The impact on the residents and services of building 593 additional houses planned for the village of East and West Horsley will overwhelm the infrastructure of a small rural community.

We need to build some new houses to help young people get on the the housing ladder but an extra 593 in Horsley is too many.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Currently the Council still has to repair holes in the road that have been unattended since the winter of 2014. Telephone and internet connections have been frequently cut off. Repairs to the water supply has cut off supplies. Already the police are unable to cope with numerous robberies that occur each month and some children cannot get into the local school.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the Guildford Borough Proposed Submission Local Plan: Strategy and sites: June 2016 with reference to impact on The West and East Horsely Villages.

- why are we building on GREENBELT land - this is land that has been protected so far for good reason. Why now should we be considering building on this land when there are surely other feasible sites which are not Greenbelt ?

- why are we planning to build additional houses in an area which is already saturated from a schools (Raleigh, Howard of Effingham running at capacity with waiting lists already.), from a medical perspective

- these are villages and do not have good enough roads, to cope with all this additional traffic
How can you put this plan forward without considering the impact on the local residents within the village or indeed what the impact will be if the houses were to be built. As part of the plan it must be seen that the houses are not built on Greenbelt Land and that if any new housing is erected on suitable (not Greenbelt land.) then increased infrastructure (eg schools, medical, roads, shopping, public transport) are also included.

I re-iterate that I strongly object to this plan for the above reasons and hope it will be denied.

2) I object to the new interchange onto the A3 at Burnt Common (A43a) as it would cause huge traffic problems through Send and Clandon. The current roads are not wide enough for this volume of traffic, it is difficult currently to pass for large lorries and the road is not of sufficient quality to withstand the current traffic, let alone any increase. These roads are regularly used by large quantities of cyclists accessing the Surrey Hills, and in areas there is no pavement. There are two primary schools on these roads (Send and Clandon) and it would be exceptionally dangerous to increase the volume of traffic along these roads where children are crossing regularly.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1) Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of Green Belt.

2) If this development proceeds, the narrow strip of Green Belt remaining between Guildford and West Clandon at this point will very likely be proposed for development in the future by the same developer who is promoting Gosden Hill.

3) The development will be highly visible from the A3 when approaching Guildford.

4) Together with the developments at Garlick’s Arch and Burnt Common there will be an almost uninterrupted ribbon of development along the A3 extending 5 miles north east from the centre of Guildford. Wisley village is 6½ miles and the M25 less than 8 miles from the centre of Guildford as the crow flies. They could all join up.

5) The development of this site will cause massive congestion in surrounding roads. It will generate many thousands of vehicle movements onto the A3 which is already at a crawl every day during peak periods.

6) The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.

7) The proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1) The amount of land to be taken out of the Green Belt seems well in excess of the space needed to build 400 homes. What will be the fate of the excess land?

2) Garlick’s Arch (A43) is an unsustainable location. The nearest station is about 1.5 miles away and the bus services are infrequent. Residents will be dependent on cars.

3) There is no proven demand for travelling show people plots in this location.

4) Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways. The development will cause additional traffic on the A3 and the A247 and B2215 in Ripley, Send and West Clandon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/2437  Respondent: 10807745 / Belinda Middleton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1) This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.

2) The Plan calls for a minimum of 7000 sq. m. (0.7 ha, previously in the 2016 Plan a maximum figure) but the proposal is to take 9.26 hectares out of the Green Belt. There is no proper justification given for taking the additional land.

3) The evidence base does not support this scale of additional industrial space and the justification for placing it in the Green Belt is not made out. If the quality of some existing industrial provision is not adequate this should cause redevelopment of it not a large encroachment into the Green Belt.

The 2017 Employment Land Need Assessment shows a demand of 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Burnt Common in the Green Belt.

4) The reference to waste management facilities mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and should not be so casually included for this site.

5) The proposal for light industry, storage, distribution and waste management activities at Burnt Common will generate large amounts of traffic including heavy vehicles on the A247.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

---

1) Residents are being asked to accept very large amounts of development with little or no detail being provided on measures which would relieve existing congestion and limit future problems.

2) Much is made of the need for new infrastructure to support developments and for this to be in place as needed (listed in Appx. C to the Plan). Even if this happens the Plan admits …"we forecast that there will also be an absolute increase in overall traffic volumes". This will be most acutely felt at junctions but these effects have apparently not been analysed so that we don’t know the location or impact.

3) We can be sure however that the cumulative effects of the developments in the north east of Guildford will have a devastating impact on the A247 through the villages of West Clandon and Send. It is hard to see how any of the infrastructure proposals in the Plan (Appx. C) will do anything to mitigate this impact. GBC has little or no control over the plans of Surrey County Council as the local highways authority and it is freely admitted by SCC that they have little money available.

4) The Plan now calls for nearly all infrastructure to be funded by developers (see Appx. C). I question how realistic it is to expect developers not only to pay for all the infrastructure but also to have it in place in a timely fashion. The Plan says that planning permission will be refused if timely provision of infrastructure cannot be secured. Such refusals will almost certainly be challenged in the courts. Developers’ business models are based on building and selling houses to create the cash required to provide infrastructure. People will be living on the sites well before infrastructure is complete, even assuming there are funds to provide it.
5) If development were to be refused the land would still have been removed from the Green Belt and its future rendered uncertain.

6) All of these developments will draw very large amounts of additional traffic to the A247. It would be naïve to think that the employment sites and schools will serve only the developments themselves. Apart from the normal movements of residents to and from the new sites there will be considerable additional traffic on the A247 generated by:

- children from elsewhere being delivered to Gosden Hill schools and collected
- the employees of the offices and industrial sites getting to work and returning home
- the vehicle movements generated by distribution and storage activities
- traffic from Wisley wishing to travel south and returning
- traffic from Gosden Hill wishing to travel south and returning
- traffic from Slyfield wishing to travel south and returning
- private and commercial traffic originating in the south and accessing Gosden Hill, Burnt Common or the A3 and returning (including traffic from Dunsfold)
- SCC’s business plan for Newlands Corner

I would like to point out that although the A247 is classified as an A road, it has none of the characteristics because it:

- is less than 2 vehicles wide in places. Larger vehicles routinely mount the only pavement.
- does not have continuous footpaths
- has several sharp bends
- has a hump-backed bridge over the railway, with poor site lines
- has a dangerous junction to access the station
- has a dangerous and unlit junction with the southbound A3 on-slip road
- has a primary school accessed by narrow pavements
- is largely unlit
- is already very congested at times, more so when delays on the A3 are severe

In summary, the A247 is quite unsuited to coping with additional traffic and it is very clear that the developments proposed in the 2017 Local Plan will increase the amount of traffic on this road over and above that in the 2016 draft to which residents strongly objected. There is nothing in the Infrastructure Schedule which addresses this issue. Indeed several of the infrastructure proposals will themselves lead to significant increases in traffic on the A247.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan states: “4.3.16 National planning policy requires that Green Belt boundaries are only amended in exceptional circumstances and that this must be undertaken as part of the Local Plan process. I consider that exceptional circumstances exist to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of development.”

1) In the introduction to the Policy statement, numerous sites are taken out of the Green Belt including Gosden Hill, Blackwell Farm, Garlick’s Arch, Burnt Common, HM Prison Ripley Road, Send, and a number of villages. The Plan fails to detail the exceptional circumstances that have been identified for each site that is to be taken from the Green Belt.

2) It appears therefore that the Plan is based on an assumption that because the housing number cannot be accommodated on brownfield or previously developed land in the Green Belt, it is legitimate to move the boundaries. A blanket change to Green Belt boundaries is being made to facilitate development. That is not in accord with the NPPF or ministerial statements.

1) The removal of Green Belt protection from the site of HM Prison, Ripley Road, means that it could come forward for housing development. The nearest feasible access to the A3 is at the A247 junction.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp17q/113  Respondent: 10807745 / Belinda Middleton  Agent: 

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

The Local Plan is not sound.

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

1) The changes in this latest version of the Guildford Local Plan show little or no willingness on the part of Guildford Borough Council (GBC) to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and will bring increasing traffic congestion, pressure on other infrastructure, noise and pollution and a reduction in the quality of life of residents.
2) The Plan does not consider the implications of Surrey County Council’s (SCC) business plan for Newlands Corner to attract 100,000 more visitors a year. A significant proportion of these can be expected to use the A247 through West Clandon.

3) The Plan does not consider the Waverley Borough Council’s approval for the development of 1,800 homes at Dunsfold. This has the potential to feed traffic, which is trying to avoid congestion around Guildford, onto the A247 to access the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council's draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:

- destroy views from the Hog's Back ridge - a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- increase tailbacks on the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford's pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Schools

It appears that the development includes a school in addition to 1100 houses. The school is not needed and is purely part of the developers plan to profit from houses and a school.
Detailed research has been carried out in an area around Normandy, Ash, Guildford, and Woking and it is abundantly clear that there is no need whatsoever for another school in the area, particularly in Normandy.

Ash Manor School is seriously understated, and, again has space to expand. The school is operating at only 57% of capacity.

Christ's College Schol also has a lot of spare capacity.

Guildford University Technical College, opening in 2018 will take over 450 pupils putting further pressure on the three schools listed above to search for more pupils to remain viable.

All the head teachers in the surrounding area are extremely concerned at the prospect of any more schools being built.

Roads

The proposed site is bounded by Westword Lane, Glaziers Lane (and those two roads are lanes) and the A323 Guildford Road.

Westword Lane has a narrow railway bridge over it which separates a give way/one way system. It works reasonably well at present but any further increase in traffic from the proposed development would cause dangerous problem.

Glaziers lane has an up-over bridge over the railway which drives approach 'blind' to oncoming traffic - potentially dangerous. The A323 Guildford Road is extremely busy now at peak times due to the major increase in traffic from Ash, Ash Green, Ash Vale and Aldershot from many new developments.

When there are accidents on the A31 Hog's Back and the A331 Blackwater relief road. Normandy becomes grid locked as it is the alternate rate for drivers to take.

Green Belt

In April 2016 the Government said 'There are no plans to relax the strong protection that prevent inappropriate developments on the Green Belt. The proposed development in Normandy is completely inappropriate, would destroy the village and convert it to a small town.

LEAVE IT AS GREEN BELT.

My Recommendation

I have lived in the Ash Vale/Normandy area for almost fifty years. There must be masses of W.D. or ex W.D. land available not of the Pirbright Road area between Normandy and Pirbright which would be highly suitable for a small number of houses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2623  Respondent: 10807841 / Bernard Stutt  Agent:

I would like to register my objection to the new set of plans for Guildford and the surrounding area.

As a dog walker, runner and horse rider, I am very unhappy about the change to the green belt. Why are we losing this valuable resource in which people can walk and exercise? Wellbeing and quality of life is hugely affected by the availability of green space and I feel abandoning it goes completely in the face of any Government drive to improve wellbeing and mental health - I think there was a very clear promise to maintain areas of the green belt. Building developments at Send Hill would impact on ancient woodland and nature again would be destroyed.

As a regular commuter and road user, I am also well aware of the pressures on the roads and A3. Send is already a funnel and pressure point and the increased traffic due to the extra houses seems to me to be a step too far. Many of the roads are single width and under pressure already. A new interchange would increase traffic in the whole area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Policy A42 and the increase in the number of homes at Clockbarn in Tannery Lane. The increase to 60 homes will only increase access and traffic problems - Tannery Lane was entirely unsuitable to having 45 new homes, now you propose 60. The number of cars and increase in traffic is unsupportable on this lane - recent guidelines reducing the pollution to young people and the elderly due to idling engines will impact on vulnerable people living locally as well as to the schools in our area. Not only that, flooding is likely to increase, as well as the reduction of green belt. It seems you are determined to link up villages in the area, completely wiping out green belt. On this basis, I also object to Policy 2 (4.3.15), which removes Send Business Park out of the green belt. As a dog walker and nature lover - you are destroying recreational space and damaging what little wildlife we have left in the area. In addition I object to Policy A43, which now has 400 homes recommended for this site - This is permanent, historic green belt and covered by the no exceptional circumstances clause - the number of homes is huge and again, will impact heavily on the traffic in the area - traffic that is already a problem - creating a new access road onto the A3 will just add to the congestion in both directions.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I just wanted to write and register my objection to the latest draft of the local plan and its impact on Send village. As one of the previous objectors, I know that you had over 30,000 objections to the last iteration of this plan - yet the new amendments have done nothing to improve, or take into account the numerous problems that it will generate for the local area. It appears that Guildford Borough Council (GBC) has not taken into account any of the objections made during the last round of consultation - this appears GBC are just paying lip-service to public consultation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I also object to Policy A58 - why do we need additional industrial premises at Burnt Common, when I know that there are empty industrial units available in Guildford.

I urge you to please reconsider your approach to our local area. It seems you are set on destroying green belt and wiping out the character of Surrey villages, damaging wild life and reducing health and wellbeing, by removing green spaces in which to walk.

Vail Williams have been appointed by Mr David Brandon, as landowner to make representations on Guildford Borough Council Regulation 19 Submission Local Plan, June 2016. This representation focuses on Policy A26: Land adjacent to Blackwell Farm, and the full statement attached below seeks to demonstrate that our clients’ site, is deliverable, suitable and achievable for residential development in line with para 47 of the NPPF.

It is consider that the residential property and its curtilage, provides an opportunity to allocate the site for additional residential development, and would enhance the existing allocation, whilst providing a unique opportunity to enhance housing delivery without detriment to the surrounding area.

Examination

The site is considered to be deliverable, suitable and achievable. As Blackwell Farm can assist the delivery of housing, in a sustainable location, we would like to register our interest in participating at the Examination and attend any pre-examination meetings.

Please see covering statement for additional justification in regard to National and Local plan policies.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1.1 Vail Williams have been appointed as planning agents for Mr David Brandon as landowner of Wellington House, Hogs Back GU3 1DE. This representation is our clients response to the Guildford Borough Council Regulation 19 Submission Local Plan, June 2016 which will guide development until 2033.

1.2 This representation builds on the submission at the Regulation 18 stage of the Local Plan in September 2014, reference DLPSA/3565, and relates to a 4.2 hectare residential site to the west of Policy A26 (site 60 as identified in site assessment documents) as allocated in Guildford Borough Council Local Plan Submission Plan (GBCLP). For site boundaries of the allocation and the proposed site see Appendix One.

1.3 This representation seeks to demonstrate that our clients’ site, is deliverable, suitable and achievable for residential development in line with para 47 of the NPPF and the opportunity to allocate the site for additional residential development, would enhance the existing allocation, and provides a unique opportunity to enhance housing delivery without detriment to the surrounding area.

2.0 SITE CONTEXT AND OPPORTUNITY:

2.1 The site comprises of one large U-shaped 2 storey residential property with access road and is surrounded by residential garden. To the west is a significant mature treescape that forms the boundary of the site, and a robust means of enclosure and natural boundary with the land to west, identified as greenbelt. The site has one owner and is available and suitable for residential development.

2.2 This site is adjacent to the Blackwell Farm allocation, a 78 hectare site which is approximately 500m from the settlement boundaries of Guildford town. To the South of the site is the A31 which forms the main access to the house, and is the primary access to the allocation to the north. There is a separate 2 storey residential property “The Gardens” immediately to the North.

2.3 This representation seeks to demonstrate that approx. 100-120 additional dwellings can be provided on the land adjacent to the primary access road at Wellington House, through the use of the residential house and its garden only. In this regard, a small scale extension to the proposed urban extension would result in only a 5.3% increase in site area, however the opportunity to deliver a more comprehensive development without undermining the context or character of the surrounding area can be achieved.

2.4 With a presumption in favour of sustainable development, this representation seeks to demonstrate how the objectives of the national policy framework (NPPF) and local planning policies (GBLP) can be consistent with the inclusion of the site into the strategic extension site under policy A26 at Blackwell Farm.

3.0 PREVIOUS POLICY CONSIDERATIONS & REPRESENTATIONS IN RELATION TO REGULATION 18

3.1 The site was previously proposed at the Regulation 18 stage on behalf of the landowner, Mr Brandon by planning consultants D&M Planning. The site is defined within the Guildford Borough Local Plan Proposal Map 2003 as being within the Metropolitan Green Belt and in an Area of Great Landscape Value (AGLV).

3.2 The site was proposed at Regulation 18 stage by the landowner with potential for residential development, in a sustainable location and adjacent to the strategic development site proposed by Guildford Borough Council. The site was identified as open countryside and abuts the proposed allocation. Despite numerous concerns raised by objectors regarding the impact on protection policies including the AONB and AGLV, including objections from Natural England, the site immediate adjacent to Wellington House at Blackwell Farm has been allocated as an extension to the settlement boundary and significant development was justified over and above greenbelt, character, agricultural, and access concerns.

3.3 At the Regulation 18 stage, 13,040 dwellings were required (652 per annum) as identified in the 2014 SHMA. The previous representation for Wellington House confirmed that this figure did not reflect the objectively assessed need for
housing (OAN) and the housing figures were therefore too low. This then considered alternative scenarios regarding higher growth need, including DCLG figures that proposed a much higher rate of 704 dwellings per annum.

3.4 It is considered that despite the previous representation, the site has not been adequately assessed as part of the land supply assessments, and the proximity to the allocated site and redefined settlement boundary warrants the additional 4.2 hectares, with a clear defensible boundary, to be added to the existing 78 hectare allocation under policy A26.

4.0 CONSIDERATIONS FROM THE EVIDENCE BASE FOR ALLOCATION AT PROPOSED SUBMISSION STAGE (REGULATION 19)

4.1 The Local Plan polices contained within the GBLP submission document, need to comply with the National Planning Policy Framework (NPPF). The plan must demonstrate that it is positively prepared, justified, effective, and consistent with national policy. It is agreed that these tests, relating to the evidence base are sound. However, there are a number of issues raised in regard to the specific assessment of the land supply available for residential development, given that the site at Wellington House has not been included in the site assessments or those housing supply figures cited in the Local Plan.

4.2 Since the Regulation 18 stage, the site allocated at Blackwell Farm has been reduced from circa 2000, to 1800 homes, and the site has been reduced from 106.2 hec to 78 hectare through the loss of land to the west of the access road. For original Regulation 18 Map, see Appendix Two.

4.3 The Local Plan in Policy S2 identifies 13,860 new homes over the plan period (equated to approx. 693 per annum over 20 year plan period). Historically delivery has been low for Guildford and whilst the plan identifies phased delivery from 2018/19-2022/2 with an increasing annual housing target, it is considered that based on delivery rates, the most effective method of ensuring housing targets are met would be to maximise the allocation and identification of sites. Wellington House ensures that this can be dovetailed with the delivery of key infrastructure, which is central to effective planning, and as identified in the Councils own Infrastructure Delivery Plan (June 2016).

4.4 The Land Availability assessment (Feb 2016) shows that the Blackwell Farm site is due for delivery years 4-15 for 1800 homes, with highest delivery per annum at 230 for years 11-15. It also identifies in the housing trajectory a deficit up to 2028.

4.5 Whilst the SHLAA, and SHMA and Local Plan seem to identify adequate land supply over the plan period, the historic delivery rates, and need to plan positively and flexibly to consider all opportunities for development, in line with para 47 of the NPPF, requires the council to consider and assess all sites. These should be available, achievable (with realistic prospect that housing will be delivered on the site within 5 years) and be viable. On this basis, it is argued that the site at Wellington House should be included as part of the site allocated in Policy A26, on the following grounds:

4.6 Achievable and Deliverable:
The site has only one owner, who has proactively proposed the site as both Regulation 18 and 19 stages of the local plan process, demonstrating positive engagement and consideration of the relevant policy considerations. It is therefore achievable and deliverable.

4.7 Suitable:
The constraints in regard to greenbelt have been removed for the site abutting Wellington House at Blackwell Farm on the basis that the scale and opportunity warrants exceptional circumstances. The additional 4.2 hectare site could increase this opportunity, and indeed already abuts the primary access road for the site, and therefore both the existing mature landscaping and access arrangements are established. Within the LAA, the allocated site at Blackwell Farm (page 428) site
reference 311, acknowledges that although the site is in the greenbelt, it partially adjoins the urban area. The small scale extension (approx. 5% increase) could warrant an additional 120 dwellings.

4.8 Again mature trees create a sense of enclosure as with the adjacent site proposed at Wellington House, providing a clear and defensible boundary with mature greenspace. The partial inclusion of the site in AONB and AGLV is acknowledged, however as the site is in a Low flood risk (Zone1) and as a residential house and garden has no Agricultural land classification, unlike the allocated site, the allocation of the house and its curtilage do not warrant such additional constraints.

4.9 The Sustainability Appraisal (June 2016) states in Box 6.5 the following:

- Blackwell Farm to the south-west performs relatively well as a site option when considered in isolation, relative to other strategic site options, as there is the potential to facilitate delivery of new strategic infrastructure (including a rail station) and enable an extension to the Surrey Research Park; and development would mostly avoid the loss of Green Belt identified as most sensitive (‘red-rated’) by the Green Belt and Countryside Study (GBCS; see Figure 6.4). As such, an urban extension here was identified as a 'given' for the purposes of developing spatial strategy alternatives. With regards to site capacity a figure of 1,800 (o.e. a figure lower than that proposed in 2014, reflecting a reduction in the overall site size to avoid red-related Green Belt and AONB, and minimise development on Area of Great Landscape Value (AGLV))32 was identified as a given, for the purposes of developing spatial strategy alternatives.

4.10 The Sustainability Appraisal therefore acknowledges that the location and principle of residential development in this location, and the scale of development is consistent with the principles of sustainable development. Para 6.4 of the SA identifies that the site at Blackwell Farm has medium green belt sensitivity. It is therefore considered appropriate in regard to the presumption of sustainable development that the same conclusions could be drawn against increasing the allocation to include Wellington House.

4.11 The Landscape Character Assessment that supports the Regulation 19 Local Plan identifies the site within the Hogs Back Chalk Ridge area B1- where development should have a positive benefit to landscape and have regard to the landscape area. It is considered that this can be addressed through sympathetic design, and use of the site as a blend and transition from the adjacent greenbelt to the site allocation at Blackwell Farm.

4.12 The principle of the assessment of the strategic site, the appropriateness of the development in regards to housing supply and the contribution to the wider priority in the provision of new homes, supports the allocation at Blackwell Farm being extended. The evidence base supports that the site is available, suitable and deliverable, and due to the single ownership of the site it should be considered that there is potential for development to be phased in line with policy approach from the larger strategic site, whilst enhancing housing supply within the early stages of the Local Plan.

5.0 CONSIDERATIONS FROM THE EVIDENCE BASE FOR ALLOCATION AT PROPOSED SUBMISSION STAGE (REGULATION 19)

5.1 The Spatial vision of the Local Plan looks to maintain the extent and function of the green belt in such a way to protect the character of the Borough. The vision then continues to explain that as not all of the development needs can be met within the urban areas, that it is proposed to “focus some development on large greenfield sites, which brings significant infrastructure, it help make it sustainable. In the context of Wellington House, the site would have additionality to this objective, and support the principal of maintaining the greenbelt whilst providing essential infrastructure in a sustainable location.

5.2 The vision also confirms that new development on the edges of existing urban areas will be required to treat the transition from urban to rural character in a sympathetic way, whilst affording great protection to the AONB and AGLV. Careful and considered design can ensure that the redevelopment of the additional 4.2 hectares, can assist in the transition between the allocation and the defined settlement boundary.

5.3 Policy S1 states that the Borough Council will work proactively with applicants jointly to find solutions so that proposals can be approved wherever possible. In this regard, Wellington House is suitable, and achievable fulling sustainable design objectives of the plan and aligning with the presumption in favour of sustainable development.
5.4 Policy S2 confirms the provision of 13,860 new homes, but accepts that “the housing target...is not a ceiling”. Table 1 shows delivery of Blackwell Farm as an urban extension spread across years 1-15, and the policy highlights the annual housing target rising from 500-790 per annum with a total delivery of 10,395. It has already been argued that Wellington House can ensure that as the site is within one ownership, the site can be brought forward in advance of the strategic site, ensuring a more flexible approach to delivery, whilst ensuring delivery throughout the plan period can address an early years deficit. (SHLAA p20)

5.5 Policy P1: Surrey Hills AONB is to be conserved and enhanced, whilst proposals in the AGLV will be required to demonstrate that they would not result in harm. It is proposed that careful design and layout, and containment within the defined boundaries of the site, that align with the western boundaries of the adjacent allocation, would ensure that there any development would not undermine any further the AONB or AGLV but would merely square off the site and allow the transition to be more consistent with the approach taken in Policy A26.

5.6 Policy P2 relates to the greenbelt. The NPPF which states that greenbelt boundaries should only be amended in exceptional circumstances, and given the significant requirement for housing, and the strategic nature of the site for additional employment and infrastructure provision, the Council has considered it appropriate to propose the urban extension site at Blackwell Farm. However, the additional land at Wellington House could also contribute additionality to the housing provision and therefore the same exception can be applied to the site.

5.7 Whilst the council intend to provide an SPD to amplify Policy P2, it is considered that the close relationship with the access to Blackwell Farm and the irregular shape of the existing allocation, is justification for the site to be included in the urban extension. Indeed, the site could be a buffer in regard to design and scale due to its character and typography, and this could then blend with the adjacent green belt. Careful and considered design can easily address this. As the site already has a large residential property within the site, the site has to a degree been previously developed and used, therefore there is a significant difference between the land and its residential curtilage and that of the adjacent open areas that more formally contribute to the green belt and its open character.

5.8 Policy P2 also argues that development on a site, within the green belt, for replacement buildings will look at the scale and proximity to existing buildings. Given the significant scale of the proposals at Blackwell Farm, it is considered that well designed additional residential dwellings on the adjacent site at Blackwell Farm can be justified in relation to the overall visual impact, and that the integrity of the greenbelt would not be undermined by “square-ing off” the urban extensions allocation in Policy A26. The additional land is therefore consistent with the council reasoned justification in para 4.3.26 which states that infill development should not have an adverse impact on the character of the countryside or the local environment.

5.9 Policy D1 of the submission Local Plan relates to design polices and making better places, and the need to create a harmonious integrated mix of uses. The unique opportunity to expand the scale of the urban extension allows the proposals for the new local centre, employment floorspace, SANG and housing to be enhanced. The site also contributes to the ability to further improve the opportunity for sustainable movement, whilst enhancing housing land supply figures in an already justified location.

5.10 The site at Wellington House would allow any residential development to “respond meaningfully and sensitively to the site, its characteristics and constraints”, whilst being laid out to make the best use of the natural features of the site. In regard to the proposed site, this relates to the opportunity to utilise the topography and natural landscape of the trees and existing mature boundary treatments, which are appropriate to their setting.

5.11 Policy A26 sets out the details of the allocation at Blackwell Farm for 1800 homes, 31,000sqm of employment space, 6 travellers pitches, comparison and convenience retail, community uses and a 2FE primary school. This significant development site abuts the Wellington House site and the shared access road is illustrated to as a primary vehicular access to serve the development. The allocation as it stands will significantly alter the character and setting of Wellington House and not including the site within the allocation ignores an opportunity to further enhance the objectives of sustainable development.

5.12 Other local plan policies:
The site does not have any other constraints that would preclude it from development potential. A planned development has the ability to address the raft of specific policies in relation to sustainable construction, open space provision, energy efficiency and all other local plan requirements through careful and considered design. The site should therefore be considered to be consistent with the NPPF and Local Plan policies.

6.0 Justification of including Wellington House, in line with the National planning context NPPF:

6.1 The NPPF (paragraph 14) states:

“At the heart of the National Planning Policy Framework is a presumption in favour of sustainable development, which should be seen as a golden thread running through both plan-making and decision-taking. For plan-making this means that:

• local planning authorities should positively seek opportunities to meet the development needs of their area;
• Local Plans should meet objectively assessed needs, with sufficient flexibility to adapt to rapid change, unless:

any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.”

The inclusion of Wellington House seeks the opportunity to meet development needs, gives flexibility to the housing land supply whilst the benefits outweigh any harm, that has already been mitigated through the allocation at Blackwell Farm.

6.2 Para 15 states that “development which is sustainable should be permitted without delay.” The site is available and can be delivered without delay as issues relating to access, suitability and sustainability have been established in principle as part of the adjacent strategic land allocation.

6.3 Para 17 of the NNP requires Local Planning Authorities to empower local people to shape their surroundings” whilst allowing Local Plans to be “a creative exercise in finding ways to enhance and improve the places in which people live”. It states that every effort should be made to objectively identify and meet development needs.“ responding positively to opportunities for growth”.

6.4 It continues, that planning should “take account of the different roles and characters of different areas”. In regards to the Guildford Local Plan, if this has been adequately considered for Site A26, then the approach can be applied to Wellington House to further respect the character of the locality whilst allowing every effort to identify development opportunities.

6.5 The NPPF also encourages the use of previously developed land, whilst actively managing growth to make the fullest use of sustainable transport, and focusing development that can be made sustainable. Paragraph 30 encourages patterns of development that facilitate sustainable modes of transport. Focusing additional growth on the boundaries of the allocation would meet all of the Core Planning Principles of the NNPF, whilst opportunities for sustainable design and construction can be amplified in a larger scale scheme.

6.6 Paragraph 47 of the NPPF requires local authorities to “boost significantly the supply of housing”, and that developable sites should be identified. Through the identification of the Blackwell Farm as a key site, critical to the delivery of housing development over the plan period, Guildford Borough Council has accepted the principle of
development in this location, and has justified that this overrides the previous green belt allocation. It does not however identify Wellington House as developable.

6.7 The NPPF requires delivery to be realistic whilst Paragraph 50 also requires policies to be flexible over time. It is considered that due to historical levels of under delivery the inclusion of the additional 4.2 hectares will allow a flexible, realistic and achievable site to come forward, that can be self sufficient, or developed as part of the wider strategic allocation.

6.8 Paragraph 52 states that “the supply of housing can sometimes be best achieved through planning for larger scale development, such as new extensions to settlements.” Whilst the authority has illustrated this in Site 26 at Blackwell Farm it has not done this far enough, and the potential to include Wellington House, ensures that the opportunity “provides the best way of achieving sustainable development”.

6.9 Whilst paragraph 53 resists the use of residential gardens, when it is harmful. Given the scale of the curtilage of Wellington House, of 4.2 hectares and the close proximity to the large 78 hectare site at Blackwell Farm, it is consistent that the supply of additional dwelling houses within the residential curtilage would not cause harm, indeed it could be positively planned to ensure a more consistent approach to the setting and context of the wider site.

6.10 Paragraph 55 requires residential development to be innovative in design, raise design standards, significantly enhance its setting and be sensitive to the defining characteristics of the local area. Due to the defensible boundaries of the site, the unusual shape and form of the allocation at Blackwell Farm and the precedent given to the use of the access road leading to both Wellington House and Blackwell Farm, the opportunity to allow the residential house site to be developed as a buffer to the strategic allocation to the north, can ensure that this is achieved through careful design and layout, respecting the local character and context. This will ensure that the development complies with Paragraph 56 which requires development to establish a strong sense of place, and optimise the potential of the site to accommodate development, responding to local character.

6.11 Four of the five objectives related to greenbelt policy cited in para 80, are to protect the sprawl of built up areas, prevent towns merging, assist in the safeguarding the countryside from encroachment, and preserve historic towns. The principle of the allocation at Blackwell Farm ensures that these have been considered and assessed, against the overriding need for land for housing for period of the Local Plan.

6.12 The extension of the site to include Wellington House can therefore be agreed that the principles of adding an additional 4.2 hectares on a 78 hectare site (5.4% increase) would not undermine the gap between built up areas, nor create the merger of towns. The scale of the site, adjacent to the larger allocation does not result in any additional encroachment eastwards into the countryside, but merely squares off the site, along the already allocated access road that is the primary access to the allocated site A26. Given that the Council argues that the strategic allocation is consistent with para 83:”Greenbelt can be developed in exceptional circumstances” it is considered that the same can apply to extending the boundary to include the additional 4.2 hectares.

6.13 The inclusion of this site would ensure “consistency with the Local Plan Strategy in meeting identified requirements (para 85). This also requires that boundaries are “defined clearly using physical features that are permanent and readily recognisable”. The heavily tree lined eastern boundary, and the access road to the west, as well as the allocation to the south ensure that this site can be consistent with para 80 and “would not have to be altered within the local plan period”.

6.14 Para 89 requires any development not to have “greater impact on the openness of the greenbelt”. Given the site allocation to the south and the significant green boundaries to the site, it is unclear how any development within the residential curtilage can be adversely impacting on the openness of the greenbelt, over that already proposed by the large allocation at Blackwell Farm.

7.0 CONCLUSION:

7.1 The opportunity to expand the allocated site at Blackwell Farm will be consistent with the ethos and vison of the Submission Guildford Borough Plan and assist the Council in achieving its objectives without any detriment to the significant constraints in the Borough regarding impact on the open countryside and greenbelt. In line with the NPPF the
site can contribute to sustainable development and the three dimensions of social economic and environmental roles. It complies with Para 7 by providing housing supply that meets the needs of present and future generations, within a high quality environment, with accessible local services. Economically it will allow the co-ordinated provision of necessary infrastructure when considered alongside the urban extension allocation A26, and environmentally, it can ensure a strengthened boundary and blend between the Blackwell Farm strategic site and the adjacent green belt, contributing to the protection and enhancement of the natural and built environment.

7.2 The benefits to the inclusion of the site at Wellington House into the Strategic urban extension can be summarised as:

- The opportunity to bring forward a site that is available, deliverable and viable in line with NPPF.
- It is appropriate, and available for development.
- Its inclusion would comply with the overriding ethos of a presumption in favour of sustainable development in line with the NPPF.
- Increased housing provision from approx 100-120 residential units (depending on design and infrastructure requirements), and associated CIL receipts.
- Increased land supply to provide additional residential dwellings in line with the LAA and at an early stage of the local plan.
- To provide additional residential units in a sustainable location that is in close proximity to both proposed and existing local centres and the urban boundary.
- To utilise a site that has already been deemed sustainable in regards to sustainable transport.
- To enhance a site that has already been released as an exceptional circumstance from the greenbelt.
- The opportunity to design the residential layout that can sufficiently blend with adjacent greenbelt and ensure a more successful transition between the new strategic scale development within the urban extension.
- Utilise the natural landscape of the site and its treescape to enhance the A31 frontage and regularise the form and shape of the existing allocation, without detriment to the integrity of the greenbelt.

7.3 It is therefore recommended that the site at Wellington House be included in the strategic allocation under Policy A26, in line with objectives and principles at both National level and local level and, when considered against the “whole plan approach”, can contribute towards achieving the objectives of a sound local plan, which can guide successful development in Guildford until 2033.

Answer (if comment is on questions 1-7 of the questionnaire): ()
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Vail Williams have been appointed by Mr David Brandon, as landowner to make representations on Guildford Borough Council Regulation 19 Submission Local Plan: strategy and sites (2017).

This representation builds on the preceding representations made in June 2016 to the previous Reg. 19 stage of the proposed Local Plan 2015-2034.

There have been a number of changes and alterations to the proposed plan particularly in terms of decreasing overall housing numbers, by approximately 1,400 dwellings overall to 12,462 from 13,860, in the most recent version of the proposed local plan reg. 19 (June 2017). The plan states in paragraph 4.1.9a that this total annual housing target is lower than what is set out in the LAA 2016 “as having potential to be delivered over the plan period” so that there is flexibility in the plan and it is demonstrable that the “strategy is capable of delivering the target”. However, given the total housing target the Council should be increasing these numbers to ensure that their OAN, along with the unmet need across the Housing Market Area (HMA), are met.

According to a recent HBF response to the Guildford Borough Council Proposed Submission: Strategy and Sites 2017 Consultation “the Plan is unsound as the Council have failed to plan positively in relation to meeting the needs of the neighbouring authorities”. For example, Woking continue to plan using their currently adopted Core Strategy which sets figures at 225 units below the OAN set out in the 2015 West Surrey Strategic Housing Market Assessment. Guildford, similar to Waverley, therefore has a duty to cooperate to aid Woking in meeting their unmet need.

The same issue was also discussed recently at Waverley Borough Council’s Examination in Public (EIP) where the Inspector determined that Waverley, and Guildford, should be increasing their housing targets to accommodate Woking given that they are all in the same HMA.

This representation focuses on Policy A26: Land adjacent to Blackwell Farm, and the full statement attached below seeks to demonstrate that our clients’ site, is deliverable, suitable and achievable for residential development in line with paragraph 47 of the NPPF.
It is considered that the residential property, and its curtilage, provides an opportunity to allocate the site for additional residential development, and would enhance the existing allocation whilst providing a unique opportunity to enhance housing delivery without detriment to the surrounding area.

In addition, the most recent changes to the proposed local plan has seen the overall plan period being decreased to 19 years, from 2013-2033, to 2015-2034; there has been a loss of overall strategic sites with the removal of the Normandy and Flexford site from the plan which was set to deliver some 1,100 new homes across the plan period. These changes in reducing housing numbers, reducing the overall time period of the plan and reducing the number of strategic sites, while the need for housing has not decreased but may, in fact, have increased due to the Borough’s duty to cooperate to help the overall HMA and Woking specifically to help meet their need, illustrate that further sites will need to come forward in order to deliver enough houses to meet the needs of the overall area within the plan period.

Despite the Guildford Borough Topic Paper 2017 on Housing Delivery which sets out the reasons for reducing their housing targets due to the allowance of the NPPF and NPPG for the Borough to lower their targets where adverse impacts of providing housing on constraints such as the AONB, Green Belt and Infrastructure Capacity would “significantly and demonstrably outweigh the benefits” of providing new housing (pg.8-9).

The demand for the additional housing need still exists and can be accommodated in sites such as Wellington House which will, overall, have a less harmful impact on the surrounding area and Borough due to its location adjacent to the Blackwell Farm strategic site, than other stand alone sites which may come forward, as it fits in and creates a stronger defensible boundary between the built up area and the open countryside, does not decrease the open gap between Guildford and Ash/Tongham any more than already proposed, and will not have infrastructural transport issues as these have already been mitigated within the Blackwell Farm proposal.

Within this most recent Regulation 19 plan proposal, further weight appears to be put on defensible boundaries with the Green Belt, seeing multiple sites allocated for development in the plan changing to amend their boundaries to make them more defensible. The inclusion of the Wellington House site into Policy A26 would “square-off” the strategic site and create a more natural boundary to the site which would be a hard line edge between the built up area and the Green Belt.

The site at Wellington House is currently developed as a residential site, being a large house and garden, and therefore constitutes as a Brownfield site on which development would be more suited to than those green field sites that are also being put forward. Therefore, the inclusion of this site would create less of an overall impact on the Borough and surrounding area than an undeveloped Green Belt site.

While it is acknowledged that this site is currently designated as Green Belt and there were large numbers of comments and objections (some 3,313) to the Green Belt policy in the local plan, the removal of this site and inclusion into policy A26, would “square-off” the site and create that defensible boundary which would be more suitable for development in the area than alternative stand-alone sites, as aforementioned.

The proposed transport infrastructure plans outlined in document T13 show that major improvements are to be made to the A31 along the Hogs Back in conjunction with policy A26. Given that Wellington House and Blackwell Farm share an access point, it makes further sense that Wellington House be included in this allocation rather than the additional housing provision be found elsewhere as the necessary infrastructure provisions associated with this type of development have already been planned for and will not need to be provided as they would on a different site.

In summary our representation is as follows:

- The site is owned by a single landowner who has had a consistent approach to putting this site, which, in line with the NPPF, is available, deliverable and viable, forward for consideration since 2014.
- The Landowner has been fully engaged in the process of promoting this site from the beginning.
- The site is fully suitable, appropriate, and available for development immediately or in the future.
- If this site at Wellington House is not allocated for development under Policy A26, it may come to be a vacant and unused site in the future due the impacts such a large strategic site will have on the amenity use of the dwelling.
• There is an increased need to deliver housing numbers for the adjacent LPAs in line with the HMA and the
determination by a planning inspector that Waverley take on half of Woking’s unmet need and suggestion that
Guildford share the burden of providing some of this remaining need also.
• The number of houses delivered by the Borough is historically poor and Guildford Borough Council need to
recognise the need to be flexible and release additional sites which will not create a negative impact on the
surrounding environment or Green Belt, such as this Wellington House site.

With this, the benefits to the inclusion of the site at Wellington House into the strategic urban extension of policy A26 can
be summarised as:

• The opportunity to bring forward a site that is available, deliverable and viable in line with NPPF.
• It is appropriate, and available for development.
• Its inclusion would comply with the overriding ethos of a presumption in favour of sustainable development
in line with the NPPF.
• Increased housing provision from approx. 100-120 residential units (depending on design and infrastructure
requirements), and associated CIL receipts.
• Increased land supply to provide additional residential dwellings in line with the LAA and at an early stage of the
local plan.
• To provide additional residential units in a sustainable location that is in close proximity to both proposed and
existing local centres and the urban boundary.
• To utilise a site that has already been deemed sustainable in regards to sustainable transport.
• To enhance a site that has already been released as an exceptional circumstance from the Green Belt.
• The opportunity to design the residential layout that can sufficiently blend with adjacent Green Belt and ensure a
more successful transition between the new strategic scale developments within the urban extension.
• Utilise the natural landscape of the site and its treescape to enhance the A31 frontage and regularise the form and
shape of the existing allocation, without detriment to the integrity of the Green Belt.

Based on a new and updated evidence base, it is therefore recommended that the site at Wellington House be included in
the strategic allocation under Policy A26, in line with objectives and principles at both National level and local level and,
when considered against the “whole plan approach”, can contribute towards achieving the objectives of a sound local plan,
which can guide successful development in Guildford until 2034.

Examination

The site is considered to be deliverable, suitable and achievable. As Blackwell Farm can assist the delivery of housing, in a
sustainable location, we would like to register our interest in participating at the Examination and attend any pre-
examination meetings.

Please see covering statement for additional justification in regard to National and Local plan policies.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3300  Respondent: 10808833 / David Brandon  Agent: Vail Williams (Suzanne Holloway)

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is
Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1 Introduction

1.1. Vail Williams have been appointed as planning agents for Mr David Brandon as landowner of Wellington House, Hogs Back GU3 1DE. This representation is our clients’ response to the Guildford Borough Council Regulation 19 Submission Local Plan, July 2017 which will guide development until 2034.

1.2. This representation builds on previous submissions for the site as part of the submission at the Regulation 18 stage of the Local Plan in September 2014, reference DLPSA/3565, and the 2016 representation to the Regulation 19 stage previously submitted.

1.3. This site relates to a 4.2 hectare residential site to the west of Policy A26 (site 60 as identified in site assessment documents as allocated in Guildford Borough Council Local Plan Submission Plan (GBCLP). For site boundaries of the allocation and the proposed site see Appendix One.

1.4. This representation seeks to demonstrate that our clients’ site, remains deliverable, suitable and achievable for residential development in line with para 47 of the NPPF. It provides Guildford Borough Council with the opportunity to allocate the site for additional residential development, enhancing the existing adjacent allocation at Blackwell Farm, whilst providing a unique opportunity to improve housing delivery without detriment to the surrounding area.

2 Site Context and Opportunity

2.1. There is a large U-shaped 2 storey residential property, an access road, and a large residential garden within this site, along with significant mature treescape which bounds the site and forms a natural boundary with the Green Belt land to the west. The site has one owner and is available and suitable for residential development.

2.2. This site is adjacent to Blackwell Farm, the strategic housing allocation (policy A26), which is a 78ha site located approximately 500m from the Guildford town settlement boundary. The A31 lies to the south of the site and acts the main access to the house, along with being the primary access to the Blackwell Farm allocation to the north. There is also a separate 2 storey residential property “The Gardens” which lies immediately to the North of the site.

2.3. This representation seeks to demonstrate that approximately 100-120 additional dwellings could be provided on the land, adjacent to the primary access road at Wellington House, through the use of only the residential house and its garden. In this regard, a small scale alteration to the proposed urban extension would result in only a 5.3% increase in site area. We propose that the opportunity to deliver a more comprehensive development which does not undermine the context or the character of the surrounding area could be achieved at this site with minimal impact to the surrounding area.

2.4. With a presumption in favour of sustainable development, this representation seeks to demonstrate how the objectives of the national policy framework (NPPF) and proposed local planning policies (GBLP) could be consistent with the inclusion of this site into the strategic extension site of Blackwell Farm under policy A26, and that the Borough Council should amend the Policy A26 boundary.

3 Previous Considerations & Representations in relation to regulation 18

3.1. This site was previously proposed at the 2014 Regulation 18 stage and the 2016 Regulation 19 stage on behalf of the landowner, Mr Brandon, by planning consultants D&M Planning and Vail Williams respectively. Within the Guildford Borough Local Plan Proposal Map 2003 the site is designated as Metropolitan Green Belt and is in an Area of Great Landscape Value (AGLV).

3.2. As outlined in the previous representation, the site was proposed at Regulation 18 stage by the landowner with the potential for residential development, in a sustainable location and adjacent to the strategic development site proposed by Guildford Borough Council. The site was, at that stage, identified as open countryside and abuts the proposed allocation. Despite numerous concerns raised by objectors regarding the impact on protection policies including the AONB and AGLV, including objections from Natural England, the site immediate adjacent to Wellington House was allocated as an extension to the settlement boundary and significant development was justified over and above greenbelt, character, agricultural, and access concerns.
3.3. At the Regulation 18 stage, 13,040 dwellings were identified as required (652 per annum) as set out in the 2014
SHMA. The first representation for Wellington House confirmed that this figure did not reflect the objectively assessed
need for housing (OAN) and that the housing figures were therefore considered too low. This then considered alternative
scenarios regarding higher growth need, including DCLG figures that proposed a much higher rate of 704 dwellings per
annum.

3.4. It is considered that despite this previous representation, and the subsequent 2016 representation, this site at Wellington
House has not been adequately assessed or considered as part of the land supply assessments. With this, the proximity to
the allocated site and redefined settlement boundary warrants the additional 4.2 hectares, with a clear defensible boundary,
to be added to the existing 78 hectare allocation under policy A26.

4 Updated Comments as a result of the evolving Evidence Base and the Regulation 19 Proposed Plan.

4.1. In line with the NPPF, the plan must demonstrate that it is positively prepared, justified, effective, and consistent with
national policy. Whilst our previous representations reiterated that it is agreed that these tests relating to the evidence base
are sound, there are a number of issues raised in regard to the specific assessment of the land supply available for
residential development, given that the site at Wellington House has not been included in the site assessments nor those
housing supply figures as now amended, that have been cited in the July 2017 version of the Regulation 19 stage Local
Plan.

4.2. Since the Regulation 18 stage in 2014, the site allocated at Blackwell Farm has been reduced to 1,500 homes being
delivered within the plan period, from approximately 2,000 homes. With this, the site has been reduced from 106.2 to 78 ha
through the loss of land west of the access road. For original Regulation 18 map, see Appendix Two.

4.3. The July 2017 update of the Local Plan shows that Policy S2 relating to housing supply, now identifies a decreased
figure of 12,426 new homes over the plan period (a level of 654 per annum, which has been reduced from 693 per annum,
according to the 2017 SHMA addendum). Historically, the delivery of housing has been low for Guildford and whilst the
plan identifies phased delivery from 2019/20-2023/4 with an increasing annual housing target, it is considered that based on
delivery rates, the most effective method of ensuring housing targets are met is through maximising the allocation and
identification of sites.

4.4. The inclusion of Wellington House would ensure that this can be dovetailed with the delivery of key infrastructure,
which is central to effective planning, and is identified in the Councils own Infrastructure Delivery Plan (June 2016).

4.5. Based on the Land Availability Assessment 2016 (LAA) and the study on the 2015 West Surrey Strategic Housing
Market Assessment (SHMA), the requirement for housing based on demographic led projections meant that 517 dwellings
would be needed per annum (Table 76 - SHMA). The fully considered OAN of 693 homes per annum equated to a total of
10,985 new dwellings over the period of the plan. This highlighted the significant need for new housing in Guildford and
the dominance it has within the wider West Surrey HMA.

4.6. Since this, a 2017 Addendum to the SHMA has been released which indicates that due to economic circumstances the
housing need for the Borough should be reduced from the original 693 dwellings per annum to 654 dwellings per annum on
the basis that the new housing target has been reduced to what has been deemed a suitable figure for the Borough when
standing alone, apart from the rest of the West Surrey HMA.

4.7. Given the issues of delivery, as a member of the HBF, we have seen sight of their representations responding to this
proposed submission, which also states that the housing requirement reductions are unjustified and would cause the plan to
become unsound. They also note that this 2017 SHMA addendum has been commissioned by Guildford Borough Council
only and solely looking at their needs, without taking into account the wider needs of the West Surrey HMA. Vail Williams
LLP are therefore concerned that the plan does not reflect an adequate duty to cooperate.

4.8. The Land Availability Assessment Addendum (June 2017) shows that the Blackwell Farm site is due for delivery years
4-15 for 1500 homes within the plan period, with highest delivery per annum being 170 new dwellings per annum across
years 11-15. The housing trajectory also identifies a deficit in development up until the year 2025 (p8).

4.9. However, whilst the original and amended SHLAAAs, SHMAs and Local Plans seem to identify adequate land supply
over the plan period, this is only for Guildford itself with the housing trajectory figures having been decreased overall to
provide flexibility for the Council within their LAA allocations. This does not take into account the need for the wider area, particularly Woking’s unmet need. However, the historic delivery rates, and need to plan positively and flexibly to consider all opportunities for development, in line with para 47 of the NPPF, requires the council to consider and assess all sites. These should be available, achievable (with realistic prospect that housing will be delivered on the site within 5 years) and be viable.

4.10. On this basis, it is argued that Wellington House should be included as part of the site allocated in Policy A26, on the following grounds:

**Achievable and Deliverable:**

4.11. The proposed site remains in single ownership, who has proactively proposed the site at both Regulation 18 and, the prior, 19 stages of the local plan process demonstrating positive engagement and consideration of the relevant policy in order to show that this site is both achievable and deliverable.

**Suitable:**

4.12. While the Green Belt constraints remain across this site, it has been removed for the immediately adjacent Blackwell Farm site on the basis that the scale and opportunity of its development warrants exceptional circumstances.

4.13. Therefore the additional 4.2 hectare Wellington House site could increase this opportunity for much needed development. With this, the site already abuts the primary access road for the Blackwell Farm, and therefore both the existing mature landscaping and access arrangements are established. Within the LAA 2016, the allocated site at Blackwell Farm (page 428, ref. 311), acknowledges that although the site is in the Green Belt, it partially adjoins the urban area.

4.14. Additionally, the existing mature trees create a sense of enclosure as with the adjacent site proposed at Wellington House. This provides a clear and defensible boundary with mature greenspace which would fit into the Blackwell Farm allocation and would make the defensible boundary stronger. With this, other sites such as Ripley and Burnt Common have had their boundaries amended in this July 2017 Local Plan to ensure they are more defensible in the Green Belt. This is not consistent with Wellington House and Blackwell Farm.

4.15. The partial inclusion of the site in the AGLV is acknowledged, however as the site is in a Low flood risk (Zone1) and as a residential house and garden has no Agricultural land classification, unlike the allocated Blackwell Farm site, the allocation of Wellington House and its curtilage do not warrant such additional constraints. It is also considered that as PDL land with existing buildings, the land should be considered over and above other loss of green belt sites proposed.

4.16. The Sustainability Appraisal (June 2016) states in Box 6.5 the following:

'Blackwell Farm to the south-west performs relatively well as a sit option when considered in isolation, relative to other strategic site options, as there is the potential to facilitate delivery of new strategic infrastructure (including a rail station) and enable an extension to the Surrey Research Park; and development would mostly avoid the loss of Green Belt identified as most sensitive ('red-rated') by the Green Belt and Countryside Study (GBCS; see Figure 6.4).31 As Such, as urban extension here was identified as a "given" for the purposes of developing spatial strategy alternatives. With regards to site capacity a figure of 1,800 (i.e. a figure lower than that proposed in 2014, reflecting a reduction in the overall site size to avoid red-rated Green Belt and AONB, and minimise development on Area of Great Landscape Value (AGLV))32 was identified as a given, for the purpose of developing spatial strategy alternatives.'

4.17. As discussed in the previous Regulation 19 submission representation, the Sustainability Appraisal acknowledges that the location and principle of residential development in this location, along with the scale of development, are consistent with the principles of sustainable development. Paragraph 6.4 of this appraisal also identifies that the Blackwell Farm site’s Green Belt sensitivity is at a medium scale. Therefore, in regard to the presumption of sustainable development, it is considered appropriate that the same conclusions could be drawn against increasing the Blackwell Farm allocation to include Wellington House.

4.18. While this site is located within the Metropolitan Green Belt and there have been a large array of comments on Policy P2 relating to the Green Belt and its protection (3,313 comments), no significant changes are proposed to be made to Policy P2. However, Wellington House’s removal from the Green Belt and inclusion into the policy A26 would further
consolidate the defensible boundary of this urban extension and would provide a stronger boundary between the urban area and the Metropolitan Green Belt while providing a suitable site for additional housing supply to meet the overall need for Guildford and the HMA, and not creating additional harm to the character of the area or the infrastructure available.

4.19. As the site is ideally located adjacent to a proposed strategic site and the appropriateness of the development in regards to housing supply and its rich contribution to the provision of new homes, Guildford Borough Council should therefore support the allocation at Blackwell Farm being extended to include Wellington House.

4.20. The Guildford Borough Transport Strategy 2017 (ref. T13) associated with the Regulation 19 proposed Local Plan shows plans to update the A31 at the entrance to the Blackwell Farm strategic site. These plans include a “new signalised junction from Blackwell Farm site to A31 Farnham Road” (ref. LRN3), an “access road at Blackwell Farm site with link to Egerton Road” (ref. LNR4), and “Interventions to address potential highway performance issues resulting from development at Blackwell Farm site” (ref. LNR5), along with significant bus networks being introduced to serve the site (ref. pg.16). These vital upgrades to the infrastructure serving the Blackwell Farm strategic site provide further reason for the Wellington House site to be included, as it will mean that Wellington House will not need significant additional infrastructural upgrades in order to be viable and sustainable. This again should be considered in context with other proposed sites that will need further infrastructure investment.

4.21. The evidence base and the recent addendums to the LAA (ref. T11a), SHMA (ref. T26a) and Transport Strategy (ref. T13) all support that the site is available, suitable and deliverable, and due to the single ownership of the site it should be considered that there is potential for development to be phased in line with policy approach from the larger strategic site, whilst enhancing housing supply within the early stages of the Local Plan.

5 Wider Policy Compliance with Regulation 19

5.1. As iterated in the June 2016 Representations, the Spatial vision of the Local Plan looks to maintain the extent and function of the green belt in such a way to protect the character of the Borough. The vision then continues to explain that as not all of the development needs can be met within the urban areas, that it is proposed to “focus some development on large greenfield sites, which brings with it significant infrastructure, (and) helps to make it sustainable”.

5.2. In the context of Wellington House, the site would have additionality to this objective, and support the principal of maintaining the Green Belt whilst providing essential infrastructure in a sustainable location. The loss of Green Belt is a highly contentious issue with some 3,313 comments and objections received last year relating to Policy P2, as aforementioned. The consolidation of extra, well needed, sites such as Wellington House joining with Blackwell Farm in Policy A26, would allow the Green Belt to be saved elsewhere and remain as robust as it is intended to be.

5.3. The vision of the proposed Local Plan also confirms that new development on the edges of existing urban areas will be required to treat the transition from urban to rural character in a sympathetic way, whilst affording great protection to the AONB and AGLV. It is therefore suggested that Wellington House, through careful and considered design would ensure that the redevelopment of the additional 4.2 hectares would help to more appropriately address the transition to the newly defined settlement boundary and will “not compromise the overall character of the Borough”.

5.4. Policy S1 relating to the Presumption in favour of sustainable development, states that the Borough Council will “work proactively with applicants jointly to find solutions that mean that proposals can be approved wherever possible”. In this regard, Wellington House is suitable and achievable, as it fills sustainable design objectives of the plan and aligns with the presumption in favour of sustainable development given its location in relation to the Blackwell Farm strategic site and proposed access.

5.5. While paragraph 4.1.4 has added in that “when implementing Policy S1, local circumstances will be taken into account to respond to different opportunities for achieving sustainable development” which includes the presumption of sustainable development not automatically applying to policies relating to Local Green Belt, AONB, designated heritage assets, etc. However, the location of Wellington House in relation to the urban area extension for Blackwell Farm (Policy A26) should be presumed to be sustainable despite its designations, given that the nature and reasons for sustainability being applied to Blackwell Farm should also apply to Wellington House. Should Blackwell Farm allocation progress without Wellington House, then the circumstances and relationship of the existing residential development adjacent to the new allocation will also be significantly altered.
5.6. Policy S2 confirms the new lower provision of 12,426 new homes from the previous 13,860 homes, but accepts that “the housing target...is not a ceiling”. The Reasoned Justification for this lower number is stated in the Regulation 19 plan to be “lower than the total supply of homes identified in the Land Availability Assessment [2016] as having potential to be delivered over the plan period” so that there is flexibility in the plan and so that it is demonstrable that the Council’s “strategy is capable of delivering the target” (paragraph 4.1.9a of Regulation 19 Plan). However, in doing this, the OAN for the entirety of the West Surrey HMA along with Woking’s unmet need have not been considered, meaning the Guildford Borough Council are in fact failing their Duty to Cooperate and therefore making this plan unsound.

5.7. To confirm that the recent HBF representation (July 2017) to the Local Plan, “policy S2 could be considered out of date from the point at which the plan is adopted” as the 2017 LAA Addendum identifies 881 new dwellings fewer than required to meet the housing target, including the potential backlog of dwellings between 2019/20 and 2023/24, based on the trajectory set out in policy S2.

5.8. It has already been argued that Wellington House can ensure that as the site is within one ownership, it can be brought forward in advance of the strategic site, ensuring a more flexible approach to delivery, whilst ensuring delivery throughout the plan period can address an early years deficit until 2023 (LAA 2016, p20).

5.9. Policy P1 states that the Surrey Hills AONB is to be conserved and enhanced, whilst proposals in the AGLV will be required to demonstrate that they would not result in harm.

5.10. It is proposed that careful design and layout, due to the defined boundaries of the site (aligning with the western boundaries of the adjacent allocation) that the proposed site would not undermine any further the AONB or AGLV but would merely “square-off” the site and allow the transition to be more consistent with the approach taken in Policy A26.

5.11. Policy P2, which has not changed in the most recent update of the plan, relates to the Green Belt. It is stated in the NPPF that Green Belt boundaries should only be amended in exceptional circumstances. Given that there is a significant requirement for housing within the Borough, and that the site is strategic in nature for additional employment and infrastructure provision, the Council has considered it appropriate to propose the urban extension site at Blackwell Farm. However, it is maintained that the inclusion of land at Wellington House could also contribute additionally to the housing provision and, therefore, the same exception should be applied to the Wellington House site.

5.12. The Council states in the proposed plan that they intend to provide a Green Belt SPD which will amplify Policy P2. With this, it is considered that the close relationship with the access to Blackwell Farm, along with the irregular shape of the existing allocation, is justification for the site to be included in the proposed urban extension in Policy A26, and that whilst the site could be a buffer in regard to design and scale due to its blend with the adjacent Green Belt, careful design could easily address this.

5.13. As stated in the June 2016 representations, as Wellington House already has a large residential property within the site, the nature of the site is previously developed and therefore there is a significant difference between the land and its residential curtilage and that of the adjacent open areas that more formally contribute to the Green Belt and its open character.

5.14. Policy P2 also argues that development on a site in terms of replacement buildings, within the green belt, will take the scale and proximity to existing buildings into account. Given the significant scale of the proposals at Blackwell Farm, it is considered that well designed additional residential dwellings on the adjacent site at Wellington House can be justified in relation to the overall visual impact, and that the integrity of the Green Belt would not be undermined by “square-ing off” and infilling the urban extensions allocation in Policy A26. Therefore, this additional land is consistent with the reasoned justification provided by the Council in paragraph 4.3.26 which sets out that infill development “is considered to be the development of a small gap in an otherwise continuous built-up frontage”, “should be appropriate to the scale of the locality”, and should “not have an adverse impact on the character of the countryside or the local environment”.

5.15. The proposed plan appears to put weight on defensible boundaries and appear to have amended the boundaries of some strategic sites in order to be more defensible between the built up area and the surrounding Green Belt land. This can be seen with sites such in Ash (Policy A28), the Former Wisley Airfield (Policy A35), and the Garlick’s Arch, Send/Burnt Common site (Policy A43) to name a few. These were all amended in order to make the Green Belt boundary more defensible according to the reasons for change within the 2017 Key Summary Changes document.
5.16. Given these amendments, it could also be shown that the boundary of the strategic Blackwell Farm site policy A26 could be amended to include Wellington House and, as aforementioned, “square-off” the allocation which would create a more natural, harder, and more defensible boundary between the site and the Green Belt without causing additional harm to the Green Belt and the character of the area, while increasing the number of suitable, available and achievable sites required to meet the OAN for the entire HMA.

5.17. As stated in the previous representations, Policy D1 of the submission Local Plan relates to design polices and place shaping and the need to create a harmonious integrated mix of uses. The unique opportunity to expand the scale of the urban extension allows the proposals for the new local centre, employment floorspace, SANG and housing to be enhanced, and the ability to enhance further the opportunity for sustainable movement whilst enhancing housing land supply figures can be achieved in an already justified location.

5.18. The inclusion of the Wellington House site would allow any residential development to “provide a harmonious, integrated mix of uses, where appropriate, that fosters a sense of community and contributes to inclusive communities that provide the facilities and services needed by them” (Policy D1). Despite part of this policy being deleted since 2016, the site at Wellington House would respond meaningfully and sensitively to the site, its characteristics and constraints, whilst being laid out to make the best use of the natural features of the site. This relates to the opportunity to utilise the topography and natural landscape of the trees and existing mature boundary treatments of the proposed site, which are appropriate to their setting.

5.19. Policy A26 sets out the details of the allocation at Blackwell Farm for 1500 homes, 30,000sqm of employment space, Gypsy and Traveller pitches, comparison and convenience retail, community uses, a 2FE primary school, and a new secondary school. This significant development site abuts the wellington house site and the shared access road is illustrated to as a primary vehicular access to serve the development. The allocation as it stands will significantly alter the character and setting of Wellington House and not including the site within the allocation ignores an opportunity to further enhance the objectives of sustainable development.

5.20. The inclusion of Wellington House under the A26 strategic site allocation, contrary to design, would have a great impact on the overall wider local plan given its suitable, achievable, available and sustainable location which would create a stronger defensible boundary with the Green Belt, provide significant aid in terms of meeting additional housing need, and create minimal additional impact to the overall character of the town and Borough.

Other local plan policies:

5.23. Other key documents which form an integral part of the evidence base to this proposed local plan include the LAA Addendum (2017), the SHMA Addendum (2017) and the Strategic Highways Assessment Report (2017).

5.24. The LAA Addendum 2017 (ref. T11a) outlines that Blackwell Farm was reduced in capacity due to a revised understanding of the site’s potential capacity. This is sited within reasons for many of the LAA site amendments, and overall has decreased the number of proposed houses in the plan period despite their need remaining. This site at Wellington House has the potential to provide additional housing which would help meet the need across the Borough as well as the wider HMA, particularly Woking’s unmet need, which the Waverley EIP inspector has advised Waverley and Guildford share.

5.25. The five year housing land supply as of the 1st April 2017 set out in this document is also stated to be 2.36years. This is not sufficient and does not meet the requirements set out by the NPPF for each Council to demonstrate that they can provide. Further to this, the inclusion of this site would aid in the increasing of this housing land supply figure and meeting the Council’s duty to adhere to national policy.

5.26. The SHMA Addendum 2017 (ref. T26a) seeks to provide an updated assessment of the Objectively Assessed Need (OAN) in the Guildford Borough. The decrease in housing need for the Borough from 693dpa to 654dpa due to changing
economic figures, according to the recent HBF representation, should not necessarily mean that the Council should have reduced their housing numbers as employment forecasts are uncertain and consideration needs to be given for job growth in other areas within the HMA. This addendum takes Guildford into account as a standalone Borough, which in reality, does not produce realistic housing need figures, as the HMA needs to be assessed together as a whole. Wellington House is a site which is ready and available to come forward to take some of the housing numbers outstanding in the plan with as minimal impact to the character of the surrounding Green Belt as possible.

5.27. The Guildford Borough Transport Strategy 2017 (ref. T13) sets out a programme of schemes for transport related infrastructure required and planned in relation to proposed schemes and site allocations throughout the plan period. It is noted that there are significant improvements to be made to the A31 around the Blackwell Farm and Wellington House site entrance. These include new signalised junctions (LRN3), links to Egerton Road (LRN4), interventions to prevent potential highway performance issues resulting from development of the site (LRN5), and significant bus network improvements and additions (BT6). These are all planned improvements to the transport infrastructure associated with the Blackwell Farm site and the inclusion of the Wellington House site allocation would further increase the suitability and achievability of the site as these essential infrastructure improvements are already planned for provision.

5.28. There are no other constraints on this site that would preclude it from development potential. A planned development would be able to address the raft of specific policies in relation to sustainable construction, open space provision, energy efficiency and all other local plan requirements through careful and considered design. The site should therefore be considered to be consistent with the NPPF and Local Plan policies.

6 Justification of including Wellington House, in line with the National Planning Context NPPF

As stated in the previous local plan representations;

6.1. The NPPF (paragraph 14) states:

“At the heart of the National Planning Policy Framework is a presumption in favour of sustainable development, which should be seen as a golden thread running through both plan-making and decision-taking. For plan-making this means that:

• Local planning authorities should positively seek opportunities to meet the development needs of their area;
• Local Plans should meet objectively assessed needs, with sufficient flexibility to adapt to rapid change, unless: any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.”

The inclusion of Wellington House seeks the opportunity to meet development needs, gives flexibility to the housing land supply whilst the benefits outweigh any harm that has already been mitigated through the allocation at Blackwell Farm.

6.2. Paragraph 15 states that “development which is sustainable should be permitted without delay.” The site is available and can be delivered without delay as issues relating to access, suitability and sustainability have been established in principle as part of the adjacent strategic land allocation.

6.3. Paragraph 17 of the NNP requires Local Planning Authorities to empower local people to shape their surroundings whilst allowing Local Plans to be “a creative exercise in finding ways to enhance and improve the places in which people live”. It states that every effort should be made to objectively identify and meet development needs “responding positively to opportunities for growth”.

6.4. It continues, that planning should “take account of the different roles and characters of different areas”. In regards to the Guildford Local Plan, if this has been adequately considered for Site A26, then the approach can be applied to Wellington House to further respect the character of the locality whilst allowing every effort to identify development opportunities.

6.5. The NPPF also encourages the use of previously developed land, whilst actively managing growth to make the fullest use of sustainable transport, and focusing development that can be made sustainable. Paragraph 30 encourages patterns of development that facilitate sustainable modes of transport. Focusing additional growth on the boundaries of the allocation
would meet all of the Core Planning Principles of the NNPF, whilst opportunities for sustainable design and construction can be amplified in a larger scale scheme.

6.6. Paragraph 47 of the NPPF requires local authorities to “boost significantly the supply of housing” and that developable sites should be identified. Through the identification of the Blackwell Farm as a key site, critical to the delivery of housing development over the plan period, Guildford Borough Council has accepted the principle of development in this location, and has justified that this overrides the previous green belt allocation. It does not however identify Wellington House as developable.

6.7. The NPPF requires delivery to be realistic whilst Paragraph 50 also requires policies to be flexible over time. It is considered that due to historical levels of under delivery the inclusion of the additional 4.2 hectares will allow a flexible, realistic and achievable site to come forward, that can be self sufficient, or developed as part of the wider strategic allocation.

6.8. Paragraph 52 states that “the supply of housing can sometimes be best achieved through planning for larger scale development, such as new extensions to settlements.” Whilst the authority has illustrated this in Site 26 at Blackwell Farm it has not done this far enough, and the potential to include Wellington House, ensures that the opportunity “provides the best way of achieving sustainable development”.

6.9. Whilst paragraph 53 resists the use of residential gardens, when it is harmful. Given the scale of the curtilage of Wellington House, of 4.2 hectares and the close proximity to the large 78 hectare site at Blackwell Farm, it is consistent that the supply of additional dwelling houses within the residential curtilage would not cause harm, indeed it could be positively planned to ensure a more consistent approach to the setting and context of the wider site.

6.10. Paragraph 55 requires residential development to be innovative in design, raise design standards, significantly enhance its setting and be sensitive to the defining characteristics of the local area. Due to the defensible boundaries of the site, the unusual shape and form of the allocation at Blackwell Farm and the precedent given to the use of the access road leading to both Wellington House and Blackwell Farm, the opportunity to allow the residential house site to be developed as a buffer to the strategic allocation to the north, can ensure that this is achieved through careful design and layout, respecting the local character and context. This will ensure that the development complies with Paragraph 56 which requires development to establish a strong sense of place, and optimise the potential of the site to accommodate development, responding to local character.

6.11. Four of the five objectives related to greenbelt policy cited in para 80, are to protect the sprawl of built up areas, prevent towns merging, assist in the safeguarding the countryside from encroachment, and preserve historic towns. The principle of the allocation at Blackwell Farm ensures that these have been considered and assessed, against the overriding need for land for housing for period of the Local Plan.

6.12. The extension of the site to include Wellington House can therefore be agreed that the principles of adding an additional 4.2 hectares on a 78 hectare site (5.4% increase) would not undermine the gap between built up areas, nor create the merger of towns. The scale of the site, adjacent to the larger allocation does not result in any additional encroachment eastwards into the countryside, but merely “squares-off” the site, along the already allocated access road that is the primary access to the allocated site, A26. Given that the Council argues that the strategic allocation is consistent with paragraph 83: “Green Belt can be developed in exceptional circumstances” it is considered that the same can apply to extending the boundary to include the additional 4.2 hectares.

6.13. The inclusion of this site would ensure “consistency with the Local Plan Strategy in meeting identified requirements (paragraph 85). This also requires that boundaries are “defined clearly using physical features that are permanent and readily recognisable”. The heavily tree lined eastern boundary, and the access road to the west, along with the allocation to the south, ensure that this site would be consistent with paragraph 80 and “would not have to be altered within the local plan period”.

6.14. Paragraph 89 requires any development not to have “greater impact on the openness of the Green Belt”. Given the site allocation to the south and the significant green boundaries of the site, it is unclear how any development within the residential curtilage of this site could be adversely impacting on the openness of the Green Belt, over that already proposed by the large allocation at Blackwell Farm.
7 Conclusion

7.1. As previously iterated in the preceding representations, the opportunity to expand the allocated site at Blackwell Farm will be consistent with the ethos and vision of the proposed Guildford Borough Local Plan and will assist the Council in achieving its objectives without any detriment to the significant constraints in the Borough regarding impact on the open countryside and Green Belt.

7.2. In line with the NPPF, the site can demonstrate sustainable development along with the three dimensions of social, economic and environmental roles. It complies with Paragraph 7 by providing housing supply that meets the needs of both present and future generations, within a high quality environment, with accessible local services. Economically, the site will allow the coordinated provision of necessary infrastructure when considered alongside the urban extension allocation A26, and environmentally, it can ensure a strengthened boundary and blend between the Blackwell Farm strategic site and the adjacent Green Belt, contributing to the protection and enhancement of the natural and built environment.

1. The site is owned by a single landowner who has had a consistent approach to putting this site, which, in line with the NPPF, is available, deliverable and viable, forward for consideration since 2014.
2. The Landowner has been fully engaged in the process of promoting this site from the beginning.
3. The site is fully suitable, appropriate, and available for development immediately or in the future.
4. If this site at Wellington House is not allocated for development under Policy A26, the site will be significantly impacted, through the adjacent large strategic site and this will have a detrimental impact on the amenity use of the dwelling.
5. There is an increased need to deliver housing numbers for the adjacent LPAs in line with the HMA and the determination by a planning inspector that Waverley take on half of Woking’s unmet need and suggestion that Guildford share the burden of providing some of this remaining need also. This is not met in this current plan.
6. The number of houses delivered by the Borough is historically poor and Guildford Borough Council need to recognise the need to be flexible and release additional sites which will not create a negative impact on the surrounding environment or Green Belt, such as this Wellington House site.

7.3. With this, the benefits to the inclusion of the site at Wellington House into the strategic urban extension of policy A26 can be summarised as:

- The opportunity to bring forward a site that is available, deliverable and viable in line with NPPF.
- It is appropriate, and available for development.
- Its inclusion would comply with the overriding ethos of a presumption in favour of sustainable development in line with the NPPF.
- Increased housing provision from approx. 100-120 residential units (depending on design and infrastructure requirements), and associated CIL receipts.
- Increased land supply to provide additional residential dwellings in line with the LAA and at an early stage of the local plan.
- To provide additional residential units in a sustainable location that is in close proximity to both proposed and existing local centres and the urban boundary.
- To utilise a site that has already been deemed sustainable in regards to sustainable transport.
- To enhance a site that has already been released as an exceptional circumstance from the Green Belt.
- The opportunity to design the residential layout that can sufficiently blend with adjacent Green Belt and ensure a more successful transition between the new strategic scale developments within the urban extension.
- Utilise the natural landscape of the site and its treescape to enhance the A31 frontage and regularise the form and shape of the existing allocation, without detriment to the integrity of the Green Belt.

7.4. Based on a new and updated evidence base, it is therefore recommended that the site at Wellington House be included in the strategic allocation under Policy A26, in line with objectives and principles at both National level and local level and, when considered against the “whole plan approach”, can contribute towards achieving the objectives of a sound local plan, which can guide successful development in Guildford until 2034.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. APPENDIX C

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick's Arch {A43} which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The "objectively assessed need" figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to...
failure to correct for errors in the historical data for international migration flows,
issues with the way it considers students and affordability and
flaws in the method for estimating the number of homes needed to support job growth.
It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable!

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A25 - Gosden Hill Farm

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data: 2010 -2014 from Crashmap data
• Clandon Cross Roads Area to Bulls Head - 17 incidents
• Bulls Heads Head to Bennett Way - 8 incidents
• Bennett Way to Highcotts Lane - 15 incidents
• Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

• 21 Oct 2015 - A247 near shell garage - Three vehicles collided causing delays Surrey Fire and Rescue

2016

• 15 April 2016 12 year old boy injured in The Street - A247 closed in both directions
• 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
• 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and sec is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100,B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham's sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development. The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.
The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England's requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an "aspiration" in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPS16/5610  **Respondent:** 10809377 / Bernice Williams  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**POLICY A43 AND A43a - Garlick's Arch**

I OBJECT to Policy A43 and A43a on Garlick's Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when
required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so-called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement—often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current "soft" edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)
The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic. The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY D3

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick's Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the
villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough's infrastructure is already heavily strained. However the plan's determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council's methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen. Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy 11. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough's infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council's control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy 11 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents' in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick's Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY D3

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will "enhance" heritage assets which I fear is a developer's charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY D4

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy E1
### POLICY E1

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick's Arch. It is in a non sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick's Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick's Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick's Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
1. POLICY E2

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class Blc, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick's Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E5

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of localservices and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
18. POLICY E6

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford.

Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor "attractions" and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/"Disneyfication". Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many "leisure and visitor attractions" already. The case for creating more is not made and no examples are given. Instead, the plan's explicit priorities should be:

- To protect the borough's prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

- To help make Guildford's river landscape less off-putting and support town-break packages for high-value tourist. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

- To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in An "English town break" (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

- To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy E7 Guildford Town Centre

The policy "vision" describes protecting the Guildford's unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council's own Town Centre Master Plan, the Guildford Vision Group's proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford's character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/11055  Respondent: 10809377 / Bernice Williams  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H1

I OBJECT to Policy H1 -Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.
The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability.

Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council's timidity is a case of "regulatory capture" by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog's Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

13. **POLICY H2**

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.
In addition the definition of an 'affordable home' is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will 'affordable homes' be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

1. **POLICY H3**

I OBJECT to Policy H3 - Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the "mix" this can include "market" housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued...
to be "closely related" Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.) The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances." The size and location of sites should be better defined and it should be clear market housing cannot be included.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY 12

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy 12)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY 13

I OBJECT to poor air quality concerns (Policy 13)

Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
2. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council's to give away and once it is gone it is gone forever.

Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of "only" 1.6% of the borough's Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an "acceptable" percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council's growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers' hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "...the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I
assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the "insetting" of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the "openness" of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF's other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To "inset" two-thirds of the borough's rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough's location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed "insetting" and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17's aim of "empowering local people to shape their surroundings" and other NPPF provisions. Paragraph 4.3.17 states that "the general extent of the Green Belt has been retained." I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called 'strategic sites' of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick's Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a 'special circumstance') to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC's Green Belt & Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

- I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that "allocating these sites does not grant planning permission for development." However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

- The housing needs assessment is flawed in various respects and overstates housing need. In addition, since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether "exceptional circumstances" existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

- Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as well as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First, I believe constraints should have been applied.

Secondly, I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

- Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless "exceptional circumstances" for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. POLICY P4

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay.

Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S1

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development "should be seen as a golden thread running through both plan-making and decision-taking." As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of "sustainable development" is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims "to secure development that secures the economic, social and environmental conditions in the area". This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as "sustainable", in breach of the NPPF's most important guideline.
Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications "wherever possible" and "without delay" reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing.

Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016) / further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. POLICY S2

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously. The housing number is based on an arbitrary Housing Market Area (HMA): the "West Surrey" tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view,

"West Surrey" is much too small. Half of Guildford borough's residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside "West Surrey". Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make "West Surrey" reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour's "need". Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey's 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford's OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered "sound".

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is "deliverable" and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council's cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered "deliverable". In addition, the number of homes proposed, plus existing planning permissions, plus expected "windfall" sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask

the public to approve a "plan" that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA).
Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound.

A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London's commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick's Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick's Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I do not agree that the evidence used for the Proposed Submission ocal Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest 'value creation' areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

2. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (e.g. from Guildford Residents' Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant. In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

- "Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt" Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
- The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
- The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
- The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.
- Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
- The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
- Much of the infrastructure required to support the level of development proposed is outside the Council's control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer's business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
- The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.
- GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.
- GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.
- GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which, many, including independent assessors, consider unsound.
- Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018.
- Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.
• The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
• The draft Local Plan will cause further linear development along the A 3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
• The proposal for Garlick's Arch was added to the draft ocal Plan without any prior consultation under Regulation 1
• The and Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and
• No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
• In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
• The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
• Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
• Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been
• The status of the text which accompanies each policy box is not If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council's refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.
Despite campaigning on a clear statement 'Conservatives Say Green Belt To Stay', the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I OBJECT specifically to Ripley and Send Villages being removed from the Green Belt. The green belt was intended to be permanent, as required by the National Planning Policy Framework, and there are no special circumstances to justify abandoning it. Send’s Green Belt provides an essential buffer stopping Woking and Guildford becoming an conurbation. Local councillors and central government gave a clear election promise to protect Green Belt ad this reneges on it, Developers will be quick to take advantage and there will be nothing to stop them

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a
development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of
  Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion –
  particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local
  network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools. Currently, a two-way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5871  Respondent: 10811361 / Simon Crago  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A43 and A43a on Garlick’s Arch.

The site is not a sustainable site being far from any infrastructure facilities and transport links.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce, defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed.

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition of north facing ramps to the A3 at Burnt Common would have an enormous impact on local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I object to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the old and established woodland that surrounds the site on two sides and runs centrally through the site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11891  Respondent: 10811361 / Simon Crago  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the sustainable employment policy (Policy E1).

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs are likely to be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/11892  Respondent: 10811361 / Simon Crago  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the location for new employment floor space (Policy E2).

It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

There is no need for the new employment floor space to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11893  Respondent: 10811361 / Simon Crago  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the loss of rural employment (Policy E5).

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages, yet the development at Garlick’s Arch (A43) would result in the loss of some existing successful rural businesses, which have been in existence for many years. These businesses employ dozens of people. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to Policy I1 due to the increased congestion that the development will cause to the local village roads and the lack of road infrastructure (Policy I1).

Our villages are already suffering from severe congestion for much of the day. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

I believe the additional traffic flows will bring increased numbers of accidents, and increase in noise, pollution and injury of the public. In the case of West Clandon, the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to Policy P2, due to the congestion that development will cause to the trunk roads, A3/M25.

Significant improvements to the road infrastructure are likely to be many years away, even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/11889  Respondent: 10811361 / Simon Crago  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy P2, due to the congestion that development will cause to the trunk roads, A3/M25.

This policy does not sufficiently safeguard the Green Belt and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development. The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas.

In addition, I object to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. Exceptional circumstances are required for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

I believe that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object to all strategic sites proposed in the draft Plan to be built in the Green Belt.

I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints.

There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

### Comment ID: PSLPP16/11887  **Respondent:** 10811361 / Simon Crago  **Agent:**
The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11888  Respondent: 10811361 / Simon Crago  Agent:

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4731  Respondent: 10811361 / Simon Crago  Agent:
C.i. Policy 25 Gosden Hill

1. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt.

2. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt.

3. The development of this site will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.

4. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress.

5. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

6. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which I understand is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4732  Respondent: 10811361 / Simon Crago  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

C.ii. Policy A43 Garlick’s Arch

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches

2. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

3. The allocation of 28.9 ha is an excessive land grab into the Green Belt.

4. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

5. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

6. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

7. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt.
There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

8. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

9. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure. Our villages are already suffering from severe congestion for much of the day. The proposed development under the plan will cause greater congestion in and around our villages.

10. Many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

11. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

12. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

13. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

14. I object to the lack of proper infrastructure planning for sites. Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

15. Despite the Garlick’s Arch site being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents in the locality will see their quality of life significantly deteriorate in many ways.

16. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Any further development without funding will place further stress upon existing health services.

17. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). I have considerable concerns that development of the large residential sites identified at Wisley Airfield, Garlick’s Arch and Gosden Hill will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

18. I object on the grounds of poor air quality. The significant level of development being proposed will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

19. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley. Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

20. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
C.iii. Policy A58 Burnt Common

1. I object to Policy A58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
3. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
4. The impact on small surrounding roads will create traffic gridlock.
5. It will join up existing villages and defeat the purpose of the Green Belt.
6. It will create poor air quality.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

E. Policy S1 Presumption in favour of Sustainable Development

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are urban sprawl. Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Duty to Cooperate

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

Reference to A44 Land west of Winds Ridge and Send Hill.

I do not consider this to be a good location for the proposed development for the following reasons:

1. I understand the site has unsafe land fill waste which may not be suitable for building on.

2. The site is opposite a cemetery.

3. Send Hill is a very narrow road and may not be suitable for extra vehicular access and is congested at the other end near the traffic lights during school times.

4. Access to Send Hill is through either Potters Land or Vicarage Lane on the south side. Both Vicarage Lane and Potters Land are quite narrow and may not cope with large volume of traffic. Exiting the A3 to Potters Lane after the farm shop there is a nasty bend that at the next bend oncoming traffic have to give way to traffic coming from the A3 but there is no give way road marking, the road is very narrow and some of the hedges from houses have overgrown onto the road. Potters Lane require hedge trimming constantly but it doesn't seem to be done properly.

5. I object to large scale development particularly on Green Belt. Send is a nice village and we would like to keep it as a village.
Thank you

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

Reference to A44 Land west of Winds Ridge and Send Hill.

I object to location of the proposed development site for the following reasons:

1. Road congestion. Approaching Send Hill from Potters Lane from the A3 would bring through lots of vehicles through a dangerous bend after the farm shop that vehicles heading to the A3 cannot see what is coming through. There is no Give way sign or road marking to indicate that two cars cannot pass each other at that bend. Furthermore approach to Send Hill from Vicarage Lane is very narrow and cannot cope with large volume to traffic.
2. Send Hill itself is very narrow and very congested at the other end near the traffic lights especially during school times.
3. The site is opposite the Cemetery.
4. I understand that the site has unsafe land fill waste and may cause harm to new residents in newly built houses.
5. Send Village is in the middle of Green belt land and I would not like to see the Green Belt land being used to build on.

Thank you.

**Document:**  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
I strongly object to the plans to build 595 new houses in the Horsleys and also the development of over 2,000 houses on the former Wisley Airfield. I moved to this area 20 years ago precisely because I wanted to live in a small rural environment. It was not an inexpensive choice, but I decided to spend my hard earned money to purchase a house in a location that I loved. Building such a large number of houses in and around Horsley Village will completely change the character of the village. In addition, it will create new problems such as over-crowding on the local train service and associated parking area. This plan does not take into consideration the welfare of the individuals who already reside in the Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

6. I object to the inclusion of the land at Garlicks Arch, Send Marsh/Burnt Common and Riplev (A43)

Garlick's Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the the Draft Local Plan Infrastructure schedule does not provide for this site at all.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

5. I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

This is disastrous as the increased volume of traffic would impact the local communities. The increased traffic from London (M25) to Woking would go through Burnt Common, Send and Old Woking, which currently cannot cope with the existing traffic. This is unsustainable.

Answer (if comment is on questions 1–7 of the questionnaire): ()
3. I object to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

This will cause more congestion to the villages of Ripley, Send and Clandon, which have poor condition narrow roads. This is currently a rural area and many no roads have no suitable pedestrian footpaths or safe crossing points. I have made complaints about the dangers of these roads to pedestrians and that the lack of footpaths discourages healthy means of transport like cycling and walking and the situation will not be improved by more cars and unsustainable volumes of traffic.

Answer (if comment is on questions 1-7 of the questionnaire): ()

14. I object to the congestion that development will cause to the trunk roads A3/M25 (Policy 12)

Both the A3 and M25 need improvements before any developments commence. This is clearly not going to happen in the timescales of the plan, so the proposed developments at Wisley Airfield (A35), Garlicks Arch (A43) and Gosden Hill (A25) should NOT take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
11. I object to poor air quality concerns (Policy 13)

The increased congestion that will arise from the massive proposed developments will in turn lead to increased air pollution which will have damaging effect on local residents and their health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

2. I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, in addition to Wisley Airfield (site A35) and Garlicks Arch (site A43)

There are no exceptional circumstances (as required by the National Planning Policy) for these villages and sites being removed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
4. I object to development in areas at risk of flooding (Policy P4)

The Environment Agency classifies the site at Garlicks Arch (A43) as being in a higher risk than the Council's own assessment. The plan does not take adequate account of the flood risk as required by National Planning Policy, especially as this area has flooded many times in recent years.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. I object to the local plan as the development proposed is not sustainable (Policy S1)

The volume of proposed housing will damage local communities especially Ripley, Send and Clandon and is not sustainable due to lack of infrastructure. In particular there is a real lack of public transport with recent cuts to local bus services, there is no train stations in the area of the proposed development and the local roads which are already under strain will do not have plans for improvement. As a doctor I am concerned about the lack of medical services in the area. There are also insufficient leisure services with no plans to expand local sports centres in spite of the planned increase in residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

2. I object to the local plan as the development proposed is not sustainable (Policy S2)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
7. I object to the Borough Wide Strategy (Policy S2)

There is too much development in Wisley (A35) Ripley/Send (A43) and Clandon (A25). The plan is unbalanced with over 5,000 houses proposed between M25 and Burpham, which will merge all the villages and their identities. This is unfair and unreasonable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/690  Respondent: 10811745 / Ann and David R. Wright  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Jacobs Well

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We wish to comment on the Local Plan with particular regard to Jacobs Well and area.

We object to the removal of Jacobs Well from the Green Belt creating a presumption in favour of infilling in the village.

We object to the figure of 693 houses per annum being the forecast of Guildford Borough Council to build in and around Guildford and especially on Green Belt land. Even with the infrastructure improvements promised, can this number of houses be justified or sustainable.

We object to flood plains near Jacobs Well being used for roads and houses such as the Clay Lane Link Road. The flood plains are there for a purpose to preserve Guildford town from being flooded and local areas.

We fully agree with GBC decision not to include the field owned by Cassidy Slyfield in SARP.

Thank you for considering these comments on the Guildford Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
In view of flawed new evidence, Guildford’s proposal for more than 12,426 homes (plus a buffer of 1,155 homes) is excessive and will result in needless loss of Green Belt and green character, and increased congestion, that cannot be justified in our heavily constrained borough.

Traffic congestion, which is already severe, is set to get worse over the plan period.

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a resident of Send, I am writing to object to the proposed development of Green Belt land at Garlick's Arch, Burnt Common & to Land West of Wind's Ridge & Send Hill.

Send ward has been allocated 485 new homes under Guildford's revised Local Plan, an population increase of over 25%.

I strongly object to the removal of Send from the Green Belt. It is vital that this land is not built upon & it is totally unnecessary as most housing required could be built on brown field sites.

The Green Belt was established after the Second World War to limit the urban development. Remove it & Woking & Guildford will merge in to one huge city. Guildford Borough's own vision states it envisages Guildford as "A county town set in a vibrant rural environment". Well, that will no longer be true & Guildford & its surrounding villages will no longer be such a desirable place to live! Our roads at peak times are already struggling to cope with the volume of traffic. Send's school & doctor's surgery are also full, we simply do not have the infrastructure to support such a huge number of proposed additional houses.

I believe that the required 13,860 houses in the local plan is exaggerated. The number of foreign students living in Guildford have been wrongly used to inflate the need. Also, if the population is to grow by some 20,000 in the plan period, we actually only need 8,000 new homes (based on 2.5 people per home) & 50% of these could be built on brown field sites.

I strongly object to Policy A43, land at Garlick's Arch designated for 400 houses & 7,000sq m of industrial & warehousing units. This site is a late addition to the plan & was put through under Regulation 19. This significant development requires full consultation under Regulation 18 as it has not been previously consulted upon. This is green belt land covered by ancient woodland & protected by NPPF. There are no exceptional circumstances.

The proposed industrial development here is simply not required. The latest ELNA shows an 80% reduction in land required for employment floor space, since the previous draft plan. A new 4-way interchange onto the A3 at Burnt Common to serve this development would be disastrous for Send. The A247 would be gridlocked all day & the surrounding roads could simply not cope with the increase in traffic.

I also object to Policy A44, land West of Winds Ridge & Send Hill, designated for 40 homes & 2 Travellers Pitches. Again, this site is new & was not included in the Regulation 18 draft & has not been consulted upon before. This was previously a land fill site which is currently vented, making the subsoil inappropriate to build upon. It is also within the Green Belt & so protected. The proposed Travellers Pitches are totally inappropriate due to the single width narrow country road access. Both proposals would impact on existing residents, cemetery users & the quiet country road.

I would be most grateful if you could pass my comments on to the Planning Inspector. I am passionate about the beautiful area in which we live & would hate to see it ruined by overdevelopment & the loss of our very valued Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Finally, I object to the proposal to inset Send Business Park from the Green Belt because this would give free reign to build expensive new houses here in the future in an area of outstanding natural beauty, adjacent to the beautiful Wey Navigation. Also, as I have already mentioned there is highly restricted vehicular access along Tannery Lane in both directions & any development causing more traffic along this road would be a mistake!

Send represents 11% of the borough, yet 40% of GBC proposed development has been targeted in our area! This is disproportionate & will cause over-development of our village & misery to all that live here. Our roads are already frequently blocked before any more development is made & we stand to loose beautiful areas of countryside. We choose to live in a village & not a town because of its rural setting & care passionately about our environment! Please listen to our objections.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the changes in Policy A43 at Garlick's Arch because there is no proven demand for Travelling Showpeople plots at this location. It is beautiful permanent Green Belt containing ancient woodland, some of which has been around since the time of Elizabeth 1st. It is also subject to frequent flooding & is currently a flood zone 2 allocation. There are NO exceptional circumstances to build on it & it's development would defeat the key purpose of the Green Belt & effectively join up Ripley & Send. Together with the 400 proposed new homes on this site, 6 plots for traveling showpeople & their associated large vehicles will generate excessive traffic & will cause total gridlock in our area. It also does not take in to account the inadequate infrastructure of roads, schools & medical facilities, as required by law!

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the changes to Policy A58 at Burnt Common because GBC have changed this from a maximum of 7,000 sq m of industrial space to a MINIMUM of 7,000 sq m of industrial space. There is simply no need to build industrial or warehouse sites in the middle of the Green Belt when Slyfield & Guildford still have empty sites. The 2017 Employment Land Need Assessment actually show a reduction in demand for industrial land to 3.9 hectares, so why has GBC over allocated a minimum of 10 hectares at Send alone? The impact on surrounding roads will cause gridlock & Send & Ripley will be joined up as one. This proposal was deleted from the 2014 draft because of all the objections, not to mention the thousands of objections logged last year. Why is GBC not listening?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to building 45 houses at Clockbarn Nursery because of the inadequate access and traffic volume. Tannery Lane is far too narrow and twisty to take and more traffic. The junction with Send Road is already very hazardous for vehicles trying to join the main road. Planning permission has previously been granted for 64 apartments at the Tannery and for building a marina, both of which will generate additional heavy traffic. The lane cannot take any more traffic. The junction is too dangerous already and will be made much worse.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to policy A44 which would see 40 homes and two travellers' pitches on land west of Winds Ridge and Send Hill. This was again a NEW site NOT included in 18 draft and therefore has NOT been consulted on previously. Once again this is Green Belt land partly containing unsafe landfill. Access is by a narrow lane which could never take the volume of traffic that would ensue from traveller's pitches. It is an inappropriate location because the narrow width single access country road provides insufficient access. The subsoil of the proposed site contains documented unsafe landfill waste registered at GBC. Any development there would spoil a high amenity area set in beautiful countryside.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the fact that the Local Plan takes no account of schools, doctors surgeries and roads that are already operating at full capacity. Another 4000 houses in this area with a conservative estimate of a further 8000 cars would be catastrophic. I request that my comments are shown to the planning Inspector who will decide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13574   Respondent: 10813345 / Ruth Cope   Agent:

I OBJECT specifically to Ripley and Send Villages being removed from the Green Belt. The green belt was intended to be permanent, as required by the National Planning Policy Framework, and there are no special circumstances to justify abandoning it. Send’s Green Belt provides an essential buffer stopping Woking and Guildford becoming on conurbation. Local councillors and central government gave a clear election promise to protect Green Belt ad this reneges on it, Developers will be quick to take advantage and there will be nothing to stop them.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the Policy A42 change at Clockbarn in Tannery Lane because:

• The increase to 60 homes in place of 45 homes is 33% more and too much
• It ignores all the hundreds of previous objections made by local people
• It will worsen access and traffic problems in Tannery Lane and at the A247 junction
• It will make erosion of the Green Belt in our village worse
• It will make surface water flooding, which is already bad, even worse
• It will impact open countryside views from the River Wey Navigation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the Policy A43 change at Garlick's Arch because:

• It ignores all the thousands of previous objections made by local people
• There is no proven demand for Travelling Showpeople plots in this location
• It is beautiful permanent Green Belt and no "exceptional circumstances" exist
• It will cause over-development of our village and the number of homes is excessive
• It is exquisite ancient woodland that existed at the time of Elizabeth I
• It will join up Ripley and Send and defeat the key purpose of Green Belt
• It is subject to frequent flooding and is currently a flood zone 2 allocation
• It is contaminated by lead shot accumulated over fifty years
• It will generate excessive traffic that will block up the local roads of Send and Ripley.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A43 change at Garlick's Arch because:

- It ignores all the thousands of previous objections made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no "exceptional circumstances" exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth 1
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the local roads of Send and Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A 58 at Burnt Common because:

• It was deleted from the 2014 draft because of all the objections made previously
• The word "minimum" is a change from the previous "maximum" in the 2016 plan and since that time there has been a decline in demand for industrial land
• There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units
• The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt
• The impact on small surrounding roads will create traffic gridlock
• It will join up existing villages and defeat the purpose of the Green Belt.

