The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.
There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.
I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY D3

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. POLICY D3

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY D4

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **POLICY E1**

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. **POLICY E2**

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.
There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. **POLICY E5**

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. **POLICY E6**

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development.
example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/”Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

1. POLICY E7

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable
residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H1

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.
It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. POLICY H2

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40. In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to other towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income. And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

<table>
<thead>
<tr>
<th>1. POLICY H3</th>
</tr>
</thead>
<tbody>
<tr>
<td>I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.</td>
</tr>
<tr>
<td>The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”</td>
</tr>
<tr>
<td>The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.</td>
</tr>
<tr>
<td>The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.</td>
</tr>
<tr>
<td>The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.</td>
</tr>
<tr>
<td>The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)</td>
</tr>
<tr>
<td>The policy wording should be restricted to adjoining sites or define the concept of being &quot;closely related&quot;. In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)</td>
</tr>
<tr>
<td>The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.</td>
</tr>
<tr>
<td>The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.</td>

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY I1

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable
(and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY I2

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).
Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

---

1. **POLICY P2**

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is
the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt.” This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

### Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. **POLICY P4**

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

### Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

1. **POLICY S1**

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)
The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY S2**

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guilford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guilford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guilford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guilford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guilford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guilford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these
adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN Ire not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: SQLP16/1563  Respondent: 8921857 / Claire Kukielska  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise
demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The
draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all
Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost
certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There
is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control.
The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure
requirements placed on developers are supposed to be in place before development commences. This is utterly
unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash
flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher
levels of congestion than now. This will reduce the quality of life for residents through congestion and
disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride
facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF
provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as
a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan
consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market
Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford
until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow
with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for
Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC
and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy
Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under
Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and
Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and
foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both
technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic
issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it
overstates housing need. The Council has prevented councilors or others from properly considering the SHMA
by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's
circumstances, including in particular the Green Belt and road infrastructure. National policy permits such
constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on
a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required
infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have
the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the
Council to very little.
The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: SQLP16/1565  Respondent: 8921857 / Claire Kukielka  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4545  Respondent: 8921857 / Claire Kukielka  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to
build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

I object to the potential impact of para 4.4.23a on Burnt Common with its over allocation of industrial zoning is subterfuge for a waste management facility which is a dishonest and underhand approach to planning and proper consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to cooperate with the wishes of its own electorate. Despite the thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

• disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

I would like to strongly object to the new plans for East and West Horsley on the following grounds:

1. Enlarging the boundaries for our villages and removing the village areas inside the boundaries from the green belt will significantly worsen the character of the villages.
2. Building the proposed new houses will significantly increase the demand on already stretched services, such as the Medical Centre and schools. For instance will we ever be able to make a doctor's appointment, already difficult?
3. Traffic has already increased significantly through the roads of East and West Horsley. Building significantly more houses will make the situation worse and indeed dangerous for both pedestrians and motorists. Parking at the two parades of shops is currently difficult and will become even more difficult.
4. Pressure on the station and also parking there will increase, particularly if the development at Wisley is part of the plan.
5. Just a comment on Wisley Airfield. I understood this development was refused recently, so cannot understand why it is being submitted again.

Finally a general comment, I understand the vast majority of residents are against the new development plan, as I am sure you will see from comments you receive and so, as elected representatives, you should reflect the views of your constituents.

<td></td>
</tr>
</tbody>
</table>
I object strongly to the re-instatement of the plan to build on the Wisley airfield site. This has already been rejected once for sound reasons: the impact of the proposed number of houses within the Green Belt is unacceptable regardless of the developer adding schools or shops to the design. The impact on the A3 transport route is unavoidable. Putting this proposal back into the plan shows a disgraceful lack of integrity by those within the Council who invite public input to the planning process and then show total disregard for the views of people who take part in the consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/11901  Respondent: 8922177 / Beverley Weston  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

I object to proposals within the Local Plan to build within the Green Belt. The NPPF guidelines state very clearly that development must be sustainable. Nibbling away at the Green Belt is intrinsically unsustainable, and the Plan is therefore unsound within NPPF guidelines.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
GBC stated that it would prioritise development of brownfield sites within the urban area over development in the Green Belt. The new Plan overemphasises commercial development within the town and allocates insufficient brownfield sites to house building.

1) I believe taking Horsley out of the green belt is fundamentally wrong and not justified. The ‘exceptional circumstances’ have not been demonstrated.

2) Infrastructure here is already bursting. It is always difficult to make a doctor’s appointment, primary and secondary schools are oversubscribed (our local secondary school The Howard of Effingham has just been refused in their planning application to upgrade their pitifully old and inadequate facilities. Roads and drainage are disgraceful. They cannot withstand any increase in traffic as they cannot meet our current need.

3) The huge number of new housing proposed in the plan would completely change the face of our village. It would be ruinous to destroy a village such as Horsley which has a rich village heritage and is even in the doomsday book.

4) I question the validity of the housing numbers themselves. They appear to be vastly inflated and would result in west Horsley (where I live) increasing by up to 35%!
I do hope Guildford council sees sense and rejects the plan in its current state,

Council has provided no information on the quantitative housing need in the borough and the requirement for 13,860 new homes appears not to be supported by a housing needs survey. I cannot believe that this is the case and would be grateful for information on how this number was arrived at. I have not seen any published data.

Answer (if comment is on questions 1-7 of the questionnaire): ()

There is a need for affordable housing and for downsizing accommodation for the elderly retired. Both need to be centrally located, not in the outer areas of the borough, necessitating travel to work, schools, clinics and shops on a very inadequate transport infrastructure, or alternatively by private car leading to yet more gridlock on roads leading to the centre.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to proposals in the Guildford Local Plan to build within the green Belt.

I object also to the proposals to increase the settlement areas of villages and even to remove some from greenbelt status. This has little to do with satisfying local housing needs and much to create a developers charter. This policy is totally flawed and gives no regard to environmental considerations. The greenbelt is sacrosanct and must be preserved and nurtured for present and future generations.

I would like to register my objection to the new local plan for the Horsleys and Wisley.

At a time when the environment is under pressure in so many ways, it seems to me ridiculous that you are looking to take areas out of the Green Belt - and increase the urbanisation of the countryside. As a country we expect the rest of the world to contribute to green policies, but unless we can demonstrate such policies close to home then we are in no position to talk.

On top of this, the infrastructure in the area does not support a significant increase in the local population size. And again, the increasing of the infrastructure will place greater burden on the environment with more/larger roads, greater use of natural resources, water, sewerage, etc.

Whilst I do appreciate that the population size is growing in the UK, requiring extra accommodation, evidence suggests that this can be provided at brown-field sites and policies to encourage higher occupancy rates.

I object to the preposterous SHMA figure of 693 homes per annum. The local area simply cannot absorb this housing number without losing its essential character.

The draft Local Plan must now undergo an editing process in order to become a document that favours development on brownfield sites and protects the Green Belt and the Borough's character.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. The geography of London is unique specifically because of the existence of the Green Belt; if not for the Green Belt London would sprawl uncontrollably like so many other cities in the world.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads. I use the M25 every day and the A3/M25 junction is already a bottleneck without an additional 4000 cars joining at the Wisley junction.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
7. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I object to all the proposed development at Keens Lane. This area is Green Belt. Keens Lane is already dangerous for all road users - pedestrians, cars, bicycles, horses - as a single lane road already used as a cut through for other traffic. It also forms part of an important wildlife corridor between Whitmoor and Broadstreet Commons. Excess water run off from Keens Lane causes flooding in Sime Close and Gravetts Lane which would be made much worse by removing green space.

As a West Clandon resident I suffer everyday at the volume and speed of traffic along the A247. The danger of fast, heavy and very large vehicles travelling the A247 is extremely dangerous and I have witnessed first hand pedestrians being frightened by vehicles mounting the pavement in order to avoid a collision with oncoming vehicles.

I also object to the proposed development at Wisley and Gosden Hill farm. The proposed developments are too great for the road infrastructure and would cause an urban sprawl that would link Guildford and the villages to the inside of the M25.

I strongly object to Guildford Borough Councils plan to build over 14,000 new homes under the revised Draft Local Plan. This proposal will damage the local communities by over development in particular Clandon and Ripley.

I object to site A43 Garlicks Arch there is no suitable infrastructure to support the extra housing and population.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I object to the A43a on and off ramp at Clandon, it would increase the traffic problems in the villages and at peak times would increase the number of dangerous drivers.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Me and my two children are keen cyclists. Our house is situated on the A247 and we and cycle on this road every day. The road is already too busy and not suited to the current volume of traffic and LGVs. It’s only a matter of time before someone is knocked off their bike and killed on The Street.

I also strongly object against the need for any additional new schools and doctor’s surgeries.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Infrastructure already overloaded: drains, water supply, medical facilities and our roads are already inadequate and could not possibly cope with the proposed number of new homes. Building this number of homes would lead to flood risk here and downstream, along the Wey and Thames.

The sewerage system is already inadequate as many will testify. To give just one instance, and there are many, after heavy rain (and not "exceptional rain") the main sewer running parallel to Ockham Road overflows and a manhole cover in a field in Slade Farm is displaced, depositing raw sewage in the field and adjacent ditch.

The single school in West Horsley is already very much over-subscribed, with further development meaning even more existing residents' children would not be eligible. The knock-on effect of the proposed development would be greatly increased traffic on local roads for school runs to outlying schools.
The single medical centre shared between the Horsleys is similarly over-subscribed and resources and staff overstretched. Such a significant increase in population as proposed would stretch this to breaking point.

Parking spaces near the shops of the Horsleys are very limited, as they are at the station. The impact of such a disproportionate increase in population as proposed would overstretch these facilities even further, make it difficult if not impossible for many residents, including those older and infirm who depend on them, to go to the shops, medical centre and chemist.

The Street, from the A246 to West Horsley, is very narrow, and could not be widened. This road is already difficult to negotiate and even dangerous in places for other drivers when used by buses, lorries and other large vehicles, particularly at night and in bad weather. This would be exacerbated by the inevitable increase in traffic which would result if the proposed development were to take place.

This road is not only a problem for drivers, it is even more dangerous for pedestrians. On these narrow stretches the pavements also are very narrow; it is impossible to walk two abreast and so a particular problem for those with children and for wheelchairs. Like the road itself, the pavements could not be widened.

There is such severe flooding in Ripley Lane that it is completely impassable several times a year. There is also frequent severe flooding after heavy rain on The Street, East Lane, and Long Reach, so much so that they are impassable to anything other than a 4x4.

Designation of Station Parade as District Centre This shows a lack of understanding of the nature of the village centre and would endanger its character by potential future urbanisation.

Proposal for large mixed development on former Wisley Airfield The potential impact on the Horsley villages and further afield would be massive and damaging in terms of character.

I object to the proposed removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site would create an urban corridor stretching from London to Guildford.

2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the detrimental impact on transport, local roads and road safety because of the following:

The development is too isolated, and even within the development itself too spread out to expect reduced reliance on the private car.

The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

The congestion this traffic would cause not only on the narrow rural roads in Ockham but also the knock-on effect on the immediate and wider local area, exacerbated by wide vehicles including increased bus and HGV movements.

The danger this traffic would pose to local cyclists and pedestrians, due to the lack of cycling paths and pedestrian footpaths and the space to provide them.

The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
I object to the continued inclusion in the plan of a site - the former Wisley Airfield - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

(After 14 months of consideration, and various extensions and amendments, Wisley Property Investments Ltd’s planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter).

Attached documents:
The Local Plan is lacking evidence and detail

I feel there is a big disconnect between the requirements most residents feel they need and the locations they would sight developments against the methods employed by GBC and the seemingly alarming developments proposed.

The plan is considerably lacking in details which does nothing to help the residents who ultimately will determine the plan as a collective. For example

1. There is no explanation of why so much housing capacity is required in this area and who it is for.
2. There are no artist’s impressions of how a development might look or any idea given of what an “affordable house” looks like.
3. What is a traveller’s pitch?
4. Are there any conditions attached to the allocation of travellers pitches?
5. How are they to be managed? How are services arranged and paid for?
6. What term do the travellers stay for? Is there a minimum or maximum?

I feel if these questions could be answered then I would be better informed and could make a better decision.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the new boundaries proposed for insetting the villages of Send and Send Marsh/Burnt Common from the Green Belt (policy P2).

The boundaries drawn enclose huge areas of open spaces that should be retained as Green Belt land and not developed at any time in the future. The village boundaries should be much more closely circumscribed to prevent urban sprawl and retain their village identity.

By having such a tightly inset area around the village then the greenbelt will be completely lost forever and urban sprawl will ensue.
With a presumption for development within these ‘inset’ areas, the proposed enclosures would encourage over-development and expansion of the villages in the future and completely ruin their essentially rural nature.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Fields around Danesfield, Send Marsh (GU23 6LS)

I refer to this area because it is not currently high profile but it is a significant site for other reasons.

I wish to object to this site although it is not specifically mentioned. However, I understand this site is regarded as ‘safeguarded’ and therefore could come into play should some of the sites drop out.

If you look at the maps then you will see that the far end and sides of Danesfield have had their boundaries inset and now the back gardens of these houses now are the proposed greenbelt boundary. As we are surrounded by open fields then this suggests that everything the otherside, i.e. open fields, would be redesignated as non greenbelt and therefore will be developed.

My comments on this site are as follows:

1. This site is on a flood plain. Over 37% of the site is in flood zones 2 or 3, with over 25% in flood zone 3. Therefore, this land is clearly not suitable for development and this was borne out whenever there is heavy rain and the land floods. I am reliably informed that the area becomes almost a large lake when there is a heavy downpour and this can be seen from the road and footpaths.

1. GBC policy and the Environment Agency are against developing on flood zones and so for this reason the land should not be built on or developed. GBC could face legal action from the Environment Agency if they were to go against this and spend tax payer’s funds to defend such a claim. This would be an irresponsible use of tax payer’s money.

1. I know photographic evidence showing the effect of flooding on the site have been sent to GBC and they have accordingly downgraded the site from a Potential Development Area to a Safeguarded Area.

1. Any building or hard standing will reduce the land available to absorb the run off from heavy rain falls and this will exaggerate the flooding affect. This could cause flooding and damage to adjoining property in Danesfield which may lead to future insurance claims.

1. There are many bats on this site which are protected under The Conservation of Habits and Species Regulations.

1. The access into the site is limited to only two points of entry. One entry is onto the busy Send Marsh Road which is narrow and unsuitable to carry more traffic. This entry point is near to a blind bend so there would be a safety
concern and a potential accident black spot with approaching traffic from the direction of Send. The other entry point is into the side of Danesfield where the access is deliberately narrow as it is a residential road where many families live with young children. There is only just enough room to get two cars passing so a massive increase in traffic would be totally impractical as well as dangerous for all the small children who play in the road. Furthermore, there is an old established oak tree on the entry point which would have to be cut down and I believe this has a TPO on it.

1. As a resident of Send and with my family living here and our garden backing onto this site, I am very concerned about what is being discussed regarding potential building on the site. It would be an absolute travesty if this land were to be lost to building. This corner of Send Marsh is of an open rural nature and therefore totally unsuitable for insetting from the green belt.

1. Our village is loved and cherished by all those of us who live here. Send Marsh has a long history of generations of families living here and we all love the open countryside, the lovely walks, the beautiful views and the village life atmosphere. To commence on such a thoughtless and aggressive building program would bring this to an end and would mean that we could never go back to what we once had.

1. The site should not be termed “safe guarded” “as the meaning of ‘safe’ does not seem to apply. As I understand the term as used here, this site could be back on the table as a possible contender for consideration for planning permission if other sites do not get their planning granted. There would not be a democratic process for this site to then have a further round of public consultation as the date will have been passed. We would then be at the mercy of GBC and the planners.

1. Send Marsh has already seen a dramatic increase in the traffic flowing through it and into Send village at peak hours with long tailbacks from the traffic lights at Mays Corner. Send Marsh regularly sees delays getting onto the Portsmouth Road at Send Dip with long queues of traffic going towards Ripley and Burnt Common.

1. This site is at the back of Danesfield has limited access onto Send Marsh Road and if this was the only way out then this would put a lot of strain onto an already congested road. If the access was through Danesfield then this would seriously congest our road as it is very narrow and difficult to pass cars at various points.

1. This site should not be removed “inset” from the green belt as this would mean planning permission would surely be granted for the future.

1. The field behind Danesfield is a beautiful open space with much wildlife including deer and foxes as well as lots of birdlife. The field is enjoyed by those in the village who walk and take their dogs by the adjoining footpaths.

1. Send Marsh Road has a very narrow and dangerous bridge which would need to be widened to make it safer and the whole of the Send Marsh Road would need to be overhauled. There is no mention of this in the plan.

1. Send Marsh does not have any infrastructure. There are no local shops, no school, no doctor’s surgery and no public park area. It comprises if mainly all houses and so the addition of so many new houses will put huge pressure on the infrastructure on Send and Ripley, both of which can hardly cope with the current pressures. You would have to walk a considerable distance to access any of these services and so this would mean owners would have to use a car. This would seem contrary to the governments’ policy for us all being green and reducing pollution.

1. The bus routes to and from both villages are very poor and infrequent, about one per hour. Again it is essential to have a car. The roads are too narrow and dangerous for cyclists so this is not really an option.

1. By proposing greenbelt sites in the area means this land will be gone forever. It is essential we protect the greenbelt or we will simply be a concrete jungle joined to Guildford and Woking with no green space in between. These greenbelt areas are essential to everyday living to provide clean and open space for everyone to enjoy.

1. There are plenty of brownfield sites available which should also be considered. In addition, there are sites which have been given planning permission but builders are refusing to build on as presumably, they are waiting for
house prices to increase so they can maximise their profits. I feel time limits should be placed on planning permissions granted to encourage building in any economic climate.

1. Send Marsh is poorly served by schools, particularly the secondary school. It has become increasingly difficult to get children into George Abbot which is the closest school to the village. With the amount of houses to be built set to increase, where will the children go to school if we don’t have a plan to build schools?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2488   Respondent: 8923905 / Claire Bridges   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Gosden Hill (policy A25)

The scale of the development proposal and its potential impact on the A3 and other local roads is a major concern. The provision of a rail link may help to partially alleviate the problem, but the number of houses proposed is far higher than is suitable for the location and unless the development is invisible from the A3 then it will detrimentally affect the appearance of the borough as a predominantly rural area.

I object to the large proposed development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.

I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A2.47 which are all already at 100% capacity.

I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A42: Clockbarn Nursery, Tannery Lane, Send (page219)

I object to this development because of the additional traffic that will be generated from that development. Coupled with the traffic from the new marina with 80 berths which you have agreed further down Tannery Lane, this will create a completely unmanageable level of traffic both in the volume and size of vehicles trying to pass along a very narrow country road which is mainly a single lane with passing places.

The Marina was identified as a high priority requirement and something the village apparently 'had to have'. Having spoken to many locals, it would appear that this would have been so far down their list of requirements to actually not be on the list at all! It was a travesty the development was voted through by GBC when clearly there were valid objections and once again, as with many of the other sites proposed, raises questions about the democratic decision making processes at GBC.
These same objections remain and will be compounded by the inclusion of the Clockbarn nursery site. This additional traffic will be unable safely to join the much overused main road through Send. This road is the main through road from Woking to the A3 and M25 which is already used to capacity especially by articulated trucks and heavy vehicles for which the road was never designed. Additional traffic joining from Tannery Lane would have great difficulty and any attempt to ease the problem with a roundabout or traffic lights would simply exacerbate the situation.

The access point is so narrow it would clearly be a safety hazard and a potential accident black spot. Vehicles would not be able to join the main road and so would back up along Tannery Lane at peak times. This would be really dangerous and if there was an emergency then the necessary services would be unable to gain access to the site and attend the incident and this could have serious consequences.

GBC has a responsibility to its residents to ensure proposed developments meet highways safety standards and if fail to see how an access point at a narrow junction of Send Road and Tannery Lane will meet this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A42: Clockbarn Nursery, Tannery Lane, Send (page219)

I object to this development because of the additional traffic that will be generated from that development. Coupled with the traffic from the new marina with 80 berths which you have agreed further down Tannery Lane, this will create a completely unmanageable level of traffic both in the volume and size of vehicles trying to pass along a very narrow country road which is mainly a single lane with passing places.

The Marina was identified as a high priority requirement and something the village apparently ‘had to have’. Having spoken to many locals, it would appear that this would have been so far down their list of requirements to actually not be on the list at all! It was a travesty the development was voted through by GBC when clearly there were valid objections and once again, as with many of the other sites proposed, raises questions about the democratic decision making processes at GBC.

These same objections remain and will be compounded by the inclusion of the Clockbarn nursery site. This additional traffic will be unable safely to join the much overused main road through Send. This road is the main through road from Woking to the A3 and M25 which is already used to capacity especially by articulated trucks and heavy vehicles for which the road was never designed. Additional traffic joining from Tannery Lane would have great difficulty and any attempt to ease the problem with a roundabout or traffic lights would simply exacerbate the situation.

The access point is so narrow it would clearly be a safety hazard and a potential accident black spot. Vehicles would not be able to join the main road and so would back up along Tannery Lane at peak times. This would be really dangerous and if there was an emergency then the necessary services would be unable to gain access to the site and attend the incident and this could have serious consequences.
GBC has a responsibility to its residents to ensure proposed developments meet highways safety standards and I fail to see how an access point at a narrow junction of Send Road and Tannery Lane will meet this.

Policy A43: Land at Garlick's Arch (page 221)

I object to this proposal because the number of homes proposed would add to local traffic congestion which is already excessive at peak travel periods.

This was a sleight of hand by GBC in slipping this application into the Plan at such short notice and more than any other proposal in the new plan raises questions about the planning processes, governance and legality. The site has never been proposed before and has not undergone a proper and full evaluation.

This site is also located underneath one or more pylons carrying power cables which constitute a health hazard for anyone and especially children living in such close proximity to them. There is evidence suggesting a link between cancer/Leukaemia and power lines and this has not been considered.

I also object to the location of any form of industrial activity which would increase traffic movements in that area leading to even greater traffic congestion. If additional industrial space is needed the ideal location is Slyfield which has the space to cater for it and there is a symbiotic relationship between the various activities on such a site. Slyfield has room to expand and accommodate extra capacity and is well located on the edge of the town.

If Garlick's Arch proceeds it will create traffic chaos in all the approach roads through the villages of Send, Send Marsh and Ripley. There is simply no proven need to consider this site for industrial or housing, on any scale planned.

I object to the proposed industrial development of 7,000 sq m at Garlick's Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan.

If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

The proposal to build 400 houses and 7,000sq.m. of employment space (light industrial/storage, warehousing) on virgin Green Belt land, lying outside the Send Marsh/Burnt Common village boundary, defies all logic. This area which includes ancient woodland is a refuge for deer and other wildlife. It was never considered as a Potential Development Area within the Council's 'Issues and Options report' or identified for development in the 2014 consultation.

In 2014 the Council rejected a planning application from 'Oldlands to build 25 houses in this location on sound planning grounds, so how is can now be considered apt to construct 400 houses and 7,000sq.metres of employment space there?

Apart from the fact that this is all Green Belt land, the infrastructure just cannot support such a development. Send Marsh/ Burnt Common has one just 'shop' (a Waitrose local housed within a petrol station), no doctors' surgery, no schools and the
local roads are already filled to capacity. My daily commute requires me to drive along Send Road and as the only road connecting all the villages of Ripley, Glandon and Send it is already too heavily used and simply cannot accommodate any further significant increase in traffic volume. It only takes one small disturbance to the flow of traffic (for example a minor roadwork on the Send Road or along Broadlands) to completely bring traffic to a stop and cause a journey that should take 5 minutes to become 1 hour. This is something I have had to endure on numerous occasions in the last 18 months and I cannot begin to imagine the impact of 400 additional houses on this. Consider that if this development is permitted to go ahead by GBC, and the roads are simply unable to cater for the additional traffic (residential and industrial), it will not be desirable for new and existing residents who would most likely be affected by delays to their commute and personal travel or to businesses and could therefore discourage investment leaving empty units and properties.

Any development at all in this area would be totally inappropriate and would be to the very substantial detriment of Send Marsh/Burnt Common as a village. The housing proposal alone would add 960 to the existing population of 2,341, an increase of 41%.

The proposed light industrial/storage facility would significantly detract from the open countryside aspect and add dramatically to the existing road use. It is totally inappropriate and would destroy the village's demarcation from Ripley, creating urban sprawl.

This very late and very major change to the Local Plan proposals does appear to have not followed the correct due process and therefore shall, if approved by your Council, be subject to immediate legal challenge.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Fields around Danesfield, Send Marsh (GU23 6LS)

I refer to this area because it is not currently high profile but it is a significant site for other reasons.

I wish to object to this site although it is not specifically mentioned. However, I understand this site is regarded as 'safeguarded' and therefore could come into play should some of the sites drop out.

If you look at the maps then you will see that the far end and sides of Danesfield have had their boundaries inset and now the back gardens of these houses now are the proposed greenbelt boundary. As we are surrounded by open fields then this suggests that everything the otherside, open fields, would be redesignated as non greenbelt and therefore will be My comments on this site are as follows:

1. This site is on a flood plain. Over 37% of the site is in flood zones 2 or 3, with over 25% in flood zone 3. Therefore, this land is clearly not suitable for development and this was borne out whenever there is heavy rain and the land I am reliably informed that the area becomes almost a large lake when there is a heavy downpour and this can be seen from the road and footpaths.
2. GBC policy and the Environment Agency are against developing on flood zones and so for this reason the land should not be built on or developed. GBC could face legal action from the Environment Agency if they were to go against this and spend tax payer's funds to defend such a claim. This would be an irresponsible use of tax payer's money.

1. I know photographic evidence showing the effect of flooding on the site have been sent to GBC and they have accordingly downgraded the site from a Potential Development Area to a Safeguarded Area.

1. Any building or hard standing will reduce the land available to absorb the run off from heavy rain falls and this will exaggerate the flooding. This could cause flooding and damage to adjoining property in Danesfield which may lead to future insurance claims.

1. There are many bats on this site which are protected under The Conservation of Habitats and Species Regulations.

1. The access into the site is limited to only two points of entry. One entry is onto the busy Send Marsh Road which is narrow and unsuitable to carry more traffic. This entry point is near to a blind bend so there would be a safety concern and a potential accident black spot with approaching traffic from the direction of Send. The other entry point is into the side of Danesfield where the access is deliberately narrow as it is a residential road where many families live with young children. There is only just enough room to get two cars passing so a massive increase in traffic would be totally impractical as well as dangerous for all the small children who play in the road. Furthermore, there is an old established oak tree on the entry point which would have to be cut down and I believe this has a TPO on it.

1. As a resident of Send and with my family living here and our garden backing onto this site, I am very concerned about what is being discussed regarding potential building on the site. It would be an absolute travesty if this land were to be lost to building. This corner of Send Marsh is of an open rural nature and therefore totally unsuitable for insetting from the green belt.

1. Our village is loved and cherished by all those of us who live in Send Marsh has a long history of generations of families living here and we all love the open countryside, the lovely walks, the beautiful views and the village life atmosphere. To commence on such a thoughtless and aggressive building program would bring this to an end and would mean that we could never go back to what we once had.

1. The site should not be termed as 'safe guarded' as the meaning of 'safe' does not seem to apply. As I understand the term as used here, this site could be back on the table as a possible contender for consideration for planning permission if other sites do not get their planning granted. There would not be a democratic process for this site to then have a further round of public consultation as the date will have been passed. We would then be at the mercy of GBC and the planners.

1. Send Marsh has already seen a dramatic increase in the traffic flowing through it and into Send village at peak hours with long tailbacks from the traffic lights at Mays Corner. Send Marsh regularly sees delays getting onto the Portsmouth Road at Send Dip with long queues of traffic going towards Ripley and Burnt Common.

1. This site is at the back of Danesfield has limited access onto Send Marsh Road and if this was the only way out then this would put a lot of strain onto an already congested road. If the access was through Danesfield then this would seriously congest our road as it is very narrow and difficult to pass cars at various points.

1. This site should not be removed from the green belt as this would mean planning permission would surely be granted for the future.

1. The field behind Danesfield is a beautiful open space with much wildlife including deer and foxes as well as lots of birds! The field is enjoyed by those in the village who walk and take their dogs by the adjoining footpaths.

1. Send Marsh Road has a very narrow and dangerous bridge which would need to be widened to make it safer and the whole of the Send Marsh Road would need to be There is no mention of this in the plan.
1. Send Marsh does not have any infrastructure. There are no local shops, no school, no doctor's surgery and no public park area. It comprises if mainly all houses and so the addition of so many new houses will put huge pressure on the infrastructure on Send and Ripley, both of which can hardly cope with the current pressures. You would have to walk a considerable distance to access any of these services and so this would mean owners would have to use a car. This would seem contrary to the governments' policy for us all being green and reducing pollution.

1. The bus routes to and from both villages are very poor and infrequent, about one per hour. Again it is essential to have a The roads are too narrow and dangerous for cyclists so this is not really an option.

1. By proposing greenbelt sites in the area means this land will be gone It is essential we protect the greenbelt or we will simply be a concrete jungle joined to Guildford and Woking with no green space in between. These greenbelt areas are essential to everyday living to provide clean and open space for everyone to enjoy.

1. There are plenty of brownfield sites available which should also be considered. In addition, there are sites which have been given planning permission but builders are refusing to build on as presumably, they are waiting for house prices to increase so they can maximise their profits. Ifeel time limits should be placed on planning permissions granted to encourage building in any economic cli

1. Send Marsh is poorly served by schools, particularly the secondary It has become increasingly difficult to get children into George Abbot which is the closest school to the village. With the amount of houses to be built set to increase, where will the children go to school if we don't have a plan to build schools?

I would like to place on record my objections which I would like to be seen by the Inspector

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43a : Land for new north facing slip roads (page 223)

I object to this proposal because it would do nothing to ease the density of traffic on a road which already suffers from long tailbacks at peak times. The A3 regularly has blocked traffic and adding a slip road which only serves the purpose to access a specific site and no other will only make things worse.

This proposal would encourage additional traffic along the very narrow, winding A247 Clandon Road and the Send Barns Lane/Send Road leading to Woking, the traffic along both of which are already at capacity. Send village is a ribbon development of housing along both sides of Send Road, so there is no scope to widen it, and where it ends at the Old Woking roundabout none of the connecting roads can be widened to ease congestion because of the existing surrounding buildings.

This ill-conceived plan to enable major development at Gosden Hill and Wisley completely fails to take account of the serpentine configuration of the Clandon Road and of the inability to improve the traffic flow along it and the Send Road because of the proximity of existing housing.

The suggestion that the land for the slip roads may be gifted should the Wisley airfield development proposal be accepted means that this is really no gift at all, merely an undisguised attempt by that developer to gain approval to build on protected land.

As such it will, if approved, be subject to legal challenge

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A44: Land west of Send Hill (page 225)

I object to the inclusion of two travellers pitches on this site which would be in contravention of your own stated policy of having a ratio of two such pitches for every 500 houses.

It is possible that the widening of the Send Hill road would encroach on the area of the site thus reducing its capacity for 40 houses assuming it could even accommodate as many as that which is doubtful. Two pitches among so few houses would certainly have a negative effect on the value of any houses built there and would certainly not secure the best return on the tax payers investment on the land.

Send Hill is certainly not a suitable location for travellers anyway access being difficult from the traffic lights especially with cars parked on one side opposite the school and on the brow of the hill making the approach quite hazardous.

In addition, there is a school at the bottom of Send Hill and at peak school times it is very congested with parents dropping their children. By travellers driving their vehicles with caravans making a long vehicle with potential blind spots then this will only heighten the risk of safety for parents and children.

However, a much smaller development without traveller pitches and in keeping with the surrounding properties could be a possibility. This would be a natural extension of the housing building line up Send Hill and could provide a development in-keeping with the rest of the area.

Traveller issues have arisen in Send several times over the years and Send residents and our Parish Council have expressed their views many times to Guildford Borough Council and GBC do not seem to heed our views and now again insist on trying to locate two pitches in a most unsuitable location. These pitches appear to have been randomly dropped into this
area as they were originally in the centre of the village in Wharf Lane, which was another equally ill conceived area to site them.

[Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]

The Local Plan is lacking evidence and detail

I feel there is a big disconnect between the requirements most residents feel they need and the locations they would sight developments against the methods employed by GBC and the seemingly alarming developments proposed.

The plan is considerably lacking in details which does nothing to help the residents who ultimately will determine the plan as a collective. For example

1. There is no explanation of why so much housing capacity is required in this area and who it is for.
2. There are no artist's impressions of how a development might look or any idea given of what an Maffordable house” looks like.
3. What is a traveller's pitch?
4. Are there any conditions attached to the allocation of travellers pitches?
5. How are they to be managed? How are services arranged and paid for?
6. What term do the travellers stay for? Is there a minimum or maximum?

I feel if these questions could be answered then I would be better informed and could make a better decision.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2 on page 48

I object to the Green Belt realignment which will take Send outside the settlement boundary when there are still brownfield sites available for development in urban areas which would have much less impact on local environment and infrastructure. By your own admission, "major consideration has been given to protecting greenbelt land through a "brownfield first" approach" and yet you appear to be deliberately ignoring brownfield sites in favour of targeting greenbelt.

This raises serious questions about why and concerns about who GBC is actually serving.

It has never been made clear by GBC why there is a need for such a vast amount of additional housing within the next 20 years for an area which is primarily residential and not industrialised.

I object to the removal of Send from the Green Belt because the village and its countryside provide a necessary buffer between Woking and Guildford.

The number of homes proposed for Send (693p.a.) is completely disproportionate in the context of a village like Send. The extensive development proposed for Send and elsewhere in this locality such as Garlick's Arch, Gosden Hill and Wisley Airfield means that, in effect, it will become a ribbon development from Guildford almost as far as Cobham and transform a pleasant rural area into suburbia.
The Green Belt policy has always been very clear. It is to stop urban sprawl and prevent joined up developments. This plan seems contrary to this policy and would appear to work in contravention of this.

I am concerned that GBC is not calculating their requirements correctly and is mixing up the temporary student requirements at places such as Surrey University, with that of the needs of the local Guildford population. My step father has lived in the area for 50 years and has expressed his exasperation that at no point during this time has he experienced a supposed demand for such an enormous amount of homes required. Imyself have not witnessed this demand from local people or companies, so I can only assume that all these homes will be lived in by people who are outside the GBC area and will be shipped in to live and work. If so, I object to this principal.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the new boundaries proposed for insetting the villages of Send and Send Marsh/Burnt Common from the Green Belt (policy P2).

The boundaries drawn enclose huge areas of open spaces that should be retained as Green Belt land and not developed at any time in the future. The village boundaries should be much more closely circumscribed to prevent urban sprawl and retain their village identity.

By having such a tightly inset area around the village then the greenbelt will be completely lost forever and urban sprawl will ensue.

With a presumption for development within these 'inset' areas, the proposed enclosures would encourage over-development and expansion of the villages in the future and completely ruin their essentially rural nature.

Having carefully examined the above Proposed Plan I would like to place on record my objections which I would like to be seen by the Inspector.

**Policy P2 on page 48**

I object to the Green Belt realignment which will take Send outside the settlement boundary when there are still brownfield sites available for development in urban areas which would have much less impact on local environment and infrastructure. By your own admission, “major consideration has been given to protecting greenbelt land through a "brownfield first” approach” and yet you appear to be deliberately ignoring brownfield sites in favour of targeting greenbelt. This raises serious questions about why and concerns about who GBC is actually serving.

It has never been made clear by GBC why there is a need for such a vast amount of additional housing within the next 20 years for an area which is primarily residential and not industrialised.

I object to the removal of Send from the Green Belt because the village and its countryside provide a necessary buffer between Woking and Guildford.

The number of homes proposed for Send (693p.a.) is completely disproportionate in the context of a village like Send. The extensive development proposed for Send and elsewhere in this locality such as Garlick’s Arch, Gosden Hill and Wisley Airfield means that, in effect, it will become a ribbon development from Guildford almost as far as Cobham and transform a pleasant rural area into suburbia.

The Green Belt policy has always been very clear. It is to stop urban sprawl and prevent joined up developments. This plan seems contrary to this policy and would appear to work in contravention of this.

I am concerned that GBC is not calculating their requirements correctly and is mixing up the temporary student requirements at places such as Surrey University, with that of the needs of the local Guildford population. My step father has lived in the area for 50 years and has expressed his exasperation that at no point during this time has he experienced a supposed demand for such an enormous amount of homes required. I myself have not witnessed this demand from local people or companies, so I can only assume that all these homes will be lived in by people who are outside the GBC area and will be shipped in to live and work. If so, I object to this principal.

I object to the number of homes that the Plan intends to deliver over the 20 year period 2013-2033 (policy S2).

The annual target of 693 is significantly higher than the 652 that the Council proposed last year and disregards the constraints which should have been imposed by the high proportion of the borough’s designated Green Belt land and the capacity of the roads, schools, doctors, hospitals and other infrastructure to support such an increase in the population.

There is no further evidence provided as to why so many more houses are required.

1. POLICY A42 Pages 241-2

I object to the proposed increase of a further 16 houses on the Clockbarn Nursery site. This is a totally unsuitable site for a high density development. Increasing the number of houses completely exacerbates the situation.

Traffic movements from the site in addition to the traffic accessing the new Marina development and then trying to join Send Road would cause considerable problems for residents and through-traffic alike. Access from Tannery Lane to Send Road is very limited and trying to join it, particularly at peak times, is extremely difficult.

Send Road is already used to capacity by traffic heading to and from Junction 10 on the M25 and is used as a rat run off these roads. Send Road was never intended to be used by today’s very large articulated trucks.
The essential traffic islands to enable pedestrians to cross represent an additional hazard plus the increasing number of cyclists exposed to rising levels of exhaust pollution.

Access from the opposite end of Tannery Lane is through very narrow country roads with limited passing areas which will render this access effectively impossible. This means that traffic from the Marina and the Clockbarn Nursery site would be forced to come and go via the Send Road junction.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**I object** to the Garlick’s Arch (A43) proposed changes to this site which in combination would generate considerable activity in a most unsuitable location.

Pitches designated for Show People suggests large vehicle traffic movements and a further extension to the commercial premises that have already been added on that side of the road all of which is located in close proximity to the surrounding residential area.

Increasing the number of houses would mean a truly massive increase in the volume of traffic which will only be able to use the A3, Send Road and travelling through Ripley, all of which are unsuitable for the level of traffic associated with such a development.

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause log jams of these villages.

- **Garlick’s Arch (A43)** should not be extended or even developed with the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

- **I object to the allocation of 6 Traveling Show people sites in A34 Garlick’s Arch**

The allocation of 6 Travelling Show people plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Show people plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

- **The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch**

I further object to the Garlicks Arch site because if A58 Burt Common site and development at Gosden Hill Farm is also granted then the A3 corridor from Burpham to Ripley will be over developed and it will simply join up a sprawling set of developments. These in turn will lead to greater traffic density, slower journey times as well as increasing safety concerns for an infrastructure which cannot support this level of traffic.
I object to the proposed insetting around Send and Send Marsh. If the new insetting boundary is adopted, then the land and all the surrounding fields for several miles around our village, by default, will become available for development and building, attracting builders to develop and build on large swathes of open countryside.

This is a completely irresponsible and reckless policy with no regard to co-ordinated planning and will lead to an out of control building frenzy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3843  Respondent: 8923905 / Claire Bridges  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A58

I object to this proposal A58 Burnt Common which is not defined and therefore open to interpretation. Any development of that type and on that scale will again impact the road infrastructure on the edge of two villages, Send and Ripley. In any case the need for them is unclear especially when there seems to be spare capacity at Slyfield industrial estate which is much more appropriate and already an established industrial estate.

I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough.

Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt.

This is grossly unfair on an already overcrowded part of the borough.

I object to removal of Brownfield sites (A4) from the Plan

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

I object to removal of Brownfield site (A34) from the Plan

Site A44 in Broadford Business Park has also been removed. This is another brownfield site that has already been developed. The Council’s claims to “have adopted a ‘brownfield first’ approach” (page 5) and makes out this is an important aspect of the plan but this is clearly not the case, and is contrary to national guidelines.

I object the change in policy on affordable homes (Policy 4.2.23)
The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

If the developer simply builds the development they want and then makes a cash payment to the council for the affordable houses the developer does not build, how does this help Guildford Borough Council build affordable housing? This would appear to prejudice the younger generation and those needing this urgently sought type of housing.

**I object to removing Send Business Park from the Green Belt (4.3.15).**

Send Business Park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s insetting (removal) from the Green Belt, and indeed GBC have not even attempted one.

Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

If further development is made on this Business Park then the same points arise as those made earlier for point 1, Clockbarn Nursery site with regard to traffic issues.

**I object to the proposal for a Waste Management Facility in Green Belt (A58)**

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

There are clearly serious pollution issues to be considered as well as a massive increase in commercial traffic bringing the waste in and out.

**I object to the lack of proper infrastructure planning for sites (A43 and A42)**

The plan lacks any infrastructure proposals to support all the development. There are no proposed plans to upgrade roads or introduce new roads or links, and it is simply a plan of building additional housing and commercial facilities but expecting the current road system to support more traffic which it is incapable of doing.

GENERAL OBSERVATIONS

The latest proposed plan is considerably worse than the previous plan and I am very disappointed in GBC and I am much more critical of the Local Plan proposals.

As residents of Send Marsh, we share the same views of that of our neighbours in Send and Ripley. Every time we are asked for our opinion we make it very clear by way of a massive response that so many of the proposals are ill conceived and impractical to apply in our particular area.

GBC seems to be either unwilling or unable to act upon the feedback and opinion which is so clearly voiced by the residents.

We in Send Marsh have repeatedly expressed our views over the years but clearly no attention is paid to them as evidenced by the fact that despite everything that has been said even more houses are proposed to be built in Send than before plus an additional eight Show people pitches.

The Conservative Manifesto for GBC states:

“Deliver a new Draft Local Plan taking into account constraints, residents’ views and protecting the green belt”.

It would appear that for the villages of Send, Send Marsh and Ripley, GBC are failing on two of these;

**Failing to take into account residents’ views**

and

**Failing to protect the green belt.**

Lessons from the previous plans have clearly not been learnt and one has to question the logic of the proposers thinking and how completely unsupported and illogical plans can have reached this stage. One also has to question whether anyone from GBC has ever driven or walked around Send and Send Marsh as one journey, particularly during rush hour would have demonstrated how ridiculous and unreasonable these plans are.

In conclusion, the continual disregard of local public opinion is very disappointing and GBC needs to create a significantly better plan than this one for the area we live in.

Removal of Ripley from Green Belt. Ripley is possibly the most strategically places of all the villages in the Guildford area in relation to the purposes of the Green Belt which is as mentioned to prevent Urban sprawl. It was recognised that urban sprawl develops along arterial routes which we have already seen along the Kingston by-pass all the way into Esher. Ripley is the only remaining separate village along the A3 artery between London and Guildford. Reducing the protection of this village and its surrounding area would be the greatest act of destruction to the Green Belt which a plan could bring. Ripley has been a main contributor through its openness to the purposes of the Green Belt but recently Guildford Council has appeared to try to undermine this by allowing so much development in the village. A dozen sites of multiple housing have already been allowed in the past few years. Any further development would destroy this historic village going back to Norman times in less than a generation.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Wisley Airfield This site stretches ¾ of the way between Ripley and the M25. It would significantly damage the purposes of the Green Belt in helping to extend urban sprawl along the route of the A3. The plans have not provided any real mitigation to the effect of increased traffic to the surrounding area and Ripley in particular.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site A45 Land behind Talbot Hotel. This site would result in an extension of the line of settlement on top of an extension of the line of settlement in a conservation area. One old cottage would become totally surrounded by new housing from 3 different developments in the last 5 years. This would result in over 70 houses in abutting developments in the last 5 years of the same design period in a conservation area. This will fundamentally alter the conservation area and overwhelm it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy E8 Any development proposed under this title will have to be outside the current business area which will result in another reason for further development of the area. It would fundamentally change the character of the village with a centre of shops, business buildings and houses intermingled. Garlick’s Arch is proposed both under E8 and for housing development. In effect this would create a single large interconnected sprawl between Ripley, Burnt Common, West Clandon and Send. Add a development on Wisley Airfield and a major destruction of Green Belt between Cobham and Guildford will have been completed in one Plan. This is the major trunk route from London to central southern England. To prevent this was the main purpose of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

The borough has taken the easy way out in the plan and ignored the primary purpose of the Green Belt. Transport and SSSIs have taken primary consideration. Problems with the A3 around Guildford and the Downs providing a funnelling effect through Guildford have been accepted as limitations in the basic thinking for the plan. This plan is meant to provide the framework for development over many years and should have been prepared to consider radical infrastructure changes for such a large increase in housing stock. This is a plan which will fundamentally change the nature of the borough but has been done by essentially squeezing them in within the current communication structure. The result is an inadequate plan based perceived housing need (specifically stated as an inappropriate reason) without vision or reflection on the overall character implications for the borough. However painful, it is essential that this plan is rejected before urban sprawl envelopes Guildford and we become as much a part of London as Croydon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPFF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the disproportionate allocation of housing in this specific part of the borough. Indeed over 23% of the Plan's new housing is proposed in the immediate localities my home in Ockham, together with Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that currently only has 0.3% of the population of GBC).

4) I object to the massive threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The Plan calls for a village of 159 dwellings (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2000+ dwelling development, with urban-style buildings up to five stories high and a population density higher than most London boroughs.

5) I object to the very seriously detrimental impact on the local infrastructure which in my view will be massively overwhelmed by the Plan. Roads, stations, schools to name but a few are completely inadequate to cope with the projected increase in demand.

6) I object to the fact that the proposed Plan does not meet the stated needs and desires of local communities, as evidenced in the Ockham Parish Plan. We local residents enjoy living in Ockham because of access to countryside and clean air as well as peace and quiet afforded by wide open spaces. Over 90% of residents want both the historic features of the village maintained and our village's green spaces, including the FWA/TFM, protected.

7) I object to the continued inclusion of a site (the former Wisley Airfield - now known as Three Farm Meadows) - where the planning application has been unanimously rejected by GBC's Planning Committee.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We have previously written to object to the proposed development at Ockham but we did not include my objections to the proposed housing developments in East and West Horsley. These villages are currently in the Greenbelt and there is no reason why they should be removed from the Greenbelt. They are small, semi-rural villages and the scale of the proposed developments are inappropriate for this location. There could possibly be an increase of a third in size of current population which would have a negative impact on the local environment and effect the quality of village life. Our local services such as the medical centre, school, train station parking are already stretched. Drainage is a real concern as in recent winters there has been widespread flooding. The rural lanes cannot cope with a further increase in traffic and have previously been damaged by heavy vehicles.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1301  Respondent: 8924065 / Rachel & Colin Holloway  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

Please record this as my objection to the draft Local Plan for the below reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed
houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3277  Respondent: 8924161 / Peter & Victoria Luckham-Jones  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

The site is the least sustainable which has been identified in both this version and in previous versions of the plan because of the constraints on the site and its physical location.

The distance from rail stations is not acceptable.

The site is next to one the most congested junction in the country (J10)

Our local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

In relation to public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

Bus services etc to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

RHS at Wisley is immediately next door where visitor numbers will increase by 500,000/annum.

The associated traffic increase from the RHS has not been taken into account.
The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.

I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

I object to the extension of the plan period by 1 year as it has not been identified as a major change.

I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I live at [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] with my husband Tom and our daughter. I am writing to express my very serious concern with the proposal to remove the Horsley villages from the Green belt and to increase the current number of dwellings by 40% over the next 5 years. Changing the village boundaries and stealing space from green belt cannot be reversed. The serious compromise to the beauty of our village, plus the devastation of green spaces belies this flawed plan. We moved to West Horsley in 2012 in search of beautiful countryside, a community we could raise a family in and a functioning infrastructure. Moving from South London, we were already very familiar with the long waits for doctors appointments and rumoured competitiveness for school places even though this did not trouble us at the time as we didn't have children. We found Horsley unaffected by too many demands on local services, due to lower population density, fewer houses and much less traffic.

The proposal to exit the Horsleys from the green belt and to build on open land I find lacks any considered effort and is an 'easy' option. The demand new houses will put on local schools, the doctors surgery and the village roads is going to seriously compromise what is acceptable for current inhabitants of the Horsleys. It's not safe and is too large a compromise with the current village amenities and resources.

In my opinion we should preserve the greenbelt and green open spaces and reconsider existing urban areas in need of regeneration instead. There is no shortage of existing brownfield sites. This must work in tandem with an improved plan for infrastructure.

For West Horsley I fear the proposal is flawed on the following grounds:

1. The Potential Development Areas (PDA) identified in West Horsley would be at odds with the existing exceptional character and geography of the village.
2. The infrastructure simply can't cope. The extra housing means an increased number of households weighing heavily on the few resources we have in the village. The doctors surgery and the Raleigh school are prime examples of public services already stretched. State secondary school places are also already strained in neighbouring Effingham and Guildford, before more households move to the new buildings.
3. I fear that higher levels of traffic will make getting around the village a misery. Increased queues at school pick up or drop off time and more cars on the roads in general is a danger to our youngsters. Parking at the station would be impossible, train services would become cramped and bus travel cannot be relied upon as an alternative.

Please consider this objection alongside others you will no doubt have received. My main concerns belie the infrastructure and the green belt. What is done to the green belt cannot be undone. Once this precious land is spoilt, our children can no longer enjoy it, and we will be forced to explain why we squandered this precious natural beauty before we exhausted all other options.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A 43. 30 ha land at Garlick's Arch, Burnt Common, Send

I have examined the plans to develop land at Garlick's Arch, Burnt Common, Send.

Due to the construction of the Ripley By-Pass, this site is now locked between roads and existing housing. However it does form a green barrier to the Burnt Common area.

It is in a fundamentally residential area and its partial proposed use for industrial/commercial development is wholly and totally inappropriate for this area. The villages of Send and Ripley are residential areas NOT industrial areas.

Furthermore, the local roads are already congested at peak times and development such as that proposed will only make matters worse and will probably give rise to peak-time gridlock. The local infrastructure is inadequate for further development in this area.

FOR THESE REASONS I OBJECT TO THE PROPOSED DEVELOPMENT PLAN.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Policy P2. SEND SHOULD NOT BE REMOVED FROM THE GREEN BELT.

It has long been the stated policy of Guildford Borough Council that our villages and communities should maintain their respective identities AND that they should be separated by Green Belt buffer zones. It is important that these Green Belt buffer zones are not gradually eroded away by successive council planning decisions. By slowly nibbling away at the Green Belt there will eventually be very little left.

It is because of the character of our villages and communities that people decide to live in them and not in large towns and cities. If we are not careful an urban sprawl will eventually swallow up all our individual villages and communities.

A particular concern of mine is the preservation of green and open land around the River Wey Navigation. Previous plans have proposed inappropriate development along the river and hopefully such proposals are now abandoned. You owe it to future generations to leave an unspoilt and natural environment to be enjoyed by everyone forever.

I OBJECT to removing Send from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/6884  Respondent: 8924385 / Jenni Mansel  Agent:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the National Planning Policy Framework, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the continued inclusion of the Former Wisley Airfield since after 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns noted below. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to a plan that calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to a plan that will have a detrimental impact on transport, local roads and road safety, specifically in relation to the development of the Former Wisely Airfield:

   1. The assertion that will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitior traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

**Policy A25 Gosden Hill:**

The documents imply that there is a reduction to 1,700 new homes (from the earlier figure of 2,000). But it now appears this is misleading and that the lower figure is still a minimum. In any event, this scale of new homes planned is, in my opinion, so large as to inevitably damage the whole infrastructure of the area.

Infrastructure: The proposed changes to the access to the A3, together with other recent and proposed road system changes will, in my opinion, have such a large negative impact on Burpham as to inevitably cause major traffic disruptions and should be entirely reconsidered.

The proposed development will generate a daily movement of thousands of vehicles the vast majority of which will pass through Burpham. This Plan represents yet another ill-conceived planning proposal, with insufficient thought given to the infrastructure needed.

The last few decades have seen two major housing estates, a considerable number of smaller garden grabbing developments, one super store and, recently, one very inappropriately sited supermarket. Both because of the volume and reduced speed of traffic, these changes regularly lead to severe air pollution which damages the quality of our lives in Burpham. The current Plan represents a major worsening in an already unacceptable traffic and pollution situation.

Traffic at the Burpham roundabout is regularly brought to a standstill with cars and delivery vehicles queuing to get into Aldi’s inadequate car park. New Inn Lane and London Road are already subject to long traffic queues at all times of day. Extra traffic will inevitably cause even worse delays and pollution.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2: The Plan as a whole is undermined by massive errors in the housing need figures. The housing need has been reduced from 693 per annum last year to 653 per annum, giving a total build over the period of the Plan of 13,893. On the one hand, a reduction of around 5% has minimal impact on concerns about the scale of the housing development’s enormous and negative impact on the Borough as a whole. Equally, I now understand that an over-inflated housing need figure has been used in the Plan. As this affects every aspect of this Draft Local Plan; this one particular renders the whole Plan unsustainable.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the proposed Infrastructure Schedule

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
1. OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. OBJECT to Gosden Hill developement being in the Local Plan The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from
encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** PSLPS16/2586  **Respondent:** 8924577 / Charles Lee  **Agent:**
I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.
This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. **I OBJECT to the damage to the historic environment as a result of the scale of the proposed development**

   I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

   The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the sustainable employment policy

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the loss of rural employment

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that
order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. I OBJECT Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

2. I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested.
Only today 12th July, 2016 there was a serious collision of two cars at a narrow point of the A247 in West Clandon where both cars ended up on the pavement. The collision happened shortly after 9:00 – I know this because my wife had just walked past this exact point only moments before on her way to school with our 3 children. It doesn’t bear thinking about what would have happened if the crash had happened a few minutes earlier…..These narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians AND you have given no consideration to this point.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5789  Respondent: 8924577 / Charles Lee  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016  / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

   1. I OBJECT to the lack of proper infrastructure planning for sites

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to poor air quality concerns

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to not protecting the Green Belt

I OBJECT to any proposal to take land out of the Greenbelt as is suggested with villages such as Ripley, Send and Clandon as well as sites of Wisley Airfield (A35) and Garlick’s Arch (A43). The National Planning Policy states clearly that it requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt and that housing need is not such an exceptional circumstance.

There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I OBJECT to development in areas which are at risk of flooding

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5780  Respondent: 8924577 / Charles Lee  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is no way sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5781  Respondent: 8924577 / Charles Lee  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

1. I OBJECT to the Borough Wide Strategy
2. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.
3. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Answer (if comment is on questions 1-7 of the questionnaire): ()

OBJECTION to Guildford Borough Council draft Local Plan (June 2016) and to the inclusion in the Plan of Site Allocation A35 - the Former Wisley Airfield - for a new settlement with 2,000 dwellings.

We live in Cobham and we have a greater interest in what goes into the Guildford Local Plan for the local area than those living on the far side of the borough.

On the 8th April 2016, we watched on video cam, application 15/P/00012 being rejected unanimously on the recommendation of Planning Officers. The Planning Report identified serious concerns about the development of this site. We are now aghast that this settlement is still being considered.

We also object to the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham.

The increase in population at Wisley and the nearby localities would put an intolerable strain on local road and rail networks which are already overstretched. During the rush hour it is tricky getting a space in the station car parks and difficult to secure a seat on the train (40 minutes standing to Waterloo from Cobham - a terrible start to the day). Long queues of traffic are an everyday occurrence in and around Cobham, particularly during the rush hour.

Moreover, Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving serving 5,000 additional occupiers at the site and would experience a significant increase in traffic.

Furthermore, we think that the proposed housing density is completely out of keeping with the surrounding rural area and we understand that the air quality around the Royal Horticultural Society gardens and the Thames Basin Heath Special Protection Area is already in excess of legal limits. It will not improve if the proposed development is allowed.

We could go on and on but a key point is that green belt boundaries can only be changed in exceptional circumstances. There are no exceptional circumstances.

Please remove Wisley Airfield from the local plan and reconsider the disproportionate allocation to Ockham, Ripley, the Horsleys and Effingham.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I strongly object to the proposals in the new Guildford Local Plan and in particular for the following reasons:

My main concern with the proposed increased number of housing in East Horsley would be the increased traffic and the inadequacy of the surrounding village roads making it extremely dangerous for pedestrians. As a resident of East Horsley I drive along Ockham Road South many times each day. Ockham Road South is an extremely narrow road with either no pavement at all or sections with a very narrow pavement. This road is already extremely dangerous even with the existing volume of traffic let alone an increased number if the proposed developments in East and West Horsley go ahead. I am aware of a recent accident involving a pedestrian walking along the pavement on Ockham Road South who was struck on the back of the head by a lorry wing mirror which was driving past. This lady had to be taken to hospital and sustained serious head injuries. This accident was as a result of the village road not being wide enough and the pavement also not being wide enough. Forest Road East Horsley is also a very narrow village road particularly the first 400 metres from Ockham road south.

Another example of the inadequacy of the village road Ockham Road South is when two buses or two lorries meet travelling towards each other as I have witnessed on many occasion. All traffic behind these vehicles come to a standstill as the two large vehicles have to drive onto the pavement and then drive along the pavement until they have cleared each other. This practice is totally unacceptable and extremely dangerous to the welfare of the pedestrians walking along the pavements. Many pedestrians in the village fall into the vulnerable category being either children, many of whom are walking to school or walking to or standing at their school bus stop, and elderly people who maybe both hard of hearing and or sight and slow on their feet, unable to detect the presence of large vehicles driving on the pavements and certainly unable to get out of dangers way.

A width restriction could be introduced but then how would existing school children and the inevitable increased number of school children as a result of the proposed developments, be taken to and from school if their school bus was not allowed along this road? It would also be necessary for the council to put on more buses as the demand for public transport increases with the increased numbers of people living in the village but again how could buses run along this road with a width restriction. To leave the village roads as they are, that is dangerously narrow, is surely not an option if the village population is to increase in numbers as is proposed.

In addition Forest Road in East Horsley is without any pavement at all between Woodland Drive and Glendene Avenue. On many occasions I have driven along Forest Road only to suddenly come across pedestrians walking in the road and had to break suddenly to avoid an accident. Many times it is children who have no option but to walk along this dangerous stretch to get to their school bus stop or train station. With increased numbers of housing proposed in the village and therefore people this problem will only get worse.

Not only will the local roads be inadequate to cope with increased numbers of cars, buses and pedestrians but rail provision will also be inadequate. The local plan contradicts itself with regards to the train station at Effingham Junction and Office Development at Wisley Airfield Ockham as you will see from the following 2 extracts from the Local Plan:

1. When developed, the two new rail stations, Guildford East (Merrow) and Guildford West (Park Barn), will be treated as a transport interchanges.
2. 4.17 For the purposes of the sequential assessment the train stations at Clandon, Chilworth, Gomshall, Shalford and Effingham Junction, will not be considered to be transport interchanges because of their locations within the Green Belt, AONB or the isolated nature of the station away from the village or centre. We do not consider that it is sequentially preferable or sustainable to direct office development to these locations.
However there is proposed employment floor space of 4,300 sq ft at Wisley Airfield Ockham with the following stated as being provided to get residents and employees from the site to Effingham Junction station:

A significant bus network to serve the site and key destinations including Effingham Junction railway station and/or Horsley railway station, Guildford, Woking and Cobham to be provided and secured in perpetuity to ensure that residents and visitors have a sustainable transport option for access to the site.

I strongly object to the proposed housing in East and West Horsley, due to the inadequacy of the surrounding village roads and the danger posed by increased numbers of traffic. Also West Horsley suffers from severe flooding every year and leaves residents with restricted access to and from the village along its main access roads which are under water.

I strongly object to the proposed site at Ockham Road North. Ockham Road North is a narrow village road. In particular this is highly dangerous due to the location of Glenesk School which even at the moment with current volumes of cars on the road causes chaos at school dropping off and picking up time with traffic driving along Ockham Road North having to overtake stationary cars of parents queuing to enter the school, and drive on the wrong side of the road in order to pass queuing traffic. This is highly dangerous to the welfare of Glenesk school pupils who are extremely young ranging in age from 2 – 7 years old.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

1. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
2. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
3. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings  

I object to the draft Local Plan for the following key reasons:  

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

1. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/2123  Respondent: 8925153 / D B Saidman  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.  
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
12. Opportunity (3) should be common to all sites and is not unique to this site
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
16. I object to the removal of additional 3.1 ha from the green belt without any justification
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.

26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. **FLOODING**

   Being a resident of Heatherdene, West Horsley, our gardens flood every winter.

   The field behind our house designated “Land near to Horsley Station and next to the railway” has been earmarked in the draft local plan for one hundred houses. A large percentage of this land is FLOOD ZONE 3. During the last winter this field was on Amber alert (imminent major flooding). How can it be possible to consider a piece of land that FLOODS all the surrounding gardens, FLOODS that section of Ockham Rd North with horrendous surface water, that commuters are constantly soaked and most of them walk with there umbrellas pointed towards the floor to stop major surface water from being kicked up from cars and lorries. *Recently a development of houses in Fetcham was built near a flood plain. Even though it was built with specialist foundations and drainage to protect the houses from flooding, it flooded almost immediately after sustained heavy rain. Causing the houses to be unsaleable*.

   The proposed entrance is too near the Railway arch on Ockham rd north, where lorries travel frequently into the middle of the road to make sure the clear the underside of the bridge.

   It is an accident waiting to happen, in the truest sense!

   Recently in Fetcham, a development was built on a site that floods. Even though, specialist flood resistant foundations and drainage were installed, the site flooded, causing damage to the properties and rendering them unsellable.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**Schools:**

Local schools are already at capacity – where will newcomers go to school? No extra places are planned in the Horsleys, and the school places proposed at Wisley Airfield will not planned until many years into the project.

There is talk of a new school at a site near to Lollesworth lane west Horsley, but this should have been talked about well before the local plan went out for consultation.

**Medical facilities:**

Similar situation to the schools.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
TRAFFIC AND PARKING

Assuming that every new house has at least 2 cars, this means potentially 6,000 more cars within a three mile radius of the villages. The impact on local roads will be tremendous. Parking at Horsley & Effingham junction stations (which are already full), at the shops, at the medical centre and at the village hall will all be affected.

Local Road Network:

In respect of the proposals for development at Wisley Airfield and for an upgrade the current A3 junction at Burntcommon to a full 4-way junction, SCC traffic modelling anticipates increased use of Guileshall Lane, Hungry Hill Lane and Tithebarns Lane for traffic accessing the A3 at Burntcommon in order to travel to Guildford and beyond. The SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”. It appears that the Plan is proposing a strategic site at Wisley Airfield without even knowing what improvements to the local road infrastructure will be required. If that is the case for Wisley Airfield, then it is almost inevitably true for the proposed developments in East and West Horsley as well.

Pollution:

The large increase in volume of traffic will cause an increase in nitrogen dioxide and particulates in the environment – already a cause for concern in several areas in the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing today to object to the 2016 draft local plan

My reasons are as follows

1. **THE GREEN BELT**

So far, no exceptional circumstances have been shown to build on Green belt land.

The Green Belt is there to stop neighbouring towns from merging. To stop the unrestricted growth of built up areas. It enables people/Families from the cities to have easy access to the countryside.

THIS SHOULD BE PROTECTED !!

Moving the green belt boundaries.

This can mean only one thing……..more development encouraged.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Loss of Green Belt land:

Sadiq Khan, new Mayor of London, has instructed London planners not to approve development on Green Belt Land within the M25. If we continue to build on our countryside it won’t be many decades before we have none left. Creeping development has led to almost continuous housing from Central London to Effingham. Is this to carry on to Guildford and beyond? (1,700 houses are planned for the Guildford end of the Hogs Back and 1,000 new houses on greenfield sites in Normandy.)

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. THERE IS ENOUGH BROWNFIELD SITES AVAILABLE

There is brownfield land available in the town centre which is being earmarked for commercial development rather than for housing. This is enough to meet our real needs for affordable local homes. There are enough vacant commercial sites to cope with genuine business need, and we have enough retail capacity already, so urban brownfield/derelict land should be used for housing. I understand that Surrey University is sitting on permission for 1,500+ accommodation units on its own brownfield campus. If the University fulfilled its obligations much Town Centre affordable accommodation would be available for rental/purchase.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
THE EVIDENCE BASE USED TO ASSESS HOUSING NEEDS HAS BEEN PROVEN TO BE FLAWED AND HAS NOT BEEN CORRECTED SINCE THE LAST DRAFT A FEW MONTHS AGO.

CONCLUSION.

THE NEW DRAFT LOCAL PLAN NEEDS TO BE REJECTED AND RE ISSUED USING THE CORRECT EVIDENCE BASE

THERE IS NOT ENOUGH BROWNFIELD SITES BEING RE DEVELOPED.

TO BUILD ON, OR NEAR FLOOD PLAINS IS HIGHLY DANGEROUS TO THE DEVELOPMENT AND NEARBY HOUSES.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Removing The Horsley’s from the Greenbelt - This is a disgrace. Horsley is GREENBELT. It is beautiful and a lovely village. Your plans are to make it into a small town which is unacceptable and NOT required. There is scope for small infill developments as have happened over the years, but not 100's of new houses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

As a resident of Guildford for over 60 years, I write to object to many aspects of the Draft Local Plan as set out in this letter. Having seen the previous Draft Local Plan published some two years ago, I find it very disappointing that the NEW Local Plan (published on 6th June 2016) fails to take account of the serious defects identified in the previous plan. Indeed what was said about many aspects of the previous Plan. Indeed what was said about many aspects of the previous plan seem not only to have been ignored but the situation has been exacerbated by further unacceptable proposals such as the removal of the green belt protection from areas in East and west horsley and the late inclusion of proposals to develop even more areas such as Garlicks arch at Send (site A43). These are unwarranted attacks on the currently widely supported Green Belt policy.

