as a basic human need to have a roof over our head). I believe that a more meaningful approach to addressing local need is through Neighbourhood Plans and local land trusts. They provide a mechanism to meet local need while preserving and enhancing villages characters. We need local planning that works with local communities. The bottom up approach of Neighbourhood Plans rather than the top down approach of SHMA with an OAN figure incompatible with genuine affordability is a more realistic approach to addressing local need.

Moreover, a recent Rural Housing Needs Survey commissioned by Send Parish Council in 2013 found that “local need” was relatively low within Send Parish.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11155  Respondent: 8886945 / Brian Osborn  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

I object to Policy P2 Green Belt.

I object to removing/ insetting villages from the Green Belt for the following reasons:

1) NPPF guidance makes clear that Green Belt boundaries should only be altered in exceptional circumstances through the Local Plan process. Unmet housing need is unlikely to out weigh harm to the Green Belt and constitute “exceptional circumstances”.

1. Send Village should remain in the Green Belt. The village of Send with its proximity on the border of Woking is a village which fulfils paragraph 80 of the NPPF which stipulates that Green Belt is to check unrestricted sprawl of large built-up areas and to prevent neighbouring towns from merging. Paragraphs 79-86 of the NPPF should therefore be applied to Send as a constraint and Send should not be removed from the Green Belt.

3) Moreover the basis for Policy P2 is the Guildford Borough Green Belt and Countryside Study.

3a) Guildford Borough Green Belt and Countryside Study has lacked consistency to Green Belt boundaries. Land in Send Parish which was initially identified as Green Belt within the evidence base document, Guildford Borough Green Belt and Countryside Study - Volume IV (2014) has now been allocated for housing development as sites A43 and A44.
3b) Elsewhere Guildford Borough Green Belt and Countryside Study is used to rule out other sites which meet the GBC Flood Risk Sequential and Exception Test (May 2016), See Appendix 1 Stage 1, 2 and 3 page 25. Again there is a lack of consistency in approach.

4) The Settlement Hierarchy is another key evidenced based document for Policy P2 which is unfounded. It makes a subjective decision that Send Marsh and Burnt Common are categorised as a large village due to their proximity to Send services. In practise this is a small convenience store attached to a garage/fuel station. Had this not been so Send Marsh and Burnt Common would have been classified a medium village. Medium villages are unsuitable for substantial growth (such as site A43 Garlick’s Arch). Please refer further to “Representations on behalf of Send Parish Council by Tibbalds Planning and Urban Design consultants).

I also object to Policy D4 Development in Urban Areas and Inset Villages for all the reasons above.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Policy S1. Sustainability should include the Green Belt as an absolute constraint.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11150  Respondent: 8886945 / Brian Osborn  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy S2.

I object to the proposed housing figure for the Local Plan to build 13,652 homes at 693 DPA for next 20 years (2013-2033). The housing figure for this plan is unsustainable and the plan does not apply constraints. Local infrastructure will not cope. Paragraph 4.1.12 of the proposed submission Local Plan acknowledges that the number of houses is greater than required. Representations made on behalf of Send Parish Council by Tibbalds Planning and Urban Design consultants illustrate how allocations are made to provide 910 Dwellings Per Annum (DPA) or 131% of the requirement of the SHMA.

According to NPPF guidance Paragraph 47 stipulates that planning authorities should provide for an additional buffer of between 5-20% and based on this advise the figure would be in region of 727-832 DPA. The provision in the GBC Local Plan to build 910 DPA is therefore excessive.

Without applying constraints the housing figure could rise even higher than 13,652 houses when windfall sites are taken into consideration.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to A42 Clockbam Nursery Tannery Lane. I have previously objected in 2016 to building 40 houses but this has now be increased to 60. My objections to the 2016 plan remain valid. Site A42 is not sustainable for building houses as Tannery Lane and Papercourt Lane's are narrow and cannot cope with this number of homes being built in addition to a Narrowboat Basin which has been approved and is only accessible by Tannery Lane.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I reiterate my objection to site A43 Land at Garlick's Arch, Send Marsh, Burnt common and Ripley I previously made to the 2016 consultation as building 400 houses on this site as this site was not included in the initial consultation of the Draft Local Plan in 2014 and it would be overdevelopment of Send and Ripley villages. Allocating travellers "pitches" in the twenty first century is outdated and instead the Council should be providing and encouraging suitable housing for traveller communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2876  Respondent: 8886945 / Brian Osborn  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to A58 Land at Burnt Common. The allocation for a minimum of 7,000 square meters of industrial warehousing is major expansion and overdevelopment. The road infrastructure cannot cope and it will make the A3 and A247 impossible for traffic and increase pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICIES A37, A38, A40 & A41, located in West Horsley

I OBJECT to POLICIES A37, A38, A40 & A41, given the scale of the development proposed in West Horsley, the inevitable destruction of its village character and the impact on infrastructure across West and East Horsley. The LAA identifies six sites in West Horsley for potential development, the four largest having allocation policies within the Proposed Submission Local Plan. The total housing number arising from these six sites is 405 homes in total. For a village which had 1,124 dwellings at the 2011 Census, this represents a proportional increase of 36% over the plan period, an enormously high proportion by any standards.

The four policy sites are all located within the Green Belt and I consider these proposed movements in settlement boundaries to be invalid. These proposals are also contrary to the principles of the Metropolitan Green belt. It is also totally contrary to the opening statement of Local Plan Policy P2 that “We will continue to protect the Metropolitan Green Belt” It seems that in West and East Horsley at least the draft Local Plan is doing exactly the opposite.

Answer (if comment is on questions 1-7 of the questionnaire): ()

<table>
<thead>
<tr>
<th>I OBJECT to Policy H2</th>
</tr>
</thead>
</table>
| - I object to the percentage of affordable homes being proposed, in particular the differences in affordable housing need across the borough. This has significant consequences in East Horsley, which is the area with the lowest demand for affordable housing in the borough. Moreover, East Horsley is not classified as a ‘rural area’ under the 1997 Housing Order and therefore is not exempt from the new ‘right to acquire or enfranchise’ entitlement – a factor which is likely to see affordable houses in the parish being bought up as soon as possible and thereafter lost to the affordable sector.  

Under Policy H2, 40% of all but the smallest development sites in East Horsley will be required to have affordable housing built upon them, irrespective of whether there is actually demand for more social housing in that area. Moreover, the affordable housing targets proposed in the Proposed Submission Local Plan indicate that the biggest component of affordable housing (40%) should be built as 1-bed dwellings despite the fact that GBC’s own studies show that the strongest affordable demand in the borough is actually for larger 3-bed dwellings.  

As a result of this flawed affordable housing policy, a significant volume of social housing is likely to be built in places where it is not needed and offered to tenants who do not want to live there nor have jobs near that location.  

Policy H2 thereby fails the test of sustainability and should be radically revised. If not, the outcome will be serious inefficiency in the provision of social housing in the borough. In an area such as East Horsley this is likely to be manifested in a rapid buying-up of properties for quick re-sale at a generous profit, at which point these homes also become lost to the affordable sector.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICIES I1, I2 & I3

These three policies cover Infrastructure & Delivery, Supporting the Department of Transport’s ‘Road Investment Strategy’ and Sustainable Transport. Whilst we support the general policy statements as presented in each case, it is the detailed infrastructure proposals for Guildford Borough which give us cause for concern.  

I OBJECT to the infrastructure proposals and believe that they do not meet the stated objective of providing infrastructure to support the proposed developments. There are serious deficiencies and shortcomings in the infrastructure of Guildford Borough as it is today and that the aggressive housing policy as proposed by GBC in the Proposed Submission Local Plan will exacerbate this problem.
The following comments can be specifically made about infrastructure in East Horsley today:

- Roads across the parish are in poor condition with many potholes. Many roads are unable to sustain their current levels of traffic, particularly the increasing levels of HGV traffic;

- The principal through roads traversing East Horsley are narrow and winding, have a series of pinch points, have sections without any pavements and are generally unlit. As a senior SCC councillor remarked at a recent public meeting in the village hall: “East Horsley has lanes, not roads.” East Horsley’s ‘lanes’ are totally unsuitable for high volumes of traffic, in particular for the volume of HGV’s now using them;

- Many of the drains are blocked or otherwise in poor condition giving rise to frequent surface water flooding when it rains;

- The pavements are in poor condition. As well as being narrow, they are often uneven and/or cracked making it difficult, for example, for people with pushchairs or prams or in wheelchairs;

- There are insufficient school spaces for the number of local children needing them, with the result that children are often allocated to schools a significant distance away such as Dorking or Woking; and The Medical Centre in East Horsley is already at capacity in terms of its number of patients. It is recognised that, as stated in the Proposed Submission Local Plan, the maintenance of adequate infrastructure and its expansion to meet growing needs is the responsibility of the relevant infrastructure provider. This is often not GBC itself but rather, for example, Surrey County Council or utility companies.

There are no proposals in respect of all the existing problems with for example roads, pavements, drainage, and schools.

Furthermore, it is inevitable that the proposed developments in East Horsley itself and nearby, particularly in West Horsley and the proposals for Wisley, will put further strain on the existing infrastructure. There are no proposals at all to cater for this.

</tbody>
</table>

I **OBJECT to Local Plan Policy P2** - GBC appears to be in breach of this policy itself through the housing policies that it has set out in the Local Plan. The analysis included in the Appendix shows that around 65% of the developments proposed in the Proposed Submission Local Plan are to be built on land currently within the Metropolitan Green Belt. Under NPPF rules, GBC is permitted to make allowance for factors which may constrain the delivery of new housing, such as the need to protect the Metropolitan Green Belt or the restrictions required to protect the Surrey Hills Area of Outstanding Natural Beauty (‘AONB’) which is offered protection under the NPPF comparable to that of a national park. Although these areas make up a large proportion of the land area of Guildford Borough, GBC makes no attempt to reduce its housing delivery in order to take account of such constraints. This is unacceptable.
I OBJECT to the Proposal to inset East Horsley from the Green Belt and request that this proposal be dropped from the Local Plan.

I OBJECT to Settlement Boundary changes in East Horsley, specifically the boundary changes, which have been proposed to move the East Horsley settlement boundary westwards from behind the houses on the west side of Ockham Road North up to the eastern boundary of Loflesworth Wood and the proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Kingston Avenue up to a tree line running along the Parish Boundary at the western edge of Kingston Meadows. The result is to take all of Kingston Meadows out of the Green Belt.

I also OBJECT to the proposal to remove Wisley Airfield from the Green Belt.

POLICY P2: Limited In-filling

I OBJECT to the proposal to designate roads south of the A246 as being within the ‘identified boundary of the village’ and to allow limited infilling within this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2: Borough Wide Strategy

This policy sets out the objective of adding 13,860 new homes to Guildford Borough over the 2013-2033 period of the Proposed Submission Local Plan, equating to an annual build of 693 new homes per annum.

I OBJECT to the borough housing targets set out in Policy S2 – I have serious concerns about the enormous scale of this building programme, which represents a net increase of 25% in the housing stock of Guildford Borough, a remarkable rate of increase for a borough in the English Home Counties. It is even more remarkable when the official statisticians at the Office of National Statistics (“ONS”) are projecting a population increase of some 15% for Guildford Borough over this same period, which could be challenged further given the results of the recent referendum.

<td></td>
</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object to the proposed development of site A46 in the new local plan on the following grounds:

1. **The proposal for development does not constitute an 'exceptional circumstance' for releasing land from Green Belt.** The proposal goes against the stated duty of GBC to protect Green Belt land. Brownfield site should be used in preference.

2. **The need for a new secondary school, a pivotal argument in consideration of the site, has not been proven.**

At a meeting of GBC on 24th May, an amendment tabled by Cllr Bilbe and seconded by Paul Spooner (GBC lead), stated that:

'Site A46 is only included as a strategic site to support provision of a new secondary school and the site should not be developed should it be demonstrated that such a school is not required'.

Data collected by SCC Cllr Keith Witham demonstrates that a new school is not required.

Surrounding secondary schools are almost without exception under-subscribed - currently to the tune of 736 vacancies, rising to an estimated 1216 vacancies when the new technical college opens in 2018. Furthermore, existing schools (eg. Ash Manor, Kings College) could be expanded if necessary and SCC has already approved expansion of St Peters and The County School.

Therefore, the expenditure involved in building, equipping and running another secondary school would seem to be huge unnecessary waste of public money!

1. **Roads and other infrastructure**
The site is bounded by 2 minor roads. The bridges over (Glaziers Lane) and under (Westwood Lane) the railway already constitute bottlenecks which would be made far worse by the increase in traffic from 1100 dwellings, a nursing home, retail outlets and the proposed schools. The increased traffic would also severely impinge on the junctions at the A323 (Aldershot to Guildford Route) and Wanborough Hill (onto the A31, Hogs Back).

The area is also subject to flooding and to poor drainage near to the Glaziers Lane/A323 junction. It would be hugely expensive to upgrade the drainage system to cope with such a vast development and flooding would be made worse by the concreting over of a large expanse of land.

1. **Effect on Environment and wildlife.**

The hugely disproportionate development proposed would change the rural nature of Normandy forever. Little regard has been paid to the environmental aspects of sustainability - or to the wishes of local residents.

The loss of farmland and wildlife habitat would be devastating and the increase in pollution, disturbance from people, and wildlife predation by an estimated 187 cats and 264 dogs would be horrendous. The SANG proposed by the developer would be insufficient to offset the environmental impact of dog walkers, who would probably use local countryside rather than the area provided.

To conclude, the proposed development of site A46 - a prime Green Belt Site should be removed from the Local Plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** pslt173/520  **Respondent:** 8887169 / Bryan & Sue Starkey  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Appendix II: Maps - Normandy and Flexford

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

Whilst as a resident of Normandy I applaud the decision to remove development of sites A46 and A47 from the Local Plan, I must object to the proposed removal of parts of Guildford Road, Glaziers Lane, Walden Cottages and Flexford from Green Belt.

The latter will facilitate development of these areas by relaxing the current restrictions on development.

The area in question is an important section of Green Belt since it contributes significantly to the openness of the current Green Belt. It will act as a boundary to prevent developments in Ash from coalescing with those from the Guildford direction (eg proposed Blackwell Farm and UOS development) to produce a continuous urban sprawl.

Surely this is not in line with GBC or government policy on Green Belt protection.

POLICIES I1, I2 & I3

These three policies cover Infrastructure & Delivery, Supporting the Department of Transport’s ‘Road Investment Strategy’ and Sustainable Transport. Whilst we support the general policy statements as presented in each case, it is the detailed infrastructure proposals for Guildford Borough which give us cause for concern.

I OBJECT to the infrastructure proposals and believe that they do not meet the stated objective of providing infrastructure to support the proposed developments. There are serious deficiencies and shortcomings in the infrastructure of Guildford Borough as it is today and that the aggressive housing policy as proposed by GBC in the Proposed Submission Local Plan will exacerbate this problem.

The following comments can be specifically made about infrastructure in East Horsley today:

- Roads across the parish are in poor condition with many potholes. Many roads are unable to sustain their current levels of traffic, particularly the increasing levels of HGV traffic;
- The principal through roads traversing East Horsley are narrow and winding, have a series of pinch points, have sections without any pavements and are generally unlit. As a senior SCC councillor remarked at a recent public meeting in the village hall: “East Horsley has lanes, not roads.” East Horsley’s ‘lanes’ are totally unsuitable for high volumes of traffic, in particular for the volume of HGV’s now using them;
- Many of the drains are blocked or otherwise in poor condition giving rise to frequent surface water flooding when it rains;
- The pavements are in poor condition. As well as being narrow, they are often uneven and/or cracked making it difficult, for example, for people with pushchairs or prams or in wheelchairs;
- There are insufficient school spaces for the number of local children needing them, with the result that children are often allocated to schools a significant distance away such as Dorking or Woking; and The Medical Centre in East Horsley is already at capacity in terms of its number of patients. It is recognised that, as stated in the Proposed Submission Local Plan, the maintenance of adequate infrastructure and its expansion to meet growing needs is the responsibility of the relevant infrastructure provider. This is often not GBC itself but rather, for example, Surrey County Council or utility companies.

There are no proposals in respect of all the existing problems with for example roads, pavements, drainage, and schools.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I OBJECT to Local Plan Policy P2 - GBC appears to be in breach of this policy itself through the housing policies that it has set out in the Local Plan. The analysis included in the Appendix shows that around 65% of the developments proposed in the Proposed Submission Local Plan are to be built on land currently within the Metropolitan Green Belt. Under NPPF rules, GBC is permitted to make allowance for factors which may constrain the delivery of new housing, such as the need to protect the Metropolitan Green Belt or the restrictions required to protect the Surrey Hills Area of Outstanding Natural Beauty (‘AONB’) which is offered protection under the NPPF comparable to that of a national park. Although these areas
make up a large proportion of the land area of Guildford Borough, GBC makes no attempt to reduce its housing delivery in order to take account of such constraints. This is unacceptable.

I OBJECT to the Proposal to inset East Horsley from the Green Belt and request that this proposal be dropped from the Local Plan.

I OBJECT to Settlement Boundary changes in East Horsley, specifically the boundary changes, which have been proposed to move the East Horsley settlement boundary westwards from behind the houses on the west side of Ockham Road North up to the eastern boundary of Lollesworth Wood and the proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Kingston Avenue up to a tree line running along the Parish Boundary at the western edge of Kingston Meadows. The result is to take all of Kingston Meadows out of the Green Belt.

My name is [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] and I am writing to OBJECT to the Proposed Submission Local Plan and the evidence and assumptions which support it.

My comments on the particular points are as follows:

**Policy S2: Borough Wide Strategy**

This policy sets out the objective of adding 13,860 new homes to Guildford Borough over the 2013-2033 period of the Proposed Submission Local Plan, equating to an annual build of 693 new homes per annum.

I OBJECT to the borough housing targets set out in Policy S2 – I have serious concerns about the enormous scale of this building programme, which represents a net increase of 25% in the housing stock of Guildford Borough, a remarkable rate of increase for a borough in the English Home Counties. It is even more remarkable when the official statisticians at the Office of National Statistics (“ONS”) are projecting a population increase of some 15% for Guildford Borough over this same period, which could be challenged further given the results of the recent referendum.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I challenge the suggestion that Green Belt may be released for development if a secondary school is provided. Also, I strongly challenge the need for another secondary school to the west of the borough, when existing schools in this area are under subscribed by more than 700 places. Additionally, more places will become available at the new Technical College, Guildford County and St Peters Schools.

The road network in the area would not support the increased volume of traffic. The two railway bridges (under in Westwood Lane & over in Glaziers Lane) are particularly hazardous.

On the matter of 'sustainability' versus 'sensitivity', two of the key concepts that underpin the local plan, I make the following point. For the purposes of assessing 'sustainability' Normandy and Flexford have been treated as one settlement, whilst for 'sensitivity' they have been treated separately. This is inconsistent and inappropriate.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

Comment ID: PSLPS16/2294  Respondent: 8887297 / Ian C Milne  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46
Whilst acknowledging the need for housing development within Guildford Borough, I have serious concerns about the extent of development proposed across the borough and in particular I object to the large scale development outlined for Normandy & Flexford.

I would like to register my objections to the Local Plan for the following reasons.

It is essential now and for future generations to protect rural areas from urban sprawl. This is why the Green Belt is valuable to us. The Green Belt of Normandy & Flexford meets all five legal purposes for its existence:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into each other
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic town
- To assist in urban regeneration by encouraging the recycling of derelict and urban

On this basis the green belt of Normandy, Flexford and Guildford Borough should not be released for large scale development.

As stated in my opening paragraph I acknowledge the need for development in the borough and that some areas will be exempt. However, I do feel very strongly that the hamlets that form Normandy have been allocated a far greater proportion of the boroughs housing requirement than can be justified and that the burden needs to be shared across the borough.

Any development in the village should strive both to maintain the mix of property that currently exists and the needs of first time buyers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
There is a diverse range of flora and fauna in the area that would be adversely affected. Habitats adjoining A46 are Priority Habitats under the NERC Act, including protected species (European Protected Species, Species of Principal Importance and those protected by The Wildlife and Countryside Act (1981).

The urban brownfield/derelict sites in the borough should be released for housing development before the development of land located within the Green Belt is considered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to register my support of Guildford Borough Council’s (GBC) decision to remove site A46 (land to the south of Normandy and north of Flexford) and A47 (land to the east of the Paddocks, Flexford) from the 2017 Local Plan.

It is reassuring that GBC has acknowledged that this land is Green Belt and that the infrastructure - roads wastewater, sewage, power supply and healthcare could not support such extensive development. Prior to the development of sites remaining in the local plan, it is essential that GBC implement improvements, to ease traffic congestion, such as the new road bridge and footbridge at Ash station to permit removal of the level crossing (ref: LRN21) in advance of building.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to add my objection to the proposed plan for over 1,000 houses and a secondary school to be built in Normandy.

If the plan goes ahead it would result in the doubling of the population of Normandy. The increase in cars for the new residents and general traffic going to and from the school on a twice daily journey would put an unacceptable burden on our local roads.

Westwood Lane is reduced to a single carriage way under the railway bridge with a blind turning from Beech Lane just before the bridge - a sure recipe for accidents.

Glaziers Lane has a narrow hump back bridge crossing the railway which was not built for the kind of heavy traffic that would be a result of the proposed plan.

The junctions of both these roads with the busy Aldershot road are already prone to heavy traffic back up. Normandy crossroads is a renowned accident black spot and the junction at the church is close to Wyke primary school with local families crossing the road to get to school.

In addition Christmaspie Crossroad is another accident black spot with regular traffic collisions.

Pollution from the increase in vehicles which will often be slow moving because of traffic build up will be a potential health hazard to the young and elderly in the village.
It is my understanding from recent research that local secondary schools are under subscribed thus eliminating the need to build another.

Lastly some areas of Normandy are prone to flooding. This would surely be increased by the proposed development.

I would have no objection to a SMALL development in Normandy particularly if it was affordable housing to buy or rent

I hope the above concerns will be considered with care.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

As a resident of East Horsley village I have studied the above and my objections, with comments, are as follows:

1. I am totally opposed to the removal of the Horsleys from the Green Belt and do not agree with any extension of the boundaries of the Settlement areas of the Horsleys. This would also have a detrimental effect on the habitat of wildlife, flora and fauna.
2. The highly inflated numbers of proposed new housing within the Horsleys is unnecessary and unacceptable and would alter the present strong characteristics of both villages to their detriment.
3. Both villages are currently struggling with overburdened and inefficient infrastructure. The schools and surgeries are now oversubscribed, the parking facilities at the village halls, surgery and shops are already insufficient - for example the Horsley U3A has approx 650 members and it is impossible for the vast majority of members to park at the Village Hall to attend meetings.

The village roads are overcrowded and in poor condition and the drainage is in an exceedingly poor state and little appears to have been done to rectify these conditions. The Ockham roads North and South are currently overused by huge trucks and lorries - very recently there was a lengthy closure of both roads due to a truck striking the railway arch.

1. Station Parade being designated a District Centre is absurd - totally inappropriate.
2. The possible development of the former Wisley Airfield so close to the Horsleys would have an enormous impact, any such development I strongly object to.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

---
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have been a resident of West Horsley for over 18 years, and I would like to register my very strong objections to the Guildford Local Plan, and specifically the plans as they apply to the villages of East and West Horsley; including the development of some 500-600 new houses in the Horsleys, and a further 2000 houses within two miles of the villages. The impact on the villages would be catastrophic and irreversible.

With Brexit now clearly under way, surely it would also be far more sensible to reassess the need for housing in the south-east in several years time. There could be a mass exodus of jobs from London to other European capitals meaning that we would have 'ghost towns' with much empty housing instead of thriving communities and the demand for housing less not greater.

I have read the various documents explaining the details of the Local Plan, and it is clear that you are likely to be overwhelmed with letters of objection. It is very apparent that whole parts of the plans have either not been thought through, and indeed significant areas appear not to have been addressed in any way. It seems that there has been a very superficial attempt to create a solution that is clearly impractical, unworkable, and objectionable on various counts.

I am shocked to read about the proposals to alter established boundaries in, what appears to be, an attempt to make the plans work where they are currently unworkable under existing and long established village boundaries. It is my understanding that any change in Green Belt boundaries should demonstrate exceptional circumstances. I see no exceptional circumstances to justify the proposed arbitrary changes to the Green Belt. Furthermore West Horsley seems to have been 'victimised' in these proposals on an unbelievable scale. While the village of Ash, for example, has virtually 'escaped' any similar devastating plans for housing developments on such a huge scale.

If it were to be shown that in fact the destruction of the Horsley villages, along with Ockham and their local countryside can be justified legally by simply re-writing the laws governing the Green Belt, then I would further object to the plans on the grounds of a severe lack of infrastructure, either currently available or planned.

I drive to my place of work each day from West Horsley to Cobham. My route 18 years ago used to less than 15 minutes; most days it is now closer to 30 minutes or longer to travel less than 7 miles. It is clear that the local road structure is completely unsuitable for today’s level of traffic and to compound the problems with significant more traffic seems to be verging on complete madness. The local roads and A3 and junction 10 of the M25 will be gridlocked for significantly more proportions of each day. It is imperative that the Authorities take immediate and major action to relieve the congestion that is currently choking our roads without adding to the problems with more housing as this would inevitably result in a significant increase in commuter vehicles as a result of these ‘plans’. This is, of course only one area where the infrastructure is totally overwhelmed. Many people, more qualified than me will explain the equally, or probably even more important, impossible situation with regards to schools, medical facilities, shops and public transport and other aspects of local infrastructure. None of these appear to have been adequately addressed.

There are obvious and real reasons why the plan to ‘adjust’ the village boundaries and cancel large areas of Green Belt to accommodate a 35% increase in local households does not work. In addition the loss of recreational amenities, both for local people and the considerable number who travel, particularly from London would be disastrous. There appears to be a determination to extend the boundaries of the built up area of London through the Horsleys, past Guildford and beyond. Our Green Belt is precious. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding; it is the city’s playground. It is for us to conserve and protect it. I understand that there are five legal purposes for Green Belt as I am certain you are aware, and the area around East and West Horsley is particularly critical in meeting all of these criterial:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns
- To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

The concept of limiting urban sprawl, and the requirements for the establishment and maintenance of the Green Belt have apparently been disregarded or completely ignored in the new Guildford Local Plan. I urge you to reconsider this...
objectionable, unworkable and irreversible plan that will result in the loss of the villages and countryside in which we live.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to set out my objections to many of the points set out in the local plan. I find it ridiculous that after months of consultation and thousands of objections the Borough Council, our supposedly elected representatives, are still not listening to the public on so many key points, not least of which the greenbelt, inflated housing numbers and total lack of supporting infrastructure.

I object in the strongest terms to:
- Villages being removed from the greenbelt
- Garlick's Arch proposals
- Wisley development still being in the plan despite previous rejection
- Gosden Hill and Blackwell Farm sites, all of the above for ridiculously inflated numbers
- Disproportionately high numbers of housing
- Total lack of thought, planning and infrastructure especially for schools and medical facilities

I urge the Council, our elected representatives, to rethink their proposals and properly listen to residents, groups and organisations such as CPRE and GGG, who all have a firmer grasp of facts and a better understanding of how to shape the borough for future generations.

Wisley

Whilst I recognise that Wisley airfield is redundant land, the area is prone to flooding, as anyone who has lived here long enough knows. The access to the A3/Wisley roundabout tends to flood during serious rainfall, and the road has been impassable several times during the last sixteen years we have lived here. You cannot responsibly build 2000 plus houses and not provide a school, medical centre, some local shops, post office, community centre and recreational space. This should be a new community where people have their own facilities and not have to travel along narrow lanes to source them. These facilities should be put in place at the same time as the houses are built. I have seen no confirmation anywhere that GBC plan to provide these facilities. On average, each house could be expected to own two cars. At present the station car park in East Horsley is full each day. Where are these people going to park if travelling into London. Similarly, it is often difficult to get an appointment at the Doctors surgery, so they wouldn't be able to cope with so many extra patients. I understand that commuters are now using the Village Hall car park and therefore when the Medical Centre car park is full, we are also unable to park in the Village Hall car park, and this is before just one extra home is built in the Horsleys.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Schools and Medical facilities.

As you must know, our schools are full and our Medical Centre stretched. You are making no promises that new schools are to be built, so I am assuming children living in all these new houses will have to travel out of the area to attend other schools. Not ideal in any way, and that means more traffic on the roads, and speeding through the village on our narrow roads, already a problem.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I understand that mention has been made of land at the tennis and cricket club at the top of Pennymead Drive. Are we not to have any recreational areas. Similarly the land at Kingston Meadow, which is enjoyed by everyone for sport, walking with dogs and for the village to come together to celebrate special occasions such as Jubilees and the Queen’s Birthday. I am completely lost for words that GBC can consider building so many houses in a lovely area and spoil it for everyone. At one time it was considered safe to be within a Green Belt area, so why are you allowed to now relax those rules. I understand that people need housing, and I have no objection to houses being built in small pockets around the village eg. The Telephone Exchange Land, and I understand the need maybe for housing on Wisley Airfield, BUT ONLY PROVIDED the aforementioned facilities are put in place, SCHOOLS, DOCTORS SURGERY, POST OFFICE, SHOPS AND RECREATIONAL FACILITIES.

Please please, give more consideration before you ruin a very lovely part of our country and turn us into a suburban community instead of a rural one.

Green Belt

I strongly object to the Horsleys being removed from the Green Belt. This is a beautiful area which is peaceful and friendly, although in recent years the traffic through the village has become a problem and localised flooding is becoming worse. The more housing that is built, water has nowhere to go. It seems that GBC has taken little notice of the concerns of residents who are totally aware of the problems we will face if all these houses are built. As mentioned before, for every house built, we can expect two extra cars on our roads. What are you thinking?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Development Site referenced Policy A38

In particular, I object to the proposal for the building of 135 homes onland to the west of West Horsley, (ReferencedPolicyA38, land at ManorFarm). The majority of land on this site is classified as moderate to good agricultural land and is currently in use as pasture for grazing horses and houses a livery stable. I question the need to remove such agricultural land from the Green Belt. Surely it is important to preserve agricultural land for future generations. This site makes a significant contribution to the openness of the Green Belt. The National Planning Policy Framework of March 2012 requires planners to “recognise the character and beauty of the countryside and take into account all the benefits of the best and most versatile farmland”.

In addition, the site is a haven for wild life, frequented by deer, foxes, small mammals, reptiles, bats and a large variety of birdlife.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. **Development Site referenced Policy A41**

I object to the proposed development of land to the south of West Horsley in East lane (Referenced Policy A41) which has been added to the Guildford Borough Proposed Submission since the public consultation on the Draft local Plan in 2014 with a proposal to build 90 new houses. Again this is good agricultural land, currently in use as pasture for grazing horses. East lane is a lane, precisely as the name suggests. It is narrow and poorly maintained, with little room for large vehicles to pass. For most of its length there is only one footpath which changes sides, thus causing pedestrians to have to cross the road. Recently a new pinch point was created outside Waterloo Farm Cottage, where a footpath has been installed, allowing only a single lane for traffic. As mentioned in Point 3 above, East lane is frequently flooded with surface water after only a moderate amount of rainfall. It certainly would not accommodate the large volume of increased traffic as a result of developments on this and the site referenced Policy A38).

In summary, I strongly object to the Guildford Borough Proposed Submission particularly the removal of the village of West Horsley from the Metropolitan Green Belt and the inclusion of the proposed large development sites for West Horsley. There appears to be little or no plan to prioritise the use of brownfield sites and no allowance for ‘windfall sites’ (which were counted by Mole Valley Council in their local Plan).

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. **Removal of Green Belt Status**

I object to the proposal to remove the Green Belt Status of a number of villages in the borough, including West Horsley. This directly contradicts the Government's National Planning Policy Framework, published in March 2012, which states in Section 9, point 79 "The Government attaches great importance to Green Belts. The fundamental aim of the Green Belt Policy is to prevent urban sprawl by keeping land open; the essential characteristics of Green Belts are their openness and their permanence." and in point 82 "The general extent of Green Belts across the country is already established. New Green Belts should only be established in exceptional circumstances, for example, when planning to larger scale development such as new settlements or major urban extensions.”

The Guildford Plan states "We will continue to protect the Metropolitan Belt”. However, the Guildford Plan proposes to remove green belt status from a number of villages in the borough, including East and West Horsley. Guildford Borough Council has not demonstrated 'exceptional circumstances' in justification of these proposals. No sound reasons have been provided and it seems that development land is being made available solely driven by profit for the benefit of developers and land owners, not the need for more housing.
1. Proposal to Inset West Horsley from the Green Belt

I object to the proposal that West Horsley be inset from the Green Belt instead of being washed over by it as it is at present.

West Horsley is a very old village with 43 listed buildings including a number of old houses and barns built before 1700. The village lies adjacent to the Surrey Hills Area of Outstanding Natural Beauty; as a result of this the village attracts a large number of walkers and cyclists who come to enjoy the many quiet lanes and footpaths in the open countryside. As a result of the proposal to inset the village from the Green Belt, any large-scale developments would completely destroy the rural character of this small village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Since the consultation in 2016, only one proposed development site in West Horsley (Site A 41) has been removed from the Local Plan, leaving four sites, A37, A38, A39 and A 40. This means that the eastern side of the Borough is scheduled to take a greater proportion of new homes within the Green Belt. This is land which is closest to London, green belt land which is most needed to prevent the encroachment of the Metropolitan conurbation. With particular reference to site A38, land to the west of West Horsley (land at Manor Farm) where it is proposed to build 135 homes, the majority of the land on this site is classified as moderate to good agricultural land and is currently in use as pasture for grazing horses and houses a livery stable. I question the need to remove such agricultural land from the Green Belt. Surely it is important to preserve agricultural land for future generations. This site makes a significant contribution to the openness of the Green Belt surrounding the village. The National Planning Policy Framework of March 2012 requires planners to “recognise the character and beauty of the countryside and take into account all the benefits of the best and most versatile farmland”. The Guildford Local Plan 2017 must recognise this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The reduction in the number of new homes proposed within the Green Belt, following the 2016 Consultation, does not go far enough in reducing the very large number of new dwellings proposed on the Green Belt. This will result in the needless loss of Green Belt, thus contradicting the Government’s National Planning Policy Framework, published in March 2012, which states in Section 9, point 79 “The Government attaches great importance to Green Belts. The fundamental aim of Green Belt Policy is to prevent urban sprawl by keeping land open; the essential characteristics of Green Belts are their openness and their permanence.” and in point 82 “The general extent of Green Belts across the country is already established. New Green Belts should only be established in exceptional circumstances, for example, when planning for larger scale development such as new settlements or major urban extensions.” Despite claims that it will continue to protect the Metropolitan Green Belt, Guildford Borough Council still proposes to remove large areas of the Green Belt for development.

It is totally unacceptable that Guildford Borough Council is choosing not to constrain its overall housing growth to protect the Green Belt, as many other Councils have done, and continues to rely upon flawed evidence to justify over-expansion.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to OBJECT to the 2016 draft version of the Local Plan produced by Guildford Borough Council.

The process of compiling the local plan has caused outrage amongst the electorate. 20,000 letters were submitted in during the Sites and Strategies Options Consultation. 95% objected to using Greenbelt land. These views have been ignored and appear to go against the councillors own election promises.

The A3 / M25 is at capacity at peak times and the Highways England Agency are not planning to improve the A3 before 2020. The planned developments will only increase congestion in and around the surrounding villages. It is proposed that 65000 houses (40%of the housing proposed) is built between the M25 & Burpham and I shall concentrate on that area during this letter.

I would like to OBJECT to West Horsley and East Horsley being removed from the greenbelt in the way that the council proposes in order to allow development on the sites proposed. As things stand currently at the Medical Centre in East Horsley it is already difficult to make an appointment. The one local state primary school shared by East and West Horsley is oversubscribed and there is no state secondary school in the villages. The car parking spaces in East Horsley around the shops, healthcentre and at the station can prove challenging at the best of times. West Horsley itself currently has one food convenience store, two Public Houses and a newsagent. There has been no Post Office since August 2013 so I fail to see how you can classify it as a medium sized village. I feel that local social, shopping, educational, healthcare and policing services will be overwhelmed by the proposed plans for development. There is no infrastructure plan whatsoever in the local plan in order to accommodate the increase in housing which I find scandalous.

I OBJECT to the draft local plan as it will destroy the ruralness of the area. In the villages of West & East Horsley the density of houses to be built on the proposed sites is totally out of keeping with the existing houses in the villages. This will mean that the proposed sites will have an urban estate density which is out of character with the low density rural character elsewhere in the villages. In West Horsley alone it has 41 listed buildings in it which gives the village appeal. Our heritage needs to be considered. This proposed plan would have a huge effect both visually and environmentally on the ruralness of this area. Tourism brings advantages to the area such as boosting the local economy. One of the reasons that tourists visit is because the countryside is rural and attractive and appreciated by walkers as well as cyclists. If the roads were developed to accommodate the proposed increase in development I believe tourism would lessen and the risk of injury to cyclists and pedestrians would increase.

I OBJECT to the draft plan due to the dangers that it may lead to. The pavements in parts of East and West Horsley i.e on The Street leading up to the two local stores, and on Ockham Road South are very narrow and unsuitable for wheelchairs and prams etc. The main routes through the villages are narrow with poor road surfaces and the increase in traffic that development would bring would bring inherent dangers to car users and pedestrians alike.

I OBJECT to the draft local plan as I feel there are unsuitable public transport facilities to meet the increase in population. It is naive to think that most people would walk or cycle to work or to the train station in East Horsley from the village and neighbouring West Horsley due to the distances needed to travel and the safety issues to take into consideration. Again this would put huge demands on the road network, increase the carbon footprint and decrease the air quality. Existing public transport in the villages is very limited which makes it difficult to get around without a car.

I OBJECT to the draft local plan as I feel that the roads in East & West Horsley tend to flood annually making the roads impassable often even in a 4x4. Development would only increase this risk as surface water would not be able to drain away so readily.

The Horsleys appear to have a larger number of Potential Development Areas than most other villages within the borough which appears unfair. In addition to the planned development sites in the Horsley’s there are plans for 2000 houses at Gosden Hill on the A3, 400 houses at Garlicks Arch, a site of ancient woodland, and a new town at the old site of Wisley...
Airfield. All these sites are on green belt and will mean that there is urban sprawl along the A3 corridor and appears to be an unbalanced allocation of development in one area of the borough. West and East Horsley will grow by over 40% by 2031 according to the draft Local Plan. Most of this will occur in the first 5 years of the Guildford Plan period. This is much much greater than other areas of the borough and will totally destroy the villages as we know them.

I OBJECT to the Horsley’s defined settlement boundaries being changed and the villages being “inset” therefore allowing development on current greenbelt land and conservation areas. There are no exceptional circumstances apparent to build on the green belt. Housing need alone should not constitute as exceptional circumstances.

I OBJECT to the local draft plan as it stands. There is unsubstantiated evidence as to how the housing figures have been ascertained. Indeed the councillors have rejected several proposals such as the new development planned at Wisley Airfield and yet they remain in this 2016 draft local plan.

I OBJECT to greenbelt land being destroyed for housing needs. 70% of the proposed development across the borough is on existing greenbelt or countryside. I believe that the council needs to consult the residents in order to produce a document which recommends a more suitable level of development which will protect our villages and surrounding countryside for generations to come. **Once the greenbelt is lost it is gone forever. The NPPF 79 said that greenbelt land should be open and permanent.** Sustainable development means that it ensures better lives for ourselves and not making worse lives for future generations.

I feel that as the plan stands in its current format future generations lives will be made worse for the reasons stated in this letter and for those reasons I OBJECT to the plan. The scale and position of future development sites needs to be much more sensible in order for the Local Plan to be more practical and realistic.

The revised plan is little different from the previous one but in more detail. My basic objection is is that both villages will no longer enjoy Green Belt status, in its place will be something called village boundary. It will have no clout and only open other areas for development.

There will be at least 600 new houses with as a result the usual one car per house and some even more. To this add further cars genated by the 2000 houses at Wisley think of the traffic jams which will result.

The population will increase who will need services, there no mention of how these will be provided.

Who set all this in motion, the Govt. that was formed some 6 years ago. The promises as usual were the countryside, what was left of it would be protected, but the existing rules were torn up and all this set in motion, once again we have been betrayed.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
My greatest underlying concern is the doubt that the figure for the calculation of the number of new houses required, taken from a Statistical Housing Market Assessment (SHMA) and not made available for consideration by the general public may be incorrect. Furthermore, this initial figure was increased by GBC for some reason. If the calculations for the basic premise for the GBC's submission are flawed it makes a nonsense of everything we are considering.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Consideration should also be given to the further threat posed to the Horsleys by the proposed huge development at Wisley Airfield, less than two miles away, which in conjunction with the Local Plan proposals will overwhelm these rural villages and the very qualities which have made living in them so attractive.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object most strongly to the re-consideration of the above proposed development.

I object to the site being on Green Belt land.

I object to the huge scale of this settlement of over 2000 houses as well as retail, commerce, traveller and school developments. This is less than two miles from the rural villages of Ripley and the Horsleys and will have an enormous negative impact on their infrastructure.

I object because:

ROADS are narrow, already congested with cars and heavy vehicles (the railway bridge has already been damaged by a large lorry)

ROADS have no space for cycle lanes for the VERY many cyclists who use our villages regularly. This is a dangerous situation

PARKING at Horsley is at a premium and both Horsley and Effingham Stations are at full capacity

SCHOOLS are over subscribed

MEDICAL SERVICES are stretched

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the proposed extension of boundaries of the Settlement areas of the Horsfeys and their removal from the Green Belt. What are the 'exceptional circumstances' which require such a drastic step? I consider this just a ruse to enable any future development to be enforced with minimum trouble. I do appreciate that more housing is necessary but the proposal for six main sites and 533 new houses in the Horsley villages is excessive.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to various proposals for the above Plan. The size and complexity of the Submission Local Plan defies the understanding of the ordinary person like myself. So I make my objections based on personal experience and common sense as an East Horsley resident of some 30 years who values what this village offers and realises that the proposed changes will ruin its character and change it irrevocably.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

My response to Guildford Borough Council’s Proposed Submission Local Plan: Strategy and Sites

I totally reject the plan to remove West Horsley and other villages from the Green Belt. Section 86 of the National Planning Policy Framework states “if it is necessary to prevent development in a village because of the important contribution which the open character of the village makes to the openness of the Green Belt, the village should be included in the Green Belt”.

The villages that the plan intends to remove from the Green Belt make a terrific contribution to the Green Belt as anyone well acquainted with the villages round Guildford would know.

There is quite a bit of land held by developers in West Horsley which one supposes is why West Horsley has been targeted for development? A Borough Council has the responsibility to protect rural communities from the sort of mass development proposed in the plan, not to endorse it.

If sites A39 and A41 were built on there would be a marked change in the nature of this area around the railway line; at present it is countryside, it would become urban.

If site A40 was built on, particularly to the north of the lane, there would be a clear encroachment into the countryside. The same applies to the north of site A38.

The traffic through East and West Horsley is already very heavy. The fumes at the junction of East Lane and Ockham Road North already provides a serious health hazard for small children, the pavement being so narrow. West Horsley is a village with occasional pavements, none of which are suitable for a wheelchair or two children sitting side by side in a double buggy. To suggest that a village already at bursting point can sustain the sort of development proposed, an increase of thirty five percent, is preposterous. The development of brown field sites in the past has been good and one would hope that would continue.
In one part of the plan it is stated that brown field sites should be built on in preference to fields but in another that the borough intends to grant planning permission to build on the sites in West Horsley early on, none of these are brown field sites. Brown field sites come up sporadically and are not so easy to develop; neither of these excuses should be used to build on fields without very careful thought. A brown field site, can in the fullness of time be changed back, a field once built on is lost forever.

As the proposal to build a small town at Wisley goes against almost every statement in the NPPF it is difficult to understand why it is still being proposed. I oppose this on the basis of excess traffic with its consequential pollution and traffic jams and the curtailment of free movement of wildlife across one of the last remaining truly rural area of West Surrey.

Councillor Spooner says “We consider that exceptional circumstances exist across the borough. These are the requirement to provide sufficient land for market and affordable housing and employment development with the significant adverse consequences of not doing so”. There is much of England where unemployment is a problem, it is not in Guildford.

Guildford has been acting as a dormitory town for London for years, this along with an expanding undergraduate population that has never been properly catered for plus development of the business park etc mean that the borough is already saturated with people and cars. Removing more of the countryside, as at Burpham, diminishes everyone’s wellbeing.

To minimise traffic any plan should focus on people living as close to work as possible generally this will be in Guildford which already has excellent bus services and a main line station. The countryside should be left for everyone to enjoy wherever they live. In the past councils have respected this it is very sad that the majority of the present Guildford Borough Councillors appear not to.

The Surrey villages and surrounding countryside provide an area for walking and, since the Olympics, have hosted an exceptional amount of cycling. The villages provide cyclists with access to the Surrey Hills and planners need to be aware of the need to keep all road users safe. Every extra adult living in a Surrey village is an extra car on already too busy roads so allowing the potential of hundreds of houses to be built in these rural villages seems to be very irresponsible. Such a potential would exist if the villages were to be removed from the Green Belt.

The plan should show a much more imaginative use of land for residential purposes in Guildford itself, as it is only here that there is the infrastructure to reduce journey times and car usage. As the NPPF states brown field sites should not be being held back from residential development in the hope of future commercial use. This appears to be happening in Guildford.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There appears to be little connection between the statements “to uphold the character of the Borough” with the proposed removal of the villages to the North East of the Borough from the Green Belt. West Horsley, one of the most rural parishes is taken out of the Green Belt and the boundary of the village expanded to include land owned by developers and property companies. on this land nearly three hundred houses are to be built. No consideration has been given to the totally inadequate infrastructure for such a massive increase in dwellings. Historically villages have grown gradually. I doubt that many would complain if the villages gradually became more densely populated as a result of infilling or development of derelict land, but the these proposals negate any sensible growth.

The proposals seem totally lacking in sympathy with the rural nature of the area from Burpham, Merrow through the Clandons, to the Horsleys, Ockham and Effingham.

Once the villages are out of the Green Belt developers will have a field day. The council, even if they see the error of their ways will be unable to stop the steady destruction of our villages as we know them. The council i.e. the payers of council tax, do not have the resources to compete against property developers; within a generation this area of Surrey will be unrecognisable.

As many will have pointed out, it is deceitful for a political party to say it will not build on green belt land and then, after people who have voted on this promise, for a council to alter the green belt boundaries without proper discussion or justification.

There are proposals to build two large scale developments a total of well over 4000 homes on the south east side of the A3 less than six miles apart. At a minimum an extra 9000 people focusing on the Royal Surrey. The traffic chaos is mind boggling. The only explanation I can find in the draft plan is that the Guildford Borough Council wants to expand the town. The Borough is already overpopulated. If this is London overspill the locals should be informed. London actually has many potential sites.

The best homes are those near a person’s place of work. Such an arrangement saves cost and stress to the worker and protects the environment. At present work places, namely to the west, are in completely different places from the sites suggested for housing.

The Council appear to be carried away with grandiose schemes that bear little relationship to the stressful lives already experienced by many local people.

Houses are needed but so is common sense.
There are frequent calls to build on the green built, these need to be thought about carefully and properly justified they are not in this plan.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to express my strong objections to the local plan as it affects my local community of West Horsley, along with East Horsley and Wisley.

The enormous level of house building along with destruction of Green Belt protection is utterly abhorrent and must not be allowed to happen. Once this starts, it will set a very dangerous precedent, and will certainly continue in the future. Is it really your intention to start the process of joining London to Guildford?

I have seen no possible justification for this ridiculous level of building and loss of protection for our lovely countryside with its wildlife.

The area is made up of small communities and this will erode that enormously turning the Horsleys, Ockham and Wisley into an unpleasant sprawl.

It appears that the continued attempt to build on countryside and not brownfield sites is merely to pander to developers who want to make easy profit. We have a good range of wildlife some of which is very sensitive to traffic, such as barn owls. They need protection.

The local services are stretched to the limit already with schools and medical services at capacity. Our local roads are in a pathetic state of disrepair, and the extra traffic will further aggravate this problem. Where are these people going to work? The extra people will undoubtedly lead to more strain and a total loss of the character of this lovely area.

PLEASE PLEASE PLEASE STOP.

Local facilities are totally inadequate for the kind of expansion that is suggested.

The Medical Centre in East Horsley is already working to maximum capacity. It has proved extremely difficult to recruit doctors to the area in the last couple of years. We are currently functioning thanks to the use of locum doctors, and this situation is likely to get worse. The building is also at maximum capacity and will struggle to cope with the massive increase in patient numbers. This increased population is likely to lead to a significant deterioration in the quality of primary care services for our population.

The roads are already struggling to cope with traffic, with inadequate parking in the villages. This development will massively increase the number of vehicles using the villages and roads. The quality of our roads is shameful, several of them resembling dirt tracks with current traffic, never mind the proposed increases.

Schools are full, and the presence of private schools in the area should not be included in the provision of education as they are not likely to contribute enough capacity. A possible economic downturn may lead to significant increased demand for state school places in the next few years as private education becomes less affordable for many families.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Local wildlife is under pressure. The Green Belt remains a hugely important protection for the area, and more building with more people and more traffic will undoubtedly have detrimental effect on many species clinging on in the area. I have personally spent long periods observing and photographing very delicate species such as barn owls. They will not survive this expansion as it has been shown time and again that traffic pressures have a devastating effect on many species.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to comment on the amended local plan as it affects the Horsleys, and the wider area including Wisley airfield and Merrow .

I remain horrified by the level of planning that is suggested and the destructive effect that this will have on the local communities and environment. It appears completely unrealistic with respect to local services and infrastructure and will lead to a dramatic loss in the rural character of the villages and surrounding countryside.

My main concerns are the disproportionate number of houses suggested with the inevitable number of people and cars that this will mean. I have seen no evidence to justify this massive development and loss of protection of this beautiful part of the country. Brownfield development in other areas such as Guildford itself have not been fully exploited, and clearly should come well ahead of this rural destruction .

The prospect of a giant urban sprawl rapidly heading towards a joining of Cobham and Leatherhead with Guildford is horrific and must not be allowed to take place. The local communities will be changed and much of the character will be lost. The countryside needs protection. No one ever tears a town down to give it back to nature. We have to stop this development now.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposed village at Wisley will have an incredibly detrimental effect on East and West Horsley. With all the roads connecting to the A3 near to, and south of, the M25 junction shut off bar the one at Ripley that comes through East Horsley, much of the traffic for Dorking, Leatherhead and Guildford will be directed through our village. This is already a narrow and dangerous road that cannot cope with the traffic using it, including many large lorries. The junction with the A246 will come to a halt, not helped by the the traffic from the proposed 48 new houses at Thatchers and the 22 proposed for the BT site. The residents of the new Wisley village will be encouraged to travel to work by rail, using Horsley station, already under pressure, with no capacity for increased parking. This is a proposal to build a small town, unattractively close to the M25, in an area that harbours wildlife, some of which is increasingly rare, and trees and vegetation that balance the emissions produced by the 24/7 traffic of the M25.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
It would also seem to me a mistake to demolish Thatchers which will presumably be necessary to accommodate so many new houses. The property was designed by Frank Chown who, along with the Earl of Lovelace, gave East Horsley its architectural heritage and so it should be preserved. There are also now very few hotels in an area that currently attracts tourists due to its wide range of cultural and leisure attractions and I am sure Thatchers could maximise its capabilities as a business in the area.