I object mainly about the building on the land known as A43 Garlicks Arch site area. This area is some fifteen to eighteen feet above Sendmarsh. At this moment the heavy rain is soaking into the fields. When its all concreted the water will obviously run down to Send Marsh and create a flooded area. Approximately 2 to 3 years ago. Over 1 million pounds was spent to avoid a flood, even with the fields taken so much of the water. What will happen when the fields become concrete? Surely we pay our rates and taxes to keep our lively hood safe.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )  
Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43 I object to the land at Garlick's Arch designated for 400 houses. This site was not in the Regulation 18 draft and has not been consulted upon. The industrial development is not required and should be at Slyfield. The additional traffic resulting from such a development would increase the traffic on Send Road and Ripley which is already gridlocked at certain times of the day as is the A3. Thorough research and consultation would prove this site as impossible.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )  
Answer (if comment is on questions 1-7 of the questionnaire): ()

Please find attached photos taken of the floods at Garlick's Arch in November 2012. This is a recognised flood plain which drains down into Send Marsh. Hence the name Marsh. I object to the planning proposals for housing and industrial sites because of the unsuitability of the land and also because of the traffic which would be generated on already congested roads. An added factor would be that future purchasers would not be able to get cover for flood risk.

1. Policy P2  I object to the 'insetting' of Send and other villages from the Green Belt. The Government advice is clear that housing needs alone is not adequate grounds for building on green belt. The SHMA figures may be inaccurate and need revising after Brexit. Send is a buffer between Woking and Guildford and should remain as such.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy 2 Green Belt at paragraph 4.3.15

I object to the proposal to take Send Business Park out of the Green Belt. It is an old site on the banks of the River Way with very limited access via Tannery Lane and further development of this site would present innumerable problems. The land floods and the increased traffic created on this narrow lane which is single track for much of it with few passing places, would prove impossible. Once again this land is Green Belt and should be preserved as such.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A42 Clockbarn Nursery, Tannery Lane, Send

I object to the fact that the proposed number of homes has been increased from 45 to 60 which is incredible you having had so many previous objections to this site. Tannery lane is a very narrow lane with poor,dangerous, access at either end and quite unsuitable for a large development. The site is on Green Belt Land which is subject to flooding and will the development will impact on the River Wey Navigation. There are already sewage problems in this area as the local plant is unable to cope with excess rain water.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy A58 Land at Burnt Common, Send.

I object, in that this had previously been deleted from the 2014 Draft owing to the objections raised and there is no demand for industrial land in the middle of Green Belt when there are still empty sites at Slyfield. Once again the traffic generated would cause gridlock on already very congested roads. The 2017 Employment Land Need Assessment show a reduction in demand for the whole borough to 3.9 hectares and to over allocate 10 hectares to Send is entirely disproportionate.

I trust my views will be taken into consideration and await your acknowledgement of this letter.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

It seems you GBC have a complete disregard for us local residents of Send & Ripley, we rise thousands of objections to building on the Green Belt surrounding our village and you go ahead and change your local plan, so we all have to object again, but this time you increase your greed for land and housing. Therefore I object to the Policy A42 change at Clockbarn in Tannery lane because it is a third more home then the original proposal, Tannery lane itself is very narrow and very prone to flooding, beside the gridlock and pollution you will be causing on the already congested roads, and also impacting on the open countryside to impacts of pollution and building.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A43 change at Garlicks Arch. Where there are the "exceptional circumstances" that you need to build on ancient woodland, the area is currently a flood zone, it lays in the green belt, you will be causing congestion for our roads even more.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58 at burnt Common. It was already deleted from the 2014 draft because of objections. Slyfield still has empty sites and units, you again are willing to put aside the green belt for your own gain damaging the environment and wildlife, when industrial, sites shows a reduction in need. More traffic gridlock.

More traffic gridlock.

Lastly I object to the Green belt policy 2 at paragraph 4.3.15, i.e. to inset Send Business park from the Green Belt, there is restricted access in Tannery lane, both ways and further expansion would harm the outstanding countryside, through pollination and building.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

It seems you GBC have a complete disregard for us local residents of Send & Ripley, we rise thousands of objections to building on the Green Belt surrounding our village and you go ahead and change your local plan, so we all have to object again, but this time you increase your greed for land and housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4690  Respondent: 10816513 / Annmarie Shenton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in
conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.

7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).

8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4692  Respondent: 10816513 / Annmarie Shenton  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35),
Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4693  Respondent: 10816513 / Annmarie Shenton  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/3137  Respondent: 10816513 / Annmarie Shenton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp17q/628  Respondent: 10816513 / Annmarie Shenton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Scale of the Proposed Developments:

The 593 houses in East & West Horsley will further aggravate the already overstretched infrastructure. The road through East Horsley (Ockham Road North & South) is inadequate even now, and cannot be upgraded. Normal cars have to slow down to pass each other in certain parts, and climb onto the pavement when a truck passes through.

And you want to add further traffic to the area?!

I understand that there are plans for 2,000+ new dwellings plus considerable related infrastructure on the Wisley Airfield, only two miles from East Horsley. I am of the opinion that the Horsley area will not be able to absorb the increased population, traffic and pollution in the area.

It is not realistic to assume that the new town will restrict itself to the Wisley Airfield area. Their daily routine will spill into the surrounding areas including East Horsley. We do not have sufficient facilities, schools, surgeries and other services. Gas, electricity and telephone services in the area are already operating at full capacity on very old pipes, wires and exchanges. Local roads are too narrow and winding to take the existing traffic, and there is insufficient parking anywhere, even in front of most homes. The local roads were built in the 1930s or before, and are mostly no more than narrow lanes where cars have to slow down to pass each other. The access roads to East Horsley are narrow and winding and are not sufficient to handle even today’s traffic.
The scale of the proposed development is way out of proportion and way out of character to the existing infrastructure and the space available in this small, picturesque old village. The new town will completely destroy the special character of our historic village.

Station Parade a “District Centre”?

There is a clear misunderstanding of the nature of the facilities in our village centre, it would be completely inappropriate to target the area for future urban development. Please, get out of your offices and come and see the village in action on any normal week day and week end, see how the facilities, roads, drainage etc are already overstretched. As a certain tennis player often said: You cannot be serious with these proposals!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Green Belt:

The Green Belt is a policy for controlling urban growth. The idea was developed so as to have a ring of countryside where urbanisation would be resisted, maintaining an area where agriculture, forestry and outdoor leisure could be expected to prevail. The fundamental aim of a Green Belt policy is to prevent urban sprawl by keeping land permanently open, and consequently the most important attribute of Green Belts is their openness.

The Metropolitan Green Belt around London was first proposed by the Greater London Regional Planning Committee in 1935. The Town and Country Planning Act 1947 then allowed local authorities to include Green Belt proposals in their development plans. In 1955, the then Minister of Housing Duncan Sandys encouraged local authorities around the country to consider protecting land around their towns and cities by the formal designation of clearly defined Green Belts, to prevent urban sprawl.

The 2012 National Planning Policy Framework (NPPF) issued by the Government clearly sets out the following purposes (amongst others) for including land with the Green Belt:

- To check the unrestricted sprawl of large built-up areas
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns

How do you reconcile the Wisley Airfield proposal, and the removal of the Horsleys from the Green Belt, with the NPPF’s guidelines above?

It appears that you now want to ignore the very reason for having designated Green Belts around urban areas, and specifically around my village of East Horsley. I strongly OBJECT to your proposals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
As a resident of East Horsley I write to OBJECT most strongly to the Proposed Submission Local Plan – Strategy & Sites consultation document, which includes plans to develop a massive 593 new houses in the Horsleys, and a new 2,000+ house village at Ockham (former Wisley Airfield), notwithstanding the enormous amount of concern and objections expressed by local residents in the last couple of years.

Why do we have to, yet again, write to express our objections to all of the proposed developments. This process is clearly designed to wear the local residents down until the plans get implemented.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objection:
I know that I am not the only person writing, yet again, to OBJECT to your development plans. I hope that the GBC, as our elected representatives charged with representing our interests, will LISTEN TO THE COMMUNITY.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
As a resident of East Horsley I write, **YET AGAIN**, to **OBJECT** most strongly to the Proposed Guildford Local Plan 2017.

The 2016 Local Plan had some serious effects on our village:

- The extension of the settlement boundaries of the Horsleys into the Green Belt
- The removal of the extended village areas from the Green Belt
- The proposal to develop SIX (!) large housing sites and several smaller sites in the extended settlement area

The changes in the Guildford Local Plan 2017 are minimal, FOUR of the original development sites remain, including the proposal for 2,000+ houses, plus sheltered/care homes, Gypsy/Traveller pitches (!!!), employment/retail space and two schools on the former Wisley Airfield.

Wow, is that a town or a city?!!

There were, I understand, over 30,000 objections to the 2016 Local Plan which identified a clear desire to limit expansion into the Green Belt. I see no evidence in the Guildford Local Plan 2017 that this plea has been heeded.

Why do we have to, yet again, write to express our objections the proposed developments? This process is clearly designed to wear the local residents down until the plans get implemented. 30,000 objections last year, but yet again, here we are having to comment on a Local Plan that keeps being thrust down our throats.

**Scale of the Proposed Developments:**

The developments will further aggravate the already overstretched infrastructure of both East and West Horsley. The road through East Horsley (Ockham Road North & South) is inadequate even now, and cannot be upgraded. Normal cars have to slow down just to pass each other in certain parts, and climb onto the pavement when a truck passes through.

And you want to add further traffic to the area?!?

The development plans for 2,000+ new dwellings plus considerable related infrastructure on the Wisley Airfield, is only two miles from East Horsley. I am of the opinion that the Horsley area will not be able to absorb the increased population, traffic and pollution.

It is not realistic to assume that the new town will restrict itself to the Wisley Airfield area. Their daily routine will spill into the surrounding areas including East Horsley. We do not have sufficient facilities, schools, surgeries and other services. Gas, electricity and telephone services in the area are already operating at full capacity on very old pipes, wires and exchanges. Local roads are too narrow and winding to take the existing traffic, and there is insufficient parking anywhere, even in front of most homes. The local roads were built in the 1930s or before, and are mostly no more than narrow lanes where cars have to slow down to pass each other. The access roads to East Horsley are narrow and winding and are not sufficient to handle even today’s traffic.

The scale of the proposed Wisley Airfield development is way out of proportion and way out of character to the existing infrastructure and the space available in this small, picturesque old village. The new town will completely destroy the special character of our historic village.

**Station Parade a “District Centre”?**
There is a clear misunderstanding of the nature of the facilities in our village centre, it would be completely inappropriate to target the area for future urban development. Please, get out of your offices and come and see the village in action on any normal week day and week end, see how the facilities, roads, drainage etc are already overstretched. As a certain tennis player often said: You cannot be serious with these proposals!

Green Belt:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Key Evidence document ‘Guildford Borough Economic Strategy 2013-2031 makes no case for locating large numbers of homes in West and East Horsley or neighbouring villages.

The need for so many houses to be built in West Horsley over the first 5 years of the Plan period 2018 to 2033 is totally unproven. The West Horsley Parish Council and Surrey Community Action Housing Survey: May 2014, identified a limited need for some 20 affordable homes for local people who want to remain in the village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I understand the SHMA FIgures for Guildford B C are to be revised
Following BREXIT
and
Following errors made

I therefore object to the draft Local Plan as the Housing figures are incorrect

If you correct the figures my understanding is that at least 100 dwellings per annum for 20 years would be removed from the figures for Guildford Borough

So that is well in excess of 2000 homes and once that is the case, G B C really does not and should not develop green belt sites

I request that the figures be re visited
I request that G B C do focus now on derelict land, ghastly brown field sites and develop those and leave countryside alone

There is no need to touch the green belt

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am dismayed to hear news of massive proposed house building projects in and around West Horsley and the wider Surrey area. I wish to register my strongest objection to the multiple proposed sites but particularly what's planned to happen around East Lane in Horsley.

These proposed developments will change rural nature of West Horsley Village, and the visual amenity to all of us who currently live here.

It looks to me as though the county has been hijacked by development mad entrepreneurs. I understand there is a local policy to protect the Metropolitan Green Belt against inappropriate development.

I object to removing the Horsleys from the Green Belt. - I can see no exceptional circumstance to justify this action.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am horrified to hear of the massive proposed house building projects in and around West Horsley and the wider Surrey area. I wish to register my strongest objection to the multiple proposed sites but particularly what's planned to happen around East Lane in Horsley.

These proposed developments will change rural nature of West Horsley Village, and the visual amenity to all of us who currently live here.

I understand there is a local policy to protect the Metropolitan Green Belt against inappropriate development.

I object to removing the Horsleys from the Green Belt. - I can see no exceptional circumstance to justify this action.

Our Roads and services infrastructure is already overloaded.

The village suffers from a high water level in the ground and at times waterlogged fields overflow onto the roads. For example East Lane and the Street in West Horsley. If the fields are built on this will compound surface water problems. This is a particular concern as we seem to have more rain in recent years.

The surrounding roads including A3 and M25 often get gridlocked and many drivers including me have given up on them and started using our village roads as a cut-through instead. So adding 100's of new families into the area will add perhaps 1000 extra cars onto local roads.
The Street and East lane have narrow sections and suffer congestion at either end particularly with drop-offs at Glenesk and Cranmore schools.

The increase in traffic will cause longer queues and congestion and increase risks of road safety and accidents to residents on foot and bikes, and the drivers themselves. The local roads are in a terrible state and more traffic will make things worse.

The increase in population will overload already stretched resources such as a doctors surgery already stretched to the limit and shops and parking. The planned population increase (in excess of Government ONS forecasts) for the Borough will require a major extension of the Royal Surrey Hospital to cope.

The state schools eg Raleigh and Howard of Effingham are overloaded already, so as far I can see there is no planning if infrastructure roads, resources and amenities to support the development.

These proposed developments each change the local area where they are planned They are over-bearing, out-of-scale or out of character in terms of its appearance compared with existing development in the vicinity.

I am also concerned that taken together these developments have an adverse effect on Nature conservation in the area.

West Horsley Parish is one of a rich and varied mix of well established low housing density settlements with a considerable number of historic buildings. There are a considerable number of recreational visitors (walkers and cyclists) through the seasons each year.

Overdevelopment: Policy S2 states that provision will be made for 13,800 new homes over the Plan Period 2013 to 2033. The number of homes is too high and unsustainable in Guildford’s villages. The Site Allocations list totals 12,698.

Village expansion is unsustainable. With only one small shop, no post office, a very limited weekdays only bus service through the village, it is clearly unsustainable for the proposed high volumes of new housing development.

The development of 385 homes on the 4 proposed sites are at much higher densities than currently exist in the village settlement and will be totally out of character with the existing mix of different housing styles and layout of the village. The homes building proposals are unsustainable in terms of schooling, drainage, roads capacity, shops, parking in East Horsley (shops and station), public transport.

The Key Evidence document ‘Guildford Borough Economic Strategy 2013-2031 makes no case for locating large numbers of homes in West and East Horsley or neighbouring villages.

The need for so many houses to be built in West Horsley over the first 5 years of the Plan period 2018 to 2033 is totally unproven. The West Horsley Parish Council and Surrey Community Action Housing Survey: May 2014, identified a limited need for some 20 affordable homes for local people who want to remain in the village.

Traffic generation from the proposed new housing estates will be considerable. Most households in rural areas as a necessity have 2 cars, many having 3. Journey times on local roads will increase significantly.

There are known sewage overflow problems in the Ockham Road North / Green Lane area. Thames Water has advised Guildford Borough that the area’s waste-water network is unlikely to be able to support the demand anticipated from all the proposed developments. The foul drainage system from West Horsley to the treatment works north of Ripley, will need to be upgraded to cope. Thames Water advise ‘a 2 to 3 years lead-in period’ to install the necessary waste water network and treatment capacity after planning permission for a development is granted.

I appeal to Guildford Borough Council to wake up to their responsibilities to protect their residents and the environment, from this massive reckless plan.

</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
11. I object to the proposed Infrastructure Schedule

The Infrastructure Schedule sets out the key infrastructure requirements for the Plan. There is no schedule for Garlick’s Arch so the Plan takes no account of the infrastructure required for this site.

Furthermore the development at Garlick’s Arch would result in the loss of four successful existing rural businesses, which have been for there many years employing local people and are therefore clearly sustainable.

12. I object due to the congestion that development will cause to the trunk roads, A3/M25

The A3 and M25 would need to be improved before any development can be considered. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no enhancements are possible in the timeframe of this Plan so the developments at Wisley Airfield, Garlick’s Arch and Gosden Hill should not take place.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

6. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley

Garlick’s Arch is within the Green Belt. There are no exceptional circumstances which allow for its removal. Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land. Why have GBC removed a brownfield site at Burnt Common and replaced it with Garlick’s Arch?

Garlick’s Arch is not appropriate because:

- There is no transport infrastructure
- There are no plans to improve local schools, medical or utilities to cope with the increased needs these new homes
- The site is liable to flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the employment strategy and impact at Garlick’s Arch

There is no need for new industrial sites at Garlick’s Arch. There is an existing brownfield industrial site at Burnt Common that could easily house the 7,000 sq m proposed. Why was this site was removed from the Plan without any reason?

I object to the lack of proper infrastructure planning for sites

The Plan does not identify adequate infrastructure improvements to support the scale of development, especially at Garlick’s Arch which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors, hospitals etc. are already at capacity. It is already extremely difficult to get a GP appointment in the local surgeries without a long wait.

Are there plans to improve the capability of the emergency services, police, ambulance, fire brigade to cover the extra houses in the north east of the borough?

I wish my objections to be taken into consideration and that the Plan is amended.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

5. I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

Ramps to the A3 at Burnt Common would be a disaster for the local population, who do need to access the A3 to the north, but the addition of ramps will draw in a huge amount of ‘through’ traffic e.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as these roads cannot be improved. The queues during the rush hours are such that it already brings gridlock to the local area. Encouraging more traffic to use these roads would be untenable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

8. I object to the damage to the historic environment as a result of the scale of the proposed development

The Garlick’s Arch proposal would double the built-up area in the locality, and would irrevocably damage the trees on the site, which includes over 80 ancient Oaks. Once these historic environments are destroyed they cannot be replaced and should be protected for future generations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/1654  Respondent: 10816705 / Maggie Cole  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure

There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plans for improvements. You cannot squeeze modern traffic down lanes that were built for a horse and cart.

The rural roads in this area are narrow, in poor condition and have no pedestrian footpaths. The new homes will generate dangerous and unsustainable traffic. The historic village of Ripley was given a by-pass to save it for future generations not make its roads into a car park.

Every time there is a problem on the A3/M25 traffic already congests the area to dangerous levels. With the increasing cycle traffic on the Olympic cycle route to the Surrey Hills using the same narrow lanes, this is a recipe for a human disaster.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1659  Respondent: 10816705 / Maggie Cole  Agent:
9. I object to poor air/noise quality concerns

The developments being proposed, particularly in the north east of the borough, will lead to increased congestion and to greater levels of air/noise pollution, which will have a detrimental effect on local residents and their health and wellbeing.

2. I object to not protecting the Green Belt

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield and Garlick’s Arch and the subsequent urban sprawl. The whole beauty and character of the area are the individual villages. There are no exceptional circumstances for these villages being removed, as required by the National Planning Policy.

There is a suitable brownfield site at Burnt Common that should be developed rather than developing Garlick’s Arch.

4. I object to development in areas which are at risk of flooding

The Plan does not take adequate account of flood risk as required by National Planning Policy.

The site at Garlick’s Arch is classified by the Environment Agency as being in a greater risk than the Council’s own assessment. I have witnessed flooding many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016). My objections are as follows:

1. I object to the Local Plan as the proposed developments are not sustainable

The proposed 13,850+ new homes in this tiny area are not sustainable – it will damage local communities by over development, especially Ripley, Send and Clandon. There is no public transport to speak of, only the occasional bus service which has already been cut back. Wisley Airfield and Garlick’s Arch have no railway stations, so almost every adult will have to drive their own car. It is already difficult to cross main roads as a pedestrian; more traffic will make it impossible and extremely dangerous.

The development should be in more urban areas where there is sustainable transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
7. I object to the Borough Wide Strategy

There is too much development in the north east of the borough (Wisley, Ripley/Send and Clandon). Why is 36% of the entire Plan’s new housing proposed in this tiny area? Why are other areas not being proposed?

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation with the loss of village identities. I was always under the impression it was Council policy to keep each village separate and retain their individuality.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

8. The increase in housing numbers from 45 to 60 at Site A42 in Tannery Lane, Send will have a significant impact on the already highly congested local rural road network around and within Ripley. There are no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network. Every day there are jams and problems on the local roads and this is only going to intensify with more and heavier traffic. More houses means yet more pressure on already stretched local services.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. The development at Site A43 Garlicks Arch would be on Green Belt land, and there is no identified or exceptional need within the Local Plan documentation.
2. The potential of an increase from a minimum 400 houses up to a possible 650 at site A43 Garlicks Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause merger of these villages. Villages should remain individual and not be merged into one huge conurbation. Local facilities, doctors, schools etc. cannot cope with this increase. Have you tried getting an appointment with a GP recently.
3. Section 4.2.22 of the Plan states that “Sufficient sites are identified within the Local Plan [for] 8 plots for Travelling Showpeople” So why do 75% of them have to be in Ripley? This is unbalanced and unfair.
4. Including six Travelling Showpeople plots with associated storage facilities is entirely inappropriate in a rural area within the Green Belt and there is no identified need within the Local Plan. The allocation of six Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan and therefore is out of scale with the proposed development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The sites planned for development, approx 533 homes, put increasing pressure upon a stressed infrastructure. The villages in the area cannot cope with the infrastructure at present, never mind increased numbers of children in our schools, increased traffic on our picturesque country lanes, increased medical needs etc, the list is endless. This is a sure sign of the first step toward urbanisation, the people that live in the area are here to get away from that.

To even consider sites within this historic and scenic Surrey countryside is a travesty.

Being an East Horsley resident, it is with deep concern that I submit my objection to the proposed local plans for the Horsleys.

The development of 533 would be totally against Guildford Borough Council's definition of a conservation area; the plans to remove the Horsleys' green belt would be both damaging to the character and ecology of the villages.

A printed statement, in 2014, by Guildford Borough Council regarding its planning policy states: "We interpret national and regional planning policy and prepare the Guildford Local Development Framework to guide development in the borough. This framework covers a wide range of issues including development in Guildford town centre and elsewhere in the borough, new homes, PROTECTING THE NATURAL AND HISTORIC ENVIRONMENT INCLUDING GREEN BELT".

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

My first objection concerns road traffic. The Ockham Road is already used as a rat run between the A246 and the A3/M25. Additional construction traffic will initially exacerbate the poor road surface conditions. Even a conservative estimate of 1 car per new house in the 533 new houses will worsen traffic at peak times (school and station runs.) Already in the last few months a lorry has damaged the railway bridge at Horsley station and the have been two serious accidents on Ockham Road South in the past 7 days. Repeated requests for height, weight and speed restrictions have been ignored. Parts of this road are not wide enough for two cars, let alone HGVs or fast moving emergency vehicles.

Furthermore, traffic control measures will be needed at Thatchers Hotel site. The bend on the A246 is sharp and semi-blind and traffic joining this road from Ockham Road South already faces lengthy peak-hour delays. The Thatchers Hotel and Bell and Colvill developments will only make matters worse.

Traffic onto the Ockham Road North and the A3 from the Wisley site will also need control. The Ockham Road South at the Ripley junction is prone to flooding.

The second issue is Infrastructure and services. Medical facilities in East Horsley are already overstretched. Schools are full. Parking is limited, especially at the station.

Finally the removal of green belt restrictions and the development of the Wisley site will change the village environment beyond repair.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4115  Respondent: 10816897 / P G Williams  Agent:
While I welcome the removal of housing sites at the Ramada Hotel and the fields south of East Lane, the remaining proposals are still unacceptable. The construction of a new village on the Wisley site would mean overloading of local roads especially Ockham Road South. If the plan is executed, the local transport system, roads, rail and buses would require a significant increase in capacity, whereas at present local services are being cut back. Furthermore the remodelling of the M25 interchange at Wisley would add to local disruption.

At present local GP surgeries are struggling to cope. The increased population from the plan would only increase the pressure.

Does the plan also allow for an increase in police and fire service personnel required for this population?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever
since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may well conclude that the consultation has not been properly conducted. The Council should also consider the impact that objections (which will inevitably be made) on any planning applications on these sites will have on its capacity to deal with planning matters.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Higgeots Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays

  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 June 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see above and below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained. To allow this would be plain irresponsible.
The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infant school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).
The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to Policy E1 - Further development in areas of Green Belt

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.
Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12208  Respondent: 10816993 / Jane Roberts  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that, whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is
likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or no force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.
There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions. This is another serious flaw in the plan.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London. This would have many benefits to Guildford itself.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students are accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.
Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

I OBJECT to Policy H3 – Rural Exception Homes as this is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions. This alone makes the overall policy ineffective and capable of challenge.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related”. Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. This will increase the risk of serious accidents.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon where I live, already suffer from intolerable traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based
on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy II requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network, phone and broadband and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital; where is this assessed and remedied?

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan. This is clearly a huge flaw in the plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 &
M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The
Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.
There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from too often severe congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

Page 2305 of 3142
The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.
The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

5. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
6. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
7. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
8. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
9. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
10. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
11. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
12. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
13. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
14. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
15. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
16. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
17. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
18. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
19. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site Policies

General Comment

GBC’s proposed Local Plan proposes:
533 houses on large sites in East and West Horsley (The Horsleys)
60 houses on small sites in The Horsleys
2000 houses on Wisley Airfield
400 houses on Burnt Common
2000 houses at Gosden Hill Farm (on the A3 near Burpham)

This makes a total of 4,993 houses within a 5-mile radius of The Horsleys, not including many smaller sites in nearby villages.

At the moment there are 2808 houses in The Horsleys (EH 1697, WH 1111).

Thus I calculate that the plan represents:

• A 21% increase in housing stock within The Horsleys.
• A 178% increase in housing stock within a 5-mile radius of The Horsleys.

I can find no argument in the document ‘Guildford Borough Economic Strategy 2013-2031 for locating such large numbers of homes in The Horsleys or neighbouring villages. Rather the majority of the Strategic Employment Sites proposed in Policy E1 are over 5 miles away from them.

There are serious shortcomings with, and deficiencies in the infrastructure, of The Horsleys currently as I have stated above under Policies I1, I2 and I3. The housing growth for The Horsleys set out by GBC in the Proposed Local Plan will merely exacerbate this problem.

In addition these policies run contrary to NPPF paragraph 17 which specifically states that planning should be about “empowering local people to shape their surroundings”. As I have said earlier, but it bears repeating, comments on local social media sites and discussions with inhabitants of East Horsley lead me to conclude that Site Policies A35-A41 do not shape the surroundings in the way local people would wish. There seems little doubt that the local populace feel victimised by GBC’s policies when The Horsleys will be required to build, in percentage terms, twice the amount of housing than Guildford urban area.

I OBJECT therefore to Site Policies A35-A41.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICIES A37, A38, A40 & A41, located in West Horsley

These policies propose a total of 405 dwellings from these six sites. The 2011 Census showed West Horsley had 1,124 dwellings at that time. This represents an increase of 36% over the plan period, a very high proportion by any standards.

These four sites all currently lie within the Green Belt. Development on them requires settlement boundary movements. As I have stated in the objection to Policy A39 above, the NPPF is quite clear that every movement in settlement boundaries must be justified by ‘exceptional circumstances’. I do not believe these policies demonstrate any such circumstances and are therefore unjustified and contrary to NPPF rules. If this boundary movements are invalid then these sites remains a part of the Metropolitan Green Belt. Therefore the housing development proposal would be invalid.

I OBJECT to Policies A37, A38, A40 and A41 as they do not demonstrate the exceptional circumstances required to move the settlement boundaries.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site A35: Land at former Wisley airfield, Ockham

I OBJECT to this policy for the following reasons:

• The proposed development site

I believe the development site to be set entirely within the Metropolitan Greenbelt as opposed to the statement on the Wisley Airfield website (http://wisleyairfield.com/) which calls it the “the biggest brownfield site in the Guildford area”. Removal of this site from the Green belt is totally against NPPF rules, regulations and its underlying spirit. The site location at the edge of the M25 circle represents a ‘first line of defence’ against metropolitan encroachment into the Surrey countryside. If this site is developed then it becomes only a question of time before Guildford itself is absorbed into the sprawling London conurbation.

I can see no demonstration of any of the exceptional circumstances necessary to alter greenbelt boundaries. Thus the proposal is inappropriate development in the Green Belt as defined by NPPF paras 88 and 89.

I also believe that:

• The vast majority of the site (70.1 ha) is Grade 3 quality agricultural land. This arable land has been farmed for many years and, I understand, produces over a million loaves of bread a year,

• Currently the site is crossed by a number of Public Rights of Way, both footpaths and bridleways, which are used by local residents.

NPPF para 79 states:
“The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.”

I believe the above bullet points show the proposed development is to be at odds with this.

Therefore I OBJECT to Policy A35 as a breach of the Metropolitan Green Belt rules.

- **Levels of sustainability**

One of the core concepts of planning policy is sustainability. However this site is rated very poorly in terms of its sustainability according to a sustainability appraisal undertaken by GBC’s consultant, AECOM. This is presented in the Local Plan Evidence Base report ‘Sustainability Appraisal (SA) of the Guildford Borough Local Plan’ issued in June 2016.

I understand that in their report AECOM rated Site A35 as the very worst of all of the six larger sites included in their evaluation, (those with proposed housing numbers of 1000 homes or greater), in terms of its sustainability. No less than 8 out of the 21 criteria were graded as ‘Red’ by AECOM for this site, more than any other large site.

Accordingly, I OBJECT to Policy A35 on grounds of its unacceptable sustainability.

- **Impact on local traffic and infrastructure**

The proposed development will have a severe adverse impact on road traffic in the surrounding area including my own village of East Horsley. This will be as a result of the high volume of additional traffic which is likely from the residents of Wisley Airfield accessing East Horsley’s two stations, shops, nearby schools and medical facilities.

I estimate that with 2000 dwellings the additional volume of traffic will be in the order of 3,000 cars. This is a considerable increase but there is no detail I could find on the Wisley Airfield website re improving local roads save for the rather bland statement:

> “We’re also making improvements to local roads to reduce rat running, improve traffic flow and increase safety.

_The proposals also see improvements to local footpaths and bridleways._”

The rural roads in this area are characteristically narrow winding ‘lanes’ – a term used in a recent local public meeting by John Furey, senior SCC councillor for Infrastructure to describe East Horsley’s through roads. Many of these ‘lanes’ are without pavements for large stretches. Further the main through-roads of Ockham Road North, Ockham Road South and Forest Road pass along poorly lit residential areas so narrow that large vehicles such as buses cannot pass each other in certain sections of these ‘lanes’. Indeed each of these roads has pinch points where one can only just fit two cars abreast, let alone two large vehicles

There are many schoolchildren who both cycle and walk along these through roads on their way to local schools. Ockham Road North has only a narrow footpath through East Horsley village and Forest Road has no footpath in places. The additional traffic will therefore increase the likelihood of accidents and reduce the safety of their journeys.

The road closures and junction changes which I have seen mentioned previously accompanying this development will only serve to increase traffic volumes through the village centres of East Horsley, Cobham and Ripley, and around the station at Effingham Junction, all of which already suffer from traffic congestion at peak times. Also any resultant increase in traffic congestion at the A3-M25 intersection would only exacerbate an existing problem for the highways authority. I understand Highways England have repeatedly expressed serious concerns about this development.

The Wisley Airfield website states that there are 9 mainline stations within 5 miles. The reality, I suggest, will be that the vast majority of inhabitants of this development would in fact travel from Effingham Junction or Horsley stations. Why? Because they are the nearest stations, much quicker to reach than the others, especially at peak times, and it is cheaper and quicker, in terms of overall journey time, to travel from these to London or Guildford (which is where most people would be going) than from elsewhere.
Neither Horsley nor Effingham Junction railway stations currently have any significant spare parking capacity, something I know from personal experience! The suggestion of the developer that large numbers of cyclists from Site A35 will cycle 6 or 7 miles each day along busy roads in order to travel to and from these stations lacks credibility.

Also proposals include plans for buses to run through the site to major local destinations approximately every 10 minutes at peak times. I wonder what these peak times would be. Many commuters to London start early and/or finish late. There is no local taxi service at Effingham Junction station so once again no doubt a car would be used– further increasing traffic volumes.

Other village facilities in East Horsley, such as the medical centre, are also likely to suffer adversely from a substantial increase in users as a result of this proposed development.

Accordingly, I OBJECT to Policy A35 on grounds of its severe impact on local infrastructure

• **Health and Safety Concerns**

The site is located close to the junction of the M25 and A3, one of the busiest road junctions in the country with traffic frequently at a standstill during peak hours. This must affect the air quality in the locality. I have seen figures from the Wisley Action Group website in the past showing the Nitrous Oxide (‘NOx’) levels being above the EU limit of 40 mg/m3. This will doubtless affect residents living at the proposed site. The proposal to build new primary and secondary schools at this location is also contrary to government policy prohibiting the building of schools on sites in areas where there is high NOx.

In addition, I believe residents of the proposed development will rely on cars as their main mode of transport. I estimate this means around an extra 3,000 cars. This will increase the problem of poor air quality.

NPPF para 109 says:

“The planning system should contribute to and enhance the natural and local environment by” ..... 

“... preventing both new and existing development from contributing to or being put at unacceptable risk from, or being adversely affected by unacceptable levels of soil, air, water or noise pollution or land instability”.

I believe that the points I have made above demonstrate that the proposed development runs contrary to the above NPPF paragraph.

Accordingly, I OBJECT to Policy A35 on grounds of its adverse health & safety implications

• **Local Character**

The development is inappropriate in size and type with regard to the surrounding villages. In the 2016 proposed Local Plan, GBC’s very first housing policy, Policy H1, requires that development should: “make the most efficient use of land whilst responding to local character, context and distinctiveness.” However, Policy A35 fails to do this.

The area is essentially rural with many charming picturesque rural villages, such as Ockham, East and West Horsley and Ripley, containing historic, listed or protected buildings. However the proposed development is large in comparison to the local villages. It would create a community of just over 2000 homes. This is much larger than the nearest village, Ockham, which has less than 200 dwellings, and would represent an increase of around ten times the existing housing stock. It would effectively be not far short of the combined housing stock of East and West Horsley.

With respect to Ockham, would this mean the disappearance of a small historic rural village?

Ockham is documented as being in existence as far back as the 11th Century when it was mentioned in the Domesday Book of 1086 as Bocheham. It has a number of historic buildings including All Saints, a Grade 1 listed building which has a nave which is partly 12th century, as are its foundations and other parts dating from the 13th and 15th centuries. Others include Ockham Park, a 17th century country house at one time home of Ada Lovelace the famous mathematician whose work on early computers with Charles Babbage is renowned world-wide, Ockham Mill dating from the Victorian Era and The
Hautbouy built in typical brick and flint Lovelace style. In addition it is the birthplace of William of Ockham, the famous medieval philosopher and inventor of the theory of Occam’s Razor.

The proposed development seems to effectively ‘absorb’ the medieval hamlet of Ockham. I believe that this would cause Ockham to lose its identity and doubtless, in the fullness of time, be forgotten. What a tragedy that a village so rich in our history should be treated thus. This should not be allowed to happen.

The overall housing density of the Wisley Airfield settlement area I have seen calculated at around 49 dwellings per hectare (‘dph’). I understand that this density is effectively an urban density appropriate for a metropolitan location. It is to be achieved in part by building apartment blocks of five stories in height, according to the designs previously presented by the developer. For a setting within the middle of rural Surrey this is completely out of character.

East Horsley, just three miles from this site, is the largest settlement in Guildford borough outside of Guildford town, with some 1,760 homes. East Horsley presently has an overall housing density of 8.1 dph within its settlement area. Therefore, the proposed development under Policy A35 is six times as dense. Other settlements close to this site are small rural villages such as Ockham, West Horsley and Ripley.

I believe the character of this whole area would be irreparably destroyed if this proposed development were to go ahead. The development therefore fails to respond to local context and as such is in breach of GBC’s own Housing Policy H1.

Thus, I OBJECT to Policy A35 on the grounds that it is out of keeping with local character, context and distinctiveness, and therefore breaches the NPPF and emerging GBC Policy H1.

- **Historic environment**

This is covered in some detail in Policy D3 of the GBC proposed plan. In particular it says:

“Heritage assets are an irreplaceable resource and works which would cause harm to the significance of a heritage asset, whether designated or non-designated, or its setting, will not be permitted without a clear justification to show that the public benefits of the proposal considerably outweigh any harm to the significance or special interest of the heritage asset in question.”

The Horsleys, Ockham and Ripley all contain a wide range of heritage assets which make an important contribution to the look and feel of the villages, their character and the environment surrounding them. I have given an example for Ockham village under Local Character above. However it is true also of the other villages I mention.

Thus, I OBJECT to Policy A35 on the grounds that it fails to meet the criteria set out in Policy D3, Historic Environment.

- **Environmental Objections**

The site is immediately adjacent to the Site of Special Scientific Interest (SSSI) at Ockham and Wisley Commons. Much of the development site is within 400m of the Thames Basin Heath Special Protection Area (SPA). Land within 400m of the SPA is designated as an ‘Exclusion Zone’ where “there will be a presumption against additional new dwellings”.

The remainder of the site falls within the 400m - 5km ‘Zone of Influence’ set out under the SPA policy, which requires developers to contribute a new Site of Alternative Natural Greenspace (‘SANG’) to mitigate for potential damage caused to the SPA from new development. I cannot understand how any proposal for a SANG can possibly mitigate the potential damage caused to the natural habitats of the bats, ground nesting birds, invertebrates, reptiles and flora and fauna by these additional residents and their pets. Furthermore I am concerned about the impact of the development’s residents, whom I estimate them to number in excess of 5,000, on the Thames Basin Heaths SPA, even with the 400m exclusion zone in place.

It is, I believe, generally acknowledged that “concreting over the countryside” increases the likelihood of flooding as rainwater can no longer drain away naturally into the earth. Indeed there was an article in The Mail Online dated 26th March 2015 stating that 19 scientists, from prestigious universities and institutes in Britain, the US, Japan, Australia and across Europe, claim over-development is making flooding much worse.
Given the size of the planned development this alone should give cause for concern. However there is a further point which adds to this concern. The development is very close to, and slopes down towards, Ockham Road North (ORN) where it is prone to flooding, close to where it meets the A3 roundabout. Local residents I am sure still remember the floods during the winter of 2013/2014 when ORN was impassable for a lengthy period.

In addition, development of this scale would, in my opinion, increase light and noise pollution in its vicinity. This would affect both current local residents and existing wildlife.

Accordingly, I OBJECT to Policy A35 on grounds of its adverse environmental impact.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**POLICY A36: Hotel, Guildford Road**

The subject of this policy, The Thatcher’s Hotel, is an iconic landmark; a long-standing Tudor style village hotel set at the eastern entrance to East Horsley village.

Policy D3: Historic Environment of the draft plan states that

“*Guildford borough’s historic environment is intrinsically part of what makes Guildford the place it is, that it acknowledges the wider social, cultural, economic and environmental benefits that conservation can bring to our community and that it will conserve and enhance the historic environment in a manner appropriate to its significance.*”

It further states that:

“*Heritage assets are an irreplaceable resource and works which would cause harm to the significance of a heritage asset, whether designated or non-designated, or its setting, will not be permitted without a clear justification to show that the public benefits of the proposal considerably outweigh any harm to the significance or special interest of the heritage asset in question.*”

I OBJECT to this policy as I believe that The Thatcher Hotel is part of this historic environment and that this policy runs contrary to Policy D3.

Furthermore Policy E6: The leisure and visitor experience. States:

“The loss of existing visitor, leisure and cultural attractions, including arts and entertainment facilities, hotels and indoor sports venues, will be strongly resisted unless replacement facilities of an equivalent or better standard and provision are proposed in a location equally accessible to the facility’s current catchment area.”

I believe that The Thatcher Hotel is such an existing visitor attraction. Not only does it cater for visitors by providing accommodation and restaurant facilities but attracts visitors by virtue of providing rooms for receptions, parties and so forth.
Therefore I OBJECT to this policy as it runs contrary to Policy E6.

My final concern is over the number of houses proposed for this site - approximately 48. This number gives a gross housing density of 37 dph. The average dph in East Horsley is 8.1 dph. According to the local parish council the highest density found in any of the roads around this location is 13 dwellings per hectare.

The proposed dph is therefore approximately 9 times the average in the village, which makes it exceptionally high for this location.

Thus, I OBJECT to Policy A36 on the grounds that it is out of keeping with local character, context and distinctiveness, and therefore breaches the NPPF and emerging GBC Policy H1.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A39: Land behind Ockham Road North, near Horsley railway station

My objection follows on from my comments above in the section “Policy P2: Green Belt, b) Paragraph 4.3.16 and Proposals Map: Settlement Boundary changes in East Horsley”.

Policy A39 proposes a housing development of 100 dwellings on a 5.7 acre green-field Green Belt site behind the houses on the western side of Ockham Road North. This is dependent upon the proposed western movement of the settlement boundary needed to bring this site within the settlement area.

The NPPF is quite clear that every movement in settlement boundaries must be justified by ‘exceptional circumstances’. I do not believe this policy demonstrates any such circumstances and is therefore unjustified and contrary to NPPF rules. If this boundary movement is invalid then this site remains a part of the Metropolitan Green Belt. Therefore the housing development proposal would be invalid.

I OBJECT to Policy A39 as it fails to demonstrate the exceptional circumstances required to move the settlement boundary.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policies I1, I2 and I3

There are serious deficiencies and shortcomings in the infrastructure of East and West Horsley as it is today. Barely a day goes past without a complaint being made on social media about it – be it schools, roads, medical facilities and so on, The aggressive housing policy as proposed by GBC in the proposed Local Plan (see my comments on Policy S1 above) can only exacerbate this problem.

I would make the following comments specifically about infrastructure in The Horsleys today:

- Roads across the parishes are in poor condition with many potholes.
- The principal through roads are narrow and winding and have a series of pinch points where it is difficult for vehicles to pass one another. As a senior SCC councillor remarked at a recent public meeting in the village hall: "East Horsley has lanes, not roads."
- These ‘lanes’ are totally unsuitable for high volumes of traffic. They struggle to cope with current levels of traffic at times, particularly the increasing numbers of large vehicles such as HGVs using them.
- They are used by schoolchildren to walk or cycle to school. Increases in traffic volumes without improvements in infrastructure must increase the risk of accidents to them.
- The pavements are in poor condition. As well as being narrow, they are often uneven and/or cracked making it difficult, for example, for people with pushchairs or prams or in wheelchairs;
- There are also sections with no or narrow pavements and which are poorly lit.
- Many of the drains are blocked or otherwise in poor condition giving rise to frequent surface water flooding when it rains.
- There are insufficient school spaces for the number of local children needing them, with the result that children are often allocated to schools a significant distance away such as Dorking or Woking; and
- The Medical Centre in East Horsley is already at capacity in terms of its number of patients.

In respect of East Horsley, I believe there are only two specific proposals in Appendix C:

LRN 25 - East Horsley and West Horsley traffic management and environmental improvement scheme. The proposal is unclear to me. It says that funding will, at least in part, come from developer contribution. Funding is needed now to sort out the existing problems I have mentioned previously - not from some unspecified source at an unspecified future date.

HSC 5 - Expansion of East Horsley Medical Centre to provide additional capacity and services for future population in years 5 – 15 of the plan. As stated above it is already at capacity and, with an ageing population, this problem will not decrease. Such expansion is therefore needed now!

Local primary schooling is also a very pressing issue which I know East Horsley Parish Council has raised with you in its objections. East and West Horsley are currently served by a single primary school - The Raleigh in West Horsley – which has no spare capacity as far as I am aware. The 11 housing development sites identified in the LAA for East and West Horsley would result in 593 new houses in the two parishes. Planning guidance suggest that to accommodate the children from these new homes around 150 additional primary school places will be required. No proposals are made in the Proposed Submission Local Plan to provide for any more schooling in The Horsleys.

The proposed developments in The Horsleys and Wisley will put further strain on the existing infrastructure, increasing traffic, patient numbers, requirement for school places and so forth. Thus existing problems will be exacerbated. There are no proposals to solve these or at least to improve the situation.

I OBJECT to the infrastructure proposals as I believe that the failure to address the current inadequacies of the existing infrastructure is a serious shortcoming in the Proposed Submission Local Plan.
Also I OBJECT to the proposals for infrastructure in that they do not meet the stated objective of providing infrastructure to support the proposed developments set out in the Site Policies.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY P2: Green Belt**

I OBJECT to this policy.

Local Plan Policy P2 states that GBC “will continue to protect the Metropolitan Green Belt”.

NPPF rules permit authorities to make allowance for factors which may constrain the delivery of new housing. This would include protecting the Metropolitan Green Belt and the Surrey Hills Area of Outstanding Natural Beauty (‘AONB’). Although these areas make up a large proportion of the land area of Guildford Borough, I cannot find GBC’s attempt to reduce its housing target in order to take account of such constraints stated anywhere.

Thus, GBC appears to ignore its own Policy P2 through the housing policies that it has set out in the Local Plan. The analysis included in the Appendix seems to show that around 65% of the developments proposed in the Proposed Submission Local Plan are to be built on land currently within the Metropolitan Green Belt. This is surely at odds with its stated policy of protection of the Green Belt.

Furthermore, I believe that GBC has incorrectly interpreted para 83 to 87 of NPPF. Para 83 clearly states green belt boundaries should be altered only "in exceptional circumstances". Ministerial Guidance on the Green Belt (reference Brandon Lewis MP and Nick Bowls MP 17/1/14 and 18/6/14 respectively) show unmet housing need alone is not likely to qualify as exceptional circumstances.

In addition, Sir Eric Pickles when Secretary of State for Communities and Local Government drew attention to the NPPF which states that the Green Belt may be altered ‘…only in exceptional circumstances…’. Sir Paul Beresford, MP for Mole Valley constituency, also commented that “we see in the NPPF that Green Belt protection is specifically cited as a consideration which would override the need to meet housing targets. This is a clear statement of government policy.”

Thus I OBJECT to this policy as I believe that this policy is inconsistent with itself and runs counter to the NPPF guidelines.

I would also like to add a quote from the Campaign to Protect Rural England (CPRE) which says (my underlining):

“Altogether the new plan proposes to build some 7,000 houses on land that is currently Green Belt. This includes a so-called ‘urban extension’ at Blackwell Farm on the Hogs Back (pictured) and two thousand houses at Wisley – this despite the Council’s own planning officers recommending refusal of permission for development at Wisley. The proposed loss of such a huge area of Green Belt in the borough is completely unjustified, especially when local opinion is so strongly against giving up any Green Belt land for development. It appears that the Council is treating both the countryside and the local community with contempt.”
I think the strength of feeling by local people can be gauged from the thousands of letters sent protesting about the previous draft plan and the various past and ongoing campaigns being waged by locals against these GBC initiatives.

In addition I OBJECT to the following paragraphs within this policy.

**a) Paragraph 4.3.13: Proposal to inset East Horsley from the Green Belt**

East Horsley is a rural village. Its Green Belt status has been a key factor in preserving its character. Policy P2 proposes that East Horsley should be inset from the Green Belt, instead of being ‘washed over’ as it is today.

Its current status, i.e. ‘washed over’ by the Green Belt, has not been a serious constraint to development within the village. For example, GBC’s planning records indicate that no less than 149 net new homes were added to the village housing stock through in-filling and brownfield developments between 2000 and 2015.

GBC attributes in paragraph 4.3.12 the need to inset East Horsley to NPPF requirements as follows:

> “the national planning policy states that only those villages whose open character makes an important contribution to the openness of the Green Belt should be included in the Green Belt. “.

Anyone bothering to walk around East Horsley would recognise that it does so.

If I may quote some figures from our local parish council; “No less than 36% of East Horsley is composed of woodlands, whilst inside the settlement area there is an average housing density of just 8.1 dwellings per hectare (‘dph’). Woodlands and large residential gardens make a vital contribution towards biodiversity, provide wildlife corridors, and furnish those open spaces which are vital to the character of the greenbelt. It is one thing for a planner to study a map and see a settlement area filled with housing, but it is quite another actually to come to a rural village like East Horsley and see how the Green Belt has preserved the rural character and openness of this village.”

I have already commented above on what I believe to be GBC’s misinterpretation of the NPPF. In addition NPPF paragraph 17 specifically states as part of its 12 principles that planning should be about “empowering local people to shape their surroundings”. Comments on local social media sites and discussions with inhabitants of East Horsley lead me to conclude that this policy does not shape the surroundings in the way local people would wish. This argument is augmented by the number of responses received by GBC regarding the former iteration of the draft local plan. I believe this was around 20,000 most of which were opposed to it.

I can see no facts or arguments within P2 to support GBC’s argument to inset East Horsley from the Green Belt. Nor do I believe it meets NPPF para 17.

I OBJECT therefore to this policy.

**b) Paragraph 4.3.16 and Proposals Map: Settlement Boundary changes in East Horsley**

GBC proposes to make a number of changes to the settlement boundaries of East Horsley and so expand the settlement area.

The NPPF is clear that every movement in settlement boundaries must be justified by ‘exceptional circumstances’.

GBC states in this paragraph that such “exceptional circumstances exist to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of development”. GBC justifies the need to make such changes in settlement boundaries in order to meet unfulfilled housing need in the borough in the Green Belt & Countryside Study and its accompanying Topic Paper.

However, Green Belt rules make it clear that unfulfilled housing need is not normally considered to be ‘an exceptional circumstance’. If it were the entire Green Belt would disappear.

Therefore I OBJECT therefore to this policy.
c) Paragraph 4.3.17: Proposal to remove Wisley Airfield from the Green Belt

I OBJECT to the proposal to remove Wisley Airfield from the Green Belt and to the planned development of in excess of 2000 dwelling thereon. The only justification for this proposed change appears to be unfulfilled housing need which is not considered an exceptional circumstance.

This proposal runs counter to the wishes of local people and also to the Council’s own planning officers’ recommendation. Indeed GBC’s Planning Officer, in assessing a previous planning application from the developer of this site, rejected their application, arguing that:

*It has not been demonstrated that the benefits of the proposal amount to very special circumstances such as to clearly outweigh the harm to the Green Belt and the other harm identified.*

Furthermore this development would be little short of catastrophic for the local villages, including East and West Horsley, Ripley and Ockham.

I have commented further on this matter under Site A35 below.

Conclusion

Policy P2 of the GBC Draft Local Plan states that “We will continue to protect the Metropolitan Green Belt.”

It seems to me that in West and East Horsley and surrounding villages the GBC draft Local Plan is doing exactly the opposite. Given the scale of the developments proposed, the effect on the infrastructure (with its current deficiencies and shortcomings) and lack of specified commitment to improve matters the villages will suffer very badly from the increased volumes of inhabitants and traffic to the extent that their existing village character will be lost.

And that of course runs contrary to Policy D1: Making Better Places when considered in its widest context, which is my final objection.

I would appreciate confirmation of the receipt of this email.

Having carefully considered the Proposed Submission Local Plan which Guildford Borough Council ("GBC") has now published for public consultation my comments are set out in this below in this email.

**Policy S2: Borough Wide Strategy**

I OBJECT to this policy as I believe the figures used to calculate GBC’s annual housing target are incorrect.

The policy is based upon a projected net increase of 25% in the housing stock of Guildford Borough over the period 2013-2033. This is equivalent to adding 693 new homes per annum or 13,860 new homes over the period of the proposed Local Plan.

The ONS on the other hand projects a 15% increase in population over the same period.

In addition the West Surrey Strategic Housing Market Assessment, ("SHMA"), which looks at how the annual housing target of 693 homes is comprised, estimates that 517 homes per annum arise from ‘the demographic starting point’. This is effectively what the Office of National Statistics (ONS) and the Department of Communities and Local Government ("DCLG") are predicting GBC will require based upon their population and household forecasts. It would appear from the SHMA that there is some “double counting”. For example, the SHMA has added another:

- 120 homes per annum in order to ‘support economic growth’
- 31 homes per annum to ‘improve affordability’ and
- 25 homes per annum due to ‘student growth’

This increases the original per annum figure of 517 new homes by 176 to reach the 693 annual housing target.

I find this strange as:

- Surely economic growth is already factored into the statistics produced by ONS and DCLG.
- The GBC Affordable Housing Policy H2 proposes that all development sites (other than the very smallest) must have 40% of their homes offered as affordable housing. Thus these would already be included in the 517 homes proposed.

It appears therefore that what GBC is proposing is actually above the official household growth forecasts for the borough.

In addition, the decision of the UK to leave the EU has seen the government and Bank of England forecast that economic growth will be reduced. This further brings into question the number of homes added to the ONS/DCLG figures.

The National Planning Policy Framework (NPPF), paragraph 158, requires GBC to base its development plan policies on up-to-date and relevant evidence. I believe it can be seen from the above that this is not the case.

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the above policy because of the increase in the number of houses intended for this site. Rather than listen to the hundreds of objections put to you last year that the number was too many, you have chosen to increase the number to 60. This shows you are really not listening. Increased traffic at the crossroads with the A247, particularly at busy times when children are walking alone or being walked to and from the local schools will make for a dangerous situation. Parking is already busy round that junction and additional traffic will create a gratuitous situation for accidents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to object to plans in the above policy because again you have not listened to the hundreds of objections put to you last year, and you have increased the number of houses and included six sites for travelling showpeople. You have shown no evidence of the need for these sites on a beautiful Green Belt location and where you are required to show exceptional circumstances. This is gross overdevelopment of our village with an excessive number of homes for a village. There is beautiful ancient woodland at the site which has been there since the time of Elizabeth 1 and will join up Ripley and Send thereby defeating the purpose of the Green Belt. An additional 400 houses will cripple the roads around Ripley and Send and contaminate surrounding homes with noxious fumes from congested traffic. I am informed that there is lead shot accumulated over 50 years at the site which, as a parent, I would not want my children to live with.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the above policy for the following reasons:

It was deleted from the 2014 draft because of all the objections but now you have chosen not only to reintroduce it but to change the stated maximum square footage to minimum: another example showing you neither listen nor care about local objection. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have vacant sites and industrial units, particularly in view of the fact that there is a decreasing demand for industrial land.

The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt. Heavy traffic associated with industrial development will again contaminate yet further the already bad air from the A3.

I object to the proposal to inset Send Business Park from the Green Belt because it is effectively an old non-conforming user in an area of outstanding countryside, adjacent to the beautiful Wey Navigation. There is highly restricted vehicular access along Tannery Lane in both directions and further expansion of development at this location detracts from the openness of the Green Belt and is inappropriate.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY 2 paragraph 4.3.15 to inset Send Business Park from the Green Belt: because Tannery Lane is totally unsuitable for a large increase in traffic being a single track road and the area is an outstanding countryside amenity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp173/91  Respondent: 10817697 / J E Kettle  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Housing in East Horsley- GBC has proposed new settlement boundaries for East Horsley as well as a new "Identified boundary of the village", and provide no justification for these changes. Furthermore GBC proposes to build 100 houses on Ockham Road North which is in Green Belt, with no justification for this proposal.

I object to the proposed Housing plan for Ockham Road North

The proposed submission by GBC is undemocratic, unjustified, and lacks any credibility as a Plan for the future of the Borough.

I object most strongly to the GBC local Plan Submission

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I firmly reject the Local Plan, detailed above for the following reasons.

This is green belt land and I suggest you concentrate on re-using brown field sites in the area, such as the whole of the Wisley airfield site.

The road of Send Hill is far too narrow and is congested to the point of being impassable during school morning and afternoon traffic periods and is already a “no go” area to the existing residents during those times.

Why does the Council persist in these anti-social lines of thought when obvious brown field sites should be used more readily and legally, without affecting the existing long suffering public.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A28

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
• Correct title of Policy A28 to say *Ash Green*, and not *Ash*.

• Policies A27, A28 and A29 collectively increase Ash Green village by 50%. Opportunity exists under Policy A28 to provide a village/community hall and recreational area which would provide Ash Green with much needed community and social space.

Opportunities (1) Should read: “To create a centre for the village by including a village hall with associated recreational space providing much needed facilities for the Ash Green community. A mix of homes (C3) and accommodation for older people (C2) could be appropriate for this site.”

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

• Correct title of Policy A28 to say Ash Green, and not Ash.

Opportunities (1) Should read: “To create a centre for the village by including a village hall with associated recreational space providing much needed facilities for the Ash Green community. A mix of homes (C3) and accommodation for older people (C2) could be appropriate for this site.”

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence.

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

“*Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.*”

2331
• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

1. a) The Street in Tongham
2. b) A331/A323 intersection
3. c) A31/White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

DRAFT LOCAL PLAN SITES A42, A43, A44 – PLEASE PASS LETTER TO INSPECTOR

I object as a Send resident to the number of new house builds being proposed in Send, Send Marsh and Burnt Common. 485 is excessive. 20,000 comments from the first local plan in 2014 resulted in the number of 431 being reduced down to 185. 485 houses could mean 1940 people and 970 cars. Plus I object to our elected Council allowing and passing A43 for the 400 homes so late on in the proceeding when no one else had chance to view it. The doctors and school here will not cope Send is already getting new house building on the Vision/Engineering site.

Answer (if comment is on questions 1-7 of the questionnaire): ()
DRAFT LOCAL PLAN SITES A42, A43, A44- PLEASE PASS LETTER TO INSPECTOR

I object as a Send resident to the above proposals.

1. The number of new house builds being proposed in Send, Send Marsh and Burnt Common. 485 is excessive and not necessary. 485 houses could mean 1940 people and 970 cars. The infrastructure will not be able to cope. There are already new houses to be built on the Vision Engineering site.

2. I object to the 7000 sq m of warehousing being included in A43. Burnt Common already has warehouse facilities further down the road not near housing.

3. I object to the amount of extra traffic and pollution these proposals will bring to an already Busy area. The permission for the Marina is soon to test this further.

4. I object to the proposal of Send being removed from the Green Belt. Our Green Belt is an area separating us from Guildford and Woking, plus a safe haven for wildlife. There are many ancient trees around this area, especially in the A43 proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the amount of extra traffic and pollution these proposals will bring. It currently takes me 3 minutes at 8.45am to exit from Boughton Hall Ave, cross the carriageway and join the Portsmouth Road to join Send Barnes Lane going into Woking. I then queue all the way down the hill into Send. At night I have the same long journey. Any problems on the A3 send traffic along the Portsmouth Road too. The volume is already set to rise, regardless of many objections following the Council's permission for the building of Send Marina.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I object to Policy A58 Land at Burnt Common, London Road. See below

Our villages of Send, Send Marsh, Burnt Common & Ripley are green sites in residential areas not industrial sites with attached villages. This is not the right area to create an industrial estate full of warehouses and industrial units. Along with workers, litter and pollution. We do not want big articulated lorries thundering past day and night. Furthermore, I am troubled to see the new policy is advocating a ‘minimum’ amount of land which can increase if required. When the idea of an industrial estate in our villages was first suggested on paper in the 2014 draft the word ‘maximum’ was incorporated though thankfully as a plan it was withdrawn from the draft due to the number of objections. Note also the 2017 Employment Land Need Assessment which has shown a reduction in the demand for industrial land. Our villages should not be subjected to an open ended policy on the final number. So why bring it back.

The area as a whole struggles daily with traffic gridlock. With the added chaos of all A3 problems making all our local roads a natural detour. Pollution rates will rise increasing health risks to all the people in the vicinity.

Keep the area green.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)
I object to the plans for which the evidence base appears to have been massaged in order to indicate a robustness which is not there. The figures for the number of houses required are unnecessarily high especially when the so called evidence is being used to support building on green belt land. It begs the question what green belt means to the Council when there appears to be an enthusiasm for building a case to support this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/67  Respondent: 10818241 / Vanessa Birchall-Scott  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

I object to the plans as, in addition to questionable evidence base it appears that the significance of the changes proposed has not been appropriately reflected in the process being followed. Full consultation should be followed as and not some kind of short cut process

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In December 2011 I moved from the urban sprawl of Greater London (Isleworth) to Glaziers lane Normandy. Normandy was advertised as a popular rural village situated within the Green Belt and Surrey Hills. Perfect for retirement, then the GBC published the proposed 2014 plan, which was dropped for various reasons. Two years later the council has now a new plan for 2016. I would like to express some concerns and objections with reference to site 368....

1/ EROSION OF THE GREEN BELT.

Agricultural land being used for 1100 homes, secondary and primary schools, travelling showpeople pitches with yards and also a nursing home.
This would lead to a 100% increase in the number of homes in Normandy.
The very nature of the area would be changed from green fields, woodlands with wild life, pasture and arable farmland into suburbia. Perhaps to be renamed Greater Guildford?

2/TRAFFIC CHAOS.

The proposed site is bounded by Westwood and Glaziers Lanes. These are classified as C and D roads respectively. I will concentrate on Glaziers Lane, although I understand the same problems are in evidence on Westward lane. In the 4 years of living here the amount and type of traffic has increased(few adhering to the 30mph speedlimit)

The road is in poor repair with the constant use of heavy duty trucks and double length transporters etc.
The lane has a single footpath just wide enough for 2 people to cross without going into the traffic.
The footpath on the approach to the railway bridge at Wanborough with the combination of traffic and the angle of the path makes it very dangerous to use.
There would be another increase in traffic from the number of proposed houses and schools with the daily drop offs and pick ups.

3/PUBLIC TRANSPORT.
At present there are 2 bus routes operating, one at the end of each lane from Guildford to Aldershot (Kite).
The other (520) operated 3 times a day Monday to Friday again from Guildford to Aldershot but this route incorporates both Glaziers and Westwood lanes.
The railway line from Wanborough is a twice hourly service from Guildford to Ascot.
By intimation, in the plan, the council is expecting the public transport options to be used instead of cars.
Does the council have input into the running of Southwest trains and bus services to the extent of frequency and fare levels to attract new residents/users?

4/SCHOOLS.
What evidence is there for the need of both types of school to be situated within this area.
The current schools are either expanding or are undersubscribed the only justification would be if the 1100 houses were to be built.
The present residents already send their children to existing schools.
In conclusion I would remind all concerned of election promises made with regard to protecting the green belt because once its gone its gone forever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPP16/3761  Respondent:  10818337 / Jim Hartley  Agent: 

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

To this end I believe that the unsatisfied demand for housing first needs to be established to be a genuine local demand for people who are either born in the locality, need to live in the locality as a consequence of their local employment or are existing residents needing to up or down size. Under current Planning Consent too many local homes have been demolished, enlarged or extended to maximise developer’s profit with an associated loss of affordable smaller dwellings. These larger houses are then often occupied by families taking advantage of the high prices obtained for inner city property and moving out to enjoy the quality of life provided by living in the Green Belt. This latter demand is not local and should not be satisfied by new developments on the Green Belt but by normal availability of existing housing stock. The Plan contains some questionable forecasts for future housing demand but no creditable proposals as to how this might be measured in reality given the timescales involved and possible changes in demographics and/or the economic climate.
Prior to any new development it’s impact on the currently overstretched road network, schools, medical services, transport and other infrastructure services needs to be properly assessed and then satisfied in advance or at least as an integral part of the Planning Approval. Your Plan relies on the future introduction of an Infrastructure Levy to be raised against all developments based on the scale of development involved. The proceeds of this levy would be used by the local authority to either fully fund or subsidise improvements to facilities and infrastructure. The Plan contains no detailed methodology by which this would be achieved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Neither should development be in a scatter-gun fashion with simultaneous developments across multiple sites by several developers. Developments should be approved on an individual site-by-site basis phased to meet demand as it is established. Simultaneous development across multiple sites would create an open property market which encourages occupation by people moving into the Green Belt to live and commuting outside the area. Again your Plan contains no detail on the methodology by which individual sites would be released to developers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

In conclusion my objection to the current Local Plan is not based on what it does contain, debatable as that may be, but on what it evidently omits. This Plan is basically a consultancy report which defines a theoretical future demand and one possible means of satisfying this demand. It is devoid of any alternative solutions or any detailed strategy or policies by which future demand may be measured. Even if demand can be quantified it relies very heavily on the vagaries of the current Planning Consent process to provide any level of monitoring or control during the implementation stage. As such it is an incomplete Plan. The availability of suitable housing in the right quantity whilst protecting the Green Belt is too important an issue to be approved on the basis of this Plan. I recommend the Plan be withdraw and that Guildford Borough Council be tasked with expending as much energy and effort on producing detailed proposals for the measurement and management of future developments as they have previously spent on calculating and justifying the demand.

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As someone who was born in Guildford, gone to school in Guildford and lived in Clandon for a large part of my life, I remain hugely uncomfortable with the proposed development plan for Wisley Airfield and Garlick’s Arch. This is not small local in-fill development for the benefit of local business it is unwarranted development of a substantial rural area which if allowed will infringe on other areas merging villages and roads in a manner more consistent with London than Surrey.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Furthermore, I fundamentally object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The site is not appropriate because:
• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding
• It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a) with North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. E.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved. As someone who can remember as a child hearing nightingales in Clandon which is now replaced by the distant and constant rumble cars this new slip road will blight the area indefinitely and lead to irreparable damage.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I also appalled at the deterioration in local roads over the last 5-7 years along with the congestion that already exists which will only decline further with the lack of road infrastructure (Policy I1). There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that. The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous and unsustainable traffic.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The green belt in Surrey has supported the quality of life of people throughout Surrey and protected the over development of areas which might otherwise by now become part of London. I fundamentally object to not protecting the Green Belt (Policy P2) and specifically to removing Ripley, Send and Clandon, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Local Plan as the development proposed is not sustainable (Policy S1) given it will damage local communities by over development, especially Ripley, Send and Clandon, with no benefit for local communities. Furthermore, there are no new railway stations or bus services proposed effectively meaning, so almost every adult will have to have a car. The Plan has nothing to improve the infrastructure for Garlick’s Arch.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Borough Wide Strategy (Policy S2) for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey, highlighting how singularly out of touch the proposers of this policy are with the local community. The Plan is unbalanced across the borough; there’s too much development in the north east of the borough (Wisley [A35], Ripley/Send [A43] and Clandon [A25]). 36% of all the Plan’s new housing is proposed in this area, which has only 11% of the existing housing. The 5,036 houses proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **I object to removal of Brownfield sites (A4) from the Plan**

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

**I object to the extended development in the Green Belt (Policy P2, Site A43)**

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

**I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch**

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

**I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch**

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1705  Respondent: 10818529 / John Hales  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A50

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The Plan is self-inconsistent in respect of traveller sites.

A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots ...” Clearly A50 more than covers the total “need” of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1709  Respondent: 10818529 / John Hales  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. I object the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value.”

The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses]. That has now been removed, thereby accepting that needing to make greater than normal profit IS to be an acceptable reason not to deliver affordable homes. This is a shocking sop to the developers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I moved to Send in 2015 - always desirous to live in a small friendly environment, having lived in large towns and cities most of my life. At the rate GBC plans to implement the building of thousands of new houses - WILL THERE BE ANY VILLAGES LEFT IN THE UK IN 20 YEARS TIME for my children and grand children to enjoy??

I STRONGLY OBJECT to the imminent erosion of OUR GREEN BELT land in order to build houses which are not required in such numbers (693 pa??)

A village has LANES not wide roads and the increase in traffic which all these new houses will bring (presumably two cars per household, minimum) will mean chaos in the mornings and evenings particularly - we have a junior school on the main 'road' in Send!!!!

GBC has not listened to the objections previously submitted in 2015, they undemocratically plough on with ludicrous ideas for areas which they know nothing about (HOW MANY COUNCILLORS ACTUALLY VISIT THE AREAS THEY WANT TO BUILD ON?)

THE CONSERVATIVE GOVERNMENT promised that GREEN BELT land would be PROTECTED - was that a lie?

In conclusion please address the question - Is this the way to preserve quality of life? It's not all about money surely?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I consider the assessments made in the local plan are deeply flawed in respect of infrastructure.

Drains and sewage

Residents of the Horsleys are aware of the situation with flooding and drainage in the local area. The current sewage system and drains is always overwhelmed by heavy showers of rain and the drains frequently block. Before there can be any extra demand placed on these systems there would have to be a redesign of the entire system. It would require substantial reconstruction prior to any extra housing.

Roads

The Villages have mostly B roads which are unable to sustain all of the extra traffic. The roads are narrow and full of pot holes. There are crossings not suitable for large traffic volume throughout the villages. Large numbers of cyclists use the roads for training, especially at weekends. It is not possible to overtake safely on large stretches if the roads. Any increase in traffic of the volume suggested would result in gridlock and a big increase in traffic accidents.

Shops/doctors/dentists

they are insufficient to deal with all the extra people.
Before any new homes can be built the infrastructure has to be massively upgraded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/684  Respondent: 10819009 / Sheila Griffin  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Shalford (south)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to strongly object to the latest version of the Local Plan in which GBC is proposing to move the green belt boundary to exclude the fields behind Shalford Village Hall. These fields must be kept outside the village settlement boundary in order to exclude housing development in a totally unsuitable area.

The proposed access to the land is via Chinthurst Lane which is a narrow country lane. This is already heavily congested and dangerous to drive along.

The elevation of the land, at 32 feet above King's Road, is the highest in the area and any development would tower over the village and community activities.

Over 700 residents signed a petition objecting to the proposed settlement boundary change last year.

I hope that the views of the local residents will ensure that this latest plan does not go ahead.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford does not have the infrastructure to cope with large scale housing. It already has severe traffic problems and pollution, a shortage of school places, and pressure on GP surgeries and the RSCH resulting in long waiting times.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12226  Respondent: 10819009 / Sheila Griffin  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In addition I object to any green belt land and areas of outstanding beauty being used for housing. Brownfield sites should be used for this purpose instead of building shops and offices. We have enough shops and business premises in Guildford. Your council should force the University of Surrey to fulfil its obligation to build adequate accomodation for students and staff at Manor Park. They have planning permission for this. This would free up a large number of houses for local people who are trying to buy or rent accomodation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/3249  Respondent: 10819041 / Lesley Stedman  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object to the proposal in the local plan on the grounds that the site is not large enough for the proposed use.
- I object to the proposal in the local plan on the grounds that it would cause adverse impact on street parking.
- I object to the proposal in the local plan on the grounds that Send Hill is a single track country road and too narrow to provide sufficient access to the site or accommodate the potential new levels of traffic the proposed development would bring.
- I object to the proposal in the local plan on the grounds that Send is in green belt. The proposed inset is inappropriate due to its permanent green belt status.
- I object to the proposal in the local plan on the grounds that Send Hill is a narrow road result in loss of a turning point for vehicles.
- I object to the proposal in the local plan on the grounds that it would impact the nature reserve nearby. The proposed site is a quality green belt amenity area within countryside and would be spoilt by development.
- I object to the proposal in the local plan on the grounds that the existing road and parking infrastructure is already inadequate or under pressure and could worsen with the planned development, reducing quality of life.
- I object to the proposal in the local plan on the grounds that too many houses are proposed to Send/ Send Marsh are and the impact on traffic congestion and local services would be unacceptable.
- I object to the proposal in the local plan on the grounds that the proposed number of houses potentially could result in 92 extra cars in Send Hill which is already suffering from congestion particularly at school run time.
- I object to the proposal in the local plan on the grounds that this would cause loss of village identity, be detrimental to the community and increased flood risk.
- I object to the proposal in the local plan on the grounds that a Wasteland Solutions environmental report on Send Hill dated March 2004 gave evidence of past ponding of water in the excavated area. Further development would disturb water table and increase risk of flooding to my property.
- I object to the proposal in the local plan on the grounds that the proposed development site (A44) was used as GBC registered landfill site, not a quarry as listed as reference LLA 2081 in the local plan.

- I object to the proposal in the local plan on the grounds that the proposed development site (A44) was used as GBC registered landfill site, not a quarry as listed as reference LLA 2081 in the local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• The housing demand assumptions are flawed given possible indigenous population growth and future migration within and beyond Europe and therefore do not require a massive increase in housing density in this area.

• The planning process seems overly complicated such that many hard working people will I imagine not have the time to fully engage with it.

It really troubles that at the proposed rate of development in the South East there will be little/no green built land left between Horsley and Surbiton by 2050 and it will be one continuous urban sprawl. The local authorities should take a much more cautious and prudent rate of development mindful that the demographic forecasts are probably wrong. Given the scope and scale of this ‘new plan’ which seems remarkably similar to what was previously proposed it seems to me my Local Authority are determined to rail road this through come what may!

I remain seriously concerned about this process and the scope and scale of the plan for the East Horsley area. I would therefore urge the Planning Department once again to re-consider this ‘new plan’ and propose something more appropriate. What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/224 Respondent: 10819297 / Phil Haymes Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As an East Horsley resident I am writing to formerly object to the proposed new Local Plan which seems to have ignored my previous submission, specifically:

• The loss of the Green Belt in the East Horsley area due to propose new housing developments for >500 new houses (noted below) would significantly change the character of the village and further shrink the Green Belt, will radically change what is supposed to be a ‘conservation area’ and it will inevitably lead to further urbanisation in years to come and a have serious impact on life in our villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/225 Respondent: 10819297 / Phil Haymes Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The scale of the development is disproportionate to the current number of dwellings (77% increase!) and given the proposed massive development at Wisley Airfield a short distance away I believe this will place an unreasonable burden on the Horsley’s for which current stressed infrastructure (roads, schools, parking, other amenities) would not be able to cope.

From a HSE perspective volumes of traffic would significantly increase on roads already struggling to cope and one assumes would become significantly more dangerous for pedestrians and cyclists alike as traffic density increases.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp173/165  Respondent: 10819297 / Phil Haymes  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to formally object to this plan as my previous objection has been ignored

FOUR of the original housing development sites remain (2000 houses).

The 2016 Local Plan was assessed as having massive and disproportionate effect on the Horsley's:

Extension of the settlement boundaries of the Horsley's into the Green Belt.

Removal of the extended villages from the green belt.

Six large housing development sites and several smaller ones in the extended development.

It seems that whatever the objections there remains a determination by the planners to drive the planning process until the authorities get their desired outcome despite the impact on local residents. I fear that by 2034 The Horsley's will become another Surbiton and all the village charm lost in pursuit of development based on flawed demographic data.

I would ask the Planning Department to take a much more holistic and balanced view and seriously challenge the data that is driving unnecessary development that encroaches on the green belt, will stress existing infrastructure to breaking point and negatively impact the quality of life of every resident in the Horsley's.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO the proposed development on land adjacent to Winds Ridge and Send hill. This is GREEN BELT land and was not part of the 2014 consultation.

The proposal is for 40 homes and includes 2 Travellers pitches on land known to be contaminated and is currently vented. Access to the site is a narrow single lane country road from Vicarage Lane or from Send. The crossroads at Send Road and Send Hill is very busy at times due to parents taking their children to and from St Bedes School.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object most strongly to the proposed local plan proposals A42, A43, A43a A44 because:

Policy A43 30ha land at Garlicks Arch Burnt Common The proposal for an additional 400 homes outlined on the above policy is not required on top of the 13,860 homes already proposed for the borough. The above site is new and was not included on the Regulation 18 draft and has not been consulted on previously. The land in question is currently designated Green Belt and is permanently protected by the NPPF which prevents merging of settlements. The site has a particular conservation aspect as it is covered in ancient woodland dating from the 16th century and would be endangered by the scale of this development. The development of these sites will create a substantial increase in local traffic through Send and Ripley villages which are already very busy and congested at peak times.

The proposed industrial development of 7000sqm is not required as the latest employment Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft. If there is a need why can't this be provided on the Slyfield or other industrial estates in the borough?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

The proposed 4 way interchange onto the A3 at Burnt Common to serve this development would be a disaster for Send and Ripley as it would attract additional through traffic from the main conurbation of Woking through the villages heading for the A3 and the M25.

The villages of Send, Send Marsh and Burnt Common are currently not well served by public transport to the main conurbations of Guildford and Woking and the additional housing, and industrial units will therefore result in a substantial increase in local traffic, air pollution, parking problems, and increased accidents in these villages.

As there are no significant infrastructure improvements described in any detail in the proposal to mitigate the effect of the development sites the proposal presents a significant risk of overloading the current infrastructure in Send.

What impact will the additional traffic have on the surrounding roads in Send and Ripley and on the A3 which is already over capacity at peak times in this area?

This development site will also result in loss of wildlife in this beautiful unspoilt part of Surrey with its diverse bird life.

Have any wildlife and environmental impact assessments been carried out on any of these sites?

What additional facilities are planned to cope with the increased demand for school places, doctors and emergency services from the increase in the population?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A42 change at Clockbarn Nursery Tannery Lane because:
The increase to 60 homes in place of 45 in the original application is too much and will worsen access and traffic problems in Tannery Lane and the A247 junction.
This development will further erode the Green Belt in our village.
The change ignores all the hundreds of previous objections.
This development will make worse the surface water flooding in this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58 Land at Burnt Common, London Rd.
The proposed industrial development of a minimum of 7000sqm is not required as the latest employment Land Needs Assessment 2017 (ELNA) shows a reduction in demand of 3.9 hectares for the whole borough not a huge over allocation of 10 hectares in the Green Belt in Send.
The word minimum is a change from the previous maximum in the 2016 plan.
If there is a need why can't this be provided on the Slyfield or other industrial estates in the borough which still have empty sites, instead of building on Green Belt land.

The villages of Send, Send Marsh and Burnt Common are currently not well served by public transport to the main conurbations of Guildford and Woking and the additional housing, and industrial units will therefore result in a substantial increase in local traffic, air pollution, parking problems, and increased accidents in these villages.
As there are no significant infrastructure improvements described in any detail in the proposal to mitigate the effect of the development sites the proposal presents a significant risk of overloading the current infrastructure in Send.
What impact will the additional traffic have on the surrounding roads in Send and Ripley and on the A3 which is already overcapacity at peak times in this area?
This development site will also result in loss of wildlife in this beautiful unspoilt part of Surrey with its diverse birdlife.
What additional facilities are planned to cope with the increased demand for school places, doctors and emergency services from the increase in the population?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy P2 Green Belt at paragraph 4.3.15
I object to the proposal to inset Send Business Park from the Green Belt because:
Access along Tannary Lane is restricted and would not be suitable for increased usage from an expansion of the Business park.
Send should not be taken out of the Green Belt. Send provides a valuable green belt buffer between Woking and Guildford.
Has the council given consideration to the development of brownfield sites in the borough before destroying green belt land?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I support the development of Wisley Airfield

There is no doubt we have to provide some new homes and they have to go somewhere. Wisley airfield is in my view suitable, but only if the site is provided with direct access to junction 10 of the M25

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the inclusion of the Garlick’s Arch site.

This proposal has been included at a very late stage and has not been consulted upon previously. It was not included in the Regulation 18 draft.

There are no exceptional circumstances to warrant the development, but there are such circumstances which make it unacceptable, such as its conservation sensitivity, being covered with ancient woodland, with trees dating back to the 16th century.

According to the Land Needs Assessment 2015 (ELNA) required employment space has reduced by 80% since the previous draft plan, so is no need for the proposed 7000 sq m of industrial development on this site. If there is eventually such need, it should be situated at Slyfield.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4487  Respondent: 10819489 / Susan Cooper  Agent:

I object to the proposed new 4 way A3 junction

The proposed new junction could help parts of the area such as the centre of Ripley, but that benefit is entirely outweighed by the hitherto unimaginable volumes of traffic which would cause gridlock at Burnt Common roundabout as well as on the entire section of A247 from West Clandon to Woking. With these areas gridlocked, traffic would need to find alternative routes and the previously little known lanes around the area would be ruined also. This one singular act of folly would cause immeasurable damage to a wide area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal to remove Send and Ripley from the green belt

Removal of Send and Ripley from the Green Belt is almost certain to result in one massive development area on both sides of the A3 road, all the way from the M25, down to the North Downs. The villages will be entirely swallowed up to become like those to our North East at Surbiton, New Maldon, Worcester Park and all the way through to Sutton and beyond.

For Guildford to retain its current charm, it is vital that the village environments should be maintained for future generations.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to strongly object to the latest draft local plan proposed by Guildford Borough Local Council.

Once again the issue of removal of Send from the Green Belt has been proposed and new housing developments planned on areas not previously considered. If all the housing and business building went ahead in and around Send/Ripley the area would be gridlocked. The increasing traffic using the M25 and A3 already has a detrimental effect on the two villages at rush hour times morning and evening.

No thought has been given to this new plan and infrastructure is not in place to deal with all the extra cars and people this will bring to the local area.

Why does Guildford Borough Planners keep trying to add new measures to local planning when residents of Send and Ripley have made their feelings known through meetings at Lancaster Hall and objection letters about previous plans.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. How can land be identified as Green Belt ie: protected and then “unprotected” like this – it is a mockery of the whole concept of protection!

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is simply too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars. Commuters going to Effingham station are NOT going to cycle or walk!
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads. These are small lanes which don’t have the capacity to take this sort of traffic.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
4. The increase in traffic will create a danger to those who do cycle (and pedestrians walking to the woods with their dogs), due to the absence of any cycling paths and the lack of pedestrian footpaths (as there is no space to provide them).
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity. Where are all these extra commuters going to park? This will lead to further development of common land which is again ‘protected’.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, which is already in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation. My husband and son are both asthmatic.

9) I object to the fact the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I simply fail to see how the local planning committee can be even reconsidering this application with so many people objecting. It certainly appears to me that the opinions of the locals are not being listened to at all. Rumours abound concerning the investment company whose registered office is in the Cayman Islands and one has to wonder given recent exposes concerning companies from that region whether everything is actually as it should be……
I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I want to protest that the application for the development of Blackwell Farm and the ensuing traffic problems this will cause on the A3. This part of the A3 is over burdened with traffic and is already dangerous. The amount of extra traffic this development will cause is unsupportable given the present road infrastructure. Heavy congestion both North and South on the A3 around this development will be immense and the fact that the health services and schools are already under severe pressure means that there is no case at all for such a huge development without the supporting road, health and educational infrastructure being put into place at the time of the development. The roads around this site are not only congested but environmentally they cause huge amounts of pollution and so I would like to strongly protest that this application to develop this site is not sound.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to object strongly to the development of Blackwell Farm and the Hogs Back. I believe building 1,500 houses, a supermarket and shops, 6 travellers' sites, at least one school and to extend the University Research Park onto Blackwell Farm at this end of The Hog's Back, or indeed at any part of the Hogs Back, would overwhelm an already very congested road system.
The University, Cathedral and A3 bypass cannot cope as it is with the amount of traffic and this development is entirely unsustainable environmentally. This part of Guildford already experiences high levels of pollution and congestion and I don’t feel that we can expose our children in Onslow to any more pollution which is inevitable with such a large scale development.

I understand that new houses are needed but does the University really have to extend any further than it already has? As it is the University has built continuously on the Manor Farm and Blackwell Farm area over many many years. Why should this part of Guildford, where is there is barely any green belt still in existence, have to yet again bear the brunt of both the University overdeveloping everything in sight (once the campus was set in a green oasis and Manor Farm was a small green sports area, now all covered in concrete and buildings) or to a massive area of house building to house employees or students from the University. As the Prime Minister recently said, Enough is Enough. Please consider leaving SOME open space for our children and grandchildren to enjoy.

I understand that legally you have to put your plans out to consultation and equally realise that you never take a blind bit of notice of objections but why not, just for a change, prove that Guildford Borough Council really does listen to their residents? It would be so refreshing.

I object to the proposed local plan for Send on the grounds that it is ill conceived with no apparent evidence base to substantiate it. There is little reliable evidence or objective need assessment to justify such a massive development in Send’s Green Belt. There has been no environmental impact assessment. There has been no effective traffic impact assessment. Send map

I object to the scale of development proposed of between 22% and 27% respectively for Send and Send Marsh/Burnt Common is excessive, unnecessary, and destructive to our community and Green Belt. There is NO justification for an overall additional 652 houses per annum. It goes absolutely against the principles of community planning and is no more than a green light to developers backed by Guildford Borough Council to carve up rural Surrey. Send map

I object to Send being expected to take a disproportionate amount of the stated development housing need for the Borough. The inserting proposal for Send more than doubles the current amount of land to be taken out of the Green Belt. This is very misleading and is not made clear in the Local Plan. The above sites 64, 74, 75, 76, 99 total 81.6 acres, but the additional inset land for Send extends the existing settlement boundary by a further 100/125 acres. This could easily mean an additional expansion of the village in excess of 50%. This inset gives the green light for development along one mile of the River Wey contravening policy statement Para 4.231 Local Plan. It also gives a green light to developing the school playing fields contravening NPPG 81.

**I object to** any removal of any villages from the Green Bely P2

- **I object to** the blatant ignoring of the well-established policies of the Green Belt (NPPG 79-83) to protect open space, prevent encroachment into the countryside and stop linear development leading to the joining together of developed communities have been ignored in the proposals for Send. This plan will produce a huge overload on local and main roads, overcrowd our schools and put enormous pressure on the local surgery and hospitals. It will effectively join Send and Burpham along the A3 creating exactly the type of urban sprawl the Green Belt was set up to defend against. P2
I OBJECT to the fact that this plan represents a terrible sentence for our village. We are destined to become a suburb of the conurbation of Guildford and Woking. NPPG 83 states that the Green Belt should only be altered in "exceptional circumstances". P2

I object to the Policy A43 Change at Garlick’s Arch because:

- It ignores all of the **thousands of previous objections** made by local people
- There is no proven demand for Travelling Show people plots in this location
- It is a beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will most certainly cause the over-development of our village and the number of homes is excessive
- It is an exquisite ancient woodland that has existed from the time of Elizabeth I
- It will join up Ripley and Send and defeat the key purpose of the Green Belt
- It is currently has a flood zone 2 allocation and is subject to frequent flooding
- It is contaminated by lead shot accumulated over 50 years
- It will generate excessive traffic that will block up the local roads of Send and Ripley

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

I object to the Policy A58 at Burnt Common because:

- It was deleted from the **2014 draft** because of all the objections made previously
- The word “**minimum**” is a change from the previous “**maximum**” in the 2016 plan and since that time there has been a decline in demand for industrial land
- There is no need to build industrial or warehouse developments **in the middle of the green belt** when Slyfield and Guildford still have **empty** sites and industrial units
- The 2017 Employment Land Need Assessment shows a **reduction** in demand to 3.9 hectares for industrial land for the whole borough not a **huge over allocation of 10 hectares at Send in the Green Belt**
- The impact on the small surrounding country roads will create traffic gridlock
- It will join up existing villages and defeat the key purpose of the Green Belt

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the lack of any evidence for the alleged housing need numbers

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPA16/3097  Respondent: 10820481 / Lisa Smith  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the proposed local plan for Send on the grounds that it is ill conceived with no apparent evidence base to substantiate it. There is little reliable evidence or objective need assessment to justify such a massive development in Send’s Green Belt. There has been no environmental impact assessment. There has been no effective traffic impact assessment.

2. I object to the scale of development proposed of between 22% and 27% respectively for Send and Send Marsh/Burnt Common is excessive, unnecessary, and destructive to our community and Green Belt. There is NO justification for an overall additional 652 houses per annum. It goes absolutely against the principles of community planning and is no more than a green light to developers backed by Guildford Borough Council to carve up rural Surrey.

3. I object to the blatant ignoring of the well-established policies of the Green Belt (NPPG 79-83) to protect open space, prevent encroachment into the countryside and stop linear development leading to the joining together of developed communities have been ignored in the proposals for Send. This plan will produce a huge overload on local and main roads, overcrowd our schools and put enormous pressure on the local surgery and hospitals. It will effectively join Send and Burpham along the A3 creating exactly the type of urban sprawl the Green Belt was set up to defend against.

4. I object to Send being expected to take a disproportionate amount of the stated development housing need for the Borough. The insetting proposal for Send more than doubles the current amount of land to be taken out of the Green Belt. This is very misleading and is not made clear in the Local Plan. The above sites 64, 74, 75, 76, 99 total 81.6 acres, but the additional inset land for Send extends the existing settlement boundary by a further 100/125 acres. This could easily mean an additional expansion of the village in excess of 50%. This inset gives the green light for development along one mile of the River Wey contravening policy statement Para 4.231 Local Plan. It also gives a green light to developing the school playing fields contravening NPPG 81.

THERE ARE NO EXCEPTIONAL CIRCUMSTANCES IN SEND.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We are amazed at the proposals for development in The Borough particularly in relation to the Horsleys and the old Wisley Airfield to which we strongly object.

Firstly we question the basis upon which the need has been calculated, which is further brought into question by our exit from the EU.

Secondly the infrastructure in the area is already overloaded with traffic during the rush hour and it has become dangerous to cross Ockham Road on foot several older people being put at risk, at such times.

This Country is experiencing progressively higher amount of rainfall and local roads are regularly flooded causing more potholes and the dangers associated therewith also making it almost impossible for pedestrians to use the pavements without getting soaked by passing traffic.

At rush hour the A3 is already suffering with serious -delays and jams particularly at the Ripley, M25, Cobham junctions any further increase in traffic (which is inevitable if the proposed developments go ahead) would bring gridlock with all the knock on effects.

Furthermore the proposals take the villages out of the Green Belt, thus making a farce of the whole object of the belt itself: which is totally unacceptable.

People have settled in this area because of its country atmosphere quietness and its general village feeling which will all be destroyed by the proposed developments. People have paid a premium price for their houses in the μ.rea and-who is going to compensate all the residents for the inevitable decrease in property values? ·

The car parking availability at local stations is fully developed, platforms have already been extended and there is very little room for expansion, which will be necessary if the proposals are carried out.

We enclose herewith an article which we trust you will read and note it's relevance and importance.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Guildford Borough Council has failed to provide sound evidence in terms of the Employment Land Needs Assessment 2015 which show an 80 per cent reduction in employment space from the previous ELNA carried out by the Guildford Borough Council in 2013. This means the industrial space at Burnt Common is no longer needed. Housing numbers from the Strategic Housing Market Assessment 2015 (SHMA) are highly questionable. The required 1368 houses in the local plan is exaggerated if the population is to grow by some 20,000 in the plan we actually need 80,000 houses (based on average of 2.5 persons per household.) The Green Belt does not need to be built over. The Guildford Borough Council's transport Assessment was not available to councillors before the vote was taken on May 24th being published on 6th June. Infrastructure overload has received scant attention.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy P2 Send, Ripley and Clandon being removed from the Green Belt. Send provides a buffer between Guildford and Woking. The particularly vulnerable areas of land behind the school including playing fields and woodland. The land to the right of the cart bridge by the Wey Navigation up to the new boundary by the River Wey Navigation up to the boundary fence with Vision Engineering and Land to the left of the cart bridge going up to the old depot on the Wey Navigation. So the council can concrete over the whole area of Ripley Send and Clandon.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A43 Land at Garlic Arc~. This is a new site and was not included in the Regulation 18 draft and has not been consulted on previously. It is Green Belt permanently protected by the NPPF which prevents the merging of settlements. There are no exceptional circumstances since it is covered by and ancient woodland. The proposed industrial site if singularly not required since the latest Employment Land Needs Assessment 2015 (ENLA) shows a reduction of 80 per cent in requirement needs of employment floor space from the previous draft plan. A new four way interchange on to the A3 at Burnt common to serve this development would create gridlock. Have you ever tried crossing the road especially in the rush hour nigh impossible. This is a ridiculous idea and really needs to be looked at very carefully. A full
transparency should be made available and looked into
very carefully, otherwise grid lock will be the result. These roads are not suitable for thousands of cars.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLP16/1090  Respondent: 10820961 / D Davies  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A44. Although you may say this is a small development the added traffic would add to the gridlock
situation which would arise from all these developments. Also the subsoil on this site contains landfill waste and is
currently vented and not suitable for building.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/2139  Respondent: 10820961 / D Davies  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I feel there should be a lot more transparency from Guildford Borough Council and so that these things are not decided
behind closed doors. This transparency should also be applied to councillors.

Also putting large numbers of small houses that are not really suitable for living in with paper thin walls are put up to give
builders and property developers huge profits it's about time house were built that people can live in properly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
Green Belt. Policy 2 Paragraph 4.3.15

I object to the proposal to insert Send Business Park from the Green Belt

- It is effectively an old non-confirming user in an area of outstanding countryside adjacent to the Wey navigation
- There is highly restrictive vehicular access along Tannery Lane in both directions
- Further development or expansion at this site detract from the openness of the Green Belt and is not appropriate

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Garlicks Arch, Sendmarsh Policy A43. I object to this policy because

- It ignores thousands of previous objections made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permeant Green Belt and no exceptional circumstances exist
- It will cause over development of our villages and the number of homes in excessive
• It will exquisite ancient woodland that existed at the time of Elizabeth I, it will be destroying our heritage
• It will join up Ripley, Send and Clandon and defeat the purpose of the Green Belt
• It is subject to frequent flooding and is currently a flood zone 2 allocation. A lot of this area is in a flood zone
• It is contaminated by lead shot accumulated over fifty years.
• It will generate excessive traffic that will block up local roads of Ripley, Send and Clandon causing gridlock which has happened before.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Burnt Common, London Road Policy A58. I object to this policy because
• It was deleted from the 2014 draft because of all the objections
• The word ‘minimum’ is changed from the previous ‘maximum’ in the 2016 plan and since that time there has been a decline in demand for industrial land.
• There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial spaces
• The 2017 Employment Land Need Assessment shows a reduction to 3.9 hectares for industrial land for the whole of the borough not a huge over allocation of 10 hectares at Send in the Green Belt
• The impact on small surroundings roads will create traffic gridlock which has happened before with incidents on the M25 with people stuck in cars for 5 hours or more going no where
• It will join up existing villages and defeat the purpose of the Green Belt

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to object to the Guildford Borough Council's Final Draft Local Plan that is trying to permit an additional 400 houses (policy A43) together with 7000 square metres of industrial space and the proposed new A3 junction at Garlick's Arch (policy A43a).

I strongly object to the proposal of removing Send's Green Belt status along with neighbouring villages. I also object to the proposed Winds Ridge/Send Hill development (policy A44) as some of the vehicles involved in its building and subsequent occupation will be exiting into Potters Lane via a narrow road on a blind bend on a de-restricted speed limit stretch of road.

We have had to endure the disruption in Send Road caused by the building of Weycott and the ongoing disturbance of the development of the Vision Engineering site. We have the prospect of further chaos yet to come with the granted approval of the marina in Tannery Lane and the additional proposal policy (A42) for 45 houses on Clockbarn Nursery.

Send does not have the suitable roads, public transport (one bus an hour each way between Guildford and Woking) or the necessary utilities infrastructure to cope with these proposals (witness the recent chaos in Potters Lane while the gas main was renewed). Even with the merging of Send First School and St Bede's Junior School, there will not be any additional capacity available for pupils generated from new housing developments. Nor will the Villages Medical Centre be able to cope with such an influx of people calling on its services. Will the existing St Bede's School site become the next target for development? Where will it all end?

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A42-CLOCKBARN NURSERY, TANNERY LANE

Even ignoring the fact that the Council has proposed an increase of planning permission from 45 to 60 houses on this site, the access and egress from Send Road into/out of Tannery Lane is totally unsuitable (ie very narrow and often obscured visibility) and similarly at the junction into Newark Lane (at the Ripley end of the road). The Lane is basically single track with passing areas along its whole length and there are already existing businesses established at the old Tannery/Send Business Park site.