Turning to the local situation in the Horsleys, I would have thought it would have been abundantly clear that the present local services would be overwhelmed by an increase of some 35% in the current number of properties. Not only would this affect current residents but it would be a source of extreme difficulty and frustration to those 'new' residents 'lured' into the area by these new housing developments, only to find a wholly unsatisfactory situation with regards to services and infrastructure that could easily have been avoided by a more enlightened policy towards additional housing provision. Aside from the lack of adequate services, the infrastructure would be inadequate for housing development on the scale envisaged particularly roads such as East Lane and Ockham Road North. I find it remarkable that the planned development alongside the railway on land behind houses in Ockham Road North (A39) seems to completely fail to recognise the potentially extremely dangerous situation that will arise when vehicular traffic emanating from 100 properties attempts to enter the busy Ockham Road North with Railway Bridge abutments allowing very restricted traffic visibility looking southwards (it is difficult to envisage a more obvious way of creating an accident 'black spot'). The traffic situation in Ockham Road North (a busy road linking the A3 Trunk Road with the A246) already gives cause for concern, particularly with the presence of Glenesk School and associated traffic. It was for these reasons that it was found necessary, a few years ago, to install a 'traffic calming' platform at the junction of East Lane/The Drift with Ockham Road North and why it was decided not to grant Planning Permission for 'Back filling' developments that would have increased traffic entering/leaving Ockham Road North (for further details see Planning Applications 03/P/02143, 02144 and 05/P/01191 etc).

Besides the completely unsatisfactory nature of the proposed development in Ockham Road North (A39) to which I object most strongly (see previous paragraph), the overloading of services and inadequate infrastructure applies equally to Manor Farm (A38), Waterloo Farm (A40) and East Lane (A41). I also object to the proposal to build over 2,000 homes on the site of the former Wisley Airfield (A35) which would be an inappropriate intrusion on the Green Belt and overwhelm local services (including the road network) already functioning at maximum capacity.
In considering the proposals in the Draft Plan it is relevant to examine the basis for this 'perceived' need for more housing and I understand that official population forecasts are available (I assume based on information produced by the Office of National Statistics) but those producing the Local Plan have chosen to ignore these figures in favour those from dubious mathematical modelling produced by a 'Strategic Housing Market Assessment'. The suggested needs relating to the latest Draft Local Plan must be viewed in the light of this apparent overestimate of 70% in the estimated population growth in the Borough. In any event, whatever the level of accommodation planned, I am strongly of the opinion that there is a need to preserve the Green Belt and support the 'National Planning Policy' which 'recognises the intrinsic character of the countryside and supports thriving rural communities within it'. As they stand, the proposals will, in my view, irretrievably damage the local environment and its undoubted appeal not only to residents but also to tourists for whom it is one of the prime attractions and destinations in the South East.

I trust that you and the Council Officials concerned will see fit to revise the Draft Plan in the light of these comments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Bearing in mind the size and architectural style of the adjacent buildings, seventy homes seems to be over the top. Consider the physical constraints of the site. I refer to the surrounding conservation areas, height and density of existing housing plus access onto the busy Portsmouth road. In addition there is no mention of parking provisions on site. This is a busy residential area which is under enormous pressure from traffic especially during peak times and also the ever increasing demand for parking from residents (with or without permits) and visitors alike.

Whilst development of the site is long overdue, a rethink of the proposed number and a commitment to reasonable on site parking seems in order. To that end, I OBJECT to the proposal as it stands in its current form.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6875  
Respondent: 8926241 / Amanda and Nigel Baines  
Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The topography of the site will indeed require ‘innovative design’. The construction process for this site will cause some considerable disruption to not only the neighbouring residents but also to the flow of peak time traffic. Disturbance of any kind travels some considerable distance through chalk; I pity the poor souls living in these homes as they will feel every tremor from the passing trains. Innovative design does not come cheap and very few private developers are prepared to swallow the costs which may well impact on the quality, appearance and sustainability of the build.

C3 classifications state that up to six people living together in one unit, be they a family or requiring care, suggests overcrowding on an awkward site. C3 also allows people with dementia and mental health problems to be accommodated here. It is well known that sufferers of either of these conditions never thrive in enclosed and noisy areas with the condition often worsening. A site on top of an extremely busy railway station is absolutely not an appropriate place to house such poor individuals.

A legal agreement preventing residents of these homes applying for parking permits whilst essential to safeguard existing residents parking in the immediate vicinity, is inadequate. Whilst the residents of the proposed site may not be allowed to park legally, there is nothing to stop them from owning a car and parking wherever they wish. The parking wardens struggle because there are not enough of them to keep on top of the parking problems now. Seventy homes with multiple occupancy equals 140 cars at a conservative estimate. This is a concern especially as it is highly unlikely any of the public transport system proposals will be in place beforehand in order for this development to be truly car free.

Limited vehicular access for refuse and removal trucks is interesting. No mention is made as to where this might be which is worrying. Farnham Road is busy with both traffic and pedestrians, the Mount is narrow and also very busy with limited access and visibility for traffic going up and down the hill. In addition, there are two schools with St Nicolas children in particular at risk.

Pedestrian access from the Mount would require pedestrians gaining access from this busy rat run onto the side of the road without a pavement. A highly dangerous situation. Plus heavy rainfall transforms that side of the Mount into an ankle deep torrent of water. This is not a problem that will lessen any time soon. There is potential for many an accident especially if the occupants of the new site are elderly or struggling with mental health problems.

The relaxation of the s52 agreement simply gives developers a green light to do as they so wish. They will not retain ‘valuable trees where possible’. Private developers are not known for retaining any existing flora and fauna at the best of times as has been seen in many recent developments in this area over the last year. A refreshing approach would be to enhance the existing trees and shrubs on the boundary lines as part of the permission to build. To do so will protect the neighbouring properties and soften the somewhat brutal site.

After consideration, I OBJECT to the current proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
To lose 1.6% of the greenbelt is too much. Current planning legislation is so open to interpretation allowing private developers to wriggle out of classifications and statutes leading to the wholesale concreting over the greenbelt. Once it has gone, it has gone. To allow developers even a toehold into development of any sort will open the floodgates literally and metaphorically. Time and again it has been proven that green areas are vital to the wellbeing of people, beneficial to those with mental health problems and extremely necessary in assisting with pollution and flooding. There are some enlightened developers who have actively worked with local wildlife trusts and national conservation bodies to great effect but Guildford Borough Council seems to have managed to overlook such worthy companies!

I OBJECT most strongly to the somewhat cavalier and unimaginative approach to the preserving and improving the valuable commodity that is our countryside and the few remaining green areas within Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14969  Respondent: 8926241 / Amanda and Nigel Baines  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford is at bursting point. There is constant gridlock, increased pollution, an outdated and insufficient public transport system, local amenities under threat and the valuable green space constantly being trifled with. Many surgeries are struggling to recruit GPs, schools are full, and the lower paid are finding it impossible to live in Guildford. The vast numbers of dwellings suggested are based on outdated sources. Fathom Consulting has just put out a report on this which makes interesting reading. It is worth noting that there are around 600,000 empty houses in England alone. Can these not be identified and made use of? Surely what is needed is a new look at the problem of the housing shortage before the massive amount of infilling, overdeveloping and despoiling the greenbelt kicks off? How about getting a sustainable, user friendly public transport system in place before any developments proceed? This would encourage residents and businesses alike to forgo the use of cars, reduce the need for providing parking and lead to a more efficient and pleasant place to live and work in.

How refreshing it would be if all developments are seen to be sustainable on a grand scale especially as climate change is here to stay. Private developers should be encouraged and persuaded by the Council to prioritise the building of sustainable and appropriate dwellings for the needs of the community. This is entirely possible and hugely beneficial to all concerned. After all, we are twinned with Freiburg which seems to have nailed a sustainable and cost effective approach to developments. Time to consider joining in on their success. I humbly urge the Council to be bold and brave and to do its utmost to prevent Guildford and its environs from becoming a new Croydon. Guildford has the potential to become the benchmark for the future. Let us collectively make this happen.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4385  Respondent: 8926273 / Catherine Sambrook  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A26
As part of the Local Plan consultation, I would like to **strongly object** to the inclusion of Blackwell Farm (site allocation A26) as a potential development area.

This area is very beautiful and forms the views from an Area of Outstanding Natural Beauty on the Hogs Back.

If the harm to the landscape were not enough to prevent this development going ahead (and it should be) then the queues of traffic on the A31 in the morning certainly are.

I grew up on the Hog's Back and the whole time I attended Guildford County School, I had to sit in traffic every morning.

The whole idea of adding traffic from 1,800 homes to this queue and to the queues at the tesco roundabout is crazy.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2.12 Our rail network and connections are underrated here. They are in fact exceptionally good giving easy connections to anywhere in the country, in many cases without travelling via London. A commitment is needed to better exploit this considerable asset.

2.13 It is not correct that “There is a reasonable network of cycle routes” - there must be an objective of creating new routes. While it is true that there is a “reasonable” network of footpaths there is a major problem that the quality of these is poor and there is a lack of basic facilities such as road crossings, and pedestrian priority; this discourages people, particularly the elderly and handicapped, from using this sustainable mode of transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5552   Respondent: 8926401 / Christine Medlow   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A12

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
A12 Bright Hill Car Park

I note the “Opportunities - Improvements to landscaping and biodiversity given the full extent of hardstanding on this site”. It will be impossible to do this or to provide the special high quality development that this site, which is in the Town Centre Conservation Area, requires, with a development of 60 homes. The current plan proposed 33. I ask that the target be reduced to 45 or less homes.

The Robin Hood pub is excluded from the development although it is prominent within the site. I ask that the pub be acquired to allow it to become part of and to enhance the development as a reminder of the previous Victorian development on the site, and that a suitable use be found for this locally listed building.

Town Centre Riverside Sites, Open Space

I welcome the designation of protected open space for the immediate riverside on site A2 (Cinema) and ask that this be continued along Bedford Wharf, and applied wherever possible in the town centre, including the Portsmouth Road Car Park.

The designation of much of this area is as “Strategic Employment Site (Office and Research and Development), but this town centre area is not suitable for R and D which often requires spacious layout and a low density of employees.

E2 Location for new employment floorspace

I disagree with the policy for second choice new employment sites to be within 500m of the “transport interchange” of London Road station. The station is a means of joining a train on a linear route, and it cannot be described as an interchange. The 500m radius would cover mainly an established residential area, including parts close to where I live, which should not be converted to business use.

E7 Guildford Town Centre

The 45,000sqm of retail (comparison) shopping proposed for the N Street site is too much. The need is for more residential. In addition it is essential to increase convenience, day to day, shopping in the centre for residents like me and my neighbours who have nowhere to do this shopping except in the centre – unless we drive out of our area. The decline in convenience and service shopping facilities continues, despite the arrival of Waitrose.

I do not wish to see evening and night-time activities along the immediate riverside. This would require railing in of the river for safety purposes, and provisions made to safeguard clients during a flood event when the area can be quite frightening. The genuine attractive and green riverside, with its green banks and important biodiversity would be lost. I do not object to such activities in the area providing they are reasonably set back from the river and are outside of the flood zone.

I am concerned about promoting additional “active” use of the riverside and river. The river is a comparatively narrow navigation, and does not have the capacity to take more boating activity than at present. The attractive towpath is already well used by walkers and cyclists.

While supporting the intent behind the banning of new food takeaways within 500m of schools, I do not think this is practical. There are a number of schools close to the centre, including the Royal Grammar School and Pewley Down Infants School, and this rule would ban takeaways from much of the centre.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I1 Infrastructure and delivery

I welcome the objective of associated infrastructure being available to occupants as soon as it is needed. However, stronger control is needed. I suggest that occupancy is not allowed until it can be shown that the infrastructure is in place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10999  Respondent: 8926401 / Christine Medlow  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
13 Sustainable Transport for new developments

I support provision of off-street parking for residential developments. This ought also to be an objective for the established areas of older small houses that have no on-site parking of their own. However, for non-residential developments located in and around the town centre this is not appropriate - it negates the whole objective of location to allow use of sustainable transport by employees and clients.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11001  Respondent: 8926401 / Christine Medlow  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

14 Green and Blue Infrastructure

I welcome the importance placed on the River Wey as a source of bio-diversity and open space. I suggest that an additional objective be added to make the Wey a continuous wildlife corridor.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10987  Respondent: 8926401 / Christine Medlow  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

P2 Green Belt

I welcome the policy statement “We will continue to protect the Green Belt” but this policy is already compromised by the decision to develop on some green belt areas. I would appreciate a more authoritative policy, and reconsideration of the development proposed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
**Comment ID:** PSLPP16/10988  **Respondent:** 8926401 / Christine Medlow  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**P4 Flood Risk**

I welcome the policy to restrict development on the ‘developed’ flood zone 3b. The flood zone areas are ideally suited to provide green open space, with increased biodiversity, and I hope this objective can be added to this policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPP16/10985  **Respondent:** 8926401 / Christine Medlow  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**S2 Borough Wide Strategy**

P 28. The housing and retail targets are too high (see 3 above).

The town centre must include provision for the everyday retail and service needs of local residents. The area in which I live, to the SE of the centre, has no “Local Centre” and so nowhere else where this function is provided.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** SQLP16/1369  **Respondent:** 8926401 / Christine Medlow  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Although I understand the aim for more sustainable modes of transport in the centre of the town, there are several matters that affect those who live close to the town centre.

Some residents are not able to walk to and from the town centre, particularly if this involves going up a steep hill. Many of these areas are not served by bus routes. Cycling is not a possibility and taxis are expensive.

Regarding the suggestion for a sustainable movement corridor (a priority route for buses, pedestrians and cyclists) through the Guildford Urban area - it would make it very difficult for residents of central Guildford to get easily from one part of Guildford to another if they were not allowed to use a car along this proposed route, especially those people living at the top of steep hills, those who are elderly or have walking difficulties (not necessarily bad enough to warrant having Blue Badges) or those who have young children.

Those of us who live close to the town centre often need to go through the centre by car if we are planning to travel anywhere away from Guildford. Also, to go from, say, the Pewley Hill area to, say, Guildford Main Line Station is a fairly short route through the town centre. However, if we had to drive several miles along roads outside the town centre to reach the station, it would be wasteful of resources (e.g. petrol) and cause more pollution.

I support the plan to build two new railway stations - Guildford West Railway Station and Guildford East Railway Station. (If there were any way of reopening the railway line between Guildford and Cranleigh, that would be excellent.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10983  Respondent: 8926401 / Christine Medlow  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Vision and ambition

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

SPATIAL VISION

Housing Target Number. This remains too high and is unjustified - it could result in a degradation of our area and our town centre. I support the analysis commissioned by GRA that predicts a need of 510 houses per year. I also request that the legitimate further constraints on this number, particularly that due to the Green Belt, be applied.

Additional Retail Provision. The proposed expansion of comparison floorspace (65,000sqm total, 45,000 sqm in North Street) is too high. There is no demand from residents for this magnitude of expansion, nor does it reflect current retailing trends. Also the proposed allowance of 3000 sqm for food and drinks use is too high. In creating more jobs it will also increase housing demand. There is a housing/employment imbalance which needs addressing. The priority must be to use land for housing, and to increase the everyday convenience shopping provision needed by residents.
Transport Strategy. This must not be just aimed at encouraging visitors to use sustainable modes of transport, but also at employees. However, the needs of elderly people and those with walking difficulties should be considered. They need to be able to have close access by car to pedestrian areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15153  Respondent: 8926529 / Annie Cross  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy D1 - Making Better Places

I object to GBC not listening to their residents, who know better than GBC, what is needed to make their areas better places.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15154  Respondent: 8926529 / Annie Cross  Agent:

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E9 - Local Centres

I object to Local Centres being considered for large, inappropriate, developments nearby. Local Centres are rural, not urban.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15134  Respondent: 8926529 / Annie Cross  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H1 - Homes For All

I object to the SHMA including student housing. The university obtained planning permission many years ago to build student accommodation, but has not done so. Freeing up private housing in the town currently used for student accommodation would provide affordable housing for local people. A new development at Blackwell Farm (2,000 houses) providing accommodation, including student accommodation, is a selfish move by the university.

After the 1st World War 'Homes for Heros' were provided countrywide, as was the case for council housing after the 2nd World War. I believe GBC should adopt the same strategy, even in areas of AONB albeit on a reduced scale, to provide sustainable homes borough-wide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15135  Respondent: 8926529 / Annie Cross  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2 - Green Belt

I strongly object to GBC considering building new developments of 2,000 houses in Green Belt. I object to Gosden Hill, Blackwell Farm and the former Wisley Airfield becoming new towns 'dumped' in the Green Belt for reasons of economy and convenience. I particularly object to the former Wisley Airfield being considered for a new town as this is slap bang in the middle of a green belt area and totally unsustainable, as accepted by the recent Planning Committee who recently unanimously rejected a planning application on various NPPF grounds. This site is far too close to Cobham (1.5km), Pyrford (1.5km) and Woking (2.5km) not to become their urban areas over time which will totally wipe out green belt in this area.
Developments of 2,000 houses in the Green Belt are exploitation and fulfil developer's dreams who can escape their their affordable homes targets (clause 4.2.40) and provide houses for those from outside the borough. I object to GBC realising those developers dreams and ignoring those of the residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P4 - Flood Risk and Water Source Protection Zones

All development sites must have consideration to flood risk, not just on the development, but the affects on the surrounding areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15132  Respondent: 8926529 / Annie Cross  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S1 - Presumption in Favour of Sustainable Development

I object to GBC not using sustainable brownfield sites in Guildford town and all the villages in the borough, but wish to use Greenbelt sites to create 3 'new towns' of approx. 2,000 houses. These sites are not sustainable, but will cause chaos to surrounding areas in terms of infrastructure, i.e. roads, parking, flooding, and will not provide adequate health services, education, shopping/pubs/restaurants/cafes on-site, as does Dickens Heath, Solihull, on which the GBC Pegasus report was based.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15133  Respondent: 8926529 / Annie Cross  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Policy S2 - Borough Wide Strategy

I object to GBC using SHMA housing figure which are almost double those of Woking and Waverly. I object these figures were prepared by consultants with a property interests, G L Hearn, and the calculation has not been scrutinised by GBC an independent body. Who are all these homes for? Not local people.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3673  Respondent: 8926529 / Annie Cross  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26
Policy A26 – Blackwell Farm

1. **I object:** to the housing numbers being reduced from 1800 to 1500 without GBC clarifying whether this reduction is due to Surrey University actually building student accommodation on their land for which planning permission was granted some years ago.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Policy A33 – Broadford Business Park

1. **I object:** to 100 homes being removed from the plan as there is a ‘Park and Ride’ nearby, therefore a sustainable site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Policy A35 – Wisley

1. **I object:** to this site being expanded from 92.8 ha to 95.9 and the proposal to remove it from the Green Belt, as this provides the possibility of large scale development on an unsustainable site which is the **only** site in the draft Plan situated in the **centre** of Metropolitan Green Belt - all the other large Green Belt sites proposed are adjacent to urban/residential areas.

2. **I object:** to GBC removing this location from the Green Belt as their own description of the site is “**former airfield and fields**” and “**partially previously developed land**” and only 17ha of the site is truly brownfield.

3. **I object:** to this amendment as it directly contravenes NPPF Section 9, para 7 “The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belt are...”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
4. I object: to the above expansion of the site contravening another of the five purposes of the NPPF, Section 9, para 80 “to prevent neighbouring towns merging into one another”. The site is in the middle of the Metropolitan and surrounded by towns and villages, all approximately 1.5-2.5 distant, including railway stations. It is inevitable that some of these towns will eventually merge with this site.

5. I object: to the GBC section ‘Requirements: Infrastructure, (3) (d), mitigation schemes “on rural roads surrounding the site”. Other than the nearby A3/M25, the surrounding country roads are narrow and winding, have no pavements and no lighting. It will be possible to walk/cycle to Ripley, (the nearest village approximately 1 mile from the nearest point of the site), in daylight along a semi-wooded path without lighting and assuming there is no need to carry shopping bags back to the site. There are cycle lanes to Ripley, but the A247 is a busy road with traffic having just left the A3 and not yet in “30 mph” mode. I have never seen anyone cycle this route. I therefore object to vague “mitigation” statements on an expanded site.

6. I object: to the GBC section ‘Requirements: Infrastructure, (4). “The identified mitigation to address the impacts on Ripley High Street and surrounding rural roads comprises two new slip roads at A247 Clandon Road (Burnt Common) and associated traffic management”. The proposed Burnt Common slip roads will mean much of the traffic travelling to/from the south to site A35 will travel through Ripley. This does not “mitigate”, it adds considerably to the current problem of heavy congestion through Ripley. If two slip roads are to be added to service site A35, they should be located at the A3 Ockham roundabout, situated next to the site.

7. I object: to GBC section ‘Requirements: Infrastructure, (22). “Sensitive design as site boundaries that has significant regard to the transition from village to greenfield”. 2,500 homes, i.e. 5,000+ people and similar number of cars, is not a village, it is a town and the transition from “village to greenfield” is in fact transition from “new town” to Green Belt.

28a I object: to GBC not applying constraints to Wisley Airfield (Site 35) and refusing to acknowledge this is an unsustainable site, further away from a railway station than any other site proposed, meaning car usage will be a necessity, contributing to air quality and light pollution problems.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A42 – Clockbarn Nursery

1. **I object:** to the amended plan increasing the number of homes on this site. The access to Send Road is poor whilst the access to Newark Lane, along the very narrow, windy, Papercourt Lane with its many blind bends, is dreadful.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

Policy A43 – Garlick’s Arch

**I object:** to ”GBC removing “appropriate green buffer between the residential and employment uses”. This is currently a paddock and builders yard in Green Belt with just a few houses nearby, so contravenes NPPF, Section 9, para 80, “to assist in safeguarding the countryside from encroachment”

**I object:** to this site being ‘snuck in’ to the 2016 draft at the last minute, with A58 being removed for that version. Now both are included. This is overdevelopment in this part of the borough.

**I object:** to the proposal of travelling showmen “with a local connection” sites. For many decades the “local” travelling showmen have been Bensons funfair, who have premises in Dorking. Ripley High Street cannot take increase in large vehicles regularly passing through the already heavily congested High Street. Ripley already has 4 travellers pitches, more are proposed on site A35, adding more is unbalanced.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---
Policy A46 – Land South of Normandy / North of Flexford

1. I object: to the removal of 1100 homes from the plan which, in spite of being in Green Belt, the location has a railway station at one corner of the site, plus bus links. This is a sustainable site and should not be removed if Site A35 (Wisley) is to be retained as this is far more sustainable than site A35.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3681  Respondent: 8926529 / Annie Cross  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A47

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A47 – Land east of The Paddocks

1. I object: to this site being excluded from the current draft Plan. 50 houses alongside a village is sustainable and not disproportionate to the size of the village. Removing this site means other proposed sites must take up this shortfall.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3684  Respondent: 8926529 / Annie Cross  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy A58 – Land around Burnt Common Warehouse

1. I object: to this site being included as well as Garlicks Arch. This is overdevelopment in the north-eastern part of the borough.

1. I object: that the draft plan has amended the 2016 wording of “up to 7,000 sq m” to “a minimum of 7,000 sq m”. This leaves the site open to further expansion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1862  Respondent: 8926529 / Annie Cross  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2 – Green Belt

1. I object: to the GBC amended plan ignoring the NPPF rules - “The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence” (NPPF Section 9, paragraph 79), instead of planning to remove huge swathes of land out of the Green Belt without proven “exceptional circumstances” (NPPF, Section 9, para 83).

2. I object: that GBC have not amended the proposed Green Belt boundary for Ripley Village (Appendix H) as it was agreed that the part running along the footpath on Ripley Green would be amended to the footpath running in front of the houses on Ripley Green.

3. I object: to the extension of the site A35 (former Wisley Airfield) proposed for removal from the Green Belt as this site will allow the site to be developed, although it is the only unique site in the draft Plan totally surrounded by Green Belt whilst every other strategic site is adjacent to urban areas.

4. I object: to the need to extend site A35 when the 2017 AECOM report on site A35 describe it as the site with the worst sustainability score out of all the large sites in the proposed draft Plan. With only 17ha true brownfield, a runway never built on and the remainder of the site farming land, no exceptional circumstances are shown for a major development.

5. I object: to GBC not providing any indication of the “exceptional circumstances” for removing Wisley (site A35) from the Green Belt or applying constraints.

6. I object: to Wisley Airfield being removed from the Green Belt in return for the Green Belt being extended between Ash Green village and Ash and Tongham.

7. I object: to the removal of NPPF from ‘Key Evidence’ as these are government rules.

8. I object: GBC’s inconsistency and lack of credible consideration of all sites. These include:

   The removal of site A46 (land south of Normandy/north of Flexford), the only site similar to A35, also located in Green Belt but with a railway station and bus services running alongside.

   The inclusion of site A35 (Wisley), in the centre of Green Belt with just a few houses alongside and NO railway within walking distance and a poor Kingston to Guildford bus service on the A3.

17. I object: to the amended plan ignoring the 32,000 comments received from their 2016 consultation, a huge public response.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2 – Planning for the Borough

1. I object: to GBC producing an Assessment of Sites for Amenity Value (which includes numerous sites for potential housing), plus other sites in the borough, but not projecting even rough numbers of potential homes on these sites to reduce the need to include large Green Belt sites.

2. I object: to the amended plan ignoring the government’s NPPF guidelines - “...local planning authorities should take account of the need to promote sustainable patterns of development. They should consider the consequences for sustainable development of channelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary”. (NPPF, Section 9, para 84). This is proven in the GBC continuing to propose large Green Belt developments.

3. I object: to GBC making amendments whilst doing little to meet the principle of the government’s NPPF rules “to assist in urban regeneration, by encouraging the recycling of derelict and other urban land”. (NPPF, Section 9, para 80).

4. I object: to GBC using amended housing figures (SHMA) based on a flawed housing study which has attracted widespread criticism.

5. I object: to GBC making amendments which do not address the 32,000 +/- comments made on the 2016 draft, particularly regarding Green Belt.

6. I object: that the amended draft does not encouraging utilising the numerous surface public car parks in Guildford town, surrounding areas and at Surrey University to provide sustainable homes, close to employment opportunities, facilities and transport links, with public car parking relocated underground. The university could house its students and free up properties in Guildford currently needed by students.

7. I object: to GBC amending all of the large Green Belt sites and including large Green Belt sites throughout the borough for housing instead of proposing housing in every village and town, on a proportional basis, to meet local needs.

8. I object: to GBC amending the plan to include further development in the north-east of the borough as some sites are just not sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2920  Respondent: 8926561 / Lindy Bomford  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base
I object to the methodology used to estimate housing numbers

The number of new houses proposed arises from a Strategic Housing Market Assessment (SHMA) generated by a consultant's mathematical model which is not revealed in the plan, nor apparently has it been revealed to Guildford Borough Council (GBC). The Office of National Statistics has acknowledged a mistake in the numbers used by the SHMA and have updated their predictions, yet these revised figures are not reflected in the GBC Local Plan. The original unsubstantiated SHMA target housing number has been further increased by GBC to give a population increase which is almost 70% higher than the official national estimates for population growth in the Borough. The scale of this increase has alarming results e.g. an increase of up to 35% in existing West Horsley households – greater than any other single area in the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2919  Respondent: 8926561 / Lindy Bomford  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

I object to the proposal to remove the Horsleys from the Green Belt

The "exceptional circumstances" required before taking this action have not been demonstrated.

I object to the extension of the boundaries of the Settlement areas of the Horsleys

No sound reasons have been given for the proposed changes, which appear to be aimed solely at increasing the available land within the settlements for future additional development.

I object because the infrastructure is already overloaded

Local Schools are full. Medical facilities stretched. Drainage is inadequate, roads and car parks are overloaded with little or no scope for improvements. Large increases in the volume of traffic will cause an increase in nitrogen dioxide and particulates in the environment – already a cause for concern in this area.

I object to Station Parade being designated a “District Centre"

This ‘designation' results from a misreading of the nature of the facilities in the village centre and would target the area inappropriately for future urban developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
• I object to the development of over 2,000 houses at Ockham (former Wisley Airfield)

The impact on the Horsley villages of such a huge mixed housing, retail, commercial, traveller and schools development, under 2 miles away, would be enormous. The plan also includes extensive and inappropriate developments at Burnt Common (400 houses & commercial developments) and Gosden Hill Farm, Burpham (2000 houses & mixed use developments).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

12) I OBJECT to the lack of any sensible provision for new schools.

13) I OBJECT to the lack of any realistic provision for doctor's surgeries.

I object to the 2016 draft Local Plan. In addition I object to the following specific points:

1) I OBJECT to the intended erosion of the Green Belt. It is there for a reason and it is not for a passing council to short-sightedly remove for future generations.

2) I OBJECT to the "in-setting" of any villages from the Green Belt.

I feel strongly that the Metropolitan Green Belt is a vital and precious part of our heritage and should not be subjected to any development other than where truly exceptional circumstances are proven. The draft Local Plan does not provide any such circumstances.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

5) I OBJECT to the disproportionate amount of development in one area of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
4) I OBJECT to the limited consultation period.

6) I OBJECT to the late inclusion of new sites with less than 2 weeks notice.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the draft local plan for the following main reasons:

**Take away our beautiful villages** - The local people love, look after and are proud of our beautiful villages in East and West Horsley. I volunteer to help lead a local Brownie group and one of the things the parents and children get involved in is local litter pick-ups, because we care for our environment. The activities and customs in the villages are steeped in English history and culture, we have formed our own allotment for example for which villagers volunteer hours to grow and share local produce.

These huge developments are being IMPOSED on the local people by the borough council and developers. Taking our villages out of the green belt with over 40 listed properties, building on ancient woodland and taking away the beautiful landscapes I believe UNETHICAL. Is this really acceptable and justified? Is this what we want to teach our children?

I accept that we need new AFFORDABLE housing in Britain, but the Guildford plan proposes a 35% growth in West Horsley alone and as affordable means up to 80% of the local average value, that would mean new homes could cost over £800,000 in the Horsleys.

**WHY THE HORSLEYS?**

I WANT TO KNOW THAT THERE IS NO BETTER ALTERNATIVE.

I OBJECT TO THE SIZE OF DEVELOPMENT - Even half this proposed number of new houses would SWAMP the Horsleys with cars and people. Plans for further shopping facilities do not resolve this amount of extra residents and cars.

CURRENTLY AT PEAK TIMES AND WEEKENDS IT IS DIFFICULT TO GET A PARKING SPACE NEAR THE SHOPS IN EAST HORSLEY.

The Guildford plan would impose an unsupportable burden on drainage, infrastructure, schools, roads, medical facilities, parking, shopping queues and public transport.

THE NATIONAL PLANNING POLICY FRAMEWORK (NPPF) REQUIRES THAT NEW RESIDENTIAL DEVELOPMENT MUST RESPECT THE CHARACTER AND DENSITY OF HOUSING IN THE AREA AND BE LIMITED IN QUANTITY BY THE AVAILABILITY OF INFRASTRUCTURE AND LOCAL FACILITIES.

IS THIS REQUIREMENT BEING MET? THE GUILDFORD PLAN SURELY DOES NOT MEET THIS REQUIREMENT.

I OBJECT TO WATERLOO FARM SITE, BORDERING GREEN LANE

SPECIFIC OBJECTIONS TO BUILDING 120 HOUSES ON THE LAND ADJACENT TO GREEN LANE, GU23 6PQ

DRAINAGE: We live directly next to one of the borders of this site, at the end of the smaller Green Lane. We have had to dig a deeper ditch next to this field due to rain water filling and spilling out of this drainage ditch. We can see that the field becomes very boggy and are concerned about the standard of drainage the developers would put there. How will the current drainage points cope?

LOCAL SEWERAGE: The main Green Lane now becomes flooded and water runs down like a river after each heavy rain storm. Faeces and used toilet roll have seeped out of the drain and pushed up the cover on several occasions. Some tarmac from the road has also been pushed up. The council have repaired this and it has still happened again. It smells and is a very unpleasant sight. If the local council are not repairing this to a standard where it does not happen again, how can they ensure drainage and sewerage will be sustainable for such a large increase in housing?

THE INFRASTRUCTURE PROPOSED IS NOT ADEQUATE AND SUSTAINABLE

The plans propose a cycle and pedestrian footpath to come off the Waterloo Farm site, directly on to the part of Green Lane with the leaked sewerage.

I STRONGLY OBJECT TO ANY FURTHER FOOTPATH OR ROAD ACCESSING GREEN LANE.

TRAFFIC ON GREEN LANE

This is a narrow road with currently much foot traffic, including a popular dog walking area. Horses are kept on either side of Green Lane and there are 2 dog day care facilities, all of which have to use Green Lane for access and exit.

There are no footpaths and it is too narrow to build them. A gas pipe runs down one side and a stream is on the other, which due to the level of REGULAR flooding down the road. It would be disasterous if the stream was filled in, as it’s vital for drainage in the area.

More local houses along Long Reach and Ockham Road North being allowed to use Green Lane as a cut through, would be dangerous.

The amount of pedestrians, horse riders, dog walkers and cars currently needing to use Green Lane is enough.
I OBJECT TO MORE CARS AND PEDESTRIAN'S ACCESSING GREEN LANE. IN MY OPINION IT WOULD BECOME DANGEROUS FOR THOSE OF US, INCLUDING CHILDREN, HORSES AND DOGS WHO LIVE ON GREEN LANE AND USE IT DAILY.

I wish to submit my objection to the ruination of West Horsley by the obscene extent of development proposed. The scale of the proposal is out of proportion to the size of West Horsley and seems to be much greater than any other area. Specific concerns are:

1. Destruction of the green belt which also appears to contradict the Green Belt and the Countryside (Policy P2). The proposed developments are NOT appropriate. The greenbelt MUST be retained. The reasons for its existence still stand.
2. There are NO exceptional circumstances to remove West Horsley from the green belt.
3. Given Brexit, the whole plan for housing numbers should be revised down.
4. Housing density is not in keeping with the rest of the village.
5. There is not sufficient infrastructure to support so many new homes - insufficient bus services, insufficient parking at Horsley station, no capacity at local schools and doctors surgeries. There are huge issues with drainage already in the area. The roads will become over used and unusable. There are no concrete commitments from developers to invest in the level of road and transport networks that would be required to accommodate this level of extra homes.

6. I have not seen any proof that West Horsley needs all these houses. It will turn a lovely semi rural spot into a noisy, congested area and where will it stop? when it finally joins up with Guildford and Woking?

7. NO village should be destroyed in this way - stop trying to turn semi rural areas into urban areas.

8. With the Wisley developers still hoping to get their proposals through, the whole area could be changed beyond recognition and not for the better. It will just become a little London.

9. The proposals are slapdash and seem driven by a vendetta against West Horsley.

10. Stop allowing the developers to dictate what happens to our towns and villages. They will walk away rich and laughing, the rest of us and this country will be poorer in so many ways.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/4033  Respondent: 8927073 / Jane E Tarbuck  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

But not only these factors, because furthermore all main roads in The Horsleys are only ‘lanes’, unlike nearby urban areas like Cobham only 4 miles away in Elmbridge, or Woking about 9 miles away and Merrow and Burpham about 6-8 miles away in Guildford. Also street lighting is very minimal in The Horsleys in comparison to these nearby urban areas and pavements are absent or inadequate on several of the major roads, which as mentioned above are only lanes anyway. The road widening and pavement construction that would be needed to improve the infrastructure to support your development proposals would not only be difficult to achieve because of the existing layout restrictions and would require demolition or significant destruction of existing landmarks, which would be unacceptably detrimental. Also existing facilities in The Horsleys are currently very basic, sufficient to support the existing small communities of the 2 villages but insufficient for the large increase in population that you are proposing with your housebuilding plans. For whilst Horsley is fortunate in having a station, its location in East Horsley is too far to walk to from most of West Horsley, as well as some of East Horsley, and local bus services are very minimal and unlikely to increase because their uptake is sporadic. The larger village of East Horsley has a good parade of shops at Station Parade and a smaller one at Bishopsmead, but in both cases the shops are only of a very local type, so I contest your designation of Station Parade as a District Centre. It is not sufficient to cater for the week’s entire shopping needs or social requirements, with larger shops and supermarkets located several miles away in neighbouring towns (Cobham, Guildford/Burpham, Woking, Leatherhead etc). which most people need to visit several times a week. West Horsley has even less, just 2 or 3 shops. People who currently choose to live in these villages are therefore of an independent nature, who don’t expect or need everything to be on their doorstep and are able, with the current level of infrastructure, to travel several miles outside of the 2 villages to seek the amenities and facilities they need such as big supermarkets, swimming pools or leisure centres, cinemas and other entertainment venues, fashion shops, senior schools, other social facilities etc. Increasing the population of the 2 villages with the numbers of houses you propose to solve a general housing shortage in the Borough isn’t well thought out in terms of the above factors since it could result in people being drawn into the neighbourhood for a much-needed house without considering that they would then feel very isolated and unhappy stranded in what they might perceive as a quiet and boring environment since the trend today is very much towards town living and being surrounded by good facilities. This not only applies to your
proposals for East and West Horsley but very relevantly to your huge proposal for the former Wisley Airfield. Even with your proposals for local shops and a village community centre this cannot replicate the facilities available in a long-established urban area and your proposed Wisley New Town will feel isolated and ‘in the middle of nowhere’. This will impact more on children and young adults but young mothers may be affected too where they had been used to a bigger support structure around them in a larger community and it is important to bear this in mind because general well-being is a very important issue and boredom amongst teenagers can also have a very negative effect on a community. Non-drivers would be particularly affected since we do not know what public transport improvements your plan would be implementing, but a network of buses would certainly be needed for Wisley. Far better for us to provide housing for people who specifically want to live here because they like rural communities and I am in favour of building houses to cater for people who were brought up here and want to remain near their parents, or for elderly people who need to downsize as well as new people who have done all their research and chosen to live here because it is specifically a lifestyle they want and are happy to live in a small, quiet area with limited facilities and infrastructure compared to an urban area. But not for large numbers of people in bigger developments who will be artificially attracted here. We also need to consider that an increase in road usage in the villages as a result of these proposals is a potential problem not just because of the existing road infrastructure (which is a major aspect) but also environmentally because we are already very congested in this particular section of the A3/M25 where pollution levels are frequently registered as unacceptably high. Increased traffic volumes are potentially hazardous with Ockham Road North and South being particularly narrow yet will have to bear the brunt of this increase, Ockham Road North has had a drainage problem at its section near the approach to the A3 for a few years now, Ockham Road South is very narrow and would need to be widened for safety reasons, usage of Old Lane (particularly from any development on Wisley Airfield) would significantly increase yet it is currently a dangerous road where accidents on the sharp bend at the A3 end are not uncommon and the crossroads at the Black Swan Pub at Hatchford/Ockham is a potential black spot. And as mentioned before, pavements are absent along much of these roads and street lighting is either absent or minimal.

I can’t see that the exceptional circumstances required for these proposals have been demonstrated and there is no good reason to extend the boundaries of the settlement area of The Horsleys. I urge Guildford Borough Council Planning to cancel the proposal to create a 2,000 house development with retail/school/commercial at Wisley Airfield and rethink the usage of the site and significantly reduce the proposals for housebuilding in East and West Horsley to a number that can cope with the limitations of the environment and infrastructure and match demand from people who want to live here for all the right reasons, environmentally and socially, not as a result of a Strategic Housing Market Assessment (SHMA) whose basis for these numbers appears to be unclear and unjustified. It is vital environmentally that East and West Horsley should retain their rural status in the Green Belt. There are plenty of urban areas lying nearby so why destroy the character of these village or we’ll end up one huge urban sprawl? Please let some rural villages survive in Surrey, particularly these in view of their geographical location between the Surrey Hills and Sites of Special Scientific Interest at Wisley and Ockham Commons.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I write to register my objection to the new Guildford Borough Council New Local Plan 2016. I also attach the same response as a Word Document in case of any formatting problems with this text.

Firstly, I strongly disagree with removing the Horsleys from the Green Belt. They are both very rural villages surrounded by open land and woodland, where existing roads were laid out to compliment the environment, taking in the proximity of Ranmore Common and the nearby Surrey Hills Area of Outstanding Natural Beauty on one side and Wisley and Ockham Commons on the other. Of particular significance are the areas of heathland and woodland at Wisley and Ockham Commons which provide a much needed refuge from the nearby A3 and M25 and it also happens that the lowland heathland in this area is a very scarce habitat and supports a specific and unusual range of wildlife, with three areas designated Sites of Special Scientific Interest by Natural England in recognition of their importance for nature conservation, and are also part of a European Special Protection Area. This therefore makes the proposed development at Wisley Airfield unacceptable in terms of the environmental damage that would have to occur in order to sustain a development of this size. I therefore urge you to reconsider your plans for Wisley with these factors in mind.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I know there have been many lengthy, detailed letters of objection registered already - mine will not be one of those but its objection carries just as much weight!

I believe the Guildford Local Plan to be flawed from the very start, and even more so in light of Brexit. I understand that the target housing outlined in the plan represents an increase in 25% in the borough - already at odds with that of the ONS of 15%, and that no one, except the consultants commissioned to complete the report actually know how that figure was arrived at - and that includes those at GBC. It is time the right questions were asked and the true answer given to reflect the current expected demand, not based on a formula from several years ago.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2725  Respondent: 8927297 / Amanda de Haast  Agent:
I feel that the intended additional 593 houses in the Horsley area are a ridiculous increase in relation to the amount of current residential housing. The current infrastructure is already overloaded and I cannot see how current provisions will be able to support such a dramatic increase in housing over the next 5 years. I feel it would be irresponsible to place such additional pressures on the locals schools and medical facilities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
There is no need to move the settlement area boundaries of West Horsley as proposed in the insetting of the two parts of the village and there is no case for siting large numbers of new homes in the Horsleys - new business /employment opportunities lie elsewhere in the county. There is no justification for removing West Horsley from Green Belt. and I believe none of its residents want this.

In West Horsley the infrastructure is not capable of accommodating any more homes - there will be no shops (as of the Autumn), the schools (both Private and Public) are full/ stretched, the EH Medical Centre struggles to meet appointments. There is no capacity for further car parking at either the shops or stations, and an extremely limited bus service. As far as I understand the only housing need we have in West Horsley is for downsizers and affordable for both young and the elderly. To claim that there is a need to increase the Horsleys housing by close to 35% is totally unproven and unsubstantiated. There are enough problems and issues meeting our current infrastructure needs, let alone those required by an increased population.

Throughout the documentation there are numerous generalizations, vague statements and comments of no substance and until each policy can be explained and justified this Local Plan should be rejected.

I object to the Proposed Submission Local Plan at every level.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I was under the impression that the green belt only to be overturned in "exceptional circumstances". I feel that these exceptional circumstances need to be outlined clearly to the local community as I do not feel that this has been done. I also feel that the plan has not considered how the increase in population and traffic will affect the Sheepleas nature reserve and site of specific scientific interest. Should the proposed plan be accepted how would these concerns of mine be addressed?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy P2- Green Belt and the Countryside/ and Policy P1 Surrey Hills ANOB

In one breath you claim to want to protect the Metropolitan Green Belt and in the next you are proposing that close to 65% of further development should take place in that very Green Belt - quite unbelievable and utter madness. Green Belt was established for so many good reasons and you plan to ignore those and bulldozer and concrete large chunks of some of Surrey's most precious, green and environmentally sensitive land. There are no' exceptional circumstances' that could justify these proposals.

### I object to the methodology used to estimate housing numbers

The number of new houses proposed arises from a Strategic Housing Market Assessment (SHMA) generated by a consultant's mathematical model which is not revealed in the plan, nor apparently has it been revealed to Guildford Borough Council (GBC). The Office of National Statistics has acknowledged a mistake in the numbers used by the SHMA and have updated their predictions, yet these revised figures are not reflected in the GBC Local Plan. The original unsubstantiated SHMA target housing number has been further increased by GBC to give a population increase which is almost 70% higher than the official national estimates for population growth in the Borough. The scale of this increase has alarming results e.g. an increase of up to 35% in existing West Horsley households – greater than any other single area in the Borough.

Answer (if comment is on questions 1-7 of the questionnaire): ()

### I object to the development of over 2,000 houses at Ockham (former Wisley Airfield)

The impact on the Horsley villages of such a huge mixed housing, retail, commercial, traveller and schools development, under 2 miles away, would be enormous. The plan also includes extensive and inappropriate developments at Burnt Common (400 houses & commercial developments) and Gosden Hill Farm, Burpham (2000 houses & mixed use developments).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M2S/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.
- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farm Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Housing Needs Numbers

I OBJECT to the housing needs numbers included in the local plan as far too high. An annual build of 693 new homes per annum represents a net increase of 25% in the housing stock of Guildford Borough when official statisticians at the Office of National Statistics are projecting a population increase of some 15% for Guildford Borough over this same period. In particular over 23% of this new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys, totally out of proportion to the population living there.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Proposal to inset East Horsley from the Green Belt Policy

I OBJECT to the proposal that East Horsley should be inset from the Green Belt, instead of being ‘washed over’ as it is today. East Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving that character. Woodlands and large residential gardens make a vital contribution towards biodiversity, provide wildlife corridors, and furnish those open spaces which are vital to the character of the greenbelt.
Removal of the Horsleys from the Green Belt would require exceptional circumstances and these have not been demonstrated. There is no consideration in the plan of the effect of such insetting upon the villages and this is required by the National Planning Policy Framework.

Changes to the Settlement Boundaries

I OBJECT to the proposed Settlement Boundary changes in East Horsley. GBC are proposing to make a number of changes to the settlement boundaries of East Horsley and so expand the settlement area, as set out in the Proposals Map. The changes to the settlement boundaries in the Horsleys appear to have be done purely on the basis of including additional Greenfield sites which can then be built on. I can see no reasons given for the proposed changes and therefore the boundaries should remain unchanged.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Wisley Airfield Policy

I OBJECT to the inclusion of Wisley Airfield development in the local plan. No exceptional circumstances have been demonstrated for its removal from the Green Belt. This proposal has also been unanimously rejected by GBC’s planning committee because of grave concerns including traffic congestion, air pollution, lack of suitable public transport, unsustainability, the inappropriateness of an urban style development in this rural area, the major impact on local villages. These are all still relevant objections.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Wisley Airfield Policy A35

I OBJECT to the inclusion of Wisley Airfield development in the local plan. No exceptional circumstances have been demonstrated for its removal from the Green Belt. This proposal has also been unanimously rejected by GBC’s planning committee because of grave concerns including traffic congestion, air pollution, lack of suitable public transport, unsustainability, the inappropriateness of an urban style development in this rural area, the major impact on local villages. These are all still relevant objections.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Infrastructure

In many aspects the infrastructure of the Horsleys is already overloaded. Local Schools are full, the medical centre is stretched, drainage is inadequate. Traffic, parking and rail routes are already heavily congested. There is little scope for improvement currently and the scale of development proposed is completely out of all proportion to the facilities available and the ability to increase those facilities. I note that in the proposal for 2,000 houses on Wisleyairfield they identify Horsley station as a transport link. There is no provision in the Local Plan to improve this infrastructure in proportion to the proposed building.

I urge the Council to revisit the housing numbers, utilize brownfield sites for housing rather than green fields and critically to fulfil their election commitment to protect the Green Belt and to retain the Horsleys within it.

Proposal to inset East Horsley from the Green Belt Policy

I OBJECT to the proposal that East Horsley should be inset from the Green Belt, instead of being ‘washed over’ as it is today. East Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving that character. Woodlands and large residential gardens make a vital contribution towards biodiversity, provide wildlife corridors, and furnish those open spaces which are vital to the character of the greenbelt. Removal of the Horsleys from the Green Belt would require exceptional circumstances and these have not been demonstrated. There is no consideration in the plan of the effect of such insetting upon the villages and this is required by the National Planning Policy Framework.

Changes to the Settlement Boundaries

I OBJECT to the proposed Settlement Boundary changes in East Horsley. GBC are proposing to make a number of changes to the settlement boundaries of East Horsley and so expand the settlement area, as set out in the Proposals Map. The changes to the settlement boundaries in the Horsleys appear to have been done purely on the basis of including additional Greenfield sites which can then be built on. I can see no reasons given for the proposed changes and therefore the boundaries should remain unchanged.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Flawed Data

The assumptions made regarding population growth are flawed and the resulting figures for housing needs are correspondingly wrong. The DLP calls for over 13,000 new houses over 15 years, an annual average of over 850, which I understand compares with a running ten year average in the region of 160 per year. This assumes the accommodation of an influx of people into the borough rather than the accommodation of the borough’s own organic growth.

I note that one of the tables attached to the DLP shows 14,660 new houses so the DLP is not internally consistent. Further, the north-east quadrant of the borough is proposed to get some 6,000 or nearly 50% of these new dwellings which is unreasonable. Since these additional houses are presumably planned for commuters, it should be noted that the roads and rail services between this area and London are already full to capacity during the morning and evening rush hours and cannot be expected to carry the resulting additional traffic should these houses be built.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

? The “objectively assessed need” figure of 693 homes a year is too high.

? A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.

? The current SHMA inflates the proposed housing figure due to failure to correct for errors in the historical data for international migration flows, issues with the way it considers students and affordability and flaws in the method for estimating the number of homes needed to support job growth.

? It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable. The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Erosion of Green Belt

The extensive and systematic erosion of Green Belt is unlawful and unacceptable: the insetting of the Horsleys in Green Belt to allow development of some 500 homes, and the land grab for Gosden Hill Farm are examples of this.

The NPPF states that Green Belt can only be used in exceptional circumstances. “Unmet housing need is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development on a site within the Green Belt”.

(National Planning Policy Guidance 06 03 2014) and also by the Inspectorate for Planning. This housing demand estimate of 652 homes p.a cannot justify GBC landgrabbing tracts of agricultural and Green Belt land (as with Gosden Hill Farm, Effingham & Send). Our Green Belt is designed to protect Guildford from urban sprawl and makes our area such a delight to live in, and such a delight for visitors and our wider tourism industry. It is recognised that in some areas, small and limited incursions /development in Green Belt may be needed. This can only be justified once all other brown field and non-Green Belt sites have been used.

Proposed Settlement Boundary for East Clandon

The proposed (but not recommended by the Local Plan) new Settlement Boundary for East Clandon: I object to the proposed Settlement Boundary for our village. This would potentially allow infill development in an already very compact and beautiful village, and one that is a conservation village of historic note, dates back to the Domesday Book and beyond, and is a leisure and tourist attraction along the Surrey Hills AONB.

You should also note that East Clandon lies entirely in Green Belt, parts are in AGLV and AONB and will be included fully in the AONB boundaries have been processed by Natural England (NE). The NE propose to extend the AONB to include East Clandon conservation village along with both National Trust properties - Hatchlands and Clandon Park. Further, as you have noted, East Clandon is low on your sustainable village ranking, having no shops or local services. Because of its compactness, It is therefore not suitable for further development as a rural local centre.

Finally, the proposed settlement boundary for East Clandon offers 'no material benefit to the village', and as a resident of the village I am against such a move. I hope that these and other views from residents in the borough are properly considered and the DLP is amended to take them into account. There seemed to be little appetite to listen to the comments of residents at the televised council meeting earlier this year. The attitude of the GBC needs to become more flexible regarding consultation.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site.

Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site. National Planning Policy promotes sustainable developments, with sustainable transport.

With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3). The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4) It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send.

Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Page 2892 of 3367
I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The leisure and visitor experience I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for over development/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm. Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions. The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated. I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London. Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back. Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I OBJECT to Gosden Hill developement being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham. No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF. The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.
Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel. The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools. Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day. Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost. There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size. Electricity supply is also inadequate and would require a big infrastructure development. The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London. The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley. If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km. Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3. Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)
Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads. Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.
I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces. Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.
With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.
The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians. The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

*Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )*  

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)  

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
I OBJECT to poor air quality concerns (Policy I3)
Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Lack of sincere consultation
Consultation with the relevant communities was not made and the last minute inclusion of the Gosden Hill Farm housing settlement, the secondary school at West Clandon Cuckoo Farm site – both on Green Belt sites - and the proposal to draw a settlement boundary around East Clandon are suspicious in that they were last minute inclusions and totally rejected by the communities concerned. Proper consultation and collaboration is required under NPPF155.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to not protecting the Green Belt (Policy P2).

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/11699  Respondent: 8928033 / P. Richardson  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon.

The services in these villages will be unable to cope with the level of development proposed.

The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to
increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Attached documents:

Comment ID: PSLPP16/11700  Respondent: 8928033 / P. Richardson  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

a. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

b. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

c. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”.

Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced. It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25
and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding
villages. The Plan is completely unbalanced and does not reflect the current
spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a
disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of
these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A28

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A28: Land to the east of White Lane, Ash Green

Correct the title of Policy A28 to say Ash Green, and not Ash.

Policies A27, A28 and A29 collectively increase Ash Green village by 50%. Opportunity exists under Policy A28 to
provide a village/community hall and recreational area which would provide Ash Green with much needed community and
social space.

Opportunities (1) Should read: “To create a centre for the village by including a village hall with associated recreational
space providing much needed facilities for the Ash Green community. A mix of homes (C3) and accommodation for older
people (C2) could be appropriate for this site.”

Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash
Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Opportunities (1) Should read: “To create a centre for the village by including a village hall with associated recreational

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A29
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A29: Land to the south and east of Ash and Tongham

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence.

Policy A29: Land to the south and east of Ash and Tongham should be amended to: “Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house.

Requirement 8 should be amended to: “Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

Infrastructure must come before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore, solutions to the following areas are also required before any development of A29 is permitted.

1. The Street in Tongham
2. A331/A323 intersection
3. A323 from A331 to Ash Station
4. A31/White Lane junction

Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A29: Land to the south and east of Ash and Tongham should be amended to: “Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P3 - Countryside

Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

**4.3.29 should be amended to:** “Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough’s second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development.”

**4.3.30 should be amended to:** “We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green.”

**Policy P3 (1) (c) should be amended to:** “does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp17q/357  Respondent: 8928097 / Sue Wyeth-Price  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

My general concerns regarding the overall plan are as follows:

I am concerned that such a large, increased, proportion of the anticipated housing requirement is planned to be built in the areas of the borough with the lower LSOA ratings, and that the mix of these houses is such that larger, less affordable houses are to be permitted within those areas, pricing them out of the reach of the local population. This does not satisfy the local housing demand and will instead encourage migration from outside the local areas. This in turn will create a greater demand on the already strained infrastructure.

I object that comments from the local residents and those made through Ash Green Resident’s Association to previous versions of the plan have failed to be included in the current plan. These comments have not only been ignored but the changes to this version of the plan have resulted in an even worse situation for Ash Green.

This version of the plan, with its proposed boundary around Ash Green, is Orwellian in that all the houses are now included in the rural area whilst the open fields and countryside have been included in the Ash and Tongham Urban Area, simply to make more land available for building and ignoring the impact that this will have on the true rural area of Ash Green.

The evidence based used does not support the new boundaries of Ash Green and specifically ignores the historical location of Ash Green, centred on Ash Manor. The Heritage section of the Draft Plan discusses our “rich and varied architectural heritage” but then ignores this when setting Ash Manor outside the boundaries of Ash Green.

The area around Ash Green has very little in terms of a supporting or sustainable infrastructure. The local roads, specifically around Ash Station, Ash Street and the Greyhound Roundabout junction with Manor Road are becoming impassable and the current plan does not include any changes to the infrastructure to support the additional housing around the congested roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing in response to the local plan proposed with particular reference to the part concerning Normandy and Wyke, Ref. A46 map. As I understand it the proposals outlined are for a substantial increase in housing – an additional 1,100 houses, almost doubling the population of the village, and also the building of a secondary school within this site with 1500 places and 250 staff.

My concerns with this proposal are about the implications for our parish church which is part of the Church of England, which serves the entire village and not just the congregation. My comments below should be considered in the context that the church comes under the existing infrastructure in the village.

My concerns about the doubling of the population size and the additional transient population through the secondary school are these:

1. There is no area on the map for the allocation of additional grave space/ additional consecrated ground. The building area proposed runs straight up to the existing churchyard. There is little space left for burial in the existing churchyard and with an increase in population the demand will soon fill the existing space.

   My request therefore is that space is made available adjacent to the church grounds to extend the churchyard.

1. There is no area on the map for parking alongside the church which exists currently as off road parking, including disabled parking. I note that the housing comes right up to the road. We would therefore be losing parking space and with the increase in population and resulting increase in congregation size we would be looking for ground for a car park adjacent to the church off Westwood Lane.

   My request therefore is that space is made available for parking close to the church off Westwood Lane.

1. St Mark's Wyke serves the needs of the whole village in terms of baptisms, weddings and funerals whether or not people are members of the church. We provide support to the young, the vulnerable, the elderly, the sick and bereaved in the village as appropriate, again whether or not people are members of the church, because that is the nature of the Church of England. A substantial increase in the population will mean more baptisms, weddings and funerals, in addition to support for the secondary school, this has serious implications for staffing levels. With the population increase we would need an additional priest with housing, and additional administrator support.

   My request therefore is that provision is made financially towards the cost of additional staff including a priest and the corresponding housing.

1. The church building is currently at capacity on a regular basis for services of worship, which include Wyke Primary school services, the Remembrance Day Commemoration service, and major feast days. To accommodate increase in numbers in the church arising from the population growth, St Mark's Wyke would be looking for help with extending its existing building and adding amenity facilities such as disabled loos on site.

   My request therefore is for financial assistance and land to extend the existing church building with added amenity facilities.

1. The church hall accommodates local groups including a nursery, and it will not be sufficient in size to meet an increase in population. We would be looking for financial assistance to extend the hall for the community. I note that the plan indicates that housing will be built right up to the hall.

   My request therefore is for financial assistance to extend the existing hall building.

Finally I reiterate a request previously made that there is an urgent need for sheltered housing for the elderly, and for retirement/ nursing homes in the village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the housing number from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent. I understand that plan includes a figure which is almost 70% higher than the official national estimates for population growth in the Borough. The scale of this increase has alarming results for example an increase of up to 35% in existing West Horsley households - greater than any other single area in the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee.

   After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 6th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and Allocations A35, A36, A37, A38, A39, A40 and 41 are removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The infrastructure in the Horsleys and Ockham are already in overload. The local schools are full and the medical facilities are inadequate and roads and car parks are overloaded with little or no scope for improvements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the disproportionate allocation of housing in the immediate localities of Ockham, Ripley, Send and the Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the Wisley development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

2. The increased volume of car A proposed development of around 2,600 homes in the Horsleys and Ockham would result in an estimated 5,000 additional cars on the roads.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the Wisley site would add additional congestion at the M25/A3 junction as well as local roads.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Horsleys and the Former Wisley Airfield (FWA/TFM) from the Green Belt. The later site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the Horsleys and FWA/TFM from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5728  Respondent: 8928161 / Jan Brophy  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P5
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the FWA/TFM site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted level Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I object to the fact that the proposed plan does not meet the needs and desires of local communities

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

° The “objectively assessed need” figure of 693 homes a year is too high.

° A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.

° The current SHMA inflates the proposed housing figure due to:

° failure to correct for errors in the historical data for international migration flows,

° issues with the way it considers students and affordability and

° flaws in the method for estimating the number of homes needed to support job growth.

° It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The plans, particularly with regards to the proposed developments around West Clandon, are totally disproportionate to the existing communities and infrastructure and would hugely change the character of our villages, destroy the character that is cherished by so many;

The Street in West Clandon (A247) is not appropriate for increased traffic (which would inevitably result from the proposed developments at Garlick’s Arch and / or additional access to/from the A3 at Burnt Common. In particular the road is extremely narrow in several places, has numerous houses with driveways that need to use mirrors to see traffic coming down the road; has dangerous and poor visibility junctions at the station and at the Onslow Arms pub/restaurant and following the 2012 Olympic Games the A247 has seen a huge (and in my view very welcome) increase in road cyclists using the road to access the Surrey Hills from Woking and further afield. For all of these reasons any plans that would increase traffic flow on this road would heighten danger both to road traffic and to residents of West Clandon who need to access and cross the road on a daily basis.

The Street in West Clandon is also inappropriate for increased traffic due to the pedestrian use – the village is spread along the road so residents need to walk along the footpaths but these are also narrow in places (in particular near the school), they are only on one side of the road or the other in several places necessitating residents to cross the road frequently; and for example the church car park is across the road from the church itself – with corners creating poor visibility and a dangerous situation for elderly or less mobile residents attempting to cross the road. The number of places that crossing the road is an issue are too numerous for pedestrian crossings to be a realistic solution.

The scale and location of the proposed developments would result in the loss of treasured and unique green belt land for ever – ill thought through and unnecessary intrusion into the Green Belt will result in permanent loss for future generations;

With the decision now taken to exit the EU, the fundamental assumptions pertaining to the number of people coming to live in the borough must be reviewed. It’s clear that the government will be aiming to reduce significantly EU immigration and therefore the housing demand must be correspondingly reduced.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the Doomsday Book.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hour. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.
Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for Infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPS16/5893  Respondent:  8928289 / Trevor Skerritt  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)
It is clear that with this site being added at the 11th hour, no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**I OBJECT** to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow, etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
**I OBJECT** to the damage to the historic environment as a result of the scale of the proposed development (Policy D3).

**I OBJECT** to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**I OBJECT** to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

. **I OBJECT** to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

. **I OBJECT** (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.
I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.
The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon, The Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

Answer (if comment is on questions 1-7 of the questionnaire): ()

.  I OBJECT to the lack of proper infrastructure planning for sites (Policy II)

Policy II requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11939  Respondent: 8928289 / Trevor Skerritt  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2
I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that, in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11925  Respondent: 8928289 / Trevor Skerritt  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

1. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.
2. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.
3. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s

Page 2922 of 3367
residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4605  Respondent: 8928289 / Trevor Skerritt  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complIES with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green. Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon
development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.

7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).

8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

10. Any proposed link road to the A247 (as well as the massive proposed housing development itself) will have a significant detrimental impact on the rural outlook from the edge of West Clandon village (in particular the rural footpath leading from the junction of The Street and Lime Grove up to Highcotts Lane)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4609  Respondent: 8928289 / Trevor Skerritt  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become ever more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

OBJECTIONS TO GUILDFORD BOROUGH COUNCIL PROPOSED LOCAL PLAN (JUNE 2016) AND TO THE CONTINUED INCLUSION IN THE PLAN OF THE FORMER WISLEY AIRFIELD (FWA), NOW KNOWN AS THREE FARMS MEADOWS: ALLOCATION A35 FOR THE PHASED DEVELOPMENT OF A NEW SETTLEMENT OF UP TO 2,100 DWELLINGS

I object to the draft Local Plan for the following reasons:

1) I object to the proposal that over 70 percent of new housing required in the plan be built within the Green Belt. There are many opportunities to regenerate brownfield land in urban areas, which already provide the required infrastructure for larger communities.

2) I object to the fact that the proposed plan goes against the wishes of local communities. We have chosen to live in this area because we appreciate access to the countryside (with clean air) and the peace and quiet provided through open spaces. Building extensively on Green Belt land will create an urban corridor stretching from London to Guildford and compound air pollution problems.

3) I object to the disproportionate allocation of housing in this particular part of the borough. Over 23 percent of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3 percent of the population of GBC).

4) I object in particular to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt.
This will result in a development with an excess of 2,000 dwellings, with urban-style buildings of up to five stories high and an unsupportable increase in population density. This is totally out of character with the surrounding villages.

5) I object to the development of the Former Wisley Airfield (FWA/TFM) Site because of the adverse impact it would have on local roads and road safety. A proposed development of 2,000 plus homes would result in an estimated 4,000 additional cars. We already have severe congestion on the Strategic Road Network of the A3 and M25. Trains servicing Horsley and Effingham Stations are already seriously overcrowded.

6) I object to the assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated and too spread out to anticipate a reduced reliance on private cars. The lack of cycling lanes and the lack of pedestrian footpaths (and the space to provide them) would impact on the safety of local residents.

7) I STRONGLY OBJECT to the continued inclusion of the Former Wisley Airfield (FWA/TFM), where the planning application has already been unanimously rejected by GBC's Planning Committee. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

For all of these reasons, I trust that the objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35 is permanently removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3967  Respondent: 8928481 / Margie Cox  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Thank you for your notification on Strategy and Sites (2017) Consultations regarding the proposed Submission of the Local Plan.
I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons, including:-
1. The surrounding road infrastructure does cannot support a development of this size.
2. Local roads in the vicinity of the site are narrow and are already at capacity. They are also unable to support proposed bus services.
3. The site is adjacent to the most congested stretch of strategic road network in Surrey and Junction 10 is often backed up.
4. The site is also opposite Wisley Gardens, a very popular visitor destination. The impact of 500,000 plus visiting cars per annum has not been taken into account.
5. The site is further away from a railway station than any other identified site.
6. Neither Horsley Station nor Effingham Station have additional parking capacity.
7. It is unrealistic to promote cycling and walking together with public transport (bus) services at the same time, as local lanes are already too narrow to safely support both cars and cyclists.
8. There are not enough employment opportunities proposed onsite for the large number of residents living in the proposed 2,600 homes. They will therefore add to congestion on the roads and lanes.

9. The changed ‘opportunities’ listed in this policy reinforce why this site is totally inappropriate talking of ‘good urban design’.

10. Opportunity (3) should be common to all sites and is not unique to this site.

11. I OBJECT to the increased area of the site. This now extends to additional heritage assess and negatively impacts the setting of the wider Ockham Conservation Area.

12. I OBJECT to the change of site boundaries as these are not identified correctly on the plan (Appendix H, p16).

13. I also OBJECT to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

14. I OBJECT to the removal of additional 3.1 ha from the green belt without any justification.

15. I OBJECT to paragraph 21 which ‘limits’ development in flood zones 2 and 3. Development should be EXCLUDED in any flood zone.

16. I also OBJECT to paragraph 22 as this does not reflect the impact of the buildings on the surrounding areas.

17. I OBJECT to the housing number and the fact that the Council have not, as required used any constraints such as green belt, infrastructure air quality, AONB, TBHSPA etc.

18. I OBJECT to policy S2 where it states ‘the figures set out in the Annual Housing Target table sum to a total of 12,426’ yet the figures in the table add up to 9,810 - what is the significance of the missing 2,616???

19. I OBJECT to the quantity of space allocated for retail in the town centre, in particular to the reliance on the Carter Jonas study update (2017) which includes ‘demand’ for retail space from companies already in administration. I have also noticed that a number of business in Horsley Village have moved or closed down.