The Government has stated that Green Belt land should be built on only in extreme circumstances, confirmed by our MP. I do not believe that there is evidence of extreme circumstance that would warrant the insetting of the Horsleys and therefore the change of village boundary and the Green Belt status of the surrounding land. It is essential that Green Belt land is maintained as sacrosanct. It gives enjoyment to thousands as evidenced almost every day and especially at weekends. To remove it would make a mockery of the Borough’s previous recent entreaties to encourage cycling tourism for example. By removing it the Borough would destroy the very thing that makes this area so attractive and cause irrevocable damage to the environment.

I am writing in response to the recently published Local Plan. It is however disappointing to note how little, in my opinion, previous consultations appear to have affected this new Plan. While I appreciate that Guildford Borough Council must make proposals for the future, much of what is included in the presented plan would, I believe, destroy the very essence of the Borough and damage the environment for future generations rather than manage, sustain and develop sensitively. My objections are as follows:

There appears to be a continued drive to build over the countryside rather than develop urban areas. Locally it is in Guildford where there is work and where there is a requirement for affordable housing both to buy and lease, and I feel that
more can be done in Guildford to maximise its potential for housing development. Building in and developing outlying villages such as the Horsleys will increase traffic, congestion and poor air quality as residents travel to the workplace and for leisure activities. Already this area, and in particular the A246 between East Horsley and Effingham, suffers from terrible traffic problems especially at rush hours when traffic is backed up at a standstill for two or three miles.

The number of proposed houses is completely disproportionate to the area. It seeks to fundamentally change the villages of East and West Horsley without any consideration for their status within conservation zones or the impact on the many Listed properties. There is also a worrying lack of thought for the impact on the infrastructure. There are no proposals to increase medical facilities or schools, to improve rail travel, including parking facilities, for work and leisure commuters, to alleviate traffic congestion, to put in place effective general drainage throughout the village, all of which cause problems already to the residents that will increase exponentially if the Plan is agreed. As I understood it the number of houses proposed in the previous plan was disputed as being well over requirement, yet this NEW Local Plan proposes even more! Factoring in Brexit, surely these figures need to be radically adjusted DOWN. I would also question what constitutes "Affordable Housing". This appears to be undefined and I have a concern that, in this area, this will not realistically be within the budget of the lower paid as we are being led to believe.

To conclude, I believe that this Plan continues to propose far greater build than is required, is unsympathetic to the area in its proposed implementation and I object to it in its present draft.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<tbody>
<tr>
<td>Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H1</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I believe that the number of houses that the Council plans to build is still too high. I have commented on this in my previous responses to Local Plan submissions but since then there have been huge political changes that will also have an effect on population numbers. For example I personally already know of European non-British nationals who are moving to other European countries due to their uncertain future in the UK and I believe that this is a trend that has been forecast. This surely will have an impact on the number of houses needed, especially in the South East, yet I see no evidence that the impact of Brexit has been taken into account. I therefore object to the number of houses identified in the proposals as being required to be built.

I am appalled by the proposals to 'inset' villages and the plans to build on the green belt. I have in previous letters made very strong objections to this. I can find no 'exceptional' circumstances that warrant the removal of green belt land over building on brownfield sites and I feel it is our duty to preserve the countryside and wildlife as far as is possible for future generations. In addition the proposals appear to build on green belt land that is unsuitable being for example a flood risk as in the case of the proposal to build near East Horsley station. This surely is irresponsible. I therefore object to the altering of inset areas, in particular as it affects East Horsley, and building on green belt land.

I am also horrified by the proposal to build so many houses at Wisley and in East Horsley. This will turn the village of East Horsley into a dangerous road bordered by with family homes as all traffic for the area and south of the area is diverted through it. The houses in East Horsley are all very close to the road as they were built to be in a village not on a main urban thoroughfare. There is huge potential here for accidents involving children and vehicles. It will also put an unbearable strain on all the facilities in East Horsley, including the station which would appear to be already at peak
capacity. Wisley is a diverse wildlife habitat which will be lost if this proposal goes ahead. I therefore object to the building of a village at Wisley airfield.

It is my belief that the Local Plan is unsympathetic to the countryside and villages that surround Guildford. I would hope that my objections to the revised proposals will be taken into account and the GBC will work to protect the natural beauty of this corner of Surrey by decreasing the number of houses it proposes to build, actively protecting the green belt and improving, rather than diminishing, the infrastructure.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposed changes made to site A35 Former Wisley Airfield, Ockham, are merely cosmetic and do not in any way address the fundamental issues with the proposal i.e.

1) The area is already congested with traffic pollution levels at the A3/M25 on still days above acceptable levels.
2) Existing local roads are not only congested but in an appalling state of repair.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would show below several points I wish to raise in Objection to GBC (Guildford Borough Council) Plans in regards to their proposed Borough Draft.

It is of great concern in the way GBC have complied and submitted the '2016 DRAFT LOCAL PLAN' with various late and amended submissions. It should be noted that constitutionally Councils should carry out full 'Due Diligence' prior to and during process of submitting a Local Plan, this should review and identify all potential unprotected areas for development prior to investigating protected areas, this does not appear to have been carried out in this case, as such would be potentially open to 'Judicial Review'.

GBC have not identified or made use of all Brownfield areas and potential unprotected areas which are suitable for development.

I am aware that GBC have removed previously identified potential development sites which are far more suitable and acceptable to try and substantiate other unsuitable areas.
There has been no reasoning for this and is being ignored by GBC, these potential development areas have been working with GBC for several years on these sites, however GBC have now removed them and as such GBC are not fully committed to properly carrying out full 'Due Diligence' on the 'Borough Wide Strategy'.

Specifically,

1. Existing Industrial/Commercial Premises with open Land to the side in Burnt Common - This site offered a substantial increase in Commercial area adjoining the existing as well as potential for residential development between 100-200 homes with suitable infrastructure existing
2. Land adjoining Slyfield Green - This site would both be able to sustain Industrial and Residential development to open land with already Industrial and residential adjoining. GBC also have land available to their existing industrial site.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would note my objections specifically as follows;

1. I OBJECT to the 2016 Draft Local Plan as this is NOT sustainable to the local communities effecting the areas and villages of Ripley, Send, Clandon, Horsleys & Ockham. It will create Urban Sprawl without the capability of suitable Highway infrastructure.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The use of the SHA which was available on the day of the 6 week consultation period effectively prevently reasonable discussion and digestion of such a large report, however within itself stating conflicting and unsatisfactory evidence and facts. Specifically noting a 1000 homes would not generate any extra traffic. As well as operating a floored and out of date programme basis and yet still conclude there would be congestion.

I request the draft plan is to be reconsidered in a correct and appropriate manner with correct procedure and consultation. Enabling local communities to identify correct sustainable development within our borough and develop existing urban areas, rather than impacting on green belt land.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I believe GBC has not carried out its requirement to follow Policy requirement of carrying out correct consultation process of Formulating a Local Plan and as such has failed in areas such as

1. Local Support
2. Community Awareness
3. Providing Information in a reasonable manner

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I would like to OBJECT to West Horsley and East Horsley being removed from the greenbelt in the way that the council proposes in order to allow development on the sites proposed. As things stand currently at the Medical Centre in East Horsley it is already difficult to make an appointment. The one local state primary school shared by East and West Horsley is oversubscribed and there is no state secondary school in the villages. The car parking spaces in East Horsley around the shops, healthcare centre and at the station can prove challenging at the best of times. West Horsley itself currently has one food convenience store, two Public Houses and a newsagent. There has been no Post Office since August 2013 so I fail to see how you can classify it as a medium sized village. I feel that local social, shopping, educational, healthcare and policing services will be overwhelmed by the proposed plans for development. There is no infrastructure plan whatsoever in the local plan in order to accommodate the increase in housing which I find scandalous.

I OBJECT to the draft local plan as it will destroy the ruralness of the area. In the villages of West & East Horsley the density of houses to be built on the proposed sites is totally out of keeping with the existing houses in the villages. This will mean that the proposed sites will have an urban estate density which is out of character with the low density rural character elsewhere in the villages. In West Horsley alone it has 41 listed buildings in it which gives the village appeal. Our heritage needs to be considered. This proposed plan would have a huge effect both visually and environmentally on the ruralness of this area. Tourism brings advantages to the area such as boosting the local economy. One of the reasons that tourists visit is because the countryside is rural and attractive and appreciated by walkers as well as cyclists. If the roads were developed to accommodate the proposed increase in development I believe tourism would lessen and the risk of injury to cyclists and pedestrians would increase.

I OBJECT to the draft plan due to the dangers that it may lead to. The pavements in parts of East and West Horsley i.e on The Street leading up to the two local stores, and on Ockham Road South are very narrow and unsuitable for wheelchairs and prams etc. The main routes through the villages are narrow with poor road surfaces and the increase in traffic that development would bring would bring inherent dangers to car users and pedestrians alike.

I OBJECT to the draft local plan as I feel there are unsuitable public transport facilities to meet the increase in population. It is naive to think that most people would walk or cycle to work or to the train station in East Horsley from the village and neighbouring West Horsley due to the distances needed to travel and the safety issues to take into consideration. Again this would put huge demands on the road network, increase the carbon footprint and decrease the air quality. Existing public transport in the villages is very limited which makes it difficult to get around without a car.

I OBJECT to the draft local plan as I feel that the roads in East & West Horsley tend to flood annually making the roads impassable often even in a 4x4. Development would only increase this risk as surface water would not be able to drain away so readily.
The Horsleys appear to have a larger number of Potential Development Areas than most other villages within the borough which appears unfair. In addition to the planned development sites in the Horsley’s there are plans for 2000 houses at Gosden Hill on the A3, 400 houses at Garlicks Arch, a site of ancient woodland, and a new town at the old site of Wisley Airfield. All these sites are on green belt and will mean that there is urban sprawl along the A3 corridor and appears to be an unbalanced allocation of development in one area of the borough. West and East Horsley will grow by over 40% by 2031 according to the draft Local Plan. Most of this will occur in the first 5 years of the Guildford Plan period. This is much much greater than other areas of the borough and will totally destroy the villages as we know them.

I OBJECT to the Horsley’s defined settlement boundaries being changed and the villages being “inset” therefore allowing development on current greenbelt land and conservation areas. There are no exceptional circumstances apparent to build on the green belt. Housing need alone should not constitute as exceptional circumstances.

I OBJECT to the local draft plan as it stands. There is unsubstantiated evidence as to how the housing figures have been ascertained. Indeed the councillors have rejected several proposals such as the new development planned at Wisley Airfield and yet they remain in this 2016 draft local plan.

I OBJECT to greenbelt land being destroyed for housing needs. 70% of the proposed development across the borough is on existing greenbelt or countryside. I believe that the council needs to consult the residents in order to produce a document which recommends a more suitable level of development which will protect our villages and surrounding countryside for generations to come. Once the greenbelt is lost it is gone forever. The NPPF 79 said that greenbelt land should be open and permanent. Sustainable development means that it ensures better lives for ourselves and not making worse lives for future generations.

I feel that as the plan stands in its current format future generations lives will be made worse for the reasons stated in this letter and for those reasons I OBJECT to the plan. The scale and position of future development sites needs to be much more sensible in order for the Local Plan to be more practical and realistic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1364   Respondent: 8889889 / Simon Stapleton   Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to OBJECT to the 2016 draft version of the Local Plan produced by Guildford Borough Council.

The process of compiling the local plan has caused outrage amongst the electorate. 20,000 letters were submitted in during the Sites and Strategies Options Consultation. 95% objected to using Greenbelt land. These views have been ignored and appear to go against the councillors own election promises.

The A3 / M25 is at capacity at peak times and the Highways England Agency are not planning to improve the A3 before 2020. The planned developments will only increase congestion in and around the surrounding villages. It is proposed that 65000 houses (40% of the housing proposed) is built between the M25 & Burpham and I shall concentrate on that area during this letter.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I am writing to object to changes to the policy relating to Surrey Hills AONB that weakens the protections offered, and (unlike previously) does not have restrictions on non-major development. This is a move in the wrong direction. Previously all proposals were considered against the 5 key tests – now development in the AONB seems to be more acceptable.

This is weaker, not stronger, and is contrary to huge responses from the public in previous consultations and the weight of protection given to AONB in the NPPF.

I OBJECT to the loss of the five tests which were previously included. Previously it was suggested that all proposals should be considered as to whether they

- Conserve or enhance the setting and views of the AONB
- Conserve wildlife, historic objects or natural phenomena within it
- Promote its enjoyment by the community and visitors to the area
- Support the rural economy of the Surrey Hills area
- Provide or maintain public access to the AONB

These tests are significant and important and the loss of these tests is a serious diminution of the protection afforded to the AONB. They should be reinstated.

Similarly the deletion of the presumption against inappropriate development means that inappropriate development is not necessarily going to be rejected – which would seem to be in contravention of the policies and the principles of the AONB, which the borough council has a duty to protect. This too should be reinstated.

Please take these objections into consideration.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The weight of traffic has increased with an alarming rate, not only due to many newly built houses (infill) but also due to Satellite Navigation systems sending traffic from the A246 through East Horsley to the A3 and A246. The roads are barely wide enough to accommodate the heavy load of lorries, coaches, large 4x4s and other traffic. There is nowhere to park in the village as the carpark behind the shops fills up very rapidly these days. So THE HORSLEYS ARE FULL.

I therefore strongly object to the horrifying idea of building any more houses in or around the Horsleys.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a resident of West Horsley I am writing to object to the proposed submission local plan: strategies and sites June 2016.

I recognise the need to build more houses across the country including locally. I can reluctantly accept some building on unused sites such as Wisley airfield is inevitable provided, and this is an important proviso, it is accompanied by supporting infrastructure (notably transport, schools, shops, leisure and medical services) which doesn't put pressure on neighbouring areas that can't cope with additional demand.

However the scale and density of the proposed housing in West Horsley appears wholly unsupportable. This is a historic village and the proposals would profoundly change its character forever. As a village it is already full, whether it be the primary and secondary schools (and the planning application to rebuild the Howard was rejected), the doctors surgery, parking at the shops, while several roads like the Drift are badly worn struggling to cope with the volume of traffic as it is. In addition I understand the drainage infrastructure would not support an additional burden.

The scale of the proposed new housing at a 35% increase on the existing village is completely out of line with the proposals for other areas. Why should West Horsley be singled out for such an increase particularly when it is self evidently harmful to the Green Belt?

The National Planning and Policy requires that new development must make due allowance for the character and density of housing in the proposed area and be suitably supported by infrastructure and local facilities. This is very clearly not the case here.

The proposed plan should be rejected and rethought.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4220  Respondent: 8890657 / David Weight  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
5. The Plan fails to address the need for a corresponding development of amenities and services in the planned building. Apart from constraints mentioned in No.4 above the wastewater network is not able to support the additional development (Thames Water advice to Guildford Borough); Flooding is also becoming a problem in the village, and further development of open land will exacerbate this issue which will lead to higher costs for the Borough Council; the local state school (Rayleigh School) is already over-subscribed with no room for expansion; Secondary education is equally constrained in the local catchment area and private schools in the area are at or near to full capacity. To my knowledge Surrey County Council has no plan to create further school places.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. Paragraph 7 of the National Planning Policy Framework states: "As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances". We see from The Plan that green-belt land is being inset for building and less emphasis has been placed on the development of previously developed or brown-field sites in the area. No special circumstances exist to support The Plan's proposals and so green-belt developments in West Horsley should not be considered. I object to the proposed development of Green Belt land.

Comment ID: PSLPP16/4216  Respondent: 8890657 / David Weight  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In response to the above plan that was published on the 6th June 2016, I would like to object to this proposal for a number of reasons:

1. The sheer scale of proposed development in West Horsley is The Plan proposes building 385 houses, which is an increase of 35%, in a short period. This is a significantly higher percentage increase in housing than is apparent in surrounding areas, is disproportionate and will damage the unique character and community of the village, irreversibly.

1. The density of the proposed development is significantly greater than anywhere in the area currently and will considerably enlarge the two village settlements thus damaging the character of the village and causing a significant loss of The Plan does not make a responsible or reasonable justification for this level of development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.</td>
<td>The proposed housing development in West Horsley will have significant ramifications on local infrastructure but when taken in conjunction with all the proposed developments, including the Wisley Airfield and the surrounding area, the vicinity will become overwhelmed with traffic. The Guildford Borough Council Highways Department and those who regularly travel in and around this area will know just how busy the local highways are currently (for example the A3; M25; A246 and many surrounding main and minor roads) and the situation will become intolerable with the additional population associated with the proposed building plan. This will also have an adverse impact on economic development through increased fuel use/cost, time wasted and lack of timely response to business needs, not to mention the adverse environmental impact. It would be far more appropriate to spend money on bringing infrastructure, amenities and services up to an acceptable level for current dwellers before building more houses. The current roadways are in a deplorable condition and will deteriorate further and faster with the increased used that the development plan would bring. It is a major deficiency of The Plan that it does not include infrastructural developments or improvements to amenities and services and so cannot demonstrate for the Authorities that there is a &quot;Presumption in favour of Sustainable Development&quot;. The Plan is therefore flawed.</td>
</tr>
<tr>
<td>7.</td>
<td>There is no demonstrable need for such a level of housing development in West Horsley. Our local Parish Council identified only a limited need for about twenty (20) affordable homes in the village. It is therefore questionable how such large scale housing development is justified. The numbers seem to relate more to developing a plan for the sake of a plan rather than dealing with reality.</td>
</tr>
<tr>
<td>8.</td>
<td>Taking the whole Plan into account the number of new homes proposed to be built in surrounding villages (some 92% of the total proposed by The Plan) cannot be shown to be sustainable. This will put an intolerable strain on services and amenities which will be unable to cope as a result. Insufficient emphasis has been put on developing land nearer to the town centres which are already well served with communications and amenities. This would also help in the development of town centres which need to be able to attract more people in a sustainable way in order to aspire to be vibrant civil and commercial hubs for the area.</td>
</tr>
<tr>
<td>9.</td>
<td>It is noted in The Plan that developers &quot;will only be expected&quot; to contribute to transport arrangements for their developments and regrettably this is wholly unsatisfactory as it only appears to be aspirational. You as the Borough Council must be aware of the current capacity constraints in the area and so any housing development MUST take due recognition of this and work on solutions to the difficulties that will be created. In fact there seems to be no mention of this in written policies and only vague statements within the Infrastructure Policies section of The Plan. Overall there is no specified or coherent plan to develop services and infrastructure contained within The Plan and this is a major confounding factor.</td>
</tr>
<tr>
<td>10.</td>
<td>Another major confounding factor of The Plan is that it was developed at a time when the UK was a Member of the EU. Since its publication circumstances have changed such that it will likely have a profound effect on the need for housing in the UK (witness the current failure of numerous commercial building funds). The Plan should be put into abeyance until the situation is has been clarified. Overall The Plan does not coherently or practically address housing needs in West Horsley and appears to be driven by a requirement to have a plan in place rather than respecting the need for considerate and sustainable development. No compelling need is shown to inset Green Belt land for the purpose of building new houses, particularly at the level proposed; not enough consideration is given to brown field or other suitable sites nearer to towns where communications are vastly superior compared to the outlying villages; no consideration seems to have been given to developing the appropriate infrastructure and services which is a sine qua non when considering increasing the population of any settlement and the Key Evidence document &quot;Guildford Borough Economic Strategy 2013-2031&quot; makes no rational case for locating large numbers of homes in West and East Horsley or neighbouring villages</td>
</tr>
</tbody>
</table>
I wish to object to this plan for the reasons stated above and furthermore believe that in view of the UK withdrawal from the EU The Plan should be put into abeyance until the situation is clarified and revised accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- It states that there needs to be a 25pct increase in housing across the borough this would appear to be in direct conflict with the Office of National Statistics which expect population growth of 15pct in the period. The scale is even more alarming for the Horsley and quite unjustifiable. I understand the Strategic Housing Market Assessment was made by a model which is not commented on in the plan and I hear remains unknown to GBC. It may also be fair (and I stress may) to assume that in light of recent political events the level of population growth will not be as great as the ONS states. The building of that number of extra homes is therefore unjustifiable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- Infrastructure – I drive almost daily sometimes a few times a day down the road that leads from The Duke of Wellington Pub to Horsley station

The road is narrow at the best of times extremely narrow in places so much so that even 2 big cars may have difficulty passing through let alone lorries.

The road system is also crowded and was not built to sustain the number of dwellings currently existing let alone more.

East Horsley if the plans went through would be a magnet from the new developments around for shops/station/doctor etc and none of these are built to sustain the current level of population let alone an increase. On top of this the school system is also overstretched at the moment to add extra children would break it
The Gas/Electric/Water/Drains system I understand are already at or close to breaking point and would have to try and operate on an unsustainable level.

The appears to have been no real consideration given to the local infrastructure to build extra Schools/Doctors/Hospitals etc this is all totally unacceptable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

- Green belt – The plan states ‘That we will continue to Protect the Metropolitan Green belt’ this appears to be in direct conflict with the proposal to remove the Horsleys from the Green belt – There would also appear to be no sound reason given for extending the boundaries of the settlement area of the Horsleys one has to conclude that the idea is to make extra land available for future additional developments by an unacceptable route and this together with removal from the Green belt is therefore totally unacceptable

### Worplesdon Parish Council’s response to Guildford Open Space, Sport and Recreation Assessment 2016-2033

1.2.2 Scope of study and objectives

**Does this assessment include common land?**

- Guildford is Surrey’s most populated district approx 141,009 residents.
- ½ of the population lives in the town.
- Four major roads through the borough.
- Population of Worplesdon 8529 residents.

#### 3.2.1 National Policy Framework

Paragraph 75 Surrey County Council is responsible for maintaining rights of way, which is a discretionary service. *Who will pay to maintain these rights of way?*

#### 3.2.2 Green Infrastructure

A network of multi-functional green space, urban and rural, which is capable of delivering a wide range of environmental and quality of life benefits for local communities. *This is what we currently have.*

#### 3.2.3 The Natural Environment White Paper (NEWP) The Natural Choice: securing the value of nature (2011)

Recognised that a healthy natural environment is the foundation of sustained economic growth, prospering communities and well-being. It sets out how the value of nature can be mainstreamed across our society by facilitating local action; strengthening the connections between people and nature; creating a green economy and showing leadership in the EU and internationally.

#### 3.2.4 Biodiversity 2020: A Strategy for England’s wildlife and ecosystem services.

This builds upon the above paper National Biodiversity Policy to implement international and EU comments. By 2050 our land and seas will be rich in wildlife, our biodiversity will be valued, conserved, restored, managed and sustainability and be more resilient and able to adapt to climate change providing essential services and delivering benefits for everyone.

The mission of this strategy is to halt overall biodiversity loss, support health well-functioning ecosystems and establish coherent ecological networks, with more and better places for nature for the benefits of wildlife and people.

1. Habitats and ecosystems on land (including freshwater environments)

By 2020 measures will have been put in place so that biodiversity is maintained and enhanced, further degeneration has been halted and where possible, restoration is underway, helping deliver more resilient and coherent ecological networks, health and well-functioning ecosystems, which deliver multiple benefits for wildlife and people.

1. Marine habitats, ecosystems and fisheries

This will help to deliver good environmental status and our vision of clean, healthy, safe productive and biologically diverse oceans and seas.
1. Species

By 2020 there will be an overall improvement in the status of our wildlife and will have prevented further human-induced extinctions of known threatened species.

1. People

By 2020, significantly more people will be engaged in biodiversity issues, aware of its value and taking positive action.

- If trees are planted at Russell Place farm it will significantly alter the biodiversity which included field fares. These birds require large open spaces.
- The proposals for the Local Plan appear contrary to the aims of these strategies.

3.3.2 Local Plan 2003

Secretary of state for Communities and Local Government gave a direction in 2007 that the 2003 GBC Local Plan policies be saved and remain in effect, with the exception of

H1 housing provision
H10 New residential development
S1 Major new retail development
GT4 Seeboard site, Woodbridge road
RE7 Protection of the best and most versatile agricultural land
HE11 scheduled ancient monuments and other sites and monuments of national importance
U1 University of Surrey

The Local Plan Aims - To promote development that meets the needs of the present without compromising the ability of future generations to meet their own needs.

1. Maintain and provide for a range of Good Quality Housing, Affordable by All Residents Throughout the Borough
2. Support, maintenance and Renewal of the Local Economy
3. Protect and Enhance Guildford’s Town Centre Role as a Regional Shopping Centre and as a Focal Point of Commercial, Arts, Cultural and Entertainment Facilities
4. To Protect and Enhance the Quality of the Urban and Rural Environment
5. Reduce the Demand for travel by car
6. Make the Best Use of Scarce Land Resources Minimising the Impact of Development on Greenfield sites.
7. Encourage and Facilitate Access for all People to all Buildings
8. Recognise the importance of Local Communities Within the Borough by Promoting Local Identity and the Provision of a Wide Range of Facilities at the Local Level
9. To Protect the Countryside from Inappropriate Development and Maintain It’s Open Rural Character
10. Support the Provision of High Quality Recreational, Tourist and Community Facilities in the Borough.

3.3.3 Corporate Plan 2015-2020

Vision: Guildford (as a town and rural borough) will be the most desirable place to live, work and visit in the South East England. A centre for education, healthcare, innovative cutting edge businesses with high quality retail and wellbeing. A county town set in a vibrant rural environment which balances the needs of urban and rural communities alike. Known for our outstanding urban planning and design, and with infrastructure that will properly cope with our needs.
TRAFFIC! Working with partners to deliver the massive improvements needed in the next 20 years, including changes to tackle congestion issues.

3.3.4 Play strategy (2016-2021)

The importance of play in natural outdoor spaces is highlighted, with research emphasising physical benefits, mental health benefits, social benefits; risk awareness and improved behaviour. This is welcomed.

3.3.5 A vision for Guildford’s Countryside DRAFT (2016)

Vision Statement:

Guildford Borough Council aims to manage its Countryside estate to maintain and enhance its landscape, natural capital and ecological value to continue providing benefits for future generations.

We will work in Partnership with residents and organisations to improve sustainability and to PROTECT OUR COUNTRYSIDE, whilst balancing this with the needs of the rural and wider economy.

Guildford’s natural environment and landscapes will form part of the overall provision of Surrey’s ecosystem services, creating a coherent network, for people, recreation and wildlife, through supporting the implementation of traditional management.

The vision statement will provide a framework to enable proactive management of Guildford’s Countryside and development of appropriate action plans for site management. The importance of partnership working is highlighted, and existing local partnerships and initiatives are set out within the document. This is all welcomed.

Page 21 Guildford Borough Councils Countryside sites contribute to the Government’s Environmental White paper

Habitats enhanced

SSSI in favourable ecological condition

River Wey catchment is clean, valued and ecologically functioning river catchment area.

Outdoor Recreation resource for sustainable Thames Basin Heath SPA to ensure visitor pressure does not damage what we have.

It states that SANG reduces pressure on SPA but what evidence or proof is there to support this.

Page 22

The Surrey Nature Partnership has produced advice to those involved in planning to ensure that development within the county protects and enhances biodiversity. Through this the aim is to also help local authorities honour their statutory ‘Biodiversity Duty’ under Section 40 of the Natural Environment & Rural Communities Act, 2006. The document describes protected sites, habitats and priority habitats and species.

3.3.7 Biodiversity Opportunity Areas: the basis for realising Surrey’s ecological network Guildford Borough (Policy Statements Prior to 2012), the Surrey Biodiversity Partnership implemented the Surrey Biodiversity Action Plan. The Partnership has now become the Biodiversity Working Group of the Surrey Nature Partnership and it is producing Biodiversity Opportunity Area Policy statements to align with the outcomes in Biodiversity 2020. The aim of Biodiversity Opportunity Areas (BOAs) is to establish a strategic framework for conserving and enhancing biodiversity at a landscape-scale, making wildlife more robust to changing climate and socio-economic pressures. BOAs are those areas where targeted maintenance, restoration and creation of Natural Environment & Rural Communities (NERC) Act ‘Habitats of Principal Importance’, i.e. Priority habitats will have the greatest benefit towards achieving this aim.

BOAs
3.3.8 Naturally richer: The Surrey Nature Partnership have developed A Natural Capital Investment Strategy for Surrey. This document as the beginning of an important initiative – to plan and coordinate collective investment in the natural environment of Surrey to:

- ensure that the natural environment continues to provide multiple benefits into the future.
- future-proof the county against current and future risks such as climate change and extreme weather events.
- help build a prosperous and secure future for everyone who lives and works in Surrey.
- demonstrate that an innovative approach to natural capital at the local level has to happen.

Sustainable land management

- Halt losses of natural capital- we will strive to halt loss and degeneration across the capital through positive management, habitat restoration and re-creation.

Smart economic growth

- Grow Surrey’s intelligent, networked, innovative economy as the best place in the UK to do business in a sustainable location.
- Supporting the creation of jobs – we will promote a healthy attractive environment which enhances the desirability of Surrey for business.
- Developing skills – we will support the development of skills to enhance natural capital investment and management as part of a wider approach to sustainable growth. · New space for business and local government – we will support the development of new business models and opportunities to provide multiple partnership benefits.

The reduction of risks (for example pollution, flooding) will be targeted and the enhancement of benefits, improving opportunities for exercise, recreation and mitigating the impacts of climate change.

3.3.9 Thames Basin Heaths Special Protection Area Avoidance Strategy (2009-2016)

3.3.12 River Wey Catchment Implementation Plan

The main issues that are a priority for the Wey catchment are phosphates from point source pollution and diffuse pollution and physical modification due to wiers and other obstructions. Two issues are invasive non native species and urban development.

3.3.11 Rights of Wey Improvement Plan for Surrey

Surrey transport plan. This is the first revision of the 2007 Right of Way Improvement Plan. This would lead to improved connectivity and rights of way to bridleways and to reduce severance. One objective of the plan is to increase the accessibility of the network for all users including blind, partially sighted and mobility difficulties, assess every improvement on the basis of “least restrictive access”. This is welcomed.

- Local Needs Assessment

Consultation and research programme March/April 2016.

- How many households were consulted? What do the % responses represent?

4.3 Neighbouring local Authorities and Parish council’s key findings. (Duty to co-operate). The duty to co-operate is a government policy, how successful has this been?
4.4 Stakeholder –Key Findings

Guildford Borough Council provides 2,600 acres of land including 7 Green Flag parks and open spaces, 61 play areas, 13 MUGAs, 2 skate parks, 1 BMX, 9 outdoor gyms, mini golf and table tennis. Bowling greens, netball and tennis.

WPC believes that there is an overall sufficient recreation space but there is deficiency in sports pitches to accommodate demand at that town centre space is limited. While access to open space is generally good, access to some sites could be improved. The availability of parking and poor public transport are the major issues.

Ash, Stoke and Westborough are the Council’s public health target areas having higher rates of smoking, biggest difference in life expectancy etc. These are areas where increased physical activity would have most impact, and hence the ones that the council should focus on.

4.4.5 Countryside site

- Nature reserves are very popular with 140 visitors a year to each reserve.
- Pressure on town centres e.g. Pewley Down
- Forest schools are in such high demand their use needs to be restricted.
- Conflict between user groups. Pedestrians, cyclists and equestrians.

The delivery of Suitable Alternative Natural Greenspace (SANG) is key in order to mitigate the impacts of new developments/population growth on internationally important sites. This is accepted however SANGS must be located in the correct place, be directly linked to specific development and delivered through the planning process.

4.4.7 Rights of Way

Any new development should not impact on rights of way. Any mitigation needs to be identified and paid for through the s106 process. New development should identify and enhance the rights of way network.

4.4.8 Other issues and observations.

The cost of implementing the play strategy is anticipated to £1.2m. Is this sufficient to meet all objectives?

5.1.5 Natural Green Space

This does NOT include the proposed SANG, but does include part of Whitmoor common. What is the rationale behind this?

(Natural England) and the local consultation for this study have identified the value attached to such space for recreation and emotional well-being. A sense of ‘closeness to nature’ with its attendant benefits for people is something that is all too easily lost in urban areas. Natural Green Space can make important contributions towards local Biodiversity Action Plan targets and can also raise awareness of biodiversity values and issues.

Natural Green Spaces can form important ‘green corridors’ for both wildlife and people, especially when linked with the public rights of way network, cycle paths and rivers etc. These spaces form an important part of the Green Infrastructure of an area, and can be important in delivering ecosystem services and attracting visitors.

Large tracks of countryside used for farming are not accessible, however, there is an extensive right of way network which can improve accessibility.

5.1.7 Churchyards

These are Important in terms of biodiversity.

5.1.9 Private Space

Such as Loseley House and gardens and other properties that are open to the public
5.2.1

Table 7 does not appear to include common land. What does Accessible Natural Green Space include?

5.2.2 Provision in Wards

Table 8 this is incorrect. There are no allotments in Worplesdon.

Outdoor fixed sport. Worplesdon tennis courts have not been included

Appendix 2 Maps show all space including roadside verges

6.0 Quality standards

The recommended standards need to be robust, evidence based and deliverable through new development and future mechanisms of contribution through on site provision and the community infrastructure levy (CIL). This is welcome but how is this going to be monitored?

6.2 Allotments How many allotments in Guildford?

95% of all respondents from the household survey never use allotments, meaning this is the least used by type of open space and 32% of people felt there should be more allotments. What household survey was this, when was it undertaken and how many respondents were there?

The propensity for higher density new housing with smaller gardens is likely to increase demand.

If 95% of people have never used an allotment how can 45% of respondents comment on the quality of the allotments?

Quality standards for amenity green space.

The value of “amenity green space” must be recognised especially within housing areas, where it can provide important local opportunities for play, exercise and visual amenity that are almost immediately accessible.

On the other hand, open space can be expensive to maintain and it is very important to strike the correct balance between having sufficient space to meet the needs of the community for accessible and attractive space, and having too much which would be impossible to manage properly and therefore a potential liability and source of nuisance. It is important that amenity green open space should be capable of use for at least some forms of public recreation activity.

Recommendation for play areas.

These standards had been critised because they are often seen as undeliverable, and can result in proliferation of play areas that can be difficult to maintain, as well as setting unrealistic aspirations in urban areas where insufficient land is available to provide facilities, especially higher density development on brownfield sites.

6.6 Natural Green Space

This is recommended by Natural England and The Woodland Trust and is welcomed.

6.6.2

There is a requirement for new developments to provide amenity green space (SANGS), either on site or make a contribution to the local planning authority to create a SANG with the Borough. The Sang must be related to the development it serves. Natural Green Spaces excludes SANG.
Wherever possible sites should be linked to help improve wildlife value as part of a network and that trees are not always the answer to Biodiversity.

Page 61

Given the lack of Accessible Natural Green Space in Ash and Tongham why was the SANG not proposed to be sited there and not at Russell Place Farm?

Do the SANGS include commons?

8.1.2. Delivering Strategic Options

Planning appears to be in a state of flux since NPPF 2012. Whilst the Local Authority will have an important role in delivering open space sport and recreation facilities their role may move from that of “deliver” to “facilitator”. The aim will be to work with community organisations to make local decisions about how facilities and services will be provided. Residents associations, voluntary organisations, sports clubs and societies will all have a key role in this. Whilst this is welcome, how will this be monitored and maintained?

8.2 Existing provision to be protected.

All open space should be afforded protection unless it can be proved it is not required. Whilst this is acceptable what evidence would be required for the protection to be removed?

Policy OS3 Recommendation- Sites which have significant nature conservation, historical or cultural value should be afforded protection, even if there is an identified surplus in quality, quality or access in that local area. This is welcomed

Table 19

Worplesdon

The information contained in Table 19 is incorrect. What information was used to populate the table? The table needs to be updated to include at least

- 3 village Greens
- Harry’s Meadow
- Nevins Copse
- Jacobswell Rec,
- 9 commons,
- 8 play areas,
- Fairlands sports field
- Worplesdon memorial grounds
- Burpham court farm

This obvious missing information, could imply that other information/evidence is missing or incorrect.

Page 81 OS10 “Develop a pilot project within one of the settlements to develop a neighbourhood plan which incorporates green space planning.” This has been done for Burpham whose neighbourhood plan included Green Space.

Page 82 Capital and grant funding

Capital and grant funding has diminished in recent years, nevertheless funding does become available for providing facilities for open space, sport and recreation. National and governing bodies for individual sports should be consulted where new infrastructure is required, such as changing rooms and sports pitches. Environmental grants and stewardship schemes are available for managing natural green space. As neighbourhood plans are developed and open space priorities are established within these, funding requirements will be identified and delivery through grant funding can be considered.
If the need has been identified and the funding path is through garn applications, there is no guarantee that funding will be provided and hence delivery is not guaranteed. The need should have been identified and included in the CIL 123 list where developers would contribute. However this still does not guarantee delivery due to the economy, lack of development and the planning process.

New Housing

At the minimum new public open space will need to be required for new housing. The Local Plan aims to provide 13,860 new homes up to 2013. The new Local Plan is still subject to consultation and independent examination, and is therefore not yet finalised. Once finalised, the amount of open space required for the increased population can be calculated using the methodology set out in table 15. However, more space will need to be required to not only deliver the number of homes but the level of open space required. More of the countryside in Guildford would be lost to this sort of development. This implies that housing numbers, and hence open space requirement would need to be reduced. This appears to be contrary to the proposed policy on protecting the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I also object strongly to Policy A46 Land south of Normandy and north of Flexford being build upon. It is an inappropriate size of development housing and school in an area of rural roads, two small railway bridges and it is totally unsuitable to increase the traffic on these unclassified roads. I lived there for the first 20 years of my life. I know the beauty the area has, this should not be sacrificed to increase housing. The congestion to surrounding villages is totally ridiculous. The infrastructure in this borough is not there to cope with 1000+ homes.Is there a need for this school?
P2 Green belt and limited infilling. The coalescence between the urban area of Guildford and the surrounding villages and also Guildford with the surrounding boroughs should be strenuously resisted.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The leader of the council Paul Spooner makes reference to "The borough of Guildford is a very special, beautiful place for all who live and work here"

They are also my thoughts too. I would like it to remain like this for generations to come. However I do not believe this local plan upholds this sentence in the opening paragraph.

I therefore object to the predicted housing numbers required by 2033. We have an ageing population as is stated in your documents. Yes we do have young people too. I have four children myself and yes I am very aware of the lack of affordable properties in this borough. So yes I do support a high % of 1, 2 and 3 bedroom affordable homes being build and would also support a high % of market homes in these bedroom sizes too. We are saturated with 4 bedroom + homes in this borough. After all people like me need to downsize too. However affordable homes at 80% of the market value this is not affordable to most young salaried people in this area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

• disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 6: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed Keens lane developement on the grounds of no infastructure and the very narrow road with grade 2 listed building in it which would not be suitable for the increased amount of traffic with such a development.

I object to the inclusion of Blackwell farm as a development site. Policy A26 &paragraph. 4.1.9 which disregards an independant expert landscape study, of which demonstrates that part of the site merits Area of Oustanding Natural Beauty.

Ignores independant expert traffic studies which show the impact of development at Blackwell farm on the local network which already cannot cope with the traffic.

Adds air pollution to neighbouring areas.

The increase surface water would effect the Parish of Woriplesdon.

My personal objections to the proposed local plan consultation period June 2017-24th July 2017 are the same as submitted by Woriplesdon Parish council.

Answer (if comment is on questions 1-7 of the questionnaire): ()
BAE Systems Applied Intelligence Systems acquired Detica which moved to the Surrey Research Park in 1986. The company now employs 4,500 staff working at the highest level in a number of critical fields that are important to UK economy.

Guildford is a location in which there has been consolidation for the company. The Draft Local Plan now out for consultation gives us an opportunity to comment on this as an important employer in the town.

- The plan improves infrastructure and the road leading off the park is an important part of this.
- Housing of different sizes and on different tenure options widens the choice for employees.
- The need to change the green belt boundary to accommodate these proposals, although not ideal, is supported.
- We would support the Borough in the process of securing an adopted Local Plan at the earliest opportunity.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I wish to object to the local plan on the following grounds:

**I object to the removal of East Horsley and West Horsley from the Green Belt.**

I would like to protest most vehemently at the proposal to remove villages from the Green Belt, in particular East and West Horsley. No 'exceptional circumstances' have been demonstrated. The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is NOT an exceptional circumstance in law. We moved to the area precisely because of the village character. Removing their Green Belt status will leave the flood gates open for development and once built upon, the green countryside will never ever return.

In this new draft local plan, 65% of new houses in the Borough are to be built on land that is currently in the Green Belt. This is not acceptable.

The Green Belt was set up for the very reason of preventing the green and beautiful countryside being built over. Any removal of Green Belt status is the thin end of the wedge - once the protection is gone, bit by bit the land will be built over, and eventually London will spread and sprawl over it all, urbanised and built up.

**I object to the extension of boundaries of the settlement area of the Horsleys**

No sound reason has been given to justify this. The only possible outcome of this is more land which includes field and open spaces is then vulnerable to being built upon, further destroying the nature of the villages.

**I object to Station Parade being designated a district centre**

Development of over 2000 houses at former Wisley Airfield.
We have objected previously to an application to build a new village here and were very pleased when Guildford Borough Council turned this down. We again object to this for the following reasons:

Building thousands of new homes here will:

Increase:
- traffic and congestion
- traffic accidents
- pollution
- pressure in rail services
- pressure on parking in the already crowded village of Horsley
- pressure on local, already oversubscribed,
- pressure on local, already oversubscribed, doctors, hospital and other health services

The idea of shutting Old Lane access from the A3 is preposterous. It is a well used route; and the long and winding detour is inconvenient, and will result in even more CO2 and other pollutants in the atmosphere, at a stage in history when we have realised the harm these do to our bodies and the environment, and are collectively and actively seeking to reduce, not increase them.

There are only two (not 9) railway stations (Horsley and Effingham Junction) within five road miles of the site and these are only reachable via narrow, unlit country lanes and have car parking already at near capacity.

Any widening of local roads would require further destruction of trees, and natural habitat.

Thames Water has identified an inability of the existing waste water infrastructure to accommodate the needs of this application. Effingham Junction, Ockham and the Horsleys already suffer badly from flooding problems. The development may lead to sewage flooding.

**Overloaded infrastructure**

The building of 593 new houses in the in the Horsleys within five years would seriously change the character of the villages for the worse, and lead to even more pressure on the already oversubscribed services, particularly the school and doctors' surgery. It is often difficult to park in East Horsley village to visit the shops, and also at the village hall and doctors' car parks. The main village shop Budgens often has long queues. The train station has insufficient parking for its users, with no room from expansion. Doubling the population of the villages would render the already crowded trains a nightmare.

The streets around The Raleigh School are chaos at drop off and pick up time. Given the geography, even if the school expanded its classrooms, there is no more room for parents to stop in the cul de sacs around, and parking on East Lane is obstructive and dangerous.

Similarly Ockham Road North is always blocked by users of Glenesk School in the morning and afternoon, as there is nowhere for parents to stop except in the small forecourt. It is not possible to park along Ockham Road North as it is too narrow and no pavements on one side. Passing traffic is therefore blocked by cars waiting to enter the school grounds. Hundreds of additional houses built would spell significantly more chaos.

There is simply not enough room in these villages for hundreds of extra houses. Yes, there might physically be spaces for the houses, but there is definitely not the space or infrastructure nor employment for the thousands of new inhabitants.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the number of houses planned in the local plan
This figure has risen to 693 houses per year over the next 20 years (compared with 652 per year in the 2014 Draft) and is more than double the 322 houses per year that was approved in the 2003 Local Plan.

I object to 65% of new houses in the Borough being built on land that is currently in the Green Belt.
The Green Belt was set up to protect this precious land.

I object to a total of 4,993 new homes being build within 5 miles of the Horsleys.
This is the total of the suggested areas within the Horsleys, 173 (East Horsley)
420 (West Horsley) plus another 4400 at Wisley, Garlick's Arch, Send Marsh Burnt Common, Ripley, Gosden Hill Farm, Merrow Lane.

It will ruin the rural nature of the area forever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/105  Respondent: 8891809 / Sarah O'Neilly  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to object to the proposals to build 533 new houses in the Horsley’s. The current infrastructure within the villages will not support this increase in people living in this community. The local schools are over- subscribed, as is the local medical centre, where it is not uncommon to wait several days for an appointment. It is often impossible to park at the local shops in East Horsley. The roads, which are already busy, will not be able to cope with the increased volume of traffic, and especially in East Lane with the proposal for 90 new houses in an area which is already heavy with school traffic. All that aside, if all these new houses are to be built what will happen to the overall look of the villages, with many of the beautiful green fields all gone, and increased volume of traffic on the little lanes?

I can only assume that those responsible do not reside in the neighbourhood since they would surely have more concerns for the area if they lived here.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I write to object to the proposed plans to build 2000 houses, plus sheltered/care homes, Gypsy/traveller pitches, employment/retail space and two schools on the Former Wisley Airfield and fields.

As I have previously stated, there is insufficient infrastructure in the surrounding villages to support this notion, and furthermore the traffic congestion, which is already heavy during rush hour times, with the introduction of in excess of 5000 cars in the locality will become completely ludicrous. This will have a knock on effect on the M25 orbital, the A3 and of course Guildford. And how will the local train station at Horsley cope with the introduction of more commuters joining trains, not to mention the already over spilling station car park?

I also do not consider that our local police force will be able to cope with the input of so many people, and we will see crime rates rise as a consequence. [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]

Will any consideration actually be given to the emergency services, which are already stretched in the area? I do not see mention of a doctors practice or hospital being included on the airfield development. Where will people be expected to go to visit their GP’s? The current practice at East Horsley is already too busy, and it takes long enough now to get a routine appointment.

Where will all the extra rubbish and recycling go from this site? Will we see our council taxes rise further to fund both refuse collection for all and of course extra schools, doctors and policing in the area?

I strongly suspect that those individuals putting forward these crazy notions, do not actually themselves reside in the villages surrounding Guildford, or they possibly wouldn’t have dreamt up such a selfish and non sustainable whim.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. Schools

Local schools are already full and turning away children who apply. Where will you build more schools in the area? Where will you find the land for these schools, their playing fields and their parking? More impact on our rural environment....

1. Medical Facilities

It is already difficult to get an appointment with our doctor within about 10 days. The medical practice in Horsley would have to be enlarged, which would necessarily also involve enlarging or renewing the building and providing extra parking areas, encroaching on the adjacent recreation area.

On a more personal note, our property is in The Street adjacent to the Bell & Colville site where, according to your plan, 40 new homes are proposed. This is a Conservation Area. Are you proposing to abolish the Conversation Area? How would you provide access to The Street and/or the busy A246 Leatherhead/Guildford road? How would this access impact on the children attending the adjacent Cranmore School?

We strongly object to these proposals, and ask you to think again.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The plan says little about the infrastructure which would be needed to support over 500 new homes, increasing the number of homes in West Horsley by over 50% - not to mention the 2000 proposed for the nearby Wisley Airfield site. However we fear great changes - and problems - in several areas, including:-

1. Traffic and Communications

The roads in the village are scarcely adequate for the present traffic. Some would need to be widened, there would be a need for traffic islands and roundabouts in some places, street lighting would have to be installed, extra parking areas would be needed in the village, and all this would adversely affect our rural environment.

Furthermore, many new residents would want to commute from Horsley station and park their cars there. The parking area at the station is already inadequate, and if 50% or more extra cars are using it, where will you find space for them?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We have seen the proposals in your new local plan published on June 6th, and would like you to take into consideration our very strong objection to these proposals.

We came to live in West Horsley nearly eighteen years ago and one of the main reasons we decided on this village was its lack of urbanisation. With the protection of the Green Belt and, in the case of our home, the Conservation Area, little has changed to affect the rural nature of our environment. Your proposals, however, would completely change the situation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

3) Aspects of your current infrastructure are undeniably poor. As an example the footpath from the Forest Road junction to the village is perilous particularly for elderly and disabled people. I challenge any of your members to use a walking frame along this stretch without putting your life in your hands.

Your future ideas of supporting infrastructure are unclear. Apparently you intend to build an infrastructure at Wisley on an adhoc basis i.e. a school, class by class. In the meantime the burden of the necessary facilities will fall on Horsley to maintain.

Shopping facilities are very limited in the Horsleys. A huge increase in traffic is likely for East Horsley where parking is already a problem at the local shops and railway station.

Extremely limited public transport in the area suggests a further 2000 cars in the Horsley area. There is inadequate parking for the present proposals and no clear evidence of new car parking facilities in the plan.

The local state schools are oversubscribed and Doctor's appointments difficult to access.

In conclusion we consider the Local Plan as currently envisioned would seriously overburden the Horsley area infrastructure, infringe seriously the Green Belt. Indeed the need for such a disproportionate increase in housing is not proven.

Please substantially reduce the extent of the GBC proposals and carefully reconsider these plans.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Also of major concern is the calculation and quantification of the number of houses proposed in the Strategic Housing Market Assessment (SHMA): a target number that was generated by an external consultant’s mathematical formula of which no qualification or calculation is to be made available. As if this wasn’t unacceptable enough, the consultant’s unsubstantiated calculation has been further massaged by Guildford Borough Council to such an extent as to provide for a population increase across the Borough which is almost 70% above the official national estimates for population growth. WHY?

Furthermore, these unquantified numbers are obviously pre-Referendum / Brexit calculations and as such now need to be recalculated if they are to be meaningful? Furthermore with Theresa May becoming the new Prime Minister, time MUST be given for her to provide a clear policy statement on her plans for the Green Belt which, hitherto, she has long sought to protect.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to 4 of the 6 proposed development sites numbered included in A36-41 which either intentionally or inadvertently will create a town at the cost of losing two separate villages. Quite why GBC should have selected West & East Horsley in this way, as compared with the exceptionally generous treatment of most other areas is, at best, exceptionally disappointing.

Whatever their merits as development sites, the 6 Horsley sites should not only be considered individually but for their cumulative impact on the contiguous villages of East and West Horsley.

Building 533 new houses on these 6 sites, plus at least another 90 on small sites is (a) excessive in absolute terms and (b) disproportionate relative to the rest of the Borough. It will destroy the rural character of these communities and put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops. The open nature of West Horsley was a significant factor that led to the 2012 Olympic cycle races passing through the village and this same route has since been adopted by the annual Prudential Ride 100 Cycle Ride. Furthermore, the housing NEED in both West & East Horsley (per recent research) is for SMALL houses / FLATS so that (a) young people can get onto the housing ladder and (b) older residents can downsize.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Site A35: Three Farms Meadow, Ockham: (2000 houses)

I OBJECT to both the inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham) and the proposal to build 2000 new homes on it. The impact on the nearby villages of West & East Horsley (less than 2 miles distant) and of course Ripley of an additional 5,000 cars (plus associated additional traffic such as couriers, supermarket deliveries, buses etc) would be catastrophic. There is no room to park NOW in either of the Horsley villages or at the local stations in Horsley and Effingham and so a development of this magnitude would be calamitous.