This proposed housing development will also cause the following problems:-

An approximation of an additional 100 vehicles thus creating at least 200 movements per day, causing more pollution.

Send Primary School has no further capacity for more pupils, and local secondary schools are in a similar position.

The Villages Medical Centre has no further capacity for more patients.

The current utilities infrastructure already struggles to meet the existing demands of the village (ie low water pressure, power ‘outs’)-to upgrade the utilities to meet the increased demand will not only cause disruption to the existing customers, it will also further delay traffic.
It is a change of land usage-causing further loss of green belt/agricultural into domestic occupation, which will not only affect the view from the Wey Navigation but also, can it be guaranteed that any development here will not cause pollution to the waterway? Or cause further surface flooding?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A43-GARLICK’S ARCH, SEND MARSH

This proposed development of 400 houses and 6/8 Travellers’ Sites will cause the following problems:-

This is a designated Green Belt area and there have been many previous objections to any plans to build on this plot. It acts as a buffer both of noise and exhaust pollution between the A3 and the old A3 (Portsmouth Road between Send and Ripley).

This proposed development will cause the following problems:-

An approximation of at least an additional 600 cars-further pollution etc.

Where will the access to the development be?

The existing public transport system could not cope at peak times with a large increase in users.

Send Primary School has no further capacity for more pupils, and local secondary schools are in a similar position.

The Villages Medical Centre has no further capacity for more patients

The current utilities infrastructure already struggles to meet the existing demands of the village (ie low water pressure, power ‘outs’)-to upgrade the utilities to meet the increased demand will not only cause disruption to the existing customers, it will also further delay traffic.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A58-LAND AT BURNT COMMON, LONDON ROAD

Is there the need for in excess of 7000 square metres of industrial buildings and/or warehousing-the existing businesses create a lot of traffic movement (thus pollution) and the road seems to be a permanent car and lorry park. If additional vehicles are attracted, they will have to cross the Send/Ripley slip road where the traffic leaves the A3 at high speed, with the likelihood of serious accidents due to slow moving, heavy lorries having to traverse both lanes. This proposal was deleted from the 2014 draft plan because of the local objections raised at the time. If the planners took heed then, why try to re-introduce them now as the objections still apply.

There still seems to be plenty of space available for this kind of development at Slyfield Green and Guildford without taking away Green Belt land in Send. Also, the recent Employment Land Need Assessment showed a reduction in demand for this type of development so why does GBC want to allow this unrequired over-allocation at the expense of our village?

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY 2 (Para 4.3.15)-SEND BUSINESS PARK

The removal of this existing development from the Green Belt will attract further businesses to the site. As stated in my objections to A42 (above), Tannery Lane is totally unsuitable for any more traffic, especially large commercial vehicles. Additional development will detract from the natural beauty of the location beside the Wey Navigation.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to the disproportionate scale of the proposed development in Normandy, it will totally destroy our rural village environment.

We register our objections to the Normandy & Flexford strategic site

Not sufficient thought or consideration appears to have been given to this proposed development within Normandy.

To propose to virtually double the current population is just farcical, and beyond common sense, again confirming that insufficient consideration has been given to the proposed plans, the infrastructure cannot support the current village situation satisfactorily as it stands.

Yes, we have a Doctors surgery, which is constantly overloaded, and with the ageing population within the village this can only put increased pressure onto the system, without any further increase in numbers to the village.

With the proposed increase in the population, this will totally destroy the rural image of the village, which is why the majority of the residents moved here originally.

We moved here over 30yrs ago for the rural lifestyle, the village at that time had the infrastructure to support the village way of life, unfortunately for what ever reason, which makes you think of long term planning, G.B.C allowed this to be eroded away by allowing the majority of these facilities to change to residential use depriving the villagers of local amenities, which itself has increased the loading on the already overloaded road structure.

The traffic situation would appear to have been totally discounted,

on a regular basis both the A3 and the A31 are seriously overloaded which is commonly known, and as happens far too frequently an accident occurs on one of these roads, so where does the traffic try to escape to, they try to come through Ash Green, and The Wanborough Hill to gain access to the A323, which is already heavily congested, which then becomes gridlocked.

The government pledged in their election manifesto of 2015 to protect the nations green belt, this needs to be enforced, where are the exceptional circumstances, None have been demonstrated, because there are none.

By increasing the traffic through our rural village this could seriously put at risk our many listed buildings along with the road structure, 38 and 44 tonne commercial vehicles are already having a devastating effect on the roads and bridges.

The wildlife habitats within the village need to be protected, unless we do so

we will loose these for the following generations, we should surely learn from others mistakes !!!! Act before it is to late.

More and better use should be made of existing Brownfield Retail sites which are far less expensive to develop, as they already have the majority of services on site.

The planned accommodation developments on the University campus site should be for the students, this has already been approved and apparently has for some considerable time.

Doing this would then release hundreds of dwellings within the town, which should also improve the Councils finances via council taxes, as we understand that landlords letting to students are not liable for Council Tax on those properties, which as residents coping with the ever increasing Council & Parish Tax we consider totally unfair and cannot understand the logic behind it.
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

**Respondent:** 10822913 / Karen Dougherty  
**Agent:**  
**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

### Comment ID: PSLPS16/6641  
**Respondent:** 10822913 / Karen Dougherty  
**Agent:**  
**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning
and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

In addition, a recent Outline Planning Application (16/P/00783) for a smaller development on this site was refused by GBC for many of the above reasons, not least that the Green Belt should be protected. The report states that “there are no overriding reasons that would constitute very special circumstances to justify the harm that it would cause to the Green Belt”. How then can this much larger proposed development on the same site now be seriously considered as suitable?

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

I object because the stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

I object because this site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

I object because the site lies within the 400m to 5km zone of the Thames Basin Heaths Special Protection Area (TBHSPA). It has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site would have an adverse effect on the integrity of the Special Protection Area and will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6642  Respondent: 10822913 / Karen Dougherty  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the
south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/13941  Respondent: 10822913 / Karen Dougherty  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13942  Respondent: 10822913 / Karen Dougherty  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in yet more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

1. **I object to the lack of proper infrastructure planning for sites (Policy I1)**

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have serious concerns over the planning of the infrastructure requirements and whether the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13946  Respondent: 10822913 / Karen Dougherty  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13947  Respondent: 10822913 / Karen Dougherty  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/13934  Respondent: 10822913 / Karen Dougherty  Agent:
I object to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

For Site A43 Garlicks Arch this is supported by the decision in a recent (June 2016) Outline Planning Application (16/P/00783) for a smaller development on this site was refused by GBC. The report states that “there are no overriding reasons that would constitute very special circumstances to justify the harm that it would cause to the Green Belt”. How can it therefore now be considered appropriate to include this site for Insetting from the Green Belt?

There are no exceptional circumstances that support this.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

I object that the recommendation issued by the Minister of State for Housing & Planning in June 2016 regarding protection of the greenbelt and a commitment toward identifying brownfield sites is being totally disregarded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site regularly floods several times a year and especially during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

This local plan seeks to reduce overall development in town centre and urban areas compared to 2014 by almost 10% and instead seeks to increase the overall housing development in rural and green belt villages by insetting 15 villages. The proposed increase in rural areas from 2014 to 2016 is almost 12%. This is totally disproportionate.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the proposal to move the fields behind Shalford village hall to fall within the village settlement boundary and outside the green belt.

These fields lie at the centre of village life and are a contributing factor in what makes Shalford special, and feel not too built up.

Please don’t make changes for the sake of it, but listen to what the people in Shalford say about our village, and how we want to protect this land so that the whole village can enjoy the open space and character they help create.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of land off Keens Lane, Worplesdon (Site A22) in the GBC Draft Local Plan for the proposed development of 140 homes and a care home, it is totally inappropriate for many reasons including three reasons below:

1. This area is a Green Belt area, and as such should built on otherwise why would it be green belt and I understand that Surrey County Council has urged Guildford Borough Council to protect Green belt land - how can you have such different views considering you are elected by and serving the same people.

2. Keens Lane is a very narrow road - to get 2 small cars to pass each other means that both car need to pull over hitting the bushes/shrubs and usually one of the cars needing to stop. How would you expect 140 homes to access this lane safely, as most cars have at least 2 cars it would mean 280 negotiating the already congested lane leading into the constricted and congested and Gravetts Lane/Tangley Lane.

3. Whitmoor Common and a Site of Special Scientific Interest, and would have a damaging effect on ecology and wildlife. It is also bounded by Broadstreet Common. The open nature of Worplesdon should be retained.

I trust you will consider my objections at your attempt to once again build in this special and protected area

Answer (if comment is on questions 1-7 of the questionnaire): ()
I wish to register several objections to the published Draft Local Plan.

1. Having lived at this address for 23 years, I feel that in respect of Send and Ripley this plan is disproportionate and out-of-keeping with the historical nature of this area.

2. I object, in the strongest possible terms, to re-designating areas which currently enjoy 'Green Belt' status. Something that has served well for many years should not be changed, and the evidence to do so now does not bear scrutiny, in my opinion.

3. I object to the large-scale nature of proposals for development in areas around the villages of Send and Ripley as it would result in less separation between them, with the consequent loss of identity and individuality.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Surrey University and Guildford BC have identified the area as being suitable for development to meet the growing population demands. The formulae used to calculate the potential growth of those wishing to purchase their homes I believe is flawed as undertaken by a commercial company with vested interest in future development. Following Brexit there should be a reassessment which I suspect will reduce annual target.

With the planned expansion of Guildford there are I recall no new car parks planned, the vast majority of shoppers would drive to town if purchasing goods or for heavy food shopping, bus and cycle ways of no benefit in those instances and bus travel not practical. The river idea would be a leisure facility and not for main shopping.

We object to Guildford Borough Council’s draft Local Plan proposals to build 1800 houses, an industrial park and a highway on the slopes of the Hog’s Back at Blackwell Farm, which will:

- Destroy views form the Hog’s Back ridge – a nationally designated Area of Outstanding Natural Beauty
- Remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- Increase tailbacks on the A31 and traffic congestion
- Result in rat-running through local roads
- Add to Guildford’s pollution

Comment ID: PSLPS16/6447  Respondent: 10824193 / Rupert Phillips  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The proposed development of Blackwell Farm some 72 hectares of farmland and ancient woodland although reduced number of homes will still require major infrastructure investment. The area is regarded as farmland and in Green Belt. The Surrey Sports Park has expanded greatly in recent years encroaching on open spaces result of which is a dramatic increase in traffic on limited highways although the junction has had a major improvement the roads leading from Guildford and Park Barn have not increased in size or flow to meet volume of use.

Surrey University received permission for student accommodation in 2004, this has not been developed, there are also other areas within the Campus areas which could provide student accommodation such as the large open air car parks used during the day and empty evenings weekends and out of term times. The University could develop these areas on a similar to the recent planning application made by Guildford Borough Council for the open air car park and bus depot. There would be with the unused planning sufficient accommodation to house the vast majority of students which should release local housing to rent and reduce the calculated demand not to mention cut in CO2 emissions, road traffic as majority of students would be living on campus. Council Tax should also be charged an additional revenue stream to help develop the Borough amenities and road improvements.

I can see why Surrey University are not keen to explore this option as it would involve them providing commercial finance for the infrastructure, design, planning and development. Whereas by selling Blackwell Farm to developers the University would benefit from a substantial investment.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The amended Plan has reduced the proposed number of new homes and stated a percentage would be affordable, there is no mention of what affordable would be, compared to Guildford property prices affordable even with benefit of various government schemes would price out local people.

Traffic proposals are key to any developments, the Draft Plan makes reference to several ideas, all subject to government funding, any development should also be subject to the road infrastructure being in place, hospital provision to provide for a growing and aged population, better access for emergency services. One suggestion in the plan is to have a traffic flow through the business park past the hospital and towards Tesco roundabout, these areas are insufficient for an increased flow, already at capacity at peak times, what impact would volume from 1800 plus homes have?

Not many families would travel by bus or from proposed rail station as the services are likely to be infrequent. Many residents would travel by car to rail station increasing CO2 emissions adding to delays in the Park area. The Onslow Park & Ride has to be accessed by car and is too far from the proposed schemes for an improved take up.

The Draft Plan makes little reference to leisure and recreational increased facilities for the expanding population at family affordable prices, not the inflated hire costs at Surrey Sports Park which can be paid by adults but not the young of the Borough. Where are the next football pitches, open spaces to kick around, basketball and netball courts which are free to use to encourage young people to be active.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I live to the West of Guildford in Onslow Village in an area blighted by increased traffic volumes morning day and night in particular the A3 and Farnham Road.

The road network is totally inadequate to provide safe travel today with numerous accidents on the A3 as drivers try to detour from the blockage of the A31 Hogs Back joining A3 and those trying to exit to the Surrey Sports Park, Business Park University and Hospital.

When we moved to our present home 10 years ago the morning traffic would start building at about 6:30am and ease of by 6:30 in the evening, weekends were generally quieter. Now the morning rush starts about 5:00am and continues after 7:00 pm, weekends the A3 in both directions is busy all day.

Although the new draft plan has proposals to increase the exit lanes to University, Business Park etc for 2017 and to make a new junction with A3/A31 in 2022 for proposed development off the A3 neither will address the issue of volume for this area, more houses will dramatically increase traffic, pollution, not to mention overloading of water and sewage services which are at near capacity and affect the quality of life for Guildford residents. The A31 Farnham Road is extremely busy from early morning with a large number of drivers using Onslow Village as a rat run to beat the A3 tailbacks which is a problem with local schools and village shops.

I object to the disproportionate distribution of houses across Guildford Borough, by far, the North East has taken an unsustainable number, in an area where country lanes are narrow and volume of traffic now using through routes makes roads gridlocked at rush hour.

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners' views, or the costs involved in improving the infrastructure, currently out side their financial capability.

The methodology is also flawed as this plan has been formulated without regard to village Neighbourhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We strongly object and oppose the proposal to remove Fangate Manor from the Green Belt. In discussion with East Horsley Parish Council, Sir Robin Gill (owner of Fangate Manor) says he has no plans for any development on his land despite the fact that he (Sir Robin Gill) has made previous applications for development on Fangate Manor during the last 30 years. If this is the case, we are at a loss to understand why Sir Robin Gill is seeking to remove his property and land from the Green Belt.

We have been residents of Manor Close for 30 years and our boundary backs on to his land at Fangate Manor. Any development at this property would precipitate a loss of amenity, wildlife and general ambience to all residents at Manor Close.

We and all other property owners in Manor Close do not intend to allow any access nor exit from the field at Fangate Manor onto the south spur road of Manor Close. This strictly a private road. The road and its verges are owned by Manor Close Residents Association.

We at Manorfield, have never witnessed any access nor exit from the field at Fangate Manor onto the south spur road in Manor Close during our 30 years.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I strongly object to the Guildford Borough Council plans to inset East/West Horsley from the Green Belt.

Also, I strongly oppose the GBC plans to propose a major housing building programme in both East/West Horsley and on the old Ripley Airfield. I find the whole scheme totally abhorrent. My reasons are as follows:-

1 The local infrastructure is already overloaded and up to its limits. The schools are full. The medical services at Horsley Medical Centre are stretched to capacity and the drainage on the roads cannot cope. As it is; the roads flood with heavy rain.

2 The local railway stations will not be able to cope with approx an extra 1500 persons. The rush hour trains are already full and there will be insufficient car parking space. There certainly is no adequate bus service in the area.

3 The proposals to build what amounts to another Surrey village on Ripley Airfield is ridiculous. 2100 new houses means at least 4000 cars.

How can our beautiful rural villages accommodate these unacceptable proposals from Guildford Borough Council.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: PSLPA16/2686   Respondent: 10824929 / Emma Jenkins   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objection to new local plan

I object to Send village, Wisley, Clandon and Ripley being removed from the Green Belt. We bought our house in this village to be outside of the hustle and bustle of Guildford or Woking and to bring up our children in a small village environment. This environment will be ruined by these plan.

I object to the number of homes that the plans intend to deliver.

I object to the new 4-way on/off ramp to A3 at Burnt Common (A43a). This will not alleviate traffic in Send, Ripley or Clandon. I believe it will make it worse. And it will enable further development.

I object to the inclusion of Green Belt within the proposed new Village boundaries (which is very likely to lead to more development in the future)

I object to Garlick's Arch proposal (Policy A43) to build 400 houses and 7000 sq. Metres of light industrial warehousing. This is literally on our doorstep and the increased traffic and noise would be unbearable.

I object to the destruction of the Green Belt in this area, including the development of 2,000 homes at Gosden Hill Farm, Merrow (Policy A25) which is in clear contravention of the central Government's stated commitment to Green Belt protection.

I object to the last minute inclusion of new sites with less than 2 weeks notice. Due process has not beed followed.
I object to the limited consultation period which doesn't give residents enough chance to digest everything and the impact this will have on their lives.

I object to policy A44 involving 1.9 ha of land to be designate for 40 homes and 2 travellers' pitches. This is new and was not included in the regulation 18 draft, and has not be consulted upon previously. Development for housing is inappropriate due to its permanent Green Belt Status.

The Green Belt was intended to be permanent, as required by National Planning policy Framework, and there are no special circumstances to justify abandoning it. Send's Green Belt provides an essential buffer stopping Woking and Guildford becoming one conurbation.

If we had wanted to live in an urban environment we would have bought a house in Guildford or Woking. We bought into the beautiful countryside on our doorstep. These plans will be devastating for the villages of Send, Clandon and Ripley and I wholeheartedly object to them.

I would like my comments to be given to the planning inspector.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. I object to further development at Clockbarn Nursery – Tannery Lane is far too narrow to take any more traffic. The junction onto the Send road is already dangerous and will be made much worse if this development is allowed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2016  Respondent: 10824961 / Debby Fieldus  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the building of 400 houses and 7000 sq metres of industrial space at Garlick’s Arch opposite Send Marsh. This land floods and is ancient woodland it provides a very necessary pollution and noise barrier between the A3 and the residents of Send.

The Industrial Space if indeed needed, should be located at Slyfield.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/2014  Respondent: 10824961 / Debby Fieldus  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. I object to a new interchange with the A3 at Burnt Common – Send Road which is already overloaded would become gridlocked. Send would just become a “cut through” and a “rat run” for traffic to and from the A3, M25 and Woking.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: PSLPP16/4287  Respondent: 10824961 / Debby Fieldus  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

[Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998]

I object to Send village being removed from the Green Belt. The Green Belt was intended to be permanent – local councillors and central government gave a clear election promise to protect the Green Belt and this reneges on it. Sends Green Belt provides and essential buffer between Woking and Guildford becoming one large urban area.

I have a number of concerns in relation to the proposed removal of site A39 and Horsley overall from the green belt:

- **There is no safe access to this proposed site.** The access proposed raises major Health & Safety issues. Even at present the close proximity of the railway bridge means access from driveways to Ockham Road North at this point is restrictive & dangerous in normal hours. At peak commuting and school hours this is even worse and becomes very dangerous and accidents have happened at this point.

- **Local flooding is a major concern at this site**. The proposed site builds on land which is at the moment acts as a flood plain curbing the issue which already exists about local flooding which doesn’t just occur with heavy downpours but also with light rain showers.

- At this point **Ockham Road North becomes dangerous** as it floods beyond the curb height and as such pedestrians and cars are put in danger

- Many houses on Ockham Road North **experience significant domestic flooding** and this site will make them even more susceptible. The flood issue also has a major impact on domestic drainage and means that toilets, sinks and bath water backs up and becomes a health & safety issue. This site will substantially increase the susceptibility of the local housing and infrastructure to the risk of flooding.

- **False criteria for proposing to take Horsley from green belt**. There is a lack of understanding of the area in relation to the description and therefore false criteria on which the draft has been proposed eg: The East vs West Horsley point above, the designation of Station parade is completely misleading and bears no resemblance to a few village shops and a small franchised convenience store and an infrastructure which can ill cope with existing residential need.

- **Infrastructure**: No-where in the plan has infrastructure been addressed. It is already an intolerably long wait to access the local GP’s and dentists at a base level. Nor is there any mention of the already inadequate lane (they cannot even be designated as roads) & footpath structure.

- **Local employment is minimal** and the majority of the resident population have to travel to and from the village using either an already inadequate road system or public transport and no additional car parking which again is already limited.
• Overall the proposal to take Horsley from the green belt and this proposed site does not take into account major flooding and infrastructure issues and as a consequence is at best not viable and at worst dangerous at a number of levels.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPS16/5846  **Respondent:** 10826177 / Paul Collins  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A39

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have a number of concerns in relation to the proposed removal of Horsley from the green belt and site A39

? There is no safe access to this proposed site. The access proposed raises major Health & Safety issues. Even at present the close proximity of the railway bridge means access from driveways to Ockham Road North at this point is restrictive & dangerous in normal hours. At peak commuting and school hours this is even worse and becomes very dangerous and accidents have happened at this point.

? Local flooding is a major concern at this site. The proposed site builds on land which is at the moment acts as a flood plain curbing the issue which already exists about local flooding which doesn’t just occur with heavy downpours but also with light rain showers.

? At this point Ockham Road North becomes dangerous as it floods beyond the curb height and as such pedestrians and cars are put in danger.

? Many houses on Ockham Road North experience significant domestic flooding and this site will make them even more susceptible. The flood issue also has a major impact on domestic drainage and means that toilets, sinks and bath water backs up and becomes a health & safety issue. This site will substantially increase the susceptibility of the local housing and infrastructure to the risk of flooding.

? False criteria for proposing to take Horsley from green belt. There is a lack of understanding of the area in relation to the description and therefore false criteria on which the draft has been proposed eg: The East vs West Horsley point above, the designation of Station parade is completely misleading and bears no resemblance to a few village shops and a small franchised convenience store and an infrastructure which can ill cope with existing residential need.

Horsley Planning Objection: June 2016 2

? Infrastructure: No-where in the plan has infrastructure been addressed. It is already an intolerably long wait to access the local GP’s and dentists at a base level.

? Lanes: There is no mention of the already inadequate lane; as they cannot in most situations be designated as roads; & footpath structure which are already inadequate and poor in structure.

? Local employment is minimal and the majority of the resident population have to travel to and from the village using either an already inadequate road/lane system or public transport and no additional car parking is planned which again is already limited. Overall the proposal to take Horsley from the green belt and this proposed site does not take into account major flooding and infrastructure issues and as a consequence is at best not viable and at worst dangerous at a number of levels.

I object in particular to the proposed development at Garlick’s Arch. The proposed 400 houses and commercial units would completely swamp existing local roads, schools & medical facilities. This would be further exacerbated by the proposed new interchange onto the A3 at Burnt Common that I also strongly object to. Current traffic levels are already too high around Burnt Common. Expanding the A3 junction would cause gridlock all day along A247 and Portsmouth Road. I also object to the Garlick’s Arch proposal on the grounds that it was not included in the previous consultation in 2014, and was added to the current proposed plan at very late notice, preventing proper due diligence from all interested parties. I also object to the proposed commercial development, as I believe it would make far more sense to expand the current commercial Slyfield area where I understand land is available.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to removing Send from the Green Belt. Green Belt exists for very good reasons to help protect the countryside from inappropriate development. Once areas are removed from the Green Belt and developed, there is no going back. If the GBC Plan is not reconsidered the scale of development in the Green Belt along the A3 corridor would completely change the character of the area and cause considerable congestion as the A3 and local roads would not be able to cope. The A3 is already congested without this scale of development.

Comment ID: pslp172/2804  Respondent: 10826209 / David Rider  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the expanded size of this plot from 45 to 60 homes in an area with very narrow existing roads. Currently, there are significant traffic jams in the immediate areas during morning and evening, and adding 60 homes will cause considerably more congestion on roads that are not designed for such levels of use. Furthermore, the views and sense of local countryside in this area will be lost with this increase in new housing. Existing Send school and medical facilities will not be able to cope with a further 60 families needs and hence new residents will have to travel further to schools and medical facilities outside the area causing further traffic congestion.
I object to the revised proposal for this plot as it will significantly eradicate the green belt area that delineates Ripley and Send, and create very significant increase in traffic from 400 homes that will totally swamp the existing modest local roads, especially Portsmouth Road and the A247. These roads are already under significant pressure from current population demands with frequent traffic jams delaying journeys to school and work. In addition, local infrastructure, especially schools and medical facilities will be swamped by the significant extra demand, requiring people to traffic further to reach such facilities in other areas, further exacerbating the traffic issues. I recognise the need for some new housing in the area, but 400 homes is totally disproportionate for this relatively small area.

I object to the new allocation of a minimum of 7,000 square metre for industrial or warehousing use. I understand this was deleted from the 2014 plan, based on objections made at the time, so it is totally unacceptable to re-introduce into the latest draft Plan. I strongly object to the use of the word “minimum”, as Plans need to be capped rather than act as licence for uncontrolled expansion of the area. It is also unnecessary to build industrial plots on existing green belt area, where there is capacity to expand existing industrial areas such as Slyfield. The increase in commercial traffic around the Burnt Common area will cause inevitable gridlock and place an unacceptable burden on local residents, as traffic will need to use the small Burnt Common roundabout.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to GBC changes to the draft local plan and inclusion of Blackwell Farm as a development site (Policy A26 & Para 4.1.9) as stated in the postcard which came through our door from save hogs back, which:

- Disregards an independent expert landscape study which demonstrates that part of the site merits AONB status following Natural England's forthcoming boundary review (para 4.3.8)
- Directs more office space to an extended business park [Policy E4], which will increase peak time congestion - particularly around the hospital and A &E - and will also encourage rat running through residential areas
- Ignores independent expert traffic studies, which show impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- Adds air pollution in neighbouring areas, which already exceeds safe EU limits for Nitrous Oxide.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Housing Needs** – My husband and I are well into our seventies and there is almost no possibilities to downsize as we find that brown field sites which have been previously developed there has been a tendency to construct large houses, with almost no consideration for first time buyers or those wishing to downsize. Any development must take into account the provision for older people.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Answer (if comment is on questions 1-7 of the questionnaire): ()

<table>
<thead>
<tr>
<th>Lack of Facilities - The village does not have sufficient facilities to support more development.</th>
</tr>
</thead>
<tbody>
<tr>
<td>• The medical centre is oversubscribed. The large number of houses proposed and increase of population would necessitate an increase of the number of doctors in the village with a larger medical centre.</td>
</tr>
<tr>
<td>• The schools would need to be enlarged. The Raleigh School site is very restricted. There is not the land available on the site to construct more classrooms and the access via two residential roads is appalling. In my opinion with any large increase of development in the village a new school would need to be constructed. This would have the advantage of releasing the existing site of the school for development.</td>
</tr>
<tr>
<td>• Water, Gas, Electricity, Sewage and Drainage – I do not believe that there is sufficient capacity to cater for the additional developments.</td>
</tr>
<tr>
<td>• Highway Safety – The roads in East and West Horsley are relatively narrow and the visibility is often poor, therefore any substantial increase in traffic would lead to more accidents. I recommend that a full traffic and capacity study should be carried out prior to any development being approved. Any necessary highway improvements should also be submitted for comment. We are often subjected to speeding cars and lorries past our house.</td>
</tr>
<tr>
<td>• Pavements in East Lane, Ockham Road South and North are narrow and as a consequence a hazard for pedestrians, especially women with prams and toddlers. The additional traffic would make matters worse.</td>
</tr>
<tr>
<td>• There is not any provision on the roads in Horsley for cyclists. I was witness to a fatal cycling accident outside my house.</td>
</tr>
<tr>
<td>• There is not sufficient parking at the railway station at present so any increase of population would exacerbate the situation. I also understand that the trains at peak hours are very crowded with standing room only.</td>
</tr>
<tr>
<td>• There is often insufficient parking in the village centre.</td>
</tr>
<tr>
<td>• A large number of new houses would completely change the character of the village.</td>
</tr>
</tbody>
</table>

The above comments are primarily concerned with East and West Horsley. The major development proposed at Wisley Airport would further exacerbate these issues.

Of the sites proposed the area south I most strongly object to the area A41 south of East Lane. It destroys the character of the road having open land on the south side and would lead to an increase of pressure of more development to link with the remainder of housing on East Lane on the southern side.

On the above grounds I object to the Draft Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
GUILDFORD BOROUGH DRAFT LOCAL PLAN

I object to the proposed local plan on the following grounds:

Green Belt – I am totally opposed to any loss of green belt land. Any loss to this important land, would create a dangerous precedence.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to object the councils Normandy and Flexford strategic site development.

We came to live in Normady from Surbilin in 1960 to enjoy a rural area and community. The council was then Guild Rural District Council – this subsequently absorbed into Guildford Borough Council.

The borough council by and large has rejected many planning submissions over many years to help preserve the rural environment. Many that have been approved rejected by the planning inspectors appeal, as in appropriate development in a rural area, within the Green Belt. In fact when Lord Taylor was resident in a weekend house his proposals for major development were rejected.

Why now this complete about turn?

The council is elected to represent the electorate and have a detailed knowledge of local requirements which effect local opinion.

A developer has no knowledge of local requirements – Indeed is in no way concerned for the adverse effects his proposal will have on the lives of local residents.

His sole objective is to identify a money making opportunity.

Surely the council can only have had a complete change of policy as a developer can relieve them of any of the work and financial commitment involved in the opportunity proposal. Otherwise why now this complete about turn?

You are failing in your duty of for a local community and taken an easy and disgraceful decision

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the new local plan.

My areas of concern:

Lack of protection of Green Belt.

Disproportionate housing development in our area, overloading schools, health services and public transport stations.

Traffic concerns on trunk roads and lanes.

Air pollution from thousands of extra cars, affecting elderly people and children.

Pedestrians and cyclists safety on overcrowded local roads with no footway.

No guarantee of enough affordable housing for young families.

Answer (if comment is on questions 1-7 of the questionnaire): ()

A43 Garlicks Arch

The potential increase from 400 dwellings at this site is extremely harmful to the rural nature of the surrounding villages and will cause coalescence of these lovely villages and will have a huge impact on our already congested roads.

The inclusion of 6x Travellers plots with associated storage facilities is entirely inappropriate in a rural environment within the Greenbelt and is not identified as a need within the Local Plan and is out of scale with the proposed development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/56  Respondent: 10826593 / Mia Jones  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to let you know that I object to your plans to build on our green belt by putting over 400 houses and warehouses at Garlick Arch, Burnt Common, I moved to the village and paid a premium to do so, so I could bring my children up in a lovely village life and not bought up in a built up area, if I wanted to live in a built up area I would have moved to one! so having the green belt areas THAT SHOULD NOT BE BUILT ON, ensuring an nicer way of life. As it is living in the village has many more problems without adding more, the amount of traffic constantly cutting though, to reach the A3 makes going to work and driving to school a head ache, by you consenting more houses to be built, would be pure madness, the roads are just not built for the volume of traffic now let alone adding congestion to it, even by adding an extra road, I really can't see that, that will help. I'm sure you are aware, there are not enough schools in the area, it took me a long stressful time to secure school placements for my children, and getting into my local and nearest school was hell! By building 400 homes, you are looking at around 800 people plus moving in, where on earth do you think these children will go to school? As far as the GP surgery goes that is also at its limit, and getting an appointment to see your doctor is a joke, as there are not enough appointments to give out to the volume of people we have registered there now let alone adding another 800 plus people.

By sneaking these plans in at last minute is so out of order, this area SHOULD NOT BE REMOVED FROM THE GREEN BELT, and at the rate you are going both SEND & RIPPLE will no longer be villages, they will turn into as mass of houses and into a town, and that nobody wants to see happen, your plans for all these extra houses is NOT wanted or NEEDED.

These plans are new and they were not included in plans before, they are not needed on top of the 13,860 already proposed for the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I moved to Send to live in the quite and pleasant village in the GREEN BELT when I retired some twenty years ago.

I OBJECT MOST STRONGLY THAT CONTRA TO ALL PROMISES FROM THE LOCAL COUNCILORS YOU WANT TO DESTROY MY PEACE AND PLEASURE IN LIVING IN THIS VILLAGE.

I object in particular to the plan to build 400 houses and industry at GARLICKS ARCH SITE as this will mean an unbearable load on local roads, Doctors, and schools.

I object to the development of the A3 junction with 2000 houses at Wisley and 1859 houses at Blackwell farm as this will give more traffic than the present road system can take. In particular heavy lorries preventing access from my road to the traffic system .

I object to the Send Hill plans to spoil the look of a quite road and give more problems of traffic flow in this area.

I object as Guildford Town has more available space on brown field sites that should be used. I do not want to be part of Guildford or Woking I want to stay in A VILLAGE.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Again we are faced with proposals that appear to have been put forward with little thought and imagination and with no respect or regard for the environment or the people and wildlife who live within it. I am shocked and saddened at the radical proposals put forward that would effectively destroy residents quality of life. Recently a medical appointment in Woking was missed as I could not drive into Woking from Ripley village within 35minutes? I can only guess as to the traffic situation on the local narrow lanes and roads should this large scale development take place?

I moved to Ripley village in the borough of Guildford to enjoy the character of this charming village and beautiful surrounding countryside, believing it would be protected as promised by its green belt status. If local government believe these are good proposals, I really need to think about packing my bags.

Ripley village has recently seen a fair amount of housing development (most has been sensible and measured, in keeping in character, smaller scale housing on re-used sites. I have supported these projects and believe that it is sufficient for local needs and do not support any larger scale building proposals in Ripley village for the moment (if we are to retain the essence of the character).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

East and West Horsley proposals.

Unthinkable to remove these precious, tranquil villages from the green belt.

West - the number of proposed houses here would change the very nature of the village forever.

The Narrow lanes without footpaths are completely unsuitable for the proposals.

Imposes an unsupported burden on the current infrastructure and services, totally unsuitable.

Enforces draconian development proposals totally unbalanced and unsustainable dramatically changing the character of West Horsley.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Ockham and Wisley Airfield new town

Local transport potential is poor (local bus services have been or are about to be cut). It is about as far from a railway station as it is possible to get in this part of the borough. Local roads are narrow winding country lanes with no spare capacity.

Emissions are a serious health hazard to people in any dwellings within 500m of a motorway. The closeness of the A3 and the M25 make the health risks a problem.

Dangerous to have more traffic arriving on an already hazardous area (A3 junction).

The charming villages of Ockham, Wisley and surrounds would be completely swamped and ruined. Unacceptable amounts of traffic sent into Ripley village!

The merging of villages!

If the Airfield site were to accommodate the proposed number of ‘affordable’ homes, the impact would effectively destroy the village altogether. The character of the area would alter irretrievably and for the worse.

In my opinion this site should be returned to needed agricultural land as previous.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Surrey Hills proposals

No to re-assessment of the village boundaries, no to development proposals outside the settlement areas all within an area classed as Outstanding Natural Beauty!

This is precious countryside valued for its beauty and wildlife that we all enjoy for our recreation.

Lastly I would like to know where are all the new home owners are going to work as I do not believe there are sufficient employment opportunities locally to support these radical plans and therefore travel will be required. As previously mentioned a greater demand on already overstretched services such as schools, healthcare, hospitals etc would be required. I already have to wait two or more weeks to see my GP.
Where is the evidence that all these homes are absolutely necessary and will the developers properties be affordable? I believe it is essential to identify brown field sites, largely in the urban areas first, either available now, or which could become available in the future plan term and what their capacity is.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I also believe my environment is worth fighting for to enable future generations to enjoy the precious green belt. I object and will attempt to make my voice heard through any legal means, including my vote.

Stop the ever increasing sprawl of London boundaries! Investment should be made to help the growth and regeneration of other regions of the country regarding employment, infrastructure and housing. Unfortunately we cannot all live in the South East!

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
I object to the unfair imbalance of the Plan across the borough. With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most planned on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to removal of Brownfield site (A34) from the Plan. Site A44 in Broadford Business Park has also been removed. This is another brownfield site that has already been developed. The Council’s claims to “have adopted a ‘brownfield first’ approach” (page 5) but this is clearly not the case, and is contrary to national guidelines.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I strongly object to removal of Brownfield sites (A4) from the Plan
Site A4 in Guildford has been removed. This is a perfectly suitable housing site within the town centre and therefore with sustainable infrastructure and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site in favour of commercial retail – thereby effectively substituting Green Belt land for retail development. This proposal is totally unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I strongly object to the increase in housing proposed in Tannery Lane (site A42)
This has been increased by a third since the 2016 version of the Plan and will have a significant impact on the already highly congested local rural road network around Send. This proposal appears in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." Despite this statement there are no proposals to improve the local roads, instead.. to add more junctions with the A3 thereby increasing congestion on the Trunk and Local road network. A totally inappropriate site and a very worrying proposal for local residents!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:
“We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this statement in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and therefore should not go ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch
The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and therefore is not compliant with the minimum of 500 as stated in section 4.2.24 of the Plan.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch
The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages. Ripley village has already recently provided a number of new dwellings and re-development. Further proposed local development and loss of green belt will adversely affect the character and increase traffic to an already busy location (especially when traffic incidences occur on the A3 and M25)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch
GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were:
a) The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, … (site allocation A25) [ than the Burnt Common site did ]
b) The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available and therefore there is no reason for Garlick’s Arch to be included.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A50

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan itself is inconsistent in respect of traveller sites. A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots …” Clearly A50 more than covers the total "need" of 8, (page 40, 4.2.22.) and therefore there is no “need” for the provision regarding the site A43 Garlicks Arch. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. The Council has a duty of transparency especially regarding such highly contentious issues. It appears the Council is neglecting its duty?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version states: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

The developer isn’t required to provide any ‘affordable’ homes, only to make a negotiated payment to the Council. This is very unlikely to result in the construction of any ‘affordable’ homes’.

Furthermore, the 2016 Plan stated (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses]. This statement has now been removed thereby accepting that needing to make greater than normal profit IS to be an acceptable reason not to deliver affordable homes.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the removal of Send Business Park from the Green Belt (4.3.15). Send Business Park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification whatsoever for it’s insetting (removal) from the Green Belt, interesting that GBC have not attempted to offer a justification? Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

I object to the hiding of development by “deferment” (A24, A25, A26, A43) This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects: i) to hide the number of houses actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!) and ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to building 400 houses and 7000 sq metres of industrial space at Garlick’s Arch, opposite Send Marsh Road. The site floods and is covered by ancient woodland. The industrial space is not needed in this area; there is already an industrial area at Slyfield. Guildford’s housing requirements have been shown to be grossly exaggerated. With proper use of brownfields sites this Green Belt site is not required.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the exaggerated “housing need” figure of 13,860 which is far too high and results in the completely unnecessary development of the Green Belt.

4. I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford’s urban brownfield areas much closer to existing transport hubs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Local roads unable to cope with the increased traffic gridlock in Ripley High St, Newark Lane, Send Rd/Send Barns Lane, due to large scale housing development and new junctions on the A3 would just encourage more traffic into the area on roads are already very busy and often jammed at peak times. the planned house building proposal would greatly increase traffic leading to peak time gridlock unless all local roads were widened and new link roads/bypasses built.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Guildford Borough Council’s Proposed Submission Local Plan

1. Taking any land in the borough out of the green belt
2. Building a new town on Wisley Airfield

Building on green field sites throughout the borough
All greenbelt designated areas must be retained to preserve agricultural land for the production of food and the countryside for leisure/tourism.

Leave the greenbelt around Guildford alone, otherwise subtle erosion will mean the borough will resemble Greater London by 2031!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

A more reasonable house building target be reached and agreed by the Guildford residence, hopefully keeping the balance and character of the borough.

The revised housing development target could be met by building on redundant factory and office/commercial sites.

Answer (if comment is on questions 1-7 of the questionnaire): ()

10. I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. The Council has a duty of transparency especially regarding such highly contentious issues. It appears the Council is neglecting its duty?

13. I object to the removal of Send Business Park from the Green Belt (4.3.15).

Send Business Park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification whatsoever for it’s insetting (removal) from the Green Belt, interesting that GBC have not attempted to offer a justification? Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
9. I object to removal of Brownfield site (A34) from the Plan

Site A44 in Broadford Business Park has also been removed. This is another brownfield site that has already been developed. The Council’s claims to “have adopted a ‘brownfield first’ approach” (page 5) but this is clearly not the case, and is contrary to national guidelines.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

8. I strongly object to removal of Brownfield sites (A4) from the Plan

Site A4 in Guildford has been removed. This is a perfectly suitable housing site within the town centre and therefore with sustainable infrastructure and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site in favour of commercial retail – thereby effectively substituting Green Belt land for retail development. This proposal is totally unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
11. I strongly object to the increase in housing proposed in Tannery Lane (site A42). This has been increased by a third since the 2016 version of the Plan and will have a significant impact on the already highly congested local rural road network around Send. This proposal appears in contradiction to section 2.14a of the Plan which states “Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” Despite this statement there are no proposals to improve the local roads, instead, to add more junctions with the A3 thereby increasing congestion on the Trunk and Local road network. A totally inappropriate site and a very worrying proposal for local residents!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”. The 2017 version states: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

The developer isn’t required to provide any ‘affordable’ homes, only to make a negotiated payment to the Council. This is very unlikely to result in the construction of any ‘affordable’ homes’.

Furthermore, the 2016 Plan stated (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses]. This statement has now been removed thereby accepting that needing to make greater than normal profit IS to be an acceptable reason not to deliver affordable homes.

<tr>
<th>1. I object to Guildford Borough Council (GBE) not following the correct process of consultation with Send residents.</th>
</tr>
</thead>
<tbody>
<tr>
<td>In April 2016 the vastly excessive 2014 plan to build 430 houses in Send had been reduced to 185, a far more reasonable figure in relation to the size of the village. The new plan is now for 485 new houses, more than twice as many as the April plan said we needed. This should surely trigger full consultation under Regulation 18, as it will have such an impact on the village, rather than Regulation 19 which GBC are trying to do.</td>
</tr>
<tr>
<td>I object to GBC not taking evidence into account when producing the current plan.</td>
</tr>
<tr>
<td>The Employment lands Needs Assessment 2015 (ELNA) shows an 80% reduction in employment space from the previous ELNA of 2013. This surely indicates that there is no need for any further industrial space in Send Village. I object to plans for further unneeded industrial development in Send Village.</td>
</tr>
<tr>
<td>I have concerns over the assessment of housing need in Guildford. If the population of Guildford is to grow by 20,000 in the planned period this would require 800 new homes, based on the average 2.5 persons per home. There is not a need for 13,500 homes and the use of foreign students to inflate the figure in The Strategic Housing Market Assessment 2015 (SHMA) is wrong.</td>
</tr>
<tr>
<td>There is enough brownfield land in Guildford to build half of the required 800 new homes. I strongly object to GBC planning to take Send and Ripley out of the greenbelt.</td>
</tr>
<tr>
<td>I find it surprising that GBC are prepared to make such far reaching decisions when they did not have their own Transport Assessment to guide them. It suggests they want their plan to go through, no matter the consequences to Send residents. The infrastructure of Send and Ripley will not cope with such a high increase in population as envisaged under these new plans.</td>

<thead>
<tr>
<th>1. I object to the fact that this news it eat Garlick's Arch was not included in the Regulation 18 draft and so has not been consulted on previously. This is, surely, wrong.</th>
</tr>
</thead>
<tbody>
<tr>
<td>I object to the proposed development of land at Garlick’s Arch for housing and industrial use. We actually need 800 new homes in Guildford although GBC have suggested 13,860.</td>
</tr>
</tbody>
</table>
There is no need whatsoever to develop Green Belt land, which includes significantly important woodland, to build yet another 400 homes.

I object to the proposal for 7,000 sq m of industrial and warehousing at Garlick's Arch. It is simply not needed, as the ELNA 2015 shows an 80% reduction in employment floor space since the previous assessment. If there is a need in Guildford there are previously approved plans for industrial use at Slyfield where existing infrastructure can support development. If the Garlick's Arch development went ahead this would include a new 4-way junction with the A3 at Burnt Common that Send simply couldn't cope with.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3077   Respondent: 10828961 / Carey Lodge  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to plans for a 4-way interchange at Burnt Common for several reasons. There is no need to build over Green Belt land to provide this interchange. If this junction was developed it would result in a huge increase in traffic through Send on the A247. The road is already struggling with traffic at peak times and this is only going to get worse when the new schools open in Send Barns lane. Increased traffic through the village will probably result in calls by groups to restrict parking to allow traffic flow, further implying on residents of Send and detrimental to local businesses. If the 2,000 houses proposed for both Wisley and Burpham go ahead it will only increase traffic further. I object to this proposal as Government guidance to planners was that Green Belt should only be built on if there are exceptional circumstances requiring this to happen. There are no exceptional circumstances at Garlick's Arch.

Attached documents:

Comment ID: PSLPS16/3089   Respondent: 10828961 / Carey Lodge  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
5. Policy A44. I object to the plan to develop land west of Winds Ridge and Send Hill. Again, this is a new site and has such was not included in the Regulation 18 draft and has not been properly consulted upon previously.

I object to this development of protected Green Belt land. Last year (2015) three pairs of Lapwings attempted nesting on land adjacent to this site. These are Red listed birds. This development would have a serious impact on the landscape of Send Hill and Potters Lane.

I object to the plan for two Traveller Pitches on this site. There is no need for any further Pitches in the Borough. The land on this site is old landfill with documented hazardous waste. Government guidance to planners was that Green Belt should only be built on if there are exceptional circumstances requiring this to happen. There are no exceptional circumstances at Send Hill.

I strongly object to the cynical manner in which GBC has added unnecessary housing and industrial proposals to our Local Plan. I cannot believe that it is legal for the development of a large road junction with huge impact to the surrounding area to be shoehorned into this plan without proper consultation. I object to GBC ignoring Government advice that Green Belt land must remain protected except in exceptional need, which does not exist in this local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6669  Respondent: 10828961 / Carey Lodge  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Policy P2. I object in the strongest terms to any suggestion that Send and Ripley are to be removed from the Green Belt. This essential protection stops uncontrolled development filling in the green spaces between settlements. The whole nature of Guildford and its surroundings is a country town surrounded by villages and green spaces for residents and visitors to enjoy. The actions of the GBC have already shown how important it is for Send to remain under the protection afforded by Green Belt legislation. The Wey Navigation is used by thousands of people in boats, on cycles and walking the countryside in this area, which would be detrimentally effected by further building on the land along the canal. There would be significant pressure to do so if protection was removed and, as shown by the approval of plans for a new marina in Tannery lane, the GBC cannot be trusted to follow the will of Send residents. Land in surrounding boroughs are also facing threats of removal from Green Belt protection. There must be a whole landscape approach to development. Current proposals are threatening to cover this part of Surrey with concrete. GBC have made repeated promises to protect the Green Belt but have failed to deliver on them. Taking Send out of the Green Belt would put huge pressure on the green spaces within the village for unwanted and unnecessary development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to Policy A42, Clockbarn Nursery, Tannery Lane.

This policy INCREASES previous proposals by a third from 45 to 60 homes. This is far too many. Tannery Lane is very narrow and the junction with Send Road is busy. this proposal will only make that worse.

Thousands of people use the Wey Navigation and its towpath recreationally every year. They do so to enjoy the countryside and views along the canal. This proposal will seriously affect the canal between the Broadmead Bridge and Tannery bridge, already built up on too much on the Send bank.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the Policy A43 change at Garlick’s Arch because:

It ignores all the thousands of previous objections made by local people

There is no proven demand for Travelling Showpeople plots in this location and Guildford has more than enough traveller plots.

It is beautiful permanent Green Belt and no “exceptional circumstances” exist to allow development on it. Almost every week in the media Government Ministers state that the Green Belt must be protected and only developed where overarching need is proved and yet Guildford Borough Council seem determined to destroy this area of ancient woodland that existed at the time of Elizabeth 1.
It will cause over-development of our village and the number of homes is excessive. It will join up Ripley and Send and defeat the key purpose of Green Belt. It is subject to frequent flooding and is currently a flood zone 2 allocation. It is contaminated by lead shot accumulated over fifty years. It will generate excessive traffic that will block up the local roads of Send and Ripley.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**I object to Policy A58** Burnt Common, London Road

It was deleted from the 2014 draft because of all the objections made previously.

There is already land at Slyfield that was planned to take further industry but this has been ignored. Send is a village, separated from Ripley and Send Marsh by narrow but important areas of green belt and will lose all character if these are built over. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt.

The word "minimum" is a change from the previous "maximum" in the 2016 plan and since that time there has been a decline in demand for industrial land. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt.

The impact on small surrounding roads will create traffic gridlock.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposal Policy 2 at paragraph 4.3.15, to inset Send Business Park from the Green Belt because:

It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation

There is highly restricted vehicular access along Tannery Lane in both directions

Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

I object to the insetting of other land within Send. Already developers are looking at building on the School playing fields which, it is proposed, will be removed from green belt protection. They have even asked me my thoughts on selling them part of my garden! This is in addition to all the other proposed building and extra houses recently, currently under review and proposed on residential plots. This is all too much for the small village of Send.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object in particular to the proposed development at Garlick’s Arch. The proposed 400 houses and commercial units would completely swamp existing local roads, schools & medical facilities. This would be further exacerbated by the proposed new interchange onto the A3 at Burnt Common that I also strongly object to. Current traffic levels are already too high around Burnt Common. Expanding the A3 junction would cause gridlock all day along A247 and Portsmouth Road. I also object to the Garlick’s Arch proposal on the grounds that it was not included in the previous consultation in 2014, and was added to the current proposed plan at very late notice, preventing proper due diligence from all interested parties. I also object to the proposed commercial development, as I believe it would make far more sense to expand the current commercial Slyfield area where I understand land is available.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to removing Send from the Green Belt. Green Belt exists for very good reasons to help protect the countryside from inappropriate development. Once areas are removed from the Green Belt and developed, there is no going back. If the GBC Plan is not reconsidered the scale of development in the Green Belt along the A3 corridor would completely change the character of the area and cause considerable congestion as the A3 and local roads would not be able to cope. The A3 is already congested without this scale of development.

| **Answer (if comment is on questions 1-7 of the questionnaire): ()** |
| **Clockbarn Nursery Policy A42** |
| I object to the expanded size of this plot from 45 to 60 homes in an area with very narrow existing roads. Currently, there are significant traffic jams in the immediate areas during morning and evening, and adding 60 homes will cause considerably more congestion on roads that are not designed for such levels of use. Furthermore, the views and sense of local countryside in this area will be lost with this increase in new housing. Existing Send school and medical facilities will not be able to cope with a further 60 families needs and hence new residents will have to travel further to schools and medical facilities outside the area causing further traffic congestion. |

| **Garlick’s Arch, Policy A43** |
| I object to the revised proposal for this plot as it will significantly eradicate the green belt area that delineates Ripley and Send, and create very significant increase in traffic from 400 homes that will totally swamp the existing modest local roads, especially Portsmouth Road and the A247. These roads are already under significant pressure from current population demands with frequent traffic jams delaying journeys to school and work. In addition, local infrastructure, especially schools and medical facilities will be swamped by the significant extra demand, requiring people to traffic further to reach such facilities in other areas, further exacerbating the traffic issues. I recognise the need for some new housing in the area, but 400 homes is totally disproportionate for this relatively small area. |

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Burnt Common, Policy A58**

I object to the new allocation of a minimum of 7,000 square metre for industrial or warehousing use. I understand this was deleted from the 2014 plan, based on objections made at the time, so it is totally unacceptable to re-introduce into the latest draft Plan. I strongly object to the use of the word “minimum”, as Plans need to be capped rather than act as licence for uncontrolled expansion of the area. It is also unnecessary to build industrial plots on existing green belt area, where there is capacity to expand existing industrial areas such as Slyfield. The increase in commercial traffic around the Burnt Common area will cause inevitable gridlock and place an unacceptable burden on local residents, as traffic will need to use the small Burnt Common roundabout.

I do hope my objections will receive due consideration in arriving at the final Local Plan

I object to POLICY D4 - Development in urban areas and inset villages

- No commitment to expand social housing or accommodation for people who can’t afford so-called affordable homes.
- Not enough new homes in urban areas, despite demand and need for urban regeneration and protection of Green Belt.
- Objectives for inset villages cancelled out by plans for excessive housing growth there.
- Too much emphasis on traditional shops, when a lot of this sector is in terminal decline.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6634  Respondent: 10829121 / Julie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY E1 - Meeting employment needs

- The evidence base is unreliable;
- There is unclear differentiation between B class uses;
- Only high value-added business uses, contributing to a modern “knowledge economy”, are desirable, not low-grade, low-employment warehousing which is also land hungry;
- Industrial and commercial businesses must be concentrated in the urban area or existing business parks (e.g. Slyfield) not in the rural environment which the infrastructure is unable to support
- The rural environment must support micro- or high-tech businesses, agricultural industries, and tourism, and these sectors must not be damaged by general industrial development which is inappropriate

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6635  Respondent: 10829121 / Julie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to POLICY E2 - Location for new employment floorspace

- It would be more sensible to confine all new office and research and development (use Class B1a and B1b) floor space to Guildford town centre.

- I oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6636  Respondent: 10829121 / Julie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY E3 - Maintaining employment capacity and improving employment floorspace

- Puts unnecessary obstacles in the way of using brownfield land into useful residential housing, contrary to government policy

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6638  Respondent: 10829121 / Julie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY E4 - Surrey Research Park

- Subordinates public planning policy to the University of Surrey’s private, commercial enterprises (not its public academic purpose).

- No cost/benefit analysis of harm to Green Belt involved in extending research park.

- Waters down research purpose of park, turning into a general business park.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to POLICY E5 - Rural economy

- Incompatible with high housing numbers proposed for rural areas elsewhere in the plan.
- Insetting and settlement boundary extension endanger appropriate rural activities listed that depend on maintaining rural areas’ character.
- Town-centre uses for rural areas contradict government’s localism policy and need to consult and protect village environments.

- Established commitments to high-speed rural broadband and mobile coverage watered down despite 2014 consultation responses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to POLICY E6 - The leisure and visitor experience

- Danger of overdevelopment: success doesn’t depend on building “attractions” which can harm heritage and rural settings. No case made for creating new ones.
- No policy of opposing reduction in rural hotel capacity.
- No definition of what added value interventions by Council can make to normal visitor market mechanisms.
- No policy of supporting Guildford countryside as its prime leisure and visitor asset, whose value rises as London gets bigger and busier.
No vision of what the ideal visitor experience of the borough actually is and how to support its various elements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6642  Respondent: 10829121 / Julie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY E7 Guildford Town Centre

- No statement in policy wording of value of Guildford’s rural setting and views.
- No consideration of Town Centre Master Plan, GVG proposals or station redevelopment plans.
- Proportion of new housing in town far too small. Development pushed into countryside, ruining the latter and harming urban regeneration.
- No brownfield register.
- Too much big retail, despite online shopping revolution and decline of traditional high streets internationally. Futile to try to turn Guildford into Woking or Kingston.
- No measures to support small, niche retailers in town, e.g. through business rates.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6643  Respondent: 10829121 / Julie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E8

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY E8 - District centres

- Too much scope to expand rural retail centres to justify major housing expansion across the countryside, despite lack of demand. Will spoil character of villages while harming Guildford’s role as a retail hub.
- No measures to support existing rural shops and services, e.g. through business rates
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/6644  Respondent: 10829121 / Julie Brown  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy E9

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY E9 - Local centres

· No need for retail development “adjacent” to rural centres for same reason as Policy E8.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/6626  Respondent: 10829121 / Julie Brown  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY H1 – Homes for all

· The policy doesn’t set any constraints on building.
· Housing mix based on growth and demographic assumptions and unreliable SHMA that weren’t put out to formal public consultation and wasn’t scrutinised by Councillors.
· I support higher density development in the urban area
· Fails to compel University of Surrey to use its thousands of planning permissions and existing space, such as car parks, for student accommodation.
· Lets University off the hook of accommodating all its students, so as to free up houses for the most needy in town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to POLICY H2 – Affordable homes

- Using the official definition of Affordable is not appropriate. ‘Affordable homes’ in this area are not affordable! Pushing for these homes just means pushing for more development.
- The viability clause lets developers off the hook of providing even these (non-) affordable homes. It is too open to manipulation.
- Contradicts government policy to develop less advantaged regions of the UK. People don’t have to live and work in Guildford but should be encouraged to move to cheaper, less congested areas.

This policy won’t affect market forces or house prices. Guildford is too small and too near London to influence these, however many homes it builds.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to POLICY H3 – Rural Exception Homes

- It loosens the criteria by allowing “market housing” and development that changes the housing mix. Developers would be able to override NPPF “exceptional circumstances” and other restrictions to build large houses in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to POLICY 14 Green and blue infrastructure

- Infrastructure considered here as an afterthought, rather than pre-condition of development. Should be a key issue for the rest of the plan.
- Excessive housebuilding in countryside not supported by any funding or provision for infrastructure.
- Heavy focus on building on greenfield sites inefficient and unnecessary: cheap for developers but much more expensive for the public who have to fund the infrastructure.
- Draft CIL scale discourages use of brownfield land first.
- No plan for organic increase in existing traffic congestion, let alone once thousands of houses are built across the countryside. Local roads hardly considered. Green Belt being eroded before road widening/improvement plans certain, encouraging over-development of greenfield sites.

- All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6629  Respondent: 10829121 / Julie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P1

I object to POLICY P1 – Surrey Hills Area of Outstanding Natural Beauty

- This policy weakens existing protection when it should strengthen it. It is dependent on the Surrey Hills Management Plan. The latter welcomes housing development. Even major (undefined) development in the AONB would be permitted if exceptional (undefined) circumstances could be demonstrated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6630  Respondent: 10829121 / Julie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY P2 – Green Belt

- No declaration of support for protecting the Guildford Green Belt, contrary to NPPF and government statements.
- No evaluation of value of local Green Belt as a public and private asset: it’s just treated as potential building land with a few inconvenient restrictions.
- Impact of Green Belt development on local agriculture ignored.
- Impact on rural leisure and tourism ignored.
- Impact on flood control ignored.
- Impact on carbon sink and knock-on effects for air pollution and climate change ignored.
- Impact on biodiversity ignored.
- Impact on natural heritage ignored.
- Impact on water catchment ignored.
- Impact on room for public space amenities (parks, cemeteries, waste facilities etc) ignored.
- Impact on rural business (e.g. mineral mining, film making) ignored.
- Impact on natural landmarks and views ignored.
- Harm to public health and wellbeing (physical, psychological) ignored.
- Allows excessive levels of development in breach of views expressed in last consultation and Conservative Party manifesto commitments at the last local elections.
- Has allowed ruling Councillors to argue that there is an acceptable percentage of Green Belt that should be sacrificed to development, when no such rule exists in the NPPF.
- Ignores alternative approaches, such as fair burden-sharing under which settlements would undertake to accommodate new development in proportion to their size.
- Disproportionate amount of development (most of it, in fact) to be in Green Belt. Too few new homes in urban areas where most people (especially the young and less privileged) want to live. This will act against much needed urban regeneration.
- “Insetting” of most villages disproportionate and unjustified in terms of their contribution under the NPPF to the purposes of the Green Belt. Based on flawed Green Belt and Countryside Study. Idea that most Guildford villages do not contribute to “openness” is subjective.
- Major settlement extensions allow indiscriminate housebuilding, as irregularly shaped villages are squared off to enclose green fields.
- Overall harm to Guildford Green Belt unjustified by any objective development need post-Brexit.

- Ignores most of NPPF 17 stipulations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6631  Respondent: 10829121 / Julie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to POLICY P3 – Countryside (i.e. beyond the Green Belt)

- Gives Ash and Tongham more protection than rest of borough, including existing Green Belt. But they don’t contribute to preventing London sprawl.
- Special treatment of ward represented by current Council Leader and his predecessor. Politically biased.
- A minor extension of Green Belt in one place does not justify its major destruction elsewhere (the inset villages).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6632  Respondent: 10829121 / Julie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY P4 – Flood risk and water source protection zones

- Inappropriately limits development of urban, brownfield, hardstanding sites, pushing development unnecessarily into the countryside

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6633  Respondent: 10829121 / Julie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY P5 - Thames Basin Heath Special Protection Areas

- Compensation mechanism too feeble to provide protection.
- Cynical encouragement of SANG to justify nearby development in protected areas. Does not extend protection or amount of green space, and can damage them (e.g. dog and cat attacks on wildlife).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Attached documents:

Comment ID: PSLPP16/6624  Respondent: 10829121 / Julie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object particularly to the proposed development at Garlick’s Arch and Gosden Hill Farm. The developments are out of proportion to the surrounding area and do not qualify for exceptional circumstances required to take them out of the Green Belt. In addition, I object to the planning policies as follows.

I object to POLICY S1 – Presumption in favour of sustainable development

- No definition of sustainable development given, no reference to its importance in the NPPF, no guidelines for applying it to planning.
- No mention of Green Belt, Guildford’s greatest legacy by far to Sustainable Development. No commitment to protecting it.
- No statement of how economic, social and environmental impacts should be balanced.
- No reference to most of the NPPF Core Planning Principles.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6625  Respondent: 10829121 / Julie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY S2 – Borough Wide Strategy

- No justification given for 13,860 housing need figure. Figure based on a secret formula used by consultants and never seen by anyone on the Council or by the public. Council has failed to seek its disclosure.
• 13,860 figure confuses the OAN with a housing target. No definite housing target given, leaving too much scope for the Council to make one up. I can’t understand how we’re being consulted when we don’t know how many houses the Council want to build, taking all the constraints into account.

• Figures based on a Housing Market Area that ignores 2 neighbouring districts (Rushmoor and Mole Valley) and is much too small, since most people commute or travel far outside the Area to shop or study. This distorts the figures: no reason why Guildford needs to build nearly twice as many large housing estates as the rest of Surrey put together, or half of all sites over 100 units.

• High numbers involved would transform the character of the borough from mainly rural/Green Belt to urban, creating a corridor of development out of London as per Woking or Croydon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy A43 change at Garlicks Arche - 400 homes and 6 travelling show people plots

The plan has ignored thousands of objections from the local people of Send

There is no proof of the need for Travelling Show people plots in this location

The Village of Send is on Green Belt Land and therefore should only be built on in exceptional circumstances

The increase in houses will cause over-development of our villages

The number of homes is excessive and is not necessary

It is an ancient woodland and should be preserved

It goes against the Green Belt Policy to prevent urban sprawl

The site is currently a flood zone 2 allocation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID:  pslp172/1689  Respondent:  10829121 / Julie Brown  Agent: 

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object to Policy A58 change at Burnt Common - Minimum of 7,000 sq m of industrial or warehousing

The word 'minimum' has been changed from 'maximum'

There is no need to build industrial and warehouse development on Green Belt Land - there are no exceptional circumstances

There will be a huge impact on local roads by the increase in traffic

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

• I object to the lack of immediate provision for new schools
i object to the lack of any immediate provision for Doctors surgeries.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Attached documents:

Comment ID: PSLPA16/3246  Respondent: 10829281 / Kevin Nicholls  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Send Village being removed from the Green Belt. Send sits in the green belt between Guildford and Woking preventing a conurbation. This clearly goes against local Councillors promises to protect the green belt and they should be fighting proposals for any threats to this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to Policy A 43. 30 - Land at Garlick’s Arch, Burnt Common, designated for 400 houses and 7000 sq m of industrial and warehousing. This site is new and was not included in the regulation 18 draft and has not been consulted upon previously (as I have alluded to above). This is a sensitive conservation area covered by ancient woodland dating back to the 16th century. There are no exceptional circumstances. The proposed industrial development of 7000 sq m is simply not required, since the the latest ELNA 2015 shows a reduction of 80% in required employment floor space from the previous draft plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the creation of an interchange with the A3 at Burnt Common. Having witnessed the exponential increase in traffic over the last few years and the effect it has had on local roads and the M25, this will be nothing more than a disaster for Send and the environs. There is nothing within the local plan to mitigate against the effects of such increases, which can only mean further jams and deadlock on our local roads. As a commuter who uses these roads, I am particularly concerned about the effects on the A3 and M25.

I object to the development of 40 houses and 2 travellers’ pitches at Send Hill. This is an inappropriate location because of restricted access caused by narrow width country roads. The subsoil of the proposed site contains documented unsafe landfill waste registered at GBC. Any development there would spoil a high amenity area set in beautiful countryside. This site is also new, was not included in Reg 18 of the draft plan and has not been consulted on previously.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The creation of more housing will impact on the:

Roads - already in a bad state of repair; congested (frequently the 5 minute drive through Ripley from the A3 takes 15/20 minutes due to the increased traffic through the bottle neck in the village; Send has similar issues); unpassable due to increases in cars who then park on roadsides restricting traffic flow on side roads and severe traffic congestion on the A3 around the M25 and Guildford.

Public transport - trains overcrowded

Doctors/dental surgeries/hospitals - demand for appointments; treatment and operations will increase with the influx of new residents to the area but which is currently under pressure.

Policing/emergency services - the local Police station in Ripley and Woking fire station has closed; an increase in local population would necessitate more emergency service cover - will this be factored in? If so who will pay?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am a Send Village resident of 25 years and am extremely concerned about the planned developments, not only in Send but also in the surrounding areas. These plans will only serve to destroy the way of life we have enjoyed for so many years. I am also appalled at the underhandedness of the council in the way it has tried to shoehorn the plans in at the last minute.

I therefore object to the local plan but in particular:

I object to Send Village being removed from the Green Belt. Local councillors and central government gave a clear election promise to protect the Green Belt and this reneges on it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Please give extra time and thought to the concerns raised by myself and others regarding any infringement on the Green Belt and local infrastructures - once it goes there will be no turning back and a decision taken today could impact detrimentally on the future generations.

I am writing to object to the following:

- Policy A43 - Land at Garlicks Arch, Send Marsh.

I am extremely disappointed that GBC have decided to completely ignore the significant weight of objection from its local people and return with an even worse set of proposals.

It proves that GBC would rather prioritise a few ‘travellers’ than heed the comments from thousands of local residents - shame on you!

The latest plan will have an even worse affect on our local road networks and infrastructure, the consequences of which have been completely overlooked. The plan will destroy local green belt and devastate the villages of Ripley and Send.

The Burnt Common proposals were previously deleted from the 2014 plan due to the level of objections, so why have they been added now? To emphasise my point above, GBC have included the word ‘minimum’ in relation to the area to be considered, instead of ‘maximum’ from the previous plan. By threatening to increase the size of the industrial site, rather than decrease it, GBC have demonstrated they are not willing to listen to our concerns.

As a local resident of over 30 years, I am particularly worried about the impact the plan will have on our already congested roads. GBC’s own transport strategy recognises that the borough’s main roads are in ‘a bad place’ and yet are content to build thousands of homes without any contingency in place to manage the significant increase in traffic these plans will cause? I use the A3 trunk road every day so know what I am talking about.

The plan will also worsen the flood risk - why are GBC ignoring the current flood zone 2 allocation?

I hope GBC will come to its senses and recognise this is a flawed plan, completely disproportionate with the area and designed only to ruin local green belt and ancient woodland.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A42-44 Land at Garlicks Arch Burnt Common

I also object to the proposed development of some 485 houses and 2 traveller sites, which given the ratio of 2.5 people per household unit represents an increase in the population over 1200 people for the planning period. This is a substantial increase of people in a relatively small village area. Additional pressures on the local infrastructure are axiomatic, for example the Villages Medical Centre, local schools and like public services such as policing. I am unaware of any plans to increase this infrastructure, given the financial pressures on public authorities generally.

I note the traffic management proposals with regard to the A3 north facing slip roads to/from the A3 at Send ~Marsh/Burnt Common.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Comments/Objections on draft Local Plan

(Ripley, Burnt Common, Send Marsh and Send)

Would you please register my comments/objections on the above as follows:

1 Green Belt Issues

I am most concerned at the proposals for insetting of the above four villages, which as I understand it means removing these areas from the Green Belt.

I wish to register my formal objection to this proposal.

The insetting/removal of these four villages suggests that those areas do not make an important contribution to the openness of the Green Belt. Having referred to paragraphs 89-90 of the National Planning Policy Framework it appears that any new development construction in Green Belt areas will be considered inappropriate unless very special circumstances can be demonstrated. The Planning Authority will have applied this test and I am sure local residents will be interested to hear how this criteria was met.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners' views, or the costs involved in improving the infrastructure, currently outside their financial capability.

The methodology is also flawed as this plan has been formulated without regard to village Neighborhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

---

**Objections to Guildford Borough Council's new Draft Local Plan**

I strongly object to the proposal to remove the Horsleys from the Green Belt and to the proposal to extend the boundaries of the settlement areas.

I object to the increased number of houses projected to be built on land currently in the Green Belt, more than double the number proposed per year in a previous plan. The impact on the local infrastructure, already struggling, would be disastrous.

There is already too much heavy traffic on the narrow roads; parking at the stations, shops, medical centre and village hall is at times already impossible. Drainage is inadequate, water pressure at times pathetic.

The increase in the local population would cause too much pressure on the schools, medical facilities and other services.

I also object to the proposal to build 120 houses behind Ockham Road North, land already subject to flooding. It would be irresponsible to aggravate the problem.

I object to the proposed removal of the former Wisley Airfield from the Green Belt and the subsequent development proposed which would have an enormous adverse effect on the whole area, including critically the management of traffic at the A3 junctions.

I object to the whole creeping development stretching from central London to the Horsleys destroying the local countryside so essential to the wellbeing of the population. There are plenty of brown field sites which could be considered for development with far less detrimental effect on the country as a whole.

I trust these objections will be fully and responsibly considered in the consultation.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPS16/564  **Respondent:** 10829889 / Geraldine Leiper  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? (;), is Sound? (;), is Legally Compliant? (;)**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

---

I object to the detrimental impact on transport, local roads and road safety. A proposed development of 2068 homes would result in an estimated 4000 cars on already congested roads.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I object to removal of Former Wisley Airfield from the green belt. Under the NPPF no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to the continued inclusion of a site (Former Wisley Airfield now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee. Serious concerns about this site have been raised by Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the former Wisley Airfield (Three Farm Meadows), Allocation A35, is removed from the local plan with immediate effect.

What changes (2016)/ further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to a plan which proposes to build on the Green Belt, ample sites available without encroaching on protected green belt land.

What changes (2016)/ further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to Thames Basin Heaths Special Protection area (SPZ), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to strongly object to the revised local plan.

In particular ref A35, 3 Farms Meadows.

The local roads are at maximum capacity & the A3 is regularly gridlocked around junction 10 of the M25.

This development would be adjacent to RHS Wisley which is such a popular visitor attraction & is planning to increase its visitors which often causes problems on the surrounding roads already.

The Heathrow Beacon will remain according to NATS so this will drastically reduce these plans re height restrictions & distance required from the Beacon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I write to voice my strong objections to the above plan. Firstly I would point out that East Horsley is a rural village of character with narrow roads and green spaces; we are not and do not wish to become a District Centre. You must be aware that we already have vacant shop premises and have no available land space for more shops, warehousing, businesses, etc. I reiterate, we are a rural village and wish to remain so.

Thatchers and Ockham Road North, the two sites proposed for development in East Horsley are both on Green Belt land; I understand that Green Belt land can only be built on in exceptional circumstances - what are these circumstances? In addition I gather that GBC has pinpointed 3 further sites identified as LAA sites for future development, all on Green Belt land. I find this a deceitful move as these sites are not in the Local Plan and therefore information not widely known by the general public.

No mention in the Local Plan of infrastructure. The roads are congested, drains blocked, parking in the village is already a problem and Medical practice overloaded. Parking at both Horsley and Effingham Stations is full by 9.0 am.

I would like to know how GBC decided on a 25% increase in growth when the Office of National Statistics forecast a 15% growth rate. I understand new houses are needed but not on the scale you are proposing.

I object most strongly to the enormous growth in building on Green Belt land in the rural village of East Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to this site being on Green Belt land and that this plan has already been rejected by Guildford Borough Council.

I object to the plan because increased traffic on narrow congested rural roads will endanger lives. There is no space for cycle lanes and the access planned for the site is dangerous exiting from the A3. The parking facilities at both Horsley and Effingham railway stations are full to capacity.

I object to this plan because it will ruin the lives of many people who live in these attractive rural villages in Surrey.

Please remove this development from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have read your proposed local plan and particularly the suggestions with regard to East and West Horsley – including Wisley airfield.

I fully understand the need for a steady increase in new housing to meet the demands of a growing population. But your plan seems far too aggressive in its proposal to increase the size of settlement areas such as East Horsley and to effectively take the village out of the green belt. Based on previously declined proposals for Wisley airfield I fail to see how you could find a workable proposal to put a new town on this site without the essential amenities – it would become a strange ghetto.

The Horsleys should contribute to meeting the need for increased housing in the borough. But this should be done in a way that is sensitive to the current environment and without any need to remove green belt ‘status’.

I Object to your local plan as currently proposed for the Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp173/414  Respondent: 10830017 / Vicky Thornton  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
As a resident of East Horsley I write, to object most strongly to the Proposed Guildford Local Plan 2017.

The 2016 Local Plan had some serious effects on our village:

- The extension of the settlement boundaries of the Horsleys into the Green Belt
- The removal of the extended village areas from the Green Belt
- The proposal to develop six large housing sites and several smaller sites in the extended settlement area

The changes in the Guildford Local Plan 2017 are minimal, four of the original development sites remain, including the proposal for 2,000+ houses, plus sheltered/care homes, Gypsy/Traveller pitches employment/retail space and two schools on the former Wisley Airfield.

There were, I understand, over 30,000 objections to the 2016 Local Plan which identified a clear desire to limit expansion into the Green Belt. I see no evidence in the Guildford Local Plan 2017 that this plea has been heeded.

Scale of the Proposed Developments:

The developments will further aggravate the already overstretched infrastructure of both East and West Horsley. The road through East Horsley (Ockham Road North & South) is inadequate even now, and cannot be upgraded. Normal cars have to slow down just to pass each other in certain parts, and climb onto the pavement when a truck passes through.

The development plans for 2,000+ new dwellings plus considerable related infrastructure on the Wisley Airfield, is only two miles from East Horsley. I am of the opinion that the Horsley area will not be able to absorb the increased population, traffic and pollution.

It is not realistic to assume that the new town will restrict itself to the Wisley Airfield area. Their daily routine will spill into the surrounding areas including East Horsley. We do not have sufficient facilities, schools, surgeries and other services. Gas, electricity and telephone services in the area are already operating at full capacity on very old pipes, wires and exchanges. Local roads are too narrow and winding to take the existing traffic, and there is insufficient parking anywhere, even in front of most homes. The local roads were built in the 1930s or before, and are mostly no more than narrow lanes where cars have to slow down to pass each other. The access roads to East Horsley are narrow and winding and are not sufficient to handle even today’s traffic.

Has anyone filmed the traffic on Ockham Rd at different times of the day? If you did you would see that there is so much traffic on this road and so many heavy vehicles it is a miracle that there haven’t been any more collisions. This road is too narrow for current traffic let alone the huge increase we would suffer if development of Wisley Airfield and the Guildford Plan went ahead.

The scale of the proposed Wisley Airfield development is way out of proportion and way out of character to the existing infrastructure and the space available in this small, picturesque old village. The new town will completely destroy the special character of our historic village.

Station Parade a “District Centre”?

There is a clear misunderstanding of the nature of the facilities in our village centre, it would be completely inappropriate to target the area for future urban development. Please, get out of your offices and come and see the village in action on any normal week day and week end, see how the facilities, roads, drainage etc are already overstretched. As a certain tennis player often said: You cannot be serious with these proposals!

Green Belt:

The Green Belt is a policy for controlling urban growth. The idea was developed so as to have a ring of countryside where urbanisation would be resisted, maintaining an area where agriculture, forestry and outdoor leisure could be expected to prevail. The fundamental aim of a Green Belt policy is to prevent urban sprawl by keeping land permanently open, and consequently the most important attribute of Green Belts is their openness.
The Metropolitan Green Belt around London was first proposed by the Greater London Regional Planning Committee in 1935. The Town and Country Planning Act 1947 then allowed local authorities to include Green Belt proposals in their development plans. In 1955, the then Minister of Housing Duncan Sandys encouraged local authorities around the country to consider protecting land around their towns and cities by the formal designation of clearly defined Green Belts, to prevent urban sprawl.

The Guildford Local Community Plan 2017 does not prevent Urban Sprawl.

Eventually when all the unoccupied flats and residences in the city of London are occupied we will find that the expansion of the green belt was not required. Don’t build on it, it won’t be needed, we have enough housing in the London area we just don’t have the right laws to make sure it’s used correctly

In short I object to the Guildford Local community Plan 2017

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy 2. Taking Send Business Park out of the Green Belt is ridiculous this cannot be opened up for general commercial use, the road access is not in any way suitable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

It appears that little attention has been paid to the previous planning objections as allowing for the fact that we need more houses our part of Guildford has been targeted disproportionate.

I must object to the additional homes suggested for Policy A42 at Clockbarn Nursery from 45 to 60 this will cause gridlock for the centre of Send, together with the additional problems of erosion of the Green Belt and exacerbate flooding problems.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I Object to Policy A43 Land at Garlick's Arch, now 400 homes and 6 Travelling Showpeople plots. The many previous objections seem to have been ignored, The permanent Green Belt is to be ruined where no exceptional circumstance exists. Send will be joined to Ripley with the many other unnecessary and unwanted proposals, including the plots for Showpeople.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There is also policy A58 and Policy 2 at para.4.3.15 both not required in the village.

There seems to be proposals for developments where no demand exists, and no infrastructure is in place so causing additional problems and expense for no reason I object most strongly to all the new proposals in the draft plan.

I OBJECT to a new interchange with the A3 at Burnt Common.

The proposal is for a new 4-way junction of the A3 at Burnt Common. With a proposal of over 5000 new homes along the A3 at Wisley, Burpham and Blackwell Farm, the new 4-way junction will bring an unprecedented level of traffic through Send which would become gridlocked and create unacceptable levels of air and noise pollution. GBC talk about improvements to the A3 (ref About Guildford, Summer 2016) but is this to the detriment of the villages adjacent to the A3?

I OBJECT to the development of 40 houses and 2 travellers' pitches at Send Hill.

The site of the travellers' pitches seems to have changed since the original Local Plan. The 40 houses were also not in the original Local Plan. I understand that the site is documented as unsafe landfill waste. Development would again be on Green Belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Guildford Borough Council (GBC) have stated that 'one of the borough's biggest assets is our significant Green Belt, and major consideration is given to protecting this, with development directed at making better use of land that has already been built on under a Brown Field first preference' and that they 'have reduced the total number of development sites on the Green Belt' (ref 'About Guildford, Summer 2016).

However, in a cynical move GBC are planning to remove Send from the Green Belt thereby allowing significant development in the village. If Send is removed from the the Green Belt then it will become just an extended area of urbanisation of Woking with a detrimental effect on wildlife and the wellbeing of the residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal to inset Send Business Park from the Green Belt because:

- It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful National Trust Wey Navigation;
- There is highly restricted vehicular access along Tannery Lane in both directions;
- Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The increase to 60 homes in place of 45 homes is 33% more and too much;
- It ignores all the hundreds of previous objections made by local people;
- It will considerably worsen access and traffic problems in Tannery Lane and at the A247 junction;
- It will make erosion of the Green Belt in our village even worse;
- It will make surface water flooding, which is already bad, even worse;
- It will impact open countryside views from the National Trust River Wey Navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the Policy A43 change at Garlick’s Arch because:

- 6 Travelling Showpeople plots is way out of proportion for the village and there will be an increase in juggernauts and lorries through the village as a result;
- It ignores all the thousands of previous objections made by local people;
- It is beautiful permanent Green Belt and no ‘exceptional circumstances’ exist;
- It will cause over-development of our village and the number of homes is excessive;
- It is exquisite ancient woodland that existed at the time of Elizabeth I;
- It will join up Ripley and Send and defeat the purpose of the Green Belt;
- It is subject to frequent flooding and is currently a flood zone 2 allocation;
- It is contaminated by lead shot accumulated over fifty years;
- It will generate excessive traffic that will block up the local roads of Send and Ripley;
- It will create an increase in pollution which will be detrimental to the health of the villagers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: pslp172/1893  Respondent: 10830753 / AJ Cheeseman  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58 at Burnt Common because:

It was deleted from the 2014 draft because of all the objections made previously;

The word ‘minimum’ is a change from the previous ‘maximum’ in the 2016 plan and since that time there has been a decline in demand for industrial land;

There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford have empty sites and industrial units – use them first;

The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt;

The impact on small surrounding roads will create traffic gridlock and extra air and noise pollution from heavy goods vehicles.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1454  Respondent: 10830785 / PE Whatley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the sites chosen in Send village and nearby as they are either unsuitable or will cause chaos and gridlock for all the village and local residents. Roads, public transport, drainage, power and other facilities are already below what might be defined as a good standard. In an area already easily prone to flooding this seems either unwise or crass stupidity.

I object to the way that the previous response to the proportion of houses to be built in the village has been ignored and instead has been increased. There seems to be no valid reason for this as a) the situation post-Brexit is likely to been entirely different, and b) the number and types of houses to be built cannot be justified as we do not seem to be able to examine the way they were worked out.

I object to the way in which the proposals have been put forward as I don't believe the proper legal processes have been followed. Such development has serious consequences in relation to the quality of life for those in the immediate vicinity. Our already congested area will suffer years of disruption followed by a lifetime of over stretched facilities the promises of large developers to offer affordable housing and infrastructure (affordable to whom, we might ask?) are well-documented to be entirely unenforceable in reality.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

I object to the proposal A42 to increase the number of homes to be built at Clockbarn Nursery from 45 to 60 because any increase in traffic on this narrow road, which is already dangerous to walk or drive along, is a matter of safety. Any increase in traffic will not improve the situation and I have already objected to 45 houses, so am not likely to find 60 agreeable and neither are all the others who objected to this proposal in the past.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal A43 which would permit build houses on Green Belt land, which includes the land at Garlick's Arch. Local residents have made their feelings very clear in the past and will never willingly accept the erosion of our Green Belt just to appease developers who could use brownfield sites if they were prepared to put in the extra money required. Local services are already stretched and the added traffic will reduce everyone's quality of life.

There are no alternative routes other than back roads when traffic comes to a standstill at the moment; those 'backroads' will be unpleasant and dangerous places to live, walk or drive. Add in the vehicles of over 500 houses in Send, 1500 at Wisley and 1500 at Gosden Hill, and the area will grind to a traffic-polluted halt.

I object to the proposal A43 and A44 to include traveller pitches anywhere in the immediate area because there is absolutely no proven need for these. However, to disproportionately allot such sites in Guildford Borough as a whole on the area around Send is not acceptable as there should be a more even distribution over the entire Borough. How come Wisley and Gosden Hill are only allocated 8 each for their proposed developments of over 1500 homes, whilst Send gets 10?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the proposal A58 to change the wording of the proposed industrial area at Burnt Common from a maximum of 7000 sq ft to a minimum of 7000 sq ft because this removes any upper limit and opens the door to any size of development in the future, with all the traffic mayhem that brings. With sites at Slyfield and in Guildford sitting empty, where is the need for this scale of industrial development?

I object to the removal of the industrial area in Tannery Lane for similar reasons (policy 2 paragraph 4.3.15). Access to the site is wholly unsuitable for heavy traffic or large vehicles. The open areas around this site are of immense environmental importance and we owe it to future generations to preserve the Green Belt wherever we possibly can. There are absolutely no exceptional circumstances that could warrant such action, and it is in direct opposition to the views expressed by local residents in the past.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
7) I object to the lack of immediate provision for new schools. The local primary (Ripley) is already full to capacity for the Sept 2016 intake.

8) I object to the lack of any immediate provision for Doctors surgeries. Already I have difficulty securing an appointment at the Villages Medical Centre.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

6) I object to the lack of any evidence for the alleged need of the housing numbers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2) I object to villages being removed from the green belt. This will in effect lead to mass development and a string of villages all merging with each other under a tidal wave of concrete.

3) I object to the disproportionate amount of development in one area of the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT concerning the major doubt over the inflated number of proposed new houses using a mathematical model which is not revealed in the New Plan. It will result in a population increase which is almost 70% higher than the official national estimates for population growth in the Borough.

I do hope that you will reconsider the New Local Plan in the light of these comments. My real fear is that once the character of the Horsleys has been destroyed, there will be no going back.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2816  Respondent: 10831393 / Catherine Ryder  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the development of over 2,000 houses in Ockham on the former Wisley Airfield. The impact of such a huge mixed housing and commercial development only two miles away will be enormous. No adequate thought has gone into planning any appropriate infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11817  Respondent: 10831393 / Catherine Ryder  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E8

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the designation of Station Parade as a ‘District Centre’.
This would misread the nature of the facilities in the village centre and target the area for urban development. Has anyone actually visited our village and been into our very small convenience stores? This designation could have grave consequences for our village because it seems to permit a wide variety of town centre uses which are completely inappropriate for a village the size of East Horsley. We do not need offices, factory outlets, warehousing, tourism developments and other urban and commercial services.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11815  Respondent: 10831393 / Catherine Ryder  Agent:
I OBJECT to placing further loading on an already overloaded local infrastructure.

The proposed addition of over 70% to the number of houses within two or three miles of Horsley (East and West Horsley, and nearby Ockham) has major implications for almost every aspect of life here in the village - public transport, schools, doctors and the medical centre, drainage and water supply, and roads and parking. Road traffic in this part of Surrey is already close to twice the national average. The main roads serving East Horsley are already too narrow for passing lorries, and cars are often squeezed on to the pavement. Be assured that no amount of analysis will alter the bare fact that the roads serving Horsley are not, and cannot be made, suitable for the level of building in the area that you envisage.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11814  Respondent: 10831393 / Catherine Ryder  Agent:

I OBJECT to the proposal to remove the Horsleys from the Green Belt.

The Metropolitan Green Belt has endured for over seventy years and has been the backdrop to the successful evolution of our village throughout this time. To remove it is to reverse over seventy years of wise conservation. I support the need for a proportionate and sensible increase in housing, but this could happen within the constraints of the Green Belt as it has in the past. Such building needs to reflect the existing character of the village and the houses and amenities within it. The practicality is that our village's removal from the Green Belt would mean that building standards will be lowered, and developers will be allowed to squeeze additional housing into completely unsuitable places. The ‘exceptional circumstances’ required before taking this action have not been demonstrated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1181  Respondent: 10831585 / Richard Stedman  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object to the proposal in the local plan on the grounds that the site is not large enough for the proposed use.
- I object to the proposal in the local plan on the grounds that it would cause adverse impact on street parking.
- I object to the proposal in the local plan on the grounds that Send Hill is a single track country road and too narrow to provide sufficient access to the site or accommodate the potential new levels of traffic the proposed development would bring.
- I object to the proposal in the local plan on the grounds that Send is in green belt. The proposed inset is inappropriate due to its permanent green belt status.
- I object to the proposal in the local plan on the grounds that Send Hill is a narrow road result in loss of a turning point for vehicles.
- I object to the proposal in the local plan on the grounds that it would impact the nature reserve nearby. The proposed site is a quality green belt amenity area within countryside and would be spoilt by development.
- I object to the proposal in the local plan on the grounds that the road and parking infrastructure is already inadequate or under pressure and could worsen with the planned development, reducing quality of life.
- I object to the proposal in the local plan on the grounds that too many houses are proposed to Send/ Send Marsh are and the impact on traffic congestion and local services would be unacceptable.
- I object to the proposal in the local plan on the grounds that the proposed number of houses potentially could result in 92 extra cars in Send Hill which is already suffering from congestion particularly at school run time.
- I object to the proposal in the local plan on the grounds that this would cause loss of village identity, be detrimental to the community and increased flood risk.
- I object to the proposal in the local plan on the grounds that a Wasteland Solutions environmental report on Send Hill dated March 2004 gave evidence of past ponding of water in the excavated area. Further development would disturb water table and increase risk of flooding to my property.
- I object to the proposal in the local plan on the grounds that the proposed development site (A44) was used as GBC registered landfill site, not a quarry as listed as reference LLA 2081 in the local plan.
- I object to the proposal in the local plan on the grounds that the 1963-8 Ordnance Survey maps of proposed site mark it as “refuse and slag heap”. It is therefore unsuitable for such a development on health reasons.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT specifically to Ripley and Send Villages being removed from the Green Belt. The green belt was intended to be permanent, as required by the National Planning Policy Framework, and there are no special circumstances to justify abandoning it. Send’s Green Belt provides an essential buffer stopping Woking and Guildford becoming on conurbation. Local councillors and central government gave a clear election promise to protect Green Belt ad this reneges on it, Developers will be quick to take advantage and there will be nothing to stop them.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6485  Respondent: 10831681 / James Cope  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to building 45 houses at Clockbarn Nursery because of the inadequate access and traffic volume. Tannery Lane is far too narrow and twisty to take and more traffic. The junction with Send Road is already very hazardous for vehicles trying to join the main road. Planning permission has previously been granted for 64 apartments at the Tannery and for building a marina, both of which will generate additional heavy traffic. The lane cannot take any more traffic. The junction is too dangerous already and will be made much worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The increase to 60 homes in place of 45 homes is 33% more and too much
- It ignores all the hundreds of previous objections made by local people
- It will worsen access and traffic problems in Tannery Lane and at the A247 junction
- It will make erosion of the Green Belt in our village worse
- It will make surface water flooding, which is already bad, even worse
- It will impact open countryside views from the River Wey Navigation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/3163  Respondent: 10831681 / James Cope  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A43 change at Garlick's Arch because:

- It ignores all the thousands of previous objections made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no "exceptional circumstances" exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth 1
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the local roads of Send and Ripley

I object to Policy A58 at Burnt Common because:
- It was deleted from the 2014 draft because of all the objections made previously
- The word "minimum" is a change from the previous "maximum" in the 2016 plan and since that time there has been a decline in demand for industrial land
- There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt
- The impact on small surrounding roads will create traffic gridlock
- It will join up existing villages and defeat the purpose of the Green Belt

Correct title of Policy A28 to say Ash Green, and not Ash.

• Policies A27, A28 and A29 collectively increase Ash Green village by 50%. Opportunity exists under Policy A28 to provide a village/community hall and recreational area which would provide Ash Green with much needed community and social space.

Opportunities (1) Should read: "To create a centre for the village by including a village hall with associated recreational space providing much needed facilities for the Ash Green community. A mix of homes (C3) and accommodation for older people (C2) could be appropriate for this site."

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Correct title of Policy A28 to say Ash Green, and not Ash.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should must include the provision of a green buffer that seeks to maintains a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:
"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

- Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

- Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

a) The Street in Tongham
b) A331/A323 intersection
c) A31 /White Lane junction

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Guildford Local Plan**

It seems to me that you propose to remove the villages of Ripley, Send, Clandon and Wisley from the Green Belt and turn them into towns by overdevelopment. There is no justification for this and no planning for the aftermath of chaos that will occur. The village roads cannot be widened, no traffic study has been carried out, no new doctor's surgeries are planned and no new schools are planned. But you propose to solve 70% of a so called housing need of 13,860 new houses by concentrating only on four villages in the Green Belt without first investigating all brown field sites in and around Guildford.

This is a planning disaster which has been made on the hoof without proper consultation or planning. In fact a new site for housing and industrial development called Garlick's Arch comprising 400 new homes has only just been proposed without warning having turned down further industrial development at Slyfield where it belongs. This is totally ridiculous and I whole heartedly object. Such a development would bring the villages of Ripley and Send to a standstill. We are already gridlocked for four hours a day in the morning and then again in the evening. Has the Highways Department undertaken a traffic study confirming that our village roads can take double the volume of existing traffic without difficulty? Is it not reasonable to assume that if narrow village roads cannot be widened then further housing in that area should be restricted to preserve the Green Belt.

Might I suggest to the Council that they revisit this figure of 13,860 houses being needed in the light of Brexit, whereby we can control and reduce the number of people coming to stay in this Country and also anticipate the vast numbers of City workers whom are to be relocated in Europe thereby freeing up a great deal of housing stock in and around Guildford.

I also object to the building of 45 houses at Clockburn Nursery because of inadequate access and traffic volume on Tannery Lane. The junction with Send road is already very difficult for vehicles trying to join the main road.

I also object to the development of 40 houses and 2 traveller's pitches at Send Hill due to its restrictive access and twisting narrow roads. The subsoil on this site contains unsafe landfill, as known to the Council.

In addition I also strongly object to the new proposed interchange onto the A3 at Burnt Common because of the obvious massive increase in traffic this will cause pouring onto village roads that are already swamped. Our village roads will become car parks and destroy our quality of life.

Please think again and ask the Highways Department where are the roads that are capable of taking increased volumes of traffic without causing gridlock. Having identified those areas the Council can then identify where a new school to cater for
the new houses is to be built and the new doctor's surgery for that area. Your current proposals are completely without merit, thought or understanding, which it seems you wish to impose with minimal or no consultation.

I very much look forward to hearing of your withdrawing the current proposals and the introduction of a more professional approach to the requirements for housing in the Borough based on detailed traffic studies, and the infrastructure contemplated to complement these new houses for public consultation and agreement.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Anyway I do continue to object to Policy A42 change at Clockburn Nursery, Tannery Lane because:
The increase to 60 from 45 homes.
It ignores, as I said before, the thousands of objections by the people of Send.
It ignores the horrendous traffic problems this development will cause to village roads.
It is an erosion of the Green Belt.
It will make surface water flooding even worse

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I also object to Policy A43 change at Garlick's Arch because:
Once again it ignores the thousands of objections already made by local people.
There is no proven demand for Travelling Showpeople plots in this location.
It is permanent beautiful Green Belt and no exceptional circumstances exist.
It will cause over-development of our village and the number of homes is excessive. It is an exceptional ancient woodland dating back to the reign of Elisabeth I.
It is subject to frequent flooding and is currently a flood zone 2 allocation.
It is contaminated by lead shot accumulated over 50 years.
It will cause traffic chaos and choke the village roads which are already blocked during rush hours.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I also object to Policy A58 at Burnt Common because:
It was deleted from 2014 draft because of all the objections made previously. The word minimum' is a change from the previous 'Maximum' in the 2016 plan and since that time there has been a decline in demand for industrial land. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford have empty sites and industrial units. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt. Once again the impact on surrounding village roads will produce gridlock.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

It seems to me that you have not listened to the thousands of objections to your proposal to remove the villages of Ripley, Send, Clandon and Wisley from the Green Belt and turn them into towns by overdevelopment. There is no justification for this and no planning for the aftermath of chaos that will occur. The village roads cannot be widened, no traffic study has been carried out, no new doctor's surgeries are planned and no new schools are planned. But you propose to solve 70% of a so called housing need of 13,860 new houses by concentrating only on four villages in the Green Belt without first investigating all brown field sites in and around Guildford. What you have done is to increase the size of developments in Send and restricted objections to these amendments. Given your practice of ignoring objections anyway it seems we live in a dictatorship where the people's wishes are not even considered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Last but not least, I object to Green Belt Policy 2 at paragraph 4.3.15 where it is proposed to inset Send Business Park from the Green Belt because: It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation. There is highly restricted vehicular access along Tannery Lane in both directions. Further expansion or development at this location is totally inappropriate.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have carefully considered the Proposed Submission Local Plan which Guildford Borough Council (“GBC”) has now published for public consultation.