20. I OBJECT to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

21. There has been no clear explanation why the Council think it is appropriate to have a regulation 19 Consultation when the changes are major.

22. I OBJECT to the fact that the Council has failed to remove this site from the local plan, despite receiving 1,000’s of objections from local residents and statutory consultees.

23. It is clear that the Council has failed to take on board many of the comments made in the past about issues such as poor drafting, errors. Etc.

24. It is also clear that when comparing the allocated sites, the Council have been extremely inconsistent placing different weight on the various restrictions.

25. I OBJECT to the Council wasting tax payers and residents time and money not following due process and indeed ignoring previous representations. I require confirmation that ALL of these comments, together with all my previous comments are passed to the Inspector. I consider for the reasons listed above, as well as numerous other factors that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
### Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

### Proposed housing numbers in the Borough.

I do not agree with the predicted housing need of 693 houses per year.

Since the 2014 draft Local Plan, the housing need has apparently increased, despite huge numbers of objections received for the 2014 draft Local Plan. Recently 2 people independent of each other (a consultant employed by The Guildford Residents Association and Cllr David Reeve, one of your Borough Councillors) have done a considerable amount of work to calculate what the housing need should be, using ONS and economic data. Each of them has come up with a very similar figure – a number considerably less that the 693 proposed by your contractors GL Hearn.

Why hasn’t Guildford Borough Council done their own checking of the numbers produced by the Hearn report? Surely the Residents of the Borough should be able to expect the highest integrity from their Council and that any major changes proposed have the fullest checking undertaken before documents are put out for public consultation.

Since both these people have done their work, we have had a huge change thrust upon the UK by the vote for Britain to leave the EU which is likely to reduce our housing need still further. This result has thus rendered the latest SHMA (and therefore the current draft Local Plan) obsolete and in need of urgent revision.

Guildford Borough has constraints imposed on it of having 89% of its land designated as Green Belt and around 50% as AONB. Our current plan is to inset around 7% of the Green Belt land so as to build on it. Surely we should instead be saying we must protect it from development and use it as a valid constraint to reduce our SHMA figure?

Why hasn’t Guildford Borough Council used the allowable mitigating factors to reduce the apparent number of dwellings required of us by the government? We are a county which is largely AONB or Green Belt land – we simply cannot fit large number of houses. NPPF says we are able to take AONB/Green Belt into consideration.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I strongly object to the creation of a ribbon of development along the route of the A3/A31.

Observation of the map published in the draft Local Plan makes it abundantly obvious that ribbon development is about become a reality. Starting in the east at the former Three Farms Meadows (Wisley Airfield) 2,000+ houses on the south of the A3; approximately 2 miles to the west, Garlick’s Arch, another 400 houses plus 7,000 sq m of industrial units on the north side of the A3; another 2 miles further west, at Gosden Hill Farm, 2,000 houses plus a park and ride on the south of the A3 adjoining the large housing estate created when Burpham Sainsburys was built. Then another 2 miles to the west on the north of the A31, 1,800 houses at Blackwell Farm and an extension to the Science Park; and then in Normandy 1,000 houses and a school. What is this if not urban sprawl, ribbon development and merging of settlements?

I also understand that a “feeder” road will be built parallel to the A3 because of the high volume of traffic expected by the housing created in the east of the Borough. This is being suggested to remove any need for traffic generated by the Gosden Hill development and the proposed park and ride facility to use small local Guildford roads to access the A3. Much of the land that this feeder road will cross is already owned by a property developer and it is inconceivable that the developer will not apply for planning permission to put housing/industrial units along this feeder road at some later date. Merging of Burpham and Send would then be complete.

Our Green Belt is precious and each time a small part is developed it eats away at the Green Belt as a whole, and in time we will have none left. Once that happens the Green Belt is gone forever and it will be too late to lament its loss.

Can Guild Borough Council take responsibility for such a loss of the Green Belt and the fact that we will have almost continuous development along the A3 from central London?

How does Guildford Borough Council explain that their draft Local Plan is not following NPPF guidelines?

How does Guildford Borough Council think removing villages from the Green Belt preserves the setting and special character of our historic towns and villages?

Guildford Borough Council is expected to follow the rules laid down in the NPPF about Green Belt. It has not.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

I strongly object to the number of houses East Horsley is having imposed upon it.

East Horsley has seen much infill development over the years. Developers are always keen to build in the village because of the huge profits they can make. There are very few infilling spaces left in the village now. Much of the development in
recent years has been large individual homes and now many perfectly good smaller homes (which we need in the village for downsizers and the like) are being ripped down and replaced with huge houses. Also in recent times smaller homes and some affordable housing and flats have been built. I am talking in particular about developments behind Bishopsmead, at Frenchlands Hatch, two developments by Horsley Station and two developments in Kingston Avenue – one on the North side and one behind the doctor’s surgery. Also retirement apartments have been built in the village centre in two places. I feel all this development should be taken into account when considering East Horsley’s contribution to housing. The fact is, much of East Horsley has already been infilled.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

The only possible reason I can see for Guildford Borough Council proposing to remove any villages from the Green Belt is to remove any objection for development for Green Belt reasons.

East Horsley, where I live, is known far and wide as the “historic Lovelace Village”, how will removing it from the Green Belt satisfy the NPPF guidelines to “preserve the setting and special character of historic towns and villages.”

West Horsley, our adjoining village, has a wealth of very old houses, one going back to 1380 and many more timber framed buildings similarly old. How can removing West Horsley from the Green Belt be possibly justified?

I strongly object to the insetting boundary defined for the Horsleys

The proposed insetting boundary for both East and West Horsley does not follow the settlement boundary. Instead it encompasses green fields and recreation areas which in time would be ripe for development. This is a travesty. In particular:

- the area identified as site A39 and Kingston Meadow south of the railway line, should not be included in the insetting boundary. Both these sites have excellent defensible boundaries as a large watercourse runs along their eastern boundaries.
- Pennymead Lake and attached recreation ground should be excluded.
- The pastureland at the end of Norrels Drive and adjoining Ridings Wood (a semi-ancient natural woodland with nationally rare hawfinches) should be excluded.
- Site A41, West Horsley: The insetting boundary defined by the draft Local Plan is completely wrong at this point and there is the perfectly good defensible boundary of East Lane to stop these fields being included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Sustainability

I strongly object to the lack of sustainability in the draft Local Plan.

Much weight is given in the NPPF document of addressing the sustainability of any development that will take place.

East & West Horsley and the surrounding areas

The draft Local Plan wants to commit East Horsley and West Horsley to at least 533 houses. There has been no provision for additional infrastructure in either village whatsoever.

Schools: There is one local primary school which serves East & West Horsley, The Raleigh School, which is already oversubscribed. 533 houses would create at a minimum, say 200 primary pupils almost half a school’s worth. Where will they be educated? The Howard of Effingham School is the local secondary school which serves the Horsleys, Effingham, Bookham and parts of Fetcham. It is already full. There are no proposals for a secondary school which could accommodate any additional students form the Horsleys.

Doctors – the surgery in East Horsley serves not only East and West Horsley, but East Clandon, Effingham and Ockham and probably Downside. The surgery is already extremely busy. How on earth will it cope with a huge influx of patients – potentially thousands. There are suggestions in the Plan that this will be expanded but not in the short term.

Village parking:

- Station Parade – already well used and no space to expand.
- Station Parking at Horsley and Effingham Junction – already full and no place to expand.
- Medical centre – parking is already inadequate at the surgery.
- Village Hall – generally full and misused by commuters using the trains.

Road systems in East and West Horsley:

The building of 533 houses in the Horsleys will introduce at least 1,000 extra local cars. The draft Local Plan wants to promote walking and cycling as part of its sustainability package. The local roads have been described by John Furey, Head of SCC Highways, as lanes NOT roads. They have evolved from the time before the station was even built in East Horsley and the north/south route through the village is very narrow for the most part and already unsuitable for the weight of traffic it takes. Cyclists will certainly be put off by speeding traffic on these narrow roads – particularly at rush hour. Footpaths, where they exist, are far narrower that statutory guidelines suggest (and no room to widen) and are in poor condition and are difficult for all but the ablest amongst us. They are difficult for mums with buggies or toddlers (too narrow and uneven) and impossible for disabled users. Commuters will only walk in dry weather as flooding and uneven path surfaces make for very wet journeys during and after rainfall.

Drainage:

Drains cannot cope with moderate to heavy rainfall in many parts of Horsley notably along the main pedestrian approaches to the village centre in East Horsley. Flooding occurs locally in several places.

House prices.
The draft Local Plan states: “Pursuing sustainable development requires careful attention to viability and costs in plan-making and decision-taking”. The draft Local Plan states that 40% of the housing should be affordable housing. As I have said before, this is not possible in areas of extremely high property prices. East Horsley regularly appears in the press as one of the most expensive villages in Britain. West Horsley while property prices are slightly lower, is still a very expensive village to live in. I would expect any person looking for affordable housing would not consider a figure £350,000 for a 2 bedroom property affordable.

The only way in which the Guildford Borough Council could address the sustainability of affordable housing would be by developers building houses controlled by housing association or similar ownership and the draft Local Plan should make this plain. Also once given planning permission, for a development which includes low cost housing, the developer should not be allowed to back track and say after the event that it would not be viable for them to build smaller houses – as has happened in the past. Any planning permission granted should make this very clear and only be allowed to go ahead if this ruling is adhered to.

Answer (if comment is on questions 1-7 of the questionnaire): ()

General comments about other proposed development sites

West Horsley

I object to the planned building of at least 385 houses in West Horsley because it is disproportionate to the current size of the village (over 35% increase). It would swamp West Horsley. West Horsley is defined as a large village – this is because it is spread out but has very few amenities. The local primary school (The Raleigh) serves both East & West Horsley and is full already. There are two pubs and one small grocery store which is about to close down. The village is rural in nature. Areas to the north of East Lane have already been more heavily developed.

- A small infill development of affordable homes could be on site A38, but the number of homes proposed for this area is certainly too much.
- A40 A small infill development part of the proposed site between Green Lane and Ockham Road would be acceptable but not the overwhelming numbers proposed. Access onto the B2039 which is narrow and has poor site lines is difficult. The campsite which adjoins this site is popular and a very good asset to the village, especially given the many local tourist attractions. Any development on A40 would have to be sensitive to the ambience of the camping grounds.
- Site A41. This pasture land should not be developed at all. It is part of the rural area in the village, close to very old and historic Grade 2* listed buildings and adjoins ancient woodland.
- Site A37 – I don’t object to a small development on this site but it should be in keeping with the area in which it stands.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Blackwell Farm

I strongly object to any development on the Hogsback an AONB.

For very questionable reasons, a landscape assessment commissioned by Surrey County Council as part of the Surrey Hills AONB boundary review had omitted Blackwell Farm. However an independent study commissioned by Compton, Warnborough and Worplesdon Parish Councils concluded that indeed Blackwell Farm was very deserving of protection.
The land evaluation study, carried out by Land Management Services, an established firm of landscape architects, assessed the area using Natural England’s latest AONB criteria and found that nearly the whole of the 265 hectare farm was of a landscape and scenic quality that merited inclusion within Natural England’s revised Surrey Hills AONB boundary. The study also recommended that adjoining semi-rural areas on the western edge of Guildford, which did not meet AONB criteria, should remain undeveloped as they provided an important views into and out of the AONB.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Three Farms Meadows - Wisley Airfield

I strongly object to any development at Wisley Airfield for two reasons – firstly inappropriate development of the area (clearly agreed by all of the Borough Councillors when they rejected the development on 14 counts) and also its effect on the AONB to the south.

The current proposals would mean an increase in population of an estimated 5,355 people. Ockham, a small hamlet of ancient houses would be subsumed into a mass of housing – like Milton Keynes. The land is predominantly productive arable farm land (only 17% is hard standing). The area (hardstanding) near Elm Corner is already in the Special Protection Area bordering on the Thames Basin Heathland. There is a 400m zone where development is prohibited, and from 400m out to 5km developments require a SANG.

It is estimated that on a development of this size there would be 700 dogs and a similar number of cats. Residents would not use another SANG for walking their dogs, they would head straight for Wisley Common over the designated green space thus doing even more damage to a nationally important area of conservation. At the moment the birdlife on the farm/airfield is wonderful. The song of the skylark is present all year round – but certainly not for long if 700 cats took up residence. The developers have stated that they would have a permanent dog warden working to prevent this happening. Do you really trust this and from 6am to 10pm when it would be necessary?

The proposed changes to the road systems around the site are awful and not only would it seriously increase volumes of traffic throughout the surrounding area, the whole character of the area would be changed for the worse forever. The effects on the surrounding villages would be devastating. The nearest stations of Horsley and Effingham Junction already have overfull car parks – what would happen here? Shopper’s parking is just adequate now in East Horsley and Ripley – where would these new visitors park for shopping etc?

Infrastructure: The developers have stated that they will not build any facilities (schools, doctors surgeries, shopping area) until 500 houses have been built – some ten years into the project. What will people use in the meantime – especially if all other local housing is built within five years as stated?

Transport links. The developers have stated that to address sustainability that there would be a bus service every ten minutes to Effingham station. Can you seriously think this would carry on at their expense in perpetuity from 6 am to midnight? The developers also calmly told me at their public meeting that they fully expected all residents to walk or cycle everywhere. My answer to that was “dream on”. I am a keen cyclist and meet many people who are astounded when they
realise that I cycle more than a couple of miles let alone 20 at one go. Can you imagine hordes of cyclists or pedestrians fighting their way down Old Lane or Ockham Road to the respective stations at morning rush hour? As an experienced cyclist I avoid those lanes even during less busy times because of the narrowness of the road and speed of traffic. People drive to our local station from less than ¾ mile away every day and certainly wouldn’t choose to walk or cycle the 2.5 miles. According to Google Maps this is a 9 minute cycle ride and a 49 minute walk. Need I say more? This is an opportunity for the landowners to make a fortune with no thought whatsoever to the sustainability of the plan.

If having promised to build various essential infrastructure projects upon completion of 500 dwellings, what would GUILDFORD BOROUGH COUNCIL do if at 499 dwellings the developers decided to pause in their building plan for a few years? What if they decided never to go beyond 499 houses as demand wasn’t satisfied? Is all this a horrible mistake in the making? I have been told that this habit of building to just under a specified total to avoid expensive infrastructure projects is not uncommon.

Effect on the AONB to the south of the site

I visited two of the highest points in the AONB to the south of the site to see whether I could see the site from the AONB (Polesden Lacy and the high point of Staple Lane – a magnificent viewpoint to the south of the A246). From both locations I identified where Wisley Airfield was using triangulation and OS maps. I couldn’t actually any of the site - just green and trees in the general area. I suspect it could be seen on the years when the farmer planted a crop oilseed rape as the yellow splash of colour would stand out. I could just about identify traffic on the A3 passing nearby the site. However there was no doubt that it would be extremely visible with housing let alone 5 storey buildings on it.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site A36 Thatchers Hotel

I have no objection in principle to development on this brownfield site but I think there should be very strict design rules for the area as Thatchers sits just outside the edge of the East Horsley conservation area next door to the historic Grade II* listed Horsley Towers and the hotel which was built by renowned local architect, Frank Chown (who built many of the lovely houses in East Horsley) reflects the ambience and openness of the area. This is the only brownfield site available for development in the village, although recently a planning application on this site was rejected because a need for a local hotel was considered paramount. The application, of course included large houses (good profit margins) when in fact the village needs smaller dwellings.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site A39 Land to the west of Horsley Railway Station, north of the railway line and west of Ockham Road North, East Horsley

I strongly object to the development on this Green Belt site. I wonder how well the producers of the plan even looked at the site. The reasons for objection are:

• The land is outside the settlement boundary.
• The land is in the Green Belt and adjoining undisturbed listed ancient woodland.
• This site is generally very wet and is extremely wet in prolonged rainy periods. The back gardens of the properties along the edge of this field (west side of Ockham Road North and in Heatherdene) routinely have persistent surface water during the winter despite a good sized watercourse running along the eastern edge of the site. Roughly 40% of the site (the Eastern sector) is a Zone 3 floodzone and a Functional Floodplain. A Zone 3 floodzone has an annual probability of flooding of 1% or more and is the most severe category of floodzone identified by the Environment Agency. More seriously, under the Environment Agency’s definitions a Functional Floodplain comprises land where water has to flow or be stored in times of flood. Land within this zone is considered to flood with an annual probability of 1 in 20 or greater in any year. Development on such land does not seem at all sensible given the flooding problems in the Borough in recent years. Serious surface water issues also occur on the road just outside this proposed site. Attempts to mitigate this water flow would also cause serious issues further north where the watercourse goes underground, back up could occur and flood adjoining properties which are designed as a development for the elderly. A near neighbour remembers walking along Ockham Road North in 1968 in calf deep water after heavy rainfall.
• We understand that access will be provided just north of the rail bridge. This would be feeding 200 cars (potentially) at peak times onto a very busy, narrow road with poor sight lines for both those trying to join Ockham Road North and those driving down the road seeing the potential vehicles leaving the site. The access is also opposite one of Horsley’s Grade 2 listed historic Lovelace buildings. Completely inappropriate.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Garlick’s Arch

I object to 400 houses plus industrial units being built on this Green Belt site. It will just continue the ribbon development from Burnt Common to Ripley. It is far too large a development for the area and would put huge pressure on current infrastructure. The lack of primary and secondary education places yet again raises questions about Guildford’s thoroughness in development of the draft Local Plan. Is the council so easily swayed by a developer who offers a
wonderful carrot of providing free land for entry and exit points from the A3 in order that he can make a huge profit without any regard to Green Belt restrictions.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the fact that the university is not providing accommodation for more of its student body and staff.

In the 2003 Local Plan the university was granted special permission to build student and staff housing on land at Manor Farm by taking it out of the Green Belt so that the university could keep a promise to build 4,790 residences to cope with its growing student population. These were considered exceptional circumstances and this planning permission was given for development on Green Belt land. Student growth accounts for 50% of the recent growth of the population of Guildford Borough, The university has instead chosen to build less than a quarter of the housing promised and we are told the University wants to expand further the number of students and has shown no intention of building the number of
dwellings promised. The university should be made to act responsibly and provide suitable accommodation for its student body thus releasing valuable housing stock for all our key workers and their families in the Borough.

Why did not GUILDFORD BOROUGH COUNCIL make sure that this accommodation was built as it was supposed to have been?

It is clear from the Government guidance that student accommodation can be counted towards calculating local housing need and not over inflate our apparent need. Has this been done?

GUILDFORD BOROUGH COUNCIL seems to have used and unrealistically low figure for windfall housing – almost half of what actually has been gained over recent years.

It seems to me that if all the rules were applied as they should be and numbers calculated properly our housing need would be much reduced and in turn stop the development on our precious Green Belt.

It is a fact that any houses built in our area will be snapped up by people wishing to move out of London because they can get better value for money in this area, even though property prices are extremely high. This however is not a housing need.

Guildford Borough does not need a huge influx of people. We have a stable jobs market, with low unemployment. Why has GUILDFORD BOROUGH COUNCIL not argued the fact that the South East is already full to bursting? What is this obsession with attracting more and more people to the area?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Affordability

I strongly object to the way in which the term “affordability” is built into any of the housing projects outlined in the plan. This is completely the wrong term to use in context of most of Guildford Borough. Unfortunately because of its proximity to London and the fact that the Borough sits in some of England’s most beautiful countryside, property prices are extremely high. It is useless stating that affordable home must be included as part of the proposed developments. The definition of affordable in this context is 80% of market values. An example. In our village four semi-detached small 3 bedroomed houses have been built, close to the station, (great for commuters) small (suitable for a young family or downsizers). Ideal you may think – just what we want to see. These houses were over £700,000. This is extremely expensive by most people’s standards. Apply the 80% rule – this is £560,000. Do you call this affordable? Of course not - 80% of very expensive is still very expensive and completely unaffordable to the very workers you are aiming them at. Our Schools, hospitals, doctors’ surgeries and other workplaces where we need key workers all have difficulty recruiting staff because they cannot afford to live in the Borough. Other firms have some difficulty in apparently retaining some staff because of the price of housing in the Borough. There is absolutely no doubt that Guildford needs more dwellings for key workers and people who are looking to start their way on the housing ladder. It is also desirable to have suitable housing in the villages for young families and for those who wish to downsize. But these dwellings must be genuinely affordable – not using the government definition as it does not work in our area.
Part of the economic plan for the Borough seems to be to create more retail space, warehousing and distribution centres as well as other business opportunities. Employees of many of these work places are relatively low paid workers. Why are we creating all this sort of employment without suitable housing for the working people and their families. What we need is social housing or housing association housing which our young people and key workers can really afford. Downsizers in the main will be able to afford whatever is built because they will be trading in a more expensive home.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I strongly object to development of the Green Belt.

The Green Belt was set up to check urban sprawl and to prevent neighbouring towns merging into one another and most importantly it was established to protect our precious countryside and diverse habitats for wildlife therein. Also importantly, it was established to encourage efficient use and re-use of urban areas so that building on green fields would not be required. Setting up of the Green Belt was also intended to preserve the setting and special character of historic towns and villages. It seems to me that the prevention of towns and villages merging into one another has been ignored.

It is set out in the NPPF guidelines that only under exceptional circumstances could a Borough consider development of Green Belt land. Ministerial guidance expressly states that unmet housing need is NOT considered an exceptional circumstance, yet Guildford Borough Council are proposing to ride roughshod over this ruling and completely ignore it. Letters written to Sir Paul Beresford MP from Nick Boles and Rt Hon Eric Pickles in the summer of 2014 state that if housing need cannot be met because of Green Belt incursion that this is a reason to reduce the number of dwellings seemingly required.

I strongly object to the removal of any villages from the Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Conclusion

Guildford Borough Council are planning to increase the Borough by 25% over the next twenty years. I have to ask why? Also Guildford Borough Council proposes to put 65% of the proposed new housing in Green Belt Land in complete contravention of NPPF guidelines and expressly against Government policy for protection of our much needed and precious Green Belt land.

There comes a point when Guildford Borough Council will have to admit that only small scale development is possible.

Overall my feeling that this has not been a well thought out exercise, and one wonders how much genuine planning lies behind this document. There seems to be no vision for what we want our Borough to achieve and look like. Unjustifiable housing numbers have been proposed and with little attention given to sustainability. It was made very clear in the NPPF that the Government attaches great importance to Green Belt land and stated that once established, Green Belt boundaries should only be altered in exceptional circumstances, and yet this has been completely ignored. Guildford Borough Council itself clearly identifies in the Settlement Hierarchy that urban areas are more sustainable areas for development than rural areas. Yet it has not even listened to its own guidelines.

Is Guildford Borough Council so lily livered that it cannot argue at Government level that the numbers being asked of us are too high or is there a hidden agenda for ignoring NPPF guidelines? Why has it not been argued that the south-east of England is already full to bursting? Has anyone considered the overall effect of all this proposed development? Not only are minor roads already busy but the A3 is choked every working day. Coping with tens of thousands of extra vehicles, brought about by the massive housing target, on a daily basis is just impossible.

I am not against some development, but I believe it should be proportionate, using brownfield sites and with great attention to the sustainability of any proposed development. Our villages need small numbers of genuinely affordable homes to rent to people who work locally. The town similarly needs affordable properties to rent to people who work locally. The university must be made to build accommodation for its staff and students, as it has permission to do, and release other homes currently occupied by students, a transient population, for local families. We do not need large expensive homes – these will always be snapped up because at the moment Guildford Borough is such a desirable place to live and commute from.

I do think the “south east” issue should be challenged at high level. We cannot forever be the “sponge” that absorbs all comers. I also think that the Green Belt should be protected at all costs. Once we let one bit go we are going to be doomed to creeping urban sprawl with severe destruction of all that is precious in this land.

The current proposals in the draft Local Plan would destroy the qualities that make Guildford a good place to live and work. Developers, once given planning permission will use their usual wiles to get around their original proposals and we will end up with the worst of all worlds. Please do not let developers and the university dictate what Guildford needs.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Approach
Why is Guildford Borough Council so determined to provide larger shopping “experience” to enhance the town? If suitable “in town” apartment complexes were built a wonderful atmosphere could be developed making Guildford “the” place to live. This alone would bring huge income to the town and reinvigorate the centre. People want to live in or near the town, not stuck on some development without suitable transport links. The opportunities for alternative proposals are huge, why is more imagination not being used?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Inadequate Infrastructure

Schools:

Many complaints have been made against former drafts of this Local Plan that the infrastructure will not cope with such a huge building regime and we received platitudes from the planning department that developers will not be allowed to proceed unless certain provisions are in place. We all know that no developer will provide a school before they have built and sold a certain number of houses, but where do children go in the meantime? All local schools are full. This provision is still not addressed.

This is a chicken and egg situation. I live in East Horsley. Any development in the Horsleys and Ripley and at Three Farms Meadow (former Wisley Airfield) will seriously affect our villages. Should the developments in the Horsleys, although huge by village proportions, go ahead, will these smaller developers be expected to provide new primary and secondary school places for the children who live in their houses? Or will the developers at Wisley be expected to provide these school places as they are clearly going to make vastly more profit that the smaller developers? Has anyone considered the situation as a whole? Is one person going to be appointed as project manager to oversee all of the developments in the Borough and be responsible to ensure infrastructure is in place when it is needed? Will this project Manager have the power to enforce any infrastructure projects?

Medical

We recently had a village AGM and a representative from the local Doctors Surgery repeatedly told us that recruiting GPs is an impossible task as they cannot afford to live here. I am sure this is equally true in other parts of the Borough. Recent recruits had been very fortunate in that the partner of the proposed GP had been relocated to the area. This is no way to
ensure an adequate supply of local GPs. Similarly can the Royal Surrey County Hospital cope with an increased population caused by an extra 12,500 houses in Guildford Borough alone?

Roads and transport

Much has been said about the inability of local roads to cope with any increase in traffic. The size and condition of the roads has not changed and local station and shop parking is already at saturation point. Locally the bus service is non-existent and therefore will not help alleviate the number of cars on the road. No sensible solutions have been proposed.

Air Quality

A huge increase in road traffic, and there is no doubt that development on this scale which bring huge increases in car numbers to Guildford Borough, will only cause the air quality to reduce further. Much of the major development is along the A3 trunk road which is already renowned for its poor air quality, particularly at the A3/M25 interchange and at the section on the A3 from Send going through Guildford to beyond the A31. We already have daily very long queues on the A3 going into Guildford – this will only get much worse and the air quality will deteriorate ever more.

Green Belt

I strongly object to development of the Green Belt and the insetting of villages.

The Conservative Government promised the Nation in their manifesto that they would protect the green belt unless exceptional circumstances prevailed. Indeed posters with the local Guildford MP and the deputy Council leader, Mr Furniss and their supporters were on the front of the local Conservative Association web site assuring us of this. Policies for the protection of the Green Belt are set out in the NPPF guidelines and Ministerial guidance, also received in writing, expressly states that unmet housing need is NOT considered an exceptional circumstance, yet Guildford Borough Council’s response to this is to remove huge swathes of land from the Green Belt and propose house building on these areas. Guildford Borough Council is proposing to ride roughshod over the national policy of preserving our precious countryside. Is this how Guildford Borough Council looks after its residents’ interest and those of future generations to come?

Many of the villages in the Borough’s area are of historical value and interest, yet Guildford Borough Council proposes removing most villages from the Green Belt. The case of East and West Horsley, the former an historic Lovelace Village and the latter an ancient village (with known settlement dating back to the Iron Age) and with a wealth of very old houses have had settlement boundaries defined solely to enable large developments to take place. This is ethically indefensible. Both these villages contribute hugely to the rural surrounds and have low density housing. Wildlife corridors are allowed because of the nature of the villages and a good level of biodiversity is maintained. Mass building will spoil this entirely. In particular, the site A39 in East Horsley already has a very defensible boundary in the form of a large ditch which runs along the east side of A39 and along the back gardens of the houses in Ockham Road North. This field should be outside the settlement boundary.
Guildford Borough Council has completely failed to use any of the powers given in the NPPF guidelines to apply constraints to development. Guildford Borough Council is completely failing its residents who elected them to look after their countryside.

Another factor that has failed to be considered is the fact that the two largest sites – the Hogs Back (Blackwell Farm) and Three Farms Meadows (Former Wisley Airfield) – are both working farms. Should these be taken out of commission at the very time that Government is saying how vital it is for our Country to provide our own food.

In conclusion, the latest draft of the local plan does absolutely nothing to allay the fears and objections raised by the previous draft. The reduction in housing numbers is derisory. No account seems to have been taken of the vote for the UK to leave the EU and the reduced population and economic downturn that is expected. The planners seem to have used no imagination as to how this Borough could flourish. There seems to have been no attempt to solve the housing crisis by providing low cost and social housing that we desperately need nor to address the imbalance of large expensive homes versus the smaller apartments and less costly family homes that are in such short supply. Brownfield land in the town centre should be used for the benefit of key workers. No attempt to address the burden put upon us by the large student population has been made (which by the way leaves considerable numbers of unused properties for parts of the year) and no vision for Guildford seems to be in place other than the creation of mass urban sprawl, which before long will stretch along the A3 all the way along to the M25 intersection.

**I strongly object to the housing targets set out in Policy S2.**

The local plan sets out a very high level view of the Borough as Guildford Borough Council sees it over the plan period. There are a series of three very large new developments, The Hogs Back (Blackwell Farm), th Slyfield redevelopment, Burpham (Gosden Hill Farm) and Ockham (Three Farms Meadows) (between 1700 and 2000+ for each development) and a large development at Send (Garlick’s Arch and nearby area 700 houses, new A3 entry and exit access points and industrial buildings) and a large increase the Horsleys of some 400 houses. It is to be noted that all of these, developments are adjacent to the A3/A31 (The Horsleys some 3 miles from the A3) and all but Blackwell Farm are to the eastern side of the Borough which is a very disproportionate spread. Overall the Local Plan represents a level of building which will mean an increase of over 22% in housing stock in the Borough in just over 10 years. This is a huge proportional increase in the Borough and enormous burden on the infrastructure and nearly double the prediction for growth for our area made by the Office for National Statistics.

At a time when Brexit negotiations are in their infancy and there is considerable uncertainty in future economic growth and population trends, Guildford Borough Council has chosen to adopt the highest forecasts given by their consultants GL Hearn for future housing need. Surely this is a reckless strategy. It is also very much out of line with the planning expert employed by Guildford Residents Association (Mr Neil MacDonald, who has impeccable credentials) who was asked to provide an independent assessment of Guildford Borough’s housing needs and who calculated a much lower number than GL Hearn did. It is also worth saying that recently the Planning Inspector, when reviewing Waverley Council’s Local Plan, acknowledged Mr Macdonald’s expertise and was happy to accept his calculations.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Comments on Proposed Submission Local Plan

East Horsley Parish Council (“EHPC”) has carefully considered the Proposed Submission Local Plan which Guildford Borough Council (“GBC”) has now published for public consultation. Our comments are set out in this letter.

EHPC has strong concerns about the Proposed Submission Local Plan and the evidence and assumptions which support it. In particular, EHPC does not agree with the scale of the house building programme which is being proposed by GBC. The target outlined represents a 25% increase in the housing stock of the borough, whilst we note that the Office of National Statistics (“ONS”) projects a population increase of some 15% for Guildford Borough over this same period.

EHPC also notes that the Proposed Submission Local Plan includes the statement “We will continue to protect the Metropolitan Green Belt”. We fully and un-equivocally support this policy. However, unfortunately GBC appears to be in breach of this same policy through the housing policies it has set out in the Proposed Submission Local Plan, whereby some 65% of developments will be made on land that is currently Green Belt.

EHPC is also concerned that the infrastructure proposals are inadequate even to meet the needs of what is there at the moment, let alone the proposed developments in the Local Plan.

EHPC therefore OBJECTS to the Proposed Submission Local Plan.

Detailed comments on the six different policy areas which form the basis of the Proposed Submission Local Plan are now set out below, followed by our comments on specific site allocation policies.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/24  Respondent: 8929057 / East Horsley Parish Council (Nick Clemens)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
POLICIES A37, A38, A40 & A41, located in West Horsley

The LAA identifies six sites in West Horsley for potential development, the four largest having allocation policies within the Proposed Submission Local Plan. The total housing number arising from these six sites is 405 homes in total. For a village which had 1,124 dwellings at the 2011 Census, this represents a proportional increase of 36% over the plan period, an enormously high proportion by any standards.

The four policy sites are all located within the Green Belt. One is a partly brownfield development but the other three sites are all open fields used for agriculture and all lie within the current Green Belt at the edge of the Settlement Area. The reasons presented by the consultants, Pegasus, in the Green Belt & Countryside Study to justify these settlement boundary movements appear to us highly questionable and in no way to meet the requirements of the NPPF that such boundary movements are only to be made in ‘exceptional circumstances’. These movements clearly represent a deliberate pushing back of settlement boundaries in order to provide more greenfield sites for housing development. As such, we consider these proposed movements in settlement boundaries to be invalid.

These proposals are also contrary to the principles of the Metropolitan Green belt. West Horsley represents one of the first ‘lines of defence’ against London urban encroachment outside of the M25 circle. Yet these policies will eliminate a significant part of this defence as they seek to expand the boundaries of this village and fill-in every bit of green space within this rural setting.

It is also totally contrary to the opening statement of Local Plan Policy P2 that “We will continue to protect the Metropolitan Green Belt” It seems that in West and East Horsley at least the draft Local Plan is doing exactly the opposite.

Given the scale of the development proposed in West Horsley, the inevitable destruction of its village character and the impact on infrastructure across West and East Horsley, EHPC OBJECTS to the site allocation policies A37, A38, A40 and A41.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
EHPC has major concerns about this proposed development and has objected against prior planning applications at this location. We consider this proposed development to be a severe contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability which will have a major adverse impact on infrastructure across a widespread area, including East Horsley. Above all it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country.

**EHPC strongly OBJECTS to Policy A35 and will provide a more detailed submission outlining our arguments against this policy in a separate letter.**

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Proposed Submission Local Plan: Policy A35, land at former Wisley Airfield, Ockham**

This letter supplements our submission of 13th June 2016 concerning the Proposed Submission Local Plan and provides additional comments on Site Policy A35, ‘land at former Wisley Airfield, Ockham’.

East Horsley Parish Council (“EHPC”) strongly OBJECTS to this proposed policy for the reasons detailed in this letter.

a) *The proposed development represents a fundamental breach of Metropolitan Green Belt rules:*

The site forms part of the Metropolitan Green Belt. Under the NPPF, development on such Green Belt land is only permitted under ‘very special circumstances’. GBC’s Planning Officer, in assessing a previous planning application from the developer of this site, rejected their application, arguing that: *It has not been demonstrated that the benefits of the proposal amount to very special circumstances such as to clearly outweigh the harm to the Green Belt and the other harm identified.*

Ministerial guidance has repeatedly confirmed that unfulfilled housing need does not qualify as a very special circumstance. Whilst the developers’ previous planning application was judged and rejected based upon the 2003 GBC Local Plan, the proposal to include this site within the 2016 Proposed Submission Local Plan does not fundamentally change the argument against it. Any removal of this site from the Green Belt can only be made based upon ‘exceptional circumstances’, which cannot be justified on the basis of unfulfilled housing need. If this was the case, then the entire Metropolitan Green Belt would already have become filled with housing.

Removal of this site from the Green Belt is totally against its rules, regulations and underlying spirit. The site location at the edge of the M25 circle represents a ‘first line of defence’ against metropolitan encroachment into the Surrey countryside. If this site is developed then it becomes only a question of time before Guildford itself is absorbed into the sprawling London conurbation.

*Accordingly, we OBJECT to Policy A35 as a fundamental breach of the Metropolitan Green Belt rules.*

b/ *This site does not meet acceptable levels of sustainability*
Sustainability Appraisal is a core concept of planning policy, yet this site is rated very poorly in terms of its sustainability.

The sustainability appraisal undertaken by GBC’s consultant, AECOM, is presented in the Local Plan Evidence Base report ‘Sustainability Appraisal (SA) of the Guildford Borough Local Plan’ issued in June 2016. In their report AECOM have graded all Local Plan policy sites according to 21 different criteria using the conventional ‘traffic light’ system. Red colouring signifies poor sustainability. Of the six larger sites included in their evaluation, (those with proposed housing numbers of 1000 homes or greater), AECOM rates Site A35 as the very worst of all in terms of its sustainability. No less than 8 out of the 21 criteria are graded as ‘Red’ by AECOM for this site, more than any other large site.

Detailed reasons why this site has such poor sustainability include the following:

- There is currently no infrastructure whatsoever at this site, meaning that all water, electricity, gas and phone services will need to be newly established;
- New large-scale sewage disposal will be needed, a fact recognised by Thames Water, indicating it may take 3+ years to provide adequate sewage handling facilities for this site;
- There are presently no schools, medical services or shops within walking distance of this site;
- There is presently no local employment at this site and little after the development is completed;
- There will be a significant destruction of agricultural land arising from this development;
- There will be significant environmental damage from this development;
- There is no public transport currently serving this location;
- The nearest train stations are Horsley and Effingham Junction, both around 3 miles away and so too far to walk. Neither station currently has significant parking capacity availab
- Travel from this site will be primarily dependent upon motor vehi Any new site so dependent upon motor vehicles for transport cannot be considered as being ‘sustainable’;
- New access roads will be needed and significant changes proposed to the surrounding road network, leading to further pressure on over-crowded rural roads and increase in the traffic congestion in nearby settlements;

Whilst some of these issues may be mitigated, e.g. by building new schools, medical facilities, etc, others such as the environmental issues and infrastructure impact may not. This proposal, fundamentally, represents an attempt to create a large-scale new settlement in a poorly-sited green field location. However, as the GBC’s own consultant has demonstrated, this site does not reach acceptable minimum levels of sustainability.

Accordingly, we OBJECT to Policy A35 on grounds of its unacceptable sustainability.

C) The site will have a severe impact on local traffic & infrastructure:

The proposed development will have a severe adverse impact on road traffic in the surrounding area. This includes East Horsley where high volumes of additional traffic are likely from the residents of this new settlement accessing East Horsley’s two stations, shops and nearby schools. Most of the rural roads in this area are narrow winding ‘lanes’ – a term used in a recent local public meeting by John Furey, senior SCC councillor for Infrastructure to describe East Horsley’s through roads. Many of these ‘lanes’ are without pavements for large stretches, whilst the principal through-roads of Ockham Road South and Forest Road pass along unlit residential areas so narrow that two buses cannot cross in many sections of these ‘lanes’.

The road closures and junction changes being proposed to accompany this development will only serve to increase traffic volumes through the village centres of East Horsley, Cobham and Ripley, and around the station at Effingham Junction, all of which already suffer from traffic congestion at peak hours. The further increase in traffic congestion at the A3-M25
intersection would only exacerbate an existing problem for the highways authority - we understand Highways England have repeatedly expressed serious concerns about this development.

Neither Horsley nor Effingham Junction railway stations currently have any significant spare parking capacity. The suggestion of the developer that large numbers of cyclists from Site A35 will cycle 6 or 7 miles each day along busy roads in order to travel there and back to these stations lacks credibility. Other village facilities in East Horsley, such as the medical centre, are also likely to suffer adversely from a substantial increase in users as a result of this proposed development.

Accordingly, we OBJECT to Policy A35 on grounds of its severe impact on local infrastructure.

d) There are damaging health & safety implications arising from development at this site:

The site is located close to the junction of the M25 and A3, one of the busiest road junctions in the country. The Nitrous Oxide (‘NOx’) emissions recorded around this area are extremely high and will affect residents living at the proposed site. The proposal to build new primary and secondary schools at this location is also contrary to government policy prohibiting the building of schools on sites in areas where there is high NOx.

In rejecting the previous planning application by the developers, the GBC Planning Officer cited the “failure to provide adequate information on NOx emissions and nitrogen deposition and to provide any information on acid deposition” as one of the grounds for this rejection.

Accordingly, we OBJECT to Policy A35 on grounds of its adverse health & safety implications.

e) The environmental impact on protected wildlife will be substantial

GBC’s Land Availability Assessment which supports Policy A35 states that the site lies within the 400m-5km ‘Zone of Influence’ of the Thames Basin Heaths Special Protection Area (‘SPA’). This is not correct. The site is immediately adjacent to Ockham & Wisley Commons, an area designated as a Site of Special Scientific Importance (‘SSSI’), which forms one part of the Thames Basin Heaths SPA and much of the site lies within the 400m Exclusion Zone where new building is effectively prohibited.

The SPA was set up to provide protection for rare and threatened birdlife in certain lowland heath locations, the provisions of which were agreed by GBC in its ‘Thames Basin Heaths SPA Avoidance Strategy’.

This strategy establishes zones to protect the SPA from the impact of new development, particularly from the damage caused by pets (dogs, cats, etc) of local residents to the habitats of threatened ground-nesting birds. Land within 400m of the SPA is designated as an ‘Exclusion Zone’ where “there will be a presumption against additional new dwellings”. Since the Wisley Airfield site is immediately adjacent to Ockham Common for a significant length, much of this site falls within 400m of the SPA Exclusion Zone.

The remaining portion of this site falls within the 400m - 5km ‘Zone of Influence’ set out under the SPA policy, which requires developers to contribute a new SANG (‘Site of Alternative Natural Greenspace’) to mitigate for potential damage caused to the SPA from new development – the size of the SANG is a function of the scale of the development. In their previous planning application the developers proposed that the land within the 400m Exclusion Zone would provide their SANG contribution. If accepted as a SANG, this would only encourage the 5000+ residents of the new settlement to allow their pets access into this space, therefore defeating the objective of the SANG mitigation.

Even with the 400m Exclusion Zone in effect, the positioning of such a large site immediately adjacent to such an important protected space will inevitably have a major detrimental impact on the wildlife within it.

Accordingly, we OBJECT to Policy A35 on grounds of its material adverse environmental impact.

The impact of the Exclusion Zone and SANG requirements, together with the need to provide for the existing waste facility, means that the actual area of land available for housing development at this site is estimated to be around 43 hectares.
f) The development is totally out of keeping with local character, context & distinctiveness:

It is a key element of planning policy that new developments should be in keeping with the established pattern of development in the area. In the 2016 Proposed Submission Local Plan, GBC’s very first housing policy, Policy H1, requires that development should: “make the most efficient use of land whilst responding to local character, context and distinctiveness.” However, Policy A35 fails to do this.

With its proposal to build some 2,100 homes on and around the site of the former Wisley Airfield, Policy A35 will create a new settlement larger than any other in Guildford Borough, outside of Guildford itself. The nearby historic village of Ockham has merely 159 dwellings. It will be completely swamped by a development on such a scale.

Moreover, the design and density of the proposed development will be completely out of context with its surrounding area. Due to the restrictions of the SPA Exclusion Zone, the need for SANG provision and the land needed for the waste facility, the actual land area to be used for housing development under Policy A35 is estimated to be around 43 hectares. Therefore, with 2,100 homes proposed for this site, the overall housing density of the settlement area may be calculated at around 49 dwellings per hectare (‘dph’).

East Horsley, just three miles from this site, is the largest settlement in Guildford borough outside of Guildford town, with some 1,760 homes. East Horsley presently has an overall housing density of 8.1 dph within its settlement area. Therefore, the proposed development under Policy A35 is six times as dense as the nearest settlement of a comparable size. The proposed development under Policy A35 therefore utterly fails to respond to local context and as such is in breach of GBC’s own Housing Policy H1.

The density of 49 dph proposed under Policy A35 is effectively an urban density appropriate for a metropolitan location. It is to be achieved in part by building apartment blocks of five stories in height, according to the designs previously presented by the developer. For a setting within the middle of rural Surrey this is completely out of character.

Other settlements close to this site are small rural villages such as Ockham, West Horsley and Ripley. These villages have grown up organically over a thousand years. They contain many historic, listed or otherwise protected buildings as well as a range of residential housing, predominantly detached two-storey houses or bungalows. They are all picturesque villages with charm and character. Visitors come to the area to enjoy some of the prettiest villages and countryside in southern England, all within easy access of London. The character of this whole area would be irreparably destroyed if this development goes ahead.

Accordingly, we OBJECT to Policy A35 on the grounds that it is out of keeping with local character, context and distinctiveness, and therefore breaches the NPPF and emerging GBC Policy H1.

Concluding remarks

EHPC has major concerns about Policy A35. We consider this proposed policy to be a severe contravention of Metropolitan Green Belt rules. It will result in a new settlement of very low sustainability, it will have a major adverse impact on the infrastructure and environment across a widespread area and it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country.

Accordingly, EHPC strongly OBJECTS to Policy A35.

In the light of the recent referendum outcome, which will result in the UK leaving the EU, it is inevitable that the population and economic projections for Guildford Borough will need to be reduced.

We presume that GBC will in due course be making such reductions to its proposed housing projections to reflect these changed circumstances. In our opinion, the proposed development at former Wisley Airfield ought to be the very first site in the Borough that GBC should remove from its draft Local Plan as a result of the UK now proceeding to leave the EU.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. SITES POLICIES

Of the many sites policies set out in the Proposed Submission Local Plan, we comment upon those in East Horsley as well as several in the surrounding area which may affect the village.

Five East Horsley sites are identified in GBC’s Land Availability Assessment (‘LAA’), two of which are allocated under policies in the Proposed Submission Local Plan. The adjacent parish of West Horsley has six sites identified in the LAA, four of which are allocated in the Proposed Submission Local Plan. Our comments on these site policies are as follows:

POLICY A36: Hotel, Guildford Road

Policy A36 proposes to re-develop the current Thatcher’s Hotel for housing.

EHPC is concerned about the loss of this long-standing village hotel and significant employer. However, assuming that the employment loss can be justified, (which is a condition of Policy A36), then EHPC is broadly supportive of housing development at this location, providing it is done in a manner that is in keeping with its prominent landmark position at the entrance to the village. The site is also close to the East Horsley Conservation Area and housing designs and site configuration must reflect the sensitivity of this setting.

Whilst we endorse many of the requirements set out in Policy A36, our principal concern is over the number of houses proposed for this site - approximately 48 dwellings. This number gives an implied gross housing density of 37 dwellings per hectare, which is exceptionally high for this location. The average housing density across the East Horsley Settlement Area is 8.1 dwellings per hectare and the highest density found in any of the roads around this location is 13 dwellings per hectare.

EHPC would only support development at this location if it has a significantly lower housing density.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY A39: Land behind Ockham Road North, near Horsley railway station

Policy A39 proposes a housing development of some 100 dwellings on a 5.7 acre green-field Green Belt site behind the houses on the western side of Ockham Road North. Access is to be secured by demolishing the first two houses next to the railway bridge.

As discussed earlier, EHPC considers that the proposed western movement of the settlement boundary needed to bring this site within the settlement area is unjustified and contrary to NPPF rules. If this boundary movement is invalid, as we believe, then this site remains a part of the Metropolitan Green Belt. As such and with no ‘very special circumstances’ to justify housing development upon it, EHPC OBJECTS to Policy A39.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E2: Location for new employment floorspace

Under this policy, areas within 500 meters of a "public transport interchange" play a key role.

Proposals for new office and research and development floorspace are to be directed to firstly Guildford town centre and then to areas within 500 meters of a public transport interchange ("PTI").

East Horsley has two railway stations, Horsley Station and Effingham Junction Station, but currently the draft Local Plan only proposes that Horsley Station should have PTI status.

The explanation given at 4.4.17 for Effingham Junction Station ("EJS") not enjoying this status is that either it is located within the Green Belt, or it is within an AONB or it is isolated away from the village or centre. It is not clear which of these applies to this particular station, but we believe strongly that none apply and that there is a strong case for EJS deserving PTI status in the same way as Horsley Station.

We will deal firstly with the three alternative reasons given for EJS not supposedly qualifying as a PTI.

Firstly there is the Green Belt aspect. This is not logical since if location within the Green Belt were determinative, this would mean that Horsley Station would also fail to gain PTI status.

Also the draft Local Plan proposes elsewhere at Policy P2 that the whole of East Horsley, including both Horsley Station and EJS, should be inset from the Green Belt. It will be seen elsewhere in these comments that EHPC objects strongly to this proposal, but the point remains that if location within the Green Belt were a valid reason for not being given PTI status, the Local Plan itself makes it clear that under Policy P2 this will not apply in the case of both Horsley Station and EJS.
Secondly EJS is not located in an AONB. EJS is within the envelope of the village settlement and will remain as such under the draft Local Plan.

Thirdly EJS is not "isolated" or "away from the village centre."

Effingham Junction (the area immediately south and west of EJS, served by respectively Forest Road south of the railway bridge and Old Lane) may not have the extensive shopping parades enjoyed by East Horsley's two other centres (Station Parade and Bishopsmead Parade) but it is a thriving community with a significant population and also a significant number of active and successful employment floorspaces and sites.

These include in Forest Road a general store (Forest Road General Store), a car sales and car repair business (PJB Car Sales/The Body Shop), a dental health centre and chiropractic clinic (Mortiboys) and on Horsley Road, Cedar Garden Centre, Royce Turf and Irrigation and at the Newmarsh Farm site, a number of businesses including Richmonds Horse Transport, Braye Hydraulic Repairs and TTS Surfacing Ltd.

It is therefore vital that the Local Plan's economy policies affecting the area protect these spaces and sites and create conditions for their sustainable growth and hence job creation.

Since all or most of these businesses are located within 500 meters of EJS, Policy E2 would be an invaluable driver for such growth which could play a major role in ensuring that Effingham Junction maintained and enhanced its position as East Horsley's "third centre" for homes and jobs. On the other hand, to exclude EJS from PTI status could very well stifle its sustainable development and condemn it to a future as a dormitory "backwater" of East Horsley.

It is also counter-intuitive in the extreme to refuse EJS "PTI" status. This is for the simple reason that EJS is clearly a "public transport interchange" as that term would be normally understood. This is for the following reasons:

- as the name "Effingham Junction" indicates, EJS is at an important junction and interchange. The railway line from Guildford splits here into two lines which take different routes into London, so many London-bound passengers will change trains here;
- EJS serves not only the Effingham Junction area, but also the many residents of Effingham and Little Bookham for whom EJS is far closer than Bookham Station;
- EJS also serves the many residents of the Cobham area for whom EJS is far closer than Cobham and Stoke d'Abernon station. EJS also serves the residents of Ockham and Ripley;
- EJS also serves the considerable numbers who visit local leisure activity sites, including three paintball sites and two clay pigeon shooting sites, for whom EJS is the only viable public transport hub; and
- EJS will be the nearest railway station to the land at the former Wisley Airfield site which is proposed for the building of 2000 homes under Policy A35 of the draft Local Plan and if, despite the objections of many including East Horsley Parish Council, this proceeds, then significant numbers of residents will be taking one form of travel to EJS and then interchanging onto the railway.

EHPC accordingly OBJECTS to Policy E2 insofar as it fails to confer "public transport interchange" status on Effingham Junction Station.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H2: Affordable Homes

We support the general principle that developers should be required to contribute part of their development profit towards the cost of social housing in the borough. However, this ‘one-size-fits-all’ policy is seriously flawed and likely to prove highly inefficient, if not unworkable, in the longer term.

In this policy GBC have taken no regard whatsoever of the differences in affordable housing need across the borough. This has significant consequences in East Horsley, which is the area with the lowest demand for affordable housing in the borough. Moreover, East Horsley is not classified as a ‘rural area’ under the 1997 Housing Order and therefore is not
exempt from the new ‘right to acquire or enfranchise’ entitlement – a factor which is likely to see affordable houses in the parish being bought up as soon as possible and thereafter lost to the affordable sector.

Under Policy H2, 40% of all but the smallest development sites in East Horsley will be required to have affordable housing built upon them, irrespective of whether there is actually demand for more social housing in that area. Moreover, the affordable housing targets proposed in the Proposed Submission Local Plan indicate that the biggest component of affordable housing (40%) should be built as 1-bed dwellings despite the fact that GBC’s own studies show that the strongest affordable demand in the borough is actually for larger 3-bed dwellings.

As a result of this flawed affordable housing policy, a significant volume of social housing is likely to be built in places where it is not needed and offered to tenants who do not want to live there nor have jobs near that location.

Policy H2 thereby fails the test of sustainability and should be radically revised. If not, the outcome will be serious inefficiency in the provision of social housing in the borough. In an area such as East Horsley this is likely to be manifested in a rapid buying-up of properties for quick re-sale at a generous profit, at which point these homes also become lost to the affordable sector.

**EHPC accordingly OBJECTS to Policy H2.**

1. INFRASTRUCTURE POLICIES

This section of the Proposed Submission Local Plan sets out details covering a range of infrastructure policies.

POLICIES I1, I2 & I3

These three policies cover Infrastructure & Delivery, Supporting the Department of Transport’s ‘Road Investment Strategy’ and Sustainable Transport. Whilst we support the general policy statements as presented in each case, it is the detailed infrastructure proposals for Guildford Borough which give us cause for concern.

EHPC believes there are serious deficiencies and shortcomings in the infrastructure of Guildford Borough as it is today and that the aggressive housing policy as proposed by GBC in the Proposed Submission Local Plan will exacerbate this problem.

We would make the following comments specifically about infrastructure in East Horsley today:

- Roads across the parish are in poor condition with many potholes. Many roads are unable to sustain their current levels of traffic, particularly the increasing levels of HGV traffic;
- The principal through roads traversing East Horsley are narrow and winding, have a series of pinch points, have sections without any pavements and are generally unlit. As a senior SCC councillor remarked at a recent public meeting in the village hall: “East Horsley has lanes, not roads.” East Horsley’s ‘lanes’ are totally unsuitable for high volumes of traffic, in particular for the volume of HGV’s now using them;
- Many of the drains are blocked or otherwise in poor condition giving rise to frequent surface water flooding when it rains;
- The pavements are in poor condition. As well as being narrow, they are often uneven and/or cracked making it difficult, for example, for people with pushchairs or prams or in wheelchairs;
- There are insufficient school spaces for the number of local children needing them, with the result that children are often allocated to schools a significant distance away such as Dorking or Woking; and
- The Medical Centre in East Horsley is already at capacity in terms of its number of patients.

It is recognised that, as stated in the Proposed Submission Local Plan, the maintenance of adequate infrastructure and its expansion to meet growing needs is the responsibility of the relevant infrastructure provider. This is often not GBC itself but rather, for example, Surrey County Council or utility companies.

In respect of East Horsley, there are only two specific proposals in Appendix C:

LRN 25 - East Horsley and West Horsley traffic management and environmental improvement scheme. It is not clear what is proposed here, and its timing and funding have to be considered uncertain. It is stated that funding will, at least in part, come from developer contribution. However, it is not at all clear what development is likely to give rise to such a contribution, but it certainly implies that funding could only come if there were a development; and

HSC 5 - Expansion of East Horsley Medical Centre to provide additional capacity and services for future population in years 5 – 15 of the plan.

There are no proposals in respect of all the existing problems with for example roads, pavements, drainage, and schools.

Furthermore, it is inevitable that the proposed developments in East Horsley itself and nearby, particularly in West Horsley and the proposals for Wisley, will put further strain on the existing infrastructure. There are no proposals at all to cater for this.

Although an expansion of the Medical centre is proposed in the Infrastructure Schedule, this is not until years 5 – 15 of the Plan. Given that it is already at capacity, EHPC believes that this needs to be done earlier.

Local primary schooling is also a very pertinent issue. There are 11 housing development sites identified in the LAA for East and West Horsley, which taken together would result in the building of 593 new houses in the two parishes that are today served by a single primary school - The Raleigh, in West Horsley. Planning guidance suggest that this number of new homes will require the provision of around 150 additional primary school places to accommodate such an increase in
population. Today there is no spare capacity at The Raleigh, yet no proposals are made in the Proposed Submission Local Plan to provide for any more schooling in the Horsley’s.

EHPC believes that the failure to address the inadequacies of the existing infrastructure to meet the needs of what is there already is a serious deficiency in the Proposed Submission Local Plan.

EHPC accordingly OBJECTS to the infrastructure proposals on these grounds. It further OBJECTS to the proposals for infrastructure in that they do not meet the stated objective of providing infrastructure to support the proposed developments.

1. PROTECTING POLICIES

This section in the Proposed Submission Local Plan sets out policies concerned with protecting the environment across Guildford Borough, including the Metropolitan Green Belt.

POLICY P1: Surrey Hills Area of Outstanding Natural Beauty (‘AONB’)
The Surrey Hills AONB is one of the great treasures of Guildford Borough and we believe that protecting this area should be given the highest priority.

We therefore support Policy P1.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P2: Green Belt

Local Plan Policy P2 states that: We will continue to protect the Metropolitan Green Belt. We fully and un-equivocally support this policy.

Unfortunately, despite such brave words, GBC appears to be in breach of this policy itself through the housing policies that it has set out in the Local Plan. The analysis included in the Appendix shows that around 65% of the developments proposed in the Proposed Submission Local Plan are to be built on land currently within the Metropolitan Green Belt. We consider this outcome to be outrageous.

Under NPPF rules, GBC is permitted to make allowance for factors which may constrain the delivery of new housing, such as the need to protect the Metropolitan Green Belt or the restrictions required to protect the Surrey Hills Area of Outstanding Natural Beauty (‘AONB’) which is offered protection under the NPPF comparable to that of a national park. Although these areas make up a large proportion of the land area of Guildford Borough, GBC makes no attempt to reduce its housing delivery in order to take account of such constraints. We find this approach inexplicable.

There are also a number of further issues relating to the detailed implementation of this policy which are set out further below:

1. a) Paragraph 4.3.13: Proposal to inset East Horsley from the Green Belt

Policy P2 proposes that East Horsley should be inset from the Green Belt, instead of being ‘washed over’ as it is today. Currently development is permitted within the settlement boundary, although this area is still considered to be Green Belt with a particular planning regime being applicable.

East Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving that character. Moreover, being ‘washed over’ by the Green Belt has not been a serious constraint on development within the village. For example, GBC’s planning records indicate that no less than 149 net new homes were added to the village housing stock through in-filling and brownfield developments between 2000 and 2015.

GBC attributes the need to inset East Horsley to NPPF requirements, arguing that the test for remaining ‘washed over’ is that the village should make an important contribution to the openness of the Green Belt. This East Horsley clearly does. No less than 36% of East Horsley is composed of woodlands, whilst inside the settlement area there is an average housing density of just 8.1 dwellings per hectare (‘dph’). Woodlands and large residential gardens make a vital contribution towards bio-diversity, provide wildlife corridors, and furnish those open spaces which are vital to the character of the greenbelt. It is
one thing for a planner to study a map and see a settlement area filled with housing, but it is quite another actually to come
to a rural village like East Horsley and see how the Green Belt has preserved the rural character and openness of this
village.

Today East Horsley is a picturesque and flourishing rural community, which has and continues to experience steady
incremental growth as a result of being ‘washed over’ by the Green Belt. As the saying goes: “If it ain’t broke, don’t fix it”. This applies to East Horsley in the matter of insetting.

EHPC therefore OBJECTS to the proposal to inset East Horsley from the Green Belt and requests that this proposal be dropped from the Local Plan.

1. **b) Paragraph 4.3.16 and Proposals Map: Settlement Boundary changes in East Horsley**

GBC are proposing to make a number of changes to the settlement boundaries of East Horsley and so expand the settlement area, as set out in the Proposals Map, with the justifications seemingly provided in the Green Belt & Countryside Study prepared by the consultants, Pegasus.

We object to two specific boundary changes, which have been proposed, as follows:

1. There is a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Ockham Road North up to the eastern boundary of Lollesworth Wood. This proposal removes over 5 hectares of agricultural fields from the Green Belt. The present boundary line is clearly defined by a deep and well-maintained drainage ditch which is classified by the Environment Agency as a ‘main river line’ and therefore represents a highly defensible Green Belt boundary.

Moving this boundary west to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. We do not believe this proposal can be considered as an exceptional circumstance. Clearly the only justification for this change is to bring a large agricultural field within the settlement area in order to provide more housing land. However, under NPPF rules this is not a sufficient justification for changing a Green Belt boundary. As such, we believe it is an invalid proposal.

**EHPC accordingly OBJECTS to this proposed boundary change.**

1. There is also a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Kingston Avenue up to a tree line running along the Parish Boundary at the western edge of Kingston Meadows. The result is to take all of Kingston Meadows out of the Green Belt.

Kingston Meadows is the main public recreational space of East Horsley, comprising various sports facilities and playing fields. The present settlement boundary is clearly defined by a deep and well-maintained drainage ditch running along its eastern side. It therefore represents a very defensible Green Belt boundary. Moving this boundary westwards to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. We do not believe that this can be considered as an exceptional circumstance. As such we believe this is an invalid proposal.

**EHPC accordingly OBJECTS to this proposed boundary change.**

In the Green Belt & Countryside Study and its accompanying Topic Paper, GBC justifies the need to make changes in settlement boundaries in order to meet unfulfilled housing need in the Borough. However, Green Belt rules make it clear that unfulfilled housing need is not normally considered to be ‘an exceptional circumstance’. If it were the entire Green Belt would already be covered in tarmac.

The NPPF is clear that every movement in settlement boundaries must be justified by ‘exceptional circumstances’. GBC have offered only a generic justification in their Topic Paper of meeting unfulfilled housing need, but a case by case justification has not been provided. As such, we believe the settlement boundary changes referred to above (and many others) are invalid without such detailed justification.

1. **c) Paragraph 4.3.17: Proposal to remove Wisley Airfield from the Green Belt**
EHPC OBJECTS to the proposal to remove Wisley Airfield from the Green Belt. The only justification for this proposed change is unfulfilled housing need which is not considered an exceptional circumstance. The proposed Wisley development is discussed further below in the Site Allocation section.

1. **d) POLICY P2: Limited In-filling**

A new planning designation has been introduced called ‘the identified boundary of the village’. For East Horsley this covers a number of roads south of the A246. It is a sizeable area, covering 45 hectares, the equivalent of 23% of the present Settlement Area of the village. Within this area, Policy P2 sets out proposals that would allow ‘limited in-filling’ within this boundary.

We find it hard to reconcile the opening statement of Policy P2 that “We will continue to protect the Metropolitan Green Belt” with this sizeable reduction in effective Green Belt status. In our opinion, this policy represents a de facto extension of the Settlement Boundary and a substantial reduction in the operational effectiveness of the Green Belt, whose effectiveness is significantly weakened where this new planning designation applies.

EHPC accordingly OBJECTS to the proposal to designate roads south of the A246 as being within the ‘identified boundary of the village’ and to allow limited infilling within this area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2: Borough Wide Strategy

This policy sets out the objective of adding 13,860 new homes to Guildford Borough over the 2013-2033 period of the Proposed Submission Local Plan, equating to an annual build of 693 new homes per annum.

EHPC has serious concerns about the enormous scale of this building programme, which represents a net increase of 25% in the housing stock of Guildford Borough, a remarkable rate of increase for a borough in the English Home Counties. It is even more remarkable when the official statisticians at the Office of National Statistics (“ONS”) are projecting a population increase of some 15% for Guildford Borough over this same period.

Some explanation for this mismatch may partly be found in the conclusion of the West Surrey Strategic Housing Market Assessment, (“SHMA”), which looks at how the annual housing target of 693 homes is comprised. It estimates that 517 homes per annum arise from ‘the demographic starting point’ – effectively what the official statisticians at the ONS and the Department of Communities and Local Government (“DCLG”) are predicting Guildford will require based upon their population and household forecasts. To this is added in the SHMA another 120 homes per annum in order to ‘support economic growth’, a further 31 homes per annum to ‘improve affordability’ and 25 homes due to ‘student growth’, all of which totals up to 693 homes per annum target.

EHPC finds this analysis perplexing. Economic growth is already factored into the statistics produced by ONS and DCLG, so what GBC are proposing actually comes on top of the official household growth forecasts for the borough. Moreover, the GBC Affordable Housing Policy H2 is proposing that all development sites (other than the very smallest) will be required to have 40% of their homes offered as affordable housing, so why another 31 homes per annum is needed as affordable housing on top of this 40% ratio is quite incomprehensible.

Furthermore, DCLG research has concluded that there is on average a 97% correlation between population growth and household formation. Therefore, if GBC’s target of a 25% increase in housing stock were actually realised, the outcome will be that Guildford Borough would see its population rise by around 25% over this period. This means that the resultant population growth for Guildford Borough would be at a level 67% higher than the official forecasts.

One of EHPC’s particular concerns in reviewing the Proposed Submission Local Plan is that the impression is conveyed upon the reader that GBC’s housing targets are effectively needed to fulfil NPPF requirements or because of central government policy – in other words that GBC has no real choice but to put forward these projections, unpalatable though they might be. However, the reality is very different. GBC has voluntarily chosen to pursue a policy of aggressive civic and economic expansion – one might perhaps term it a policy of ‘Forced Growth’ – which underpins all of the housing policies in the Local Plan. In short, the difference between the official statisticians’ forecasts and GBC’s target of a 25% increase in housing stock is entirely down to a political choice made by GBC.
Of course, there is nothing fundamentally wrong in GBC adopting a Forced Growth policy for the Borough – not so long as that policy is made clearly and explicitly and is fully supported by a majority of its electorate. However, EHPC doubts whether this is actually the case. It is certainly not a vision that is shared by EHPC, which unequivocally rejects GBC’s Forced Growth policy.

**EHPC accordingly OBJECTS to the borough housing targets set out in Policy S2.**

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** SQLP16/99  **Respondent:** 8929057 / East Horsley Parish Council (Nick Clemens)  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Concluding remarks**

EHPC does not share the same vision for the future of Guildford Borough as GBC, although we do recognise that an enormous volume of work has gone into the preparation of the Proposed Submission Local Plan, which is now out for public consultation.

However, after more than 20,000 responses were submitted in 2014 in connection with the previous draft Local Plan, most of them opposed to its proposals, GBC has made relatively few changes from the earlier version and none of any materiality.

At the heart of the problem is GBC’s desire to pursue a ‘Forced Growth’ policy which results in highly aggressive and unjustified targets being set for housing development in the Borough. These excessive targets – the proposed 25% increase in housing stock in particular – create a tremendous strain on both land and infrastructure in an already over-crowded and over-stretched part of the country.

These targets will also have a material adverse impact on the Metropolitan Green Belt across this area, despite all the political promises made to the contrary. The irony of Policy P2 which states that “We will continue to protect the Metropolitan Green Belt” does not fool anybody.