Furthermore, the impact of an additional 5000 cars, all using the Ripley Roundabout for egress and access (not to mention an additional 5000 from the site proposed at Gosden Hill Farm (Policy A25), would simply magnify exponentially the major traffic flow problems that exist NOW. The nearest railway stations to this proposed site are those of Horsley and Effingham Junction; both of which are full to overflowing NOW and have no space available for enlargement. As is already evident NOW, anybody who attempts to drive towards the A3 / M25 from West / East Horsley, Send or Ripley during the rush hour faces a daunting proposition because not only is the A3 slip road (going northwards) at a virtual standstill but so is the A3 to the extent that the A3 traffic coming from the Guildford direction will be backed-up for several miles. Equally, the local village shops of Ripley and East Horsley have major parking problems NOW and would not be able to cope with the additional cars associated with this proposed development.

Following a major public outcry, GBC’s Planning Committee rejected unanimously a recent application for this development on numerous grounds yet, for no apparent reason, it has been included in the new Draft Local Plan – a clear invitation to the developers that they should try again. This is not a NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who have already been given many additional months to refine their application prior to its rejection. It is therefore my opinion that this development should be removed from the new Draft Local Plan for all the same reasons that it was rejected by GBC’s Planning Committee on 6th April 2016. These include:

- Green Belt location and absence of “exceptional circumstances”.
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottleneck and Ripley village and roundabouts.
• Absence of adequate traffic data.
• Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
• Loss of high-quality agricultural land (35% of the site), in breach of national policy.
• Disproportion of locating 2,000 dwellings within the village of Ockham’s 159 households.
• Presence of a Surrey County Council safeguarded waste site.
• Cost of infrastructure required to the detriment of alternative more favourable sites.
• Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
• Impact on listed buildings.
• Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.
• Extreme housing density with tiny garden spaces.
• Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
• Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).
• Failure to evaluate the cumulative impact of this and nearby development sites on the area.

In closing, permit me please to thank you and your colleagues for providing me with the opportunity to respond to this new 2016 Draft Local Plan

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Site A36: Thatcher’s Hotel, East Horsley (48 houses)

Of the 6 sites (36-41), this is the least impactful as it only proposes the addition of 48 new houses. However, the main issue regarding this proposal is one of road access and safety because, as will be known, Thatcher’s Hotel sits between two very sharp bends and includes an already very busy junction, particularly in the mornings due to (in particular) people going to work and primary school traffic. Additionally, the nearby village shops of East Horsley are in two separate ribbon-strips but both already have inadequate car parking facilities (as does the railway station) and there is no land available for the expansion of either.

Equally, the very limited shops in West Horsley are served by nothing more than a small lay-by which has no room for expansion. These are problems NOW before any additional houses are built which will bring an additional 120 cars based on an average of 2.5 cars per property. For these reasons, I hold **SIGNIFICANT RESERVATIONS** against this proposal but do not object to it.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site A37: Bell & Colville Garage, West Horsley (40 houses)

Traffic flow, due to a combination of regular daily traffic combined with access and departure from Cranmore School (450 pupils), has long been a major problem and any additional homes and associated cars in this immediate vicinity will cause havoc. Similarly, the very limited shops in West Horsley are served by nothing more than a small lay-by with no room for expansion. These are problems NOW before any additional houses are built that will inevitably mean an additional 100 cars based on an average of 2.5 cars per property. For these reasons, I hold **SIGNIFICANT RESERVATIONS** against this proposal but do not object to it.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I **OBJECT** to this proposal because, quite apart from the fact that the land is on the flood-plane, development is totally impractical because of the hugely inherent dangers that will be caused by as many as 250 new cars entering the narrow Ockham Road North from this site.

This is a 'line of sight' issue because safe access from the development onto Ockham Road North will be blocked by the railway bridge. I am well aware that a prospective and seemingly well informed / confident developer, has already purchased one house (the one nearest to the railway line) and holds an agreement to purchase the second house should planning permission be granted. However and irrespective of where an access road is positioned, there will be significant road safety issues particularly with young children making their way along the narrow pavement to either Glenesk Pre Preparatory School or The Raleigh School. It should also be noted that at drop-off and collection time at Glenesk, many parents park their car towards the railway bridge and then walk down to collect their children which will cause additional road safety issues for cars pulling out of this proposed development.

Furthermore, Ockham Road North (and South), given the narrowness of their width (having been built more for the pony & trap or stagecoach era than today's motorcars which, inevitably, means wide 4x4's, long wheel-based couriers and supermarket vehicles), already carry far too much traffic of which a significant number of drivers completely ignore the speed limit of 30mph. The nearby village shops of East Horsley are in two separate ribbon-strips but both have inadequate car parking facilities (as does the railway station) NOW and there is no land available for expansion.

Comment ID: PSLPS16/1513  Respondent: 8892353 / Elizabeth Russell  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A40

I OBJECT to this proposal at Waterloo Farm because this particular tranche of land for a number of reasons which include the fact that this land is subject to an unacceptable flood risk from the combination of a high groundwater table a lack of surface water run-off. Ockham Road North was closed for several weeks in 2014 because of flooding, and indeed still floods regularly. This site is on flat land with clay soil on the downhill side of the Horsleys where floodwater from any new development will simply accumulate and back up onto existing properties nearby. Furthermore, the envisaged development misjudges the problems of safe access which are definitely not simply limited to flooding. Nor will they be overcome by the proposal to extend the existing 30mph zone past the site entrance. Worthy of note is that repeated attempts made by Ockham Road North residents to extend this zone have been turned down by the local authorities, Highways England and Surrey Police: this despite the fact that data collected in 2015 clearly demonstrated that traffic volume had doubled in the past 15 years and that the average speed in the 40mph section of this road is 52mph, with maximum recorded speeds
of over 80mph. No traffic calming measures have so far been permitted and additional housing of this magnitude (120 houses / 300 cars) will merely add to the existing hazards along this narrow and already dangerous stretch of road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Again, traffic congestion and road safety are of major concern given that an additional 90 houses will produce somewhere in the region of 200+ cars. East Lane (where this site is situated) is a tight two-lane road that was built for the pony & trap / stage coach era but which already carried a significant volume of traffic with people turning off the Ockham Road and/or the Drift into East Lane to go to The Raleigh School and/or make their way towards Guildford and other environs. The fact that The Raleigh School is served by East Lane means that some young children make their way to school on bikes / scooters etc and any additional cars will only increase the risk of tragic accidents. The village shops of East Horsley are in two separate ribbon-strips but both already have inadequate car parking facilities (as does the railway station) and there is no land available for expansion. Similarly, the very limited shops in West Horsley are served by nothing more than a small lay-by and again with absolutely no room for expansion. Answer (if comment is on questions 1-7 of the questionnaire): ()
Inexplicably, the new Draft Local Plan (which provides for 5000 new homes within a 5-mile radius of the Horsleys) has designated Station Parade, East Horsley, as a ‘District Centre’ which demonstrates a complete and utter misreading of the area because there are but a handful of local shops of which some have flats above. Such a designation / classification would merely encourage future urban development.

I **OBJECT** because "Affordable Homes" by their very definition, means those sold or rented at 80% of market value which, given the high value of land in West & East Horsley, will effectively mean they are UN-affordable. Inevitably, the building of such homes is effectively a placebo to developers who will be 'here-today' and 'gone-tomorrow' with absolutely no concern for the countryside.

**POLICY H2: Affordable homes**

I **OBJECT** because “Affordable Homes” by their very definition, means those sold or rented at 80% of market value which, given the high value of land in West & East Horsley, will effectively mean they are UN-affordable. Inevitably, the building of such homes is effectively a placebo to developers who will be 'here-today' and 'gone-tomorrow' with absolutely no concern for the countryside.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

All of our local Schools are already full, our Medical facilities are already overstretched and our village Parking facilities (including the railway station and local shops) are already inadequate with no space for improvement. All local roads are narrow and were built at a time when the stage coach / pony & trap were the typical mode of transport rather than today’s 4x4’s, long-wheel courier vans and supermarket delivery vehicles. Much of the Horsleys are built on clay with the consequence that drainage is inadequate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT because this policy lessens the protection that exists currently whereas I believe most strongly that GBC should be looking to reinforce it. As it is envisaged in the 2016 Draft Local Plan it would seem that any major development in the AONB could be permitted if exceptional circumstances were to be demonstrated. The word 'exceptional' is of course the key here and needs to be urgently defined and clarified by GBC?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I **OBJECT** to the proposed removal of West & East Horsley from the Green Belt because the requisite "exceptional circumstances" required have NOT been demonstrated in any way and such a dramatic change would adversely impact on the streetscene and rural ambiance of the two villages. Indeed, in Paragraph 79 of the government's own National Planning Policy Framework (NPPF), it states:-

*The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.*

Furthermore, under paragraph 82 of the government's NPPF document, it states:

*The general extent of Green Belts across the country is already established.*

*New Green Belts should only be established in exceptional circumstances, for example when planning for larger scale development such as new settlements or major urban extensions. If proposing a new Green Belt, local planning authorities should:*

  * demonstrate why normal planning and development management policies would not be adequate;*
  * set out whether any major changes in circumstances have made the adoption of this exceptional measure necessary;*
  * show what the consequences of the proposal would be for sustainable development;*
  * demonstrate the necessity for the Green Belt and its consistency with local Plans for adjoining areas; and*
  * show how the Green Belt would meet the other objectives of the Framework*
Furthermore, I fundamentally disagree with the Draft Local Plan's wording that "the general extent of the Green Belt has been retained". The Green Belt (including the Metropolitan Green Belt) is an invaluable asset and amenity, not just to those that live within it but to the nation as a whole and any erosion to its boundaries now will make it so much easier for others to denude it further and further as the years go by to the extent that it will be gone forever. Unconscionable as that is to me, the dilution and destruction of the Green Belt when brown field sites are not only preferable but available, indicates a disappointing lack of concern and responsibility by Guildford Borough Council.

Per the Draft Local Plan, GBC's intention is to inset no fewer than 14 villages which will inevitably have a dramatic and hugely damaging impact on the Borough. Furthermore, an approximate calculation from the information provided in the Draft Local Plan, indicates that as much as 7% of the Green Belt will be lost. Equally, slightly over 8,000 houses are planned to be built on current Green Belt designated land, of which only 14% is earmarked for Guildford.

I OBJECT and furthermore fundamentally disagree with the Local Plan's wording that "the general extent of the Green Belt has been retained". The Green Belt (including the Metropolitan Green Belt) is an invaluable asset and amenity, not just to those that live within it but to the nation as a whole and any erosion to its boundaries now will make it so much easier for others to denude it further and further as the years go by to the extent that it will be gone forever.

Answer (if comment is on questions 1-7 of the questionnaire): ()

REMOVAL OF WEST & EAST HORSLEY FROM THE GREEN BELT

I OBJECT to the proposed removal of West & East Horsley from the Green Belt because the requisite “exceptional circumstances” required have NOT been demonstrated in any way and such a dramatic change would adversely impact on the streetscene and rural ambiance of the two villages. Indeed, in Paragraph 79 of the government’s own National Planning Policy Framework (NPPF), it states:-

The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.

Furthermore, under paragraph 82 of the government’s NPPF document, it states:
The general extent of Green Belts across the country is already established.

New Green Belts should only be established in exceptional circumstances, for example when planning for larger scale development such as new settlements or major urban extensions. If proposing a new Green Belt, local planning authorities should:

- demonstrate why normal planning and development management policies would not be adequate;
- set out whether any major changes in circumstances have made the adoption of this exceptional measure necessary;
- show what the consequences of the proposal would be for sustainable development;
- demonstrate the necessity for the Green Belt and its consistency with Local Plans for adjoining areas; and
- show how the Green Belt would meet the other objectives of the Framework.

Furthermore, I fundamentally disagree with the Draft Local Plan’s wording that “the general extent of the Green Belt has been retained”. The Green Belt (including the Metropolitan Green Belt) is an invaluable asset and amenity, not just to those that live within it but to the nation as a whole and any erosion to its boundaries now will make it so much easier for others to denude it further and further as the years go by to the extent that it will be gone forever. Unconscionable as that is to me, the dilution and destruction of the Green Belt when brown field sites are not only preferable but available, indicates a disappointing lack of concern and responsibility by Guildford Borough Council.

Per the Draft Local Plan, GBC’s intention is to inset no fewer than 14 villages which will inevitably have a dramatic and hugely damaging impact on the Borough. Furthermore, an approximate calculation from the information provided in the Draft Local Plan, indicates that as much as 7% of the Green Belt will be lost. Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S1: Presumption in favour of sustainable development

I OBJECT because the NPPF (Paragraph 14) states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking” yet no definition of “sustainable development” is contained within the Draft Local Plan which, by inference, suggest that any future development will seemingly qualify as “sustainable”, thereby failing to meet the NPPF’s most important guideline.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3280  Respondent: 8892353 / Elizabeth Russell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2
Included among my OBJECTIONS are the removal of West & East Horsley from the Green Belt and the unpalatable and surely unnecessary addition of 385 houses in West Horsley which equates to a staggering increase of 35% on this essentially rural village which currently comprises 1,111 homes. This proposed increase is infinitely greater than that proposed in any other village across the whole Borough and leads to the supposition that West Horsley is being discriminated against.

All of our local Schools are already full, our Medical facilities are already overstretched and our village Parking facilities (including the railway station and local shops) are already inadequate with no space for improvement. All local roads are narrow and were built at a time when the stage coach / pony & trap were the typical mode of transport rather than today's 4x4's, long wheel courier vans and supermarket delivery vehicles. Much of the Horsleys are built on clay with the consequence that drainage is inadequate.

Inexplicably, the new Draft Local Plan (which provides for 5000 new homes within a 5-mile radius of the Horsleys) has designated Station Parade, East Horsley, as a 'District Centre' which demonstrates a complete and utter misreading of the area because there are but a handful of local shops of which some have flats above. Such a designation / classification would merely encourage future urban development.

Also of major concern is the calculation and quantification of the number of houses proposed in the Strategic Housing Market Assessment (SHMA): a target number that was generated by an external consultant's mathematical formula of which no qualification or calculation is to be made available. As if this wasn't unacceptable enough, the consultant's unsubstantiated calculation has been further massaged by Guildford Borough Council to such an extent as to provide for a population increase across the Borough which is almost 70% above the official national estimates for population growth. WHY?

Furthermore, these unquantified numbers are obviously pre-Referendum / Brexit calculations and as such now need to be recalculated if they are to be meaningful? Furthermore with Theresa May becoming the new Prime Minister, time MUST be given for her to provide a clear policy statement on her plans for the Green Belt which, hitherto, she has long sought to protect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Following a major public outcry, GBC’s Planning Committee rejected unanimously a recent application for this development on numerous grounds yet, for no apparent reason, it has been included in the new Draft Local Plan - a clear invitation to the developers that they should try again. This is not a NPPF "presumption in favour of sustainable development" but a predetermined bias in favour of specific applicants, who have already been given many additional months to refine their application prior to its rejection. It is therefore my opinion that this development should be removed from the new Draft Local Plan for all the same reasons that it was rejected by GBC’s Planning Committee on 5th April 2016. These include:

- Green Belt location and absence of "exceptional circumstances".
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within 400m exclusion zone for The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottleneck and Ripley village and roundabouts.
- Absence of adequate traffic

- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
- Loss of high-quality agricultural land (55% of the site), in breach of national policy.
- Disproportion of locating 2,000 dwellings within the village of Ockham’s 159
- Presence of a Surrey County Council safeguarded waste site.
- Cost of infrastructure required to the detriment of alternative more favourable sites.
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity
- Impact on listed buildings
- Difficulty of SANG siting and inability to divert residents and their pets away from the SPA
- Extreme housing density with tiny garden spaces
- Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure
- Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).
- Failure to evaluate the cumulative impact of this and nearby development sites on the area.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I am writing to object to the draft Local Plan for the following reasons:

I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment as far too high.

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. Development on the site will create an urban corridor stretching from London to Guildford.

I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys.

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there.

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site.

I object to the detrimental impact on transport, local roads and road safety.

I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee.

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan.
I object strong once again to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan.

I highlight below some of the objections as to why I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan:

Grade 2 listed building within 100 metres of your proposed site. I strongly object to the increased area of the site is located 100 metres from Upton Farm which is a Grade 2 listed building, one of the heritage sites in Ockham, and would have a huge impact on our outlook and views all around. Not to mention the noise pollution, environmental impact, and loss to our quality of life. We have spent years adhering to the stringent Heritage Rules to make sure this house is in keeping with its period and history.

I strongly object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

Local roads are at full capacity and often grid-locked in the rush hours, particularly when the weather is bad, when going to work

It is adjacent to the most congested stretch of strategic road network in the county and close to one of the most congested junctions in the country (J10)

The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”!

I object to para 21 which “limits” development in flood zone 2 and 3. Development should be EXCLUDED in flood zone 2 and 3.

I strongly object to the fact that the council has failed to remove this site from the local plan, despite receiving 1000’s of objections from local residents and statutory consultants.

I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The figures used for justifying the number of new houses in the SHMA are spurious at best but in the light of the Government’s recent proposals on population the whole scheme should now be shelved. The current organic growth of the area works reasonably well when controlled properly by the Planning Department in line with national policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. There are no “exceptional circumstances” demonstrated to justify removing the Horsleys from the Green Belt and once removed it would not be possible to return the area to the Green Belt in the future.
2. The extension of the boundaries of the Settlement Areas is appalling. This is an inappropriate and contrived device to try to show that there aren’t that many of us in the Areas and to justify the increase of housing as a consequence.
3. The infrastructure of the Horsleys is at bursting point as it is. There are hardly any roads. The ones that we have are inadequate. Peak times are a nightmare at a number of junctions and they wouldn’t be particularly assisted by traffic control. The roads leading to the A3/M25 would be totally blocked. The geography of the area lends itself to local flooding which would be made much worse by any additional building and run off.
4. Schools and Medical Facilities are over subscribed and were unable to accommodate our family or others.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. The local shops are not a “District Centre” by any stretch of the imagination.

<tr>
<td>16.</td>
<td>I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)</td>
<td>The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, I also understand that it is based on ‘commercially confidential’ modelling assumptions that cannot be checked, reviewed or audited independently. I note that there has been no transparency to this evidence base and it is therefore impossible to assess its accuracy. I firmly believe that this has been conducted in an undemocratic fashion and is not appropriate for consultation of the Plan. The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors. I trust that all my objections made above are fully taken into consideration and that the Plan is withdrawn.</td>

Answer (if comment is on questions 1-7 of the questionnaire):

13. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Commonand Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. It has not been confirmed to why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

National Planning Policy promotes sustainable developments, with a sustainable means of transport. With ever reducing bus services in the area and no train station within reasonable and safe walking distance it is impossible for any development on this site to offer a sustainable transport solution. I suggest again that this development on this site is wholly inappropriate (Policy I3) development.

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland, that is marked as an area of Special Scientific Interest (SSSI) and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

I can observe both the Greenbelt and Woodland in question from my property, as a result I know that it has an abundance of wildlife, many of which are protected. It is home to many types of Owls (Tawny, Little and Barn) and a large number of bats, a number of songbirds, Cuckoos and Woodpeckers. In addition there are badgers setts, with a host breeding families of deer that roam across the land surrounding Tithebarns Land. In late summer, once the harvest has been made, the fields host large gatherings of Canada Goose and visiting Egyptian Geese. I have also spotted breeding families of Kestrels, Red Kites and Bustards, as the long grasses the right feeding habitat. In recent weeks, I have also spotted several nesting Red-legged Partridge. As soon as construction starts, their habitat will be ‘at best’ at risk’ but most likely lost. I note that no wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. As a Governor of a local school, I am acutely aware of the pressure to provide services, so I would like to question how will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, the site has a number of several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents, associated with the transfer of electromagnetic radiation (EMR).

I would like to draw your attention to a report in 2001 from the National Radiation Protection Board (NRPB) said that there may be a very slight increased risk for leukaemia in children. A further study in 2005, looked at how close children lived to high voltage power lines when they were born. The aim of the study was to find out if this affected their chance of getting leukaemia. It found that children who lived within 200 metres from these lines had an increased risk of getting leukaemia. It also showed a smaller increase in risk for children living between 200 and 600 metres from these lines. Again, further evidence highlighting that this site is not viable for development.

14. I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

I feel the need to highlight that the addition north facing ramps to the A3 at Burnt Common would be a disaster for my local community. By creating an access point to drive on to the A3 to the north, will create a draw for a huge amount of ‘through’ traffic.

I am also concerned that the fields behind my property will be used as site access/egress with a typical works compound, and of course the construction site, for the entire works period. Given, it’s proximity this will see a 24 hour security fenced and lit compound. Movements of heavily construction traffic within a short distance from my house, will happen 5 or 6 days a week to amount to thousands of movements of material away and deliveries. My whole family will suffer the consequences of noise pollution, dust pollution, and construction activity for the duration of the development.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Clandon and Burnt Common. This increased funneling will cause immense damage to those areas with narrow roads, all increasing the possibility of road traffic accidents.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

8. I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)
I object to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient Oak trees. It is well documented that Oaks provide a habitat rich in biodiversity; supporting more life forms than any other native tree species – which each Oak hosting hundreds of species of insect, supplying many native birds with an important food source. In autumn mammals such as badgers and deer take advantage of the falling acorns. Development will see the destruction of these tress and further damage to the local biodiversity.

Answer (if comment is on questions 1-7 of the questionnaire): ()

5. I object to the sustainable employment policy (Policy E1)
If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable and less disruptive.

6. I object to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

7. I object to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of several successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them wish to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

| Answer (if comment is on questions 1-7 of the questionnaire): () |
1. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, a large number of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition, and have not been tendered. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested, with traffic accidents more likely to happen. I mention this as Surrey has become a mecca for cycling, particularly at weekends hundreds of cyclists passing through Ripley, Send and Clandon on the way to the Surrey Hills. Trade to local businesses such as the coffee shops in Ripley have benefitted from this pursuit, along with employment and wealth creation from local Small to Medium Enterprises (SME’s). I am like many a keen cyclist, and I am concerned that the Surrey Hills will be damaged beyond recognition should this development be brought forward, thus losing it’s brand value, attraction and status. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road traffic accidents involving cyclists as a result of the development proposed under the local plan. This comes at a time when many of the local schools are trying to encourage cycling within their School’s Travel Plans (STP’s).

Most of the local rural roads also do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians. To example, in Clandon, where footpaths do exist, they are often very narrow in places with construction lorries mounting pavements in order to pass, and this has been already well documented by West Clandon Parish Council.

2. I object to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, I share the view that my family and I along with all other existing residents’ in the locality will see our quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site. The farm land around the South bound extension, floods regularly. Should this development go ahead, I expect that the flood waters will be pushed closer to my property and will present greater risk for flooding.

I also note that without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and very likely to be overwhelmed. It is well documented that many local services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I am also concerned with the general reduction in future Police funding (Surrey Police identified that it needed to save £28.4m over the four years of the spending review between March 2011 and March 2015). Savings have been made, but their scope with new developments will increase, creating extra pressure. This will have further impact to all local residents as local Police will have 13,860 new homes during the plan period.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Reviewing Highways England material, suggests that it has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

12. I object to poor air quality concerns (Policy I3)

As a local resident, with a young family I am acutely concerned, with air quality and the levels of harmful motor transport emissions. Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” As this development, is within 400m from my house, I ask GBC to detail how they achieve this? This proposed development, particularly in the north east of the borough will lead to considerable further congestion, and emissions as traffic will mount up waiting for the lights to change. This will be particularly acute to nearby properties such as mine. This will have a detrimental health effect to my children when they play in their garden.

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. I object to not protecting the Green Belt (Policy P2)

I object to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages and the land to be taken from the Green Belt.

There is a real danger that the loss of this Greenbelt will result in a mess of urban sprawl and the neighbouring villages merging into one another. The significance of this development, will result in the character of these villages being lost and the natural habitat and countryside being encroached.

I am bemused to why the existing brownfield site just to the south of the site at Burnt Common, has not been considered.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4. I object to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.
The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. As a local resident, I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay (in winter 2013 to the depth of 2 feet in places). Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

As an owner occupier of a property close to the proposed development, I object in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). The Plan is ill-considered, unsustainable and, in many provisions completely unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1. I object to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently damage and will have lasting detrimental impact to all the existing local communities by 'over development', particularly for the villages between Guildford and the M25, including Ripley, Send and Clandon. The local services and infrastructure in these villages will be unable to cope with the level of development proposed. The proposed developments as they stand do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35) and Garlick’s Arch (A43) are in completely unsustainable locations. They do not benefit from railway stations within easy walking distance, furthermore with the reduction of bus services across rural villages, this will force more motor vehicles to what is already congested roads. These sites are unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve wider infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution.

With the proposed development coming within 400m of my property, I am acutely aware of the destruction, the increased noise, pollution and damage this development will have to the local habitat. This will perhaps, affect me more than most but all residents in Send, Clandon and Ripley will suffer as a result.

2. I object to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only 5 miles. It will in effect create a sprawl, with the merging of ‘identities’ of the surrounding villages, with no delineation between one village and the next.

The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. This development will have a permanent and detrimental impact on each of these communities, should this Plan be approved.

Re: Guildford Borough Proposed Submission Local Plan:

: strategy and sites: June 2016 (The Guildford Plan)

I object. I object to the boundaries of East and West Horsley villages being greatly enlarged, the areas inside these new boundaries being removed from the Green belt and to the development of 533 new homes in the villages. This totally fails to recognise that development of this scale in this rural area is unsustainable. The roads, schools, medical facilities, water and all infrastructures are already at full capacity and would not cope with such a development. If the National Planning Policy Framework is followed this development would not be allowed.

I object. I object that Green belt areas are targeted for development when there are brownfield sites within the urban area which if suitably developed would meet housing needs and give people better access to workplaces.

I object. I object to the need for affordable housing being used as a reason to remove protections on Green Belt and areas of outstanding natural beauty when the 40% of affordable housing proposed will be beyond the means of low paid workers. This defeats the reason for plundering green belt and other protected areas.

More thoughtful social housing plans in existing urban areas would fulfill the need far better.

I object. I object to the total disregarding of the detailed and well researched objections submitted after the first Guildford Plan was proposed when it was previously announced that local concerns and objections would be addressed. Instead nothing has changed and no attempt has been made to resolve the immense impact that these proposals would have on the infrastructure and consequentially the character of the Horsley's. This is a betrayal of the standards I would expect from an elected body.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• The Guildford Plan for the development of West Horsley is based on four sites and gives a total of 385 new houses. Near Horsley railway station, on a site adjacent to the West Horsley Parish boundary, a further 100 homes are proposed in the village of East Horsley. The housing density proposed for each site is much higher than that which currently exists in the villages and will be totally out of character. The National Planning Policy Framework calls for the respect of character and density of housing of new residential developments in the area. Furthermore, it requires that the housing is limited in quantity by the availability of infrastructure and local facilities. The proposed development of these sites is therefore inappropriate and unsustainable.

• I object to the significant enlargement of the West and East Horsley village boundaries as given in the above Guildford Plan. Furthermore, I object to the proposal to remove the village areas inside these boundaries from the Green Belt. Neither justification nor explanation for these changes is provided in the Plan. The Green Belt is protected as a matter for National and Local policy. In the National Planning Policy Framework it is stated “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.” There are no very special circumstances which justify the above changes as proposed in the Plan. The proposed changes are totally unacceptable and should not be implemented.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2195  Respondent: 8892737 / David Eagle  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2203  Respondent: 8892737 / David Eagle  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base
I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

|-------------|---------------|-------------|----------------------|-------|-----------|--------------------------------------------------|

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. **The plan says that “allocating these sites does not grant planning permission for development.”** However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever
since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.
The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

**2010 –2014 from Crashmap data**

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

**2015**

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  
  Surrey Fire and Rescue deployed.

**2016**

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.
The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)
It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

| Document:   | Proposed Submission Local Plan: strategy and sites 2016 / Policy E1 |
| Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( ) |
| Answer (if comment is on questions 1-7 of the questionnaire): | () |
I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/9283  Respondent: 8892737 / David Eagle  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPP16/9356  **Respondent:** 8892737 / David Eagle  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk
of becoming an excuse for overdevelopment/"Disneyfication". Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9331  Respondent: 8892737 / David Eagle  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.
The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9319  Respondent: 8892737 / David Eagle  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related”. In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.
Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The
fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.
There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9251  Respondent: 8892737 / David Eagle  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”.

Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

Page 1716 of 3367
The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.
The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation

2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation

3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound

4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018

5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars

6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham

7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

C.i. Policy 25 Gosden Hill – My Objections

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt.

4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity.

5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.

7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).

8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4630  Respondent: 8892737 / David Eagle  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )  

Answer (if comment is on questions 1-7 of the questionnaire): ()  

C.ii. Policy A43 Garlick’s Arch – My Objections  

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches  
2. It ignores all the thousands of previous objections made by local people  
3. There is no proven demand for travelling show people plots in this location  
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.  
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.  
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4631  Respondent: 8892737 / David Eagle  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

C.iii. Policy A58 Burnt Common – My Objections

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

15. I object to the potential impact of para 4.4.23a on Burnt Common with its over allocation of industrial zoning is subterfuge for a waste management facility which is a dishonest and underhand approach to planning and proper consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
A. Policies ID1 & ID2 Infrastructure – My Objections

Although much is made of the need for new infrastructure to support these developments and for this to be in place as needed, the Plan admits “we forecast that there will also be an absolute increase in overall traffic volumes” and this is assuming all the infrastructure (listed in App. C to the Plan) is in place in a timely fashion. GBC has little or no control over the plans of Surrey County Council as the local highways authority and Highways England for trunk roads. Worryingly, the Plan now has less substantive information about improvements to the A3 South of the M25 from Highways England and it appears that their plans are not yet formed (Policy ID2). In the absence of such information, the infrastructure proposed is specific to each proposed development and does not address cumulative effects. What would be the case with regard to planning approval if SCC and/or HE do not provide timely infrastructure?

The Plan now calls for nearly all infrastructure to be funded by developers (see APP. C). We question how realistic it is to expect developers not only to pay for all the infrastructure but also to have it in place in a timely fashion. The Plan says that planning permission will be refused if timely provision of infrastructure cannot be secured. Such refusals will almost certainly be settled in the courts. Developers’ business models are based on building and selling houses to create the cash to provide infrastructure. People will be living on the sites well before infrastructure is complete. Will GBC prevent development of Gosden Hill until slip roads etc. are provided off and onto the A3? Again, the infrastructure is site specific and does not address cumulative effects.

If development were to be refused the land would still have been removed from the green belt and its future rendered uncertain.

Residents are being asked to accept very large amounts of development with little or no detail being provided on measures which would relieve existing congestion and limit future problems. The cumulative effects of the developments listed below are certain to have a devastating effect on the A247 through our village (and of course on Send) and it is hard to see how any of the infrastructure proposed in the Plan (App. C) will do anything to mitigate the effects of these developments on the A247 and hence our village.

B. Policies having an impact on the A247 – My Objections

The following objections are made because of the impact they will have on the A247 and hence the village of West Clandon.

B.i. Policy A25 – My Objections

Gosden Hill development of 1700 houses. Reference to a potential link road from the development to the A247. The clear implication is for an access from the development to the A247 with enormous traffic implications for the A247.

South bound off- and on- slip roads to service the development and replace the existing off- slip road to Burpham. The only North bound access to the A3 will be via the existing slip road off Clay Lane. (See later, Burnt Common).

4-entry form secondary school, a primary school, a retail centre and a park and ride for up to 700 cars.

When developed, the new employment site at the north side of Gosden Hill Farm (site allocation A25) will be treated as an Office and Research & Development Strategic Employment Site (7000sq.m). This could mean several hundred employees.

B.ii. Policy A43 – My Objections

Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.

B.iii. Policy A43a – My Objections

Provision of a Northbound on- slip road and a Southbound off- slip road to the A3 to join the A247. These are stated to be required to relieve Ripley from the effects of the development of Wisley. It is not clear how this could work unless traffic from Wisley wishing to go South either goes up to the A3/M25 roundabout and comes back down the A3 or direct access to the A3 (as claimed by the promoters of the Wisley development) Southbound
is provided at Wisley/Ockham. In either case, slip roads at the A247 seem unnecessary. It is more likely that these slip roads are to provide access to the Garlick’s Arch and Burnt Common developments. The slip roads will have the effect of creating an all-ways junction with the A3 at Burnt Common making it a centre for future development and a traffic magnet with clear implications for the A247.

B.iv. Policy A58 – My Objections

Burnt Common strategic industrial employment site for light industry, storage and distribution activities. It is to be designated an Industrial Strategic Employment Site which means that it is a preferred site for industrial development including waste management facilities. The site is 9ha which it is stated allows for considerable future expansion. This will generate large amounts of traffic including heavy vehicles on the A247.

B.v. Policy A24 – My Objections

Slyfield development of 1000+ houses. (A road from Slyfield to Clay Lane and thus to the A3 has already been agreed.) This will generate traffic on the A247 from those wishing to go due South.

B.vi. Policy A35 – My Objections

The Wisley development of a new village / town with at least 2000 houses, 4-entry form secondary school and employment land. The development does not seem to meet the NPPF requirement that developments that generate significant movement will be located where the need to travel will be minimised and the use of sustainable transport modes can be maximised. The provision of slip roads at the A3/A247 junction to relieve the impact of this development on Ripley will have potentially severe effects on the A247.

B.vii. Policies A37, 38, 40, 42, 44 & 45 – My Objections

Some 295 houses in various smaller developments in West Horsley, 100 in Send and 15 in Ripley. These will generate traffic on the A 247 to access the A3.

B.viii. Policy P2 Introduction – My Objections

The removal of green belt protection from the prison site meaning that it is likely to come forward for housing development. The nearest feasible access to the A3 is at the A247 junction.

B.ix. Non-plan Items – My Objections

Surrey County Council’s business plan for Newlands Corner (not referenced in the Local Plan) to attract 100,000 more visitors a year. A significant proportion of these can be expected to use the A247.

Waverly B. C. has approved the development of 1,800 homes at Dunsfold which has the potential to feed traffic trying to avoid Guildford, onto the A247 to access the A3 (not referenced in the Local Plan).

B.x. Summary of the Impacts on the A247 – My Objections

All of these developments will draw additional traffic to the A247 through the village. It would be naïve to think that the employment sites and schools will serve only the developments themselves. Apart from the normal movements of residents to and from the new sites there will be considerable additional traffic on the A247 generated by:

- children from elsewhere being delivered to schools and collected
- the employees of the offices and industrial sites getting to work and returning home
- the vehicle movements generated by distribution and storage activities
D. Cumulative impact of changes – My Objections

Changes to the Plan have done nothing to alleviate the problems (particularly of traffic and congestion) raised in residents’ previous responses. Indeed it is now clear that the problems will be made much worse. There do not appear to be any changes which would be of benefit to the Clandons and indeed the cumulative effect of what is in the Plan and some external factors not in the Plan will have a much worse impact on the A247 through West Clandon and Send than the 2016 draft. Note that the A247 is the only road over the Guildford to Waterloo railway, North of Guildford that doesn’t involve travelling through the town centre.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/3072  Respondent: 8892737 / David Eagle  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
E. Policy S1 Presumption in favour of Sustainable Development– My Objections

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

G. Duty to Cooperate – My Objections

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to cooperate with the wishes of its own electorate.

Despite the thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: PSLP16/10788  Respondent: 8892801 / Richard Hall  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Partially as a result of the planning controls but also as a result of topography with large areas forming flood plains draining ultimately to the Mole and Wey and limited crossing points of these rivers and streams the area has limited road infrastructure and Surrey County Council acknowledged this recently saying the area had lanes not road without the usual architecture of drainage and highway design found in sustainable urban areas. The width of the roads is limited and without wide scale compulsory purchase and reconstruction upgrading of these roads to a safe and sustainable design is not possible and the complexity of such a scheme is not deliverable.

The village school was unable to accept either of our children with the only option available, 20 minutes away at Merrow and the level of subscription is unlikely to abate. The medical centre is also full and the retail parades maintain a balance of facilities.

The community infrastructure is stressed but balanced with roads that already present significant risks to pedestrians and other users. Wing mirror strikes of pedestrians are all too frequent as cars pass along the Ockham Road North and cars have to mount the pavement to let HGV traffic pass. The village has been cut off by flooding from the A3 during exceptional rainfall and these weather events are likely to increase.

The classification of Ockham Road North and South as an "A" class road is out of necessity rather than design, the necessity being that no other route is available to designate, it is now unsafe and in need of traffic calming measures and the proposals to place a further burden on it by permitting a substantial increase in local development is not tenable.

The railway line is held out as a possibility of sustainable transport but each train is full as it leaves Horsley each weekday morning with passengers having to standing from Effingham and Cobham for nearly three quarters of an hour to London and passengers unable to board by Surbiton. It is noticeable that more passengers travelling from Guildford are electing to use this line as Guildford grows and the mainline is overwhelmed. The capacity needs to be protected for those travelling further from the sustainable centre of Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? (x), is Sound? (x), is Legally Compliant? (x)

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Green belts were originally conceived as a "lung" around urban centres, which in Surrey's case was to serve London. The parishes of East and West Horsley fulfil this function providing areas of recreation for London to the north and the nearby towns of Guildford, Leatherhead and Woking with large numbers visiting the area every week to enjoy the relief of being away from these densely developed centres. The importance of the Green Belt to the conurbation grows year by year.

The Green Belt reinforced the first planning controls brought in in 1939 to control the lazy land hungry ribbon development out from London and other conurbations.

It is quite clear that the policy was a success and has fulfilled the objectives.

The designation of The Horsley's as Green Belt has produced a slow and sustainable change in housing stock as it is modernised and reorganised to meet modern demand and demographics.
No credible planning case has been presented for removing the Green Belt designation beyond the fact that only a limited population live in the area, it would be odd if a large population lived in a Green Belt area by definition and the process has failed to consider the large number of weekly visitors to the area using the Green Belt for what it was conceived for.

If the Horsley’s were to be removed then new planning controls to protect the character of the area and its setting in the surrounding landscape would be required including conservation areas and design standards applying to large areas. These controls tend to prevent the delivery of housing and the modernisation of the existing stock by raising the level the bureaucracy preventing development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Without major infrastructure investment which is notoriously difficult to secure or deliver the north part of Guildford Borough Council is not a realistic area to propose the development of large amounts of housing.

Town centres have always provided the best opportunity for sustainable development and large areas close to the Guildford's centre have low density poor quality commercial development which could with relatively little investment in flood defence be resolved and/or commercial use retained at ground floor level.

The population growth projected in the plan assumes an ever upward trend of numbers and household formation and aims to meet that demand whatever it might be. The underlying calculation has not been made available for scrutiny. Resources including land are finite and as well as housing the planning system is required to provide a sustainable environment for Guildford and the surrounding authorities and especially London including the need to provide open space and relief from the urban environment. The requirements the Green Belt fulfills have been entirely disregarded in formulating this Development Plan and the Green Belt is seen as an obstruction rather than its usefulness weighed against the requirement to provide housing.

The densities proposed for the large sites are not realistic and will as they do in every Local Plan fall short once internal site roads, open space and other needs are designed in.

The Local Plan as drafted is, as ever, driven by politics rather than planning and simply places unwanted development as far from the County towns as possible and is designed to fail and throw the burden of deciding where housing should be built onto the Planning Inspectorate. In these circumstances where the plan is unsound planning will be uncontrolled and by exception and it is inappropriate to expose land with such poor surrounding infrastructure to this unplanned approach by removing its Green Belt designation.

The laissez fairs attitude to investment in road and flood protection infrastructure has now taken up all available capacity outside of the large and small town centres in Surrey and it is extraordinary that the Local Development Plan has such limited proposals for the upgrading of that infrastructure.

The Local Plan is in my view unsound in that it will fail to deliver the housing provision it proposes and in such circumstances removing land from the Green Belt without a method of making it deliverable or weighing its existing
benefits against other needs is unsound and bad in its proposal process and bad at law and fails to meet the test of an "exceptional circumstance" to remove land from the Green Belt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to complain about the housing being increased in Guildford by 693 homes a year. This figure is far too high and I have not seen any evidence to justify it (if there is some please provide it in a form the general public can understand).

The university has not fulfilled any of its obligations to the town. Students rent all the available homes for 30 weeks of the year when they should be available to local families all year round. The university has space to increase its campus but has failed to do so.

Please take notice of the views of Guildford residents who want to live here with their families and not be forced out by developers who are going to make a fast buck and get out.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I wish to object in the strongest possible terms to the removal of West Horsley and East Horsley villages from the Green Belt under the Proposed Submission Local Plan: Strategies and Sites June 2016, by insetting and extending the 2003 Local Plan Settlement Area boundaries.

The Green Belt and Countryside Study is clearly flawed and there is no need for the currently defined Settlement Area boundaries to be extended.

The planned density of new homes is far too high for the village to support as well as being out of character without a sustainable infrastructure of drainage, road capacity or public transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

I am 30 years old and have been a resident of West Horsley for all my life. I am a qualified construction manager and work for one of the country's biggest construction companies. I therefore feel I am positioned to make valid comments of the Proposed Submission Local Plan: Strategies and Sites June 2016.

In the first instance, the 385 proposed number of homes is wholly out of character and fat too large to be required or sustainable by the current infrastructure. I would comment that the basis calculation from which the demand for this quantum of housing emerges appears to be incorrect.

the requirement that West Horsely suffers insetting and consequent removal from the Green Belt is wholly unnecessary and again based on the flawed Green Belt and Countryside Study. I very much object to this proposal.

It is furthermore clear from published details that the current drainage and waste water infrastructure could not cope with the scale of building proposed in West Horsely let alone the roads and transport system.

I accordingly must close by registering my wholehearted objection the Proposed submission Local Plan: Strategies and Sites June 2016.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Guildford borough NEW LOCAL PLAN 2016**

**Notice of objection.**

I am writing to register my objection to the above plan.

My reasons for objecting are:

1. Removing Green Belt status from the Horsleys will result in high density building developments that are out of keeping with the nature of the villages and detrimental to the character of the villages. There is no justification for this action.
2. The inevitable increase in population arising from the development of new homes within the area will further stress the already failing water and sewer utilities; will overstretch the capacity of the already fragile infrastructure - doctors, state schools, parking, road and rail public transport; and will lead to higher traffic density, an increased number of road accidents, and higher levels of air pollution.
3. The Strategic Housing Market Assessment model, on which the number of new houses required is based, has not been made public and the results appear highly dubious and certainly not a basis for critical planning decisions.
4. The plan will greatly increase the population of young people in an area where local employment opportunities are already low and unlikely to increase as a result of the plan.

Having lived in East Horsley for over 30 years I have seen the increasing erosion of the Green Belt and experienced the already obvious stresses and strains on the infrastructure over this period.

It is the responsibility of the local planners to ensure that these existing problems are addressed and resolved, not greatly exacerbated by removing the constraints that currently exist.

I wish my objections to be noted when this unsatisfactory and highly flawed plan is considered.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
1.1 **We object** to policy A25 Gosden Hill

1.2 There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.3 Gosden Hill is located entirely within the green belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,