My comments are set out in this letter. I have strong concerns about the Proposed Submission Local Plan and the evidence and assumptions which support it. In particular, I do not accept the scale of the house building programme which is being proposed by GBC. The target outlined represents a 25% increase in the housing stock of the borough, whilst I note that the Office of National Statistics (“ONS”) projects a population increase of some 15% for Guildford Borough over this same period. I also note that the Proposed Submission Local Plan includes the statement “We will continue to protect the Metropolitan Green Belt”. I fully and un-equivocally support this policy. The Green Belt is a national asset which should be treasured; the whole character of Surrey will change over time if GBC allow the degradation of the Green Belt. If every time there is pressure to build housing, GBC uses the Green Belt as an area for negotiation, the unique character of Surrey will be lost forever and the generations that follow will look at this moment as a trigger point in the decline of Surrey.
Unfortunately GBC appears to be in breach of this same policy through the housing policies it has set out in the Proposed Submission Local Plan, whereby some 65% of developments will be made on land that is currently Green Belt. I am also concerned that the infrastructure proposals are inadequate even to meet the needs of what is here currently, let alone the proposed developments in the Local Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In the Green Belt & Countryside Study and its accompanying Topic Paper, GBC justifies the need to make changes in settlement boundaries in order to meet unfulfilled housing need in the Borough. However, Green Belt rules make it clear that unfulfilled housing need is not normally considered to be ‘an exceptional circumstance’. If it were the entire Green Belt would already be covered in tarmac.

The NPPF is clear that every movement in settlement boundaries must be justified by ‘exceptional circumstances’. GBC have offered only a generic justification in their Topic Paper of meeting unfulfilled housing need, but a case by case justification has not been provided. As such, I believe Local Plan Response 13.06.16 the settlement boundary changes referred to above (and many others) are invalid without such detailed justification.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P2: Green Belt

Paragraph 4.3.13: Proposal to inset East Horsley from the Green Belt
Policy P2 proposes that East Horsley should be inset from the Green Belt, instead of being ‘washed over’ as it is today. Currently development is permitted within the settlement boundary, although this area is still considered to be Green Belt with a particular planning regime being applicable.

East Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving that character. Moreover, being ‘washed over’ by the Green Belt has not been a serious constraint on development within the village. For example, GBC’s planning records indicate that no less than 149 net new homes were added to the village housing stock through in-filling and brownfield developments between 2000 and 2015.

GBC attributes the need to inset East Horsley to NPPF requirements, arguing that the test for remaining ‘washed over’ is that the village should make an important contribution to the openness of the Green Belt. This East Horsley clearly does. No less than 36% of East Horsley is composed of woodlands, whilst inside the settlement area there is an average housing density of just 8.1 dwellings per hectare (‘dph’). Woodlands and large residential gardens make a vital contribution towards biodiversity, provide wildlife corridors, and furnish those open spaces which are vital to the character of the greenbelt. It is one thing for a planner to study a map and see a settlement area filled with housing, but it is quite another actually to come to a rural village like East Horsley and see how the Green Belt has preserved the rural character and openness of this village.

Today East Horsley is a picturesque and flourishing rural community, which has and continues to experience steady incremental growth as a result of being ‘washed over’ by the Green Belt. Therefore there is no need to change its status. I therefore OBJECT to the proposal to inset East Horsley from the Green Belt and requests that this proposal be dropped from the Local Plan.

Paragraph 4.3.16 and Proposals Map: Settlement Boundary changes in East Horsley

GBC are proposing to make a number of changes to the settlement boundaries of East Horsley and so expand the settlement area, as set out in the Proposals Map, with the justifications seemingly provided in the Green Belt & Countryside Study prepared by the consultants, Pegasus.

I object to two specific boundary changes, which have been proposed, as follows:

1. i) There is a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Ockham Road North up to the eastern boundary of Lollesworth Wood. This proposal removes over 5 hectares of agricultural fields from the Green Belt. The present boundary line is clearly defined by a deep and well-maintained drainage ditch which is classified by the Environment Agency as a ‘main river line’ and therefore represents a highly defensible Green Belt boundary. Moving this boundary west to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. I do not believe this proposal can be considered as an exceptional circumstance. Clearly the only justification for this change is to bring a large agricultural field within the settlement area in order to provide more housing land. However, under NPPF rules this is not a sufficient justification for changing a Green Belt boundary. As such, I believe it is an invalid proposal. I, accordingly, OBJECT to this proposed boundary change.

1. ii) There is also a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Kingston Avenue up to a tree line running along the Parish Boundary at the western edge of Kingston Meadows. The result is to take all of Kingston Meadows out of the Green Belt. Kingston Meadows is the main public recreational space of East Horsley, comprising various sports facilities and playing fields. The present settlement boundary is clearly defined by a deep and well-maintained drainage ditch running along its eastern side. It therefore represents a very defensible Green Belt boundary. Moving this boundary westwards to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. I do not believe that this can be considered as an exceptional circumstance. As such I believe this is an invalid proposal. I accordingly OBJECT to this proposed boundary change.
In the Green Belt & Countryside Study and its accompanying Topic Paper, GBC justifies the need to make changes in settlement boundaries in order to meet unfulfilled housing need in the Borough. However, Green Belt rules make it clear that unfulfilled housing need is not normally considered to be ‘an exceptional circumstance’. If it were the entire Green Belt would already be covered in tarmac.

The NPPF is clear that every movement in settlement boundaries must be justified by ‘exceptional circumstances’. GBC have offered only a generic justification in their Topic Paper of meeting unfulfilled housing need, but a case by case justification has not been provided. As such, I believe Local Plan Response 13.06.16 the settlement boundary changes referred to above (and many others) are invalid without such detailed justification.

Paragraph 4.3.17: Proposal to remove Wisley Airfield from the Green Belt I OBJECT to the proposal to remove Wisley Airfield from the Green Belt. The only justification for this proposed change is unfulfilled housing need which is not considered an exceptional circumstance. The proposed Wisley development is discussed further below in the Site Allocation section.

INFRASTRUCTURE POLICIES This section of the Proposed Submission Local Plan sets out details covering a range of infrastructure policies.

POLICIES I1, I2 & I3 These three policies cover Infrastructure & Delivery, Supporting the Department of Transport’s ‘Road Investment Strategy’ and Sustainable Transport. Whilst I support the general policy statements as presented in each case, it is the detailed infrastructure proposals for Guildford Borough which give us cause for concern. I believe there are serious deficiencies and shortcomings in the infrastructure of Guildford Borough as it is today and that the aggressive housing policy as proposed by GBC in the Proposed Submission Local Plan will exacerbate this problem. I would make the following comments specifically about infrastructure in East Horsley today:

- Roads across the parish are in poor condition with many potholes. Many roads are unable to sustain their current levels of traffic, particularly the increasing levels of HGV traffic;
- The principal through roads traversing East Horsley are narrow and winding, have a series of pinch points, have sections without any pavements and are generally unlit. As a senior SCC councillor remarked at a recent public meeting in the village hall: “East Horsley has lanes, not roads.” East Horsley’s ‘lanes’ are totally unsuitable for high volumes of traffic, in particular for the volume of HGV’s now using them;
- Many of the drains are blocked or otherwise in poor condition giving rise to frequent surface water flooding when it rains. Any substantial development as indicated within the Local Plan will increase hard surfaces in the area and therefore the rainfall runoff will increase into local watercourses and exasperate localised flooding.
- The pavements are in poor condition. As well as being narrow, they are often uneven and/or cracked making it difficult, for example, for people with pushchairs or prams or in wheelchairs;
- There are insufficient school spaces for the number of local children needing them, with the result that children are often allocated to schools a significant distance away such as Dorking or Woking; and
- The Medical Centre in East Horsley is already at capacity in terms of its number of patients.

Train services to and from Horsley to London on the ‘Guildford via Cobham’ line are already at full capacity at peak times. The current service has to be substantially improved BEFORE allowing further development. Such improvements should include additional train services and additional stations to support new communities.

It is recognised that, as stated in the Proposed Submission Local Plan, the maintenance of adequate infrastructure and its expansion to meet growing needs is the responsibility of the relevant infrastructure provider. This is often not GBC itself but rather, for example, Surrey County Council, South West Trains or utility companies. Surely GBC must see the infrastructure improved first before approving any new developments.

In respect of East Horsley, there are only two specific proposals in Appendix C:

LRN 25 - East Horsley and West Horsley traffic management and environmental improvement scheme.
It is not clear what is proposed here, and its timing and funding have to be considered uncertain. It is stated that funding will, at least in part, come from developer contribution. However, it Local Plan Response 13.06.16 is not at all clear what development is likely to give rise to such a contribution, but it certainly implies that funding could only come if there were a development; and

HSC 5 - Expansion of East Horsley Medical Centre to provide additional capacity and services for future population in years 5 – 15 of the plan. There are no proposals in respect of all the existing problems with for example roads, pavements, drainage, and schools. Furthermore, it is inevitable that the proposed developments in East Horsley itself and nearby, particularly in West Horsley and the proposals for Wisley, will put further strain on the existing infrastructure. There are no proposals at all to cater for this. Although an expansion of the Medical centre is proposed in the Infrastructure Schedule, this is not until years 5 – 15 of the Plan. Given that it is already at capacity, I believe that this needs to be implemented earlier.

Local primary schooling is also a very pertinent issue. There are 11 housing development sites identified in the LAA for East and West Horsley, which taken together would result in the building of 593 new houses in the two parishes that are today served by a single primary school - The Raleigh, in West Horsley.

Planning guidance suggest that this number of new homes will require the provision of around 150 additional primary school places to accommodate such an increase in population. Today there is no spare capacity at The Raleigh, yet no proposals are made in the Proposed Submission Local Plan to provide for any more schooling in the Horsley’s. I believe that the failure to address the inadequacies of the existing infrastructure to meet the needs of what is there already is a serious deficiency in the Proposed Submission Local Plan.

I therefore OBJECT to the infrastructure proposals on these grounds. I also OBJECT to the proposals for infrastructure in that they do not meet the stated objective of providing infrastructure to support the proposed developments.

There is a legacy of approving development without the appropriate infrastructure, and the infrastructure lags to the point it cannot cope, whether this schools, trains, roads or utilities. GBC in their local plan set out a vision of development, however the details of the infrastructure upgrades needed to today are not firm legal commitments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

GBC in their local plan set out a vision of development, however the details of the infrastructure upgrades needed to today are not firm legal commitments.

Summary

Surrey is a beautiful county enjoyed by the people from London and further afield, the beauty comes from the structure of open land, green fields and villages, which has been preserved through planning constraints and the Green Belt. The GBC Local Plan sets out to erode the green spaces of Surrey, put strain onto the infrastructure already under strain, and allow housing developments on a scale that is not justified.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
POLICY A35: Land at former Wisley Airfield Policy

A35 proposes approximately 2,000 homes to be built on the site of the former Wisley Airfield. This will lead to the creation of the largest settlement in Guildford Borough outside of Guildford town. In effect it is proposing to create a New Town in the heart of the Surrey Green Belt. I have major concerns about this proposed development. I consider this proposed development to be a severe contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability which will have a major adverse impact on infrastructure across a widespread area, including East Horsley. Above all it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country. I strongly OBJECT to Policy A35.

Summary Surrey is a beautiful county enjoyed by the people from London and further afield, the beauty comes from the structure of open land, green fields and villages, which has been preserved through planning constraints and the Green Belt. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have carefully considered the Proposed Submission Local Plan which Guildford Borough Council (“GBC”) has now published for public consultation. My comments are set out in this letter.

I have strong concerns about the Proposed Submission Local Plan and the evidence and assumptions which support it. In particular, I do not accept the scale of the house building programme which is being proposed by GBC. The target outlined represents a 25% increase in the housing stock of the borough, whilst I note that the Office of National Statistics (“ONS”) projects a population increase of some 15% for Guildford Borough over this same period. I also note that the Proposed Submission Local Plan includes the statement “We will continue to protect the Metropolitan Green Belt”. I fully and unequivocally support this policy. The Green Belt is a national asset which should be treasured; the whole character of Surrey will change over time if GBC allow the degradation of the Green Belt. If everytime there is pressure to build housing, GBC uses the Green Belt as an area for negotiation, the unique character of Surrey will be lost forever and the generations that follow will look at this moment as a trigger point in the decline of Surrey.

Unfortunately GBC appears to be in breach of this same policy through the housing policies it has set out in the Proposed Submission Local Plan, whereby some 65% of developments will be made on land that is currently Green Belt.

I am also concerned that the infrastructure proposals are inadequate even to meet the needs of what is here currently, let alone the proposed developments in the Local Plan.

POLICY P2: Green Belt

Paragraph 4.3.13: Proposal to inset East Horsley from the Green Belt Policy P2 proposes that East Horsley should be inset from the Green Belt, instead of being ‘washed over’ as it is today. Currently development is permitted within the settlement boundary, although this area is still considered to be Green Belt with a particular planning regime being applicable.

East Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving that character. Moreover, being ‘washed over’ by the Green Belt has not been a serious constraint
on development within the village. For example, GBC’s planning records indicate that no less than 149 net new homes were added to the village housing stock through in-filling and brownfield developments between 2000 and 2015.

GBC attributes the need to inset East Horsley to NPPF requirements, arguing that the test for remaining ‘washed over’ is that the village should make an important contribution to the openness of the Green Belt. This East Horsley clearly does. No less than 36% of East Horsley is composed of woodlands, whilst inside the settlement area there is an average housing density of just 8.1 dwellings per hectare (‘dph’). Woodlands and large residential gardens make a vital contribution towards biodiversity, provide wildlife corridors, and furnish those open spaces which are vital to the character of the greenbelt. It is one thing for a planner to study a map and see a settlement area filled with housing, but it is quite another actually to come to a rural village like East Horsley to see how the Green Belt has preserved the rural character and openness of this village.

Today East Horsley is a picturesque and flourishing rural community, which has and continues to experience steady incremental growth as a result of being ‘washed over’ by the Green Belt. Therefore there is no need to change its status. I therefore OBJECT to the proposal to inset East Horsley from the Green Belt and requests that this proposal be dropped from the Local Plan.

Paragraph 4.3.16 and Proposals Map: Settlement Boundary changes in East Horsley

GBC are proposing to make a number of changes to the settlement boundaries of East Horsley and so expand the settlement area, as set out in the Proposals Map, with the justifications seemingly provided in the Green Belt & Countryside Study prepared by the consultants, Pegasus.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3818  Respondent: 10832321 / Robert Deatker  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There are some small changes made in the revised Local Plan to Site Policy A35, Land at Wisley airfield in Ockham. However, these changes do not provide any justification for continuing to include this site within the revised Local Plan. Having made a downward revision to its housing targets in the revised 2017 Local Plan draft, GBC is proposing to remove a number of development sites that were included in the 2016 version of the plan. The largest site removed is addressed by Site Policy No. 46 located in Normandy (‘Land to the south of Normandy and north of Flexford’) where a mixed used development of 1,100 homes had previously been proposed.

Whilst I have no objection to the removal of this policy site per se, I would question GBC’s decision-making process of site selection which chooses to remove this site from the local plan rather than the Wisley airfield site. Of all the larger sites included in the 2017 draft Local Plan, Wisley airfield has by far the worst sustainability. In the updated 2017 Sustainability Assessment provided by GBC’s consultant AECOM, Wisley airfield is by some margin the site with the poorest sustainability appraisal – it has no less than 8 red flags in the AECOM criteria list. By comparison Site No. 46 in Normandy is much more sustainable yet it is the one selected to be removed from the plan.
In rejecting a 2015 planning application for development at the Wisley site (proposed in advance of the Local Plan) GBC identified no less than 14 reasons to justify their rejection of the planning application, only one of which was the issue of it being in the Green Belt. The reminder highlighted a long list of deficiencies associated with this proposed development including its major impact on traffic flows, its severe environmental impacts, its total lack of existing transport and other infrastructure, as well as many other factors. According to GBC’s consultation website, a total of 1,429 comments were registered in the 2016 Local Plan consultation about the Wisley airfield site – 97% of them were against its development. And yet GBC chooses to maintain Wisley airfield as a policy site in the 2017 revised Local Plan.

With a planning appeal due to be heard in September 2017, I trust that if the planning inspector decides to reject the appeal of Wisley Property Investments, then GBC will finally listen to the views of so many of its residents, accept the AECOM sustainability conclusions on the deficiencies of this site and remove Wisley airfield entirely from the Local Plan.

I therefore continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for a number of reasons including:

1. This is the least sustainable site identified in both the current and previous versions of the Local Plan because of the site constraints and location.
2. This site is further from railway stations than any other identified strategic site.
3. The site is adjacent to the most congested stretch of strategic road network (SRN) in the county and close to one the most congested junction in the country (M25 -J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (in peak times and also due to accidents, diversions, roadworks etc)
5. Suggested public transport initiatives including bus services to and from Guildford will exacerbate the already over crowded road network leading to unreliability and delay, which in turn will make local residents choose individual modes of transport resulting in further congestion.
6. Public transport bus services to Horsley will reduce the safety of the local road network as lanes are narrow and this will increase danger to cyclists and walkers which should be encouraged as eco friendly alternatives. The area is greatly used by cyclists at all times throughout the year who seek to follow the 2012 Olympic cycle route and train for the annual Ride London –Surrey 100 cycle event. The current plan will add to traffic flows and endanger cyclists and walkers lives.
7. The proposed site is adjacent to the Royal Horticultural Society gardens, which is one of the most visited destinations in the south-east of the country. I understand that expansion plans the RHS have will significantly increase the number of visitors to Wisley. From reading the plan, the resultant traffic increase from the RHS has not been considered. Furthermore, there are regular events at the RHS which attract 1,000’s of additional visitors and again the impact of this increase in traffic does not appear to have been taken into consideration.
8. Once completed, there will be minimal employment opportunities on the developed site as a result of which, the majority of new residents will travel to work. The majority of these are likely to use motor cars (probably with only a driver) and this will add significant volumes of traffic to the already over crowded local narrow lanes.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
12. Opportunity (3) should be common to all sites and is not unique to this site
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
16. I object to the removal of additional 3.1 ha from the green belt without any justification
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A Regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a Regulation 19 consultation when the changes are major.

23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.

26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

As a further over arching comment on local and government policy, I do not understand why more emphasis is not being given to long term investment in developing other parts of the UK. It is evident that the South East and the London conurbation in particular is over crowded. The answer is not to destroy the green belt but to encourage a shift in population to other areas which have been neglected by successive governments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to add my voice to the many objections you will already have received regarding the above plans for the Horsleys and the surrounding villages.

My main objection is to the infringement of the Green Belt in this area. This land is of outstanding natural beauty and needs to stay this way for the future generation to enjoy.

My concern is also for the increased amount of traffic that would arise from the number of houses suggested---also the pressure on local schools; GP Surgeries; car parking at the stations and in the villages-etc.

I have lived in Horsley for over fifty years and have seen many changes during this time---but the one that really concerns me is the heavy and continuous traffic that now passes down our roads--this is dangerous now and will become seriously so if these new plans go forward. I ask you to rethink the New Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am lodging my views on the Send housing development as per below. Also, why do we need two travellers sites in Send???? What justification is there for these two separate sites? We've seen no details of traveller demographics in the area to support that. Please acknowledge this email as I tried lodging my views before and got told I couldn't email in until after a certain date!

Thank you.

I am writing to complain about the ridiculous idea that the council now has about building potentially up to 485 new houses in Send. There is absolutely no way our village would cope. The school has gone down the pan and it utterly rubbish and below par and is meant to service our village. We live in an affluent area and don't even have a decent school in sight. We can barely get an appointment for an adult at Send In Village which by the way services the surround areas of Send, the Clandon's and Ripley. It's near Impossible to get an appointment without waiting a week unless it's an emergency. We live on Potters Lane and the traffic down our road is absolutely dire and dangerous. No one sticks to the 30 mile limit. My husband had almost been knocked off his bike a few times as he cycles to woking station and back. He's had many rucks with drivers and I am forever waving at people to slow down. Someone will kill a child down this road if we are not careful. The blind corners are ridiculous for all the traffic. I have had 2 near collisions recently where I've had to slam on the break (with a toddler in the car) as as I've gone around one of the blind corners a lorry has been coming the other way taking up half my side of the road. This has happened twice lately. Then the other issue is Lorries get stuck and cause a queue and you nearly crash into the back of someone around the blind corner. My sister in law actually wrote her car off w a baby in the back, as she was going along potters lane and an old boy pulled out of send hill without hearing her coming and she smashed right into the side of his car. So the streets around here absolutely cannot take anymore cars. Absolutely no way!!! It's utterly dangerous. To think Send is a pass thro village anyway linking woking and the m3 to the other side of send - cars come from everywhere and drive through send. I do the school run everyday and can never get out of the end of woodhill because of the a3 slip road. Permanent cars coming thro and you have to sit there for ages coming into woodhill and out of it and the council think it's a good idea to increase the cars and traffic in the area by building 485 more house!!! Totally absurd and ridiculous! We literally have no facilities in Send to service anymore houses. The traffic thro ripley each
morning is ridiculous too. And take today, it was gridlocked because of a crash on the a3. Gridlocked through all the
country lanes which just shows how many people pass thro tiny old send! Our village is going to be absolutely ruined! How
on earth is anyone going to be able to move for cars? The roundabout by the shell garage at burnt common is permanently
gridlocked. You can't go anywhere in a rush in rush hour. How on earth will it be with 485 more houses when typically
most household has 2 cars and if teenagers or young adults then potentially 3 or 4 cars - but say 2 per house, that would be
a further 970 cars on average if not way more, in addition to the gridlock that already is during rush hour. Absolutely
absurd!!!!!!!!! We just go not have the facilities to support this kind of a development in our village!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/4442  Respondent: 10832673 / Lisa Hall  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am currently away but my husband has this morning informed me that there potential plans to try and build 40 houses on
Send hill plus a travellers site. It's absolutely ludicrous! Send hill is such a busy road what with the school being just off of
there and the traffic twice a day is just madness. You can't get thro there for love nor money. The end of send hill leading
into potters lane is highly annoying because only one car fits down there and you have to permanently reverse as 90 percent
of the time you come across a car coming the other way. It is a dangerous road and you have to go incredibly slow as there
are blind spots. That then brings me to the actual junction of send hill and potters lane. It is the most dangerous dangerous
spot. I have had a near miss pulling out of there. You always have to stop and put your window down and listen for traffic
before pulling out as its a complete blind spot. My sister in law was coming along potters lane minding her own business in
her car when an older man pulled out of send hill in front of her and she couldn't brake in time and smashed straight into
the side of his car with my niece who was about 5 months old. It was absolutely horrendous and could have been horrific.
She wrote her car off in the process. The crash was so loud that the people who own send farm heard it and ran out to help.
But that crossroad needs a massive massive mirror there so that people can see. My worry is that teenagers cycle to george
abbot from our road and you can't hear a bike coming along. Anyhow so how you propose building more houses and
creating more traffic up there is beyond me.

With regards to travellers sites in Send we just don't need it. What send needs is a revamp to elevate the area like its
surrounding areas such as ripley and west Clandon. The last thing send needs are traveller sites. The village shops area
needs a total revamp and the village could do with some money injected into it to make it more appealing, [Response has
been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate
discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations
between persons with a protected characteristic and persons who do not share it]. Unfortunately I'm not quite sure how else
to phrase all of this without getting to the point. But we are surrounded by lovely villages and Send does need some tlc to
try and bring it up a bit. Please see my other email with regards to my views on the ridiculous idea about building a further
400 plus houses. We do not have the facilities to maintain any of that nor the capacity to take more cars, more patients at
the practice, the school is absolutely dreadful at the moment, so much so we are paying to go private which is infuriating
that we have to do that because the school is in special measures!

I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford. Any more development in this area would surely constitute urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A42 Clockbarn Nursery

There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area.

The site has very restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical.

Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic.

Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

Conclusion:

It appears that GBC are desperately and naively clutching at straws to find what they think are suitable sites to include in the Local Plan, instead of carefully identifying already suitable Brownfield sites. GBC need to realise how important the Green Belt is, and stop treating it as a free space to indiscriminately destroy for generations to come.

This Local Plan seems to have been thrown together with no real thought, we need a ‘common sense’ Local Plan, not this rubbish.

I object to policy A43 Garlicks Arch.

There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past...
through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the
village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an
increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result
in the road becoming ever more dangerous for pedestrians.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate
its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of
development being proposed, particularly in the north east of the borough will lead to considerable further congestion,
despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and
will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has
previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for
approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and
storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the
Green Belt (Policy P2).

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure
Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools
and doctors cope, many of which are already at capacity? (Policy I1)

This proposal was never in the regulation 18 draft, and as such has never been consulted on, and was slipped into the Local
Plan at the last minute.

This site is green belt comprising of woodland and meadows between the A3 and Send and Ripley. This site has a
particular sensitivity since it is covered in ancient woodland, some trees date back to the 16th century.

It is permanently protected by the NPFF which prevents the merging of settlements, there are no exceptional circumstances
to develop this land.

To destroy a natural boundary between the A3 and the villages would be incredibly damaging to them. The obvious
increase in pollution caused by massive amounts of extra traffic would be hazardous to health of residents young and old of
both Ripley and Send. The existing boundary also absorbs some noise and pollution from the A3 itself.

The proposed industrial development of 7000 sq m is simply not needed since the latest Employment Land Needs
Assessment 2015 shows a reduction of 80% in required employment floorspace from the previous draft plan. Additionally
GBC have not provided any evidence of a requirement for this. Basically this means that industrial space at Burntcommon
is not required. Even if there was a requirement for 7000 sq m of industrial space it should be at Slyfield where there is
already available space.

Furthermore, a new 4 way interchange onto the A3 at Burntcommon to serve this development would be disastrous for
Send. Send Road A247 would become gridlocked all day, as it would be the through route to Woking for traffic leaving the
M25 and A3, the proposed 2000 houses at Wisley and the 2000 houses at Burpham. Send cannot take that amount of
traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )  

Answer (if comment is on questions 1-7 of the questionnaire): ()  

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a).  
The additional north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.  
The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.  
I object to the proposed Infrastructure Schedule (Appendix C). The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.  
Generally transport evidence for this policy is incomplete and unreliable. What would happen in reality would be serious accidents, major traffic jams twice a day and therefore excessive pollution.  

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )  

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to policy A44 Send Hill.

There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

The proposed development is not sustainable because of poor infrastructure. Send Hill is a single track country road and too narrow to provide sufficient access to the site for travellers or accommodate the potential new levels of traffic the proposed development would bring.

The site is a high quality green belt amenity area within beautiful surrounding countryside and would be spoilt by the development.

A Wasteland Solutions environmental report on Send Hill dated March 2004 gave evidence of past ponding of water in the excavated area. Further development would disturb the water table and increase risk of flooding to surrounding properties.

The site was used as a GBC registered landfill site and shown on the 1963-8 Ordnance Survey maps as “refuse and slag heap”. It is therefore unsuitable for such a development on health reasons.

On the 1971 Ordnance Survey the site is shown as a “refuse tip” prior to when proper licensing/registration was required. The date of the landfill works predates the 1999 EU Landfill Directive regulations. I therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials.

GBC has installed gas monitoring wells on site since July 2000. One well recording methane gas discharge.

A Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies the proposed site as GBC recorded landfill site Ref GU/11/LLC with type of waste not identified. The date of the landfill works predates the 1999 EU Landfill Directive regulations. I therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials.

A Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies proposed site GBC recorded landfill site Ref GU/12 with type of waste identified as “unrestricted”. This causes concern as to what it does contain and the dangers if disturbed.

An Envirosearch Report RS1100201_1_1 dated 17th February 2004 and historical map data and information from GBC has identified the site as landfill and has “areas of potentially contaminative industrial activities” and “potential risk from landfill gas migrations”. Development of this site would be a health hazard.

I feel contempt for Councillors of G.B.C. who are attempting to force developments that destroy Green Belt land in a cynical move and return the number of houses to far in excess of what is required. There is no need for any more housing on top of the 13,860 already proposed for the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the large proposed development at of 2,000 houses at Wisley Airfield (the subject of which I have written to you twice before), 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm, because it will destroy large areas of Green Belt and agricultural land, massively increase congestion on the A3 and the surrounding villages such as Ripley and Send, and create a lot of additional pollution due to traffic.

Use brownfield sites which are available.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

GBC have not followed correct procedure. Since 2014 GBC has changed every major site in Send proposed for development and now has added a new massive road junction. The 2014 proposal for 430 houses went down in April 2016 to 185 and has just gone up again to 485. These significant changes require another full consultation under regulation 18, not the short cut regulation 19 which GBC are trying to get away with. This invalidates the whole process.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Furthermore housing numbers from the 2015 (SHMA) are highly questionable.

I object to the exaggerated “housing need” figure of 13,860 which is far too high and results in the completely unnecessary development of the Green Belt. The way students, economic need and affordability are calculated inflates the housing need.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/7318    Respondent: 10833089 / J Wright    Agent:
I object to policy A42 Clockbarn Nursery

There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area.

The site has very restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical.

Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic.

Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

Conclusion:

It appears that GBC are desperately and naively clutching at straws to find what they think are suitable sites to include in the Local Plan, instead of carefully identifying already suitable Brownfield sites. GBC need to realise how important the Green Belt is, and stop treating it as a free space to indiscriminately destroy for generations to come.

This Local Plan seems to have been thrown together with no real thought, we need a ‘common sense’ Local Plan, not this rubbish.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to policy A43 Garlicks Arch.

There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.
Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

This proposal was never in the regulation 18 draft, and as such has never been consulted on, and was slipped into the Local Plan at the last minute.

This site is green belt comprising of woodland and meadows between the A3 and Send and Ripley. This site has a particular sensitivity since it is covered in ancient woodland, some trees date back to the 16th century.

It is permanently protected by the NPFF which prevents the merging of settlements, there are no exceptional circumstances to develop this land.

To destroy a natural boundary between the A3 and the villages would be incredibly damaging to them. The obvious increase in pollution caused by massive amounts of extra traffic would be hazardous to health of residents young and old of both Ripley and Send. The existing boundary also absorbs some noise and pollution from the A3 itself.

The proposed industrial development of 7000 sq m is simply not needed since the latest Employment Land Needs Assessment 2015 shows a reduction of 80% in required employment floorspace from the previous draft plan. Additionally GBC have not provided any evidence of a requirement for this. Basically this means that industrial space at Burntcommon is not required. Even if there was a requirement for 7000 sq m of industrial space it should be at Slyfield where there is already available space.

Furthermore, a new 4 way interchange onto the A3 at Burntcommon to serve this development would be disastrous for Send. Send Road A247 would become gridlocked all day, as it would be the through route to Woking for traffic leaving the M25 and A3, the proposed 2000 houses at Wisley and the 2000 houses at Burpham. Send cannot take that amount of traffic

Comment ID: PSLPA16/871  Respondent: 10833377 / Cynthia Thorpe  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am a long term resident of West Horsley. An extra 385 extra homes in West Horsley, which is an increase of some 35% on existing, without any improvements in infrastructure, will cause huge problems in the area. As it is, existing schools, medical facilities, road an transport systems, together with drainage and sewage systems to name but a few, are struggling to cope with current strains put on them. What is proposed is insupportable and I wish to object.

The proposed extra 385 homes in West, and 100 in East Horsley, are at variance with the key Evidence document "Guildford Borough Economic Strategy 2012-2031." Why? Because it does not argue in favour of locating large numbers of homes in either The Horsleys or neighbouring villages. I object to the proposal for this reason also.

Furthermore, simple arithmetic tells me that such a large number of houses on such relatively small sites will be both out of keeping and of a much higher density that the rest of West Horsley. Please register my complaint on these grounds.

The West Horsley Parish Council & Surrey Community Action Housing Survey:May 2014 indentified a limited need for about 20 affordable homes to enable local people to stay in the village: principally young people and elderly people wishing to downsize. The need for so many houses to be buliy in West Horsley over the initial 5 years of the Plan period 2018-2033 is totally unproven. Again I wish to register an objection.

I am totally opposed to any change in, or 'insetting' of, the Green Belt, so as to permit the proposed developments because no exceptional circumstances have been cited in justification. Again, will you please register my objection. It must be said that if acceptable representations had been made for 'insetting' the Green Belt, then I might take a different view.

You will see from the above that I am totally opposed to the proposal to build an extra 385 homes in West Horsley - and for that matter an extra 100 in East Horsley. Please add my name to the list of objectors.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

I write to say yet again how greatly I object to the above Policy which in my view will [illegible word] the whole part of the Hog’s Back, take even more Green Belt land (which was always supposed to be protected throughout the country) reduce further the production of crops on excellent farmland, caused even more traffic congestion and air pollution.

In September 2014 when This project was first suggested, I wrote (and reiterate my comment then) to say The University is surrounded with plenty of land which could provide extensive student accommodation. I see from the report in the Surrey Advertiser of 30/6/17 I was not alone in This suggestion. Also there is other land not yet used, so again use that already available.
As to the Research Park, I suggested they and the do as in other areas – build up or below ground. There is so much space allocated for car parking which could be put to better use if the cars were able to use a carpark underground leaving extensive space to build at least two storey facilities covering the same area.

Regarding the 1800 not affordable housing plan – are these really necessary? Usually the constraint refrain is for affordable housing. If you get approval for this plan and use more of Blackwell Farm how long will it be before another Plan is suggested and the whole farm will be completely concreted over plus where will other “sites” be earmarked for housing and offices/car parking. Nowhere will be safe from proposed “developments” regardless of traffic congestion, air pollution etc.

Answer (if comment is on questions 1-7 of the questionnaire): ()
As a resident of Ockham Road South, I must object most strongly to the new local plan;

Why have our villages been removed from the Green Belt, when the objectives of the green belt are to preserve our green and beautiful land from intrusive development?

Has anyone given a thought to the infrastructure of Horsley? The B2039 Ockham Road South was never built for the volume of traffic it is currently sustaining. At certain times of the day I cannot exit my drive without someone stopping to let me out. We regularly pick up wing mirrors (2 to 3 per week) from outside the house. I have been in the hedge twice to avoid vehicles mounting the pavement rather than slow down, and my husband has had the number plate torn off his car whilst in the drive waiting to turn left, by a speeding lorry which had mounted the pavement to avoid slowing down. There are many elderly people and mums with buggies walking up and down - will it take an accident to determine that the roads are currently very dangerous?

Places at local schools are at a premium, the doctors surgery is full, the roads flood regularly.

533 houses equals at least a thousand more people, a thousand more cars and a thousand times more load on our already fragile infrastructure.

Since our local supermarket Budgeons has Sunday opening hours, it cannot therefore be categorised as a large supermarket.

This is a village, first and foremost. It's identity is being superseded by planners who see a gap and attempt to force multiple houses on small areas of land, therefore eroding the very nature of the village.

Whilst we are all aware of the need for more housing - this plan is ill thought out, and intrusive. The scale of these proposals is totally disproportionate to the area and must be reviewed.

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D).

The "objectively assessed need" figure of 693 homes a year is too high.

A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects. The current SHMA inflates the proposed housing figure due to failure to correct for errors in the historical data for international migration flows, issues with the way it considers students and affordability and flaws in the method for estimating the number of homes needed to support job growth. It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
OBJECT to Gosden Hill development being in the Local Plan The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, 62215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.
The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England's requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an "aspiration" in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. I OBJECT to the location for new employment floorspace at Garlick's Arch - Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class Blc, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.
There is no need for the new employment floorspace to be located at Garlick's Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/1811  Respondent: 10833537 / AC Vause  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (BS).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site.

There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).
This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy 03).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylons runs through the site, which will have the potential to be a health hazard for any residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1).

If developed, the new employment site at Garlick's Arch, Send Marsh/Burnt Common {A43}, would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (B2) and storage and distribution (B8) at Garlick's Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick's Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT. Tourism and visitors do not depend on new visitor "attractions" and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/"Disneyfication". Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many "leisure and visitor attractions" already. The case for creating more is not made and no examples are given. Instead, the plan's explicit priorities should be:

1. To protect the borough's prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford's river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourist attractions. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An
"English town break" (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Answer (if comment is on questions 1-7 of the questionnaire): ()

IOBJECT (POLICY H1 - Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brex it projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council's timidity is a case of "regulatory capture" by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog's Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the "mix" this can include "market" housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances ."

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists pass through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents' in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.
I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a 'special circumstance' and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC's Green Belt & Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1SFRA has been used to guide development towards areas at the lowest risk offloading and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding.

Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3860  Respondent: 10833537 / AC Vause  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further
vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will
suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Borough Wide Strategy (Policy S2)
2. The borough wide strategy is poorly It proposes 13,860 housing being developed across the borough and does not
apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This
approach differs from all the other Borough Councils in Surrey.
3. The Housing number is based on pre-Brexit data for economic and population growth, including mi These now
need to be revised downwards, possibly quite seriously. The housing number is based on an arbitrary Housing
Market Area (HMA): the "West Surrey" tri-borough area of Guildford, Woking and Waverley. An HMA should
be an area within which a majority of people live, work, shop or On any common sense view, "West Surrey" is
much too small. Half of Guildford borough's residents work elsewhere, and half who work here live outside the
borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the
South, Reigate to the East and Basingstoke to the West; but all lie well outside "West Surrey". Puzzlingly, the
adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to
say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say)
Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more
complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public
consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however,
does not make "West Surrey" reliable. The area is artificial, and so therefore are the housing numbers derived from it. For
instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open
countryside to meet its bigger, urban neighbour's "need". Guildford wants to build 7 sites of over 500 units, compared
with only 4 across Surrey's 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This
distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the
borough resulting from the allocation Wisley Airfield (A35), Garlick's Arch (Ripley/Send border) (A43) and Gosden Hill
(Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being
located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only
about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated
between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the
surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the
borough.
The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I am a resident of the village of West Clandon and I wish to object to the following elements of the 2017 Local Plan policies having an impact on the A247 - my objections are-

The following proposals will have an impact on the traffic on the A247, much of which will be lorries and vans:-

1. Gosden Hill Development and off and on slip roads to service the development.
2. The proposed 4 form entry secondry school etc.
3. Potential employees on the employment site to the north side of Gosden Hill Farm
4. Garlick's Arch Development
5. Burnt Common on/off slip roads
6. Burnt Common industrial Site Development
7. Slyfield Development
8. Wisley Development
9. Smaller house developments in West Horsley, Send and Ripley
10. The SCC business plan for Newlands Corner

The A 247 although an A road:-

1. Is less than 2 vehicles wide in places, lorries have to mount the pavement to pass
2. Does not have continuous footpaths or street lights
3. Has several sharp bends
4. Has a humpback bridge with poor site lines
5. Has a primary school
6 Is already congested at times, more so when delays on the A3 are severe, commonly between 4 and 6.30pm
7 It cuts through the Conservation Area of West Clandon within which 19 listed buildings are located with road frontage

I wish to register my objection to the inclusion of land off Keens Lane, Worplesdon (Site A22) in the GBC Draft Local Plan for the proposed development of 140 homes and a care home and believe this is inappropriate for the following reasons:

1. Keens Lane is a narrow lane and has been so for decades, over which more and more houses have been snuck into the area feeding off of the narrow lane. Building more properties there without widening of the road does not seem logical and any widening and increased traffic would then severely impact on the interlinking, of Gravetts Lane and Tangle Lane.

2. The area is Green Belt, which should be retained and not built on, but then you know this.

It seems to me that some official in the planning department drew lines around possible open spaces and brown field sites on a CAD map. The official missed out the large commercial sites such as in Walnut Tree Close opposite Dapdune Wharf. With the downturn in commercial rents caused by Brexit, this is likely to remain empty like other site in North Street which look like a bomb site. Well done Guildford Borough Council. Leave the centre of Guildford derelict!
There has been no consideration to the disruption and cost of reinforcing the potable water, waste water, gas, electricity, drainage and communication networks to supply the new properties. Also there are no results of impact studies carried on the effects on increased traffic flows. For example 1100 houses in Flexford. In the mornings the whole area goes into gridlock already because of existing extra housing. What is the impact of another 1100 cars? Where do the 4 wheel drive cars from the new estates in Ripley and Wisley go at 8 am?

Have any of the executive team ever walked around Guildford on a Friday evening and see York Road, Stoke Road, Woodbridge Road at a standstill. Probably not.

| We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which: | | | | | • disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]  
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas  
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]  
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide. |

GBC LOCAL PLAN

I wish to make the following comments;

I object to Effingham being taken out of the Green Belt.

However, if this has to be the case, the boundary proposed in the centre of the village is very weak and a better boundary would be Church Lane and thus keeping Lower Road and the Howard of Effingham School in the Green Belt.

I attach a map showing my proposed changes.

I trust that you will take my comments into consideration.

Answer (if comment is on questions 1-7 of the questionnaire): (No)

Whilst there seems to be broad agreement for the Guildford 'demographic' OAN arrived at by the 2015 SHMA, the increase to this figure to support economic expansion, improved affordability and additional student housing has been vigorously disputed. There is credible analysis questioning the validity of this 'uplift'. As the SHMA is such a key part of the evidence base underpinning the plan some attempt should be made to resolve the differing views prior to submission, rather than just hiding behind an excuse of commercial sensitivity.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object to the Local Plan proposed for Send, Send Marsh and the surrounding area on the following grounds:

I object to the proposal to build 45 houses at Clockham Nursery, on Tannery Lane. There are already 64 houses planned for the area, plus the development of a marina, on a narrow, single track country road which cannot take the traffic. The planned building of these houses is already too much for this site (which also consistently floods) so adding 45 more houses would be disastrous.

I object to the development at Garlick's Arch for 400 houses and 7000 square metres of industrial space. The A3 is already at a very high capacity; the additional traffic from the houses and an industrial site would lead to severe congestion, nearing (or even reaching) gridlock. I also object to the industrial space on the grounds that the Employment Land Needs Assessment 2015 (ELNA) shows a reduction in required employment floor space from the previous draft plan of 80%, so it is simply not needed.

I object to all the proposed sites in Send because they were not included in the previous consultation of 2014. Send and Send Marsh have not been properly consulted on the current sites, especially Garlick's Arch and a new, 4-way A3 junction, which were pushed through at the last minute, not having previously been proposed and consulted on with local residents and businesses.

I object to the 4-way A3 junction at Burnt Common, as Send simply cannot cope with the additional traffic it would bring. Anyone who knows Send village is all too aware of the extreme traffic congestion, especially in the morning and evening rush hours. Traffic already tails back into Woking as traffic travels to and from the A3; the dangers of both gridlock and increased risk of traffic accidents really cannot be overstated.

I object to Send being removed from the Green Belt (Policy P2). The Green Belt land around Send and Send Marsh act as a buffer between Woking and Guildford. This is one of the tenets of The National Planning Policy Framework, namely point 80, which states that one of the purposes of Green Belt land is ‘to prevent neighbouring towns merging into one another’. It is vital to keep this buffer in place, not only for the local community, but because of the great natural beauty of the area.

I object to the proposals for the development of 40 houses and 2 traveller's pitches at Send Hill (Policy A44 . 1.9 ha). There is only a single track road, which already suffers from heavy traffic; it would be a grave mistake to add to this strain with the additional traffic the development would create.

I object to the large proposed development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm. Not only will this result in large areas of Green Belt being destroyed, but it will also add to the heavy traffic congestion on the A3, especially at the junction with the M25 and through Ripley, Send and Send Marsh, which are already under immense pressure from the volume of traffic travelling through and around these areas.

I object to the Local Plan based on the fact that the infrastructure of Send and Send Marsh is wholly inadequate, and cannot cope with the increase volume of traffic and population. Our schools, nursery and The Villages surgery are under immense pressure already, and could not cope with such a proposed increase in population. The road system would also be unable to take the increased volume, with the very real risk of not only gridlock, but increased risk of accidents to drivers, cyclists and pedestrians (including children at Send Primary and St Bede's schools). However, any further development of the road system would destroy the Send Marsh and Send village, which act as the essential buffer between Woking and Guildford. The plan is entirely unsuited to the area, and so I urge you to abandon it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I wish to inform you that I **strongly object to A46 in Normandy** in the June 2016 Draft Local Plan.

Residents have the right to decide where they choose to live.

I chose to live in a semi-rural environment and not in a suburban area. Normandy and Flexford's 'needs and priorities have not been decided by residents.' This developer-led plan is forcing urbanisation into a totally unsuitable environment.

A village needs to change and develop slowly and gradually over time. Normandy is changing as small pockets of infilling and development on brownfield sites have occurred. Young families are moving in and the age balance is good. There is already a lively community area especially using the Manor Fruit Farm facilities and Normandy Common.

**The Local Plan for A46 is totally out of proportion to the current size of Normandy.**

It is forcing Normandy and Flexford to become a 'town' divided only by a railway line. Development is not needed to supply village needs. There are still empty houses on the new builds in Tongham showing there is no need for further housebuilding.

Shops and pubs have closed in Normandy as they were underused. Shopping habits are changing nationally. If a 'local' shop was thought viable one of the big four supermarkets would have jumped at the opportunity of the vacant station property with small adjoining car park.

I am shocked that the Planning Department are so weak to think of using Normandy as a scapegoat as one big development saves planning department's time and hassle of a number of smaller developments using brownfield sites.

The Green Belt's purpose is to prevent urban areas sprawling by keeping green, living, breathing spaces open. These spaces are to keep us all physically and mentally well. To remove Green Belt to pacify a developer's greed is WRONG. If a developer choses an area they think will maximise profit, this does **not** count as 'Exceptional Circumstances.'

There is currently no need for a secondary school as there are sufficient spaces available for the 30 children moving on from Wyke Primary School each year. Such a school would only be needed if the development was forced through. As there is no need children would be 'dragged in' from other areas by car causing further problems on the dangerous, narrow, crowded roads. These 'dragged' children would cause the neighbouring local schools to become further undersubscribed. Any idea of children all coming by train is unrealistic. The platform at Wanborough is only 4 carriages long. Plans to bus
children to school are not feasible as it would need dozens of single decker buses as the railway arch in Westwood Lane is too low to accommodate double decker buses.

Environmentally the village lanes are narrow and twisty with very poor sight lines. Glaziers Lane (D60) has only partial pavements. I am forced to cross Glaziers Lane multiple times to simply attend Emmanuel Church in Glaziers Lane. During the week I walk my 4 grandsons to and from Nursery in Glaziers Lane. Every crossing of Glaziers Lane becomes a nightmare. Occasionally a car will stop to let us cross but this is so dangerous. A few years ago there was a fatal accident at the very place I am forced to cross over the lane as the pavement ends immediately at a sharp blind bend. This unbelievably is one of the so called access points to A46! How many people will have their lives at risk or die if this development goes ahead.

No more traffic can be pushed onto Glaziers Lane (D60) or Westwood Lane (C16). The latest development at Beech Lane (off Westwood lane) immediately adjacent to the narrow, single lane, low railway arch which is also skewed; so very poor sightline visibility is causing many near accidents with the increasing number of vehicles cutting through the village to and from the A31 Hogs Back up a narrow village lane.

Every time there is a problem on the A31 Hogs back or elsewhere traffic is forced down through the village causing snarl ups and fumes. Any traffic problem in Guildford or at the A323 Ash railway crossing causes the A323 Aldershot Road to grind to a halt. Any more enforced traffic would result in total gridlock. Asthmatics suffer dreadfully from traffic fumes.

Both D60 and C16 have narrow, dangerous, broken and filthy pavements. Glaziers Lane cannot cope with surface water drainage after the slightest rainfall water bursts out of manholes and drains which means I have to walk in the lane to dodge torrents of water and mud whilst pushing a pram. The station entrance regularly floods and pedestrians cannot access the station platforms and have to be driven through the water to the platform entrance. This problem was exacerbated by the 2 lots of infilling development along Station Road. Station Road is a right angled bend immediately at the bottom of a blind hump back bridge. This access is totally unsafe for children to access the 'so called' safe cycle path (Christmas Pie Trail) or dash to hundreds of parent's cars which would be parked on every available space around the village. School Lane cannot cope with the traffic from a one form entry Primary School. The idea of an 8 form entry Secondary School is ludicrous.

The traffic chaos in the whole Guildford area needs to be fully addressed or the resulting deaths from respiratory problems and road accidents will cause Guildford and the surrounding villages untold harm.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I am staggered and outraged with the proposals and I object

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/1447  Respondent: 10836033 / Katherine Gervasio  Agent:
I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough because it is too high.

The Plan’s proposed growth is based on the SHMA report which says that 693 homes a year are required by the borough. This is more than double the figure of 322 used in previous plans. However, the Council will not publish the SHMA report so how do we know if this figure is commensurate with demand or not? This lack of transparency is unacceptable for consultation on the Plan!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley

Garlick’s Arch is protected from development as Green Belt. Central Government states clearly that housing need is not an exceptional circumstance and, therefore, there are no exceptional circumstances which allow for the removal of Garlick’s Arch from the Green Belt (Policy P2). The Plan states that Brownfield Site should be used in preference and yet Guildford Borough Council have removed the Burnt Common proposal and replaced it with Green Belt land at Garlick’s Arch. There are other reasons that this site is unsuitable which have already been mentioned such as frequent flooding, lack of transport infrastructure, the site of ancient woodland with accompanying wildlife habitat and the lack of schools and medical facilities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. Central Government states clearly that housing need is not an exceptional circumstance and, therefore, there are no exceptional circumstances which allow for the removal of Garlick’s Arch from the Green Belt (Policy P2). The Plan states that Brownfield Site should be used in preference and yet Guildford Borough Council have removed the Burnt Common proposal and replaced it with Green Belt land at Garlick’s Arch. There are other reasons that this site is unsuitable which have already been mentioned such as frequent flooding, lack of transport infrastructure, the site of ancient woodland with accompanying wildlife habitat and the lack of schools and medical facilities.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the inclusion of the land for new on/off ramps at Burnt Common

If this plan goes ahead, all the traffic from London/M25 to Woking and back will go through Burnt Common, Send and Old Woking. The proposed extra development in the area will compound this problem. The roads cannot take this sort of traffic, they struggle with current traffic levels. Neither can they be improved/widened because they run through villages.

Comment ID: PSLPP16/5823  
Respondent: 10836033 / Katherine Gervasio  
Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3
I object to the damage to the historic environment as a result of the scale of the proposed development

Garlick’s Arch (A43) is proposed to have development that would double the built up area in this locality and include business units which are more than likely to attract heavy goods vehicles and this would inevitably damage the character of the Ancient Woodland which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. **I object to the employment strategy and impact at Garlick’s Arch (A43)**

There is no need for new industrial sites on Green Belt at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000sq m proposed. That site was removed from the Plan without any reasoning.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1. **I object to there being a lack of proper infrastructure planning for sites (Policy 11)**

The Local Plan does not include adequate infrastructure improvements to accommodate such a massive development. The area is already overloaded and there is no thought for police/emergency services provision for the extra 5000 + houses planned in the Local Plan in the north-east of the Borough.

At Garlick’s Arch (A43) for instance, local services, sewerage, utilities, doctors and schools are already at full capacity but there is no infrastructure projects envisaged in the Plan so the development is untenable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. **I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure**

There is no plan to improve the main roads in Send, Clandon and Ripley which are already overly congested. As for the smaller, rural roads - these are often narrow or single track, in poor condition with no pedestrian provision. In rush hour these roads are used as alternatives. Any more traffic (from large housing developments) would be dangerous and unsustainable.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Answer (if comment is on questions 1-7 of the questionnaire): ()

Lastly, I object due to the congestion that will be caused to the trunk roads, A3/M25 by the development

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the time frame of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been there for decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

4. I object that Green Belt is being removed from its Protection.

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). This will result in urban sprawl which is exactly why it was designated Green Belt in the first place. The cavalier approach of this Local Plan to summarily remove the Green Belt because it does not suit is, at best, convenient, and, at worst, criminal. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy. Why cannot the plan develop the existing brownfield site at Burnt Common, originally in the Draft, rather than developing Garlick’s Arch (A43)?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. **I object to development in areas which are at risk of flooding**

The Garlick’s Arch Site (A43) is classified as a higher risk of flooding by the Environment Agency in the Council’s own assessment. This area has flooded many times in recent years so should not be included in the development. This Plan does not take adequate account of flood risk as required by National Planning Policy. It will mean misery for those who buy houses on this site!

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I object to the Local Plan for the unsustainability of the development proposed (Policy S1)

The proposed number of houses for the Borough will damage local communities, especially Ripley, Send and Clandon. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services. This means that people who buy houses here will have to rely on cars which will clog the whole area. Why not target urban areas, with good public services, for more development rather than small villages whose characters will change as a result of over-development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. **I object to the Borough Wide Strategy**

In my opinion the Plan is unbalanced: 36% of all the Plan’s new housing is proposed in the north-east area of Guildford: (Wisley [A35], Ripley/Send [A43] and Clandon [A25]) where there is currently only 11% of the current housing. A staggering amount of housing: 5,036 new homes are proposed on the 5 mile stretch between the M25 and Burpham. This will result in a merging urbanisation of these villages.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the increase in housing numbers from 45 to 60 at Site A42 in Tannery Lane, Send. It will have a significant impact on the already highly congested local rural road network around and within Ripley. This is in contradiction to section 2.14a of the Plan which states “Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Proposed Submission Local Plan (June 2017)

I am objecting to the Guildford Borough Proposed Submission Local Plan (June 2017) and the changes around Ripley and Send, which have increased development so that this Plan is even worse than the 2016 proposals.

I object to the increased A43 Garlicks Arch development. It is Green Belt land and has no identified or exceptional need with the Local Plan Documentation.

I object to the proposed 6 Travelling Showpeople plots. There is no need for this many and the designated formula is for 1500-1999 home on the same site. There are 400 houses proposed on the site so 6 is too many for the amount of houses.
I object to this many Traveller plots in the Ripley/Send area. In Section 4.2.22 of the Plan it states that “Sufficient sites are identified within the Local Plan [for] 8 plots for Travelling Showpeople.” So why do 75% of them have to be in Ripley? This is unbalanced and unfair.

I object to the change in wording and likely consequences on ‘Affordable Homes’. In the 2016 version of the Plan (Policy 4.2.23) it stated that Developers will be expected to provide land for affordable homes at nil value. Now it just says “Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.” Developers can just pay money to the Council to avoid including affordable homes. This is disgraceful!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Re: Guildford Borough Council's Final Draft Local Plan

I am writing to show my objection to your plans for development in Send and the surrounding area and would like my views to be seen by the Planning Inspector.

The amount and scale of proposed development in a village such as Send is beyond a level that is reasonable. The number of proposed new houses has been increased from the number last objected to, up to 485. Surely this warrants another consultation!

Send is within the Green Belt, which in itself should preclude any development that is not reasonable and in keeping with the identity of the village. The village of Send does not have the space or resources to accommodate the infrastructure that is needed to cope with the development which includes an increase in housing, and a development to build 485 houses and an area of industrial, storage and distribution space at Garlick's Arch.

This area can specifically not handle the additional traffic that will be developed if a new interchange on the A3 is built and the roads will be gridlocked all day and night.
The scale of the proposed development will destroy the Green Belt and the rural identity of the village and lead Send to become a concreted "suburb" of Woking or Guildford and lose its Green Belt status. Some of the development is on or near to land that regularly floods and therefore not practical.

We will also lose beautiful, green spaces in which to play and walk and which are of benefit to all. Send is a "buffer" between Woking and Guildford and should retain its Green Belt status and not have unnecessary and unsympathetic development within its boundaries.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Further, the specific proposal for a traveller's pitch has also not been consulted on previously and in addition the roads that will be needed to access this site together with the proposed sites for development at Winds Ridge and Send Hill, designated for 40 homes and 2 travellers pitches, are narrow, hedge lined lanes that are not suitable to accommodate the size of road required to manage the additional traffic that will pass along their route.

I trust that you will reconsider the totally inappropriate plans which are objected to by the residents of Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A35 - Land at Wisley Airfield. (Three Farm Meadows). The continued retention of this land in the Local Plan for the planned building of massive housing estates total over 2000 houses is completely unacceptable. Not only will the small village feel of the areas be completely lost but the areas simply cannot take that volume of new housing all at once. There is not the infrastructure nor the amenities in the areas to be able to handle this volume increase. As a Daily commuter who uses the A3 on a daily basis the roads are already not able to cope with the existing traffic any further
increase in volume would be completely unacceptable. The changes in the revised plan are only small and make no effort to address the real issues at stake here regarding the impact on the local communities and infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I am writing to send an objection to development of land at Keens Lane for 140 homes, Site A.22 in the Local Plan.

1. The site should not be developed as it forms part of the Green Belt protected zone surrounding Guildford.

2. Keens Lane is a very narrow lane, bordered on the one side by housing and common land, and on the other by tall hedges. In places it is impossible for two vehicles to pass each other. Tangley Lane, into which Keens Lane feeds, and which forms part of the boundary of the development, is equally narrow, and has a particularly hazardous blind 90 degree corner. Both lanes are unsuitable for further traffic.

3. Whitmoor Common SPA is adjacent to the corner of the proposed development, and with the nearby Broad Street Common SNCI, further housing development would create unacceptable stress on these unique protected habitats, and the wildlife corridor between them.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()

A secondary school at site A46 is not needed

There are a very large number (many hundreds) of vacant secondary school places in local schools (undersubscribed), all of which have space for expansion and a willingness from them to increase admission numbers by expanding if there was demand. The nearest secondary school, Ash Manor, is only 3 miles from the A46 site. There is no requirement for a new secondary school in Normandy.
There are NO EXCEPTIONAL CIRCUMSTANCES to take site A46 at Normandy out of the Green Belt. As already stated there is no need to build a secondary school at site A46.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Infrastructure of Normandy cannot support the development of site A46.

Highways

Site A46 is bounded by Glaziers Lane (060) and Westward Lane (C16). Both of these are 'Lanes' by definition- not roads. Lane is defined as a narrow way or road. In particular Glaziers Lane is unclassified. It is narrow with blind bends with a steep blind hump back bridge (over a railway line) at skewed angle. In the main there is only a foot path on one side of the lane but this changes from one side to the other and back again at the most dangerous positions possible - one by a sharp blind bend with no sight lines forcing people to cross actually on the bend and hope no vehicles are coming as the sight line doesn't materialise until you are halfway across the lane (the site of a fatal road accident some years ago). The other at the base of the hump back bridge where there is no sight line of oncoming vehicles due to the blind summit. Because of the narrowness of much of the footpath it is difficult to push a pram along without having at times to go into the road. Neither Glaziers Lane nor Westwood Lane were designed for the volume of traffic they currently take, let alone a massive increase that would be generated by developing A46.

Westward Lane has a very narrow railway arch under which the lane passes. This is only one lane wide and is skewed with poor sightline visibility. This also has a height restriction preventing larger vehicles such as buses and lorries from using.

Although unsuitable, both Glaziers Lane and Westward Lane take traffic between A31 Hogs Back and A323 Aldershot/Guildford Road particularly at peak times. Whenever there are traffic problems on A31 or A323, (with increasing frequency), traffic diverts through Normandy causing traffic chaos.

The proposed development of site A46 would create a massive increase in vehicle movements on a daily basis throughout the day. The vehicle movements and parking of parent' cars because of the very large school would be massive and should not be underestimated. Traffic chaos would prevail and also the problems caused by hundreds of parked cars due to parents taking and collecting children at the school.

Most children would not be able to come by rail (the station platforms are only long enough for 4 carriages) and these are usually full of passengers in the mornings and evenings. It would not be safe or possible to bus hundreds of children in and out of school each day either - the number of coaches required on these narrow busy roads would be dangerous.

### Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** (

Site A46 at Normandy has been designated as RED ZONE sensitive area by GBC, where development should **not** take place and should remain in the Green Belt.

The proposed development of site A46 would completely urbanise the semi-rural village of Normandy, destroying the open space. It would more than double the number of houses plus all the additions of commercial and other buildings and also the enormity of a very large secondary school - replacing grass with concrete. The whole purpose of Green Belt land is to provide a buffer from increased urbanisation, to provide a living, breathing 'green space'.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

*Surface water/ Flood risk*

Surface water problems are evident over the whole of the Normandy area with standing and often flowing water from drains into the roads and adjacent land in heavy rain. The drainage system at present is at capacity and there is absolutely no doubt that the proposed development of A46 would be catastrophic for surface water in Normandy and nowhere for the water to go when it rains, let alone the volumes of water generated by the development. Even part of the A46 site which adjoins a stream is a flood plain when the stream overflows. What will happen when this land is built on?

Where will the excess water go? Where will the water from the development go? It will cause serious flooding in the area.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the site proposed under PolicyA43 which is one of the last minute additions to the GBC Plan. Development of Garlick's Arch will destroy ancient woodland and Green Belt land. The requirement for a further 400 homes must be justified along with the need for 7000sq m of industrial space when the Slyfield site would seem to have the necessary acreage available for this purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3381  Respondent: 10837313 / Mary Jane Gray  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a
I object to the development proposed under Policy A43A. Construction of a new interchange onto the A3 at Burnt Common will impose an intolerable burden on the A247 through Send and West Clandon as this road will now become a primary feeder to the A3 and hence the M25. The existing roads though these villages cannot be widened or upgraded and are already overloaded at peak times so any further increase in traffic flows will produce a gridlock situation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the site proposed under Policy 44. This is another new site that was not included in the Regulation 18 draft document. As well as being Green Belt land this site has been the subject of extensive landfill activities that need to be fully researched before it can even be considered for development. I believe that the inclusion of 2 No. Travellers Pitches at this site is wholly inappropriate for both the travellers and the existing community.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
In general I object to the apparent failure of the GBC to firstly identify all available brownfield sites within the urban area for development and the continued support of the GBC for proposals that destroy Green Belt and open countryside particularly along the A3 corridor.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/883  Respondent: 10837313 / Mary Jane Gray  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed changes under Policy A42 of the Plan to increase the number of homes at Clockbarn Nursery to 60. This proposal takes no account of the many objections raised previously regarding the development of this site with respect to traffic along Tannery lane and its junction with Send Road, drainage and erosion of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposed changes under Policy A43 of the Plan for 400 homes and 6 Travelling Showpeople Plots at Garlick's Arch. Once again this proposal ignores all previous concerns with respect to the development of this site in respect of loss of Green Belt, traffic congestion, drainage, lead pollution and the destruction of ancient woodland. It would also seem to be totally as much as anything else to locate Travelling Showpeople on a residential development such as that being proposed.[Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the proposed changes under Policy A58 of the Plan for a new minimum allocation of 7000m² of Industrial and Warehousing on land at Burnt Common. Development of this area was deleted from the 2014 draft of the Local Plan due to the number of objections received and I can see no justification for its reintroduction in this Plan. GBC are implored to exhaust the development of all existing available industrial sites within the Borough before introducing new sites within Green Belt areas that are to the detriment of the community as a whole.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposed removal of Send Business Park from the Green Belt under Policy 2 (paragraph 4.3.25) of the Plan. I believe that this policy is will result in yet further commercial development at this site and takes no account of the poor vehicular access in both directions along Tannery Lane or the position of the site in open countryside adjacent to the Wey Navigation.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the local plan proposed, and express my worries about the assault on the countryside and Sends local environment. Policy P2 removal of villages from the green belt is very worrying and I object most strongly as it sends the opposite message to your statement in the "About Guildford" publication- "One of the boroughs biggest assets is our significant Green Belt and major consideration is given to protect this".

I strongly object to Policy A43, Garlick's Arch with its proposed A3 junction, 400 houses and a large area of Industrial and warehousing 1000 sq metres. This would really impact on all aspects of Send's life. The A247 is already at a stand still morning and evening during the week and when there is an accident on the A3. It would also make a huge impact on the schools and medical centre. This site has been sprung on us as is on Green Belt protection through NPPF and also it was not included in the regulation 18 draft.

I also object to Policy A44, which again was not included in the regulation 18 draft which is in permanent Green Belt status it contains unsafe landfill waste and is only accessed by a narrow single track country road and Send cemetry is close by, it would disturb the peace and quiet we would hope to keep.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Finally I enclose a cutting from the before mentioned “About Guildford” publication, in particular the paragraphs leaded “your questions about the local plan answered”

“questions. Will there be developments along the A3 from J10 of M25 to beyond the Hogs back?

Answer NO

It then proceeds to explain that in fact there will be some developments.

The paragraph alongside it to the right states “the plan rejects any schemes that would have a detrimental effect on the green belt.

I submit that policy A43. Garlicks Arch proposal cannot be considered to be anything other than detrimental to the green belt.

Such comments in print from “Guildford Borough Council” are in my opinion designed to confuse folks who are very worried over the prospects of the potential disruption of the status quo and all we hold dear.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I further object to the proposal to inset Send business park from the Green Belt- Policy 2 para's 4.3.15 as Tannery Lane is highly restricted in either direction for large commercial/industrial vehicles, being in an area of open countryside adjacent to the attractive Wey navigation in the Green Belt.

I have lived in Send since 1970 and increasingly in recent years have felt the need to add my voice to defend the peace and quiet I moved here for. GBC seems to have a predilection to ignore the ideals of the Green Belt and the laws constraints to take due account of inadequate infrastructure of roads, school and medical facilities and ignore the traffic and pollution implications in a disproportionate manner for our area.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to submit the following comments and concerns regarding the latest version of the local plan.

- I believe the annual number of houses being proposed each year is too high and needs reducing as the current number does not stand up to detailed scrutiny.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A22
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

• POLICY A22: Land north of Keens Lane, Guildford
  o I do not support the size of the site at the land north of Keens Lane, Guildford for the western end of this site heavily encroaches on the existing properties in Keens, Tangle and Gravets Lane. I would support this site if it was reduced in size to address my concern.
  o I have concerns with the amount of traffic that will be created on Keens, Tangle and Gravets Lane as a result of this site. All of those roads are very small and not designed for the increase that would result. The site would be better served by a single access road from the A322 Worplesdon Road and would support this site if this was the case.
    • I am grateful to see the removal of the sites at Liddington Hall and Fairlands as I did not support them in the previous local plan for numerous reasons.

Other than the points I have highlighted I have no objection and support of rest of the local plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

You have failed to provide sound evidence for your “late additions” in terms of the Employment Lands Needs Assessment of 2015 (ELNA), which shows an 80% reduction in employment space from previous Assessment carried out by Guildford Borough Council in 2013. This means that industrial space at Burnt Common is no longer needed.

I strongly OBJECT to the industrial development at Garlick’s Arch. This is just not needed since the (ELNA) has shown a reduction of 80% in required floor space from the previous plan. If there is a need for industrial space, then this should be a Slyfield.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly OBJECT to the housing suggestion at Garlick’s Arch, as there is no more need for these houses. The number of foreign students I feel has been wrongly used to inflate the need. The required 13,860 houses in the local plan is vastly exaggerated. If the population is to grow by 20,000 as suggested in the plan period, we actually need 8,000 homes, (based on an average of 2.5 people per home).

OJECTIONS TO NEW DRAFT LOCAL PLAN 2016

I have now seen your new revised Local Plan and am appalled by your plans for Send. You have not followed the correct process and have changed every major site in Send proposed for development since 2014. Not only that, you have now added the “Garlick’s Arch” at Burnt Common and a new development of 40 houses and 2 Travellers Pitches on Send Hill.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have now seen your new revised Local Plan and am appalled by your plans for Send. You have not followed the correct process and have changed every major site in Send proposed for development since 2014. Not only that, you have now added the "Garlick's Arch" at Burnt Common and a new development of 40 houses and 2 Travellers Pitches on Send Hill.

Your original plan of 2014 proposed 430 houses for Send, but this went down in April 2016 to 185 after many objections. This has now gone back up to 485. You cannot make these significant changes without another full consultation under Regulation 18. This will invalidate the whole process!

You have failed to provide sound evidence for your "late additions" in terms of the Employment Lands Needs Assessment of 2015 (ELNA), which shows an 80% reduction in employment space from previous Assessment carried out by Guildford Borough Council in 2013. This means that industrial space at Burnt Common is no longer needed.

I strongly OBJECT to removing Send from the Green Belt, you are just using this to your advantage to allow for more development. The Green Belt around this area is permanently protected by the NPPF which prevents merging settlements. I This area contains ancient woodland with trees from the 16th Century. 50% of new homes needed could be built on brownfield sites.

I strongly OBJECT to Garlick's Arch as this site was not included in the Regulation 18 draft and has not been consulted upon previously.

I strongly OBJECT to the housing suggestion at Garlick's Arch, as there is no more need for these houses. The number of foreign students I feel has been wrongly used to inflate the need. The required 13,860 houses in the local plan is vastly exaggerated. If the population is to grow by 20,000 as suggested in the plan period, we actually need 8,000 homes, (based on an average of 2.5 people per home).

I strongly OBJECT to the industrial development at Garlick's Arch. This is just not needed since the (ELNA) has shown a reduction of 80% in required floor space from the previous plan. If there is a need for industrial space, then this should be a Slyfield.

I strongly OBJECT to a 4 way interchange onto the A3 at Burnt Common. This would mean the Send Road (A247), would become a through route to Woking for traffic leaving the M25 and A3 and also the proposed 2,000 houses at Wisley and the 2,000 houses at Burpham which would leave it gridlocked all day long and not just at rush hour.
I strongly **OBJECT** to the 40 homes and 2 Travellers Pitches designated to the land West of Winds Ridge on Send Hill. Again this site was not included in the regulation 18 draft and has not been consulted upon previously. This area is within beautiful countryside in the Green Belt which would be spoilt by your development. The area is also a known landfill site with documented unsafe waste which is currently vented. Disturbing this land could leach toxic chemicals into the surrounding atmosphere. The cemetery is opposite your proposed site which is meant to be a peaceful place for people to come and visit their lost ones. Adding another 40 homes with two cars per household will remove the peace and quiet. This proposal is in appropriate due to the narrow width single track country road which becomes very hazardous in winter, providing insufficient access to the site.

I hope you take my objections into account when making your final decisions.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We would like to register our objection to the proposed New Local Plan. Fifty seven years ago, we moved to the lovely village of West Horsley and over the years have seen it grow, however, it has basically remained a village.

If the proposed developments go ahead, it will become a town, without the infrastructure to support it. If we had wanted to live in a town to raise our family, we would have done so.

It is of great concern to us that these developments will increase the population significantly and without due concern to the Green belt which was set up to prevent the spread of towns particularly around London.

I object to the proposed new development at Garlick's Arch. GBC has failed to demonstrate the need for a further 400 houses in addition to those already included in the Plan, or the need for such an extensive industrial/warehouse development. The area, which is currently Green Belt, includes ancient woodland, which, once lost, could never be replaced. The area already has an established industrial site at Slyfield. Given the latest Employment Land Needs Assessment 2015 showed an expected 80% reduction in the required employment floor space from the previous draft plan, this could easily be accommodated at Slyfield.

I object to the new A3 interchange at Burnt Common. The roads around Send are already congested: already at peak times it is difficult to safely turn out of Boughton Hall Avenue onto the Portsmouth Road, and the proposed development is likely to result in near-permanent gridlock at Burnt Common. In addition, the road through Clandon is unsuitable for large vehicles: I have seen several "near misses" as lorries come round narrow bends straddling the middle of the road. The inevitable increase in commercial traffic would make these roads far more dangerous.

I object to the proposed development west of Winds Ridge and Send Hill. This new site was not included in the original plan and has not been consulted on. Apart from the loss of Green Belt this would entail, I understand the area includes vented land fill, increasing the risk of building on the site. In addition, the site is served by a narrow single track road, which could not safely handle the increase in traffic which the development would produce.

While I recognise that some level of new house building is necessary, I am concerned that the proposed Local Plan vastly overstates the need for both new housing and industrial expansion and does not take account of the limitations of the infrastructure in the Send area. Accordingly:

I object to the removal of Send village from the Green Belt. The inevitable result of this would be extensive development effectively removing the buffer between Guildford and Woking. Amongst the areas lost would be school playing fields and woodland: a great loss of amenity for all residents.

With reference to the latest GBC Local Plan, I strongly object to all the proposals noted in the Local Plan now submitted for further development and changes to the Green Belt Boundaries in Send, considering that these are not only significantly different from the previous proposals submitted in 2014 but are both flawed and ill conceived.

I wish to question why the Council consider it necessary to make incursions into current Green Belt areas without first exhausting all available 'Brownfield' sites in the Borough. It is my understanding that Government directives require these sites to be developed as a priority in order that the required housing demand can be satisfied before the need to spoil our beautiful countryside forever.

There are many detailed objections to the particular sites identified (i.e., Garlick's Arch Clockbarn Nursery and Winds Ridge) but my main point is that the development of 'Brownfield' sites is most likely to negate the requirement for these sites to even be considered.

I also object to the lack of clarity given with respect to the derivation of the housing requirement figures. It would appear that the figures have been based on an exaggerated housing need which has resulted in increased numbers from the previously submitted plan, an increase that can only be satisfied by building on Green Belt land.

I therefore re-iterate my strongest objection to the Local Plan for Send in its current form and insist that Guildford Borough Council must reconsider the proposals in their entirety.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed changes to increase the number of homes at Clockbarn Nursery to 60 under Policy A42 of the Plan. The increase in number is totally unacceptable and takes no account of previous concerns raised regarding the development of this site with respect to traffic management and safety along Tannery Lane and its junction with the A247 at Send Road. A full and thorough TIA must be carried out to prove beyond doubt that the inherent dangers associated with the additional traffic from this development and the Send Business Park can be managed and the appropriate road and junction improvements can and will be implemented.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposed changes for the allocation of 400 homes and 6 Travelling Showpeople Plots at Garlick's Arch under Policy A43 of the Plan. The proposal ignores all previous concerns that the development of Garlick's Arch will destroy ancient woodland and Green Belt land together with the very real possibility of causing drainage problems for the areas of Send Marsh that are downstream of the site. The number of houses proposed at this site is excessive and will undoubtedly adversely affect the local traffic situation in Send and Ripley and will be the start of a 'bridge' of development which will join the two villages thereby defeating the purpose of the Green Belt provision. I would also question whether there is a proven need for Travelling Showpeople Plots at this location especially as it would seem wholly inappropriate to locate what are effectively commercial sites within a residential area.

I object to the proposed changes for a new allocation for a minimum of 7000m2 of Industrial or Warehousing on Land at Burnt Common under Policy A58 of the Plan. Development of this area was deleted from the 2014 draft of the Local Plan due to the number of objections raised previously. I would question whether the present demand for Industrial Land is such that there is a need to develop Green Belt land at all let alone change the requirements on this site from a 'maximum' under the 2016 Proposed Plan to a 'minimum' development area under this Plan. I therefore request that GBC explore the development of all existing industrial sites within the Guildford area such as those that are currently available at Slyfield before introducing new industrial sites within the Green Belt areas.

I therefore re-iterate my strongest objection to the local Plan 2017 for Send in its current form and insist that Guildford Borough Council reconsider the proposals accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the removal of Send Business Park from the Green Belt as proposed under Policy P2 (paragraph 4.3.15) of the Plan. I believe that this is the 'thin end of the wedge' that will result in yet further expansion of commercial building at this location which is totally inappropriate given its position within open countryside adjacent to the Wey Navigation and the poor vehicular access in both directions along Tannery Lane.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I strongly object to the proposed building of 1100 homes, a secondary school and six travelling showman sites with yards on sustainable agricultural land between Normandy and Flexford.

This will lead to a 100% increase in the number of home in Normandy thus destroying our village and rural environment. The Green Belt land (site 368) is grade 3 arable and pastoral and has not been removed from the green belt. As we are the only remaining open rural area in between Ash and Pirbright heath lands this will have a devastating impact on the habitat of the remaining wildlife. The urbanisation will threaten the rare birds of the THBSPA, which is only 1km away from this proposed development which 2700 people, 1500 cars, 250 dogs and 190 cats. This could have detrimental effect on the THBSPA.

The development will bring chaos to the already congested roads which frequently come to a standstill at rush hour times. New school will add even more traffic and is there any need for a new school? has not been proven.

More homes should be built on brownfield sites. There are brownfield sites available for another million homes plus developers have running permission outstanding for 65,000 homes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I support the removal from the Local Plan of site A.46 (land to the South of Normandy and North of Flexford) – 1,100 homes and school. The removal of site A47-50 homes (land to the East of the Paddocks Flexford.)

I object to the proposed change that Normandy settlement, Flexford settlement and Walden Cottages should be inset from the Green Belt. There is evidence in past planning appeals APP/Y3615/W/15/3002308, APP/Y3615/A/10/2140630 and APP/Y3615/A/10/2131590 that the land here contributes to the “openness” of the Green Belt.

There is evidence in the sustainability Appraisal para 10.4.7 that the agricultural land between the settlements is of BMV quality, exhibits ‘openness’ and contributes to the rural economy.

The land in and around the settlements of Normandy and Flexford Contributes to views into and from the Surrey Hills AONB (HOGS BACK.)

Policy P2 omits any assessment of the Green Belts value. The Green Belt is not just empty space but is an inhabited working environment that safeguards a certain [illegible word] of natural capital. There is no “acceptable” percentage (in the NPPF or anywhere else) of land that may be removed from the Green Belt.

I object to the changed “insetting” of 15 villages from the Green Belt and at “infilling” 12 of the borough’s Green Belt villages. I am concerned that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. This is completely unplanned and unmeasured development outside the OAN.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43- Land at Garlick's Arch, Send marsh

I OBJECT TO POLICY A43 CHANGE AT GARLICK'S ARCH because

1) it will generate much more traffic than we already have to put up with
2) it will join the villages of Send and Ripley (Ripley already overloaded with traffic from Junction 10 on the M25 and a 'short-cut' for traffic from the A3 which ends up in Send!)
3) the thousands of objections that have been made by local people previously have been totally ignored
4) the site frequently floods
5) OUR GREEN BELT AND THE ANCIENT WOODLANDS (DATING BACK TO THE TIME OF ELIZABETH I) SHOULD BE LEFT AS THEY ARE!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/614  Respondent: 10839393 / F.A. Howell  Agent:
Policy A58- Land at Burnt Common, London Road

I OBJECT TO POLICY A58 AT BURNT COMMON because there is already an established industrial area at Slyfield- why cant this be developed?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/71  Respondent: 10839393 / F.A. Howell  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Green Belt, Policy 2 at paragraph 4.3.15

I OBJECT TO POLICY 2 AT PARAGRAPH 4.3.15 because

1) we are not an industrial area
2) Tannery lane (in both directions) is far too small to accommodate large lorries
3) Council has failed to provide a need for self build plots, additional employment floor space or space for travelling show people in this area.

Council has already received over 3000 objections to the Garlick's Arch site proposal from just one small area of Send (namely Send marsh), which on account of the population density is unanimous! When Council rejected the Wisley Airfield proposal unanimously, that had some effect, and likewise so should this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the site proposed under Policy A42a. Planning permission has already been granted for development of a marina and 64 apartments on the adjacent site. Any additional development on Tannery lane will create further safety issues with respect to the traffic loads on this narrow road and its junction with Send Road. A full and thorough TIA must be carried out to prove beyond doubt that the inherent dangers associated with the additional traffic from these developments can be managed and the appropriate road and junction improvements can and will be implemented before any development goes ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the site proposed under Policy A43 'which is one of the last minute additions to the GBC Plan. Development of Garlick's Arch will destroy ancient woodland and Green Belt land as well as create severe drainage problems for the areas of Send Marsh that are downstream of the site. Any development of this area will need to be proven by a full and thorough Environmental Study to indicate how these problems are to be addressed. I would also question the need for a further 400 homes over and above the previous figures as well as the need for 7000sqm of industrial space when the Slyfield site would seem to have the necessary acreage available for this purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the development proposed under Policy A43A. Construction of a new interchange onto the A3 at Burnt Common will impose additional burden on the A247 through Send and West Clandon as this road will now become a primary feeder to the A3 and hence the M25. The existing roads through these villages cannot be widened or upgraded and therefore will be subject to an intolerable increase in the volume of traffic without being able to address the safe flow of that traffic. I would also suggest that any further developments and accesses along the A3 corridor are completely meaningless until the current traffic issues that are encountered on a daily basis at the Guildford By-pass and approaches to Junction 10 of the M25 are resolved.

Comment ID: PSLPS16/3410  Respondent: 10839649 / Lawrence Harris  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the site proposed under Policy 44. This is another new site that was not included in the Regulation 18 draft document. As well as being Green Belt land this site has been the subject of extensive landfill activities thus a full Environmental Study is required before it can even be considered for development. In any event I believe that the inclusion of 2 No. Travellers Pitches at this site is wholly inappropriate for both the travellers and the existing community given its proximity to the new housing proposals and other residential developments in the immediate vicinity.

With reference to Policy P2 of the GBC local Plan I strongly object to the removal of Send from the GreenBelt. I believe that this is the 'thin end of the wedge' and will result in yet further erosion of this vital asset to the well being of the people of Surrey in the future. The latest GBC Local Plan for Send includes a number of changes from the previous version put forward in 2014. I object to the manner with which these additional sites have been included and consider that these significant changes require the full consultation process to be effected not the shortcut procedure under Regulation 19 that the GBC are currently trying to implement.

I object to the proposed changes to increase the number of homes at Clockbarn Nursery to 60 under Policy A42 of the Plan. The increase in number is totally unacceptable and takes no account of previous concerns raised regarding the development of this site with respect to traffic management and safety along Tannery Lane and its junction with the A247 at Send Road. A full and thorough TIA must be carried out to prove beyond doubt that the inherent dangers associated with the additional traffic from this development and the Send Business Park can be managed and the appropriate road and junction improvements can and will be implemented.

I object to the proposed changes for the allocation of 400 homes and 6 Travelling Showpeople Plots at Garlick's Arch under Policy A43 of the Plan. The proposal ignores all previous concerns that the development of Garlick's Arch will destroy ancient woodland and Green Belt land together with the very real possibility of causing drainage problems for the areas of Send Marsh that are downstream of the site. The number of houses proposed at this site is excessive and will undoubtedly adversely affect the local traffic situation in Send and Ripley and will be the start of a 'bridge' of development which will join the two villages thereby defeating the purpose of the Green Belt provision. I would also question whether there is a proven need for Travelling Showpeople Plots at this location especially as it would seem wholly inappropriate to locate what are effectively commercial sites within a residential area.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

I object to the proposed changes of a new allocation for a minimum of 7000m2 of Industrial or Warehousing on Land at Burnt Common under Policy A58 of the Plan. Development of this area was deleted from the 2014 draft of the Local Plan due to the number of objections raised previously. I would question whether the present demand for Industrial Land is such that there is a need to develop Green Belt land at all let alone change the requirements on this site from a 'maximum' under the 2016 Proposed Plan to a 'minimum' development area under this Plan. I therefore request that GBC explore the development of all existing industrial sites within the Guildford area such as those that are currently available at Slyfield before introducing new industrial sites within the Green Belt areas.

I therefore re-iterate my strongest objection to the local Plan 2017 for Send in its current form and insist that Guildford Borough Council reconsider the proposals accordingly.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - East Horsley South

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We have lived here in East Horsley for almost 40 years and the village is growing alarmingly. The basic infrastructure cannot cope with a lot more housing which means many more people using the roads, which are narrow, the shops with inadequate parking, the schools which are not big enough and the medical practice which is stretched already. If more housing is needed on a larger scale then plans must be in place to provide the appropriate services of schools, doctors and shops. Our country lanes cannot cope with the added weight of enormous lorries cutting through from the A3, and M25, they are not in good condition now and will only get worse. Cars are forced off the road by the size of lorries using country lanes to avoid motorways. More housing will bring many more contractors vehicles and consequently roads will suffer with deep rutting and pot holes, already a problem. The Horsleys are old villages which do not have the resources to cope with a dramatic rise in population. They are in the green belt and have many farms and fields with animals. These need to be preserved for future generations to enjoy green open space away from the M25.

We add our agreement to the document drawn up by the Horsley Countryside Preservation Society citing the many reasons that large scale building of houses would be detrimental to the area and hope that local residents' views and reasons will be taken into consideration when this local plan is again discussed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object to the proposed Local Plan for the village of Send, Send Marsh and the surrounding Green Belt area.

I object to the Local Plan on the grounds of Guildford Borough Council (GBC) having made major changes to the Plan in recent months. These changes are so significant that another full consultation under Regulation 18 is required, as opposed to Regulation 19, which GBC are trying to use to quickly force through the proposals.

I object to the proposal to remove Send from the Green Belt (Policy P2). The National Planning Policy Framework (point 80) states that Green Belt land is vital 'to prevent neighbouring towns merging into one another'. Send and its surrounding Green Belt land plays precisely that role, between Guildford and Woking.

I object to the development at Garlick's Arch, which is being proposed as the site for 400 houses and also 7000 square metres of industrial space. The Employment Land Needs Assessment 2015 (ELNA) has concluded that there has been a dramatic reduction in the employment floor space needed, down 80% from the previous ELNA of 2013. This means that there is no longer the need for this industrial space. Also regarding the industrial space, together with the proposed 400 houses at this site; the pressure on an already heavily used A3 would be too great, leading to severe delays, increased accident risk and potential gridlock.

I object to the proposed 4-way A3 interchange at Burnt Common, as Send simply cannot cope with the additional traffic it would bring, especially if the proposed developments at Wisley, Gosden Hill in Burpham and Blackwell Farm go through. Send has one road passing through it, from the A3 down Send Hill, past The Villages Surgery and two schools and on to Woking. The current demand for access to and from the M25 and A3 is already too great, with traffic often crawling for miles, and sometimes at a standstill. There is simply not the capacity for the increase in traffic the interchange would bring, and the increased risk of traffic accidents, particularly around the schools and the centre of Send village would be significant.

I object to the proposed development of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill in Burpham and 1,850 houses at Blackwell Farm. There is already intense traffic in these areas, particularly around the M25, and as such will only add to the high volume of traffic passing through Send and Send Marsh, which do not have the infrastructure to cope.

I object to the proposed development of 40 houses and 2 traveler’s pitches at Send Hill and lands west of Winds Ridge (Policy A44 . 1.9 ha). As stated previously, the road through Send is already at full capacity regarding traffic, and could not cope with the additional traffic which would arise from this development. Furthermore, this is a newly proposed site, as it was not included in the Regulation 18 draft, which in turn means it has not been consulted on previously; such a consultation must take place before any decisions are made.

I object to the proposal to build 45 houses at Clockbam Nursery on Tannery Lane. The lane is winding and narrow, with several blind corners, and is only wide enough for one vehicle at a time in many places. To build here would require a huge remodelling of the area and complete construction of a new road, thus decimating this Green Belt land, which is actually prone to frequent flooding (The area is called Send Marsh for a reason). It also acts as an important buffer between Send Marsh and Send.

I object to the Local Plan, as it clearly fails to recognise that there is insufficient infrastructure in and around Send and Send Marsh to cope with an increase in both traffic and population. Not only are the roads unable to take more vehicles, but The Villages Surgery and the two schools are also already under severe pressure, and as such cannot be expected to cope with an increased population. There is also the very real danger of an increased risk of accidents around the schools. Much of the land proposed for development is also prone to frequent flooding.
These are clearly valid objections in the eyes of those who know the area. For these reasons, I strongly urge for the Local Plan to be rejected.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have been a resident of East Horsley for sixteen years. It is a fantastic place to live and bring up children. There are good schools, social clubs for young and old. There are tennis, badminton, football, art, cricket, scouting clubs. There are facilities for children with special needs. There are 200 members of the University of the Third age running clubs for retired residents. There is the Wheel of Care, where locals volunteer to help those less fortunate. There is a great community spirit. There is a library, a train link to Guildford and London. There are leisure centres in Guildford and Leatherhead. Horsley is surrounded by countryside which is protected by the green belt, which people use everyday. Everyone appreciates the biodiversity of plants and wild life of the area.

In short The Horsleys and surrounding villages are wonderful places to live.

The only downside is that over recent years there has been a great deal of building, usually 'infilling', leading to greater congestion. In turn, the roads have suffered and not been repaired. Surrey is a rich successful borough and yet it has roads that are worse than many other counties such as Kent, Essex, Devon and Hertfordshire. Indeed they are worse than some of the third world countries we see on TV. Also it is becoming increasingly difficult to find parking spaces, when shopping or visiting hospitals.
I have looked at the proposed building plan for Guilford and Horsley and find the plan totally unacceptable. The proposed building expansion of the area will completely change the character of the area. By allowing any of the green belt to be destroyed, more urbanisation will increase congestion and pollution.

If smaller homes are built with small plot sizes then there will be more congestion. There will be more pressure on the local infrastructure. Our schools are already full and services stretched. There are not enough Police to care for the proposed influx of people. There will be more pollution and less countryside for those families to enjoy. The proposed building expansion is unsustainable.

I consider myself very lucky to live in the Guildford area. As your proposed planning document states we have low unemployment. It has a character of its own and yet is within striking distance of the job opportunities in London, bringing wealth from the city to the surrounding area. If the village flavour of the Horsleys and surrounding settlements are changed, then those people sustaining Guildford, will go elsewhere.

The Borough Council should be proud of the environment they have created. I urge you not to spoil the character and sense of community that Surrey has worked hard to achieve. As Joni Mitchell sings in her song 'Big Yellow Taxi'- 'You don't know what you've got till it's gone'.

I object to the inclusion of the A35 and Three Farms Meadows site. This new plan increase the congestion of the local roads, which in many cases are country lanes. The urban sprawl suggested will increase pollution, increase congestion and change the character of the villages now under threat.

The proposed development at Wisley is totally out of the local character of surrounding villages. It is potentially extremely dangerous, as it's exit will be on to a very dangerous junction on the A3 just on the slip road from the M25. I am frightened to envisage children playing close to this fast dual carriage way. Also there will be insufficient work for those residents and so they will have to travel to either Horsley or Woking station. The roads to either of these stations are very narrow. They are also part of the Surrey cycle way. Those roads will become extremely dangerous to any cyclists or walkers. They are not big enough for regular bus routes.

Comment ID: pslp171/931  Respondent: 10840161 / Janet Attfield  Agent: 

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am very annoyed to see the proposed changes to the Greenbelt designation stated in this proposed plan. The Greenbelt designation was put in place to protect the green spaces, thus preventing pollution and protecting wildlife. They maintain local residents mental and physical health as they enjoy these spaces. The parent Greenbelt maintains the character of the villages and attract people with good incomes to the area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Directs more office space to an extended business park (policy E4) which will increase peak time congestion and encourage rat-running through residential areas which is already a major problem.

Ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development (2.14a).

Adds to air pollution in neighbouring areas, which already exceeds safe EU limits for Nitrous Oxide.

Disregards an independent landscape study which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review (4.3.8)

Answer (if comment is on questions 1-7 of the questionnaire): ()

Proposed Submission Local Plan: Strategies and Sites June 2016

I am writing to raise my objections and comments re the above, in particular in respect of its impact on the Horsley and neighboring villages, as follows:

1. I strongly object to the proposed removal by “insetting” of West and East Horsley villages from the Metropolitan Green. This appears to be indiscriminate and is entirely inappropriate and with no justifiable basis. The Green Belt is established by national legislation for the preservation of the countryside and should only be used for development as a last resort in very exceptional circumstances. I am also concerned by the excessive proposed use of Green Belt for development in general, and consider that greater use should be made of brownfield and redevelopment sites before encroaching on Green Belt land for development.

1. I object to the density and timing of new housing proposed for West Horsley and East Horsley villages. The main proposed Horsley new development sites amount to 533 new homes which is a staggering high increase on existing homes (35% increase in West Horsley) and at a much higher density out of character with the village. This level of development would massively and irreversibly impact on the rural nature of the villages, and is simply unsustainable in terms of the capacity of the local infrastructure (roads, drainage etc) and amenities. The
extent of proposed new housing for the Horsley villages is disproportionately high as compared with the Borough as a whole. The proposed timing (between 2018 and 2022) is also inappropriate as non-Green Belt sites should be used first.

I object to the massive scale of development (2000 homes) proposed for the Wisley. This is entirely inappropriate for a Green Belt and, especially when combined with the proposed new housing developments in East & West Horsley, would completely overwhelm the nearby infrastructure and villages and including Horsley, Ockham and Ripley.

West and East Horsley villages have a rich historical mainly agricultural heritage, and are characterized by its mix of very old and newer houses surrounded by and interspersed with farmland and woodland. The open character of the Horsley villages makes an important contribution to the openness of the Green Belt hence in accordance with the National Planning Policy Framework (NPPF) the villages should remain within the Green Belt. It is noted that the NPPF requires new developments to respect the character and density of existing housing and be limited in quantity by availability of infrastructure and local facilities.

The local infrastructure is already stretched to capacity by high volumes of traffic, and the Council struggles to keep up with maintenance of roads and draining as it is. The proposed developments would utterly overwhelm the existing infrastructure, whilst severely and permanently damaging the rural character of the area.

I am concerned by the overall strategy in the Plan of proposed extensive use of Green Belt for development. The primary need for affordable and social housing is clearly in an round Guildford as opposed to the rural areas, yet the plan seems to focus on large scale Green Belt development instead of regeneration and development within Guildford itself. This approach seems fundamentally wrong and would inevitably lead to increased urban sprawl and spoiling of the borough.

It is unclear why it is proposed to remove the Horsley villages from the Green Belt, whilst at the same time creating new Green Belt around Ash and Tongham. This is clearly inconsistent.

I would also question the need for the very high rate of new housing proposed for Guildford Borough overall, being far in in excess of actual recent population growth, and see no justification for driving such a dramatically increased rate of population growth in the Borough. My understanding of the need for new homes in the Horsley villages is only for a relatively small number of smaller and affordable homes.

Overall I consider the Plan to be unbalanced in inappropriately using Green Belt for development rural areas, which would be unsustainable in terms of local infrastructure, in preference to first making use of brownfield and redevelopment sites to meet housing needs. The Plan also overplays the need for economic development in rural areas.

Councillor Paul Spooner recently stated that "we have also listened to the what you said in the last consultation". It is disconcerting that after very extensive and constructive comments and objections raised by local residents to the Draft Local Plan published for public consultation in 2014, the proposed New Plan is if anything even worse than before for the Horsley villages.

I trust my objections and comments will be taken into consideration, in particular in retaining the Horsley villages within the Green Belt, and scaling back the proposed Horsley and Wisley developments to a sustainable level appropriate for Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

| I have lived in the Send Marsh area since 1968. |
| I OBJECT to all erosion of the green belt. |
| I OBJECT to site A43 Garlicks arch. |
| I OBJECT to site A43a the on and off ramp at Clandon- this will increase traffic problems in the villages, not help them. |
| I OBJECT to site A45 The Talbot- this is overdevelopment in a conservation area. |
| I OBJECT to site A57 The Paddocks- this is unlawful. |
| I OBJECT to any "in- setting" (i.e removal) of any villages from the Green Belt. |
| I OBJECT to the disproportionate amount of development in one area of the borough. |
| I OBJECT to the limited consultation period. |
| I OBJECT to the last minute inclusion of new sites with less than 2 weeks notice. |
| I OBJECT to the lack of any evidence for the alleged housing need numbers. |
| I OBJECT to the lack of immediate provision for new schools. |
| I OBJECT to the lack of any immediate provision for doctors surgeries. |

Why are many of our local villages in the pipeline for local destruction. Surely we should be looking to preserve our green belt. Once they are gone, they are gone forever.

I am 78 years of age. When I die I would like to leave behind a country that is England- our green and pleasant land- not a concrete mess, trying to accommodate all and sundry.