**Accordingly EHPC OBJECTS to the Proposed Submission Local Plan.**

We sincerely request that GBC that radically re-assess its own policy objectives rather than force through the Council a Local Plan which clearly does not have the wider support of the residents of Guildford Borough.

We reserve the right to make further submissions during the course of this consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

As a local government organisation the PC would like the opportunity to represent their residents at any examination.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

There are some small changes made in the revised Local Plan to Site Policy A35, Land at Wisley airfield in Ockham. However, these changes do not provide any justification for continuing to include this site within the revised Local Plan.

Having made a downward revision to its housing targets in the revised 2017 Local Plan draft, GBC is proposing to remove a number of development sites that were included in the 2016 version of the plan. The largest site removed is addressed by Site Policy No. 46 located in Normandy ('Land to the south of Normandy and north of Flexford') where a mixed used development of 1,100 homes had previously been proposed.

Whilst EHPC have no objection to the removal of this policy site per se, we would question GBC's decision-making process of site selection which chooses to remove this site from the local plan rather than the Wisley airfield site. Of all the larger sites included in the 2017 draft Local Plan, Wisley airfield has by far the worst sustainability. In the updated 2017 Sustainability Assessment provided by GBC's consultant AqCOM, Wisley airfield is by some margin the site with the poorest sustainability appraisal - it has no less than 8 red flags in the AECOM criteria list. By comparison Site No. 46 in Normandy is much more sustainable yet it is the one selected to be removed from the plan.

In rejecting a 2015 planning application for development at the Wisley site (proposed in advance of the Local Plan) G6C identified no less than 14 reasons to justify their rejection of the planning application, only one of which was the issue of it being in the Green Belt. The reminder highlighted a long list of deficiencies associated with this proposed development including its major impact on traffic flows, its severe environmental impacts, its total lack of existing transport and other infrastructure, as well as many other factors. According to GBC's consultation website, a total of 1,429 comments were registered in the 2016 Local Plan consultation about the Wisley airfield site - 97% of them were against its development. And yet GBC chooses to maintain Wisley airfield as a policy site in the 2017 revised Local Plan.

With a planning appeal due to be heard in September 2017, we trust that if the planning inspector decides to reject the appeal of Wisley Property Investments, then GBC will finally listen to the views of so many of its residents, accept the AECOM sustainability conclusions on the deficiencies of this site and remove Wisley airfield entirely from the Local Plan.
In previous consultations EHPC has already provided detailed reasons for our objections to the Wisley site and there is no reason to repeat them all again here. For these and the many more reasons already provided:

**EHPC strongly OBJECTS to Site Policy A35, the creation of a new settlement at the former Wisley airfield**

Policy D1 provides the general policy framework for infrastructure development in the borough proposed in the local plan, including the accompanying Infrastructure Schedule set out in Appendix C.

As we have detailed in our previous letter of 13th June 2016, EHPC considers the level of investment proposed in the plan to be totally inadequate in meeting the serious deficiencies in infrastructure across the borough. Moreover, where significant investment is specified in the Infrastructure Schedule in many cases it is unclear whether public sector funding is going to become available to support the level of investment needed: for most major infrastructure projects funding from developers will typically not be sufficient but until such infrastructure is in place many of the larger developments proposed in the Local Plan will not be sustainable.

Other than a few specific changes consequential on the removal of certain projects in the light of the reduced housing target, there are only minor changes made to the infrastructure proposals in the 2017 version of the GBC Local Plan. These changes totally fail to address the inadequacies of the existing infrastructure, nor meet the stated objective of providing infrastructure to support the proposed developments. Accordingly:

**EHPC strongly OBJECTS to the inadequate provision of infrastructure investment across the borough provided for in the local plan.**

Concluding remarks:

As we have set out in this letter, EHPC has major concerns about the revised 2017 Local Plan in general, in particular the excessively high housing targets that are being set, the failure to recognise the constraints to this development and the large-scale destruction of Green Belt land particularly in its most vulnerable areas in the north east of the borough. Accordingly:

**EHPC strongly OBJECTS to the revised 2017 Local Plan**

2971 of 3367
The revised Green Belt Policy P2 continues to make the hollow promise that "The Metropolitan Green Belt will continue to be protected". However, despite minor changes it has failed to revise Paragraph 4.3.13 "which proposes to inset the village of East Horsley from the Green Belt.

There is no justification for this approach. East Horsley is a rural village of very low housing density. Within the current settlement area the average density of housing is just 8 dwellings per hectare. Most houses lying within the current settlement area have large gardens that are filled with trees, shrubs and open lawns. As a result East Horsley makes an important contribution to the Green Belt of the area providing openness, picturesque green spaces and wild life corridors which support a rich biodiversity - for example, there are currently an estimated 43 different protected species of wild life to be found in East Horsley.

If East Horsley is inset from the Green Belt, as proposed in the revised Local Plan under Policy P2, then important Green Belt planning protection will be lost over land currently within the settlement area. This will inevitably lead to increased development within this area and the loss of openness, destruction of trees and hedgerows, diminished biodiversity and the impairment of picturesque views of this rural village.

It is also important to recognise that the locality of East and West Horsley represents one of the first lines of defence against Metropolitan urban encroachment outside of the M25 circle. To inset East and West Horsley from the Green Belt would therefore represent a further weakening of this important Green Belt barrier. Accordingly:

**EHPC strongly OBJECTS to the insetting of East Horsley proposed as part of Policy P2.**

We also note one new change made to the proposed settlement boundaries of East Horsley under the revised 2017 local plan, as detailed in the accompanying Appendix II maps for East Horsley (South). The Amendment 4 on this map addresses land in the southern part of the village designated as being within the identified boundary of the village and which is currently Green Belt land outside of the settlement area. However, under Amendment 4 the settlement boundary is to be extended further south to encompass all of this area.

This is land which is close to and in some parts directly adjacent to the Surrey Hills AONB. It is a very low density part of the village located in a highly distinctive rural setting including in Chalk Lane a sunken single track road lined with chalk slopes and which dates back many hundreds of years. To bring such land within the settlement area of the village is not in any way justifiable and is very likely to lead to development that is inappropriate to the Green Belt. This area of the village has benefitted from Green Belt protection for many years but this proposed change would have a significant adverse impact and lead to the destruction of its character. Accordingly:

**EHPC strongly OBJECTS to the movement of the settlement boundary proposed under Amendment 4 in Appendix H map of East Horsley (South), proposed as part of Policy P2.**

The result of the proposed expansion of the settlement boundary further to the south of the A246, together with the other movements proposed at other locations, is to increase the total settlement area by some 37%, which is an extraordinarily large in crease to be proposed by any local plan and will inevitably have an adverse impact on the character and form of the village of East Horsley.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I OBJECT TO:

1) With reference to site A46 in your proposal to build 1,100 homes on land that has not been removed from the Metropolitan Greenbelt and exceptional circumstances have not been demonstrated or approved.

2) There are approximately 3,000 residents in Normandy and the majority of them wish for Normandy to remain a village with the sense of community that that brings. We have no need for a secondary school, as both Ash Manor and Kings College, which serve this parish are undersubscribed and have room for expansion as and when necessary.

3) The roads and other transport infrastructure required to support your proposal would create a completely unacceptable impact on the present highways and together with other neighbouring plans for enormous developments, would cause chaos to commuters and others in and out of Guildford.

4) Flooding at site A46 has always been an issue in the area, which alone makes it completely unsustainable. Even given the best drainage and sewage systems in place, all that water has to go somewhere, so it is common sense to assume that more residents will experience sewage back-ups and other health issues, and some people elsewhere will have flooded homes.

5) On the grounds of destruction of the wildlife that live alongside us in this area, any large development would destroy the variety of wildlife presently living in this area.

6) There is a proposed development for 350 homes to be built at Fairlands-Rokers land, with land given for provision of a secondary school there. So why build a school at Normandy? There is simply no need.

The evidence for my objections comes from information I received from:

- Letter-box drop-ins
- N.A.G
- Normandy Parish Council
- “Write to Fight”
- Various meetings I attended at Emmanuel Church Annex
- Surrey Wildlife Trust
- Other residents

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
14) I OBJECT to the lack of any immediate provision for new schools.

15) I OBJECT to the lack of any immediate provision for doctor's surgeries.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Further to my letters to Guildford Borough Council of 20 September 2014 and 27 November 2013 (the 1st and 2nd round of “consultations” in the Guildford local plan process), I write to object to the new Draft Local Plan, to remove an immense, and wholly disproportionate area, from the Green Belt in Site A46.

This is an excessive plan, based on doubtful evidence and one which contradicts the assurances we, as residents, were given a year ago.

The new plan, it is clear to all, is entirely developer/profit led - and does not take account of any of the objections raised over the last 3 years’ public consultations, undertaken at vast cost to the tax-payer.

The plan has no basis in the findings of the previous two draft plans. Boundaries appear to have been re-drawn simply because a site is available, not because it meets the National Planning Policy Framework Thus one can assume that:

1/ GBC executive have not taken any account of the objections and valid arguments put forward by vast numbers of Normandy/Flexford residents (and many others beyond our villages who stand to be affected by the colossal strain on infrastructure).

2/ Taylor Wimpey, who, in March 2015 secured an “option” on the land from the owners, the Baldry Trust – are offering such a financially attractive package to a desperate council - that councillors are blinded to other more valid land options in the borough.

This is an whitewash, designed by a developer who seeks to profiteer from the council’s desperation to fulfil it’s housing targets in the fastest way possible, to central government, by way of offering a school to circumvent Green Belt planning law.

To remove land from Green belt "extreme or special circumstances" have to be present. It is claimed that the secondary school (and I notice from the latest Master Plan – also now a primary school) are being “sold” to the community as the exceptional circumstances. Possibly also the 60-bed nursing home.

In Summary: I ask the council to prove the need for a secondary school given the following arguments:

- The area already has 2 primary schools (Wyke, Puttenham – indeed also Worplesdon very nearby)
- Existing local secondary schools are undersubscribed
- Existing secondary schools need Ofsted ratings improved in order to reach capacity
- Existing secondary schools have capacity, and desire, to expand their buildings, facilities and infrastructure
- There is a declining birth rate nationally, particularly in Surrey
- There is a huge increase in Home education
- The Road infrastructure (C16, D60, but also A323, A31) would not be able to sustain the increase in volume of traffic, nor parking. (and this is just in relation to two schools – let alone housing and retail outlets also.
- Public transport links are simply not suitable (for children to travel alone).

There is no necessity for a primary school in Normandy – we already have Wyke primary. Also Puttenham school within 2 miles of Normandy.

The need for a secondary school is also a complete fabrication of the actual situation to fit the convenience of a site put forward by the developer, for reasons as follows:

Both Ash Manor and Kings College (local secondary schools) are UNDER subscribed – as borne out by recent communications with Mr Keith Witham, Normandy’s parish councillor by the Heads of these schools. Both are keen to have their Ofsted ratings improved by help from the council, and both also have capacity to build and expand their facilities and ability to take more students.

The need for either school is simply not in existence – and if the council are looking to the future – the UK birth rate is declining – particularly in the South East – this is universally known and reported.

In addition has the council taken into account the huge increase in Home Schooling?
Current figures published recently show that **Home education has risen 50% in Surrey in the past 5 years. 872 children are officially known to be being educated at home**, that is 1% of the whole. However there is no obligation for parents to tell the council their child is being home educated, and there is no official national register – it is optional.

Currently, councils are making little effort to record accurately the numbers of children being home educated. So this leads to the obvious conclusion that Home Ed figures that ARE known are conservative – there will be more … For some interesting reading see: [www.theguardian.com/education/2016/apr/12/home-schooling-parents-education-children-england](http://www.theguardian.com/education/2016/apr/12/home-schooling-parents-education-children-england)

Even with a further 1025 houses, with the above points taken into account, it is still doubtful that there would be a need for a secondary school. **Thus children would be travelling from further afield to the village by car** (highly unlikely that they would use the train – what responsible parent puts a primary (and in most cases a secondary) school-age child on a train on their own?) … it is utterly inconceivable that Westwood and Glaziers Lane could sustain that kind of traffic increase, and parking.

Even if 20% (and that is generous) use public transport - on both the East and West access roads of Westwood and Glaziers Lane (classified as C16 and D60 respectively) there are narrow railway bridges which, even with construction to shore up/ widen them – will not cope with the increase in traffic.

**There have already been fatalities in the past 6 years on Glaziers Lane due to speeding and increased traffic** – two directly outside my house. If you wish to have evidence of this, I have photographs of the Air Ambulance Helicopter that needed to land in the field (Site A46) in order to obtain access to Glaziers Lane. If a housing development had been there, there would have been nowhere for the emergency services to access these accidents.

Neither will the A323 junction at Glaziers Lane and Westwood Lane be able to cope with twice daily drop offs and pick-ups at schools, and the thousands of extra residents cars. Our local roads and ‘A’ routes (A323 and A31) are already stationery “car parks” at peak times with massively increased exhaust pollution.

Without the planned 1025 houses, there is certainly no need for a secondary school to be located here – probably however, even **WITH** the housing there is no argument that supports a new Secondary, or primary school, in the area – until such time as other local schools are consistently, year on year, reaching capacity.

**Alternative local sites?**

In my letter in November 2013, I offered, (as active public comment was being encouraged by GBC) constructive suggestion by identifying an alternative parcel of land in Normandy for consideration for development, being a **large field along the A323 Aldershot/Guildford Road, opposite the former Duke of Normandy pub** (nearest postcode GU3 2AU) Land bordered to the west by ”Anchor's Copse” ; to East and South by Aldershot/Guildford Roads and to the North by Grassy Piece Copse.

GBC have never responded to this suggestion nor my Land Registry search (undertaken at my own expense via my solicitor). I was under the impression that since the council were asking for public input, they had a duty to respond within 28 days?

I will not re-send all pages of the Land Registry Title on email again, and indeed if Taylor Wimpy’s move to take an option on the A46 land in 2015 is anything to go by, my 2013 registry search may well be out of date now/have a developer’s option on it too now anyway.

Suffice to point you to the PDF attached “**Alternative Normandy site plan.pdf**”, showing in red the edged area of land abutting the Guildford Road/Grassy piece copse which forms part of the land area held under **Land Registry Title number: SY42052**.

This site is on a main bus route, an A-road and in an area not already significantly built up with housing. Distances to services (Doctors, secondary/primary schools) are good/better than Glaziers lane. A secondary school sited here would be in the catchment for both Worplesdon primary school and Wyke primary – thus justifying the 7 form entry size proposed.

Furthermore, there is a notoriously dangerous bend at this point on the Aldershot road which could be significantly improved by a change of infra-structure/highways work to alter the course of the road.
Equally – there are no **flooding issues** (the current site A46 cuts across Flood Zones 2 and 3 – (in the past 2 years all of my neighbours have had No Return Valves fitted from their properties to the sewerage system due to the fowl water coming back up in their gardens when it rains).

I can only assume that the owners of the land of SY42052 command a comparatively high purchase price to site A46 – if indeed they have even been approached by the council or Pegasus consulting, prior to the last public consultations. Though it must be said that perhaps a higher initial land purchase cost would pale into comparison when the extra costs are considered of rectifying the flooding in Glaziers Lane, the fields around Pussey's copse itself, and improving road infrastructure near Site A46 (the land in SY42052 is on the A323 already – a far more major route).

**To Close:**

I am deeply saddened that such a huge development as A46 is deemed appropriate in a Green Belt area; that there is not more creative and inspired thinking to spread housing developments across the borough more evenly in smaller pockets. Surely to identify smaller plots, in each parish, and brownfield sites, would be more sustainable and not overload existing facilities, rather than a "super" site?

That, of course, is expensive. But in the long term – wouldn’t it be worth pioneering a model, a precedent - for considered, TRULY sustainably designed development, even in the face of government pressure. We need houses – but with an eye to a future regardless of immediate financial gain – for the future of us all.

I finish with a my own images of the outstanding beauty of the **“Site 46”**, enjoyed by myself, my children - many before me, thousands of walkers and not least the wildlife – deer, foxes, partridge, bats, herons, etc.

This is **irreplaceable Green Belt Land**.

This development would be a mistaken act which, once done, cannot be undone.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **APPENDIX C**

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

2. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe
constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

3. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trum short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. APPENDIX D

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY A25 - Gosden Hill Farm

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  
  Surrey Fire and Rescue deployed.

2016
Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.
If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

**Comment ID:** PSLPS16/2145  **Respondent:** 8930209 / Ray Corstin  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. **POLICY A43 AND A43a – Garlick’s Arch**

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)
The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement—often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.
This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY D3

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
**Comment ID:** PSLPP16/4465  **Respondent:** 8930209 / Ray Corstin  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY D4**

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY E1**

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and
I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPP16/4456  Respondent: 8930209 / Ray Corstin  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E5

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4467  Respondent: 8930209 / Ray Corstin  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is
likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4463  Respondent: 8930209 / Ray Corstin  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E7

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes
could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4461  Respondent: 8930209 / Ray Corstin  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H1

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.
It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPP16/4462  **Respondent:** 8930209 / Ray Corstin  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY H2**

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists pass through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable...
(and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy II requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY I2

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).
Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

---

1. **POLICY I3**

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )
1. **POLICY P2**

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages.

In particular I OBJECT to the settlement boundary put round East Clandon with no reference to the residents or the Parish Council.

Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I
cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

1. SITES - POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

1. **POLICY P4**

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

3000
I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

1. POLICY S1

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1. **POLICY S2**

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guilford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

---
The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.
The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Questions posed by Guildford Borough Council as part of its consultation.

Questions from GBC

24.A. Question 1: The evidence base and submission documents

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

ANSWER

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

24.B. Question 2: Legal Compliance

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant? Please provide the following information being as precise as possible:

• why you consider it is or is not legally compliant and
• what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
24.C. Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

• why you consider it is or is not sound and
• what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. "Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt." Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation

2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound.

4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018.

5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.

6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
24.D. Question 4: Duty to cooperate

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate? Please provide the following information being as precise as possible:

- why you consider it has or has not complied with the Duty to cooperate and
- what change(s) (if any) you consider necessary to make it comply with the duty to cooperate, explaining why this is the case.

**ANSWER**

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

In policies SRN9 and SRN10 I note the change in responsibility for delivering new A3 slip roads at Burntcommon from Surrey County Council to either Highways England or developer. I have concerns that if delivered by Highways England alone there would be no local level control over if/when/how the scheme was delivered. This is an existing concern for other schemes including SRN2 and SRN3 (Stoke interchange and M25 J10/A3 interchange), where Highways England have sole responsibility.

I also have concerns over the changes in funding in policies SRN2 and SRN3. While I strongly welcome developer ‘funded’ (which implies more financial commitment than ‘contribution’) for road network improvements which are required as a direct result of new housing, I am concerned this may lead to a reduction of the affordable housing percentage delivered (which should be 40% in most cases). This concern is in part due to a change in Section 4.2.40, where there is in our view some softening of the language around the issue of developers needing to demonstrate lack of economic viability of affordable homes in order to reduce their standard quota (40%). This concern applies to other developer funded projects including Wisley cycle networks.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object to a number of issues in the ‘Proposed Submission Local Plan (2017)’ which have changed since the previous ‘Draft Local Plan 2016’. In addition I would like to state that the original objections to the 2016 plan remain. I still believe that this deeply flawed Local Plan will have a direct and detrimental effect on the amenity currently enjoyed by residents of East Clandon and to the even greater detriment to our neighbouring villages of West Clandon, Ripley, Send, West and East Horsley. The plan erodes the openness of the Green Belt and endangers the beauty and views in and out of the Surrey Hills AONB.

I urge you once again to reconsider the overly aggressive growth plans and housing numbers in this plan, and their detrimental impact on Guildford’s Green Belt, beautiful AONB and AGLV areas.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A25 Gosden Hill Farm, in that even though housing numbers at this site on the surface seem to have been revised slightly downward to 1700 from 2000, in actual fact the wording in Policy A25 now states 'Approximately 2,000 homes of which a minimum of 1,700 homes will be delivered within the plan period'. This seems to be attempting to indicate a change which in reality may not exist, and is misleading.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to site A35, Former Wisley Airfield, as the overall area of the site has increased to 95.9 ha, which implies loss of more open countryside to development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2456  Respondent: 8930209 / Ray Corstin  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A58
I object to site A58 Burntcommon, which has now become a ‘Strategic Employment Site’. The overall burden on Send (and West Clandon) of the minimum of 7000sq m of industrial space (i.e. could be much larger) is greater than the now deleted up-to 7000 sq m from the neighbouring site A43 Garlick’s Arch. This is a net gain in traffic and congestion in this area. The proposed insetting of Send Business Park from the Green Belt indicates GBC’s increased emphasis and ambition for growth of this village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/872  Respondent: 8930209 / Ray Corstin  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to POLICY P2 (6), specifically the new phrasing ‘Limited infilling may also be appropriate outside the inset or identified settlement boundaries, where it can be demonstrated that the site is as a matter of fact on the ground within the village’ referring to Ockham and Wisley, and by extension to other villages with settlement boundaries. I feel this change in language creates less clarity around the purpose of settlement boundaries as regards development policy. This objection is made in the context of the fact that there is no change to POLICY P2 (5), the intention for East Clandon to have a settlement boundary for the first time, which I and fellow residents have previously and still object to.

I object that GBC are contravening the NPPF framework stipulation in paragraph 87 which states “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.” (Policy P2, P3, E5). The Guildford Green Belt Group have stated that 70% of new housing will be in countryside and 58% of this is on Green Belt (Gosden Hill, Wisley, Blackwell Farm). This is exceptional in size and thus does not meet the criteria to demonstrate exceptional circumstances. I support instead developing and densification of brown belt and urban areas. According to Policy H13, developments should have a maximum (and minimum) densification policy to prevent developers from using land inefficiently which leads to countryside erosion and ineffective use of brownfield sites.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy S2 for the proposed provision of the very high overall housing numbers of 12,426 new homes, which is only a small reduction on the previous figure of 13,860. These numbers are still based on an overly high-growth economic development plan which in itself has had no direct consultation with any residents. They remain too high as shown by an objective assessment made by the report made for the Guildford Residents Association (GRA) by Neil MacDonald (independent adviser and commentator on housing demographics).

Also in Policy S2 housing numbers, I object to the fact that downward economic pressures (including Brexit) have been adequately accounted for. Additionally in Policy E1, E2 there is too much emphasis is on providing retail and commercial in Guildford town centre, when the pattern of business is changing and more town centre housing is needed rather than retail. This would ease the pressure on housing on the Green Belt.

Furthermore, I object to Policy S2 because I believe the 12,426 homes includes estimated demand from London, and also now possibly from Woking’s perceived unmet need, and I feel Guildford will become a dormitory town for London and the surrounding areas, rather than meeting the needs of residents of Guildford Borough.

I object to the fact that in Policy S2, despite the afore mentioned slight apparent reduction in overall housing numbers and industrial space, the reduction is mostly in Normandy/Flexford and the load on the East of the borough is still disproportionate and has even increased.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I write to **strongly object** to a number of policies and sites described in this draft local plan. I list my specific objections below.

Firstly, I must say I found your statements that this latest draft has taken account of the many comments received on the last effort totally disingenuous. From my reading of this draft hardly any comments relating to West Horsley were listened to let alone taken on board. Also, I am aware of the two independent reports on the methodology and modelling of the housing needs assessment and note that both demonstrate that your assessment is well over-stated. The need is for a much lower figure than the SHMA currently states. This means that the basis upon which the Council has developed the draft local plan is fundamentally flawed and therefore unsafe.

Secondly, West Horsley is very rural, picturesque and within the green belt. It has seen some development over the years but this has been done sensitively, in individual or very small amounts thus retaining the character and rural nature of a village. I therefore find your intention to remove West Horsley from the green belt totally unacceptable and **OBJECT** strongly. The plan to put 35% of the Borough’s housing need in this village which is small (currently 1120 dwellings with a population of 2828) that is served by narrow lanes, frequently floods and has such limited infrastructure that the school and medical centre are already heavily oversubscribed and parking at the train station an impossibility on week days, ridiculous and ill-judged. Reference is also made to housing being affordable. As the definition for “affordable housing” is 80% of average market value in the area, this would translate to circa £750,000 in this village which I strongly suggest is not affordable in the terms envisaged in your plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I object to Policy H2: Affordable Homes which is flawed and misled. The real cost of “affordable homes” in the Horsley area is likely to be much greater than the probable reach of affordability for key workers. I also note that your intention for business development is on the opposite side of the Borough to West Horsley which, with the transport links, makes no sense.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to Policy I1: Infrastructure and Delivery as very little consideration appears to have been given to this essential element and no detail of how such significant housing developments will be supported and sustained should they proceed. No account appears to have been taken of the degree of flooding that occurs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy P2: Green belt. I object to the removal of the green belt which was created for a purpose the value of which is very well known and documented. GBC’s own statement of “protecting the green belt from inappropriate development” is contradicted by its subsequent statement of “building 65% of proposed new development on green belt land”. I object to the insetting of 14 villages and the proposed infilling within another 11 villages thereby ruining the rural nature and destroying the very purpose of the green belt.

Finally, I have grave concerns over the appropriateness, viability and sustainability of the local plan. In respect of West Horsley where I live the case for developing sites A37, 38, 39, 40 and 41 has not been made. I also believe the case for Wisley Airfield is similarly not made as unfulfilled housing need is not an exceptional circumstance for building on the green belt. Your statements of “we will continue to protect the Metropolitan Green Belt” are very hollow when reading this draft Local Plan. I regret to say I have no confidence that the very serious issues, concerns and objections raised by local people will be taken into account and acted upon although I live in hope.

1. The draft plan relies heavily of the figures set out in the SHMA. The validity of these figures is strongly challenged and disputed. I therefore object to the numbers of dwellings that the SHMA sets out and consider any decisions taken by the Borough Council relying upon such figures to be fundamentally flawed. The latest figure of circa 295 in West Horsley alone is too many and I object to such a high number.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Clandons have many historical and interesting buildings, many listed and scale of development is just not appropriate within this area.

Likewise the countryside will be spoilt with all this proposed extra development.

I object to East Clandon being deemed a settlement area and the settlement area being extended in West Clandon.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We need a LOW COST housing scheme in all small villages to encourage young people to settle or be able to stay in the community where they grew up. I would see no problem whatsoever with each village in the Borough having to provide LOW COST housing - say 20 houses per village. This would be sustainable and would certainly meet the housing needs with in the Borough over the next 20 odd years or so.

I object most strongly to the traffic congestion any additional development will cause to our local villages due to inadequate road infrastructure. As it is now, whenever there is a traffic accident on the A3 or M25, vehicles try to cut through all the local roads (at speed quite often) which results in major congestion and danger through all the small villages in the area. The A3 is at a standstill daily heading north to London and south at Stag Hill and that is without any additional development within the area.

I object to not protecting the Green Belt. The Green Belt is there for future generations to enjoy. We as a nation are trying to promote the great healthy outdoors, encouraging young and old alike to cycle, walk and make use of the open green spaces. We shouldn't be building on these spaces.

I object to the developments proposed at Garlick's Arch, Wisley Airfield, Gosden Hill and Clandon Golf Course I object to the lack of proper infrastructure planning for those sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to all development in areas at risk from flooding.

Any development carried out in or around the Clandons, which are renowned for their water meadows will add to the flooding, which so often occurs in the Wey and Mid Thames Valleys and any additional large developments will just add to the misery for those who live in those areas. The Government has cancelled the flood relief programme for the Mid Thames area a few years ago.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the Local Plan. There is no evidence to suggest we need in excess of 13,000 houses in the area. This level of development is not sustainable and the National Planning Policy promotes sustainable development.

The Local Plan is flawed and has been prepared in a biased way, with a huge amount of the development being recommended around the Clandons.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
It is extremely doubtful that the proposal of 13,000 plus houses to be developed are reasonable and sustainable, particularly in view of Brexit I therefore object to the Borough Wide Strategy. National Planning Policy promotes sustainable development, which this-total plan lacks.

What is driving the need for housing in and around the villages of Guildford? I suspect it is the greed of our Borough Council to build more business premises and attract more people to live in the area, which is ludicrous as the road infrastructure is overloaded as it is.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon
development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in
conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send
through to Guildford.

6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads.
The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is
stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of
cars through the narrow, winding road through West Clandon.

7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way
junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial
vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).

8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build
two schools.

9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway
England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4489  Respondent: 8930465 / Michael & Carol Cook  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and
ignores constraints.
4. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes
per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land
requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt
Common where the factor is 7 times the land required.
5. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at
every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of
the green Belt be intent on conserving it rather than exploiting it.
6. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by
National Planning Policy.
7. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy
walking distance and bus services across rural villages are forever reducing. Residents will have few options, but
to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore,
there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be
dependent on the car for transport. Greater consideration should be given to increasing the density of
development in urban areas, such as Guildford, where more practical sustainable transport options can be
provided.
8. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion.
Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the
environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35),
24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4490  Respondent: 8930465 / Michael & Carol Cook  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Having written in September 2014 to object to the original Draft Local Plan, I am deeply concerned about the 2016 Plan which seems virtually unchanged and containing the same flaws. Namely:

- The wholesale removal of rural villages, in particular Ripley, Wisley, Clandon, Send and E & W Horsley, from the Green Belt;
- The monster house building proposals at Wisely, already rejected by the GBC as unsuitable, Burnt Common, Gosden Hill and Blackwell Farm;
- As well as the proposed 385 new homes in my village, West Horsley, which is completely disproportionate to the 1,100 existing homes in the village -an expansion of the size of the village by nearly 40%;
- The evidence for this scale of new housing number, namely 14,000, is just not there; nor is the infrastructure in terms of shops, schools, doctors' surgeries, railways and car parks.

The proposals in this Plan are completely disproportionate and unjustified, and are a disservice to the need for a properly controlled expansion of our housing stock in the UK. I hereby register my objection to the 2016 Draft Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Respondent: 8930529 / Marianne Hooley  
Agent:
I note that the overall housing growth forecast on which the plan is based is now reduced, but it is still stating a growth assumption of nearly 25%. This is far more than that of the Office of National Statistics for Guildford.

The removal of rural villages such as Ripley, Wisley, The Clandons and The Horsleys from the Green Belt still remains.

Whilst the number of new homes proposed for The Horsleys is reduced, it seems to me that 500 new homes for West Horsley is still a large number. Increasing housing by a third more for this village would drastically affect the character of the village and its infrastructure.

The Wisley Airfield proposed development for 2,000 homes is still on the plan. This again would affect the local infrastructure around the area massively.

I therefore register my objection to the Proposed Submission of the Local Plan on the above grounds. I hope that my objections to the plan are properly addressed. The Plan as it stands does a disservice to our local communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

The housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) is far too high. This assessment and calculation process is widely questioned, has been far from transparent and is more than double the figure used in previous plans.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site would create an urban corridor stretching from London to Guildford.

The proposed plan does not meet the needs and desires of local communities, as shown through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the former Wisley Airfield, protected.

Serious concerns about development on this site have also been raised by major statutory consultees including Highways England, Thames Water, NATS and the Environment Agency.

I object to the continued inclusion in the plan of a site - the former Wisley Airfield - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

(After 14 months of consideration, and various extensions and amendments, Wisley Property Investments Ltd’s planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the threat to the historic rural village of Ockham and the blight on properties there. The plan calls for this village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Scant consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

Air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic would exacerbate this, impacting the health of current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of habitat degradation.

Comment ID: PSLPP16/15912  Respondent: 8930625 / Malcolm Scott  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2
I object to the disproportionate allocation of housing in this particular part of the borough. Over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. there is no clear justification for the removal of one strategic site over site A35;
2. the inclusion of A35 would not contribute to the 5-year housing projection due to constraints particularly in the provision of sewerage capacity;
3. the inclusion of a 10% buffer in the housing number over the plan period is unnecessary;
4. the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 is unclear and has been challenged by other experts including NMSS;
5. the transport evidence base including the SHAR 2016 Highways assessment report has been criticised by Mouchel for using out of date modelling software and is therefore unreliable;
6. GBC has directed the transport assessment to use prescribed vehicle movements from this site with no justification;
7. GBC has not as required, used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. The housing number is unsound and open to legal challenge;
8. the disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels;
9. policy S2 states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound;
10. of the quantity of space allocated for retail in the town centre which could be better used for residential development. Reliance on the Carter Jonas study update 2017 which includes demand for retail space from companies already in administration is strange to say the least;

16: the unfair imbalance of the plan across the borough as regards housing, becoming even more biased against the north east of the borough. Guildford Borough is over 100 square miles. Of the11350 homes proposed in the plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.
Because of the above and many other reasons cited by the Horsley Countryside Preservation Society, Ripley Action Group and Wisley Action Group all of whom I support, this plan is unsound and not fit for purpose.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** pslp171/2674  **Respondent:** 8931105 / Elizabeth Murphy  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

Infrastructure: as residents know only too well, the infrastructure of the Horsleys is already sorely inadequate and could emphatically not support any further increase in households and residents. Drains, water supply, medical facilities and roads are already overstretched and could not possibly cope with the proposed number of new homes. Building this number of homes would lead to flood risk here and downstream along the Wey and Thames.

Drainage and sewerage: the sewerage system is already inadequate as many will testify. To give just one instance, and there are many, after heavy rain (and not "exceptional rain") the main sewer running parallel to Ockham Road overflows and a manhole cover in a field in Slade Farm is displaced, depositing raw sewage in the field and adjacent ditch. The area around the site off Green Lane is a major flood risk, with raw sewage pouring into the roads, on the occasion of the last major flood at Christmas 2013.

Schools: the single school in West Horsley is already very much over-subscribed, with further development meaning even more existing residents' children would not be eligible. The knock-on effect of the proposed development would be greatly increased traffic on local roads for school runs to outlying schools.

Medical centre: the single medical centre shared between the Horsleys is similarly over-subscribed and resources and staff overstretched. Such a significant increase in population as proposed would stretch this to breaking point.

Parking: parking spaces near the shops of the Horsleys are very limited, as they are at the station. The impact of such a disproportionate increase in population as proposed would overstretch these facilities even further, make it difficult if not impossible for many residents, including those older and infirm who depend on them, to go to the shops, medical centre and chemist.

Flooding: the land between Silkmore Lane and Ripley Lane is rated as low flood risk however those familiar with the area know that there is such severe flooding in Ripley Lane that it is completely impassable several times a year. There is also frequent severe flooding after heavy rain on The Street, East Lane, and Long Reach, so much so that they are impassable to anything other than a 4x4. The run-off inevitable from further development would exacerbate this.

Wildlife: no consideration has been shown of the potential impact of the proposed development on wildlife in the Horsleys. There would inevitably be loss of habitat, and disturbance caused by such an increase in residents and households and concomitant traffic.

‘National planning policy does however ask us to take opportunities to enhance wildlife through our Local Plan.’ you say, yet there have apparently not even been any wildlife impact assessments.
I urge the council to withdraw this plan and to consult with residents to develop a sustainable plan of proportionate
development which should not damage existing settlements

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Also, particularly as a resident of Horsley I object to proposal regarding the Green Belt because:

The Green Belt is central to the essential character of the Horsleys as you admit the main purpose of the Green Belt is to
keep a sense of openness between built up areas, in this case around London. Green Belt also provides opportunities for
people to access the countryside, to keep land for agriculture, forestry and similar land uses, and for nature conservation

The need for more housing is understood but the case for the scale and for the locations included is certainly not proved. It
would be far better in planning terms for the GBC area to use brownfield land and create sustainable settlements that would
not have an extremely detrimental effect on existing settlements, changing forever their character.

The plan admits that: ‘special circumstances would need to be demonstrated for development in the Green Belt’, however
no such special circumstances have been demonstrated to remove villages from the Green Belt. The Ministerial Statement
of 1 July 2013 stated "unmet need is unlikely to justify the very special circumstances necessary to permit such
development in the Green Belt". The plan would therefore presumably be open to legal challenge.

The plan proposes 9,000 new homes to be built on Green Belt land. There are currently 50,000 homes in Guildford so this
would equate to 18% of existing homes. The National Planning Policy Framework (NPPF) requires any change of Green
Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is not an exceptional circumstance in law,
however the existence of the Green Belt/AONB is a reason for not meeting objectively assessed housing need. Such
protected land is a legal constraint against any such development. No exceptional circumstances have been cited so Green
Belt boundaries should not be changed. The villages are rural in character, one of the main reasons Surrey is so attractive,
and should remain in the Green Belt. To remove most of the borough’s villages from the Green Belt would change the
nature of this area of countryside forever and would eventually merge historic and separate villages - an environmental
outrage.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A43 changes at Garlick’s Arch increasing the housing between 400 and 650 homes and provision for travelling show people.

- The demand for show people plots is not explained.
- No exceptional circumstances are given for the use of the Green Belt.
- This development would lead to the joining of Ripley, Send and West Clandon and destroy any notion of the Green Belt being used to separate villages.
- The traffic consequences for Ripley and Send are not explained.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have already made comments which object to the local plan in various ways. I am informed that these will only register as objections if I use the word 'object' in them. Please be advised that all my comments indicate that I strongly object to the building of a large number of homes in the borough, I strongly object to the lack of a defined plan for infrastructure as it means that the consequences of the local plan are not addressed, and I strongly object to the lack of transparency in the evidence base for the local plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The numbers of houses planned for Guildford as a whole will lead to considerable congestion in the borough which will adversely affect the commercial life of this borough and surrounding areas. The concentration of developments close to the junction of the A3 and A31 (Blackwell Farm in particular but also developments on the Hospital, Science Park and Cathedral sites, and to a lesser extent all other developments west of the town centre) will have a major detrimental impact on the flow of traffic on the A3 and A31. This junction is already a congestion hotspot and even another carriageway from Stoke to the University roundabout will not cope with the increase in traffic which can be anticipated. The mention of mitigating interventions implies changes to local communities to try to alleviate this problem as it develops but these solutions are not described so it is impossible to judge if they will be adequate and what the impacts will be. It seems likely that the whole of the west of Guildford will be blighted by this. Other developments threaten to do the same to the rest of the borough.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a resident of Guildford for almost 30 years, I have seen it grow and grow without any apparent thought for what the infrastructure can reasonably sustain.

From my observations; The main roads, especially the A3, cannot cope in the rush hours, and nearly all the proposed developments will adversely affect the A3.
Therefore, in my opinion, it would be totally irresponsible to propose major developments, some in the Green Belt, at Gosden Hill (2000 homes), Blackwell Farm (1800 homes), Wisley (2000), Normandy (1000 homes), Send (400 homes) and Guildford (3000 homes), before the A3 is able to cope with the existing situation.

I suggest that there should be a complete freeze on all major housing developments until the above is rectified, i.e. a tunnel is built for the A3 through Guildford.

I would also point out that there is considerable housing construction taking place, infilling, replacing old properties with several units, which seems to be ignored in the housing need number.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to you in relation to the above proposed planning and my deep concerns about the suitability of the location within our Village. As part of the Normandy community and having followed and attended various local meetings it is now crystal clear that a site of such proposed size, location and suitability to our village is not appropriate.

I have read all the documents and for me to cover every point would be very time consuming. However, I would like to reiterate what I believe are the key reasons to not proceed with such a plan.
Background to our village

I have lived 14 years in Normandy and when I arrived it took some time to get to know the area and neighbours. It is a small tight group of people. As the years have gone by I can now see it is a self-contained village with no real amenities, poor travel infrastructure. The one thing that is apparent is that it is a very special environment in terms of location, history and natural beauty, abundant with wildlife and for those who live here is enough for them to want to stay and go out of the village for everything they need.

To build up to 1200 homes, or anything above a couple of hundred within our village would destroy the environment, lead to a nightmare with surrounding villages and the commuting of neighbouring areas that is already very heavy at peak times and the roads are already unable to cope.

Reviewing your plans I believe the types of homes and other amenities you are proposing would in the short term placate the new dwellers, long term it would not suffice. They would be a group of homes stand alone and I truly believe would be very stand alone. As few shops within the plan and provision to increase the shops etc would not add any value to the existing community.

Below are my main concerns

1200 homes: impact on existing village in terms of traffic, which I believe there is no planning to create new roads. Very poor railway link (in fact deemed a few years ago as the most unsafe piece of railway line in south England).

Impact of up to 1200 homes on our water management. This is both from the effect of building on land which will push to water table which is already very high even higher causing flooding to nearby land and properties. Also an entire village sewage review would need to take place. I am sure you are fully aware of the badly maintained, old sewage system which is an existing problem.

Type of housing. The type of housing and the people it is targeted for require large facilities on their doorstep. For this amount of people, the plan would suit a location similar to Farnborough, Camberley with large superstores. Infact very similar to Horsham development that I have driven through recently. The size of the development in Horsham is smaller than 1200 homes at the moment and it is huge, this cannot happen to a small village like Normandy!

Wildlife is abundant in this village and to destroy precious green land is I’m sure as indicated in the plan not part of the current laws.

Having said the above and there are many more reasons as the Normandy Action Group and Normandy Parish council have outlined. I feel that the GBC process and timeline management has been arranged and implemented to rush and avoid full investigations and community input. The absolute icing on the cake is that the GBC plan is based on the requirement of a new secondary school. Insisting that it is required when all research and information gathered shows that we clearly do not need one. You have all the details so I don’t need to go through them. The area of Normandy does not need a school as all neighbouring schools have been and are predicted to be under subscribed. Bringing in pupils from further afield will have a devastating impact on the traffic and congestion and destroy our village.

I understand that there are many incorrect and misleading processes and information within your plan that are in fact illegal. I urge you to review your plan and consider fewer homes that our village can accommodate or look for other more appropriate sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the housing number of 693 as it is excessive and cannot find from your documentation how this figure is calculated for the SHMA. I understand that GBC also do not know how the number was arrived at and are fully dependant on a third party consultant's software that only they understand. I would be surprised if this passed scrutiny at the inspection by the Planning Inspectorate in December.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Worplesdon

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Without major changes to our roads and plans to upgrade utilities and flooding defences, I object to any further building in Worplesdon Parish.

Today, the current infrastructure cannot cope with the existing population, particularly the road network. Roads around Worplesdon are often gridlocked and any additional housing would make matters worse causing further pollution as well as more delays. Water and Sewage, likewise is a problem and again The Proposed Local Plan does not seem to deal with this?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the fact that Brownfield sites seem to have been ignored in the Proposed Submission with further destruction of the Greenbelt.

This is despite GBC Councillors who were elected at the last election on the promise of keeping the Greenbelt free from development.

Despite all the hard work and cost involved in producing the Proposed Submission, I feel that major alterations will have to be made prior to it being presented for inspection particularly with the uncertainty that Brexit now brings.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

The villages of Wonersh and Albury do not have this threat. Why does Chilworth? It has great historic interest with the Gunpowder Site plus all the other industries that were there. People around the country are genuinely interested in this sight. How awful it would be if they could not be viewed in their glory...the full extent of the sight. Guildford should be capitalising on such a precious space, not reducing its importance by allowing a sprawl to envelop it.

This cannot be allowed. The green belt is in place for a purpose. I do not want to be one of the generation who removes it and spoils Chilworth for ever.

This is an unprecedented action that must be stopped!

The villages of Chilworth, Shalford and Peasmarsh are unique villages with diverse attractions surrounding Guildford which help to make Surrey such an interesting and attractive area. By "insetting" them, within a very short time there will be one sprawl, starting in Guildford. Where this would end is anybody's guess as without the strict development laws to protect our lovely area the natural boundaries which separate the villages would be swallowed up, resulting in an unmanageable sprawl.

Our roads cannot cope with the present traffic. The council appear to be unwilling to face the problems eg Rice's Corner which desperately needs a roundabout. Heavy lorries thunder through Chilworth as do many lorries with drivers under instruction. Not only is the traffic situation poor for drivers it is appalling for pedestrians, especially parents taking their children to school when traffic is at its worst. Doctors' surgeries and schools, two vital constituent parts of life, are overcrowded, resulting in the obvious concerns. We cannot take more houses.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Thank you for the opportunity to object and comment under "Regulation 19 of the Town & Country Planning (Local Planning) (England) Regulations 2012" before submission of the Local Plan to the Secretary of State.

Thank you also for all your hard work.

This letter concentrates on some of the main points of the Local Plan. Objections are shown in bold. As in my letter of 10 September 2014, I feel that I must point out poor sentence construction, jargon and inconsistent 'house style' etc. I have typed the existing text followed by a suggested alternative, eg operate: operates. I hope that this will be constructive and helpful.

'Front Cover

Normally, on a front cover, the word 'borough' would have a capital letter at the start of the word. In fact, your site maps all have the word 'Borough'. Your front cover is inconsistent and does not look right.

Also, it is somewhat unusual to have 'strategy' and 'sites' without a capital letter at the start of each word. Does this matter? Yes, I think it does. See 'Foreword' below.

Page 3 Contents Onfrastructure and Delivery)

Policy I1 (ie I for India 1) can easily be misread as "Policy 11" (ie the number 11). Policies I2, I3, and I4 certainly look like policies I2, I3, and I4. Why not have "Policy ID"(ie Infrastructure and Delivery I), to ensure clarity? See also pages 108-121.

Page 5 Foreword (and elsewhere throughout the Plan)

The trouble with the design of the title Local Plan: strategy and sites is that, with no capital letters, strategy and sites look like words belonging to the text, not belonging to the title. Why not make things easier for the reader? Again, you are being
inconsistent, as Paragraphs 1.3, 1.6 etc have the title of your Plan in inverted commas (perhaps to help the reader overcome any confusion which you may have created by leaving out capital letters at the start of words in the title)!

Page 5 Foreword. 3rd Paragraph 'is necessary' makes poor sentence construction. Why not have 'It is necessary to have more affordable housing, sites for travellers and diversification of the housing stock through other means to help ensure that accommodation is accessible to all'. I am not sure why you have the words 'through other means'.

Enhancing our employment offer: Increasing the number of jobs including our rural areas: including prosperity in our rural areas.

1.13 Neighbourhood Planning operates: operate

Page 10 Key diagram Page 10 evidence base

Regarding the headings, why not Key Diagram? Why not Evidence Base? Your other headings on pages 10 and 11 have capital letters, at the start of words which form headings.

There is inconsistency with the use of capital letters in headings elsewhere in the Plan. 1.16 Evidence Base is comprised of: comprises

1.18 Monitoring Indicators
deliver against: deliver the

has: have

against: measured against

218 Housing

has informed: it shows in detail

2.23 Natural Environment

My comments:

As about 89% of the Borough is located within the Metropolitan Green Belt, the Secretary of State and the Public Inquiry Inspector should recognise that the number of new houses and other buildings proposed in the Local Plan should be greatly reduced.

• The Green Belt was established to meet a number of important needs, and those needs have not gone away.
• There should be no building on the Green Belt, except perhaps small scale, limited
• The number of houses and other buildings proposed in the Local Plan should be greatly
• It is not wise - or sustainable - to have huge numbers of extra buildings in the Borough of Guildford, to cater for a national population which is increasing at a fast rate.

2.34 Sustainability Appraisal CSA) and Strategic Assessment (SEA)

inform : help to form

Page 18 Guildford Borough Key Diagram
Objection to development and loss of Green Belt at Normandy and Flexford (and Blackwell Farm in respect of numbers and density of new homes). See pages 4-7 of this letter.

3.2 Spatial Vision

40% affordable housing is too high. It is unrealistic. You could say up to 40%.

clear distinction between urban and rural areas: (especially between Aldershot/Tongham/Ash to the west and Guildford to the east).

Answer (if comment is on questions 1-7 of the questionnaire): ()
Page 182. Policy A26: Blackwell Farm, Hogs Back, Guildford

**Objection** - There will be too many homes (approx. 1,800). Too much land will be taken from the Green Belt for housing. Also, housing density will be too high. There may be exceptional circumstances associated with building on this Green Belt land (e.g., research facilities near to the University). However, the number of houses planned suggests that the Blackwell Farm site will be overdeveloped (in relation to its position between the Urban area of Guildford and the open countryside of the Green Belt).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Page 190, Policy A29: Land to the South and East of Ash and Tongham

Objection -The reasons for objection are below (on pages 19-21 of this letter)

Strategic Location for Development

The words 'This is a strategic location for development' should be removed. There is an implication that you would like inappropriate, large scale growth, perhaps with ugly tall buildings and inappropriate large scale road building.

There will be too many homes (approx. 1200). Density will be too high.

Contents of Policy A29

Your Policy, in a sense, lists reasons why too many homes are planned and why the density will be too high:

- Loss of greenfield land
- Surface water
- Grade II listed buildings
- Historic location of Ash green village
- Area of High Archaeological Potential

- Tree Preservation Orders
- Ancient woodland at some boundaries

- Desirability of a green buffer along Ash green Road
- Congestion on the A323 Ash Street, Ash Church Roa Guildford Road
- Need to connect spaces and habitat within the site and to outside the site.

Pollution

For some people there may be noise issues (from the A31 Hogs Back, the A33 l Blackwater Valley Road and the railway). Poor air quality must also be considered. The URS report dated August 1014, prepared for Guildford Borough Council, states "Development at Send and Ash!rongham is likely to lead to negative effects on air quality, noise, human health and other topics'.

Should you not add 'potential noise and air quality issues' to your list in Policy A29? You mention such problems in your description of the former Wisley airfield on page 205, so there is a need to be consistent.

Highway Network

The highway network is not entirely suitable for additional development.

In my view egress from the main sites onto Ash Green Road or Harpers Road is undesirable, bearing in mind the character of these roads and the risk of injury accidents. The junctions of Harpers Road/A323 Guildford Road and Wyke Lane/A323 Guildford Road have accident records. Also, at the Harpers Road/Pound Lane junction there are
historic buildings close to the road. Substantial improvement to these roads would be difficult and costly, taking into account a narrow railway bridge etc. The character of the roads which lead to and from the A323, could change so that they are no longer quiet, pleasant, rural lanes. Along the A323, the provision of more traffic signals (compared with roundabouts) would change the character of the A323 from rural to urban. Road widening, which might involve taking land from the recreation ground, would not be welcome.

**Historic Environment**

Regarding land North of Ash Green Road and East of Foreman Road, this site is too close to the 13th century Manor House which has a moat, on or near to land which was once the village green. It is important that there should be no building development anywhere near to the Manor House as it will be out of context and harm the integrity of a historic site. See Policy D3 on Page 103. **South Side of Tongham**

Development of land on the north side of the A31 dual carriageway, to the west of the Street, will remove the green buffer between the A31 and the village of Tongham.

Building development will spoil the rural character of the approach to Tongham (the land at present has a hop field which serves the Hogs Back Brewery which is on the east side of The Street). The only way to mitigate the effects of the proposed development would appear to be to have fewer homes and less density.

**Ash Railway Station**

Policy A29 mentions ‘improve the level crossing’. Elsewhere in the Local Plan you have mentioned closure of the level crossing, so there is some inconsistency. Please see Policy A30, below.

After 'new road bridge' add:

'A new off-street car park will also be provided on the north side of the railway to the east of A323 Church Road to serve additional residents in the general area and to reduce problems caused by parking on nearby roads'. Please see Policy A30, below.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** PSLPS16/4184  **Respondent:** 8933185 / Peter See  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A30

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**Page 193. Policy A30: Land for New Road Bridge and Footbridge Scheme to enable Level Crossing Closure on A323 Guildford Road Adjacent to Ash Railay Station. Ash Allocation -After station, add 'A new off-street car park will also be provided'.

Requirements -Second, third and fourth requirements should be:

'A new off-street car park will also be provided on the north side of the railway to the east of A323 Church Road to serve additional residents in the general area and to reduce problems caused by parking on nearby roads. The new car park will
be landscaped and secure. It will be funded by contributions from developers and/or Guildford Borough Council in view of the need to address travel problems which will arise from the Council's policies of adding new homes in the area (1200 in Ash and Tongham).

'High standard cycle routes will be provided, on and off the highway, to encourage cycling to the station and to help the safety of cyclists.'

'Traffic signals will help pedestrians and cyclists to cross the A323'.

Note: If these additional requirements are not added to Policy A30, there is a risk that they will be delayed or even overlooked. They are fundamental requirements and they should be included in the policy (although, of course, different wording could be used).

There is no indication of a new road at this site to serve the homes proposed between Harpers Road, the A323 and the railway line. Should this not be shown on the site drawing on page 194, to ensure co-ordination of plans? As mentioned on page 20 of this letter, Harpers Road and Wyke Lane etc are not suitable for increased traffic.

Page 229. Policy A46: Land to the South of Normandy and North of Flexford

Objection

Introduction

It is not always easy to be completely objective about proposed schemes in a Local Plan. However, this one (which is a large housing development on the Green Belt next to an existing village) seems to be the worst proposal in the Guildford Local Plan.

Building on the Green Belt

National planning policy requires that Green Belt boundaries are amended only in exceptional circumstances. The need for sustainable development in Guildford Borough is not an exceptional circumstance in terms of the normal use of the English language.

It is possible that a new secondary school has been proposed as a means to obtain planning permission for building a large number of homes etc. However, the provision of a secondary school is not an exceptional circumstance, so it should not be built on the Green Belt in Normandy. New main line railways or power stations may be exceptional because of a national need and their scale and their cost. But secondary schools have been built all over the UK in their thousands and there is flexibility in terms of where and when they can be built they are not exceptional in planning terms. There is reason to think that a new secondary school in Normandy is not justified. There are spare pupil places elsewhere within reasonable traveling distance and some existing secondary school buildings could be expanded. If necessary, Policy A26 Blackwell Farm, Hog's Back, in the Local Plan, could be changed to include a secondary school (on the basis that the Council seems to think that there are special circumstances to allow the provision of research facilities etc near to the University, on Green Belt land).

This site could look like a new town, viewed from the Hog's Back or from other high ground. Development will not be in keeping with the surrounding area, especially with a Special Protection Area close to the north and an Area of Outstanding Natural Beauty close to the south.

Building on land to the south of Normandy and north of Flexford will reduce the 'green gap' (of only 2-3 miles in total between the existing edges of development) from the urban area of Ash to the urban area of Guildford.

Building anywhere between Ash and Guildford on the Green Belt would be against normal standards of planning which have been followed by Guildford Borough Council and Surrey County Council since the 1950s.
See also pages 5-7 of this letter.

Pollution

The scale of the proposed development will increase pollution, which is already a health risk from time to time. Nonnandy is next to Ash and the URS report dated August 2014, prepared for Guildford Borough states "Development at ... Ashffongham is likely to lead to negative effects on air quality, noise, human health and other "topics". Measures will need to be put in place to ensure that air quality objectives are not exceeded and Air Quality Management Areas are designated".

There is little reason to hope that it will be possible to ensure that there is no deterioration in human health, having regard to the scale of proposed development between Aldershot/fongham/Ash and Guildford. For example, there will be congestion, air pollution and traffic noise for several miles in various directions.

Road Network

There are only two east/west routes to the west of Guildford (the A31 Hog's Back and the A323 Guildford Road/Aldershot Road); congestion and pollution will be at unacceptable levels due to increased traffic on these roads and others in the general area. There will be significant pressure on the approaches to Ash/Aldershot and Guildford. There will be no funds for new east/west routes and, in any case, such routes would be out of the question on environmental and amenity grounds.

Roads alongside the site, and others between Ash and Guildford, are of a pleasant, rural character. Changes to these roads (especially the introduction of traffic signals or widespread traffic calming) to allow for increased traffic, will make them look more urban. Such changes will be against the spirit of 4.5 'Design Policies' and Policy DI 'Making Better Places' in the Local Plan. However, for the avoidance of doubt, there is of course no objection to the provision of low-cost injury prevention measures where the accident record shows a need. Also, roundabouts are usually better than traffic signals at junctions (they help traffic flow and they calm traffic).

New Homes in Aldershot, Hampshire, 4 miles (6km) From Normandy

Paragraph 1.5 of the Local Plan mentions the duty of local councils to cooperate with neighbouring authorities. You will therefore have been aware that for the last 15 years or so Rushmoor Borough Council has had plans for 3000-4000 homes to be built upon military land (brownfield sites). Building work has now started.

This is yet another reason why there should be no building on the Green Belt between the Aldershot/fongham/Ash urban area and Guildford, in terms of:

- the alternative site in Aldershot for new homes
- increased congestion on roads between Aldershot and Guildford caused partly by Rushmoor residents
- increased pollution
- the increasing need to maintain green fields and trees between two major urban areas for amenity, leisure and Community Environmental Planning, Concept Masterplan Ref Csa/25161101

Although this may be an 'early stage concept plan', it seems to show the provisional intention of 'potential residential blocks' close to Westwood Lane. This part of any masterplan could be unattractive. For pedestrians, drivers and passengers it could be like passing barracks or poorly designed houses of a uniform pattern, which would dominate Westwood Lane. There is a need for homes along Westwood Lane to have their own driveways (see pages 8-9 of this letter). Also, it would be desirable to have wide verges, trees and 'service roads' between the homes and Westwood Lane. They would help to keep the area attractive and dissuade drivers from parking on Westwood Lane.

Westwood Lane is an old road with Westwood House, a property which dates back to pre Elizabethan times. It is hoped that the land (to the south of Normandy and north of Flexford) will never be developed, but if it is, more respect should be paid to Westwood Lane, even if that means fewer homes and a much lower density of development.

Numbers of Homes & Density
There will be too many homes (approx. 1,100). Density will be too high.

4.2.5 Policy H I Homes for All including the: including
prevailing built form: design of existing buildings in the area

4.2.8 Density
Add:

People in houses need gardens, especially children who need gardens large enough in which to play.

It is important that houses have their own driveway, where cars can be parked securely, within the gardens of homes where windows overlook parked vehicles. Garages are often used just for storage of various items rather than the parking of cars. So driveways are needed too. Without driveways, there are often problems involving safety/obstruction/neighbour disputes/parking on verges etc. Visitors need to park in (driveways, as well as residents. Elderly people, in particular, need their car to be close to their house. It is not always possible to provide a suitable parking bay, on a road, for a person who has disabilities.

4.2.20 Travellers

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
2.33 Policy H2: Affordable Homes

reducing: reduce

Object to inadequacy of Policy H2 and its supporting text.

Although the Local Plan has '4.5 Design Policies', it does not have a strong policy which ensures that good standards are followed for various aspects of affordable homes. This is regrettable as there is a need for a strong policy to take into account the risk of increasing numbers of problems. These could be caused by more and more affordable homes which do not completely look after their occupants or fully take into account the need to retain the pleasant character of an area.

A Policy should include the need for affordable housing to be in keeping with other development nearby. If a number of homes are to be erected, they should vary in design in order to be pleasing to the eye. In the past a number of affordable homes have been provided which are not in keeping with others nearby and which are too plain.

The Council (with housing associations etc) should not 'impose' housing on towns and villages, if the affordable housing is of poor exterior design, with inadequate living space and inadequate gardens (and without driveways and convenient and secure garages for parking cars or bicycles). The elderly and disabled people in particular need driveways for cars. It is not always possible, for example, to provide numerous Disabled Parking Bays on a road. See 4.2.8 on page 7 of this letter.

High standards are needed, even though high standards may mean fewer properties are provided. Otherwise, the high numbers of affordable homes planned could completely spoil the character and amenity of parts of the Borough, cause significant problems for the people living in their affordable homes, and cause problems and costs for the general community.

I think that it would be more realistic to say up to 40% must be affordable. On the west side of the Borough, there are already large areas of affordable housing in Ash and in Hampshire at Aldershot and Farnborough).

Page 41 Monitoring Indicators

It will be interesting to see what your monitoring shows. The provision of affordable homes seems to be too complicated with significant costs for the Council, tax payers, developers and the occupants of new homes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: PSLPP16/8758  Respondent: 8933185 / Peter See   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Page 42 Policy H3: Rural Exception Homes

I am not objecting to this policy. However, I am uneasy about the fairness of this policy in relation to eg protecting the Green Belt and giving special treatment to certain people. After all, many people could (and do) travel to work and to visit family connections and friends. Many people do not live near their work or family connections or friends and they accept this situation as part of normal life.

There should be a small number of such homes. There is no need to build them between Ash and Guildford as it is not a remote area (eg suitable homes are in Aldershot, Tongham, Ash, Guildford).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objection to building on the Green Belt (with very few small scale exceptions). See page 6 of this letter.

Objection to development and loss of Green Belt at Normandy, Flexford and Blackwell Farm. Regarding Blackwell Farm, the objection is in relation to too much housing density and too much land will be taken from the Green Belt for housing. The existing character of the Borough will not be protected. Also, the clear distinction between urban d rural areas will not be maintained (ie between Aldershot/Tongham/Ash to the west and Guildford to the east).

Answer (if comment is on questions 1-7 of the questionnaire): ()

4.3.13 Policy P2 : Green Belt

My general views are given on pages 6-7.

Objection Fairlands, Flexford, Normandy and Wood Street village should not be inset (ie removed) from the Green Belt. As these villages are not fully developed, they make an important contribution to the openness of the Green Belt belt (between the main conurbations of Aldershot/Tongham Ash and Guildford). There should be no encroachment onto the Green Belt. It is important to look after amenity, air quality, etc.

Page 49 Policy P2: Green Belt

Objection to the text under 'Extensions or alterations'.

Regarding the way Policy P2 has been written, you say '...meet the following criteria': So, you should list the criteria without unnecessary words, which get in the way of the actual criteria. You have the heading 'Extensions or alterations'. My view is that under this heading you should have ' These should not result in disproportionate additions compared with the exterior dimensions of the original building (taking into account the size of buildings nearby)'.

Reasons for objection:

1. Your proposed text is open to too much interpretation, to the possible detriment of home owners. The words 'provided that it would not result in disproportionate additions over and above the size of the original building' are somewhat subjective and could be too restrictive.
2. The size of original buildings should not preclude extensions or alterations if (in general terms) they will be in keeping with nearby buildings, they will be within a garden with sufficient space, they will be of a suitable appearance and they will not harm the overall appearance of the Green Belt.

3. Paragraph 4.4 Policy H1: Homes for All, states "New homes should support the changing needs of individuals and families at different stages of life". While this paragraph may, or may not be, intended to apply to the interior of a home, there is no reason why it should exclude changes to the exterior of a new home. This principle should also apply to Policy P2 (ie to homes which are not new) as far as possible.

4. It is not tenable for the Council to allow - or even encourage - thousands of new buildings, estate roads etc, to be constructed on Green Belt land (thereby harming the Green Belt) while at the same time the Council will be enforcing Policy P2. Home owners may well think that Policy P2 is proscriptive, inconsistent and unfair, when they wish to build modest extensions or alterations to their homes in the Green Belt

You may think that the Council's planning staff will take a 'sympathetic view' with planning applications, but Policy P2 should not rely on the sympathetic interpretation of staff. Extensions and alterations are very important to homeowners, especially if they have growing families. So Policy P2 should be improved to give more help to home owners who would like to extend or alter their homes.

Regarding your criteria listed under the heading 'replacement buildings', the text could be shortened (to avoid duplication of words etc) to:

'A new building:

• should have the same use
• should not be materially larger than the one it replaces
• should be sited on or close to the position of the existing building'.

Page 49. Policy P2: Green Belt

Objection to Limited Infilling, as the following should be included in the text which starts with the village of Albury:

Fairlands, Flexford, Normandy, Wood Street Village.

Reasons for objection are shown in Paragraph 4.3.13 on page 10 of this letter.

Extensions or Alterations

Objection - it is possible that your proposed guidance calculations may sometimes be unnecessary. Or your calculations may be too proscriptive, too restrictive, inconsistent (bearing in mind widespread building development allowed by the Council on the Green Belt, and unfair. May I urge you to take a more 'generous approach' than in the past with your calculations. For example, the floor area of a new loft conversion need not affect the Green Belt. There will still be plenty of scope for planning applications for extensions or alterations to be turned down if appropriate. There is no need to go back to the old, restrictive (some might say misleading)* policy of 'keeping' small dwellings; it appears that the Council will have large numbers of new, small, affordable homes in (or near to) the Green Belt in due course, including Rural Exception Homes.

* See Local Plan 2003, paragraph 5.28 (which stated that the loss of small dwellings should be resisted) and Policy H9. Certain extensions to small dwellings (making them medium sized dwellings) were in fact allowed under 'permitted development'. After building work, subsequent planning applications a few months later, for even more building work, were then approved. But this method of overcoming the Council's resistance, cost homeowners a great deal of time and money and wasted significant amounts of building material.

You refer to the forthcoming Green Belt Supplementary Planning Document (SPD) which will be prepared to support Policy P2. You have consulted widely on the Draft

Local Plan. Will you similarly consult widely on the SPD and give the public the chance to comment on it? It will probably be of importance to homeowners if they want to extend their homes or alter them.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I welcomed your contribution to the Queen's Speech debate on housing on 5 June. Further to recent discussions, I would just like to take the opportunity to explain the Government's on-going commitment to national Green Belt protection, reflecting what Ministers have regularly told Parliament.

As set out in the Coalition Agreement, this Government is strongly committed to protecting the Green Belt. National policy on the Green Belt is set out in the National Planning Policy Framework, which we published in March 2012, and which broadly reflects Long-standing planning policy (previous editions of Planning Policy Guidance 2).

The Framework makes clear that most development in the Green Belt is Inappropriate and should be approved only in very special circumstances. Planning guidance, updated in March 2014, also states that unmet house need (including for travellers sites) is unlikely to outweigh the harm to the Green Belt to constitute the very special circumstances justifying Inappropriate development within the Green Belt.

Moreover, I would note:

- Paragraph 14 of the Framework clearly states that, when plan-making, Local Plan should meet objectively assessed needs, unless specific policies in this Framework indicate. Development should be restricted: these policies include the Green Belt and Areas of Outstanding Natural Beauty.
- Paragraph 17 notes that the core planning principle that underpin plan-making include both protecting the Green Belt and recognising the Intrinsic character and beauty of the countryside.
- Paragraph 83 states that, once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan.
- Paragraph 89 allow for redevelopment of previously developed sites (brownfield land) within the Green provided it would not have a greater impact on the openness of the Green Belt and the purpose of Including land with it than the existing development.
- Paragraph 80 notes how the purposes of the Green Belt include checking the unrestricted sprawl of large built-up 81988, preventing neighbouring towns merging into one and assisting in safeguarding the countryside from encroachment.