1.4 The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity

1.5 The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

1.6 The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

1.7 We object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).

1.8 The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

1.9 A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 **We object** to policy A26 Blackwell Farm
1.2 There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
1.3 Blackwell Farm is located entirely within the green belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Blackwell Farm performs all five functions of green belt, and fulfils purposes 1, 3 and 5 very strongly.
1.3.1 Purpose 1 - “checking the unrestricted sprawl of large built-up areas”. There is
```
huge pressure to develop on the western edge of Guildford; the University of Surrey has stated publicly that its key objective is to develop the whole of its landholdings, stretching west to Flexford Farm. This, combined with the indefensible boundary being proposed (a hedgerow rather than the existing belt of ancient woodland), will put more of the green belt and the Surrey Hills Area of Outstanding Natural Beauty (AONB) at risk of future development.1.3.2 Purpose 3 “assists in safeguarding the countryside from encroachment” - the proposed movement of the green belt boundary on the west of Guildford to allow for development of the University in 2004 resulted in the encroachment on countryside and the loss of working farmland (including some Grade 2) at Manor Farm. The proposed future change in the boundary would result in further encroachment and the loss of farmland including further Grade 2. The proposed road development with access road from the A31 would also effectively cut off farm access to the south of the development area leading to further urban influence on this countryside. The University’s stated key objective is to develop land which includes Chalkpit and Wildfield farms leading to the risk of further boundary change and further encroachment in future years.1.3.3 Purpose 5 - “assists in urban regeneration by encouraging the recycling of derelict and other urban land”1.4 Whilst all green belt assists towards this purpose, the ownership of this land by the University of Surrey with its extensive landholdings within the urban boundary (including land it leases to the Hospital and Holiday Inn, the Surrey Research Park, Hazel Farm as well as two large campuses) means that the location of Blackwell Farm within the green belt plays an even greater and direct role in encouraging the more efficient usage of urban land.1.5 Stopping development on Blackwell Farm would result in the University of Surrey investing in, and regenerating, land in its ownership and delivering its commitments following the 2003 boundary review (including 270 homes for key workers, 3,125 student residences and releasing further accommodation at Hazel Farm). The University has 17 hectares of surface car parking that could be built over with offices and flats. This is a more sustainable option than building over open farmland (largely grade 2 and 3a) within the green belt.1.6 The Blackwell Farm development would result in harm to the Surrey Hills Area of Outstanding Natural Beauty (AONB), harm to an Area of Great Landscape Value (AGLV), and harm to the setting to the AONB. (Blackwell Farm forms the views into and out of the Hogs Back ridge). The NPPF is clear that AONBs should be afforded the highest level of protection in relation to landscape and scenic beauty. All development proposals within and adjacent to the AONB must conserve or enhance its special qualities. The NPPF also makes it clear that applications for major development in the AONB will be refused unless exceptional circumstances are demonstrated and the development is proven to be in the public’s interest. Guildford Borough Council has not shown that the proposed housing development or the extension of the Research Park, or the proposed link road from the A31 to Gill Avenue, is in the wider public interest. Indeed, the increased traffic through the already congested Egerton Road/Gill Avenue junction, which would result from the development, would impede emergency vehicles travelling to the Hospital and this would be very much against public interest. GBC’s Policy P1 states that, “The Surrey Hills Area of Outstanding Natural Beauty (AONB) will be conserved and enhanced to maximise its special landscape qualities and protect it from inappropriate development. All proposals will be considered against whether they conserve and/or enhance the setting and views of the AONB”. I question how the proposal to carve a new two-lane carriageway through the AONB fits this policy, or meets para 115 of the NPPF? Finally, nearly the whole site has been identified as a “candidate area” for AONB status in the Landscape Evaluation Study commissioned by Compton, Worplesdon and Wanborough parish councils. Therefore, the entire site should be treated as though it is within the AONB during this local planning process.1.7 The access to the proposed Blackwell Farm site will put additional peak hour pressure on two of Guildford’s worst congestion “hot spots”: the A31 (Hog’s Back) and the Tesco Roundabout on Gill Avenue.1.8 GBC’s proposal to create a new major route into Guildford from the west at, or close to, the Down Place private driveway, and to make this the main access to the planned Blackwell Farm development, does not appear to have been thought through. There are queues stretching back from the Farnham Road Bridge as far as the Down Place driveway entrance most weekday mornings and any traffic generated by the new development would not be able to clear the junction. In order to accommodate the volume of traffic using the new junction (generated by residents of the new housing estate, employees at the Surrey Research Park, Hospital and University, and visitors to the new school/supermarket), there would almost certainly need to be a roundabout (rather than the proposed traffic-light controlled junction) and GBC has ruled out a roundabout on grounds of landscape impact and traffic.1.9 The secondary access to the site at Gill Avenue also presents problems, and as GBC states in its Transport Assessment (14.9.5), changes planned for the Tesco roundabout will not mitigate against the increased level of traffic through the junction as a result of the Blackwell Farm development, and this in turn will impact on the Egerton Road/Gill Avenue junction, which serves the Royal Surrey County Hospital. I question whether it is responsible to allow a development that would impede emergency access to an A&E department and a major incident unit.1.10 The traffic impact resulting from the development of Blackwell Farm on the strategic road network would not appear to be properly assessed but it would be alleviated in part (but not completely) by widening the A3. However, timing and funding for this work is unclear so there would be many years of traffic chaos before any widening took place (if indeed it does). More significantly, the widening of the A3 would create noise and environmental impact on the neighbouring residential areas of Onslow Village and Beechcroft Drive and a six-lane highway would cause greater severance between Guildford and Blackwell Farm and
areas to the west. The NPPF states in Section 6 para 47 that local authorities should “identify a supply of specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15”. In a footnote to this, it further adds, “To be considered developable, sites should be in a suitable location for housing development and there should be a reasonable prospect that the site is available and could be viably developed at the point envisaged.” I consider that the proposed access arrangements to Blackwell Farm are wholly inadequate for a development of this scale and thus the site cannot be “viably developed”.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 We object to Policy A35 Wisley

1.2 We object to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.

1.3 There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.4 This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.

1.5 Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

1. Green Belt location and absence of “exceptional circumstances”. 2. Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.

3. Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).

4. Proximity to A3/M25 bottleneck and Ripley village and roundabouts. 5. Absence of adequate traffic data.

6. Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.

7. Loss of high-quality agricultural land (55% of the site), in breach of national policy.
8. Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.

9. Presence of a Surrey County Council safeguarded waste site. 10. Cost of infrastructure required to the detriment of alternative more favourable sites.

11. Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.

13. Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.

15. Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.

16. Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).

17. Failure to evaluate the cumulative impact of this and nearby development sites on the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1.1 We object to policy A42 Clockbarn Nursery

1.2 There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.3 The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area.

1.4 The site has very restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical.

1.5 Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic.

1.6 Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.
1.7 The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPS16/7659  **Respondent:** 8893057 / Dianne Garnett  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):**

---

1.1 **We object** to policy A43 Garlick’s Arch

1.2 There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.3 The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

1.4 Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

1.5 The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

1.6 **We object** to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

1.7 **We object** to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

1.8 **We object** to the proposal to build 7,000 sq m of light industrial, general industrial or warehousing on the site at Garlick’s Arch. There is no need to place a Strategic Employment Site in this location when there is plenty of spare space available at Slyfield (40 ha). The Employment Land Needs Assessment (ELNA) 2015 has been reduced by 80% since the
ELNA 2013. There is no longer any need to place industrial development in the Green Belt when there are plenty of brownfield sites available.

1.9 We object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

1.10 We object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

1.11 We object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

1.12 Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

1.13 Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

1.14 With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

1.15 The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

1.16 We object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

1.17 Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

1.18 Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

1.19 Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

1.20 Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

1.21 We object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. We have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are
already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

1.22 We object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

1.23 We object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

1.24 It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 We object to the inclusion of the land for new on/off ramps at Burnt Common (A43a). The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

1.2 The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

1.3 We object to the proposed Infrastructure Schedule (Appendix C). The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 We object to policy A44 Send Hill

1.2 There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.3 The proposed development is not sustainable because of poor infrastructure. Send Hill is a single track country road and too narrow to provide sufficient access to the site for travellers or accommodate the potential new levels of traffic the proposed development would bring.

1.4 The site is a high quality green belt amenity area within beautiful surrounding countryside and would be spoilt by the development.

1.5 A Wasteland Solutions environmental report on Send Hill dated March 2004 gave evidence of past ponding of water in the excavated area. Further development would disturb the water table and increase risk of flooding to surrounding properties.

1.6 The site was used as a GBC registered landfill site and shown on the 1963-8 Ordnance Survey maps as “refuse and slag heap”. It is therefore unsuitable for such a development on health reasons.

1.7 On the 1971 Ordnance Survey the site is shown as a “refuse tip” prior to when proper licensing/registration was required. The date of the landfill works predates the 1999 EU Landfill Directive regulations. We therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials.

1.8 GBC has installed gas monitoring wells on site since July 2000. One well recording methane gas discharge.

1.9 A Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies the proposed site as GBC recorded landfill site Ref GU/11/LLC with type of waste not identified. The date of the landfill works predates the 1999 EU Landfill Directive regulations. We therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials.

1.10 A Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies proposed site GBC recorded landfill site Ref GU/12 with type of waste identified as “unrestricted”. This causes concern as to what it does contain and the dangers if disturbed.

1.11 An Envirosearch Report RS1100201_1_1 dated 17th February 2004 and historical map data and information from GBC has identified the site as landfill and has “areas of potentially contaminative industrial activities” and “potential risk from landfill gas migrations”. Development of this site would be a health hazard.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7662  Respondent: 8893057 / Dianne Garnett  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 We object to policy A46 land to the south of Normandy

1.2 There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints

1.3 There is unproven demand for secondary school places in the west wards that is being proposed as "exceptional circumstances" to redraw the Green Belt boundary. There is strong research evidence from SCC Education which proves existing under-utilisation in long term of secondary places in the west of the borough.

1.4 There is an incorrect calculation of bespoke SANG since only 10 ha are proposed within site but the new population requires 21 ha. This will impact viability if contained in site (65 ha approx) - there is not an additional 10 ha in currently proposed SANG pre-allocated schedule in infrastructure report (Russell Place Farm)

1.5 There is an incorrect evaluation of contribution of land within and between settlements to Green Belt "openness" - the previous PINS decisions in three appeals asserts "openness". GBC state there is no "openness" yet all land parcels in the site are 'red' sensitivity in GBCS Vol 2 Addendum 1 & 2 and all contribute to the 3 key purposes of the Green Belt.

1.6 There is a failure to engage with Rushmoor under the duty to co-operate rules in regards of traffic impact from Aldershot Urban Extension (3,800 homes) The increased commuting to Guildford plus new local vehicles (1,375 estimated) will take the A3232 to over design capacity and produce perpetual congestion

1.7 The one railway bridge in Glaziers Lane + 1 railway tunnel in Westwood Lane on North Downs line are restricted (tunnel single lane) with poor geometry and have poor safety records with one fatality in last 15 years and there is no plan in the infrastructure report to widen bridge or replace tunnel (Network Rail). This will lock traffic from new development within site to the north of Flexford. C and D class roads are not designed for volumes indicated in Scenario 5.

1.8 The flood risk will be significantly increased when land is developed. The site lies on the Hogs Back spring line and the land is natural SuDS. There is a stream running through the site with flood risk 3a. Civil engineering mitigation is unlikely to be effective.

1.9 The site will introduce 300+ dogs and 250+ cats within 1km of TBHSPA and SANG will not stop increased disturbance and predation on the SPA.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1.1 **We object** to Policy D1 Making better places

1.2 **We object** to the absence of any reference to vernacular or historic design guidelines, even in Conservation Areas. Most of the borough, especially the rural areas, has vernacular design guidelines that are available to give suggestions as to appropriate design. These should have mandatory planning force.

1.3 The monitoring of this policy is inappropriate. Why should this policy result in a reduction of the number of appeals for poor design? Should it not result in better-designed buildings?

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy D2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1.1 **We object** to Policy D2 Sustainable design, construction and energy

1.2 Sustainability should be an overarching ambition, conditioning the whole local plan and running through it, as claimed in the NPPF, “like a golden thread”. It should be set out clearly in Policy S1, not buried away as a minor detail in Policy D2.

1.3 This policy amounts to “greenwashing”, expounding aspirational environmental targets while ignoring the plan to build dormitory towns across the Green Belt that are environmentally and socially unsustainable. These settlements will bring vastly increased car use and will lead to unacceptable traffic congestion, overstretched social infrastructure, and more greenhouse gas emissions, noise and light pollution. This policy should not be just about saving energy but about preserving the borough’s stock of natural capital, especially the countryside, from futile attempts to rig the housing market.

1.4 This policy’s emphasis on Combined Cooling Heating and Power and communal heating networks is meaningless, since no such networks are available locally.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

**Comment ID:** PSLPP16/16981  **Respondent:** 8893057 / Dianne Garnett  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy D3
We object to policy D3 Historic Environment

This policy clashes with the strongly pro-development agenda of the rest of the plan and fails to address the contradiction. History is unamenable to improvement, so the policy should commit the Council firmly to protecting and preserving our heritage assets from development. Instead, the specific policy pledge to “support development” that might “enhance” heritage assets leaves wide scope for abuse in the form of destructive commercialisation and financial leveraging of relevant sites.

This policy is based on the false premise that Guildford’s heritage is inherently in decay. This is a developer’s charter – a short step away from the idea that the historic environment needs to pay its way to be preserved. The Council’s aggressive reviews of Guildford Museum and the Electric Theatre support this interpretation. Whatever the “reasoned justification”, the actual policy wording in the blue box leaves too many loopholes.

Development close to historical assets is harmful and should be expressly prohibited. This policy fails to meet the requirements of NPPF paragraphs 126 and 131-133.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy D4: Development in urban areas and inset villages.

I Object to this policy as I feel that Social housing rather than 'affordable housing', which many on very low wages cannot afford, WITHIN regenerated 'brownfield sites' in urban areas instead of concentrating on greenfield sites should be used. Jobs would be closer at hand, and added pressure on the rural roads.would be obviated. The plan envisages shops and retail buildings on the brownfield sites. Use of department stores and retail space is in decline with big names closing.. why add to white elephants when the space is needed for housing people close to work and transport hubs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 We object to policy D4 Development in urban areas and inset villages

1.2 This policy that does not address the opportunity for building in the urban area

1.3 The plan envisages that 40% of homes built will be “affordable”, but this does not provide any accommodation for low-paid workers, for example, those on the minimum wage, who cannot afford to buy so-called “affordable” homes or pay an “affordable” rent. There is a need for some expansion in social housing, especially in urban areas, where there is a greater concentration of low-paid workers such as those employed in the retail, warehousing and distribution sectors (all of which this plan aspires to expand).

1.4 The number of homes planned in the urban area is much too low. There is a glaring need for regeneration in many urban areas, particularly Guildford Town Centre but this is ignored in favour of building homes on green-field sites instead.

1.5 This will not address urban housing needs. It is also unsustainable, since building outside the town does disproportionate harm to road traffic, air quality and overstretched infrastructure.

1.6 The plan envisages a large expansion of the retail sector, but this is a sad voice from the past because the sector is in rapid and continuous decline.

1.7 All the stated policy aims for “inset” villages will be negated by the excessive weight of new housing development proposed which would radically change their character forever.

2 THE BROWNFIELD OPPORTUNITY

2.1 Yes, we need a new Local Plan for our borough in order to provide a development strategy within which we can accommodate our local housing, economic and environmental needs. But first we must make 100% use of our urban brownfield before we consider building in the Green Belt or countryside.

2.2 Paragraph 80 of the NPPF clearly states that Green Belt serves a key purpose, “to assist in urban regeneration, by encouraging the recycling of derelict land and other urban land”. In order to comply with central planning policy we need a brownfield strategy that states clearly. “We are committed to a brownfield first initiative whereby all applications on previously developed land are given fast track priority and every facility to promote development for residential purposes and employment purposes in order to satisfy the needs of local people. In parallel a zero CIL incentive should be given for all residential development on brownfield land.

2.3 In response to the detailed objections received in the Regulation 18 process of the 2014 Local Plan and also in accordance with government policy a Guildford brownfield land register should be urgently compiled showing address, ownership, occupier, current use and detailed planning brief.

2.4 A head of brownfield should be appointed at GBC with a clear briefing to deliver brownfield targets of housing and employment space.

2.5 GBC needs to accelerate the residential redevelopment at Woodbridge Meadows, Walnut Tree Close and the Station within the next 5 years.

2.6 GBC needs to examine the residential development opportunity of the 25.7 acres of car parks in GBC ownership.
2.7 We do not consider that the target of 1,172 homes in the town centre takes account of the need and demand for housing or the opportunities that brownfield sites present for increasing the residential development in the core of the town which will in itself help to sustain the retail core by increased economic impact.

2.8 The Town Centre policy needs to maximise the potential for residential development on brownfield and include as an absolute minimum the 2,551 units proposed in by Allies and Morrison for the town centre included in the masterplan 2015 which has recently been adopted by GBC. The reality is that the Town Centre has the capacity for at least 5,000 homes.

2.9 The additional target capacity of 5,000 could easily be provided within the following urban sites which have the capacity for 7,500 homes:
   - 2,500 homes detailed in Masterplan 2015 including Woodbridge Meadows which can itself be increased substantially
   - 500 homes at North Street
   - 1000 homes on current GBC car parks (25 acres) and at the station
   - 1000 homes saved in the urban area if 100% of students are accommodated on Surrey University campus (17 ha of car parks)
   - 1000 homes at Slyfield on the 40 ha regeneration site
   - 1000 windfall infill (50 per annum)
   - 500 homes on brownfield sites in villages on sites of max 1ha which do not impact Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16970  Respondent: 8893057 / Dianne Garnett  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 We object to policy E1 sustainable employment

1.2 We note that there is a significant reduction of between 71% and 79% in the previous job target and resultant 79% reduction in employment space in response to the many objections lodged in 2014 against an unsubstantiated agenda for economic expansion in the last draft and based on new findings by Aecom in the latest ELNA 2015.

1.3 We have concern as to the ill-informed clustering of all B classes in terms of the clarity of market evidence required to inform effective planning and a failure to provide a clear understanding of business needs required under Section 160 of the NPPF.

1.4 We also note the dramatic reduction in assessed demand by two Employment Land Needs Assessment Reports carried out under the same terms of reference within a period of 2 years which calls into question the general reliability of the process of collection and interpretation of data in the overall forward planning process by GBC. I do not support the policy of creating a Strategic Employment site at Garlick’s Arch (A43) in the Green Belt which is completely unnecessary due to the overall decrease in demand for industrial space which could be easily accommodated at Slyfield.
1.5 We are concerned however that the research undertaken by Aecom is generally superficial and lacks sufficient detail and analysis between B1a, B1b, B1c, B2 and B8 use classes and that no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of office, research and development, light industrial, general industrial and warehousing and distribution floor space.

1.6 No proper analysis has been made of data held by GBC in respect of different B classes in terms of planning applications granted or evidence gathered by the economic development function at GBC and no robust assessment of local market demand apart from fairly brief references to freely available market research undertaken by commercial estate agents such as Lambert Smith Hampton covering a much wider area.

1.7 GBC appear to fail to appreciate the fundamental rationale of the Use Classes Order as a planning tool in terms of useful property market research or forward planning.

1.8 What we are left with is a fairly clumsy and poorly informed plan which clusters B classes without any appreciation of widely different employment impact and economic sustainability. E.g. B1 generates at least 5 times as much employment as B8.

1.9 The lack of appreciation by GBC as to the opportunity for widely different uses being generated within B class clusters defeats the whole point of proper planning of employment uses and can significantly endanger previously good planning put forward in the previous 2003 plan. E.g. the creation of a research and development park linked to the University but now has the threat of being downgraded into a general business park (see below).

1.10 Little regard has been given in the plan to the economic reality of falling demand for B2 industrial space which is clustered with other B classes almost randomly throughout the plan.

1.11 Little regard is had to the opportunity of B1b space as an opportunity for research and development which needs to be nurtured and preserved without the detrimental and confused clustering with other B classes both in terms of planning and promotion of a research hub.

1.12 We note that the past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 derived from VoA analysis and that the calculated annual floor space demand is 0.7% over the plan period up to 2033.

1.13 We support the concept of seeking increased investment in our local knowledge-based, high technology economy. This will provide well paid, creative jobs and generate the funding necessary to pay for the infrastructure and environment this sort of industry requires.

1.14 We need to distinguish between wanting to increase the added value of the economy and physical expansion, especially given the scarcity of land in Guildford. Guildford is not the place for large space hungry businesses. So it should target high added value small and medium sized enterprises rather than the headquarters of larger corporations.

1.15 We need to promote the idea of new knowledge transfer in incubator units and small premises for new start up enterprises. They need to be on the wave of innovative new technology as opposed to older established businesses.

1.16 **We object** to the policy of creating a Strategic Employment at Garlicks Arch (A43) in the Green Belt. The stated requirement of 7,000 sq m (B1c, B2 and B8) could easily be accommodated at the Slyfield Regeneration site of 40 ha.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** PSLPP16/16971  **Respondent:** 8893057 / Dianne Garnett **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 **We object** to policy E2 location for new employment floor space

1.2 We are of the opinion that all new office and research and development (use Class B1a and B1b) floor space should be within Guildford town centre.

1.3 **We object** to the policy of expanding the Research Park onto Blackwell Farm and I do not believe there are exceptional circumstances to justify incursion into this permanent and high quality area of Green Belt

1.4 The Surrey Research Park currently extends to 65,000 sq m. There is already granted consent to expand to a further 9,000 sq m (14%)

1.5 The past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 based on ELNA 2015 derived from VoA analysis.

1.6 The ELNA 2015 calculated annual floor space demand is 0.7%.

1.7 The data point for our analysis is today in 2016 so we have 17 years to go to the end of the plan period. The necessary growth in floor space over the plan period is therefore 17 years x 0.7% = **11.9%**.

1.8 There is currently **14% expansion space** already available.

1.9 The proposal by GBC to expand the 65,000 sq m by 9,000 sq m (existing allocation) with an additional 35,000 sq m amounts to an increase of 67% of the Research Park which is not required.

1.10 The Research Park is currently developed at a density of 25% plot ratio. The majority of existing buildings are 2 stories giving a developed floor space plot ratio of 12.5%.

1.11 The existing Research Park has the opportunity to markedly increase its density without infringing any Green Belt land nearby. Any density increase would be cost effective for the use of all existing infrastructure and would also have the potential to match the existing densities of existing academic buildings on the university campus which are three to four times higher.

1.12 Together with the existing expansion of 14% through existing consents and the opportunity to increase its density the Research Park has ample capacity to expand to embrace new demand for B1b uses linked to the university.

1.13 We do not accept that the valuable and workable concept of the Research Park should have its integrity and purpose diluted by being converted into yet another Business Park for office users rather than research organisations

1.14 A preferred location for increased B1a and B1b space should be in the Town Centre close to housing and a convenient transport hub

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPP16/16972  **Respondent:** 8893057 / Dianne Garnett  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E3
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 **We object** to Policy E3 maintaining employment capacity

1.2 **We object** to the ill-informed policy of resisting change of use from B1a to residential because it flies in the face of positive property market solutions for the regeneration of brownfield land. It is also contrary to current government policy which has recently been reaffirmed and permits a change of use from B1a (offices) to C3 (residential).

1.3 We believe that the existing government policy which has recently been made permanent of allowing change of use from B1a to C3 is sound

1.4 Many office buildings reaching an age of more than 30/50 years become redundant in terms of energy compliance making them illegal to occupy for employment purposes and the cost of refurbishment makes them redundant and uneconomic

1.5 The reality of market demand is that the gross development value of refurbished residential space is in excess of the gross development value of refurbished old office space in many locations (this gross development value assessment is supported by the analysis by property consultants GVA in the supporting evidence within the Allies and Morrison Masterplan for Guildford dated 2015)

1.6 To resist change from B1a to C3 is contrary to the concept of brownfield first for residential development schemes.

1.7 To resist change from B1a to C3 in Strategic or Significant Employment Sites is contrary to the concept of integrated mixed use communities whereby the journey to work is minimised.

1.8 London has led the way with significant residential schemes being created from redundant office stock. A good example is the South Bank in London adjacent to Waterloo Station where in 2005 the Shell Centre has been converted into flats. Another early example is the 2000 scheme at Metro Central Heights at Elephant and Castle where the old Alexander Fleming House was converted to 435 flats by St George. GBC needs to adopt more modern trends and policies.

1.9 Guildford is in dire need of increasing town centre residential development.

1.10 The feared loss of employment will be marginal and impractical to resist. Empty office blocks are not the answer.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

**Comment ID:** PSLPP16/16973 **Respondent:** 8893057 / Dianne Garnett **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1.1 **We object** to policy E4 Surrey research Park.

1.2 We support the maintenance of research, development and design activities, in any science, including social science, that is complementary to the activities of the University of Surrey at the Surrey Research Park. **I object** however to the completely unnecessary expansion of the Research Park into a larger Business Park. I believe that the planning policy going forward for the Surrey Research Park should be to maintain and enhance the integrity of its research base allowing for the economic value add to the local economy of knowledge and technology transfer from the University.

1.3 We believe that B1b (should be the primary use class for the Research Park and that applications for B1a should be resisted due to the danger of dilution of the core purpose and reputation of the park. **I object** to the inclusion of B1c uses which is inappropriate and unnecessary.

1.4 Research parks based on the early UK technology transfer exemplars of the Cambridge and Oxford need careful monitoring, nurturing and protection to ensure the integrity and quality of the park is maintained and the park continues to be a destination for innovation and enterprise

1.5 There is a danger for research parks to be overwhelmed by short sighted development opportunities being taken by park managers provided by standard office activities and administrative functions which in time turn them into standard business parks which can be found anywhere in the country. Their relative low density and attractiveness make them targets for “any other” office user

1.6 Research parks that lose their way stop being the location of choice for new innovative enterprises.

1.7 The Surrey Research Park in Guildford needs to be focussed on a broad spectrum of scientific research including computer science, bio-chemistry, design, space-science, eco-science, health science, software development, laser technology, media-science, artificial intelligence, robotics and super-manufacturing

1.8 Monitoring indicators should include new start-ups and new patents created

1.9 Facilities should be provided whereby new small businesses can secure premises under subsidised licence fee arrangements with no onerous rent or lease commitments

1.10 We support the idea of a variety of sizes of unit including some small units (between 15 – 80 sq m) bearing in mind one workstation is 10 sq m

1.11 Consideration should be given to the concept of shared “enterprise hubs” where individuals can take pay as you go workstations in shared spaces similar to touch down business centres similar to the “enterprise village” concept

1.12 **We object** to the policy of any new extension of the research park more than the existing 14% already provided for within the park or within the footprint of the park

1.13 The Surrey Research Park currently extends to 65,000 sq m

1.14 There is already granted consent to expand to a further 9,000 sq m (14%) This space has been available for 10 years and is still to find a taker

1.15 The past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 based on ELNA 2015 derived from VoA analysis

1.16 The ELNA 2015 calculated annual floor space demand is 0.7%

1.17 The data point for our analysis is today in 2016 so we have 17 years to go to the end of the plan period.

1.18 The necessary growth in floor space over the plan period is therefore 17 years x 0.7 = 12% which is less than the current expansion space of 14%.
1.19 The research park is developed at a plot ratio of 25%. This could be increased to 50% within the same footprint of the existing park without damage to its amenity. The actual current land use for development in the park is in fact only 12.5% because most buildings are 2-storey.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Comment ID:** PSLPP16/16974 **Respondent:** 8893057 / Dianne Garnett **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 **We object** to policy E5 Rural Economy

1.2 In our opinion this policy should only apply to small-scale development in rural areas which means development of less than 100 sq m (gross) which is in keeping with and the permanence and amenity of the green belt.

1.3 Use of rural areas for town centre uses without applying the sequential approach is against the principles of localism that require local people to be consulted and heeded, not ignored. Villages need protecting in terms of both design and scale. 1.4 Most of the economic activities listed in 4.4.44 depend on maintaining the rural character of our villages which would be endangered by the wholesale “insetting”, boundary expansion and house building proposed in other parts of the plan. This applies also to new and projected enterprises in the Green Belt (e.g. Grange Park Opera’s Theatre in the Woods in West Horsley, which requires a protected, rustic setting to be a success, not housing estates and congested roads). Policy E5 is incompatible with the high housing numbers proposed.

1.5 Previous commitments to improved high-speed broadband and mobile phone coverage have now been diluted, despite general support. This disregards the responses from the 2014 public consultation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Comment ID:** PSLPP16/16975 **Respondent:** 8893057 / Dianne Garnett **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1.1 We object to policy E6 the leisure and visitor experience.

1.2 We believe that the importance of a visitor attraction hub could be much better articulated. Guildford has great potential to become a “must see” destination for tourists and visitors. Surrounded by the natural beauty of the Surrey Hills, it is already distinguished as an historic county town. The historic part of the town should be exploited to the full creating a real sense of vibrancy and atmosphere. This should be linked to the attractions of the Museum, the Castle, the Wey and the historic High Street including its views of the Hogs Back. Guildford would be wise to model itself on other historic towns like Bath, Chester and York.

1.3 The economic impact would create big advantages for both the leisure and the niche speciality retail sectors in the town. Given the local and wider catchment of the town Guildford should strive for high quality definition making it a great centre for people to live in and visit. It would be a great mistake if Guildford were to opt for large impersonal department stores and dull high street chain stores at the expense of exploiting its uniqueness and character which would afford greater benefits.

1.4 Guildford the historic “Gateway to the Surrey Hills” has far more potential than Guildford just any other stereotypical centre found anywhere around London. What GBC needs to do is create a theme such as a new “Pilgrims Trail” similar to the Patriots trail in Boston USA with marked yellow footsteps leading from the station to the River and up through the historic heart of the town.

1.5 There is a need to make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

1.6 There is a need to help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to RHS Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently bypass Guildford to go to Bath, Oxford or Cambridge instead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
sq m of retail space at North Street because of lack of demand for retail units in the Town Centre particularly large units. This is due to falling demand for retail space in Guildford and town centres throughout the country evidenced by independent research and the reality of empty shops in many high streets (including Guildford) and the accelerating competition from internet shopping.

1.4 The failure of the North Street scheme to be redeveloped over the last ten years is a testament to lack of demand which has been so poor that the original planning permission for a large retail scheme became time expired.

1.5 The reality is that the town centre has enough retail floor space. If more is introduced it will result in the closure of existing shops particularly in locations which are less than 50% of peak Zone A or 100% positions. What Guildford needs is a new focus on speciality high quality comparison shopping supported by a revival of Guildford’s attractive heritage core and a new major visitor attraction supported by restaurants. Guildford needs to become the quality shopping destination for Surrey.

1.6 The existing site in North Street should be replaced with a well-designed ground floor high quality speciality retail mall and frontage of no more than 40 shops extending to 7,000 sq m with the rear and upper floors providing an additional 500 to 600 homes. The proportion of the above proposed smaller scheme at North Street will be complementary to and not antagonistic to the Upper High Street, Tunsgate, the Debenhams site and the 100% Zone A positions of the Lower High Street. If the existing policy under E7 is adopted the North Street site will remain empty for another 10 year

1.7 The findings of the Guildford Retail and Leisure Study 25 September 2015 are very pessimistic about retail trends. Carter Jonas’s recent retail study reports a fairly bad time for retail, the bullets below are direct quotes from the report:1. Para 3.3 Retail Trends “Town centres, once the principle focus for retail and leisure are now increasingly under threat”2. Para 3.4 Retail Expenditure “disposable income and retailers’ margins are being squeezed further”3. Para 3.5 “there has been limited growth in retail (convenience and comparison goods) expenditure per head since 2008”4. Para 3.6 “the retail sector remains fragile and analysts forecast that some operators and centres will continue to struggle over the short to medium term”5. Para 3.8 “completed new shopping centre floor space in the UK is currently at its lowest level since the 1990s”6. Para 3.11 Internet Shopping “New forms of retailing have also emerged in recent years and are becoming established as significant alternatives to more traditional ‘bricks and mortar’ shopping facilities. Over the last 5 years, online sales have increased by 222%”

1.8 Despite the findings about retail we are told “evidence suggests that high quality schemes will continue to prosper.” What evidence?

1.9 Para 3.33 “the latest 2013-14 Javelin VenueScore17 ranks Guildford Town Centre within the UK’s top 50 shopping locations at 33. By contrast, Kingston-Upon-Thames is ranked 17th. Since 2007, Guildford Town Centre has fallen 20 places in the Venue Score ranking”

1.10 Para 3.40 “The growth of online shopping is also impacting on the vitality and viability of many of Britain’s centres and high streets. This is placing pressures on rental growth and market demand in many centres, particularly secondary centres outside the ‘top 100’ shopping locations. This has been further compounded by rising vacancy levels and the loss of key retailers. As a result, the share of non-food retail sales conducted through town centre shops has declined, from 64% in 2002 to just over 40% by 2013. In our opinion, a far more uncertain future awaits the next “wave” of new retail investment and development. The evidence suggests that high quality schemes in the strongest prime shopping locations will continue to prosper.” Is this not an aspirational assumption?

1.11 Para 3.41 “Notwithstanding the threat of online shopping, industry experts still predict that the demand from major retailers for new space will continue as it remains the primary mechanism for retailers to ‘reach’ their customers and grow their businesses.” Who are these industry experts? Is this not an outdated concept and merely an aspiration of the British Council of Shopping Centres (BCSC)?

1.12 Appendix 6 of the Retail Study indicates potentially inaccurate demand data

1.13 Para 5.29 “The latest CoStar Report recorded 64 requirements for Guildford from January 2013 to August 2014; representing a total maximum floor space requirement of 62,208m2 gross (see Appendix 6).”
1.14 The Appendix 6 list of retailer demand looks impressive with brands such as Joules Clothing; Fossil; Comptoir des Cotonniers; Moshulu; Rituals; Princesse tam.tam; Cycle Surgery; Majestic Wine; Game Stores Group Ltd; Iceland. However, if we look closely at Appendix 6 it is an amalgam of old unchecked national high street requirements some of which do not even include Guildford as a destination and the majority are hardly high quality comparison retail. There are also no “big” requirements in terms of space. Where are the big stores?

1.15 GH Pressley & Sons – Watches and Silver- Requirement “They are seeking a flagship diamond store in central London. Target locations include Mayfair, St James, Kensington and Knightsbridge. Brands will include Hans D Krieger and Marco Bicego.” This does not sound like Guildford.

1.16 Oxygen Red Ltd – Ladieswear- Requirement “Oxygen Red is looking to acquire temporary stores in Shopping Centre locations within the M25” Guildford is well outside the M25.

1.17 The data relating to retail demand does not appear reliable. The 62,800 sq m does not translate to real demand for an expansion of 500,000 sq ft. If proper due diligence was applied perhaps 30% of this alleged Carter Jonas requirement would survive proper scrutiny.

2 THE TOWN CENTRE OPPORTUNITY

2.1 We do not consider that the target of 1,172 homes in the town centre takes account of the need and demand for housing or the opportunities that brownfield sites present for increasing the residential development in the core of the town which will in itself help to sustain the retail core by increased economic impact. What the town centre needs in terms of urban regeneration is much more residential development. As can be seen from the previous section retail will not work!

2.2 The Town Centre policy needs to maximise the potential for residential development on brownfield and include as an absolute minimum the 2,551 units proposed in by Allies and Morrison for the town centre included in the masterplan 2015 which has recently been adopted by GBC. The reality is that the Town Centre and other areas of brownfield in the borough has the capacity for at least 5,000/7,500 homes.

2.3 The additional target capacity of 5,000 could easily be provided within the following urban sites which have the capacity for 7,500 homes:

- 2,500 homes detailed in Masterplan 2015 including Woodbridge Meadows which can itself be increased substantially
- 500 homes at North Street
- 1000 homes on current GBC car parks (25 acres) and at the station
- 1000 homes saved in the urban area if 100% of students are accommodated on Surrey University campus (17 ha of car parks)
- 1000 homes at Slyfield on the 40 ha regeneration site
- 1000 windfall infill (50 per annum)
- 500 homes on brownfield sites in villages on sites of max 1ha which do not impact Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Answer (if comment is on questions 1-7 of the questionnaire):** ( )
1.1  We object to policy E8 District centres

1.2  We object to the proposal that sites “on the edge” of District Centres should be considered for retail developments. This is another Trojan horse policy, allowing retail hubs to be vastly expanded in order to smooth the way for vast new housing estates outside in the countryside (e.g. to meet the “everyday shopping and service needs” of the roughly 1,500 people living in the 600 new homes planned for the Horsleys). 1.3  This is a case of back-to-front priorities. Expanded local retail hubs are being proposed in order to justify more housebuilding in the villages, and in a forlorn attempt to mitigate the serious traffic and infrastructure problems this will bring. The Council have no business preparing the way for new supermarkets in the Green Belt. Rural retail capacity should be left to local demand.

1.4  The policy proposes not a single measure to support existing rural shops and services that are the lifeblood of village communities, e.g. using business rates and other levers at the Council’s disposal.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1  We object to Policy E9 Local centres

1.2  We object (for the reasons given under Policy E8 above) to the proposal for retail development adjacent to the 6 rural centres, and sites on the edge of designated centres. This is creeping urbanisation, damaging to the Green Belt and to Guildford town revival as a thriving urban hub. It will contribute to local urban decay and depopulation, just as expansion of the suburbs did to mid-20th century London.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1.1 **We object** to policy H1 Homes for all.

1.2 Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set any rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

1.3 The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated. 1.4 We support higher density development in the urban area close to transport hubs to facilitate modal shift e.g. 20 minutes’ walk of Guildford railway station. Much of Guildford town could usefully be regenerated with 5-6 storey blocks (there are currently blocks of this size already in the town) at 50 homes per ha with landscaping and underground parking, as often seen on the Continent and, recently, in London.

1.5 Student accommodation should provide for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and underused surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back. Surrey University has 17 ha of car parks that could provide all the student accommodation required on stilts with parking beneath.

1.6 Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Overprovision is inappropriate given other constraints.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 **We object** to policy H2 Affordable homes.

1.2 “Affordable” homes, under national definitions, means homes that are sold or rented at 80% of market value. Even if 70% of these are rented as proposed, the level of market prices in the South-East means that these homes will remain well beyond most people’s means and that starter homes will not become available for local people. 1.3 In addition, the viability clause (4.2.40) means that in practice the policy could be unenforceable. Private financial viability has no place in a public policy and should be removed. It is a get-out-of-jail-free card for developers that will sacrifice countryside for no local benefit.

1.4 We question the assumptions that seem to underlie this policy: that people have a right (rather than a legitimate aspiration) to own a home; that they should be encouraged to live locally (contradicting the Government’s policy of encouraging labour mobility and development in poorer regions, where homes are cheaper anyway); that increasing local house-building will reduce overcrowding and congestion (rather than simply suck more people into the borough); and that it will stem the rise in house prices (even though 13,860 new homes will be a drop in the ocean, given that prices are determined by an infinite demand-pull from London, whose population is increasing by 100,000 a year, and by the
currently low cost of capital for overseas and other buyers). The weak mechanisms proposed in the plan might influence the market in a more remote part of the UK, but not here.

1.5 This policy’s version of “affordability” is just a smokescreen for pushing through more development generally. Building more homes in Guildford cannot increase real affordability given the overhang of the London market.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H3 Rural exception Homes

I object to this as it potentially allows for development in the Greenbelt. It should be made CLEAR that this would only be allowed in exceptional circumstances especially in relation to NPPF 87, 88, and 89. It appears that the Guildford Borough Council is using existing projected needs for housing instead of local needs in their numbers. There has been a developer led proposal that rural exceptions should be used to gain permission to build outside settlement boundaries, in complete contravention of NPPF. This scheme should be strictly controlled and should not be used for market housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 We object to policy H3 Rural Exception Homes

1.2 This is a type of Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix”, this can include “market” housing – i.e. normal commercial development which in Guildford usually means expensive executive homes. This policy means building anywhere, and ignoring all historic planning restrictions.
1.3 The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1.1 **We object** to policy I1 Infrastructure and delivery

1.2 Most of the borough’s infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. Yet this plan’s commitment to building housing estates across the Guildford countryside will mean either major infrastructure investment that no-one is prepared to pay for or else a catastrophic and simultaneous collapse in transport, educational, medical, energy, water and communications services.

1.3 The plan targets greenfield sites – requiring heavy infrastructure investment – in order to generate CIL income necessary to meet an infrastructure shortfall that is already serious. This is not sensible. The current draft CIL scale also encourages development on greenfield sites rather than brownfield.

1.4 The policy wording says nothing about roads and traffic. The Council’s methodology for assessing infrastructure needs in this area is inadequate, identifying only the tip of an iceberg of existing congestion. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that involve demolishing property and road-widening in residential areas to solve the resultant congestion. The A3 improvements are not guaranteed to take place but they are being used to justify removing large areas from the Green Belt before detailed traffic assessments have taken place. These detailed investigations are being deferred until the planning application stage and will be left to developers to prepare. If a site then proves to be unsustainable its Green Belt protection will have been lost for no reason and unsuitable development will take place by a more insidious process.

1.5 Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritising greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly.

1.6 This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognising this as a key issue, the plan is based on a wing and a prayer.

1.7 The highways network is under stress at peak times in many parts of the borough. Queuing is the daily experience of drivers going to and from work. The local plan recognises the problems in para 2.14. Much of the road network is single-carriageway, and junctions act as constraints.
The key evidence on future traffic conditions is provided in the Strategic Highway Assessment Report (SHAR) which summarises the results of the tests carried out by Surrey County Council at the request of GBC. Five scenarios were examined using SCC’s strategic traffic model.

Scenario 1 contains all developments and planning permissions from 2009 to date. As such it corresponds to today’s circumstances, and describes the current unsatisfactory traffic conditions in peak periods.

Scenario 5 represents the position at the end of the plan period, including all development and highways schemes in the local plan.

The results of the analysis show that there will be widespread congestion in the morning peak hour across the network. The key strategic routes, the A3 through Guildford NE bound, and the M25 between Junctions 10 and 11, are shown to be at or over capacity. The summary network statistics presented in the SHAR, while useful, require some interpretation because the analysis of vehicle-hours is derived from link speeds only, and does not reflect junction delays and queues. The tables that show the ratio of flow to capacity and level of service are especially helpful to gaining an understanding of the conditions on the network in the forecast. Where the forecast traffic volume is above or close to capacity, flow becomes unstable and there is congestion. The SHA results provide evidence that, in 2031, congestion will be worse than it is today on much of the network.

It is the case that the traffic modelling does not take into account the potential for increased use of other modes, but the trip rates used for developments already have built in the typical level of use of other modes, and services will be required to meet that need. It is also the case that the model does not allow for park and ride, which would improve matters in the town centre, as discussed below.

In order to gain an insight into conditions across the network, it is necessary to combine information from several tables in the SHAR. Table 4.5 shows that the M25 and A3 will be at capacity in Scenario 5. The other roads that will have poor levels of service include those in Table 4.5 but also those in 4.12 (except the A3) and those in Tables 4.3 and 4.4 with levels of service E and F that will not be given some relief by improvement of the A3 in Scenario 5. Paras 4.10.3, 4 and 5 point out that there will be increased congestion. Given that the starting point is unsatisfactory, there can be no expectation that the schemes in the Infrastructure Development Plan will provide an overall improvement. There will be some local benefits, such as the Ash rail bridge for example, but in general conditions will be as bad and in many places worse. So the statement in the SHAR para 4.2.5 that ‘the combined mitigation as reflected in Scenario 5 indicates that at the strategic level it accommodates the additional PSLP demand’ needs qualifying – ‘at the cost of a lot of queuing’.

The cumulative effect of the additional traffic generated by the developments in the local plan will be to increase congestion, even with the proposed highway schemes in place. More detailed analysis of the junctions and queuing is required. So we question the conclusion that the developments would have “an acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF”.

Appendix 3 of the Transport Topic Paper shows the phasing of housing development and transport infrastructure. The major scheme being considered for the A3 between the A31 and the A320 is scheduled for delivery in the period 2023/24 to 2027/28. The strategic developments at Blackwell Farm and Gosden Hill Farm are shown as being phased in from 2021/22 onwards. The Garlick’s Arch development is shown as starting in 2019/20. Therefore, there will be a period in which the existing A3 has to cope with the additional demand arising from those developments before extra capacity is provided.

The following comments regarding the strategic sites are taken from the SHAR: 1.16.1 Blackwell Farm – there will be congestion at the A31 junction, and the problems at the Tesco junction, and the Egerton road /Gill Avenue junction (para 4.9.5). Traffic is likely to access the Surrey research park and the RSCH through the development (para 4.7.3). 1.16.2 Gosden Hill Farm – there will be an increase in traffic through Burpham. There will be pressure on the A3100/B2234 roundabout (paras 4.7.6, 4.7.7 and 4.7.8). 1.16.3 Wisley – traffic will increase on minor roads to gain access to the A3 (N and S bound) and other routes (para 4.7.11). The development will add more traffic to the A3. The Burnt Common slips help alleviate the traffic through Ripley according to the model, but queuing on the A3 could mean this does not happen (para 4.7.14). 1.16.4 Normandy/Flexford – the report has little to say about the impact of this large development. The increase in flow on Westwood Lane is noted (para 4.5.7). Tables 4.10 and 4.11 show junction delay reducing at the Westwood Land, B3000 junction, but an increasing at the Puttenham Hill/Millbrook junction. 1.16.5 Ash
– development in Ash is not specifically addressed, but there are major increases in traffic on a number of roads. The new rail bridge will bring relief (but traffic will move to the next junction). 1.16.6 Slyfield – there are no remark relating to SARP, and as there are no additional trips shown in and out of the Slyfield residential zone in Tables 3.3 and 3.4, it is possible that this development has been omitted. There is a significant increase in trips to and from the Slyfield industrial zone, which will impact on the A320 and Clay Lane. 1.16.7 Town Centre – the report has very little to say about the town centre. It is evident that the model is forecasting severe congestion on the approaches to the town centre, such as the A281, the A31 Farnham Road, and Woodbridge Road for example. No mitigation measures are planned. And in the Transport Strategy, GBC states that the intention is to adopt Allies & Morrison’s Scenario 2 which would have the effect of significantly reducing the capacity of the town centre road system. The implications have not been examined, but traffic using the A281 from Waverley, for example, would be affected.

1.17 The local plan does not state an objective for congestion. The two strategic objectives that are included for infrastructure refer to supporting sustainable development and delivering a balanced system. However, in para 2.15 there is an aspiration expressed about opportunities ‘to improve the performance of the road networks through transport infrastructure and service improvements’, which taken with the previous paragraph includes reducing congestion. The evidence so far shows that this will not happen.

1.18 The mitigation proposed is not sufficient to overcome the problems that will be caused by the level of growth in the local plan. Congestion will worsen. The network will lack resilience and be vulnerable to disruption due to incidents. Minor roads will have to cope with a lot more traffic, for which they are unsuitable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy 12 Transport

I Object to this as the Network Highways England makes decisions on the A3 and M25, and Proposals for the A3 improvements would be delivered at the end of the plan period. If this plan is implemented a massive road building growth would be needed and result in even more gridlocked traffic around Guildford, road improvements will lead to further disruptions. Traffic constraints should be reflected in reduction of large housing numbers. Public funds should be available to cover costs of improvements in FULL, or housing developments should be limited to ten houses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16984  Respondent: 8893057 / Dianne Garnett  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2
1.1 We object to policy i2 Supporting the Department of Transport’s “Road Investment Strategy”

1.2 This policy is too vague and unrealistically optimistic. Decisions by Highways England on improving the strategic road network (the M25 and A3) are still years off. The Council have suggested a very expensive tunnel under Guildford, but this is no more than a dream. Even if Highways England accepted this (which is highly unlikely in the post-Brexit public spending climate) it would not be built until the end of the plan period at the earliest. Other, less expensive A3 improvements, and changes to the Junction 10/Heathrow stretch of the M25, will also take years to agree and complete. 1.3 The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is foolhardy. Surrey is the most congested county in England, with 683 people per square kilometre, compared with an English average of 413. This policy will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone). This is a major development constraint that should have been applied to the OAN before this consultation, and not left up in the air.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16985  Respondent: 8893057 / Dianne Garnett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

1.1 We object to policy i3 Sustainable transport for new developments

1.2 This is another vaguely aspirational policy, based on wishful thinking and not grounded in the practical realities of daily life. It consists of a standard, box-ticking list of local government measures unrelated to the specifics of the plan. Like infrastructure, transport appears to be an afterthought; the policy fails in its essential job of guiding planning decisions, since it assumes development of any kind can be supported by sustainable transport.

1.3 The sustainability of the dormitory settlements which the Council want built across the countryside depends on a general “modal shift” from private car use to walking, cycling and public transport. This is unrealistic. The proposed sites are often miles away from the nearest railway station. Bus services even in the largest villages are almost non-existent – just one bus to and from Guildford each day in the Horsleys and none at weekends. Since bus services depend on profitability, they cannot be expanded and the Council are not proposing to subsidise new ones. Rural buses are too slow anyway for busy people. Most rural roads in the borough are narrow, winding, hilly, potholed, muddy and unlit. Many flood badly and have no footpaths.

1.4 The desired modal shift would require a comprehensive co-ordination of bus and train timetables with services every few minutes, seven days a week, to stops within walking distance of every home in the borough. This kind of integrated public transport system has been achieved in Switzerland, for instance, but only at huge public cost and thanks to
a political consensus supporting state ownership of trains, buses and the post office, which delivers rural passengers as well as mail. There is absolutely no chance of this in the UK.

1.5 The vast majority of the borough’s residents are not, in practice, able to cycle. This includes children, the elderly, commuters who have to look smart, the infirm, the unfit and people carrying goods or shopping of any kind. Dependence on walking and cycling discriminates against these groups, which include some of the most vulnerable members of the community. It is socially unjust. One in two working people in Guildford commute for up to 3 hours a day, as I used to do. They will not leave their cars for even part of their journey if it means longer travel times.

1.6 Park-and-rides are a welcome part of the transport mix but are too slow for commuters and others on a tight schedule. Well-off pensioners seem to be the main beneficiaries. For an adult couple going shopping it is still cheaper to park in town. 1.7 Forget about water buses. The Wey is too narrow and, with a river speed limit of 4mph, boats are too slow for anything but recreation. Except on the tideway, not even the Thames has such services.

1.8 The addition of two new stations appears attractive but will slow down train journeys, which are already slower than at any time since the 1930s. Knock-on effects on localities where the new stations are built have not been worked out or presented.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 **We object** to policy I4 green and blue infrastructure.

1.2 This policy is a box-ticking exercise with no teeth to it. It sits oddly with the plan’s onslaught on the Green Belt. The plan to build on large areas of countryside and to inset villages will cancel out any benefits from extending the principle of enhancing biodiversity beyond Biodiversity Opportunity Areas.

1.3 There is no mention of the value of wildlife gardening to biodiversity or the important role that larger gardens play in a village setting.

1 **ABSENCE OF POLICY ON RIVER WYE**

1.1 **We object** to the omission of a policy for the River Wey which was included in the previous local plan. The existing policy G11 from 2003 Local Plan should be included so that development within the River Wey corridor will only be permitted provided that:

- It protects or improves the special character of the River Wey and the Guildford and Godalming Navigations, in particular their visual, setting, amenities, ecological value, architectural and historic interest;
- The special character of the landscape and townscape in the corridor is protected or improved;
- Views both within and from the corridor which contribute to this special character are protected or improved;
Where appropriate, public access is provided to and along the River and the Navigations.

The Nature Conservation value of the site is protected or improved

2 **GREEN BELT SITES**

2.1 We **object** to ALL Green Belt sites allocated for development in the local plan

2.2 We object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses.” This ignores the tens of thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. This amounts to a war of attrition by the Council in conjunction with developers, since many busy residents are sick and tired of repeating the same comments to deaf ears. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014.13

2.3 There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

2.4 All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

Policy P1  Surrey Hills and AON

I Object to this policy in that the wording of this does not agree with the national significance of the AONB. Using words like 'considered' and 'expected' suggests erosion of the rules are a possibility. The Draft plan 2014 was worded far more strongly and this area should be safeguarded.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 We object to policy P1 Surrey Hills Area of Outstanding National Beauty 1.2 This policy weakens existing protection when it should strengthen it. It is dependent on the Surrey Hills Management Plan. The latter welcomes housing development. Even major (undefined) development in the AONB would be permitted if exceptional (undefined) circumstances could be demonstrated.

1.3 Much of my concern stems from the loose wording of the Policy, which in some places renders the policy ineffective, for example:1.3.1 “All proposals will be considered against whether they…”1.3.2 “All development proposals within and adjacent to the AONB will be expected to conserve or enhance its special qualities”

1.4 Terms such as “considered” and “expected” are not strong enough in prohibiting development proposals that do not conserve and enhance the AONB, and it is likely that developers will be able to use this loose wording to their advantage. Of particular concern is the paragraph 3, which begins:1.4.1 “Whilst the AONB designation does not preclude specific types of development in the Surrey Hills and proposals will be assessed on their individual merits…”

1.5 This whole opening clause is unnecessary and almost invites development proposals. I believe that it should be deleted, and the sentence should therefore begin: “There is a presumption against major development in the AONB in accordance with NPPF.”

1.6 In addition to the weakness of the language, We are also concerned that the AONB criteria listed in the policy are not the most important ones in determining whether a planning application should be approved. Aside from the one outlined in the first bullet point (which relates to the AONB setting) none of these criteria is concerned with the key characteristics of AONB, ie landscape character, scenic beauty, important views, tranquility etc. Whether or not a development supports the rural economy or provides public access are of far less national importance than preserving the quality of the landscape itself.