I object to Policy A58 at Burnt Common because:

I live in this area. I have to work out the best time to drive up Send Marsh Dip (top of Portsmouth Road) because it’s like committing suicide at certain times trying to turn right. Your plans will make the situation worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the building on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded. The Garlick’s Arch site has a particular conservation sensitivity since it is covered in ancient woodland. The site is also subject to flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to Policy A43 at Garlick’s Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded. The Garlick’s Arch site has a particular conservation sensitivity since it is covered in ancient woodland. The site is also subject to flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to **Policy A43.30** the proposed development of Garlicks Arch designated for 400 houses and an industrial estate. This is a new site not included in the Regulation 18 draft and has NOT been consulted on previously.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to **Policy A43.30** the proposed new interchange onto the A3 at Burnt Common because it would be disastrous for Send and the (A247) would be gridlocked all day.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to **Policy A44** the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The sub-soil of the existing site contains unsafe land fill waste, which is currently vented. The proposal to include two travellers pitches is completely inappropriate due to the narrow single track country road providing insufficient access to the site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---
I object to the large proposed development of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPS16/39  Respondent:  10840641 / John Pyne  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object also to Policy A 43 designated for 400 houses and 7,000 sqm for industrial use at Burnt Common, our local roads cannot cope with any further rise in traffic levels, Potters Lane in particular already becomes congested and dangerous with narrowing sections and tight bends, especially at peak times during the day. Potters lane has become a 'rat run' at rush hour especially in the morning and I have witnessed to many accidents and near misses in the 20 years I lived in Potters Lane. A life will be lost if the weight of traffic increases beyond the level it is.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<tr>
<td>Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

6) I OBJECT to policy A44 which would see 40 homes and two travellers' pitches on land west of Winds Ridge and Send Hill. This was again a NEW site NOT included in 18 draft and therefore has NOT been consulted on previously. Once again this is Green Belt land partly containing unsafe landfill. Access is by a narrow lane which could never take the volume of traffic that would ensue from traveller's pitches.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
As a local resident, I am very concerned about the proposals for the removal of our villages from the green belt and the extensive building projects that will mean we no longer live in villages with a village community and surrounding green areas and ancient woodland. The infrastructure will not sustain these proposed changes on such a large scale.

My main objections are:

1) I OBJECT to the removal of 15 villages, including Ripley and Send, from the green belt. This will lead to wholesale, and often inappropriate developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

2) I OBJECT to the fact that GBC have not followed the correct process for Send and Ripley developments. Any significant changes to the 2014 proposals, such as the proposal development of Garlicks Arch, should have required another full consultation, which did not happen. This invalidates the whole process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the Policy A42 change at Clockbarn in Tannery Lane because,

The increase to 60 homes in place of 45 homes is 33% more and too much for the area and therefore making the current access and traffic problems affecting Tannery Lane and A247 junction during rush hour and school drop off/collection worse.

The current removal of the Green Belt in our village will increase, and there will no longer be views of the River Wey Navigation that we and our children currently enjoy.

Surface water flooding which is already an issue, will worsen.

The previous objections by the local people to this have obviously been ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3210     Respondent: 10840769 / Rosemarie Haxton     Agent:

I object to the Policy A43 change at Garlick’s Arch because:

It ignores all the previous objections made by local people who will have to live with the consequences.

There is no known demand for 6 Travelling Showpeople plots in this location.

This is permanent Green Belt and no "exceptional circumstances” for its removal exist, and, if this occurs, Ripley and Send will no longer be separated and therefore the purpose of Green Belt will no longer exist as well.

It will cause over-development and destruction of our village and 400 homes is excessive, causing excessive traffic which the roads of Send and Ripley cannot cope with.

It is beautiful ancient woodland that existed at the time of Elizabeth 1 and should be left alone for future generations.

This is currently a flood zone 2 allocation and already has frequent flooding.

There is contamination by lead shot accumulated over fifty years.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3211  Respondent: 10840769 / Rosemarie Haxton  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A 58 at Burnt Common because:

It was deleted from the 2014 draft due to all the previous objections

The word "minimum" is a change from the previous "maximum" in the 2016 plan and since that time there has been a reduction in need for industrial land

As there are currently empty sites and units at Slyfield and Guildford there is no reason to build industrial or warehouse development in the middle of the Green Belt land

The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not an over allocation of 10 hectares at Send in the Green Belt.

The impact on surrounding roads will create traffic chaos and join up Send and Ripley to defeat the purpose of the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1504  Respondent: 10840769 / Rosemarie Haxton  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposal to inset Send Business Park from the Green Belt because:

This is an old non-conforming user in an area of outstanding countryside next to the beautiful Wey Navigation

There is highly restricted vehicle access along Tannery Lane in both directions that would not accommodate any increase in volume or type of traffic

Any increased expansion or development at this site detracts from the Green Belt and is completely inappropriate

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/3150  Respondent: 10840801 / Carolyn Kurk  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Shalford (north)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

To move the green belt boundary to exclude the fields behind Shalford Village Hall (the map shows a new area in this location bounded in pink), and which I understand is proposed to be Open Space.

Extend the village settlement boundary to include these fields, making it easier to develop.

These fields must continue to be protected as previously concluded by The Guildford Landscape Character Assessment & Guidance published in 2007 by Guildford Borough Council and Landuse Consultants.

The proposed changes will remove the field's current protected status and leave them more open for housing development. Any development would in addition exacerbate the existing traffic problems in the adjacent Chinthurst Lane and Shalford as a whole.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/3148  Respondent: 10840801 / Carolyn Kurk  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing in response to Guildford Borough Council's new Local Plan.

I most strongly object to the removal of East and West Horsley from the Green Belt and feel it would be disastrous for the character of both villages. Green Belt should mean Green Belt and should not be made available for development.

I object to the number of houses suggested being built in the villages due to the fact that schools, doctors and parking are already at breaking point. The roads would become even busier and they were not built to sustain so much more traffic.

If you are going to build in the Horsleys then I would suggest a residential home, a day centre or something like it for the people of the Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the latest version of Guildford borough council proposal because the access to these fields is already a heavily congested country lane and also because the access to these said fields is not sufficiently wide to accommodate an entrance and exit to these said fields, side by side.

These were my objection to the previous GBC local plan and they are not altered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPA16/3404  Respondent: 10843233 / David Hardiman  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I understand that the inflated number of new houses proposed seems to arise from a Startegic Housing Market Assessment (SHMA) that was generated by a consultant's model which is not revealed in the plan. Nor apparently to GBC. This SHMA target housing number seems to have been further increased by GBC to give population increase which is almost 70% higher than the official estates for population growth in the Borough. The scale of this increase has alarming results e.g. I am led to believe up to 35% in existing West Horsley households which would seem incredible! If this is indeed how the calculations were formed it is alarming, and a demonstration of a lack of understanding of the local environment, population and infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6608  Respondent: 10843233 / David Hardiman  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The impact on the Horsley villages of such a huge mix of new development under 2 miles away would be significant. In particular added congestion on the A3 and M25 trunk roads and congestion on local village roads and lanes. Not to mention concerns over poor air quality from the significantly increased traffic and other pollution catalysts.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal to remove the Horsleys from the Green Belt. The "exceptional circumstances" required before taking such action have not been demonstrated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13850  Respondent: 10843233 / David Hardiman  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

No sound reasons have been given for the proposed changes, which seem to be aimed solely at increasing the land available within the settlement for future additional development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3482  Respondent: 10843361 / Natalie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY D1 - Making better places

- There is no reference to vernacular or historic design guidelines, even in Conservation Areas. Most of the borough, especially the rural areas, has vernacular design guidelines that are available to give suggestions as to appropriate design. These should have mandatory planning force.
- The monitoring of this policy is inappropriate. Why should this policy result in a reduction of the number of appeals for poor design?
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3483  Respondent: 10843361 / Natalie Brown  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy D2

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY D2 - Sustainable design, construction and energy

- Targets unachievable if Green Belt covered with amount of housing as proposed, causing traffic chaos, infrastructure failure and unacceptable levels of pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3484  Respondent: 10843361 / Natalie Brown  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY D3 - Historic environment

- Supports overdevelopment: you can’t “enhance” history. Doesn’t ban private interests from trying to make aggressive profits from privatising and commercialising public historic assets.
- Doesn’t ban development near historic assets.
- Development close to historical assets is harmful and should be expressly prohibited. Fails to meet the requirements of NPPF 126, 131, 132, 133.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to POLICY D4 - Development in urban areas and inset villages

- No commitment to expand social housing or accommodation for people who can’t afford so-called affordable homes.
- Not enough new homes in urban areas, despite demand and need for urban regeneration and protection of Green Belt.
- Objectives for inset villages cancelled out by plans for excessive housing growth there.
- Too much emphasis on traditional shops, when a lot of this sector is in terminal decline.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3473  Respondent: 10843361 / Natalie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY E1 - Meeting employment needs

- The evidence base is unreliable;
- There is unclear differentiation between B class uses;
- Only high value-added business uses, contributing to a modern “knowledge economy”, are desirable, not low-grade, low-employment warehousing which is also land hungry;
- Industrial and commercial businesses must be concentrated in the urban area or existing business parks (e.g. Slyfield) not in the rural environment which the infrastructure is unable to support
- The rural environment must support micro- or high-tech businesses, agricultural industries, and tourism, and these sectors must not be damaged by general industrial development which is inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I object to POLICY E4 - Surrey Research Park

- Subordinates public planning policy to the University of Surrey’s private, commercial enterprises (not its public academic purpose).
- No cost/benefit analysis of harm to Green Belt involved in extending research park.
- Waters down research purpose of park, turning into a general business park.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to POLICY E5 - Rural economy

- Incompatible with high housing numbers proposed for rural areas elsewhere in the plan.
- Insetting and settlement boundary extension endanger appropriate rural activities listed that depend on maintaining rural areas’ character.
- Town-centre uses for rural areas contradict government’s localism policy and need to consult and protect village environments.
- Established commitments to high-speed rural broadband and mobile coverage watered down despite 2014 consultation responses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to POLICY E6 - The leisure and visitor experience

- Danger of overdevelopment: success doesn’t depend on building “attractions” which can harm heritage and rural settings. No case made for creating new ones.
- No policy of opposing reduction in rural hotel capacity.
- No definition of what added value interventions by Council can make to normal visitor market mechanisms.
- No policy of supporting Guildford countryside as its prime leisure and visitor asset, whose value rises as London gets bigger and busier.
- No vision of what the ideal visitor experience of the borough actually is and how to support its various elements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3479  Respondent: 10843361 / Natalie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object to POLICY E7 Guildford Town Centre

- No statement in policy wording of value of Guildford’s rural setting and views.
- No consideration of Town Centre Master Plan, GVG proposals or station redevelopment plans.
- Proportion of new housing in town far too small. Development pushed into countryside, ruining the latter and harming urban regeneration.
- No brownfield register.
- Too much big retail, despite online shopping revolution and decline of traditional high streets internationally. Futile to try to turn Guildford into Woking or Kingston.
- No measures to support small, niche retailers in town, e.g. through business rates.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3480  Respondent: 10843361 / Natalie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E8

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )
I object to POLICY E8 - District centres

- Too much scope to expand rural retail centres to justify major housing expansion across the countryside, despite lack of demand. Will spoil character of villages while harming Guildford’s role as a retail hub.
- No measures to support existing rural shops and services, e.g. through business rates.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/3463  Respondent: 10843361 / Natalie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I object to POLICY H1 – Homes for all

- The policy doesn’t set any constraints on building.
- Housing mix based on growth and demographic assumptions and unreliable SHMA that weren’t put out to formal public consultation and wasn’t scrutinised by Councillors.
- I support higher density development in the urban area
- Fails to compel University of Surrey to use its thousands of planning permissions and existing space, such as car parks, for student accommodation.
- Lets University off the hook of accommodating all its students, so as to free up houses for the most needy in town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Attached documents:

Comment ID: PSLPP16/3464  Respondent: 10843361 / Natalie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY H2 – Affordable homes

• Using the official definition of Affordable is not appropriate. ‘Affordable homes’ in this area are not affordable! Pushing for these homes just means pushing for more development.
• The viability clause lets developers off the hook of providing even these (non-) affordable homes. It is too open to manipulation.
• Contradicts government policy to develop less advantaged regions of the UK. People don’t have to live and work in Guildford but should be encouraged to move to cheaper, less congested areas.
• This policy won’t affect market forces or house prices. Guildford is too small and too near London to influence these, however many homes it builds.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3466  Respondent: 10843361 / Natalie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY H3 – Rural Exception Homes

• It loosens the criteria by allowing “market housing” and development that changes the housing mix. Developers would be able to override NPPF “exceptional circumstances” and other restrictions to build large houses in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
### Comment ID: PSLPP16/3486  Respondent: 10843361 / Natalie Brown  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

---

**I object to POLICY I4 Green and blue infrastructure**

- Infrastructure considered here as an afterthought, rather than pre-condition of development. Should be a key issue for the rest of the plan.
- Excessive housebuilding in countryside not supported by any funding or provision for infrastructure.
- Heavy focus on building on greenfield sites inefficient and unnecessary: cheap for developers but much more expensive for the public who have to fund the infrastructure.
- Draft CIL scale discourages use of brownfield land first.
- No plan for organic increase in existing traffic congestion, let alone once thousands of houses are built across the countryside. Local roads hardly considered. Green Belt being eroded before road widening/improvement plans certain, encouraging over-development of greenfield sites.
- All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Comment ID: PSLPP16/3469  Respondent: 10843361 / Natalie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY P2 – Green Belt

- No declaration of support for protecting the Guildford Green Belt, contrary to NPPF and government statements.
- No evaluation of value of local Green Belt as a public and private asset: it’s just treated as potential building land with a few inconvenient restrictions.
- Impact of Green Belt development on local agriculture ignored.
- Impact on rural leisure and tourism ignored.
- Impact on flood control ignored.
- Impact on carbon sink and knock-on effects for air pollution and climate change ignored.
- Impact on biodiversity ignored.
- Impact on natural heritage ignored.
- Impact on water catchment ignored.
- Impact on public space amenities (parks, cemeteries, waste facilities etc) ignored.
- Impact on rural business (e.g. mineral mining, film making) ignored.
- Impact on natural landmarks and views ignored.
- Harm to public health and wellbeing (physical, psychological) ignored.
- Allows excessive levels of development in breach of views expressed in last consultation and Conservative Party manifesto commitments at the last local elections.
- Has allowed ruling Councillors to argue that there is an acceptable percentage of Green Belt that should be sacrificed to development, when no such rule exists in the NPPF.
- Ignores alternative approaches, such as fair burden-sharing under which settlements would undertake to accommodate new development in proportion to their size.
- Disproportionate amount of development (most of it, in fact) to be in Green Belt. Too few new homes in urban areas where most people (especially the young and less privileged) want to live. This will act against much needed urban regeneration.
- “Insetting” of most villages disproportionate and unjustified in terms of their contribution under the NPPF to the purposes of the Green Belt. Based on flawed Green Belt and Countryside Study. Idea that most Guildford villages do not contribute to “openness” is subjective.
- Major settlement extensions allow indiscriminate housebuilding, as irregularly shaped villages are squared off to enclose green fields.
- Overall harm to Guildford Green Belt unjustified by any objective development need post-Brexit.
- Ignores most of NPPF 17 stipulations.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY P3 – Countryside (i.e. beyond the Green Belt)

- Gives Ash and Tongham more protection than rest of borough, including existing Green Belt. But they don’t contribute to preventing London sprawl.
- Special treatment of ward represented by current Council Leader and his predecessor. Politically biased.
- A minor extension of Green Belt in one place does not justify its major destruction elsewhere (the inset villages).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY P5 - Thames Basin Heath Special Protection Areas

• Compensation mechanism too feeble to provide protection.
• Cynical encouragement of SANG to justify nearby development in protected areas. Does not extend protection or amount of green space, and can damage them (e.g. dog and cat attacks on wildlife).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3461  Respondent: 10843361 / Natalie Brown  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY S1 – Presumption in favour of sustainable development

• No definition of sustainable development given, no reference to its importance in the NPPF, no guidelines for applying it to planning.
• No mention of Green Belt, Guildford’s greatest legacy by far to Sustainable Development. No commitment to protecting it.
• No statement of how economic, social and environmental impacts should be balanced.
• No reference to most of the NPPF Core Planning Principles.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/3462  Respondent: 10843361 / Natalie Brown  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to POLICY S2 – Borough Wide Strategy

- No justification given for 13,860 housing need figure. Figure based on a secret formula used by consultants and never seen by anyone on the Council or by the public. Council has failed to seek its disclosure.
- 13,860 figure confuses the OAN with a housing target. No definite housing target given, leaving too much scope for the Council to make one up. I can’t understand how we’re being consulted when we don’t know how many houses the Council want to build, taking all the constraints into account.
- Figures based on a Housing Market Area that ignores 2 neighbouring districts (Rushmoor and Mole Valley) and is much too small, since most people commute or travel far outside the Area to shop or study. This distorts the figures: no reason why Guildford needs to build nearly twice as many large housing estates as the rest of Surrey put together, or half of all sites over 100 units.
- High numbers involved would transform the character of the borough from mainly rural/Green Belt to urban, creating a corridor of development out of London as per Woking or Croydon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/859  Respondent: 10843457 / Kelvin Hayes  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a local resident, I am writing to object most strongly to some elements of the new local plan.

The Horsleys are rural villages and have no infrastructure suitable for 533 new houses and their occupants. The local primary school is already over-subscribed and parking in the village, particularly at the station, is limited.

The Green Belt was set up to protect such places for future generations, it should never be open to negotiation.

I do accept that we have a need for more houses, particularly so called “affordable” properties and those for older residents, but going by recent developments, the houses that will be built in this area will be in the upper price bracket, and as such will not alleviate any housing problems that the wider area may have.

1. I do not agree that the village areas should be removed from the Green Belt. This is effectively a way of lowering the hurdle to build on the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Clockbarn Nursery, Tannery Lane, Policy A42
Now 60 homes in place of 45 homes previously
I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The increase to 60 homes in place of 45 homes is 33% more and too much]
- It will worsen access and traffic problems in Tannery Lane and at the A247 junction
- It will make erosion of the Green Belt in our village worse
- It will make surface water flooding, which is already bad, even worse
- It will impact open countryside views from the River Wey Navigation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Garlick’s Arch, Send Marsh, Policy A43.
Now 400 homes and 6 Travelling Showpeople plots
I object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the thousands of previous objections made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth I
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the local roads of Send and Ripley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4151  Respondent: 10843521 / Yvonne Woozley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Burnt Common, London Road, Policy A58.
Now a new allocation for a minimum of 7,000 sq m of industrial or warehousing
I object to Policy A 58 at Burnt Common because:

- It was deleted from the 2014 draft because of all the objections made previously
- The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land.
- There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt
- The impact on small surrounding roads will create traffic gridlock
- It will join up existing villages and defeat the purpose of the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Overall the proposed changes will have a huge detrimental effect, with particular impact on traffic and other facilities, in addition to the removal of the irreplaceable Greenbelt protection that parts of our village enjoy. I have detailed my objections to specific policies below, but having drawn a - somewhat rudimentary- map of all the proposed development the impact of the changes can be seen in their entirety (See attachment) This map does not illustrate the additional impact on traffic and other infrastructure from other proposed developments such as Gosden Hill, which will compound the issues with local roads and other facilities which are struggling to cope with the local population as it is. In addition, there appears to have been minimal effort to development existing brownfield sites in and around Guildford. This is evidenced by recent redevelopment of land such as the old Fire station and the Waitrose in the centre of Town. Both these sites, and many others, could have been used for residential development instead of more retail space, with far less impact on the local infrastructure and none of the Greenbelt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to express my total objection to all proposals to build on green-field sites in Surrey and elsewhere. There is clearly now great importance in exerting pressure to preserve all wild-life sites and green fields for future generations and building on such sites (even when they are relatively out-of-sight from general passers-by; in essence covert building) must be prevented with utmost attention to detail and fastidiousness.

The principle of protecting these crucial sites, even to the extent of economically disadvantaging the area, is clearly of such extreme importance, that failure to do so amounts to nothing but total dereliction of duty. This view is very typical of the vast majority of people who live in all parts of the county and elsewhere. It is of utmost importance to everyone that you protect wild-life and farming sites for living creatures and ourselves.

When changes of the scale proposed are so vast it is difficult to comment on specific sites. Please regard this e-mail as an objection to all building proposals affecting wild-life and green field sites.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send

I object to Green Belt, Policy 2, paragraph 4.3.15 regarding Send Business Park being taken out of the Green Belt altogether. This Business Park is in a beautiful area adjacent to the Wey Navigation. Tannery Lane is effectively a country lane and there is highly restricted vehicle access in both directions of Tannery Lane. Any more development on this site will detract from the beauty of the Green Belt in that area.

Overall, the traffic and pollution implications of the above proposals will be untenable. We do not have the infrastructure in place to be able to cope with such massive over development of Send. Please take Send's objections to these proposals seriously.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to Policy A43 regarding development at Garlick's Arch as this means destroying a beautiful ancient woodland and huge canopy of trees and will cause massive over development of our village with the number of homes being proposed as excessive. Development of Garlick's Arch will generate a huge amount of additional traffic and cause massive congestion in the local roads in Send and Ripley. There is no proven demand for travelling showpeople plots in this location. Pollution levels will rise and these are already a concern in this area. This proposed development is already subject to frequent flooding. It will effectively join Send and Ripley together and defeat the key purpose of Green Belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Site Allocation Policy A35 Former Wisley Airfield – Strongly Object**

I object to this development being on green belt. The scale, bulk and density of the plan on a narrow airstrip is completely inappropriate for the area. The conservation area of Ockham Village, which only has 150 houses, would be completely swamped by this development. The proposed development would have a detrimental impact on the openness of the Green Belt surrounding it. The effect on the habitat in the Thames Basin Heath would be devastating. Damage will occur to the habitats of the protected and endangered rare species. The ground nesting birds would be disturbed by the building works and then the volume of people living in close proximately not to mention the pets that would be introduced to the area.

The surrounding villages, Ripley, Effingham, East and West Horsley, do not have the infrastructure to support such a development. The local schools are over-subscribed and it is already difficult to get a doctor’s appointment at the Medical Centre in East Horsley. The extra volume of traffic would cause even more congestion. The lanes are narrow in places and not very well maintained. The proposed development is on an elevated site and there are already water table problems with localised flooding in the area. Some roads become impassable, Ockham Lane, Ripley Lane, East Lane, Ockham Road North and parts of The Drift. There is no spare parking capacity at Effingham Junction or Horsley stations.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site Allocation A39 – Object

This area already has water drainage problems. The proposed access area to the site has poor visibility along Ockham Road North where the sight line is blocked by a railway bridge and the road floods. It also backs onto ancient woodland.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

### Site Allocation A41 – Strongly object

Is on green belt and backs onto ancient woodland. This side of East Lane is not densely populated and retains a rural aspect and openness. I notice that in recent months the owners of the land have allowed the hedges to fall into neglect in an attempt to obscure the openness.

D1 – Making Better Places

Culturally we rely on our cars and suggesting that people are going to walk or cycle would mean a cultural shift. How is this going to be encouraged, monitored and enforced? The roads around the Horsleys are narrow and pot-holed, with poor street lighting.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

H1 – Homes for All - Affordable Homes

80% of Surrey house prices are not affordable to most workers in the local area. These houses will not be affordable. The proposal that by setting the price at 80% will suddenly transform the ability of a nurse or teacher to purchase is unsubstantiated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy I1: Infrastructure and delivery – Object

Infrastructure & Services for East and West Horsley

The local plan proposes an huge increase in the number of houses is the Horsleys yet no plans on how the local infrastructure will be expanded or improved to accommodate the increase.

There is no mention of how infrastructure is to be funded. There is no plan or details for management of increased traffic in the villages. There is no mention of how the water drainage and the foul drainage system infrastructure will be upgraded to cope with the increase demand placed on these services.
Specific existing issues which this plan will exacerbate include:

- There is only a very limited bus service and no buses at weekends.
- It is difficult to get a Doctor’s appointment at the Medical Centre in East Horsley, it can be a 2 week wait. The walk-in clinic where appointments are released on the day starts to queue before 8.00am in the morning for 8.30am surgery opening time.
- The junction of Ockham Road North and Kingston Avenue, the location of East Horsley Medical Centre, is already difficult to negotiate.
- Parking is full every weekday at Horsley and Effingham stations.
- Ockham Road North between Horsley Station and East Lane is repeatedly flooded in moderate rainfall. Pedestrians are forced to take cover in driveways. Converting land to housing will exacerbate this issue.
- East Lane between Edwin Close on Long Reach repeatedly floods in moderate rainfall.
- The Raleigh School does not have enough places to meet the current demands. No plans have been published for creating further school places for children of all ages in the Horsleys. The traffic in out of all of the schools in the immediate area causes a lot of congestion. Parked cars for events at Glenesk School cause a lot of parking and traffic problems on East Lane.
- West Horsley will have no facilities, the small village shop is about to close. The Post Office closed a few years ago and is now housing. Presumably GBC regard this as a success according to the proposals in this plan.
- The number of houses proposed and the increase in size of the village is out of character with the rural landscape. The density of housing on the proposed sites is very high and not in keeping with the rest of the village. West Horsley has a mix of low density housing in roads and streets off East Lane and The Street, these have been added gradually and sympathetically over the decades. West Horsley is defined by its openness of hedgerows and agricultural land with a number of historic buildings.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/14899  Respondent: 10843905 / G King  Agent: 10843905 / G King

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Green Belt – I strongly object to the removal of the Horsleys and other villages in Guildford Borough from the Green Belt.

The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.

This fundamental foundation of the purpose of Green Belt has been ignored by this plan. If the proposals in this plan are carried out then Green Belt will be irreversibly removed and a conurbation created from Bookham and Cobham through to Guildford. This is diametric opposite of the Green Belt’s purpose. This plan is predicated on the assumption that it is acceptable to convert Green Belt to housing. This must be the option of last resort, not the starting point.
I strongly object to the disproportionate amount of development proposed for the east of the borough, the Horsleys, Wisley, Ockham, Ripley and Send. The proposed developments of A25, A35, A36, A37, A38, A39, A40, A41 and A43 do not respect the character and density of housing in the area, a requirement of The National Planning Policy Framework (NPPF).

I strongly object to these proposed developments within the plan and the lack of planned improvements to infrastructure and services. I object to the detrimental impact on transport, local roads and road safety. I object to the proposed high density development along the A3 corridor when this road is already at full capacity and struggling to cope. Rail commuters will drive to the stations, Woking, Clandon, Horsley and Effingham which already have full car parks. The village centres will be gridlocked by the amount of people trying to transition through them and lose their sense of community. The green belt will be destroyed and the village areas will combine to look like a suburb of London. Guildford Borough is renowned for its towns, urban spaces and contrasting rural and wooded countryside and villages it will be ruined forever under this proposed plan.
Evidence Base and documents:

I do not understand how the figures for the number of properties required for the Borough have been arrived at. The information from the Strategic Market Housing Assessment [SHMA] belongs to Guildford Borough Council but no explanation has been given as to the calculation of figures or the model used. The assessment and calculation process has not been transparent. These figures, however they were arrived at, are now invalidated by Brexit.

I strongly object to the disproportionate amount of development proposed for the east of the borough, the Horsleys, Wisley, Ockham, Ripley and Send. The proposed developments of A25, A35, A36, A37, A38, A39, A40, A41 and A43 do not respect the character and density of housing in the area, a requirement of The National Planning Policy Framework (NPPF).

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

• disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to object in the strongest possible way to the proposed development in Normandy contained in the draft local plan and named as site A46. The reasons for my objection are as follows:

- The proposed site is within the Green Belt. The NPPF states that Green Belt land may be developed in “very special circumstances”. GBC has not provided any argument that demonstrates these are exceptional circumstances. Fulfilling the housing requirement is a regular, calculable requirement, and there is nothing exceptional about this. The NPPF states that unmet housing need does not constitute the ‘very special circumstances’.
- I understand that underdevelopment in recent years means that there is an increased need for housing in the new local plan. This cannot justify ‘very special circumstances’. If it did, local authorities would be incentivised to create peaks and troughs in order to circumvent planning regulations. GBC must plan the current housing need within the framework that would have been available to it had there been no backlog.
- The size of the proposed development is disproportionate to the size of the village. I understand that Normandy’s current population is 2300. Adding an additional 1200 households would double the size of the population, permanently destroying the character of the village.
- The proposed development ignores my right to live in a rural environment. I chose to live here because of its rural nature, green surroundings, access to countryside and small size. The proposed development would permanently destroy all these characteristics.
- GBC’s SHMA does not provide methodology for its calculation of housing need. When responding to a FOIA request, it replied that the algorithm underpinning the calculation was outsourced to a private company and is therefore private IP. This is immoral, in addition to making the calculation ineligible for consideration in the planning process. GBC has a public duty to show how the housing need has been calculated and it is a moral outrage to claim that the workings cannot be disclosed. This significant public decision must be within the public domain. If the model cannot be disclosed then it cannot be relied upon as part of GBC’s evidence.
- The SHMA does not demonstrate consideration of reduced population growth, and also assumes a level of immigration that now may not arise in the current political climate.
- There is no demonstrated need for a secondary school in Normandy. Local schools such as Kings School and Ash Manor are significantly undersubscribed, and an additional new school is being built in Mayford. Furthermore, the demographics of Normandy shows a skew towards an older population who have no current or future need for this amenity. The proposed school in particular does not take into account the needs of the local community.
- GBC has not maximised development of brownfield sites before proposing to build on green belt. Nor has GBC taken steps to ensure that all urban sites are in full use before destroying the green belt. Only 2742 homes are planned in Guildford, an urban area with far greater capacity for absorbing new housing than its surrounding small villages and green belt.
- The local plan demonstrates a preference for large scale developments with significant impact on local areas instead of multiple smaller developments whose impact would be less harmful overall. GBC has a public duty to minimise the harmful impact of proposed development and a greater number of smaller developments would be less impactful than the proposed large scale developments. It is fairer overall to spread development through the region rather than to select three areas to permanently destroy, which has perhaps happened because this offers less work and less resistance for the council. This is not in the public interest.
- Finally, I have significant concerns about traffic. I live on the A323 and at peak times it often takes me an unacceptable amount of time to pull out of my driveway, or to queue on the main road before I reach home. I do not believe that this road has the capacity to cope with the additional volume of traffic the proposed development would bring. Furthermore, additional traffic from the new development in Aldershot has yet to be taken into consideration. We also have a major problem with speeding on this road, which I think will be exacerbated by the development. Glaziers lane will be perceived as the local road serving the development, and the Guildford Road will be perceived as the end of the built up area, so that drivers will be even less likely to adhere to the speed limit.

I trust that these points will be given due consideration as part of the consultation process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the 2016 Draft Local Plan on the following grounds:

1) I object to the building of the enormous number of houses being built in Ripley, Send and Clandon. These communities do not need such over development. The infrastructure cannot cope with such a development. The development should be in urban areas with adequate transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6935  Respondent: 10844353 / Julia Wood  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3) I object due to the congestion on the roads. There is already a lot of traffic coming through Ripley, which is often at a standstill at rush hour. The Wisley Airfield development alone would add an awful lot of traffic as the potential residents would need their cars to go to Horsley and Woking stations and to go to London. The roads in the area are too narrow to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
5) I object due to the congestion on the main roads (A3 and M25). Wisley Airfield, Garlick's Arch and Gosden Hill developments would add to the already congested roads.

6) I object due to poor air quality concerns. The developments mainly at the North East of the borough would create more congestion and increased air pollution which would be very detrimental to people's health.

I hope you will take my objections into account.

<td>I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.</td>

I OBJECT to Policy A43a, the proposed on/off ramps to the A3 at Burnt Common as this will inevitably cause traffic chaos on the local road network throughout Ripley, Burnt Common, Send and West Clandon, with absolutely no possibility of mitigation due to the nature of our rural roads and lanes.

I object to policy 2. Taking an area out of the green belt to cater for GBC’s insane desire to concrete over the area is another example of the dirty tactics that are being used.

For heavens sake, will someone in the council drive down Tannery Lane and look at the roads you are proposing to dramatically increase the traffic on.

I would like to know if the current planning policy has been implemented simply to make it look like the planning department are doing something!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to policy A42 because there are too many homes being proposed for the existing infrastructure. The roads are already poorly maintained, narrow and in places dangerous. Increased traffic will be a burden and a hazard. Additionally I absolutely do not want to wantonly erode the green belt. It's there for a reason and it's disgusting you plan on destroying it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I very strongly object to policy A58 because there is absolutely no need for more industrial sites in this residential area. What are the planners thinking? Are you just throwing things at a map? Slyfield caters sufficiently and I understand is not at capacity. Again the traffic implications seem to have been overlooked by the planners or ignored. Incompetent or negligent, I don't know.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/746  Respondent: 10844897 / H S Lofthouse  Agent:
I write to object most strongly to the inclusion of the Wisley Airfield in the local plan. We must protect our green belt and exclude this site from the draft local plan without delay. I have written previously to object, our country lanes cannot hold the considerable amount of traffic that would need to be accommodated, the A3 junctions would be even more clogged up than usual at rush hour, air pollution would suffer, the site is unsuitable for a housing development and would spoil the green belt and the protected area and its environs. The potential schools are not needed here. We are served by excellent schools already. This is the wrong area to consider. There are many other sites that could and indeed should be considered. Please start afresh. Take a step back and consider how detrimental this would be to our landscape. Why build on this agricultural land which should be retained as such, as was the original historical intention. There are sites off the M25 that could be considered, and outside Guildford, where much of the housing could be contained.

Please consider carefully all the objections you will receive from residents of this picturesque hamlet of Ockham - don't spoil our countryside in this way. Expand elsewhere but not her at Wisley - green open space enjoyed by so many is becoming a rarity. Conserve and preserve our green belt as was intended.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

The application was rejected by GBC on hood ground last year when TFM should have been removed from the Local Plan. It is wrong to bring it back for consideration when it was turned down on so many grounds and for very good reasons.

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   ◦ The associated traffic increase from the RHS has not been taken into account.
   ◦ The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
12. Opportunity (3) should be common to all sites and is not unique to this site
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
16. I object to the removal of additional 3.1 ha from the green belt without any justification
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeoological impact
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.
26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.
35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

Please consider all of the above and ensure that plans for a huge town in the most inappropriate location are again refused. There are many other parcels of land around that can be considered for housing which would not impact on a small community in this way.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal to inset Send Business Park from the Green Belt due to the following points:

The roads to this area are rural roads, single track for the most part, certainly not suitable for any more traffic, especially larger commercial vehicles. At one end it joins another rural road with a weak bridge in one direction and a very narrow junction in Ripley in the other.

Any more development in this area ruins the surrounding Green Belt land, which comprises open fields and the River Wey.

The original development is effectively and old non conforming user in an area of outstanding countryside, so shouldn't even be there.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to policy A42 change at Clockbarn Nursery, Tannery Lane due to the following points:

The site has very restricted access along Tannery Lane which is single track for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical with 45 homes, so an increase of 33% is just ridiculous.

Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with traffic for 45 extra homes, so an increase is not going to work.

Planning consent has already been granted, rather unwise given the access problems, for 84 flats and a marina. The traffic for this development has not yet been added to the current traffic situation.

The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane, so an increase in homes just exacerbates the problem.

This change ignores hundreds of previous objections. These have been made by people who live locally, the people who know the area best, they should be listened to, not pushed to one side.

Surface water flooding will be increased with the original number of homes, additional homes will make the situation worse still.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A43 Garlicks Arch due to the following points.

There is no proven demand for plots to accommodate Travelling Showpeople.

National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt land. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. It constitutes over development. These further changes to the plan are not required.

It is an unsustainable location. It will undoubtedly cause traffic chaos on the minor surrounding roads. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion, anyone who lives in these areas will confirm that this is the case. Substantially more vehicle movements will result in even more congestion and greater pollution. Residents and the environment will suffer as a result.
This area contains ancient woodland dating back to the 16th century, which should be preserved. There is no good reason to tamper with it.

This site is identified as being in a Flood Zone 2 and regularly floods during winter months.

This site contains land which is heavily contaminated by many years of shooting with lead shot.

Above all, the latest changes to this site have completely ignored the thousands of previous comments from residents (who know the area best of all) during the 2016 Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58 Burnt Common due to the following points:

There is no requirement for new industrial or warehouse space as there is availability at Slyfield and Guildford Industrial estates, developing in this way is pure stupidity and is just building for the sake of it.

Additionally, this site is in the Green Belt, there are no exceptional circumstances to justify development here.

According to the 2017 Employment Land Need Assessment there is a reduction in demand to 3.9 hectares for industrial land in the whole borough. Why is there a huge allocation of 10 hectares in Send? This policy has not been thought through at all.

Generally transport evidence for this policy is incomplete and unreliable. What would happen in reality would be serious accidents, major traffic jams twice a day and therefore excessive pollution.

Any extra traffic would cause traffic chaos in the local area with its small roads, adding commercial vehicles to this would be completely unsustainable.

This site was deleted from the 2014 Local Plan due to previous objections, why has it returned?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the large proposed development at of 2,000 houses at Wisley Airfield (the subject of which I have written to you twice before), 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm, because it will destroy large areas of Green Belt and agricultural land, massively increase congestion on the A3 and the surrounding villages such as Ripley and Send, and create alot of additional pollution due to traffic.

Use brownfield sites which are available.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to policy A42 Clockbarn Nursery

There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area.

The site has very restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical.

Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic.

Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to policy A43 Garlicks Arch.

There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more
practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of
development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

This proposal was never in the regulation 18 draft, and as such has never been consulted on, and was slipped into the Local Plan at the last minute.

This site is green belt comprising of woodland and meadows between the A3 and Send and Ripley. This site has a particular sensitivity since it is covered in ancient woodland, some trees date back to the 16th century.

It is permanently protected by the NPFF which prevents the merging of settlements, there are no exceptional circumstances to develop this land.

To destroy a natural boundary between the A3 and the villages would be incredibly damaging to them. The obvious increase in pollution caused by massive amounts of extra traffic would be hazardous to health of residents young and old of both Ripley and Send. The existing boundary also absorbs some noise and pollution from the A3 itself.

The proposed industrial development of 7000 sq m is simply not needed since the latest Employment Land Needs Assessment 2015 shows a reduction of 80% in required employment floorspace from the previous draft plan. Additionally GBC have not provided any evidence of a requirement for this. Basically this means that industrial space at Burntcommon is not required. Even if there was a requirement for 7000 sq m of industrial space it should be at Slyfield where there is already available space.

Furthermore, a new 4 way interchange onto the A3 at Burntcommon to serve this development would be disastrous for Send. Send Road A247 would become gridlocked all day, as it would be the through route to Woking for traffic leaving the M25 and A3, the proposed 2000 houses at Wisley and the 2000 houses at Burpham. Send cannot take that amount of traffic.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )
I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a).

The additional north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

I object to the proposed Infrastructure Schedule (Appendix C). The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Generally transport evidence for this policy is incomplete and unreliable. What would happen in reality would be serious accidents, major traffic jams twice a day and therefore excessive pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):**

I object to policy A44 Send Hill.

There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

The proposed development is not sustainable because of poor infrastructure. Send Hill is a single track country road and too narrow to provide sufficient access to the site for travellers or accommodate the potential new levels of traffic the proposed development would bring.

The site is a high quality green belt amenity area within beautiful surrounding countryside and would be spoilt by the development.

A Wasteland Solutions environmental report on Send Hill dated March 2004 gave evidence of past ponding of water in the excavated area. Further development would disturb the water table and increase risk of flooding to surrounding properties.

The site was used as a GBC registered landfill site and shown on the 1963-8 Ordnance Survey maps as “refuse and slag heap”. It is therefore unsuitable for such a development on health reasons.

On the 1971 Ordnance Survey the site is shown as a “refuse tip” prior to when proper licensing/registration was required. The date of the landfill works predates the 1999 EU Landfill Directive regulations. I therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials.
GBC has installed gas monitoring wells on site since July 2000. One well recording methane gas discharge.

A Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies the proposed site as GBC recorded landfill site Ref GU/11/LLC with type of waste not identified. The date of the landfill works predates the 1999 EU Landfill Directive regulations. I therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials.

A Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies proposed site GBC recorded landfill site Ref GU/12 with type of waste identified as “unrestricted”. This causes concern as to what it does contain and the dangers if disturbed.

An Envirosearch Report RS1100201_1_1 dated 17th February 2004 and historical map data and information from GBC has identified the site as landfill and has “areas of potentially contaminative industrial activities” and “potential risk from landfill gas migrations”. Development of this site would be a health hazard.

I feel contempt for Councillors of G.B.C. who are attempting to force developments that destroy Green Belt land in a cynical move and return the number of houses to far in excess of what is required. There is no need for any more housing on top of the 13,860 already proposed for the borough

Answer (if comment is on questions 1-7 of the questionnaire): ()
GBC need to realise how important the Green Belt is, and stop treating it as a free space to indiscriminately destroy for generations to come.

This Local Plan seems to have been thrown together with no real thought, we need a ‘common sense’ Local Plan, not this rubbish.

It appears that GBC are desperately and naively clutching at straws to find what they think are suitable sites to include in the Local Plan, instead of carefully identifying already suitable Brownfield sites.

Answer (if comment is on questions 1-7 of the questionnaire): ()

General points of objection:

GBC have not followed correct procedure. Since 2014 GBC has changed every major site in Send proposed for development and now has added a new massive road junction. The 2014 proposal for 430 houses went down in April 2016 to 185 and has just gone up again to 485. These significant changes require another full consultation under regulation 18, not the short cut regulation 19 which GBC are trying to get away with. This invalidates the whole process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Conclusion:

It appears that GBC are desperately and naively clutching at straws to find what they think are suitable sites to include in the Local Plan, instead of carefully identifying already suitable Brownfield sites. GBC need to realise how important the Green Belt is, and stop treating it as a free space to indiscriminately destroy for generations to come.

This Local Plan seems to have been thrown together with no real thought, we need a ‘common sense’ Local Plan, not this rubbish

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the proposal to inset Send Business Park from the Green Belt due to the following points:

The roads to this area are rural roads, single track for the most part, certainly not suitable for any more traffic, especially larger commercial vehicles. At one end it joins another rural road with a weak bridge in one direction and a very narrow junction in Ripley in the other.

Any more development in this area ruins the surrounding Green Belt land, which comprises open fields and the River Wey.

The original development is effectively and old non conforming user in an area of outstanding countryside, so shouldn't even be there.

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farms Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Pollution:

The large increase in volume of traffic will cause an increase in nitrogen dioxide and particulates in the environment – already a cause for concern in several areas in the Borough.

Schools:

Local schools are already at capacity – where will newcomers go to school? No extra places are planned in the Horsleys, and the school places proposed at Wisley Airfield will not planned until many years into the project.

There is talk of a new school at a site near to Lollesworth lane west Horsley, but this should have been talked about well before the local plan went out for consultation.

Medical facilities:

Already very difficult to get an appointment and the car park is always full.

Answer (if comment is on questions 1-7 of the questionnaire): ()

TRAFFIC AND PARKING

Assuming that every new house has at least 2 cars, this means potentially 6,000 more cars within a three mile radius of the villages. The impact on local roads will be tremendous. Parking at Horsley & Effingham junction stations (which are already full), at the shops, at the medical centre and at the village hall will all be affected.

Local Road Network:

In respect of the proposals for development at Wisley Airfield and for an upgrade the current A3 junction at Burntcommon to a full 4-way junction, SCC traffic modelling anticipates increased use of Guileshall Lane, Hungry Hill Lane and Tithebarns Lane for traffic accessing the A3 at Burntcommon in order to travel to Guildford and beyond. The SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”. It appears that the Plan is proposing a strategic site at Wisley Airfield without even knowing what improvements to the local road infrastructure will be required. If that is the case for Wisley Airfield, then it is almost inevitably true for the proposed developments in East and West Horsley as well.

Loss of Green Belt land:

Sadiq Khan, new Mayor of London, has instructed London planners not to approve development on Green Belt Land within the M25. If we continue to build on our countryside it won’t be many decades before we have none left. Creeping development has led to almost continuous housing from Central London to Effingham. Is this to carry on to Guildford and beyond? (1,700 houses are planned for the Guildford end of the Hogs Back and 1,000 new houses on greenfield sites in Normandy.)

Answer (if comment is on questions 1-7 of the questionnaire): ()

FLOODING

Being a resident of Heatherdene, West Horsley, our gardens flood every winter and whenever there is heavy rain

The field behind our house designated “Land near to Horsley Station and next to the railway” has been earmarked in the draft local plan for one hundred houses. A large percentage of this land is FLOOD ZONE 3. During the last winter this field was on Amber alert (imminent major flooding).

How can it be possible to consider a piece of land that floods all the surrounding gardens and floods that section of Ockham Road North with horrendous surface water? Commuters are constantly soaked as they walk along The Ockham Road towards the village by overflowing drains every time there is rain.

The proposed entrance is too near the Railway arch on Ockham rd north, where lorries travel frequently into the middle of the road to make sure the clear the underside of the bridge.

It is an accident waiting to happen, in the truest sense!

Recently in Fetcham, a development was built on a site that floods. Even though, specialist flood resistant foundations and drainage were installed, the site flooded, causing damage to the properties and rendering them unsellable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

THERE IS ENOUGH BROWNFIELD SITES AVAILABLE

There is brownfield land available in the town centre which is being earmarked for commercial development rather than for housing. This is enough to meet our real needs for affordable local homes. There are enough vacant commercial sites to cope with genuine business need, and we have enough retail capacity already, so urban brownfield/derelict land should be used for housing. I understand that Surrey University is sitting on permission for 1,500+ accommodation units on its own brownfield campus. If the University fulfilled its obligations much Town Centre affordable accommodation would be available for rental/purchase.

Answer (if comment is on questions 1-7 of the questionnaire): ()

FIELDS BEHIND SHALFORD VILLAGE HALL

As a resident of Shalford and a member of Shalford LTC I wish to make known my objections to the current version of the Local Plan which removes the fields behind the Village Hall and Tennis Club from the Green Belt and puts them in the Shalford settlement boundary.

Although these fields have been classified as "open spaces" there is no explanation or confirmation to say that this would give them the same degree of protection as the Green Belt from housing development.

Any Construction on these fields which are 25ft above the village hall would tower over the tennis courts and bowling green and totally destroy the Green lung on the village.

The considerable traffic from a development would have to exit onto Chinthurst lane not only adding to the traffic chaos and pollution but increasing the potential for an accident.

By implementing a small adjustment back to the 2003 boundary GBC could protect these fields and ensure they remain open spaces.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to:

- increased traffic that would be cause in which a village such as Ripley already cannot sustain its current demand without long tailback and
- dangerous size vehicles manoeuvring in roads that has little or no pedestrian path way due to increased traffic
- lack of parking in the village for the present day users let alone if more were to be housed
- the use of countryside areas for which the area is so well know to build more properties

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I was very surprised to see the new development plan.

Having read the previous plan and having attended the meeting in April at Lancaster village hall, nothing had previously been mentioned about the two areas below:

Policy A 43 30 ha land at Garlick's Arch Burnt Common.
Whilst in principle it seems like a good idea to have both on and off access to the A3 at the Burnt Common roundabout, I am concerned about the effect it will have on the already congested local roads. We have massive lorries coming through Clandon (another problem) and now there would be even more, using this interchange from the M25/A3 to get to Woking. The road passing through Send is very congested for long periods during the day and this would only exacerbate the problem.

If we build houses but no offices, where do the people go to work? They all have to get in their cars to drive to work. Industrial units mean more big lorries on the narrow and already congested roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6928  Respondent: 10846145 / Phillipa Bottomley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Whoever it may concern.

I am very concerned about the plans for Garlick's Arch and the associated increase in traffic on the roads.

Many of the surrounding roads are very narrow and we have had wing mirrors gone and sides of cars badly scratched.

Although the new entrance and exit onto the A3 sounds good I am concerned at the increase in lorries and cars this would generate going through the already very congested Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/94  Respondent: 10846145 / Phillipa Bottomley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy A44. 1.9 ha Land West Ridge and Send Hill.

This area used to be a land fill waste site and there are currently vents in place which may be a concern for those that live in houses built on this site.

Send Hill is a very narrow road especially where it meets Potters Lane, where it is single lane, it then comes out onto a blind corner. Even an increase of 40 houses and 2 travellers sites would cause untold problems and danger.

I live on Potters Lane which since Sat nav has changed radically. We continue to get double-decker lorries and large trucks bombing along on a totally unsuitable road.

40 extra houses in Send Hill and 2 travellers site would only increase this even more.

Has research been carried out on the nearby roads?

How can GBC add these new developments so late in the day?

Whilst I understand that new houses do need to be built I object to both developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2568  Respondent: 10846145 / Phillipa Bottomley  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A42 change at Clockbarn in Tannery Lane because the increase in homes will worsen the chronic traffic conditions through Send and associated roads (as per my response to earlier draft Local Plans), and the impact on other services. This will be exacerbated if Policy A43 is also enacted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2569  Respondent: 10846145 / Phillipa Bottomley  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the Policy A43 change at Garlick’s Arch because the scale of the development is inappropriate for local roads, schools and surgeries. This will have a significant impact on traffic through Send, Ripley and Clandon, and will have a material impact on local schools, access to medical services and the Woking trains. This development will connect Ripley to Send developing a single conurbation contrary to the aims of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2570  Respondent: 10846145 / Phillipa Bottomley  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A 58 at Burnt Common and the change of “maximum” to “minimum” as there is no commercial case for such a development (reference empty units at Slyfield) and this change ignores all previous comments that caused its withdrawal from the 2014 draft. This development in conjunction with A42, A43 and the new interchange onto the A3 at Burntcommon all acting as a gateway in to Woking and the train system will blight the area to gridlock.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1005  Respondent: 10846145 / Phillipa Bottomley  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal to inset Send Business Park from the Green Belt because it is in an area of outstanding countryside adjacent to the beautiful Wey Navigation and is an inappropriate development in the Green Belt. The narrow country road system connecting Send Business Park to Send, Ripley and Woking is inadequate and will only be made worse by more development of this site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1006  Respondent: 10846145 / Phillipa Bottomley  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2
I am supportive of local development and an increase in housing, but my principal concern with the Local Plan is that it treats each development separately without considering the impact of the cumulative effect of these developments on schools, roads, public transport, medical centres and hospitals.

I am also concerned that this process is being re-iterated with what appears to be little impact from earlier responses which makes me increasingly convinced that this is being undertaken to appear to take account of the views and insights of current residents rather than develop an integrated and sustainable development of our area.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have no confidence in the current GBC's ability to carry out the wishes of the majority of residents of Send and Ripley. Their promises to protect the greenbelt have proven worthless. They have ignored the many petitions objecting to the proposed developments which appear to have not taken into account the affect on the infrastructure of our communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send
I object to the proposal to inset Send Business Park from the Green Belt because it is an old non-conforming user on the lovely open Green Belt area adjacent to the Weymouth Navigation. The restricted access of Tannery Lane makes this proposal even more undesirable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/382  Respondent: 10846241 / John Ford  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

I object to the Policy A42 change at Clockbarn in Tannery Lane because despite the many objections made previously by local people the development has been increased by 33%. Obviously this will make worse the traffic problems in Tannery Lane and at the A247 junction.

In addition it will increase the Green Belt erosion, surface water flooding and spoil the views on the River Wey Navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/383  Respondent: 10846241 / John Ford  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

I object to the Policy A43 change at Garlick Arch because again it has ignored the thousands of previous objections by local people. This proposal will also erode the Green Belt and no exceptional circumstances can be justified i.e. plots for travellers. The number of homes proposed is excessive and will cause an over-development of our village. It will cause increased flooding possibilities in a flood zone 2 area and cause further traffic congestion on the roads of Send and Ripley.

I object to Policy A58 at Burnt Common because it was taken out of the 2014 draft due to the number of previous objections. We do not require industrial development in this Green Belt area when Slyfield and Guildford have empty sites and industrial units. Further the 2017 Employment Land Need Assessment shows a reduction in demand for industrial land in this borough especially as the proposal indicates a minimum (not maximum as previously proposed) allocation of 10 hectares on Sends Green Belt. The proposal will create further traffic congestion on the narrow roads in this area.

We object to Guildford Borough Council's draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:
- destroy views from the Hog's Back ridge - a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green belt increase tail backs on the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford's pollution.

Comment ID: PSLPA16/2895  Respondent: 10846497 / Malcolm Folley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Increasing the population of West Horsley by such vast numbers would eradicate the character and charm of what is – and should remain – a traditional village. This letter is to highlight my grave concerns for the future of West Horsley, its inhabitants and the environment.

The scale of this plan is unsustainable for a multitude of reasons:

* The infrastructure is already fraying at the edges. Our roads, through West Horsley and East Horsley, are congested at peak times of the day as commuter and school traffic has become significantly increased in recent years.

* The Raleigh School in West Horsley is full with no room on the site for expansion. The Howard of Effingham Secondary School, traditionally the school that children from West Horsley transfer to at the appropriate age, is also at maximum capacity.

* At school times, when parents deliver or collect their children from the Raleigh Primary School, or the preparatory schools, Glensk and Cranmore, it is not an exaggeration to describe East Lane, Ockham Road, Northcote Road, Northcote Crescent and Nightingale Crescent as chaotic. It does not bear thinking about how worse these roads would become in the event of an influx of housing on the scale being considered.

* Traffic increases from the proposed new housing estates will exacerbate an already critical overload of cars in the village.

* This congestion then spreads to all the adjacent roads. Furthermore, the state of these roads, and all others within the two villages, are narrow with poor or limited paving. In places, in West Horsley, there is barely room for two four-by-four vehicles to pass; and the presence of trucks, which are seen with greater frequency as our villages are used as cut-through between the A3/M25 and the A246 Guildford-Leatherhead road, causes traffic to slow to a halt. This is also placing pedestrians at risk.

* Also, there are several points in East Lane, in West Horsley, that are repeatedly flooded through the winter. In essence, the pressure on our roads and drainage is at a worryingly fraught level today.
*Parking is already an issue, too. The station car park, serving both villages, is almost full on most days from Monday-Friday. Parking at the three parades of shops is also regularly overloaded.

*The Horsley Medical Centre is operating at what appears to be maximum capacity – again parking to keep an appointment at the surgery is already a game of chance. Other issues are at play here. Like the Medical Centre, the schools have limited scope, or no scope at all, for building development and are at full capacity.

*To this end it is incumbent on the Local Plan that the unsatisfied demand for housing first needs to be established to be a genuine local demand for people born in the locality, or who need to live in the locality as a consequence of their local employment; or are existing residents needing to downsize or upsize.

*In West Horsley, we have watched a succession of smaller, and therefore ‘affordable’ properties, be granted planning permission by the Guildford Borough Council allowing them to be rebuilt into substantially larger, and therefore hugely more expensive homes. Where has the coherent thinking been behind that policy, I wonder?

*I wholly object to the unwritten expectation that all the villages on the A3 corridor will, sooner rather than later, become an urban sprawl linking this area to the suburbs of south west London.

*The importance of maintaining the Green Belt to prevent the urbanisation of Surrey’s rural communities, like West Horsley and East Horsley, is paramount. Our legacy should not be to leave behind a landscape to resemble a concrete jungle – which I fear will be the consequence of the scale of the proposal drawn up by Guildford Borough Council.

*If we are to protect the Green Belt for future generations we need to ensure it is only lost after strict examination against laid down criteria and after all suitable Brown Field are fully utilised.

*Our environment is attractive and of national importance for flora, fauna and geographical issues.

*Erosion of verges and ditches is already a threat caused by flooding and unusual weather patterns of late. The effect of concreting over the Green Belt land will further reduce the natural drainage system and drive water into existing drains that are already at risk of overflowing.

*Our concern about the Cayman Island registered company's promotion on the former Wisley Airfield will have unimaginable and irreversible consequences on all the villages surrounding the site, obviously including West Horsley.

A traditional village life has been maintained throughout our 33 years in residence with strong clubs and associations, as well as an abundance of local businesses, and producers of food local to the area.
There is limited employment within the Horsleys, and the bus service is one designed to meet the needs of ageing, rural community inhabitants; not those seeking to work in Guildford or Woking, for example. The rail service is already heavily used throughout the week – and the railway station is substantial distance from much of the housing in West Horsley.

It is the duty of our generation to maintain the natural beauty – and significant importance – of villages like West Horsley for the generations of the future. We think we are doing a decent job of that. After all, history has shown that the constructions of 1960’s style development of cheap housing created more problems in rural areas than it solved: rising crime, unemployment, and communities without a soul.

Once farmland has been commissioned for development, we have arrived at a point of no return.

This plan destroys the very essence of Surrey – so attractive not only to those of us living here in West Horsley, but for those that relish the chance to visit and enjoy the Green Belt that has been part of our heritage for a century.

I repeat: this Local Plan proposed by Guildford Borough Council is inappropriate and should be condemned for the damage and destruction that would be wreaked upon West Horsley killing a village that is vibrant, well-maintained and cherished by those who live here.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<tbody>
<tr>
<td>Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to the dearth of the evidence base. The submission documents are unsound, unreliable and inconsistent.

1.2 I object to the way in which the current SHMA inflates the proposed housing figure, some examples of which are summarised below:

the failure to correct for errors in the historical data for international migration flows;

the failure to update the demand estimate in the light of the EU referendum vote. The ONS data supporting the SHMA makes it absolutely clear that the primary component of future housing demand is net international migration. The assumptions underpinning the calculations must be revisited following the decision for the UK to leave the EU;
the way it considers students and affordability, and:

the flaws in the method for estimating the number of homes needed to support job growth:

the treatment of vacant property

1.3 I object to the way in which the Green Belt and Countryside Study fails to value the fundamental aim of Metropolitan Green Belt properly or look strategically at options for development in major settlements beyond. The way Green Belt is parcelled up and scored is not valid: serving 2 Green Belt functions is as valid as serving 4 functions. Green Belt is Green Belt, it does not require assessment or qualification. The Green Belt sensitivity analysis is not a valid basis for informing decisions.

1.4 I object to GBC’s failure to evidence and articulate the exceptional circumstances required to justify amendments to Green Belt boundaries as part of the Local Plan process. It is quite achievable for realistically prepared and identified development needs to be accommodated in Guildford’s urban areas and villages.

1.5 I object to the use of Transport Evidence has been produced very late and is incomplete, inaccurate and untested to the extent that the Plan is not ready for a Regulation 19 consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A35 “Wisley” on the grounds that:

This constitutes a re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.

This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.

Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

1.Green Belt location and absence of “exceptional circumstances”.

2.Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
3. Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).

5. Absence of adequate traffic data.

6. Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.

7. Loss of high-quality agricultural land (55% of the site), in breach of national policy.

8. Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.

10. Cost of infrastructure required to the detriment of alternative more favourable sites.

11. Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.

13. Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.

15. Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.

16. Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).

17. Failure to evaluate the cumulative impact of this and nearby development sites on the area.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**
1.1 **I object** to policy A42 “Clockbarn Nursery” on the grounds that;

1.2 The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area.

1.3 The site has very restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical.

1.4 Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic.

1.5 Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

1.6 The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/6772  Respondent: 10846625 / Frank Drennan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 **I object** to policy A43 “Garlick’s Arch” on the grounds that;

1.2 Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided

1.3 The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result

1.4 I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

1.5 I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area...
well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

1.6 I object to the proposal to build 7,000 sq.m of light industrial, general industrial or warehousing on the site at Garlick’s Arch. There is no need to place a Strategic Employment Site in this location when there is plenty of spare space available at Slyfield (40 ha). The Employment Land Needs Assessment (ELNA) 2015 has been reduced by 80% since the ELNA 2013. There is no longer any need to place industrial development in the Green Belt when there are plenty of brownfield sites available.

1.7 I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

1.8 I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

1.9 I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

1.10 Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

1.11 Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

1.12 With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

1.13 The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

1.14 I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

1.15 Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

1.16 Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

1.17 Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
1.18 Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

1.19 I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

1.20 I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

1.21 I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

1.22 It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6773  Respondent: 10846625 / Frank Drennan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a). The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

1.2 The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved and are already heavily loaded.

1.3 I object to the proposed Infrastructure Schedule (Appendix C). The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPS16/6774  **Respondent:** 10846625 / Frank Drennan  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 **I object** to policy A44 “Send Hill” on the grounds that;

1.2 There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.3 The proposed development is not sustainable because of poor infrastructure. Send Hill is a single track country road and too narrow to provide sufficient access to the site for travellers or accommodate the potential new levels of traffic the proposed development would bring.

1.4 The site is a high quality green belt amenity area within beautiful surrounding countryside and would be spoilt by the development.

1.5 A Wasteland Solutions environmental report on Send Hill dated March 2004 gave evidence of past ponding of water in the excavated area. Further development would disturb the water table and increase risk of flooding to surrounding properties.

1.6 The site was used as a GBC registered landfill site and shown on the 1963-8 Ordnance Survey maps as “refuse and slag heap”. It is therefore unsuitable for such a development on health reasons.

1.7 On the 1971 Ordnance Survey the site is shown as a “refuse tip” prior to when proper licensing/registration was required. The date of the landfill works predates the 1999 EU Landfill Directive regulations. I therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials.

1.8 GBC has installed gas monitoring wells on site since July 2000. One well recording methane gas discharge.

1.9 A Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies the proposed site as GBC recorded landfill site Ref GU/11/LLC with type of waste not identified. The date of the landfill works predates the 1999 EU Landfill Directive regulations. I therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials.

1.10 A Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies proposed site GBC recorded landfill site Ref GU/12 with type of waste identified as “unrestricted”. This causes concern as to what it does contain and the dangers if disturbed.

1.11 An Envirosearch Report RS1100201_1_1 dated 17th February 2004 and historical map data and information from GBC has identified the site as landfill and has “areas of potentially contaminative industrial activities” and “potential risk from landfill gas migrations”. Development of this site would be a health hazard.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to Policy D1 “Making better places” on the grounds that;

1.2 The absence of any reference to vernacular or historic design guidelines, even in Conservation Areas. Most of the borough, especially the rural areas, has vernacular design guidelines that are available to give suggestions as to appropriate design. These should have mandatory planning force.

1.3 The monitoring of this policy is inappropriate. Why should this policy result in a reduction of the number of appeals for poor design? Should it not result in better-designed buildings?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to Policy D2 “Sustainable design, construction and energy” on the grounds that;

1.2 Sustainability should be an overarching ambition, conditioning the whole local plan and running through it, as claimed in the NPPF, “like a golden thread”. It should be set out clearly in Policy S1, not buried away as a minor detail in Policy D2.

1.3 This policy amounts to “greenwashing”, expounding aspirational environmental targets while ignoring the plan to build dormitory towns across the Green Belt that are environmentally and socially unsustainable. These settlements will bring vastly increased car use and will lead to unacceptable traffic congestion, overstretched social infrastructure, and more greenhouse gas emissions, noise and light pollution. This policy should not be just about saving energy but about
preserving the borough’s stock of natural capital, especially the countryside, from futile attempts to rig the housing market.

1.4 This policy’s emphasis on Combined Cooling Heating and Power and communal heating networks is meaningless, since no such networks are available locally.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to policy D3 “Historic Environment” on the grounds that;

1.2 This policy clashes with the strongly pro-development agenda of the rest of the plan and fails to address the contradiction. History is unamenable to improvement, so the policy should commit the Council firmly to protecting and preserving our heritage assets from development. Instead, the specific policy pledge to “support development” that might “enhance” heritage assets leaves wide scope for abuse in the form of destructive commercialisation and financial leveraging of relevant sites.

1.3 This policy is based on the false premise that Guildford’s heritage is inherently in decay. This is a developer’s charter – a short step away from the idea that the historic environment needs to pay its way to be preserved. The Council’s aggressive reviews of Guildford Museum and the Electric Theatre support this interpretation. Whatever the “reasoned justification”, the actual policy wording in the blue box leaves too many loopholes.

1.4 Development close to historical assets is harmful and should be expressly prohibited. This policy fails to meet the requirements of NPPF paragraphs 126 and 131-133.

Attached documents:

Comment ID: PSLPP16/14460  Respondent: 10846625 / Frank Drennan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1.1 **I object** to policy D4 “Development in urban areas and inset villages” on the grounds that;

1.2 This policy that does not address the opportunity for building in the urban area

1.3 The plan envisages that 40% of homes built will be “affordable”, but this does not provide any accommodation for low-paid workers, for example, those on the minimum wage, who cannot afford to buy so-called “affordable” homes or pay an “affordable” rent. There is a need for some expansion in social housing, especially in urban areas, where there is a greater concentration of low-paid workers such as those employed in the retail, warehousing and distribution sectors (all of which this plan aspires to expand).

1.4 The number of homes planned in the urban area is much too low. There is a glaring need for regeneration in many urban areas, particularly Guildford Town Centre but this is ignored in favour of building homes on green-field sites instead.

1.5 This will not address urban housing needs. It is also unsustainable, since building outside the town does disproportionate harm to road traffic, air quality and overstretched infrastructure.

1.6 The plan envisages a large expansion of the retail sector, but this is a sad voice from the past because the sector is in rapid and continuous decline.

1.7 All the stated policy aims for “inset” villages will be negated by the excessive weight of new housing development proposed which would radically change their character forever.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

---

1.1 **I object** to policy E1 “sustainable employment” on the grounds that;

1.2 There is a significant reduction of between 71% and 79% in the previous job target and resultant 79% reduction in employment space in response to the many objections lodged in 2014 against an unsubstantiated agenda for economic expansion in the last draft and based on new findings by Aecom in the latest ELNA 2015.

1.3 The ill-informed clustering of all B classes in terms of the clarity of market evidence required to inform effective planning and a failure to provide a clear understanding of business needs required under Section 160 of the NPPF.

1.4 The dramatic reduction in assessed demand by two Employment Land Needs Assessment Reports carried out under the same terms of reference within a period of 2 years which calls into question the general reliability of the process of collection and interpretation of data in the overall forward planning process by GBC.I do not support the policy of creating a Strategic Employment site at Garlick’s Arch (A43) in the Green Belt which is completely unnecessary due to the overall decrease in demand for industrial space which could be easily accommodated at Slyfield.

1.5 That the research undertaken by Aecom is generally superficial and lacks sufficient detail and analysis between B1a, B1b, B1c, B2 and B8 use classes and that no reliable individual analysis has been undertaken of the widely different
The supply and demand dynamics of office, research and development, light industrial, general industrial and warehousing and distribution floor space.

1.6 No proper analysis has been made of data held by GBC in respect of different B classes in terms of planning applications granted or evidence gathered by the economic development function at GBC and no robust assessment of local market demand apart from fairly brief references to freely available market research undertaken by commercial estate agents such as Lambert Smith Hampton covering a much wider area.

1.7 GBC appear to fail to appreciate the fundamental rationale of the Use Classes Order as a planning tool in terms of useful property market research or forward planning.

1.8 What we are left with is a fairly clumsy and poorly informed plan which clusters B classes without any appreciation of widely different employment impact and economic sustainability. E.g. B1 generates at least 5 times as much employment as B8.

1.9 The lack of appreciation by GBC as to the opportunity for widely different uses being generated within B class clusters defeats the whole point of proper planning of employment uses and can significantly endanger previously good planning put forward in the previous 2003 plan. E.g. the creation of a research and development park linked to the University but now has the threat of being downgraded into a general business park (see below).

1.10 Little regard has been given in the plan to the economic reality of falling demand for B2 industrial space which is clustered with other B classes almost randomly throughout the plan.

1.11 Little regard is had to the opportunity of B1 b space as an opportunity for research and development which needs to be nurtured and preserved without the detrimental and confused clustering with other B classes both in terms of planning and promotion of a research hub.

1.12 I note that the past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 derived from VoA analysis and that the calculated annual floor space demand is 0.7% over the plan period up to 2033.

1.13 I support the concept of seeking increased investment in our local knowledge-based, high technology economy. This will provide well paid, creative jobs and generate the funding necessary to pay for the infrastructure and environment this sort of industry requires.

1.14 We need to distinguish between wanting to increase the added value of the economy and physical expansion, especially given the scarcity of land in Guildford. Guildford is not the place for large space hungry businesses. So I should target high added value small and medium sized enterprises rather than the headquarters of larger corporations.

1.15 We need to promote the idea of new knowledge transfer in incubator units and small premises for new start up enterprises. They need to be on the wave of innovative new technology as opposed to older established businesses.

1.16 I object to the policy of creating a Strategic Employment at Garlicks Arch (A43) in the Green Belt. The stated requirement of 7,000 sq m (B1c, B2 and B8) could easily be accommodated at the Slyfield Regeneration site of 40 ha.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to policy E2 “location for new employment floor space” on the grounds that;

1.2 I am of the opinion that all new office and research and development (use Class B1a and B1b) floor space should be within Guildford town centre.

1.3 I object to the policy of expanding the Research Park onto Blackwell Farm and I do not believe there are exceptional circumstances to justify incursion into this permanent and high quality area of Green Belt

1.4 The Surrey Research Park currently extends to 65,000 sq m. There is already granted consent to expand to a further 9,000 sq m (14%)

1.5 The past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 based on ELNA 2015 derived from VoA analysis.

1.6 The ELNA 2015 calculated annual floor space demand is 0.7%.

1.7 The data point for our analysis is today in 2016 so we have 17 years to go to the end of the plan period. The necessary growth in floor space over the plan period is therefore 17 years x 0.7% = 11.9%.

1.8 There is currently 14% expansion space already available.

1.9 The proposal by GBC to expand the 65,000 sq m by 9,000 sq m (existing allocation) with an additional 35,000 sq m amounts to an increase of 67% of the Research Park which is not required.

1.10 The Research Park is currently developed at a density of 25% plot ratio. The majority of existing buildings are 2 stories giving a developed floor space plot ratio of 12.5%.

1.11 The existing Research Park has the opportunity to markedly increase its density without infringing any Green Belt land nearby. Any density increase would be cost effective for the use of all existing infrastructure and would also have the potential to match the existing densities of existing academic buildings on the university campus which are three to four times higher.

1.12 Together with the existing expansion of 14% through existing consents and the opportunity to increase its density the Research Park has ample capacity to expand to embrace new demand for B1b uses linked to the university.

1.13 I do not accept that the valuable and workable concept of the Research Park should have its integrity and purpose diluted by being converted into yet another Business Park for office users rather than research organisations

1.14 A preferred location for increased B1a and B1b space should be in the Town Centre close to housing and a convenient transport hub

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14467  Respondent: 10846625 / Frank Drennan  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E3
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to Policy E3 “maintaining employment capacity” on the ground that;

1.2 The ill-informed policy of resisting change of use from B1a to residential flies in the face of positive property market solutions for the regeneration of brownfield land. It is also contrary to current government policy which has recently been reaffirmed and permits a change of use from B1a (offices) to C3 (residential).

1.3 That the existing government policy which has recently been made permanent of allowing change of use from B1a to C3 is sound

1.4 Many office buildings reaching an age of more than 30/50 years become redundant in terms of energy compliance making them illegal to occupy for employment purposes and the cost of refurbishment makes them redundant and uneconomic

1.5 The reality of market demand is that the gross development value of refurbished residential space is in excess of the gross development value of refurbished old office space in many locations (this gross development value assessment is supported by the analysis by property consultants GVA in the supporting evidence within the Allies and Morrison Masterplan for Guildford dated 2015)

1.6 To resist change from B1a to C3 is contrary to the concept of brownfield first for residential development schemes.

1.7 To resist change from B1a to C3 in Strategic or Significant Employment Sites is contrary to the concept of integrated mixed use communities whereby the journey to work is minimised.

1.8 London has led the way with significant residential schemes being created from redundant office stock. A good example is the South Bank in London adjacent to Waterloo Station where in 2005 the Shell Centre has been converted into flats. Another early example is the 2000 scheme at Metro Central Heights at Elephant and Castle where the old Alexander Fleming House was converted to 435 flats by St George. GBC needs to adopt more modern trends and policies.

1.9 Guildford is in dire need of increasing town centre residential development.

1.10 The feared loss of employment will be marginal and impractical to resist. Empty office blocks are not the answer.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1.1 I object to policy E4 “Surrey research Park” on the grounds that;

1.2 The expansion of the Research Park into a larger Business Park is completely unnecessary. The planning policy going forward for the Surrey Research Park should be to maintain and enhance the integrity of its research base allowing for the economic value add to the local economy of knowledge and technology transfer from the University.

1.3 That B1b should be the primary use class for the Research Park and that applications for B1a should be resisted due to the danger of dilution of the core purpose and reputation of the park. I object to the inclusion of B1c uses which is inappropriate and unnecessary.

1.4 Research parks based on the early UK technology transfer exemplars of the Cambridge and Oxford need careful monitoring, nurturing and protection to ensure the integrity and quality of the park is maintained and the park continues to be a destination for innovation and enterprise

1.5 There is a danger for research parks to be overwhelmed by short sighted development opportunities being taken by park managers provided by standard office activities and administrative functions which in time turn them into standard business parks which can be found anywhere in the country. Their relative low density and attractiveness make them targets for “any other” office user

1.6 The Surrey Research Park in Guildford needs to be focussed on a broad spectrum of scientific research including computer science, bio-chemistry, design, space-science, eco-science, health science, software development, laser technology, media-science, artificial intelligence, robotics and super-manufacturing

1.7 Monitoring indicators should include new start-ups and new patents created

1.8 Facilities should be provided whereby new small businesses can secure premises under subsidised licence fee arrangements with no onerous rent or lease commitments

1.9 Consideration should be given to the concept of shared “enterprise hubs” where individuals can take pay as you go workstations in shared spaces similar to touch down business centres similar to the “enterprise village” concept

1.10 I object to the policy of any new extension of the research park more than the existing 14% already provided for within the park or within the footprint of the park

1.11 There is already granted consent to expand to a further 9,000 sq.m (14%) This space has been available for 10 years and is still to find a taker

1.12 The past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 based on ELNA 2015 derived from VoA analysis

1.13 The ELNA 2015 calculated annual floor space demand is 0.7%

1.14 The data point for our analysis is today in 2016 so we have 17 years to go to the end of the plan period.

1.15 The necessary growth in floor space over the plan period is therefore 17 years x 0.7 = 12% which is less than the current expansion space of 14%.

1.16 The research park is developed at a plot ratio of 25%. This could be increased to 50% within the same footprint of the existing park without damage to its amenity. The actual current land use for development in the park is in fact only 12.5% because most buildings are 2-storey.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14473  Respondent: 10846625 / Frank Drennan  Agent:
I object to policy E5 “Rural Economy” on the grounds that;

This policy should only apply to small-scale development in rural areas which means development of less than 100 sq.m (gross) which is in keeping with and the permanence and amenity of the green belt.

Use of rural areas for town centre uses without applying the sequential approach is against the principles of localism that require local people to be consulted and heeded, not ignored. Villages need protecting in terms of both design and scale.

Most of the economic activities listed in 4.4.44 depend on maintaining the rural character of our villages which would be endangered by the wholesale “insetting”, boundary expansion and house building proposed in other parts of the plan. This applies also to new and projected enterprises in the Green Belt (e.g. Grange Park Opera’s Theatre in the Woods in West Horsley, which requires a protected, rustic setting to be a success, not housing estates and congested roads). Policy E5 is incompatible with the high housing numbers proposed.

Previous commitments to improved high-speed broadband and mobile phone coverage have now been diluted, despite general support. This disregards the responses from the 2014 public consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to policy E6 “the leisure and visitor experience” on the grounds that;

The importance of a visitor attraction hub could be much better articulated. Guildford has great potential to become a “must see” destination for tourists and visitors. Surrounded by the natural beauty of the Surrey Hills, it is already distinguished as an historic county town. The historic part of the town should be exploited to the full creating a real sense of vibrancy and atmosphere. This should be linked to the attractions of the Museum, the Castle, the Wey and the historic High Street including its views of the Hogs Back. Guildford would be wise to model itself on other historic towns like Bath, Chester and York.

The economic impact would create big advantages for both the leisure and the niche speciality retail sectors in the town. Given the local and wider catchment of the town Guildford should strive for high quality definition making it a great centre for people to live in and visit. It would be a great mistake if Guildford were to opt for large impersonal department
stores and dull high street chain stores at the expense of exploiting its uniqueness and character which would afford greater benefits.

1.4 Guildford the historic “Gateway to the Surrey Hills” has far more potential than Guildford just any other stereotypical centre found anywhere around London. What GBC needs to do is create a theme such as a new “Pilgrims Trail” similar to the Patriots trail in Boston USA with marked yellow footsteps leading from the station to the River and up through the historic heart of the town.

1.5 There is a need to make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

1.6 There is a need to help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to RHS Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently bypass Guildford to go to Bath, Oxford or Cambridge instead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14477  Respondent: 10846625 / Frank Drennan  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to Policy E7 “Guildford Town Centre” on the grounds that;

1.2 Policy E7 is ill-informed and there is insufficient evidential support to objectively assess the capacity of the existing town centre to accommodate appropriate new development and therefore fails the requirements of Section 161 of the NPPF to assess the real quantitative and qualitative floor space needs.

1.3 Policy E7 is an aspirational voice from the past and is unlikely to benefit the health of the town centre in the future. There is no reliable evidence provided that the retail core of the Town Centre needs or can be expanded by 45,000 sq m of retail space at North Street because of lack of demand for retail units in the Town Centre particularly large units. This is due to falling demand for retail space in Guildford and town centres throughout the country evidenced by independent research and the reality of empty shops in many high streets (including Guildford) and the accelerating competition from internet shopping.

1.4 The failure of the North Street scheme to be redeveloped over the last ten years is a testament to lack of demand which has been so poor that the original planning permission for a large retail scheme became time expired.

1.5 The reality is that the town centre has enough retail floor space. If more is introduced it will result in the closure of existing shops particularly in locations which are less than 50% of peak Zone A or 100% positions. What Guildford needs is a new focus on speciality high quality comparison shopping supported by a revival of Guildford’s attractive
heritage core and a new major visitor attraction supported by restaurants. Guildford needs to become the quality shopping destination for Surrey.

1.6 The existing site in North Street should be replaced with a well-designed ground floor high quality speciality retail mall and frontage of no more than 40 shops extending to 7,000 sq m with the rear and upper floors providing an additional 500 to 600 homes. The proportion of the above proposed smaller scheme at North Street will be complementary to and not antagonistic to the Upper High Street, Tungate, the Debenhams site and the 100% Zone A positions of the Lower High Street. If the existing policy under E7 is adopted the North Street site will remain empty for another 10 years.

1.7 The findings of the Guildford Retail and Leisure Study 25 September 2015 are very pessimistic about retail trends. Carter Jonas’s recent retail study reports a fairly bad time for retail, the bullets below are direct quotes from the report:

1. Para 3.3 Retail Trends “Town centres, once the principle focus for retail and leisure are now increasingly under threat”

2. Para 3.4 Retail Expenditure “disposable income and retailers’ margins are being squeezed further”

3. Para 3.5 “there has been limited growth in retail (convenience and comparison goods) expenditure per head since 2008”

4. Para 3.6 “the retail sector remains fragile and analysts forecast that some operators and centres will continue to struggle over the short to medium term”

5. Para 3.8 “completed new shopping centre floor space in the UK is currently at its lowest level since the 1990s”

6. Para 3.11 Internet Shopping “New forms of retailing have also emerged in recent years and are becoming established as significant alternatives to more traditional ‘bricks and mortar’ shopping facilities. Over the last 5 years, online sales have increased by 222%”

1.8 Despite the findings about retail we are told “evidence suggests that high quality schemes will continue to prosper.” What evidence?

1.9 Para 3.33 “the latest 2013-14 Javelin VenueScore17 ranks Guildford Town Centre within the UK’s top 50 shopping locations at 33. By contrast, Kingston-Upon-Thames is ranked 17th. Since 2007, Guildford Town Centre has fallen 20 places in the Venue Score ranking”

1.10 Para 3.40 “The growth of online shopping is also impacting on the vitality and viability of many of Britain’s centres and high streets. This is placing pressures on rental growth and market demand in many centres, particularly secondary centres outside the ‘top 100’ shopping locations. This has been further compounded by rising vacancy levels and the loss of key retailers. As a result, the share of non-food retail sales conducted through town centre shops has declined, from 64% in 2002 to just over 40% by 2013. In our opinion, a far more uncertain future awaits the next “wave” of new retail investment and development. The evidence suggests that high quality schemes in the strongest prime shopping locations will continue to prosper.” Is this not an aspirational assumption?

1.11 Para 3.41 “Notwithstanding the threat of online shopping, industry experts still predict that the demand from major retailers for new space will continue as it remains the primary mechanism for retailers to ‘reach’ their customers and grow their businesses.” Who are these industry experts? Is this not an outdated concept and merely an aspiration of the British Council of Shopping Centres (BCSC)?

1.12 Appendix 6 of the Retail Study indicates potentially inaccurate demand data

1.13 Para 5.29 “The latest CoStar Report recorded 64 requirements for Guildford from January 2013 to August 2014; representing a total maximum floor space requirement of 62,208m2 gross (see Appendix 6).”

1.14 The Appendix 6 list of retailer demand looks impressive with brands such as Joules Clothing; Fossil; Comptoir des Cotonniers; Moshulu; Rituals; Princesse tam.tam; Cycle Surgery; Majestic Wine; Game Stores Group Ltd; Iceland.
However, if we look closely at Appendix 6 it is an amalgam of old unchecked national high street requirements some of which do not even include Guildford as a destination and the majority are hardly high quality comparison retail. There are also no “big” requirements in terms of space. Where are the big stores?

1.15 GH Pressley & Sons – Watches and Silver- Requirement “They are seeking a flagship diamond store in central London. Target locations include Mayfair, St James, Kensington and Knightsbridge. Brands will include Hans D Krieger and Marco Bicego.” This does not sound like Guildford.

1.16 Oxygen Red Ltd – Ladieswear- Requirement “Oxygen Red is looking to acquire temporary stores in Shopping Centre locations within the M25” Guildford is well outside the M25.

1.17 The data relating to retail demand does not appear reliable. The 62,800 sq m does not translate to real demand for an expansion of 500,000 sq ft. If proper due diligence was applied perhaps 30% of this alleged Carter Jonas requirement would survive proper scrutiny.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14478  Respondent: 10846625 / Frank Drennan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E8

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to policy E8 “District centres “on the grounds that;

1.2 The proposal that sites “on the edge” of District Centres should be considered for retail developments. This is another Trojan horse policy, allowing retail hubs to be vastly expanded in order to smooth the way for vast new housing estates outside in the countryside (e.g. to meet the “everyday shopping and service needs” of the roughly 1,500 people living in the 600 new homes planned for the Horsleys).

1.3 This is a case of back-to-front priorities. Expanded local retail hubs are being proposed in order to justify more housebuilding in the villages, and in a forlorn attempt to mitigate the serious traffic and infrastructure problems this will bring. The Council have no business preparing the way for new supermarkets in the Green Belt. Rural retail capacity should be left to local demand.

1.4 The policy proposes not a single measure to support existing rural shops and services that are the lifeblood of village communities, e.g. using business rates and other levers at the Council’s disposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14479  Respondent: 10846625 / Frank Drennan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E9
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to Policy E9 “Local centres” on the grounds that;

1.2 (for the reasons given under Policy E8 above) to the proposal for retail development adjacent to the 6 rural centres, and sites on the edge of designated centres. This is creeping urbanisation, damaging to the Green Belt and to Guildford town revival as a thriving urban hub. It will contribute to local urban decay and depopulation, just as expansion of the suburbs did to mid-20th century London.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14480  Respondent: 10846625 / Frank Drennan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to policy H1 “Homes for all” on the grounds that;

1.2 Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set any rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

1.3 The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

1.4 Student accommodation should provide for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and underused surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back. Surrey University has 17 ha of car parks that could provide all the student accommodation required on stilts with parking beneath.

1.5 Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Overprovision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to policy H2 “Affordable homes” on the grounds that;

1.2 “Affordable” homes, under national definitions, means homes that are sold or rented at 80% of market value. Even if 70% of these are rented as proposed, the level of market prices in the South-East means (even post-Brexit) that these homes will remain well beyond most people’s means and that starter homes will not become available for local people.

1.3 In addition, the viability clause (4.2.40) means that in practice the policy could be unenforceable. Private financial viability has no place in a public policy and should be removed. It is a get-out-of-jail-free card for developers that will sacrifice countryside for no local benefit.

1.4 I question the assumptions that people have a right (rather than a legitimate aspiration) to own a home; that they should be encouraged to live locally (contradicting the Government’s policy of encouraging labour mobility and development in poorer regions, where homes are cheaper); that increasing local house-building will reduce overcrowding and congestion (rather than simply suck more people into the borough); and that it will stem the rise in house prices (even though 13,860 new homes will be a drop in the ocean, given that prices are determined by an infinite demand-pull from London, whose population is increasing by 100,000 a year, and by the currently low cost of capital for overseas and other buyers). The weak mechanisms proposed in the plan might influence the market in a more remote part of the UK, but not here.

1.5 This policy’s version of “affordability” is just a smokescreen for pushing through more development generally. Building more homes in Guildford cannot increase real affordability given the overhang of the London market. In addition the many additional homes will in themselves create an additional need for further affordable housing, creating an unsustainable feedback loop at the heart of the policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1.1 I object to policy H3 “Rural Exception Homes” on the grounds that;

1.2 This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix”, this can include “market” housing – i.e. normal commercial development which in Guildford usually means expensive executive homes. This policy means building anywhere, and ignoring all historic planning restrictions.

1.3 The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to policy I1 “Infrastructure and delivery” on the grounds that;

1.2 Most of the borough’s infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. Yet this plan’s commitment to building housing estates across the Guildford countryside will mean either major infrastructure investment that no-one is prepared to pay for or else a catastrophic and simultaneous collapse in transport, educational, medical, energy, water and communications services.

1.3 The plan targets greenfield sites – requiring heavy infrastructure investment – in order to generate CIL income necessary to meet an infrastructure shortfall that is already serious. This is not sensible. The current draft CIL scale also encourages development on greenfield sites rather than brownfield.

1.4 The policy wording says nothing about roads and traffic. The Council’s methodology for assessing infrastructure needs in this area is inadequate, identifying only the tip of an iceberg of existing congestion. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that involve demolishing property and road-widening in residential areas to solve the resultant congestion. The A3 improvements are not guaranteed to take place but they are being used to justify removing large areas from the Green Belt before detailed traffic assessments have taken place. These detailed investigations are being deferred until the planning application stage and will be left to developers to prepare. If a site then proves to be unsustainable its Green Belt protection will have been lost for no reason and unsuitable development will take place by a more insidious process.

1.5 Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritising greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly.
1.6 This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognising this as a key issue, the plan is based on a wing and a prayer.

1.7 The highways network is under stress at peak times in many parts of the borough. Queuing is the daily experience of drivers going to and from work. The local plan recognises the problems in para 2.14. Much of the road network is single-carriageway, and junctions act as constraints.

1.8 The key evidence on future traffic conditions is provided in the Strategic Highway Assessment Report (SHAR) which summarises the results of the tests carried out by Surrey County Council at the request of GBC. Five scenarios were examined using SCC’s strategic traffic model.

1.9 Scenario 1 contains all developments and planning permissions from 2009 to date. As such it corresponds to today’s circumstances, and describes the current unsatisfactory traffic conditions in peak periods.

1.10 Scenario 5 represents the position at the end of the plan period, including all development and highways schemes in the local plan.

1.11 The results of the analysis show that there will be widespread congestion in the morning peak hour across the network. The key strategic routes, the A3 through Guildford NE bound, and the M25 between Junctions 10 and 11, are shown to be at or over capacity. The summary network statistics presented in the SHAR, while useful, require some interpretation because the analysis of vehicle-hours is derived from link speeds only, and does not reflect junction delays and queues. The tables that show the ratio of flow to capacity and level of service are especially helpful to gaining an understanding of the conditions on the network in the forecast. Where the forecast traffic volume is above or close to capacity, flow becomes unstable and there is congestion. The SHA results provide evidence that, in 2031, congestion will be worse than it is today on much of the network.

1.12 It is the case that the traffic modelling does not take into account the potential for increased use of other modes, but the trip rates used for developments already have built in the typical level of use of other modes, and services will be required to meet that need. It is also the case that the model does not allow for park and ride, which would improve matters in the town centre, as discussed below.

1.13 In order to gain an insight into conditions across the network, it is necessary to combine information from several tables in the SHAR. Table 4.5 shows that the M25 and A3 will be at capacity in Scenario 5. The other roads that will have poor levels of service include those in Table 4.5 but also those in 4.12 (except the A3) and those in Tables 4.3 and 4.4 with levels of service E and F that will not be given some relief by improvement of the A3 in Scenario 5. Paras 4.10.3, 4 and 5 point out that there will be increased congestion. Given that the starting point is unsatisfactory, there can be no expectation that the schemes in the Infrastructure Development Plan will provide an overall improvement. There will be some local benefits, such as the Ash rail bridge for example, but in general conditions will be as bad and in many places worse. So the statement in the SHAR para 4.2.5 that ‘the combined mitigation as reflected in Scenario5..indicates that at the strategic level it accommodates the additional PSLP demand’ needs qualifying – ‘at the cost of a lot of queuing’.

1.14 The cumulative effect of the additional traffic generated by the developments in the local plan will be to increase congestion, even with the proposed highway schemes in place. More detailed analysis of the junctions and queuing is required. So we question the conclusion that the developments would have “an acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF”.

1.15 Appendix 3 of the Transport Topic Paper shows the phasing of housing development and transport infrastructure. The major scheme being considered for the A3 between the A31 and the A320 is scheduled for delivery in the period 2023/24 to 2027/28. The strategic developments at Blackwell Farm and Gosden Hill Farm are shown as being phased in from 2021/22 onwards. The Garlick’s Arch development is shown as starting in 2019/20. Therefore, there will be a period in which the existing A3 has to cope with the additional demand arising from those developments before extra capacity is provided.

1.16 The following comments regarding the strategic sites are taken from the SHAR:
1.16.1 Blackwell Farm – there will be congestion at the A31 junction, and the problems at the Tesco junction, and the Egerton road /Gill Avenue junction (para 4.9.5). Traffic is likely to access the Surrey research park and the RSCH through the development (para 4.7.3)

1.16.2 Gosden Hill Farm – there will be an increase in traffic through Burpham. There will be pressure on the A3100/ B2234 roundabout (paras 4.7.6, 4.7.7 and 4.7.8).

1.16.3 Wisley – traffic will increase on minor roads to gain access to the A3 (N and S bound) and other routes (para 4.7.11). The development will add more traffic to the A3. The Burnt Common slips help alleviate the traffic through Ripley according to the model, but queuing on the A3 could mean this does not happen (para 4.7.14)

1.16.4 Normandy/Flexford – the report has little to say about the impact of this large development. The increase in flow on Westwood Lane is noted (para 4.5.7). Tables 4.10 and 4.11 show junction delay reducing at the Westwood Land, B3000 junction, but an increasing at the Puttenham Hill/Millbrook junction.

1.16.5 Ash – development in Ash is not specifically addressed, but there are major increases in traffic on a number of roads. The new rail bridge will bring relief (but traffic will move to the next junction).

1.16.6 Slyfield – there are no remark relating to SARP, and as there are no additional trips shown in and out of the Slyfield residential zone in Tables 3.3 and 3.4, it is possible that this development has been omitted. There is a significant increase in trips to and from the Slyfield industrial zone, which will impact on the A320 and Clay Lane.

1.16.7 Town Centre – the report has very little to say about the town centre. It is evident that the model is forecasting severe congestion on the approaches to the town centre, such as the A281, the A31 Farnham Road, and Woodbridge Road for example. No mitigation measures are planned. And in the Transport Strategy, GBC states that the intention is to adopt Allies & Morrison’s Scenario 2 which would have the effect of significantly reducing the capacity of the town centre road system. The implications have not been examined, but traffic using the A281 from Waverley, for example, would be affected.

1.17 The local plan does not state an objective for congestion. The two strategic objectives that are included for infrastructure refer to supporting sustainable development and delivering a balanced system. However, in para 2.15 there is an aspiration expressed about opportunities ‘to improve the performance of the road networks through transport infrastructure and service improvements’, which taken with the previous paragraph includes reducing congestion. The evidence so far shows that this will not happen.

1.18 The mitigation proposed is not sufficient to overcome the problems that will be caused by the level of growth in the local plan and consequently congestion will worsen. The network will lack resilience and be vulnerable to disruption due to incidents. Minor roads will have to cope with a lot more traffic, for which they are unsuitable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1.1 **I object** to policy i2 “Supporting the Department of Transport’s Road Investment Strategy” on the grounds that;

1.2 This policy is too vague and unrealistically optimistic. Decisions by Highways England on improving the strategic road network (the M25 and A3) are still years off. The Council have suggested a very expensive tunnel under Guildford, but this is no more than a dream. Even if Highways England accepted this (which is highly unlikely in the post-Brexit public spending climate) it would not be built until the end of the plan period at the earliest. Other, less expensive A3 improvements, and changes to the Junction 10/Heathrow stretch of the M25, will also take years to agree and complete.

1.3 The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is foolhardy. Surrey is the most congested county in England, with 683 people per square kilometre, compared with an English average of 413. This policy will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone). This is a major development constraint that should have been applied to the OAN before this consultation, and not left up in the air.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1.1 **I object** to policy I3 “Sustainable transport for new developments” on the grounds that;

1.2 This is another vaguely aspirational policy, based on wishful thinking and not grounded in the practical realities of daily life. It consists of a standard, box-ticking list of local government measures unrelated to the specifics of the plan. Like infrastructure, transport appears to be an afterthought; the policy fails in its essential job of guiding planning decisions, since it assumes development of any kind can be supported by sustainable transport.

1.3 The sustainability of the dormitory settlements which the Council want built across the countryside depends on a general “modal shift” from private car use to walking, cycling and public transport. This is unrealistic. The proposed sites are often miles away from the nearest railway station. Bus services even in the largest villages are almost non-existent – just one bus to and from Guildford each day in the Horsleys and none at weekends. Since bus services depend on profitability, they cannot be expanded and the Council are not proposing to subsidise new ones. Rural buses are too slow anyway for busy people. Most rural roads in the borough are narrow, winding, hilly, potholed, muddy and unlit. Many flood badly and have no footpaths.

1.4 The desired modal shift would require a comprehensive co-ordination of bus and train timetables with services every few minutes, seven days a week, to stops within walking distance of every home in the borough. This kind of integrated public transport system has been achieved in Switzerland, for instance, but only at huge public cost and thanks to a political consensus supporting state ownership of trains, buses and the post office, which delivers rural passengers as well as mail. There is absolutely no chance of this in the UK.

1.5 The vast majority of the borough’s residents are not, in practice, able to cycle. This includes children, the elderly, commuters who have to look smart, the infirm, the unfit and people carrying goods or shopping of any kind. Dependence
on walking and cycling discriminates against these groups, which include some of the most vulnerable members of the
community. It is socially unjust. One in two working people in Guildford commute for up to 3 hours a day, as I used to
do. They will not leave their cars for even part of their journey if it means longer travel times.

1.6 Park-and-rides are a welcome part of the transport mix but are too slow for commuters and others on a tight
schedule. Well-off pensioners seem to be the main beneficiaries. For an adult couple going shopping it is still cheaper to
park in town.

1.7 The Wey is too narrow and, with a river speed limit of 4mph, boats are too slow for anything but recreation. In
addition any vessel would have to negotiate a number of locks to travel any significant distance. Except on the tideway,
ot even the Thames has such services.

1.8 The addition of two new stations appears attractive but will slow down train journeys, which are already slower
than at any time since the 1930s. Knock-on effects on localities where the new stations are built have not been worked out
or presented.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1.1 I object to policy P1 “Surrey Hills Area of Outstanding National Beauty” on the grounds that;

1.2 This policy weakens existing protection when it should strengthen it. It is dependent on the Surrey Hills Management Plan. The latter welcomes housing development. Even major (undefined) development in the AONB would be permitted if exceptional (undefined) circumstances could be demonstrated.