I have also communicated many of these points on existing planning policy to the Planning Inspectorate. A copy of my letter from March can be found online at https://www.gov.uk/government/publications/inparagraphHeporbHm-tocal-Qlans.

Our abolition of the last Administration's Regional Strategies, including the abolition of the South East Plan, sought to end the unwanted 'top-down' pressure on many local authorities to delete. The Green Belt I recognise that creating a Local Plan is a challenging process, not least since there is no longer an unelected Regional Assembly at which to point the blame. It is...
now for locally elected councillors to determine where badly-needed new homes should _and_ should not go, in consultation with local residents.

I hope you find this of use, and please feel free to pass this letter to constituents or any other interested party if you feel it would facilitate public debate and scrutiny.

4.1.7 Policy S2 Planning for the Borough -Our Spatial Development Strategy

Suggested change: a small number of rural

**Objection** to the implication that Green Belt land will be used for building development. See pages 5-6.

Countryside beyond the Green Belt: (small scale, low density) urban extensions to Guildford and Ash and Tongham: (without taking Green Belt land) Page 26 Policy S2

Suggested additional text: We will meet our statutory obligations but future provision for gypsies, travellers and travelling show people, will be limited in view of the large number of existing sites (compared with the number of sites provided by other councils) and in view of the large number of sites in the west of the Borough.

Policy S2 Borough Wide Strategy

**Objection** -The reasons for objection are below (on pages 5-7 of this letter).

**Targets**

The target of 13,860 new homes during the Plan period (2013-33) is too high and unrealistic. It will harm the environment (loss of green fields and trees; more pollution). My view is there should be up to 400 new homes built per year.

Serious questions have been raised about forecasts of the number of homes that should be built (the use of historical statistics etc). Forecasts, especially involving economics over extended periods of time, are often wrong or misleading.
Green Belt

(a) The Green Belt was established to meet a number of important needs, and those needs have not gone away.

(b) There should be no building on the Green Belt, except perhaps small scale, limited infilling.

- The number of houses and other buildings proposed in the Local Plan should be greatly reduced, otherwise significant harm will be done to the Green
- It is unwise -and unsustainable - to have huge numbers of extra buildings in the Borough of Guildford (especially in the Green Belt) to cater for a national population which is increasing at a fast Housing needs

There is now widespread use of the term "housing needs" even though in some ways it lacks precision. The word "need" means lacking something which you cannot well do without; necessity; requiring relief eg extreme poverty or distress. However, for many people it would be a matter of preference - not need - to live in Guildford Borough rather than somewhere else.

Seeking to Maximise Housing Delivery

Seeking to maximise housing delivery is implied in Policy S2. History since the 19th century has shown us that, it is not sensible to build a maximum number of homes to meet demand, in most areas of the UK. The worst results have been slums, brutal high rise flats contributing to crime and social problems (some of which had to be demolished after a short life) and spoilt townscapes/landscapes. High demand in the South East is now almost endless. But land in the UK is not unlimited, especially in the South East.

Building homes outside the south east would be more sensible than building on the Green Belt around London.

Farmland (Existing or Potential) Taken for Homes

Agriculture is, like accommodation, very important. We need more farmland, not less, so that we can produce more food in a sustainable way. About 50% of our food is rted. But soil in many parts of the world is degrading; water in many parts of the world is inadequate; and more countries need to import food or to keep food for their own growing populations rather than export it to us. A forecast for global population in 2050 is nine billion and this will affect the UK. Low quality farmland can be used for planting trees to help deal with pollution and climate change. It should not be used for building in the Green Belt.

Pollution

Meeting needs or demand for homes in the Borough will mean more roads to service homes, more vehicles and more air pollution. Poor air quality is already causing illness and death, especially in the south east. Data from Public Health England indicate that 5.3% of all deaths every year in people over 25 are linked to air pollution. It is especially bad for children because their lungs are still developing.

The Guildford Borough Local Plan should contain data showing existing and future air pollution levels in various places in the Borough (eg in Ash and Guildford), just as it contains facts and figures for many other subjects. Data should not be in supporting documents only.

C) Farmland, Fields and Woods Between Towns and Villages

These help community cohesion, quality of life and life expectancy. They should be retained, not reduced in area.

For example, the green gaps between the furthest edges of existing development, from Ash to Guildford, extend to a total of only about 2-3 miles. So, there should be no more development allowed between Ash and Guildford (including ribbon development) with only a very small number of special exceptions to such a policy.

Homes in the UK - General
There will have to be an under supply of housing in Guildford Borough because of the need to protect the countryside and the character of towns and villages. But there could be an oversupply outside the south east (eg in the north west) which could be used to accommodate people, if they decide to move there. Certainly, there are ‘brown field sites’ in London and outside the south east.

**Realigned Green Belt Boundaries**

Central government has said that there is no need for Green Belt land to be removed unless there are exceptional circumstances. It seems that central government's policy is that, in general, homes etc should not be built on the Green Belt. See the letter from the Parliamentary Under Secretary of State (Planning) dated 18 June 2014, enclosed with my letter of the 10 September 2014.

Table 1 - Planned Delivery Between 2018 and 2033 Table 2 - Hierarchy of Retail & Service Centres

**Objection** to building development, as below.

Ash & Tongham - too many houses and too much density. There should be no building n the Green Belt.

Ash and Tongham strategic location of growth - too many houses and too much density.

Normandy and Flexford village expansion (Policy A46) - there should be no building on the Green Belt. The proposals reduce the distinction between the rural area to the north of the Hog's back, and the urban areas of Aldershot-Fowndham / Ash to the west and Guildford to the east. See 3.2 of the Local Plan. There will be too many buildings and too much density. See pages 5-7 of this letter.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Page 212, Policy A29: Land to the South and East of Ash and Tongham

Objection – The reasons for objection are below:

Strategic Location for Development

The words 'This is a strategic location for development' should be removed. There is an implication that you would like inappropriate, large scale growth, perhaps with ugly tall buildings and inappropriate large scale road building.

Numbers of Homes and Density

There will be too many homes (approx. 1750, raised from the previous figure of 1200). Density will be too high.

New Homes in Aldershot, Hampshire, 2 miles (3km) from Ash & Tongham
Paragraph 1.9 of the Local Plan mentions the duty of local councils to cooperate with neighbouring authorities. You will therefore have been aware that for the last 16 years or so Rushmoor Borough Council has had plans for 3000-4000 homes to be built upon military land (brownfield sites). Building work has now started. This is one of a number of reasons why there should be less building development proposed in the Ash/Tongham area.

*Contents of Policy A29*

Your Policy, in a sense, lists reasons why too many homes are planned and why the density will be too high:

- Loss of greenfield land
- Surface water flooding
- Listed buildings
- Historic location of Ash green village
- Area of High Archaeological Potential
- Potential noise and air quality issues
- Proximity to ancient woodland/SNCl

Also, there is often congestion on the A323 Ash Street, Ash Church Road, Guildford Road.

*Pollution*

For some people there may be noise issues (from the A31 Hogs Back, the A331 Blackwater Valley Road and the railway). Poor air quality must also be considered. The URS report dated August 1014, prepared for Guildford Borough Council, states ‘Development at Send and Ash/Tongham is likely to lead to negative effects on air quality, noise, human health and other topics’.

*Highway Network*

The highway network is not suitable for the scale of the proposed additional development.

In my view egress from the main sites onto Ash Green Road or Harpers Road is undesirable, bearing in mind the character of these roads and the risk of injury accidents. The junctions of Harpers Road/A323 Guildford Road and Wyke Lane/A323 Guildford Road have accident records. Also, at the Harpers Road/Pound Lane junction there are historic buildings close to the road. Substantial improvement to these roads would be difficult and costly, taking into account a narrow railway bridge etc. The character of the roads which lead to and from the A323, could change so that they are no longer quiet, pleasant, rural lanes. Along the A323, the provision of more traffic signals (compared with roundabouts) would change the character of the A323 from rural to urban. Road widening, which might involve taking land from the recreation ground, would not be welcome.

*Historic Environment*

Regarding land North of Ash Green Road and East of Foreman Road, this site is too close to the 13th century Manor House which has a moat, on or near to land which was once the village green. It is important that there should be no building development anywhere near to the Manor House as it will be out of context and harm the integrity of a historic site. See Policy D3 on Page 116.

*South Side of Tongham*
Development of land on the north side of the A31 dual carriageway, to the west of the Street, will remove the green buffer between the A31 and the village of Tongham. Building development will spoil the rural character of the approach to Tongham (the land at present has a hop field which serves the Hogs Back Brewery which is on the east side of The Street). The only way to mitigate the effects of the proposed development would appear to be to have fewer homes and less density.

Ash Railway Station

After '(9) new road bridge' add:

'A new off-street car park will also be provided on the north side of the railway to the east of A323 Church Road to serve additional residents in the general area and to reduce problems caused by parking on nearby roads'.

Land for New Road Bridge and Footbridge Scheme to enable Level Crossing Closure on A323 Guildford Road Adjacent to Ash Railway Station, Ash

Land for Off-street Parking in the Vicinity

The existing, small, Ash railway station car park is inadequate. There is a need for a firm plan to provide a new off-street parking for cars and cycles on the north side of the railway to the east of A323 Church Road to serve additional residents in the general area and to reduce problems caused by parking on nearby roads. The parking area could be provided before a bridge is built. It could then be adapted to fit land available after a bridge is built. The new car park could be landscaped and secure. It could be funded by contributions from developers and/or Guildford Borough Council in view of the need to address travel problems which will arise from the Council's policies of adding new homes in the area (1750 in Ash and Tongham). The Local Plan will mean that there will be over 2000 more cars and other vehicles owned within a few miles of Ash railway station.

Land for Cycle Routes in the Vicinity

High standard cycle routes could be provided, on and off the highway, to encourage cycling to the station and to help the safety of cyclists.

If necessary, traffic signals could help pedestrians and cyclists to cross the A323.

Note: If these proposed additional requirements for off-street parking and cycle routes are not included in the Local Plan, there is a risk that they will be overlooked.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

After '(9) new road bridge' add:

'A new off-street car park will also be provided on the north side of the railway to the east of A323 Church Road to serve additional residents in the general area and to reduce problems caused by parking on nearby roads'.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Page 71 Policy E1:Meeting Employment Needs.**

4.4.9 choice and flexibility is not: choice and flexibility are not We recommend to the Inspector that Policy E1 is changed in the following way:

"choice and flexibility is not" is amended to "choice and flexibility are not" Review for duly made

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

4.4.9 choice and flexibility is not: choice and flexibility are not

**Attached documents:**
Objection to Policies E1 and E2 and to the policies map on page 301 in respect of the proposal that Ash railway station should be a strategic employment site.

In paragraph 4.4.17 you have excluded certain railway stations from becoming strategic employment sites, because of their nature and character and because of the size of the surrounding village or centre. Ash railway station should be excluded on the same grounds.

A strategic employment site at Ash railway station would allow office buildings of a significant size and other substantial buildings to be erected. The drawing on page 301 clearly shows that such buildings could be erected within 500m of the railway station. If a mistake has been made and the distance is far less than 500m, the mistake should be corrected.

The drawing on page 301 sums up the need for you to withdraw your proposal. You have included the following buildings and land within the 500m area, yet for obvious reasons, offices etc should not be erected in their vicinity.

Ash, North and West of A323

primary school

cemetery

ancient parish church (11th century)

old house (Hartshorn, 14th century)

housing (in depth)

Note: The Thames Basin Heaths Special Protection Area is not within the 500m area but it is very close to it.

Ash, South and East of A323

housing (in depth, existing or about to be developed)

land needed for a road and pedestrian bridge over the railway (no alternative site)

land needed for an off street car and cycle park (the existing car park is inadequate)

manor house with moat (13th century)

church hall

old rectory (Elizabethan)

church
I regret to say that your drawing on page 301 looks somewhat cavalier. It does not fully take into account the need for new development to be in keeping with existing development (which is mainly housing). See Policy D4 on page 119. It fails to protect a historic area, much of which has a pleasant character. There may be scope in the future to improve the character of some of the area (eg where there is a car sales business on the A323) but a significant amount of office development – which is strongly implied by your proposal - would harm the existing character of the general area.

Which buildings do you propose to demolish? Which open space will be used for offices etc?

Is there firm evidence that offices are needed within 500m of Ash railway station now, or during the life of the Local plan, or beyond? Even if there were to be a specific need, it should be borne in mind that it is not uncommon for offices to become empty for long periods. There have been empty offices in Farnborough (only a few miles away) for many years.

For the avoidance of doubt, of course there is no objection to continuation of the present small scale employment immediately next to Ash railway station.

You appear to be misusing the word 'buffer' in a totally inappropriate manner when you show a 500m buffer area. Do you mean that development which is not for offices, will not be allowed? Are you confusing the buffer at a railway station? Are you implying, with the word 'buffer', that residents should not worry about office development near their homes and gardens? The word 'zone' is used in Policy P4 and the word 'zone' would be better than 'buffer'.

Add to 4.4.21: The 500m zone around a transport interchange means that new employment (eg office development) may be allowed anywhere within 500m of the transport interchange.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Page 75 Policy E2 Location for new Employment Floorspace

Answer (if comment is on questions 1-7 of the questionnaire): ()
Page 29 Policy S2 Planning for the Borough – Our Spatial Development Strategy

**Objection** to the implication that much Green Belt land (some of which may not be specifically identified in the Local Plan) will be used for building development, even though it may not be a brownfield site.

Page 29, 4.1.9, Policy S2

Add to your list, Ash and Tongham, as Policy A29 on page 212 states “Land to the south and east of Ash and Tongham - This is a strategic location for development”.

**Objection** to Ash and Tongham being a strategic development site. There is an implication that that there will be inappropriate, large scale growth, perhaps with ugly tall buildings and inappropriate large scale road building. There will be insufficient land available to justify the term 'strategic development site'.

Pages 30-31 Policy S2

**Objection** – The reasons for objection are below. More justification for this objection is in my letter dated 5 July 16, pages 5-7.

The target of at least 12,426 new homes (700-850 per year) during the Plan period (2015-2034) is too high and unrealistic. It will harm the environment (loss of green fields and trees; more pollution). My view is there should be up to 400 new homes built per year.

Serious questions have been raised about forecasts of the number of homes that should be built (the use of historical statistics etc). Forecasts, especially involving economics over extended periods of time, are often wrong or misleading. It is unwise, and unsustainable, to have huge numbers of extra buildings in the Borough of Guildford (especially in the Green Belt).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

You have about 13 lines where you are starting words with a capital letter (ie upper case), even though elsewhere you have small letters (ie lower case). For example:

Policy H2: Affordable Homes: should be Affordable homes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Page 21, Spatial Vision

and be: and will be

Objection

12,426 additional homes by 2034 would be too many. The target is unrealistic. You could say up to 400. per year.

Objection to building on the Green Belt (with very few small scale exceptions).

Objection to development and loss of Green Belt at Blackwell Farm. There will be too much development on land taken from the Green Belt.

Page 22

Objection to proposed further development in and around Ash and Tongham on land beyond the Green Belt. The number of new homes and the density of the development will be too high.

located: located

Page 23

deliver: provide
In this sentence you are going to deliver road safety and congestion relief will be delivered. It looks as if you are running vans delivering items.

3.2

Objection – add the following:

Pollution and air quality

3.3

We have included 'air quality' to the list of issues in respect of the environment because poor air quality is a danger for many people, especially for children and elderly people. The local plan has the potential to limit or improve poor air quality by the implementation of many policies. Meeting various needs or demand for homes in the Borough will mean more roads to service homes, more vehicles and more air pollution. Poor air quality is already causing illness and death, especially in the south east. Data from Public Heath England indicate that 5.3% of all deaths every year in people over 25 are linked to air pollution. It is especially bad for children because their lungs are still developing. We will monitor air quality and take action (eg near schools) to limit air pollution as funds allow.

Note: The Guildford Borough Local Plan should contain data showing existing and future air pollution levels in various places in the Borough (eg in Ash and Guildford), just as it contains facts and figures for many other subjects. Data should not be in supporting documents only.

Parking

We have also included off-street parking as a lack of this often causes numerous problems for road users, pedestrians and residents.

Pages 24-26

Objection to the following not being specifically mentioned on pages 24-26:

air quality, cycle routes, off-street parking for cyclists and drivers.

Please see my earlier letters. Unfortunately, the amount of additional development planned by Guildford Borough Council will add to air pollution, disadvantage cyclists on existing roads and cause more parking problems.

Page 24 Environment Issue

Add improving air quality, eg near schools.

Page 24 Society Issue

traveler: traveller

Page 26 Infrastructure

public transport: public transport and cycle routes

In spite of the benefits of cycle routes, you have not specifically included them here, even though they may sometimes be forgotten by planners and engineers or may not be given much priority.

Add, as an issue: Lack of adequate, secure, well designed off-street parking for cars and cycles.

Your plans for increased development will increase the need for such parking, eg (a) on the south east side of Church Road A323, north of the railway, Ash, and (b) probably on the south west side of Effingham Common Road, south east of the railway at Effingham junction (alternative common land may have to be found to 'compensate').

|-------------|-------------|-------------|-----------------------|
| Document:   | Proposed Submission Local Plan: strategy and sites 2017 / Appendix C: Infrastructure Schedule |
| Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( ) |
| Answer (if comment is on questions 1-7 of the questionnaire): () |

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends.

For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

| Document:   | Proposed Submission Local Plan: strategy and sites 2017 / Policy A25 |
| Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( ) |
| Answer (if comment is on questions 1-7 of the questionnaire): () |
I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 – 2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.
The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/815   Respondent: 8933537 / Annie Ladd   Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.
The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/816  Respondent: 8933537 / Annie Ladd  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/817  Respondent: 8933537 / Annie Ladd  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: pslp171/823  Respondent: 8933537 / Annie Ladd  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/827  Respondent: 8933537 / Annie Ladd  Agent:
I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being “closely related”. In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

Comment ID: pslp171/820  Respondent: 8933537 / Annie Ladd  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure
will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.
2. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 2: Legal Compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp17q/111  Respondent: 8933537 / Annie Ladd  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.
5. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
6. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
7. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
8. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.
9. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.
10. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.
11. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound.
12. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018.
13. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.
14. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.
15. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.
16. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
17. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
18. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

19. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

20. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

21. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

22. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

23. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.
The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

12. Policy D4: I OBJECT to the insetting of villages (meaning in fact, removal of villages from Green Belt protections) and the fact that they will suffer from higher density development and the resulting increase in traffic and use of infrastructure which is already under pressure. I object in particular to the insetting of West Clandon, Send and the Horsleys. This will have a detrimental impact on the openness of the Green Belt and the views in and out of the AONB in direct contravention of Policy P1 and P2.

3. I OBJECT to the Settlement Boundary which has been imposed on East Clandon without any consultation. This imposition provides no protection to further development outside of the settlement boundary (Policy P2 para 4.3.25) and is unnecessary in an already tightly developed ancient and rural conservation village. This proposal would endanger the openness of the Green Belt, the views in and out of the AONB (protection of the AONB Policy P1) and the character of the village.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Policy P2 – Green Belt: I OBJECT to this significant erosion of the Green Belt with the proposals for large towns being developed on Green Belt land thereby removing the openness of the Green Belt. The huge developments proposed for the North East quadrant of the borough (Wisley Airfield, Gosden Hill Farm, various farms and tracts in the Horsleys and Garlicks Arch at Send) will have a severely detrimental effect on the amenity of the area.

2. I OBJECT that Policy P2 is not met where it states that Green Belt should be protected. I object to the disproportionate use of Green Belt land for housing – some 65% of the housing proposed is on Green Belt, with little consideration being given to redevelopment of brown field sites.

3. I OBJECT to the changes to Green Belt boundaries. This is not justified by any very special circumstances. All the Green Belt sites meet the five purposes of the Green Belt.

4. I OBJECT to building on the Green Belt because the essential characteristic of Green Belt is its openness and permanence (National Planning Policy Framework paragraph 79).

5. I OBJECT to the fact that brownfield land would be disproportionately used for commercial development and unnecessary retail expansion. This means Green Belt land is used for housing development unnecessarily;

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

14. I OBJECT that GBC are contravening the NPPF framework stipulation in paragraph 87 with the proposed developments at Gosden Hill Farm, East and West Horsley and Garlicks Arch, Send. Paragraph 87 states “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.” All of the proposed developments are out of proportion to the surrounding area and none qualify for the exceptional circumstances required to take them out of the Green Belt.

15. I OBJECT specifically to the proposed building on Gosden Hill Farm on Green Belt designated to prevent West Clandon being absorbed into a sprawling urban environment. The proposed development would be four times the size of the village and is completely disproportionate and unjustified.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/7568  Respondent: 8933793 / Sally Novell  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to Policy S1 which doesn’t offer sustainable development as regards roads and rail infrastructure. The current road network doesn’t cope with existing demand, with frequent congestion on the M25 and A3 in particular, and the trains are already overcrowded. No pre-emptive planning has been made to alleviate these problems which will be much exacerbated by large increases in housing in the north-east of the borough. I am particularly concerned about the impact of additional traffic on narrow winding local roads such as the A247 through West Clandon and the Ripley Road in East Clandon, which is already used as a cut-through to and from the A3. This would be much exacerbated by the proposed huge housing developments in the area which would inevitably result in a large increase in cars and travel.

2. I OBJECT that Policy S1 (Presumption in favour of Sustainable Development) is not being met as there are no fixed plans to improve the provision of shops, medical facilities, schools in the area. The infrastructure has not been properly assessed and is inadequate to deal with current housing levels – roads, doctors, schools will not be able to cope;

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/7552   Respondent: 8933793 / Sally Novell   Agent:

Objection to the Guildford 2016 Local Plan

I OBJECT to the 2016 Draft Local Plan as a whole and in particular I object to the specific issues listed below. I believe that this deeply flawed Local Plan will have a direct and detrimental effect on the amenity currently enjoyed by residents of East Clandon, West Clandon, Send Marsh, Ripley, West and East Horsley. It erodes the openness of the Green Belt and endangers the beauty and views in and out of the Surrey Hills AONB.

My specific points are as follows:

1. I OBJECT to Policy S2 for the proposed provision of the very high overall housing numbers of 13,800 new homes (690 new dwellings being built every year for 20 years). I object on 3 grounds:

   1. these housing numbers have been imposed with no real consultation being undertaken with residents;
   2. the housing numbers are based on a high-growth economic development plan which in itself has had no consultation and this combined with estimated demand from London residents will turn Guildford into a dormitory town for London;
   3. no real economic or housing demand factors have been provided by the borough planners to substantiate the very high housing target of 13,800 new dwellings over the next 20 years.
2. I OBJECT to the proposed scale of new building throughout the borough, which is disproportionate and unjustified.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I also wish to add that as a young person I object most vigorously to the inclusion of FWA/TFM on the basis that it has been for over 1000 years and remains to this day a working farm which provides much need agricultural supplies to the population of England. The land is also part of the greenbelt – the lungs of London. As a young person I believe that the elected officials in this borough have ridden rough shod over the concerns of over 20,000 residents in their drive to get large tranches of financial aid from large property developers and central government. This need for funding is transparently obvious to most residents while most of the ‘elected’ GB Councillors continue to deny this is the reason they have ‘opted’ for the ‘story’ that Guildford’s housing needs are as high as they suggest. Organic growth in the villages is what is needed not this fixation on building large (2000+ houses) numbers of houses on the middle of a farm in the middle of the rural village of Ockham.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

6) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
3) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 164 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

5) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from
London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

Answer (if comment is on questions 1-7 of the questionnaire):()

I draw your attention to the very serious existing problems in the village with infrastructure - roads, flooding - on roads and in gardens, many of which are still waterlogged in mid-summer, drainage, sewage, etc - and facilities - schools full, doctors, failing businesses (shops only occupied because of the high proportion of charity shops - low rents/rates, low staffing costs and no stock costs!), no useful buses, to mention just a few. There is a high dependence on car use. For these reasons a large increase in the numbers of houses in the villages would not be viable or sustainable in the ordinary meanings of those words. It would also destroy the character of the village. For all the reasons given above, I am against anything other than small scale additions to housing, which have been taking place steadily over the last 22 years and have contributed, largely appropriately, to increasing the housing stock.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire):()

The harmful effect on the Horsleys is magnified by the proximity of the so-called Wisley Airfield Site. This site is key to the maintenance of the Green Belt and building a new settlement here would contribute to the creation of an urban corridor through the Green Belt. It has high amenity, farming and historical value. A planning application has recently been rejected by GBC on numerous grounds. For all these reasons, the site should be removed from the Plan now

Answer (if comment is on questions 1-7 of the questionnaire):()
I object to this policy. The borough's prime leisure and tourism asset which needs protecting is its countryside, dotted with open villages and visible from the urban centre of Guildford itself, by maintaining all boundaries and the integrity of the Green Belt. This is seen in the large numbers of cyclists particularly and walkers, economically valuable tourists. This lack of development is highly prized in the overcrowded south east of England, particularly so close to London, but also accessible from Europe and from the major airports. There are ample visitor 'attractions' in the region of all sorts. None further are needed. Some such as the town centre of Guildford's Wey riverside could be opened out and enhanced.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this policy. In its concentration on shopping the policy fails to take into account the irreversible move to online shopping, so that further retail space is unnecessary, particularly with recent spectacular failures. This is likely to be a continuing trend. The key would be in revitalising niche shopping in keeping with Guildford's historic setting and using underused commercial space for housing in the town centre where most people especially the young and the older want to live and where the facilities and infrastructure exist to support it. This in turn will help to revitalise the town centre. Your vision recognised that the ideal position is for development to take place within existing urban boundaries. I support this policy wholeheartedly as one who's intention is to move into an urban area within the next 10 years to be closer to amenities and able to function using public transport and without a car. In the plan, I expected to already to see this work - a real determination to find, and a detailed analysis of sites in urban areas as your priority focus and I charge you to make this information available to us, the residents. Beyond that, I call on you to think creatively. Car parks do not need to be taking up space above ground. There are examples certainly just across the Channel (eg Chartres) of how urban land can be freed up (and aesthetics improved) by moving car parks underground. Look at how burying the A3 has improved our countryside. I call on you to think creatively and mobilise County and Central Government to do so with you. Yes it will cost money, but what cost destroying the Green Belt? Developers, big and small, need to understand that there is no quick buck to be made out of the Green Belt so that their efforts will turn to regenerating the urban areas.

Answer (if comment is on questions 1-7 of the questionnaire): ()
For East Horsley to be listed as a district centre in the settlement hierarchy is still a distortion of ordinary language, which is being done to make it easier to push development on to the village. People go to Guildford for their shopping, etc and not to East Horsley which struggles to keep shop premises occupied and is oversupplied with non-commercial charity shops and estate agents. In following the tick list exercise in more background documents, your agents seem to have lost sight of reality. I do not agree with the settlement hierarchy and I object to this policy which would allow for sites on the edge of so-called district centres to be considered for retail developments. These are more appropriate in urban areas, but please note my comments on changing retail habits.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this policy and to the proposal to build 13,860 new homes. The figure is not substantiated as a genuine or reasonable estimate of new homes needed. I understand that councillors have not even been able to scrutinise the methodology which produced the figure. It is unreasonable to base the number on the arbitrary Housing Market Area (HMA) selected of Guildford, Waverley and Woking - why exclude Mole Valley which is much closer and with which we have much in common? Many of the borough's residents work elsewhere and many who work in the borough do not live here, the housing market is much more complex than allowed for. Guildford should not be lumped with Woking and expected to meet its urban needs, nor should it have to accommodate the ever present demand from those moving out of London. The housing number is unreliable and especially in light of the decision to leave the EU, must be properly and transparently re-assessed in the light also of Guildford's 89% Green Belt. In consequence I object to all the housing policies H1 - H3.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to this policy.

This policy states: "the general extent of the Green Belt has been retained". This is a lie. Insetting 14 of the borough's villages is not in any view "retaining the general extent of the Green Belt. I am totally opposed to the named villages and additional land surrounding those villages being taken out of the Green Belt. The Green Belt policy and the Green Belts themselves were devised for just this situation in which we find ourselves now. It is essential to the preservation of the Green Belt that it should not be eroded in this way. You will be well aware of the prohibition in para 83 on Guildford Borough Council (GBC) changing established Green Belt boundaries except in 'exceptional circumstances'. You have outlined no such exceptional circumstances either in the Plan or in the background LAA. With all the guidance provided recently by Government Ministers, it is now quite clear that unmet housing need (if there were unmet housing need in question which I dispute) does not constitute exceptional circumstances. There are therefore no grounds for the Green Belt boundary to be changed in Guildford Borough.

As the National Planning Policy Framework ('NPPF') states at para 79: "...the essential characteristics of the Green Belts are their openness and permanence." The characters of those villages which I know well (the Horsleys, Effingham, Ripley, Shere) are all different but all with an essential openness quite different from the urban areas due to their small sizes and very low density of housing and extensive green areas. I am sure this is true of all the villages. They sit in the open landscape of the Green Belt and form an essential element of it. Exactly as it says in para 86 of the NPPF, "It is necessary to prevent development in [those] village[s] because of the important contribution which the open character of [each] village makes to the openness of the Green Belt [and so] the village[s] should be included in the Green Belt." In particular, East Horsley, where we live has had its openness protected by the actions of the local community in purchasing large areas of woodland in the (The Forest and Great Ridings Wood) to be held in perpetuity by the Woodland Trust.

We need you to continue the vision and tenacity which led to the creation of the Green Belt as it continues to serve all the purposes set out for it at the time (the lungs of London) and later in the NPPF (stopping urban sprawl and four others) and the villages need to stay in the Green Belt for its proper protection. The role of Surrey's open spaces open villages and woodland in the fight against climate change will only become more obvious as time passes as will their crucial role for wildlife and biodiversity. The amenity value of these villages for local towns and London is clearly seen - just one example is the hundreds of cyclists coming through East Horsley through the year. Another is its Millenium walking trail showing its openness. You can not pick off some villages and take them out of the Green Belt without endangering the whole by allowing urbanisation into its heart. You only need to look at the Weybridge, West Byfleet, Woking spread to see what will happen if villages are taken out of the Green Belt. I have seen nothing in your documents to convince me this is necessary.

In the NPPF at para 58, it states "Local and neighbourhood plans should develop robust and comprehensive policies that set out the quality of development that will be expected for the area. Such policies should be based on stated objectives for the future of the area and an understanding and evaluation of its defining characteristics." With 89% of Guildford Borough in the Green Belt, its overriding defining characteristic is its Green Belt status, a fact that may be forgotten from the Borough Council Offices in the centre of Guildford. GBC's Local Plan needs to have that defining Green Belt characteristic at its heart and until it does so is fundamentally flawed and I object to it in total. Let your legacy and ours be the preservation and continuation of the Green Belt for future generations as was always intended and not its destruction.

I object to the extensive changes to settlement boundaries by the insetting boundaries and to infilling 12 of the Borough's villages. This is an indecent land grab of fields and other open land, one must assume for future development purposes and has not been justified in any way.

The flawed Green Belt and Countryside Study clearly discloses GBC's bias in favour of development in the Green Belt in the brief for the GBCS, which was effectively how to destroy it: 'Provide a robust, independent assessment of Guildford Borough’s Green Belt and 'countryside beyond the Green Belt’ with a view to potential release for development purposes in the longer term, should this be necessary within the

Guildford Local Development Framework Plan Period 2006-2026 (and up to 2030), identifying realistic sustainable location(s) for green field release.’ p1 of the summary document to the GBCS.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I am saddened to be writing to you for the third time to object to a Local Plan which in spite of unprecedented thousands of objections has not been altered in any material way to reflect the wishes of local people. There has been no meaningful consultation in any ordinary accepted sense of the word of listening and taking heed of views. As the Plan is so little altered all the previous letters of objection still apply and it is immoral on the part of Guildford Borough Council (GBC) to state that they will not do so. I suspect that many local people will be too disillusioned to bother to write yet again. For these and other reasons stated in my letters of 29th November 2013 and 21 September 2014, which I wish to apply to this stage of the consultation as well, the consultation process has not been a fair process.

I will refer in my letter to Policies in the Plan to which I have particular objections. Many however are too complex or obscure for me to be able to comment in detail. However, as detailed below, I believe that GBC's Local Plan needs to have the defining Green Belt characteristic of the Borough at its heart and until it does so, the Plan is fundamentally flawed and I object to it in total.

GBC has shown no exceptional circumstances for changing the Green Belt boundaries to remove 14 villages from the Green Belt, extending the size of those villages in the process. The Plan is therefore contrary to the NPPF.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
It is not too late to make a Local Plan which accords with the character of the Borough and the wishes of local people. I call on you to carry out a proper Plan/GBC led review of urban brownfield sites, particularly in and around Guildford town centre, as proposed some time ago by Guildford Green Belt Group. Their work shows that a much greater proportion of housing need can be met in the urban areas on brownfield sites and I support this, as someone who wishes within about 10 years to move to an urban area for proximity of amenities and to remove the need for car travel. Redeveloping urban brownfield sites is not of course the easiest way for developers to make a profit, but it is best for the whole of our borough as recognised in your Vision, but not carried through into your policies. It is time to stop allowing developers to lead the Plan by proposing sites and time to make it clear that there is no big profit to be made by banking Green Belt land for future development. Please stand by the promises that have been made to protect that land.

I call on you further to make a realistic and transparent estimate of real local housing need in accordance with Parish Council neighbourhood surveys and in line with national statistics, revised to take into account economic and other forecasts post the Brexit vote. Stop wasting our money on opaque modelling that is not explained even to you who are supposed to be representing us.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Guildford Residents Association has commissioned an expert report on the SHMA which concludes that the objectively assessed housing need is smaller than the prediction by G L Hearn. It appears that there was pressure to come up with a large figure. Particularly unsupportable is the addition of 31 houses per year to increase affordability. Why is it 31 and not 300? What economic model justifies that such an element in the target will do anything for affordability? All adding this number will do is bring extra people to settle in Guildford who can afford the high prices, it will not bring prices down.

Why has Guildford not applied constraints to the housing target in the way allowed by the planning guidance and used by neighbouring boroughs? Stating that this will be applied on a case-by-case basis is not the same as having a plan. It means there will be endless negotiations with developers which are bound to be defeated on grounds of viability. The purpose of having this feature in the planning process is to allow for the recognition of constraints such as flood plain, AONB, green belt, etc. The plan authors have abdicated their responsibility to the Borough’s inhabitants to maintain the attractions of the town and its surrounding countryside. The omission of constraints on housing need is unacceptable.

The evidence is not yet in a sufficient state to support the increase in housing and retail proposed in the plan. Where is the central bus exchange to be allowing passengers to change from one service to another? How will the increased number of rail passengers access the station? How much traffic relief will the sustainable transport corridor provide and will it be feasible in the current narrow roads? How will shoppers travel to the extra 40% of retail space?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Why is so much green belt to be lost? What are the exceptional circumstances that require such a widespread sacrifice of our precious countryside? There should be much more emphasis on brownfield development such as providing housing in the town instead of unneeded retail space. The plan anticipates using all the potential greenbelt sites in one planning cycle leaving no similar expansion into greenbelt for the future generations. This is desperate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

This plan barely deserves the title of a plan. It seems to me to be a catalogue of things that might happen without any clear vision of what sort of town we are aiming for. Adopting the SHMA result as a housing target without applying constraints means that the Borough Council is abandoning any consideration of any of the Borough’s needs other than having a huge house-building programme. Committing to so much Green Belt development is a contradiction of the Conservative pledge to protect the green belt. The transport provisions are sketchy and will not alleviate the congestion already present and destined to get worse when the new developments are built. Why is there a 40% increase in retail space specified when online shopping will make such an increase unnecessary? The plan is not ready for an inspector.

I support an expanding and thriving Guildford which evolves in a way which maintains and enhances the character of the town and preserves its country setting. This plan does not address such development and is merely an assembly of developers’ wish lists. I commend the submission from the Guildford Residents Association.

Attached documents:

Comment ID: pslp173/326  Respondent: 8934561 / Chris Jubb  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - West Clandon
Living close to Burpham I am naturally dismayed by the Gosden Hill plan. Burpham Community Association has expressed its views in this consultation and I agree with all it says. The proposal will bring extra traffic through Burpham centre which already is regularly gridlocked by shopper’s cars queuing to enter Aldi. Funnelling the traffic generated by the Gosden Hill residents through the Burpham will make for intolerable traffic congestion at peak times. The proposed access solely onto the southbound carriageway of the A3 is a false economy and will lead to frustration not only to residents or the development but to residents of Merrow, Burpham and Christchurch.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/3236  Respondent: 8934561 / Chris Jubb  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID3

Guildford appears to have very limited influence on the road network since the A3 which has a profound influence on traffic circulation is in the hands the Highways Agency who work to their own timetable, funding cycles and priorities. The Sustainable Movement Corridor seems to be based on wishful thinking. It appears a worthy attempt to modernise and ramp up the use of more environmentally friendly transport, but given the constricted amount of space available it will inevitably restrict traffic volumes and add to congestion instead of easing it. Modal shift will not occur if journey times are longer; bus passengers and cyclists will only use it if it is convenient and journey times are short and reliably consistent. Traffic congestion is expected to increase during the plan period which is an extraordinary thing to plan for. The Borough is in a difficult place, both literally and metaphorically. Limited space and resources to expand to meet its housing and business expectations and to develop the infrastructure to support this expansion.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Since I began to put these comments together, there has been an enormous change in the outlook for the UK, which will have impacts on Guildford and everywhere else - and render the Plan’s housing targets void as the assumptions behind them are no longer valid. The referendum vote that the UK should leave the EU (which I personally did not want, but is now a fact of life) will reduce pressures on our housing stock in two ways. There will be less immigration, and it is also likely there will be a general deterioration in the UK economy. Both these things now make futile the high-growth wishful thinking that lies behind the Plan’s projected housing numbers. The whole Plan needs to be reconsidered to take account of these changed national circumstances.

Finally, it is also objectionable that the Council has published its proposals with such a short time allowed for public comment, on such a long and complex document; especially at a time when much public attention has been taken up by the EU Referendum, and when many people are going on holiday. More time ought to have been allowed for comment. Due to various other commitments I have had insufficient time to study the whole of the Plan properly. So I reserve the right to submit additional comments if I have time to complete my perusal between now and 18 July.

For the Horsleys, this proposed scale of housebuilding would so enlarge the villages as to overwhelm and destroy their existing charm. Instead of living in a village, residents would end up living in an expanding, suburbanising conglomeration with entirely inadequate local infrastructure.

Answer (if comment is on questions 1-7 of the questionnaire): ()
The desirable character of most of the villages in Guildford Borough, such as East and West Horsley, very much depends on their remaining at or close to their present size and not being overwhelmed by new housing estates. Local facilities in our villages that are already fully stretched include roads, schools, water and sewerage, shops, medical services, and associated car parking spaces. These constraints mean there is no room for any significant increase in population in our villages.

Ultimately (and I recognise this is outside the remit of Guildford Borough - but it needs to be taken into account in assessing whether the Borough’s proposals make any sense), it would be crazy to either allow the UK population to expand indefinitely at anything the current rate; or to encourage incomers to settle anywhere in the overcrowded South-East region (other than perhaps in inner London, and a few other town centres). The region has very limited natural resources (in particular drinking water, in the droughts that are an increasing risk from climate change). This and other infrastructure constraints make it imperative to spread the burden into other parts of the UK, where there is also better scope for more housing and a much higher need for an invigorated local economy.

At the present moment much of the South-East is still, despite all the pressures, a reasonably good place to live. But it will lose its remaining attractions if more and more people are crammed in.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The new in-setting boundary would extend the old settlement boundary and include fields and open spaces, which would thereby be made vulnerable to future development. This applies to currently valuable open spaces like Kingston Meadows (by East Horsley Village Hall) - I question why.

The current Plan would if implemented amount to a disaster, leading to long term destruction of the Green Belt and a much reduced quality of life in our villages. I therefore hope you will read my comments carefully and draw the appropriate conclusions.

I support the Guildford Greenbelt Group’s useful critique of the Local Plan, and the CPRE’s criticisms of the draft Plan’s housing need figures. I also support the arguments concerning the local situation being put forward by the East Horsley Action Group.

In my view it should be a fundamental principle that to protect the environment, and for many other reasons, there should be no building on Green Belt land and no boundary changes to reduce the amount of Green Belt land. (More about this is said in some of the following detailed sections of these comments, and in my Annex to them).

**Comment ID:** PSLPP16/1637  **Respondent:** 8934657 / Nigel Watson  **Agent:**
I strongly object to many of the proposals in the 2016 redraft of the Guildford Local Plan, as set out in my detailed comments attached below.

The draft Plan proposes serious - and in my view unnecessary - erosion of the Green Belt and major new housebuilding, both in East or West Horsley and in other rural places in Guildford Borough. I object both to the numbers of new houses proposed in the Plan, and to the proposed locations for building them.

It appears that in preparing the revised Plan the Borough has taken insufficient notice of the very large number of objections and other comments received after the last round of consultation. Like their predecessors, the new proposals are badly thought out and are arousing a very high degree of local protest. Planners and councillors should remember their duty to existing residents, and resist the trend to over-development to maximise short term financial gain.

The Council has just insulted our intelligence by describing (in its news sheet “About Guildford”) the revised proposals as “A Local Plan for Local People”. This is rubbish; made worse by an outright lie that the revision has taken on board residents’ comments on the previous draft. The reality is that little or no account seems to have been taken of the great weight of public objections to the earlier proposals, which are little changed - and in the overall scale of housebuilding envisaged, have actually been changed in the wrong direction. The vast majority of local people’s lives will be made much worse by the scale of building (on green belt, too) envisaged in the document. The only people to benefit from the proposals would be a handful of developers, those with land to sell to them, and their friends on the council.

For the whole Borough, the number of houses planned has risen to 693 houses per year over the next 20 years (compared with 652 per year in the 2014 draft) and is more than double the 322 houses per year that was approved in the 2003 Local Plan. These numbers are hugely excessive, but it is even more objectionable that over 60% of the new houses in the Borough are proposed to be built on land that is currently in the Green Belt.

At my more local level the new proposals include at least 148 more houses in East Horsley; at least 385 more houses in West Horsley; and that both villages would be taken out of the Green Belt. I object to these proposals. They would totally and unacceptably change the unique character of our villages, especially as the Plan also envisages the building of many more houses nearby: 2068 on the former Wisley Airfield; 400 more at Burnt Common; and 2000 at Gosden Hill Farm. None of these places is more than a few miles away from the Horsleys. It is likely the new houses will average more than one car per household, so the plan would result in several thousand more cars in use within a three mile radius of the villages. The impact on local roads would be tremendous. Parking spaces at Horsley & Effingham Junction stations (which are already full), at the shops , at the medical centre and at the village hall would all be grossly over-subscribed. Road congestion (especially at commuting and school pick-up times) would change from the present situation of everyday but manageable small delays into one of traffic jams and long periods of no movement.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal to allow the creation of a substantial new town at Wisley airfield.

The small changes made in the revised Local Plan to Site Policy A35 do not provide any justification for continuing to include this site within the revised Local Plan. I question GBC’s decision to remove certain other sites from the local plan’s development proposals, rather than the Wisley airfield site. Of all the larger sites included in the 2017 draft Local Plan, Wisley airfield has by far the worst sustainability. (See the updated 2017 Sustainability Assessment provided by GBC’s consultant AECOM; Wisley airfield is by some margin the site with the worst score – it is given 8 red flags in the AECOM criteria). In rejecting a 2015 planning application for development at the Wisley site (proposed in advance of the Local Plan) GBC identified 14 reasons to justify their rejection of the planning application, including: its being in the Green Belt; its major impact on traffic flows; its severe environmental impacts; its total lack of existing transport and other infrastructure; and many other factors. According to GBC’s consultation website, a total of 1,429 comments were registered in the 2016 Local Plan consultation about the Wisley airfield site – 97% of them were against its development. So why has GBC chosen to maintain Wisley airfield as a housing site in the 2017 revised Local Plan?

A planning appeal on Wisley airfield is due to be heard in September 2017. If the planning inspector decides to reject the appeal of the current developer (Wisley Property Investments), GBC should finally listen to the views of residents; accept the AECOM sustainability conclusions on the deficiencies of this site; and remove Wisley airfield entirely from the Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Although small changes have been made to Site Policy A39, it seems GBC is still proposing to include this Green Belt site within the revised Local Plan. I object to this. In its previous Local Plan submission East Horsley Parish Council concluded that the removal of this site from the Green Belt was not adequately justified by GBC or their consultants Pegasus. They argued that the change in the inset boundary proposed in the Pegasus Green Belt & Countryside Study for this site has no merit whatsoever. The Pegasus study proposes the movement of the settlement boundary westwards from behind the houses on the western side of Ockham Road North up to the eastern boundary of Lollesworth Wood, thereby removing over 5 hectares of currently farmed land from the Green Belt. However, the present Green Belt boundary line is defined by a deep drainage ditch, classified by the Environment Agency as a ‘river line’. As such, this river line represents a highly defensible Green Belt boundary. Therefore, I concur with the Parish Council view that there is no justification for moving this boundary under current Green Belt rules. The site also has other serious deficiencies for development with much of the land being classified as a flood zone. The site is also directly adjacent to an important SNCI.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

GBC seems to be taking the housing need projections of GL Hearn as the housing targets proposed in the Local Plan. This however fails to take into account any of the significant constraints which limit the supply of housing across the borough, in particular the large proportion of land which currently falls within the Metropolitan Green Belt; and our already over-stretched infrastructure.

GBC has a revised Green Belt policy P2 in the Local Plan which states that “The Metropolitan Green Belt will continue to be protected”. However in reality this alleged “protection” is totally incompatible with GBC’s proposal to remove large amounts of land from the Green Belt in order to build the large number of houses required for the Plan’s excessively high housing targets.

It appears that the majority of the land being proposed by GBC for development under the revised Local Plan is currently part of the Metropolitan Green Belt; the Guildford Green Belt Group have estimated that some 57% of all the new housing proposed in the 2017 GBC Local Plan is to be built on land which is currently Green Belt.

This is contrary to ministerial guidance and planning inspectorate decisions which continue to support the position that unfulfilled housing need does not constitute the ‘very special circumstances’ needed to justify building on Green Belt land.

The Green Belt & Countryside Study produced for GBC by the consultants Pegasus proposes numerous changes in Green Belt boundaries without due justification in order to deliver land for housing use in the Local Plan. I consider that the justifications given by Pegasus in their Green Belt & Countryside Study are extraordinarily weak and in many cases fail to meet the planning criteria required for moving long established defensible.

Green Belt boundaries.

East Horsley Parish Council has commented further on the detailed Green Belt boundary changes proposed by GBC and I agree with their comments on this.

It is especially concerning that the Green Belt land selected for housing in GBC’s Local Plan is mostly in the north eastern part of the borough, and thus is closest to London. Eroding this section of the Green Belt would take away precisely the part that is most needed to prevent encroachment of the Greater London suburbs into our borough; it would therefore negate the most vital element in the whole Green Belt concept.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As I have already pointed out the revised Green Belt Policy P2 continues to make the hollow promise that “The Metropolitan Green Belt will continue to be protected”. However, this is worthless if the reality of the Plan is to remove some currently protected land from Green Belt designation!

On specifics, I object to the proposal to inset the village of East Horsley from the Green Belt. There is no justification for this approach. East Horsley is a village of rural character and low density (just 8 dwellings per hectare). Most houses in the village have large gardens with trees, shrubs and lawns; many also use hedges as their boundaries, and some contain ponds. As a result East Horsley makes an important contribution to the Green Belt, providing openess, picturesque green spaces and wildlife corridors which support a rich biodiversity. For example, there are currently an estimated 43 legally protected species of wildlife to be found here.

If East Horsley is inset from the Green Belt, as proposed in the revised Local Plan under Policy P2, then important Green Belt planning protection will be lost over land currently within the settlement area. This will inevitably lead to increased development within this area - and the loss of openness, destruction of trees and hedgerows, diminished biodiversity and the impairment of the landscape. There are already considerable development pressures in the Horsleys leading to the over-enlargement of houses and some loss of green space; the changes proposed in the Plan would make this far worse. As I have already said, the Green Belt land surrounding East and West Horsley is one of the first lines of defence against urban and suburban encroachment outside the M25. Insetting East and West Horsley from the Green Belt would therefore represent a significant weakening of one of the most important parts of the Green Belt barrier in Guildford Borough.

I note that the analysis of the 2017 Plan by East Horsley Parish Council concludes that the proposed changes in our settlement boundaries would increase the total settlement area by some 37%. This to my mind is an extraordinary and disproportionate increase. I object strongly to this proposal, which if implemented would inevitably have a very adverse impact on the character of the village. East Horsley and West Horsley are presently still rural, but an increase on this scale would make us into a suburb!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
This revision now proposes a target for new housing in Guildford borough of 12,426 homes. While this is a small reduction from the 13,860 proposed in the previous draft, it still seems far too high. I strongly object to the 12,426 homes target for the following reasons:

a) The conclusions of the revised SHMA are very likely wrong

However it takes insufficient account of many significant changes during the past 12 months, particularly those connected with Brexit and national targets for reduced immigration, which are likely to result in major changes in population trends, migration patterns and the economic development of the UK. It is very probable that the whole economic future of the UK is less rosy than many people (especially politicians) like to think. In addition to Brexit, two other major factors that will limit growth are climate change and constraints on energy supply. Both seem likely to impact on economic activity, prosperity, and housing demand during the coming decades. It is also worth noting that expert demographers confidently expect world population to peak within the next few decades, and then start to fall. While this will take time to work through to become a reduction in UK housing demand, it does suggest that assuming and planning for an never-ending increase in UK population is the wrong strategy. In this context, it is surely prudent to prioritise the conservation of our irreplaceable natural assets of wildlife and countryside; and not promote a suburban sprawl which in the longer term would be wasteful and unnecessary. Instead we need to re-direct necessary development towards under-used and brownfield sites.

On the detail of the Plan’s housing numbers, I agree with much of the analysis submitted in comments by East Horsley Parish Council and will not go into this further. The key point is that given the considerable uncertainty in all forward trends for economic growth, population and housing demand, it would be prudent to be very cautious and conservative in making forward projections used for long term policy. So, why has GBC chosen to adopt the highest forecasts on offer to establish projections of future housing need in the borough? I believe this approach by GBC is almost certain to be wrong.

b) GBC fails to allow adequately for known planning constraints, especially the Green Belt. GBC seems to be taking the housing need projections of GL Hearn as the housing targets proposed in the Local Plan. This however fails to take into account any of the significant constraints which limit the supply of housing across the borough, in particular the large proportion of land which currently falls within the Metropolitan Green Belt; and our already over-stretched infrastructure.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The housing number of 693 is far too high. The SHMA calculations on how this number was reached have not been provided (and we have been asking for two years). Nobody in the council has checked it (or that is what the council have told us). Resident cannot check the calculation as GBC have refused to provide it. We are taking the number on trust from a company called GLHearn who represent developers, and boast on their website they solve developer problems.
Constraints on the housing number NEED to be applied as allowed but have not been. Guildford is 89% Greenbelt, 44% Area of Outstanding Natural Beauty, yet our roads are gridlocked and that is TODAY. This plan will not fix that just make it worse that is 14000 houses at 2 cars per house... on our roads extra!

Brownfield opportunities are being ignored, or assigned elsewhere – we need more homes in the town centre (not 40% more shops), and much more accommodation on campus for students, and homes for the elderly to free up family houses. The University needs to build the student accommodation it promised in 2003. The University impact needs to be allowed for and managed in this plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I simply cannot support a plan that will destroy acres of biodiverse green space. As I walked along the bridleway yesterday, I watched three species of birds that depend on this habitat for local breeding and survival. It is not acceptable to damage these populations, they require protection.

There is a balance to providing a sustainable community for growth and protecting natural resources. In this case I firmly believe the plan is wrong and reiterate that I DO NOT support the plan and the Blackwell Farm development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Please find this email as an objection to potential development at Blackwell Farm, under the Guildford Local Plan. As a local resident and passionate conservationist and educator I cannot support this prosed development at all.

Inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9]:

1) It is home to a breeding population of nationally conservation sensitive bird species, including breeding populations of yellowhammers and skylarks. They are in decline and require protection LOCALLY.

2) It disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]

3) It directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas

3) It ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]

4) It will add to air pollution in neighbouring areas, which already exceeds safe EU limits for nitrogen oxides [Policy A26].

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We originally opposed the Keens lane development as it would be harmful to the occupants and the wildlife in this local area. We are now astounded to see that you have increased the number of houses in the plan here. Any development on this land would be extremely harmful and will cause issues such as the below:

- Loss of habitat for the Deer, Bats, birds of prey and other wildlife in these fields and surrounds.
- Traffic congestion and increased danger to people and horses from the extra entrances and exits to Keens Lane / Tangle Lane
- Increase in people using Whitmoor Common, which will put this protected area under more strain.
- Increased likelihood of bad flooding in Tangle Lane due to water run-off from the development in these fields.
- Noise and Light pollution will also increase.

We would like to re-register our objection based on the change to the plan.

Further, I notice that the projected housing "need" is based on analytical studies and adjustments involving dubious arithmetic which has been queried by planning experts. At the very least, the calculations are not transparent and open to scrutiny. Taken across the whole borough, they involve a 25% increase in the housing stock which seems scarcely credible, all the more so when majority of houses are planned to be built on what is currently Green Belt land, and the government has 'categorically said that these are not "special circumstances".

Answer (if comment is on questions 1-7 of the questionnaire): ()

When I looked at the June 2016 draft of the Local plan, I was very disappointed. Very few changes had been made to the earlier draft of the plan in the light of the many hundreds of consultation responses you received including my own. What is the point of local consultation when you are just 'going through the motions' and have - so it appears - fixed views on what the outcome will be?

I maintain my strong objection to removing the villages of East and West Horsley from the Green Belt. As I have said before the existence of the Green Belt has not hampered the development of the villages in the post-war years, and I believe that suitable creative planning policies could be devised to continue this organic development of the village while maintaining appropriate standards consistent with the existing character of the villages.

I therefore object to the Local Plan because of the proposed removal of the villages from the Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Finally I'd like to comment on the effect of this programme of accelerated and forced development of our village (East Horsley) on the local infrastructure. To take just one example, the roads are simply not wide enough to accommodate an increase in lorry and commercial traffic, and the geography of the two villages prevents a widening of most of the roads which are little more than country Lanes. A few days ago there was a serious car collision in the very centre of East Horsley because of poor visibility. It is simply not good enough to say that our infrastructure services are the responsibility of a different public authority; council tax-payers have the right to expect joined-up thinking. If the building programme goes ahead as you propose, it will involve a permanent down-grading of the quality of life in this part of Surrey.

I therefore object to the draft Local Plan because of the perfunctory attention that is given to the effect of the proposed house-building on the local infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object most strongly to Guildford Borough Council’s local plan for housing and development. As a resident of East Horsley I am deeply concerned by the proposals, which will have a profoundly damaging effect on the character of the village, and will stretch the local services to beyond breaking point.

It is extremely frustrating that I have previously written on many of these points, as did many others during the consultation process for the local plan in 2014, and yet the current local plan contains the same major flaws. It would seem that GBC is taking no notice of the concerns of residents, and has not made any attempt to explain why it feels that re-drawing Green Belt boundaries is justified, nor to review the clearly incorrect estimates of housing need.

Once again, and in summary, there are a number of key points which I REJECT:

1. The proposal to remove the Horsleys from the Green Belt. This contravenes the National Planning Policy Framework and will destroy the openness inherent in the planning and building within the settlement boundary. The changes proposed by GBC will destroy this openness permanently and GBC have in no way demonstrated ‘exceptional circumstance’ in order to justify this.

2. The proposal to extend the settlement boundaries of the Horsleys which goes totally against the principles of Green Belt planning. GBC have shown no evidence that justifies this proposal.

3. The result of the Strategic Housing Market Assessment referred to in the proposed plan. Estimates that 593 additional houses are required to be built within 5 years of adopting the plan are hugely inflated. Other estimates, provided by detailed analysis using a number of different methodologies have shown that the total number of new houses required in East Horsley is in the order of 130 to 180 over the next 15 - 20 years. This is in line with population growth over the last 12 years, and takes account of the local demographic, the nature of local businesses, and the lack of students living in the Horsleys (which appear to have disproportionately influenced GBC’s calculations). Development on this scale is much more reasonable. I absolutely accept the need to increase housing stock, including the provision of affordable housing, but the scale of development must be proportionate, and the character of any development must be in keeping with the current character of the Horsleys, which are, and should remain, within the Green Belt.

4. The implication that the village infrastructure can cope with the significant increase in housing stock and therefore population. The local schools and medical centre are oversubscribed. The roads and pavements are suited to a small rural community. The proposal looks to increase the housing in West Horsley by 35%. This is totally unacceptable and the village infrastructure cannot cope with an increase of this magnitude.

5. The proposal to remove Fangate Manor from the Green Belt and include it within the Settlement Boundary. There are no exceptional Planning circumstances to justify removing Fangate Manor from the Green Belt, and changing the Settlement Boundary does not in any way enhance the defensible nature of the Settlement Boundary. It merely involves moving the boundary from one hedgerow to another, but leads to the loss of Green Belt and agricultural land.

6. The designation of Station Parade as a “District Centre”. One wonders whether the person responsible for drafting this comment has actually ever set foot within the Horsleys? Station Parade is simply a parade of local shops within a village, comprising services valuable to local residents. It is hardly a “District Centre” attracting people from surrounding villages.

7. The proposed major development at Ockham (former Wisley Airfield). This would have a significant impact on the Horsleys. Whilst there are many arguments against the appropriateness of developing the Wisley Airfield site, our main concern is around the ability of the current transport networks to cope with the increased demand. There is no rail connection to this site so it is highly likely that commuters would access Horsley and Effingham Junction stations to travel to London by rail. The car parking at these sites is already limited, and the nature of the roads connecting Horsley and Ockham is such that cycling would not be a safe or attractive option for many. The A3 and M25 (at the A3 intersection)
would be put under increased strain. Already there are traffic problems on this section of the A3 and the M25 at peak times. Increasing the demand by placing another 2000 homes in close proximity (not to mention those homes proposed for Burnt Common and Gosden Hill Farm, Burpham which will also likely put additional stress on the A3) will make this section of the A3 more congested and less safe.

Finally, there is an ERROR in the Land Availability Assessment dated February 2016, and we ask that GBC corrects this. There is a plan on page 299 that appears to show access to Fangate Manor from Manor Close. Manor Close is a private road, and access will not be granted. Our residents association, MCRA, would oppose any change to the character of this very quiet road. The road and the verges are narrow and are not suited to any growth in traffic.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**Policy 35 Wisley Airfield**

Again an application for this development was very wisely refused by GBC earlier in the year on many grounds. Again I do NOT therefore see the logic of including this development in the Local Plan. The idea of putting 2,000 new houses on this space is ridiculous; there are so many reasons for opposing it -

- It would be a new town in the heart of the current Green
- It would be ruining the lovely little village of Ockham (much of which is a conservation area).
- It would be very close to the Thames Heath Basin Special Protected Area.
- It would be very close to the Chatley Heath Semaphore Tower - an important historical site.

* It is near one of the busiest road junctions in the country - the junction of the M25 and the A3 features in the news frequently with great problems. Again there is very little scope for road improvements with RHS Wisley on one side and Boldermere Lake and a Thames Heath Protected Area on the other.

* There is very high pollution at Junction 10. The sensors record levels similar to Central London.

* The drainage in the area is poor. Most years there is flooding on the 82039 near the busy Wisley roundabout - the very spot designated as the main access point to the Wisley Airfield development!

* I am particularly incensed with all this devastation to our wonderful Green Belt making money for a Cayman registered company!!!

* I object to the inclusion in the Plan of The Thatchers Hotel and Wisley Airfield, both of which have been refused planning permission by GBC recently.

GBC needs to listen to the electorate and reassess its objectives! I would ask GBC to reconsider its plan to ruin our villages and attack our Greenbelt.

SITES POLICIES

Policy A36 Thatchers Hotel

An application for this development was very wisely refused by GBC earlier in the year on many grounds. I do not see the logic therefore for including this site in the Local Plan. Also now that the new opera house has received planning permission there is likely to be even more demand for hotel rooms in the village.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H1 HOMES FOR ALL

The general notion of 'Homes for all' is a laudable ambition. However it would seem that there is a particular need in the borough for cheaper homes and for homes for downsizers. In a generally affluent borough such as Guildford, proposals need to be generally targeted at providing homes needed by local people rather than large establishments attracting more commuters to our over crowded rail networks. The aim should therefore be not to pursue a 'one size fits all policy' but to target development to need.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**Policies 11,12,13 INFRASTRUCTURE**

GBC's rampant expansionist policy will be building on a crumbling infrastructure! The goal of 'sustainability' is very unlikely to be achieved. GBC's plans for our infrastructure seem to rely on others.

**THE ROADS & PAVEMENTS**

NOW driving and cycling on our local roads is an unpleasant experience. At present most people in this area wish to travel north/south. However most of our main roads (A246, A25, A31) go east/west! The roads going north/south are generally totally unsuited to carry the current amount of traffic especially with the enormous lorries. In Horsley we have a prime example of this problem. Ockham Road South and Ockham Road North are frequently in gridlock; these roads are narrow, pot-holed with several pinch points. Short of knocking down a vast number of large houses (most worth over a million pounds) there is limited scope for improvements!

The pavements are very narrow and uneven. Pedestrians have an unpleasant and hazardous trip with many lorries mounting the pavement. NOW it is an unpleasant walk to the station or the shops. It is particularly unpleasant for people with prams, pushchairs and wheel chairs. One is very concerned for children walking along these paths.

**SCHOOLS**

NOW we do not have sufficient school places to meet local needs. Children often have to be given places miles away in Dorking or Woking.

**MEDICAL FACILITIES**

NOW the medical services are struggling to cope with demand.

Generally I am very concerned about the infrastructure in the area as it is already over stretched and scope for improvement is very limited.

I would urge that any assessment of the current situation is not done in school holidays or main holiday times. It is important to do this work at prime times of the day and the year!

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2 THE GREEN BELT

Guildford Borough Councillors were elected on the promise that they would protect the precious Metropolitan Greenbelt! Sadly many councillors seem to have a short memory for their wise words at the election. This plan drives a super-sized digger through the precious Metropolitan Green Belt. On examination around 650,000 of the proposed developments are on the current Metropolitan Green belt. What sort of legacy is that to hand on to future generations?

The proposal to remove Greenbelt status from East Horsley & West Horsley is appalling. Not only is the plan proposing to remove the 'washed over' Greenbelt status from the current village area, it is proposing to extend village boundaries so that even more land will come out of the Greenbelt. The NPPF states that 'once established Green Belt boundaries should only be altered in exceptional circumstances'. I see no evidence that GBC have met these exceptional circumstances. The general consensus is that this is developer led.

I particularly object to 2 boundary changes to the village of East Horsley -

1. Kingston Meadow

The proposal to include the whole of Kingston Meadow within the settlement area and so take this valuable area out of the Green Belt seems ludicrous. Kingston Meadow is the main public recreational space in East Horsley. Why take this out of the Green Belt? I can see no logical reason for this by a Council supposedly supporting the Green Belt. Surely there can be no 'exceptional circumstances' to justify this unless beady eyes are on this delightful space for development in the long term.

2. Area south of the A246
I am particularly alarmed by the proposal to designate a large area south of the A246 as within 'the identified boundary of the village'. This is a huge area involving 45 hectares that is equivalent to 23°10 of the present settlement area. Policy P2 says this change will allow for limited infilling in the precious Green Belt area. Well - this area is at the start of the chalk downland that constitutes The North Downs - a very precious area much beloved by walkers & cyclists. This is yet another strange proposal from a council vowing to protect the Green Belt.

- I STRONGLY object to ALL the proposals in The Metropolitan Green Belt is one of our most precious assets.

**Answer (if comment is on questions 1-7 of the questionnaire):** ( )

I am hugely disappointed with the content of Guildford Borough Council's 2016 Local Plan. Sadly there is very little to applaud. In 2013 & 2014 GBC underwent time consuming and expensive consultation processes; GBC were deluged with comments and suggestions on both occasions. Did they listen? It appears not I do hope GBC will listen to the electorate this time!

Policy S1 PRESUMPTION IN FAVOUR OF SUSTAINABLE DEVELOPMENT

The Plan sets out a wish to comply with the NPPF's notion of sustainable development. This is an excellent aspiration. However I am sorry to say that I doubt whether the principles of sustainable development can be met by this plan. I cannot see there is much scope here for securing development that satisfies the 'three dimensions' in sustainable development as set out by the NPPF - the economic, social and environmental conditions in the area are not likely to be enhanced! The Plan overburdens parts of the borough with development in ways that will make it extremely difficult for the communities to function let alone find improvement.

* Therefore I applaud the idea of sustainable development but think that in many areas this plan will fall short.

Policy S2 BOROUGH WIDE STRATEGY

The Plan proposes the provision for 13,860 new houses for the period to 2033. Why? There is certainly a shortage of particular types of housing within the borough. However there is MUCH DOUBT as to the need for such a large number of new houses. I can find NO EVIDENCE to support GBC's claim that the need is there! I can only find evidence to show that GBC have wildly exaggerated the requirement for new housing. The rampant expansionist policy being promoted by GBC is very alarming. I strongly deny the need to build 693 houses per year through to 2033. This presupposes the requirement for a 250/o increase in the housing stock over the borough in that time. However this does not even agree with figures from The Office of National Statistics suggesting an increase of 15/o in the population of Guildford over that time. There is also now evidence since the EU Referendum that the economy will be cooling down and there will be less migration and less housing need than expected. However I suppose it is quite possible that with the falling pound more foreign investors will be interested in buying into our housing stock!

I am particularly annoyed that GBC have a propensity to blame others for their plans & actions! When a query arises over the matter of the excessive numbers, GBC blame official government policy & legislation for the figures. I understand the relevant government departments do not agree with this assessment!

The effect of S2 on The Horsleys

Under this New Local Plan East & West Horsley Horsley together could receive 593 new houses. At this moment there are fewer than 3,000 houses in the two Horsleys. Although the two villages each have their own very clear identity, development in one has a substantial effect on the other. Many facilities are shared. The schools are in West Horsley, while the station, shops and surgery are in East Horsley. All these facilities are considerably over stretched at present so to add 593 houses to the stock would result in chaos and would certainly not meet the sustainable development criteria as set out in the NPPF - there would be NO economic, social or environmental enhancement.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Office of National Statistics suggesting an increase of 15% in the population of Guildford over that time. However I suppose it is quite possible that with the falling pound more foreign investors will be interested in buying into our housing stock!