1.7 We believe that the AONB Policy in the Draft Plan 2014 provided greater protection to the AONB, and would like to see the following sentences reinserted:1.7.1 “The national significance the AONB will be afforded the highest level of protection and only proposals which can be sensitively amalgamated into the area and which complement and enhance the character of the AONB will be considered”1.7.2 “Proposals within the AGLV which would have a negative impact upon views into and out of the AONB and which do not respect the setting, will not be acceptable”1.7.3 In accordance with the most up to date Minerals and Waste Plan, safeguarding of applicable land within the AONB and/or AGLV may be necessary and deemed appropriate

1.8 Finally, we would like to see a clause which gives protection to the candidate areas for AONB status in the forthcoming Surrey Hills AONB Boundary Review. I consider that all land that has been assessed as meeting the latest Natural England criteria for AONBs should be subject to the same level of protection as an AONB, not just land that has been designated AGLV.

Answer (if comment is on questions 1-7 of the questionnaire): ()

P2 Greenbelt

I Object to this policy as the wording is far weaker than previous versions. Villages have been inset and infilled making
them more vulnerable to large blocks of development. In Gomshall and Shere villages for example gardens and small
houses have been replaced by several two and three storey dwellings, one single storey bungalow on Queen street
Gomshall has been replaced by two three storey houses with no parking, in addition to 26 houses which replaced 11 single
storey bungalows nearby. The whole character has already changed and parking is becoming an increasing problem as is
the amount of traffic. This is Greenbelt and should be protected for future generations. Development should be monitored
and strictly limited.

Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 **We object** to Policy P2 green belt

1.2 This policy states, “the general extent of the Green Belt has been retained.” This is completely false.

1.3 The policy wording is weak in support of the Metropolitan Green Belt even though the latter forms 89% of the
borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the
present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future
generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it.
It is an inalienable public good. Once gone it is gone forever. It is not the Council’s to give away. 1.4 Policy P2
completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been
around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in
Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to
contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in
the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the
unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the
countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban
regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation
were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy
Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the
world.
1.5 Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

1. Agricultural production
2. Rural leisure and tourism amenities
3. Water catchment
4. Flood control
5. Biodiversity
6. Natural heritage
7. A carbon sink for air pollution
8. Room for public facilities such as parks and burial grounds
9. Profitable film locations (e.g. Shere)
10. Future economic potential such as mineral extraction (even fracking)
11. Natural beauty, landmarks, open space, rural views and sight lines
12. Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF)

1.6 As a matter of law and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations.

1.7 It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6% of the Crown jewels in order to build houses.

1.8 We object to the “insetting” of 14 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages. I am deeply disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are “leggy” in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat.

1.9 We believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors.

1.10 To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need (especially post-Brexit) and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 We object to policy P3 Countryside (i.e. beyond the Green Belt)

1.2 This is more protective – as a policy – than the proposals for the AONB and the Green Belt, so is anomalous and wrong. We are not in favour of building on this area, since urban, brownfield areas are sufficient to meet all reasonable housing targets. There is no need to build on any green fields if brownfield, previously developed land is used efficiently (without garden-grabbing).

1.3 This policy refers to the countryside near Ash and Tongham (see paragraph 4.3.28). This area does not justify stronger policy protection than any other part of the borough. The fact that the current and previous Council Leaders represent it should not give it preferential status: “we will seek to limit any development in the countryside unless it can be demonstrated that it is necessary in that location”. Green Belt and AONB areas should by definition have higher levels of protection than non-Green Belt areas. 1.4 It should also be noted that Ash and Tongham lie beyond Guildford far away from London and therefore make no contribution to controlling Metropolitan urban sprawl, unlike those villages which, ironically, are to be “inset”. That is presumably why Ash and Tongham are not in the Green Belt already. This policy, however, attaches higher priority to preventing the “coalescence between the Ash and Tongham urban area and Aldershot” than it does to the primary purpose of the Metropolitan Green Belt, which is to stop London sprawl.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1.1 **We object** to policy P4 Flood risk and water source protection zones

1.2 Urban development on existing hardstanding would not create additional flood risk, especially where there is scope for improved flood resistance measures to be included in the design. Sites such as Woodbridge Meadows Industrial Estate and the Arriva bus depot, on the River Wey bank, are potential high-value brownfield sites that would not be available for housing if this policy is implemented. It is not the footprint of existing buildings that should limit future development, but the extent of existing hardstanding. Tarmac and concrete do not act as functional floodplain, and some land with hard standing close to the river, within the town centre and within easy walking distance of the railway station, provides an excellent opportunity for real urban regeneration that could protect the surrounding countryside.

1.3 We strongly believe that this policy should not be used as a convenient excuse not to build on the extensive area of brownfield sites between the station and Ladymead. Any new development in this area could easily be built on stilts with flood resistant ground floor parking in areas that are identified as high flood risk. This area has been built over successfully over the last 50 years. We do not need to stop now.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1.1 **We object** to policy P5 Thames Basin Heath Special Protection Areas 1.2 This policy is weak. The mitigation (cash compensation) offered for development in the special protection area is so small as to be meaningless.

1.3 SANG (Suitable Alternative Natural Greenspace) is not beneficial since the sites identified or targeted are already green space. This is just using agricultural or wooded land as recreation land in order to justify building on other green spaces nearby. There is no actual increase in open space or environmental protection; instead, it is a ploy designed to permit building on otherwise protected areas. SANG – in part used to prevent dogs and cats attacking nesting birds – must also ensure that it is not using land which is adjacent to the Special Protection Areas.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy S1 Sustainable Development policy

I object to this as the policy does not take into account that in rural areas infrastructure and transport cannot cope with the scale of the development proposed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16960  Respondent: 8893057 / Dianne Garnett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 We object to policy S1 as stated and the presumption in favour of sustainable development.

1.2 The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” Policy S1 ought to set a clear framework. No definition of “sustainable development” is given.

1.3 The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

1.4 The promise “to secure development that secures the economic, social and environmental conditions in the area” omits to recognise that economic growth, social justice and environmental protection often conflict. It does not say how each element is to be weighted or conflicts resolved. As a practical guide to the tough choices Councillors will face, it is useless. Under this policy, any development will qualify as “sustainable”, thereby failing to apply the NPPF’s most important guideline.

1.5 The most gaping hole in Policy S1 is the Green Belt. As an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity, the Green Belt is a living example of sustainable development in practice. It is the envy of the world. Policy S1 should commit to uphold Green Belt boundaries and protections, setting at least one clear boundary to planning decisions. The plan’s contempt for Green Belt constraints is amply demonstrated in later policies.

1.6 The commitment to approve planning applications “wherever possible” and “without delay” reveals this draft plan’s pro-development bias. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

1.7 This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8471  Respondent: 8893057 / Dianne Garnett  Agent:
Policy S2 Borough Planning

I object to this as the number of 13,860 homes proposed has not been scrutinised despite apparently frequent request being made to account for this unsubstantiated number which will require major structural changes. If these only met housing needs it would not be necessary to encroach on the Green belt. This is also pre-Brexit data: These should also be looked at in the light of Brexit, possible (probable) slowdown of growth of the economy, people leaving Britain and less migration. The future is uncertain, traffic problems are already dire in and around Guildford,

This number also apparently refers to houses for 'West Surrey' including Guildford, Woking and Waverley. This is Commuter belt for London. Is Guildford being asked to build houses in open countryside to cater to London and feed Woking's requirements? There must be transparency for the underlying working of this figure. The Consultants used to have a website which proclaims a pro development agenda: have these figures been inflated for profit? What about the rickety infrastructure? Rural areas will become urban. A substantially lower figure is needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 We object to policy S2 the Borough Wide Strategy and the commitment to build 13,860 homes based on the Strategic Housing Market Assessment (SHMA) 2015 prepared by GL Hearn.

1.2 The OAN “objectively assessed need” figure in the SHMA of 693 homes a year is far too high

1.3 We are very surprised and concerned that GBC have adopted the OAN of 13,860 homes as the housing target without any application of constraints as required under the National Planning Policy Framework and the National Planning Policy Guidance. The scale of the housing number proposed, inevitably increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

1.4 Other local planning authorities appear to take a more balanced view in their approach to planning. The Woking Core Strategy 2012 applies a constraint of 50% from the 594 new homes identified in their own SHMA. “ It should be noted that local evidence (Strategic Housing Market Assessment - SHMA) highlights a need for an additional 499 new affordable homes every year in the Borough and a total of 594 new homes every year when taking into account demand. Given the level of environmental constraints present in the Borough, it is considered that the provision of an average of 292 dwellings per annum represents a reasonable level of housing growth for Woking and is deliverable.”
1.5 Historically GBC have correctly applied constraints on housing numbers to protect the Green Belt. The Surrey Structure Plan 1994 advocated a general slowing down in the rates of development “because of the environmental constraints which exist in the County, including Green Belt”. This slowing down was reflected in the requirement that Guildford Borough should accommodate a net increase of 3,800 dwellings between 1991 and 2006. This was a lower rate of development than in previous years. It is interesting to note that the Structure Plan at that time expected sufficient land to arise within the urban areas to accommodate this requirement.

1.6 However it would appear that today GBC have effectively ignored the real potential of the urban area to provide for housing. At the same time GBC have adopted a radically different approach to the policy of the Council over the last 20/30 years and are now ignoring government policy in relation to the Green Belt.

1.7 A detailed and comprehensive professional review of the SHMA dated June 2016 by NMSS an independent expert firm dealing with housing and demographics procured by Guildford Residents Association (GRA) has concluded that the OAN figure should be revised down from 693 homes per annum to 510 homes per annum.

1.8 The 41 page report by NMSS which can be found on the GRA website entitled “A Review of the West Surrey SHMA as it relates to the Objectively Assessed Housing Needs of Guildford”. It was a real community effort. It was paid for by over separate 20 Guildford Residents Associations and Local Parish Councils none of whom were convinced that the SHMA report procured and presented by GBC was accurate or transparent or accessible in a meaningful way. So they clubbed together and collected contributions from many hundreds of Guildford residents to try to find out the truth of the housing need figure presented in the Local Plan.

1.9 The NMSS report includes detailed analysis and financial modelling and was prepared by Neil McDonald who we were lucky to find. He is a niche consultant with the right skills and a national reputation. An independent adviser and commentator on housing demographics. He works with local authorities and others on the estimation of housing need and related issues. He was a civil servant and policy adviser to Ministers for over 30 years, the last 10 advising on housing and planning issues within the Department of Communities and Local Government. His 7 years as a Director at DCLG included a posting as Director, Planning Policy and a period as Chief Executive of the National Housing and Planning Advice Unit.

1.10 NMSS found that the SHMA used in the Local Plan incorrectly adds extra homes to its basic demographic projection to allow for improving affordability of housing, increased student numbers and economic growth. The report found that none of these additions were justified based on the evidence presented within the SHMA. The report concluded amongst other matters that:

- The affordability of housing in Guildford is no worse than in other Surrey districts and boosting supply beyond the demographic OAN would not result in a noticeable improvement in affordability but simply in more people moving to the area.

- There are reasons for believing that the SHMA’s estimate of the number of homes needed for students may be too high and that an adequate provision for students is already included in the demographic OAN. The report advises that the Council should commission a separate student housing need figure for Guildford given the distorting effect of students on our overall OAN. It envisages that, once this exercise is undertaken, improved accuracy means the overall OAN would be likely to reduce still further.

- The SHMA seeks to estimate the number of homes needed to support employment growth using employment rate assumptions that are inconsistent with the employment forecasts. This produces misleading results. An analysis of the Cambridge Econometrics and Oxford Economics forecasts using employment or economic activity rate assumptions consistent with the forecasts suggests that in neither case is there a need to provide more housing than suggested by the demographic analysis. Indeed, in both cases a smaller population growth (and hence fewer homes) could support the jobs growth that is forecast.

1.11 A further independent report was procured in 2016 by the Campaign for the Protection of Rural England CPRE from Richard Bate of Green Balance, an independent consultancy with expertise in demographic and housing matters to carry out a review of the GL Hearn SHMA.

1.12 The report by Green Balance runs to 37 pages and its findings are that the OAN for homes in Guildford should be reduced from 693 per annum to 481 because:
1. the vacancy rate figures should be taken from local government annual records rather than from the 2011 Census. This would reduce vacancy rates to 2.9% in Guildford.

2. there should be no increase for affordability above basic demographic change.

3. there should be no increase for Student housing and it was considered unrealistic that the University should be allowed to exert such substantial pressure on the domestic housing market.

4. the use of employment-led forecasts should be abandoned using purely household projections instead which are more reliable as a form of prediction.

1.13 Two completely independent expert reports are surprisingly consistent in their findings. In broad terms a figure of approximately 500 homes per annum would appear to be a correct estimate of OAN for Guildford. However, this is before constraints are applied to arrive at an acceptable housing target.

1.14 It is unacceptable that demographic and economic model assumptions have been withheld by GBC and cannot be checked making the process unaccountable.

1.15 The figure of 13,860 new homes is unsubstantiated. It has not been scrutinised by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by commercial sub-contractor used in preparing the SHMA.

1.16 Both the National Planning Policy Framework and National Planning Policy Guidance provide a clear policy direction that the overall housing target should be reduced by a variety of constraints to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors. I have corrected this omission below. Infrastructure policies should be planned at the same time as Local Plans but in this case they have effectively been left out and are not sufficiently developed.

1.17 The Framework also makes clear that, once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan.

1.18 Unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development on a site within the Green Belt.

2 THE NEED TO APPLY CONSTRAINTS

2.1 Ministerial guidance in relation to building on the Green Belt is clear:

1. “the single issue of unmet need - is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development in the Green Belt” - Nick Boles to Sir Paul Beresford MP 7th February 2014.

2. “we were always very clear that we would maintain key protections for the countryside, and, in particular, for the Green Belt. The Framework makes it clear that a Green Belt boundary may be altered only in exceptional circumstances and reiterates the importance and permanence of the Green Belt” – Nick Boles to Sir Michael Pitt, Planning Inspectorate 3rd March 2014.

3. “Planning Guidance, updated in March 2014, also states that unmet housing need is unlikely to outweigh the harm to the Green Belt to constitute the very special circumstances justifying inappropriate development within the Green Belt” – Nick Boles to Sir Paul Beresford MP 18th June 2014

2.2 70% of the sites put forward in the Local Plan are in the Green Belt which flies in the face of current government planning policy. The National Planning Policy Framework (NPPF), National Planning Policy Guidance and case law make it clear that Green Belt is an absolute constraint on housing supply. Exceptional circumstances need to be shown to adjust boundaries.
2.3 Other constraints under the NPPF include assessments of sustainability, strategic flood risk assessment, physical constraints on land use and infrastructure constraints (this can include road congestion, schools, drains, power supply and medical requirements).

2.4 Constraints should be applied to the Objectively Assessed Housing Need (OAN). However this itself is overstated and should be reduced from 693 per annum to 500.

2.5 In view of the comments above it would appear logical to apply CONTRAINTS in line with government policy to a corrected OAN. of approximately 50% to account for the fact that 89% of the borough is in the permanent Green Belt and development is not supported by adequate major infrastructure. This reduction is in line with the constraints percentage of 50% applied by Woking Borough Council.

2.6 This would result in a more acceptable and practically achievable HOUSING TARGET of 250 homes per annum which over a 20-year period would be 5,000 homes. All of these homes could be built in the existing urban brownfield areas of the borough and would in part satisfy the 20,000 objections made by residents to the 2014 draft plan and also relieve the additional problems of inadequate infrastructure.

2.7 It would also mean that there is currently 8.5 years supply of housing (2131/250) which is made up of existing permissions granted (1,518) and completions made (613) during 2013/2015. (Monitoring Report by GBC 2015)

2.8 Whilst we have many significant objections to the GBC Local Plan we applaud the policy statement by GBC in their Monitoring Report. “We will continue to monitor the use of previously developed land, and continue to identify as many opportunities as possible for redevelopment of previously developed land.” We believe it will be to the benefit of all residents if GBC can apply themselves vigorously to this endeavour in order to protect the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: SQLP16/1602  Respondent: 8893057 / Dianne Garnett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 We object to the paucity of the evidence base. The submission documents are unsound, unreliable and inconsistent.

1.2 Key parts of the evidence base are flawed or based on withheld assumptions.

1.3 The current SHMA inflates the proposed housing figure due to the following factors:
the failure to correct for errors in the historical data for international migration flows;
the way it considers students and affordability, and;
the flaws in the method for estimating the number of homes needed to support job growth;
the treatment of vacant property.
1.4 The Green Belt and Countryside Study does not value the fundamental aim of Metropolitan Green Belt properly or look strategically at options for development in major settlements beyond. The way Green Belt is parcelled up and scored is not valid: serving 2 Green Belt functions is as valid as serving 4 functions. Green Belt is Green Belt, it does not require assessment or qualification. The Green Belt sensitivity analysis is not a valid basis for informing decisions.

1.5 Exceptional circumstances clearly do not exist to justify amendments to Green Belt boundaries as part of the Local Plan process. It is quite achievable for realistically prepared and identified development needs to be accommodated in Guildford’s urban areas and villages.

1.6 The Transport Evidence has been produced very late and is incomplete, inaccurate and untested to the extent that the Plan is not ready for a Regulation 19 consultation.

1.7 It is emerging that the Strategic Highway Assessment shows there will be congestion, even with all the highway schemes in the Plan. Many questions remain unanswered. E.g. Why would 1000 homes on Slyfield generate no extra traffic? The report only gives average speeds and information needed to understand how much congestion will occur and where it has not been provided in time to inform Plan proposals or responses.

1.8 The available evidence suggests much of the proposed Sustainable Movement Corridor cannot be delivered due to narrow roads and pinch points.

1.9 Evidence on bus travel is fundamentally compromised because no clear and workable location for a bus interchange is proposed. No information has been provided on the demand for and capacity of rail services. The main line to London is already extremely busy in peak periods.

1.10 Information about the town centre as regards traffic, buses and parking is lacking. It is not credible to proceed without this given existing levels of congestion, the number of transport routes that rely on the town centre to cross the Downs, the shortage of crossing points over the railway and river and the fact that narrow roads and steep slopes make Guildford unsuitable for a ring road approach.

1.11 The Strategic Highway Assessment 2016 is flawed. It is invalid to base this on less traffic growth than the proposed housing growth. The report points to overcapacity use of the A3, M25, A31, A320, Millbrook, Ladymead, Woodbridge Road, York Road, London Road but understates the congestion consequences. Various suggested queue reductions are unexplained. The consequences of major proposed reductions in road space in the town centre (eg closure of Walnut Tree Close, narrowing of Woodbridge Road, reduced capacity of the gyratory) and of developing Burnt Common are not included. More time is needed to assess and refine this crucial 11th hour report which seems incomplete, understates the consequences of traffic overload, shows inconsistencies, and does not supply assumptions or information needed to understand queues at junctions.

1.12 The Guildford Retail Study Update lacks credibility and there is no proven case for expanding comparison retail space which is undermined by failure to implement existing retail consents at the North Street development over the last 10 years. The Guildford Retail Study does not take account of changing retail patterns in relation to the threat of the internet and the “clicks and mortar” conflict. The study also assumes a number of logged retail requirements from companies already in liquidation or with national requirements that exclude Guildford.

1.13 We believe that it was unacceptable to stop monitoring air quality, where NO2 emissions exceed limits, on the unrealistic assumption congestion would reduce. Estimates of premature deaths have doubled and issues with vehicle emission controls have emerged. Traffic noise from the A3 should also be reported.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 We request a confirmation by email from GBC that all of the objections made below are put to the Inspector appointed by the Secretary of State to review the GBC Regulation 19 draft local plan.

1.2 We request that once our objections are fully taken into consideration the draft plan is amended accordingly and re-issued.

1.3 Guildford is a constrained borough by the reality of having 89% of its area zoned as permanent Green Belt and an out of date road network that is already at capacity. We are concerned that GBC have adopted an inflated OAN of 13,860 homes as a housing target without any application of constraints as required under the National Planning Policy Framework and the National Planning Policy Guidance.

1.4 The application of constraints to housing need is a sensible and practical approach to development within the borough and is not only what GBC have done in the past in previous plans but is also what its neighbouring local planning authorities have done.

1.5 The scale of the housing number proposed in this plan, inevitably increases the onus for the plan to be seen to be sound. A substantially lower number of 5,000 homes over the plan period, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

1.6 We are concerned that GBC have failed to grasp the opportunity of following clear government policy to develop in the urban area on previously developed sites. Many of these sites are in their ownership and it would seem a practical and readily achievable alternative which is much more acceptable to local residents.

1.7 In our opinion much of the proposed local plan appears out of date. It is like a voice from the past. Current trends in terms of property development such as the marked decline in town centre shopping centres and the need to create modal shift by developing residential uses close to transport hubs appear to have been overlooked.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1.1 To review a local plan from a standing start is a big task and has required a lot of reading and detailed research. Along the way I have come across well informed opinion from individuals and organisations and I make no apology for including what I believe are correct and clearly expressed statements regarding the wide ranging issues to hand. I would therefore like to give thanks to others for their valuable contributions. However, I have of course referenced all statements made by retained consultants by GRA and CPRE e.g. NMSS and Green Balance.

1.2 NMSS is a consultancy company specialising in housing demographics whose principal is Neil McDonald

1.3 Green Balance is a consultancy company specialising in housing demographics whose principal is Richard Bate

1.4 On matters of road infrastructure, I have relied on comments by Richard Jarvis of the GRA who was previously a highways consultant with WS Atkins

1.5 On matters of property research, development, planning and valuation I have relied on my own skills and experience as a former Chartered Surveyor and Management Consultant specialising in property strategy and research in the public and private sectors. I have also used some material from my review of the Town Centre Masterplan 2015 which I reviewed for the Guildford Greenbelt Group and which can be found on their website.

1.6 References to “local plan” are intended not to be the previous 2003 Local Plan but to be references to the current Regulation 19 draft local plan prepared by Guildford Borough Council.

1.7 GBC refers to Guildford Borough Council

1.8 SHMA refers to the Strategic Housing Market Assessment 2015 prepared by GL Hearn

1.9 OAN refers to the Objectively Assessed Need in relation to housing

1.10 NPPF refers to the National Planning Policy Framework

1.11 CPRE refers to the Campaign for the Preservation of Rural England

1.12 GRA refers to the Guildford Residents Association which comprises over 25 Residents Associations and five Parish Councils

1.13 SSAG refers to the Save Send Action Group which comprises over 500 residents

1.14 ELNA refers to the Employment Land Needs Assessment 2015

1.15 NPPF refers to the National Planning Policy Framework

1.16 NPPG refers to the National Planning Policy Guidance

1.17 VoA refers to the Valuation Office Agency

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
1.1 Key parts of the evidence are missing, flawed or based on withheld assumptions.

1.2 The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach and the Transport evidence is too late and incomplete to be relied upon to inform the Plan.

1.3 The Plan preparation process has had inadequate regard for national policy which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

1.4 The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

1.5 It is unacceptable to treat Green Belt as a readily available source of development land during Plan preparation. The Mayor of London intends to respect Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level. Releasing Green Belt to fund infrastructure or build on open, previously-developed Green Belt does not pass this test. Opportunities to channel development towards brownfield locations beyond the outer Green Belt boundary, linked to sustainable transport, have not been adequately considered. It is not credible to suggest the Green Belt is being treated as permanent when its boundary was changed as recently as 2003 as part of the last Local Plan review. Indeed, land released in 2003 is neither fully developed nor efficiently used. An approach of eroding the Green Belt at each Local Plan review is not sustainable. If there is a case for Green Belt development, it needs to be proven through the application of policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/1873  Respondent: 8893057 / Dianne Garnett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

1.1 Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and surface water flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach.

1.2 The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. **GBC have failed to apply any reduction which makes the plan undeliverable and unsound.** I believe it would be harmful to the character, quality of life and economy of Guildford not to reduce the housing figure to a number significantly below 13,860 new homes by 2033. I submit it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to
develop on the scale currently proposed. I am concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site.

1.3 In view of the extent of physical and policy constraints, the inflated SHMA figure, and the transport evidence indicating that the Plan would lead to congestion, the OAN figure should be **500 homes per annum and the housing target after the application of constraints should be in the range of 250 homes** per annum and kept under regular review.

1.4 The extent to which the Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way casts doubt over whether sustainability has been assessed. The report treats various major development sites in Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”, fails to consider options that constrain development or that make greater use of brownfield or previously released greenfield land, focuses on a range of options that involve developing on even more Green Belt around Guildford in order to protect Green Belt around Woking does not consider environmental limits or impact on the next generation in terms of weighing demand for homes for the young alongside the use of all possible last resort greenfield options by one generation.

1.5 The National Planning Policy Framework requires that objectively assessed needs should be met unless: “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or specific policies in this Framework indicate development should be restricted.”

1.6 The specific policies described include several of particular relevance to Guildford including sites protected under the Birds and Habitats Directives, Sites of Special Scientific Interest, Green Belt, Local Green Space, Area of Outstanding Natural Beauty, designated heritage assets and locations at risk of flooding. In this situation, is it appropriate for the Appraisal to rule out not meeting needs in full from a sustainability perspective?

1.7 Notwithstanding that the Sustainability Appraisal should be proportionate, strategic and look at significant matters, the assessment appears deficient and biased in the spectrum of alternatives it considers to the point that it is questionable whether it meets the requirements.

1.8 GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.

1.9 GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

1.10 GBC has proposed an OAN of 693 houses per annum in the GL Hearn Strategic Housing Market Assessment (SHMA) which is unsound.

1.11 Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018. This is too late!

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**
I would like to make the following comments:

**Vision and Ambition:**

I OBJECT to this plan as it is based on a requirement for 13,860 new built homes by 2033. It would appear that the figures on which this is based are faulty, how the numbers were arrived at and who was responsible should be completely transparent to the public who are affected, and they should come from a quarter who has nothing to gain from homebuilding themselves. It also appears that it assumes a population increase far greater than that seen over the last ten years. Guildford is within the Green Belt and access and roads around it are already often gridlocked, and it seems no proper plan has been made to deal with this. I also object on the grounds that the future of Britain's economy after Brexit is entirely unknown, and the population numbers due to people of other nationalities leaving or lack of immigration may leave us with swathes of Greenbelt built on needlessly. This huge number needs to be rethought and the Greenbelt needs to be respected.

National trends show that too much retail and commercial space in the town centre has been allocated for commercial/retail rather than housing. Large floorspaces of this nature will end up as white elephants and the green belt will be built over. It also exacerbates the issue of gridlocked traffic when workers commute. I object to this.

I object to the fact that paragraphs have been deleted. If Developers are not monitored for efficient use of space and a policy for minimum and max. densities must be in place or there will be additional pressure on undeveloped land and the countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1778  Respondent: 8893057 / Dianne Garnett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the fact that the five tests below are no longer being considered when proposals are considered in order to protect AONB in the NPPF.

These tests should be reinstated in order to protect the AONB

1. to conserve or enhance views and setting in the AONB
2. to conserve wildlife, historic objects and natural phenomena in the AONB
3. to promote enjoyment by the community and visitors to these areas
4. to support the rural economy specifically in the Surrey Hills area
5. to provide or maintain public access to the AONB

The presumption against inappropriate development NOW means that inappropriate development is not necessarily going to be rejected, This contravenes the principles of the AONB. It is the duty for the borough council to protect this, as development is now rampant compared to what it was with developers now pushing through planning and hoarding land for future development, which would never have been accepted before. The previous presumption of inappropriate development being rejected should be reinstated.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the fact that it appears that 12,426 is based on assumptions THAT HAVE NOT BEEN MADE PUBLIC and have not been modified or corrected in the SHMA. (Professional analyst Neil McDonald of NMSS feels that annual housing initially of 400 per year should meet the overall need in Guildford). In order to allow for the infrastructure to be improved and for this to be carefully monitored open ended targets with unknown figures held back until after the plan period is a postponement not reduction and does not allow for proper planning and is not TRANSPARENT.

The NPPF 109 refers.

THE EVIDENCE BASE

You ask if the evidence base is adequate, up-to-date and relevant. I have objections to parts of the three documents below.

In the GBC Transport Strategy I object to;

Local Roads Network Strategy.

Major external developments have not been sufficiently accounted for, leading to flaws in the strategy on Local Roads in the West of the Borough. The AUE, 3,850 homes, and PRB, 1,200 homes, are already under development and significant traffic flows to and from Guildford will result. The AUE is predicated on many residents using the car. Local Roads affected will be the A323, A331, B3411 and also the A31. To this is to be added 1,300 homes in Ash and 1,100 in Normandy. The effect on these local roads will be severe.

The new bridge at Ash level crossing on the A323 is welcome, but will not resolve the problem of delays on the A323, which is operating at close to capacity. Other improvements to the A323 and to Westwood Lane are insufficient and delivery is too late. Judging from the sum to be spent, £6.6m, improvements will be minor. LRN9 -LRN 13 and LRN 18-LRN19 will deliver improvements between 2017 and 2026. The A323 is especially vulnerable, being a narrow A road with no opportunity to widen it along its length. Large queues will form at peak time at junctions and obstructions such as bus stops. The planned improvements will be delivered well after the first commuters travel from the AUE and PRB to Guildford.

GBC has not produced a strategy that deals with the quantum leap in commuters from the new developments in West of the Borough and external developments.

More Information in Annex A
BT4 Delivery 2021-2022. Funding TBC.

Significant bus network serving the Land to the south of Normandy and to the north of Flexford site and key destinations including Guildford and the Blackwater Valley to be provided. Given that the roads that these services would use are already operating over capacity, and very minor improvements, not guaranteed, are planned, I cannot see that this bus network would be effective at peak times.

AM4 delivery 2020 - 2024.

The Christmas Pie Trail runs from Wood Street to Farnham. The surface is unmade and unlit. It is muddy in winter and narrow where it passes through woods. There is little scope for lighting and improving the surface at the Wood Street end, as it runs through the Broad Street and Backside Commons, which is an SNCI. Much of the trail runs through fields away from sources of electricity, so lighting the trail would be expensive and would pollute an otherwise dark area. It is unsuitable for year round travel.

I object to the housing target in the SHMA

I would have liked to have been able to understand how the housing target is calculated, especially as the number is greatly in excess of previous Plan's targets. I accept that the owner of the model that calculates housing need wishes to protect their intellectual property. I do not believe that GBC should accept the findings of the model just because other Authorities have. I would have liked to have seen the input that GBC submitted for the model, and a summary of the test scripts run by the developer to show that the model delivers correct results.

To what extent have GBC engaged with Rushmoor and Surrey Heath? The AUE is 500m from the Guildford border. Have the AUE and PRB been taken into account when calculating the housing numbers, especially as they are intended in part for people who work in Guildford?

I object to the flawed nature of the Settlement Hierarchy and Settlement Profiles in respect of Wider Normandy

Wider Normandy is made up of five/six hamlets, of which Normandy is one.

The Settlement Hierarchy and Settlement Profiles;

- Confuse Normandy with Wider Normandy
- Ignore two of the hamlets, Willey Green and Pinewoods
- Consider Flexford to be part of Normandy, although they have been informed that this is not the case
- Consider Normandy and Flexford as being one settlement when it suits their case, and as two when the opposite is true
- Claim that Normandy would benefit from shops, with no proof. We are avid internet shoppers. How up-to-date is any evidence that GBC are using? Is it pre-superfast Broadband?
- There are 10 errors/omissions in the Settlement Profile for Normandy/Flexford. For example; GBC state that we have one SNCI to the north of Normandy when there are five; a Scheduled Ancient Monument which lies partly in Flexford is omitted.

More information in Annex B

I object to the lack of a Heritage Strategy

English Heritage requested that GBC produce a Heritage Strategy. There is a draft document "Historic Environment Information" April 2016, which is not available in the Evidence Base. The Plan was put together without information on GBC's Heritage Assets being available. Nor have residents been able to comment on it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
ANNEX A

GBC Transport

LRN9 - LRN 13 and LRN 18 - LRN 19, improvements to the A323 and to Westwood Lane are insufficient and delivery is too late. LRN21, a bridge replacement for the level crossing at Ash is welcome.

In addition to the AUE and PRB, a Super Garrison in Aldershot is being planned. What will the effect of this be on Local Roads in the west of Guildford?

Hot spots on the A323 may be improved, but the congestion will just move on to the next hold-up, be it a car turning right or stopping bus. Large queues will form at peak time at junctions, in particular the roundabout at the junction of the A323 and the B3411 and the traffic lights at the junction of the A323 and the A324. The A323 is a direct road from the AUE into Guildford.

ANNEX B

The flawed nature of the Settlement Hierarchy and Settlement Profiles in respect of Wider Normandy

Wider Normandy is not a village with a centre, but is a collection of the following hamlets; Normandy, Flexford, Christmas Pie, Willey Green, Wyke and the eastern side of Pinewoods, a ribbon development along the A323, the western side being in Ash. Strictly speaking Flexford and Christmas Pie are one settlement, though residents of Christmas Pie think of themselves as separate.

After reading the Settlement Hierarchy and Settlement Profiles documents it is clear to me that Guilford Borough Council (GBC) suffers from confusion between Wider Normandy and Normandy. Wyke is mentioned once and Willey Green and Pinewoods not at all, even to be rejected as being too loose-knit or too small. The populations and amenities of Willey Green, Wyke and Pinewoods are therefore not included in either document. In 2011 Wider Normandy had a population of 2,981. The populations mentioned in these documents are Normandy 585 and Flexford 1,199, a total of 1,784, leaving 1,197 people unaccounted for, over a third of the population of Wider Normandy.

The Settlement Hierarchy

The Settlement Hierarchy document starts with the bold statement "The settlement hierarchy study is a key part of our evidence base for the new Local Plan. ... This document will enable us to have a better understanding of the roles of each of our settlements". I don't think that the document shows any understanding of Wider Normandy or its settlements.

It is claimed that evidence gathering has identified that Flexford and Normandy would benefit from future development and access to key services for local residents. Where is this evidence?

I am not aware of demand for more services in Normandy, though there are some residents of Normandy who would like a shop for when they run out of milk or bread and to have a chat with the shopkeeper, particularly the chat. (When the Post Office closed, older residents would come to the Surgery and chat to the receptionist. The Church then started Tuesday teas for this group.) This, however, is not a viable business model. The Parish Council undertook a survey to assess demand for a shop, and found that demand was so weak that it would not be worthwhile. We had food shops and pubs in Wider Normandy, but they closed for lack of business. We still have bars in the British Legion and the Cricket Club. We have a
farm shop which sells mainly meat, but also milk, fruit and vegetables, and a small range of organic groceries. It opens Weds - Sat and is well used.

The population of Wider Normandy is sufficient to support a pub, there used to be six 15 years ago when the population was less than it is today, and a convenience store, but pubs and local shops are in decline all over the country as living patterns change.

Since Fast Broadband arrived two years ago residents increasingly shop online. Sainsbury and Tesco delivery vans buzz round the hamlets, and I have seen the Post van stacked high with Amazon parcels at Christmas. I shop online; my friends in Normandy all shop online. My husband and I, and probably other residents, bank online. Online shopping and banking is the most sustainable for villages. Local shops will be less sustainable.

The Normandy Community Bus makes three trips a week to the supermarkets for residents who need transport. There is a convenience store in western Pinewoods, and a pub. The milkman delivers a range of groceries.

I am at a loss as to how the current residents of Normandy and Flexford will benefit from this plan, or in what way Normandy and Flexford will be more sustainable. The only thing on offer seem to be shops, which we do not need. The plan only brings disbenefits; loss of green open space, increased traffic, years of noise and disruption during building, pressure on existing services and a loss of identity, as the proposed development will double the size of Wider Normandy. The Settlement Profiles states "In terms of how well the villages work as a community, the settlement scores 35 out of 40, the highest scoring out of all the villages". This is what makes Normandy sustainable. Will this community spirit still exist if this plan is implemented? As for the evidence gathering, please see below.

The Settlement Profiles

These are the errors and omissions.

- P47 Wider Normandy is confused with Normandy Settlement. The document says "Normandy Parish Council considers Flexford and Normandy to be one village. We have therefore assessed and scored it on this basis." Normandy Parish Council considers Flexford and Normandy to be two settlements in the parish. Scoring Normandy and Flexford together is therefore incorrect. The nature of Normandy was explained in the last consultation, but the error has persisted. Why?

- Only Normandy and Flexford are considered. Wyke, Pinewoods and Willey Green are ignored. Wyke has two schools, Wyke Infant and Primary, two SNCIs (Wyke School SNCI and Normandy and Wanborough Woods SNCI) and a good bus service. Willey Green has a good bus service, 2 SNCIs (Withybed Copse and Henley Pak Fields SNCI and Broadstreet and Backside Commons SNCI) and 6 rural businesses, eastern Pinewoods has an Indian restaurant, a Chinese takeaway and a good bus service.

- On page 47 it states that Normandy has two schools. The schools are in Wyke.

- On page 47 it states in respect of Flexford "There is no central meeting place such as a village green within the village" which is true if Flexford is considered to be separate from Normandy, but untrue of they are considered as one, as in this document. Manor Fruit Farm, Normandy, where the Village Hall is situated, is a de facto village green. This is where the May and August Fetes, the 5th November Bonfire and Dog Shows are held. Manor Fruit Farm has a play area for children and an outdoor gym. The Doctors Surgery is also located here, and Normandy Therapy Garden.

- On page 48 it claims that Wanborough station has direct access to London. There is a change at Guildford.

- On page 49 it states that there is a Site of Nature Conservation Importance (should be Interest) to the North of Normandy. There are 5 SNCIs to the North of Normandy; Normandy Common SNCI, Wyke School Woods SNCI, Normandy and Wanborough Woods SNCI and Withybed Copse and Henley Park Fields SNCI and Wyke Churchyard SNCI. It omits to say that there are 2 SNCIs to the South, Little Flexford SNCI and Broad Street and Backside Commons SNCI.

- On page 50, it is stated that Normandy has two Grade II listed buildings. Normandy has nine, Longerend Farm, Longerend Cottage, Hunts Hill House, Manor House, Normandy Hill Cottage, Normandy Hill Farmhouse, Glaziers, Halsey Cottage, not two (Or does GBC think that Normandy stops at the A323?). In all, Wider Normandy has 22 Grade II listed buildings.
• Flexford has a Scheduled Ancient Monument, a Romano-Celtic temple complex 385m west of Long Common. List no: 1019641 which lies between Flexford and Wanborough. This not mentioned,
• On page 50 Normandy and Flexford are again considered separately, instead of together, as stated.

ANNEX C

This development is not driven by objectively assessed need as required by the NPPF, but by commercial considerations and GBC's willingness to build on the Green Belt, rather than more difficult options within Guildford itself. The NPPF places priority on Evidence Based planning. This plan has been put forward by Taylor Wimpey, who have options to buy this land and therefore wish to develop it for commercial reasons, as developers quite rightly do. However, to get over the inconvenience of it being Green Belt land, they have offered a free school in return for permission to build 1,100 houses.

Once the offer of a free school in Normandy/Flexford was made, and only then, GBC started to talk about a lack of school places in the West of the Borough, based on need from Blackwell Farm, Ash and the Normandy/Flexford development. Normandy currently has about 20 children.

An amendment was passed at the GBC full Council meeting on 24th May which stated that if the need for a school was not proven, then there should be no development in Normandy/Flexford. It therefore follows that significant need for secondary school places from outside of Normandy should be shown, as children from the new development in Normandy/Flexford cannot be used to justify the school. At the GBC meeting on the 24th May I heard one councillor say "but if the school fails where will we build all those houses?" The houses are the driver and the school is the enabler for building on the Green Belt.

- The Infrastructure required is not there

Transport

Roads

The A323, the road that passes through Normandy, is nearing capacity. Travelling eastwards, to turn into Bailes Lane where I live requires a right turn on a sharp left hand bend. Sometimes it can be a long wait, and traffic builds up while I wait to turn. Other junctions in Normandy are similar. The traffic lights at the junction of the A324 and A323 have been identified as a bottleneck in the Surrey County Council Strategic Highways Assessment Report (SHAR) 4.9.1, as has the roundabout at the junction of the A323/B341.

Queues also build up on the A323 in Normandy on Mondays, when the rubbish truck collects. There are few bus bays, so traffic queues behind buses. There are no cycle lanes, which means that traffic has to slow and wait to pass cyclists on this narrow road, which has many bends as it passes through Worplesdon.

Westwood Lane and Glaziers Lane form the borders of the Normandy/Flexford Site. Westwood Lane, C16, is a narrow country lane on which two entrances into the Normandy/Flexford site are planned. Queues will form while cars and fairground equipment wait to turn right into the development. Glaziers Lane, D60, where a single entrance is planned is also narrow. These rural lanes have developed over time to allow people to travel to Guildford from Wider Normandy and between the hamlets. They were never meant for, nor are they suitable for, any weight of traffic.

Queues will build at the junction of Westwood Lane, the A323 and School Lane, where Wyke Primary School is located close to the junction. The SHAR table 4.3 anticipates that traffic on Westwood Lane will increase by 1284%. Anticipated improvements to Westwood Lane are not due until 2021 -2026.

The A31 runs to the south of Normandy and can be accessed via Westwood Lane and Wanborough Hill. The A31 is a traffic black spot at peak times. Improvements to the junction at Puttenham Hill, if confirmed, will take place between 2021 and 2026.
It can be seen that traffic from developments is already preceding improvements to roads. Moreover, the improvements to the A323 and the A31 are anticipated, not confirmed. Given the nature of the A323, it is difficult to see how it can be turned into a major link between Aldershot, Ash and Guildford.

**Rail**

The Normandy/Flexford site is considered sustainable because it is next to Wanborough station. Children from Ash attending the school and commuters to Guildford are expected to use the train. Wanborough is a small rural station, unmanned, with a platform suitable for trains with 4 carriages or less. There are trains to Guildford and Aldershot half hourly, and one peak hour service to Reading, which stops at Farnborough. Commuters wishing to travel to London have to change at Guildford onto a service which is already crowded at peak times.

To find out availability on peak hour services I went to Wanborough Station on Monday 6th June between 7:30am and 8:30am. The train to Reading and trains to Aldershot were quite empty. The 07:48 to Guildford was quite full, but some seats were available. With 40 people standing per carriage, that train could probably have taken 200 passengers. The 08:18 was slightly less crowded. With full standing, this train could probably have taken another 300 passengers. That is 500 spaces on peak hour services for a development with a population of over 2,500 people. Even these few spaces are likely to be unavailable, owing the AUE. The train, a 17 minute journey from Aldershot to Guildford, is likely to be a popular option for AUE residents working in Guildford as it is a 20 minute walk or 10 minute cycle to the station, an overall journey time of 37 minutes.

GBC is in talks with the Train Operating Companies and Network Rail, but any improvements to the service are aspirational.

**Cycling**

Policy A46 mentions an off-site cycle network to Wanborough station. It is not clear to me where this proposed cycle network would be. There is no space in Glaziers or Westwood Lane, closest to the site, or on the A323. Policy A46 also mentions an off-site cycle network to the Christmas Pie Trail (a rural track), which would lead to key destinations, unspecified.

**Heritage Assets**

it is a core principle of the NPPF to conserve heritage assets so that they can be enjoyed for their contribution to the quality of life of this and future generations.

There are seven Grade II listed buildings and one Grade II listed tomb adjoining or close to, this site. The houses are: Westwood Place, Buckhurst, Great Westwood, Halsey's Cottage and Glaziers. The other buildings are: Great Westwood Barn and St Mary's Church. The tomb is the Pirbright Tomb.

**Westwood Place**

**IMAGE 1**

*Westwood Place has a wonderful approach from the footpath across the field. Building on this site will obscure this view.*

**Glaziers**

Glaziers, a lovely timber framed 16th century cottage, the Glaziers of Glaziers Lane, borders the site. GBC's own plan, according to the Sustainability Scoping Study, is that a site is red for development if an historic house is within 25m. Glaziers is within 25m of the site.

**IMAGE 2**

The Thames Basin Heaths Special Protection Area (SPA)
Policy P5 of the GBC Plan states that 8ha should be set aside for every 1,000 residents. GBC also estimates an average of 2.4 people per dwelling. As this site proposes to build 1,100 homes, 2,640 people, the SANG should be at least 21ha.

**Degradation of Ancient Woodland and Ancient Trees and loss of Biodiversity**

Part of this site was originally parkland, laid out with oaks, many of which remain, belonging to Westwood Place. Some oaks are on the Ancient Trees Inventory and are more than 5m in circumference. Other ancient oaks on the site have yet to be surveyed.

**Flooding**

Wider Normandy is prone to flooding in all but the driest months, as it is situated in a valley with Ash Ranges to the North and the Hog's Back to the South. As the soil is mostly clay, the drainage is poor. A number of small streams swell and burst their banks in wet weather. There are springs on both the slopes of Ash Ranges and the Hog's Back. The water from these springs, together with surface water, collect in Wider Normandy to form the infant Hoe Stream. The Hoe then passes through Woking to join the River Wey.

The Hoe is notorious for flooding. Woking Borough Council (WBC) and the Environment Agency have worked together to alleviate flooding from the Hoe. As part of the mitigation project, SCC have designed the Hoe Valley Path which follows the Hoe Stream. It is managed by WBC and is designated as an SNCI because of its varied habitats.

Any flood mitigation should therefore be of the greatest sensitivity, in order to protect the Hoe and to avoid flooding other areas of Wider Normandy.

**Degradation of the view from the Hog's Back AONB**

Currently the small development of Christmas Pie can be seen from the Hog's Back. The houses are low rise and there is minimal street lighting. A46 will be highly visible.

**NEW SITE**

**CHRISTMAS PIE**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A22
Objection to Policy A22 Land North of Keen's Lane

Parts of this site are within the 400m zone of the Thames Basin Heaths SPA (SPA). I have no objection to the care home, but have concerns over damage to the SPA from the rest of the development, 140 houses.

Whilst there is a covenant banning pets for the care home, there is not one for the housing. If cats are not banned there is a risk to the SPA. GBC state that only the most immobile will use these homes, such that they are unlikely to access the SPA for recreation. How can this be controlled? Will mobile C2 potential occupants be turned away? And what would the criteria for rejection be? If the occupants have dogs, there is a severe risk of harm to the SPA.

NPPF 113 and 117 point 3 refers

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object strongly to the strategic development in Normandy/Flexford, Policy A46 in the plan

1. the developer’s site MasterPlan has different boundaries to GBC. It stretches further east and does not include the northernmost piece of land. It may be more than 46ha. Is the developer finding it difficult to fit everything promised onto the original site? The village green, promised as a central meeting point in A46, is not there. The SANG will require at least another 21ha of land in addition to the 46ha. This is not mentioned in the GBC Plan.

Loss of sustainability

In the Settlement Hierarchy Normandy scored highly for sustainability, largely for its community spirit, rather than facilities. Flexford had only open green space, an infrequent bus (now at risk), a school bus, access to the A31 and a station. GBC would seem to be set on damaging the most sustainable aspect of Normandy, its community spirit, by doubling the size of the village. Already a much greater number of houses than usual are for sale in Normandy. I suspect that many more will join them if A46 is approved. The community and the spirit that goes with it will disappear. Normandy will be less sustainable. Flexford is even worse off. It will lose its green space and the train will be much more crowded; standing or no place at all at peak times.

In exchange Normandy and Flexford get shops, which they don't need.

Objections

The need for this strategic site is not based on evidence

The need for a school is not based on evidence, as required by the NPPF, but by a developer-led plan which offers a free school. In essence, GBC is agreeing to a proposal to build a 7FE secondary school in the Green Belt, where the roads are inadequate, public transport over-stretched, where there are currently only 20 children and no opportunity to cycle or walk to school.

There is no need for another secondary school in West Guildford. In 2013 the draft Sustainability Appraisal specifically stated that there was adequate secondary school provision throughout the Borough, except Central Guildford. The GBC 2013 Plan contained the sites at Blackwell Farm and Ash. So what has changed between 2013 and 2016? The number of houses in Blackwell Farm has been reduced from 2,250 to 1,800. The number of developments in Ash has been reduced, but a strategic site of 67ha has been added, so it is difficult to compare, but the number of hectares available for development has been reduced. So why, if there was not a shortage of secondary school places in 2013, is there one now? The children from the Normandy/Flexford site should not be included in the numbers, as it would be in contradiction to logic (a circular argument, the school exists because of the children who exist because of the school).

It uses Green Belt Land without proving exceptionality. The land used by this site has been assessed as the most sensitive Green Belt by GBC. There is also a risk, if the housing is built before the school, that it will be discovered that there is no need for a school after all. The Green Belt will have been destroyed and the school, for which exception to building on the Green Belt was made, will not materialise. If the school is built first, it may turn out to be a white elephant.

NPPF 89 refers

The Infrastructure required is not there

Sewerage.

Sewerage in Normandy is problematic. Two years ago the sewer under Glazier’s Lane collapsed, and when it was fixed the next section of the pipe collapsed. Last year the pipe broke between Normandy and Willey Green. An operation that
involved three tankers on rotation was put in place to take our sewage away for about three weeks. There are houses in Orchard Close that have been experiencing problems with sewage overflow in their gardens for 20 years. Will the sewers be able to cope with a vastly increased population and two schools?

Transport

The A323, the road that passes through Normandy, is nearing capacity. Significant new developments further west will place additional strain on this road. Improvements to the A323 through Normandy are not due until 2021 - 2026. The budget allocated is small. Their nature is unspecified and they are not guaranteed. Westwood Lane and Glaziers Lane form the borders of the Normandy/Flexford Site. Westwood Lane, C16, is a narrow country lane on which two entrances into the Normandy/Flexford site are planned. It is single lane at the rail bridge. Glaziers Lane, D60, is even narrower and there are no planned improvements.

The Normandy/Flexford site is considered sustainable because it is next to Wanborough station. Children from Ash attending the school and commuters to Guildford are expected to use the train. The train will not provide the level of service suggested, as it is already busy at peak times, and as the AUE develops, will be full when it leaves Aldershot, before calling at Ash, Wanborough and Guildford.

Policy A46 emphasises travel by bus, train and bike, but the reality is that owing to shortcomings in these modes of transport, perhaps as many as 1,000 residents’ cars will stream in and out of this site at peak times. Additionally significant numbers of pupils and staff of the secondary school (1,200 pupils and 300 staff) will also use cars to get to school. Even with the anticipated improvements to the A323 and Westwood Lane, the effect on the roads will be severe.

Lack of infrastructure makes the site unsustainable

The Sustainability Appraisal (SA) 5.3.3 states that continued overuse of cars will result in "Adverse economic, social and environmental impacts of high traffic volumes and a culture of dependence on private car use including recurrent traffic congestion on certain parts of the network at certain times of day, road collisions, community severance, obesity, noise pollution, local air pollution, greenhouse gas emissions, high demand for parking, and amenity of local neighbourhoods."

The SA recommends that developments have Green Travel Plans. Government Policy is to increase cycling and walking as a means of travel (Active Travel (2011)).

Walking

The only employment on the site will be the school and the retail centre. Employees of the school and shops living on the site will be able to walk to work, everyone else will need to commute. The children on the site will be able to walk to school; all other pupils will need to commute. Walking to the retail centre will be possible for most residents on the site. Walking opportunities are limited.

Cycling

The local roads are used by adult cyclists. More cyclists on the road will delay traffic. There is no space on local roads for dedicated cycle lanes, nor do GBC have plans for any. The Christmas Pie Trail is unsuitable for year round travel. (See Page 4). I would not want a child of mine to use it, as it is unlit and passes through woods. It will be possible to cycle on the site. Cycling opportunities are limited. (See Annex C)

Train

The train has little spare capacity. (See Annex C)

Bus

BT 4 in the Transport Strategy promises a significant bus network A46 / key destinations including Guildford and the Blackwater Valley. There is no room for bus lanes on the A323, nor do GBC have plans for any. Buses, including school buses, will be stuck in traffic with cars. The bus is expensive. Parents would prefer their children to be able to walk and cycle to school, rather than have to pay for the bus.
Summary

This site does not offer any viable Green Travel plans, or opportunity for Active Travel. It is unsustainable.

The NPPF 30 and 35 refer

Heritage Assets

It is a core principle of the NPPF to conserve heritage assets so that they can be enjoyed for their contribution to the quality of life of this and future generations. There are seven Grade II listed buildings and one Grade II listed tomb adjoining or close to, this site. The houses are: Westwood Place, Buckhurst, Great Westwood, Halsey's Cottage and Glaziers. The other buildings are: Great Westwood Barn and St Mary's Church. The tomb is the Pirbright Tomb. Glaziers and Westwood Place face particular threats. Glaziers is within 25m of the site, red for development in GBC's Sustainability Appraisal Site Criteria. Glaziers Lane is an ancient lane, mentioned in the 15th century, when it ran from the A323 to Glaziers cottage. Hence Glazier's Lane. Glaziers is therefore a house of some importance.

If GBC had a Heritage Strategy this might contain historic walks in Normandy. It might also consider how to exploit the Roman sites in the area; one in Flexford, two in Willey Green and another 1 mile away in Park Barn, along the Roman Road which runs from Farnham to Stoke, passing through Flexford on the way.

NPPF 129 refers

The Thames Basin Heaths Special Protection Area

The threat to the SPA from the proposed site has not been given enough weight. Two entrances to the SPA are within easy reach of the site, Dolley's Hill (800m) and Nightingale Road (1k).

Dog walking is of particular concern to SPA managers for the damage they do to the SPA. It can be expected that a large number of residents will have dogs, the pet of choice in the countryside, and will require somewhere to walk them. However good the SANG provided, it is inevitable that a good number of dog-walkers will prefer to walk their dogs on the SPA, especially in winter, as the SPA is dry and land in Normandy is wet. A46 will harm the SPA.

NPPF 113 and 117 point 3 and 118 point 1 refer

Degradation of Ancient Woodland and Ancient Trees and loss of Biodiversity

This site, which runs from the railway line to the backs of the houses on the A323, is a complete north/south barrier which will destroy green corridors used by wide ranging species such as deer and hedgehogs to move across southern Normandy.

Ancient Trees, registered on the Ancient Trees Inventory, are at risk of damage from children, cats and dogs, pollution and the building work required to develop the site.

There is ancient woodland both on the site and adjoining it. Both will be degraded by cat predation. The woodland on site will be further damaged by children and pollution. Green corridors between the ancient woodland will be lost.

Wyke Churchyard SNCI is within 400m of the site. This SNCI contains the rare Green Winged Orchid, which is sensitive to disturbance. I do not hold out any hope of these rare plants surviving the building work. Normandy Common SNCI will be affected by pollution.

Surrounding this site are many UK BAP sites, which will be disturbed by the initial build in particular, birds being especially vulnerable. The (Wild) Birds Directive 79/409/EEC, 1979: "To protect all naturally occurring wild bird species and their habitats, with particular protection of rare species." refers. GBC Policy 14 states "The Council will conserve and enhance biodiversity and will seek opportunities for habitat restoration and creation, particularly within and adjacent to Biodiversity Opportunity Areas (BOAs)". There is a Traditional Orchard BOA bordering the site, within the settlement boundary. Rather than seeking opportunities to restore this BOA, this Plan will harm it by surrounding it with development.
The SANG will not compensate for this loss of biodiversity, nor will the gardens of the development, which will not provide the openness required by many bird species that currently use the site. If this development goes ahead Normandy will have a net loss of biodiversity of approx 46ha.

**NPPF 118 point 1 and 109 point 3 refer**

**Loss of Agricultural Land**

This land is currently farmed. It is mostly hay meadow, with some pigs and horses. It is Grade 3 agricultural land. The Government places a high priority on using lower grade agricultural for building, and retaining other grades for food production. This Grade 3 land should remain in agriculture. A further 21ha of agricultural land nearby will be lost to the SANG.

**NPPF 112 refers**

**Flooding**

The site is Flood Zone 2 and Flood Zone 3 in places. The site is one of the sources of the Hoe Stream.

**NPPF 100 refers**

**Degradation of the view from the Hog's Back AGLV/AONB**

GBC’s POLICY P1 states that. All proposals will be considered against whether they conserve and/or enhance the setting and views of the AONB

The best views from the Hog's Back along the A31 are to the North, towards Normandy. A46 will bring a large expanse of taller buildings with street lighting. In summer the site will be partially hidden by trees, but at night it will be clearly visible, and also in winter when the trees are bare. Light pollution and dense housing will spoil the view from the Hog's Back. This development will neither conserve nor enhance the AONB, but will harm it.

**NPPF 115 refers**

**Summary**

A46 is not sustainable. The need for school on this site has not been arrived at by means of evidence. The infrastructure is not there. In my view there are seven contradictions to principles in the NPPF. Some of these cite exceptional need as a reason for ignoring the principle, however, is it reasonable to ignore loss of Biodiversity and likely damage to the SPA and spoiling the view from the Hogs Back and Flood Zones 2 & 3 and spoiling Grade II listed houses and losing agricultural land?

I am at a loss as to how the current residents of Normandy and Flexford will benefit from this plan, or in what way Normandy and Flexford will be more sustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objection to Policy A47 Land to the East of the Paddocks, Flexford