1.3 The wording of the Policy is unduly loose, which in some places renders the policy ineffective, for example: “All proposals will be considered against whether they…” “All development proposals within and adjacent to the AONB will be expected to conserve or enhance its special qualities”

1.4 Terms such as “considered” and “expected” are not strong enough in prohibiting development proposals that do not conserve and enhance the AONB, and it is likely that developers will be able to use this loose wording to their advantage. Of particular concern is the paragraph 3, which begins: “Whilst the AONB designation does not preclude specific types of development in the Surrey Hills and proposals will be assessed on their individual merits…”

1.5 This whole opening clause is unnecessary and almost invites development proposals. I believe that it should be deleted, and the sentence should therefore begin: “There is a presumption against major development in the AONB in accordance with NPPF.”

1.6 In addition to the weakness of the language, I am also concerned that the AONB criteria listed in the policy are not the most important ones in determining whether a planning application should be approved. Aside from the one outlined in the first bullet point (which relates to the AONB setting) none of these criteria is concerned with the key characteristics of AONB, i.e. landscape character, scenic beauty, important views, tranquillity etc. Whether or not a development supports the rural economy or provides public access are of far less national importance than preserving the quality of the landscape itself.

1.7 I believe that the AONB Policy in the Draft Plan 2014 provided greater protection to the AONB, and would like to see the following sentences reinserted: “The national significance the AONB will be afforded the highest level of protection and only proposals which can be sensitively amalgamated into the area and which complement and enhance the character of the AONB will be considered” “Proposals within the AGLV which would have a negative impact upon views into and out of the AONB and which do not respect the setting, will not be acceptable” In accordance with the most up to date Minerals and Waste Plan, safeguarding of applicable land within the AONB and/or AGLV may be necessary and deemed appropriate

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14508  Respondent: 10846625 / Frank Drennan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1.1 I object to Policy P2 “green belt” on the grounds that;

1.2 This policy states, “the general extent of the Green Belt has been retained.” This is completely false.

1.3 The policy wording is weak in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. It is an inalienable public good. Once gone it is gone forever. It is not the Council’s to give away.

1.4 Policy P2 completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world.

1.5 Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

- Agricultural production
- Rural leisure and tourism amenities
- Water catchment
- Flood control
- Biodiversity
- Natural heritage
- A carbon sink for air pollution
- Room for public facilities such as parks and burial grounds
- Profitable film locations (e.g. Shere)
- Future economic potential such as mineral extraction (even fracking)
- Natural beauty, landmarks, open space, rural views and sight lines
- Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF)

1.6 As a matter of law and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations.

1.7 It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are
included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold.

1.8 I object to the “insetting” of 14 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages. I am deeply disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are “leggy” in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat.

1.9 This policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors.

1.10 To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need (especially post-Brexit) and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

1.11 Send is a good example of villages that should not be removed from the Green Belt. Send provides an important Green Belt buffer between Woking and Guildford. Yes, it is true that Send comprises old ribbon development but this should not mean it can be removed from the Green Belt so that Woking joins up to Guildford. The village and the countryside behind the A247 should all be protected.

- I object to three particularly vulnerable areas of high quality amenity land being taken out of the Green Belt around Send which include:
  - The land behind the schools including playing fields and woodland.
  - The land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision Engineering.
  - Land to the left of Cartbridge going up to the old depot on the Wey Navigation.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )
1.1 **I object** to policy P3 “Countryside” (i.e. beyond the Green Belt) on the grounds that;

1.2 I am not in favour of building on this area, since urban, brownfield areas are sufficient to meet all reasonable housing targets. There is no need to build on any green fields if brownfield, previously developed land is used efficiently (without garden-grabbing).

1.3 This policy refers to the countryside near Ash and Tongham (see paragraph 4.3.28). This area does not justify stronger policy protection than any other part of the borough. The fact that the current and previous Council Leaders represent it should not give it preferential status: “we will seek to limit any development in the countryside unless it can be demonstrated that it is necessary in that location”. Green Belt and AONB areas should by definition have higher levels of protection than non-Green Belt areas.

1.4 It should also be noted that Ash and Tongham lie beyond Guildford far away from London and therefore make no contribution to controlling Metropolitan urban sprawl, unlike those villages which, ironically, are to be “inset”. That is presumably why Ash and Tongham are not in the Green Belt already. This policy, however, attaches higher priority to preventing the “coalescence between the Ash and Tongham urban area and Aldershot” than it does to the primary purpose of the Metropolitan Green Belt, which is to stop London sprawl.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Comment ID: PSLPP16/14516  Respondent: 10846625 / Frank Drennan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 **I object** to policy P4 “Flood risk and water source protection zones” on the grounds that;

1.2 Urban development on existing hardstanding would not create additional flood risk, especially where there is scope for improved flood resistance measures to be included in the design. Sites such as Woodbridge Meadows Industrial Estate and the Arriva bus depot, on the River Wey bank, are potential high-value brownfield sites that would not be available for housing if this policy is implemented. It is not the footprint of existing buildings that should limit future development, but the extent of existing hardstanding. Tarmac and concrete do not act as functional floodplain, and some land with hard standing close to the river, within the town centre and within easy walking distance of the railway station, provides an excellent opportunity for real urban regeneration that could protect the surrounding countryside.

1.3 This policy should not be used as a convenient excuse not to build on the extensive area of brownfield sites between the station and Ladymead. Any new development in this area could easily be built on stilts with flood resistant ground floor parking in areas that are identified as high flood risk. This area has been built over successfully over the last 50 years. This must continue.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I request a confirmation by email from GBC that all of the objections made below are put to the Inspector appointed by the Secretary of State to review the GBC Regulation 19 draft local plan.

1.2 I request that once my objections are fully taken into consideration the draft plan is amended accordingly and re-issued.

1.3 Guildford is a constrained borough by the reality of having 89% of its area zoned as permanent Green Belt and an out of date road network that is already at capacity.

1.4 I object to GBC adoption of an inflated OAN of 13,860 homes as a housing target without any application of constraints as required under the National Planning Policy Framework and the National Planning Policy Guidance.

1.5 I object to the persistent confusion between housing demand and housing need which continues to distort the characterization of future housing development across the borough.

1.6 I object to the failure of Policy S1 to provide a meaningful definition of “sustainable development” or to set out any principles for applying sustainable development in practice to local planning decisions.

1.7 I object to GBC’s promise “to secure development that secures the economic, social and environmental conditions in the area” whilst omitting to recognise that economic growth, social justice and environmental protection often conflict.

1.8 I object to the failure of Policy S1 to say how each element of its sustainability promise is to be weighted or conflicts resolved. Under this policy, any development will qualify as sustainable, which makes a mockery of the NPPF’s most important guideline.

1.9 I object to GBC’s commitment to approve planning applications “wherever possible” and “without delay” reveals this draft plan’s pro-development bias. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

1.10 I object to the way in which Policy S1 policy also ignores the majority of the 12 Core Planning Principles set out in NPPF paragraph 17.3

1.11 I object to GBC’s failure to apply constraints to housing need. The application of constraints is a sensible and practical approach to development within the borough and is not only what GBC have done in the past in previous plans but is also what its neighbouring local planning authorities continue to do.
1.12  I object to the scale of the housing number proposed in this plan. The scale of GBC’s ambitions, which will be felt for decades into the future and irreversibly harm the local environment, demands that a high burden of proof on GBC to demonstrate that the plan is sound. A substantially lower number of 5,000 homes, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

1.13  I object to this local plan on the grounds that GBC has failed to grasp the opportunity of following clear government policy to develop in the urban area on previously developed sites. Many of these sites are in GBC’s ownership and it would seem a practical and readily achievable alternative, much more acceptable to local residents.

1.14  I object to this local plan on the grounds that the proposed local plan relies on outdated thinking and practices. Current trends in terms of property development such as the marked decline in town centre shopping centres and the need to create modal shift by developing residential uses close to transport hubs appear to have been overlooked.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1  I object to policy S2, on the grounds that;

1.2  GBC have adopted the OAN of 13,860 homes as the housing target without any application of constraints as required under the National Planning Policy Framework and the National Planning Policy Guidance. The scale of the housing number proposed, inevitably increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

1.3  Other local planning authorities appear to take a more balanced view in their approach to planning. The Woking Core Strategy 2012 applies a constraint of 50% from the 594 new homes and identified in their own SHMA that “it should be noted that local evidence (Strategic Housing Market Assessment - SHMA) highlights a need for an additional 499 new affordable homes every year in the Borough and a total of 594 new homes every year when taking into account demand. Given the level of environmental constraints present in the Borough, it is considered that the provision of an average of 292 dwellings per annum represents a reasonable level of housing growth for Woking and is deliverable.”

1.4  Historically GBC have correctly applied constraints on housing numbers to protect the Green Belt. The Surrey Structure Plan 1994 advocated a general slowing down in the rates of development “because of the environmental constraints which exist in the County, including Green Belt”. This slowing down was reflected in the requirement that Guildford Borough should accommodate a net increase of 3,800 dwellings between 1991 and 2006. This was a lower rate of development than in previous years. It is interesting to note that the Structure Plan at that time expected sufficient land to arise within the urban areas to accommodate this requirement.
1.5 In the current plan GBC have ignored the real potential of the urban area to provide for housing. At the same time GBC have adopted a radically different approach to the policy of the Council over the last 20/30 years and are now ignoring government policy in relation to the Green Belt.

1.6 A detailed and comprehensive professional review of the SHMA dated June 2016 by NMSS (an independent expert firm dealing with housing and demographics procured by Guildford Residents Association (GRA)) has concluded that the OAN figure should be revised down from 693 homes per annum to **510 homes per annum**.

1.7 The NMSS report includes detailed analysis and financial modelling and was prepared by Neil McDonald who we were lucky to find. He is a niche consultant with the right skills and a national reputation. An independent adviser and commentator on housing demographics. He works with local authorities and others on the estimation of housing need and related issues. He was a civil servant and policy adviser to Ministers for over 30 years, the last 10 advising on housing and planning issues within the Department of Communities and Local Government. His 7 years as a Director at DCLG included a posting as Director, Planning Policy and a period as Chief Executive of the National Housing and Planning Advice Unit.

1.8 NMSS found that the SHMA used in the Local Plan incorrectly adds extra homes to its basic demographic projection to allow for improving affordability of housing, increased student numbers and economic growth. The report found that none of these additions were justified based on the evidence presented within the SHMA. The report concluded amongst other matters that:

The affordability of housing in Guildford is no worse than in other Surrey districts and boosting supply beyond the demographic OAN would not result in a noticeable improvement in affordability but simply in more people moving to the area.

There are reasons for believing that the SHMA’s estimate of the number of homes needed for students may be too high and that an adequate provision for students is already included in the demographic OAN. The report advises that the Council should commission a separate student housing need figure for Guildford given the distorting effect of students on our overall OAN. It envisages that, once this exercise is undertaken, improved accuracy means the overall OAN would be likely to reduce still further.

The SHMA seeks to estimate the number of homes needed to support employment growth using employment rate assumptions that are inconsistent with the employment forecasts. This produces misleading results. An analysis of the Cambridge Econometrics and Oxford Economics forecasts using employment or economic activity rate assumptions consistent with the forecasts suggests that in neither case is there a need to provide more housing than suggested by the demographic analysis. Indeed, in both cases a smaller population growth (and hence fewer homes) could support the jobs growth that is forecast.

1.9 A further independent report was procured in 2016 by the Campaign for the Protection of Rural England CPRE from Richard Bate of Green Balance, an independent consultancy with expertise in demographic and housing matters to carry out a review of the GL Hearn SHMA.

The report by Green Balance runs to 37 pages and its findings are that the OAN for homes in Guildford should be reduced from 693 per annum to **481** because:

- the vacancy rate figures should be taken from local government annual records rather than from the 2011 Census. This would reduce vacancy rates to 2.9% in Guildford.
- there should be no increase for affordability above basic demographic change.
- there should be no increase for Student housing and it was considered unrealistic that the University should be allowed to exert such substantial pressure on the domestic housing market.
- the use of employment-led forecasts should be abandoned using purely household projections instead which are more reliable as a form of prediction.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to this local plan on the grounds that key parts of the evidence are missing, flawed or based on withheld assumptions.

1.2 I object to this local plan on the grounds that i) the Strategic Housing Market Assessment overstates need, ii) that the Green Belt and Countryside Study uses a flawed approach and iii) that the Transport evidence is too late and incomplete to be relied upon to inform the Plan.

1.3 I object to this local plan on the grounds that the Plan preparation process has had inadequate regard for national policy which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” to justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

1.4 I object to this local plan on the grounds that the Sustainability Appraisal has lost sight of and is not compliant with the concept of Sustainable Development as described in the National Planning Policy Framework.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: SQLP16/1674  Respondent: 10846625 / Frank Drennan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 The National Planning Policy Framework requires that objectively assessed needs should be met unless: “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or specific policies in this Framework indicate development should be restricted.” The specific policies described include several of particular relevance to Guildford including sites protected under the Birds and Habitats Directives, Sites of Special Scientific Interest, Green Belt, Local Green Space, Area of Outstanding Natural Beauty, designated heritage assets and locations at risk of flooding. Notwithstanding that the Sustainability Appraisal should be proportionate, strategic and look at significant matters, the assessment is deficient and biased in the range of alternatives it considers.

1.2 GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.

1.3 GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.
1.4 Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018. This is too for the current decision process and leaves a crucial gap in the decision support information. Any decisions made in the absence of this crucial information will be deficient and unsound.

**Attached documents:**

**Comment ID:** pslp171/1108  **Respondent:** 10846625 / Frank Drennan  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object to the change in Policy E1 of proposed designation of Burnt Common as an Industrial Strategic Employment Site.

- It was deleted from the 2014 draft because of all the local objections made previously and there is no logical reason to go back on this decision
- The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land as shown in the Employment Land Needs Assessment 2017
- There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have many empty sites and industrial units
- The 2017 Employment Land Need Assessment shows a reduction in demand to a low of 3.7 and a high of 4.1 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Burnt Common in the Green Belt
- There are patently no exceptional circumstances in terms of demand for employment space to build on this important area of Green Belt which effectively separates existing development in Send and Ripley and prevents urban sprawl
- The impact on small surrounding roads will create traffic gridlock
- It will join up existing villages and defeat the purpose of the Green Belt

I also object to the potential inclusion at Burnt Common of a waste management facility mentioned at the change to paragraph 4.4.23a which lacks sufficient detail for proper consultation and is completely inappropriate

I object to the fact that no reliable analysis has yet been made of data held by GBC in respect of different B classes in terms of planning applications granted or evidence gathered by the economic development function at GBC and no robust assessment of local market demand apart from fairly brief references to freely available market research undertaken by commercial estate agents such as Lambert Smith Hampton covering a much wider area.

The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

38,357sqm of B1c, B2 or B8 use class is quite sufficient supply for the plan period and does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

I object to changes in policy E4 Surrey Research Park which is still earmarked for excessive expansion which is not supported by the findings of the Employment Land Needs Assessment 2017.

I object to the extension to the Research Park of over 10 hectares will be delivered. This expansion is not effectively supported by evidence for an increase in B1b use class under the Employment Land Needs Assessment 2017.

I also object to the inclusion of B1c light industrial uses which is inappropriate and unnecessary.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the changes in Policy E7 Guildford Town Centre. There is insufficient evidential support to objectively assess the capacity of the existing town centre to accommodate appropriate new development and therefore fails the requirements of Section 161 of the NPPF to assess the real quantitative and qualitative floor space needs.

I object to the deletion of the Allies and Morrison Masterplan as a source document for the plan since although it failed to fully exploit the development potential of the Town Centre it did include many good ideas including more extensive brownfield development extending to 2551 homes including Woodbridge Meadows as a residential development site. The Town Centre policy needs to maximise the potential for residential development on brownfield and include as an absolute minimum the 2,551 units proposed in by Allies and Morrison for the town centre included in the masterplan 2015 which was originally adopted by GBC. The reality is that the Town Centre and other areas of brownfield in the borough has the capacity for at least 5,000/ 7,500 homes. The additional target capacity of 5,000 could easily be provided within the following urban sites which have the capacity for 7,500 homes:

- 2,500 homes detailed in Masterplan 2015 including Woodbridge Meadows which can itself be increased substantially
- 500 homes at North Street
- 1000 homes on current GBC car parks (25 acres) and at the station
- 1000 homes saved in the urban area if 100% of students are accommodated on Surrey University campus (17 ha of car parks)
- 1000 homes at Slyfield on the 40 ha regeneration site
- 1000 windfall infill (50 per annum)
- 500 homes on brownfield sites in villages on sites of max 1ha which do not impact Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
the needs of the greater number of lower income people attracted by the inevitable greater level of economic activity. GBC's approach is therefore not sustainable and will do nothing to meet the aspiration of its own policy.

With regards to the changes to this policy, I object to the change by way of deletion of the paragraph on density: “New residential development is required to make the most efficient use of land whilst responding to local character, context and distinctiveness. Residential densities will vary dependent upon the local area context and character and the sustainability of the location. Higher density development will be supported in Guildford town centre.” This suggests that GBC have no intention of building at a higher density within the existing urban area which is desperately needed and is in accordance with existing government policy. To have a plan with no density guidelines in the urban area is irresponsible and effectively very bad planning since it fails to exploit the development opportunities that urban areas can afford.

I support higher density development in the urban area close to transport hubs to facilitate modal shift e.g. 20 minutes’ walk of Guildford railway station. Much of Guildford town could usefully be regenerated with 7 storey blocks (there are currently blocks of this size already in the town) at 50 homes per ha with landscaping and underground parking, as often seen on the Continent and, recently, in London.

I object to the change in relation to student accommodation: “About 60 per cent of full time Guildford based University of Surrey eligible students population (full time equivalent) are expected to be provided with student bedspaces on campus.” The University should provide accommodation for 100% of new first year students and more than 60% of existing students. This would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and underused surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back. Surrey University has 17 ha of car parks that could provide all the student accommodation required on stilts with parking beneath.

I object to the change in relation to Gypsy, Traveller and Travelling Showpeople pitches and plots. Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Overprovision is inappropriate given other constraints.

I object in particular to the inclusion of 6 Travelling Showpeople pitches at Garlicks Arch where there is no proven need.

I object to the deletion of the paragraph 4.2.8 on density: “We have a responsibility to use our natural resources, such as land, wisely. Efficient use of land is essential. Housing density describes the number of homes developed within a particular site area. It is usually calculated by the number of dwellings per hectare (dph). Increasing densities can help to reduce the land needed for new homes and make development more sustainable. It can also support more facilities and services. Certain areas can accommodate higher densities provided there is no adverse impact on the character of the area and the infrastructure is able to cope. Planning applications will be assessed on a case-by-case basis having regard to the local context, character of the surrounding local area and the sustainability of the location. This will include consideration of established street patterns, plot sizes, spaces around buildings, and relationship with nearby buildings as well as form, massing, height of existing buildings and structures, and materials.”

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposed changes to the plan will not satisfy the goal of the policy i.e. to deliver a wide variety of high quality homes that provide all tenures, types and sizes of housing to meet the needs and demands of different people in our community.

With reference to section 5.22 of the West Surrey Strategic Housing Market Assessment: Guildford Addendum Report 2017, the statement that "it is reasonable to consider that 40% of housing could be delivered as affordable for the purposes of following the advice set out in the PPG as above" is a clear example of wishful thinking on the part of those writing the report and is not supported by any evidence. On the contrary, experience shows that 40% is a wildly optimistic assumption and it is reasonable to expect that the council will struggle to get developers to agree to anything in excess of 20% at best.

It is also noted that section 5.20 of the above referenced report highlights that "The updated assessment indicates that 517 households per annum require support in meeting their housing need. This is higher than assessed in the 2015 SHMA, reflecting higher new household formation shown in the updated demographic analysis together with evidence that lower quartile rental growth has exceeded growth in incomes, meaning a higher proportion of households fall into affordable housing need". GBC offers no credible solution to this problem and instead will only exacerbate the issue by building a large number of homes catering to the relatively wealthy, and thereby creating further need for affordable housing to meet the needs of the greater number of lower income people attracted by the inevitable greater level of economic activity. GBC's approach is therefore not sustainable and will do nothing to meet the aspiration of its own policy.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to ASP 3 new A3/A3100/B2215/A247 Burpham-Burnt common all-movements junction, formed by a new connector road linking between new A3/A3100 Burpham junction (SRN4) and the B2215 London Road, in combination with the new A3 northbound on-slip (SRN9) and the new A3 southbound off-slip (SRN10) under Infrastructure and Delivery.

If development gets the go ahead for the strategic site at Gosden Hill it would be logical to construct a 4-way A3 interchange at Burpham. It is not feasible to pass the problem down the line to Send which will already be bearing the brunt of traffic generated from a planned 4,000 homes. The A247 link road to Woking already at capacity will become gridlocked.

I object to SRN4 New A3/A3100 Burpham junction with relocated A3 southbound off-slip and new A3 southbound on-slip. This will place an unbearable problem onto the A247 whereby traffic will be passing directly through Send from the A3 and M25 and the proposed new development at Wisley.
I object to SRN9 A3 northbound on-slip at A247 Clandon Road (Burnt Common) and SRN10 A3 southbound off-slip at A247 Clandon Road (Burnt Common). This will place an unbearable problem onto the A247 which is already at capacity.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the changes to Policy P2 because they have not addressed many of the 32,000 objections made to the 2016 plan.

I object to the new para (1) “The Metropolitan Green Belt will continue to be protected as shown designated on the Policies Map, against inappropriate development. In accordance with national planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated.” The words “as shown designated on the Policies Map” should be deleted. The Policies Map has effectively ignored huge areas of Green Belt protection and the new para (1) is therefore a sham.

I object to the proposed change that Send Business Park should be inset from the Green Belt due to the fact that:

- It is effectively a non-conforming user in an area of beautiful countryside adjacent to the beautiful Wey Navigation
- It has restricted access along Tannery Lane
- It should not be given the opportunity for further expansion or development

Policy P2 still completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24 km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world.

Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital.

It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6% of the Crown jewels in order to build houses.
I object to the statement in the Draft Local Plan under Green Belt Policy P2 (4.3.13) which claims that Send and a further list of 13 villages are “now inset from the Green Belt”. This statement is false. GBC is proposing to “inset” these villages. No decision has been made by an Inspector, therefore the villages remain in the Green Belt.

I object to the changed “insetting” of 15 villages (including Ripley) from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages. Send is a good example of villages that should not be removed from the Green Belt. Send provides an important Green Belt buffer between Woking and Guildford. Yes, it is true that Send comprises old ribbon development but this should not mean it can be removed from the Green Belt so that Woking joins up to Guildford. The village and the countryside behind the A247 should all be protected.

I object to three particularly vulnerable areas of high quality amenity land being taken out of the Green Belt at Send which include:

- The land behind the schools including playing fields and woodland.
- The land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision Engineering.
- Land to the left of Cartbridge going up to the old depot on the Wey Navigation.

I object to the inclusion of Send Business Centre/Tannery Studios Tannery Lane, Send in relation to proposed inset from the Green Belt because:

- It is effectively an old non-conforming user in an area of outstanding countryside
- It is adjacent to the beautiful Wey Navigation
- There is highly restricted vehicular access along Tannery Lane in both directions
- Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the changes in policy P4 Flood risk and water source protection zones. Urban development on existing hardstanding does not create additional flood risk, especially where there is scope for improved flood resistance measures to be included in the design. Sites such as Woodbridge Meadows Industrial Estate and the Arriva bus depot, on the River Wey bank, are potential high-value brownfield sites that would not be available for housing if this policy is implemented.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/1095  Respondent: 10846625 / Frank Drennan  Agent:
A detailed and comprehensive professional review of the SHMA dated June 2017 by NMSS an independent expert firm dealing with housing and demographics procured by Guildford Residents Association (GRA) has concluded that the OAN figure should be revised down from 560 homes per annum to **400 homes per annum**. The 19 page report by NMSS, which can be found on the GRA website entitled “Review of GL Hearn’s Guildford Addendum to the West Surrey SHMA”, has found that the latest SHMA update by GL Hearn 2017 over estimates population growth for Guildford. The report shows that an indication of the scale of the problem can be obtained directly from the ONS’s own data. Their estimates of births, deaths and population flows into and out of Guildford suggest that the population should have grown by 15,000 between the 2001 and 2011 censuses. The censuses, however, record a population growth of only 7,800. The discrepancy is over 90% of the population change indicated by the censuses. The analysis in the NMSS report demonstrates that the errors must be in the population flows in age groups in which there are significant numbers of students. They are almost certainly the result of the under-recording of the numbers of students leaving Guildford each year. If the projections are based on under-estimates of the number of students leaving the district each year, they will assume that people will be living in the area who will in fact have left. This means that they will over-estimate the likely growth in Guildford’s population. The ONS’s projections envisage that the population will grow by 21,700 between 2015 and 2034. However, if the estimates of past migration flows are adjusted to make them consistent with the census figures, this could fall to 13,000. As a consequence, the demographically-based estimate of the number of homes needed would be 400 homes a year (2015-34), not 580.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** pslp17q/175  **Respondent:** 10846625 / Frank Drennan  **Agent:**

The evidence base is deeply flawed, especially the GL Hearn SHMA. Independent analysis by Neil McDonald of NMSS demonstrates that the SHMA conclusions significantly overestimate future housing need in the HMA, especially within the Guildford area.

The 19 page report by NMSS (a copy of which is attached) shows that an indication of the scale of the problem can be obtained directly from the ONS’s own data. Their estimates of births, deaths and population flows into and out of Guildford suggest that the population should have grown by 15,000 between the 2001 and 2011 censuses. The censuses, however, record a population growth of only 7,800. The discrepancy is over 90% of the population change indicated by the censuses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: Review of GL Hearn's Guildford Addendum to the West Surrey SHMA.pdf (1.2 MB)

The proposed changes to the plan are wholly unsound. As noted in my response to Question 1 the evidence base is at best flawed and at worst highly misleading, significantly overstating the OAN. The plan then compounds these foundational errors by failing to apply appropriate constraints taking due consideration of the need to protect the Green Belt. Further the plan fails to demonstrate any exceptional circumstances justifying the erosion of the Green Belt which would result from the plan's implementation. 70% of the sites put forward in the Local Plan are still in the Green Belt which flies in the face of current government planning policy. The National Planning Policy Framework (NPPF), National Planning Policy Guidance and case law make it clear that Green Belt is an absolute constraint on housing supply. Exceptional circumstances need to be shown to adjust boundaries. Other constraints under the NPPF include assessments of sustainability, strategic flood risk assessment, physical constraints on land use and infrastructure constraints (this can include road congestion, schools, drains, power supply and medical requirements). Constraints should be applied to the Objectively Assessed Housing Need (OAN). However this itself is overstated and should be reduced from 580 per annum to 400.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I do not consider the Proposed Submission Local Plan: strategy and sites (2017) as a whole has complied with the Duty to cooperate. GBC's approach to the local plan process is characterised by frequent late changes to key elements of the plan, many of this are of dubious value. These changes undermine its duty to cooperate by deliberately introducing elements into its already deeply flawed plan that serve only to confuse, distract and undermine the earlier efforts of those objecting to its plans.

A prime example of this is the inclusion of the Wisley airfield site (policy A35). Following a huge public outcry, Guildford Planning Committee had unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again. Policy A35 s, should be deleted from the plan for all the reasons the development was rejected by the Planning Committee.

GBC should revise its plan to take proper account of the many objections already made and cease adding new elements that only add further grounds for objection.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A39

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Objection to East Horsley local plan**

With reference to:

<table>
<thead>
<tr>
<th>A39</th>
<th>Land near Horsley railway station, Ockham Road North, East Horsley</th>
</tr>
</thead>
<tbody>
<tr>
<td>Houses proposed</td>
<td>C100 (c3)</td>
</tr>
<tr>
<td>Location</td>
<td>Village</td>
</tr>
<tr>
<td>Ward</td>
<td>Clandon and Horsley</td>
</tr>
</tbody>
</table>

I have a number of concerns in relation to the proposed removal of Horsley from the green belt and site A39

- **There is no safe access to this proposed site.** The access proposed raises major Health & Safety issues. Even at present the close proximity of the railway bridge means access from driveways to Ockham Road North at this
point is restrictive & dangerous in normal hours. At peak commuting and school hours this is even worse and becomes very dangerous and accidents have happened at this point.

- **Local flooding is a major concern at this site** The proposed site builds on land which is at the moment acts as a flood plain curbing the issue which already exists about local flooding which doesn’t just occur with heavy downpours but also with light rain showers.
- At this point **Ockham Road North becomes dangerous** as it floods beyond the curb height and as such pedestrians and cars are put in danger.
- Many houses on Ockham Road North experience significant domestic flooding and this site will make them even more susceptible. The flood issue also has a major impact on domestic drainage and means that toilets, sinks and bath water backs up and becomes a health & safety issue. **This site will substantially increase the susceptibility of the local housing and infrastructure to the risk of flooding.**
- **False criteria for proposing to take Horsley from green belt** There is a lack of understanding of the area in relation to the description and therefore false criteria on which the draft has been proposed eg: The East vs West Horsley point above, the designation of Station parade is completely misleading and bears no resemblance to a few village shops and a small franchised convenience store and an infrastructure which can ill cope with existing residential need.
- **Infrastructure:** No-where in the plan has infrastructure been address. It is already an intolerably long wait to access the local GP’s and dentists at a base level.
- **Lanes:** There is no mention of the already inadequate lane; as they cannot in most situations be designated as roads, & footpath structure which are already inadequate and poor in struct.
- **Local employment is minimal** and the majority of the resident population have to travel to and from the village using either an already inadequate road/lane system or public transport and no additional car parking is planned which again is already limited.

Overall the proposal to take Horsley from the green belt and this proposed site does not take into account major flooding and infrastructure issues and as a consequence is at best not viable and at worst dangerous at a number of levels.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPS16/440  **Respondent:** 10846945 / Sarah Jezard  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A40

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Please see below a summary of a number of concerns which I have in relation to the proposed removal of site A40 from the green belt:

Firstly as the access is shown on the proposed the site is actually in East Horsley and not West Horsley. There is no safe access to this proposed site. The access proposed raises major Health & Safety issues. Even at present the close proximity of the railway bridge means access from driveways to Ockham Road North at this point is restrictive & dangerous in normal hours. This is exacerbated at peak hours of school and going & coming back from work times at which it becomes very dangerous and accidents have happened at this point. The proposed site builds on land which is at the moment curbing the issue which already exists about local flooding which doesn’t just occur with heavy downpours but also with light rain showers – example pictures are available. At this point Ockham Road North becomes dangerous as it floods beyond the curb height and as such pedestrians and cars are put in danger.
The flood issue also has a major impact on domestic drainage and means that toilets, sinks and bath water backs up and becomes a health & safety issue. This site will substantially increase the susceptibility of the local housing and infrastructure to the risk of flooding.

There is a lack of understanding of the area in relation to the description and therefore false criteria on which the draft has been proposed: The East vs West Horsley point above, the designation of Station parade is completely misleading and bears no resemblance to a few village shops and a small franchised convenience store and an infrastructure which can ill cope with existing residential need.

No-where in the plan has infrastructure been addressed. It is already an intolerably long wait to access the local GP’s and dentists at a base level. Nor is there any mention of the already inadequate road & pavement structure.

Local employment is minimal and the majority of the resident population have to travel to and from the village using either an already inadequate road system or public transport and no additional car parking which again is already limited.

Overall this proposed site does not take into account major flooding and infrastructure issues and as a consequence is at best not viable and at worst dangerous at a number of levels.

1.1 **I object** to the new Guildford Borough Council Transport Strategy 2017.

1.2 **I object** to ASP 3 new A3/A3100/B2215/A247 Burpham-Burnt common all-movements junction, formed by a new connector road linking between new A3/A3100 Burpham junction (SRN4) and the B2215 London Road, in combination with the new A3 northbound on-slip (SRN9) and the new A3 southbound off-slip (SRN10) under Infrastructure and Delivery.

1.3 If development gets the go ahead for the strategic site at Gosden Hill it would be logical to construct a 4 way A3 interchange at Burpham. It is not feasible to pass the problem down the line to Send which will already be bearing the brunt of traffic generated from a planned 4,000 homes. The A247 link road to Woking already at capacity will become gridlocked.

1.4 **I object** to SRN4 New A3/A3100 Burpham junction with relocated A3 southbound off-slip and new A3 southbound on-slip. This will place an unbearable problem onto the A247 whereby traffic will be passing directly through Send from the A3 and M25 and the proposed new development at Wisley.

1.5 **I object** to SRN9 A3 northbound on-slip at A247 Clandon Road (Burnt Common) and SRN10 A3 southbound off-slip at A247 Clandon Road (Burnt Common). This will place an unbearable problem onto the A247 which is already at capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the continued poor quality of the evidence base and lack of sound property market research that relates to the local market in Guildford rather than the continued reliance on generic economic capacity forecasts. As a result many of the submission documents providing key evidence are unsound, unreliable and inconsistent.

2. Key parts of the evidence base are flawed or based on withheld assumptions.

3. The latest SHMA 2017 still inflates the proposed housing figure due to the following factors:

4. An independent review by NMSS of the latest ONS population estimates and projections has found compelling evidence that there are substantial errors in past estimates of student migration flows. It is probable that migration flows out of Guildford, both to other parts of the UK and abroad, have been under-estimated by sizeable amounts.

5. Owing to the way in which migration estimates are used to construct population and household projections, the errors in past migration estimates are likely to mean that the latest demographically-based housing need estimates by GL Hearn overstate the number of homes needed by over 25%.

6. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

7. 38,357sqm of B1c, B2 or B8 use class is a quite sufficient supply for the plan period and does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

8. The ELNA states “that a large proportion of the net additional floorspace and land requirements for both office/ R&D and industrial/storage uses could be met through the permissions which have been consented but which have yet to be implemented. However, there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

9. “There is the possibility that some pipeline developments may not come forward” is patently a weak argument indeed for the proposed industrial development at Burnt Common in the Green Belt and expansion of the Surrey Research Park into the Green Belt which has unused consents dating back many years and also the substantial latent potential for an increased density of development. The current plot ratio is less than 25%. The reason that the unused consents have not been used up is simple. There is a proven lack of demand.

10. Exceptional circumstances clearly do not exist to justify amendments to Green Belt boundaries as part of the Local Plan process. It is quite achievable for realistically prepared and identified development needs to be accommodated in Guildford’s urban areas and villages.

11. The Carter Jonas Guildford Retail Study Update 2017 lacks credibility and there is no proven case for expanding comparison retail space which is undermined by failure to implement existing retail consents at the North Street development over the last 10 years. The Guildford Retail Study does not take account of changing retail patterns in relation
to the threat of the internet and the “clicks and mortar” conflict. The study also assumes a number of logged retail requirements from companies already in liquidation or with national requirements that exclude Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4032  Respondent: 10847521 / Andrew Procter  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.

1.2 There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.3 Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,

1.4 The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity

1.5 The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

1.6 The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.

1.7 I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).

1.8 The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

1.9 A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1.1 I object to the changed policy A26 Blackwell Farm for 1500 homes which is still far too much.

1.2 There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.3 Blackwell Farm is located entirely within the green belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Blackwell Farm performs all five functions of Green Belt, and fulfills purposes 1, 3 and 5 very strongly.

1.4 The site is dependent on a new access road from the A31 (Hog’s Back) to the Hospital roundabout at Egerton Road, with a new signalised junction on the A31 at Down Place (just east of the A3 slip road). An independent traffic study commissioned by the Parish Council has shown that this new junction would result in more queuing on the Hog’s Back and on the A3 during the morning peak-hour, and as a result the villages of Puttenham, Compton and Artington will see a surge in traffic numbers as Guildford-bound drivers seek out the fastest route and divert along the B3000, B3100 or Down Lane.

1.5 Levels of nitrous oxide that are consistently well above the EU legal limit have been recorded at the A3 end of the B3000 over the last 2 years (GBC Air Quality Annual Status Report, September 2016. Compton Parish Council is expecting that this section of the B3000 will be made an Air Quality Management Area soon. Any traffic intervention that increases traffic levels through Compton (such as the proposed access road to Blackwell Farm), will make this situation worse and potentially have an impact on the health of residents.

1.6 The development will result in the loss of nationally important countryside - The new access road would cut through the Surrey Hills Area of Outstanding Natural Beauty (AONB), uprooting centuries old trees and scarring the north face of the Hog’s Back. It would also pass through an Area of Great Landscape Value and through, or next to, a belt of ancient woodland. The housing development itself and the proposed extension the research park, would harm the setting to the Surrey Hills AONB (the views into and out of the Hog’s Back ridge). The development site includes high-grade farmland and forms 20% of Compton’s green belt.

1.7 The development will produce more congestion at the Hospital/Tesco roundabout - This will impede access to the Hospital's A&E unit - a problem was identified by the Planning Inspector who presided over the previous Local Plan and who put a cap on traffic increases in the area of 5%. That cap has been exceeded (despite the University’s claim that construction traffic and buses don’t count). Guildford’s underlying traffic modelling is flawed and simply tweaking the Hospital roundabout and/or providing a new rail halt at Park Barn will not mitigate against the traffic generated by 1,800 homes, two schools, and an extended business park.

1.8 The new road proposed would be inadequate for the volume of traffic, and once the development has been built out it wouldn’t be long before new roads were required to serve the new population, which would inevitably pass through Wood Street Village (adding to the congestion in Worplesdon and potentially ruining Wood Street Village Green) and/or through Flexford/Wanborough, potentially ruining the conservation area of Wanborough, with its 13th century church and 14th century barns.

1.9 The development will result in more flooding. The Hog’s Back acts as a soak away for surface rainwater. Once its slopes are concreted over, this water will travel north, adding to existing flooding in Wood Street Village, Fairlands and Whitmore Common (a European protected habitat)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1.1 I object to the changed Policy A35 Wisley in respect of the identified mitigation to address the impacts on Ripley High Street and surrounding rural roads comprises two new slip roads at A247 Clandon Road (Burnt Common) and associated traffic management. This will not in any way mitigate the impact on Ripley High Street since traffic will need to pass through Ripley to reach Wisley.

1.2 My previous objections therefore still stand for this changed policy concerning the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.

1.3 There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.4 This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.

1.5 Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

1. Green Belt location and absence of “exceptional circumstances”.
2. Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
3. Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
5. Absence of adequate traffic data.
6. Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
7. Loss of high-quality agricultural land (55% of the site), in breach of national policy.

8. Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.

10. Cost of infrastructure required to the detriment of alternative more favourable sites.

11. Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.

13. Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.

15. Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.

16. Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).

17. Failure to evaluate the cumulative impact of this and nearby development sites on the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4035  Respondent: 10847521 / Andrew Procter  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A36

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

22.1 I object to the changes to Policies A36 to A41 (East and West Horsley)

22.2 The number of potential development sites has been reduced by two (A36 and A41, representing a total of 138 dwellings). This leaves four sites (A27-40) which still represent a total of 395 new dwellings.

22.3 Marginal changes such as these would still leave 70% of all new development in the borough built on Green Belt sites. No “exceptional circumstances” or any other justification is advanced for this strange imbalance.

22.4 The deletion of two Horsley sites fails to correct the issue of relative overdevelopment in East and West Horsley, which is both excessive in absolute terms and disproportionate in relation to the rest of the borough.

22.5 No attempt is made to assess the cumulative impact on the Horsleys – either of the four sites now proposed, or of Site A35 (Three Farms Meadow, alias “Wisley Airfield”), with over 2,000 new homes only 2 miles away. This piecemeal
approach leaves the future of the Horsleys at the mercy of ad hoc planning applications, which is the opposite of what a Local Plan should intend.

22.6 The new plan Policies put greater emphasis on the need for adequate facilities and infrastructure to underpin development. But this is not reflected in any new wording on the Horsley sites, thus leaving most local objections unaddressed. Again, this defect curtails the plan’s usefulness as a practical planning tool at a site level and undermines its credibility among residents.

22.7 The plan fails to mention most of the known sustainability issues and infrastructure constraints affecting the Horsley sites, including public transport, traffic, road safety, parking, schooling, medical facilities, sewage, flooding/surface drainage and shops. These were fully set out in responses to last year’s public consultation.

22.8 The density of new housing on the four Horsley sites too is inappropriate, being greater than anywhere in the locality at present.

22.9 Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries. The plan presents no arguments for this which, contrary to NPPF paragraph 79, will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

22.10 Collectively, the four Horsley sites breach NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been an outstanding success story in the Horsleys, as detailed in response to the last consultation. Assets include a dense public footpath network, parish parks, sports fields, a campsite of international standard, Britain’s newest rural opera theatre and the popular Olympic cycle route. These examples of positive planning depend on a Local Plan that protects the Green Belt, maintains its openness and beauty and avoids urbanisation and traffic congestion. Sites A35-41 are hostile to this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4036   Respondent: 10847521 / Andrew Procter   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to the changed policy A42 Clockbarn Nursery to 60 homes.

1.2 It ignores all the hundreds of previous objections made by local people

1.3 The increase to 60 homes in place of 45 homes is 33% more and too much.

1.4 It will worsen access and traffic problems in Tannery Lane and at the A247 junction.

1.5 It will make erosion of Green Belt in our village worse

1.6 It will make surface water flooding, which is already bad, even worse

1.7 It will impact open countryside views from the River Wey Navigation
1.8 The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area.

1.9 The site has very restricted access along Tannery Lane which is narrow and for most of its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical.

1.10 Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic.

1.11 Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

1.12 The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4037  Respondent: 10847521 / Andrew Procter  Agent:  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches

1.2 It ignores all the thousands of previous objections made by local people

1.3 There is no proven demand for travelling show people plots in this location

1.4 There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.5 The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

1.6 This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

1.7 The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

1.8 Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport.
Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

1.9 The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

1.10 I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

1.11 I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

1.12 I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

1.13 I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

1.14 I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

1.15 Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

1.16 Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

1.17 With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

1.18 The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

1.19 I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
1.20 Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents in the locality will see their quality of life significantly deteriorate in many ways.

1.21 Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

1.22 Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

1.23 I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

1.24 I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

1.25 I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

1.26 It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1.1 **I object** to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site.

1.2 This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.

1.3 The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

1.4 There is in fact no justification for building anymore industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

1.5 There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

1.6 The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

1.7 The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

1.8 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

1.9 The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

1.10 The impact on small surrounding roads will create traffic gridlock.

1.11 It will join up existing villages and defeat the purpose of the Green Belt.

1.12 The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

1.13 The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

1.14 The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

1.15 **I object** to the potential impact of para 4.4.23a on Burnt Common with its over allocation of industrial zoning is subterfuge for a waste management facility which is a dishonest and underhand approach to planning and proper consultation.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1  I object to the change by way of deletion of paragraph 4.5.8: “We will expect development to respond to local character and history, reflecting the identity of its context whilst allowing for innovative and forward thinking design….

1.2  There is no reasoned justification for this deletion and its omission will not make places better.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp171/2137  Respondent: 10847521 / Andrew Procter  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1  I object to the change in Policy E1 sustainable employment because they have not addressed many of the 32,000 objections made to the 2016 plan.

1.2  I object to the inclusion of Send Business Centre/Tannery Studios Tannery Lane, Send in relation to proposed inset from the Green Belt because:

   • There is highly restricted vehicular access along Tannery Lane in both directions
   • It is effectively an old non-conforming user in an area of outstanding countryside
   • It is adjacent to the beautiful Wey Navigation
   • Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate.

1.3  I object to the change in Policy E1 of proposed designation of Burnt Common as an Industrial Strategic Employment Site.
• The impact on small surrounding roads will create traffic gridlock.

• The 2017 Employment Land Need Assessment shows a reduction in demand to a low of 3.7 and a high of 4.1 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Burnt Common in the Green Belt.

• The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land as shown in the Employment Land Needs Assessment 2017.

• It was deleted from the 2014 draft because of all the local objections made previously and there is no logical reason to go back on this decision.

• There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have many empty sites and industrial units.

• There are patently no exceptional circumstances in terms of demand for employment space to build on this important area of Green Belt which effectively separates existing development in Send and Ripley and prevents urban sprawl.

• It will join up existing villages and defeat the purpose of the Green Belt.

1.4 I also object to the potential inclusion at Burnt Common of a waste management facility mentioned at the change to paragraph 4.423a which lacks sufficient detail for proper consultation and is completely inappropriate.

1.5 I object to the ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 which generally is superficial and lacks sufficient detail and analysis between B1a, B1b, B1c, B2 and B8 use classes and that no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of office, research and development, light industrial, general industrial and warehousing and distribution floor space.

1.6 I object to the fact that no reliable analysis has yet been made of data held by GBC in respect of different B classes in terms of planning applications granted or evidence gathered by the economic development function at GBC and no robust assessment of local market demand apart from fairly brief references to freely available market research undertaken by commercial estate agents such as Lambert Smith Hampton covering a much wider area.

1.7 GBC in their role as a Planning Authority appear to fail to appreciate the fundamental rationale of the Use Classes Order as a planning tool in terms of procurement of useful property market research analysis or forward planning.

1.8 What we are left with is a fairly clumsy and poorly informed plan which clusters B classes without any appreciation of widely different employment impact and economic sustainability. E.g. B1 generates at least 5 times as much employment as B8.

1.9 The lack of appreciation by GBC as to the opportunity for widely different uses being generated within B class clusters defeats the whole point of proper planning of employment uses and can significantly endanger previously good planning put forward in the previous 2003 plan. E.g. the creation of a research and development park linked to the University but now has the threat of being downgraded into a general business park (see below).

1.10 Little regard has been given in the plan to the economic reality of falling demand for B2 industrial space which is clustered with other B classes almost randomly throughout the plan.

1.11 The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions granted or evidence gathered by the economic development function at GBC and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

1.12 38,357sqm of B1c, B2 or B8 use class is quite sufficient supply for the plan period and does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
1.13 Little regard is still not given to the opportunity of specific B1 space as an opportunity for research and development which needs to be nurtured and preserved without the detrimental and confused clustering with other B classes both in terms of planning and promotion of a research hub.

1.14 I support the concept of seeking increased investment in our local knowledge-based, high technology economy. This will provide well paid, creative jobs and generate the funding necessary to pay for the infrastructure and environment this sort of industry requires.

1.15 We need to distinguish between wanting to increase the added value of the economy and physical expansion, especially given the scarcity of land in Guildford. Guildford is not the place for large space hungry businesses. So I should target high added value small and medium sized enterprises rather than the headquarters of larger corporations.

1.16 We need to promote the idea of new knowledge transfer in incubator units and small premises for new start up enterprises. They need to be on the wave of innovative new technology as opposed to older established businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/2138  Respondent: 10847521 / Andrew Procter  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to the change in policy E2 under paragraph 4.4.23a in relation to development involving waste management facilities to be directed to the Industrial Strategic Employment Sites.

- This fails to provide sufficient public consultation in relation to access and traffic flows
- This fails to provide sufficient public consultation in relation to unpleasant aspects of waste management

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/2139  Respondent: 10847521 / Andrew Procter  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1.1 I object to the changes in relation to Policy E3 maintaining employment capacity which do not take account of my previous objections to this policy.

1.2 I object to the ill-informed policy of resisting change of use from B1a to residential because it flies in the face of positive property market solutions for the regeneration of brownfield land. It is also contrary to current government policy which has recently been reaffirmed and permits a change of use from B1a (offices) to C3 (residential).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/2140  Respondent: 10847521 / Andrew Procter  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to changes in policy E4 Surrey Research Park which is still earmarked for excessive expansion which is not supported by the findings of the Employment Land Needs Assessment 2017.

1.2 I support the maintenance of research, development and design activities, in any science, including social science, that is complementary to the activities of the University of Surrey at the Surrey Research Park. I object however to the completely unnecessary expansion of the Research Park into a larger Business Park.

1.3 I object to the extension to the Research Park of over 10 hectares will be delivered. This I understand will provide a total capacity of around 35,000 sq m of additional floorspace, of which 30,000 sq m is expected to be delivered in the plan period. This expansion is not effectively supported by evidence for an increase in B1b use class under the Employment Land Needs Assessment 2017.

1.4 I also believe that B1b (should be the primary use class for the Research Park and that applications for B1a should be resisted due to the danger of dilution of the core purpose and reputation of the park. I also object to the inclusion of B1c light industrial uses which is inappropriate and unnecessary.

1.5 Research parks based on the early UK technology transfer exemplars of the Cambridge and Oxford need careful monitoring, nurturing and protection to ensure the integrity and quality of the park is maintained and the park continues to be a destination for innovation and enterprise.

1.6 There is a danger for research parks to be overwhelmed by short sighted development opportunities being taken by park managers provided by standard office activities and administrative functions which in time turn them into standard business parks which can be found anywhere in the country. Their relative low density and attractiveness make them targets for “any other” office user.

1.7 Research parks that lose their way stop being the location of choice for new innovative enterprises.

1.8 The Surrey Research Park in Guildford needs to be focussed on a broad spectrum of scientific research including computer science, bio-chemistry, design, space-science, eco-science, health science, software development, laser technology, media-science, artificial intelligence, robotics and super-manufacturing.

1.9 Monitoring indicators should include new start-ups and new patents created.
1.10 Facilities should be provided whereby new small businesses can secure premises under subsidised licence fee arrangements with no onerous rent or lease commitments.

1.11 The Surrey Research Park currently extends to 65,000 sq m.

1.12 The research park is developed at a plot ratio of 25%. This could be increased to 50% within the same footprint of the existing park without damage to its amenity. The actual current land use for development in the park is in fact only 12.5% because most buildings are 2-storey.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** pslp171/2141 **Respondent:** 10847521 / Andrew Procter **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy E7

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

1.1 **I object** to the changes in Policy E7 Guildford Town Centre.

1.2 I am of the opinion that policy E7 is **still very ill-informed** and there is insufficient evidential support to objectively assess the capacity of the existing town centre to accommodate appropriate new development and therefore fails the requirements of Section 161 of the NPPF to assess the real quantitative and qualitative floor space needs.

1.3 Policy E7 **is still an aspirational voice from the past** and is unlikely to benefit the health of the town centre in the future. There is no reliable evidence provided that the retail core of the Town Centre needs or can be expanded by 41,000 sq m of retail space at North Street because of lack of demand for retail units in the Town Centre particularly large units. This is due to falling demand for retail space in Guildford and town centres throughout the country evidenced by independent research and the reality of empty shops in many high streets (including Guildford) and the accelerating competition from internet shopping.

1.4 The recent Carter Jonas Study Retail Study 2017 update predicts total demand for Guildford Town Centre by 2020 at only 3,313 sq m and only 34,811 sq m by 2036. We have now been waiting some 15 years + for demand to catch up to enable development of North Street where the old consent for some 40,000 sq m of retail had to be renewed because it was getting out of date. Are we now going to have to wait till **2036 only another 19 years** for demand to get to the point to enable development of this much prized site which developers have not exactly been falling over themselves to develop. That is also assuming that all retail demand in the Town Centre is wanting just this site.

1.5 However optimistically and quite illogically they protest that “there still remains significant capacity to support new comparison goods floorspace over the plan period”. It’s a bit like saying in town x we have currently 100,000 m of shopping and the UK retail forecast done by Experian shows that we can predict a growth of 10% therefore this means we must have an additional 10,000 sq m in town x. This is unscientific guess work.

1.6 In table 2 Appendix 6 of their report we learn that there is a potential for turnover to reach £856.3m in the town centre by 2020 however actual committed floorspace take up accounts for only £1.3m of this. This is 0.15%. It is hardly surprising that there are no details of take up or real demand evidence given anywhere in the report.
1.7 The Carter Jonas report is based on broad brush retail capacity forecasting derived from work by Experian which is very far from site or location specific and as a retail supply and demand assessment in my view is totally unreliable. The source is not even Guildford specific or even Surrey specific. The authors of the report do not disagree with my cynicism with capacity forecasting since they state up front that “It should be noted at the outset that capacity forecasts carried out over a long period of time are inherently less certain and should be treated with caution” and repeated again “at the outset we advise that all capacity forecasts beyond a five year period should be treated with caution. This is because long term trends in the economy, consumer demand and retail property market could have a significant impact on the potential capacity and need for new retail floorspace. For example, as discussed previously, a higher growth in non-store retail sales (i.e. Internet sales) than forecast by Experian would reduce the capacity for new retail floorspace over time.”

1.8 The Carter Jonas report is a vague whitewash report for a pre-conceived and outdated concept of increased retail development in the town centre. “For comparison goods, we have assumed the same estimations for convenience goods expenditure ‘inflow’ (10%) for Guildford Town Centre, again based on the centre’s role as a popular shopping and visitor destination.” Coming to the vague conclusion that Guildford is popular is far from reliable property market research!

1.9 The closest thing I can find to evidence of actual demand in this report is to read “In addition to focusing their attention on larger, dominant centres, many of the multiples and traditional high street retailers are changing their store formats and locational requirements. For example, key anchor retailers such as Boots, Next, Mothercare, TK Maxx, John Lewis and Marks & Spencer are actively seeking larger format units to showcase their full product range and to provide an exciting shopper environment backed by the latest (digital) technology.” But I then I realise this statement applies to any of 100 centres in the UK. I am concerned as to whether the authors of this retail study have actually visited Guildford or know where it is?

1.10 In their 2014/2015 reports Carter Jonas provided a fairly inaccurate picture of retail demand (originally Appendix 6) with the inclusion of retailers who had either gone bust or actually specified demand requirements in centres other than Guildford. This I note has now been deleted presumably because of its inaccuracies which were dealt with in my 2016 objection and has not been updated. We are now left with no demand assessment from either small, medium sized or large retailers. This does not support the view that Guildford is a vibrant retail destination requiring expansion with a large retail development in North Street.

1.11 The reality is that the town centre has enough retail floor space. If more is introduced it will result in the closure of existing shops particularly in locations which are less than 50% of peak Zone A or 100% positions. What Guildford needs is a new focus on speciality high quality comparison shopping supported by a revival of Guildford’s attractive heritage core and a new major visitor attraction supported by restaurants. Guildford needs to become the quality shopping destination for Surrey.

1.12 The existing site in North Street should be replaced with a well-designed ground floor high quality speciality retail mall and frontage of no more than 40 shops extending to 10,000 sq m with the rear and upper floors providing an additional 600 homes. The proportion of the above proposed smaller scheme at North Street will be complementary to and not antagonistic to the Upper High Street, Tunsgate, the Debenhams site and the 100% Zone A positions of the Lower High Street. If the existing policy under E7 is adopted the North Street site will remain empty for another 10 years.

1.13 I also object to the continued failure of this policy to provide much needed substantial residential development in the Town Centre which is still only a modest target of 1,300 homes. Only approximately 10% of the total planned for the Borough. There is still a blind over concentration on retail expansion which fails to take account of market forces and a complete failure to grasp the reality that a residential expansion is required to stimulate retail/leisure demand in the Town Centre which is markedly losing out to nearby centres such as Woking which has a very different approach. See the Town Centre Opportunity in next section.

1.14 I object to the deletion of the vision statement “Guildford town centre has a unique setting and historical character, and is at the centre of one of the most prosperous counties in England. We will protect and build on these assets and insist that all new development will be of the highest design and environmental standards. We will be proactive in building a great town centre which connects to the amenity of the riverside. We will invest in creating high quality public realm. We will put people above traffic and we will promote new high quality retail and business development. To achieve this we will develop innovative funding and delivery bodies. As we embark together towards this exciting future we pledge that we will continue and extend an active dialogue with our residents and other stakeholders.” Guildford Town Centre needs a decent vision. Without a vision the Town Centre is flying blind and it demonstrates the failure of the potential for imaginative Town development in this latest draft plan.
1.15 I support the deletion of paragraph 4.4.86 since many of the sites along the River Wey are capable of full development.

1.16 I object to the deletion of the Allies and Morrison Masterplan as a source document for the plan since although it failed to fully exploit the development potential of the Town Centre it did include many good ideas including more extensive brownfield development extending to 2551 homes including Woodbridge Meadows as a residential development site.

1.17 I do not consider that the modest target of 1,300 homes in the town centre takes account of the need and demand for housing or the opportunities that brownfield sites present for increasing the residential development in the core of the town which will in itself help to sustain the retail core by increased economic impact. What the town centre needs in terms of urban regeneration is much more residential development. As can be seen from the previous section, retail will not work!

1.18 The Town Centre policy needs to maximise the potential for residential development on brownfield and include as an absolute minimum the 2,551 units proposed in by Allies and Morrison for the town centre included in the masterplan 2015 which was originally adopted by GBC. The reality is that the Town Centre and other areas of brownfield in the borough has the capacity for at least 5,000/ 7,500 homes.

1.19 The additional target capacity of 5,000 could easily be provided within the following urban sites which have the capacity for 7,500 homes:

- 2,500 homes detailed in Masterplan 2015 including Woodbridge Meadows which can itself be increased substantially
- 500 homes at North Street
- 1000 homes on current GBC car parks (25 acres) and at the station
- 1000 homes saved in the urban area if 100% of students are accommodated on Surrey University campus (17 ha of car parks)
- 1000 homes at Slyfield on the 40 ha regeneration site
- 1000 windfall infill (50 per annum)
- 500 homes on brownfield sites in villages on sites of max 1ha which do not impact Green Belt

1.20 Yes, we need a new Local Plan for our borough in order to provide a development strategy within which we can accommodate our local housing, economic and environmental needs. But first we must make 100% use of our urban brownfield in the town before we consider building in the Green Belt or countryside.

1.21 Paragraph 80 of the NPPF clearly states that Green Belt serves a key purpose, “to assist in urban regeneration, by encouraging the recycling of derelict land and other urban land”. In order to comply with central planning policy we need a brownfield strategy that states clearly. “We are committed to a brownfield first initiative whereby all applications on previously developed land are given fast track priority and every facility to promote development for residential purposes and employment purposes in order to satisfy the needs of local people. In parallel a zero CIL incentive should be given for all residential development on brownfield land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1.1 **I object** to all changes in policy H1 Homes for all because they have not addressed many of the 32,000 objections made to the 2016 plan.

1.2 **I object** to the change by way of deletion of the paragraph on density: “New residential development is required to make the most efficient use of land whilst responding to local character, context and distinctiveness. Residential densities will vary dependent upon the local area context and character and the sustainability of the location. Higher density development will be supported in Guildford town centre.”

1.3 This indicates that GBC have no intention of building at a higher density within the existing urban area which is desperately needed and is in accordance with existing government policy. To have a plan with no density guidelines in the urban area is irresponsible and effectively very bad planning since it fails to exploit the development opportunities that urban areas can afford.

1.4 **I support** higher density development in the urban area close to transport hubs to facilitate modal shift e.g. 20 minutes’ walk of Guildford railway station. Much of Guildford town could usefully be regenerated with 7 storey blocks (there are currently blocks of this size already in the town) at 50 homes per ha with landscaping and underground parking, as often seen on the Continent and, recently, in London.

1.5 **I object** to the change in relation to student accommodation: “About 60 per cent of full time Guildford based on the University of Surrey eligible students population (full time equivalent) are expected to be provided with student bedspaces on campus.”

1.6 The University should provide accommodation for 100% of new first year students and more than 60% of existing students. This would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and underused surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back. Surrey University has 17 ha of car parks that could provide all the student accommodation required on stilts with parking beneath.

1.7 **I object** to the change in relation to Gypsy, Traveller and Travelling Showpeople pitches and plots. Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Overprovision is inappropriate given other constraints.

1.8 **I object** in particular to the inclusion of 6 Travelling Showpeople pitches at Garlicks Arch where there is no proven need.

1.9 **I object** to the deletion of the paragraph 4.2.8 on density: “We have a responsibility to use our natural resources, such as land, wisely. Efficient use of land is essential. Housing density describes the number of homes developed within a particular site area. It is usually calculated by the number of dwellings per hectare (dph). Increasing densities can help to reduce the land needed for new homes and make development more sustainable. It can also support more facilities and services. Certain areas can accommodate higher densities provided there is no adverse impact on the character of the area and the infrastructure is able to cope. Planning applications will be assessed on a case-by-case basis having regard to the local context, character of the surrounding local area and the sustainability of the location. This will include consideration of established street patterns, plot sizes, spaces around buildings, and relationship with nearby buildings as well as form, massing, height of existing buildings and structures, and materials.”

1.10 To have a plan with no clear density guidelines is irresponsible and effectively very bad planning since it fails to exploit the development opportunities that urban areas can afford.

### Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

<table>
<thead>
<tr>
<th>1.1 I object to the changes in policy H2 Affordable homes which still do not go far enough to address affordable or social housing need.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.2 “Affordable” homes, under national definitions, means homes that are sold or rented at 80% of market value. Even if 70% of these are rented as proposed, the level of market prices in the South-East means (even post-Brexit) that these homes will remain well beyond most people’s means and that starter homes will not become available for local people.</td>
</tr>
<tr>
<td>1.3 In addition, “the viability clause” means that in practice the policy could be unenforceable. Private financial viability has no place in a public policy and should be removed. It is a get-out-of-jail-free card for developers that will sacrifice countryside for no local benefit.</td>
</tr>
<tr>
<td>1.4 This policy’s version of “affordability” is just a smokescreen for pushing through more development generally. Building more homes in Guildford cannot increase real affordability given the overhang of the London market.</td>
</tr>
<tr>
<td>1.5 GBC has failed demonstrably to provide any significant social housing. Over the last 2 years a tiny 65 units have been built. GBC may have demonstrated a pre-determined agenda to build large numbers of high priced executive boxes for Londoners in the Green Belt but key workers such as nurses and teachers have been ignored. Opportunities for local not for profit social housing schemes, borrowing from the public sector at low interest rates and using existing GBC land holdings are extensive. But the political persuasion and intent of GBC does not seem to really want to accommodate local people in need. This is a great pity.</td>

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to the changes to Policy P2 because they have not addressed many of the 32,000 objections made to the 2016 plan.

1.2 I object to the new para (1) “The Metropolitan Green Belt will continue to be protected as shown designated on the Policies Map, against inappropriate development. In accordance with national planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated.” The words “as shown designated on the Policies Map” should be deleted. The Policies Map has effectively ignored huge areas of Green Belt protection and the new para (1) is therefore a sham.

1.3 I object to the proposed change that Send Business Park should be inset from the Green Belt due to the fact that:

1.4 It is effectively a non-conforming user in an area of beautiful countryside adjacent to the beautiful Wey Navigation

1.5 It has restricted access along Tannery Lane

1.6 It should not be given the opportunity for further expansion or development

1.7 Policy P2 still completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world.

1.8 Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital.

1.9 It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6% of the Crown jewels in order to build houses.
1.10 **I object** to the statement in the Draft Local Plan under Green Belt Policy P2 (4.3.13) which claims that Send and a further list of 13 villages are “now inset from the Green Belt”.

1.11 This statement is untrue as GBC is **proposing** to “inset” these village. No decision has been made by an Inspector, therefore the villages remain in the Green Belt!

1.12 **I object** to the changed “insetting” of 15 villages (including Ripley) from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages.

1.13 I am deeply disturbed that settlement boundaries are to be hugely extended in many villages (particularly at Send) and that infilling is also proposed outside the settlement boundaries of 11 further villages. This is completely unplanned and unmeasured development outside of the OAN.

1.14 Many Guildford villages are “leggy” in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat.

1.15 Send is a good example of villages that **should not be removed** from the Green Belt. Send provides an important Green Belt buffer between Woking and Guildford. Yes, it is true that Send comprises old ribbon development but this should not mean it can be removed from the Green Belt so that Woking joins up to Guildford. The village and the countryside behind the A247 should all be protected.

1.16 **I object** to three particularly vulnerable areas of high quality amenity land being taken out of the Green Belt at Send which include:

1.17 The land behind the schools including playing fields and woodland.

1.18 The land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision Engineering.

1.19 Land to the left of Cartbridge going up to the old depot on the Wey Navigation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1.1 I support the change to paragraph 4.1.4 “Local Planning Authorities are encouraged to include a policy within their Local Plan that embraces the presumption in favour of sustainable development. Policy S1 meets this requirement and adopts the model wording suggested. When implementing Policy S1, local circumstances will be taken into account to respond to different opportunities for achieving sustainable development. In accordance with the NPPF, the presumption will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

1.2 I am of the opinion in terms of clear policy that GBC have made a definitive statement to support the Green Belt. I am however disappointed that they have failed to put this policy into sharp practice in forming this plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/2129  Respondent: 10847521 / Andrew Proctor  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to the Guildford Borough Council (GBC) Regulation 19 draft plan 2017 because it is not sound and the changes do not take account of my previous objections or indeed the 32,000 other valid objections that are shown on the GBC website and made to the previous 2016 version.

1.2 I have focused, as requested, on changes to which I find reason to object but this also includes some deletions which lack acceptable justification.

1.3 I request a confirmation by email from GBC that all of the objections to changes made below are put to the Inspector appointed by the Secretary of State to review the GBC Regulation 19 local plan 2017 and that all my previous objections to the 2016 draft plan will be placed before the inspector.

1.4 I formally request the opportunity to give evidence in person at the Public Inquiry currently planned for 2018 in relation to my objections in 2016 and 2017.

1.5 I request again that once my objections are fully taken into consideration the draft plan is amended accordingly and re-issued before it is submitted to the Inspector.

1.6 I am of the opinion that if it is submitted in its current form it will be in risk of being summarily dismissed and put back to the Council for resubmission.

1.7 Guildford is a constrained borough by the reality of having 89% of its area zoned as permanent Green Belt and an out of date road network that is already at capacity. I am concerned that GBC have adopted a lower but still grossly inflated OAN of 12,426 homes as a housing target without any application of constraints as required under the National Planning Policy Framework and the National Planning Policy Guidance.

1.8 70% of the new development proposed in this plan is in the permanent Green Belt which was coincidentally invented in Guildford under a private Act of Parliament in 1938. It is perhaps ironic that the process of Town and Country planning has become a type of Town v. Country debate.
1.9 The population in the borough is split equally between town and country but Guildford town has developed very little over the last 20 years and has not undergone the type of normal urban expansion, redevelopment of previously developed sites and increase in residential densities as nearby towns such as Woking have experienced. It is informative that Woking is currently outperforming Guildford in terms of economic performance.

1.10 It is interesting to note that urban densities in Guildford town are no higher than the villages that surround it. Even though the latter are in the main in the Green Belt which is protected from development and the former is in an area where there is no presumption against development. I am of the opinion we need a rebalancing between town and country and much more development in Guildford town, particularly residential development.

1.11 In the latest plan only 1,300 homes are going to be built in Guildford town which is some 10% of the total development proposed. It is very disappo"nting that GBC fail to set higher densities for the urban area and have in this latest draft deleted all reference to “density for development” which is normally an integral part of forward planning and development control.

1.12 GBC still fail to acknowledge that the application of constraints to housing need in respect of the Green Belt is a sensible and practical approach to development within the borough and is not only what they have done in the past in previous plans but is also what its neighbouring local planning authorities have done.

1.13 The current scale of the housing number proposed in this plan, which is based on a flawed SHMA, inevitably increases the onus for the plan to be seen to be sound. A substantially lower number of 4,000 homes, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

1.14 I am concerned that GBC have still failed to grasp the opportunity of following clear government policy to develop in the urban area on previously developed sites. Many of these sites are in their ownership and it would seem a practical and readily achievable alternative which is much more acceptable to local residents.

1.15 In my opinion much of the updated local plan still appears out of date. It is like a voice from the past. Current trends in terms of property development such as the marked decline in town centre shopping centres and the need to create modal shift by developing residential uses close to transport hubs appear to have been overlooked.

1.16 Unsupported assertions that there is real demand for the expansion of retail, industrial or office space lack credibility especially in the absence of significant planned expansion of residential development in the town centre which is universally acknowledged as a key stimulant for urban economic health.

1.17 There would appear to be two worrying examples where GBC are taking the role of “developer/landowner” rather than “independent not for profit public sector planner” in so far that they have a pre-determined agenda for building on the Green Belt rather than acting as careful, professional and responsible planner guardians. Example 1: Policy A43 Garlicks Arch Burnt Common. The stated, albeit unproven, need by GBC is 400 homes. Normal residential density is 30 homes per ha. Land required would therefore be 13 ha. Land actually proposed to be allocated is **28.9 ha**. This is more than double land required in beautiful irreplaceable Green Belt. Example 2: Burnt Common Policy A 53. The stated, albeit unproven need, is 7,000 sq m B1c, B2 and B8 development. Normal density 50% plot ratio. Land required 1.4 ha. Land allocated **9.26 ha**. This is more than six and half times more land than necessary in valuable Green Belt which the planners should be looking after.

1.18 I regret that my conclusion is that this plan is a clear example of bad planning.

6.1 I object to the amended policy S2 the Borough Wide Strategy and the commitment to build **12,426 homes** based on the Strategic Housing Market Assessment (SHMA) 2017 prepared by GL Hearn because it has not addressed many of the 32,000 objections made to the 2016 plan.

6.2 The OAN “objectively assessed need” figure of 12,426 is far too high

6.3 I am very surprised and concerned that GBC have adopted the OAN of 12,426 homes as the housing target without any application of constraints as required under the National Planning Policy Framework and the National Planning Policy Guidance. The scale of the housing number proposed, inevitably increases the onus for it to be seen to be
sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole. 1.4 Other local planning authorities appear to take a more balanced view in their approach to planning. The Woking Core Strategy 2012 applies a constraint of 50%.

6.5 Historically GBC have correctly applied constraints on housing numbers to protect the Green Belt. The Surrey Structure Plan 1994 advocated a general slowing down in the rates of development “because of the environmental constraints which exist in the County, including Green Belt”. This slowing down was reflected in the requirement that Guildford Borough should accommodate a net increase of 3,800 dwellings between 1991 and 2006. This was a lower rate of development than in previous years. It is interesting to note that the Structure Plan at that time expected sufficient land to arise within the urban areas to accommodate this requirement.

6.6 However it would appear that today GBC have effectively ignored the real potential of the urban area to provide for housing. At the same time GBC have adopted a radically different approach to the policy of the Council over the last 20/30 years and are now ignoring government policy in relation to the Green Belt.

6.7 A detailed and comprehensive professional review of the SHMA dated June 2017 by NMSS an independent expert firm dealing with housing and demographics procured by Guildford Residents Association (GRA) has concluded that the OAN figure should be revised down from 560 homes per annum to 400 homes per annum.

6.8 The 19 page report by NMSS which can be found on the GRA website entitled “Review of GL Hearn’s Guildford Addendum to the West Surrey SHMA”. It was a real community effort. It was paid for by over separate 20 Guildford Residents Associations and Local Parish Councils none of whom were convinced that the SHMA report procured and presented by GBC was accurate or transparent or accessible in a meaningful way. So they clubbed together and collected contributions from many hundreds of Guildford residents to try to find out the truth of the housing need figure presented in the Local Plan.

6.9 The NMSS report includes detailed analysis and financial modelling and was prepared by Neil McDonald who we were lucky to find. He is a niche consultant with the right skills and a national reputation. An independent adviser and commentator on housing demographics. He works with local authorities and others on the estimation of housing need and related issues. He was a civil servant and policy adviser to Ministers for over 30 years, the last 10 advising on housing and planning issues within the Department of Communities and Local Government. His 7 years as a Director at DCLG included a posting as Director, Planning Policy and a period as Chief Executive of the National Housing and Planning Advice Unit.

6.10 The NMSS recent study has found that the latest SHMA update by GL Hearn 2017 over estimates population growth for Guildford.

6.11 The report shows that an indication of the scale of the problem can be obtained directly from the ONS’s own data. Their estimates of births, deaths and population flows into and out of Guildford suggest that the population should have grown by 15,000 between the 2001 and 2011 censuses. The censuses, however, record a population growth of only 7,800. The discrepancy is over 90% of the population change indicated by the censuses.

6.12 The analysis in the NMSS report demonstrates that the errors must be in the population flows in age groups in which there are significant numbers of students. They are almost certainly the result of the under-recording of the numbers of students leaving Guildford each year.

6.13 If the projections are based on under-estimates of the number of students leaving the district each year, they will assume that people will be living in the area who will in fact have left. This means that they will over-estimate the likely growth in Guildford’s population. The ONS’s projections envisage that the population will grow by 21,700 between 2015 and 2034. However, if the estimates of past migration flows are adjusted to make them consistent with the census figures, this could fall to 13,000. As a consequence, the demographically-based estimate of the number of homes needed would be 400 homes a year (2015-34), not 580.

6.14 70% of the sites put forward in the Local Plan are still in the Green Belt which flies in the face of current government planning policy. The National Planning Policy Framework (NPPF), National Planning Policy Guidance and case law make it clear that Green Belt is an absolute constraint on housing supply. Exceptional circumstances need to be shown to adjust boundaries.
6.15 Other constraints under the NPPF include assessments of sustainability, strategic flood risk assessment, physical constraints on land use and infrastructure constraints (this can include road congestion, schools, drains, power supply and medical requirements).

6.16 Constraints should be applied to the Objectively Assessed Housing Need (OAN). However this itself is overstated and should be reduced from 580 per annum to 400.

6.17 I object to the fact that GBC have not used the guidance available to reduce the number of houses they propose.

6.18 GBC has not taken into account the possibility of lowering the required number of houses by adhering to the restraints offered in various papers. Government guidelines, even before the publication of the Paper, quoted below say that if a Council cannot supply sufficient houses without impinging on the Green Belt, then they do not have to build so many houses.

6.19 GBC have gone against the NPPF as they are not adhering to the ruling that Local Plans must plan positively to seek opportunities that meet objectively assessed development needs and be flexible enough to adapt to rapid change unless any adverse impact of doing so would significantly outweigh the benefits or specific policies in the NPPF which suggest that development should be restricted.

6.20 House of Commons Briefing Paper; Planning for Housing no 03741, 14 June 2017. Guidance on taking account of constraints. “Need alone, is not the only factor to be considered when drawing up a Local Plan”. This includes “land designated as Green Belt” and “SSSIs”.

6.21 “The framework makes clear that once established Green Belt boundaries should only be altered in exceptional circumstances” and “should take into account any constraints such as Green Belt, which indicate that development should be restricted and which may restrain the ability of an authority to meet its need.” (P d055 ref ID.3-045-20141006)

6.22 In view of the comments above it would appear logical to apply CONSTRAINTS in line with government policy to a corrected OAN. of approximately 50% to account for the fact that 89% of the borough is in the permanent Green Belt and development is not supported by adequate major infrastructure. This reduction is in line with the constraints percentage of 50% applied by Woking Borough Council.

6.23 This would result in a more acceptable and practically achievable HOUSING TARGET of 200 homes per annum which over a 20-year period would be 4,000 homes.

6.24 All of these homes could be built in the existing urban brownfield areas of the borough and would in part satisfy the 32,000 objections made by residents to the 2016 draft plan and also relieve the additional problems of inadequate infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)
1.1 Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and surface water flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach.

1.2 The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. GBC have failed to apply any reduction which makes the plan undeliverable and unsound. I believe it would be harmful to the character, quality of life and economy of Guildford not to reduce the housing figure to a number significantly below 12,426 new homes by 2034. I submit it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to develop on the scale currently proposed. I am concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site.

1.3 In view of the extent of physical and policy constraints, the inflated SHMA figure, and the transport evidence indicating that the Plan would lead to congestion, the OAN figure should be 400 homes per annum and the housing target after the application of constraints should be in the range of 200 homes per annum and kept under regular review.

1.4 The extent to which the Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way costs doubt over whether sustainability has been assessed. The report treats various major development sites in Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”, fails to consider options that constrain development or that make greater use of brownfield or previously released greenfield land, focuses on a range of options that involve developing on even more Green Belt around Guildford in order to protect Green Belt around Woking does not consider environmental limits or impact on the next generation in terms of weighing demand for homes for the young alongside the use of all possible last resort greenfield options by one generation.

1.5 Policy in relation to sustainable development has been changed in a way that runs counter to GBC’s previous predetermined agenda for building on the Green Belt.

1.6 Under newly amended para 4.1.4 It is stated that "Local Planning Authorities are encouraged to include a policy within their Local Plan that embraces the presumption in favour of sustainable development. Policy S1 meets this requirement and adopts the model wording suggested. When implementing Policy S1, local circumstances will be taken into account to respond to different opportunities for achieving sustainable development. In accordance with the NPPF, the PRESUMPTION WILL NOT AUTOMATICALLY APPLY to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding. The National Planning Policy Framework requires that objectively assessed needs should be met unless: “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or specific policies in this Framework indicate development should be restricted.”

1.7 Under this amended policy it is clear that the OAN should be constrained.

1.8 The specific amended policy described above is of particular relevance to Guildford including sites protected under the Birds and Habitats Directives, Sites of Special Scientific Interest, Green Belt, Local Green Space, Area of Outstanding Natural Beauty, designated heritage assets and locations at risk of flooding. In this situation, is it appropriate for the Appraisal to rule out not meeting needs in full from a sustainability perspective?

1.9 Notwithstanding that the Sustainability Appraisal should be proportionate, strategic and look at significant matters, the assessment appears deficient and biased in the spectrum of alternatives it considers to the point that it is questionable whether it meets the requirements. 1.10 The plan fails to produce a coherent development strategy for Guildford Town. GBC has deleted its independently commissioned Town Centre Master Plan by the well renowned firm of architects and master planners Allies and Morrison as a source document from the plan even though this master plan was previously well publicised and enthusiastically adopted by the Council.
1.11 Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2020. This is too late!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3428  Respondent: 10847585 / Sean Meharg  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A47

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land to East of The Paddocks, Flexford

I object to the above two sites because, apart from being green belt land that should continue to be protected, they are entirely unsuited for development, for the following reasons:

1. Both are subject to flooding, which would be obvious to anyone who has visited the sites, particularly after heavy rain. I regularly walk along FP361 (through Site A46) and FP375 (through Site A47). Any measures adopted to prevent flooding of the proposed new developments would simply cause the flooding risk to be moved to other locations, including my property.
2. The infrastructure of the area cannot cope with the current situation, never mind with the extra pressures from an additional 1100+ homes and a school, as witnessed by anyone who is familiar with the village:
3. Regular power outages.
4. Flooding from existing sewers at times of high rainfall.
5. Subsidence of existing roads, including the collapse of manholes.
6. Narrow roads, with hazardous 90 degree bends (on Westwood Lane leading to Wanborough and at the Glaziers Lane/Flexford Road junction) that are already the scene of several accidents.
7. Inadequate lighting on existing roads. These developments would result in even more dangerous conditions for both drivers and pedestrians.

8. Restrictions at the existing railway crossings:

9. Single lane traffic only at the Westwood Lane underbridge, with a height restriction stopping large vehicles from using that route.

10. Settlement behind abutments at Glaziers Lane overbridge (probably as a result of large vehicles being unable to use the Westwood Lane underbridge), with hazardous, blind approaches set at an angle to the road alignment.

11. Traffic congestion at the top of Wanborough Hill and junctions with the A31 sliproads resulting in long delays, whether leaving or approaching the area.

12. Traffic congestion tailing back along the A323 Guildford Road, sometimes from as far away as the level crossing at Ash railway station. This can be particularly severe, in the event of an accident on the A31.

13. Specifically applicable to Site A46, where there is currently no need for a school within the Normandy area. The adjacent schools, at Ash Manor School in Ash and Kings College in Park Barn are both currently under-subscribed and, should the situation change at some point in the future, have expansion capacity within their existing sites.

14. Ecologically, I do not feel the need to reiterate how these developments would affect the local environment, as other residents, with more detailed knowledge than I, will be able to put forward a much better case, other than to say that I specifically moved to Normandy because of its rural surroundings and access to green field walks.

Finally, it would appear that little or no research was carried out to establish whether these sites were really appropriate for development. I would therefore urge you to look again at their suitability and reject these proposals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Having studied the changes made to the Local Plan that effect my village (Normandy), I would like to make the following comments:

1. I am pleased that both Sites A46 and A47 have now been removed from the local plan and that you have taken heed of my objections, on the grounds of poor infrastructure, flood risk to existing properties etc. etc.
2. However, I am still concerned that it is proposed that Site A49 (Land to the Rear of Palm House Nurseries), which is behind my property, is to be removed from the Green Belt. In September 2014, I wrote giving my objections and they still remain. This is an extract from my email of 21st Sep 2014: “Site 91 – Land rear of Palm Nurseries, Normandy: The current planning conditions state this should be reinstated to its previous Greenfield condition and this should be enforced. If it is not, it will set a precedence to develop any other plots without following normal planning procedures. The lane leading to the plot is totally unsuitable for any kind of development.” If planning officers let this go through, it means that Green Belt status is meaningless, allowing anyone who takes possession of a Green Belt site to develop it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
A43 Land at Garlick Arch, Send, Send Marsh/Burnt Common and Ripley

This proposed development of 400 homes and an industrial estate is too large for the area. Admittedly part of the site is a Brown Field site already developed for commercial uses. However the local infrastructure will be unable to cope with the large amount of traffic generated (possibly 1000 vehicles). The suggested new slip road onto the A3 northbound would help to stop vehicles going through Ripley Village. However take a look at the A3 northbound on a Monday morning during the peak time (during term time) and you will see that the traffic is stationary back to Burnt Common, therefore people will still go through Ripley Village to queue jump and that will cause a traffic jam there.

The Greenbelt was created to protect rural communities and to stop urban sprawl. The villages in Guildford Borough need this protection and therefore any plans to erode the Green Belt must be abandoned.

The proposals outlined in the Local Plan do not state how the Borough intends to address the education, health, pollution, and public transport problems that the increase in the population in the area will cause.

To sum it up we feel the number of houses proposed throughout the entire borough is far too large. The erosion of the Green Belt should not be allowed. The increase of vehicles on the roads will increase the pollution in the area adding to health problems.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPP16/8005  **Respondent:** 10847713 / Gillian Cox  **Agent:**

The local roads in the Guildford Area are already at capacity, especially the A3 and need major work on them to keep the traffic flowing. This should be the Council's priority before any new developments are envisaged. Any new developments in the Ripley, Burpham, Send and Wisley areas will result in the A3 becoming totally clogged (even with the suggested new slip roads at Burnt Common and Railway Station at Merrow) and vehicles being unable to move in peak times which will have a knock-on effect for local businesses and freight companies losing money because of delays. The frustrated drivers will then decide to avoid the A3 and take to the declassified roads which are not designed for high levels of traffic. Remember for every house built there will be on average 2 cars.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
School

The case to build a secondary school at this location is not proven in fact the opposite is true. My understanding is, Ash Manor and King's College in Surrey are undersubscribed. It will be the proposed housing that is driving the need not the other way round.

Does an unneeded school in this area provide enough "exceptional circumstance" to remove our land from the metropolitan green belt? It should be built elsewhere in the borough where the need already exists.

Traffic

The railway bridge immediately outside my property is already a dangerous nightmare with the oncoming traffic blind spot. With this new proposed development where even a small estimate will generate 1500 cars let alone extra traffic drawn here for the proposed school and shops.

The bridge is only single vehicle access and will cause traffic at either side of the road to get through.

The junction at the A323 at Westwood Lane and Glaziers Lane is already difficult to turn right and the additional proposed traffic makes it unsustainable.

Glaziers Lane is an unclassified road (D60) and Westwood Lane and Wanborough Hill are only C16 classified road, therefore the roads are not up to handling the additional expected traffic.

Rural environment

This proposal will increase Normandy population by 100% ripping apart the 'ruralness' of our village and changing its character and makeup.

I hope you take note of the wishes of the majority of the village and reconsider these proposals. Please do not underestimate the power of the people in Normandy and mistake it as an easy and soft target to just build a 'new town' here.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to object to the proposal in the Local Plan to build a significant development at Blackwell Farm on the Hogs Back.

Despite the proposed additions to infrastructure, I feel this would simply be adding to the existing problem of too many people needing to travel into Guildford or along the A3 from that area. The road system cannot cope with the current level of traffic, let alone with an additional 4,000 homes, some of which will no doubt have 2 cars rather than one.

We have seen from previous developments that many people won’t use public transport even if more buses or trains are available – they prefer the convenience and greater reliability of driving. They are even less likely to walk or cycle – as anyone who has been passing a primary school at about 3.30pm will tell you.

The beautiful view of the Hogs Back from the A31 is one of the most attractive routes into Guildford and appreciated by visitors and regular commuters alike. Sadly this will be lost if there is a massive new development of housing, offices, a school and various other buildings. This does not fit well with our policy of protecting Guildford’s character as a Surrey Hills market town surrounded by countryside and of promoting tourism.

Such a scale of building on countryside will also inevitably have a detrimental impact on wildlife. Once destroyed the natural environment cannot be recovered.

The loss of the fields and paths of Blackwell Farm will also reduce the green space available for dog walkers, ramblers and other people enjoying the outdoors. The government are constantly promoting exercise and interaction with nature as being good for our health, but to support that we need to maintain access to suitable places to walk rather than build on them.

There were so many objections to this proposal at the initial stage and I am disappointed to see that it remains in the Local Plan despite widespread concerns.

I would also like to object to the plan to build 100 homes next to the cathedral on Alresford Road. This is currently an important wildlife corridor with a wide stretch of established hedge and open land, packed with birds and other native wildlife. If this becomes pavement, flats and parking as proposed, wildlife will inevitably be affected.

Alresford Road and Ridgemount also form a well-used safe walking route from the university and Onslow Village into town, which avoids the busy main road with all its traffic fumes. We want to encourage people to walk into town where possible rather than drive, and changing this route into another busy road by adding 100 additional homes will deter people from doing this. Currently it is quiet enough and safe enough for people to walk in the road, avoiding the narrow pot-holed pavement, but this will not be possible with a huge increase in traffic.

Having the cathedral positioned in the middle of a housing estate is also not great for tourism. It is attractively set amongst green fields at the moment, making it a popular venue for all sorts of activities.

I appreciate that the council is under pressure from the government to squeeze a huge number of extra homes into the borough, and the Planning team have my sympathy with their difficult task, but we residents are relying on you to protect our town from over-development and to prevent the loss of important areas of green space. If we continue to build more and more, Guildford will expand further and further until it loses its character and becomes a sprawling metropolis.

I hope you will reconsider the plans.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I am writing to you to strongly voice my objections to the huge and completely inappropriate development proposed in Ripley and send (Garlicks arch and burnt common) and Send hill.

As a resident of Send village I would like my objection to be seen by the planning inspector.

I am completely shocked and appalled that it appears Guildford borough council are underhandedly trying to push this through and attempting to remove Send village from the green belt altogether.

I was of the impression that the Government attaches great importance to Green Belts and that it had stayed a commitment for green belt protection. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their PERMANENCE! Send provides a buffer between Guildford and Woking. Removing Send from the green belt simply cannot happen, the green belt was put in place when our government had the foresight that one day we might need to be forced to protect our green open spaces from our future selves and they were right to do it.

It’s where we relax. It’s where we watch wildlife. It’s where we take part in our hobbies. It’s where we eat and drink. It’s essential for our local wildlife and the health and well being of the local residents. We must protect it. It is a slippery slope if we start to bend the rules here and there just because there are housing targets to meet. We should all think of the future of these areas for our children and our grandchildren and for generations to come.
I object to the fact that Guildford borough council have not followed the correct process of another full consultation for these proposed developments, under regulations 18 this is required. These regulations are in place for a reason. Why is it that guildford borough council do not feel they have to follow correct procedure? The trust of the local community has been shaken by their blatant attempt to cheat the system to achieve their goals with no consideration for the effect this would have on the beauty and quaintness of our country village.

I also object on the basis that Guildford borough council also seem to have fabricated their evidence in an attempt to justify these plans. The evidence they have provided is inaccurate and therefore cannot be used to justify these plans. I urge you to read the 2015 ELNA assessment which shows an 80% reduction meaning the industrial space at burnt common is not needed anymore.

**Guildford borough council should be using brownfield sites to help tackle the housing crisis. They should not be re-classifying green belt to skirt around the rules and regulations.**

I object to the planned development at Send hill and Winds ridge and also the traveler site that has been proposed. This was NOT included in regulation 18 draft and has NOT been consulted on previously. This is a quaint peaceful area that will be ruined and destroyed by either of these things. Send Hill is an important part of our local countryside, with open grass areas with wild flowers and bee orchids essential to the survival of local insects, especially bees which are at serious risk if we don't make a commitment to saving these areas.

A traveler site is not appropriate for this area. I work in Epsom and regularly see areas where travellers live and settle and they are completely destroyed. Not to mention the increased risk of crime that ultimately comes with having travellers living in the area. I speak from personal experience. Even if you discount all these reasons, this is inappropriate simply due to the narrow width single track country road.

I objects to Send being removed from the green belt.

I object to policy A 43. 30 land at garlicks arch, burnt common proposed housing as there is no need for any more houses on top of the 13,860 already proposed for the borough. This site is new and was not included in the regulation 18 draft and has NOT been consulted on previously. This is green belt protected by the NPPF. There is no reason to justify this whatsoever.

If there is a shortage of living space in this area I would suggest Guildford Borough Council allow planning permission to existing residents to extent their dwelling where necessary and possible. They are renowned for objecting to planning application for even basic extension work. Yet they now feel it's appropriate to destroy our countryside and village with these proposals.

My husband and I had a planning application refused and one of the main points quoted for this refusal was that "it would have a harmful impact on the host property and character of the local area. As such, the proposal would be contrary to policies H9, G5 of the Guildford Borough Local Plan 2003 (as saved by CLG Direction 24 September 2007) and Supplementary Planning Guidance 2003: Residential Extensions." How can Guildford borough council possibly justify these huge proposed developments and changes that threaten to destroy the identity of our villages, zone vast areas of green belt land for development and cause huge problems with our local roads.

Please do not let this happen to our beautiful countryside, local wildlife and quaint English villages.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

11. I object to the proposed Infrastructure Schedule

The Infrastructure Schedule sets out the key infrastructure requirements for the Plan. There is no schedule for Garlick’s Arch so the Plan takes no account of the infrastructure required for this site.

Furthermore the development at Garlick’s Arch would result in the loss of four successful existing rural businesses, which have been for there many years employing local people and are therefore clearly sustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

6. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley

Garlick’s Arch is within the Green Belt. There are no exceptional circumstances which allow for its removal. Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land. Why have GBC removed a brownfield site at Burnt Common and replaced it with Garlick’s Arch?

Garlick’s Arch is not appropriate because:

- There is no transport infrastructure.
- There are no plans to improve local schools, medical or utilities to cope with the increased needs these new homes
- The site is liable to flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

5. I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

Ramps to the A3 at Burnt Common would be a disaster for the local population, who do need to access the A3 to the north, but the addition of ramps will draw in a huge amount of ‘through’ traffic. e.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as these roads cannot be improved. The queues during the rush hours are such that it already brings gridlock to the local area. Encouraging more traffic to use these roads would be untenable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

11. I object to the lack of proper infrastructure planning for sites

The Plan does not identify adequate infrastructure improvements to support the scale of development, especially at Garlick’s Arch which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors, hospitals etc. are already at capacity. It is already extremely difficult to get a GP appointment in the local surgeries without a long wait.

Are there plans to improve the capability of the emergency services, police, ambulance, fire brigade to cover the extra houses in the north east of the borough?

I wish my objections to be taken into consideration and that the Plan is amended.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
3. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure

There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plans for improvements. You cannot squeeze modern traffic down lanes that were built for a horse and cart.

The rural roads in this area are narrow, in poor condition and have no pedestrian footpaths. The new homes will generate dangerous and unsustainable traffic. The historic village of Ripley was given a by-pass to save it for future generations not make its roads into a car park.

Every time there is a problem on the A3/M25 traffic already congests the area to dangerous levels. With the increasing cycle traffic on the Olympic cycle route to the Surrey Hills using the same narrow lanes, this is a recipe for a human disaster.

13. I object due to the congestion that development will cause to the trunk roads, A3/M25

The A3 and M25 would need to be improved before any development can be considered. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no enhancements are possible in the timeframe of this Plan so the developments at Wisley Airfield, Garlick’s Arch and Gosden Hill should not take place.

Answer (if comment is on questions 1-7 of the questionnaire): ()
9. I object to poor air/noise quality concerns

The developments being proposed, particularly in the north east of the borough, will lead to increased congestion and to
greater levels of air/noise pollution, which will have a detrimental effect on local residents and their health and wellbeing.

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. I object to not protecting the Green Belt

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield and Garlick’s Arch and the subsequent urban sprawl. The whole beauty and character of the area are the individual villages. There are no exceptional circumstances for these villages being removed, as required by the National Planning Policy.

There is a suitable brownfield site at Burnt Common that should be developed rather than developing Garlick’s Arch.

Answer (if comment is on questions 1-7 of the questionnaire): ()

4. I object to development in areas which are at risk of flooding

The Plan does not take adequate account of flood risk as required by National Planning Policy.

The site at Garlick’s Arch is classified by the Environment Agency as being in a greater risk than the Council’s own assessment. I have witnessed flooding many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016).

My objections are as follows:

1. **I object to the Local Plan as the proposed developments are not sustainable**

   The proposed 13,850+ new homes in this tiny area are not sustainable – it will damage local communities by over development, especially Ripley, Send and Clandon. There is no public transport to speak of, only the occasional bus service which has already been cut back. Wisley Airfield and Garlick’s Arch have no railway stations, so almost every adult will have to drive their own car. It is already difficult to cross main roads as a pedestrian; more traffic will make it impossible and extremely dangerous.

   The development should be in more urban areas where there is sustainable transport.

   **What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

   **Attached documents:**

**Comment ID:** PSLPP16/1774  **Respondent:** 10848513 / Martin Cole  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

7. **I object to the Borough Wide Strategy**

   There is too much development in the north east of the borough (Wisley, Ripley/Send and Clandon). Why is 36% of the entire Plan’s new housing proposed in this tiny area? Why are other areas not being proposed?
5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation with the loss of village identities. I was always under the impression it was Council policy to keep each village separate and retain their individuality.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

• The increase in housing numbers from 45 to 60 at Site A42 in Tannery Lane, Send will have a significant impact on the already highly congested local rural road network around and within Ripley. There are no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network. Every day there are jams and problems on the local roads and this is only going to intensify with more and heavier traffic. More houses means yet more pressure on already stretched local services.

Please find below my objections to the Revised Local Plan:

• The development at Site A43 Garlicks Arch would be on Green Belt land, and there is no identified or exceptional need within the Local Plan documentation.
• The potential of an increase from a minimum 400 houses up to a possible 650 at site A43 Garlicks Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause merger of these villages. Villages should remain individual and not be merged into one huge conurbation. Local facilities, doctors, schools etc. cannot cope with this increase. Have you tried getting an appointment with a GP recently.
• Section 4.2.22 of the Plan states that “Sufficient sites are identified within the Local Plan [for] 8 plots for Travelling Showpeople” So why do 75% of them have to be in Ripley? This is unbalanced and unfair.
• Including six Travelling Showpeople plots with associated storage facilities is entirely inappropriate in a rural area within the Green Belt and there is no identified need within the Local Plan. The allocation of six Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan and therefore is out of scale with the proposed development.

- The potential for a substantial increase in industrial floor space from 7000 sq m to an unspecified amount at the site A58 Burnt Common does not provide local residents with sufficient information for a full and proper consultation given the ambiguity and lack of detail within the document. Also the increase in heavy traffic is unmanageable within the local roads and lanes
- The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.4.23a and does not allow for full and proper consultation

I object to Send Village being removed from the Green Belt. The National Planning Policy Framework required this status to be permanent. There are no special circumstances which justify altering this. Local councillors and central government gave a clear election promise to protect the Green Belt. We, the electorate, expect those promises to be upheld.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

---
I object to the building of 45 houses at Clockbarn Nursery. Tannery Lane is narrow and gives inadequate access for the significant traffic volume which this will bring. The junction with Send Road is already dangerous and a dramatic increase in traffic will make it more so. Permission has already been granted for 64 apartments at the Tannery and for building the Marina so traffic is already set to increase, but the area will not be able to cope with the further increase. Pollution and noise will increase, and this will have a negative impact on residents and wildlife.