I am particularly annoyed that GBC have a propensity to blame others for their plans & actions! When a query arises over the matter of the excessive numbers, GBC blame official government policy & legislation for the figures. I understand the relevant government departments do not agree with this assessment!

The effect of S2 on The Horsleys

Under this New Local Plan East & West Horsley Horsley together could receive 593 new houses. At this moment there are fewer than 3,000 houses in the two Horsleys. Although the two villages each have their own very clear identity, development in one has a substantial effect on the other. Many facilities are shared. The schools are in West Horsley, while the station, shops and surgery are in East Horsley. All these facilities are considerably over stretched at present so to add 593 houses to the stock would result in chaos and would certainly not meet the sustainable development criteria as set out in the NPPF - there would be NO economic, social or environmental enhancement.

**West Horsley** would bear the brunt of the development with 405 new houses. This is in a village where there is only one small shop and that is scheduled to close in a few months. West Horsley Parish Council and Surrey Community Action Survey identified a limited need for some 20 affordable homes for local people who wish to remain in the village i.e. for young people and for the elderly who wish to downsize to a smaller home. I would dispute the demand for 405 new houses in a village with no shops, no post office, no station, very limited bus service, no surgery and overcrowded schools! All the new householders would need to get in a car!

**East Horsley** has most of the facilities but it is interesting to refer to GBC's own documentation. In the Guildford Borough Council's *Greenbelt & Countryside Study Volume 5* it says "East Horsley would not be appropriate for a major village expansion due to the current population of

3,785 meaning that only a relatively small population growth requirement of 215 would be needed to reach the 'critical mass' population of 4,000." Well the addition of the 188 new houses proposed in East Horsley would take the population well over that critical mass! East Horsley certainly has a reasonable collection of small shops at Station Parade, named as a 'district rural' centre in the Plan. However for this 'district rural' centre parking is a big challenge. The parking facilities do not meet current demand so it is impossible to imagine the situation if the Plan goes ahead. The Plan also picks out Bishopsmead Parade as a 'rural local' centre - rather a grand title for one small newsagent/post office! The other businesses in that parade are services such as dentist or estate agents. East Horsley has a station with a reasonable service to Waterloo. However again the parking facilities are very tricky indeed. Sometimes one pays £6.50 to park and cannot find a space! East Horsley has a surgery, which is not currently meeting the demands of its patients.

One also needs to put the situation in context and look beyond our village boundaries. Under this Plan there will be **4,993 new houses** built within 5-mile radius of the Horsleys; this will equate to the development of a village nearly twice the size of both Horsleys in the area Horsley/Burpham.

- Therefore I STRONGLY object to the proposals in S2 - the housing targets are not justifiable and cannot be achieved without chaos! They satisfy a demand that is not there.

<tr>
<td>I strongly object to the proposals for the airfield. I note modest changes have been suggested. However these do NOT justify including this site within the amended plan! This site has poor sustainability. The viability of this area so close to one of the busiest junctions on the M25, so close to one of the most important gardens in the UK, so close to Boldermere Lake and so close to an important conservation area really defies belief! There are enormous constraints on any infrastructure improvements in the area – there is poor drainage in much of the surroundings and even now if there is a problem at Junction 10 all local roads see the effect. East Horsley is the neighbouring village that would have to provide access to trains &amp; shops and scope for improving the congested road structure here is very little limited. In this area most of the main roads go from east to west BUT most people wish to travel south to north. This results in much traffic travelling on the narrow village roads lined with sizeable houses; bottlenecks provide an extra hazard!</td>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have carefully perused the new document with its amendments to GBC’s Local Plan 2016. Guildford Borough Council had many thousands of objections to that plan; these objections particularly centred on protecting the Green Belt. I was looking forward to seeing some changes in the 2017 Plan to reflect the concerns of local residents. I am sadly disappointed!! In fact I am much struck by the little heed taken by GBC of the wishes of the residents of the borough. I therefore write AGAIN to object to the plan.

Housing Target & The Green Belt

I consider the proposed housing target for the borough is excessively high considering the uncertain times in which we find ourselves. There are certainly likely to be major changes in population trends and future migration patterns. In considering housing targets GBC should also take proper account of the constraints provided by the Green Belt. Guildford Borough is exceptionally fortunate to have such a large percentage of its area inside the Green Belt particularly being so close to the capital; this should be regarded as an asset to be protected. Indeed it has been estimated that around 57% of the proposed housing in this plan will be built on land now in the Green Belt. It is also worth noting that GBC appears to focus much building in the northeast of the Borough; this land is closest to London and therefore is in most need of protection! Insetting the villages of East and West Horsley from the Green Belt will remove a valuable protection for our countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4536  Respondent: 8939425 / Petria Hiam  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented."

5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the draft local plan and in particular the inclusion in the plan of the former Wisley Airfield (Allocation A35) for the following reasons:

Building on the Green Belt

Huge increase in car traffic

Increased air pollution

GBC’s planning committee unanimously turned down WPIL’S application.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object to the local plan, particularly in regard to the former Wisley Airfield site which I believe is allocation A35. The site could generate an extra 4500 cars which could lead to an impossible situation around the local roads and the A3. The site is greenbelt, it is farmland and it is adjacent to the TBHSPA and is thus totally unsuitable for such a large development

Answer (if comment is on questions 1-7 of the questionnaire): ()
We strongly object to the size of the proposed development between Glaziers Lane and Westwood Lane in Normandy. Whilst we recognise that there is a need for house building in Surrey, we find it incongruous that such an oversized development should be considered for placement within the Green belt and in a rural location such as Normandy, upon an area which is recognised to have drainage issues. Surely the disastrous recent flooding events of other locations in the UK, should create caution. We object because it is neither a proportionate nor a sustainable proposal as it would considerably increase the local population for whom there aren't adequate local services. Furthermore, the massive increase in traffic from such a development cannot be catered for by the current road system and will create considerable delay and dysfunctionality within the road network, resulting in losses to both the local and wider economy, as well as an increased risk to safety through road traffic accidents and pollution.

Additionally, we object that the locality should be considered for the site of a new comprehensive school when there are undersubscribed schools for this age group in the immediate areas either side of Normandy, at Ash Manor School and King's College. Aside from being an unnecessary and wasteful proposition, a school would lead to increased traffic upon the community's roads which would add further disruption.

We would recommend that developments within a locality such as Normandy be planned in a more sensitive and sustainable manner and of a size that can be absorbed within the community, rather than dominate it.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

• disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick's Arch (A43} which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

• The "objectively assessed need" figure of 693 homes a year is too high.
• A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
• The current SHMA inflates the proposed housing figure due to failure to correct for errors in the historical data for international migration flows,
• issues with the way it considers students and affordability and
• flaws in the method for estimating the number of homes needed to support job growth.
• It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to Gosden Hill development being in the Local Plan The land in Gosden Hill does exactly what the Greenbelt was designed to. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.
The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England's requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an "aspiration" in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7732  Respondent: 8940225 / Glen Ruddy  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (B2) and storage and distribution (BB).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site.

There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.
National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

### Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E3

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**
Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the loss of rural employment (Policy E3)

Policy E3 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor "attractions" and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/"Disneyfication". Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many "leisure and visitor attractions" already. The case for creating more is not made and no examples are given. Instead, the plan's explicit priorities should be:

1. To protect the borough's prime leisure and tourism asset, its countryside, from inappropriate This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford's river landscape less off-putting and support town-break packages for high-value To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

1. To help private providers market local touri This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An "English town break" (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in
London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath,
Oxford or Cambridge instead.

2. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new
houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT {POLICY H1- Homes for all) Numbers aside, all the policy in the blue box says is that the Council
will encourage building over the plan It fails to set rules on important issues such as constraints and density, and
is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not
been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high rise buildings that
developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated
with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would
free up ideal family accommodation in the urban area. Other university cities {e.g. Oxford) insist on higher percentages
than those proposed in the plan. In my view, the Council's timidity is a case of "regulatory capture" by Surrey University,
which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve
the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students
were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog's
Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is
inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3 - Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the "mix" this can include "market" housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy 11)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In a addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and
with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy 11)

Policy 11 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents' in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick's Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

11. I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy 12)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 &
M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to poor air quality concerns (Policy 13)

Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/17111  Respondent: 8940225 / Glen Ruddy  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a 'special circumstance' and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC's Green Belt
& Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding.

Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy SI)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/17108  Respondent: 8940225 / Glen Ruddy  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

1. The Housing number is based on pre-Brexit data for economic and population growth, including These now need to be revised downwards, possibly quite seriously.

1. The housing number is based on an arbitrary Housing Market Area (HMA): the "West Surrey" tri-borough area of Guildford, Woking and An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, "West Surrey" is much too small. Half of Guildford borough's residents work...
elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside "West Surrey". Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make "West Surrey" reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour's "need". Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey's 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick's Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/881  Respondent: 8940449 / Ben Vessey  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy D1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the large areas of land identified for possible development which, combined with the significantly increased housing density and extension of the village boundaries, will completely change the character of the individual villages concerned. These individual villages are a valued part of the Surrey environment and their destruction by accumulation into an amorphous sprawl cannot be undone once it has taken place - the atmosphere will charge irreversibly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the lack of planning in relation to employment. The Local Plan acknowledges there is little or no local employment for the type of person for whom the increased density housing is designed. Where are the jobs for these people - and how are they going to get to these jobs? Surely it makes more sense to house people local to their prospective employment so as to minimise the congestion already apparent on our local roads and reduce our overall carbon footprint. The proposals in relation to our local train stations also do nothing to address this problem.

In view of the issue above, I urge you to vote against the Local Plan as currently drafted, and to require its substantial amendment so as to properly take the issues into account.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the lack of concrete and properly thought-through proposals in relation to infrastructure. The current infrastructure is struggling now, and there would be substantial increase in pressure on local schools (th., Raleigh School and Howard of Effingham are both oversubscribed and full), medical surgeries, roads, parking provision and drainage. Whilst limited additional provision of certain aspects of the infrastructure is suggested within the proposals, there remain significant problems, for example, in relation to increased road traffic (including for leisure use such as cycling, already a real problem in the area at weekends) and parking, that will mean local residents and businesses are put to considerable inconvenience. This in turn is likely to result in some local businesses foundering due to difficulties with access.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Of particular concern with the latest plan is the proposal for a new 4-way junction at Burnt Common. This area already suffers considerably when there is any accident or congestion nearby on the P.3 or M25. The provision of additional access will simply add to the problem of vehicles attempting to avoid that congestion by emptying on to local roads. Only a few weeks ago a lorry caused significant damage to the railway bridge over Ockham Road North, ignoring the warning height limit signs.

It is clear from comments made by Surrey County Council, the Highways Authority and Thames Water, amongst others, that they also have significant concerns that the infrastructure will not cope as it currently stands and that the proposed Local Plan does not include any or sufficient provision for the likely increase in road traffic, drainage needs and school places. These issues should be addressed properly so as to provide a proper and agreed framework within which any development should take place, not left to be dealt with on a piecemeal basis as we go along.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to oppose the proposals set out in the latest version of the Local Plan, particularly as regards the impact on East and West Horsley and the surrounding villages. I am especially concerned that the following points do not appear adequately dealt with:

I object to the vast majority of the housing locations proposed as being outside the Guildford urban area. This needlessly increases the urbanisation of the Borough at the expense of our precious countryside, and we should be working to keep our green belt safe rather than sacrificing it as an easy target.

3.1 SHMA

The main driver of the vision is the figure of 693 dwellings per year that as assessed to be the housing need. This has not been validated or even scrutinised by Councillors. It is difficult for the average resident to square the circle that says that from 2001 the need was 322 dwellings per annum and this, according to the SHMA documentation, satisfied the need at that time.

The rate of growth far exceeds anything that has occurred in the recent past and would have to be sustained for 16 years. With recent political developments, and the country facing great uncertainty, economists are downgrading projections for Britain’s growth, certainly in the short term.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Fairlands

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1.1 Fairlands, Liddington Hall and Gravetts Lane Community Association

The Fairlands and Liddington Hall and Gravetts Lane Community Association (FLGCA) was formed in the 1950s to represent the interest of the people of Fairlands, Liddington Hall, Gravetts Lane, Holly Lane and the Aldershot Road between these locations. The officers of the Association are elected annually by the residents.

In September 2013, following a meeting to discuss the Issues and Options consultation initiated by Guildford Borough Council, a meeting of over 200 local residents unanimously voted to form an action group, as a section of FLGCA. This group subsequently became known as FLAG.

1.2 FLAG

Since 2013 FLAG has been extremely active in representing our residents. We have held 5 public meetings at various times during the process. We have also canvassed our residents, and we are able to report 95% positive support having spoken with 228 residences with 218 in favour of FLAG representing their wishes and objecting to the threat of development around Fairlands, with only three against the representation and in favour of development.

Our mandate to represent the residents of our area of benefit was renewed at the AGM of July 2015.

1.3 September 2014 Response

FLAG responded to the consultation in September 2014 with a twenty-two page comprehensive response. Whilst some of our objections and comments have been addressed many of the themes still exist in the new plan.

As a consequence some of the content from our original response is repeated here.

2.1 Summary

We recognise the huge amount of effort that has been expended on this version of the Plan and are grateful to the Council staff for all their hard work. Whilst residents are pleased that the inappropriate developments in Fairlands and Liddington Hall have been removed from the Plan, we find there is enough in the Plan that requires us to object to it as a flawed document overall. We summarise our objections as follows:

We object very strongly to the scale of growth predicted in this plan, driven by the Strategic Housing Market Analysis, a figure that is neither transparent nor scrutinised.

Overall, we must object to the policies in this plan as we believe:

Policies in this plan are couched in imprecise language and, with a presumption in favour of development, this will not enable the policies to prevent inappropriate development.

Monitoring of the policies is weak and ineffective, often not even monitoring resources that policies are required to protect.

There is insufficient housing in the plan for low wage and key workers. Affordable housing is simply NOT affordable in our area due to the high cost and there is an insufficient allocation of social housing.

Infrastructure is currently insufficient to support the existing population. Whilst the CIL may go some way to mitigating new development, it cannot, and will not, be used to rectify current problems.

We object to the Thames Basin Heath Protection Policy in particular, this is ineffective with irrelevant monitoring.

2.2 Growth

There is concern over the aggressive growth predicted in this version of the plan, particularly in view of the recent referendum results. Whilst we are currently undergoing a period of uncertainty, there is an almost unanimous reduction in projections for economic growth, at least in the short term.
Nowhere is this growth constrained in any way, although the plan can be constrained by lack of infrastructure or for preservation of the Green Belt.

2.3 Policies

These will be dealt with in the body of this document, but overall we find the language to be imprecise, monitoring to be ineffective or entirely development biased.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Flag objects most strongly to this allocation for the following reasons:

a) This area was Green Belt. There has been no demonstration of special circumstances required to allow building on the Green Belt.

b) Keens Lane is a single track road, unsuitable for any more traffic.

c) Any exit onto Keens Lane will be a dangerous junction.

d) The development is within the zone of influence of Whitmoor Common as such it has to prove it will have no impact on footfall on the common. The council is going to ask residents to believe they will drive 5 km to Russell Place Farm SANG rather than walk 500 yards to Whitmoor Common. Alternatively displacing current users of Whitmoor Common is even more unlikely as 70% of them travel 2.8 km or less.

FLAG objects strongly to this allocation for the following reasons:
a) The area should be included as AONB, it is beautiful, defines the Hogs back.
b) The infrastructure will not support this site.
c) Water run-off will run down and affect Wood Street and Fairlands

**Answer (if comment is on questions 1-7 of the questionnaire):**

Again we cannot support this policy due to the inexact wording. Developments “should have regard to”, should be replaced by “must”.

Old policies always stated that new developments would have to be “in character” with its surrounds – although more words are used, we feel the new definition is more vague.

On 15th June 2010 the Chief Planning Officer wrote in a letter that private residential gardens cannot be considered as “Previously Developed Land”. This should be articulated within this policy to prevent “Garden-Grabbing”

Answer (if comment is on questions 1-7 of the questionnaire): ()

3.2 Retail

Current trends should be leading to a reduction in retail space, rather than an increase. The British Retail Consortium, representing over 80% of the retail sector predicted a shrinking from 559 million square feet of retail space in Britain in 2010 to 527 in 2020.

Overall the use of language is weak and ineffective. Use of words such as “should” allow too much wriggle room for developers, coupled with the presumption for development. Why does the policy not use the word “must” to avoid doubt?

We agree and support the part of the policy that says that development should provide a mix of housing types and sizes appropriate to the site size, characteristics and location.

We also agree that residential densities should reflect the local area context, character and sustainability.

We object to the figure of 60% of students being housed on campus. The university has failed so far to meet its commitments as far as students on campus are concerned and some leading universities operate a much higher percentage of students on campus. Releasing HMO dwellings into the housing pool would alleviate the pressures elsewhere and reduce traffic to and from the university. There is no specific monitoring of this figure other than planning applications. Bearing in mind the past performance of the university in terms of non-delivery of planning permissions, surely it is possible to monitor the percentage of students on campus?

We support the proposed restrictions on the granting of HMO planning permission, although stress that the need for sufficient amenity space should explicitly require parking space. Parts of Guildford are being turned into untidy car parks, with vehicles parked on pavements and illegally parked in restricted zones. This council must remember that HMOs usually mean multiple cars as well.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
### 2.4 Affordable and Social Housing

With property prices at current levels in Guildford “affordable” is a misnomer. Additional workers will be needed to support the excessive growth predictions, particularly in retail, yet affordable housing is likely to be out of the range of many of these workers. There needs to be an adequate supply of Social Housing to accommodate key workers, yet there is no significant increase in Social Housing.

</tbody>
</table>
2.5 Infrastructure

New developments will pay a levy to ensure impact on infrastructure will be mitigated, but this levy cannot be used to improve the current situation. Traffic in and around Guildford is problematic as the normal situation. Efforts to persuade residents to walk, cycle or use public transport have met with limited success.

Surrey County Council has estimated a shortfall of £3 billion to provide the infrastructure required to support projected housebuilding in the area and admit: “We cannot ask our residents to fund something that is completely out of the reach of the council taxpayer”.

With the majority of new developments outside Guildford town centre, the plan will generate more journeys to put additional strain on an already malfunctioning infrastructure.

3.4 Infrastructure

The growth in the vision is predicated on the delivery of the necessary infrastructure, yet the infrastructure schedule is light on detail and vague on costs. There is little action in the west of Guildford in particular to alleviate the poor rush hour experience of drivers along the arterial routes into Guildford (A320, A322 and A323). Any action improving egress from the A3 and A31 will lead to increased congestion on these routes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Whilst we support the sentiment that “infrastructure needed to support development should be provided and available when first needed to serve the occupants and users of the development” this ignores the fact that current infrastructure is not sufficient to support the existing population.

Below is a representation of Guildford traffic averages at 8:30 am on a Monday morning. Roads are coloured green and overlaid with red if congestion is taking place (courtesy of Google Maps).

Appendix C is very short on detail and for the Aldershot Road in Guildford – already severely impacted in the peak morning hour, there is no respite. The projected developments at Ash and Flexford will add further traffic to the route from Fairlands to Guildford.

In terms of monitoring, the measure of CIL receipts and spending is completely ineffective and unlikely to measure the satisfaction of residents. A much better measure would be average speeds during rush hour on the arterial routs through Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID: PSLPP16/16059  Respondent: 8941761 / FLGCA (Paul Kassell)  Agent:**

**Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There is no question that Guildford must support the Road Investment Strategy. However, there is little supporting detail. Some timescales are also towards the end of this planning period. FLAG feels very strongly that improvements on the A3 will only increase the congestion on all arterial routes to and from Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID: PSLPP16/16060  Respondent: 8941761 / FLGCA (Paul Kassell)  Agent:**

**Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Whilst we support the principle of sustainable transport, it has been ineffectively introduced in Guildford. The council seems to believe that a white line can be painted on the side of the road and it can be designated “a cycle path”. Cars frequently park over these paths, making them extremely dangerous for the cyclist. There is no enforcement, so these paths fall into disuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16061  Respondent: 8941761 / FLGCA (Paul Kassell)  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Whilst we support the attempts to protect biodiversity, we have shown under Policy P5 that in practice the Council pays lip service to the protection of our valuable areas.

We also object to the inexact wording used. This policy replaces G5(10) which was worded: “Open spaces, whether public or private, which contribute to the character of an area, in terms of the views they create, the feeling of openness they allow, are protected.” This has been modified as far as this policy is concerned: “Open space (encompassing all open space within urban areas, land designated as Open Space on the Policies Map and all land and water that provides opportunities for recreation and sport) will be protected from development in accordance with the NPPF.” The old policy, although shorter, is felt to be more all-encompassing. What if an open space does not appear in the policy map? An example would be a large roundabout surrounding a small green – according to this policy, it can now be built upon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16038  Respondent: 8941761 / FLGCA (Paul Kassell)  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The wording of this phrase cases great concern, if we desire to protect the Area of Outstanding Natural Beauty. Firstly, if the plan starts with a presumption in favour of development, surely this policy could start with a presumption against development in the AONB. The wording lower down in the policy does not offer the same prominence and qualifies with the word “major”

Additionally consider the phrase “All proposals will be considered against whether they
• conserve and/or enhance the setting and views of the AONB
• conserve wildlife, historic objects or natural phenomena within it
• promote its enjoyment by the community and visitors to the area
• support the rural economy of the Surrey Hills area
• provide or maintain public access to the AONB”

Surely this would be better worded as “Developments that do not…….will not be granted planning permission.”?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16039  Respondent: 8941761 / FLGCA (Paul Kassell)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to this policy as inset villages are natural targets for reviewing Green Belt boundaries and directing development towards those villages. Residents would be much less concerned if the current plan did not quote an inflated housebuilding number as “special circumstances” required for changing Green Belt boundaries.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16040  Respondent: 8941761 / FLGCA (Paul Kassell)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

FLAG welcomes the creation of new Green Belt to prevent urban sprawl and supports this policy. We would also comment that the wording here is much better than the protection of AONB or the Green Belt itself – would it be possible to ask whoever wrote this to have a go at the previous two?

Having said that, we cannot understand the relevance of the monitoring of appeals for developments within inset villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPP16/16044  Respondent: 8941761 / FLGCA (Paul Kassell)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

FLAG generally supports this policy particularly the paragraph:

"All development proposals will be required to demonstrate that they will not result in an increase in surface water run-off and should have regard to appropriate mitigation measures identified in the Guildford Surface Water Management Plan or Ash Surface Water Study. Priority will be given to incorporating SuDs (Sustainable Drainage Systems) to manage surface water drainage, unless it can be demonstrated that they are not appropriate. Where SuDs are provided, arrangements must be put in place for their management and maintenance over their full lifetime"

It should be noted that restricting the rebuilding of a structure to the same footprint of a previous structure is not necessary. It should be restricted to the size of the previous hard standing area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

2.6 Thames Basin Heaths Policy

We value our environment and wish to preserve natural habitats. This policy ignores the data from the 2012 / 2013 survey and requests the reader to suspend belief. The Council then chooses not to examine the health of the heath or even monitor visitor numbers as a measure of success.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

<table>
<thead>
<tr>
<th>6.5 P5 Thames Basin Heath SPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>FLAG objects very strongly to this policy. The protection of our habitats is of prime concern and this policy is weak and completely ineffective.</td>
</tr>
<tr>
<td>The objective of the policy is to prevent additional footfall on protected areas and particularly to prevent cats prowling from their home or an increase in dog walking. We believe this council is intent on paying lip service to the protection of our Thames Basin Heaths without determining whether any mitigation is effective.</td>
</tr>
<tr>
<td>Firstly, this is done by not allowing residential development within 400 metres of the Special Protected Area or SPA. However this Council believes that it can build a residential care home in this protected buffer – (in previous iterations of the plan there was a secondary school within 50 metres, completely ignoring students using to common to get to and from the school as well as using the SPA for recreation. We believe this was only rejected as Surrey County Council pointed out that access by foot and by road would be dangerous).</td>
</tr>
<tr>
<td>Secondly, between 400 metres and 5 kilometres the submission states:</td>
</tr>
<tr>
<td>In the zone of influence, beyond the exclusion zone and up to 5km (linear) from the SPA, a net increase in the number of residential units is likely to lead to increased recreational use of the SPA as visitor surveys produced by Natural England demonstrate that 70 per cent of visitors to the SPA come from within this distance. In order to ensure that new residential development will not lead to increased recreational pressure on the SPA, net new residential development must secure or provide Suitable Alternative Natural Greenspace (SANG) and provide funding for Strategic Access Management and Monitoring (SAMM). Proposals for student accommodation may not need to provide mitigation and avoidance measures. This will be assessed on a case by case basis.</td>
</tr>
<tr>
<td>Note that the 2012 / 2013 visitor survey identified that 75% of visitors to Whitmoor Common travelled 2.8 kilometres or less. This is well below the 5 kilometres average used to define the zone of influence. Salt Box car park recorded the second highest number of visitors of all the survey counts and the highest number of dogs. A SANG must attract people away from the SPA to be effective. Either that or people who currently visit Whitmoor Common must be displaced and visit another site. The argument that people are going to travel longer distances to visit a SANG is clearly flawed. Additionally 30% of those surveyed said that nothing would persuade them to visit another site. If you also add 13% who said they would move for a larger open space and 12% if the other site was nearer home, it cannot be argued that a SANG sited that is smaller than Whitmoor Common and sited further away can be effective.</td>
</tr>
<tr>
<td>FLAG cannot agree that student accommodation should not provide any mitigation – are students not going to visit the common (jogging and cycling are common activities).</td>
</tr>
<tr>
<td>In terms of monitoring, there is absolutely nothing that measures the effectiveness of this policy. Reduced or static visitor numbers would be a minimum expectation. Measuring the amount that developers contribute towards a SANG is an example of paying lip service to protecting our environment.</td>
</tr>

At the heart of the National Planning Policy Framework is a presumption in favour of sustainable development. This means that the council must grant permission unless specific policies in the plan indicate that development should be restricted.

Whilst FLAG does not accept the prediction of 693 dwellings per year as a suitable figure, nevertheless all development has to be sustainable. To us this means that appropriate infrastructure must be in place, prior to occupation of the site.

We feel that this Policy will be used to justify inappropriate development, creating a future borough of even worse traffic congestion than currently experienced.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

3.3 Green Belt Development

Listing developments as Urban extension is disingenuous as this is Green Belt land. The Conservative Councillors were elected having issued a campaign promise to protect the Green Belt. Whilst the vision states that brownfield development is the preferred route the majority of dwellings are provided on Green Belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We object most strongly to the growth rate of 693 dwellings per annum. This figure is so fundamental to the plan, that its validity must be beyond question or the plan cannot possibly be accepted. If the number was set at the previously agreed growth rate of 322 units per annum, would the devastation of vast areas of the Green Belt be required?

The number has not been scrutinised by Councillors, nor have the inner workings and assumptions been revealed. It is absolutely essential in an era of open government that these figures are beyond reproach, instead the number is produced “out of a hat” with no justification or appropriate scrutiny.

We also object to the fact that the total exceeds even the 693 units a year, once windfall and existing permissions are taken into account.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Scale of development

I OBJECT to an increase of up to 385 potential new dwellings which is included in the proposed submission Local Plan for West Horsley in the next 5 five year. This represents an increase of over 35% which is totally disproportionate to the size of the village and at a density that is significantly above the village at present. The existing infrastructure is already at capacity and would be totally swamped by the number of new dwellings proposed and the character of the village would be changed forever.

The local primary school has been at capacity for many years and has no room for expansion. The local medical centre is also at capacity. There is no mention in the submission of essential facilities such as shops. The railway station car park is full every day and parking in East Horsley village centre is very difficult.

We ask you to reconsider the proposals concerning Horsley and change the plan to incorporate a consensus of the views expressed by all Horsley residents. Following a local survey of residents, it was considered that a limited need for some 20 affordable homes was required in West Horsley to accommodate local people, especially the young and the elderly, and we ask that you respect these views.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Objections to the Guildford 2016 Local Plan

I have lived in East Clandon for over 10 years and am appalled by the proposed Local Plan.

I object to the 2016 Draft Local Plan as a whole and in particular I object to the specific issues (listed below). I believe that this deeply flawed Local Plan will have a direct and detrimental effect on the lives of my family and other residents of East Clandon and an even greater detrimental impact on our neighbouring villages of West Clandon, Ripley, West and East Horsley. It erodes the openness of the Green Belt and endangers the beauty and views in and out of the Surrey Hills AONB.

I object to the Settlement Boundary which has been imposed on East Clandon without any consultation. This imposition provides no protection to further development outside of the settlement boundary (Policy P2 para 4.3.25) and is deemed by me as being unnecessary in an already tightly developed ancient and rural conservation village with high archaeological merit. I demand that this proposal be removed as it will endanger the openness of the Green Belt, the views in and out of the AONB (protection of the AONB Policy P1) and the character of our village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/17053  Respondent: 8944257 / Bruce Tindale  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Policy D4: I object to the insetting of villages (meaning in fact, removal of villages from Green Belt protections) and the fact that they will suffer from higher density development and the resulting increase in traffic, increased use of infrastructure which is already under pressure. I object in particular to the insetting of West Clandon, Send and the Horsleys. This will have a detrimental impact on Green Belt openness and the views in and out of the AONB in direct contravention of Policy P1 and P2.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

| **Do you consider this section of the document; complies with the Duty to Cooperate?** | ( ) | **is Sound?** | ( ) | **is Legally Compliant?** | ( ) |
| **Answer (if comment is on questions 1-7 of the questionnaire):** | ( ) |
| 1. I **object** to building on the Green Belt because the essential characteristic of Green Belt is its openness and permanence (National Planning Policy Framework paragraph 79). |
| 1. I **object** to all other strategic sites in the Local Plan, Blackwell Farm, 3 Farms Meadows, Garlick’s Arch, West Horsley and Hog’s Back. All are out of proportion to the surrounding area and none qualify for the exceptional circumstances required to take them out of the Green Belt. |
| 2. I **object** that GBC are contravening the NPPF framework stipulation in paragraph 87 with the proposed developments at Gosden Hill Farm, Ripley, East and West Horsley and Garlicks Arch, Send. Paragraph 87 states “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.” and GBC have not proven any special circumstance for developing on these Green Belt areas. |

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

| **Comment ID:**   | PSLPP16/17052 | **Respondent:** | 8944257 / Bruce Tindale | **Agent:** |
|-------------------|---------------|-----------------|--------------------------|
| **Document:**     | Proposed Submission Local Plan: strategy and sites 2016 / Policy S1 |
| **Do you consider this section of the document; complies with the Duty to Cooperate?** | ( ) | **is Sound?** | ( ) | **is Legally Compliant?** | ( ) |
| **Answer (if comment is on questions 1-7 of the questionnaire):** | ( ) |
| 1. I **object** to Policy S1 not offering sustainable development as regards roads and rail infrastructure which currently does not cope with demand, congestion on the A3 in particular, but also other A roads in the area such as the A247, the A246 and then there is the already overcrowded and slow train system for those currently living in the borough and needing to commute to London. No pre-emptive planning has been made to alleviate these real problems which will be much exacerbated by any large increases in housing. |
I specifically want you to note the winding, narrow and dangerous route via the A247 through West Clandon which then drives people to use a short-cut the even narrower rural road, the Ripley Road, through East Clandon to and from the A3. This will be much exacerbated with the large increase in housing twinned with large increase in cars and travel.

1. Continuing with Policy S1 (Presumption in favour of Sustainable Development) I object that this is not being met and that GBC are contravening this when it is clear that no fixed plans are available to improve the provision of shops, medical facilities, schools in our immediate area (besides roads and rail already mentioned) to service us. If the GBC were serious about improving the infrastructure and sustainability of our communities, they would have secured plans and funding to ensure these facilities are available and not just at the behest and hoped-for goodwill from the developers. Further, how will developers be held accountable to their promises to build infrastructure? Stories are legion of developers reneging on commitments as the ‘money runs out’ even though vast profits will be made from turning agricultural and Green Belt land into highly valuable housing land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/17049  Respondent: 8944257 / Bruce Tindale  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy S2 for the proposed provision of the very high overall housing numbers of 13,800 new homes (690 new dwellings being built every year for 20 years) and I object on two grounds; these housing numbers have been imposed on the borough with no real consultation being undertaken with the residents of East Clandon and the borough as a whole. Secondly, the housing numbers are based on a high-growth economic development plan which in itself has had no consultation with us and this combined with estimated demand from London residents will turn Guildford into a dormitory town for London.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/1885  Respondent: 8944257 / Bruce Tindale  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 5: The examination

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the fact that GBC have not met the requirements of the NPPF Paragraph 155 which imposes an explicit obligation to have early and meaningful consultation. This has not been met in a number of areas by GBC. We have not had a meaningful consultation on imposing a settlement boundary on East Clandon, on the absence of meaningful economic and population growth figures for Guildford showing various scenarios with high, medium and low growth scenarios being offered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I grew up in Cobham, and then after university in Manchester and living for a while in London, I moved back to Surrey and to Ockham 10 years ago to start a family, and to allow my children to experience the benefits of the Green belt. I have been amazed and depressed by the sheer scale of development you have proposed as part of this local plan, and in particular the development on the Former Wisley Airfield that will effectively back on to our home and shatter our quality of living, and the lives of those around us in Ockham, Ripley and the Horsleys. This is a massive threat to local flora and fauna, there is no way that the local infrastructure can support it and the overall impact on this part of the borough will be devastating. No wonder this was thrown out when reviewed objectively by the Planning Committee.
In summary then I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.
Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I reside at [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998]

I have several objections to the Guildford Plan. The following are the most significant;

1. I oppose the unjustified removal of the village from the Green Belt by insetting and extending the 2003 Local Plan Settlement boundaries.
2. The development of 385 homes on the 4 proposed sites will result in much higher densities than exist at present and will be out of character with the existing layout and housing styles.
3. The building proposals will be unsustainable with regard to schooling, roads capacity, shops, drainage, access to healthcare, and car parking in the Horsleys. Insufficient thought has been given to infrastructure problems, in particular, roads, transport and waste water. Car parking is already a problem at the Medical Centre, East Horsley Station, and shops. East Horsley Station car park is normally full on weekdays and the car parks are used not only by residents of the Horsleys but also by people from outlying locations. The proposals are likely to make car parking more difficult if not impossible for local residents.

**Comment ID:** PSLPA16/4289  **Respondent:** 8944737 / Martin Grant Homes (Martin Grant Homes)  **Agent:** Barton Willmore (Michael Knott)

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
11.0 APPENDIX C: INFRASTRUCTURE SCHEDULE

11.1 At this stage of the planning and delivery process, the costings set out against many of the infrastructure projects in Appendix 3 are broad and provisional estimates. MGH intends to provide a more detailed response upon completion of its further work prior to the Examination of the Local Plan.

11.2 MGH is committed to the delivery of all necessary infrastructure to support the development of Gosden Hill and will continue to engage with GBC, SCC and other delivery bodies to review the Infrastructure Schedule provided at Appendix C of the Local Plan and seek to agree costs and funding sources.

11.3 We understand that GBC has yet to finalise its approach to introducing a Community Infrastructure Levy (CIL). Specifically, it has yet to be determined whether a CIL liability will apply to the development of strategic sites identified within the Local Plan. GBC is also yet to publish an up-to-date draft Regulation 123 List, a CIL Draft Charging Schedule, or confirm how Section 106 requirements and associated policies will be scaled back to those matters that are directly related to a specific site.

11.4 Specifically, Appendix C cites a range of infrastructure as being specific to the delivery of Gosden Hill and makes reference to various projects being ‘developer funded’ or the costs being met by ‘developer contributions’. Where necessary to make the proposals acceptable in planning terms, it would be appropriate for such infrastructure to be secured via Section 106 / Section 278 (or appropriate conditions). Wider, strategic infrastructure necessary to deliver the Local Plan would conversely hold the potential to be funded via CIL receipts (and other funding sources).

11.5 It remains unclear, at this stage, how the introduction of a CIL regime by GBC will influence the procurement and delivery of site-specific infrastructure associated with Gosden Hill and wider delivery of strategic infrastructure to support the Local Plan.

11.6 Furthermore, it is unclear whether the infrastructure items identified within Appendix C as being associated with Gosden Hill, and earmarked for payment or delivery by MGH, are in fact wholly and directly related to the development (i.e. ’site-specific’).

11.7 It is important that greater clarity is provided by GBC with respect to the division between ‘strategic’ and ‘site-specific’ infrastructure. The associated legislative restrictions regarding funding (via CIL or Section 106 / Section 278) must be appropriately reflected within the emerging CIL regime and in accordance with emerging Local Plan policies. Careful consideration must also be given to the financial burden placed on the delivery of the strategic sites by costs associated with both strategic and site-specific infrastructure. This should be addressed via robust viability testing as part of the emerging CIL evidence base, and thoroughly considered by GBC as it progresses towards adopting a CIL Charging Schedule (with consultation understood to be due in October 2016).

Answer (if comment is on questions 1-7 of the questionnaire): ( )
1.0 INTRODUCTION

1.1 These representations have been prepared by Barton Willmore LLP on behalf of Martin Grant Homes (MGH) who own the land at Gosden Hill Farm, to the north-east of Guildford, hereafter referred to as ‘Gosden Hill’.

1.2 These representations are submitted in response to the Guildford Borough Proposed Submission Local Plan: Strategy and Sites consultation document (June 2016) (‘the Local Plan’).

1.3 The representations are supported by the Vision and Development Framework Document (VDFD) for Gosden Hill, prepared in 2014, which remains largely up-to-date. Where necessary, updated or additional information regarding specific site-related issues is provided within these representations. The VDFD and the Revised Framework Masterplan are enclosed with these representations (see Appendix 1 and Appendix 2).

Overview

1.4 MGH is generally supportive of the Local Plan in terms of the vision and strategic policies. In particular, we support GBC in taking forward a Local Plan with the aim of meeting the objectively assessed housing needs of the area as identified in the West Surrey Strategic Housing Market Assessment (SHMA) September 2015. Inevitably, this requires a review of the existing Green Belt boundaries in order to meet these needs. In this regard, MGH fully supports the allocation of Gosden Hill and provides detailed comments regarding the policy criteria set out within Policy A25 and related provisions contained within the Infrastructure Schedule provided at Appendix C of the Local Plan.

1.5 MGH is promoting the strategic allocation of Gosden Hill for a residential-led, mixed-use development which will make a significant contribution to meeting the needs for market and affordable housing in the area, alongside employment and supporting facilities. Importantly, the development will support the delivery of a significant infrastructure package which will benefit both its future residents and nearby parts of Guildford and the Borough as a whole.

1.6 MGH welcomes the progress made by GBC in preparing the Local Plan and the intention of the plan being adopted by the end of 2017. MGH intends to participate in the Examination of the Local Plan to present the representations set out below.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: 21633 A3 MK 16 07 18 - Covering Letter to Proposed Submission LP Representations.pdf (67 KB)

Comment ID: PSLPP16/18638  Respondent: 8944737 / Martin Grant Homes (Martin Grant Homes)  Agent: Barton Willmore (Michael Knott)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Key facts

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
2.0 SECTION 2: KEY FACTS ABOUT THE BOROUGH

2.1 The sub-section titled ‘Housing’ refers to the SHMA at paragraph 2.18. Reference should be added to the full objectively assessed housing need identified within the SHMA (estimated to be 693 dwellings per annum).

2.2 Whilst we support the commentary set out in sub-section titled ‘Competing and conflicting demands’ (paragraphs 2.27-2.28) and how this is applied within the Local Plan, we question whether it is appropriate for this to be included in a section titled “Key Facts”.

2.3 The Local Plan includes the Key Diagram on page 18. We note that Green Belt is not included in this (whereas, for example, “Countryside” is shown). Whilst the designation of the Green Belt is shown on the separate Policies Map, MGH considers that it could be appropriate for the Key Diagram to include it as well.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7960  Respondent: 8944737 / Martin Grant Homes (Martin Grant Homes)  Agent: Barton Willmore (Michael Knott)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

10.1 As stated above, MGH fully supports the allocation of Gosden Hill as a strategic allocation site in the Local Plan. MGH confirms its commitment to the delivery of a residential led, mixed-use development which will make a significant contribution to meet the housing and infrastructure needs of the area.

10.2 MGH confirms that the site is deliverable, being within its ownership and available for development. MGH fully intends to bring forward the site at an early stage, through the preparation and submission of a planning application once the Local Plan has been submitted to the Secretary of State and is advancing towards adoption. It is anticipated that the site will make a contribution to housing delivery in the first five years of the Local Plan once adopted.

10.3 We set out below our specific comments in response to the criteria in Policy A25:

Allocation

Capacity

10.4 As MGH has indicated previously in representations submitted at the earlier stages of the Local Plan’s preparation, Gosden Hill has capacity for up to 2,000 homes. This is considered to be the maximum quantum of residential development which is deliverable taking into account, inter alia, the analysis of the site presented in the accompanying DFD; the requirements for on-site infrastructure; and the need to satisfy other policies in the Local Plan including those relating to Design.

10.5 We therefore consider it appropriate for the 1st bullet to be modified to refer to; “Up to 2000 homes”
**Education**

10.6 MGH agrees to the provision of a two forms of entry primary school to meet the needs arising from the development of Gosden Hill. This was incorporated into the Framework Masterplan included in the 2014 VDFD (Appendix 1) and is maintained in the Revised Framework Masterplan (Appendix 2) accompanying these representations.

10.7 The requirement for a secondary school to be provided on site has been introduced in this iteration of the Local Plan, following discussions with GBC and Surrey County Council (SCC) in early 2016.

10.8 A four forms of entry secondary school has been incorporated into the illustrative scheme as shown in the Revised Framework Masterplan (Appendix 2). The school could be situated in the north-eastern part of the site, where it would be within a short walk of the proposed Park and Ride (as required by the Infrastructure Schedule at Appendix C of the Local Plan – see SED1) and with good access to the proposed off-site sports pitches immediately to the east of the allocation.

10.9 MGH will continue to engage with SCC and GBC to review the requirement for the on-site provision of a secondary school, however, it should be made clear that any such requirement is for up to four forms of entry. We understand that the flexibility for this to be increased to up to six forms of entry is unnecessary, as such a need would not arise from the Local Plan, and therefore such references should be deleted.

10.10 We therefore seek an amendment to the 9th bullet to be modified to read; “A secondary school (D1) (four form entry, potentially as a through school; of which two forms are need for the housing on the site and the remainder for the wider area”).

**Park and Ride**

10.11 MGH is committed to providing the land and works/appropriate financial contributions to help deliver the physical infrastructure of the Park and Ride at Gosden Hill.

10.12 The successful operation of the Park and Ride will be dependent on GBC policies relating to the operation of existing Park and Ride sites and parking strategies within Guildford town centre. As such, it should be for GBC/SCC to operate the service and to ensure it will operate without public subsidy.

10.13 We therefore seek an amendment to the 10th bullet (or the 13th bullet, if the 10th is deleted due to duplication) to read; “Phased delivery of a park and ride facility, initially providing some 500 car parking spaces, with additional land reserved for potential expansion of the facility to up to 1,000 spaces.”

**Requirements: Infrastructure**

*New Southbound Junction with the A3*

10.14 We support the requirement for connections to the southbound carriageway only, as an appropriate junction to serve the development of Gosden Hill. The new A3 southbound slips which are to be provided by MGH in developing Gosden Hill are included within the strategic modelling undertaken by SCC (GBC Proposed Submission Local Plan ‘June 2016’ Strategic Highway Assessment Report).

10.15 It is evident from the strategic modelling which supports the Local Plan, that the infrastructure associated with the development of Gosden Hill will meet the needs of the development, whilst providing a strategic benefit to the operation of both the local and strategic highway (see paragraph 4.7.6 of the Strategic Highway Assessment Report).

10.16 Taking this into account, we seek the following amendment to bullet 11 of Policy A25; “A new junction on to the A3 southbound carriageway to meet the needs of the development, which could also provide strategic benefits to the A3 and local routes, comprising the relocated A3 southbound off-slip, a new A3 southbound on-slip and connection to the local road network via a new roundabout to the A3100, with associated infrastructure on the A3100 corridor within Burpham.”

*Safeguarding for Aspirational All Movements Junction*
10.17 The Strategic Highway Assessment Report prepared by SCC concludes that that the quantum and distribution of development proposed in the Local Plan together with the key highway schemes (Scenario 5), will not lead to severe impacts on the local and strategic highway network.

10.18 The modelling does not therefore identify the need for either a dedicated all moves junction to the east of Gosden Hill, or a tunnel under Guildford. Nor has the assessment tested a vehicular link between Gosden Hill and an all moves junction, or improved slips at Burntcommon and Send linked by a road with the B2215 London Road.

10.19 On the basis of SCC’s modelling, it is evident that a new southbound junction on the A3 will meet the needs of the development along with providing benefits to the wider network and that the delivery of an all moves junction or tunnel is not necessary to support the delivery of Gosden Hill. As such, any safeguarding is merely to meet an aspiration of GBC which is not soundly founded on robust evidence.

10.20 Clarity is required as to what is proposed; what is justified; and what is technically achievable in respect to providing an all moves junction between the A3100 London Road, the B2215 London Road and the A247 Clandon Road.

10.21 In our view, the 12th bullet should be removed entirely from Policy A25, as this is linked to an aspirational scheme which does not form part of the Local Plan, and particularly as no land has been identified or safeguarded between the eastern boundary of the Gosden Hill site and proposed slips at Burntcommon and Send. Alternatively, the wording should be amended as follows:

“A strip of land on the northern boundary of the site immediately adjacent to the A3 and to the east of the new junction should be safeguarded if, by the time of submitting a planning application for the development of Gosden Hill, Highways England has confirmed in writing that the delivery of a link eastwards to a currently aspirational scheme to provide strategic access to the A3 will form part of the Department for Transport’s “Road Investment Strategy”.

10.22 Whilst not a specific requirement of the Gosden Hill development, this safeguarded strip, if required, would likely preclude built development up to 30m from the edge of the current A3 carriageway and would facilitate the delivery of a link eastwards to such a wider scheme.”

**Sustainable Movement Corridor**

10.23 The delivery of sustainable movement corridors (SMC) across Guildford is supported by MGH.

10.24 The development of Gosden Hill will be brought forward with two new transport hubs in the form of a Guildford East (Merrow) Rail Station and a Park and Ride, with high quality connections within the site, between the two hubs and onwards towards Guildford. These will aid modal transfer for the benefit of the town and the development.

10.25 Given that the proposed sustainable movement corridor to the east of Guildford will increase accessibility to existing neighbourhoods of Boxhill, Merrow and Burpham, the wording of the 14th bullet should be amended to ensure clarity as to which sections of the SMC are to be provided by Gosden Hill and which sections will be delivered by GBC / SCC to facilitate modal change.

**Guildford East Rail Station**

10.26 The Guildford East (Merrow) railway station was identified in the SCC Rail Strategy (September 2013) and is a long held aspiration of both SCC and GBC. The principle of the proposal is also supported by Network Rail, Train Operating Companies and the Department for Transport.

10.27 A Guildford East (Merrow) station which could provide up to four trains per hour into Guildford and London would serve existing residents of Merrow and Burpham, businesses located at the Merrow Business Park and Merrow Depot and the new residents of Gosden Hill.

10.28 MGH will continue to engage with the Department for Transport, Network Rail, the Train Operating Companies, SCC and GBC to help ensure that the Guildford East (Merrow) station is deliverable and will operate at an appropriate stage in bringing forward the development of the site.
Traveller Pitches

10.29 Traveller pitches have been incorporated as part of the Revised Framework Masterplan provided at Appendix 2. This reflects GBC’s requirements, with the pitches situated in an area which reasonably integrated within the development with good connections to the facilities to be delivered at Gosden Hill.

Urban to Greenfield Transition

10.30 The 31st bullet in Policy A25 requires “sensitive design at site boundaries that has significant regard to the transition from urban to greenfield”. Whilst MGH does not disagree with the general principle, it is unnecessary in our view for this to be stated in policy, adding to the long list of criteria set out in Policy A25.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/17591  Respondent: 8944737 / Martin Grant Homes (Martin Grant Homes)  Agent: Barton Willmore (Michael Knott)

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy D2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

8.1 MGH objects to the requirement under ‘Sustainable development’ which requires proposals for development to be supported by the submission of a sustainability statement. In particular, the requirement to set out how they will deliver “the lowest level of carbon emissions (direct and embodied) that is achievable” is in conflict with the NPPF and is unsound.

8.2 Having regard to the high standards of energy and water required by national Building Regulations, it is unreasonable in our view to require developers to provide evidence of viability and feasibility in support of planning applications for development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
7.1 In relation to office (B1a) and Research & Development (B1b) Strategic Employment Sites, Policy E1 states that:

“When developed, the new employment site at Gosden Hill Farm will be treated as a Strategic Employment Site.”

7.2 As explained in more detail below and detailed within the VDFD submitted with these representations, MGH’s current proposals for Gosden Hill envisage the delivery of a prime B1 office site alongside the new A3 access and Park and Ride, together with other employment provision being delivered as part of a mixed use area located at the southern end of the site, adjacent to the proposed Merrow Station.

7.3 It therefore needs to be made clear in Policy E1 that this relates only to employment land which is envisaged to be delivered alongside the A3 development access at Gosden Hill for B1a Office development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
5.1 We support Policy H1 insofar as it does not seek to adopt a rigid application of the SHMA in securing a mix of new homes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/17587  Respondent: 8944737 / Martin Grant Homes (Martin Grant Homes)  Agent: Barton Willmore (Michael Knott)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

5.2 Whilst MGH has no objection to the level of affordable housing sought from qualifying sites, it is appropriate for Policy H2 to allow for lower levels of provision to be negotiated having regard to viability. This is very important having regard to the priority given to infrastructure provision and the significant burden placed upon, in particular, the strategic site allocations.

5.3 MGH therefore considers it appropriate for Policy H2 to state that GBC will review affordable housing requirements on a case by case basis having regard to an assessment of viability.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/17592  Respondent: 8944737 / Martin Grant Homes (Martin Grant Homes)  Agent: Barton Willmore (Michael Knott)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy I1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

9.1 In advance of GBC published a draft CIL Charging Schedule and a clearer understanding of the approach to be taken in relation to strategic sites including Gosden Hill, MGH reserves its position regarding Policy I1. We comment separately on the Infrastructure Schedule set out at Appendix C of the Local Plan and the requirements expressed in Policy A25 relating to Gosden Hill.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPP16/17593  Respondent: 8944737 / Martin Grant Homes (Martin Grant Homes)  Agent: Barton Willmore (Michael Knott)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy I2: Supporting the Department for Transport’s “Road Investment Strategy”

9.2 As discussed in more detail below in our response to Policy A25 (Gosden Hill), GBC should be taking a far more positive and proactive approach in securing the delivery of the improvements identified in the Department for Transport’s Road Investment Strategy (RIS). We are concerned that the statement at the end of the Vision (page 21 of the Local Plan) suggests that the delivery of housing is dependent on these measures. It is therefore imperative that the RIS A3 improvement schemes are implemented as soon as practicably possible to ensure the Local Plan is deliverable.

9.3 We also note that reference in made in paragraph 4.6.18 to a feasibility study currently being undertaken which could establish that the scheme for the A3 through Guildford could be either widening of the existing A3 carriageways or a tunnel option. In summary, MGH does not consider a tunnel option to be realistic and we understand is unlikely to be pursued by Highways England / Department for Transport. It should therefore be discounted at this early feasibility stage.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/17588  Respondent: 8944737 / Martin Grant Homes (Martin Grant Homes)  Agent: Barton Willmore (Michael Knott)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

6.1 Having regard to paragraph the NPPF, it would be appropriate for Policy P2 to refer to the partial or complete redevelopment of previously development sites, as set out in paragraph 89 (6th bullet) of the NPPF. Related to this, DCLG consulted earlier in 2016 on proposed changes to national policy including a proposal to make this policy provision more flexible. Any change to policy should be taken into account prior to submission of the Local Plan or through the Examination process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
4.0 SECTION 4.1: STRATEGIC POLICIES

Policy S2: Borough Wide Strategy

4.1 We broadly support the overall level of housing provision proposed in the Local Plan which is consistent with national planning policy and the Government’s objective of rapidly increasing the supply of new housing by 2020.

4.2 In progressing the Local Plan to an Examination, GBC will need to consider the recently published DCLG 2014-based household projections which show an increased need for housing in Guildford when compared to the previous 2012-based projections which were used in the SHMA. These latest projections, together with any other more up-to-date data i.e. economic forecasts, could point to an increase in the objectively assessed need for housing.

4.3 MGH objects to the proposed phasing of housing delivery set out in Policy S2. The National Planning Policy Framework (NPPF) is clear that local planning authorities should “boost significantly the supply of housing” (paragraph 47). There is plainly an urgent need to significantly increase the level of housing provision within the Borough from the unsustainably low levels experienced in recent years (principally as a result of policy constraints restricting land supply). The inclusion of a phased approach to housing delivery is unduly negative and unnecessary.

4.4 As set out below, MGH is committed to bringing forward the delivery of housing at Gosden Hill at an early stage in the plan period. This will likely include a contribution to supply in the first five years of the plan period.

4.5 Furthermore, the annual housing numbers set out in the phasing schedule do not take account of the under delivery in housing provision since the start of the plan period (2013). We therefore seek an amendment to Policy S2 which removes phasing and provides for an annual average figure covering the plan period.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
12.1 These representations have been prepared by Barton Willmore LLP on behalf of Martin Grant Homes (MGH) who own the land at Gosden Hill Farm, to the north-east of Guildford, hereafter referred to as ‘Gosden Hill’.

12.2 These representations are submitted in response to the Guildford Borough Proposed Submission Local Plan: Strategy and Sites consultation document (June 2016) (‘the Local Plan’).

12.3 These representations are supported by the submission of a Vision and Development Framework Document (VDFD) for Gosden Hill, prepared in 2014 which remains largely up-to-date, and a copy of the Revised Framework Masterplan. A copy of the VDFD and the Revised Framework Masterplan are submitted to Guildford Borough Council (GBC) as part of the response made on behalf of MGH.

12.4 MGH is generally supportive of the Local Plan in terms of the vision and strategic policies. In particular, we support GBC in taking forward a Local Plan with the aim of meeting the objectively assessed housing needs of the area as identified in the West Surrey Strategic Housing Market Assessment (SHMA) September 2015.

12.5 Inevitably, the strategy which seeks to meet the full objectively assessed development needs of the area requires a review of the existing Green Belt boundaries in order to identify sufficient deliverable and developable sites.

12.6 In this regard, MGH fully supports the allocation of Gosden Hill and the representations set out above provide comments regarding the policy criteria set out within Policy A25 and related provisions contained within the Infrastructure Schedule provided at Appendix C of the Local Plan.

12.7 MGH is promoting the strategic allocation of Gosden Hill for a residential-led, mixed-use development which will make a significant contribution to meeting the needs for market and affordable housing in the area, alongside employment and supporting facilities. The Revised Framework Masterplan for the site illustrates a form of development which accommodates the development and infrastructure as detailed in Policy A25.

12.8 Importantly, the development will support the delivery of a significant infrastructure package which will benefit both its future residents and nearby parts of Guildford and the Borough as a whole. MGH is committed to the delivery of all necessary infrastructure to support the development of Gosden Hill and will continue to work with relevant consultees to agree a more detailed strategy.

12.9 MGH will continue to engage with GBC, SCC and other delivery bodies to review the Infrastructure Schedule provided at Appendix C of the Local Plan and seek to agree costs and funding sources. For the reasons set out above, it is vital that the issue of viability and the significant infrastructure and financial burdens which are indicated for Gosden Hill are carefully considered by GBC as it progresses its CIL Charging Schedule (with consultation due later in 2016).

12.10 MGH welcomes the progress made by GBC in preparing the Local Plan and the intention of the plan being adopted by the end of 2017. MGH intends to participate in the Examination of the Local Plan to present the representations set out above.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: 21633 P7e A5 MK GBC Proposed Submission Local Plan reps - reduced size.pdf (12.7 MB)
3.0 SECTION 3: VISION AND AMBITION

3.1 We broadly support the vision set out in the Local Plan but consider that Guildford Town should be identified as the focus for future development and infrastructure provision, acknowledging the benefits which will result.

3.2 On behalf of our client, we challenge the statement made at the end of the Vision which indicates that housing delivery in the later stages of the plan period is dependent upon major improvement to the A3 through Guildford. We discuss this matter in more detail below and in response to Policy A25 for Gosden Hill.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp173/415  Respondent: 8944737 / Martin Grant Homes (Martin Grant Homes)  Agent: Barton Willmore (Michael Knott)

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Infrastructure Delivery Plan

NR3 - Merrow Station (Guildford East)

The Guildford East (Merrow) Railway Station, as identified in the Surrey County Rail Strategy (September 2013), is a long standing aspiration of sec and would provide benefits to existing local residential and employment areas, as well as Gosden Hill. Furthermore, it will form part of a transport hub at the end of the Sustainable Movement Corridor.

The station is an aspiration of sec and GBC and provides strategic benefits to local residents and employment at the Merrow Business Park and Merrow Depot. Clearly, a significant financial contribution will be secured through the development of Gosden Hill to help fund the delivery of the station together with the provision of land within our client’s ownership necessary to help deliver the station and associated facilities.

However, to reflect the position summarized above, the text "to principally serve Gosden Hill Farm" should be deleted and the wording relating to its delivery modified, to read as follows:

Infrastructure Project: NR4 New rail station at Guildford East (Merrow)
Delivered by: Network Rail, Surrey County Council and developer(s)

SRN4 - New and Relocated Southbound A3 Slips

Not only will the improved A3 / A3100 Burpham junction with relocated A3 southbound off-slip and new A3 southbound on slip provide access to the Gosden Hill development, it will also provide benefits to the local and strategic road network, including a reduction in 'drive through' trips, as well as providing an access to the Park and Ride at Gosden Hill, which is another strategic infrastructure project.

In respect to SRN4 the following amendments should be made:

**Improved A3/ A3100 Burpham junction with relocated A3 southbound off-slip and new A3 southbound on slip (to serve Gosden Hill Park and Ride, Gosden Hill and provide local and strategic road network benefits).**

LRN6 Interventions to Address Potential Highway Performance Issues

Interventions to highway deliver capacity improvements associated with Gosden Hill will be designed so as to take account of all users and the provision of the identified sustainable movement corridor (SMC6).

Given the wide range of improvements which could be provided, alongside the fact that some interventions may be delivered alongside SMC6 improvements it is anticipated that some local interventions would be delivered by SCC as the Local Highway Authority.

As such, the delivery agent for LRN6 should include sec and not be limited to Highways England and/or developer. This would be in line with other 'LRN' schemes identified within the Infrastructure Delivery Plan.

P&R 1 - Park and Ride

A Park and Ride at Gosden Hill would provide benefits to existing local residential and employment areas, as well as Gosden Hill, whilst removing a significant number of trips from the local and strategic road network. Furthermore, it will form part of a transport hub along the sustainable movement corridor.

The text 'to principally mitigate traffic impact of Gosden Hill Farm site' should be removed, as the Park and Ride forms part of the strategic transport interventions to deliver the Local Plan overall.

BT5 - Bus Network

The delivery of housing at Gosden Hill provides an opportunity for existing bus routes to be strengthened and for new routing opportunities and modern public transport opportunities to be realised.

Either clarity should be provided on what constitutes a 'significant bus network' or BTS should be amended to read:
Provide access to the public transport network, including the potential opportunities to serve the site via local and demand responsive bus services linking the site with key destinations including the existing suburbs of Guildford and the town centre.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2718  Respondent: 8944737 / Martin Grant Homes (Martin Grant Homes)  Agent: Barton Willmore (Michael Knott)

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

These representations are submitted in support of land at Gosden Hill, North East Guildford which is allocated in the Local Plan (Policy A25) for the development of approximately 2,000 homes, employment, supporting facilities and services, and the supporting the delivery of strategic transport infrastructure.

The Site is in the sole freehold ownership of MGH and is immediately available for development. The enclosed representations wholly support the inclusion of the Site as a strategic allocation at North East Guildford and respond to individual draft policies contained within the Local Plan.

In support of these representations, a Vision and Development Framework Document (VDFD) originally submitted in 2014 is enclosed together with a Revised Framework Masterplan prepared in response to the updated policy requirements for the site, as set out in Policy A25 of the Local Plan.

On behalf of Martin Grant Homes, we have previously submitted representations to the earlier stages of the Local Plan's preparation including the regulation 19 Proposed Submission published in June 2016. We have not repeated our previously submitted representations relating to that stage of consultation.

These representations therefore relate only to the modifications to the Local Plan which form the basis of the consultation at this current stage.

'Our Vision and Ambition'
As we set out in more detail below, we have concerns regarding the proposed reduction in housing requirement associated with the reduced objectively assessed housing need (OAHN) in the West Surrey Strategic Housing Market Assessment (SHMA) Guildford Addendum Report (2017).

We also note that the Inspector appointed to examine the Waverley Borough Local Plan has advised that Council that it will need to consider accommodating up to 50% of the unmet housing need arising from Woking Borough (approximately 113 dpa). It is understood that Guildford Borough Council will potentially need to increase its housing requirement in response to this issue through its Local Plan.

Similarly, we have concerns regarding the reduction in the quantum of new employment land proposed to be allocated through the Local Plan.
However, we recognise that the Local Plan proposes, in particular, to significantly boost the supply of housing, well above existing levels of delivery. In this regard, we support the proposed release of land from the Green Belt including Gosden Hill to help deliver the identified OAHN for the Borough.

We note that the final paragraph of the Local Plan's 'Vision and Ambition' has not been modified, signalling that little or no progress has been made by the Council since June 2016 regarding the Department for Transport's (OfT) Road Investment Strategy (RIS) relating to major improvement to the A3 through Guildford. We strongly urge the Council, working with Highways England and the DfT, to resolve this potential infrastructure capacity issue.

**Policy S2: Planning for the Borough - Our Spatial Development Strategy**

Our client is strongly supportive of the Council progressing its Local Plan and seeking to secure its adoption as soon as practicably possible, including its submission by early 2018. However, we are concerned that the reduced level of housing proposed and the associated evidence base is very likely to attract objections.

Barton Willmore has not undertaken a technical review of the SHMA Addendum, however, there is a strong likelihood in our view that the reduction in OAN/housing requirement will be criticised. In particular, there is a risk that a partial update of the SHMA which relates to Guildford Borough, as opposed to the entire HMA, will be questioned. We recommend that the Council should undertake a further review of the SHMA, jointly with Waverley and Woking Boroughs, taking account of the new standardised methodology for calculating OAHN. This work should be completed prior to the Examination of the Local Plan in 2018.

In addition, we raise concerns regarding the phased trajectory which is proposed in Policy S2. The Council's approach 'back-loads' housing delivery towards the end of the plan period. The much lower level of housing proposed within the first 5 years from the expected date of adoption is potentially inconsistent with national policy and the Government's target of one million additional homes being delivered by 2020. We note, however, that the Local Plan proposes to release land from the Green Belt including strategic sites in order to meet the identified OAHN. In our view, the Council has taken a reasonable approach to the rate of delivery of the proposed allocations.

We note that the 'Annual Housing Target' table in Policy 52 provides annual figures from 2019/20 up to 2033/34. These total 9,810 dwellings, and therefore it is understood that this assumes 2,616 dwellings will be delivered during 2015-2019 (four years), at an annual rate of 654dpa. However, we note that 388 dwellings were completed in 2015/16, leaving 2,228 dwellings to be delivered in the subsequent three years (2016 - 2019), equivalent to a rate of 743dpa. It is unclear from the Council's evidence whether this is achievable.

Any under-delivery of housing in the early part of the plan period, prior to the Local Plan's adoption, could potentially compound other concerns regarding the deliverability of the Council's housing strategy. We urge the Council to consider whether its approach to housing provision as set out in Policy S2 is soundly based.

**Policy H1: Homes for All**

We note that the Council has modified the policy requirements associated with the provision of Gypsy, Traveller and Travelling Showpeople pitches and plots. However, the allocation of plots to proposed allocations for new residential development is unchanged. On behalf of our client, we object to the approach which includes the allocation of pitches or plots to the Gosden Hill strategic allocation in Policy A25. We comment on this issue in more detail below in response to Policy A25.

**Policy 1D1: Infrastructure and Delivery**

In our view, it is inappropriate to include criterion (3) in Policy 1D1 when criteria (1), (2) and (5) set out a reasonably clear policy framework to secure the timely provision of infrastructure necessary to support new development.

We therefore recommend the deletion of criterion (3).

**Policy A25: Gosden Hill Farm, Merrow Lane, Guildford**

Martin Grant Homes continues to support the proposed allocation of Gosden Hill through the Local Plan. Similarly, we support the Council progressing the Local Plan and seeking to secure its adoption as soon as practicably possible.
We welcome the modifications to Policy A25 which, in part, appear to have responded to the representations which we submitted on behalf of our client in response to the 2016 Local Plan.

We comment as follows in respect of Policy A25 as modified.

**Allocation**

**Criterion (1) - Residential Capacity and Delivery**

We support the Council's cautious approach to the delivery of the site (and other strategic sites) within the plan period. This will assist in ensuring that the delivery of housing through allocated sites meets the Local Plan's requirement.

**Criterion (2) - Gypsy and Traveller Pitches**

On behalf of our client, we object to the requirement for Gypsy and Traveller pitches to be delivered as part of the development.

**Criterion (9) - Secondary School Provision**

We welcome the modifications clarifying the requirement for secondary school provision. However, as stated below, we consider that the requirement for a four form entry secondary school should be stated as a maximum. It would also be appropriate in our view for the policy to state that "approximately" two forms are needed to meet the needs of the development.

We therefore propose the following modification to this criterion:

*A secondary school (01) (up to four form entry, of which approximately two forms are needed for the housing on the site, and the remainder for the wider area).*

**Requirements**

**Criterion (1) - Improved Junction on the A3**

We welcome the clarification proposed under criterion (1) of the 'Requirements - Infrastructure' section of Policy A25. Martin Grant Homes continues to support the proposed access with the A3 which will serve the development of Gosden Hill and also provide benefits to the wider network.