This site is not sustainable as it builds on an SNCI, has not defensible borders, damages GBC's natural capital and requires an infrastructure that is not there. GBC's consideration for this site says. The majority of the site is designated as an SNCI. The site lies within an area identified as a ‘Water Vole Alert Area’. These areas were identified by the National Water Vole Database and Mapping Project in 2012.

The Government is committed to halting overall decline in biodiversity, as is GBC. Building on this site does not support these commitments. I am very disappointed that GBC could consider building on an SNCI.

Opportunities exist in Wider Normandy to promote its natural capital, the seven SNCIs and the heathland slopes south of the SPA. Publicity, site information boards and leaflets, improvement of some paths for disabled access, activities such as pond dipping and promoting the tea shop at The Therapy Garden would provide an excellent way for families to engage with nature. Little Flexford would be part of this. The Friends of Normandy Wildlife are already organising nature walks on Normandy Common, pond dipping in the Traditional Orchard, and together with the Trustees of Normandy Pond, signage and leaflets. A Bat walk on the footpath that crosses site A46 have been successful and well supported. GBC should exploit the natural capital in Normandy, rather than build on it.

The borders of the site to the south and east are not defensible.

Cars from this site will have to use Flexford Lane, a narrow road, which floods at the bridge where the Wanborough Spring comes from the Hog's Back when the weather is wet. There are no planned improvements to Flexford Road. There is no opportunity to travel by train (see A46), by bike or on foot. Without Green Travel options, A47 is not sustainable.

NPPF 109 point 3 refers.

SUMMARY

Examples of confused and contradictory thinking.

- GBC state that the Town Centre is the most sustainable location to build. The majority of development in is the Green Belt.
- GBC state that they will focus on brownfield development; the majority of building is on greenfield sites in the Green Belt.
- GBC make a priority of Biodiversity. Policy A47 plans to build on an SNCI. The amount of green space is the Borough is reduced by 218ha.
- GBC's policy is infrastructure first, development later. Policy A46 - the developer hopes to deliver in 1- 5 years. The infrastructure improvements, minor as they are, will not start until 2021.
- GBC states that they will work with neighbouring Boroughs as the Duty to Co-operate requires. The first commuters from the AUE (Rushmoor) will use the A323 from 2016. Improvements to the A323 start later.
- Policy D3 states that it will "enhance the special interest, character and significance of the borough’s heritage assets and their settings and make a positive contribution to local character and distinctiveness." A46 will affect 8 Grade II listed buildings; two of them will suffer significant harm.
- Policy P1 states that GBC will "conserve and/or enhance the setting and views of the AONB". However, it will spoil the view from the Hog's Back (A46), and is contemplating driving a road through it (A26).

To be credible, GBC need to set out policies and then meet them.

There are inconsistencies. Policy A36 has a requirement to ensure the Grade II listed building on the site is not harmed. Policy A46 has no requirement to mitigate the harm to the Grade II listed buildings by the site, one within 25m.
I have only commented on issues where I think I can add value. As a result I do not know other areas in the Plan are more sound that the ones that I have looked at. However, judging from reaction from other Guildford residents I suspect not, in which case there is a question mark over the soundness of the whole Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objection to Policy A6; North Street development.

*GBC has failed to plan proactively for the 21st century when proposing 45,000 sq m of new retail space and has not recognised the role that residential development can play in ensuring the vitality of a town centre.*

I object that 45,000 sq m is being set aside for increased retail space in Guildford Centre.

Internet shopping now accounts for 13% of all purchases nationally, up from 3% in 2007. Tesco, Sainsburys and Morrisons are all making losses. Austin Reed is closing its shops this month. The British Retail Consortium anticipates that thousands of stores and 1m jobs will be lost by 2025.

Guildford has been successful in maintaining retail capacity in the past. However, it will be shaped in future shaped by the forces that are changing high streets everywhere; the internet, a decline in clothes shopping and more money being spent on experiences and sport. It is not planning for the 21st century. Its assumption that it will continue to maintain and increase shops is flawed. Has there been much interest in this site from developers?

This space could more profitably be used to fulfil the Government’s and GBC’s commitment to building sustainably on brownfield sites and using residential property to boost the vitality of town centres. GBC is only planning to build just 1,300 homes in the town centre. The town centre is where many people would like to live.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF 82 refers

Objection to Policy D4  Development in urban areas and inset villages

Development in urban areas is vastly different to development in villages. It concerns me that the two are brought together in D4.

Most of Guildford's villages contribute to the openness of the countryside. Their buildings are generally low rise and widely spaced, giving views of the surrounding countryside. The nature of the Guildford countryside will be spoiled if the open character of its villages is damaged. Allowing urban density development within inset villages will damage villages. Development is possible in washed-over villages, either by using brownfield sites such as redundant garages and pubs, or permitted development, such as rural exception housing. It is these types of developments that will preserve the character of the countryside. D4 seeks to create urban blocks in the countryside.

NPPF para 86 refers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4842  Respondent: 8893697 / Gill Woolfson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy P2 insetting of Normandy & Flexford

P2 mentions Normandy and Flexford separately in the list of villages to be inset in the Green Belt. However, The new Green Belt Boundary, which loops round Normandy and Flexford and includes A46, shows that they have been considered as one village.

Of course both Normandy and Flexford both contribute to the openness of the Green Belt. GBC acknowledge that it is the most sensitive Green Belt. Therefore it should not be inset as it would not be sustainable.

I also object to the settlement boundary as not being defensible. The obvious place for the boundary is the continuation of Glaziers Lane, not extending round Little Flexford, with inadequate boundaries to the south and east.

NPPF 86 refers

I object to Policy P2 4.3.17, the creation of Green Belt between Ash  Green and Ash/Tongham
"The Green Belt boundary has also been extended between Ash Green village and the Ash and Tongham urban area in order to prevent coalescence."

New Green Belts should only be established in exceptional circumstances, for example when planning for larger scale development such as new settlements or major urban extensions.

This is not the case here.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

SOUNDNESS

The Plan is flawed in places and confused.

A fundamental flaw was the presumption of GBC that it would need to build on the Green Belt to meet its housing target. This presumption has led to building on the Green Belt becoming the main focus for development. The Town Centre Plan is incomplete.

GBC hopes to remain an historic county town and be a centre for technological industry at the same time. In my view, to achieve this it would need to have a top quality medium rise (4-5 story) technological centre, with workplaces, retail, leisure and flats, in an area offset from the town centre, Slyfield or somewhere similar. This would enable people to live and work sustainably, with the Green Belt countryside available for farming, wildlife, tourism and leisure, and the historic town centre for retail, tourism, housing, particularly more one and two bedroom flats, and leisure. It would also be cost-effective and sustainable, as there would be less need for expensive upgrades to transport infrastructure, as fewer people would be travelling in from the villages.

Taller buildings in Guildford will have to come, if not in this Plan, then in the next, or the one after. How much more far-sighted it would be if thought was given now on where taller buildings could be sited, and to use the Green Belt for the purpose for which it was intended.

A second fundamental flaw is the amount of infrastructure improvement required to deliver the Plan, much of which is unfunded. Some improvements are dependent on external providers, the Highways Agency, Surrey County Council and Network Rail, who may have different priorities. However, I applaud GBC for tackling the problems that Guildford has with its transport infrastructure.

A third fundamental flaw is the amount of extra infrastructure developers are expected to fund. The bulk of these costs incurred by developers will be passed on to property buyers, driving house prices higher.

The plan is not sound in places. I would draw your attention to:

Duty to co-operate
I can see no evidence that GBC have co-operated fully with Rushmoor Borough Council (RBC) and Surrey Heath Borough Council. Both the Aldershot Urban Extension (AUE) in Rushmoor and the Princess Royal Barracks (PRB) in Surrey Heath will impact on GBC's transport strategy and housing numbers. Although both Authorities are mentioned in the West Surrey SHMA, it is not clear where data concerning these sites has been fed into Housing policies. Nor is it clear that GBC have a cross-border Transport Strategy to deal with traffic flow from the AUE and PRB.

Evidence

See below, Transport Strategy and Settlement Hierarchy & Settlement Profiles

Late inclusion of Policies A43 and A46

These sites were not included in the last version of the Plan. They were not announced until April 2016. This is the first time residents have been able to comment on them, and have had very little time to consider their responses. GBC have been aware of A46 since 2014. Cllr Paul Spooner had the opportunity to engage with Normandy residents on A46 when he addressed Normandy residents in February 2016, but chose not to take it. The NPPF is quite clear that there should be early and meaningful engagements with residents.

Failure to meet the principles of the NPPF

There are places where the GBC Submission Local Plan does not meet the principles set out in the NPPF. I have described some of them in comments on individual policies below.

However, in particular, I consider that GBC have not met either its own policies on Biodiversity, found in Policy 14, nor those of the NPPF section 11. There will be a significant net loss of Biodiversity if this Plan goes ahead in full. The GBC Spatial Vision states "Over 250ha, equivalent to more than 350 football pitches, will be provided in perpetuity for the use of residents and visitors. This space will also support and improve the borough’s biodiversity". This is disingenuous. GBC plans to use 467ha of land that is either farmland or other green space for building. Against this it is creating 249.8ha of mixed use Suitable Alternative Greenspace (SANG) a net loss 218.2 ha of fields and other green space.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removal of LRN19.

3,850 new homes are being built as part of the Aldershot Urban Extension, a further 1,200 at the Princess Royal Barracks at Deepcut and at least 1,870 homes in Ash and Tongham. All these homes are all being marketed as suitable for people who work in Guildford. The result will be excessive pressure on the A31 and A323 at all times.

In addition, the A31 will have a new signal controlled exit route from site A26, Blackwell Farm. It would seem that the proposed road bridge at Ash level crossing, site A30, on the A323, has been removed from the Plan. This is a significant bottleneck.

The A31 is already congested at both peak and normal times and the new signal controlled junction at Blackwell Farm will make the congestion worse. The A323 is congested at peak times. Normandy and Worplesdon are facing traffic blight, gridlock at peak times, and increased levels of pollution and noise. Even a small road improvement such as LRN19 should be kept, anything that might help even a little.
On a personal note, it is becoming harder to turn out of Bailes Lane into the Aldershot Road at busy times. I fear it may become impossible.

I would have liked to have seen some strategic thinking about how the road infrastructure to the west of Guildford could be improved to handle the increased traffic from these large developments. Currently there appears to be no mitigation at all in the Guildford Borough Council jurisdiction.

Comment ID: PSLPA16/702  Respondent: 8893857 / Derek Bullman  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base
I wish to object strongly to much of the contents of this consultation document. My objections are both general and specific in relation to West Horsley, which is where I have lived for the past ten years.

General objections:

1. Guildford Borough Council (GBC) has not revealed the basis upon which the alleged additional housing need has been calculated. Post the referendum, with restrictions on further immigration, the assumptions - whatever they may be - may well need to be revisited.

2. There need to be exceptional circumstances to permit appropriate building in the Metropolitan Green Belt.

3. I strongly support fully maintaining the Green Belt and village boundaries "as is"

4. These proposals are extremely inappropriate

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/704  Respondent: 8893857 / Derek Bullman  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections specific to West Horsley:-

While there is obviously some modest scope for further appropriate housing development in West Horsley - and the Parish Council has identified a need for approximately twenty affordable homes - I strongly object to the suggestions for West Horsley in this Local Plan for the following reasons:-

1. The infrastructure - schools, medical facilities, roads, parking, drainage etc. are already at breaking point. There is nothing in these proposals about how the insufficiencies would be addressed, what it would cost if feasible and who would be accepting liability to pay for it.

2. There is a duty of care on the part of GBC Planning Department towards existing residents which has been comprehensively ignored in drawing up this Plan for consultation.

3. The character of West Horsley village would be completely ruined by development on the scale envisaged. The number of dwellings proposed is preposterous in relation to the size of the existing village and the proposed densities would be totally out of character with the built environment. There are no precedents for flats and townhouses in West Horsley. Planning Policy Guidelines have again been completely ignored.
4. Any development on the newly identified site A41 on East Lane opposite Greta Bank would be unthinkable. This is an unbroken rural vista of fields, trees and sometimes horses, enjoyed by thousands who make their way along this thoroughfare, especially at peak times.

5. It appears that GBC foresees the best economic development opportunities as lying on the opposite side of Guildford to West Horsley. Why then is huge development of West Horsley such a good idea?

Needless to say I also object to massive development on the site of the former Wisley airfield.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. We object to the plan which proposes to increase the number of homes within West Horsley by 35%.
2. We object to the plan which proposes that over 70% of new housing to be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
3. We object to the disproportionate allocation of housing in this particular part of the borough.
4. We object to the detrimental impact on transport, local roads and road safety. The roads within the villages of West and East Horsley are already worn and full of potholes and are in need of resurfacing (along with the pavements) – more cars, vans and lorries on these roads are going to cause even more problems.
5. We object to the plan due the increased volume of car traffic. The proposed developments would result in an estimated 1,000 additional cars on the local roads.
6. We object to the plan as there is a lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
7. We object to the plan as the local facilities are already stretch (i.e. doctors, dentists, etc). More people moving into the area, without another doctor’s surgery being added, would cause so many more problems with obtaining appointments.

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the reliance upon calculations for the number of new houses required which are based upon an undisclosed mathematical model which has then been further increased by GBC to result in a population increase set at 70% above the official national estimates for the Borough. !'lo justification has been provided for this. Moreover, the DLP takes no account of the different social or affordable housing needs across the Borough; the proposals as they stand will require affordable housing to be included in developments whether or not such properties are needed to house those locally employed or are otherwise appropriate to those in need of social and affordable housing.

I object to the proposals to change the status of the land currently within the Metropolitan Green Belt. About 65% of all the housing development proposals within the DLP relate to land currently within the Metropolitan Green Belt. Our Green Belt is precious. It is for us to conserve aid protect such land for future generations; removing land from Green Belt status is a once-for-all decision. not to be taken lightly; indeed the National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is not an exceptional circumstance in law. The very existence of the Green Belt/AONB is a reason for not meeting objectively assessed housing need (ie such protected land is a legal constraint against any such development). No exceptional circumstances have been demonstrated, including as to the removal of Wisley Airfield from the Green Belt.

I object to the proposal to inset East Horsley from the Green Belt instead of maintaining its current "washed over" status. This proposal would change the nature of this area of countryside forever. Contrary to the suggestion in the DLP, East Horsley is set in a rural location and has the character of a rural village. Over a third of the land within the village boundary is woodland, and additionally the gardens attaching to the majority of the houses are relatively large, making an additional contribution to the openness of the area. The developments proposed would destroy this character and eventually merge historic and separate villages. Furthermore, the current open spaces provide important habitat for local wildlife that would be lost under the development as proposed.

I object to the proposed designation of station Parade as a 'District Centre'. The proposal demonstrates a total misunderstanding of the facilities within the village centre and the nature of the shops and businesses that currently operate here; it is inappropriate for the area and would adversely affect existing businesses.

I object to the proposals set out in relation to infrastructure for the area. Our existing infrastructure in the form of drains, water supply, medical facilities, schools and roads, cannot cope with the proposed number of new homes; the OLP proposals do not adequately respond to the existing difficulties in relation to infrastructure, let alone meet the additional burden that will be exacted by the developments proposed.

Aside from the A246, roads to and through East and West Horsley are narrow and winding; they are lanes, not major roads, and the proposed developments will add to existing congestion; for example, the proposed development opposite Horsley Station on Ockham Road North. Land proposed for development in both East and West Horsley is subject to flood risk; the Environment Agency has acknowledged the importance of retaining greenfield sites in managing flood risk generally.

Users of our Medical Centre regularly have trouble obtaining a prompt appointment due to the number of patients registered, and parking in order to visit the doctor is a problem. Our local primary and secondary schools are already full to capacity and with waiting lists; if children are required to travel further afield for their schools their transport adds yet further congestion to already busy roads that were never designed for the weight of traffic they now carry, and the spreading of children into schools across a wide geographical area impacts negatively on their community involvement. These issues will only get worse with an increase in housing numbers locally.

The DLP fails to properly address and deal with these issues. I ask the Council to note these objections, and act upon them by rejecting the Draft Local Plan as currently formulated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I support this development subject to suitable arrangements for parking and suitability of the site on environmental grounds.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the number of houses being proposed (current suggestion appears to be 1750).

The A320, which is planned as the access road, already exceeds capacity and no development should take place until proper access is sorted out. A high percentage of these homes should be affordable and prioritised for people for families awaiting housing in the Guildford area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Development in the villages should be appropriate in scale and have no unacceptable effect on the occupants of existing buildings. This has not always been the case with previous infilling developments which have been accepted in Jacobs Well.

I object to the removal of the village of Jacobs Well from the Green Belt. Infilling in our village has already led to planning permission being granted for developments which are totally out of character with the surrounding properties.

I object to the use of large swathes of Green Belt land for development. National policy attaches great importance to the openness and permanence of the Green Belt and this openness has a significant part to play in the well being of our population. The heritage of future generations should not be squandered.

I am totally opposed to any development on flood plains. Our village suffers from flooding, being close to the floodplain near Burpham Court Farm where a major road development The Clay Lane Link Road remains part of the local plan for infrastructure despite part of the area being 3b flood plain. The Slyfield Area regeneration project also proposes development on some 3b floodplain, to which I object.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed SHMA figures and support the submission by Guildford Residents’ Associations which challenges the figure of 693 houses per annum. The reports commissioned by GRA and others prove that the methodology used has been deliberately withheld from public scrutiny and seems to be flawed and that such a high level of housing is justified, particularly in the light of the recent economic and political situation.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy D4 Development in urban areas and inset villages. Although GBC have added some additional verbiage aimed at protecting villages re infilling, the JWRA does not feel this goes far enough. Development in the villages should be appropriate in scale and have no unacceptable effect on the occupants of existing buildings. This has not always been the case with previous infilling developments which have been accepted in Jacobs Well. We also feel that the data source, with regards monitoring, should also be planning applications, not just appeals

We support the improvements planned for the A3 through Guildford (which are long overdue) and to empower the Gosden Hill and Wisley developments.

We object to any future Clay Lane Link Road, which is not a sustainable way for traffic to reach the A3, as it would cross a 3b floodplain, create very dangerous junctions, disrupt a fragile ecosystem and cause unacceptable air and noise pollution close to residential properties, with many elderly residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Although the JWRA welcomes the fact that flow routes will be considered as part of any Flood Risk Assessment, the JWRA still totally opposes and objects to any development on flood plains. Jacobs Well suffers from flooding, being close to the zone 3b floodplain near Burpham Court Farm where a major road development, The Clay Lane Link Road, is still under consideration. With town centre and SARP development going ahead, with related flood risk mitigation, plus climate change and the increased potential for flash storms, to ensure risk to properties is only once per 100 years, the Burpham Court Farm zone 3b flood plain is therefore even more important in reducing the risk of flooding in Jacobs Well and must be preserved as is and not developed upon.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2
I strongly object to the number of proposed new developments in the plan for East and especially West Horsley. In West Horsley you are proposing an approx. 35% increase in the number of houses which will ruin the village:

- Proposed housing densities are much higher than currently exist and will be completely out of character with the existing village
- Expansion on this scale is not sustainable – the existing infrastructure (schooling, doctors, parking, traffic, public transport, drainage) cannot support it
- West Horsley is a beautiful village, partly in an area of AONB and this development will ruin it and it will therefore cease to attract large numbers of tourists and visitors for walking and cycling etc
- Like many other residents of the village I am opposed to the village being removed from the greenbelt by insetting and extending settlement boundaries. Green belt is there to protect villages like West Horsley. Before we know it, Horsley will be like Walton– just one sprawling line of housing.
- Green belt land should be protected and no exceptional circumstances have been made for developing greenbelt in the Horsleys
- The local schools are already completely over subscribed

In addition I have seen no evidence to support the fact that so many more houses are needed in West Horsley and the Green Belt and Countryside Study which I read seems completely flawed.

Commenting on a specific site which is the plot of land to the south of the A246, bordering the A246 and to the west of Shere Road and also bordering Shere Road – Dandara have an option on this land are our trying to seek approval for housing development. I am against developing this plot for the infrastructure problems (listed above) and because it would be completely wrong as having open space and farm land next to roads is an important aspect of feeling in the country ie that is why this plot is currently greenbelt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the DLP as it currently stands. It has been constructed on the basis of housing numbers which no-one, councilors or members of the general public, has had the opportunity to scrutinize. GBC has consistently refused to make available the formula by which the numbers have been calculated, apparently because the company to whom the task of determining the numbers was delegated has claimed intellectual property rights as a reason for non-disclosure. Without public scrutiny of the projected housing numbers the DLP can have no validity.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Notwithstanding the above, with regard to my own locality:-

   • For reasons previously stated, I OBJECT to the insetting proposed for East and West Horsley the sole purpose, of which, is to enable significant housing. The increase in housing proposed (some 600 dwellings overall - OLP plus other "minor" potential developments with some 400 plus in West Horsley) is excessive and will fundamentally change the character of both villages, placing unsustainable pressure on the local infrastructure. As far as West Horsley is concerned it is difficult to equate the DLP's proposals with the planning authority's Settlement Hierarchy statement that West Horsley is unsuitable/or substantial growth. A proposed circa 40% increase in housing stock within the village (no doubt to be followed by further development if greenbelt status is lost) is, in my view, substantial and excessive.

   • I OBJECT to the proposal to develop a "new town" of some 2,100 dwellings on the former Wisley. The consequence of this, coupled with the developments proposed for the Horsleys, will have a devastating impact on the immediate locality, increasing the number of homes by nearly 80% of current homes and releasing significant numbers of additional cars into an area that consists largely of narrow country roads. The local infrastructure cannot accommodate such a dramatic increase in housing/vehicle numbers and local facilities, particularly the railway stations of Horsley and Effingham Junction, would be overwhelmed. Similarly, medical and educational facilities will be adversely affected, at least until additional facilities are developed. The whole nature and character of Ockham and the Horsleys will be destroyed if this proposal proceed.

   • Of the developments proposed for East/West Horsley, I PARTICULARLY OBJECT to:-

     • The proposal for some 100 houses on site. Any access to this site will require demolition of a house(s) fronting Ockham Road North. Such access will compromise traffic and pedestrian safety, releasing traffic from the development onto a minor (but extremely busy) road with poor sight lines and with only narrow footpaths for pedestrians (including young children on the way to local schools), who are obliged to walk no more than 1-2 feet from passing traffic, including very heavy lorries and goods vehicles most of which, I might add, break the speed limit. Additionally, the site is subject to severe flooding, and abuts Lollesworth Woods, which are designated a Site of Nature Conservation Importance. Although these woods are private property, it is inevitable that the nature of the woods, the flora and fauna, will be irreparably harmed by the inevitable incursions by inhabitants of any development of this site.

     • Site A41 (90 houses), which looks as if a blindfolded planner has just put a pin in it is difficult to imagine a more inappropriate site. A housing development here will destroy what is a significant stretch of rural pasture with woodland behind, which provides an unbroken rural seen and feel between two separate parts of West Horsley.

4.4 Finally, I OBJECT to the proposed designation of Station Parade, East Horsley as a "Rural District Centre" which, by definition, opens the village to uses which are wholly inappropriate.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposals in the DLP to build some 65% of new houses in the current greenbelt and the insetting of many villages to facilitate this, more so since I understand the leader of the council proposes to CREATE a new greenbelt area in his own and his predecessor’s community. GBC’s

Conservative group was re-elected on a manifesto promise to protect the greenbelt and this Government's advice is clear that housing need alone is not adequate grounds for building on the greenbelt. Insufficient use has been made of brownfield sites, much being earmarked for commercial development (a sector in decline with in the borough given the growth of on-line shopping, etc.), and the number of houses planned in the urban areas is, I believe, too low. It would seem that regeneration of some areas has been ignored with the plan concentrating instead on the building of homes on greenfield sites. This is not a sustainable policy given the disproportionate effect it will have on traffic generation (for which there is no adequate infrastructure). For these reasons alone the DLP, in its current form, should be rejected.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Former Wisley Airfield

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. I OBJECT to the proposed development on the former Wisley Airfield. Despite further proposed amendments (as part of the current appeal) they do not alter the fact that this is a wholly inappropriate development for this site the impact, of which, will be devastating for the surrounding communities in, and outside, the borough. The proposed development cannot possibly meet true sustainability objectives.

3. Despite proposed changes to the Local Plan, I OBJECT to what I see as disproportionate development. The local area (including the Horsleys, Wisley Airfield, Gosden Hill Farm and Ripley/Send/Burnt Common) appears to be taking a major
proportion of the borough's total proposed housing development. The area does not have the infrastructure (road, rail, schools, medical facilities, sewage systems, etc.) to support such development numbers. The sheer volume of such developments (in the rural/semi-rural east of the borough), combined with proposals in other local authorities, will only add to the gradual coalescence of the London suburbs with towns, villages and other settlements to the south west of the capital.

I wish to object to the new version of the plan.

It envisages an unacceptable degree of incursion into the green belt. Unless the green belt is given priority as a key contributor to the quality of life, which must be protected, it will in the end suffer death by a thousand cuts. In my view the plan far too readily extends village settlement areas without sufficient regard to the character of those villages.

The Guildford area is currently very congested and further significant building will require major infrastructure investment much of which cannot be easily funded by developers. It seems absurd to be proposing building on such a scale without more convincing detail of how the necessary resulting infrastructure can be set up.

There is a clear need for more housing, particularly small and affordable dwellings, and this need cannot be easily met but the plan displays disappointingly little imagination in devising solutions to the problem.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North
I OBJECT to the 2016 Draft Local Plan in its entirety:

To proceed with house building on this scale within already overpopulated village areas would totally destroy the fragile rural aspects we have been careful to try and preserve for so many years.

There is no proven demand for anything like this level of new housing from the existing community and this has been demonstrated by the results of a survey carried out by West Horsley Parish Council only last year. Any demand for such expansion is founded upon developers' determination to make money, GBC councillors' self interest and a total disregard from local and central government towards electors' wishes.

The Green Belt was established for the purpose of maintaining rural space and to prevent urban sprawl. It is not there for transient local government councillors to arbitrarily tamper with this provision. They have not been given this authority.

I wish this letter to be passed to the Planning Inspector carrying out the forthcoming review of the 2016 Draft Local Guildford Plan and I expect any conclusions drawn from local correspondents to be acted upon accordingly. Clearly, Guildford Borough Council cannot be trusted to deal with this issue.

How is it to be expected that developers will be able to mitigate these effects (under sustainable Transport Policy i3)?

1. Access to Shops and Local Facilities

No thought has been given to the increased parking demand resulting from these developments. Parking at the shops in any of the three retail areas is already difficult at the best of times. Has anyone carried out an assessment of the implications of adding a possible 700 more cars in East and West Horsley? No, of course not.

Recruitment of doctors to work in GP surgeries is known to be a national problem and the local medical centre is already increasingly stretched, going by lengthening waiting times for appointments. How is GBG going to address this issue? It can't.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the disproportionate distribution of houses across Guildford Borough, by far, the North East has taken an unsustainable number, in an area where country lanes are narrow and volume of traffic now using through routes makes roads gridlocked at rush hour.

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners’ views, or the costs involved in improving the infrastructure, currently out side their financial capability.

The methodology is also flawed as this plan has been formulated without regard to village Neighbourhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to stretching Infrastructure to breaking point: Local services are already under strain and a significant increase in population would stretch these beyond breaking point. These include

- Parking at local station: parking after rush hour is already difficult;
- Doctor's surgery: where getting appointments is already difficult
- Local schools: where it is already difficult to get places
- Additional traffic on roads: sadly I already refuse to let allow my children walk to the local shops as there are already many vehicles drives too quickly along these narrow village roads - even more will increase the risk of serious accidents; and surrounding major roads (A3/M25) already suffer from long delays throughout rush hour but also at weekends and are not able to cope with additional demand with further expanding capacity

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am strongly against the Draft Local Plan on a number of points, including:

I object encroachment onto the Green Belt: GBC has failed to demonstrate that exceptional circumstances exist to adjust the boundaries of the Green Belt. Once lost, this land will never be green again. GBC must go further in utilising all brown-file sites and should go further in protecting green sites for generations to come.

I object to the lack of Proportionality: If the proposals are fully realised across East Horsley, West Horsley and Ockham, the number of households would increase from dramatically, in part due to the ridiculous high and out of character density that the plan suggests. This represents a disproportionate impact in comparison with other parts of the borough better placed to deal with large population increases.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Once again we are called upon to give our views on a local plan for the area in which we live.

Once again we are required to say NO to large developments that will totally alter the character of this area changing this village forever. I will restate that I have decided to live in this area because it is in the Green Belt and I wish it to remain so.

I oppose this local plan for numerous reasons of lack of infrastructure and overcrowding of roads and services. Please LEAVE the green fields around the Horsleys and Ockham alone.

They are part of the reason that people have chosen to live here. I do not oppose development of brown filled sites but I do not want the ruination of the villages of East And West Horsley.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

22. APPENDIX C

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/2925  Respondent: 8896097 / Andrew Fordham  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base
23. APPENDIX D

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The “objectively assessed need” figure of 693 homes a year is too high.

A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.

The current SHMA inflates the proposed housing figure due to failure to correct for errors in the historical data for international migration flows, issues with the way it considers students and affordability and flaws in the method for estimating the number of homes needed to support job growth.

It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

- 2010 – 2014 from Crashmap data Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015
- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  Surrey Fire and Rescue deployed.

2016
- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham. No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel
thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day. Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development. The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants. The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km. Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/5993  Respondent: 8896097 / Andrew Fordham  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

21. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys.
Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car. The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt. I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council’s eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford. Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The
development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

8. POLICY D3

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Comment ID: PSLPP16/12160  Respondent: 8896097 / Andrew Fordham  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

16. POLICY D4

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12140  Respondent: 8896097 / Andrew Fordham  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1
### 5. POLICY E1

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

6. POLICY E2

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt. Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

7. POLICY E5

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Attached documents:

Comment ID: PSLPP16/12163  Respondent: 8896097 / Andrew Fordham  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
18. POLICY E6

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
14. POLICY E7

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done.

However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF. The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

Answer (if comment is on questions 1-7 of the questionnaire): ()

12. POLICY H1

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages
than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Answer (if comment is on questions 1-7 of the questionnaire): ()

13. POLICY H2

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to other towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price? As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**17. POLICY H3**

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related".

In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time.

In addition, the road surfaces are in a poor condition. I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems. With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.
The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy 11. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy 11 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
10. POLICY I2

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)
I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period.

Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Answer (if comment is on questions 1-7 of the questionnaire): ()

11. POLICY I3

I OBJECT to poor air quality concerns (Policy I3)
Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.
To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth. In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

19. SITES - POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment...
seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

Comment ID: PSLPP16/12138  Respondent: 8896097 / Andrew Fordham  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4. POLICY P4

I OBJECT to development in areas which are at risk of flooding (Policy P4) National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary. I set out below my objections to specific policies and matters within the Plan.

1. POLICY S1

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**2. POLICY S2**

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.
These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.
The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

2. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.
The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal. As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

“Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound.

Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018 Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.

The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

The Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.
In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition. In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Policies A1 to A57: Site allocations**

I object to the inclusion of all the Green Field sites in the plan until exceptional circumstances can be proven.

I also OBJECT to the total volume of proposed houses if you add together all the following proposals: A35, A36, A37, A38, A39, A40, A41, A42. This total volume is far too high in relation to existing numbers of houses in these rural villages. The increase in West Horsley alone would be 35% which is quite disproportionate compared with other areas of the Borough. Furthermore, the density of housing proposed is far too high and far higher than existing in these villages.

In addition:

- Site A36 I object as this should remain as a hotel site.
- Site A37. I object as the density is too high.
- Site A38 I object as the density is too high
- Site A39 I object as this is flood control land
- Site A40 I object as this is removing environmental benefits from a camp site which receives visitors from all over the world and would make it unviable.
- Site A41 I object to the reduction of openness and visual amenity.
- Site A24 Flood plain. More building anywhere exacerbates flooding.

I object because together these sites make a virtually continuous mass of bricks and mortar down the A3. Settlements merge together with no break. The Green Belt was set up to prevent this for the benefit of all. Leave it alone.

Site A35 Wisley Airfield/Three Farms Meadow Why on earth is this still in the plan? It was unanimously rejected by the Council for over 14 reasons and rightly so:

Green Belt location and absence of “exceptional circumstances”, • Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and have never had any buildings on it. • Proximity to
RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA). • Proximity to A3/M25 bottleneck and Ripley village and roundabouts

Absence of adequate traffic data.

- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
- Loss of high-quality agricultural land (55% of the site), in breach of national policy.
- Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
- Presence of a Surrey County Council safeguarded waste site.
- Cost of infrastructure required to the detriment of alternative more favourable sites.
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
- Impact on listed buildings.
- Difficulty of SANG siting and inability to divert residents and their pets away from the SPA. • Extreme housing density with tiny garden spaces.
- Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
- Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).19
- Failure to evaluate the cumulative impact of this and nearby development sites on the area.

All the reasons still remain valid.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to E5 to the extent that it includes extensions of the Green Belt in some areas (Ash and Tongham) when you are simultaneously effectively removing the Green Belt from other areas, *without a convincing argument as the merits of the former against the disbenefits of the latter, in relation to each of the specific affected areas.*

E5 is incompatible with the high housing numbers proposed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Comment ID:** PSLPP16/18572  **Respondent:** 8896161 / Carol Wilson  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to policy E6 because we do not need to create new visitor attractions. Conversely, we need to preserve the Green Belt and the countryside. If we just preserve the greenbelt and the natural countryside there will continue to be sufficient reasons for tourists to come and visit. That is why they come. We do not need to Disneyfy attractions such as Newlands Corner. Leave them alone.

[A36] I object to the use of the Thatchers Hotel site for housing. There are too few hotels already and the Thatchers Hotel is close to the new Opera house at Horsley Place.

The River frontage needs to be sorted out with proper vision to make it more accessible. It is a great asset not well used at the moment.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H1: Homes for all

I OBJECT to this policy for the following reasons:

It puts building homes as a higher priority than (a) preserving the Green Belt and (b) making attempts to reduce the growth that feeds the need for new housing.

In the specific case of West Horsley, the numbers of houses proposed are not required, as is proven by the 2014 Housing Survey carried out by West Horsley Parish Council which identified only about 20 affordable homes being required for local people who want to remain in the village.
In the specific case of West Horsley, the proposed housing densities are much higher than the existing layout.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/14750  Respondent: 8896161 / Carol Wilson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H2: Affordable homes

I agree with the need for affordable housing, but I OBJECT to the high volumes and high densities proposed in the West Horsley areas.

The affordable homes will be too expensive for key workers and so we need some social housing provided by the Council for rent, preferably near to workplaces to minimise cost of transport.

I object to any affordable homes being built in the Green Belt or elsewhere which are built to enable other market priced houses to be built in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14751  Respondent: 8896161 / Carol Wilson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H3: Rural exception homes

I OBJECT to Rural Exception homes overriding Green Belt rules. This seems like a recipe for putting a grand large house anywhere in the Green Belt to finance the affordable housing. This does not protect the Green Belt.
I OBJECT to the Plan making proposals for areas of development without simultaneously making plans for the necessary infrastructure to be in place at the time it would be needed. Consequently I submit that the Plan is severely flawed. In many cases it is unclear if the improvements would ever be made – so Green Belt would be sacrificed unnecessarily.

The choice of large potential sites for building seems to be preferred by GBC possibly so as to get funding for infrastructure. I object to this sacrifice of beautiful land for huge housing estates. We do not need them. Small is what we need.

It seems that the effect on all of the infrastructure of a 77% increase in homes in Ockham and the Horsleys has not been considered or the cost calculated properly. We are at capacity already in terms of:

- State Schools - all full. Private schools expensive and traffic problem from non-locals
- Medical services – both GP and Hospital – long waiting times for both, as full
- Station parking – no spaces by 9.00am on weekdays. Same at Effingham.
- Sewage – pipes old and falling apart, our road (Pincott Lane) has to have 6 monthly clean and repair. Overflows frequently as poor fall and easily blocked. Raw sewage goes straight into the water courses. There is no capacity downstream at the sewage works.
- Roads – small unlit country roads with no paths – we like this. Not suitable for influx of thousands of extra cars. (2 per household)
- Surface water drainage – with a natural spring line where the chalk meets the clay, and poor flow we have regular flooding of roads. Ripley Lane and Ockham Road have been closed regularly after rain over recent years.
- Parking at shops – Difficult now, impossible with 70% increase in numbers. Even worse if the ‘centre’ is enlarged – no room for that anyway.

The area will sink under the load if these proposals are implemented. The whole area would be ruined for ever.
The County Council has said it has no funds available to cover upgrades. We cannot cope with the increased housing proposed in the Horsley area, let alone with Wisley Airfield as well. What changes (2016)/further amendments (2017) do you suggest should be made to the document? Attached documents:

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy I3: Sustainable transport for new developments

I OBJECT to this policy to the extent that it has a detrimental impact on the existing Green Belt. I also OBJECT to this policy as it does not include, but should include, compulsory cycle lanes separated from the roads on all new developments. I also OBJECT to this policy as it is too weak in saying only that developers “will be expected to” propose and secure travel Plans for their developments and contribute to transport arrangements for the able and disabled. This proposed policy needs to be made more robust and properly tie down developers and major housebuilding companies.
If new towns such as Wisley are built, then there will be insufficient employment locally and the car will be the only mode of transport available for commuters. The roads would grind to a halt.

The bicycle is good in theory but unlikely in reality for many. Most cyclists are recreational cyclists. Others are too old, too young, have too much to carry, do not want to arrive sweaty.

I object to the proposals to inset 14 village from the Green Belt and to change settlement boundaries. Land can only be removed from the Green Belt in exceptional circumstances. Housing is not a special circumstance.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P1: Surrey Hills Area of Outstanding Natural Beauty

The policy should be expanded so that developments that detract from the views from the Surrey Hills are appropriately controlled and minimised. The villages viewable from the Surrey Hills (which include West Horsley, East Horsley and Ockham and Wisley Airfield) should not be included as special areas for additional building sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy P2: Green Belt and the countryside

This is what the NPPF says the Green Belt is for:

- to check the unrestricted sprawl of large built-up areas;
- to prevent neighbouring towns merging into one another;
- to assist in safeguarding the countryside from encroachment;
- to preserve the setting and special character of historic towns; and
- to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

I OBJECT to the Green Belt and the Countryside policy for the following reasons:

It is completely illogical on the one hand to say that “you will continue to protect the Metropolitan Green Belt” when in fact you are proposing to put 70% of all new developments in the Green Belt! He Conservative party also promised to preserve the Green Belt.

There are no exceptional circumstances mentioned for removal of parts of the Green Belt. Housing is not an exceptional circumstance (NPPF)

There is plenty of Brownfield to use. Of course it is often more expensive to prepare a brownfield site for building, but this has to be done – it’s called recycling which is advocated in another part of the plan. Recycling of derelict and other urban land is encouraged by NPPF’s statement above.

Greedy developers prefer the cheaper more damaging option.

I object to the proposals to inset 14 villages from the Green Belt and to

change the settlement boundaries particularly in the cases of East Horsley, Effingham, Jacobs Well, Ripley, Send, Send Marsh/Burnt Common and West Horsley. Land can only be removed from the Green Belt in exceptional circumstances. Housing is not a special circumstance.

West Horsley is a small village dating back to the Saxons. It is adjacent to the National Trust Hatchlands Estate, and also has 41 listed buildings. Part of West Horsley is in a Conservation Area.
It now consists predominantly of mixed, and generally quite old houses along either side of a long road, The Street. There are some small developments, again of mixed housing, on adjoining roads. There are two old traditional pubs, one towards the north (dating back to c. 1500) and the other towards the south (dating back to pre-1800). There is one village shop, shortly to close down, because of parking problems. Further to the south, Shere Road is again a long road going up towards the North Downs Way, and with a variety of housing either side, pretty well all with direct views to the countryside.

In other words, most of West Horsley is a typical small, old village with ribbon development. Indeed, if from any house you cannot see directly to the surrounding countryside, it is not more than a one-minute walk to enjoy the wonderful rural views.

I OBJECT to the proposed density and numbers of houses to be built in both West and East Horsley.

I OBJECT to the removal of Three Farms Meadow from the Green Belt.

In particular I OBJECT to the proposal to build 385 homes in West Horsley. That would represent a colossal percentage increase in the number of houses in West Horsley and would completely destroy its rural village nature.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P4: Flooding, flood risk and groundwater source production

The GBSPLP2016 says that “Detailed flood risk modelling has not been undertaken in all parts of the borough”. I OBJECT to proposals to remove areas relating to East and West Horsley from the Green Belt when this modelling has not been undertaken. It is clear that flood risk and groundwater source production is not properly under control in these areas and this has not been allowed for in the GBSPLP2016.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy S1. Presumption in favour of sustainable development

I OBJECT

The NPFF defines sustainable as “ensuring that better lives for ourselves don’t mean worse lives for future generations”

I object as it is clear that the proposed local plan will not make lives better for future generations, because the Green Belt area will firstly be reduced in size and secondly will be built on. The Green Belt is there for a purpose and the Government’s Planning Guidance document para 81 states that “local planning authorities should plan positively to enhance the beneficial use of the Green Belt, such as looking for opportunities to provide access; to provide opportunities for outdoor sport and recreation; to retain and enhance landscapes, visual amenity and biodiversity; or to improve damaged and derelict land. GBPSP2016 is in contravention to this guidance.

The proposed developments in West Horsley are not sustainable. We have only one small shop which is shortly to close, and no post office!

Proposed developments have a negative effect for future generations in that they will be deprived of Green Belt. I object.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2: Planning for the borough - our spatial development

I OBJECT to this policy.

This policy aims to add 13,860 new homes to Guildford Borough over 2013-2033. This is equivalent to 693 new homes per annum.

The numbers seem to result from a forced growth policy rather than a reasoned analysis.

Furthermore, students have not been properly accounted for, and it does not (but should) require the University of Surrey to build the student accommodation that it previously committed to.

These numbers are excessive and based upon false assumptions and using a model that the public have not been allowed full access to so that it can be properly verified.

The Council has not scrutinised them either which is an incomprehensible error. Nevertheless, from the limited information provided to some, Councillor David Reeve and Guildford Residents Association (who I believe used an independent expert) have separately identified numerous errors that need correcting and will lead to a reduction in forecast numbers.
GL Hearn subcontracted the work on the SHMA to J Gardner Consultancy and subcontracting is against the rules. I object to my money being used in this way.

Furthermore, the economic growth rate forecasts need to be revisited in the light of Brexit which is already causing an economic slow down and will change requirements significantly.

The SHMA numbers therefore need to be revised downwards.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the amount of building proposed on the Green Belt. Policies and promises are being broken in this plan in a shameful way. Housing is not a special circumstance. The density proposed is not in keeping with current densities. 57% of proposed new homes are on the Green Belt. How can this be in agreement with promises to protect the Green Belt by the government and by the Council?

I object to the insetting of villages from the Green Belt and object to the fact that no changes are proposed to this damaging idea. My local villages of East and West Horsley would be severely affected and the openness of the landscape would be compromised.

The Green Belt has the job of protecting the area from London sprawl and is therefore especially important to the east, adjacent to the M25.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Constraint has not been applied to the housing numbers of homes. The rate of growth is still too great and will spoil the borough. 395 additional homes for Horsley is too high. 25% increase of the size of Guildford by 2034 is ridiculous. No account has been taken of Brexit uncertainty either.

Flawed evidence is still being used to justify over expansion. Transparency is needed.

I object to the fact that, despite some changes in sites, the east of the Borough is planned to have more than its fair share of development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

• disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Page 1866 of 3367
I am writing to voice my concerns about the above project which I have done many times before.

I object to the plan for the following reasons:

1. The proposal to remove my village - West Horsley - out of the green belt has not been properly considered. Once the action is taken it will have huge effects and yet the decision has been taken lightly without due consideration of the long term consequences.

2. Our village infrastructure is already at maximum capacity. Our schools are full, the station car park and the trains are oversubscribed leading to terrible travel conditions in rush hour and the roads are already busy. How can we cope with the impact of more people?

3. The drainage system needs to be improved at the moment - how will it cope with more houses and people. It won't.

   1. Any new housing won't be affordable for anyone apart from the richest - my sons will never be able to live in this village when they require their own homes.

   2. If the Wisley development goes ahead all the above problems will be magnified.

This is not a good plan. It requires far more planning about what happens afterwards and I have seen no plans that cover this at all.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/1610  Respondent: 8896673 / James Gooden  Agent: 8896673 / James Gooden

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We are writing to object to Guildford Borough Council's Draft Local Plan. We believe Normandy is unsuited to the sort of expansion proposed. We are particularly concerned by the high levels of development proposed which completely disregard Green Belt protection.

It is clear that GBC has taken no account of one of the major purposes of the Green Belt which is the prevention of urban sprawl. It is important that the rural farming village of Normandy retains its green belt status. No account has been taken by GBC of the concept of "openness" and yet this is one of the main purposes of Green Belt, as evidenced by the Planning Inspectorate in recent appeal decisions (indicating they recognise that land contained in Normandy contributes to the openness of Green Belt).

NEW SECONDARY SCHOOL

We object to the proposal for the 1100 housing development on Land parcel A46 because there is no proven need for a new Secondary School. And without a school there is no need for the associated development plan.
Currently neighbouring Secondary Schools - Kings College and Park Barn - are under-utilised (the latter by 57%). The Head Teachers of Ash Manor School and Kings College have expressed a willingness to expand once they are full. They have the facilities to do this. Secondary Schools to the west of the Borough are under subscribed by 736. Another 480 places will be available at the new Technical Collage (2018) and there are approved expansions at Guildford County School and St Peters. The new Hoe Valley School will have 120 places available per year, 25 places this year not taken (no catchment area). Developments in teaching and learning (independent learning) mean that Secondary Schools could become obsolete in the near future. In addition there is a falling birth rate in Guildford.

Surrey County Council has failed to prove an undisputed need for a 7 Form Entry Secondary School as well as the availability of financing this to make it a reality.

With No Proven Need there can be -

No New Secondary School and Therefore No Housing Development.

Comment ID: PSLPS16/3099  Respondent: 8896673 / James Gooden  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

ENVIRONMENT

We object to the development proposed by GBC as 20 years of research evidence has shown that the continual fragmentation of natural habitat has caused the dramatic decline of our birds and wildlife species to levels when even our most popular species are under threat. Gardens planned for this development are not enough to combat this decline.

All habitat within or adjoining the parcel of land called A46 are priority habitats under the NERC Act including protected species. Therefore it is vital that this is a key consideration when drafting the Local Plan. However GBC has failed to adequately consider the protection of wildlife within Policy 14.

The following are becoming increasingly rare in the local area:- Hedgehogs, Dormice, Great Crested Newts, Barn Owls, Stag Beatles, Skylarks, Toads, Lizards, Grass Snakes, Adders, Slow worms, Badgers, Bats.

There are vitally important ecological networks (green infrastructure corridors) that surround A46 (namely Ancient and Semi-natural Woodland, Veteran Trees, Hedgerows, Semi-improved Grassland, Farmland and the Stream which flows along the back of Guildford Road properties lining the field at the back of The Old Vicarage, Wyke). These connect to other important and protected sites within Normandy Parish and the wider countryside (namely Wanborough and Normandy Woods Site of Nature Conservation Importance (SNCI), A47 The Paddocks SNCI, Normandy Pond SNCI (into which the stream runs), Normandy Common SNCI (put forward by the Surrey Local Nature Partnership in 2015), Wyke Churchyard SNCI and Little Flexford SNCI.)

This site is in close proximity (0.8 km) to the European Nature 2000 "Thames Basin Heaths Special Protection Area” that hosts 3 rare ground-nesting bird species in a rare heathland habitat.
GBC should apply constraints when calculating the overall housing target in the Borough because of the TBHSPA (NPPF). GBC has not applied constraints and so are compromising sensitive 'designated wildlife sites and landscapes' for pro development. A46 is an 'unsustainable' development so therefore fails Policy 5.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3103  Respondent: 8896673 / James Gooden  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

A46 WAS NOT PROPOSED OR CONSIDERED AS A STRATEGIC SITE IN THE FIRST CONSULTATION

A46 'strategic site', was not previously proposed in an earlier consultation. It is not appropriate development at this stage. In 2014's consultation A46 was 'safeguarded'. It was not removed from the Metropolitan Greenbelt. 'Exceptional circumstances' have not been demonstrated or approved by the Inspectorate. You can't just inset boundaries around pieces of greenbelt, A46/A47/A50 and urbanise them. They must remain Green Belt, according to the recent Solihull ruling. So we object to GBC's proposal to build over Green Belt land with the Local Plan.

In addition there has been no meaningful engagement made or requested from local people. We object to the fact that GBC have not listened to residents and have breached the National Planning Policy Framework (NPPF).

Sensitivity versus Sustainability

We understand that two of the key concepts that underpin the Local Plan are: Sustainability and Sensitivity. Individual settlements are ranked on both counts and development is favoured in the most sustainable ones whereas it is least favoured in the most sensitive ones. What is significant here is that for the purposes of assessing Sustainability, Normandy and Flexford have been treated as one settlement which maximises its score on this count - whereas in terms of Green Belt Sensitivity the open area between the two settlements is disregarded which reduces our score on that one. This is simply inconsistent. Infact the original data (used in the first consultation) identified Normandy as one settlement. The data was rewritten in 2014 dividing the settlements in two. Data cannot be changed.

We object to the deliberately misleading and inconsistent calculations used to override our Green Belt. GBC's intention to build 1,100 new homes in Normandy and Flexford shows no objective assessment of the needs of existing residents in these settlements.

Thames Basin Heaths Special Protection Area’s SANG Avoidance Strategy is about to expire (2016). We object to the fact that a new Avoidance Strategy for TBHSPA is not available. There is 'bespoke' SANG on A46 but there is no guarantee the SANG will be delivered by the developer.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6720  Respondent: 8896673 / James Gooden  Agent:
TRAFFIC CHAOS

We object to the planned development because it will cause traffic chaos and gridlock. When GBC's elected councillors voted through the Draft Plan (on 24.5.16) they failed to scrutinise the Strategic Transport Report - a major piece of evidence. (Adjournment was requested so that this vital piece of evidence could be considered but GBC's councillors failed to allow this).

Surrey County Council's traffic simulations verify that the level of traffic on our roads is already above the capacity that they were designed for. GBC's unrealistic growth plans for Normandy and Flexford will force more traffic onto the already congested A3, A323, C16 and D60. There is no evidence of secure funding for any improvements to the A3 during the lifetime of the Draft Plan.

The already highly congested road network in and around Normandy/Flexford will grind to a halt at peak times causing significant adverse impact to the daily lives of local residents and small businesses. One major existing traffic congestion issue is the railway arch in Westwood Lane which only allows alternate single lane through traffic. It is already hazardous and a bottleneck for traffic at peak times. There is no capacity to change this in the future. The increased traffic will also cause a massive increase in exhaust pollution with excessive levels of nitrous oxide and carbon dioxide - threatening the health of all residents.

Traffic Black Spots Near Site Access - North end of Parcel of land A46 (Guildford Rd Junction with Westwood Lane).

Access to any development of houses and I or flats at rear of The Old Vicarage, Wyke would cause increased traffic dangers to an already very dangerous junction at corner of Westwood Lane and Guildford Road where there have been several fatalities.

There is also already heavy traffic at the Wyke Primary School across the road from the same junction.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
GREEN BELT

We object to the GBC Planning Policy team ignoring the “Openness” of the Green Belt land between Normandy and Flexford (recognised as such in the Green Belt and Countryside Study documents).

Such a large development as proposed would bring with it a huge increase in street lighting which would generate significant light pollution. This would be easily visible from the Surrey Hills AONB ruining the view for all time, for residents and visitors to the area.

Furthermore, Policy 14 also states that “permission would not be granted for proposals that are likely to materially harm the nature conservation interest of local sites unless clear justification is proved that the need for development clearly outweighs the impact on biodiversity”. If there was no "alleged" need for a Secondary School in the West of the Borough, the THBSPA and SSSI would not allow this site to be taken out of Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6736  Respondent: 8896673 / James Gooden  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In Conclusion - we object to the fact that Green Belt is being eroded by disproportionate 'strategic sites' without secure funding for infrastructure and road improvements, inset villages, insetting, the manipulation of boundaries, using rural exception sites outside settlement areas for the whole Borough rather than 'needs' of individual rural communities.

Guildford and the surrounding village and countryside will be damaged irreparably.