I object to the building of 400 houses and 7000sq metres of industrial space at Garlick's Arch, opposite Send Marsh Road. The site is covered in ancient woodland which is home to many animals and birds which would be impacted by the destruction of the woodland. The industrial space could be accommodate instead at Slyfield which would avoid the destruction of ancient woodland. Guildford's housing needs could be met by the proper use of brownfield sites, thereby preserving the Green Belt and upholding election promises.

I object to a new interchange with the A3 at Burnt Common because Send would have to take traffic from the proposed 2000 new houses at Wisley Airfield, 2000 houses at Gosden Hill, Burpham and 1850 at Blackwell Farm. Send is already congested and any increase in traffic would cause gridlock and cause significant increase in pollution and noise which would negatively affect residents and wildlife.

1. I object to the lack of evidence for the alleged housing need numbers. In previous versions of the draft it was explicitly stated that a significant factor in the demand for housing was the national requirement to make provision for migrants. Given the recent EU referendum result, it is almost certain that the migrant numbers anticipated will be very significantly lower than at present and thus it is rash to go ahead with a Local Plan based on housing need numbers that will drop.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the lack of provision for Doctors’ Surgeries. The existing Surgeries are already full and quick appointments or consultations are very difficult if not impossible to arrange, even for the very ill. Adding more demand without more provision is reckless and risks serious damage to residents’ health and well-being.

2. I object to the lack of immediate provision for new schools. We live in an affluent area of a relatively affluent Country. We should be educating our children to the highest standards and we need to make school as inclusive to all as possible. Over-crowded schools are a catalyst for unrest and lead to disenfranchised and disenchanted children, with undue pressure on over-worked teaching staff and a knock-on negative effect on families and communities. We need to make more places available, not “shoe-horn” more children into the same schools.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to all erosion of the Green Belt. It is essential that we contain urban sprawl and there is plenty of evidence that we have considerable ‘brownfield’ land on which to build.

2. I object to any “in-setting” of any villages from the Green Belt, mostly for the same reasons as above, but also because any proposed development should be tested very vigorously against the character of the area and the absolute necessity to keep green spaces between our towns and villages; they preserve quality of life and provide an essential eco-system which promotes peoples’ health and welfare.
1. I object to the disproportionate amount of development on one area of the borough. In previous drafts of the plan, development areas were spread more evenly, whereas this draft enables planners to go ahead with proposed strategic sites totalling nearly 7,000 homes in a relatively small area in or around Ripley and the Lovelace area. None of the proposals so far put forward make any serious effort to address the infrastructure issues. Roads are already clogged, not just at peak times and the many thousands of extra vehicles which these developments will generate cannot be supported without significant new infrastructure.

2. I object to the limited consultation period. In previous drafts of the plan, there was time for communities to review, discuss, query and respond properly to the plan, whereas, the “unseemly” haste within this latest draft is unacceptable.

2. I object to last minute inclusion of new sites with less than two weeks notice. My reasons are as in 4 above.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.
Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am absolutely appalled to hear that in certain areas of Horsley that the green belt has already been changed, once this has happened and carries on our green and wonderful land will be lost forever.

I am totally against any encroachment on the green belt.

I was at the meeting held in your offices about the Wisley Airfield when it was completely outed I now see it has again been included in the plan. It is ridiculous in so many ways and would completely ruin this area forever, for a start the amount of traffic and the roads would be impossible.

The nearest station car parks are already filled to capacity. This is just a total profit making idea for a few people who live in The caymen Islands with no care about the residents who live here and what about you the council? I would have thought it was your duty to protect the local people who by the way pay a lot of money in council tax.

I a resident who lives in Old Lane am really annoyed this has been allowed to carry on and take time money and energy from the council.

I reiterate I would like to know exactly who these people are in the Caymen Islands as they seem to have an agent acting for them I think we should have a right to know.

I feel very strongly about any green belt loss and will oppose it with all my stength.

Comment ID: PSLPP16/9427  Respondent: 10848929 / Mark Grainger  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

I object to policy P2 (green belt)

This is an extremely important asset to the public and goes against protecting it. The impact on flooding, natural resources, wildlife, leisure and health has been ignored.

There appears to be an unreasonable amount of development proposed for the green belt in areas of west and east horsley, which in my opinion will do more harm than good.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/122  Respondent: 10848993 / Steve Rowley  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

I object to policy P2 (green belt)

This is an extremely important asset to the public and goes against protecting it. The impact on flooding, natural resources, wildlife, leisure and health has been ignored.

There appears to be an unreasonable amount of development proposed for the green belt in areas of west and east horsley, which in my opinion will do more harm than good.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I inherited the green belt, I am therefore responsible for my children, their children and great great grandchildren to also inherit this precious land, I also vote people in to council who will also look after our inheritance, if promises are to be broken that is not a democracy. The building on green belt is not necessary or needed as there are local brown belt sites which can be used.

The site at Garlicks Arch is a prime example of cutting down trees, destroying the habitat and rising more flood to Send Marsh, having spent money to prevent this.

The term affordable is incorrect as proved as White Hart Court, Ripley the prices were not negotiated before planning consent was given and put them out of the reach of the majority.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the proposed use of Green Belt for future development. It is essential that the green belt is protected as it provides the separation of towns and maintains the beauty and rural nature of our county.

It has long been the policy to use any "brown-field" sites as the basis for any development, of which there are plenty. These sites must be exhausted before green belt land could even be mentioned, thus opening the flood gates for massive development of any green belt land, causing towns like Guildford and Woking to be joined.
I do not understand why the council is considering this green-belt development, this will ruin the individual nature of the villages and cause them to become urbanised.

I therefore strongly object to the 2016 Draft Local Plan.

I OBJECT strongly to SEND Village being removed from the Green Belt which was supposed to be a permanent thing and there are no circumstances justifying abandoning it. Send's Green Belt provides a "stop" between Woking & Guildford Councillors & the Government gave us a promise to protect the green Belt and this clearly back tracks. Developers will leap on this and there will be nothing to stop them.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
I OBJECT to building 45 houses at Clockbarn Nursery as there is such poor access and such great volume of traffic. Tannery Lane is far too narrow and cannot take more traffic. It is exceptionally dangerous for any vehicles exiting there to the main Send Road. The Lane just cannot take any more traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to building 400 houses and 7000 sq metres of industrial space at Garlick's Arch opposite Send Marsh Rd. This site floods and is an ancient woodland. The industrial space is not needed but if were, it should be at Slyfield.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to the new interchange with the A3 at Burnt Common because all the traffic from the proposed 2000 new houses at Wisley Airfield, 2000 at Burpham and 1850 at Blackwell Farm would have to be taken by SEND Send Road, which is already overloaded, would become gridlocked along with noise and pollution levels which are excessive already, would worsen.

I trust you will take all these OBJECTIONS into account.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)
Ref: Guildford Borough Transport Strategy 2017

I am a Guildford resident and a professional transport planner, with a consultancy practice on the Surrey Research Park. Having read the 2017 Borough Transport Strategy, my key comments are as follows:

1. I wholly support the proposed A3 Guildford tunnel as the only satisfactory long-term mitigation of the severe road safety, environmental (air quality, noise and severance) and economic (congestion) impacts associated with the existing A3.
2. I support short term measures to improve safety on the A3 through Guildford, but proper noise mitigation measures (i.e. a complete acoustic fence) should also be implemented to protect residents living near the A3.
3. I strongly support measures to improve sustainable modes of travel in and around Guildford town centre, including the reallocation of space to pedestrians, cycles and buses. Please also encourage more use of car clubs in the town.
4. More short and long stay car parking on the edges of Guildford town centre, combined with restricted vehicle movement in some streets, would reduce unnecessary car trips into the town centre. In principle, I would support a town centre congestion charge/road pricing system.
5. More joined-up cycle routes should be implemented to facilitate cycling within and through town centres, whilst wider routes should be available to the more ambitious cyclist between towns.
6. I am unconvinced by what I have read and heard so far in relation to mitigation of transport impacts arising from the proposed Blackwell Farm allocation, particularly in the absence of an A3 tunnel. If it proceeds, the development needs to be genuinely accessible by non-car modes; lip service will not suffice.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The land at Guildford Cathedral is currently designated as Protected Open Space. I object to the proposed change in status of this site to C3 housing on the grounds that it would have a significantly negative impact both on the wildlife and local community, and also importantly would ruin the vista of Guildford Cathedral, a historic landmark for Guildford and tourist attraction.

The proposed development of 100 dwellings at Guildford Cathedral would negatively affect the local community in terms of:

- Significant traffic congestion on Guildford Park Road leading into the town centre and out towards the A3 will only worsen due to the developments proposed in and around Walnut Tree Close, Guildford Station, along Farnham Road and Cathedral land. Given the recent road traffic accidents around the Friary Centre which resulted in a fatality and serious injuries, proposed development of the Cathedral land would result in congestion on Alresford Road, Benbrick Road and Ridgemount which are not equipped to deal with the throughput of vehicles from a further 100 dwellings, making it quite unsafe for pedestrians and the local community comprising of children. Moreover, the inadequate pavements in the area and bus depot at the bottom of Ridgemount makes it difficult and potentially unsafe for cars and pedestrians as buses manoeuvre in and out of the premises.
- Inadequate local infrastructure including schools
• Damage to local housing in Alresford Road, Benbrick Road, Ridgemount and Scholars Walk due to problems related to subsidence and inadequate draining.
• Damage to natural wildlife

Given the large number of proposed new dwellings for Guildford town centre, Onslow and surrounding areas, it is even more crucial that the Protected Open Space at Guildford Cathedral remains protected to ensure the health and wellbeing of the local community, natural wildlife and reputation of Guildford city and its historic landmark.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
The plan proposes a significant development of Green Belt land at the disused Wisley Airfield. I object to the proposed development on the basis that it is inappropriate development in the green belt and is unsustainable.

The council has failed to show that it is necessary to develop the Wisley Airfield, contributing to urbanisation sprawl along the A3 in Surrey, destroying the openness of the green belt.

The proposals will destroy the rural nature of local villages, Ockham in particular, but extending to Ripley, East and West Horsley, Cobham and Effingham. It will increase loads on local infrastructure which is already at breaking point: local roads and rail transportation will be overloaded, local schools will have to be enlarged thereby further damaging other sensitive villages and sites in the borough.

Forecast Population and Housing Increases: The forecasts in the ‘Evidence Base’ needs to be updated given the recent decision to ‘Vote Leave’ from the EU, especially given controls on immigration rather than freedom of population movement into the UK. In addition the ‘Evidence Base’ needs to consider the final decision on an additional runway at Heathrow or Gatwick or not at all. The Strategic Housing Market Assessment (SHMA) should be re-assessed based on these two issues and in addition be based on credible data inputs and model and not result in 70% higher than official national estimates for population growth in the Guildford borough.

This alarming incorrect data currently results in planning for more than 593 homes in East and West Horsley and a 35% increase in West Horsley housing alone which is not appropriate. Proportionate is included in the definition of Large Villages which leads me to conclude that the substantial development being planned for East and West Horsley are in fact likely to be very disproportionate to their current sizes. Whilst I believe that some new homes should be built in East and West Horsley, the types of these homes should be specifically controlled to provide homes for younger families and for older downsizing residents. The village does not need any more large and expensive 4 or 5+ bedroomed detached houses that will only mean massive profits for developers and will continue to distort the demographic balance of the village. The focus for East Horsley local house building should first priority be with the existing ‘Brownfield’ locations only.

The potential housing requirements therefore need to be corrected for a credible population estimate before any non-Brownfield locations could possibly be considered for development. If the total housing needs reflect lower population estimates, the Brownfield sites could account for the vast majority of the housing required. If the population projections are proved incorrect over an initial 5 year period, certain other sites would then not have to be considered for development. If the current projections prove to be too high, GBC will avoid unnecessarily building on previously undeveloped areas and irreversibly damaging the Surrey countryside. Student housing should be focused on the University site, and not be exaggerated for in local villages like East Horsley where transport links are already inadequate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I believe the current Guildford Borough Council (GBC) Proposed Submission Local Plan is deficient, not justified and if implemented will have serious adverse consequences for my village East Horsley and our neighbouring parishes. Both East Horsley and West Horsley are distinct parishes as referenced in the Domesday Book of 1086 and as current Surrey Villages, being south of the M25 motorway, must continue to be protected as such. The Proposed Submission Local Plan should address improving the economic, social and environmental conditions in the area however it is not fit for purpose, based on obsolete population data as the basis and fails to provide simple advice to future planners who will face development proposal decisions.

Proposal to remove East Horsley from the Green Belt: The fundamental aim of the Green Belt policy is to prevent urban sprawl by keeping land permanently open. This Local Plan will expose East Horsley to the threat of urban developments wholly inappropriate that would not be permitted under the existing Green Belt classification - I find this unacceptable. There are no exceptional circumstances why this classification should be changed and East Horsley should therefore remain as a Village, like West Horsley, and continue to be included within the existing Green Belt protection. Only appropriate development and re-development opportunities should be supported in line with East Horsley’s own Neighbourhood Plan. East Horsley’s Neighbourhood Plan needs to be a means of providing a measure of local control to the planning process, in accordance with NPPF paragraph 17: “planning should be genuinely plan-led, empowering local people to shape their surroundings, with succinct local and neighbourhood plans’.

The existing East Horsley Infrastructure is not acceptable for the current population needs: I am very concerned with recent flooding from Pennymead Drive in East Horsley, down Ockham Road South and Ockham Road North and all the way to the A3 roundabout. I also now find out this area is in a Zone 3 Flood-zone and Functional Floodplain. Any further housing development will obviously severely impact further flooding in this whole area. Local residents who pass our house in a very narrow section of Ockham Road South going to Horsley station or to the local school get very wet every time it rains, because traffic splashes water from the flooded road on to the very narrow pavement. Insufficient work has been carried out on planning for and executing the infrastructure for the existing developments in East Horsley, let alone for any future new developments. Ockham Road South and Ockham Road North have not been constructed to take the existing traffic growth, let alone further expansion from any proposed new developments - a cycle lane along the road is also currently impossible to provide. Opposite our home, the start of Forest Road does not even have a pavement provided from Ockham Road South to Glendene. In addition the East Horsley medical facility is stretched and the local school is full so there is no planning for any future population expansion in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
This e-mail sets out my objections to GBC’s New Local Plan.

I believe GBC is failing in its responsibility to the people of East and West Horsley and surrounding areas, and I itemise below my reasonings.

Wisley

Whilst I recognise that Wisley airfield is redundant land, the area is prone to flooding, as anyone who has lived here long enough knows. The access to the A3/Wisley roundabout tends to flood during serious rainfall, and the road has been impassable several times during the last sixteen years we have lived here. You cannot responsibly build 2000 plus houses and not provide a school, medical centre, some local shops, post office, community centre and recreational space. This should be a new community where people have their own facilities and not have to travel along narrow lanes to source them. These facilities should be put in place at the same time as the houses are built. I have seen no confirmation anywhere that GBC plan to provide these facilities. On average, each house could be expected to own two cars. At present the station car park in East Horsley is full each day. Where are these people going to park if travelling into London. Similarly, it is often difficult to get an appointment at the Doctors surgery, so they wouldn’t be able to cope with so many extra patients. I understand that commuters are now using the Village Hall car park and therefore when the Medical Centre car park is full, we are also unable to park in the Village Hall car park, and this is before just one extra home is built in the Horsleys.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Development of Wisley Airfield: Ockham’s classification of other rural community includes “Rural communities unsuitable for taking any development including infill housing”. It seems ironic that GBC have now decided to propose a new strategic settlement of some 2,000 new homes on Green Belt land about 200 yards from the properties situated along Ockham Lane and only 2 miles from East Horsley. In the absence of real needs, this is an utter disgrace especially given the concerns with the very limited local infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Designating Station Parade East Horsley as a District Centre: Identifying Station Parade, East Horsley as a District Centre and second in the hierarchy of retail and service centres after Guildford town centre is entirely inappropriate for this small parade of local shops in East Horsley and should be rejected. We need to retain the existing atmosphere of Station Parade and our Village. The existing Budgen’s is not a large supermarket but a convenience store which is the only reason it is allowed to open all day on Sundays. There is no spare land around Station Parade with already a shortage of parking spaces for shoppers. East Horsley also has a non-existent bus service to the Urban Areas.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Schools and Medical facilities.

As you must know, our schools are full and our Medical Centre stretched. You are making no promises that new schools are to be built, so I am assuming children living in all these new houses will have to travel out of the area to attend other schools. Not ideal in any way, and that means more traffic on the roads, and speeding through the village on our narrow roads, already a problem.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposed developments in East Horsley, West Horsley and Ockham area represent a very significant increase in the number of homes given a total over-estimation of the real population growth projections and housing needs. Development at this scale will irrevocably change our Villages and cause considerable adverse effects on traffic, parking at local shops and railway stations, access to local school places, the medical facility and access to doctors. I do not think that the Local Plan provides a rational and fair basis for allocating housing to East Horsley, providing the required infrastructure improvements, or protecting East Horsley’s Green Belt and Village classification. It is not in the interests of East Horsley residents and I will help fight it all the way through the courts if needed until changed. I object in the strongest terms to these Local Plan proposals.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Green Belt

I strongly object to the Horsleys being removed from the Green Belt. This is a beautiful area which is peaceful and friendly, although in recent years the traffic through the village has become a problem and localised flooding is becoming worse. The more housing that is built, water has nowhere to go. It seems that GBC has taken little notice of the concerns
of residents who are totally aware of the problems we will face if all these houses are built. As mentioned before, for every house built, we can expect two extra cars on our roads. What are you thinking?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I understand that mention has been made of land at the tennis and cricket club at the top of Pennymead Drive. Are we not to have any recreational areas. Similarly the land at Kingston Meadow, which is enjoyed by everyone for sport, walking with dogs and for the village to come together to celebrate special occasions such as Jubilees and the Queen’s Birthday. I am completely lost for words that GBC can consider building so many houses in a lovely area and spoil it for everyone. At one time it was considered safe to be within a Green Belt area, so why are you allowed to now relax those rules. I understand that people need housing, and I have no objection to houses being built in small pockets around the village eg. The Telephone Exchange Land, and I understand the need maybe for housing on Wisley Airfield, BUT ONLY PROVIDED the aforementioned facilities are put in place, SCHOOLS, DOCTORS SURGERY, POST OFFICE, SHOPS AND RECREATIONAL FACILITIES.

Please please, give more consideration before you ruin a very lovely part of our country and turn us into a suburban community instead of a rural one.

I do not believe the SHMA is sound because it counts overseas university students as permanent residents (their permanent address is given as their term time address - clearly the majority return overseas at the end of their course), these students are also counted as part of international migration; and no adequate adjustment has been made for the discrepancy between the 2011 Census and the population forecasts.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Our drains, our water supply, our medical facilities and our roads cannot cope with the proposed number of new homes.

Our roads are already busy and parking is limited. This includes parking at the railway station, and at the local shops where it is very often difficult to find a space. Our roads are frequently flooded in bad weather too, which could only be made worse by more pressure on the drainage system that so many new houses would undoubtedly cause.

The only medical practice is in East Horsley, serving both East and West Horsley as well as surrounding areas. It is an extremely busy practice and it can often be difficult to get an appointment. With the proposed increase in population this medical practice would be stretched even further.

This leads me on to mention the state schools in our area. The local primary and secondary schools, the Raleigh and the Howard, are very good and very popular. There have been times where children living in the village have been unable to
get a place there. This is already a big problem for local families, and we really do not have capacity in our existing schools to cope with the number of families that the proposed housing would bring to the village.

In conclusion, I ask Guildford Borough Council to revise the housing number, and to amend the Local Plan to maintain our existing village boundaries and green belt status.

As a resident of West Horsley I wish to register objections to the new Local Plan as follows:

The purpose of green belt is to protect against urban sprawl and retain the character of rural communities like ours. The removal of green belt status and addition of large numbers of houses in the Horsleys would completely change the look and feel of our villages.

The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Exceptional circumstances for removing the Horsleys from the Green Belt have NOT been demonstrated.

Upgrading services such as drainage, education, medical etc would make the plan totally uneconomic.

For these reasons I would like to record my objection most strongly to the Proposed Submission Local Plan; strategies and sites June 2016.
I am writing to object to the Guildford Plan, specifically the plans for West and East Horsley. My overall objection is the strain on the existing infrastructure, including any upgrades as part of the Plan. The density of the proposed developments will be significantly greater than anywhere now which is already severely overstretched at rush hour and school times.

The proposal to remove East and West Horsley villages from the green belt is hard to understand. It goes in the face of the successful protection which the green belt has given over decades. On principle it should be retained for the benefit of future generations.
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**I strongly object** to the GBC Spatial Strategy and the number of houses proposed to be built in the village. We are not a town and do not want or need this many houses in our village.

**I strongly object** to Send Village being removed from the Greenbelt. This is an atrocious plan, we want to retain our greenbelt protection now and for the future of our children and keep our green areas and wildlife safe.

I sincerely hope that Guildford borough listens to the people of Send village and stops the plans to excessively build on our Greenbelt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

A44

I strongly object to the allocation of 40 homes and 2 traveller sites. This is our countryside full of natural beauty and wildlife, our children should be able to walk in our village and see deer, foxes, birds as their parents have done before. This is an appalling application which again will affect the over burdened traffic in our village and our resources such as local schools and doctors surgery.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
GBC has not listened to the residents at all and you have in fact amended your plans to make the outcome worse for Send villagers.

I strongly object to the proposal to inset Send Business Park from the Green Belt because:

Tannery Lane has restricted access and is not suitable for more vehicles.

It is in an area of outstanding beauty, is already a large site and does not need or warrant being made bigger at the detriment of our beautiful countryside and wildlife.

I sincerely hope that this time you listen to the resident of Send's objections and act accordingly. Leave our green belt alone!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I strongly object to the Policy A42 change at Clockbarn in Tannery Lane because:

You have increased the number of houses and not reduced the number in your plan.

The traffic problems in Tannery Lane and the A247 junction are already dangerous and will worsen.

It will ruin and make the erosion of the Green Belt in our village worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the Policy A43 change at Garlick's Arch because:
There is no proven demand for Travelling Showpeople in this location
It is green belt land and no exceptional circumstances exist
The number of homes is excessive and not needed in our village
It will generate excessive traffic and block up already busy roads in Send
The land is subject to flooding and is currently a flood zone 2 allocation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object to forty new houses! And two travellers pitches put forward in the local plan, I live in Winds Ridge and as I'm sure you are aware it is a single track Road (Send Hill), which is completely unacceptable and impractical to accommodate forty houses with the increased traffic flow. We already have much congestion due to the school traffic at the end of Send Hill causing lengthy delays.

There would also be no practical way of travellers in large vehicles being able to negotiate the narrow lane.

As I'm sure you are also aware Send cemetery sits very near the proposed travellers site as well as the new housing site, which is currently a peaceful, quiet location for people to visit their deceased relatives, that tranquility would also be lost.

Lastly the proposed housing site is one of the few open spaces for local people to be able to walk either with their dogs or children enjoying nature, The open space was recently used by the air ambulance to airlift a local neighbour, that would also be lost.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M2S/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.
- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.
I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to all building in Send because,

1. You have already given permission for a marina which has parking for 84 narrow boats. This means more cars to & fro along Tannery Lane.
2. More office building in Tannery Lane with obviously more traffic.
3. Houses in Clockbarn Nursery more traffic in Tannery Lane. This road is far too narrow and access onto A247 junction is impossible as it is.
4. Also the effect all of this will have on schools and doctors.

The more houses you build means there are no longer any villages as they will all be joined together.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford Borough Council Plan (2016).

I am objecting to the 2016 draft local plan.

I have lived in Send Marsh for forty-four years. During that time I have seen Send Marsh, Send, and Ripley grow as new developments and extensive infill have taken place. During that time no attempt has been made to upgrade the infrastructure. The roads do not have sufficient capacity for today’s traffic, and there seems to be no plans to answer traffic
congestion issues. The only exception was the Ripley bypass. What a mess the A3 would be if that had not happened. The proposed all way access to the A3 at Burnt Common is no more that a sticking plaster token solution.

The utility supplies also need to be addressed now, before any additional consumers are added. Winter evenings and we regularly see electricity drop to 190 volts. Not enough to start a fluorescent light tube.

What are the plans for additional health and education facilities to support the increase on population?

During my time in Send Marsh I have witnessed many planning attempts to blight the villages along the A3 with mindless developments. The latest GBC Plan has to be the most appalling attempt so far to turn pleasant Surrey villages into ghettos.

The concept of the Green Belt was introduced to give communities green space, countryside, and identity. In the quest to build houses, GBC seems to have completely ignored the concept of quality of life for those who live in the Borough and who through their efforts, contribute to the very existence and wealth of the Borough and the County.

BEFORE any further developments are even considered the present infrastructure needs to be addressed. Traffic management on the A3 and feeder roads from the M25 to south of Guildford can only be described as a complete farce. Road congestion both morning and evening is an utter disgrace. It has been like it for years and clearly demonstrates a complete lack of nous demonstrated by GBC Planning.

Is GBC just going through a numbers game? “We have been told we have to build thousands of homes, so we will just stick them along the A3”. With the advent of Brexit, the whole future housing requirement must be questioned, as should why is this part of the Borough is being so heavily targeted. It really does beg the question who are the beneficiaries of this plan. The lateness of the addition of Garlicks Arch will clearly result in many people asking many FOI questions for a long time to come.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I find myself having to object again to things the council are trying to put through when precious objections were made.

I object to the following areas of the draft plan.

1. The erosion of the local Green Belt and what is called "in-setting" of any villages from the Green Belt. I live in Ripley, and am objecting to the plan to take Ripley, Send and Clandon out of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. I object again to the plan bringing too much development in one area of our borough. I am for development of affordable housing but this plan is disproportionate.

   1. Though I do believe in affordable housing development this plan is not in my view considering affordability and is squeezing too much into these smaller more expensive and so I guess profitable areas. Instead of placing distributed development across the borough to support the whole borough. The numbers are too focused in our area.

<td>I object to plan A43 which includes the 30 hectares of Garlick's Arch in this Plan A43. This site is new and was not included in the Regulation 18 Draft, and has not been consulted on previously. It forms part of the Green Belt and is permanently protected by the NPPF, which is there to prevent the merging of settlements. It also contains around 5 hectares of ancient woodland, some of which dates back to the 16th century the plan includes the building of 400 houses and nearly 2 acres of industrial buildings and warehousing. The ENLA of 2015 shows an 80% reduction in employment space over that of 2013, therefore industrial space at Burntcommon is no longer required. Quite apart from losing Green Belt land, the extra traffic generated by an estate of this size, which will consist of about 800 cars and many HGV's, will put an unbearable pressure on all the roads around the Burntcommon roundabout (A247/B2215), especially at rush hour times. As well as the roads being unable to cope with such huge population growth, neither will the local schools or the Villages Medical Centre.</td>

I object to plan A43A a new northbound slip road to the A3 from Clendon Road and a new southbound off slip from the A3 to A247. The proposal to create extra entry and exit slip roads from the A3, London bound, off the A247 Clandon Road will add grossly to the congestion that is already a big problem at the roundabout and surrounding roads in Send at rush hour.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the development of 40 houses and 2 traveller pitches at Send Hill. The access to this is insufficient as the road is narrow and single track.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the fact that the infrastructure has not been considered and is inadequate to deal with the proposed housing levels and additional traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the removal of Send from the Green belt because the village and countryside provide a necessary buffer between Guildford and Woking and there are no special circumstances that can be justified for building on the Greenbelt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the Guildford plan which has not identified sufficient brownfield sites within the urban area and includes 70% of the proposed housing of 13860 targeted in green belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Clockbarn Nursery, Tannery Lane, Policy A42

I object to the Policy = A42 change at Clockbarn in Tannery Lane because:

- The increase in the number of proposed homes on the plan has increased by a third, with no reasonable justification
• It ignores all the hundreds of previous objections made by local people
• It will increase problems with the traffic in Tannery Lane and at the A247 junction
• It will cause erosion of the Green Belt in our village
• It will increase surface water flooding, which is already a problem, and increasing with further development
• It will impact on the open countryside views from the River Wey Navigation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Garlicks Arch, Send Marsh, Policy A43

I object to the Policy A43 change at Garlicks Arch because:

• It ignores all the thousands of previous objections made by local people
• There is no proven demand for Travelling Showpeople plots in this location
• It is beautiful permanent Green Belt and no exceptional circumstances exist
• It will cause overdevelopment of our village and the number of homes is excessive
• It is exquisite ancient woodland that existed at the time of Elizabeth 1
• It will join Ripley and Send and defeat the key purpose of Green Belt
• It is subject to frequent flooding and is currently a flood zone 2 allocation
• It is contaminated by lead shot accumulated over 50 years
• It will generate excessive traffic that will block up the local roads of Send and Ripley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Land at Burn Common, London Road, Policy A58

I object to Policy A58 at Burn Common because:

- It was deleted from the 2014 draft because of all the objections made previously
- The word minimum is a change from the previous maximum in the 2016 plan and since that time there has been a decline in the demand for industrial land
- There is no need to build industrial or warehouse developments in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt
- The impact on small surrounding roads will create traffic gridlock
- It will join up the existing villages and defeat the purpose of the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( Yes ), is Sound? ( No ), is Legally Compliant? ( Yes )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I've lived in Guildford all my life and I cannot help but point out that the section on infrastructure is fatally flawed. As a person currently trying to become qualified as an environmental consultant I appreciate the need to protect the environment and provide sustainable forms of transports, but there is a need to recognise that Guildford's economy at present has a heavy reliance on the car as the primary means of transport and that isn't going to change in the short-term - thinking otherwise is delusional. Guildford therefore needs good road access, but there has been historically a real lack of nerve to make the decisions that really needed to be made for the sake of the prosperity and development of the town, and what worries my is that there doesn't seem to be much a move to correct this. There really should be a proper short-term of long-term internal road development plan devised. Amongst other things, the town desperately needs the ring road that should have been built in the 1960's instead of creating the town centre gyratory system and Millbrook, thereby routing all through-traffic through the centre of the town. That planning decision is now coming back to haunt us in the form of excessive traffic congestion through the town centre at peak times. The good thing is, it is not too late - there is still room to build a ring road within the Guildford Borough boundary and it could easily be justified as it would provide a means of developing the town in a more planned, coherent manner, and a vital main transport link along which further developments around the edge of the town could be placed. However, I'm not going to hold my breath for this, because like most people living in the town I know that unless the council gets to grips with this, it simply won't happen, which is bad for the people who live here in Guildford and bad for the Guildford economy. I appreciate that the idea of a ring road won't satisfy everyone, but it is what Guildford has needed for over 50 years and needs now more than ever. Naturally it will upset some people - particularly large landowners (as it did in the 1960's - which is why the ring road didn't get built back then) and some environmental campaigners who can't appreciate it that Guildford may exist in an AONB, but people still have to be able to live here and get around easily, and sometimes that means by road, but the vast majority of people will be glad to have a better way to get from one side of Guildford to the other, when they don't need or particularly want to have to go through the town centre.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to a new interchange with the A3 at Burnt Common because Send would have to take traffic from the proposed new houses at Wisley airfield, Gosden Hill at Burpham and Blackwell Farm. Much of the traffic from the A3, M25 Woking and Guildford would go through Send. Send Road and Clandon Road are already overloaded with traffic and would become gridlocked. Currently I can sit for ages trying to get out of my entrance on to the Clandon Road if this interchange were to go ahead it would be impossible. Noise and pollution levels which are already excessive would get worse. This would be a disaster.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to all the proposed sites in Send because they were not included in the previous consultation in 2014.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPA16/1405  Respondent: 10852897 / Diana Goddard  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North
The six development sites listed on the new plan amount to a total of 533 new houses, I am trusting these houses will be affordable housing to enable the younger generation to move back into this area. At the moment every house being built consists of four or more bedrooms, we need smaller homes – not all cramped together either.

Planning for Thatcher’s Hotel I do strongly object to for the following reasons:-

Firstly, The Claudel Hotel, Epsom Road is now a nursing home

Secondly, Bookham Cetange Hotel is residential care

Thirdly, Preston Cross Hotel will also be nursing care homes which leaves only one hotel for the whole area, I do feel this Hotel could still have a future, it has quite a lot of history going back to the days of a tea-room, a lot more thought needs to be put into this, I’m sure someone could make it into a thriving business

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/268  Respondent: 10853089 / J Goulding  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

I object to the 2016 Draft Local Plan for Guildford and I wish my comments to be seen by the Planning Inspector.

I object to the enclosure of Green Belt land within proposed new village boundaries and the consequent presumption that the land then becomes available for future development. This is in clear contravention of the government's stated commitment to Green Belt protection.

I object to the number of homes, warehousing and industrial sites that the Plan intends to deliver at Garlick's Arch (Policy A43). This is a new site included with less than two weeks notice and has not been consulted on previously.

Local roads in this area are already clogged with traffic, the schools and GP surgery already oversubscribed. Send Road (A247) is almost at a standstill at peak times. How can Send and Ripley cope with development on this scale which will completely alter the balance and identity of the villages. Garlick's Arch is an area of Green Belt upon which is ancient woodland which must be protected to prevent the merging of the two villages.

I object to the proposed creation of north and southbound slip roads to and from the A3 (Policy A43A) at Burnt Common - another late addition to the Plan.
I object to the misleading use of the word 'insetting' which implies 'putting inside of and protecting' but is actually being used in the Plan to mean 'removing or moving outside of'.

I object to the redrawing of the Green Belt boundary to exclude an area of land between Danesfield and Send Marsh Road without any notice and without any consultation with residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Local healthcare facilities overwhelmed

Many local health services, such as the Villages Medical Centre, Send, are being stretched already, and it’s becoming more difficult to get doctor/nurse appointments without unacceptable delays. This would become significantly worse should the draft local plan be implemented. I object to the additional stress that would be caused should the proposals be implemented.

Lack of proper infrastructure planning for sites
Local infrastructure is already stretched, and there appears little or no planning or implementation of improvements prior to the proposed plan. This is particularly true at Garlick’s Arch. I object to the lack of proper infrastructure planning of local services such as doctors and schools.

Sites planned in unsustainable locations

Many strategic sites, such as Garlick’s Arch and Wisley Airfield, are in unsustainable locations. They are not located near any railway stations, and would not be within easy reach of local villages. With infrequent bus services, residents would be reliant on the use of motor vehicles resulting in further pollution and congestion. I object on the grounds of the sites being unsustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Unsuitability of local roads for heavy vehicles and more traffic

Many local roads around the villages of Send, Ripley and Clandon are narrow and there are already many instances of vehicles having to mount pavements to allow large vehicles to pass. This is particularly an issue on the A247 between Burnt Common and Clandon Crossroads. The inclusion of the Garlick’s Arch proposal, particularly the industrial and warehousing elements of the plan, is certain to make the situation far worse. I object to the development proposed in the local plan, which will result in more traffic using narrow roads.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Parking issues in local villages caused by a larger population

Parking in local villages is already an issue. It is frequently impossible to find parking in Ripley if you require to stay for more than two hours. I object to the proposals as further development around our villages will only make the situation worse.

Congestion on the trunk roads, A3/M25

The A3 and M25 already suffer from severe congestion during rush hours, in addition, Highways England have no plans to improve the A3 prior to 2020. I object to the development of these sites shown in the local plan because trunk roads would be unable to cope.

Congestion on local village roads and lanes

Many of the villages are suffering from severe congestion, for example the Shell roundabout at Burnt Common, and the Newark Road & Rose Lane junction in Ripley. I object to the further development which will cause further congestion in and around our villages.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Unbalanced development in one area of the Borough

There appears to be a large part of the proposed new housing concentrated between the M25 and Burpham. I object to my local area being subjected to such a large proportion of the allocated development, when it would be better spread more evenly throughout the Borough.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Limited consultation period

I object to the limited consultation period for the Guildford Local Plan. The range and extent of the proposals would have benefitted from a longer period of consideration.

Late inclusion of new sites in the Local Plan

I object to the late inclusion of parts of the Local Plan with less than two-weeks notice. This particularly relates to the Garlick’s Arch and the four-way on/off ramp to the A3 at Burnt Common.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A43 change at Garlick’s Arch because:

a) It ignores many thousand previous objections from local people.
b) There are no proven reasons why there should be Travelling Show People plots at the location.
c) There are no ‘exceptional Circumstances’ why the Green Belt should be permanently damaged.
d) The number of new homes would be excessive, and our village would be over-developed.
e) Send and Ripley would be joined, and Green Belt would be sacrificed.
f) The area is subject to flooding.
g) Increased traffic will cause gridlock on local roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy A58 at Burnt Common because:
  a) It had previously been deleted from the 2014 draft because of previous objections.
  b) Since the 2016 plan there has been a decline in demand for industrial land, so it is objectionable that the word ‘maximum’ has been changed to ‘minimum’.
  c) There is no need to build industrial units on Green Belt land when there are empty sites at Slyfield.
  d) The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for the whole borough, not a huge over allocation of 10 hectares at Send in the Green Belt.
  e) Increased traffic will cause gridlock on local roads.
  f) Adjacent villages will be joined, defeating the purpose of Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

We object to Guildford Borough Council's draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:

- destroy views from the Hog's Back ridge - a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- increase tailbacks on the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford's pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have been a resident of Burpham for over 30 years and view the Guildford Borough Council Draft Local Plan (“the Plan”) and its effect on the area and town in which I live with sheer horror and bewilderment. How it can be considered practical and necessary to have such an intensive and unsustainable development in an area where the infrastructure is already under pressure defies any logic and has complete and cynical disregard for the quality of life for the residents who will be affected. I have studied the content of the Plan and attended presentations by the Council where I voiced my concern about the impact on transport, schools, medical facilities and other infrastructure items. It was quite apparent that even the Council’s staff there present considered the impact of the proposal to build 2,000 homes on Gosden Hill (“GH”) alone would be catastrophic on an already overcrowded road network in Burpham. This is only one of many major proposals in the Plan which would degrade the lives of the residents of Guildford as a whole, but is by far and away the most destructive in terms of negative impact.

The destruction of the Green Belt around Burpham by the GH proposal is a travesty to the basic planning principles that have been honoured in post-war Britain, and is in direct contravention to promises given by the Government to voters in recent General Elections.

There is no evidence to support the need for such an intensive development in the Plan. Now that the Government has announced it will proceed with Brexit the need for housing will decrease and the Plan needs to be redrawn in terms of housing need. Sustainable development on existing brownfield sites is what is needed, not environmental destruction. Has anybody considered the effect the building of 2,000 homes on GH will mean in terms of lorry movements and pollution for local inhabitants?
Why is the Council concentrating so much of the development in one area? There is no clarity or transparency regarding the other bugbear for the Burpham area, namely the Slyfield area Plan and the related access road, which also proposes dramatic increases in HGV movements along Clay Lane, already congested due to the sheer amount of traffic and is potentially dangerous due to the number of schools on the route. If GH and Slyfield go ahead I shudder to think of the congestion that will occur on the access roads in the Burpham area.

The proposals to introduce a new train station and Park and Ride for GH will not in any way alleviate the impact of at least another 5,000 cars on our roads. The Plan should be shelved immediately as it does not represent the interests of Guildford residents as a whole, and those of Burpham in particular. There has been inadequate consultation for such a far-reaching and potentially catastrophic proposal.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I note that in the Revised Local Plan (“RLP”) that there has been a small reduction in the proposed number of houses to be built on the green belt sites, although in the main the sites themselves continue to be earmarked for development at a level which is totally unsustainable for the existing community. I attended a presentation at Tongham and asked numerous questions to the Council staff (Mr Spooner was not present) and was not given any satisfactory responses. There was no presentation at Sutherland Park and this omission is remarkable considering the impact of the Gosden Hill Farm (“GHF”) on the residents of Burpham, of which I am one. As such a resident I know first-hand the impact of an additional 5,000 vehicles (from 2,000 new houses) on the already clogged-up narrow roads, in particular Clay Lane which under an additional threat from the Slyfield Regeneration Plan. It is clear that the Council is adopting a plan of “housing first, infrastructure second” as there is no clear plan to ease the traffic other than token gestures such as a new station and park-and-ride (which nobody uses anyway).

I ask that the greenfield sites be removed from the plan, not out of NIMBYism but out of a genuine and deep-seated concern over the effect on the existing community.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **EVIDENCE.** GBC have failed to provide sound evidence in terms of the Employment Land Needs Assessment 2015 (ELNA) which shows an 80% reduction in employment space from the previous ELNA carried out by GBC in 2013. This means that industrial space at Burnt Common is no longer needed. Housing numbers from the Strategic Housing Market Assessment 2015 (SHMA) are highly questionable. The number of foreign students has been wrongly used to inflate the need. The required 13,860 houses in the local plan is **exaggerated.** If the population is to grow by some 20,000 in the plan period, we actually need 8,000 homes (based on an average of 2.5 persons per home). The Green Belt does not need to be built over. **50 of new homes needed could be built on brownfield sites!** GBC’s Transport Assessment was not even available to councillors for the vote taken on 24 May, being published on 6 June. Infrastructure overload has received scant attention. GBC Officials seem to be blind to the concept of using brownfield sites but just take the easy of option of removing Green Belt in areas that do not generally affect them directly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I have strong objections to the latest version of the local plan as recently published and in particular as it affects Send and our local environment.

It seem to me that many of the objections raised a year or so ago, which on the surface seemed to have been taken into account of, have now been completely disregarded in the latest version and several new projects introduced. all of which have an adverse effect on the village. In particular the concept of taking Send completely out of the Green Belt classification.

In my view we do not need as many houses as the government think, what we need is less people but that is a matter for the national government to resolve with the electorate at large.

I would ask that this letter of objection and my comments below be seen by the Inspector.

1. **GBC HAVE NOT FOLLOWED CORRECT PROCESS.**

Since 2014 GBC has changed every major site in Send proposed for development and now just added a massive new road junction. The 2014 proposal for 430 houses went down in April 2016 to 185 and has just gone up again to 485. These significant changes require another full consultation under Regulation 18, not the short cut of Regulation 19 which GBC are trying to get away with. This invalidates the whole process and I strongly object to GBC officials completing ignoring the views of the local population who elect them.
1. Evidence GBC have failed to provide sound evidence in terms of the Employment Land Needs Assessment 2015 (ELNA) which shows an 80 reduction in employment space from the previous ELNA carried out by GBC in 2013. This means that industrial space at Burnt Common is no longer needed. Housing numbers from the Strategic Housing Market Assessment 2015 (SHMA) are highly questionable. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY A 43.30 ha LAND AT GARLICK'S ARCH, Burnt Common, designated for 400 houses and 7,000 sq m of industrial and warehousing. There is no need for any more houses on top of the 13,860 already proposed for the borough. This site is NEW and was not included in the Regulation 18 draft and has NOT been consulted upon previously. It is Green Belt permanently protected by the NPPF which prevents the merging of settlements. There are no exceptional circumstances. The site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The proposed industrial development of 7000 sq m is simply not required since the latest Employment Land Needs Assessment 2015
(ELNA) shows a reduction of 80 in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield. A new 4-way interchange onto the A3 at Burnt Common to serve this development would be disastrous for Send. Send Road (A247) would be gridlocked all day. Send would be the through route to Woking for traffic leaving the M25 and A3, the proposed 2,000 houses at Wisley and the 2,000 houses at Burpham. Send cannot take it. In fact, leaving Send Close to join the A247 always takes several minutes due to the traffic loads, during peak times takes a lot longer. The proposals now being brought forward will increase the traffic loads to a huge degree to an unacceptable level.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. Policy A44. 1.9 ha LAND WEST OF WINDS RIDGE AND SEND HILL designated for 40 homes and 2 Travellers Pitches. This site is NEW and was NOT included in the regulation 18 draft and has NOT been consulted upon previously. Development for housing is inappropriate due to its permanent Green Belt status and high quality Green Belt amenity within an area of beautiful countryside which would be spoilt by any development. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is inappropriate due to the narrow width single track country road providing insufficient access to the site. I object to the proposals on this site mainly because it is a please country lane but by definition narrow! The addition of unsuitable traffic, coupled with the inherent danger already existing at the Potters Lane end of the Send Hill make the proposals completely ridiculous.

Whilst School Places do not affect me personally and others are probably more qualified to speak on the subject. As I understand it many did not get their children in to their first choice of St Bede’s, these developments will just make it harder which will mean more traffic on the roads for school runs.

What does affect me is the inability to get a doctors appointment in a reasonable time at the Villages Medical Centre – these developments will add to that pressure, without I would imagine more resources being made available.

So in summary I do strongly object to the proposed unreasonable level of development crammed into such a small area and I hope the review process sees the common sense in keeping the developments to a sensible scale for the area.

WE OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

WE OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Introduction
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

WE OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council has received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
WE OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 – 2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Higheclotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.
The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution, which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

WE OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a Brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.
Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

WE OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

WE OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages, which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

WE OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site, which is in the Green Belt, should not be developed as a Strategic Employment Site when there is a suitable alternative Brownfield site very close by, which is far more sustainable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

WE OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travel card for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
WE OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on Brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature, which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/7181  Respondent: 10854113 / Sarah Pickering  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

WE OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to de-humanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University,
which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve
the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students
were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s
Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or
other university sites. The plan should take account of the university's ability to house its own students and reduce the
housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is
inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

WE OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm
and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk
and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The
price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of
unviability arguments only serves to inflate land values. It will become clear that developments are unviable when
developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location
close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount
of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now
having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the
original owner simply pocketing the profit.

Comment ID: PSLPP16/7186  Respondent: 10854113 / Sarah Pickering  Agent:
WE OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford Borough Housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses through all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals, which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related”. Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
WE OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

WE OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists pass through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing Greenfield over urban, Brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure
will follow on the heels of house building as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean NO development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Answer (if comment is on questions 1-7 of the questionnaire): ()

WE OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy, as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have
considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Answer (if comment is on questions 1-7 of the questionnaire): ()
WE OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Answer (if comment is on questions 1-7 of the questionnaire): ()

WE OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

 Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.
I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition WE OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

WE OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Attached documents:

Comment ID: PSLPP16/7169  Respondent: 10854113 / Sarah Pickering  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

WE OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.
Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

| Answer (if comment is on questions 1-7 of the questionnaire): | () |
WE OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible
change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
It is totally unacceptable to even contemplate the development of houses/industrial units at Wisley Airfield, Garlicks Arch and Gosden Hill Farm. Whilst it is anticipated the plan will ensure sufficient health care and schooling is in place it is totally obvious to any user of the local roads during peak rush hour (both morning and evening) that the A3 and M25 cannot cope NOW and I don't see how widening these roads is going to improve the situation or adding an extra junction...just create more accidents and more delays when trying to exit the A3 for the M25.

This current plan is flawed and needs to be put in the bin. A sensible plan considering current residents, the environment, what is achievable with the major infrastructure needs to be developed. It is not just about the profits that can be made by companies.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Firstly please confirm receipt of this objection to the proposed Local Plan. As a long standing resident of Send under no circumstances should the Green Belt be encroached by any proposed development. The Green Belt provides local residents with a certain quality of life...that is what I have paid for in the cost of my house and I am not prepared for Guildford Borough Council to take that away from me.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Green Belt, Policy 2 at paragraph 4.3.15

Send Business Park now taken out of the Green Belt altogether

I object to the proposal to inset Send Business Park from the Green Belt because:
• It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation

• There is highly restricted vehicular access along Tannery Lane in both directions
• Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Clockbarn Nursery, Tannery Lane, Policy A42

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

• There is a 33% increase from 45 to 60 and its too much
• It ignores all the hundreds of previous objections made by local people
• It will worsen access and traffic problems in Tannery Lane and at the A247 junction
• It will make erosion of the Green Belt in our village worse
• It will make surface water flooding, which is already bad, even worse

Answer (if comment is on questions 1-7 of the questionnaire): ()
Land at Garlick’s Arch, Send Marsh, Policy A43.

I object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the thousands of previous objections made by local people and increases the housing to 400 with 6 travelling showpeople plots. Why?
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It will generate excessive traffic that will block up the local roads of Send and Ripley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Land at Burnt Common, London Road, Policy A58.

I object to Policy A 58 at Burnt Common because:

- It was deleted from the 2014 draft because of all the objections made previously but it has been seen fit to reinclude. Why?
- The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land
- There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt
- The impact on small surrounding roads will create traffic gridlock
- It will join up existing villages and defeat the purpose of the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We object to Guildford Borough Council’s draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog’s Back at Blackwell Farm, which will:

- Destroy view from the Hog’s Back ridge – a nationally designated Area of Outstanding Natural Beauty
- Remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- Increase tailbacks on the A31 and traffic congestion
- Result in rat running through local roads
- Add to Guildford’s pollution

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Conservation of our environment, habitats and declining species and flora and fauna.

The proposed ‘Local Plan’ will have a negative effect on our environment. In recent years there have been serious declines in many species of flora and fauna due to the increase in human population and all that it brings, e.g. Disturbance, air and noise pollution, litter, vandalism, predation by pets.

The site lies within the Green Belt, all habitats within or adjoining A46 are Priority Habitats under the NERC Act and have European Protected Species. This plan will also impact on views from the AONB.

Highways, traffic congestion.

I live on the Guildford Road and it is already very busy and at peak times morning and evening it is very congested. Traffic is queuing every Monday to Friday at peak times. The proposed ‘Local Plan’ would increase traffic on the Guildford Road causing potentially more accidents (which have happened close to my house) and an increase in air and noise pollution. I have not seen any evidence that GBC have produced a successful method of easing congestion on the Guildford Road in conjunction with the proposed ‘Local Plan’.

Local secondary School.

The local secondary schools have been contacted by our Parish councillor’s and their Head teachers have said their schools are under subscribed, so we do not need another secondary school.

GBC’s consultation on the Local Plan was based on the proviso that policy A46 was to be deleted in the absence of justification for the location of a secondary school at the site. The Parish Council has seen no proper justification for the location of a secondary school in this Green Belt site. The selection of the site appears to have been justified on the basis that it will be close to the housing identified in the allocation.

My final thoughts.

I think our ‘Local Plan’ needs to reflect the views of Normandy and local area residents much more closely. The current proposed ‘Local Plan’ includes building over 1,100 houses which in my opinion is far too many.

I realise there may be a need for affordable homes but I strongly object to large scale house building in rural settings like Normandy and Flexford.

If there is a justification for affordable housing in the Guildford area then I would conclude that the people to whom the houses are intended are likely to be working in Guildford centre or close to it. There is no large scale employment in Normandy.

Therefore why can’t GBC get more creative and fully utilise brown field sites in urban areas and consider building attractive low level flats? This will also aid traffic congestion into Guildford as those that live and work in and round Guildford are more likely to use the bus or walk to work.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed new interchange onto the A3 this will cause congestion on the main road right through Send village. Every time the A3 has a traffic problem our road is nose to tail often as far as the Old Woking mini-roundabout, that is a mile and a half of solid traffic. The knock on effect of too much traffic means, Potter’s Lane and Send Marsh Road have the same problem.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the grossly overstated future housing need that underpins the Guildford Borough Plan. I accept new housing is required, but I question the assumptions that have been used. I believe if a more realistic assumption was used, it would be possible to accommodate new housing within existing urban brownfield areas.

I strongly object to removing Send from the Green Belt. Green Belt exists for very good reasons to help protect the countryside from inappropriate development. Once areas are removed from the Green Belt and developed, there is no going back. If the GBC Plan is not reconsidered the scale of development in the Green Belt along the A3 corridor would completely change the character of the area and cause considerable congestion as the A3 and local roads would not be able to cope. The A3 is already congested without this scale of development.

I object in particular to the proposed development at Garlick’s Arch. The proposed 400 houses and commercial units would completely swamp existing local roads, schools & medical facilities. This would be further exacerbated by the proposed new interchange onto the A3 at Burnt Common that I also strongly object to. Current traffic levels are already
too high around Burnt Common. Expanding the A3 junction would cause gridlock all day along A247 and Portsmouth Road. We are already struggling with the current situation of traffic in the area anytime of the day. I also object to the Garlick’s Arch proposal on the grounds that it was not included in the previous consultation in 2014, and was added to the current proposed plan at very late notice, preventing proper due diligence from all interested parties. I also object to the proposed commercial development, as I believe it would make far more sense to expand the current commercial Slyfield area where I understand land is available.

I object to the proposed 45 houses at Clockbarn as the existing roads (Tannery Lane) are very narrow and struggle to cope with current traffic levels. Adding further houses would cause major traffic issues all day long that would also impact Send and Send Marsh areas. In addition, permission has already been granted for a marina development that current infrastructure will not be able to cope – a second development is just nonsensical.

Answer (if comment is on questions 1-7 of the questionnaire): ()
RE: SEND VILLAGE. GREEN BELT INCURSION

It must be wonderful to be a property developer - sitting there with nothing to do except vandalise the Surrey countryside, eagerly perusing your commissioned aerial photographs, greedily peering at open spaces and green bits - totally oblivious to the wonderful fecundity, streams, woodlands and healthy abundance of wildlife there.

The developer sees none of this - just 'business opportunities' where a couple more houses and yet another Tesco Express could be squeezed in ... no conscience, no altruism ... just greed.

In the odd moment of benevolence they salve their consciences by proclaiming they create jobs and provide much-needed housing - which translates to jobs for 3 months and houses that no ordinary person could afford.

A property developer's standing on the social pariah scale is now alongside that of the average MP.

I know quite a few developers .. most of whom are boring, soulless individuals you'd pray you're never stuck in a lift with.

And so here we go again: the annual battle with Guildford Council and their mates - the whittling away of the Green Belt - which was created for a purpose, by people gifted with more wisdom and foresight than the elected guardians we're blessed with now.

I do appreciate your problems on the Council: It can't be easy with the government pouring people into the South East year on year They care little - after all, many of its members will have their fat pensions and a couple of 'consultancies' to fall back on, leaving some other poor sap to try to sort out the mess they've made.

Viewing your list of proposals on this new Local Plan is very depressing:

Light industry? Travellers Sites? Housing Estates? ..

Are you mad??! You hope to push these proposals through with little or no added infrastructure? Oh, please!

The proposed Garlick's Arch and Tannery Lane developments are of particular concern to me.

What your plans should involve is building roads and services for the villages & communities we have now, not piling yet more straws onto the enervated camel's back.

Thanks to much-vaunted 'Austerity' our infrastructure is grinding to a halt: roads can't be maintained, paths and road signs are completely overgrown, making getting about more of an ordeal with every week that passes.

And I wonder if any of you actually ever venture onto the M25's J 10 via the A3? If you value your life, probably not - it is now increasingly dangerous. Or maybe try to head down the A3 past Guildford? Um, excuse me: WE CAN'T COPE NOW!

It's no use you hoping against hope that the traffic fairy will come along, wave her wand and for your problems to disappear ..

They won't.

Mid Surrey is not some gigantic Monopoly board with bits to be cherry-picked and flogged off to make a fortune - No, it's an example of England at its finest. But won't be if you get your way.
Speaking as one who's rapidly grown to love the place and its inhabitants, it's all too apparent that the good residents of Send and its environs are up in arms and ready to do battle with this intended vandalism ... and frankly, who can blame them?

The developers, who obviously consider themselves 'Oh so clever" have the resources to pay people to keep their applications coming, then revised application compounding revised application, confident that sooner or later we Plebs will get bored of protesting, thus clearing the way for their ugly, cash-rich developments.

Think again ... We won't

Please add my name to the growing list of objectors ..

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As recently as last month it was all going so well for the Tories set fair for a thumping Parliamentary majority around the seventy mark, to provide a rock-solid mandate to do whatever they liked for the next five years. But of course fate decreed otherwise; the PM, along with her equally out-of-touch advisers, crushed that dream in 10 minutes flat by alienating millions of core voters.

However, it seems this same detached thinking continues outside Central government - the regions, especially the moneyed ones, still think they can carry on as though the promised landslide had actually happened. It must be wonderful to be a property developer - sitting there with nothing to do except vandalise the Surrey countryside, eagerly perusing your commissioned aerial photographs, greedily peering at open spaces and green bits - totally oblivious to the wonderful fecundity, streams, woodlands and healthy abundance of wildlife there.

The developer sees none of this - just 'business opportunities' where dozens more houses and yet another Tesco Express can be squeezed in ... no conscience, no altruism ... just flat out greed. In the odd moment of munificence they salve their conscience by proclaiming they create jobs and provide much-needed housing - which translates to jobs for 3 months and houses no ordinary person could ever afford. A property developer's standing on the social pariah scale is now alongside that of your average MP. I know quite a few developers., most of whom are boring, soulless individuals you'd pray you're never stuck in a lift with.
And so, here we go again: the annual battle with you on Guildford Council and your select band of friends, and the whittling away of the Green Belt - which was created for a purpose, by people gifted with more wisdom and foresight than the elected guardians we're blessed with now. I do appreciate your problems on the Council: It can't be easy with government pouring people into the South East year on year They care little - after all, many of its MPs will have their fat pensions and a couple of 'consultancies' to fall back on, leaving some other poor sap to try to sort out the mess they've made.

Viewing your list of proposals on this new Local Plan is very depressing:

The proposed Garlick's Arch and Tannery Lane developments are of particular concern to me. You'd proceed with little or no added infrastructure?! Oh, please! What your plans should include is building roads and services for the villages & communities we have now, not piling yet more straws onto the weary camel's back. Thanks to much-vaunted 'Austerity' (that went well, didn't it??) our infrastructure is grinding to a halt: roads can't be maintained, and paths and road signs completely overgrown, Don't you realise? - WE CAN'T COPE NOW! Or perhaps you just don't care ... even more unforgivable. It's no use you hoping against hope that the traffic fairy will come along, wave her wand - and all your problems will disappear.. They won't.

Mid Surrey is not some gigantic Monopoly board with bits to be cherry-picked and flogged off to your mates to make a fortune - No, it's an example of England at its finest. But won't be if you get your way. Some of your speculator friends, ready to swoop like the greedy vultures they are, don't even know where Guildford is some of them probably aren't too sure where England is - so why should they care what happens to this lovely corner of it? Speaking as one who's rapidly grown to love the area and its denizens, it's all too apparent that the good residents of Send and its environs are up in arms and ready to do battle with this wilful and studied vandalism and frankly, who can blame them? The developers, who obviously consider themselves oh-so-clever, have the resources to pay people to keep their applications coming, then revised application compounding revised application, confident that sooner or later we Plebs will get bored of protesting, thus clearing the way to sneak through their ugly, cash-rich developments.

Think again We won't.

Please add my name to the long list of objectors..

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
9. I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

6. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are **no exceptional circumstances** which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is **not** an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:
• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding
• The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

5. I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. E.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Answer (if comment is on questions 1-7 of the questionnaire): ()

8. I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

The Garlick’s Arch (A43) proposal would double the built area in the locality, and would irrevocably damage the character of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2172  Respondent: 10855553 / Emma Tallick  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

12. I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2167    Respondent: 10855553 /Emma Tallick    Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that.

The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous and unsustainable traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2173    Respondent: 10855553 /Emma Tallick    Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

13. I object to the lack of proper infrastructure planning for sites (Policy I1)

The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

14. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

I wish these objections to be fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2171  Respondent: 10855553 / Emma Tallick  Agent:

Answer (if comment is on questions 1-7 of the questionnaire): ()
11. I object to poor air quality concerns (Policy I3)

The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2166  Respondent: 10855553 / Emma Tallick  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2168  Respondent: 10855553 / Emma Tallick  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4. I object to development in areas which are at risk of flooding (Policy P4)

The Plan does not take adequate account of flood risk as required by National Planning Policy.

The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016).

These are my main reasons/ I object on these grounds / …

1. **I object to the Local Plan as the development proposed is not sustainable** (Policy S1)

13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially Ripley, Send and Clandon. The local communities don’t need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Plan has nothing to improve the infrastructure for Garlick’s Arch.

The development should be in urban areas where there is sustainable transport.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
7. I object to the Borough Wide Strategy (Policy S2)

GBC’s proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey.

The Plan is unbalanced across the borough; there’s too much development in the north east of the borough (Wisley [A35], Ripley/Send [A43] and Clandon [A25]). 36% of all the Plan’s new housing is proposed in this area, which has only 11% of the existing housing.

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/1807  Respondent: 10855713 / Janet Holland  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to express my deep concern and anger over the recent new building proposals for Send.

I was saddened by and strongly object to Send being removed from Green Belt status. This will permanently alter the character of the village and will only open the way for yet more building development in the future. One of the main reasons we have chosen to live in Send is the fact it is surrounded by fields which gives it its rural status. With building on the Green Belt land our village feel and status will be irreversibly lost. Green Belt is exactly what it says it is and is there to protect the nature of places, provide open green spaces and enhance the lives of those that live there. Once lost, it is lost forever!

I am very concerned and strongly object to the way Guildford Borough Council have tried to 'sneak' these plans through without proper consultation. Significant changes legally require full consultation under Regulation 18. Since the last consultation major development proposals have been added to the plans and the council are obviously trying to quietly push them through. The 2014 proposal for 430 houses went down to 185 in April 2016. These have now gone up to 485! Every major site proposed for development in Send has been changed and a massive new road junction added on. I am disappointed in the councils' approach which has been very underhanded and dishonest to the people of Send.

Send already struggles with the large amount of traffic driving through the village which of ten results in long queues and tail backs. The infrastructure will not be able to cope with all these new build proposals. You cannot just take a small village and dump hundreds of houses and large industrial developments onto it and expect it to work. There are not enough school places, it is already extremely difficult to get a doctor's appointment at the medical centre, the roads will be permanently grid locked and the status of village and village life will be gone forever. We do not wish to be an extension of Guildford but wish to remain a separate village with our own identity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/3550  Respondent: 10855713 / Janet Holland  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )  

Answer (if comment is on questions 1-7 of the questionnaire): ()  

I strongly object to policy A43. 30ha Land at Garrick’s Arch. There is no need for more houses on top of the 13,860 already proposed by the borough. It is Green Belt protected by the NPPF which prevents the merging of settlements. It is covered in ancient woodland with trees dating back to the 16th century and once lost, is lost forever. The latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. Therefore the proposed industrial development of 7000sqm is not needed. The obvious place for any new industrial development is at Slyfield, Guildford - an industrial site already set up and running. There would then be no need to have to build a new 4-way interchange onto the A3 at Burnt Common to serve this industrial development. Surely saving money!  

What changes (2016)/further amendments (2017) do you suggest should be made to the document?  

Attached documents:  

Comment ID: PSLPS16/3552  Respondent: 10855713 / Janet Holland  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )  

Answer (if comment is on questions 1-7 of the questionnaire): ()  

I strongly object to policy A44. 1.9 HA Land West of Winds Ridge and Send Hill. This has been designated for 40 homes and 2 traveller's pitches.  

Where has this come from? It was NOT included in the regulation 18 draft and has NOT been previously consulted on. This is an area of unspoilt natural beauty and should not be destroyed. The subsoil is documented as containing unsafe land fill waste which is currently vented, thereby making it unsuitable for development. Anyone visiting the village will be aware of the enormous volume of traffic it experiences daily especially during morning and evening rush hours and school drop off and collection times. The junction at the bottom of Send Hill already struggles to cope. Adding yet more houses and traveller pitches (with caravans) will make this junction impossible to cope and dangerous. Send Hill is a arrow width single track country road and certainly not built for so much extra daily traffic. Surely common sense dictates this is not a sensible idea.  

Thank you for taking the time to read my concerns. Please do not allow Guildford Borough Council to 'sacrifice' the village status of Send with its beautiful surrounding countryside.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the 2016 draft local plan for reasons as follows

1. The underhand and cynical way Guildford Borough Council pushed in a proposal for 400 houses and 7000 sqm of industrial space and a 4 way junction at Garlick’s Arch Burnt Common. This will entail destroying ancient woodland and encroaching on Green Belt Land. This proposal was supposed to be at Slyfield a brown field site altered at the last minute. Anyone local to the area will remember half of send marsh flooded when water came down from Clandon and Newlands corner across the A3 at the dip and flooded Send Marsh as the stream couldn’t cope with the amount of water. Remove the woods and natural soaking system is gone. Concreting over these woods is madness do we need industrial units in this area? So much for protecting Green Belt.

• Infrastructure - the Plan does now recognise that the infrastructure will need to be expanded to accommodate the proposed new developments, but is vague on the details and the timing of any improvement. In the case of the proposed Gosden Hill development there is mention of a new exit off the A3, but no commitment or requirement that this be in place before any development can begin. There is no mandatory linking to the A247 which would provide an alternative route into Guildford (via the A246); it is therefore possible that all traffic travelling from the new development to Guildford would be routed along the A3100 (London Road) which simply will not cope. The plan goes on to say 'Interventions will be required which address the potential highway performance issues which could otherwise result from the development,' which acknowledges the traffic issue without saying what solutions the Council has in mind. Clarity on this is paramount.

Attached documents:

---

Comment ID: PSLPS16/5680  Respondent: 10856353 / David Howells  Agent:
A 24 Double impact with Slyfield Regeneration Project. The impact of any development at Gosden Hill must also be viewed in conjunction with the proposals at Slyfield. More than 20% of new housing in the Draft Local Plan is proposed within a 2 mile radius of Burpham which is hugely disproportionate to this region compared to the borough as a whole.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

A25 Density of housing at Gosden Hill (2000 homes plus promised increased infrastructure, albeit in a slightly expanded area since the 2014 Plan) being out of character with that of the surrounding area. This is unlikely to make the development a pleasant place for people to live and will have an adverse knock on effect for the residents of Burpham in terms of traffic volumes and proximity to open space. It is a development with the same number of dwellings as Burpham itself, yet built in an area which looks to be about half the size. The existing community will simply be swamped by a development of this size.

• S2 The assumptions about the number of houses needed by 2033. No doubt this figure, which I already find suspect, was prepared before the Referendum decision to Brexit. Politicians have repeatedly warned that this will cause house prices to plummet (due to falling demand) and that immigration numbers will fall, thus reducing pressure on future housing needs. The housing need should therefore be reassessed in the light of the country's decision to leave the EU.

• S2 I apologise for the brevity of this response to the 2016 Draft Local Plan, but I simply have not had time to consider all 255 pages in the short period of consultation allowed.

<td>1. <strong>EVIDENCE.</strong> GBC have failed to provide sound evidence in terms of the Employment Land Needs Assessment 2015 (ELNA) which shows an 80 reduction in employment space from the previous ELNA carried out by GBC in 2013. This means that industrial space at Burnt Common is no longer needed. Housing numbers from the Strategic Housing Market Assessment 2015 (SHMA) are highly questionable. The number of foreign students has been wrongly used to inflate the need. The required 13,860 houses in the local plan is <strong>exaggerated.</strong> If the population is to grow by some 20,000 in the plan period, we actually need 8,000 homes (based on an average of 2.5 persons per home). The Green Belt does not need to be built over. <strong>50 of new homes needed could be built on brownfield sites!</strong> GBC's Transport Assessment was not even available to councillors for the vote taken on 24 May, being published on 6 June. Infrastructure overload has received scant attention. GBC Officials seem to be blind to the concept of using brownfield sites but just take the easy of option of removing Green Belt in areas that do not generally affect them directly.</td>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have strong objections to the latest version of the local plan as recently published and in particular as it affects Send and our local environment.

It seem to me that many of the objections raised a year or so ago, which on the surface seemed to have been taken into account of, have now been completely disregarded in the latest version and several new projects introduced, all of which have an adverse effect on the village. In particular the concept of taking Send completely out of the Green Belt classification.

In my view, we do not need as many houses as the government think, what we need is less people but that is a matter for the national government to resolve with the electorate at large.

I would ask that this letter of objection and my comments below be seen by the Inspector.

1. GBC HAVE NOT FOLLOWED CORRECT

Since 2014 GBC has changed every major site in Send proposed for development and now just added a massive new road junction. The 2014 proposal for 430 houses went down in April 2016 to 185 and has just gone up again to 485. These significant changes require another full consultation under Regulation 18, not the short cut of Regulation 19 which GBC are trying to get away with. This invalidates the whole process and I object strongly to GBC officials completing ignoring the views of the local population who elect them.

2. EVIDENCE

GBC have failed to provide sound evidence in terms of the Employment Land Needs Assessment 2015 (ELNA) which shows an 80 reduction in employment space from the previous ELNA carried out by GBC in This means that industrial space at Burnt Common is no longer needed. Housing numbers from the Strategic Housing Market Assessment 2015 (SHMA) are highly questionable. The number of foreign students has been wrongly used to inflate the need. The required 13,860 houses in the local plan is exaggerated. If the population is to grow by some 20,000 in the plan period, we actually need 8,000 homes (based on an average of 2.5 persons per home). The Green Belt does not need to be built over. 50 of new homes needed could be built on brownfield sites! GBC's Transport Assessment was not even available to councillors for the vote taken on 24 May, being published on 6 June. Infrastructure overload has received scant attention. GBC Officials seem to be blind to the concept of using brownfield sites but just take the easy of option of removing Green Belt in areas that do not generally affect them directly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. **POLICY A 43.30 ha LAND AT GARLICK’S ARCH, Burnt Common, designated for 400 houses** and 7,000 sq m of industrial and warehousing. I object to these plans as I feel there is no need for any more houses on top of the 13,860 already proposed for the borough. This site is **NEW** and was not included in the Regulation 18 draft and has **NOT** been consulted upon previously. It is Green Belt permanently protected by the NPPF which prevents the merging of settlements. There are no exceptional circumstances. The site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The proposed industrial development of 7000 sq m is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80 in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield. A new 4-way interchange onto the A3 at Burnt Common to serve this development would be disastrous for Send. Send Road (A247) would be gridlocked all day. Send would be the through route to Woking for traffic leaving the M25 and A3, the proposed 2,000 houses at Wisley and the 2,000 houses at Burpham. Send cannot take it. In fact, leaving Send Close to join the A247 always takes several minutes due to the traffic loads, during peak times takes a lot longer. The proposals now being brought forward will increase the traffic loads to a huge degree to an unacceptable level.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. 4. Policy A44. 1.9 ha LAND WEST OF WINDS RIDGE AND SEND HILL designated for 40 homes and 2 Travellers Pitches. I object to this site as it is NEW and was NOT included in the regulation 18 draft and has NOT been consulted upon previously. Development for housing is inappropriate due to its permanent Green Belt status and high quality Green Belt amenity within an area of beautiful countryside which would be spoilt by any development. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is inappropriate due to the narrow width single track country road providing insufficient access to the site. I object to the proposals on this site mainly because it is a please country lane but by definition narrow! The addition of unsuitable traffic, coupled with the inherent danger already existing at the Potters Lane end of the Send Hill make the proposals completely ridiculous. Whilst School Places do not affect me personally and others are probably more qualified to speak on the subject, as I understand it many parents did not get their children in to their first choice of St Bede’s, these proposed developments will just make it harder which will mean more traffic on the roads for school runs.

What does affect me is the inability to get a doctor’s appointment in a reasonable time at the Villages Medical Centre now – these developments will add to that pressure, without I would imagine more resources being made available.

So in summary, I object to the proposed unreasonable level of development crammed into such a small area and I hope the review process sees the common sense in keeping the developments to a sensible scale for the area.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

I object to the proposal in the local plan for the following reasons:

- The site is not large enough for the proposed use
- Send hill is a single track country road and too narrow to accommodate the potential new levels of traffic the proposed development would bring.
- Send is in the green belt, so the proposed inset is inappropriate due to its permanent green belt
- The existing road and parking is already inadequate and under pressure and would worsen with the planning development and the additional cars this would incur, its particularly bad at the school run.
- The proposed plan could increase flood risk as a report march 2004 gave evidence of past ponding in the excavated area and further development would disturb the water table.
- I believe there is a danger that any disturbance would be a health hazard due to unknown materials having been placed in this landfill site.
- Southern County Searchers report Jan 2005 identifies the site as potentially contaminated industrial land with usage of unknown constituents. Changes to the site could cause potential ground water vulnerability to my property.
- Travellers accommodation assessment research purported to have been taken June/July 2012 by hill field services cannot be so. This market research company was dissolved in Jan 2011
- Guildford BC has recorded methane gas discharge since 200

## Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the building of houses at Clockbarn Nursery.

The junction with Tannery Lane and the Send Road is permanently busy and potentially dangerous.

It is not an easy junction to get in and out of - at any time of day.

Tannery Lane is nothing more than a country lane. To build additional housing and the proposed Marina, combined with the proposed A3 interchange will undoubtedly have a major and damaging effect on residents and traffic congestion.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the building of 400 houses and industrial space at Garlick's Arch.

This is an area of ancient woodland and should remain so.

The junction of the Send Marsh Road and the Old Portsmouth Road is always difficult and at times dangerous.

There is a 40mph on this stretch of road, and we have witnessed many accidents and near misses at this junction in the 26 years we have lived here.

Building 400 homes and an industrial site will have an effect on vehicles trying to exit the Send Marsh Road and will increase the number of accidents/near misses occurring.

There is no requirement for industrial space at this site can and should there be the need then this should be accommodated within the existing site at Slyfield.

I OBJECT to Send Village being removed from the Green belt.

By so doing would have a detrimental effect on the surrounding area(s) allowing developers a "free for all " approach to extend/develop beyond what is required/needed for the area.

We need to maintain a Green Belt buffer zone between Send & Woking.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Having lived my entire life as a Surrey Resident I am extremely concerned as to the level and extent of development being proposed for Surrey.

Surrey has always been to me a county of outstanding natural beauty -this needs to remain so.

Surrey has beautiful villages clearly defined by separation by areas of fields & woodlands-this needs to remain so.

The proposal for the developments in and around Ripley & Send and the proposal that they should be removed from the Green Belt will urbanise these villages and in effect will morph both Woking and Guildford together.

Our local services, roads and Doctors Surgery cannot deal with any further increase in development.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

House prices and affordability. It is expensive to live in the Horsleys. Would the new homes have government subsidies to make them affordable for people? Other wards in the county have land to build on, green belt or not, and are in designated areas of deprivation. Ash and Tongham are such wards identified by the Council as priority areas to invest and improve. What of house prices? Would so many extra houses stagnate house prices in the villages? Another major reason for being here is that is so desirable, build on the green belt and you reduce that desirability.

I strongly urge you to reconsider, debate and propose a new strategy. One that does not take away our green belt and one that is focused on the wards you have identified as priorities where there is infrastructure to support new housing developments.

I would like to lodge my objection to the Proposed Local Plan.

I object on the following grounds:

Education. The Raleigh already operates at full capacity with no land to expand into. Places are in demand and extra housing means even more demand. Where would those children go to school and what of the others who would usually fall into the catchment area? Would that shrink to accommodate the increased demand? Furthermore, Surrey County Council has no plans to build new schools in the area.

Roads. The roads in the villages are busy and sometimes dangerous. There's already many housing works taking place with vans and lorries delivering and construction blocking or reducing access. Part of the beauty of the villages is that it's commutable distance to many places of work but isolated enough to have a countryside feel to it. Don't take that away.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

5. APPENDIX D

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant
infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highecotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays

  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.
A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6803  Respondent: 10857249 / Alice Pashley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces
pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.
The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/14644  Respondent: 10857249 / Alice Pashley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14655  Respondent: 10857249 / Alice Pashley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6
I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.
4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.
Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to other towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy II)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy II. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure
will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have
considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

I have particular concerns about the growth in traffic on our already overburdened roads, in particular the A3, which is frequently gridlocked at peak times, and the A247, which despite its A road status is too narrow to allow for two large vehicles to pass each other. Only last week I witnessed the aftermath of an accident on the A247 and another near-accident in the same place. The unsustainable increase in housing numbers will add to the traffic in a way which the roads cannot cope with.

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.
This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the
flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-
commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/14640  Respondent: 10857249 / Alice Pashley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running
through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework.
Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying
sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the
area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy
does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be
taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate
developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach
of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government
policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of
sustainable development in practice and is one of the most important factors affecting sustainable development in the area
covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the
Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least
one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank
rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development
bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of
sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF
paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National
Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact
existing local communities by over-development, particularly for the villages between Guildford and the M25, including
Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development
proposed. The proposed developments do not meet the needs of the local communities.
The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.
The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper account of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.
It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4509  Respondent: 10857249 / Alice Pashley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding
is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site
will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4511  Respondent: 10857249 / Alice Pashley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.
13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.
14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We need a sensible plan, that supports realistic growth requirements with new housing and infrastructure projects that will create new jobs and transport facilities accordingly. We need to find a balance and respect the countryside around Guildford!

Why is that each year I find myself having to write to the council in protest at plans drawn up under your guidance? We live in West Clandon, a beautiful village of historical significance and charm. We use our local facilities and support local businesses in and around the Guildford area, but in order to do this we have to work in areas other than Guildford as there is simply not the infrastructure in our local area to provide jobs for the current level of housing (or suitable, reliable transport links in and out of Guildford), let alone an aggressively expanded plan which you are putting forth once again.

The land at Guildford Cathedral is currently designated as Protected Open Space. I object to the proposed change in status of this site to C3 housing on the grounds that it would have a significantly negative impact both on the wildlife and local community, and also importantly would ruin the vista of Guildford Cathedral, a historic landmark for Guildford and tourist attraction.

The proposed development of 100 dwellings at Guildford Cathedral would negatively affect the local community in terms of:

- Significant traffic congestion on Guildford Park Road leading into the town centre and out towards the A3 will only worsen due to the developments proposed in and around Walnut Tree Close, Guildford Station, along Farnham Road and Cathedral land. Given the recent road traffic accidents around the Friary Centre which
resulted in a fatality and serious injuries, proposed development of the Cathedral land would result in congestion on Alresford Road, Benbrick Road and Ridgemount which are not equipped to deal with the throughput of vehicles from a further 100 dwellings, making it quite unsafe for pedestrians and the local community comprising of children. Moreover, the inadequate pavements in the area and bus depot at the bottom of Ridgemount makes it difficult and potentially unsafe for cars and pedestrians as buses manoeuvre in and out of the premises.

- Inadequate local infrastructure including schools
- Damage to local housing in Alresford Road, Benbrick Road, Ridgemount and Scholars Walk due to problems related to subsidence and inadequate draining.
- Damage to natural wildlife

Given the large number of proposed new dwellings for Guildford town centre, Onslow and surrounding areas, it is even more crucial that the Protected Open Space at Guildford Cathedral remains protected to ensure the health and wellbeing of the local community, natural wildlife and reputation of Guildford city and its historic landmark.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to this policy

The emphasis on energy and waste hierarchies and reduction of carbon emissions as part of building design are welcomed.

The building of dormitory towns is unsustainable and will require increased car use. This will lead to increased congestion, more air pollution and higher carbon dioxide emissions.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/8856  Respondent: 10857889 / William Kyte OBE  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this policy

There are effectively two separate parts to this policy, both are flawed, and in the case on insetting, fatally flawed.

There is a need for expansion in social housing, especially in urban areas, where there is a greater concentration of low paid workers such as those employed in the retail, warehousing and distribution sectors.
The number of homes planned in the urban area is too low. There is a need for regeneration in some areas, but this is ignored and instead the plan concentrates on building homes on green field sites. Over cramming and alien high-rise developments in the town must be avoided.

The plan envisages a large expansion of the traditional retail sector, but this is a sector in long term decline, which will continue to accelerate with the growth in online shopping.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E5: Rural Economy

I OBJECT TO THIS POLICY as written

This policy should only apply to small-scale development in rural areas which means development of less than 100 sq m (gross) which is in keeping with the permanence and amenity of the green belt.

Use of rural areas for town centre uses without applying the sequential approach is against the principles of localism which means that local people should be consulted and heeded. Villages need protecting both in terms of design and in terms of scale.

Previous commitments to improved high-speed broadband and mobile phone coverage have now been diluted, despite general support.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E6: The leisure and visitor experience

I OBJECT to this policy

Tourism and visitors do not depend on new visitor attractions and facilities which will undermine the area. Overdevelopment will destroy the very things that make Guildford a very desirable place to live, work in and to visit.

Guildford, surrounded by the natural beauty of the Surrey Hills, is already distinguished as an historic county town. The historic part of the town should be exploited to the full. This should be linked to the attractions of the Museum, the Castle, the River Wey and the historic High Street including its views of the Hogs Back.

Guildford should model itself on other historic towns like Bath, Chester and York by capitalising on its unique strengths.

It would be a great mistake if Guildford were to opt for large impersonal department stores and dull high street chain stores at the expense of exploiting its uniqueness and character which would afford greater benefits.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/8863  Respondent: 10857889 / William Kyte OBE  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E7: Guildford Town Centre

I OBJECT to this policy

There should be much more residential use of the town centre. There is a very limited need for further retail, which will disadvantage existing retailers and the unique High Street.

The town centre lacks essential shops such as butchers, grocers, bakers which need support.

A central bus station and shuttle must be provided and priority must be given to bus/rail interchange to enable sustainable transport

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H1: Homes for all

I OBJECT to this policy

The housing mix is based on the flawed assumptions and calculations in the Strategic Housing Market Assessment (SHMA) which has not been scrutinised nor evaluated.
Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up suitable family accommodation in the urban area.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs and this should be taken into account when evaluating need for travellers.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

I OBJECT to this policy

Affordable homes, under national definitions, means homes which are sold or rented at 80% of market value. This means that these homes will not be cheap, and starter homes will not be made available for local people. There is a viability clause (4.2.40) which means that in practice this could be unenforceable.

There is a need for more social housing.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

Policy I1: Infrastructure and delivery

I OBJECT to this policy as it stands

Various aspects of infrastructure are acknowledged as congested, inadequate for the existing population and not able to accommodate much growth.

The methodology commissioned by the Council to assess traffic and the corresponding roads infrastructure needs is inadequate for the purpose of the Local Plan.

With regard to SANG provision, GBC has demonstrated that it has no genuine interest in conserving and enhancing biodiversity and clearly regards the Thames Basin Heaths SPA as an obstacle to be overcome rather than a valued asset. GBC is failing to take account of existing biodiversity at sites selected for SANG provision.

Areas identified as SANGS should not be developed and urbanised.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy I2: Supporting the Department for Transport’s “Road Investment Strategy”

I OBJECT to this policy as it stands.

Very significant traffic constraints should be applied to the OAN for this Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Policy I3: Sustainable transport for new developments

I PART SUPPORT, PART OBJECT to this policy.

I support the concept and aim but OBJECT on the grounds that the practicalities of sustainable transport have not been properly considered.

A central bus station and shuttle bus service in the town centre are essential for existing development and are crucial before any new development.

While I welcome the intention to encourage rail travel by adding two new stations, there could be unintended consequences.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy I4: Green and blue infrastructure

I OBJECT to this policy

The Policy shows concern for conserving and enhancing biodiversity, which is welcome.

There is no mention of the impact of the plan on food production, or of monitoring the loss of agricultural land.

The River Wey must not be subject to overdevelopment which would destroy its naturalness and a green corridor must be preserved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8874  Respondent: 10857889 / William Kyte OBE  Agent:

Policy P1: Surrey Hills Area of Outstanding Natural Beauty

I OBJECT to this policy as it stands.

Whilst I welcome the inclusion of a policy to protect the AONB in the draft Local Plan, I OBJECT to Policy P1 and its supporting text, which I consider has weakened the protection of the AONB and the AGLV from the previous draft Plan.

It does not protect natural beauty which is the prime reason for the existence of the AONB.

The Surrey Hills needs much more substantial protection. Even major development in the AONB would be permitted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8875  Respondent: 10857889 / William Kyte OBE  Agent:
<table>

</tr>
</tbody>
</table>

**Policy P2: Green Belt**

I OBJECT to this policy.

This ignores the Green Belt as a constraint as set out in the NPPF and has weakened the interpretation of exceptional circumstances.

Villages should continue to be washed over by the Green Belt in order to preserve their integrity and character.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Policy S1: Presumption in favour of sustainable development**

I OBJECT to this policy.

While this wording is based on the National Planning Policy Framework (NPPF) – which is binding - this policy fails to recognise that development in rural areas, with inadequate transport and other infrastructure, cannot cope with the proposed scale of development. It is unsustainable. This should represent an absolute constraint on development. It also fails to balance the three prongs of Sustainable Development (economic, social and environment) being heavily biased to economic development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** PSLPP16/8880  **Respondent:** 10857889 / William Kyte OBE  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Policy S2: Planning for the borough – our spatial development strategy**

I OBJECT to this policy.

13,860 homes are proposed. The assumptions and calculations underlying the model are hidden. It is not reasonable to produce unsubstantiated numbers in order to justify major structural change in a widely protected area.

It is inappropriate to allocate this housing number, either over the plan period or across projected sites, when the number is unsubstantiated.

Eminent external consultants and members of the public have shown that the OAN is flawed and overestimates the housing need.

Furthermore constraints, which are especially needed in a gap town, have not been applied

If the housing number were substantially lower, and only met real housing need, there would be no need to build on Green Belt or open countryside, or to over cram the town with high-rise buildings.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
**Comment ID:** SQLP16/1227  **Respondent:** 10857889 / William Kyte OBE  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

Key parts of the evidence are missing, flawed or based on withheld assumptions. The Strategic Housing Market Assessment (SHMA) overstates housing need. The Green Belt and Countryside Study uses a flawed approach. The Transport evidence is too late and incomplete to inform the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

The Plan shows inadequate regard to national policy which attaches great importance to the openness and permanence of the Green Belt. The test of exceptional circumstances has not been rigorously demonstrated. The Sustainability Appraisal has not applied the concept of sustainable development.

The Plan has had such substantial changes since the last Regulation 18 consultation that it should be subjected to a further Regulation 18 consultation.

The Local Plan has been prepared against a predetermination by the GBC Executive to ‘roll back the Green Belt’ which has destroyed objectivity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Attached documents:**
**Comment ID:** SQLP16/1229  **Respondent:** 10857889 / William Kyte OBE  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

It is unsound and unsustainable to develop on the scale proposed. The housing target and substantial increase in retail space should be reduced to take account of the constraints and the growth in online retailing.

Sustainable transport cannot be realised without a central bus station and a proper bus/rail interchange.

The implications of Brexit need to be considered and taken into account.

The changes essentially preclude building in these brownfield areas. Suitable designs can protect against flood risk and free up land for suitable development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp17q/317  Respondent: 10857889 / William Kyte OBE  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

The Local Plan remains unsound because it is based on flawed evidence and constraints have not been properly applied which lead to an overestimated housing figure. Some of the changes made in this draft exacerbate this.

The 2107 Draft Local Plan is still deeply flawed and should be rejected to enable these flaws to be corrected.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Your papers also contain comments on the type of housing that you would wish to see in the Horsleys. Here again your approach is flawed as 533 new homes of the type you describe would be wholly out of keeping with the village. It is an observable fact that many Horsley houses are large and on large plots and that is why people have bought them. Furthermore, you reflect this fact in the heavy Council tax bills we pay from which Horsley residents derive few benefits.

You need a major re-think and a concentration on the more than adequate brownfield sites in the Borough.

Stated Government policy is that areas should only be taken out of the Green Belt in exceptional circumstances and you have not demonstrated that those circumstances apply in the case of the Horsleys. It is accepted that on your planning watch you have permitted some infill development in the main East Horsley village, but south of the A246 there have been no extra dwellings in decades. Indeed, you have previously advised me that the Warren and Rowbarns Way are in an Area of Outstanding Natural Beauty - i.e. the Surrey Hills. In the circumstances, how can you possibly permit a re-designation from AONB status to a planning free-for-all; that would be an act of quite inexcusable planning vandalism?

Re: New local plan

I am writing regarding the revised local plan you have recently published which, despite its volume (no doubt designed to befuddle those who elect you), appears to wholly ignore earlier feedback and to contain fatal flaws.

Firstly, as regards likely population demands, your projections (such as they are) need to be re-visited in the light of Brexit. Your proposal for up to 533 new homes in the Horsleys with possibly another 2,000 on the Wisley site (under two miles away) would represent a disgraceful urbanisation of what is still a predominantly countryside area, with little thought given to the infrastructure consequences and certainly no guarantees that these will all be addressed in advance of any building.

I would like to inform you of our objections to the New Local Plan 2016, especially in relation to the proposed developments at Wisley Airfield and also to the proposals for more than 500 new homes in East and West Horsley. We believe that these proposals, which would remove the Horsleys from the Green Belt, are a significant over-development and would totally swamp an already overloaded infrastructure - I've had my wing mirror knocked more than once at the Ockham Road South 'pinch-point', heaven help us if it has to withstand the traffic required to construct an entire new town!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

It's not too late to go back to the drawing board and avoid years of being thought of as the administration that ruined so many lovely areas. We'd all accept some development - but please keep it in fair proportion.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to lodge my objection to the 2016 local plan for Guildford,

**The Green Belt was put in place to**

- To check the unrestricted sprawl of large built-up areas;
- To prevent neighbouring towns merging into one another;
- To assist in safeguarding the countryside from encroachment;
- To preserve the setting and special character of historic towns; and
- To assist in urban regeneration, by encouraging the recycling of derelict and other urban land.
- I cannot understand how the draft local plan abides by what the Green belt is meant to be and so I strongly object to what is being proposed
- I object to the building on green belt land altogether (this is against Government stated commitments for Green Belt protection)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/251  Respondent: 10858657 / Fiona Gray  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I strongly object to the development of Waterloo Farm, Horsley

Planning permission for 3 dwellings was rejected in 2014

The land is regularly flooded and waterlogged

The area is categorised as a Paddock, with mature trees and wildlife.

There is insufficient access routes for households or emergency services.

120 dwellings would have massive impact on traffic on the Ockham Road

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object to the plan on the grounds of insufficient infrastructure around local services

The plan fails to identify adequate infrastructure improvements to support the huge scale of development.

Local services such as Doctors, Dentists, Nurseries, Primary and Secondary Schools are all operating at capacity, or close to capacity.
Utilities and Sewerage, Rain Floodaways, Increased road and rail usage, all need to be accounted for.

The impact on Police and other Emergency services and access routes need to be considered, but there are inadequate plans to meet these demands.

Within Horsley there is just the single Doctors Surgery, and organising an appointment is currently very difficult, so further households will stretch these services to breaking point.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the local plan as it will increase congestion on road infrastructure that can't cope

The area has too much road traffic at present, and the rural roads are in poor condition through overweight traffic (lorries and coaches) damaging the surface, particularly evident in our local area along East Lane, and the Drift, Horsley.

An increase in housing as proposed will lead to a substantial increase in cars, and in turn traffic. Leading to congestion, increased traffic noise, traffic pollution, increased accidents and a detrimental effect to the environment both physical and social.

I object on the grounds that there is insufficient rail infrastructure

Parking at both Effingham and Horsley Train Stations is currently at capacity, with no room for further parking during peak hours.

I object due to the congestion that the actual development will cause

Before any development can commence, trunk roads and access routes to the areas would need to be improved to enable the access of vehicles.

There are no such plans for the A3 and M25 and the local rural roads can't handle the construction traffic.

I object due to insufficient plans for meeting commuter needs

Without a regular bus network, footpaths, cycle ways, sufficient train frequency, increased road network, then the proposed plan will not be able to accommodate the needs to commute.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

| I object to the local plan as it does not protect the green belt. |
| Multiple villages and their surrounding areas will be removed from the green belt, resulting in urban sprawl. |
| Villages will lose their identities as a result of their sprawl. Ancient Woodland will be destroyed, wildlife will be impacted due to the loss of their natural habitat. |
| For instance at the site of Waterloo Farm there are regular sightings of Deer, Peacocks and Rabbits along with a variety of birds. |
| The plan should concentrate solely on brownfield sites, leaving the current green belt intact. |

**DEFINITIONS AND SOURCES**

To review a local plan from a standing start is a big task and has required a lot of reading and detailed research. Along the way I have come across well informed opinion from individuals and organisations and I make no apology for including what I believe are correct and clearly expressed statements regarding the wide ranging issues to hand. I would therefore like to give thanks to others for their valuable contributions. However, I have of course referenced all statements made by retained consultants by GRA and CPRE e.g. NMSS and Green Balance.

NMSS is a consultancy company specialising in housing demographics whose principal is Neil McDonald

Green Balance is a consultancy company specialising in housing demographics whose principal is Richard Bate

On matters of road infrastructure, I have relied on comments by Richard Jarvis of the GRA who was previously a highways consultant with WS Atkins

On matters of property research, development, planning and valuation I have relied on my own skills and experience as a former Chartered Surveyor and Management Consultant specialising in property strategy and research in the public and private sectors. I have also used some material from my review of the Town Centre Masterplan 2015 which I reviewed for the Guildford Greenbelt Group and which can be found on their website.

References to “local plan” are intended not to be the previous 2003 Local Plan but to be references to the current Regulation 19 draft local plan prepared by Guildford Borough Council.

GBC refers to Guildford Borough Council

SHMA refers to the Strategic Housing Market Assessment 2015 prepared by GL Hearn

OAN refers to the Objectively Assessed Need in relation to housing
NPPF refers to the National Planning Policy Framework
CPRE refers to the Campaign for the Preservation of Rural England
GRA refers to the Guildford Residents Association which comprises over 25 Residents Associations and five Parish Councils
SSAG refers to the Save Send Action Group which comprises over 500 residents
ELNA refers to the Employment Land Needs Assessment 2015
NPPF refers to the National Planning Policy Framework
NPPG refers to the National Planning Policy Guidance
VoA refers to the Valuation Office Agency

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

**EVIDENCE BASE**

I object to the paucity of the evidence base. The submission documents are unsound, unreliable and inconsistent.

Key parts of the evidence base are flawed or based on withheld assumptions.

The current SHMA inflates the proposed housing figure due to the following factors:

- the failure to correct for errors in the historical data for international migration flows,
- the way it considers students and affordability, and
- the flaws in the method for estimating the number of homes needed to support job growth
- the treatment of vacant property

The Green Belt and Countryside Study does not value the fundamental aim of Metropolitan Green Belt properly or look strategically at options for development in major settlements beyond. The way Green Belt is parcelled up and scored is not valid: serving 2 Green Belt functions is as valid as serving 4 functions. Green Belt is Green Belt, it does not require assessment or qualification. The Green Belt sensitivity analysis is not a valid basis for informing decisions.

Exceptional circumstances clearly do not exist to justify amendments to Green Belt boundaries as part of the Local Plan process. It is quite achievable for realistically prepared and identified development needs to be accommodated in Guildford’s urban areas and villages.
The Transport Evidence has been produced very late and is incomplete, inaccurate and untested to the extent that the Plan is not ready for a Regulation 19 consultation.

It is emerging that the Strategic Highway Assessment shows there will be congestion, even with all the highway schemes in the Plan. Many questions remain unanswered. E.g. Why would 1000 homes on Slyfield generate no extra traffic? The report only gives average speeds and information needed to understand how much congestion will occur and where it has not been provided in time to inform Plan proposals or responses.

The available evidence suggests much of the proposed Sustainable Movement Corridor cannot be delivered due to narrow roads and pinch points.

Evidence on bus travel is fundamentally compromised because no clear and workable location for a bus interchange is proposed.

No information has been provided on the demand for and capacity of rail services. The main line to London is already extremely busy in peak periods.

Information about the town centre as regards traffic, buses and parking is lacking. It is not credible to proceed without this given existing levels of congestion, the number of transport routes that rely on the town centre to cross the Downs, the shortage of crossing points over the railway and river and the fact that narrow roads and steep slopes make Guildford unsuitable for a ring road approach.