**Criterion (2) - Potential Opportunity to Provide an All Movements Junction**

On the basis of Surrey County Council's (SCC's) modelling, it is evident that an improved southbound junction on the A3 (as proposed in criterion (1) under 'Requirements - Infrastructure' in Policy A25) will meet the needs of the development of Gosden Hill. It will also provide benefits to the wider network.

The Strategic Highway Assessment Report prepared by SCC concludes that that the quantum and distribution of development proposed in the Local Plan, together with the key highway schemes, will not lead to severe impacts on the local and strategic highway network. The modelling does not therefore identify the need for a dedicated all-moves junction at Gosden Hill and nor has the assessment tested a vehicular link between the A3100, Gosden Hill and a stretched all moves junction at the B2215 London Road / A247 Clandon Road.

The delivery of a new northbound on-slip to the A3 trunk road from A247 Clandon Road and a new southbound off-slip from the A3 trunk road to A247 Clandon Road, in addition to the existing northbound off-slip at Burnt Common (B2215 London Road) and the existing on-slip at the A247 Clandon Road I Ripley By-Pass could potentially create a stretched 'all-moves' junction to the northeast of Guildford. Importantly, however, the delivery of an all-moves junction is not necessary to support the delivery of Gosden Hill. As such, the delivery of a connector road to the B2215 London Road I A247 Clandon Road is merely to meet an aspiration of GBC which is not supported by any robust evidence base.
On this basis, criterion (2) under 'Requirements- Infrastructure' should be deleted. Alternatively, this is moved to be listed under the 'Opportunities' section of Policy A25, to make clear that this aspirational scheme is not a requirement of the development of Gosden Hill.

Criterion (3) - Park and Ride

Martin Grant Homes is committed to providing the land and works/appropriate financial contributions to help deliver the physical infrastructure of the Park and Ride at Gosden Hill.

The successful operation of the Park and Ride will be dependent on the Council's policies relating to the operation of existing Park and Ride sites and parking strategies within Guildford town centre. As such, it should be for the Council and sec to operate the service and to ensure it will operate without public subsidy. Furthermore, it is not fair or reasonable for the developer to be expected to subsidise a Park and Ride service in perpetuity.

We therefore seek an amendment to criterion (3) under 'Infrastructure', to read;

Land and Park and Ride facility, of a sufficient scale as required by projected demand at the time of the submission of an application.

Criterion (4) - Sustainable Movement Corridor

The delivery of Sustainable Movement Corridors across Guildford is supported by Martin Grant Homes.

Martin Grant Homes and its consultant team will continue to engage positively with the Council and sec to investigate the improvements along the eastern route section, as envisaged in the Sustainable Movement Corridor Supplementary Planning Document, to be funded by the development of Gosden Hill, necessary to mitigate its impact.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Criterion (5) - Bus Network

The delivery of housing at Gosden Hill provides an opportunity for existing bus routes to be strengthened and for new routeing opportunities and modern public transport opportunities to be realised. It is likely that commercial operators will wish to serve the new residential dwellings and the proposed Guildford East (Merrow) Rail Station.

However, either clarity should be provided on what constitutes a "significant bus network" or the wording should be amended to read:
Provide access to the public transport network, including the potential opportunities to serve the site via local and demand responsive bus services linking the site with key destinations including the existing suburbs of Guildford and the town centre.

Criterion (7) - Guildford East Rail Station

The Guildford East (Merrow) station which could provide up to four trains per hour into Guildford and London would serve existing residents of Merrow and Burpham, businesses located at the Merrow Business Park and Merrow Depot and the new residents of Gosden Hill.

The principle of the proposal is supported by Network Rail, Train Operating Companies and the Department for Transport (DfT). FirstGroup MTR South Western Trains, which was recently awarded the South Western franchise for a period of seven years from August 2017, has publicly committed to work with stakeholders to progress the plans for new station at Guildford East (Merrow).

Martin Grant Homes is continuing to engage with the DfT, Network Rail, the train operating companies, sec and the Council to identify the necessary land and reasonable financial contributions to support the delivery of the Guildford East (Merrow) station.

Criterion (11) - Secondary Educational Need

On behalf of our client, we will continue to work with sec Education and the Council to agree any new secondary school provision as part of the development of Gosden Hill. We understand that the wording now set out in Policy A25 reflects SCC's latest advice. However, it would be appropriate for the wording of this criterion to reflect the likelihood that secondary educational need will potentially need to be reviewed through pre-application discussions and through the determination of a planning application. Indeed, sec may also wish to allow the flexibility as part of a future planning permission to secure all (up to four forms of entry) or part of the secondary school provision on the site.

We therefore propose the following modified wording to this criterion:

Secondary educational need will be re-assessed at the time a planning application is being prepared, during determination and prior to construction, at which time any recent new secondary school provision will be taken into account. The associated off site playing fields must be dual use and secured through the planning application process.

Opportunities

The final section of Policy A25 - under the header of 'Opportunities' - has been added at this stage of the Local Plan process. It is unclear whether the criteria set out in this section are regarded as 'desirable' or 'essential'. Criteria (1) and (2) appear to be requirements rather than opportunities. Similarly, criterion (4) appears to be a requirement. All three of these criteria appear to be duplicating with other policies in the Local Plan and therefore appear to be unnecessary.

Criterion (3) begins with the word "potential", suggesting that this is a desirable component of the future development of the site.

In our view, this section of Policy A25 is ambiguous and its status in future decision making unclear. Notwithstanding this general concern,

Criterion (3) - Potential through Route within the Site

Martin Grant Homes support criterion (3) under 'Opportunities', setting out the potential to provide a link through the site between the 82234 and the improved A3 access. This has the potential to provide greater permeability through the site and also the opportunity to divert traffic from the 82234 and A3100. This would provide access to the Railway Station, the Park and Ride, Primary and Secondary schooling and could potentially bring about wider strategic infrastructure improvements, assisting in the delivery of the Local Plan.
However, the form of any such access road and link between the 82234 and A3 improved access requires careful consideration as it will ultimately increase vehicular movements through the site and will cause some localised redistribution.

While the inclusion of this opportunity is welcomed, the text should be amended to read:

**Potential to provide an access into the site from the south, which could facilitate the diversion of the 82234 through the site to the improved A3 access, providing a more direct link than the 82234 I A3100 for all modes. Any such link should be subject to further assessment prior to any application on the site.**

**Criterion (4) - Bus, Cycle and Pedestrian Links**

Martin Grant Homes is committed to developing a sustainable urban extension including contributing toward the Sustainable Movement Corridor which will provide a high-quality connection for pedestrians, cyclists and buses between the proposed Park and Ride and Guildford East (Merrow) Railway Station, through the site and onwards towards Guildford. These infrastructure improvements will aid modal transfer for both existing and future residents of the town and the development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

**Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings**

I have lived in Ockham now for 10 years, and have lost track of the number of letters I have had to write to you in objection to large scale development on this site. You seem hell-bent on ruining a part of the greenbelt, planting a totally unsustainable development on the Greenbelt and effectively eliminating the historic hamlet of Ockham. I am particularly distressed to see that since this proposal was last dismissed by the Planning committee, the land has now expanded and moved even closer to the residents along Ockham Lane (including our own house).

In summary then I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I am astonished that the evidence base consists of huge documents which much of the public would be unable to download. I object to any document in the evidence base in excess of 5mb in size.

I object to the housing number of 693 houses per year from the West Surrey SHMA is far too high. The calculations are not transparent and therefore not verifiable. The assumption that GL Hearn have acted for numerous local authorities and “it’s been ok” is not acceptable. As a scientist I cannot support this document and object to its use in any form and its inclusion in the evidence base.

I object to the fact that insufficient consideration has been made for the constraints in this borough, be they infrastructure in nature, AONB, THBSPA, Green Belt, water supply etc.

I object to the disproportionate (in terms of population density) allocation of housing to the north east of the borough in the wards of Clandon and Horsley and Lovelace in particular.

I object to the significant use of the green belt for site allocations. I object to any allocation being made before a housing number has been accepted. You need to start at the beginning, properly determine the number and THEN decide where to put the housing and what infrastructure is needed.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the use of inferior, inadequate and subjective documents in the evidence base.

In particular I object to the LAA, which is inconsistent in the extreme and incomplete, citing for example land considered for schools which has not been considered for housing despite being brownfield, in excess of 50ha and close to the railway. [eg site at Newmarsh Farm East Horsley – clearly brownfield due to lack of enforcement]. It is also highly subjective and open to challenge.

I object to the Borough Infrastructure Delivery Plan, which is incomplete, lacking in detail, not properly costed eg £5-£10 million or even worse £100-£250 million and relies on funding that is not allocated by central government and is more of a wish list than anything else.

I object to the use of the Green Belt and Countryside Study in all its volumes and addenda. Why is it that some sites are excluded because they weren’t identified in the Green Belt and Countryside Study despite numerous volumes and addenda? Why is it that some sites may impact the TBHSPA when they are outside the 5km zone are excluded (nothing to do with the size of site) and some sites are inside and indeed outside the zone but included? (again not to do with the size of site). It just appears to be inconsistent and subjective – quite possibly a desk-based study which has not been verified or cross-checked. This is unacceptable.

I object to the fact that modern building techniques appear to have been ignored such that there is almost no housing proposed for the town centre “due to flood risk”. In many other parts of the country this risk has been completely mitigated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the allocation Three Farms Meadows – allocation A35. I object to the proposed removal of this site from the green belt when no exceptional, very special or special circumstances exist. I object due to:

1. Unsustainable nature of site reliant on private cars and undeliverable public transport [in terms of unrealistic journey times/fabricated modelling which do not stand up to scrutiny]
2. Unrealistic assumptions that people will even walk from one end of the development to the other to go to the doctor, school, shop etc.
3. Unsustainable due to poor air quality impact on both housing and the SPA
4. Impact on views to and from the Surrey Hills AONB
5. The urban nature of the proposal – five storey buildings are out of keeping in the countryside [and some would argue are not even acceptable in Guildford town centre]
6. Road, sewerage, fresh water, gas and electric capacity does not exist.
7. Funding for infrastructure from Central government does not exist;
8. There is already a huge infrastructure deficit in terms of roads. This is not properly taken into account.
9. Impact on nitrogen deposition on the TBHSPA is not neutral and this allocation is therefore open to legal challenge.
10. No consideration has been taken of the current and future plans of the RHS Wisley. These should take priority over allocation A35. Roads definitely cannot accommodate an additional 500,000 visitors to the RHS and 5,000 residents of site A35. [this is without taking into consideration the huge number of houses planned in the Horsleys, Send and Ripley].
11. Robust objections to the planning application almost identical to this allocation were made by numerous statutory bodies including neighbouring Local Authorities.
12. Insufficient consideration has been taken of the historic houses in Ockham and Ripley and the Chatley Heath Semaphore Tower

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the allocation at Garlick’s Arch – allocation A43 due to the loss of ancient woodland; the impact on all local infrastructure of another 400 houses; the site is too close to the A3 and will have poor air quality. There appears to be no joined up thinking on the various on/off junctions on the A3 – my understanding is that the SRN is meant to be for THROUGH TRAFFIC not local traffic. Numerous junctions will slow progress for all users and increase accidents due to more lane changes.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fact that insufficient truly affordable housing is being proposed. There is no evidence that any calculations at all have been done; no sensitivity analysis on interest rates; costs of running cars etc.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/17231  Respondent: 8944929 / A Jefferies  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object due to the fact that local healthcare facilities will be overwhelmed by large numbers of additional residents – it is already difficult to get an appointment at the GP and the RSCH is failing to meet waiting times for outpatients’ appointments.

I object due to the impact of large numbers of additional residents on local policing facilities which will be further overwhelmed. Surrey Police are currently unable to cope with dealing with local residents’ concerns [eg breach of law on PROWs on allocation A35] citing lack of resources.

I object to the impact of large numbers of new residents on school places which has not been properly planned. For example, Send Primary School (in the process of being rebuilt) is being rebuilt with no spare capacity. The proposed redevelopment of the Raleigh School in Horsley [not even in the local plan] is only for redevelopment not for enlargement. Schools planned for Three Farms Meadows will not be operational for the first 500 houses of development. Where will those children go to school? There is no capacity. When the school is built at A35 children will have to be bussed in from elsewhere as it’s not possible to walk... adding to congestion on local roads and the Strategic Road Network

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

---

I object to the fact that the plan implies modal shift to cycling and walking which in the rural areas is completely unrealistic due to lack of proper cycle lanes on local roads (and the space to provide them). This plan disenfranchises the elderly, the young, the unwell and the disabled.

I object to the fact that the plan implies modal shift to cycling and walking which in the rural areas is completely unrealistic due to lack of proper pedestrian footpaths on local roads and the requisite street lighting to ensure the safety of users. Much of the borough is RURAL IN NATURE and residents specifically do not want to live in well-lit areas more akin to urban living.
I object to the impact of excessive development on the already congested Strategic Road Network particularly on the A3 and M25.

I object to the fact that there is no tolerance planned at all for accidents, roadworks etc on the SRN which already impact local roads often resulting in gridlock. I cannot imagine that funding is available post-Brexit as the economy looks weaker whilst the country repositions itself.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fact that insufficient consideration has been given to the harm caused by over-development to the Special Protection Area, the Sites of Special Scientific Interest and the borough’s Conservation Area and heritage assets. There appears to be no notice taken of the NPPF which specifically does NOT call for the presumption in favour of sustainable development to be engaged where the Birds Directive is engaged. This covers a huge proportion of the borough.

I object to the fact that many of the allocated sites are being planned in unsustainable locations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLP16/17226  Respondent: 8944929 / A Jefferies  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Vision and ambition

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fact that this proposed plan does not meet the needs of local communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp173/674  Respondent: 8944929 / A Jefferies  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

2. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

3. The AECOM work to support the ELNA is a poor piece of work riddled with unsupported assumptions.

6. I object to the continued use of the Green Belt and Countryside study as part of the evidence base. It is a subjective and inconsistent document that pays no regard to the impact of the current proposals on the setting of the AONB for example.

7. The transport evidence provided shows an increase in congestion as a result of the planned developments. Insufficient modelling has been done to satisfy me that any of the strategic sites can move forward on this basis. The consequences are severe to residents of Guildford and those much further afield.

13. There is no evidence that cross-boundary options beyond the green belt have been considered as a viable option instead of moving the green belt boundaries within the borough.
6. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

8. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

41. I object to the variation in the assessment of sites which is extremely inconsistent. In some cases the TBHSPA appears to be a concern whereas in others it isn’t. The same applies to a number of elements including impact of conservations areas, SNCIs, views in and out etc.

31. I continue to object to the inclusion of the following policies:
   a. A36-A41 inclusive in the Horsleys, A43 at Garlick’s Arch, A42 Clockbarn, and A58 There is no evidence that anyone has considered the cumulative impact of these developments together with the development at A35. The infrastructure proposed is totally inadequate and, as these stand at the borough boundary will have a huge impact on residents throughout the borough and further afield, particularly those who use the A3.

I object to the fact that there is no clear justification for the removal of the strategic site at Normandy over site A35.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4342  Respondent: 8944929 / A Jefferies  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

42. I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

43. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

44. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

45. It is further from railway stations than any other identified strategic site.

46. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

47. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

48. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

49. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

50. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   o The associated traffic increase from the RHS has not been taken into account.
   o The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account

51. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis

52. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station

53. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
54. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”

55. Opportunity (3) should be common to all sites and is not unique to this site

56. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.

57. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

58. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

59. I object to the removal of additional 3.1 ha from the green belt without any justification

60. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact

61. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3

62. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

63. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

64. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire):()

24. I object to para 4.4.36 with regard to the extension of the Surrey Research Park. There is no justification for this when there are a number of surface car parks within the Research Park which should be used in preference. The density of buildings in the Research Park needs to be prioritised over an extension in area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire):()

25. I object to the wording of para 5 in policy E5 – “marketing of the site for its current use for a minimum of 12 prior to submission of a planning application”. This is another example of extremely poor and careless drafting. DO you mean 12 days, months, years….

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

29. I object to the continued assumption that Guildford needs more retail. The ELNA fails to understand the shortcomings in the Carter Jonas retail study update 2017 which refers to retail requirement from companies already in administration and also fails to recognise the increasing use of internet shopping over the bricks and mortar experience. This is lamentable as the land allocated for retail could be put to much better use as residential.

32. I object to the fact that there is no evidence that land owned by the council in the town centre is being used for residential development.

9. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

10. Para 2.10a underestimates the pressure already suffered by local residents on a daily basis as a result of insufficient infrastructure particularly in the provision of health services, e.g. doctors and hospital appointments. Additional growth in the quantum proposed is unsustainable in that it fails to recognised the needs of current residents and is focussed only on the needs of future residents.

11. Para 2.13 I reject the statement that most local roads in villages have “at least one footway and usually two “.

12. I reject the assumption in para 2.15 that increased road infrastructure capacity – it may improve theoretical capacity but actually worsens performance.

### Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):**

---

**18.** I object strongly to the deletion of para 4.2.8 on housing density. There must be an efficient use of land in keeping with the local area. It is notable than the development planned for the town centre is at a lower density than that at site A35 for example and this is totally unacceptable.

**19.** I object to the wording of 4.2.18 which is unenforceable. Throughout the plan the word “Expect” needs to be replaced by “require”

**20.** Likewise, I object to the use of the word “resist” in 4.2.24 – it should be replaced by “refused” in this para and throughout the plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** pslp171/2724  **Respondent:** 8944929 / A Jefferies  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy H2

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire):**

---

**8.** Policy H2 para 4 needs to include that any funds paid in lieu of affordable housing should be ringfenced and the wording further tightened by replacement of “expect” by “will enable”

**21.** I object to the wording of policy H2 specifically “we will also seek” and “we will seek”. This should be replaced by the use of the verb “require” in this para and throughout the document.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

26. In Guildford borough, it is widely accepted that there is an infrastructure deficit particularly in roads and the provision of health services. The needs of current residents are not taken into account in policy ID1. All infrastructure should be in place before development of strategic sites takes place to ensure that the developer pays so as not to jeopardise the needs of current residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  pslp171/2739  Respondent: 8944929 / A Jefferies  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

28. I object to the wording of policy ID3 para 11 which makes no sense at all. What do you mean by “the provision of additional public off-street parking in Guildford town centre will be supported when it facilitates the interception of trips that would otherwise derive through the Guildford gyratory”.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  pslp171/2726  Respondent: 8944929 / A Jefferies  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy P2
11. I object to policy P2 and the inclusion of Ripley in the list of villages to allow insetting.

12. Policy P2 refers to the Metropolitan green belt yet goes on to create additional green belt in the west of the borough furthest from the metropolitan area. There is no justification whatsoever for new green belt land in Ash as it does not serve to protect the MGB.

19. I object to the fact that policy S2 makes no distinction between previously developed land in the Green Belt. It is clear that the use of a site with no above ground building e.g. A35 has a far greater impact than the use of a site such as Send Prison.

22. I object to the removal in para 4.3.18 of “where it would not have a greater impact on the openness.” and the replacement by “subject to the impact”. This is completely in contravention of the purposes of the green belt.

23. I do not understand why previously developed sites in the green belt have not been included for development. Specifically, HMP Send where the prisoners have been told that they might be moving and indeed the site is understood to have been valued by Savills amongst others. There is no justification for adjustment of green belt boundaries until all other options have been exhausted. Doubtless there are other examples.

38. I object to the fact that greenbelt sites are allocated to improve flexibility in the delivery of the plan. It is clear that the green belt should only be seen as a last resort, after all other opportunities have been fully explored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
7. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

17. I object to Para 4.1.11 which should clearly identify the version of the LAA and not just refer to “the latest”.

35. I object to the housing number of 693/annum as no constraints have been applied – the GL Hearn methodology has compounded past errors in international migration forecasts and the whole SHMA needs to be re-visited and corrected as a matter of urgency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 6: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

10. I object generally to the very poor drafting throughout. If this plan is accepted there will be little opportunity to enforce many of the policies due to poor drafting. This plan needs checking by lawyers on the basis of “can I enforce this policy? IF not, which will often be the case, redraft.

24. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

2. I object to the extension of the plan period by 1 year as it has not been identified as a major change

3. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

4. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

39. I object to the use of a film on the GBC website promoting a biased view from those interviewed who would in the real world have been excluded due to conflicts of interest. This is unfortunately completed expected behaviour from a council that continues to promote opaque policy and one which has little respect from many residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp17z/972  Respondent: 8945089 / Linda Grimmond  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I wish to object to the inclusion of the land off Keens Lane Worplesdon (Site A22) into the Local Plan for development for the following reasons,

1. The road infrastructure of the feeder roads is totally unsuitable for any increase.
2. The site is in the Green Belt and should remain there.
3. Any resultant traffic increase is just not acceptable and cannot be justified.

I am sure you will give due attention to the response of the Guildford Residents Association but I wish to add my voice as someone who has lived in Guildford all my adult life. In the plan there is a misplaced emphasis on retail expansion in the town centre at a time when internet shopping is becoming the norm. We already have too many retail spaces empty and this trend seems likely to continue. What we need are town centre homes which will add life and vibrancy to Guildford and bring local trade to businesses

2. Traffic implications for the Tyting area

The lanes of the Surrey Hills are only suited to carrying a low level of traffic, often being narrow single track roads, as is the case for Halfpenny Lane and White Lane/Guildford Lane in the Tyting area where I live.

The combination of the scale of growth proposed in this 2017 plan and a reduction of capacity in the town centre (as indicated by the plans for the Sustainable Movement Corridor and the Town Centre Regeneration Strategy) threatens to lead to much more peak hour traffic on minor roads around the town as drivers find alternatives routes.

This potential impact on the lanes should be avoided and the character of the lanes protected.

The majority of private houses rented in Guildford are to University students. If these were reclaimed then there would be a considerable number of houses available for private occupation. Why has the University not fulfilled its obligations and provided sufficient student and staff accommodation on campus for which planning permission was granted a long time ago?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There is no infrastructure in place for such excessive building. The roads, schools, doctors' surgeries, etc., are at breaking point at the moment. Wood Street Village and Worplesdon in general have a great problem with flooding. Proposing to vastly increase the villages to such an extent will only add to urban sprawl and exacerbate the problems that already exist. At peak times Guildford comes to a halt with most roads being blocked by the vast amount of traffic.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposal to build on Green Belt land is wrong. Surely there are sufficient brownfield sites to avoid using up prime Green Belt areas which once lost are gone for ever. Why is it necessary to build even more offices and business premises on such land when we already have a vast number? Surely priority should be given to local residents and their families to live and work in the Guildford area rather than catering for additional people arriving for work who could also wish to eventually reside here. Affordable housing in this area is virtually impossible to find and any new housing can be allocated to anyone on the Guildford Housing List.

We object to Guildford Borough Council's draft Local Plan proposals 10 build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:

- destroy views from the Hog's Back ridge – a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green bell
- increase tailbacks on the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford's pollution.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the 2016 Draft Local Plan with particular regard to the amount of proposed development around the Burpham and Merrow area. This plan merges all the villages along the A3 from the Hog’s Back to the M25. Yet there is no provision for specific infrastructure improvements to either the A3 or local roads. Just some of the reasons are listed below:

- Once the Green Belt has gone it will be lost forever.
- There is a lack of evidence for the doubling of housing need numbers – 693 a year is more than double the previous figure of 322.
- There is a proposed disproportionate level of development in one area of the borough ie Burpham.
- There is a disturbing lack of specific details about essential infrastructure.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The strategic housing market assessment is proposing a level of development that is too high and the underlying assumptions are based on misinterpreted data. The proposed level of expansion greatly exceeds those proposed by neighbouring authorities. The ensuing development will greatly increase housing density thus making a major, detrimental, change to the area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Green Belt and Countryside. The plan takes a cavalier approach to lopping off sections of the green belt. The developments proposed will close the gaps between existing settlements, I recall the previous Government's South East plan where there was proposed to be a minimal gap between Guildford and Woking. Guildford town and environs has always been a 'leafy' environment and the level of development will compromise this aspect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Transport and Infrastructure. When I was born in the 50's the roads were adequate and there was little congestion. As the country prospered car ownership increased but really the only reactions to the were the introduction of the 'gyratory system' and improvements to the A3. Guildford is also a market town that attracts people and a 40% increase in retail space will increase that attraction and thus require a plan to cope with both the increased traffic and the attendant parking requirements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

4. The impact of the increase in traffic has been totally underestimated. Most families have at least one, and in this area due to the cost of living most people have 2 adults working per household and hence many have 2 cars. On the already congested roads the new 14000 new houses would bring at least that many additional cars and probably more.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt la Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too hig This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

2. The increased volume of car traff A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

6. The lack of suitable public transpor The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

1. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
2. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

3. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

4. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Objections to the Guildford draft local plan 2016

I write to object in the strongest possible terms to the draft Local Plan recently produced.

It is an act of gross cynicism on the part of the Council to reject the Planning Application for the former Wisley Airfield, and then immediately to produce a draft plan which would not only give a green light to such a development, but also add greatly to pressure on local amenities and infrastructure by threatening to disapply Green Belt planning restrictions in the same area. What changed overnight? Nothing.

The justified (and, for about 24 hours, persuasive!) objections to the Wisley development are only aggravated by other current proposals at Garlick’s Arch and elsewhere in the immediate area to which the Ripley Action Group are objecting. Local amenities and infrastructure simply cannot handle the pressures that would result. Local roads are choked, Ripley High Street is regularly impassable, there are problems over schools, access to work, access to medical facilities, and more.

These classes of development cannot be regarded as sustainable. Local roads are already inadequate for pedestrian and cycle access – particularly relevant to the problems of additional car use which would result from such intensive
development in this rural area where public transport is wholly inadequate. Roads serving much of the threatened Green Belt insets simply cannot be enlarged. The proposals for on/off access to the A3 at Burnt Common would require extensive additions to routes which are the responsibility of the national Highway Authority, which as I understand it has no plans or funds for any such works within the time frame of the Plan. This is the antithesis of planning: it is ‘press on regardless and to hell with local residents, infrastructure and amenity’!

There are particular objections to Garlick’s Arch development:-

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- It has ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.

The Council seem to be volunteering Guildford for a far heavier level of development than is proposed by neighbouring boroughs. It appears to have doubled the assumed housing requirements compared with earlier estimates, but refuses to publish the SHMA report with its figures and assumptions. How can you expect any confidence in your consultation procedures if you present us with a ‘pig in a poke’?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire):  

I wish to object to Guildford Borough Council (GBC) Draft Borough Plan re Normandy - Site Allocation 46 and Site 47. Policies: S1, S2,P1,P2,P3,P4,P5,D1,D2,D3,D4,E1through to E9, H1,H2,H3,J1,P12,P13,P14, A46 and A49

This is a disgraceful attempt by GBC to take a path of least resistance and impose a huge proportion of its over inflated housing target on a small vulnerable village community. It contemptuously ignores the fact that a development of this size would overwhelm and destroy this village, its intrinsic rural character, its arable heritage and would bulldoze over the lifestyle and wishes of the people of Normandy and Flexford.

No Council or Plan should ever have the power to destroy the environment of any community but that’s exactly what will happen if this proposal is allowed to go ahead. It should therefore be rejected.

The National Planning Policy Framework (155) states that, “Early and meaningful engagement and collaboration with neighbourhoods and organisations is essential”. This has not happened and I believe there is evidence available that proves that two years ago documentation for this A46 site was submitted on behalf of Taylor Wimpey developers. The people of Normandy and Flexford were not aware of or consulted at that stage.

This proposal is also driven by powerful, insatiable and profit loving developers, greedy for easy build greenfield sites and who do not care about the devastating impact that this development would have on Normandy and its surrounding communities, they are driven by money and have spotted a very lucrative opportunity. Offering to build a new school on this site (at their own expense) in return for planning permission for 1,300 new homes, the developers seem to have persuaded GBC that this site is viable!
GBC has not adequately appraised this site. A sound plan must be based on proper evidence and be consistent with national policy. To be lawful, the plan must be promoted on the basis of a proper analysis of the environmental impacts of policies together with an assessment of reasonable alternatives, this has not been adequately carried out by GBC in a timely or transparent way. Vital evidence was missing at the full GBC meeting on 24 May. The Strategic Transport Report was NOT available to the councillors at this time yet they still approved the Draft Plan without being able to read this report. This is very poor practice.

The Green Belt and Countryside Study referring to the importance of the openness of the land between Normandy and Flexford, has been ignored. The current version of the Plan treats Normandy and Flexford as separate settlements for the purposes of Green Belt ‘sensitivity’ but as one settlement for the purposes of ‘sustainability’. This is a double standard and wrong. The A46 site is only 800 meters away from the TBHSPA. Normandy/Flexford is situated between the TBHSPA and the AONB and should remain washed over in the green belt. In recent correspondence Natural England disagrees with this development because it will impact on the wildlife and habitat in this area.

Already our roads in this area are at full capacity. There is serious traffic congestion and long delays on the A323 morning and evening and access to this new development by car or bus will compound the problem and bring longer delays. There are many other large scale developments already taking place in neighbouring Aldershot, Wayverly and Rushmoor. Guildford and the other local authorities have a duty to co-operate in making their local plans work in harmony, but I do not believe that this has happened. Approximately 31,000 new homes (with cars) are already being built and proposed in these areas. There seems to be no joined-up thinking or planning between the boroughs into the combined affect that all this new development will have on the area. It will obviously place even greater strain on our already congested roads and infrastructure. This area is in serious danger of grinding to a complete standstill. A more sensible approach is required with a reduction in the number of houses being built or planned in the area.

It is not legitimate to take land out of the Green Belt (Site 46-47 GBC draft plan) so that 1,300 houses can be built against an unproven need for a secondary school. Our neighbouring secondary schools in Ash and Park Barn are currently undersubscribed. Kings Manor has 57% of its school places currently unoccupied and the birth rate has reduced in the last two years, so there is no need to build a new school in Normandy. Surrey County Council, in an official response to GBC (July 2014), said: "A site within the proposed urban extension at Blackwell Farm, with all necessary access infrastructure built in and a catchment surrounding the site, would be a more sustainable location in transport terms for a new secondary school to serve the western side of Guildford.” GBC should listen to this advice.

Normandy is not a suitable location for a school and I reject the assertion that the designation of Normandy/Flexford as a ‘strategic site’ achieves “greater sustainability for our village,” it does not. It is Guildford Borough Councils unrealistic and unsustainable housing targets and developer pressures that are fuelling this proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

| Comment ID: | pslp172/2839 | Respondent: | 8947457 / Gerry Armstrong | Agent: |
| Document: | Proposed Submission Local Plan: strategy and sites 2017 / Policy A49 | Do you consider this section of the document; complies with the Duty to Cooperate? | ( ) | is Sound? | ( ) | is Legally Compliant? | ( ) |
| Answer (if comment is on questions 1-7 of the questionnaire): | () |
I object to Policy A49, the traveller sites at land to the rear of Palm House Nurseries and Policy 50, the travelling show people site at Whittles Drive, Guildford Road, proposed for ‘inset’ and permanence. By creating new boundaries and “insetting” the two sites they will be two islands of “urban land” in Green Belt. This is inappropriate development. According to NPPF paragraph 89, a council must be able to provide evidence of “exceptional circumstances”. No evidence has been provided, The traveller sites are all assessed as being located in Green Belt land of “high sensitivity”.

I strongly support the removal of Strategic Sites A46 and A47 from the Local Plan because these developments would have destroyed the unique, rural character of Flexford and Normandy irretrievably. In document T3 Sustainability Appraisal 2017 paragraph 10.10.7, Policy 46 would have resulted in the loss of 3a agricultural land, classified as the ‘best and most versatile land’ due to its flexibility, productivity and efficiency in delivering food and non food crops for future generations and benefiting the rural economy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy E1 and E2 because it is nationally recognised there is a down turn in retail within town centres. Employment in this sector is in decline due the rapid rise of internet shopping. It would be better used for mixed housing.

This week I received a leaflet from local supplier Afinity Water, highlighting that ‘After months of low rainfall, water resources are below average’...... ‘after months of low winter rainfall, our groundwater resources remain well below average – despite the rain in May and June’. Here is a good example illustrating that our natural resources have limits and could fail under such large scale excessive demands from new development.

No one seems to be looking at the ‘big picture’ realistically or considering the overall impact that these large developments, in close proximity to each other, will have on the area! It is downright irresponsible that this has not been factored into council plans and the overall housing numbers substantially reduced.

In conclusion I object to the unsustainable, unrealistic levels of homes the Government are pushing on Councils in the South East of England. Our roads are already running above capacity. This whole area is in serious danger of grinding to a complete standstill. The addition of 60,000 cars from new development joining the network (large scale developments in neighbouring Aldershot, Waverly, Woking and Rushmoor) would simply be too much for the area and would destroy our environment.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the weakening of the AONB protection in Policy P1. There appears to be no restrictions on non-major development. This is unacceptable; the 5 key tests should be maintained in this Policy. Development in these areas removes the choice from residents who wish to enjoy natural beauty, ancient woodland, natural habitats and associated wildlife all of which are under stress from urbanisation and encroaching development.

I would like my original Consultation 19 response, to the Local Plan 2016, to be taken into consideration.

I object to the changes in Policy 2 because they do not reflect the NPPF’s criteria of the Metropolitan Green Belt, its value, importance and permanence.

I object to the new change in paragraph (1) “The Metropolitan Green Belt will continue to be protected as shown designated on the Policies Map, against inappropriate development. In accordance with National planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated.” The words “as shown designated on the Policies Map” should be deleted. The Policies Map has effectively ignored Green Belt protection, therefore the new paragraph (1) is a sham. The Plan states that only 1.6% of the borough’s Green Belt will be lost, however, the 1.6% stated does not include ‘insetting’ of villages, infilling and settlement boundary extensions.

I object to the proposed three “inset” settlements Normandy, Flexford and Walden Cottages in Guildford Borough Proposed Submission Local Plan 2017 Appendix H Maps pg54 Amendments 3-8. GBC has not proved “exceptional circumstance” for their removal from Green Belt. The Green Belt Sensitivity Analysis and The Green Belt & Countryside Study Volume 5 Appendix 1 recognised that H10, H12, H13, H14 and H16, Normandy and Flexford and the surrounding area are of “high sensitivity” fulfilling the essential role of ‘openness’ in preventing urban sprawl and merging settlements. In past appeal decisions by Planning Inspectors all three settlements, Flexford, Normandy and Walden Cottages were recognised as contributing to the “openness” of the Green Belt, therefore all three settlements should remain washed over in Green Belt.

In Green Belt Policy P2 (4.3.13) Normandy, Flexford and 12 other listed villages are now “inset from the Green Belt”. This statement is incorrect, an Inspector has not made that decision and so the villages remain in Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Policy S2 and the modified target of 12426 homes. The new target calculated has not been explained or justified. 12426 is unsustainable development and will impact greatly on utilities, infrastructure, and the environment.

I object strongly to taking unfulfilled housing needs from Woking and Waverly there’s not enough space or infrastructure to take more.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Pegasuslife is the landowner of the Site identified in draft Policy A1 with a draft allocation for approximately 70 dwellings (Use Class C3). The extent of the Site is identified on the plan accompanying Policy A1. The Site has been the subject of significant pre-application discussions with your Officers for proposed development to provide assisted living accommodation for older people with communal facilities and health and wellbeing facilities. The Council concluded that the proposed development is a Sui Generis Use Class in September 2015.

A planning application was subsequently submitted to GBC in April 2016 on behalf of Pegasuslife and is currently subject to determination, for the provision of:

Proposed assisted living accommodation for older people (sui generis) comprising 103 apartments and communal facilities including; residents lounge, guest suite, health and well-being facilities, restaurant, staff offices, surface and basement car parking, cycle parking, bin storage, plant room, associated hard and soft landscaping, and groundworks.

On behalf of Pegasuslife, we support the principle of draft Policy A1, which confirms the acceptability for redevelopment at the Site for residential purposes. However, we object to the sole allocation of the Site for residential use (Use Class C3) and consider the Site should instead be allocated for residential (Use Class C3) and/or assisted living accommodation for older people (Sui Generis).

Assisted living accommodation for older people is considered to be an entirely appropriate land use given the Site's location within the Town Centre. The Site has good levels of accessibility via walking, cycling and public transport modes. Both Guildford Railway Station and Guildford Bus Station are within an 8 minute walk from the Site.

The number of older people in the UK is growing and the HAPPI 3 Report 1 (June 2016) states that the number of people aged 80 and above will more than double by 2037 and the number of people aged over 90 will triple. The number of centenarians (i.e. those older than 100 years old) shows an increase of sevenfold in estimates from 14,450 in mid-2014 to 111,000 in mid-2037.

In the light of the rate of change, it is not surprising that there is a chronic undersupply of suitable housing for older people in the UK with retirement properties making up just 2% of the housing stock (approximately 533,000 homes). To put this into perspective, the over 65 population is approximately 10 million and the over 60 population is approximately 14 million. Evidently, the demand for suitable housing for older people significantly outweighs the supply.

The ONS Annual mid-year population estimates (2014) for the UK (published in June 2015), estimates a rise in the medium age of the population to 40-years (the highest ever estimated) as the number and therefore proportion of older people continue to rise, up 0.3% in a year. This only reinforces the need for a response to the crisis.
Accordingly, the NPPF (para 50) encourages a wide choice of quality homes that widen opportunities for home ownership and create sustainable, inclusive and mixed communities. Local Authorities are required to plan for a mix of housing based on current and future demographic trends, market trends and the needs of different groups in the community. This includes older people and people with disabilities. The revisions to the Planning Practice Guidance (PPG) (March 2015) strengthen the requirement for LPAs to plan and provide housing for older people.

Paragraph 4.2.7 of the PSLP confirms that self-contained accommodation for the elderly will contribute to GBC’s local housing requirement. The sustainable location of the Site therefore makes it appropriate for this land use to make an important contribution to local housing need.

Paragraph 4.2.8 recognises that efficient use of land is essential and certain areas can accommodate higher densities. The Site is sustainably located within Guildford Town Centre and perfectly placed to accommodate higher densities. We therefore object to the allocation of approximately 70 dwellings. Notably, no evidence has been presented to support the proposed quantum of 70 units. In this regard, the Policy is not 'Justified' and therefore is "unsound" in this regard (NPPF, para 182).

We consider that the Site can accommodate approximately 90-100 dwellings, which is in line with the Pegasuslife’s proposed response to consultation feedback received for the proposed development. It is considered appropriate that dwelling range is provided in order to be flexible and respond to prevailing circumstances.

We continue to support the requirement within draft Policy AI that development proposals must be sensitive to the scale and heights of nearby Listed Buildings, and views of the church tower (St Nicholas Church).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/7466   Respondent: 8947649 / Barton Willmore (Huw Edwards)   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. Draft Policy H2: Affordable Homes

Draft Policy H2 requires that on sites providing five or more homes, or sites of 0.17ha or more, that 40% are to be affordable. The 'reasoned justificat ion', for this draft policy states at paragraph 4.2.35:

This policy applies to all new homes within the C3 Use Class. This generally includes retirement homes, as well as self-contained studio flats for a single household, whether specifically aimed at students or not. It does not apply to residential institutions such as care homes and nursing homes. Assisted living and other sui generis residential developments may be required to make provision; these will be considered on a case-by-case basis.

We object to this draft policy as currently drafted since it does not take into account the viability or provide certainty for emerging models of accommodation and care for older people, such as the presently proposed development of the Site. The draft Policy is therefore not considered 'Effective ' in this regard, and therefore fails this test of "soundness".

Assisted living accommodation for older people generates additional costs relative to residential development (Use Class C3) due to the need for specialist design and specification, the sacrifice of saleable area for the provision of services and
facilities with no compensating income, and other differentiating factors. Land must be competed for on the open market with key competition including non-specialist housebuilders, student housing developers and commercial developers. Inevitably, in reaching a competitive land value an affordable housing provision equal to that assumed by non-standard housebuilders bidding on the site cannot therefore be sustained.

This is a structural issue which affects the delivery of assisted living accommodation for older people at a strategic level. Not looking to achieve parity of affordable housing provision between specialist and mainstream developments is essential to supporting efforts to boost the supply of housing in this sector in line with both national and local priorities. Owing to the further increased costs of redevelopment on previously developed sites, it is therefore considered that Policy H2 should not apply to assisted living developments on previously developed land.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We need homes, and there is one place part green belt, but barely used, that possibly could be used for homes - round about Godsen Hill Farm, towards Mevrow. The Park. Ride Car Park which seems relatively unused and is also near the A3.

The other thing that is often left far too late is facilities like schools and local shops.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to green field development in general and in particular to the inclusion of all Green Belt sites. Exceptional circumstances have not been demonstrated for the proposed development of Green Belt land.

I OBJECT to the identification of sites without regard to local housing requirements – the volume of housing allocated to rural areas bears no relation whatsoever to the actual housing requirements of those areas. The local plan housing target is incorrect and inflated and ignores constraints.

I OBJECT to the identification of sites without regard to the impact on infrastructure.

All Green Belt sites should be removed from the plan until exceptional circumstances have been demonstrated.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A36

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site A36 - Hotel, Guildford Road, East Horsley

I OBJECT to this site being included. It is in the Green Belt and there are no exceptional circumstances for its removal. The recent planning application for change of use and development of 49 dwellings on this land was, quite rightly, rejected so there can be no justification for including the whole site in the local plan as a development site for housing. Any redevelopment of this site should be restricted to the brownfield part.

I OBJECT to the change to the settlement boundary required to facilitate this development.

There is no need for housing on this site because the local plan housing target is incorrect and inflated, and no justification for its change of use.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT. What is the point of setting out aims for sustainable design, etc when the rest of the planned local plan is all about unsustainable development: destruction of Green Belt, housing development based on unreasonably high population projections, urbanisation of villages etc.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/16170  Respondent: 8948385 / Gillian Eve  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I OBJECT to this policy in its current form. Whilst it is important to protect the historic assets of the borough, the wording is too imprecise and will leave Guildford’s valuable historic sites at risk of inappropriate development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/9383  Respondent: 8948385 / Gillian Eve  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

Policy D4: Development in urban areas and inset villages

I OBJECT to the insetting of villages.

I OBJECT to the presumption in favour of development in inset villages. The wording of the remainder of the policy is too imprecise to guard against inappropriate development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Policy E7: Guildford Town Centre

I OBJECT. There should be much more residential use of the town centre and a focus on brownfield redevelopment before considering development outside the existing urban area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16165  Respondent: 8948385 / Gillian Eve  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E8: District Centres

I OBJECT to the designation of the existing shopping parades in 3 villages being designated as District Centres. Village shopping parades should serve the needs of the local residents. More extensive shopping facilities are available in Guildford Town centre, and this is where they should remain.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9379  Respondent: 8948385 / Gillian Eve  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E8

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT in particular to Station Parade, East Horsley, being designated a District Centre. This is a small-scale retail centre meeting the needs of the local village population and further retail development would encourage the use of this centre by residents outside the villages, with its consequent adverse impact on road use and parking.

I OBJECT to the plan to encourage further retail development on the existing retail centre or on sites on the edge of this centre. I reiterate that this is a village and the shops serve local needs. This should continue to be the case in future. Further development at this centre or on the edge of this centre would turn the village into a town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H2: Affordable Homes

I OBJECT. Whilst the aim of providing affordable homes appears laudable, in practice very few genuinely affordable homes will be made available. Property prices in the borough are so high that so called "affordable houses" - 80% of market value - will be beyond the reach of those who genuinely need affordable housing.

Furthermore, the developers will take full advantage of the "viability" clause, which means they can be exempted from providing the required level of "affordable" homes if it is not deemed profitable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16152  Respondent: 8948385 / Gillian Eve  Agent:

Furthermore, the developers will take full advantage of the “viability” clause, which means they can be exempted from providing the required level of “affordable” homes if it is not deemed profitable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT. The infrastructure needs to be considered now, not left until planning applications for sites are received. By that time there will be a presumption in favour of development on sites included in the plan.

The Strategic Highways Assessment is not fit for purpose and should be removed from the evidence. Its methodologies grossly underestimate current traffic levels and therefore the impact of further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

It would be impossible to provide adequate infrastructure to support this level of housing development without losing even more of the Green Belt, widening roads and enlarging junctions, and ruining the rural nature of the borough’s villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the insetting of villages.

I OBJECT to the presumption in favour of development in inset villages. The wording of the remainder of the policy is too imprecise to guard against inappropriate development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT. The wording of this policy "will need to take account of" is too vague.

It only considers the A3 and M25 and ignores the impact the local plan will have on other roads in the borough.

Furthermore the draft plan commits to building massive housing estates in the countryside before any of the road improvements described are in place, leading to widespread congestion and delays to journeys.

This policy is based on a flawed Strategic Highway Assessment.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy I2: Supporting the Department for Transport's "Road Investment Strategy"
I OBJECT to this policy as currently worded. The wording ("we will expect") is too weak.

Whilst I support the idea that transport within the borough should be more sustainable, you can't expect people to cycle when the roads are so dangerous (and likely to become more so with the increased traffic generated by the proposed developments) or to use public transport when it is so sparse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to this policy in its current form. It says that the Council will conserve and
enhance biodiversity, but this is at odds with the rest of the draft local plan which proposes to build on green belt land and to inset, infill and urbanise villages (which currently include wildlife corridors which help to protect and promote biodiversity across the borough).

Whilst I support the aims of protecting and promoting biodiversity and open spaces, this policy, together with the rest of the proposed local plan, will not achieve those aims.

Policy P2: Green Belt

I OBJECT. This policy should unequivocally state that the Metropolitan Green Belt will be maintained and protected. That cannot possibly be the intention of this policy given the extent of the proposed loss of Green Belt land to development described in the rest of the proposed local plan.

I OBJECT to the "insetting" of villages from the Green Belt, and at "infilling" within the borough's Green Belt villages. This would lead to a proliferation of development within these villages which would entirely ruin their rural character.

I OBJECT to the unjustifiable proposed changes to the settlement boundaries around East and West Horsley.

I OBJECT to the permitting of "limited infilling". Unless "limited" is defined it will have no meaning and will open the floodgates to filling almost every bit of green space between current dwellings.

I OBJECT to the removal of the site of the former Wisley Airfield from the Green Belt. No exceptional circumstances have been demonstrated.

The policy states that "the general extent of the Green Belt has been retained." This is a misrepresentation.

This policy is based on a flawed Green Belt and Countryside Study.

I OBJECT to the insetting of villages.

I OBJECT to the presumption in favour of development in inset villages. The wording of the remainder of the policy is too imprecise to guard against inappropriate development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Comment ID:** PSLPP16/9369  **Respondent:** 8948385 / Gillian Eve  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P3: Countryside

I OBJECT. There should be no need to build on any countryside if brownfield, previously developed land is used efficiently. There is no justification for making an exception of Ash and Tongham and giving them greater protection than existing Green Belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

**Comment ID:** PSLPP16/9371  **Respondent:** 8948385 / Gillian Eve  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Policy P5: Thames Basin Heaths Special Protection Area**

I OBJECT. The policy is weak. The mitigation (cash compensation) offered for development in the vicinity of the special protection area is so small as to be meaningless.

SANG (Suitable Alternative Natural Greenspace) is not beneficial since the sites identified or targeted are already green space. There is no actual increase in open space or environmental protection; instead, it is a ploy designed to permit building on otherwise protected areas.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Comment ID: pslp172/4231  Respondent: 8948385 / Gillian Eve  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site A35 - Land at former Wisley Airfield Ockham

I OBJECT to the continued inclusion of this site. It is in the Green Belt and there are no exceptional circumstances for its removal.

Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development, so there can be no justification for including it in the local plan.

There is no need for housing on this site because the local plan housing target is incorrect and inflated.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

Question 1: The evidence base and submission documents

Answer: No

Comment: The data underlying the Proposed Submission Local Plan is flawed:

• The SHMA grossly overestimates the housing number.
• Details underlying the SHMA have not been made public.
• The SHMA has not been scrutinised by the Scrutiny Committee.
• Other independent analysis has resulted in a much lower housing number.
• The SHAR grossly understates the current traffic levels and thus underestimates the effect of proposed developments on local traffic infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp17q/452  Respondent: 8948385 / Gillian Eve  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 2: Legal Compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

Question 2: Legal Compliance

Answer: No

Comment: I have no confidence in the legality of the Plan or the consultation process.
Within my family, many of the comments made in the last consultation were omitted from the published
comments, or recorded under someone else’s name, and it took a long time for corrections to be made. It is likely
that many people did not check their comments on the published comments so who knows how many other errors
were made.

- I spent time making comments on the on-line response form, only to find that these had disappeared when I
  logged in again – hence this response by letter. Other people may have given up.
- Insufficient consideration has been given to the results of the previous consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Question 3: Soundness

Answer: No

Comment:

- The Proposed Submission Local Plan is based on flawed evidence (SHMA and SHAR among others).
- There has been insufficient scrutiny of the underlying data and assumptions.
- Insufficient consideration has been given to Green Belt and AONB protection.
- The changes made to the 2016 Plan insufficiently reflect the very many objections / suggestions made as part of the consultation on that Plan.

Q6 Any Other Comments

- The changes to the Proposed Submission Local Plan are not a reasonable response to the overwhelming objections raised in the original consultation.
- Nothing has been done to address the concerns over the housing number that provides justification for the extensive development plans, the threat to the rural nature of our villages and the inclusion of many sites in the Green Belt.
- Nothing has been done to address concerns over the validity of the traffic assessment and hence the impact of development on traffic infrastructure.
- Some of the changes appear to have weakened Green Belt and AONB protection.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Re. Guildford Borough Council – Proposed Submission Local Plan

As a long time resident of West Horsley I write to Object to the proposals set out in the above proposed local plan as they affect The Horsleys, Ripley, Send and Ockham.

I object to the proposed removal of West and East Horsley from the green belt. The villages are well into the green Belt, are not adjacent to any non green belt urban areas and it would be incongruous to have Areas of Outstanding Natural Beauty (AONB) within or adjacent to urban areas. At what point does a village stop being a village?

I object to the proposal to add 385 new homes within the parish of West Horsley.

I object to the proposals on the grounds that the villages do not have the infrastructure to service the homes proposed; that is insufficient water, electricity, gas and sewerage. In addition there is no provision for extra school places, at all levels the schools are over subscribed, nor plans to expand medical provision. The current road network is based on roads which remain country lanes, founded in the days of horse and cart, are narrow, without safe pedestrian footpaths and because of the increasing heavy use are uneven, pot holed and breaking up.

If Guildford Borough Planning department was of a mind to develop and plan the development of the borough and region in a meaningful and positive way it would start with planning improvements and expansion of the infrastructure. If the planning department was a business it would fail as it has not thought through or planned for the development it is proposing. The way it is going about the plan will lead to the Borough trying to develop without sufficient income to service the plans. The proposals do not demand that developers contribute meaningful sums to the infrastructure development.

I object to the plan as the housing density proposed is much higher than anywhere in the parishes. The parishes need smaller starter homes so that younger people/our own children can live in the area in low rise properties with gardens.

I object to the proposed plan for its impact on the green belt and in particular on the Surrey Hills AONB, which abuts and is part of the parishes of East and West Horsley.

I object to the plan as Guildford Borough Council has not demonstrated joined up policies for car parking, access to shopping areas, development of local shopping opportunities rather than their reduction. There has to be access to shops and parking and parking availability to increase footfall. This is necessary while transport locally is geared to the motor car. Busses are like trains they cannot go everywhere so many people will not use them and then they are uneconomic.

I also object to the plan as I am concerned as to where new residents and future generations will work. We are all different and we all enjoy our own space. Myself and my husband chose Horsley as a place to live 20+ years ago and we have been fortunate to be able to bring our family up in a beautiful Green Belt area and have used local schools, clubs, medical etc. It would be such a shame to change the current beautiful village environment. Green space is important for the mind and wellbeing and should be available for us all to enjoy, whether it be living in it or visiting for enjoyment/recreation. Once it’s gone, it’s gone!

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Unrealistic and Overstated Housing Targets

I consider the Annual Housing Targets to be grossly overstated particularly in light of the recent Brexit vote and the new government’s stated determination to bring immigration under control. The ONS and GL Hearn population and housing demand forecasts are already based on levels of migration much higher than the long term 2000-2012 trend and it would be foolish to presume that these high levels of migration will now be realised. And it cannot be right that the current Local Plan effectively calls for Green Belt to be sacrificed now to accommodate people who have yet to arrive in the UK.

The methodology and assumptions used in the GL Hearn forecasts have not been revealed (even, as I understand it, to GBC local councillors) and consequently no independent oversight is available to confirm the plausibility and quality of the housing forecasts they have developed.

It is not clear why GL Hearn have separately counted the demand for employment housing, as the ONS demographic forecasting process already includes macro-economic effects in their modelling of inward population movements to the region. Identifying employment housing and adding it to the housing demand from the ONS population forecast therefore looks like double counting.

No assessment appears to have been made of the ability of the regional and national building industry to deliver the very large and sudden expansion in new home building called for in the Plan. Since the industry has reported difficulty in sourcing capital, labour, and building materials as a major reason for its inability to deliver even the more modest housing targets of recent years, it is pertinent to question whether the resources (including public and private sector investment capital) exist to deliver anything remotely approaching the Housing Target set out in the Local Plan. Brexit will also reduce the supply of low cost manpower from Europe that the building industry relies on.
To summarise:

- the so-called ‘Objectively Assessed Need’ for new housing is much higher than the new post Brexit situation warrants
- the Housing Target should be revised to a much lower, but implicitly more realistic, number
- this implies that the requirement for residential development on Green Belt land will be much reduced, ideally to...

2. Lower Post-Brexit Economic Growth

The consensus among economic forecasters is that Brexit will lead to lower than previously forecast economic growth and so your forecasts of employment and demand for business and commercial space are likely to be significantly overstated as the ONS macro-economic forecasts will have been based on pre-Brexit assumptions.

Given reduced need for business and commercial space, more brownfield land is likely to be available for residential development, further reducing the need for Green Belt development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Inappropriate Developments outside the present Horsleys settlement boundaries

I object to the proposals for development beyond the present settlement boundaries in East and West Horsley (policies A36, A37, A38, A39, A40, A41) on each of the following grounds:

- It is not demonstrated that any Green Belt development is necessary in the Horsleys, for the reasons set out above.
- The construction of between 533 and 623 new homes within as little as 5 years in the Horsleys (which currently comprise less than 2,700 homes) represents a disproportionate allocation on one local community of the new development burden imposed by the Plan.
- The developments will overload existing primary and secondary schools in the area, as there is no firm provision in the Plan to increase school
- The housing densities proposed on the sites are out of keeping with the existing neighbouring semi rural
- The increased local population will place added strain on local recreation spaces and open country and it is not clear that the half-hearted provision of associated local SANG will in fact discourage new residents from exercising their right to go onto the nearby Thames Basin Heaths Special Protection Area, to the detriment of the rare species it
- It is proposed that around 40% of the housing be affordable The Horsleys are not a suitable location for large settlements of social housing given the lack of local employment opportunities, the poor local public transport,
the long walking distances to the closest shops and medical facilities, and the distance to major centres such as Guildford and Leatherhead.

• The Horsleys are in a flood area and any large-scale developments will adversely impact on the ability of the land to absorb heavy The Ockham Road South and East Lane/ The Street already flood frequently after only moderate rainfall. Building on open land in the vicinity will only worsen these problems.

• A 30% increase in local housing will overwhelm the Horsley Medical Centre which is already operating at or beyond capacity – it can take 3-4 weeks to get a GP It is unclear whether sufficient expansion is possible at the site given its proximity to a Designated Open Space (Kingston Meadow) and to the nearby storm drain. Car parking capacity at the Village Hall and Medical Centre is already insufficient to meet demand, and Kingston Avenue is frequently congested by overflow car parking.

• Similarly the 30% increase in housing will place unacceptable strain on local public transport – the infrequent bus services to Guildford and Leatherhead, and the train services to Guildford and No increase is possible in car parking at Horsley Station (due to lack of land), in train size (due to platform limits) or in rush hour train frequency (due to capacity constraints at Clapham Junction).

• The 30% increase in housing will exacerbate road congestion problems on local roads and particularly the B2039 Ockham Automatic traffic surveys by Surrey County Council on the B2039 regularly report peak hour traffic flows approaching 80% of the peak traffic flow on the main A246 – this on a minor road which in places is too narrow to permit two HGVs to pass safely and is too narrow even to justify its B-road classification according to Department of Transport standards. There is no practical scope to widen the road or provide alternative routes for the significant increases in car traffic and heavy traffic which will result from placing high density housing development on the outskirts on the villages.

None of these developments can therefore be regarded as ‘sustainable’ and they should be withdrawn from the Plan for the reasons given above.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objection to Housing Development at the Scout Hut, Weston Lea, West Horsley (site 1275)

Lastly I wish to object to the inclusion in the Plan of the Scout Hut site in Weston Lea as a possible site for future residential development, even in the 11-15 year timescale ahead. The Scout Hut is a valuable resource for young people in the local community and its provision enables local Scout and Cub groups to operate entirely with local community volunteers and private fund raising, at no cost to the public purse. The loss of the Scout Hut would be a major detriment to the local community and the extra 5 houses the site would deliver are incidental to the achievement of the Local Plan. The site should therefore be reclassified as protected local community space for the duration of the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. Objections to Development at the former Wisley Airfield

I object to the proposed strategic settlement (Policy A35) at the former Wisley airfield on each of the following grounds:

- It is not accepted that any residential development is needed at this Green Belt site, for the reasons set out above.
- Removing Wisley airfield from the Metropolitan Green Belt will encourage urban sprawl all the way from Guildford to Cobham and The site is only partly brown field (the old runways and apron area). The rest of the site is untouched agricultural land and should continue to be afforded Green Belt protection.
- The proposed Wisley airfield development will have a major adverse impact on wildlife and rare
- The development will have an adverse impact on the TBHSPA and it is unclear whether the limited provision of open space in the middle of the development will discourage the 4000+ new residents from intruding onto the TBHSPA, threatening the rare species it contains.
- The present airfield site is an important open space for local walkers and cyclists, who will not wish in future to visit what will become an industrialised building Again, this may put the TBHSPA under further pressure.
- The development will overload existing primary and secondary schools in the area, as the Infrastructure Development Plan states that there will be no provision of new school capacity before the development is substantially
- If the proposed waste processing facility goes ahead at Wisley it would be inappropriate to place residential developments close
- It is proposed that around 40% of the housing be affordable Wisley airfield is not a suitable location for large settlements of social housing given the lack of local employment opportunities, the very limited local community shops and other amenities proposed, the lack of local public transport links, and the difficult access without car to Ripley, the Horsleys, and further afield to Guildford, Leatherhead, and Woking. You are in danger of creating a ghetto of deprivation far removed from the services and support that a large social housing development would require.
- The proposal assumes that pedestrians and cyclists will be willing to walk or cycle 4-5km to either Effingham Junction or Horsley stations but this is wishful Pedestrians and cyclists will be exposed to traffic on existing busy narrow roads where there is no room for either pavement or dedicated cycle lanes and it is unlikely that walking or cycling this distance on busy roads would appeal to most residents of a Wisley airfield development.
- Instead it is likely that most residents would choose to use their cars to get to and from a train station - but neither Horsley nor Effingham Junction stations has sufficient car park capacity to absorb the several hundred additional commuter vehicles that might be expected once the development is The additional train commuter traffic would also overload the existing rush hour train services – but there is no scope to increase train size (due to platform limits) or rush hour train frequency (due to capacity constraints at Clapham Junction).

- The already severe local rush hour congestion at the A3/B2039 and A25/M25 junctions and elsewhere will be significantly worsened due to an additional 3-4,000 cars belonging to Wisley airfield residents on the The air pollution at these locations, already in excess of EU standards, will be correspondingly worsened.
- 3-4,000 new residents’ cars will also create additional congestion problems on the B2039 Ockham Road South in East Horsley, particularly at times of peak traffic Automatic traffic surveys by Surrey County Council regularly report peak hour traffic flows approaching 80% of the peak traffic flow on the main A246 – on a minor road which in places is too narrow for two HGVs to pass and too narrow even to justify its B-road classification according to Department of Transport standards. There is no practical scope to widen the road or provide alternative routes to cope with any significant increase in car traffic.
• The development will place additional strain upon the Horsley Medical Centre, which is already operating at or beyond capacity – it can take 3-4 weeks to get a GP. It is unclear what expansion is possible at the site given its proximity to a Designated Open Space (Kingston Meadow) and to the nearby storm drain. Car parking capacity at the Village Hall and Medical Centre is already insufficient to meet demand, and Kingston Avenue is frequently congested by overflow car parking.

The Wisley airfield development cannot therefore be regarded as ‘sustainable’ and should be withdrawn from the Plan for the reasons given above.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Lack of Adequate Infrastructure Plans

By your own admission your infrastructure plans are incomplete and subject to uncertainty as to timing and availability of money for infrastructure investment. Consequently many of your developments proposed in the LAA fail to meet the basic principle of sustainable development enshrined in policy S1, and should be withdrawn for that reason. For instance, you are proposing an increase of up to 623 new dwellings in the Horsleys (an increase of over 30%) without any corresponding increase identifiable in your Plan in local primary school capacity (the existing schools already being oversubscribed). Similarly, no corresponding improvements are proposed to local road capacity or local public transport.

In the same vein, you designate the former Wisley airfield as a site for intensive residential development without any assurance that the necessary infrastructure improvements will be in place before the site is occupied. Your IDP admits, for example, that new schools are only likely to be made available after residential developments have been largely completed; this would therefore impose worsened education provision on existing residents as well. Similar considerations apply at Wisley to medical provision, public transport, roads and access, and flood prevention and drainage; there is no guarantee when, if indeed ever, that any of the required infrastructure improvements will be made.

The lack of adequate infrastructure plans therefore makes a mockery of your claim that the developments in the Local Plan are sustainable.

Comment ID: PSLPP16/12778   Respondent: 8949569 / Richard Deighton   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Failure to Protect the Green Belt from Unnecessary Development

You claim “very special reasons” for putting new housing in the Green Belt but nowhere in the Local Plan is any justification advanced to support your claim. The NPPF and the Planning Inspectorate have made clear that the existence of demand for housing is not ipso facto adequate reason for breaching Green Belt protections. However, despite your evidence base and the NPPF guidance, you have not considered whether the limited availability of development space outside of the Green Belt should in fact restrict the extent of development and constrain the Housing Targets to below the so-called Objectively Assessed Need.

I object to the proposals to ‘inset’ various villages from the Green Belt. This seems to be in reality no more than a bureaucratic device to release land in and around villages for more development without being subject to Green Belt constraints. ‘Insetting’ a village makes no physical difference to its appearance or to its value as open green space separating urban settlements such as Guildford, Woking, and Leatherhead/ Fetcham.

The Local Plan contains insufficient provisions to ensure that all brownfield opportunities within existing settlements are fully exploited before the irreversible sacrifice of Green Belt land for development. The Plan should include much more robust measures to exploit brownfield sites. It should require that all brownfield opportunities across the Borough have been identified and realised before permission is given for any development in the Green Belt.

In the same vein, development (or redevelopment) of any brownfield site for commercial/ business use should not be permitted unless the site is demonstrably unusable for residential development. There is no point in promoting economic development to the detriment of adequate housing provision.

The Local Plan also ignores the evidence you presented in the earlier 2014 SHMAA which showed that some 43% of all existing properties in the Borough are too large (by a margin of two or more bedrooms) for the households occupying them. This suggests that some 20,000 existing housing units in the Borough are oversized and hence inefficiently used, and will be increasingly so as households continue to shrink in size in future. The Local Plan however contains no constructive proposals whatsoever to address the dysfunction in the existing housing stock. For example, planning incentives aimed at homeowners and small builders would encourage oversized dwellings more readily to be subdivided into (or to be replaced by) multiple smaller units. It is likely that many times more ‘windfall’ units could be created in this way than the 625 assumed over the lifetime of the Plan; illustratively, replacing just 10% of the 20,000 oversized existing houses with smaller units more suited to small or elderly households could yield anywhere between 2,000 and 6,000 additional smaller housing units. As these would be brownfield by definition, this would further reduce the need for development in the Green Belt.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. Failure to Define ‘Sustainable Development’

The Local Plan does not define anywhere what it means by ‘sustainable development’. The Plan therefore contains no
guidance to planners or developers as to what is required, and ‘sustainable development’ has therefore become no more
than a catchphrase that means what anyone wants it to mean.

The Local Plan needs instead to highlight exactly what the NPPF regards as ‘sustainable development’ and this should
include objective criteria by which the sustainability or otherwise of a proposed development can be assessed, and any
resulting detriment to existing communities quantified. Sustainability should also have regard to supply-side capacity as
discussed above.

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

...
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the proposal to add 385 new homes within the parish of West Horsley and further I object to the proposal to build 100 homes in East Horsley close to the railway near to East Horsley Station, but adjacent to parts of West Horsley.

I object to the proposals on the grounds that the villages do not have the infrastructure to service the homes proposed; that is insufficient water, electricity, gas and sewerage. In addition there is no provision for extra school places, at all levels the schools are over subscribed, nor plans to expand medical provision. The current road network is based on roads which remain country lanes, founded in the days of horse and cart, are narrow, without safe pedestrian footpaths and because of the increasing heavy use are even now breaking up.

If Guildford Borough Planning department was of a mind to develop and plan the development of the borough and region in a meaningful and positive way it would start with planning improvements and expansion of the infra structure. If the planning department was a business it would fail as it has not thought through or planned for the development it is proposing. The way it is going about the plan will lead to the Borough trying to develop without sufficient income to service the plans. The proposals do not demand that developers contribute meaningful sums to the infrastructure development. Crazy!

I object to the plan as the housing density proposed is much higher than anywhere in the parishes and while the parishes do not need more large 4-5 bed houses, but smaller 2-3 , particularly 2 bed maisonettes, and terraced houses so that younger people can live in the area, with green space between the blocks to maintain the garden feel of the parishes. In some locations, perhaps near railway embankments 4-5 floored blocks of flats of interesting design could be built.