NPPF 17 requires local authorities to 'take account of the different roles and character of different areas, promoting the vitality of our main urban areas, protecting the greenbelts around them, recognising the intrinsic character and beauty of the countryside and supporting thriving communities within it.’ GBC Draft Local Plan does not meet the requirement of Policies S2, H3, P6, 04).

USE BROWNFIELD SITES FIRST

It would seem far more sensible to build more homes on

Brownfield Sites first. These should be in or near Guildford town centre - close to the station and existing services eg Woodbridge Meadows, Walnut Tree Close and North Street. Normandy’s station is a tiny rural station (Wanborough) which would in no way support the proposed 100% population increase.

It would be better to provide accommodation for 80-90% of university students on campus, freeing up hundreds of homes in the town - instead of GBC’s proposed 60% of university students living on campus.
Redundant retail space should be turned into homes as there should be no need for massive retail expansion in the town (due to traditional retail activity falls resulting from increased internet shopping habits).

We trust that our comments will be considered carefully by GBC before the Local Plan is finalised.

**Answer (if comment is on questions 1-7 of the questionnaire):**

**FLOODING**

We object to GBC's building of 1100 homes in land parcel A46 due to insufficient attention to the significant flooding risks already present in this area.

There is an extremely high water table in the Normandy/Flexford area and no reference in the GBC plans to improve the water/sewerage management. Already there is inadequate drainage in Normandy and sewerage back-flush problems are regularly experienced around Guildford Road and Glaziers Lane. Every winter the fields in and around Normandy are subject to extreme flooding and therefore unsuitable for building on.

The assessment carried out of the available land takes into account old data regarding flood risk and we question its value.

For a number of years there has been much concern about the high levels of flooding in St Mark's Churchyard, Wyke and the field at the rear of The Old Vicarage is very boggy ground, subject to extreme flooding. Every winter the land is shin-deep in water and regularly floods some of the properties lining it (eg Tanglewood was flooded by the storms of recent years with several inches of water entering car and integral garage).

Stream Through Land

There is a significant stream which flows along the back of the Guildford Road properties that line this field (behind The Old Vicarage, Wyke). This runs very high in rainy weather and regularly flows over its banks.

Building development on this site and area would exacerbate existing and significant flooding problems. There would be far fewer fields to absorb the excess water and the new "hard-standing" would affect even more adversely the general drainage and sewerage, not to mention the strain added by an increased number of users.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am very concerned by the plan outlined in the SSIO document for many reasons outlined below. Firstly I would like to object to East and West Horsley being defined as ‘semi-urban’. It is not a semi-urban area but very definitely a rural area although the plans outlined in this document including the removal of green belt status and the extension of the village boundaries would condemn it to becoming semi-urban and destroy the countryside that the ‘green belt’ has so far protected for future generations. What a catastrophe if we are the ones to allow it to be destroyed for ever and let it join the smothering urban hell that England is becoming.

1. The loss of the ‘green belt’ will be irreversible and catastrophic for the future of our countryside, once built on the area can never be reclaimed and it will just be the start of a continual erosion of rural England. We need to protect from the greedy development of urbanisation.

2. The density of housing proposed by this plan is just not in character with this area and I’m not convinced is actually needed locally - indeed there has been no assessment of the housing need. The local employment opportunities are not readily available but tend to be in the Guildford or Leatherhead area so anyone moving to this planned housing will need to travel by car to access it as local transport is poor and sporadic and limited. In fact during the first 10 years of the plan 75% of the housing locations are outside the Guildford town centre and urban area.

3. This increase in housing will mean a huge increase in local population that will have a hugely detrimental effect. Firstly the huge increase in traffic will not be sustainable by the current network. Already the narrow lane running the length of East Horsley (Ockham Road North and South) is an accident waiting to happen, for example when large construction lorries are passing through especially where the road narrows to almost a single lane (outside Conisbees and after Station Parade), currently two cars passing at these points have to slow down otherwise wing mirrors collide. Will the council accept responsibility for any accidents that occur due to the increased traffic especially during times of heavy construction?

4. With this increased traffic will come the need for extra parking especially at the station, Bishopmead shops, Station Parade shops, village halls and doctors surgery which are already heavily over subscribed, does the council propose to also make large areas available for parking?

5. To support the rural label the street lighting is also not of a semi-urban area. There is very little street lighting through East and West Horsley, only occurring occasionally along Ockham road and East Lane. This would also need to be considered with a large and ever increasing population and alter completely the rural village atmosphere.

6. The increase in population and traffic will have a detrimental affect on the air quality and carbon emissions in this rural area also destroying the countryside and health of the local population.

7. These two villages cannot sustain the necessary increase in pressure on the infrastructure that would occur with regard to sewers and treatment works for this level of increase in population. Plus there is already flooding in many areas around the two Horsley’s and between Horsley and the A3 at Ockham.

8. The current facilities such as the Doctors and schools are already at bursting point with local people struggling to get appointments at the one surgery that supports East and West Horsley. The Raleigh School is full and cannot expand physically any further and sending children further afield will only of course increase the heavy traffic at a peak time.

9. The horrific idea of abandoning the ‘green belt’ and developing even further into the surrounding countryside is a crime to those of us who treasure our English countryside and want to preserve it for future generations. Where will the greed of development end? Until we are one huge urban hell with no agricultural land left? This plan will mean the loss of important habitats e.g. SNCI and compromises SPA/SSSI which can never be recovered - this is a crime of huge proportions and I hope those of us who protest will be able to protect it from the selfish encroachment of humanity.

10. Finally the proposed development at the Wisley Airfield is out of all proportion and will have a huge impact on the local area and its facilities. It will hugely increase the traffic around and off the A3 with increased greater demands on the roads through Ripley and Horsley. Also increasing the demands on the local facilities such as the
doctors and schools. It will overburden the whole surrounding area to bursting and also destroy a wild and diverse natural habitat.

I am very disappointed in this plan to destroy the character and natural countryside of our local area and feel very let down by the Guildford Borough and local councils in even proposing it and especially removing the green belt status. Many have said that the pressure is from Central Government to provide housing – at what cost? Are we to provide housing for the whole of Europe? Is it our countryside and rural areas to be sacrificed? Will no-one stand up and protect our country traditions. During the cycle races through Surrey which passed through our villages, even Boris Johnson commented ‘who knew Surrey so was so lovely’, if your plan is implemented it will no longer exist.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the suggestion of “traffic managing” in the Horsley area as with maybe 5000 more cars on the local roads we need full access to all the present roads to spread the traffic over the whole area not funnel everyone down the same route.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

1. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

2. I object to the fact that air quality concerns have not been taken seriously — air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

3. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

4. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/ Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word "minimum" is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of the current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.
13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.
14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Wisley Airfield Site

I strongly object to this proposal remaining in the new Local Plan. Ockham has been designated with "limited infilling" so I fail to understand how the Wisley plan can possibly remain in the Plan, especially as it was rejected by the Planners just a few months ago. This cannot and must not happen. The area is an important site for wildlife and much needed green space and acts as a buffer for Ockham Village from the pollution and noise from the A3 and M25. In addition the local roads simply cannot cope now with the volume of traffic and adding to it by such a huge number of vehicles every day would be disastrous.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Ripley Village/Send

I strongly object to the proposal for 400 houses between Burnt Common and Ripley. The proposal would practically join the villages into one large urban sprawl and, again, the local roads cannot accommodate any more traffic.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I strongly object to this proposal as it would lead to over development and ruin the character of the areas concerned. There are many brown field sites in and around Guildford without the need to destroy our villages. Small infilling developments may be needed but not on the scale proposed. The villages simply do not have the infrastructure or facilities to cope with large scale building and would be ruined for ever.

The Green Belt should and must remain intact at all costs.

Proposed Housing Numbers

I strongly object to the proposed number of houses proposed in the new Local Plan. The local area simply cannot cope with the numbers. Our roads cannot take the extra traffic, our trains cannot take more commuters and we simply do not have the infrastructure.

I urge the Planners reconsider these proposals and come up with a revised Plan which ensures our part of Surrey remains a pleasant place to live. We must preserve what we have now so that future generations can enjoy the pleasures of the countryside.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
NEW LOCAL PLAN: THE HORSLEYS DEVELOPMENT SITES

Having already written back in 2014 opposing the draft local plan, I find myself writing yet again to implore those in planning how removing the Horsleys from the Greenbelt will have nothing, but a detrimental effect.

I have lived in Horsley for 12 years now and have always lived in Surrey, from the age of 13 I lived in Effingham. My partner grew up here and both our parents live in the village. I would like to think that our children could also live here if they chose to and the housing would be available and affordable for them.

Saying that, I strongly oppose to the amount of houses (533, with possibly +60 more) that are being proposed in the plan.

Both of my sons attended both the local primary and secondary school, however, we went through the whole process of appeal when the catchment area boundary was moved. We were faced with having to send my son to a school over 8 miles away, instead of our local school The Howard of Effingham. We went through the upsetting experience of appeal with many other to get him into this school – the result was the school putting a whole extra class of 30 children for that year group. Both schools are severely oversubscribed every year, where will the extra children from the proposed houses go?

This obviously will apply to our local Doctors surgery, where already we find ourselves waiting two weeks for an appointment. The extra cars that each house owner will have – at least 2, means potentially 6,000 cars within a 3 mile radius of the villages – how will our roads cope? I commute 3 days a week into London, the station car parks are already full.

It states that Station Parade in Horsley is designated a “District Centre” – this suggests that the area is urban – potentially allowing the area to be targeted for future, further developments – I oppose this.

The proposed greedy housing development at Wisley Airfield suggests upgrading the current A3 junction– I cannot believe that this is even being considered. I can only think that this will have an enormous impact on our roads though the villages, not only with the increased volume, but also pollution.

I cannot pertain to understand the drainage system our villages use, but I know that with the building of 7 houses (since we moved here) in close proximity to our house has resulted in drainage problems for us and our neighbours. I believe that flooding will be an issue with the proposed developments, with such a demand on our drains.

As I said I would love for the next generation and the next one after could see a future ahead of them living in our villages, I understand the need for affordable housing, but the proposal to remove us from the green belt to build hundreds of houses will destroy our village completely. Residents have been made aware of a Strategic Housing Market Assessment (which apparently was not revealed in the plan – or to the Council) whose target housing number is almost 70% higher than the official national estimates for population growth in the Borough, resulting in a possible increase of upto 35% in existing West Horsley households. This is greater than any other single area in the Borough, why?

I can only see that it is Guildford Borough Council’s failure to ensure that other sites and brownfield sites are used first and using the Green belt is not in this instance an exceptional circumstance – there are other available sites that could and should be built on, before attacking this area of outstanding beauty.

I thank you for taking the time to read this and implore those that make these decisions, to reconsider destroying our beautiful villages and the destruction of the green belt.

SITE A42 TANNERY LANE, SEND

The increase from 45 to 60 new homes. This may seem small but with poor public transport in the area every home will be reliant on cars.

Why does GBC continue to ignore the people they serve? Concentrating most of the development in the NE of the borough is a recipe for traffic disaster and poor air quality. Why not spread the housing throughout the borough equally?

Answer (if comment is on questions 1-7 of the questionnaire): ()

SITE A43 GARLICKS ARCH

This is Greenbelt Land and the revised plan is increasing the number of homes to a minimum of 400, which with all the other proposed developments to the north of the borough is extremely harmful to the rural nature of the surrounding villages of Send, Ripley, and Clandon.

Inclusion of 6 Travelling Showpeople plots and associated storage facilities is totally inappropriate in a rural environment in Greenbelt land. There is no identified need within the Local Plan document for this allocation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposed housing numbers have no basis in the real world and seem to have just been plucked at random out of thin air. This completely undermines the basis of the whole Plan and makes it an entirely invalid exercise. Until this is rectified the whole Plan is worthless.

The final major flaw in the Local Plan is of course that it was created on the basis that we were in the EU and whilst I voted to stay we are now in a post Brexit world and everything is likely to change. The Local Plan must clearly now be revised to reflect the fundamental changes that will result from this exit from the EU.

With regard to the proposed development of the former Wisley Airfield as I have stated before this appears to be being treated by Guildford Borough Council as though it was the development of a brownfield site. It is not. The clue is in the name, Airfield. It is or at least should be a field in the Green Belt if the agreement with the original owners to remove the runway when it closed had been enforced as it properly should have been. This is therefore just a proposal to build on a large area of the Green Belt with no exceptional circumstances involved and should be rejected on that basis. Notwithstanding that it is a completely inappropriate development of the land concerned both as to scale and nature and would put completely unacceptable pressure on local facilities e.g. roads, sewage, water etc

The proposal to remove villages including the Horsleys from the Green Belt makes a mockery of the whole concept of the Green Belt and just seems to be a rather cynical attempt to permit more development within the village boundaries.

With regard to the proposed extension of those boundaries there appears to be no logic to them and they seem solely to be aimed at increasing the area within the village boundaries (see above) available for development

To suggest that the central small shopping area in East Horsley is a "District Centre" is just ridiculous. Perhaps whoever wrote this part of the Local Plan should try visiting the area and should also check the definition of a "District Centre" before making such a suggestion.

DRAw ISS LOC ALS PLAN – CONSULTATION

Wisley Airfield – Site A35

This letter addresses the proposals contained in June 2016 Guildford BC Draft Local Plan for 2013 - 31 for substantial extra housing across the Borough, and particularly at Wisley Airfield close to my home.

I OBJECT to this ridiculous proposal to begin an unsustainable wedge of development between London & Guildford which will be uncontrollable in the future through the precedent set by this Plan.

The Plan seriously jeopardises adjacent picturesque and unspoilt villages in the south-east. It will impinge on valuable green belt, and impose an insupportable burden on local schools, the road network, drainage, infrastructure, medical services, shopping facilities and public transport, and change the character and amenity of the community – contradicting a specific promise within the document by ignoring the huge contribution of openness this area makes just outside London. (Policy P2)

I vehemently object to any proposals which remove the restrictions on development over our much-needed and prized Metropolitan green belt – the shrinking “life-blood” which makes living so close to London remotely bearable. I am utterly astonished that the Borough, and our local and government politicians, who have in the past defended the community they serve against all and any proposals for even minor building within the green belt, could even now contemplate such ridiculous extension of the built-up area into such precious landscape. This proposal seriously contradicts statements suggesting the Borough (and Government) are not proposing development over green belt.

Whilst I am not against all new development, I believe that any necessary residential development and associated infrastructure MUST:
• respect and reflect the amenity and character of the existing nearby villages in this area. The numbers of houses proposed on the designated area/acreage is at serious odds with the current housing density in these villages and will thus irrevocably change its whole character. It computes to some 25 homes per acre when deductions for roads/paths and amenity areas are made. This used to be called “ghetto” density.

• be limited in size by the availability of all necessary local facilities, infrastructure and transport. The Draft Plan contains insufficient and inadequate proposals to increase the schooling, roads and transport, medical facilities, parking, drainage, mains utilities or any other infrastructure required to avoid serious over-use and overcrowding which will be caused by the increase in dwellings and residents near Ripley, Effingham, Ockham, the Clandons and the Horsleys. It will completely change the character of the villages, and attract yet more traffic, already increasing by “rat-running” avoiding the M25 between Wisley & Leatherhead. Parking spaces at existing local shops, the medical centres, Village Halls and particularly railway stations are already at a premium with no room for expansion. The numbers of houses proposed would require the construction of multi-storey car parks at the two local railway stations, more parking at the local shops (how?), and a completely new road layout at various local road junctions, particularly at the A3 (two) and at B2039/A246 junction in East Horsley, which already suffers serious delays in the rush hours. It would also be necessary to widen the roads, in particular A3, M25, and Ockham Road North and South where blockages occur already. The junction designed for the composting facility is totally inadequate for such a housing conurbation. Has this planning (opposed by GBC) not fallen out of time? To suggest that cycling will in any way reduce this impact is nonsense. People will not cycle back from the medical centre with a temperature of 105, nor with four shopping bags, and the vast majority will not cycle 4 miles every morning and evening to and from the station.

• provide primarily, sufficient housing for the needs of the local community e.g. for some children of existing residents who need to purchase locally, or existing elderly residents wishing to downsize, thus providing larger properties for other incoming families. The Draft Plan makes dubious and unsupportable assumptions about housing need in this particular area, and in particular for affordable housing in this location far from existing jobs. The numbers proposed are much too high, and include double accounting. The EU Referendum result will also reduce numbers. “Sustainable development” means that the country needs to spread the burden, and the benefits, of increasing population across a much wider area of the country, instead of attracting yet higher density into the south-east and London. Businesses will, through market forces, move towards available labour, and government should recognise this by providing the necessary infrastructure to other areas anxious to attract better living standards.

• avoid development over our precious greenbelt and spoiling the landscape we desperately need close to major conurbations including London.

• recognise that if any expansion into the Green Belt is proved absolutely necessary, by simple geometry, it would have less impact the farther away it is from the circumference of London which is already under severe threat.

• whilst the Plan suggests that development of housing on Wisley airfield is a low flood risk, this only refers to the new housing itself, being on a slight mound. What it fails to show is the devastating impact this new catchment will have on existing critical local ditches, lakes and drains.

All the run-off from local villages to the south travels northwards, and is already placing a huge strain on the flood plain around the A3 junction/ Ripley/ Pyrford/ Wisley triangle. This area suffers serious flooding already. Any such development would need to provide very substantial pumping all the way to the river and beyond, and/ or water treatment and storage facilities, to avoid impacting local roads, landscapes and amenities.

To summarise, I say NO to:

• Any proposals to remove Surrey villages close to London from the safeguards of green belt status apart from under exceptional circumstances – the Plan does NOT demonstrate this.

• Any development which seriously enlarges existing villages, let alone a new one, except by the careful addition of a few acres, perhaps by very limited “smoothing” of the existing settlement boundaries, so that local people still need walk only a few yards to enjoy the countryside. Such isolated acres do exist for small developments.

• Any overdevelopment which has a density above the level already existing within the local community – Wisley would be 3 to 4 times that.

• Any large new development over green belt land near the borders of greater London, such as proposed here in Horsley (A36-41) and at Wisley (A35), whether some new infrastructure is provided or not, and which will still have a devastating impact on the way of life in existing neighbourhoods.
• Any development which strains the existing fragile infrastructure of local and much-prized villages and communities
• Any impingement of the Green Belt which will open the door to greater and greater development between Surbiton and Guildford, just as has happened between Hounslow/Staines and Woking, where very little Green belt remains.

I suggest the Borough reduces their estimates for sustainable development, identifies more sensible and sustainable sites for limited expansion, and drops all proposals for any dense or significant developments over, or transfer out of, existing valued green belt land close to London.

If they do not, existing elected representatives who support this Plan, in central government, the county, the borough or the parish will not receive my vote in the future.

**DRAFT LOCAL PLAN – CONSULTATION**

**East Horsley and West Horsley, and other villages in Surrey**

This letter addresses in particular the proposals contained in the June 2016 Guildford BC Draft Local Plan for substantial extra housing across the Borough, and particularly in the Horsleys where I live, over a period 2013 - 33. I OBJECT to the proposals on several grounds.

The Plan seriously jeopardises two of the most picturesque and unspoilt villages in the south-east. It will impinge on valuable green belt, and impose an insupportable burden on local schools, the road network, drainage, infrastructure, medical services, shopping facilities and public transport, and change the character and amenity of the community – contradicting a specific promise within the document (Policies P1, P2, P3), and ignoring the huge contribution of openness these villages make just outside London.

I vehemently object to any proposals which remove the restrictions on development over our much-needed and prized Metropolitan green belt – the shrinking “life-blood” which makes living so close to London remotely bearable. I am utterly astonished that the Borough, and our local and government politicians, who have in the past defended the community they serve against all and any proposals for even minor building within the green belt, could even now contemplate such ridiculous extension of the built-up area into such precious landscapes. Merely “re-designating” these villages as “outside the green belt” is just using weasly words to avoid contradicting statements suggesting the Borough (and Government) are not proposing development over green belt. The Plan (4.1.13) admits that 65% of all their new housing proposals are on Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

- avoid development over our precious greenbelt and spoiling the landscape we desperately need close to major conurbations including London. The Draft Plan not only proposes to remove the protection of the green belt from across the Horsley villages, but actually adds a number of additional “undesignated” areas, as well as some 590 additional houses, adjacent to the current “settlement” boundary, both of which can only be designed (obviously) to encourage further and denser development in the future above and beyond those actually identified in the Plan.

- provide primarily, sufficient housing for the needs of the local community e.g. for those children of existing residents who need to purchase locally, or existing elderly residents wishing to downsize, thus providing larger properties for other incoming families. The Draft Plan makes dubious and unsupported assumptions about housing need in this particular area (S2). The numbers proposed are much too high, and calculations dubious in the extreme, with plenty of “double accounting”. Nor do they take account of the EU Referendum result which will likely lead to better border controls. The majority proportion of population increase in the UK arises from high net immigration. “Sustainable development” means that the country needs to spread the burden, and the benefits, of increasing population across a much wider area of the country, instead of attracting yet higher density into the south-east and London. Businesses will, through market forces, move towards available labour, and government should recognise this by providing the necessary infrastructure to other areas anxious to attract better living standards.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- Any overdevelopment, however small, which has a density above the level already existing within the local community
- Any large new development over green belt land near the borders of greater London, such as proposed here (A36, A37, A38, A39, A40, A41) and at Wisley (A35), whether some new infrastructure is provided or not, and which will still have a devastating impact on the way of life in existing neighbourhoods, although development of some of these sites at much lower density may be acceptable.
I am writing to object to the guildford local plan for development. I am particularly making reference to West And East Horsley as this is where I reside and therefore know the villages well.

I object on the following grounds

Traffic and parking

I object as the traffic through West Horsley is already extremely busy and many of the roads are now too narrow to take the large lorries and cars at the same time. The parking at the shops is almost impossible now and small businesses will suffer if you cannot quickly pull up and shop. The other day I tried to take my grandson to the swings at the East Village hall and the car park was totally full so unable to stop.

Pavements

I object to more houses being built in the area as the pavements are too narrow and dangerous to walk along with a pushchair. If more houses are built there will undoubtedly be more cars in the immediate area.

Flooding

I object to more houses being built in West Horsley as the drains cannot cope at the moment when it rains. Obviously the infrastructure of drainage was done many years ago when there were fewer houses. My garden for one floods very easily when there is rain and if there is more houses it will certainly impact on drains and drainage.

Medical Centre

I object to more houses being built due to the fact that the Medical Centre is already under pressure and if more residents live in the area it will be even harder to get an appointment.

I object as I feel the proposal will dramatically change the character of our village for ever.
Housing Requirements

Firstly, I can see no evidence or calculation given for the number of houses planned, and therefore I strongly object to the requirement for so many houses. If, as stated in 2:19 of the plan, the NPPF requires councils to identify the housing needs of their area, then that evidence must be trustworthy and transparent – it is not. ‘A review of the West Surrey SHMA as it relates to the objectively assessed housing needs of Guildford’, by Neil McDonald (an independent advisor and commentator on housing demographics) in June 2016, concludes that the actual need for housing is considerably less than that suggested by SHMA. And, as highlighted by councillor David Reeve in his ‘A review of the Guildford Objectively Assessed Housing Need’ in July 2016, the country’s decision to leave the European Union will be likely to reduce Britain’s economic growth, and further reduce the already overestimated job and housing numbers. Therefore, before any adoption of any version of the Local Plan, GBC must re-analyse and re-calculate the housing requirements in the light of the referendum result, and then present evidence to support their calculations (or those of the consultant they used) that is clear, accurate and easy to interpret. Not to do so really renders the whole plan unviable. It is also worth noting that many of the proposed houses are only needed to accommodate the workers that will need to be employed to build them – thus many are not needed on this basis alone – you have created a ‘chicken and egg’ scenario. Having made that point, and assuming that numbers will be lessened accordingly, I wish to comment further on the ramifications of the proposed plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Whilst the individual proposals A36 and A37 look modest in size, when taken together with the other sites proposed for the Horsleys (A38-41), the total number of houses proposed is too high for these rural villages. It would have been clear to see, if GBC had merged the separate maps and presented them as one overall picture for clarity. **I object strongly therefore to Site allocations A36-A41.** Not only are they proposed for sites currently within the Greenbelt, but the infrastructure of the villages cannot support this quantity of new housing. We already have insufficient parking at the station, overstretched and archaic waste water removal systems (which apparently the water board wont be able to sort for several years for the current usage alone – has anyone from GBC actually witnessed the flooding that regularly occurs from sudden downpours for example?…and climate change predicts this will keep happening!), overstretched medical facilities, and overstretched schools. The heavy plant required for such large building proposals will further damage the road infrastructure, which GBC already struggles to maintain (largely due to water damage resultant from high water tables and poor waste water capacity)

The housing density of the proposed sites is also far too great and completely out of character with the current building density and style of the villages. For example, the proposed 100 houses for policy A39 would occupy less space than about half the number of pre-existing houses adjacent to this site. Given that these houses would presumably be targeted by families (due to proximity to the Raleigh school for example) the ensuing garden space for children would be woefully small for example. And the school itself could not support the increased numbers – People who have chosen to live in a village and school their children here have done so wanting a village school environment – they do not wish the school to be doubled in size because the village has been forced to double in size. These proposals would potentially harm the quality of education the children of our villages receive. The A38 site proposed would mar the open feel of the current village of West Horsley, and would therefore detrimentally impact the village. The Site A36 is likely to change the visual entrance to East Horsley detrimentally, and this right-angled bend already suffers severe congestion at peak times – building here will undoubtably exacerbate this unless very careful and thoughtful traffic flow measures are considered.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPP16/13456  **Respondent:** 8897857 / Helen Lewis  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

Adding to the argument against the housing proposals based on lack of adequate infrastructure, is the argument concerning safety to road users. The village roads are narrow in places and there is already a problem with oversize lorries using our villages for the building work currently active in both West and East Horsley. The danger to current road users from the vastly increased traffic through the villages, both in terms of the heavy lorries that will be required to undertake the developments proposed in the current draft local plan and the subsequent increase in number of cars on the roads, will be exacerbated. GBC is surely aware of the great and ever-increasing number of recreational cyclists using our village roads and surrounding lanes, especially after the Olympic route through Surrey promoted this sport. Developmental building as proposed, ensuing road closures which are bound to happen, heavy plant using the roads (often discourteously and at speed) and causing damage to the road surfaces, will all contribute to increasing the hazards for cyclists as well as causing misery and congestion for village inhabitants/drivers on these roads

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Furthermore, I object strongly to the proposed Site allocation A35 (Wisley Airfield site). Although GBC proposes new infrastructure here, it takes no account of the already overburdened rail link into London – the plan talks about laying on adequate public transport to Horsley and Effingham stations, but this commuter line already suffers from severe overcrowding – indeed South West trains haven’t been able to cope despite adding extra coaches to their trains. Parking at the stations is already to capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I very strongly object to the removal of our villages from the Greenbelt (insetting them), to the proposals to increase the settlement area of East Horsley by 13%, and to any limited infilling on the new ‘identified boundary of the village’ despite it's greenbelt status. In the Greenbelt there is a general presumption against inappropriate development, as outlined in the NPPF, unless very special circumstances can be demonstrated to show that the benefits of the development will outweigh the harm caused to the Greenbelt. I can see no evidence of any very special or exceptional circumstances, and therefore East and West Horsley should not be removed from the Metropolitan Greenbelt. Nor indeed do I see the need to increase the size of the settlement boundaries. In 2:27, it states that ‘The local plan needs to protect our attractive and valued environment whilst reconciling need to accommodate developmental needs.’ Whilst I understand the need to provide adequate housing, the projected housing needs are unreliable (as identified above) and housing in itself is not a sufficient reason to destroy Greenbelt, when other more suitable and sustainable Brownfield sites are available. There is a disproportionate amount of development proposed for the Greenbelt and too few new homes proposed for urban areas where most people (especially young and less privileged) want to live. And this will not help the much needed urban regeneration. So more effort to find sites in the urban areas of Guildford, rather than bigger cinema complexes or further retail when so much shopping now happens online, would be a wiser long term approach rather than destroying our precious green spaces for ever. GBC really needs to hear the voice of the people, and act on it, much as the government has just done in the referendum. Much of the opening pages of the proposed plan have laudable statements about safeguarding the environment and protecting the need for green spaces to increase the quality of life for the most disadvantaged. Destroying open spaces, specifically the greenbelt that was set up to give such sanctuary, in order to line the pockets of greedy developers, seems to fly in the face of such points as 2:27.

Slightly detouring from this point, GBC talks about retaining and protecting AONB in perpetuity, but propose to levy payment to enjoy such places (e.g. Newlands Corner) which will deter the less privileged from accessing these places.
I OBJECT to the Proposed Submission Local Plan for many reasons, particularly the following:

1. I object to the proposal to allocate so much new housing to the Green Belt; it should be put on the brownfield land in the urban areas of the Borough. That would reflect election promises to preserve the Green
2. I object to the housing number of 693 houses per year; this number appears to me to be far too high, particularly in the context of Brexit
3. I object to the proposal to remove the Former Wisley Airfield from the Green. There are no exceptional circumstances to warrant removing the land from the Green Belt. This area clearly fulfils an important objective of separating Ripley, Cobham, Woking and Horsley.
4. I object that this urban 2,000 house development would be totally out of place in the rural village of 159 homes in Ockham.
5. I object to the danger from its effects on transport, local roads and road The proposed development would result in around 4,000 additional cars on the roads. This will increase the danger from horse riders on the narrow local roads in Ockham and the surrounding area and increase the already severe congestion on the A3 and M25. Cycling would be dangerous.
6. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heath Special Protection Area, and the Sites of Special Scientific Interest and Special Nature Conservation Endangered ground nesting birds such as the Skylark and the Nightjar will be threatened by the development.
7. I object to the threatened loss of high quality farmland where crops have been grown for decades and probably for centuries.
8. I object to the continued inclusion of this site where a recent planning application has already been unanimously rejected by the Planning Committee.

I request that the Former Wisley Airfield, site A35, is removed from the Submission Local Plan.
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I require confirmation that all of these comments together with all my previous comments are passed to the Inspector.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. I object to the disregard for the impact on the Thames Basin Heaths SPA, particularly the damage caused by nitrogen deposition and high pollution levels.
2. I object to the inclusion of Site A35 as it will not contribute to the 5-year housing projection due to many constraints including the provision of a new sewerage facility.
3. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
4. The changes to the plan can only be made if the previous plan was ‘unsound’ and the changes should explain how they will make the plan sound. I object to the absence of proper procedure, leaving an unsound plan not capable of being accepted.
5. I object to the fact that the council has failed to remove this site from the local plan despite receiving over 50,000 objections from local residents and statutory consultees.
6. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
7. I object to the removal of additional 3.1 ha to be removed from the green belt without any justification.
8. I object to the fact that the increased area, being on the south of the site facing the North Down AONB will increase the negative impact of the views from the AONB.
9. Opportunity (3) should be common to all sites and is not unique to this site.
10. It remains unclear when and if the Ockham DVOR/DME beacon will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
12. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
13. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
14. It is further from railway stations than any other identified strategic site.
15. It is the least sustainable strategic site identified in this version and in previous versions of the plan because of the constraints on the site and the physical location.
16. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
17. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
18. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The Plan has not taken into account the associated daily traffic increase to and from the RHS as well as for the regular events at the RHS which attract 1000’s more visitors several times a year.
19. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
20. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate despite talking of “good urban design”
21. I object to the increased area of the site as this now abuts and overlooks the Ockham Conservation Area.
22. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
23. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
24. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
25. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
26. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
27. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
28. I object to the Housing number which is unsound and open to legal challenge.
29. I object to Policy S2 where it states: “4.1.9a The figures set out in the Annual Housing Target table sum to a total of 12,426 homes.” Yet the figures in the table add up to 9,810. The difference of over 20% demonstrates the lack of understanding of the housing requirements of the Borough. It is also an example of why the Plan is not sound.

For the reasons listed above and numerous other reasons I consider that the plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford Borough Proposed Submission Local Plan strategy and sites: June-July 2016 Consultation

I am writing in response to the above Proposed Submission Local Plan June 2016, particularly in regard to how this may affect West Horsley.

It would be foolish to pretend that there is not a need for more housing, particularly in the South East. However it is difficult to understand the size of the numbers apparently deemed necessary in Guildford Borough and it appears equally difficult to obtain any clear answer as to how they were arrived at.

Whatever the number finally built over the next 15 years, I would argue strongly that it should not be allowed to change for ever the character of existing settlements.

West Horsley is currently a village of some 1,100 homes. These are a mix of various styles and ages, including a number of historic buildings. Most importantly it is LOW DENSITY housing. The number of houses suggested for the proposed sites for development within the village would be completely out of keeping with the current village.

The proposed numbers of new homes (385 on 4 sites) represent a 35% increase on the current size of the village. There are almost no facilities within West Horsley. The last shop in the village is likely to be lost later this summer. The state primary school is fully subscribed every year. Almost all the needs of residents are met in East Horsley: doctor, bank, library, shops and station. Already the traffic and parking situation is almost at capacity there. For the majority of people, the development sites proposed for West Horsley cannot be considered within walking distance of these facilities, so that will mean many, many more cars on already busy local roads and nowhere to put them when they reach their destination.
A major worry with this amount of possible development is the provision of adequate waste water and sewage management. Thames Water has advised Guildford Borough that the current wastewater system is unlikely to cope with the demand from these developments and the foul drainage system from West Horsley to Ripley treatment works will need to be upgraded. This is likely to need 2 to 3 years to complete, AFTER development planning permission is granted. Sewage, roads, transport, schools - what thought has really been given to the infrastructure that is needed for development on the scale proposed, infrastructure that should come first not later?

West Horsley does not want or need this number of new homes. Yes, a serious case can be made for a few limited developments, particularly smaller, more affordable housing for younger buyers and for older residents wanting to 'down-size' whilst remaining in the area (and thus releasing some larger homes for families without the need for new build).

As I understand it, the National Planning Policy Framework (NPPF) requires that new residential development MUST respect the character and density of housing in the area and be limited in quantity by the availability of infrastructure and local facilities. This plan appears to ignore these rules entirely.

Preserving the Green Belt

The NPPF, para 37, reads "As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in VERY SPECIAL CIRCUMSTANCES." What are these 'very special circumstances' that the Council feels justifies its plan? How has it happened that nearly two thirds (64.6%) of the total number of homes proposed by the Guildford Plan are to be built in the Green Belt? It may well be far more attractive to developers if they can be offered pristine greenfield sites, no expensive demolition or cleaning up, but where is the emphasis on using up brownfield land and regenerating run down areas (even at the loss of a little profit). Are too many of these more urban sites being reserved for commercial development rather than housing? Would it be very cynical to think this housing plan to use Green Belt sites has been 'developer led'?

The plan to take villages (generally, not just West Horsley) out of the green belt seems a very retrograde step. Once this protection starts to be lost, then what incentive is there not to nibble away at it as and when the Council thinks fit?

Please think again. Do not spoil West Horsley and many other similar villages in the Borough by taking them out of the Green Belt and burdening them with development they cannot sustain and that will change them for ever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
stretches from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am a local resident - not an unreasonable one, in that I do not object in principle to a degree of redevelopment in the area. However, I am concerned at the scale of the current proposals and the apparent lack of attention to any improvement in local infrastructure that would be required for even a reasonable amount of redevelopment and, as a result, object strongly to the proposals in the New Guildford Local Plan, in particular:

Medical Facilities

The Horsley Medical Centre is overwhelmed and it is already impossible to get an appointment

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Local Infrastructure

My view is that the local infrastructure is already overloaded.

Road Network

Junctions are often totally gridlocked at peak times (I am particularly affected by the junction of the A246 and Ockham Road South, the junction of Effingham Common Road and Forest Road, and the A3 junction at Ockham/Ripley). The number of new houses proposed will result in a significant increase in traffic volume which cannot possibly be absorbed. The condition of the roads is also an issue. Many are in a constant state of repair and the drains are unable to cope with rain.

Parking

The station car park at Horsley station is already at maximum capacity.

I wrote to you on 4th July to strongly protest about raising the Wisley Airfield/Three Farms Meadows saga yet again. Now, having been appraised of other contentious issues I am adding to that complaint the proposed removal of the Horsleys and other villages from the Green Belt, for no valid reasons ...

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Complaint proposed to the grossly unrealistic numbers of houses intended to be built, in comparison with those already there, but having no satisfactory grounds publicized to justify swamping GBC's ability to supply adequate drainage, energy supplies, medical services or school places for the multitude of putative inhabitants.

The more I hear of the latest proposals the more concerned I become.

**Proposed New Local Plan Normandy & Flexford**

I am writing to object to the council’s proposals for Normandy & Flexford in the new Local Plan. Four generations of my family have lived in Normandy and I am fighting for it to stay a country village not a vast housing estate.

I am not a NIMBY and would not object to 200 – 300 homes as the village needs new life but 1,100 is too many for a small community to absorb without the character of the village being changed and the green fields lost forever. What we do need is a retirement complex for lots of elderly residents, Normandy has plenty of these, who could stay here amongst their friends and at the same time free up their family homes for new families. Why can’t some of these proposed homes be retirement bungalows?

Why is Taylor Wimpey suggesting 1,100 homes for Normandy? Presumably this is the maximum number they can fit in to get the maximum profit. Do you have any say in the actual numbers proposed? I suspect it’s a devious plan to threaten us with the maximum number which will eventually be reduced to an acceptable level (say 200 - 300) so that GBC can say magnanimously they have conceded to local opinion when the lower figure was what they had in mind all along but thought we would not accept it at this early stage.

With regard to the secondary school, there is no proven need at present for this. According to recent figures there are spaces available at most other local schools. There is only a need if all these new developments in the Local Plan go ahead. GBC are illegally sacrificing the Green Belt in order to fit in a secondary school somewhere that might be needed some time in the future if all these houses are built, a circular argument.

I have not even touched on the traffic chaos that will ensue on our quiet country roads, the C16 Westwood Lane and D60 Glaziers Lane, with all those extra car journeys, especially in the rush hour, from all the workers and additional 1,000+ secondary school children in this new development adding to the existing traffic. There is no way these roads can be improved to accommodate the extra traffic. Sometimes the stationery queue for the Ash level crossing two miles away is back to Normandy at busy times. How will all these additional commuters cope with that?

At present people enjoy living in Normandy because

a) it’s a quiet village

b) we have countryside within the village and all around us

c) we are not joined to any other conurbation (yet!)
d) our local school and surgery can cope (just about) with our numbers

e) our roads are relatively safe, apart from congestion at rush hour or if anything goes wrong on the A31 or A3 and we become a rat run

f) our fields are full of natural wildlife with beautiful animals and birds etc.

All of these reasons would be cancelled out by this huge development.

How do you justify your Local Plan against the Conservative’s pledge made by David Cameron in July 2015 “We will always protect the Green Belt”. GBC are now breaking this promise. Once the open fields are gone it’s too late. Please reconsider this particular development and at the very least reduce the number of houses planned.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

2) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. Recent data confirms that ONS growth figures should have been used and these have been ignored.

3) I object to the disproportionate allocation of housing in the north of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

4) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 164 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

5) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
6) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

7) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

8) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

9) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Limited’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I also hope that the borough’s housing needs are considered in relation to the effect the Brexit vote will have on population growth ie the consensus is that immigration rates will decrease and therefore the demand for housing will also decrease.

<tr>
<td>In relation to the specific allocation of site A35, I have a number of objections as outlined below:</td>
</tr>
<tr>
<td>1. I object to the inclusion of site A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of infrastructure and in particularly the sewerage constraint due to lack of any spare capacity at Ripley sewerage works.</td>
</tr>
<tr>
<td>2. I object to the fact that the Council appear to have directed that the transport assessment for site A35 uses prescribed vehicle movements from site with no justification. I believe this makes the transport evidence subject to challenge due to bias on behalf of the Council.</td>
</tr>
</tbody>
</table>
3. I object to the inclusion of site A35 as it is the least sustainable site identified in both this version and previous versions of the plan because of the constraints of the site and the physical location which is adjacent to the TBHSPA.

4. I object to this site due to the fact that it is further from the railway stations than any other strategic site and that the nearest stations have unsolvable capacity and parking issues.

5. I object to the inclusion of site A35 in spite of unanimous rejection of planning application 15/P/00012 on 14 grounds.

6. I object to the inclusion of site due to the fact that it is adjacent to the most congested stretch of strategic road network in the county and close to one of the most congested junctions in the country (J10). The SRN in this location is currently operating significantly over-capacity and the proposed improvements both uncertain in design and timescale. Even with Highways improvements proposed without the impact of this development it is accepted that the A3 is at full capacity and so cannot take the additional traffic from this proposed development.

7. I object to the inclusion of site A35 due to the fact that the local road network is also at capacity and is severely adversely affected when the SRN is not free-flowing at times of accidents, diversion, roadworks etc.

8. I object to the allegation that public transport provision will be able to mitigate the impact of this allocation especially as bus routes to/from Guildford will have to utilise the over-crowded SRN in one/both directions and therefore will be unreliable and subject to frequent delays.

9. I object to the inclusion of site A35 due to the fact that any public transport (bus services) provision to Horsley and/or Effingham junction will impact the safety of the local road network as the lanes are not legally wide enough to accommodate PSVs, particularly when sustainable methods of travel such as cycling and walking are being promoted on the same lanes at the same time. This is not only unrealistic but it is also unsafe.

10. I object to the allocation of site A35 due to the fact that the mitigation to address the impact of increased traffic will not address the commuters travelling to Woking station.

11. I object that due to the fact that site A35 is adjacent to the most popular tourist attraction in the south-east, the RHS at Wisley where the visitor numbers are due to increase by 500,000 visitors per annum and that the associated traffic increase has not been properly modelled or taken into account; and

12. I object to the fact that nor has any account been taken of the traffic resulting from the regular events at the RHS which attract 1000’s more visitors several times a year in the consideration of the allocation of site A35.

13. I object to the fact that the inclusion of site A35 has not properly taken into account the impact of the changed boundaries of the allocation on the adjoining heritage assets and in general and in particular the impact on the setting of Bridge End House (Grade II) and Upton Farm (Grade II) in addition to the known impact on Yarne.

14. I object to the dismissal of the substantial or less than substantial negative impact on the setting of the Grade 2 listed property Yarne. The requirement is to go through a process supported by statute and is to be given a ‘heavy weighting’ when considering the balance of harm versus benefits of development. As this is enshrined in statute law it is not legal to ignore these effects on Yarne and surrounding historic sites.

15. I object to the fact that the increased allocation at site A35, being on the south of the site facing the Surrey Hill AONB will further negatively impact the views to and from the AONB.

16. I object to the removal of an additional 3.1ha of land from the green belt without any justification.

17. Furthermore, I object to change of the site boundaries of allocation A35 as these are not identified clearly or correctly on the plan (Appendix H p16)

18. I object to the unjustified change in the green belt boundary at the eastern end of the site especially as this now encloses an area of high archaeological interest which will prove difficult to develop in the light of the archaeological finds in the surrounding area.

19. I object to the fact that the impact of the OCK/DVOR has not been properly taken into account in the allocation of site A35. It remains unclear when/if this will be decommissioned as the timetable has already slipped. The constraints on the site due to the DVOR are significant and if it is not decommissioned will severely limit the availability of the site to deliver enough land to make the allocation viable.

20. I object to the fact that insufficient weight has been given to the sustainability of allocation A35 due to the lack of employment available onsite meaning that almost all residents will have to travel to work. As already identified above it is unrealistic and unsafe to assume people will walk/cycle to work on narrow unlit local roads on anything more than a very occasional basis.

21. I note that the changes in the opportunities listed in site allocation A35 reinforce why this site is totally inappropriate, talking of “good urban design” – just what is needed in a rural area.

22. I object because of the impact on the TBH SPA of A35 to the mitigation strategy proposed concerning use and calculation of the SANG and considering the appointment of a warden to solve the issue of inhabitants and cats
being drawn down the rights of way and into the sensitive TBH SPA. The mitigation strategy proposed is inadequate.

23. I object to the undercalculation of SANGS and the failure to recognise the flooding of the southern area designated as SANGS thereby meaning there is inadequate SANGS to protect the TBHSPA
24. I object on the same grounds as RSPB to the negative and inadequately mitigated impact on the SSSI, SNCI and TBHSPA
25. I object to the fact that site A35 will not meet any of the 5 year housing requirement and is subject to so many exigencies and infrastructure costs it cannot be an exceptional circumstance to include it in the Plan which thereby removes the site from greenbelt.

For all the reasons I have already identified in previous submissions, together with the reasons listed above it is quite clear that site allocation A35 is unsustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the impact of Guildford Borough Council Draft Local Plan on Heritage sites and Conservation Areas in Ockham

Despite its relatively close proximity to London and nearby towns Ockham has escaped suburbanisation. It has retained its distinct rural heritage and has not been subsumed within much larger conurbations. It remains a rural parish and retains its identity as an evolution of a collection of medieval hamlets where small houses nestle together in settlements with their own distinct character. The foundation of the local economy remains agricultural based around arable and livestock farming, equine recreation and game bird rearing.

The special character of the built environment in Ockham is acknowledged by the fact that 29 buildings have been listed by English Heritage. Many of the listed buildings are farm houses by origin. Their setting was and remains rural and agricultural. Upton Farm and Yarne are both 15th century farmhouses immediately adjacent to Three Farms Meadow and have views over it. Appstree and Bridge End have land adjoined Three Farms Meadow. The development of high density housing at Three Farms Meadow will cause irreparable damage to the setting of the listed buildings in Ockham and to the Ockham Conservation Area. The development, because of its location on the highest point of the hill and down the south side of the proposed site will overlook the Conservation Area and impact the setting of those precious and ancient buildings in the Ockham Conservation area causing substantial impact. The effect on the distinctive local Lovelace style would be wholly inappropriate.

The particular significance of the Three Farms Meadows is that it creates a meaningful green gap which enriches and strengthens the separate identities of the different settlements of Ockham. Consequently the separation provided by the green gap is a significant asset to both conservation areas and contributes to their character as distinctly separate settlements.

The most significant harm caused by the development proposals is that the scale of development overwhelms the historic settlements of Ockham which are quintessentially small in scale and historic in nature. Unlike many ‘commuter belt’
villages these settlements have escaped extensive redeveloped or extensive post-war expansion. Consequently they retain their evolved medieval form as well as most of their rural separation and setting. These are the characteristics which make them special and gave rise to the designations of Bridge End, Church End and Ockham Mill as a conservation areas.

The disproportionate scale of development in the appeal proposals is contrary to the natural evolution and growth which gave rise to the character of Ockham over the last 500 years. The result will be a revolutionary change in the shape and morphology of the Parish settlements which cannot fail to harm their distinct character.

The historic parish currently consists of 163 dwellings. The addition of another 2,100 dwellings a greater than tenfold increase, will irreversibly change the way in which the historic settlements of Ockham areas perceived. Perception will no longer be of an evolved medieval parish in rural surroundings but of a much larger modern suburb with an historic periphery.

Development on this scale has never occurred within the Parish of Ockham or in Lovelace Ward and, even if well designed, cannot assimilate well into the fine grain and historic parameters of the parish settlements. The development fails to respond to the significance of Ockham’s listed buildings, its conservation area or wider setting in any positive way.

NPPF paragraph 137 states that ‘Local planning authorities should look for opportunities for new development within Conservation Areas and World Heritage Sites and within the setting of heritage assets to enhance or better reveal their significance.’

Sections 66 of the Planning (Listed Buildings and Conservation Areas) Act 1990 requires special regard to be given to preserving listed buildings or their settings and section 72 requires special attention to be paid to preserving or enhancing the character or appearance of conservation areas.

Justice Linblom stated that ‘...a finding of harm to the setting of a listed building or to a conservation area gives rise to a strong presumption against planning permission being granted. The presumption is a statutory one.’ As such heritage conservation is to be given considerable weight and importance in the planning balance.

The proposal for the building of in excess of 2000 houses on the former Wisley airfield no way accords with any planning framework. More importantly it fails to meet statutory requirements and the substantial damage to historic heritage properties and the Ockham Conservation Area cannot be adequately mitigated. As such I strongly object to the inclusion in the Draft Local Plan of this site A35 (FWA) and it should be entirely removed from the GBC Draft Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ( )
I object to the impact of Guildford Borough Council Draft Local Plan on Heritage sites and Conservation Areas in Ockham

Despite its relatively close proximity to London and nearby towns Ockham has escaped suburbanisation. It has retained its distinct rural heritage and has not been subsumed within much larger conurbations. It remains a rural parish and retains its identity as an evolution of a collection of medieval hamlets where small houses nestle together in settlements with their own distinct character. The foundation of the local economy remains agricultural based around arable and livestock farming, equine recreation and game bird rearing.

The special character of the built environment in Ockham is acknowledged by the fact that 29 buildings have been listed by English Heritage. Many of the listed buildings are farm houses by origin. Their setting was and remains rural and agricultural. Upton Farm and Yarne are both 15th century farmhouses immediately adjacent to Three Farms Meadow and have views over it. Appstree and Bridge End have land adjoining Three Farms Meadow. The development of high density housing at Three Farms Meadow will cause irreparable damage to the setting of the listed buildings in Ockham and to the Ockham Conservation Area. The development, because of its location on the highest point of the hill and down the south side of the proposed site will overlook the Conservation Area and impact the setting of those precious and ancient buildings in the Ockham Conservation area causing substantial impact. The effect on the distinctive local Lovelace style would be wholly inappropriate.

The particular significance of the Three Farms Meadows is that it creates a meaningful green gap which enriches and strengthens the separate identities of the different settlements of Ockham. Consequently the separation provided by the green gap is a significant asset to both conservation areas and contributes to their character as distinctly separate settlements.

The most significant harm caused by the development proposals is that the scale of development overwhelms the historic settlements of Ockham which are quintessentially small in scale and historic in nature. Unlike many ‘commuter belt’ villages these settlements have escaped extensive redeveloped or extensive post-war expansion. Consequently they retain their evolved medieval form as well as most of their rural separation and setting. These are the characteristics which make them special and gave rise to the designations of Bridge End, Church End and Ockham Mill as a conservation areas.

The disproportionate scale of development in the appeal proposals is contrary to the natural evolution and growth which gave rise to the character of Ockham over the last 500 years. The result will be a revolutionary change in the shape and morphology of the Parish settlements which cannot fail to harm their distinct character.

The historic parish currently consists of 163 dwellings. The addition of another 2,100 dwellings a greater than tenfold increase, will irreversibly change the way in which the historic settlements of Ockham areas perceived. Perception will no longer be of an evolved medieval parish in rural surroundings but of a much larger modern suburb with an historic periphery.

Development on this scale has never occurred within the Parish of Ockham or in Lovelace Ward and, even if well designed, cannot assimilate well into the fine grain and historic parameters of the parish settlements. The development fails to respond to the significance of Ockham’s listed buildings, its conservation area or wider setting in any positive way.

NPPF paragraph 137 states that ‘Local planning authorities should look for opportunities for new development within Conservation Areas and World Heritage Sites and within the setting of heritage assets to enhance or better reveal their significance.’

Sections 66 of the Planning (Listed Buildings and Conservation Areas) Act 1990

requires special regard to be given to preserving listed buildings or their settings and section 72 requires special attention to be paid to preserving or enhancing the character or appearance of conservation areas.

Justice Linblom stated that ‘...a finding of harm to the setting of a listed building or to a conservation area gives rise to a strong presumption against planning permission being granted. The presumption is a statutory one.’ As such heritage conservation is to be given considerable weight and importance in the planning balance.
The proposal for the building of in excess of 2000 houses on the former Wisley airfield no way accords with any planning framework. More importantly it fails to meet statutory requirements and the substantial damage to historic heritage properties and the Ockham Conservation Area cannot be adequately mitigated. As such I strongly object to the inclusion in the Draft Local Plan of this site A35 (FWA) and it should be entirely removed from the GBC Draft Local Plan.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

Reg 19 Consultation objection and right to comment on broader issues

My first objection is to due process. GBC has claimed a reg 19 consultation. As a result it has requested comments only on changes and referenced to the particular clause. This is a breach of due process because substantial/material changes have been made to the Draft Local Plan including a major change to the OAHN as stated by Councillor Spooner, removal of one of four only strategic sites which impacts all strategic sites, changes (increased withdrawal in many cases) to the greenbelt boundaries and in particular A35 with and without consent from owners, incomplete data sets and a requirement from Highways England as a compromise for their withdrawal of major concerns at the impact of the Plan on Highways on the A3 that infrastructure has to be in place before major developments ‘come forward in advance of critical infrastructure’:

All of these changes cannot be considered minor and therefore the request to comment only on the change clause itself is not in accordance with the law. The effect of these attempted changes are that the DLP of 2016 must therefore be considered ‘unsound’ to have caused the major changes and therefore it is not a valid reg 19 consultation.