It is time that Guildford Borough acknowledged that a good part of the housing need could be met by the development of high rise buildings in the centre of Guildford, such as the railway redevelopment proposals. Other areas are also suitable. As towns develop into cities their centres go up. Centres of the Guildford suburbs could also rise higher to perhaps 5/6 storeys.

I object to the plan as Guildford Borough Council has not demonstrated joined up policies for car parking, access to shopping areas, development of local shopping opportunities rather than their reduction. There has to be access to shops and parking and parking availability to increase footfall. This is necessary while transport locally is geared to the motor car. Busses are like trains they cannot go everywhere so many people will not use them and then they are uneconomic.

I object to the proposed plan for its impact on the green belt and in particular on the Surrey Hills ANOB, which abuts and is part of the parishes of East and West Horsley.

I also object to the plan as there is no or little indication of where the new residents will likely find employment to enable them to live in the new houses planned. The Railways are already at capacity as are the local trunk roads and there is no surplus parking space at any of the local railway stations. As we are likely to continue to use the motorcar for personal transport and with buses rather like trains in that they only travel on limited routes the current plans will increase pollution in the atmosphere and increase Global Warming.

These local plan proposals have not been well thought out and must be rejected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13159  Respondent: 8953025 / Peter R Dawson  Agent:
As a long time resident of West Horsley and earlier of Ockham, I write to Object to the proposals set out in the above proposed local plan as they affect The Horsleys, Ripley, Send and Ockham.

I strongly object to the proposed removal of West and East Horsley from the green belt. The villages are well into the green Belt, are not adjacent to any non green belt urban areas and it would be incongruous to have Areas of Outstanding Natural Beauty (AONB) within or adjacent to urban areas.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I feel passionately that Chilworth should remain in the Greenbelt, my main concern being once this status has been changed there is no protection against development. With each new home built, there would be 2 plus extra cars travelling along the A248, causing even further congestion through Chilworth, with cars turning towards Shalford at Rice’s corner. At present the traffic from two schools (that causes gridlock between 7.45 and 9am), plus the new housing that has already taken place in Chilworth in recent years, would be greatly added to. There is also the planning for 1,800 homes at Dunsfold Park, creating even more traffic for our villages. At present both New Road and Dorking Road Chilworth have major parking problems, with cars parking up on pavements, caused by both schools, The Percy Arms Public house (whose car park cannot cope) and the parking restrictions at the Station. Travelling through Chilworth is like negotiating a chicane, apart from the danger to pedestrians crossing roads, it also causes gridlock at certain times of the day. By increased housing and more vehicles these problems can only worsen. The Drs surgery in Wonersh, where the majority of residents of Chilworth are registered would also be put under extra strain, as would both schools.

You have to live in Chilworth to fully know the extent of the problem and for this reason are deeply disagree in taking Chilworth out of the Greenbelt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object most strongly to the excessive housing target numbers set out in the Revised Local Plan. These numbers were set at a time when the UK was expected to remain within the European Union and according to Councillor Spooner were based on that assumption. Following the Brexit vote on June 23rd the UK will be subject to reduced immigration and, according to many independent organisations, significantly reduced growth, so the numbers must be revised downwards to reflect this. I understand that Councillor Spooner has promised that not only this will be done, but that the numbers will be revisited to take into account the 2014-based population and household projections. I must also insist that since the latter would also have assumed that the UK would remain in the EU, these numbers must also be adjusted to reflect the Brexit vote before being used in the re-calculation of the target housing numbers.

I also object to the fact that the calculations behind the numbers have not been made transparent. It beggars belief that given that the whole plan is based on these numbers, Guildford Borough Council has not examined these in more detail and is apparently prepared to accept them at face value. Does the Council not expect some detail of how a developer claims he will accommodate a particular number of homes on a particular site? Of course they do! Given the amount of time & effort that has gone into this plan, and the difficulty the Council has clearly had finding suitable sites I find it extraordinary that the Council has not examined this number in more detail and verges on negligence.

I object to the overprovision of housing provided for in the Local Plan 2016. The plan provides for approximately 31% oversupply of the OAN number while making no allowance for infill housing that is not envisaged by the Local Plan, rather seeing this infill is seen as ‘windfall supply’ or should that be oversupply. If the Target numbers are to be recalculated as discussed in Section 1 above this oversupply may be around 40% or more. Whilst I can understand a desire to allow for some sort of oversupply in the short term it seems madness to allow for oversupply some 17 years into the future. No one can see that far ahead, three different governments will have come and gone by then and policies will have changed. The fact is that any substantial sites which identified in the plan will inevitably lead to housing blight in their immediate vicinity until they are identified as not required. The Council must make decisions and eliminate some sites before the Plan is finalised.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. Housing Numbers

The Ripley Society objects most strongly to the excessive housing target numbers set out in the Revised Local Plan. These numbers were set at a time when the UK was expected to remain within the European Union. Following the Brexit vote on June 23rd the UK will be subject to reduced immigration and, according to many independent organisations, significantly reduced growth, so the numbers must be revised downwards to reflect this. The Society understands that the Council has promised that not only this will be done, but that the numbers will be revisited to take into account the 2014-based population and household projections. It must also insist that since the latter would also have assumed that the UK would remain in the EU, these numbers must also be adjusted to reflect the Brexit vote before being used in the re-calculation of the target housing numbers.

1. Calculation of Housing Numbers

The Society also objects to the fact that the calculations behind the numbers have not been made transparent. It beggars belief that given that the whole plan is based on these numbers, Guildford Borough Council has not examined these in more detail and is apparently prepared to accept them at face value. Does the Council not expect some detail of how a developer claims he will accommodate a particular number of homes on a particular site? Given the amount of time & effort that has gone into this plan, and the difficulty the Council has clearly had finding suitable sites we find it extraordinary that the Council has not examined this number in more detail.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I also object to the proposed development of 2000 homes at Gosden Hill Farm. Whilst I would concede that this site could accommodate a (much) lower number of homes, the surrounding road infrastructure is totally inadequate to accommodate the number of homes proposed and would result in an urban sprawl spreading from Guildford through Burpham to Send Parish and West Clandon.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the building of 45 homes on the site of Clockbarn Nursery. The land is Grade 1 Agricultural Land and should be used accordingly. So far as I can see, no allowance at all has been made in the Local Plan for the increased food consumption required to feed the additional mouths implied by the 693 homes per year foreseen by the plan. Also, there is already inadequate access to the various buildings and industrial sites along Tannery Lane and the junction with Send Road is hazardous to the extent that significant amounts of traffic access the other end of Tannery Lane via Send Marsh Road and Polesden Lane. Planning permission has already been granted for 64 apartments at The Tannery and for the building of a Marina. Enough is enough; Tannery Lane can take no more.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the building of 400 homes and 7000 sq metres of Industrial Space at Garlick’s Arch. The site floods, and is in part ancient woodland and any building on the site would increase the off-run into the East Clandon Stream, and increase the risk of flooding downstream in Send Marsh despite the flood prevention works carried out following earlier incidents of flooding. The Pylons which march across this area would mean that the area of Green Belt sacrificed per home would be greater than alternative sites due to the need to allow space around the transmission lines. Also it is not clear that the suggested Industrial Space would be required if the reduced economic growth expected following the Brexit vote were properly reflected in the Council’s figures.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed new interchange with the A3 at Burnt Common. The construction of this interchange would result in a vast increase in traffic though Send to Woking and beyond. In addition to the traffic that currently passes through Ripley and down Newark Lane it would also encourage traffic that currently travels from Esher and Cobham to Woking through West Byfleet along the A245 (and vice-versa), to divert through Send (both of which routes are already gridlocked in the morning and evening rush hours), making Send Road more gridlocked and polluted than it already is. This interchange solves nothing, merely diverts traffic to Woking via another route. If it was a solution it would have been proposed in the previous plan, rather than appearing as a last-minute amendment to a fatally flawed Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the building of 40 houses and 2 travellers’ pitches at Send Hill. Send Hill is an inappropriate location for development of this scale because of the narrow width of the access road. The sub-soil of the proposed site contains unsafe landfill waste registered with Guildford Borough Council and would lay the Council open to legal action were there to be any untoward leakage from the site and possible claims of discrimination.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Attached documents:
I object to the proposal to allow the 4 travellers’ pitches at Rose Lane to remain. These pitches have only been granted temporary planning permission until such time as the Council provides sufficient numbers of travellers’ pitches in line with national guidelines. These pitches were constructed without planning permission and when retrospective permission was applied for it was refused by Guildford Borough Council, as was appeal after appeal. Only on the final appeal at national level was temporary permission granted as described above. This site is in the Green Belt and the Council must stick to its previous stance and remove the site from the Local Plan. To do otherwise would encourage everyone to build without applying the necessary permissions in the hope / belief that planning permission would eventually be granted. There must be more suitable sites in the Borough, or adjacent. The appellant stated at the final appeal that what they really wanted was a permanent site to live, the location was irrelevant.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposals to remove a number of the Local Villages from the Green Belt. The Metropolitan Green Belt was established in the 1940s and 1950s to limit the urban sprawl of London and was intended to be permanent. The Local Plan states that 89% of the land area of the Borough is Green Belt, of which getting on for 50% is made up of the Surrey Hills AONB and a further perhaps 15% comprises SSSIs or areas with other sorts of protection. This understandably places pressure on the Council when trying to meet national housing targets, and one of its responses has been to inset a large number of Surrey villages from the Green Belt. Instead of this approach the Council should use its large (largest?) proportion of Green Belt land to argue a special case for a reduced housing target, and indeed I had understood from a public meeting in Send in January this year that they would indeed be pleading this ‘special case’ but no such case appears to have been made. I would also remind the Council that it’s members, almost to a man / woman were elected on promises to protect the Green Belt, whilst once elected they appear to have decided that there are various grades of Green Belt and only some of it needs protection. Guildford Borough Council has not established the special circumstances required to inset these villages form the Greenbelt.

I object in particular to the removal of Send (including Send Marsh and Burnt Common) from the Green Belt. In addition to the above argument Send Parish’s Green Belt forms an essential and substantial buffer which prevents Woking and Guildford becoming a single conurbation. Send Village itself has an open character with two lakes as its geographic heart, and the southern side of the Wey forms a green backdrop to the view from Old Woking and beyond. The Wey Valley itself forms an essential wildlife corridor, a fact which has been recognised by Woking Borough Council in respect of the north bank and this corridor needs to be reflected on the South Bank. The Wey itself is also of historical and cultural significance since it was one of the first rivers to be made navigable by construction of the Wey Navigation. Send is also a long way from the nearest Railway Station(s) and is served by a single hourly Bus Service, its removal from the Green Belt and consequential increased development would, therefore, mean significant increases in vehicle movements and the associated pollution. Send Village must therefore remain in the Green Belt.

Similarly, I object in to the removal of Ripley from the Green Belt. Ripley Village also has an open character with one of the largest village greens in England, and one of the oldest cricket pitches at its heart. The centre of the village itself comprises a Conservation Area which Guildford Borough is considering extending, though the report regarding this extension seems to have been delayed. Again Ripley is a long way from the nearest Railway Station and its removal from the Green Belt and subsequent increased development would, therefore, mean significant increases in car traffic and the consequential pollution. Ripley Village must therefore remain in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. Removal of Villages from the Green Belt

**The Society objects to the proposals to remove a number of the Local Villages from the Green Belt.** The Metropolitan Green Belt was established in the 1940s and 1950s to limit the urban sprawl of London and was intended to be permanent. The Local Plan states that 89% of the land area of the Borough is Green Belt, of which getting on for 50% is made up of the Surrey Hills AONB and a further perhaps 15% comprises SSSIs or areas with other sorts of protection. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposed distribution of housing in the 2016 Local Plan. This Local Plan identifies sites for some 1,800 new homes to be built in the Central Wards of Guildford and some 11,000 in the outer wards of Guildford Borough with some 9,600 of the new homes in the outer wards being congregated in very large sites of 400 homes or more. Without doing detailed sums I suspect this proposed provision is almost in a directly inverse proportion to the existing housing stock. This is monumentally unfair to residents who have typically invested between a quarter and a third of their income in the home and environment of their choice. The Plan needs to be revisited and use innovative methods to establish a fairer distribution of new housing in proportion to existing housing, which for example, sees Send Marsh / Burnt Common expected to accept an increase in 48% in home numbers and Send Parish as a whole see an increase of 20% plus with other areas being allocated increases of 2.5% or less.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Distribution of Housing

The Society objects to the proposed distribution of housing in the 2016 Local Plan. This Local Plan identifies sites for some 1,800 new homes to be built in the Central Wards of Guildford and some 11,000 in the outer wards of Guildford Borough with some 9,600 of the new homes in the outer wards being congregated in very large sites of 400 homes or more. Without doing detailed sums the Society suspects this proposed provision is almost in a directly inverse proportion to the existing housing stock. This is monumentally unfair to residents who have typically invested between a quarter and a third of their income in the home and environment of their choice. The Plan needs to be revisited and use innovative methods to establish a fairer distribution of new housing in proportion to existing housing.

1. Overprovision of Housing

The Society objects to the overprovision of housing provided for in the Local Plan 2016. The plan provides for approximately 31% oversupply of the OAN number while making no allowance for infill housing that is not envisaged by the Local Plan, rather seeing this infill is seen as ‘windfall supply’ or should that be oversupply. If the Target numbers are to be recalculated as discussed in Section 1 above this oversupply may be around 40% or more. Whilst the Society can understand a desire to allow for some sort of oversupply in the short term it seems madness to allow for oversupply some 17 years into the future. No one can see that far ahead, three different governments will have come and gone by then and policies will have changed. The fact is that any substantial sites which identified in the plan will inevitably lead to housing blight in their immediate vicinity until they are identified as not required. The Council must make decisions and eliminate some sites before the Plan is finalised.

| Comment ID: | pslp172/4858 | Respondent: | 8955169 / Lynne Gibbons | Agent: |
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Evidence base

The latest SHMA 2017 still inflates the housing figure because it is based on an excessive calculation of need and fails to apply appropriate constraints. GBC have contravened government guidelines by agreeing that G L Hearne and its subcontractor have intellectual property rights in the detailed analysis so not even GBC and the councillors know how the figure was calculated. It seems that migration has been over-estimated but in the absence of information it is impossible to verify. A report by experts NMSS dated June 2017 commissioned by Guildford Residents' Association concludes that population growth had been substantially over-estimated and that on correct analysis the number of homes required should be substantially reduced.

The Carter Jonas Retail Study Update 2017 lacks credibility. The failure to implement existing retail consents in North Street for 10 years undermines the argument that there is demand for more retail space and no account is taken of the trend for consumers to buy on the internet rather than visit a shop. The potential for residential development in the town centre has therefore been under estimated as has the potential for development of brownfield sites.

There is no overall strategy for the town. The Town Centre Masterplan commissioned by GBC from architects and planners Allies & Morrison has been deleted as a source document despite having been adopted by the Council.

The Employment Land Needs Assessment 2017 lacks detail and analysis of different use classes B1(a), B1(b), B1(c), B2 and B8. Since the employment requirements of these use classes differ significantly the ELNA is deeply flawed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Detailed comments relating to West Horsley

I approve the removal of Site 41 from the plan but the total of 295 homes proposed for the village is still substantially excessive. It would destroy the rural nature of the village and overwhelm its infrastructure.

I object in particular to Policy A37. Bell & Colvill already have permission for nine houses on the site of their workshop and adjacent property; this is reasonable as it is brownfield land and provides homes of a size needed in the village. The proposal in the plan to expand this onto adjacent Green Belt land and increase the number of homes to 40 is totally unacceptable. It would involve high density development in a conservation area within 500m of at least five listed properties. I object most strongly.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the failure of Policy D1 properly to address the issue and in particular the inadequacy of the Guildford Borough Council Transport Strategy 2017.

Infrastructure

The present infrastructure is inadequate to meet current requirements for transport, medical care, education, flood control and water supply. Developments proposed by the plan would overwhelm these and Policy D1 makes no realistic proposal to deal with the problem.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
AONB

The paragraphs relating to AONB weaken the protection of AONB. The previous restrictions on non major developments have been removed. The five key tests previously applied seem to have given way to a more relaxed attitude to applications affecting AONBs. I object to these changes to Policies P1 and E5.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Since the SHMA is flawed, the 12,426 housing target is excessive. The objectively assessed number should be analysed to a lower figure and the housing target should be further reduced by the application of constraints as required by the NPPF, in particular the need to protect the Green Belt to which lip service is paid in Policies P1 and P2. I object therefore to the housing target of 12,426 and the consequences that flow from it.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Attached documents:
I am a long-standing resident of Guildford and moved to Tilmahms Farm in 1983. I attach a set of papers led by a letter to Carol Humphrey dated 23rd November 2013 (which sets out how I became involved in the Town Planning project on this round) following which I had a meeting with Heather Sandall on 3rd March 2014 - I had not received a reply from Carol. I am not good on websites, but I understand that my land does not currently appear on your plans.

Since 2014 I have received advice that, in due course, even if not immediately, you are short of available grounds for housing and that, as my land adjoins and has a drive to the roundabout close by the Crematorium, it would be of use to you.

Having given further consideration with my family and taken professional advice two things arise.

I attach a further plan which shows, in yellow, the field opposite the roundabout and also shows land not previously referred to which is coloured blue and which we own.

My correspondence shows my family's commitment to the farm, outlined in red on the plan (altogether we farm some 55 acres including farming and taking care of some 25 acres of National Trust meadow, outlined in brown on the plan).

Looking to our own future, we should like to apply to build a house on the land marked in blue for ourselves for the future, for which we would be prepared to offer the upper (and higher, flat) part of the land marked in yellow for your housing purposes.

Could you please give consideration to our proposal.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We previously commented on your designation of East Horsley as a Rural District Centre in the draft Local Plan. We note that the designation has now changed to a District Centre and we repeat our objection to this on the grounds that the designation completely misreads the situation. The direction of main town centre uses towards the village, as a District Centre, would not only be inappropriate and unsustainable, but would be physically impossible to introduce. It should also be noted that there is already insufficient parking in the village for those using the local amenities, and there is no available space to alleviate this. The error in designating East Horsley as a District Centre is compounded by the fact that Cobham, which is in close proximity but outside the GBC boundary, is in reality the District Centre for the Horsleys and vicinity. The reason for this is the much more extensive range of services available, including two large supermarkets and branches of 4 different banks, compared to the Horsleys where there is no large supermarket and only one bank.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Infrastructure Policy

We strongly support the need for improvement in the infrastructure of East and West Horsley. However, the GBPSLP is focused on the Infrastructure required to support potential future development. This ignores the fact that the current infrastructure is not functioning in an acceptable manner.

The Infrastructure in the Horsleys is not only failing to meet the current needs of users but some aspects, such as roads, have no obvious possibility for improvement. The boundaries of the 82039, which runs through East Horsley, are such that widening is not possible. The number, vehicle size and speed of the current traffic using this road is already far greater than the original design could have envisaged. The inability of the roads, drainage, schools and medical facilities to adequately support the existing homes within East and West Horsley is evident, and has been acknowledged at Borough and County level. We do not believe that Community Infrastructure Levy is intended or designed to deal with these existing constraints. **We therefore object** to the development proposals in the Horsleys on the grounds that infrastructure constraints have not been applied, and no data has been produced to demonstrate how the existing issues can be dealt with.

In addition, the impact of the proposed 2,000 houses at Ockham on the site of the former Wisley airfield would have a dramatic effect on the roads, station parking and rail transport overloading for residents of East and West Horsley. It would also create a settlement of questionable sustainability besides removing an environmentally sensitive and strategically placed tract of land from the Green Belt. We therefore **object** to the identification of this as a strategic development site and request its removal from the plan.

Policy P2- Green Belt

This policy states that Guildford Borough Council (GBC) will continue to protect the Green Belt and we fully support that aim.

In the villages of East and West Horsley the original objectives of the Green Belt continue to be fully met and we disagree with the analysis in the Green Belt and Countryside Study (GBCS) documentation produced by consultants on behalf of GBC which fails to acknowledge the open nature of the villages, the large areas of woodland and open space which are integral to the appearance of the area and the low density of housing in the settlement areas.

We object strongly to the proposal to remove the villages from their current status by insetting them from the Green Belt and we do not believe that GBC have demonstrated the exceptional circumstances which are necessary to support such a proposal. The only circumstances that they present are those for increased development, in particular housing, which is unacceptable as a basis even if the proposed development was based on accurate and supportable evidence. As outlined above, this is not the case as the OAN and the SHMA are flawed.

There is also a proposal to change the settlement boundaries for the villages which appears to arise from the GBCS. The reason for changing the boundaries appears to be solely in order to include additional area inside the village boundaries in order to make land available for development. In many of the cases the proposed extended boundary lines are less recognisable in logic and certainly less defensible than the existing ones. We object to these proposals to change the settlement boundaries for East and West Horsley and in addition object to the newly designated "identified boundary for the Village" proposed to the south of the A246 in the area of Chalk Lane, The Warren, Rowbarns Way and Green Dene.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Thank you for the opportunity to comment on the Guildford Borough Proposed Submission Local Plan (GBPSLP).

The Society wishes to register its concerns over GBPSLP and the Evidence Base which supports it. We realise that the Evidence Base is not a part of the consultation process, but because it underlies the whole of the GBPSLP, and we continue to see the inaccuracies and inconsistencies which we outlined in our previous letters in response to the Options document (2013) and the Draft Local Plan ((2014), we therefore Object to the Proposed Submission Local Plan.
We outline below some of the specific items to which we object.

Policy S2 - Borough wide Strategy.

We consider that the Housing Targets on which the policy is based are derived from an Objectively Assessed Housing Need (OAN) and a Strategic Housing Market Assessment (SHMA) which are flawed. The modelling to produce the original number has not been demonstrated to adequately represent either the historic immigration figures nor the projected figures issued by the Office of National Statistics (ONS). The further increases made to the demographic starting point are in some cases inappropriate and in some case erroneous. Given that the proposed developmental needs in the borough are based on what we consider to be inaccurate data we object to Policy S2.

Policy A35 and Policy S2

We object to the Former Wisley airfield being included in Policy S2 as a strategic development site.

We also object to Policy A35 which sets out details of the proposal to develop the former Wisley airfield.

The main reasons for our objection on these policies are as follows:

1. Inappropriate development in the Green Belt, and no exceptional circumstances being evidenced for the removal of the land from the Green Belt.
2. The site does not exhibit the necessary sustainability, as shown by adverse sustainability appraisal reports.
3. Air quality at the site is in excess of EU permitted levels.
4. The increased volume of road traffic on roads which are already severely congested, and which are regularly and frequently used by leisure cyclists.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E8 & Policy E9

Although not objecting in total to these policies concerning District Centres and rural Local Centres, we have specific concerns. We object to the inclusion of the phrases "and other main town centre use" where it appears in both policies.

The definition of main town centre uses within these policy sections (paras. 4.4.87b and 4.4.92a) include an extremely wide ranging selection of activities, some of which are totally inappropriate to locations such as Station Parade and Bishopmead Parade, East Horsley. Examples include factory outlet centres, casinos, drive-through restaurants and night clubs. The fact that these uses will be "supported" by Policies E8 and E9 is a concern. The designation "retail and other main town centre uses" replaces the previous wording which simply said "retail development". The term "consistent with the scale and function of that centre" is insufficient protection against inappropriate development and the reference to "other main town centre uses" and the supporting definition of these uses should be removed.

Attached documents:

Policy ID1

We object to the policy on Infrastructure and delivery.

Comments regarding the current overloading of all aspects of infrastructure were made during previous consultations. There is no reason to believe that there will be any improvement in delivery of infrastructure capability in the future and it is obvious that the only additional infrastructure being considered is that required for new development. That means that the current infrastructure deficit will continue throughout the plan period. It also means that current underperformance will be accentuated by the addition of new developments and, particularly for road transport aspects of infrastructure, the disruption resulting from development works will exacerbate the current situation.

The sustainability of development in West Horsley is particularly questionable and the evidence of this is apparent from its position in the settlement hierarchy table produced by GBC (Appx.XII)
In conclusion, we object to the way in which the distribution of proposed new housing across the borough has changed from 2016 to 2017 as it increases the pressure on the Metropolitan Green Belt in the area of the borough which is most sensitive to loss.

For the Guildford area and for Ash and Tongham the proportion of homes is roughly the same from 2016 to 2017. Housing allocation for the Western rural area of the borough has reduced by 25% and the Eastern area has increased by 14%. Thus, of the total house allocation for the borough during the plan period, 48% is planned to be built in the Eastern rural areas. This inevitably means that more Green Belt land will be utilised and the indication is that around 58% of all the new development in the borough will be built on Green Belt land. This does not accord with statements that the Green Belt will be protected, nor that a "brown field first" policy will be implemented.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2

HCPS strongly objects to:

- proposals for new Green Belt boundaries within the Metropolitan Green Belt and "insetting" of several villages from the Green Belt, including the villages of West Horsley and East Horsley. This will give rise to further infilling development potential within the arbitrarily extended villages settlement areas.

- the change in the East Horsley settlement boundary to the south of the A246 [Map entitled Amendment 2: Horsleys-East Horsley (south)].

- the use of an unconstrained OAN figure of 654 homes per annum throughout the rural and urban areas.

- the unsustainable characteristics of proposed development sites A37, A38, A39 and A40. The Proposed Submission Local Plan 2017 consultation documents contain no proposals for provision of infrastructure for the proposed development sites in East and West Horsley.

One of the changes in Policy P2 refers to the Metropolitan Green Belt as "designated on the policies map" where it previously stated "as shown on the proposals map". This change appears to have ignored all previous comments on the proposals to inset villages and translated the insetting proposals into a current status. The previous objections to the fact that the Green Belt including the Surrey villages, and in particular the villages of East and West Horsley, continued to meet the requirements set out for Green Belt designation still stand. The insetting of villages, together with the extension of settlement boundaries, for the purpose of achieving (erroneous) housing targets is inconsistent with national government and GBC declared intent of protecting the Metropolitan Green Belt and does not represent exceptional circumstances.

The proposal to include land to the south of the A246 within the settlement boundary for East Horsley, which increases the settlement area by almost 40%, would not only adversely change the form and character of East Horsley, but runs counter to the proposed Policy D3 to conserve historic environment. The area to the south of the A246 is an example of the
equilibrium between the built environment and the natural environment providing an historic asset based around an ancient hollow way through the chalk hills. This is rightly, and historically, outside defined settlement areas.

For West Horsley South, categorised as highly sensitive by the Green Belt Purposes Schedule, the additional lands proposed for removal from the Green Belt will be highly damaging to listed buildings, historic buildings, the conservation area and the overall character of the village.

Development sites A37(WH South) and A40 (WH North) were assessed as unsustainable. No justification was presented for the new boundaries, many of which are not defensible.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2

HCPS strongly object to the number of houses identified for provision during the plan period.

Our objection is mainly based on two considerations:

1. The total number is based on a flawed Strategic Housing Market Assessment (SHMA) for Guildford. The major contributors to the inaccuracy in the numbers are: perceived errors in the net migration figures for the borough; the inclusion of student housing needs which are already accounted for elsewhere in the calculations; inconsistent use of data from disparate sources to calculate the homes needed to support job growth. The detailed argument for this is to be found in Neil McDonald's report of June 2017 entitled "Review of GL Hearn’s Guildford Addendum to the West Surrey SHMA".

2. The total housing number resulting from the flawed calculations is then used without any constraints. It is our contention that the target number used should have constraints applied in correcting Objectively Assessed Needs (OAN) to take account of Green Belt, infrastructure and other relevant issues.

Since the target numbers for housing requirements underlie most of the other policies in the proposed Plan, doubts concerning their accuracy mean that much of the current document remains suspect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In response to the current proposed local plan I wish to express my views, concerns and objections.

**Housing:** I object to the proposed number put forward. The figure is excessively high, based more on supposition and suggestions than real hard evidence. Whilst there is a need for some new housing, especially for key workers, social housing, first time buyers and those empty nesters who wish to downsize, this need would not come close to the numbers currently being proposed. I object to the size and location of some proposed sites, especially within the greenbelt. Brownfield sites need to be utilised more efficiently.

**Brownfields sites** - residential properties v retail/office space. I object to the ratio suggested. The Internet has changed, and will continue to change, the way people not only shop (on line with home delivery) but many office based businesses now do and will increasingly rely on "virtual offices" or conference calling methods. Whilst the "Head Office" might be in Guildford the need for all staff members to be located there would not. The same with many IT/researched based Companies. Demand for retail and office space will decline pro-rata. I have already witness first hand empty office and retail spaces both within and outside Guildford itself. A greater proportion of brownfield sites, especially in Guildford Centre, should be allocated to residential properties to house those in most need locally - at truly affordable prices.

Whilst the NPPF appears to offer the ability to protect against "garden grabbing" I could not see anything specific in the policies to this effect. I demand there is specific wording making this totally clear when the final plan is drawn up.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Inset Villages:** Whilst I am pleased the land around Fairlands Village is no longer safeguarded I am concerned that Fairlands is now to be inset from the Green Belt. Fairlands will have Green Belt on 3 sides - the fourth is the Aldershot Road. Leaving Fairlands vulnerable to future expansion and possibly effectively merging with Perry Hill Ward. "**In accordance with the NPPF (para 84), any site allocations should be directed to those villages that are inset (rather than washed over) The potential development areas are identified on the basis that should exceptional circumstances warrant amending the Green Belt boundary in order to accommodate growth that could not be suitably provided elsewhere, development here would not harm the main purpose of the Green Belt. If allocated, the inset boundary surrounding the village would be extended to incorporate the site.**"

**Infrastructure:** I object that GBC seem to be pursuing a "cart before the horse" mentality. Our roads are already at breaking point. A minor prang/accident in one area has an immediate ripple effect over many miles which invariably
results in a mass gridlocking of all arterial roads. Until the issue of our road systems is resolved any increase in housing numbers will cause even greater congestion problems than we already have.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Keens Lane site: - I object to this site being considered as a suitable site for 140 dwellings and/or 60 bed residential care home as it falls within the Metropolitan Greenbelt; part of the site falls within the 400m buffer zone of Whitmoor Common SPA and SSSI. (A Common where the new residents are more likely to visit than the proposed Russell Place Farm SANG some 5km away.) It is a vital wildlife corridor and is also home to water voles (a protected species). Vehicle emissions from this site would have a detrimental impact on Whitmoor Common. Keens Lane is a very narrow single width country lane as is Tangle and Gravettes Lane. Keens Lane would be especially difficult, if not impossible, to widen as it is bordered by Chitty's Common - which is registered common land. Any access into the A322 Worplesdon Road would be potentially dangerous and would exacerbate the existing traffic problem. There is also an issue with flooding.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Surrey University has still to build the amount of student accommodation on its Manor Park Farm site that was agreed when planning permission was given in 2004. The site is big enough to create accommodation for some 7000 students and possibly many of its staff. This would free up something like 2000 dwellings and reduce the need to build more. I object to their request to build anything at all on the Blackwell Farm site - an AONB. Any planning application they submit should be denied until they have honoured their current obligations relating to the Manor Park Farm site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
**Flooding:** I cannot see into the future any more than the next person, but I would question the idea of building on land that has flood issues be they minor or major. If this summer is a reflection of weather to come then our rain fall/water table is likely to increase also. The use of "Suds" will improve surface drainage agreed, but where will the addition fluvial water go, especially if some of the historic courses are now blocked by new development foundations. I agree we have to plan for tomorrow but better to wonder "what if" today than "if only" some time in the maybe not too distant future. Unless maybe Guildford could be renamed Guildford on Stilts or Guildford on Water?

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Land North of Keens Lane Policy A2 site 126.**

I OBJECT - 140 was to many and unrealistic, to increase by 10 is madness. Access is down a country lane barely wide enough for single traffic let alone two way. It is a main wildlife corridor between Broad Street, Rydes Hill, Chitty's and Whitmoor commons. Both the A322 and A323 have rush hour issues and already at capacity whether from commuting public or delivery vehicles of all types. These 2 roads bottleneck at Woodbridge Hill; when severe rain, there are flooding issues especially on the A323.

Whilst it might be possible to restrict any pets kept by residents in a care home, it will be impossible to do the same for private residential properties, regardless of the age of the occupants. To suggest no staff accommodation will be permitted within 400m of the SPA is totally bizarre - does that mean that if they are already local they will have to move or not be allowed to buy/build/rent one of these residential properties if not local. Really does need some joined up thinking and clarity.
Like the idea of encouraging cycling and pedestrian momentum to and from site. However if the "Strategic SANG" that allowed this development to come into being is a car drive away - Russell Place Farm Frog Grove Lane Wood Street for example - can't see many dog walkers either able or willing to walk/cycle along the Aldershot Road with dog/s trotting along side. As new locals they will seek the nearest open space such as Rydes Hill, Chitty's Broad Street or even Whitmoor Commons. If they are going somewhere special yes they will drive but not just to exercise either themselves or their pets.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()
We object to Guildford Borough Council's draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:

- destroy views from the Hog's Back ridge - a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- increase tailbacks on the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford's pollution

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to site A26 Blackwell Farm being included in the strategy and sites consultation because it goes against both the National and Guildford Borough Council’s own policies as follows:

- Policy D1: P93 Design - Making better places
  - In matching words to reality, this policy has a hollow ring especially in the creation of the proposed Garden Neighbourhood at Blackwell Farm. The harsh reality is that site 60 is not close to the centre of Guildford and transport is ESSENTIAL. Public transport in the area is always being cut back due to lack of funding or is unreliable. Therefore use of the car is the order of the day, as has been found on the envisioned car free campus of Manor Park, now covered in acres of car parking.
  - Development on the Hogs Back will destroy the local character of Guildford.

- Policy P1: P45 Protecting - Surrey Hills Area of Outstanding Natural Beauty
  - Forming part of the Hogs Back ridge Blackwell Farm is very scenic.
  - By law Blackwell Farm should be given the highest level of protection.
  - See NPPF

- Policy P2: P48 Green Belt
  - Located on the outskirts of Guildford on the slopes of the Hogs Back in an Area of Outstanding Natural Beauty and Area of Great Landscape Value, Blackwell Farm is GREEN BELT.
  - Guildford has already lost too much Green Belt already. It is our legacy not only for our future, but our children’s future.
  - Access to the Countryside
  - Nature conservation
  - This land is high grade agricultural land.
  - Growing our food locally is sustainable and with climate change, this will prove to be even more so.
  - See NPPF
  - Chalk Down is rare in Great Britain and needs special protection.
• Policy D3: P103 Historic environment,
  ◦ Blackwell Farm contains many ancient hedgerows, some of which date back to Medieval times. Most of the hedgerows are well over 200 years old.
  ◦ The Hogs Back is part of one of the oldest roads in Britain.
  ◦ It is high a quality environment
  ◦ Development of Blackwell Farm will not contribute to local character and distinctiveness

Policy E6: P79 Leisure and visitor experience

• The visual impact as seen from the Hogs Back and the Down will be disastrous. This visual amenity will be destroyed forever as has already happened under ‘exceptional circumstances’ with the development of Manor Park.
• The Hogs Back is iconic and Guildford’s heritage.

Policy E7: P83 Guildford Town Centre

• As it nestles into the North Downs, Guildford already suffers from pollution levels in excess of acceptable levels. It is a perfect trap for pollution. Located in such close proximity, Blackwell Farm provides much needed oxygen for the town centre.
• This tract of land is the lungs of Guildford. The loss of Blackwell Farm will have an impact on health on it’s citizens.

Policy I3: P113 Sustainable transport for new developments

• The development of Blackwell Farm with housing and an extension of the Research Park, which is a “nationally significant business cluster”, will bring a huge increase in traffic to an area which is already over- burdened with chronic traffic jams.

Policy 14: P116 Green and blue infrastructure

• See NPPF Paras 7, 99, 117, 156 with regards to Biodiversity, Wildlife corridors and Climate change
• The area supports a great deal of wildlife which include deer, skylarks, and badger’s setts. It is one of the few sites remaining in the Borough of Guildford where badgers have been able to survive in the area.
• It was always considered to be safe as it was Green Belt in an Area of Outstanding Natural Beauty.
• There has been a dramatic reduction in wildlife since the Manor Park development.
• Blackwell Farm is home for many endangered species.
• It is well used by walkers, runners, dog walkers, and bicyclists

There are many areas in Guildford which need regeneration such as Walnut Tree Close and the Station instead of taking our precious Green Belt which is our heritage for the future. Vast areas of land are taken up with car parking especially at the University. With masterful town planning, students on campus and proper use of brown field sites, it could provide all the affordable homes required and a sustainable expansion of Guildford.

Furthermore in the light of Brexit, housing figures need to be reviewed and constraints put in place due to the Green Belt. Guildford is a gap town with a very poor road infrastructure.

The loss of Blackwell Farm will be detrimental to the quality of life for all who live in the Guildford area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

APPENDIX C AND TOPIC PAPER ON TRANSPORT

I OBJECT TO THE REMOVAL OF THE BEECHCROFT DRIVE SCHEME SRN6 FROM THE DRAFT LOCAL PLAN

We were not given an opportunity to comment on this earlier. There is an important omission to the 2017 Draft Local Plan. The 2003 Local Plan included a clause to explore ways of improving the access of Beechcroft Drive. 14 years later nothing has been done and conditions on the A3 have deteriorated to an even greater degree due to the increase in traffic as a consequence of the Hindhead Tunnel.

KEY EVIDENCE

Currently residents, visitors and service providers such as recycling trucks, food delivery etc leaving Beechcroft Drive risk their lives by driving into head-on traffic, from a standstill, on a motorway* with virtually no gaps, with at least 15,000,000 car movements per year, on a blind corner, with most of the traffic speeding beyond the 50mph limit from 6am till late at night. Entry to the Drive on the Northbound carriageway is no better as it is necessary to slow down to 10-20 mph to take the 45 degree switch-back to turn into the Drive safely. This puts A3 drivers, especially if they have lost concentration, at risk of shunting, which has happened on a number of occasions.

Road rage and harassment

Despite a large sign which only lights up if drivers are speeding and the coloured road, drivers on the A3 cannot believe we would make such manoeuvres on a Strategic Road Network and as a consequence, we are experiencing high levels of road rage and harassment.

This happens both entering and exiting the Drive. Here are some examples -
• Residents regularly experience abusive car horns
• 2 residents entering the Drive have been chased by drivers to their houses with fists raised
• 3 mothers travelling with their children in their cars have had drivers tail gating or even worse driving alongside almost mirror to mirror to terrify all the occupants.
• I have had the latter experience on two occasions and one driver tail gated and then drove alongside blowing his horn as he did so! These experiences have left me traumatised, white and shaking.
• Another mother with her children in the car had the experience of a car overtaking, cutting in front of her and then putting his breaks on.

Safety

It is obviously not safe for all parties. But the harsh reality is that when accidents involving residents happen they are blamed for performing a dangerous manoeuvre on a dual carriageway. I always wait until there is no traffic coming round the corner before exiting Beechcroft drive and therefore can wait up to 15-20 minutes to get out. However with this margin of safety, the oncoming traffic will be on my back within seconds, even if drivers are travelling within the correct speed limit. Another experience which many residents have had is drivers swapping lanes from the fast lane without indicating. This has happened to me twice and it is nothing short of a miracle that I have managed to avoid a collision. This is dangerous for both residents and drivers on the A3.

Under Health and Safety because it is considered such a danger taxis are now reticent to drop off a visitor or resident. For their safety many visitors to Beechcroft Drive are parking on the other side of the A3 and walking across the footbridge.
One disabled lady has had to give up her car and another elderly couple have had to return home on a number of occasions because they could not get out.

Disability Discrimination
In 5.19 of the topic paper on Transport there is mention of the requirement to maximise opportunities for people with disabilities to access all modes of transport. The elderly and the severely handicapped cannot get their Dial a Ride facilities because it is considered unsafe for the driver and occupants of the bus. With the distance to get to public transport and its limited service, this makes them prisoners in their own home.

In the last 2 years the volume of traffic has increased dramatically and because of the increased levels of traffic, residents are having to take greater risks in order to get to or from their homes. It is now well known that Guildford is the most congested town in the whole of Great Britain.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I STRONGLY OBJECT TO POLICY A26 BLACKWELL FARM HOGS BACK, GUILDFORD BEING INCLUDED IN THE STRATEGY AND SITES. This goes against both the National and Guildford Borough Councils own policies as illustrated in my 2016 submission. The changes to the 2016 Draft Local Plan do not reflect this and I am disappointed that the Borough Council has not heeded the voice of the majority who are intimate with the area and have had to deal with the problems often on a daily basis.

Allocation
Clauses 1-10 This ignores an independent expert landscape study and independent exper traffic studies which have been submitted as evidence.

Requirements - Infrastructure
1. Independent expert traffic studies have been ignored
2. An independent expert landscape study has been ignored
3-5 Independent expert traffic studies have been ignored
6. The A26 location is a significant distance for walking and cycling
8. Independent expert traffic studies have been ignored 10-23 An independent expert landscape study and and independent traffic studies have been ignored

Opportunities
This ignores an independent expert landscape study and independent expert traffic studies

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
REPRESENTATIONS BY BELL AND COLVILL LTD ON THE GUILDFORD BOROUGH PROPOSED SUBMISSION LOCAL PLAN STRATEGY AND SITES; JUNE 2016.

Introduction

ShrimplinBrown Ltd are instructed by Bell and Colvill Ltd (B&C, Our client) to submit the following representations to the Guildford Borough Proposed Submission Local Plan: Strategy and Sites document, June 2016.

ShrimplinBrown have undertaken a comprehensive review of the Draft Guildford Local Plan document as well as the relevant supporting evidence base. In accordance with the guidance set out within the Planning and Compulsory Purchase Act 2004 as amended by the Localism Act 2012, the following representations relate specifically to the “legal compliance” and “soundness” of the draft Local Plan. As well as the specific tests of soundness set out in the NPPF.

These representations should be read in conjunction with the attached summary information and Design and Access Statement drawn from the recent planning application and which provides further analysis of the site capacity for land at Bell and Colvill together with assessment and justification of site potential.

For ease of reference we have set out our representations within this single document which addresses the relevant questions set out within the questionnaire and makes clear references to specific; paragraphs, policies and site allocations within the draft plan.

A completed copy of the Council’s Questionnaire is also enclosed.

QUESTION 1: THE EVIDENCE BASE AND SUBMISSION DOCUMENTS

The majority of the Evidence Base is considered robust, although the Council have not published an update on CIL. This will be a key document in assessing and evaluating the deliverability of sites and other plan commitments, in particular the level of affordable housing sought from new development.

Our Client is concerned that the 40% target for affordable housing provision has been determined on the basis of assumptions from the Preliminary Draft of the CIL Charging Schedule. Furthermore, the affordable housing threshold does not take account of National Guidance (see additional comments on Policy H2 below).

UNSOUND There is insufficient JUSTIFICATION for the affordable housing policy which is based on an outdated Evidence Base and which is not based on up to date information in relation to CIL. The Policy is also inconsistent with National Guidance.

QUESTION 2 AND 3: LEGAL COMPLIANCE AND SOUNDNESS

As a whole our Client considers that the Local Plan may be deemed to be legally compliant and sound subject to comments in relation to specific policies which for ease of reference we consider in turn below.

As a general point we are concerned that the Council have failed to “…assess the likely cumulative impacts on development in their area of all existing and proposed local standards…” (Paragraph 174 of the NPPF).
In particular our Client has concerns regarding the cumulative impact of; Affordable Homes (Policy H2); Policy D1 (Making Better Places); Policy D2 (Sustainable Design, Construction and Energy) and the Council’s future proposals for CIL (only a preliminary charging schedule currently published)

The wider conformity with National guidance is considered individually below in our responses to individual policies.

**QUESTION 4: DUTY TO COOPERATE**

Our Client have no specific comments to make on the Duty to Co-operate at this stage.

**QUESTION 5: EXAMINATION**

Our Client wishes to reserve the right to attend the Examination. They are the owners of land which is included in Site Allocation A37- Land at and to the rear of Bell and Colvill, Epsom Road, West Horsley and thus wish to reserve the right to attend the Examination in order to clarify any details relating to the site allocation, site capacity or to present evidence relating to any policies which could impact on the effective delivery of the allocation.

**QUESTION 6: THE CONTENT OF THE PLAN**

Our Client wishes to make the following comments on the Draft Plan.

**POLICY H2: AFFORDABLE HOMES**

Our Client is supportive of the need to make appropriate provision for affordable housing, however, they wish to make the following specific comments in relation to; the viability and justification of the affordable housing target set out within Policy H2.

Compliance with National Guidance

The Council’s policy does not take account of Paragraph: 031 Reference ID: 23b-031- 20160519 of the NPPG.

This states that there are specific circumstances where contributions for affordable housing and tariff style planning obligations (section 106 planning obligations) should not be sought from small scale and self-build development. This follows the order of the Court of Appeal dated 13 May 2016, which give legal effect to the policy set out in the Written Ministerial Statement of 28 November 2014 and should be taken into account.

These circumstances are that;

- Contributions should not be sought from developments of 10-units or less, and which have a maximum combined gross floorspace of no more than 1000sqm
- In designated rural areas, local planning authorities may choose to apply a lower threshold of 5-units or less. No affordable housing or tariff-style contributions should then be sought from these developments. In addition, in a rural area where the lower 5-unit or less threshold is applied, affordable housing and tariff style contributions should be sought from developments of between 6 and 10-units in the form of cash payments which are commuted until after completion of units within the development. This applies to rural areas described under section 157(1) of the Housing Act 1985, which includes National Parks and Areas of Outstanding Natural Beauty.

The clear intention and wording of the Ministerial Statement is to ensure that smaller scale development (10 units or less) are not burdened by the need to provide affordable housing or other contributions. This must clearly apply to both financial contributions as well as on-site provision.

For the avoidance of doubt a lower threshold should only be applied in ‘rural areas’ which meet the definition in the Housing Act. This should not include sites within defined settlement boundaries i.e. a lower threshold would not be appropriate within the revised West Horsley settlement boundary. Furthermore, our Client cannot, however, see any grounds for a lower target to be applied anyway in the Borough and indeed there is no support for such an approach from the Council’s evidence base.
The Local Plan does not reference the Ministerial Statement and relies on Evidence Base which pre-date the Court of Appeal Decision. The Guildford Borough Council Local Plan Viability and Affordable Housing Study, Final Report, December 2014 references the relevant National Guidance at 2.2.7 to 2.2.12, however, no justification is provided for setting aside the policy provision.

**Flexibility in the application of the target**

Although it is agreed that, where possible, a sufficient level of affordable housing should be provided on site, this should be subject to viability considerations and should, on a site specific basis, take into consideration other regeneration benefits or sites costs. The policy should include a greater degree of inherent flexibility to specifically recognise the need for reduced levels of on-site provision or off-site contributions on sites that would otherwise be undeliverable.

The Council must be certain that the affordable housing target that is ultimately adopted is realistically attainable and will not hold back development. The policy should also include safeguards to prevent the policy being rigidly applied and being used as a brake on development.

**Setting the affordable housing target**

We understand the pressing need for affordable housing within the District and overall our Client supports the approach to extend the requirement across a wider range of sites, taking account of the National limitations on sites of 10 units or less. Our Client considers that the threshold should be set at 11 units. There is also no justification for setting an additional size threshold of 0.17 hectares.

It is deemed appropriate that the Council have adopted a level playing field by setting a single fixed target, however, the 40% level is deemed unrealistic particularly in the context that affordable housing completions as a proportion of total supply have only hit 31% of the period 2008-2013. This is without the added burden of a CIL charge.

It is considered that the proportion of affordable housing should remain at 35% with clear flexibility written into the policy to reduce this when development otherwise be unviable.

The policy should also clarify that the affordable threshold should be derived on a ‘net increase of units’ to enable the offset of existing housing stock.

**Off-site contributions**

The policy text makes no provision for off-site contributions which will be essential on some smaller and medium size schemes (11 units or more) to ensure that they are workable, viable and ultimately deliverable. To be robust the policy must include a specific mechanism within the policy wording to allow offsite contributions in appropriate circumstances. Reference is made to this at paragraphs 4.2.36 – 4.2.37, however, there needs to be a specifically included within the policy text.

Any formula must also be tested and subject to public consultation and should not be left for publication as supplementary guidance.

It must also be recognised that alternative sites cannot always be identified and it is unrealistic to specify that land values for affordable housing must always be provided at nil value.

It is considered that the statement at paragraph 4.2.38 that ‘the vast majority of development in most locations in the Borough are viable providing an affordable housing contribution of 40 per cent.’ Is misleading. The viability work is based on specific scenarios and it is not considered that this provides a reliable basis for the threshold and percentage adopted.

In order to ensure that development comes forward in the short term the approach outlined at paragraph 4.2.39 may only realistically be applied once the plan, and any CIL charge has been adopted. Where land has been acquired or options signed in advance the Council should adopt greater discretion in negotiations.
Finally, Affordable housing is a dynamic sector and accordingly the Council should ensure that this policy does not prejudice the delivery of key worker or Private Rented Sector schemes which can make schemes in their entirety more accessible.

UNSound: The published Affordable Housing Evidence Base is not considered to provide the necessary justification for the 40% target. The target should be reduced to 35%

No justification is provided for setting aside the National Policy which limits the requirement for affordable housing on sites of 10 units or less. The threshold should be set at sites of 11 units or more, and no site size threshold should be included.

Flexibility must be included within the policy wording to enable the negotiation of off-site affordable housing contributions.

**POLICY P2: GREEN BELT**

Our Client fully supports the proposal to inset villages from the Green Belt, including West Horsley. This is essential to ensure that the Council maximise the opportunities for housing delivery, particularly in the earlier years of the Local Plan.

**SUPPORT POLICY**

**POLICY P5: THAMES BASIN HEATHS SPECIAL PROTECTION AREAS**

Our Client considers that in assessing the requirement for mitigation within five and seven kilometres of the SPA the threshold of 50 net new dwellings is too low and would place a further unreasonable restriction on development.

The supporting text states that 80% of visitors come from within seven kilometres of the SPA, however, this does not quantify the proportion from the outer reaches of the zone of influence (5-7 kilometres).

This consideration is more relevant to the larger strategic sites and it is suggested that a threshold of 100 or 150 units should be imposed. Furthermore, the uncertainty presented by the case by case assessment will curtail the delivery of sites and could stifle housing delivery.

UNSound: The assessment of schemes of 50 net new dwellings within 5-7 kilometres of the SPA is not JUSTIFIED and would threaten the EFFECTIVENESS of the Plan.

RECOMMENDED CHANGE: Increase the threshold to at least 100 units.

**POLICY D4: DEVELOPMENT IN URBAN AREAS AND INSET VILLAGES**

B&C fully support the proposed southern extension to West Horsley (As shown on the Proposals Map)

However, whilst the overall objectives of the policy guidance set out at Policy D4 are acknowledged and broadly supported by Our Client it is considered that the tone of the policy could serve to curtail rather than encourage the development of the specific site allocations identified in the Plan. Paragraph 4.5.46 suggests that the policy is targeted to windfall opportunities, however, the wording could still be applied to ‘all new development’ including site allocations. Our Client contend that this would undermine the delivery of Site Allocations and impact on the delivery of the Council’s housing target.

The expansion and development of edge of settlement sites will necessitate some changes in scale, massing and height. It will also be necessary to build at increased densities in order to ensure the most effective use of land. Whilst it will be important to ensure that new development successfully integrates within areas and does not impact on the amenities of neighbours the Borough requires a step change in the delivery of housing, particularly in urban areas. As such settlements and places will need to sensitively evolve.

UNSound: As currently drafted the policy will not be EFFECTIVE in securing the delivery of Site Allocations. It is suggested that the policy is re-worded as follows.
“Development will be deemed acceptable in principle for all of the Site Allocations identified at pages 123-126. The approximate site densities should be achieved wherever possible subject to compliance with other plan policies.

Other new development in the urban areas of Guildford, and Ash and Tongham, and inset villages should

- Be developed with reference to the layout, scale, form, massing, height and materials of surrounding buildings and structures;
- Take account of the existing grain and street pattern;
- Conserve, and where possible enhance designated heritage assets;
- Ensure that the amenities enjoyed by the occupants of buildings are protected.

To avoid confusion the policy should also specifically identify the Inset Village Areas where it is intended that this criteria will be relevant. Similarly these criteria should not serve as a brake on the delivery of Site Allocations.

**SITE ALLOCATION A37: LAND AT AND TO THE REAR OF BELL AND COLVILL, EPSOM ROAD, WEST HORSLY**

The council’s decision to allocate land as part of Site Allocation A37 and the amendment to the village settlement boundary is fully supported by the Evidence Base as follows:

**LAA, February 2016**

The LAA identified development potential for circa 40 houses on land encompassing the eastern part of the Bell and Colvill site together with land to the north and west. In highlighting the potential of the site the LAA noted that the site is very close to other residential properties and services in the village.

A Phase 1 contamination survey has been undertaken for the Bell and Colvill site which has shown that there is no ground contamination which would prevent residential development.

The site is in Flood Zone 1. The LAA concludes that access from the A246 could be appropriately adapted.

The Bell and Colvill garage site is located outside of the conservation area.

**Green Belt and Countryside Study, 2014**

The Council have undertaken a detailed assessment of the Green Belt and Countryside across the entire Borough which led to the proposed amendments to settlement boundaries set out in the Draft Plan including the proposed revisions to include additional land to the north-west and south of West Horsley.

The enclosed finger of land comprising the Bell & Colvill garage site and land to the north was highlighted within the document as a logical location for the extension of the settlement and has been carried forward to the Proposed Submission Draft Plan.

**Landscape and Character Assessment, 2007.**

The site is not within a sensitive location within the LACA and development of the site would contribute positively to enhancing the characteristics of the Ockham and Clandon Wooded Rolling Claylands.

The development plot is well contained by the existing settlement and a firm defensible southern boundary created by the Epsom Road. Development in this location will clearly not lead to fragmentation of the landscape.

**Summary**

Our Client supports the proposed allocation for up to 40 residential dwellings. Residential use is the most appropriate use for the site.
The Bell & Colvill site already functionally forms part of the settlement and the currently undeveloped land to the north is enclosed on all sides. The development of these sites would form a natural rounding off of the settlement and will offer opportunities to; build new housing, rationalise the existing Bell and Colvill business and strengthen boundary landscaping.

The Council’s evidence base work has clearly highlighted the appropriateness of directing new development to West Horsley (north and south) and this work supports the proposed amendment to the Settlement boundary and the specific allocation of the site for development.

Whilst planning permission was refused in January 2016 for a scheme of 9 units this decision was on the basis of current policy and is subject to an appeal. As set out in the LAA the decision was predominantly on the grounds of inappropriate development in the Green Belt, which will be addressed through the proposals in the Draft Local Plan, and as such does not have a bearing on this allocation. Further details relating to the application accompany these reps.

Landownership, the likely need to relocate part of the Bell and Colvill business, and the nature of the collective landholding mean that it is very unlikely that the entire Site Allocation will come forward as an entire block. Whilst the garage site is likely to be developed in isolation it could in the future facilitate access into the rear plot without undermining short term potential.

SUPPORT SITE ALLOCATION A37: LAND AT AND TO THE REAR OF BELL AND COLVILL, EPSOM ROAD, WEST HORSLEY INCLUDING THE PROPOSED REVISION TO THE SOUTHERN EXTENT OF THE WEST HORSLEY SETTLEMENT BOUNDARY TO INCLUDE LAND AT B&C AND THE IDENTIFICATION OF THE SITE AS PART OF A WIDER OPPORTUNITY.

Land at Bell and Colvill (Part of Site Allocation A37)

A Planning Application was submitted in October 2015 for the following proposal:

“Construction of nine dwellings (two pairs of 3 bed semi-detached, two pairs of 4 bed semi-detached & 1 x 4 bed detached) with associated access improvements, car parking and landscaping following demolition of existing workshop, showroom, three residential properties and removal of hardstanding, on land at Bell & Colvill (Horsley) Ltd, Epsom Road, West Horsley, Leatherhead, KT24 (LPA Ref: 15/P/02122).”

In pre-application discussions and during the course of the planning application the following detailed matters were confirmed by Guildford Borough Council and Statutory Consultees:

- The site represents in its entirety previously developed land where the principle of residential development is acceptable, subject to compliance with paragraph 89 of the NPPF1;
- Whilst outside of the currently identified settlement boundary the Council accept that it may be reasonably considered as part of the village of West Horsley;
- The site is within the 5km to 7km buffer of the Thames Basin Heaths Special Protection Area where development has no impact on the Special Protection Area;
- The proposals will not result in the loss of employment use but rather the reorganisation and rationalisation of space. The Council confirmed that they have no objection to the proposal in this regard;
- The existing built form on the site is of no architectural merit and there is no objection to its demolition;
- There would be no material harm to the setting and significance of the Conservation Area;
- There would be no harm to the residential amenity of existing or proposed residents;
- The proposed dwellings would be able to coincide with the retained Bell and Colvill site in an acceptable manner;
- The proposals would reduce the number of access points on to the access road and the proposed development would result in a slight decrease in vehicular movements. The County Highway Authority has not raised any objections in relation to highways Impact or the proposed Site Access;
- Each dwelling would be allocated two on-site car parking spaces which would meet the Council’s maximum standard;
- There are no protected species or habitats on site which would be adversely impacted by these proposals;
There are no significant trees on the site and trees on neighbouring land may be protected by a condition to secure root protection measures; The application site is in Flood Zone 1; The site can be developed using sustainable urban drainage systems which may be secured by means of condition.

The Council determined under delegated powers to refuse the application on 13th January 2016 for two reasons:

1. The proposal represents the redevelopment of a previously developed site. However, due to the scale, bulk and massing of the proposed dwellings, particularly at first floor and roof level, the quantum of development, together with the proposed layout, the development would have a greater impact on the openness of the Green Belt than the existing development on the site. In addition, while the proposal may be considered to be located within a village, the development does not represent a limited infill. As such, the proposal represents inappropriate development within the Green Belt which is harmful by definition. Furthermore, in itself, the proposal would result in an adverse impact on the openness of the Green Belt. No very special circumstances have been put forward that would outweigh the inherent harm. As such, the proposal is contrary to policy RE2 of the Guildford Borough Local Plan (as saved by CLG Direction on 24/09/07) and the National Planning Policy Framework.

2. By virtue of the bulk, scale and design of the proposed buildings, along with the layout of the development, the proposal would detract from the character of the area. The proposal would result in an development which which would be urban in appearance, and which would represent a visually discordant and incongruous addition to the surrounding area. The proposal is therefore contrary to policy G5 of the Guildford Borough Local Plan (as saved by CLG Direction on 24/09/07) and advice contained in the National Planning Policy Framework.

Our Client strongly disagrees with the reasons for refusal and has submitted a planning appeal (Ref: APP/Y3615/W/16/3154084).

In any event neither of these reasons for refusal undermine the underlying principle of development on the site. The reasons relate specifically to the assessment of the particular proposals in its current context and under the limitations of current adopted and National policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: Design and Access Statement.pdf (3.0 MB)
1. Nowhere in the proposals or appendices have I found the simple key fact of what the current population density of Guildford Town is (inhabitants per square kilometre), nor what future population density is being planned for. Without these basics it is impossible to judge fairly the balance in the plan between the town and the rest of the borough.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Sites

Former Wisley Airfield, Site A35

1. I object to the proposal to create a settlement on the former Wisley Airfield (Site A35). This is both an unjustified breach of the Green Belt and folly. The size of the site and proposed large population will inevitably have a damaging impact on the adjacent Thames Basin Heaths Special Protection Area where all three vulnerable species, woodlark, Dartford warbler and nightjar breed. Damage will come not only from pressure of people but the lethal impact of their dogs and cats. The required regulatory buffer area will not be sufficient in reality for a site of this size.

2. Even more serious is the lack of proper infrastructure and transport links. Despite the words about promoting walking and cycling the reality will be that this will be an isolated settlement of commuters without sufficient on-site employment and dependent on cars. The inadequate local access to the site has already been exhaustively examined and rejected, it has not changed. The suggestion that a 5 kilometre cycle ride is acceptable is fantasy in terms of families with children, shopping, bad weather and dangerous local roads. It makes no sense to create a large car-dependent settlement next to the overladen M25 and A3 where the pollution levels are already well above permitted levels and traffic congestion is chronic. The plan makes no serious proposals for the provision of basic services such as electricity (where will the generating capacity come from?) water and sewage which will be well beyond present capacity. There is nothing sustainable about this proposal.

Answer (if comment is on questions 1-7 of the questionnaire): ()
East and West Horsley Sites : A36 to A41

I object to these sites which encroach on the Green Belt.

1. I object to the policy Site A36 (Hotel). Although safeguards are proposed for the historic setting the housing density is well above surrounding area (37 dwellings per hectare compared to 8.1) and will be out of keeping. The access to the site will be tricky because of the busy A246 road and special arrangements will be needed for traffic. A very significant reduction in the housing density would be needed to make this site acceptable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to policy Site A39.( by the Railway Line) This is currently in the Green Belt with a clear and defensible boundary of a deep ditch. Moving the boundary to the edge of Lollesworth Wood will impact on this ancient woodland. This is an area of Ockham Road North that is subject to regular surface water flooding with a drainage system unable to cope. Part of the site is zone 3 floodplain. The proposed density of housing is greater than in the surrounding area. Should this proposal be continued the number of houses should be substantially reduced to lessen the flooding effect of more impermeable surfaces and to provide adequate space for flood prevention measures including the creation of a pond and a wetland which could have biodiversity benefits.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to policy Site A 40 (Waterloo Farm). The site is in the Green Belt and a case has not been made justifying its removal. Should the proposal be continued then the excessive number of houses should be reduced to be more in keeping with its surrounding area. The site is a wildlife corridor, leading to and from the gardens of West Horsley. Maintaining this function by such means as a substantial hedge of native species and creating adequate flood prevention measures in the north-east corner, in the form of a pond and wetland could have offsetting biodiversity benefits. This will not be possible at the proposed density.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object strongly to policy Site A41 (East Lane). This encroachment into the Green Belt is a travesty of bending the rules to accommodate an opportunistic developer. There is at present a clear boundary along East Lane, there is no defensible boundary for the proposed site which the site map shows is an irregular chunk taken out of the Green Belt. It should be rejected.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Employment

11. In policy E2 why, in para 4.4.17 has Effingham Junction been omitted as a public transport interchange with no specific reason given? It is more of an interchange than Clandon or Horsley stations and probably has more businesses within its 500 metre envelope then either of them, especially if retail is excluded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. In policy E8 I query the designation of East Horsley Station Parade as a District Centre. It is an excellent Local Centre but the real District Centre for the area is Cobham, which East Horsley cannot compete with for its quality and range of shops and availability of parking.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Infrastructure

13. I object to policy 11 on infrastructure as inadequate. The proposed new housing will pose a burden on an infrastructure already seriously stretched. Quite apart from the pressures on schools, medical facilities, roads and parking the lack of capacity in the basic utilities of electricity, water and sewage are not adequately addressed with no clear plan for where adequate funding for the major investment needed will come from. It looks piecemeal, not planned.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Green Belt and Insetting.

1. I object to policy P2 on the Green Belt and insetting. Under the National Planning Policy Framework (NPPF) housing need alone is not a sufficient justification for changing and encroaching on the Green Belt. GBC have provided no evidence of the exceptional circumstances which could justify the proposed changes. The statement in para 4.3.16 is an opinion not evidence. In particular I object to the insetting of East and West Horsley from the Green Belt, both parishes I know. The decision in paras. 4.3.12 and 4.3.13 that these villages do not make an important contribution to the openness of the Green Belt is simply wrong. Have any of the planners or GBC councillors ever walked the Horsley Jubilee Trail?

2. At present both villages have distinctive characters, East Horsley was developed in the 1920’s/30’s as a rural garden village and has retained that character, particularly leafiness. The large gardens and valued open spaces in East Horsley create both a haven and corridor for wildlife and a source of biodiversity. West Horsley is characterised by its openness and historic setting with fields, hedgerows, woods and large gardens again providing an environment for wildlife and a rich biodiversity.

3. This biodiversity has been documented: for the area of the two parishes there are records of 8 species of reptiles and amphibians, 24 species of mammals, 38 species of butterflies, 18 species of dragonflies and damselflies, 12 species of orchids, 275 species of moths and 95 species of birds. Of the total 2 are Specially Protected, 20 are Biodiversity Action Plan Priority Species, 21 are on Schedule 5 of the Wildlife and Countryside Act and 7 are on Schedule 1, while 25 are on Red Lists of Conservation Concern, plus the badger which has its own Protection Act (details for East Horsley on the neighbourhood plan evidence base)

4. The insetting of the villages will inevitably lead to a greater density of housing with increased pressure from people and their pets and less green space. This will worsen the impact of the proposed additional new houses, which in West Horsley at 35% of the existing number is hugely disproportionate. This will have a damaging impact on the wildlife and the area’s biodiversity contrary to the National Planning Policy Guidance.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Flood Risk.

1. I support policy P4 on flood risk But should not the main title be “Flooding, Flood Risk and Ground Water Source “PROTECTION” not” PRODUCTION”?

10. When the flooding risks are so clearly recognised why is such a large proportion of new housing proposed for the Horsley, Send and Wisley areas which constitute, on GBC’s own map, the largest flooding hotspot in the borough?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policies

Housing targets

1. I object to policy S2. The figures given for growth needed in the number of houses amounts to 25% increase over the plan period whereas the National Statistical Office’s estimate of population growth in the same period is 15%. Why is there this discrepancy? According to census data much of the growth in the period up to 2012 was not from natural increase in the local population but from incomers. In the post-Brexit situation this growth is unlikely to continue and could turn negative. No justification is given for the high rate of growth proposed or why it creates an exceptional situation. It appears to be an artificial target self-imposed by GBC.

Spatial Strategy.

1. I also object to policy S2 on spatial strategy grounds. Though the general principles are unexceptionable the implementation, in putting a major proportion of new housing in the Green belt in the east of the Borough is detrimental to the wider national interest in the Metropolitan Green Belt, containing the spread of London. With over 64% of new homes proposed for the Green Belt its integrity and effectiveness will be seriously damaged. The insetting of Ripley, Send, Send Marsh and the Horsleys from the Green Belt coupled with the changes to their areas of settlement and the creation of the new settlement on the former Wisley airfield will thin out the Green Belt where it is most needed.