In that case comments should be allowed to any material aspect of the Plan and not just to particular clauses.

Generally, it is disappointing to note that the Council has given very little weight to either the councils own refusal of the planning application on site A35 or indeed to any of the thousands of representations made by ourselves and other members of the public and statutory bodies.

I am of the view that the current consultation cannot legally constitute a regulation 19 consultation

1. I object to the fact that there has been no clear explanation from the Council as to why they think it is appropriate to have a regulation 19 consultation when the changes made are major, for example the removal of a strategic site and a reduction in the housing number.
2. I object to the fact that there is no clear explanation why the Plan period has changed particularly as this has not been either justified or clearly identified.

III. I object to the Council wasting tax payers’ and residents’ time and money not following due process and indeed ignoring previous representations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I continue to have very serious concerns on the soundness of the evidence base and object in the strongest of terms on the proposed submission plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing to strongly object to the local plan with regard to the Horsleys.

I have lived with my family in West Horsley for thirty years. This village has historic roots and prides itself on retaining its rural heritage. eg we have no street lights by choice.

I can see that the plan proposes to increase the West Horsley households by a completely unacceptable percentage, which would change the nature of the village for ever.

This scale of housing would give a population increase higher than the national estimates for population growth.

Our village school is already full with no physical room for expansion. Even the private schools do not have room for a large influx of pupils.

Our doctors surgery is extremely busy already.

The railway carpark at East Horsley (and also Effingham Junction) is full daily.
Our main drainage system is already inadequate with back up occurring in the drains at some of the houses at the northern end of the village. Have GBC gained assurance from utility companies and Surrey County Council that they have the funds to adequately improve drains and roads?

The plan gives no demonstration of the exceptional circumstances required to remove the Horsleys from the green belt and extend the boundaries of the Settlement area.

I am unable to understand on what grounds Station Parade East Horsley has been designated a "District Centre".

I strongly object to the size of the larger proposed development areas which will completely in fill on green spaces and create an urban sprawl, physically changing the village of West Horsley for ever.

The Horsleys seem to have been lumped together, whereas they are very different in character with West always retaining its historic rural roots.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

It appears that the draft Local Plan has now been revised to feature once more a straight boundary to the very large sloping field to the south west of Silkmore Lane. It had been argued that a straight boundary would make it easier to ensure that no intrusion into the field (and thus into the Green Belt) would take place in the future.

This has been widely regarded as a pointless move, an infringement in itself on the Green Belt for no valid reason - a rather feeble suggestion that the Council might somehow be ineffective in preventing intrusion into the Green Belt as it stands - and a measure which, if adopted, would leave open the probable building in the freed-up space of yet more houses to spoil the serenity of this lovely shallow valley.

We recommend that this particular proposal be struck out of the Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

More specifically I live in Send Barns Lane which has seen much increased traffic over the last 5 years. Each morning and evening the traffic is at a standstill and when there is a breakdown or even a minor traffic accident the congestion can last for part of the morning. If you give the green light to build over 400 dwellings at Garlick's Arch which could represent another 800 cars our lifestyle will be ruined. The local infrastructure is at bursting point, you even have to queue for petrol at the Burntcommon garage now at any time. The local medical centre has about a one week plus waiting time to see your doctor now, this new proposed influx of 25% to the population to our village will breakdown local services not to mention the local schools which already caters for children outside of the local area. Already you have approved building developments in the Send area including a narrow boat basin for 80 boats. There aren't 80 boats on the canal, this was approved I assume to gain access for future housing development which has not yet been applied for. When will the desire to make money over people's lives stop.

If you continue to wreck our countryside and village life we will end up just an extension/suburb of London. Please do not approve more massive housing industrial estates.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing again to voice my opinion to try and protect our Green Belt. The Governments manifesto which we voted for was to protect the Green Belt. My objection to use the so called protected Green Belt to build houses and industrial estates. Future generations will not have the pleasure of green fields and bird and animal life. Once you build on this precious land it will never be. The same again.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The 2016 Plan put forward was rejected by local residents from over 32,000 objections largely by Send Residents. Is the GBC not listening, the stealing of Green Belt lands for domestic and commercial expansion and the many points put forward on the lack of infrastructure and environmental reasons have simply been ignored. 

The Government has made clear that the Brown Field sites must be used for future development and Green Belt land only to be used in very exceptional circumstances. What are the exceptional circumstances in this case. Send village has been selected out and most disproportionately targeted by the GBC for this proposed development. 

Our village which has many narrow roads has problems now in handling traffic on a daily basis any more additional traffic will stop us villagers with right of free movement. 

Two sites in our village have changed three times by the GBC namely Burnt Common and Garlick's Arch which are now both back in contention, what is going on. These latest changes are totally unacceptable. The GBC seem to have some kind of rigid agenda to ignore residents comments and to destroy what we have for future generations and not taking into account the problems of infrastructure and the environment which is required by Law. 

Green Belt, Policy 2 at para.4.3.15 

Send Business Park now taken out of the Green Belt in its entirety. 

I strongly object to the proposal to inset Send Business Park from the Green Belt it is effectively an old-conforming user in an area of beautiful open countryside enjoyed by local residents for walking and local wildlife all along the Wey Navigation. 

The road along Tannery lane is so narrow cars have to stop and allow oncoming cars to pass in places. 

Lorries jam up now, more will be ridiculous. 

Any further development here is most unacceptable. 

What changes (2016)/further amendments (2017) do you suggest should be made to the document? 

Attached documents:
I object to the Policy A42 change at Clockburn in Tannery Lane because instead of reducing demands the GBC have chosen to increase the number of new home by a third. All previous reasons for objection have been ignored making far worse the present access and traffic problems in Tannery Lane and the A247 junction. Send must retain its Green Belt and not add to the problems of surface flooding during parts of the year.

The river Wey Navigational Canal which flows through Send is a natural beauty and views for walking in open countryside. This must not be impacted further.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I object to Policy A43 change at Garlick's Arch, Send Marsh, again the addition of hundreds more new homes on Green Belt lands is not acceptable. The previous comments still stand, is not the GBC not listening to the previous objections of local people.

There are no exceptional circumstances existing to continue and over develop the Green Belt in this beautiful village with history dating back to Elizabethen times. The purpose of the Green Belt must not be ignored. We must safeguard our wonderful woodland and open countryside.

This particular land I understand is a flood zone 2 area and any further development will cause additional flooding during parts of the year. Local wildlife will also be affected. More additional traffic will bring pollution in air quality and noise. There is no justification for this proposal.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Policy A58 land at Burnt Common, London road. This is now a new allocation which was previously dropped from the 2014 draft Plan which was again objected to by the local residents and scrapped. All the previous objections still stand. This Policy has now been reintroduced with the wording from the previous Plan "to a minimum of 7,000 sq.ft. From a maximum of 7,000 sq.ft".

There is no need to build an industrial and warehousing development in the village of Send when Slyfield and Guildford have empty sites and industrial units.

The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for the whole Borough not this massive allocation of 10 hectares all at Send in the Green Belt. The impact of heavy industrial lorries and vans is totally unacceptable the additional dust, dirt, noise and road gridlock is just too much.

I OBJECT to the manner in which Guildford Borough Council has presented this latest Plan. I consider that the Plan is misleading and contradictory to their presented by Guildford B.C. especially the Summer edition of "About Guildford" where statements are made and then immediately contradicted. For example:-

You state that the number of development sites has been reduced. YET you added more sites at short notice, Garlick's Arch and Winds Ridge/ Send Hill AND ENLARGED the Send inset area, thereby allowing and encouraging larger developments.

You state that there will be NO development along the A3 between Junction 10, M25 to the Hogs Back. YET YOU PROPOSE (including Wisley Airfield) some 6800 dwellings.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? (), is Sound? (), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the removal of 89 ha. of Green Belt at Gosden Hill Farm. This valuable farmland is desperately needed to help reduce the need for imported fresh foodstuffs. Despite the suggested road improvements the development proposal will, without doubt, have a detrimental effect on the existing areas of Burpham and Merrow. The "Allocation" box in Policy statement A25 clearly shows, without any doubt, how Guildford Borough Council supports the environmental Armageddon of this part of the Borough. Adding together all the proposed uses, it is absolutely obvious that the Burpham area will be a place to avoid. Congestion caused by housing, schools, shopping, general employment, Park and Ride and other proposals will add to the traffic nightmare current on the A3.

To put it simply, wasn't the A3 improved to REMOVE traffic from peripheral villages?

Perhaps you have forgotten!

Finally, perhaps you will be able to explain to the Public Inquiry Inspector why Guildford Borough Council is encouraging developers to progress housing proposals as soon as possible. Could it be that Guildford Borough Council is attempting a series of "fait accompli" in advance of any Inspector's decision?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Wisley Airfield still being included in the Plan when permission was refused in April.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to the development at Clockbam Nursery. Tannery Lane is narrow, winding and already suffers heavy vehicle movements for the industrial units. The proposed 45 houses, together with the 65 houses already approved, will create a traffic nightmare at the junction of Tannery Lane and Send Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the industrial use at Garlick's Arch when studies have shown a reduction in the need. Why put this development in the Green Belt when there are 40 ha. available at Slyfield?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the destruction of Green Belt at Burnt Common in order to create a further junction for the A3. This proposal will massively increase the traffic along the A247 through both West Clandon and Send. The A247 was never designed to attract large volumes of traffic and is incapable of improvement without substantial compulsory purchase of land and property. I BELIEVE THAT THE LAND HAS BEEN OFFERED BY THE OWNERS OF THE GARLICK ARCH LAND AS A MEANS OF PERSUADING GUILDFORD COUNCIL TO GRANT PERMISSION FOR THE 400 HOUSES AND INDUSTRIAL DEVELOPMENT. You will be feeding the already seized up A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the destruction of ANY part of the Green Belt when a sustainable requirement has not been proven AND NONE HAS.

I OBJECT to the removal of some 128 ha. of Green Belt in the areas of Send, Send Marsh, Burnt Common and Gosden Hill Farm and its conversion to concrete and tarmac.

I OBJECT to the insetting of the Send area which removes some 39 ha. from the Green Belt. By this action Guildford B.C. is promoting and encouraging residential and industrial development in an area where perceived need has NOT been proven.

I OBJECT to Guildford Council's double standards when in "About Guildford" you state the Plan rejects any schemes that would have a detrimental effect on the Green Belt. You do not appear to understand your own evidence and publicity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to Policy A43 change at Garlick's Arch I have been unable to find any justification in the Plan that requires the inclusion of a site for Travelling Showmen in this area. Travelling Showmen, by the very nature of their business TRAVEL. Is this site inclusion at Garlick's Arch for their winter quarters? We are all aware "when the fair comes to town" of the size and nature of showmen's vehicles and equipment and the long running of diesel generators with consequent atmospheric pollution. Yet again the wanton destruction of Green Belt and historic woodland. The increase of some likely 800 additional vehicle movements, on the naïve assumption of one car per household, in the immediate area to schools, doctor's surgery and supermarkets and workplaces.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A58 at Burnt Common
Guildford Council have seen fit to increase industrial development on this land by increasing the MAXIMUM developable area referred to in the 2016 Plan to a MINIMUM area of 7000sq. m. in this Plan. The Employment Land Need identifies a REDUCTION of need to 3.9 hecta across the whole Borough so how can the increase of at least 7 hectares. at OFi location, be justified?
Why not develop existing industrial land much of which is in Council ownership.
No reference has been made in the Plan to the increase of atmospheric pollution from diesel engined Heavy Goods Vehicles.
The Burnt Common roundabout is already congested by vehicles ul all types, "leapfrogging" the congestion on the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

1. The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, over double the previous figure of 322 used in previous plans. It has been reported that the SHMA report methodology is susceptible to challenge as it inflates the needs of the borough by distorted student numbers. However, as it is based on commercially confidential modelling assumptions, that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have lived in the village of Ripley for the last twenty one years and whole heartedly object to the scale and location of sites for development in the Proposed Local Plan. I attended the Extraordinary Council Meeting on 24th May and thought that the members of public who addressed the meeting made a series of very compelling points which were not given sufficient credence by representatives of the Council.

We cannot all be experts on planning law but we can all now what it is like to live in the area and share our deep commitment to preserving the quality of our environment for future generations. Observing the meeting on 24th May it felt that the experiences and concerns of current residents are not being properly heeded and respected.

Over the last couple of years it has become increasingly difficult to make car journeys around the area and the proposed scale of development which I understand will add around 25% of housing to the borough, will only add to the burden on existing residents. I regularly make journeys onto the M25 for access to Buckinghamshire and Berkshire and up the A3 to London. There are frequently extensive queues to access the A3 from Ripley and coming back into the village in the evening we are often in a queue of traffic. For the last year I have also been taking my son to Woking station for access to the Waterloo train and collecting him in the evening. The journey regularly takes around 45 minutes each way with the volume of traffic at 8am and 6pm. Although there are some plans to enhance the highways there are in no way sufficient to respond to the proposed increase in houses and the improvements in public transport proposed with additional stations in Guildford will have no value at all for Ripley residents. Indeed we have recently seen a cut back in bus services.

Newark Road and the Rose Lane junction in the centre of Ripley face daily congestion. The proposed developments in the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads. Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and only accommodate one vehicle at a time. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for
pedestrians. Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

I also have concerns that insufficient focus is given to the implications of developments on a cross borough basis. I know from proposed developments in Woking there are likely to be even greater pressures on the trunk roads into West Byfleet and Woking and think that insufficient thought is given to the knock on effects of developments on residents.

I set out below my objection to specific policies and matters within the Guildford Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford Borough Local Plan (June 2016) – My Objections

Having lived in Ripley for 20 years I would like to object to the scale and location of sites for development in the Proposed Local Plan on the grounds of preserving the quality of our environment for future generations.

Over the last couple of years it has become increasingly difficult to make car journeys around the area and the proposed scale of development which will add around 25% of housing to the borough, will only add to the burden on existing residents. There are already frequent extensive queues to access the A3 from Ripley and coming back into the village in the evening we are often in a queue of traffic. Although there are some plans to enhance the highways there are in no way sufficient to respond to the proposed increase in houses and the improvements in public transport proposed with additional stations in Guildford will have no value at all for Ripley residents. Indeed we have recently seen a cut back in bus services.

Newark Road and the Rose Lane junction in the centre of Ripley face daily congestion. The Plan does not provide an achievable strategy for improving capacity on these local roads. Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and only accommodate one vehicle at a time. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians. Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular activity, and particularly at weekends many cyclists pass through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land.

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site.

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be no solution for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc.) and the A25 will now go through Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13613  Respondent: 8899617 / Claire Nix  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3
I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I object to the local plan based on the impact it will have on the borough’s special countryside. The proposed development at Garlick’s Arch (A43) would have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. I object to the location for new employment floor space at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floor space will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floor space to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq. m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

The Local Plan does propose some additional schools but they seem insufficient to address the scale of development.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. The proposed development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that: “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health. Recent tests conducted have reported that Ripley High Street is already at dangerous levels.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to not protecting the Green Belt (Policy P2)

I object in the strongest possible terms to the proposal to remove the villages of Ripley, Send and Clandon from the Green Belt. This appears to be squandering a legacy and flouting National Planning Policy which requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the developments on Green Belt. Once taken the green belt is lost forever and it represents the thin end of the wedge. Proposed developments such as Garlick’s Arch would result in a spreading urban sprawl along the A3 and our beautiful villages gradually merging into one another. Residents do not want the character of our villages to be lost forever and for ongoing encroachment on the countryside. Furthermore the GBC’s Green Belt & Countryside Report does not address the Garlick’s Arch site, so there is no evidence base to support inclusion of this proposed development.

It is hard to feel faith in a system that picks Garlick’s Arch in preference to the existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development. In general insufficient attention has been given to brownfield sites and I urge the Council to think again.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

| 1.  I object to development in areas which are at risk of flooding (Policy P4) |
|---|---|
| The recent heavy rain and the flooding along Newark Lane highlight the difficult nature of our local communities. National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change. |
| The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river, meaning that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed by the Council as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. The heavy clay soil of the area presents a greater risk and there is a clear knock on effect for the wider community. Clearly the Council’s assessment is not fit for purpose and needs to be re-commissioned to accurately reflect the actual flooding risks of each site. |

| Attached documents: |

---

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

| 1.  I object to the Local Plan as the development proposed will not be sustainable (Policy S1) |
|---|---|
| The purpose of the planning system is to contribute to the achievement of sustainable development and we do not think the scale and location of proposed developments are sustainable. Some 13,860 additional homes during the Plan period will have a permanently detrimental impact on existing local communities by over development, particularly for the villages of Ripley, Send and Clandon. The services in these villages will be unable to cope with the level of development proposed. Indeed parking in Ripley is already impossible and air pollution in the High Street at dangerous levels. |
| The strategic sites of Wisley Airfield (A35) and Garlick’s Arch (A43) are in unsustainable locations. They have no ready access to railway stations and bus services across rural villages are being reduced. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. |
| We urge the Council to give greater consideration to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided. |
| The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion particularly at rush hour. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result. |

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) being identified as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley, whilst at present these three Wards represent only about 11% of the existing housing in the borough. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Horsleys’ schools, roads, car parks, drainage, medical practice and local facilities are already fully stretched by existing demands. It is more than likely that additional pressure resulting from 590+ new houses could not be absorbed.

West Horsley does need some affordable housing, but this can be achievable both sensitively, and without compromising the Green Belt status and the protection that it offers. Implementation of the Local Plan proposal for West Horsley will remove that protection and will irreversibly alter the character and nature of the village.

Whilst I acknowledge that the Borough needs identify further sites on which affordable housing can be built, I believe that the proposal to build some 400+ homes in West Horsley is ill-conceived and totally disproportionate to the existing housing stock of some 1,100 homes.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

• The “objectively assessed need” figure of 693 homes a year is too high.
• A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
• The current SHMA inflates the proposed housing figure due to
  ◦ failure to correct for errors in the historical data for international migration flows,
  ◦ issues with the way it considers students and affordability and
  ◦ flaws in the method for estimating the number of homes needed to support job growth.
• It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.
I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents
- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays

Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 June 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).
The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools. Currently, a two-way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime, given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly, any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council’s eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/8044  Respondent: 8899713 / Tessa Crago  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8033  Respondent: 8899713 / Tessa Crago  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the location for new employment floor space (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floor space will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floor space to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area. The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion. The policy also fails to provide guidance on design requirements, as required by the NPPF. The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions. The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.
Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university’s ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular, a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford’s relative popularity as a place to live combined with its location close to other towns and within the London Commuter belt no amount of building will meet demand. Similarly, no amount of affordable housing will ever meet demand.

In addition, the definition of an ‘affordable home’ is 80% of market value. With even a 2-bedroom flat in Guildford now having a market value of £360,000 the discounted price is still not going to be affordable to anyone on a normal income. And at what point will ‘affordable homes’ be able to go onto the market at full market price? As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/8045   Respondent: 8899713 / Tessa Crago   Agent:
I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations Ire available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1).

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure
will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have
considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public
consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition, I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt.
There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Comment ID: PSLPP16/8028  Respondent: 8899713 / Tessa Crago  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)
The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.
The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

Attached documents:
The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.
The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

Comment ID: SSQLP16/1175  Respondent: 8899713 / Tessa Crago  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford’s circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

C.i. Policy 25 Gosden Hill

1. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt
2. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt.
3. The development of this site will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.

4. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress.

5. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

6. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which I understand is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/5413  Respondent: 8899713 / Tessa Crago  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

C.ii. Policy A43 Garlick’s Arch

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. The allocation of 28.9 ha is an excessive land grab into the Green Belt.
4. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
5. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
6. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
7. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
8. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
9. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure. Our villages are already suffering from severe congestion for much of the day. The proposed development under the plan will cause greater congestion in and around our villages.

10. Many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

11. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

12. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

13. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

14. I object to the lack of proper infrastructure planning for sites. Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

15. Despite the Garlick’s Arch site being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

16. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Any further development without funding will place further stress upon existing health services.

17. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). I have considerable concerns that development of the large residential sites identified at Wisley Airfield, Garlick’s Arch and Gosden Hill will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

18. I object on the grounds of poor air quality. The significant level of development being proposed will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

19. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley. Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

20. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
E. Policy S1 Presumption in favour of Sustainable Development

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are urban sprawl. Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp17q/682  Respondent: 8899713 / Tessa Crago  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Duty to Cooperate

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/647  Respondent: 8900033 / Irene Woods  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the inclusion of the 30 hectares of Garlick's Arch in this Plan. This site is new and was not included in the Regulation 18 Draft, and has not been consulted on previously. It forms part of the Green Belt and is permanently protected by the NPPF, which is there to prevent the merging of settlements. It also contains around 5 hectares of ancient woodland, some of which dates back to the 16th century.

Any further industrial space required could easily be accommodated at Slyfield.

The new slip roads proposed for London bound traffic, which would lead to and from the A3 by the bridge on the A247 over the A3, would vastly increase traffic flows in the Burntcommon and Send village areas. The A247 through Send would be gridlocked at rush hours, and in all probability for most of the day. At present there is a constant flow of traffic around the Burntcommon roundabout (by the Shell petrol station and Little Waitrose) all day and evening. I fear that those of us living in Boughton Hall Avenue ... about 100 yards from this roundabout ... would find access to and from our Avenue very difficult indeed. Our junction with the B2215 is our only entry and exit point and there are at present 76 detached properties in this estate.

I would like you to ensure that this letter is passed on to the Government Planning Inspector.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send Marsh/ Burnt Common

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT

I am writing to register my firm objection to the changes in the Guildford Borough Local Plan currently under consultation.

The fundamental objection to the changes is that they have failed to address ANY of the fundamental issues raised in many thousands of objections that GBC received in relation to the original plan on which these changes are based.

My objections relate to the continued inclusion of the 'strategic' site at Wisley Airfield and the additional inclusion of another 'strategic' site at Garlic's Arch.

The addition of Garlic's Farm is predicated on the SHMA calculation for the original plan, which was fraudulently calculated then and remains so now. It requires a rate of housing expansion DOUBLE that of any of the neighbouring boroughs of similar size, in spite of the fact that half of Guildford is an AONB and much of the rest is Green Belt. The fact that GBC refuse to release the details of the calculation is disgraceful and demonstrates the fraudulent base on which both the original plan and the changes are based.

Further, in relation to the elements of the new plan dealing with Wilsey Airfield and Garlic's Arch.

THEY DO NOT

A Address the fact the road infrastructure in the Ockham, Wisley, Horsley area is inadequate to handle the additional traffic. So that, regardless of plans related to the Junction 10 expansion, until there are slip roads onto and off the A3 at Ockham and Burnt Common and an upgrade of all roads in the area, this development cannot possibly be accommodated and any start on this MUST be deferred until these works are completed. A few cycle lanes and bus routes are not going to do it!

B Recent AIR QUALITY tests by Ripley Parish Council have indicated that traffic levels in neighbouring Ripley are above EU limits and are poisoning the population. There should therefore be no substantial development in this area until the AIR QUALITY levels are back well below the EU set limits.

C Among the many Green Belt regulations that these development trample over is the one relating to the visual impact from afar. The impact of either of these developments on views fro the Surrey Hills will be dramatically negative.

D There are much better places to build strategic sites on brownfield sites in Guildford and elsewhere in the country.

E The Green Belt is a fundamental protection of amenity for London as a whole. The urbanisation south west of London as far as the M25 has turned the whole area into a concrete suburb and it is up to YOU, THE PLANNERS, to stop local politicians making this this happen outside the M25.

Some other objections relating to specific changes in the plan document are included below and form part of my objection.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

2. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

3. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

4. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

5. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

6. I object to the extension of the plan period by 1 year as it has not been identified as a major change.

7. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

8. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
2. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
3. I object to the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
4. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
5. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to lodge my objection to the new version of the local plan, in particular the inclusion of site A46 in Normandy.

I understand Taylor Wimpey have offered to build a secondary school as part of their development of this site and while I can see how a free school may be very attractive to GBC, a recent consultation with the 2 nearest secondary schools (Kings Manor in Park Barn and Ash Manor in Ash) has revealed that they are both currently significantly undersubscribed and both have the option to expand their capacity, should it be needed in the future.

A new secondary school in this part of the borough is not only unwelcome but would be detrimental to our current schools. GBC’s assertion that site A46 should be removed from the Green Belt protection because a new secondary school is required is very ill-advised and will not stand up to any scrutiny if/ when this case is taken to court.

Further, no thought appears to have been given the infrastructure that will be needed to support over 1,000 new homes and 1,500 school places. Westwood Lane narrows to a single lane under the railway line and forms a blind junction for people exiting from Beech Lane. GBC is proposing to add approximately 6,000 car journeys to this already hazardous road which will also add to the traffic congestion we already see in the villages of Flexford and Normandy.

If new housing really is needed (in the face of Brexit I expect housing will steadily decline over the next 5-10 years), I strongly recommend that it is spread evenly across the borough and limited to no more than 50 new houses in each village and that the Green belt remains undeveloped for future generations and the Surrey wildlife to enjoy. On a related note, I would also like to insist that any affordable housing be distributed evenly throughout the borough, and within each new development [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]

In summary, building on greenbelt land is wholly unacceptable and I will do everything in my power to ensure this does not happen.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to strongly object to the new plans for West and East Horsley and please see the comments below.

We have lived in this area for over 40 years and cannot believe the disruption that this new plan would cause.

1. Development of over 2,000 house village at former Wisley Airfield would have a major impact on the Horsley villages of such a mixed housing, retail, commercial traveller and schools development, less than 2 miles away would be enormous.
2. Infrastructure is already overloaded. The schools are full and medical facilities stretched.
3. Problems of finding parking places at the station and shops which at certain times is very, very difficult.
4. An extra 25,000 cars on our roads which are already very congested and this would also mean much higher levels of pollution.
5. Some of our roads are liable to serious flooding and the extra traffic would make this problem much worse.
6. We have some beautiful countryside in this area with probable damage to the flora and fauna if this development happens.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
estimates for population growth in the borough. The scale of this increase has alarming results e.g. an increase of up to 35% in existing West Horsley households – greater than any other single area in the Borough.

5. Where are the new jobs to come from for these new residents?
6. Much longer waiting times to see the doctor or go to the hospital.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the OLP as it currently stands. It has been constructed on the basis of housing numbers which no-one, councillors or members of the general public, has had the opportunity to scrutinize. GBC has consistently refused to make available the formula by which the numbers have been calculated, apparently because the company to whom the task of determining the numbers was delegated has claimed intellectual property rights as a reason for non-disclosure. Without public scrutiny of the projected housing numbers the DLP can have no validity.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Notwithstanding the above, with regard to my own locality:-
   
   • For reasons previously stated, I OBJECT to the insetting proposed for East and West Horsley the sole purpose, of which, is to enable significant housing. The increase in housing proposed (some 600 dwellings overall - DLP plus other "minor" potential developments

   - with some 400 plus in West Horsley) is excessive and will fundamentally change the character of both villages, placing unsustainable pressure on the local infrastructure. As far as West Horsley is concerned it is difficult to equate the DLP's proposals with the planning authority's Settlement Hierarchy statement that West Horsley is unsuitable for substantial...
growth. A proposed circa 40% increase in housing stock within the village (no doubt to be followed by further development if greenbelt status is lost) is, in my view, substantial and excessive.

- I OBJECT to the proposal to develop a "new town" of some 2,100 dwellings on the former Wisley The consequence of this, coupled with the developments proposed for the Horsleys, will have a devastating impact on the immediate locality, increasing the number of homes by nearly 80% of current homes and releasing significant numbers of additional cars into an area that consists largely of narrow country roads. The local infrastructure cannot accommodate such a dramatic increase in housing/vehicle numbers and local facilities, particularly the railway stations of Horsley and Effingham Junction, would be overwhelmed. Similarly, medical and educational facilities will be adversely affected, at least until additional facilities are developed. The whole nature and character of Ockham and the Horsleys will be destroyed if this proposal proceeds.

- Of the developments proposed for East/West Horsley, I PARTICULARLY OBJECT to:-

- The proposal for some 100 houses on site Any access to this site will require demolition of a house(s) fronting Ockham Road North. Such access will compromise traffic and pedestrian safety, releasing traffic from the development onto a minor (but extremely busy) road with poor sight lines and with only narrow footpaths for pedestrians (including young children on the way to local schools), who are obliged to walk no more than 1-2 feet from passing traffic, including very heavy lorries and goods vehicles most of which, I might add, break the speed limit. Additionally, the site is subject to severe flooding, and abuts Lollesworth Woods, which are designated a Site of Nature Conservation Importance. Although these woods are private property, it is inevitable that the nature of the woods, the flora and fauna, will be irreparably harmed by the inevitable incursions by in habitants of any development of this site.

- Site A41 (90 houses), which looks as if a blind folded planner has just put a pin in a It is difficult to imagine a more inappropriate site. A housing development here will destroy what is a significant stretch of rural pasture with woodland behind, which provides an unbroken rural scene and feel between two separate parts of West Horsley.

- Finally, I OBJECT to the proposed designation of Station Parade, East Horsley as a "Rural District Centre" which, by definition, opens the village to uses which are wholly inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the proposals in the OLP to build some 65% of new houses in the current greenbelt and the insetting of many villages to facilitate this, more so since I understand the leader of the council proposes to CREATE a new greenbelt area in his own and his predecessor's community. GBC's Conservative group was re-elected on a manifesto promise to protect the greenbelt and this Government's advice is clear that housing need alone is not adequate grounds for building on the greenbelt. insufficient use has been made of brownfield sites, much being earmarked for commercial development (a sector in decline within the borough given the growth of on-line shopping, etc.), and the number of houses planned in the urban areas is, I believe, too low. It would seem that regeneration of some areas has been ignored with the plan concentrating instead on the building of homes on greenfield sites. This is not a sustainable policy given the disproportionate effect it will have on traffic generation (for which there is no adequate infrastructure). For these reasons alone the OLP, in its current form, should be rejected.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The ensuing increase in traffic along wholly unsuitable narrow lanes will lead to an increased likelihood of accidents with the many cyclists enjoying this area.

Huge demand will be placed on local services which are already stretched.

It will turn this part of Surrey into another anonymous urban sprawl.

With greater creativity and thought, I am sure a balance can be achieved between the needs for housing and preserving the countryside for future generations.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2
(2) I strongly object to Policy P2 because it seems in order to meet the target, some 57% of new housing will be built on the Green Belt. How can this be justified? As far as the population is concerned, the Green Belt is sacrosanct. Surely, it is undemocratic to impose this policy which will inevitably destroy our beautiful countryside and the wildlife.

(3) I strongly object to the insetting of East Horsley, which is proposed as part of Policy P2.

(4) I again strongly object to the proposed extension of the settlement boundary and, therefore, the removal of the village areas of the Horsleys from the Green Belt (Policy P2).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Comment ID: PSLPS16/1995  Respondent: 8900705 / Susan Fuller  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to Gosden Hill development being in the Local Plan The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime, given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

Comment ID: PSLPS16/1998  Respondent: 8900705 / Susan Fuller  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).
The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been compiled with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The additional north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking and Guildford would now be through Burnt Common and Send. Equally, traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.
This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

 Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.  I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.  POLICY H3 – Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems. The A247 in particular is narrow and twisting and, in places, impossible for two large vehicles to pass each other. The footpaths are narrow and, therefore, dangerous for pedestrians. This country lane through a pretty village is already used by far too great a volume of traffic and it cannot take any more.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)
Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision for any increased capacity for Guildford hospitals. Where is this assessed and remedied? The Royal Surrey is already extremely busy causing inevitable delays in patients being treated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4243  Respondent: 8900705 / Susan Fuller  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3
I am particularly concerned about the amount of traffic already coming through West Clandon, a narrow winding road. I also feel that Surrey should keep its villages as they are and not seek to expand them until they are dormitories of Guildford. Please don’t destroy what is lovely about our county.

<td></td>
</tr>
</tbody>
</table>

1. I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/4249  Respondent: 8900705 / Susan Fuller  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I OBJECT to the Borough Wide Strategy (Policy S2)

a. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

b. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

c. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any commonsense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
C.i. Policy 25 Gosden Hill – My Objections

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

C.ii. Policy A43 Garlick’s Arch – My Objections

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.
19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
C.iii. Policy A58 Burnt Common – My Objections

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site

2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.

3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
E. Policy S1 Presumption in favour of Sustainable Development– My Objections

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

G. Duty to Cooperate – My Objections

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

Comment ID: PSLPA16/3581  Respondent: 8900737 / Denise Graham  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am an East Horsley resident and I would like to state my objection in the strongest possible terms to the developments proposed for East and West Horsley and Effingham as well as the removal of these villages from the Green Belt. I have stated my reasons for objecting below.

**Loss of Greenbelt Land:** Although I understand there is a need for increased housing nationally, as well as locally, I would have thought that the preservation of the Green Belt outweighed this requirement. If we do not act now to preserve the Green Belt I can see that in time these areas will be swallowed up by increased development into the Greater London area. The Green Belt is essential for preserving the ‘gap’ between Greater London and Surrey. Surely any need for new houses, should first be put onto the numerous Brownfield sites in Guildford itself before any encroachment of the Green Belt is even considered. Other options for development to the west (Onslow Village) and east (Burpham) of the existing town also seem preferable as those areas are not currently in the Green Belt and at least existing infrastructure and transport links to local businesses are already largely in place. To make such an increase in these small villages, would change their character irrevocably for the worse.

**Traffic and Parking:** Currently the roads in these villages are small, often without pavements in many roads. There would be a huge increase in traffic in these areas with currently very limited public transport and the existing train stations with car-parks are already full to capacity. The village shops, medical centre and village hall have limited parking, and again, any increase in traffic would only exacerbate this problem.

**Flooding:** This is already a problem in many areas, and this would only increase with increased building. The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area, and local residents are well aware of how much standing water there is in their gardens after rain. We already know what happens to local roads when it rains – the drains can’t cope.

**Schools:** The existing state schools are already oversubscribed, and again, traffic jams are already bad in the times of the school runs. : No extra places are planned in the Horsleys, and the school places proposed at Wisley Airfield will not planned until many years into the project.

**Medical Facilities:** These would be affected in the same way as the schools.

**Pollution:** The large increase in volume of traffic will cause an increase in nitrogen dioxide and particulates in the environment – already a cause for concern in several areas in the Borough.

**Transport:** Misery for commuters, nowhere to park and full trains at commuting times.

**Local Road Network:** In respect of the proposals for development at Wisley Airfield and for an upgrade the current A3 junction at Burntcommon to a full 4-way junction, SCC traffic modelling anticipates increased use of Guileshall Lane, Hungry Hill Lane and Tithebarns Lane for traffic accessing the A3 at Burntcommon in order to travel to Guildford and beyond. The SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”. It appears that the Plan is proposing a strategic site at Wisley Airfield without even knowing what improvements to the local road infrastructure will be required. If that is the case for Wisley Airfield, then it is almost inevitably true for the proposed developments in East and West Horsley as well and I find this extremely worrying.

It is paramount that GBC should make every effort to retain the present character of the area and address economic and housing requirements without impacting the Green Belt.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Comment ID: PSLPA16/3374  Respondent: 8900769 / Andrew Frackiewicz  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I strongly object to the overall proposal to remove the villages listed in the above document from the Green Belt, in particular East Horsley, West Horsley, Ockham & Ripley. This is fundamentally against the principles that our countryside is protected from building on and to ensure that there is a balance between houses and open spaces. The Green Belt we have in the Guildford area and particularly around East Horsley, West Horsley, Ockham and Ripley preserves/protects the environment, air quality, helps to prevent flooding and provides open countryside for all to share.

2. I strongly object to the removal of Wisley Airfield and the land surrounding it from the Green Belt. Again this is an open area which should be protected against the developer.

3. I strongly object to the proposal to designate Wisley Airfield as an area for building some 2000 new houses. This is Green Belt land and must remain so.

4. A part of any local plan should be to use up all brownfield sites first, whether immediately available or at a later date, before any other land for housing is considered. There are areas in the Guildford area where there are unoccupied pieces of land, derelict offices and industrial areas. In Guildford itself the areas around Walnut Tree Close and Slyfield spring to mind but all other such areas which need re-generation must be identified and used for housing needs before any other land is considered. Developers must be made to use brownfield land and not just proceed with what they see as a 'cheaper' option, i.e. the development of green fields.

5. The land held by Surrey University should be released for housing for students and accommodation built upon this land. If students were accommodated on this land, the housing that they currently occupy in the Guildford area would become free and allow other people to live there or allow development of new houses. Again this must be implemented before any Green Belt land is developed.

6. I believe that the housing requirements have been over-stated. There is no visibility on how the currently proposed numbers have been arrived at and a further aspect is that the allowance for migration is probably over-stated given the government's latest policies both pre-Brexit and post-Brexit.

Specific Comments

1. I most strongly object to the proposal to remove the Horsleys from the Green Belt and for extending the boundaries of the Settlement areas of the Horsleys, thus possibly leading to a substantial number of new homes being built. The public facilities are already at full capacity. The doctors surgery is always full and appointments are generally difficult to obtain
unless one is prepared to wait for a few days. There is no bus service worth mentioning as there is only the odd bus at times between 9:30 a.m and 4:00 p.m. The only practical way to reach East Horsley is by car and parking is already difficult, therefore additional vehicular traffic arising from more people living in the vicinity or coming to East Horsley could not be catered for and would be chaotic for the residents already living there. Further more there is no available land to provide for additional facilities, other than a few empty shop units.

2. I object to the Settlement Boundary Local Plan 2003 for East Horsley being re-drawn in the 2016 Plan. The lines as designated in 2003 should remain.

3. The infrastructure in East Horsley and West Horsley is already over stretched. For instance in East Horsley we have had Thames Water checking the sewers as they have concerns about their capacity. When we have heavy rain we have flooding - refer to government maps which places part of East Horsley on the 'Flood Plain'. The roads around East & West Horsley are already very busy and in many places 2 cars travelling in opposite directions struggle to pass - never mind any larger vehicle. Examples of this can be found on Oakham Road South between Bishopsmead shops and the railway station.

Proposed Areas for Housing

1. East Horsley - I have no objection in principle to use the Thatcher's Hotel Site for housing provided the density is reduced and that adequate road access provisions are constructed due to the already very busy and dangerous access situation onto the main A246 road.

2. West Horsley - I have no objection in principle to use the Bell & Colville Garage Site for housing.

3. The remainder of East & West Horsley - As well as the Green Belt issue I mention at the start of my letter, I object to increasing the size of these villages by some 500 additional houses, mainly the additional designated housing area in West Horsley. This would destroy the character of both East & West Horsley. In addition to adding the 500 or so houses, such an increase would severely impact East Horsley since West Horsley has no facilities to speak of, i.e. no shops, surgery, bank, library, etc. Therefore more people would travel to East Horsley and further increase the parking problem there. There is a primary school (Raleigh) which is shared with East Horsley but I understand that this is full and certainly the secondary school at Effingham is full. So again any significant increase in people living in East & West Horsley would probably swamp the schools facilities we already have in this area.

4. Wisley Airfield - I strongly object to any form of building here as I mention above. This is an area of Green Belt land with no infrastructure and non-existent transport facilities other than road access. The reasons for unsuitability and rejection of this area for potential development are well documented in the recent rejection by GBC Planning of a planning application for access to this site. The Wisley site must be removed from the Local Plan. Access from this site to the A3 is very poor and already the junction is at capacity at peak travel periods. In addition rail transport is already at full capacity on the train line into London and the car parks at nearby stations are fully utilised. The large increase of vehicular traffic and people from houses built at Wisley could not be absorbed by the current infrastructure and public facilities.

5. The recent proposal for housing at the Effingham School site was recently rejected by GBC. Surely if this proposal was rejected then the conditions for building more houses in the Horsleys & Ockham are even less favourable due to the more restricted infrastructure and transport availability and roads which generally are only lanes.

6. Onslow Estate Housing - Why has this proposed area not been listed for housing? I understand from the local press that GBC do not wish to take up the offer for this large area to have housing. It has good access to the A246 and is close to Merrow shops and public transport including buses and the park & ride which provides good access to Guildford town centre.

Other Comments

1. In order to achieve a better balance in the housing stock GBC should implement a strict policy to ensure that the demolition of small houses including bungalows and the resulting construction of replacement houses of a much larger size be immediately prohibited. Whilst current policy appears to favour the developer the removal of smaller housing stock reduces the number of properties to which people can downsize to and obviously if there are no such smaller houses available in the area that people wish to continue to live in then they will just remain in their larger homes and not free up existing houses for growing families.

In conclusion I would ask that Guildford Borough re-consider this plan. It would appear that many of the comments and views raised by local people in the previous consultation appear to have been largely ignored, certainly as far as the Horsleys, Ockham & Ripley villages are concerned.

The objective of adding some 14,000 new homes, which I understand represents a net increase of some 25% to the housing
stock of Guildford Borough over the next 20 years, appears grossly overstated given the nationally projected population increase of 15% over the same period. I have to question whether employment in the area; infrastructure including roads and public transport; facilities such as hospital, medical and schooling; will increase by a similar amount. If not then it surely is illogical to start to plan for so many additional houses.

East & West Horsley as well as Ockham are village communities and I wish them to remain so. My plea is that 'brownfield' sites in the Guildford area should be the starting point for any additional housing and Guildford Borough Council being an elected body together with the local Councillors should all be fighting for the wishes of the citizens who have elected them.

Page 206 of 3367
This letter is my response to your invitation to comment on the above-named document, which has been studied recently. On 22nd November 2013, I wrote to you about the previous Green Belt & Countryside Study/Local Plan Strategy Sites Issues & Options. The current document offers some improvements on the earlier draft, including the welcome removal of the previously proposed development site which included L열lesworth Wood.

Nevertheless, the present PSLP still contains proposals which I find unacceptable. First of these is the continuing proposal to inset virtually the whole of West Horsley from the Green Belt. In my view this proposal remains unacceptable for the following reasons:

1. West Horsley in particular (as well as East Horsley to an even greater extent but partly for different reasons - see further below) appears on the Guildford Borough Key Diagram (page 13 of the PSLP), as a sea of white (i.e. land no longer to be Green Belt) set in a much larger sea of green representing "countryside". It is clear that the proposed treatment of West Horsley does not measure up to the requirements of the National Planning Policy Framework (NPPF) generally, but in particular to those of paragraph 83.

2. From the North part of West Horsley there are exceptional open views towards the Sheeples (the nearest part of the Surrey Hills Area of Outstanding Natural Beauty - ANOB), as well from the ANOB towards the North into West Horsley. Clearly these much-prized views will be damaged by any significant development in any part of West Horsley. Further, West Horsley is the main access point for the public on foot & by car to the ANOB from the North (at West Horsley church and Shere Road).

   1. In particular, the new Strategic Development site A41 in the PSLP is particularly objectionable in this regard, as its' effect will be to compromise (destroy) views to and from West Horsley, more than other Strategic Development sites proposed for the Horsleys.

Turning to East Horsley's proposed development as a District Centre, this is beset by problems, particularly as regards the area of East Horsley Station Parade. Already this has too little short-term and long-term parking, both at the railway station and increasingly for the local shops. Other services, particularly medical and educational are quite clearly already insufficient.

The new housing developments proposed for both East and West Horsley in the PSLP will alone overload the proposed District Centre, but the possibility of a larger development at the Wisley Airfield site can only exacerbate this situation, since Horsley station would be the obvious access point for Wisley residents, (in particular London commuters) to the railway. (Residents of the proposed Gosden Hill Farm and Send housing developments might be attracted to a new Merrow Station, but this will be no help to Wisley, and will, in any case, lead to increased over-crowding at later stations, given the likely limit to additional train capacity which could be run on existing tracks). Furthermore, there are no proposals to develop the area around Effingham Junction station, which would be slightly closer to Wisley (if built) than Horsley.

All in all, it appears that the adoption of the current proposals for excessive housing concentration in the Eastern areas of the Borough of Guildford in the current document can only lead over time to the complete destruction of the Green Belt in the Horsley area, and most probably to a major transport disaster.

Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the borough. It will destroy the rural character of these communities.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Dear Sirs

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farm Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object most strongly to the latest draft of the GBC Local Plan.

My reasons are as follows:

The plan still proposes to inset East Horsley from the Greenbelt;

Development of 100 homes is proposed near Horsley Station;

Over 2000 homes are still proposed to be built on the Wisley Airfield site;

The village of East Horsley and its surrounding villages (West Horsley, Effingham and Ripley) simply do not have the infrastructure in terms of schools, medical facilities and transport (including rail, roads and parking) to meet such a high increased demand.

I note that 57% of the new housing proposed will be on land that is currently categorised as Greenbelt. This was promised to benefit future generations and to destroy this is quite appalling.

Following the Brexit referendum forecasts of increasing population numbers have been reduced to 10.4% for Guildford so why, in the light of this does the Council plan to raise housing stock by more than double to 22%? It is neither warranted nor rational.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object the A42 Clockbarn Nurseries, Tannery Lane.

This lane is also very narrow and, because of recent Marina approval, will make access into Send Road even more dangerous.

To summarise:
All these proposals are being built on what was green belt and seems extremely underhand by moving the green belt boundary lines. This goes against the Secretary of State guidelines and Government planning Minister. A letter received from Sir Paul Beresford in July, 2014, stated that only in exceptional circumstances could properties be built on green belt land. These proposals could be built on brown fields and do not show special reasons for green belt building. With reference to Send Hill development this is a complete residential area and could not cope with a large increase in traffic including commercial lorries used by travellers. However the Clockbarn site is more suitable for commercial vehicles. I am also surprised that Ewbanks brown belt site was suddenly abandoned as it would seem more appropriate for industrial usage and homes. I would be most interested to know how and why this occurred and the other sites suggested were put in at the last moment before the meeting on the 24th May. This gives very short notice for discussion.

A copy of this letter is being sent to the Secretary of State, Ministry of Planning, our local Member of Parliament and Prime Minister, David Cameron.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed development of the above sites for the following reasons:

Development of this area is totally inappropriate because Send and Ripley could not absorb 400 house and 700 square feet of industrial usage. As your plan does not include any infrastructure improvements it is obvious that at most times the traffic will become completely gridlocked. This does not take into consideration the proposed 4000 properties at Wisley and Gosden Hill Farm. The suggested four way entrances on to the A3 would also make a further impact on the area and would encourage traffic to and from Woking and Old Woking to use Send Road to reach this junction. Unless there is vast improvement to the infrastructure, e.g. shops, doctors, hospitals, dentists, schools all of which are already oversubscribed - where are all the people's facilities.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I was totally surprised at the latest addition to the local plan for Send's future development. The development at Send Hill would obviously be built on Green Belt Land and is totally unsuitable for this area.

I object for the following reasons:

1. Send Hill is a very narrow lane and, in particular, where this proposed site will be there is absolutely no room for two vehicles to pass each other. If this proposal was accepted, the road would have to be widened, at considerable cost, to enable lorries and caravans to go back and forth on this site. Winds Ridge has always had drainage problems and these will be exacerbated by extra properties in Send Hill.

2. The privately owner part of this development, over recent years, has become a haven for wild life with deer, badgers and various species of birds.

3. When this piece of land was sold to the present owner there was a Covenant that a comer of this plot should not be disturbed as it was used as a dog and pet cemetery If this is built on, surely this is breaking the lease.

4. The GBC area of this development has been used for many years - to my knowledge well over twenty years - for recreation, children and dog walkers.
5. Previously the land was used as a waste infill. This infill was extremely toxic and has been vented over a period of time. If building was to take place, surely this would disturb any existing toxicity in the ground which could result in serious problems. This could be one risk too far!

6. The cemetery enlargement in Send Hill, which has now been offered to all denominations will, in itself, increase both traffic and parking problems and there would be added chaos on your proposed development. If you take into consideration the traffic from schools and their latest rebuilds, this will also increase the traffic problems. By the riding stables in Send Hill the road gets even narrower and is very dangerous leading into Potters Lane.

I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

Answer (if comment is on questions 1-7 of the questionnaire): ()
C.i. Policy 25 Gosden Hill – My Objections

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt.
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

C.ii. Policy A43 Garlick’s Arch – My Objections

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.
19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Answer (if comment is on questions 1-7 of the questionnaire): ()
C.iii. Policy A58 Burnt Common – My Objections

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.
13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.
14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

I object to the potential impact of para 4.4.23a on Burnt Common with its over allocation of industrial zoning is subterfuge for a waste management facility which is a dishonest and underhand approach to planning and proper consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
E. Policy S1 Presumption in favour of Sustainable Development– My Objections

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

G. Duty to Cooperate – My Objections

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to cooperate with the wishes of its own electorate.

Despite the thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
c) The infrastructure is already under great strain, and this further demand on resources is likely to lead to complete breakdown in some areas. We already have little or no spare capacity in schools and doctor’s surgeries. There is often no parking space at Horsley station now, and when longer trains are available to accommodate these extra people travelling, there will not be sufficient parking space for them. What about the provision of utility supplies, water, power, drainage, broadband & telephony? Local roads are dangerously overused by traffic such as heavy trucks and buses for which the roads were not designed. Additional road traffic is likely to lead to health and safety issues. Who is going to pay for all these improvements? Guildford Borough Council (us, in other words)?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