The Strategic Highway Assessment 2016 is flawed. It is invalid to base this on less traffic growth than the proposed housing growth. The report points to overcapacity use of the A3, M25, A31, A320, Millbrook, Ladymead, Woodbridge Road, York Road, London Road but understates the congestion consequences. Various suggested queue reductions are unexplained. The consequences of major proposed reductions in road space in the town centre (eg closure of Walnut Tree Close, narrowing of Woodbridge Road, reduced capacity of the gyratory) and of developing Burnt Common are not included. More time is needed to assess and refine this crucial 11th hour report which seems incomplete, understates the consequences of traffic overload, shows inconsistencies, and does not supply assumptions or information needed to understand queues at junctions.

The Guildford Retail Study Update lacks credibility and there is no proven case for expanding comparison retail space which is undermined by failure to implement existing retail consents at the North Street development over the last 10 years. The Guildford Retail Study does not take account of changing retail patterns in relation to the threat of the internet and the “clicks and mortar” conflict. The study also assumes a number of logged retail requirements from companies already in liquidation or with national requirements that exclude Guildford.

I believe that it was unacceptable to stop monitoring air quality, where NO2 emissions exceed limits, on the unrealistic assumption congestion would reduce. Estimates of premature deaths have doubled and issues with vehicle emission controls have emerged. Traffic noise from the A3 should also be reported.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In addition I attach the reasoned objections to the whole dreadful Guildford Plan which is opposed by virtually all the Villages Around Guildford and most of the Guildfordians and our local MP Sir Paul Beresford. Compiled by Andrew Procter.

Finally the most important objection:

I OBJECT to Send village being removed from the Green Belt.

This fantastic legacy from our Victorian Philanthropists was always intended to be permanent, as required by the National Planning Policy Framework. There are no special circumstances to justify abandoning this fantastic legacy.

The Green Belt in Send provides an ESSENTIAL Buffer, stopping Woking and Guildford becoming one conurbation. The GBC Councillors and Government gave clear election promises to protect the GREEN BELT. This plan blatantly reneges on those promises, and goes against Government Guidelines as pointed out by Sir Paul Beresford our local MP.

This would be a Developers Charter to provide unlimited development all over our Village and some other villages too.

Please do not make this woefully ill-conceived error, which will be irreversible.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: Objection to GBC Local Plan 11 July 2016.doc (261 KB)

---

I object to ALL Green Belt sites allocated for development in the local plan

I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses.” This ignores the tens of thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. This amounts to a war of attrition by the Council in conjunction with developers, since many busy residents are sick and tired of repeating the same comments to deaf ears. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014.13

There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A25 Gosden Hill

There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

Gosden Hill is located entirely within the green belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,

The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to policy A26 Blackwell Farm

There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

Blackwell Farm is located entirely within the green belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Blackwell Farm performs all five functions of green belt, and fulfils purposes 1, 3 and 5 very strongly.

- **Purpose 1** - "checking the unrestricted sprawl of large built-up areas". There is huge pressure to develop on the western edge of Guildford; the University of Surrey has stated publicly that its key objective is to develop the whole of its landholdings, stretching west to Flexford Farm. This, combined with the indefensible boundary being proposed (a hedgerow rather than the existing belt of ancient woodland), will put more of the green belt and the Surrey Hills Area of Outstanding Natural Beauty (AONB) at risk of future development.

- **Purpose 3** “assists in safeguarding the countryside from encroachment” - the proposed movement of the green belt boundary on the west of Guildford to allow for development of the University in 2004 resulted in the encroachment on countryside and the loss of working farmland (including some Grade 2) at Manor Farm. The proposed future change in the boundary would result in further encroachment and the loss of farmland including further Grade 2. The proposed road development with access road from the A31 would also effectively cut off farm access to the south of the development area leading to further urban influence on this countryside. The University’s stated key objective is to develop land which includes Chalkpit and Wildfield farms leading to the risk of further boundary change and further encroachment in future years.

- **Purpose 5** - “assists in urban regeneration by encouraging the recycling of derelict and other urban land”

Whilst all green belt assists towards this purpose, the ownership of this land by the University of Surrey with its extensive landholdings within the urban boundary (including land it leases to the Hospital and Holiday Inn, the Surrey Research Park, Hazel Farm as well as two large campuses) means that the location of Blackwell Farm within the green belt plays an even greater and direct role in encouraging the more efficient usage of urban land.

Stopping development on Blackwell Farm would result in the University of Surrey investing in, and regenerating, land in its ownership and delivering its commitments following the 2003 boundary review (including 270 homes for key workers, 3,125 student residences and releasing further accommodation at Hazel Farm). The University has 17 hectares of surface car parking that could be built over with offices and flats. This is a more sustainable option than building over open farmland (largely grade 2 and 3a) within the green belt.

The Blackwell Farm development would result in harm to the Surrey Hills Area of Outstanding Natural Beauty (AONB), harm to an Area of Great Landscape Value (AGLV), and harm to the setting to the AONB. (Blackwell Farm forms the views into and out of the Hogs Back ridge). The NPPF is clear that AONBs should be afforded the highest level of protection in relation to landscape and scenic beauty. All development proposals within and adjacent to the AONB must conserve or enhance its special qualities. The NPPF also makes it clear that applications for major development in the AONB will be refused unless exceptional circumstances are demonstrated and the development is proven to be in the public’s interest. Guildford Borough Council has not shown that the proposed housing development or the extension of the Research Park, or the proposed link road from the A31 to Gill Avenue, is in the wider public interest. Indeed, the increased traffic through the already congested Egerton Road/Gill Avenue junction, which would result from the development, would...
impede emergency vehicles travelling to the Hospital and this would be very much against public interest. GBC’s Policy P1 states that, “The Surrey Hills Area of Outstanding Natural Beauty (AONB) will be conserved and enhanced to maximise its special landscape qualities and protect it from inappropriate development. All proposals will be considered against whether they conserve and/or enhance the setting and views of the AONB.” I question how the proposal to carve a new two-lane carriageway through the AONB fits this policy, or meets para 115 of the NPPF? Finally, nearly the whole site has been identified as a “candidate area” for AONB status in the Landscape Evaluation Study commissioned by Compton, Worplesdon and Wanborough parish councils. Therefore, the entire site should be treated as though it is within the AONB during this local planning process.

The access to the proposed Blackwell Farm site will put additional peak hour pressure on two of Guildford’s worst congestion “hot spots”: the A31 (Hog’s Back) and the Tesco Roundabout on Gill Avenue.

GBC’s proposal to create a new major route into Guildford from the west at, or close to, the Down Place private driveway, and to make this the main access to the planned Blackwell Farm development, does not appear to have been thought through. There are queues stretching back from the Farnham Road Bridge as far as the Down Place driveway entrance most weekday mornings and any traffic generated by the new development would not be able to clear the junction. In order to accommodate the volume of traffic using the new junction (generated by residents of the new housing estate, employees at the Surrey Research Park, Hospital and University, and visitors to the new school/supermarket), there would almost certainly need to be a roundabout (rather than the proposed traffic-light controlled junction) and GBC has ruled out a roundabout on grounds of landscape impact and traffic.

The secondary access to the site at Gill Avenue also presents problems, and as GBC states in its Transport Assessment (14.9.5), changes planned for the Tesco roundabout will not mitigate against the increased level of traffic through the junction as a result of the Blackwell Farm development, and this in turn will impact on the Egerton Road/Gill Avenue junction, which serves the Royal Surrey County Hospital. I question whether it is responsible to allow a development that would impede emergency access to an A&E department and a major incident unit.

The traffic impact resulting from the development of Blackwell Farm on the strategic road network would not appear to be properly assessed but it would be alleviated in part (but not completely) by widening the A3. However, timing and funding for this work is unclear so there would be many years of traffic chaos before any widening took place (if indeed it does). More significantly, the widening of the A3 would create noise and environmental impact on the neighbouring residential areas of Onslow Village and Beechcroft Drive and a six-lane highway would cause greater severance between Guildford and Blackwell Farm and areas to the west.

The NPPF states in Section 6 para 47 that local authorities should “identify a supply of specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15”. In a footnote to this, it further adds, “To be considered developable, sites should be in a suitable location for housing development and there should be a reasonable prospect that the site is available and could be viably developed at the point envisaged.” I consider that the proposed access arrangements to Blackwell Farm are wholly inadequate for a development of this scale and thus the site cannot be “viably developed”.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/8262  Respondent: 10858977 / Angela Otterton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Policy A35 Wisley

I object to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.

There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.

Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

- Green Belt location and absence of “exceptional circumstances”.
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottleneck and Ripley village and roundabouts.
- Absence of adequate traffic data.
- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
- Loss of high-quality agricultural land (55% of the site), in breach of national policy.
- Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
- Presence of a Surrey County Council safeguarded waste site.
- Cost of infrastructure required to the detriment of alternative more favourable sites.
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
- Impact on listed buildings.
- Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.
- Extreme housing density with tiny garden spaces.
- Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
- Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).19
- Failure to evaluate the cumulative impact of this and nearby development sites on the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to building 45 houses at Clockbarn Nursery.

There is inadequate access and high local traffic volume.

Planning permission has been given for 64 apartments at the Tannery and for building the Marina. This will generate additional heavy traffic. By adding another 45 houses, this will greatly add to the traffic already there. It will be even more chaotic. The junction with Send Road is already very dangerous for vehicles joining the Main Road, this proposal will make it even worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to building 400 Houses and 7000sq meters of industrial Space at Garlicks Arch opposite Send Marsh Road.

This is Green Belt Land with Ancient Woodland, and is prone to considerable flooding. The industrial space is definitely not needed as there is adequate space at Slyfield Green, and the owners at Slyfield are keen to have extra use there if there is in fact a need at all for extra industrial Space.

If GBC used the brownfield sites this Green Belt land would not be needed.

The gridlock that this development would cause on the local Roads would be massive.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to policy A43 Garlick’s Arch

There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

I object to the proposal to build 7,000 sq m of light industrial, general industrial or warehousing on the site at Garlick’s Arch. There is no need to place a Strategic Employment Site in this location when there is plenty of spare space available at Slyfield (40 ha). The Employment Land Needs Assessment (ELNA) 2015 has been reduced by 80% since the ELNA 2013. There is no longer any need to place industrial development in the Green Belt when there are plenty of brownfield sites available.

I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.
Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to this proposed new interchange with the A3 at Burnt Common because much of the traffic to and from the A3, the M25, Woking and Guildford would be going through to Send Road which is already at full capacity. It would be total gridlock as this road funnels into a small roundabout and very small congested roads in Old Woking.

The proposed junction would have to take traffic from the proposed 2000 houses at Wisley Airfield, 2000 houses at Gosden Hill, Burpham and 1850 at Blackwell Farm, this would be a total disaster for the Village of Send.

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a). The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

I object to the proposed Infrastructure Schedule (Appendix C). The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

I OBJECT to the development of 40 houses and 2 Travellers Pitches at Send Hill.

A totally inappropriate location with very narrow Roads with single tack roads with insufficient access.

The subsoil here contains documented unsafe landfill waste registered at GBC.

This development would spoil a high amenity area set in beautiful countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/8266  Respondent: 10858977 / Angela Otterson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**I object** to policy A44 Send Hill

There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

The proposed development is not sustainable because of poor infrastructure. Send Hill is a single track country road and too narrow to provide sufficient access to the site for travellers or accommodate the potential new levels of traffic the proposed development would bring.

The site is a high quality green belt amenity area within beautiful surrounding countryside and would be spoilt by the development.

A Wasteland Solutions environmental report on Send Hill dated March 2004 gave evidence of past ponding of water in the excavated area. Further development would disturb the water table and increase risk of flooding to surrounding properties.

The site was used as a GBC registered landfill site and shown on the 1963-8 Ordnance Survey maps as “refuse and slag heap”. It is therefore unsuitable for such a development on health reasons.

On the 1971 Ordnance Survey the site is shown as a “refuse tip” prior to when proper licensing/registration was required. The date of the landfill works predates the 1999 EU Landfill Directive regulations. I therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials.

GBC has installed gas monitoring wells on site since July 2000. One well recording methane gas discharge.

A Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies the proposed site as GBC recorded landfill site Ref GU/11/LLC with type of waste not identified. The date of the landfill works predates the 1999 EU Landfill Directive regulations. I therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials. A Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies proposed site GBC recorded landfill site Ref GU/12 with type of waste identified as “unrestricted”. This causes concern as to what it does contain and the dangers if disturbed.
An Envirosearch Report RS1100201_1_1 dated 17th February 2004 and historical map data and information from GBC has identified the site as landfill and has "areas of potentially contaminative industrial activities" and "potential risk from landfill gas migrations". Development of this site would be a health hazard.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/8267  Respondent: 10858977 / Angela Otterson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A46 land to the south of Normandy

There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints

There is unproven demand for secondary school places in the west wards that is being proposed as "exceptional circumstances" to redraw the Green Belt boundary. There is strong research evidence from SCC Education which proves existing under-utilisation in long term of secondary places in the west of the borough.

There is an incorrect calculation of bespoke SANG since only 10 ha are proposed within site but the new population requires 21 ha. This will impact viability if contained in site (65 ha approx) - there is not an additional 10 ha in currently proposed SANG pre-allocated schedule in infrastructure report (Russell Place Farm)

There is an incorrect evaluation of contribution of land within and between settlements to Green Belt "openness" - the previous PINS decisions in three appeals asserts "openness". GBC state there is no "openness" yet all land parcels in the site are 'red' sensitivity in GBCS Vol 2 Addendum 1 & 2 and all contribute to the 3 key purposes of the Green Belt.

There is a failure to engage with Rushmoor under the duty to co-operate rules in regards of traffic impact from Aldershot Urban Extension (3,800 homes) The increased commuting to Guildford plus new local vehicles (1,375 estimated) will take the A323 to over design capacity and produce perpetual congestion

The one railway bridge in Glaziers Lane + 1 railway tunnel in Westwood Lane on North Downs line are restricted (tunnel single lane) with poor geometry and have poor safety records with one fatality in last 15 years and there is no plan in the infrastructure report to widen bridge or replace tunnel (Network Rail). This will lock traffic from new development within site to the north of Flexford. C and D class roads are not designed for volumes indicated in Scenario 5.

The flood risk will be significantly increased when land is developed. The site lies on the Hogs Back spring line and the land is natural SuDS. There is a stream running through the site with flood risk 3a. Civil engineering mitigation is unlikely to be effective.

The site will introduce 300+ dogs and 250+ cats within 1km of TBHSPA and SANG will not stop increased disturbance and predation on the SPA.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to Policy D1 Making better places

I object to the absence of any reference to vernacular or historic design guidelines, even in Conservation Areas. Most of the borough, especially the rural areas, has vernacular design guidelines that are available to give suggestions as to appropriate design. These should have mandatory planning force.

The monitoring of this policy is inappropriate. Why should this policy result in a reduction of the number of appeals for poor design? Should it not result in better-designed buildings?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Policy D2 Sustainable design, construction and energy

Sustainability should be an overarching ambition, conditioning the whole local plan and running through it, as claimed in the NPPF, “like a golden thread”. It should be set out clearly in Policy S1, not buried away as a minor detail in Policy D2.

This policy amounts to “greenwashing”, expounding aspirational environmental targets while ignoring the plan to build dormitory towns across the Green Belt that are environmentally and socially unsustainable. These settlements will bring vastly increased car use and will lead to unacceptable traffic congestion, overstretched social infrastructure, and more
greenhouse gas emissions, noise and light pollution. This policy should not be just about saving energy but about preserving the borough’s stock of natural capital, especially the countryside, from futile attempts to rig the housing market.

This policy’s emphasis on Combined Cooling Heating and Power and communal heating networks is meaningless, since no such networks are available locally.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy D3 Historic Environment

This policy clashes with the strongly pro-development agenda of the rest of the plan and fails to address the contradiction. History is unamenable to improvement, so the policy should commit the Council firmly to protecting and preserving our heritage assets from development. Instead, the specific policy pledge to “support development” that might “enhance” heritage assets leaves wide scope for abuse in the form of destructive commercialisation and financial leveraging of relevant sites.

This policy is based on the false premise that Guildford’s heritage is inherently in decay. This is a developer’s charter – a short step away from the idea that the historic environment needs to pay its way to be preserved. The Council’s aggressive reviews of Guildford Museum and the Electric Theatre support this interpretation. Whatever the “reasoned justification”, the actual policy wording in the blue box leaves too many loopholes.

Development close to historical assets is harmful and should be expressly prohibited. This policy fails to meet the requirements of NPPF paragraphs 126 and 131-133.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to policy D4 Development in urban areas and inset villages

This policy that does not address the opportunity for building in the urban area

The plan envisages that 40% of homes built will be “affordable”, but this does not provide any accommodation for low-paid workers, for example, those on the minimum wage, who cannot afford to buy so-called “affordable” homes or pay an “affordable” rent. There is a need for some expansion in social housing, especially in urban areas, where there is a greater concentration of low-paid workers such as those employed in the retail, warehousing and distribution sectors (all of which this plan aspires to expand).

The number of homes planned in the urban area is much too low. There is a glaring need for regeneration in many urban areas, particularly Guildford Town Centre but this is ignored in favour of building homes on green-field sites instead.

This will not address urban housing needs. It is also unsustainable, since building outside the town does disproportionate harm to road traffic, air quality and overstretched infrastructure.

The plan envisages a large expansion of the retail sector, but this is a sad voice from the past because the sector is in rapid and continuous decline.

All the stated policy aims for “inset” villages will be negated by the excessive weight of new housing development proposed which would radically change their character forever.

THE BROWNFIELD OPPORTUNITY

Yes, we need a new Local Plan for our borough in order to provide a development strategy within which we can accommodate our local housing, economic and environmental needs. But first we must make 100% use of our urban brownfield before we consider building in the Green Belt or countryside.

Paragraph 80 of the NPPF clearly states that Green Belt serves a key purpose, “to assist in urban regeneration, by encouraging the recycling of derelict land and other urban land”. In order to comply with central planning policy we need a brownfield strategy that states clearly. “We are committed to a brownfield first initiative whereby all applications on previously developed land are given fast track priority and every facility to promote development for residential purposes and employment purposes in order to satisfy the needs of local people. In parallel a zero CIL incentive should be given for all residential development on brownfield land.

In response to the detailed objections received in the Regulation 18 process of the 2014 Local Plan and also in accordance with government policy a Guildford brownfield land register should be urgently compiled showing address, ownership, occupier, current use and detailed planning brief.

A head of brownfield should be appointed at GBC with a clear briefing to deliver brownfield targets of housing and employment space.

GBC needs to accelerate the residential redevelopment at Woodbridge Meadows, Walnut Tree Close and the Station within the next 5 years.

GBC needs to examine the residential development opportunity of the 25.7 acres of car parks in GBC ownership.

I do not consider that the target of 1,172 homes in the town centre takes account of the need and demand for housing or the opportunities that brownfield sites present for increasing the residential development in the core of the town which will in itself help to sustain the retail core by increased economic impact.

The Town Centre policy needs to maximise the potential for residential development on brownfield and include as an absolute minimum the 2,551 units proposed in by Allies and Morrison for the town centre included in the masterplan 2015 which has recently been adopted by GBC. The reality is that the Town Centre has the capacity for at least 5,000 homes.

The additional target capacity of 5,000 could easily be provided within the following urban sites which have the capacity for 7,500 homes:
- 2,500 homes detailed in Masterplan 2015 including Woodbridge Meadows which can itself be increased substantially
- 500 homes at North Street
- 1000 homes on current GBC car parks (25 acres) and at the station
- 1000 homes saved in the urban area if 100% of students are accommodated on Surrey University campus (17 ha of car parks)
- 1000 homes at Slyfield on the 40 ha regeneration site
- 1000 windfall infill (50 per annum)
- 500 homes on brownfield sites in villages on sites of max 1ha which do not impact Green Belt

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy E1 sustainable employment

I note that there is a significant reduction of between 71% and 79% in the previous job target and resultant 79% reduction in employment space in response to the many objections lodged in 2014 against an unsubstantiated agenda for economic expansion in the last draft and based on new findings by Aecom in the latest ELNA 2015.

I have concern as to the ill-informed clustering of all B classes in terms of the clarity of market evidence required to inform effective planning and a failure to provide a clear understanding of business needs required under Section 160 of the NPPF.

I also note the dramatic reduction in assessed demand by two Employment Land Needs Assessment Reports carried out under the same terms of reference within a period of 2 years which calls into question the general reliability of the process of collection and interpretation of data in the overall forward planning process by GBC. I do not support the policy of creating a Strategic Employment site at Garlick’s Arch (A43) in the Green Belt which is completely unnecessary due to the overall decrease in demand for industrial space which could be easily accommodated at Slyfield.

I am concerned however that the research undertaken by Aecom is generally superficial and lacks sufficient detail and analysis between B1a, B1b, B1c, B2 and B8 use classes and that no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of office, research and development, light industrial, general industrial and warehousing and distribution floor space.

No proper analysis has been made of data held by GBC in respect of different B classes in terms of planning applications granted or evidence gathered by the economic development function at GBC and no robust assessment of local market demand apart from fairly brief references to freely available market research undertaken by commercial estate agents such as Lambert Smith Hampton covering a much wider area.

GBC appear to fail to appreciate the fundamental rationale of the Use Classes Order as a planning tool in terms of useful property market research or forward planning.
What we are left with is a fairly clumsy and poorly informed plan which clusters B classes without any appreciation of widely different employment impact and economic sustainability. E.g. B1 generates at least 5 times as much employment as B8.

The lack of appreciation by GBC as to the opportunity for widely different uses being generated within B class clusters defeats the whole point of proper planning of employment uses and can significantly endanger previously good planning put forward in the previous 2003 plan. E.g. the creation of a research and development park linked to the University but now has the threat of being downgraded into a general business park (see below).

Little regard has been given in the plan to the economic reality of falling demand for B2 industrial space which is clustered with other B classes almost randomly throughout the plan.

I note that the past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 derived from VoA analysis and that the calculated annual floor space demand is 0.7% over the plan period up to 2033.

I support the concept of seeking increased investment in our local knowledge-based, high technology economy. This will provide well paid, creative jobs and generate the funding necessary to pay for the infrastructure and environment this sort of industry requires.

We need to distinguish between wanting to increase the added value of the economy and physical expansion, especially given the scarcity of land in Guildford. Guildford is not the place for large space hungry businesses. So I should target high added value small and medium sized enterprises rather than the headquarters of larger corporations.

We need to promote the idea of new knowledge transfer in incubator units and small premises for new start up enterprises. They need to be on the wave of innovative new technology as opposed to older established businesses. **I object** to the policy of creating a Strategic Employment at Garlicks Arch (A43) in the Green Belt. The stated requirement of 7,000 sq m (B1c, B2 and B8) could easily be accommodated at the Slyfield Regeneration site of 40 ha.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**I object** to policy E2 location for new employment floor space

I am of the opinion that all new office and research and development (use Class B1a and B1b) floor space should be within Guildford town centre.
I object to the policy of expanding the Research Park onto Blackwell Farm and I do not believe there are exceptional circumstances to justify incursion into this permanent and high quality area of Green Belt.

The Surrey Research Park currently extends to 65,000 sq m. There is already granted consent to expand to a further 9,000 sq m (14%)

The past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 based on ELNA 2015 derived from VoA analysis.

The ELNA 2015 calculated annual floor space demand is 0.7%.

The data point for our analysis is today in 2016 so we have 17 years to go to the end of the plan period. The necessary growth in floor space over the plan period is therefore 17 years x 0.7% = 11.9%.

There is currently 14% expansion space already available.

The proposal by GBC to expand the 65,000 sq m by 9,000 sq m (existing allocation) with an additional 35,000 sq m amounts to an increase of 67% of the Research Park which is not required.

The Research Park is currently developed at a density of 25% plot ratio. The majority of existing buildings are 2 stories giving a developed floor space plot ratio of 12.5%.

The existing Research Park has the opportunity to markedly increase its density without infringing any Green Belt land nearby. Any density increase would be cost effective for the use of all existing infrastructure and would also have the potential to match the existing densities of existing academic buildings on the university campus which are three to four times higher.

Together with the existing expansion of 14% through existing consents and the opportunity to increase its density the Research Park has ample capacity to expand to embrace new demand for B1b uses linked to the university.

I do not accept that the valuable and workable concept of the Research Park should have its integrity and purpose diluted by being converted into yet another Business Park for office users rather than research organisations.

A preferred location for increased B1a and B1b space should be in the Town Centre close to housing and a convenient transport hub.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy E3 maintaining employment capacity

I object to the ill-informed policy of resisting change of use from B1a to residential because it flies in the face of positive property market solutions for the regeneration of brownfield land. It is also contrary to current government policy which has recently been reaffirmed and permits a change of use from B1a (offices) to C3 (residential).

I believe that the existing government policy which has recently been made permanent of allowing change of use from B1a to C3 is sound.

Many office buildings reaching an age of more than 30/50 years become redundant in terms of energy compliance making them illegal to occupy for employment purposes and the cost of refurbishment makes them redundant and uneconomic.

The reality of market demand is that the gross development value of refurbished residential space is in excess of the gross development value of refurbished old office space in many locations (this gross development value assessment is supported by the analysis by property consultants GVA in the supporting evidence within the Allies and Morrison Masterplan for Guildford dated 2015).

To resist change from B1a to C3 is contrary to the concept of brownfield first for residential development schemes.

To resist change from B1a to C3 in Strategic or Significant Employment Sites is contrary to the concept of integrated mixed use communities whereby the journey to work is minimised.

London has led the way with significant residential schemes being created from redundant office stock. A good example is the South Bank in London adjacent to Waterloo Station where in 2005 the Shell Centre has been converted into flats. Another early example is the 2000 scheme at Metro Central Heights at Elephant and Castle where the old Alexander Fleming House was converted to 435 flats by St George. GBC needs to adopt more modern trends and policies.

Guildford is in dire need of increasing town centre residential development. The feared loss of employment will be marginal and impractical to resist. Empty office blocks are not the answer.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy E4 Surrey research Park.

I support the maintenance of research, development and design activities, in any science, including social science, that is complementary to the activities of the University of Surrey at the Surrey Research Park. I object however to the completely unnecessary expansion of the Research Park into a larger Business Park. I believe that the planning policy going forward for the Surrey Research Park should be to maintain and enhance the integrity of its research base allowing for the economic value add to the local economy of knowledge and technology transfer from the University.
I believe that B1b (should be the primary use class for the Research Park and that applications for B1a should be resisted due to the danger of dilution of the core purpose and reputation of the park. I object to the inclusion of B1c uses which is inappropriate and unnecessary.

Research parks based on the early UK technology transfer exemplars of the Cambridge and Oxford need careful monitoring, nurturing and protection to ensure the integrity and quality of the park is maintained and the park continues to be a destination for innovation and enterprise.

There is a danger for research parks to be overwhelmed by short sighted development opportunities being taken by park managers provided by standard office activities and administrative functions which in time turn them into standard business parks which can be found anywhere in the country. Their relative low density and attractiveness make them targets for “any other” office user.

Research parks that lose their way stop being the location of choice for new innovative enterprises.

The Surrey Research Park in Guildford needs to be focussed on a broad spectrum of scientific research including computer science, bio-chemistry, design, space-science, eco-science, health science, software development, laser technology, media-science, artificial intelligence, robotics and super-manufacturing

Monitoring indicators should include new start-ups and new patents created

Facilities should be provided whereby new small businesses can secure premises under subsidised licence fee arrangements with no onerous rent or lease commitments

I support the idea of a variety of sizes of unit including some small units (between 15 – 80 sq m) bearing in mind one workstation is 10 sq m

Consideration should be given to the concept of shared “enterprise hubs” where individuals can take pay as you go workstations in shared spaces similar to touch down business centres similar to the “enterprise village” concept

I object to the policy of any new extension of the research park more than the existing 14% already provided for within the park or within the footprint of the park

The Surrey Research Park currently extends to 65,000 sq m

There is already granted consent to expand to a further 9,000 sq m (14%) This space has been available for 10 years and is still to find a taker

The past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 based on ELNA 2015 derived from VoA analysis

The ELNA 2015 calculated annual floor space demand is 0.7%

The data point for our analysis is today in 2016 so we have 17 years to go to the end of the plan period.

The necessary growth in floor space over the plan period is therefore 17 years x 0.7 = 12% which is less than the current expansion space of 14%.

The research park is developed at a plot ratio of 25%. This could be increased to 50% within the same footprint of the existing park without damage to its amenity. The actual current land use for development in the park is in fact only 12.5% because most buildings are 2-storey.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**I object** to policy E5 Rural Economy

In my opinion this policy should only apply to small-scale development in rural areas which means development of less than 100 sq m (gross) which is in keeping with and the permanence and amenity of the green belt.

Use of rural areas for town centre uses without applying the sequential approach is against the principles of localism that require local people to be consulted and heeded, not ignored. Villages need protecting in terms of both design and scale.

Most of the economic activities listed in 4.4.44 depend on maintaining the rural character of our villages which would be endangered by the wholesale “insetting”, boundary expansion and house building proposed in other parts of the plan. This applies also to new and projected enterprises in the Green Belt (e.g. Grange Park Opera’s Theatre in the Woods in West Horsley, which requires a protected, rustic setting to be a success, not housing estates and congested roads). Policy E5 is incompatible with the high housing numbers proposed.

Previous commitments to improved high-speed broadband and mobile phone coverage have now been diluted, despite general support. This disregards the responses from the 2014 public consultation.

**Comment ID:** PSLPP16/18601  **Respondent:** 10858977 / Angela Otterson  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**I object** to policy E6 the leisure and visitor experience.

I believe that the importance of a visitor attraction hub could be much better articulated. Guildford has great potential to become a “must see” destination for tourists and visitors. Surrounded by the natural beauty of the Surrey Hills, it is already distinguished as an historic county town. The historic part of the town should be exploited to the full creating a real sense of vibrancy and atmosphere. This should be linked to the attractions of the Museum, the Castle, the Wey and the historic High Street including its views of the Hogs Back. Guildford would be wise to model itself on other historic towns like Bath, Chester and York.
The economic impact would create big advantages for both the leisure and the niche speciality retail sectors in the town. Given the local and wider catchment of the town Guildford should strive for high quality definition making it a great centre for people to live in and visit. It would be a great mistake if Guildford were to opt for large impersonal department stores and dull high street chain stores at the expense of exploiting its uniqueness and character which would afford greater benefits.

Guildford the historic “Gateway to the Surrey Hills” has far more potential than Guildford just any other stereotypical centre found anywhere around London. What GBC needs to do is create a theme such as a new “Pilgrims Trail” similar to the Patriots trail in Boston USA with marked yellow footsteps leading from the station to the River and up through the historic heart of the town.

There is a need to make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

There is a need to help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to RHS Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in the Surrey Hills, a visit to RHS Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently bypass Guildford to go to Bath, Oxford or Cambridge instead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/18602  Respondent: 10858977 / Angela Otterson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy E7 Guildford Town Centre

I am of the opinion that policy E7 is ill-informed and there is insufficient evidential support to objectively assess the capacity of the existing town centre to accommodate appropriate new development and therefore fails the requirements of Section 161 of the NPPF to assess the real quantitative and qualitative floor space needs.

Policy E7 is an aspirational voice from the past and is unlikely to benefit the health of the town centre in the future. There is no reliable evidence provided that the retail core of the Town Centre needs or can be expanded by 45,000 sq m of retail space at North Street because of lack of demand for retail units in the Town Centre particularly large units. This is due to falling demand for retail space in Guildford and town centres throughout the country evidenced by independent research and the reality of empty shops in many high streets (including Guildford) and the accelerating competition from internet shopping.

The failure of the North Street scheme to be redeveloped over the last ten years is a testament to lack of demand which has been so poor that the original planning permission for a large retail scheme became time expired.

The reality is that the town centre has enough retail floor space. If more is introduced it will result in the closure of existing shops particularly in locations which are less than 50% of peak Zone A or 100% positions. What Guildford needs is a new
focus on speciality high quality comparison shopping supported by a revival of Guildford’s attractive heritage core and a new major visitor attraction supported by restaurants. Guildford needs to become the quality shopping destination for Surrey.

The existing site in North Street should be replaced with a well-designed ground floor high quality speciality retail mall and frontage of no more than 40 shops extending to 7,000 sq m with the rear and upper floors providing an additional 500 to 600 homes. The proportion of the above proposed smaller scheme at North Street will be complementary to and not antagonistic to the Upper High Street, Tunsgate, the Debenhams site and the 100% Zone A positions of the Lower High Street. If the existing policy under E7 is adopted the North Street site will remain empty for another 10 year.

The findings of the Guildford Retail and Leisure Study 25 September 2015 are very pessimistic about retail trends. Carter Jonas’s recent retail study reports a fairly bad time for retail, the bullets below are direct quotes from the report:

- Para 3.3 Retail Trends “Town centres, once the principle focus for retail and leisure are now increasingly under threat”
- Para 3.4 Retail Expenditure “disposable income and retailers’ margins are being squeezed further”
- Para 3.5 “there has been limited growth in retail (convenience and comparison goods) expenditure per head since 2008”
- Para 3.6 “the retail sector remains fragile and analysts forecast that some operators and centres will continue to struggle over the short to medium term”
- Para 3.8 “completed new shopping centre floor space in the UK is currently at its lowest level since the 1990s”
- Para 3.11 Internet Shopping “New forms of retailing have also emerged in recent years and are becoming established as significant alternatives to more traditional ‘bricks and mortar’ shopping facilities. Over the last 5 years, online sales have increased by 222%”

Despite the findings about retail we are told “evidence suggests that high quality schemes will continue to prosper.” What evidence?

Para 3.33 “the latest 2013-14 Javelin VenueScore17 ranks Guildford Town Centre within the UK’s top 50 shopping locations at 33. By contrast, Kingston-Upon-Thames is ranked 17th. Since 2007, Guildford Town Centre has fallen 20 places in the Venue Score ranking”

Para 3.40 “The growth of online shopping is also impacting on the vitality and viability of many of Britain’s centres and high streets. This is placing pressures on rental growth and market demand in many centres, particularly secondary centres outside the ‘top 100’ shopping locations. This has been further compounded by rising vacancy levels and the loss of key retailers. As a result, the share of non-food retail sales conducted through town centre shops has declined, from 64% in 2002 to just over 40% by 2013. In our opinion, a far more uncertain future awaits the next “wave” of new retail investment and development. The evidence suggests that high quality schemes in the strongest prime shopping locations will continue to prosper.” Is this not an aspirational assumption?

Para 3.41 “Notwithstanding the threat of online shopping, industry experts still predict that the demand from major retailers for new space will continue as it remains the primary mechanism for retailers to ‘reach’ their customers and grow their businesses.” Who are these industry experts? Is this not an outdated concept and merely an aspiration of the British Council of Shopping Centres (BCSC)?

Appendix 6 of the Retail Study indicates potentially inaccurate demand data

Para 5.29 “The latest CoStar Report recorded 64 requirements for Guildford from January 2013 to August 2014; representing a total maximum floor space requirement of 62,208m2 gross (see Appendix 6).”

The Appendix 6 list of retailer demand looks impressive with brands such as Joules Clothing; Fossil; Comptoir des Cotonniers; Moshulu; Rituals; Princessse tam.tam; Cycle Surgery; Majestic Wine; Game Stores Group Ltd; Iceland. However, if we look closely at Appendix 6 it is an amalgam of old unchecked national high street requirements some of which do not even include Guildford as a destination and the majority are hardly high quality comparison retail. There are also no “big” requirements in terms of space. Where are the big stores?
GH Pressley & Sons – Watches and Silver- Requirement “They are seeking a flagship diamond store in central London. Target locations include Mayfair, St James, Kensington and Knightsbridge. Brands will include Hans D Krieger and Marco Bicego.” This does not sound like Guildford.

Oxygen Red Ltd – Ladieswear- Requirement “Oxygen Red is looking to acquire temporary stores in Shopping Centre locations within the M25” Guildford is well outside the M25.

The data relating to retail demand does not appear reliable. The 62,800 sq m does not translate to real demand for an expansion of 500,000 sq ft. If proper due diligence was applied perhaps 30% of this alleged Carter Jonas requirement would survive proper scrutiny.

THE TOWN CENTRE OPPORTUNITY

I do not consider that the target of 1,172 homes in the town centre takes account of the need and demand for housing or the opportunities that brownfield sites present for increasing the residential development in the core of the town which will in itself help to sustain the retail core by increased economic impact. What the town centre needs in terms of urban regeneration is much more residential development. As can be seen from the previous section retail will not work!

The Town Centre policy needs to maximise the potential for residential development on brownfield and include as an absolute minimum the 2,551 units proposed in by Allies and Morrison for the town centre included in the masterplan 2015 which has recently been adopted by GBC. The reality is that the Town Centre and other areas of brownfield in the borough has the capacity for at least 5,000/7,500 homes.

The additional target capacity of 5,000 could easily be provided within the following urban sites which have the capacity for 7,500 homes:

- 2,500 homes detailed in Masterplan 2015 including Woodbridge Meadows which can itself be increased substantially
- 500 homes at North Street
- 1000 homes on current GBC car parks (25 acres) and at the station
- 1000 homes saved in the urban area if 100% of students are accommodated on Surrey University campus (17 ha of car parks)
- 1000 homes at Slyfield on the 40 ha regeneration site
- 1000 windfall infill (50 per annum)
- 500 homes on brownfield sites in villages on sites of max 1ha which do not impact Green Belt

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E8

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Policy E8 District centres

I object to the proposal that sites “on the edge” of District Centres should be considered for retail developments. This is another Trojan horse policy, allowing retail hubs to be vastly expanded in order to smooth the way for vast new housing estates outside in the countryside (e.g. to meet the “everyday shopping and service needs” of the roughly 1,500 people living in the 600 new homes planned for the Horsleys).

This is a case of back-to-front priorities. Expanded local retail hubs are being proposed in order to justify more housebuilding in the villages, and in a forlorn attempt to mitigate the serious traffic and infrastructure problems this will bring. The Council have no business preparing the way for new supermarkets in the Green Belt. Rural retail capacity should be left to local demand.

The policy proposes not a single measure to support existing rural shops and services that are the lifeblood of village communities, e.g. using business rates and other levers at the Council’s disposal.

I object to Policy E9 Local centres

I object (for the reasons given under Policy E8 above) to the proposal for retail development adjacent to the 6 rural centres, and sites on the edge of designated centres. This is creeping urbanisation, damaging to the Green Belt and to Guildford town revival as a thriving urban hub. It will contribute to local urban decay and depopulation, just as expansion of the suburbs did to mid-20th century London.

I object to policy H1 Homes for all.

Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set any rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area close to transport hubs to facilitate modal shift e.g. 20 minutes’ walk of Guildford railway station. Much of Guildford town could usefully be regenerated with 6/10 storey blocks (there are currently blocks of this size already in the town) at 50 homes per ha with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provide for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and underused surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back. Surrey University has 17 ha of car parks that could provide all the student accommodation required on stilts with parking beneath.

Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Overprovision is inappropriate given other constraints.

Answer (if comment is on questions 1-7 of the questionnaire): (

I object to policy H2 Affordable homes.

“Affordable” homes, under national definitions, means homes that are sold or rented at 80% of market value. Even if 70% of these are rented as proposed, the level of market prices in the South-East means (even post-Brexit) that these homes will remain well beyond most people’s means and that starter homes will not become available for local people.

In addition, the viability clause (4.2.40) means that in practice the policy could be unenforceable. Private financial viability has no place in a public policy and should be removed. It is a get-out-of-jail-free card for developers that will sacrifice countryside for no local benefit.

I question the assumptions that seem to underlie this policy: that people have a right (rather than a legitimate aspiration) to own a home; that they should be encouraged to live locally (contradicting the Government’s policy of encouraging labour mobility and development in poorer regions, where homes are cheaper anyway); that increasing local house-building will
reduce overcrowding and congestion (rather than simply suck more people into the borough); and that it will stem the rise in house prices (even though 13,860 new homes will be a drop in the ocean, given that prices are determined by an infinite demand-pull from London, whose population is increasing by 100,000 a year, and by the currently low cost of capital for overseas and other buyers). The weak mechanisms proposed in the plan might influence the market in a more remote part of the UK, but not here.

This policy’s version of “affordability” is just a smokescreen for pushing through more development generally. Building more homes in Guildford cannot increase real affordability given the overhang of the London market.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy H3 Rural Exception Homes

This is a type of Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix”, this can include “market” housing – i.e. normal commercial development which in Guildford usually means expensive executive homes. This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to policy I1 Infrastructure and delivery

Most of the borough’s infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. Yet this plan’s commitment to building housing estates across the Guildford countryside will mean either major infrastructure investment that no-one is prepared to pay for or else a catastrophic and simultaneous collapse in transport, educational, medical, energy, water and communications services.

The plan targets greenfield sites – requiring heavy infrastructure investment – in order to generate CIL income necessary to meet an infrastructure shortfall that is already serious. This is not sensible. The current draft CIL scale also encourages development on greenfield sites rather than brownfield.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing infrastructure needs in this area is inadequate, identifying only the tip of an iceberg of existing congestion. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that involve demolishing property and road-widening in residential areas to solve the resultant congestion. The A3 improvements are not guaranteed to take place but they are being used to justify removing large areas from the Green Belt before detailed traffic assessments have taken place. These detailed investigations are being deferred until the planning application stage and will be left to developers to prepare. If a site then proves to be unsustainable its Green Belt protection will have been lost for no reason and unsuitable development will take place by a more insidious process.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritising greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly.

This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognising this as a key issue, the plan is based on a wing and a prayer.

The highways network is under stress at peak times in many parts of the borough. Queuing is the daily experience of drivers going to and from work. The local plan recognises the problems in para 2.14. Much of the road network is single-carriageway, and junctions act as constraints.

The key evidence on future traffic conditions is provided in the Strategic Highway Assessment Report (SHAR) which summarises the results of the tests carried out by Surrey County Council at the request of GBC. Five scenarios were examined using SCC’s strategic traffic model.

Scenario 1 contains all developments and planning permissions from 2009 to date. As such it corresponds to today’s circumstances, and describes the current unsatisfactory traffic conditions in peak periods.

Scenario 5 represents the position at the end of the plan period, including all development and highways schemes in the local plan.

The results of the analysis show that there will be widespread congestion in the morning peak hour across the network. The key strategic routes, the A3 through Guildford NE bound, and the A25 between Junctions 10 and 11, are shown to be at or over capacity. The summary network statistics presented in the SHAR, while useful, require some interpretation because the analysis of vehicle-hours is derived from link speeds only, and does not reflect junction delays and queues. The tables that show the ratio of flow to capacity and level of service are especially helpful to gaining an understanding of the conditions on the network in the forecast. Where the forecast traffic volume is above or close to capacity, flow becomes unstable and there is congestion. The SHA results provide evidence that, in 2031, congestion will be worse than it is today on much of the network.

It is the case that the traffic modelling does not take into account the potential for increased use of other modes, but the trip rates used for developments already have built in the typical level of use of other modes, and services will be required to meet that need. It is also the case that the model does not allow for park and ride, which would improve matters in the town centre, as discussed below.
In order to gain an insight into conditions across the network, it is necessary to combine information from several tables in the SHAR. Table 4.5 shows that the M25 and A3 will be at capacity in Scenario 5. The other roads that will have poor levels of service include those in Table 4.5 but also those in 4.12 (except the A3) and those in Tables 4.3 and 4.4 with levels of service E and F that will not be given some relief by improvement of the A3 in Scenario 5. Paras 4.10.3, 4 and 5 point out that there will be increased congestion. Given that the starting point is unsatisfactory, there can be no expectation that the schemes in the Infrastructure Development Plan will provide an overall improvement. There will be some local benefits, such as the Ash rail bridge for example, but in general conditions will be as bad and in many places worse. So the statement in the SHAR para 4.2.5 that ‘the combined mitigation as reflected in Scenario 5..indicates that at the strategic level it accommodates the additional PSLP demand’ needs qualifying – ‘at the cost of a lot of queuing’.

The cumulative effect of the additional traffic generated by the developments in the local plan will be to increase congestion, even with the proposed highway schemes in place. More detailed analysis of the junctions and queuing is required. So we question the conclusion that the developments would have “an acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF”.

Appendix 3 of the Transport Topic Paper shows the phasing of housing development and transport infrastructure. The major scheme being considered for the A3 between the A31 and the A320 is scheduled for delivery in the period 2023/24 to 2027/28. The strategic developments at Blackwell Farm and Gosden Hill Farm are shown as being phased in from 2021/22 onwards. The Garlick’s Arch development is shown as starting in 2019/20. Therefore, there will be a period in which the existing A3 has to cope with the additional demand arising from those developments before extra capacity is provided.

The following comments regarding the strategic sites are taken from the SHAR:

- Blackwell Farm – there will be congestion at the A31 junction, and the problems at the Tesco junction, and the Egerton road /Gill Avenue junction (para 4.9.5). Traffic is likely to access the Surrey research park and the RSCH through the development (para 4.7.3)
- Gosden Hill Farm – there will be an increase in traffic through Burpham. There will be pressure on the A3100/ B2234 roundabout (paras 4.7.6, 4.7.7 and 4.7.8).
- Wisley – traffic will increase on minor roads to gain access to the A3 (N and S bound) and other routes (para 4.7.11). The development will add more traffic to the A3. The Burnt Common slips help alleviate the traffic through Ripley according to the model, but queuing on the A3 could mean this does not happen (para 4.7.14)
- Normandy/Flexford – the report has little to say about the impact of this large development. The increase in flow on Westwood Lane is noted (para 4.5.7).
- Tables 4.10 and 4.11 show junction delay reducing at the Westwood Land, B3000 junction, but an increasing at the Puttenham Hill/Millbrook junction.
- Ash – development in Ash is not specifically addressed, but there are major increases in traffic on a number of roads. The new rail bridge will bring relief (but traffic will move to the next junction).
- Slyfield – there are no remark relating to SARP, and as there are no additional trips shown in and out of the Slyfield residential zone in Tables 3.3 and 3.4, it is possible that this development has been omitted. There is a significant increase in trips to and from the Slyfield industrial zone, which will impact on the A320 and Clay Lane.
- Town Centre – the report has very little to say about the town centre. It is evident that the model is forecasting severe congestion on the approaches to the town centre, such as the A281, the A31 Farnham Road, and Woodbridge Road for example. No mitigation measures are planned. And in the Transport Strategy, GBC states that the intention is to adopt Allies & Morrison’s Scenario 2 which would have the effect of significantly reducing the capacity of the town centre road system. The implications have not been examined, but traffic using the A281 from Waverley, for example, would be affected.

The local plan does not state an objective for congestion. The two strategic objectives that are included for infrastructure refer to supporting sustainable development and delivering a balanced system. However, in para 2.15 there is an aspiration expressed about opportunities ‘to improve the performance of the road networks through transport infrastructure and service improvements’, which taken with the previous paragraph includes reducing congestion. The evidence so far shows that this will not happen.
The mitigation proposed is not sufficient to overcome the problems that will be caused by the level of growth in the local plan. **Congestion will worsen.** The network will lack resilience and be vulnerable to disruption due to incidents. Minor roads will have to cope with a lot more traffic, for which they are unsuitable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**I object** to policy i2 Supporting the Department of Transport’s “Road Investment Strategy” This policy is too vague and unrealistically optimistic. Decisions by Highways England on improving the strategic road network (the M25 and A3) are still years off. The Council have suggested a very expensive tunnel under Guildford, but this is no more than a dream. Even if Highways England accepted this (which is highly unlikely in the post-Brexit public spending climate) it would not be built until the end of the plan period at the earliest. Other, less expensive A3 improvements, and changes to the Junction 10/Heathrow stretch of the M25, will also take years to agree and complete.

The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is foolhardy. Surrey is the most congested county in England, with 683 people per square kilometre, compared with an English average of 413. This policy will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone). This is a major development constraint that should have been applied to the OAN before this consultation, and not left up in the air.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to policy I3 Sustainable transport for new developments

This is another vaguely aspirational policy, based on wishful thinking and not grounded in the practical realities of daily life. It consists of a standard, box-ticking list of local government measures unrelated to the specifics of the plan. Like infrastructure, transport appears to be an afterthought; the policy fails in its essential job of guiding planning decisions, since it assumes development of any kind can be supported by sustainable transport.

The sustainability of the dormitory settlements which the Council want built across the countryside depends on a general “modal shift” from private car use to walking, cycling and public transport. This is unrealistic. The proposed sites are often miles away from the nearest railway station. Bus services even in the largest villages are almost non-existent – just one bus to and from Guildford each day in the Horsleys and none at weekends. Since bus services depend on profitability, they cannot be expanded and the Council are not proposing to subsidise new ones. Rural buses are too slow anyway for busy people. Most rural roads in the borough are narrow, winding, hilly, potholed, muddy and unlit. Many flood badly and have no footpaths.

The desired modal shift would require a comprehensive co-ordination of bus and train timetables with services every few minutes, seven days a week, to stops within walking distance of every home in the borough. This kind of integrated public transport system has been achieved in Switzerland, for instance, but only at huge public cost and thanks to a political consensus supporting state ownership of trains, buses and the post office, which delivers rural passengers as well as mail. There is absolutely no chance of this in the UK.

The vast majority of the borough’s residents are not, in practice, able to cycle. This includes children, the elderly, commuters who have to look smart, the infirm, the unfit and people carrying goods or shopping of any kind. Dependence on walking and cycling discriminates against these groups, which include some of the most vulnerable members of the community. It is socially unjust. One in two working people in Guildford commute for up to 3 hours a day, as I used to do. They will not leave their cars for even part of their journey if it means longer travel times.

Park-and-rides are a welcome part of the transport mix but are too slow for commuters and others on a tight schedule. Well-off pensioners seem to be the main beneficiaries. For an adult couple going shopping it is still cheaper to park in town.

Forget about water buses. The Wey is too narrow and, with a river speed limit of 4mph, boats are too slow for anything but recreation. Except on the tideway, not even the Thames has such services.

The addition of two new stations appears attractive but will slow down train journeys, which are already slower than at any time since the 1930s. Knock-on effects on localities where the new stations are built have not been worked out or presented.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to policy I4 green and blue infrastructure. This policy is a box-ticking exercise with no teeth to it. It sits oddly with the plan’s onslaught on the Green Belt. The plan to build on large areas of countryside and to inset villages will cancel out any benefits from extending the principle of enhancing biodiversity beyond Biodiversity Opportunity Areas.

There is no mention of the value of wildlife gardening to biodiversity or the important role that larger gardens play in a village setting.

**ABSENCE OF POLICY ON RIVER WEY**

I object to the omission of a policy for the River Wey which was included in the previous local plan. The existing policy G11 from 2003 Local Plan should be included so that development within the River Wey corridor will only be permitted provided that:

1. It protects or improves the special character of the River Wey and the Guildford and Godalming Navigations, in particular their visual, setting, amenities, ecological value, architectural and historic interest;
2. The special character of the landscape and townscape in the corridor is protected or improved;
3. Views both within and from the corridor which contribute to this special character are protected or improved;
4. Where appropriate, public access is provided to and along the River and the Navigations.
5. The Nature Conservation value of the site is protected or improved.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object to policy P1 Surrey Hills Area of Outstanding National Beauty

This policy weakens existing protection when it should strengthen it. It is dependent on the Surrey Hills Management Plan. The latter welcomes housing development. Even major (undefined) development in the AONB would be permitted if exceptional (undefined) circumstances could be demonstrated.

Much of my concern stems from the loose wording of the Policy, which in some places renders the policy ineffective, for example:

- “All proposals will be considered against whether they…”
- “All development proposals within and adjacent to the AONB will be expected to conserve or enhance its special qualities”

Terms such as “considered” and “expected” are not strong enough in prohibiting development proposals that do not conserve and enhance the AONB, and it is likely that developers will be able to use this loose wording to their advantage. Of particular concern is the paragraph 3, which begins:
• “Whilst the AONB designation does not preclude specific types of development in the Surrey Hills and proposals will be assessed on their individual merits…”

This whole opening clause is unnecessary and almost invites development proposals. I believe that it should be deleted, and the sentence should therefore begin: “There is a presumption against major development in the AONB in accordance with NPPF.”

In addition to the weakness of the language, I am also concerned that the AONB criteria listed in the policy are not the most important ones in determining whether a planning application should be approved. Aside from the one outlined in the first bullet point (which relates to the AONB setting) none of these criteria is concerned with the key characteristics of AONB, ie landscape character, scenic beauty, important views, tranquility etc. Whether or not a development supports the rural economy or provides public access are of far less national importance than preserving the quality of the landscape itself.

I believe that the AONB Policy in the Draft Plan 2014 provided greater protection to the AONB, and would like to see the following sentences reinserted:

• “The national significance the AONB will be afforded the highest level of protection and only proposals which can be sensitively amalgamated into the area and which complement and enhance the character of the AONB will be considered”
• “Proposals within the AGLV which would have a negative impact upon views into and out of the AONB and which do not respect the setting, will not be acceptable”
• In accordance with the most up to date Minerals and Waste Plan, safeguarding of applicable land within the AONB and/or AGLV may be necessary and deemed appropriate

Finally, I would like to see a clause which gives protection to the candidate areas for AONB status in the forthcoming Surrey Hills AONB Boundary Review. I consider that all land that has been assessed as meeting the latest Natural England criteria for AONBs should be subject to the same level of protection as an AONB, not just land that has been designated AGLV.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy P2 green belt

This policy states, “the general extent of the Green Belt has been retained.” This is completely false.

The policy wording is weak in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. It is an inalienable public good. Once gone it is gone forever. It is not the Council’s to give away.
Policy P2 completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world.

Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

- Agricultural production
- Rural leisure and tourism amenities
- Water catchment
- Flood control
- Biodiversity
- Natural heritage
- A carbon sink for air pollution
- Room for public facilities such as parks and burial grounds
- Profitable film locations (e.g. Shere)
- Future economic potential such as mineral extraction (even fracking)
- Natural beauty, landmarks, open space, rural views and sight lines

Benefits to public health and well being, physical and psychological (as well expressed in the NPPF)

As a matter of law and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations.

It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6% of the Crown jewels in order to build houses.

I object to the “insetting” of 14 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages. I am deeply disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are “leggy” in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat.
I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors.

To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need (especially post-Brexit) and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Send is a good example of villages that should not be removed from the Green Belt. Send provides an important Green Belt buffer between Woking and Guildford. Yes, it is true that Send comprises old ribbon development but this should not mean it can be removed from the Green Belt so that Woking joins up to Guildford. The village and the countryside behind the A247 should all be protected.

I object to three particularly vulnerable areas of high quality amenity land being taken out of the Green Belt around Send which include:

1. The land behind the schools including playing fields and woodland.
2. The land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision Engineering.
3. Land to the left of Cartbridge going up to the old depot on the Wey Navigation.

**Answer (if comment is on questions 1-7 of the questionnaire):**

I object to policy P3 Countryside (i.e. beyond the Green Belt)

This is more protective – as a policy – than the proposals for the AONB and the Green Belt, so is anomalous and wrong. I am not in favour of building on this area, since urban, brownfield areas are sufficient to meet all reasonable housing targets. There is no need to build on any green fields if brownfield, previously developed land is used efficiently (without garden-grabbing).

This policy refers to the countryside near Ash and Tongham (see paragraph 4.3.28). This area does not justify stronger policy protection than any other part of the borough. The fact that the current and previous Council Leaders represent it should not give it preferential status: “we will seek to limit any development in the countryside unless it can be demonstrated that it is necessary in that location”. Green Belt and AONB areas should by definition have higher levels of protection than non-Green Belt areas.

It should also be noted that Ash and Tongham lie beyond Guildford far away from London and therefore make no contribution to controlling Metropolitan urban sprawl, unlike those villages which, ironically, are to be “inset”. That is
presumably why Ash and Tongham are not in the Green Belt already. This policy, however, attaches higher priority to preventing the “coalescence between the Ash and Tongham urban area and Aldershot” than it does to the primary purpose of the Metropolitan Green Belt, which is to stop London sprawl.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy P4 Flood risk and water source protection zones

Urban development on existing hardstanding would not create additional flood risk, especially where there is scope for improved flood resistance measures to be included in the design. Sites such as Woodbridge Meadows Industrial Estate and the Arriva bus depot, on the River Wey bank, are potential high-value brownfield sites that would not be available for housing if this policy is implemented. It is not the footprint of existing buildings that should limit future development, but the extent of existing hardstanding. Tarmac and concrete do not act as functional floodplain, and some land with hard standing close to the river, within the town centre and within easy walking distance of the railway station, provides an excellent opportunity for real urban regeneration that could protect the surrounding countryside.

I strongly believe that this policy should not be used as a convenient excuse not to build on the extensive area of brownfield sites between the station and Ladymead. Any new development in this area could easily be built on stilts with flood resistant ground floor parking in areas that are identified as high flood risk. This area has been built over successfully over the last 50 years. We do not need to stop now.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to policy P5 Thames Basin Heath Special Protection Areas

This policy is weak. The mitigation (cash compensation) offered for development in the special protection area is so small as to be meaningless.

SANG (Suitable Alternative Natural Greenspace) is not beneficial since the sites identified or targeted are already green space. This is just using agricultural or wooded land as recreation land in order to justify building on other green spaces nearby. There is no actual increase in open space or environmental protection; instead, it is a ploy designed to permit building on otherwise protected areas.

SANG – in part used to prevent dogs and cats attacking nesting birds – must also ensure that it is not using land which is adjacent to the Special Protection Areas.

Comment ID: PSLPP16/18586  Respondent: 10858977 / Angela Otterson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy S1 as stated and the presumption in favour of sustainable development.

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” Policy S1 ought to set a clear framework. No definition of “sustainable development” is given.

The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The promise “to secure development that secures the economic, social and environmental conditions in the area” omits to recognise that economic growth, social justice and environmental protection often conflict. It does not say how each element is to be weighted or conflicts resolved. As a practical guide to the tough choices Councillors will face, it is useless. Under this policy, any development will qualify as “sustainable”, thereby failing to apply the NPPF’s most important guideline.

The most gaping hole in Policy S1 is the Green Belt. As an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity, the Green Belt is a living example of sustainable development in practice. It is the envy of the world. Policy S1 should commit to uphold Green Belt boundaries and protections, setting at least one clear boundary to planning decisions. The plan’s contempt for Green Belt constraints is amply demonstrated in later policies.

The commitment to approve planning applications “wherever possible” and “without delay” reveals this draft plan’s pro-development bias. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.
This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.3.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**I object** to policy S2 the Borough Wide Strategy and the commitment to build 13,860 homes based on the Strategic Housing Market Assessment (SHMA) 2015 prepared by GL Hearn.

The OAN “objectively assessed need” figure in the SHMA of 693 homes a year is far too high.

I am very surprised and concerned that GBC have adopted the OAN of 13,860 homes as the housing target **without any application of constraints** as required under the National Planning Policy Framework and the National Planning Policy Guidance. The scale of the housing number proposed, inevitably increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

Other local planning authorities appear to take a more balanced view in their approach to planning. The Woking Core Strategy 2012 **applies a constraint of 50%** from the 594 new homes identified in their own SHMA. “It should be noted that local evidence (Strategic Housing Market Assessment - SHMA) highlights a need for an additional 499 new affordable homes every year in the Borough and a total of 594 new homes every year when taking into account demand. **Given the level of environmental constraints present in the Borough, it is considered that the provision of an average of 292 dwellings per annum represents a reasonable level of housing growth for Woking and is deliverable.**”

Historically GBC have correctly applied constraints on housing numbers to protect the Green Belt. The Surrey Structure Plan 1994 advocated a general slowing down in the rates of development “because of the environmental constraints which exist in the County, including Green Belt”. This slowing down was reflected in the requirement that Guildford Borough should accommodate a net increase of 3,800 dwellings between 1991 and 2006. This was a lower rate of development than in previous years. It is interesting to note that the Structure Plan at that time expected sufficient land to arise within the urban areas to accommodate this requirement.

However it would appear that today GBC have effectively ignored the real potential of the urban area to provide for housing. At the same time GBC have adopted a radically different approach to the policy of the Council over the last 20/30 years and are now ignoring government policy in relation to the Green Belt.

A detailed and comprehensive professional review of the SHMA dated June 2016 by NMSS an independent expert firm dealing with housing and demographics procured by Guildford Residents Association (GRA) has concluded that the OAN figure should be revised down from 693 homes per annum to **510 homes per annum**.

The 41 page report by NMSS which can be found on the GRA website entitled “A Review of the West Surrey SHMA as it relates to the Objectively Assessed Housing Needs of Guildford”. It was a real community effort. It was paid for by over separate 20 Guildford Residents Associations and Local Parish Councils none of whom were convinced that the SHMA
report procured and presented by GBC was accurate or transparent or accessible in a meaningful way. So they clubbed together and collected contributions from many hundreds of Guildford residents to try to find out the truth of the housing need figure presented in the Local Plan.

The NMSS report includes detailed analysis and financial modelling and was prepared by Neil McDonald who we were lucky to find. He is a niche consultant with the right skills and a national reputation. An independent adviser and commentator on housing demographics. He works with local authorities and others on the estimation of housing need and related issues. He was a civil servant and policy adviser to Ministers for over 30 years, the last 10 advising on housing and planning issues within the Department of Communities and Local Government. His 7 years as a Director at DCLG included a posting as Director, Planning Policy and a period as Chief Executive of the National Housing and Planning Advice Unit.

NMSS found that the SHMA used in the Local Plan incorrectly adds extra homes to its basic demographic projection to allow for improving affordability of housing, increased student numbers and economic growth. The report found that none of these additions were justified based on the evidence presented within the SHMA. The report concluded amongst other matters that:

- The affordability of housing in Guildford is no worse than in other Surrey districts and boosting supply beyond the demographic OAN would not result in a noticeable improvement in affordability but simply in more people moving to the area.
- There are reasons for believing that the SHMA’s estimate of the number of homes needed for students may be too high and that an adequate provision for students is already included in the demographic OAN. The report advises that the Council should commission a separate student housing need figure for Guildford given the distorting effect of students on our overall OAN. It envisages that, once this exercise is undertaken, improved accuracy means the overall OAN would be likely to reduce still further.
- The SHMA seeks to estimate the number of homes needed to support employment growth using employment rate assumptions that are inconsistent with the employment forecasts. This produces misleading results. An analysis of the Cambridge Econometrics and Oxford Economics forecasts using employment or economic activity rate assumptions consistent with the forecasts suggests that in neither case is there a need to provide more housing than suggested by the demographic analysis. Indeed, in both cases a smaller population growth (and hence fewer homes) could support the jobs growth that is forecast.

A further independent report was procured in 2016 by the Campaign for the Protection of Rural England CPRE from Richard Bate of Green Balance, an independent consultancy with expertise in demographic and housing matters to carry out a review of the GL Hearn SHMA

The report by Green Balance runs to 37 pages and its findings are that the OAN for homes in Guildford should be reduced from 693 per annum to 481 because:

- the vacancy rate figures should be taken from local government annual records rather than from the 2011 Census. This would reduce vacancy rates to 2.9% in Guildford.
- there should be no increase for affordability above basic demographic change.
- there should be no increase for Student housing and it was considered unrealistic that the University should be allowed to exert such substantial pressure on the domestic housing market.
- the use of employment-led forecasts should be abandoned using purely household projections instead which are more reliable as a form of prediction.

Two completely independent expert reports are surprisingly consistent in their findings. In broad terms a figure of approximately 500 homes per annum would appear to be a correct estimate of OAN for Guildford. However, this is before constraints are applied to arrive at an acceptable housing target.

The SHMA is based on pre-Brexit projections for economic and population growth, including migration. These now need to be revised downwards.

It is unacceptable that demographic and economic model assumptions have been withheld by GBC and cannot be checked making the process unaccountable.
The figure of 13,860 new homes is unsubstantiated. It has not been scrutinised by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by commercial sub-contractor used in preparing the SHMA.

Both the National Planning Policy Framework and National Planning Policy Guidance provide a clear policy direction that the overall housing target should be reduced by a variety of constraints to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors. I have corrected this omission below. Infrastructure policies should be planned at the same time as Local Plans but in this case they have effectively been left out and are not sufficiently developed.

The Framework also makes clear that, once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan.

Unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development on a site within the Green Belt.

THE NEED TO APPLY CONSTRAINTS

Ministerial guidance in relation to building on the Green Belt is clear:

“the single issue of unmet need - is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development in the Green Belt” - Nick Boles to Sir Paul Beresford MP 7th February 2014.

“we were always very clear that we would maintain key protections for the countryside, and, in particular, for the Green Belt. The Framework makes it clear that a Green Belt boundary may be altered only in exceptional circumstances and reiterates the importance and permanence of the Green Belt” – Nick Boles to Sir Michael Pitt, Planning Inspectorate 3rd March 2014.

“Planning Guidance, updated in March 2014, also states that unmet housing need is unlikely to outweigh the harm to the Green Belt to constitute the very special circumstances justifying inappropriate development within the Green Belt” – Nick Boles to Sir Paul Beresford MP 18th June 2014.

70% of the sites put forward in the Local Plan are in the Green Belt which flies in the face of current government planning policy. The National Planning Policy Framework (NPPF), National Planning Policy Guidance and case law make it clear that Green Belt is an absolute constraint on housing supply. Exceptional circumstances need to be shown to adjust boundaries.

Other constraints under the NPPF include assessments of sustainability, strategic flood risk assessment, physical constraints on land use and infrastructure constraints (this can include road congestion, schools, drains, power supply and medical requirements).

Constraints should be applied to the Objectively Assessed Housing Need (OAN). However this itself is overstated and should be reduced from 693 per annum to 500.

In view of the comments above it would appear logical to apply CONSTRAINTS in line with government policy to a corrected OAN. of approximately 50% to account for the fact that 89% of the borough is in the permanent Green Belt and development is not supported by adequate major infrastructure. This reduction is in line with the constraints percentage of 50% applied by Woking Borough Council.

This would result in a more acceptable and practically achievable HOUSING TARGET of 250 homes per annum which over a 20-year period would be 5,000 homes. All of these homes could be built in the existing urban brownfield areas of the borough and would in part satisfy the 20,000 objections made by residents to the 2014 draft plan and also relieve the additional problems of inadequate infrastructure.
It would also mean that there is currently 8.5 years supply of housing (2131/250) which is made up of existing permissions granted (1,518) and completions made (613) during 2013/2015. (Monitoring Report by GBC 2015)

I have recently (9 July 2016) had a meeting with Sir Paul Beresford my own MP for Mole Valley who has kindly assured me that he is in the process of speaking to the Secretary of State to ratify the current government policy of protecting the Metropolitan Green Belt and to instruct the Planning Inspectorate and Local Planning Authorities accordingly. This is in the wake of the recent national referendum and the likelihood of the easing pressure on international immigration over the next 20 years.

The Brexit vote may have strengthened government policy further. Theresa May, the new prime minister in waiting, announced on 11 July that she is personally committed to protecting the Green Belt once she takes office.

Whilst I have many significant objections to the GBC Local Plan I applaud the policy statement by GBC in their Monitoring Report, “We will continue to monitor the use of previously developed land, and continue to identify as many opportunities as possible for redevelopment of previously developed land.” I believe it will be to the benefit of all residents if GBC can apply themselves vigorously to this endeavour in order to protect the Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Key parts of the evidence are missing, flawed or based on withheld assumptions.

The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach and the Transport evidence is too late and incomplete to be relied upon to inform the Plan.

The Plan preparation process has had inadequate regard for national policy which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

It is unacceptable to treat Green Belt as a readily available source of development land during Plan preparation. The Mayor of London intends to respect Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level. Releasing Green Belt to fund infrastructure or build on open, previously-developed Green Belt does not pass this test. Opportunities to channel development towards brownfield locations beyond the outer Green Belt boundary, linked to sustainable transport, have not been adequately considered. It is not credible to suggest the Green Belt is being treated as permanent when its boundary was changed as recently as 2003 as part of the last Local Plan review. Indeed, land released in 2003 is neither fully developed nor efficiently used. An approach of eroding the Green Belt at each Local Plan review is not sustainable. If there is a case for Green Belt development, it needs to be proven through the application of policy.

Comment ID: SQLP16/2118  Respondent: 10858977 / Angela Otterson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and surface water flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach.

The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. GBC have failed to apply any reduction which makes the plan undeliverable and unsound. I believe it would be harmful to the character, quality of life and economy of Guildford not to reduce the housing figure to a number significantly below 13,860 new homes by 2033. I submit it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to develop on the scale currently proposed. I am concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site.

In view of the extent of physical and policy constraints, the inflated SHMA figure, and the transport evidence indicating that the Plan would lead to congestion, the OAN figure should be 500 homes per annum and the housing target after the application of constraints should be in the range of 250 homes per annum and kept under regular review.

The extent to which the Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way casts doubt over whether sustainability has been assessed. The report treats various major development sites in Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”, fails to consider options that constrain development or that make greater use of brownfield or previously released greenfield land, focuses on a range of options that involve developing on even more Green Belt around Guildford in order to protect Green Belt around Woking does not consider environmental limits or impact on the next generation in terms of weighing demand for homes for the young alongside the use of all possible last resort greenfield options by one generation.

The National Planning Policy Framework requires that objectively assessed needs should be met unless: “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or specific policies in this Framework indicate development should be restricted.”

The specific policies described include several of particular relevance to Guildford including sites protected under the Birds and Habitats Directives, Sites of Special Scientific Interest, Green Belt, Local Green Space, Area of Outstanding Natural Beauty, designated heritage assets and locations at risk of flooding. In this situation, is it appropriate for the Appraisal to rule out not meeting needs in full from a sustainability perspective?
Notwithstanding that the Sustainability Appraisal should be proportionate, strategic and look at significant matters, the assessment appears deficient and biased in the spectrum of alternatives it considers to the point that it is questionable whether it meets the requirements.

GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

GBC has proposed an OAN of 693 houses per annum in the GL Hearn Strategic Housing Market Assessment (SHMA) which is unsound.

Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018. This is too late!

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** SQLP16/2119  **Respondent:** 10858977 / Angela Otterton  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**SUMMARY**

I request a confirmation by email from GBC that all of the objections made below are put to the Inspector appointed by the Secretary of State to review the GBC Regulation 19 draft local plan.

I request that once my objections are fully taken into consideration the draft plan is amended accordingly and re-issued.

Guildford is a constrained borough by the reality of having 89% of its area zoned as permanent Green Belt and an out of date road network that is already at capacity. I am concerned that GBC have adopted an inflated OAN of 13,860 homes as a housing target **without any application of constraints** as required under the National Planning Policy Framework and the National Planning Policy Guidance.

The application of constraints to housing need is a sensible and practical approach to development within the borough and is not only what GBC have done in the past in previous plans but is also what its neighbouring local planning authorities have done.

The scale of the housing number proposed in this plan, inevitably increases the onus for the plan to be seen to be sound. A substantially lower number of 5,000 homes, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

I am concerned that GBC have failed to grasp the opportunity of following clear government policy to develop in the urban area on previously developed sites. Many of these sites are in their ownership and it would seem a practical and readily achievable alternative which is much more acceptable to local residents.
In my opinion much of the proposed local plan appears out of date. It is like a voice from the past. Current trends in terms of property development such as the marked decline in town centre shopping centres and the need to create modal shift by developing residential uses close to transport hubs appear to have been overlooked.

- I object to the identity of Send from the Green Belt.
- I object to the number of houses to be built, increasing the number of cars with an already congested local roads.
- I object to the number of houses and the lack of infrastructure to support families, to include schools, GP surgeries and small narrow roads.
- I object to GBC trying to destroy my quality of life by increasing stress levels by reducing our very valuable green spaces.

As a Send resident I object to policies A42, A43, A43a and A44 of the local plan.

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plan.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   b. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
   c. The increase in already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   e. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   f. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted level. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the reversible impact of the habitat degradation.

9. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

10. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning
After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the local Plan with immediate effect.

4) I OBJECT to Policy A43.30 the proposed development of Garlicks Arch designated for 400 houses and an industrial estate. This is a new site not included in the Regulation 18 draft and has NOT been consulted on previously. It is not only permanently protected green belt but also a site of ancient woodland with some trees planted in the 16th century.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
5) I OBJECT to policy A43.30 the development of new four way interchange onto the A3 which would mean that narrow Send Road (A247) would be the main route for traffic leaving the M25 and A3. It is already crowded and vulnerable to traffic jams. Further traffic from this development would result in permanent gridlock. It simply would not work.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

6) I OBJECT to policy A44 which would see 40 homes and two travellers' pitches on land west of Winds Ridge and Send Hill. This was again a NEW site NOT included in 18 draft and therefore has NOT been consulted on previously. Once again this is Green Belt land partly containing unsafe landfill. Access is by a narrow lane which could never take the volume of traffic that would ensue from traveller's pitches.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
7) I OBJECT to the fact that the Local Plan takes no account of schools, doctors surgeries and roads that are already operating at full capacity. Another 4000 houses in this area with a conservative estimate of a further 8000 cars would be catastrophic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/3492  Respondent: 10859265 / Neil Haxton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Living in this community, we are already faced with traffic flow issues, over stretched health and education services, and a rapidly diminishing green belt which the proposed developments would only add to these issues.

My main objections are;

1) I OBJECT to the removal of 15 villages, including Ripley and Send, from the green belt. This will lead to wholesale, and often inappropriate developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2) I OBJECT to the fact that GBC have not followed the correct process for Send and Ripley developments. Any significant changes to the 2014 proposals, such as the proposal development of Garlicks Arch, should have required another full consultation, which did not happen. This invalidates the whole process.

**I object to the Policy A42 change at Clockbarn in Tannery Lane because,**

The increase to 60 homes in place of 45 homes is 33% more, therefore a significant increase on stretched area and too much for the area and therefore making the current access and traffic problems affecting Tannery Lane and A247 junction during rush hour and school drop off/collection worse.

The current removal of the Green Belt in our village will increase, and there will no longer be views of the River Wey Navigation that we and our children currently enjoy.

Surface water flooding which is already an issue, will potentially worsen.

The previous objections by the local people to this have obviously been ignored.

**I object to the Policy A43 change at Garlick’s Arch because:**

It makes no reference to and ignores all the previous objections made by local people who will have to live with the consequences.

There is no known demand for 6 Travelling Showpeople plots in this location.

This is permanent Green Belt and no “exceptional circumstances” for its removal exist, and, if this occurs, Ripley and Send will no longer be separated and therefore the purpose of Green Belt will no longer exist as well.

It will cause over-development and destruction of our village and 400 homes is excessive, causing excessive traffic which the roads of Send and Ripley cannot cope with. The roads are currently at breaking point and this can only make matters worse.

It is beautiful ancient woodland that existed at the time of Elizabeth 1 and should be left alone for future generations.
This is currently a flood zone 2 allocation and already has frequent flooding
There is contamination by lead shot accumulated over fifty years

Comment ID: pslp172/3215  Respondent: 10859265 / Neil Haxton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A 58 at Burnt Common because:

It was deleted from the 2014 draft due to all the previous objections

The word "minimum" is a change from the previous "maximum" in the 2016 plan and since that time there has been a reduction in need for industrial land

As there are currently empty sites and units at Slyfield and Guildford there is no reason to build industrial or warehouse development in the middle of the Green Belt land

The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not an over allocation of 10 hectares at Send in the Green Belt.

The impact on surrounding roads will create traffic chaos and join up Send and Ripley to defeat the purpose of the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposal to inset Send Business Park from the Green Belt because:

This is an old non-conforming user in an area of outstanding countryside next to the beautiful Wey Navigation

There is highly restricted vehicle access along Tannery Lane in both directions that would not accommodate any increase in volume or type of traffic

Any increased expansion or development at this site detracts from the Green Belt and is completely inappropriate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I write to object to the Local Plan for East and West Horsley.

I believe that the Horsleys should remain as Green Belt. The exceptional circumstances required before taking this action have not been demonstrated.

There are no sound reasons for the boundaries of the settlement areas to be changed.

Infrastructure in Horsley is already overloaded. Local schools are full, drainage is inadequate, roads and car parks are overloaded.

Station Parade should not be designated as a District Centre. The nature facilities in the village centre have been misread.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley South

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object to your plan.

Horsleys are in the Green Belt and there are no proven reasons for removing this protection.

The Horsleys are already crowded to the extent that local children cannot always obtain entry to local schools.

The Medical facilities are exceedingly stretched.

Winter time the roads are often under water because of inadequate drainage.

In short the Horsleys cannot cope with more houses.

Answer (if comment is on questions 1-7 of the questionnaire): ()

SHMA

I object to the huge housing number need put forward by GBC. The definitive SHMA that has been produced for Guildford Borough Council by G L Hearn and sets a requirement of 13,600 homes for the Borough is questionable. GBC has been less than transparent in informing the public how this figure is arrived at and admits that they themselves have not
I object that GBC is not applying any constraints to the housing number. Neighbouring Boroughs are doing so. Guildford Borough is almost wholly Greenbelt with large areas of outstanding natural beauty, good quality farmland, sites of special scientific interest and SPA’s. It has many acres of river and canal frontage as well as ancient woodlands. It is rich in wildlife and home to rare species. Many sites are also prone to regular flooding. All this in itself should invite definitive constraints.

Furthermore the narrow country lanes and village infrastructure cannot and will not cope with the level of development proposed. It is unsatisfactory and, in fact, dangerous to hand 'constraints' over to developers. These same would be developers are already, in the case of Wisley, advertising the new homes at Wisley in local cinemas. This level of disregard for reality bodes very badly for the future of our borough.

SHMA

I object to the huge housing number need put forward by GBC. The definitive SHMA that has been produced for Guildford Borough Council by G L Hearn and sets a requirement of 13,600 homes for the Borough is questionable. GBC has been less than transparent in informing the public how this figure is arrived at and admits that they themselves have not scrutinised the calculations. This has been critically examined by further expert investigation. It is inflated by the inclusion of dubiously arrived at numbers based on student numbers, immigration and a heavily weighted growth agenda.

I object that GBC is not applying any constraints to the housing number. Neighbouring Boroughs are doing so. Guildford Borough is almost wholly Greenbelt with large areas of outstanding natural beauty, good quality farmland, sites of special scientific interest and SPA’s. It has many acres of river and canal frontage as well as ancient woodlands. It is rich in wildlife and home to rare species. Many sites are also prone to regular flooding. All this in itself should invite definitive constraints.

Furthermore the narrow country lanes and village infrastructure cannot and will not cope with the level of development proposed. It is unsatisfactory and, in fact, dangerous to hand 'constraints' over to developers. FINALLY

I believe this plan is ill conceived, uses misleading data and contains many fundamentally flawed assumptions and errors. I do not believe it can be achieved and as a template for the Borough going forward it gives a depressing glimpse of a chaotic future where a great deal will be lost for short term gain in the hands of the few.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**SEND**

I object to all the proposals for development in Send on the grounds that none were included in the 2014 draft Local Plan and that these fundamental changes and last minute inclusions have not undergone proper consultation.

I object to the removal of Send and other villages from the Greenbelt. Send specifically and in conjunction with development at Gosden Hill is in the front line as a link village between Guildford and Woking. This plan to infill Greenbelt land will effectively join up the towns thus creating exactly the type of urban sprawl the Greenbelt was created to avoid.

**Garlick's Arch, Burnt Common**

**Proposed Interchange on the A3**

I object to this policy because it will significantly increase traffic flow through Send. This is already at a standstill at peak hours and this will mean gridlock. The narrow through road with no capacity for widening means that there will be increased danger to cyclists and pedestrians and a further reduction in already polluted air quality.

I object to this policy because there has been no adequate transport assessment and the supporting evidence is sketchy, incomplete and unreliable.

The proposed development of 400 homes at Garlick's Arch
I object to the development of so many homes on this site. There is no proven need for this number of houses. It is inappropriate and will overload facilities in the village. There are no special circumstances which would support this development.

I object on the grounds that this site at Burnt Common floods every year. Building would create problems for other areas of the village and potentially the road networks as well.

I object to this development on conservation grounds and am surprised that it should be considered.

The area covered in ancient woodland with trees dating back 400 years.

The Proposed Industrial development of 7,000 sq.m at Garlick's Arch

I object to this proposal because it is superfluous. The requirement for employment space need ELNA 2015 is reduced by 80% from the 2014 plan. A 40ha site with planning permission is already available at Slyfield and this development could be easily and better accommodated there.

I object to this development on the grounds that there are already a number of rural businesses adjacent providing local employment. These would disappear if this development were to go ahead.

Send Hill

The proposal for 40 new homes at Send Hill and 2 travellers pitches

I object to this development because there is no requirement for these houses.

I object to the fact that this proposed development is in the Greenbelt in an area of beautiful countryside and there are no special circumstances which would make it necessary or desirable

I object to this proposed development on the grounds that subsoil on the site contains unsafe landfill waste. There is documented evidence to this effect and the site is currently vented with detectable methane emissions. Elderly residents who had close contact with the site report consequent health problems.

I object to the inclusion of 2 travellers pitches. The road is narrow and manoeuvring and achieving access for the large vehicles used by travellers would be impossible.

Clockbarn Nurseries, Tannery Lane

Proposal for 45 houses

I object to this proposal as there is no requirement for these houses.

I object also on the grounds that Tannery Lane is narrow and winding and this development in addition 64 homes which already have planning permission and the new Marina will create real problems for motorists as well as endangering cyclists and pedestrians

I object as this development will exacerbate problems at the Send Road/Tannery Lane junction which is already hazardous

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

ROADS, TRANSPORT AND INFRASTRUCTURE

I object to the lack of any solid proposals for roads to support any of the developments. Proper highway surveys have not been undertaken and the majority of stated potential undertakings are no more than aspirational at best and unachievable at worst. I do not believe such major structural requirements should be so ignored or again, handed as conditions to developers. It is not enough insurance and gives developers a potential free hand to begin housebuilding without these being in place. The result will be chaos.

I object to the fact that in its entirety this Draft Local Plan ignores the huge problems that will be generated throughout the Borough on the road networks and hubs, as well as through villages and on country roads.

I object that insufficient consideration has been given to the problems which will arise from pressure on public services, sewerage etc.

I object that not enough attention is paid to environmental aspects, particularly air quality which is poor currently and will be made a great deal worse as a result of increased traffic.

I object that there are misleading and incorrect references to bus timetables and services for the villages. These have been made to appear much more efficient than they actually are.

I object that there are references to increasing use of cycling as a means of transport when the lack of provision of cycle paths and the impossibility of providing them along tortuous, unlit narrow roads often bearing heavy traffic makes this a nonsense.

GREENBELT AND BROWNFIELD

I object to the fact that 70% of the building proposed in this Local Plan is in the Greenbelt and strung along the A3 where it will not only remove valuable countryside forever but will destroy the openness of the Greenbelt and effectively join up town and villages as well as creating impossible traffic congestion on the A3 and local roads.

I object to the relatively small amount of development for Guildford Town center and the complete failure of GBC to identify and promote sufficient brownfield sites within the urban area, where much more is possible. It almost completely ignores the proviso of 'brownfield first'. Walnut Tree Close, which represents a very real opportunity for housing provision has mysteriously become 'high flood risk' in this plan despite the fact that it is already built upon and new buildings continue to be constructed there. There are many ways to mitigate flood risk. It is interesting that this risk does not seem to be a bar to proposed rural sites, which flood regularly.

I object to GBC using taxpayer's money to buy consultancy, which continually fails to meet their objectives. The station development, another big opportunity for housing is constrained by very precise size and height requirements, which make it difficult for imaginative planning to apply. More imaginative approaches to the issues could achieve better results.

The concentration on retail in the town centre is a further restriction on housing provision. Guildford has adequate retail provision and there is no big demand for more. Retail is less and less needed as so much shopping is now done on line and this trend will continue. If Guildford wants more retail it would be wise to provide housing first and the demand for retail would follow. As it is, pushing development into the countryside will hugely increase external traffic coming to the centre and exacerbate the already congested access problems. Under this circumstance alone retail is likely to fail.

I object to the fact that this plan will fail to deliver anywhere near enough 'affordable housing' despite the promotional exercise on the GBC website where key workers talk of the benefits of the plan. This sort of PR, again at tax payers expense, is highly misleading. The lack of building in the town centre where key workers are most needed and access to work and public transport is available is an indictment of the intent. Guildford Borough is a commuting area and over building in the countryside will only create more commuters. Moreover this housing will not be 'affordable'. These will be executive homes and will be expensive.

Answer (if comment is on questions 1-7 of the questionnaire): ()

GREENBELT AND BROWNFIELD

I object to the the fact that 70% of the building proposed in this Local Plan is in the Greenbelt and strung along the A3 where it will not only remove valuable countryside forever but will destroy the openness of the Greenbelt and effectively join up town and villages as well as creating impossible traffic congestion on the A3 and local roads.

I object the relatively small amount of development for Guildford Town centre and the complete failure of GBC to identify and promote sufficient brownfield sites within the urban area, where much more is possible. It almost completely ignores the proviso of 'brownfield first'. Walnut Tree Close, which represents a very real opportunity for housing provision has mysteriously become 'high flood risk' in this plan despite the fact that it is already built upon and new buildings continue to be constructed there. There are many ways to mitigate flood risk. It is interesting that this risk does not seem to be a bar to proposed rural sites which flood regularly.

I object to GBC using taxpayers money to buy consultancy which continually fails to meet their objectives. The station development, another big opportunity for housing is constrained by very precise size and height requirements which make it difficult for imaginative planning to apply. More imaginative approaches to the issues could achieve much better results.
The concentration on retail in the town centre is a further restriction on housing provision. Guildford has adequate retail provision and there is no big demand for more. Retail is less and less needed as so much shopping is now done online and this trend will continue. If Guildford wants more retail it would be wise to provide housing first and as demand for retail would follow. As it is, pushing development into the countryside will hugely increase external traffic coming to the centre and exacerbate the already congested access problems. Under this circumstance alone retail is likely to fail.

I object to the fact that this plan will fail to deliver anywhere near enough 'affordable housing' despite the promotional exercise on the GBC website where key workers talk of the benefits of the plan. This sort of PR, again at tax payer's expense, is highly misleading. The lack of building in the town centre where key workers are most needed and access to work and public transport is available is an indictment of the intent. Guildford Borough is a commuting area and over building in the countryside will only create more commuters. Moreover this housing will not be 'affordable'. These will be executive homes and will be expensive.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY II INFRASTRUCTURE AND DELIVERY

1.1 I object to the new Guildford Borough Council Transport Strategy 2017.

1.2 I object to ASP 3 new A3/A3100/B2215/A247 Burpham-Burnt common all-movements junction, formed by a new connector road linking between new A3/A3100 Burpham junction (SRN4) and the B2215 London Road, in combination with the new A3 northbound on-slip (SRN9) and the new A3 southbound off-slip (SRN10) under Infrastructure and Delivery.

1.3 If development gets the go ahead for the strategic site at Gosden Hill it would be logical to construct a 4 way A3 interchange at Burpham. It is not feasible to pass the problem down the line to Send which will already be bearing the brunt of traffic generated from a planned 4,000 homes. The A247 link road to Woking already at capacity will become gridlocked.

1.4 I object to SRN4 New A3/A3100 Burnham junction with relocated A3 southbound off-slip and new A3 southbound on-slip. This will place an unbearable problem onto the A247 whereby traffic will be passing directly through Send from the A3 and M25 and the proposed new development at Wisley.

1.5 I object to SRN9 A3 northbound on-slip at A247 Clandon Road (Burnt Common) and SRN10 A3 southbound off-slip at A247 Clandon Road (Burnt Common). This will place an unbearable problem onto the A247 which is already at capacity.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1 POLICY A25 GOSDEN HILL

1.1 I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.

1.2 There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.3 Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,

1.4 The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity.

1.5 The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

1.6 The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.

1.7 I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).

1.8 The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

1.9 A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3828  Respondent: 10859489 / Jennifer Procter  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1 POLICY A26 BLACKWELL FARM

1.1 I object to the changed policy A26 Blackwell Farm for 1500 homes which is still far too much.

1.2 There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.3 Blackwell Farm is located entirely within the green belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Blackwell Farm performs all five functions of Green Belt, and fulfils purposes 1, 3 and 5 very strongly.

1.4 The site is dependent on a new access road from the A31 (Hog’s Back) to the Hospital roundabout at Egerton Road, with a new signalised junction on the A31 at Down Place (just east of the A3 slip road). An independent traffic study commissioned by the Parish Council has shown that this new junction would result in more queuing on the Hog’s Back and on the A3 during the morning peak-hour, and as a result the villages of Puttenham, Compton and Artington will see a surge in traffic numbers as Guildford-bound drivers seek out the fastest route and divert along the B3000, B3100 or Down Lane.

1.5 Levels of nitrous oxide that are consistently well above the EU legal limit have been recorded at the A3 end of the B3000 over the last 2 years (GBC Air Quality Annual Status Report, September 2016). Compton Parish Council is expecting that this section of the B3000 will be made an Air Quality Management Area soon. Any traffic intervention that increases traffic levels through Compton (such as the proposed access road to Blackwell Farm), will make this situation worse and potentially have an impact on the health of residents.

1.6 The development will result in the loss of nationally important countryside - The new access road would cut through the Surrey Hills Area of Outstanding Natural Beauty (AONB), uprooting centuries old trees and scarring the north face of the Hog’s Back. It would also pass through an Area of Great Landscape Value and through, or next to, a belt of ancient woodland. The housing development itself and the proposed extension the research park, would harm the setting to the Surrey Hills AONB (the views into and out of the Hog’s Back ridge). The development site includes high-grade farmland and forms 20% of Compton’s green belt.

1.7 The development will produce more congestion at the Hospital/Tesco roundabout - This will impede access to the Hospital's A&E unit - a problem was identified by the Planning Inspector who presided over the previous Local Plan and who put a cap on traffic increases in the area of 5%. That cap has been exceeded (despite the University’s claim that construction traffic and buses don’t count). Guildford’s underlying traffic modelling is flawed and simply tweaking the Hospital roundabout and/or providing a new rail halt at Park Barn will not mitigate against the traffic generated by 1,800 homes, two schools, and an extended business park.

1.8 The new road proposed would be inadequate for the volume of traffic, and once the development has been built out it wouldn’t be long before new roads were required to serve the new population, which would inevitably pass through Wood Street Village (adding to the congestion in Worpleston and potentially ruining Wood Street Village Green) and/or through Flexford/Wanborough, potentially ruining the conservation area of Wanborough, with its 13th century church and 14th century barns.

1.9 The development will result in more flooding. The Hog’s Back acts as a soak away for surface rainwater. Once its slopes are concreted over, this water will travel north, adding to existing flooding in Wood Street Village, Fairlands and Whitmore Common (a European protected habitat)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
POLICY A35 WISLEY

1.1 - **I object** to the changed Policy A35 Wisley in respect of the identified mitigation to address the impacts on Ripley High Street and surrounding rural roads comprises two new slip roads at A247 Clandon Road (Burnt Common) and associated traffic management. This will not in any way mitigate the impact on Ripley High Street since traffic will need to pass through Ripley to reach Wisley.

1.2 - **My previous objections therefore still stand for** this changed policy concerning the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.

1.3 - There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.4 - This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.

1.5 - Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

1. Green Belt location and absence of “exceptional circumstances”.
2. Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
3. Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
5. Absence of adequate traffic data.
6. Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
7. Loss of high-quality agricultural land (55% of the site), in breach of national policy.
8. Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
10. Cost of infrastructure required to the detriment of alternative more favourable sites.
11. Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
13. Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.
15. Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
16. Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).
17. Failure to evaluate the cumulative impact of this and nearby development sites on the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A36

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1 POLICIES A36 to A41

1.1 I object to the changes to Policies A36 to A41 (East and West Horsley)

1.2 The number of potential development sites has been reduced by two (A36 and A41, representing a total of 138 dwellings). This leaves four sites (A27-40) which still represent a total of 395 new dwellings.

1.3 Marginal changes such as these would still leave 70% of all new development in the borough built on Green Belt sites. No “exceptional circumstances” or any other justification is advanced for this strange imbalance.

1.4 The deletion of two Horsley sites fails to correct the issue of relative overdevelopment in East and West Horsley, which is both excessive in absolute terms and disproportionate in relation to the rest of the borough.

1.5 No attempt is made to assess the cumulative impact on the Horsleys – either of the four sites now proposed, or of Site A35 (Three Farms Meadow, alias “Wisley Airfield”), with over 2,000 new homes only 2 miles away. This piecemeal approach leaves the future of the Horsleys at the mercy of ad hoc planning applications, which is the opposite of what a Local Plan should intend.

1.6 The new plan Policies put greater emphasis on the need for adequate facilities and infrastructure to underpin development. But this is not reflected in any new wording on the Horsley sites, thus leaving most local objections unaddressed. Again, this defect curtails the plan’s usefulness as a practical planning tool at a site level and undermines its credibility among residents.

1.7 The plan fails to mention most of the known sustainability issues and infrastructure constraints affecting the Horsley sites, including public transport, traffic, road safety, parking, schooling, medical facilities, sewage, flooding/surface drainage and shops. These were fully set out in responses to last year’s public consultation.
1.8 The density of new housing on the four Horsley sites too is inappropriate, being greater than anywhere in the locality at present.

1.9 Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries. The plan presents no arguments for this which, contrary to NPPF paragraph 79, will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

1.10 Collectively, the four Horsley sites breach NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been an outstanding success story in the Horsleys, as detailed in response to the last consultation. Assets include a dense public footpath network, parish parks, sports fields, a campsite of international standard, Britain’s newest rural opera theatre and the popular Olympic cycle route. These examples of positive planning depend on a Local Plan that protects the Green Belt, maintains its openness and beauty and avoids urbanisation and traffic congestion. Sites A35-41 are hostile to this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1 POLICY A42 CLOCKBARN NURSERY

1.1 I object to the changed policy A42 Clockbarn Nursery to 60 homes.

1.2 It ignores all the hundreds of previous objections made by local people

1.3 The increase to 60 homes in place of 45 homes is 33% more and too much.

1.4 It will worsen access and traffic problems in Tannery Lane and at the A247 junction.

1.5 It will make erosion of Green Belt in our village worse

1.6 It will make surface water flooding, which is already bad, even worse

1.7 It will impact open countryside views from the River Wey Navigation

1.8 The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area.

1.9 The site has very restricted access along Tannery Lane which is narrow and for most of its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical.

1.10 Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic.
1.11 Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

1.12 The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

1. POLICY A43 GARLICK’S ARCH

1.1 **I object** to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches

1.2 It ignores all the **thousands of previous objections** made by local people

1.3 There is no proven demand for travelling show people plots in this location

1.4 There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.5 The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

1.6 This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

1.7 The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

1.8 Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

1.9 The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
1.10 I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

1.11 I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

1.12 I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

1.13 I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

1.14 I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

1.15 Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

1.16 Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

1.17 With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

1.18 The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

1.19 I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

1.20 Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

1.21 Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.
Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

<table>
<thead>
<tr>
<th>1</th>
<th>POLICY A58 BURNT COMMON</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1</td>
<td>I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site</td>
</tr>
<tr>
<td>1.2</td>
<td>This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.</td>
</tr>
<tr>
<td>1.3</td>
<td>The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build</td>
</tr>
</tbody>
</table>
7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

1.4 There is in fact no justification for building anymore industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented. “

1.5 There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

1.6 The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

1.7 The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

1.8 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

1.9 The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

1.10 The impact on small surrounding roads will create traffic gridlock.

1.11 It will join up existing villages and defeat the purpose of the Green Belt.

1.12 The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

1.13 The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

1.14 The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

1.15 I object to the potential impact of para 4.4.23a on Burnt Common with its over allocation of industrial zoning is subterfuge for a waste management facility which is a dishonest and underhand approach to planning and proper consultation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY E1 SUSTAINABLE EMPLOYMENT**

1.1 I object to the change in Policy E1 sustainable employment because they have not addressed many of the 32,000 objections made to the 2016 plan.

1.2 I object to the inclusion of Send Business Centre/Tannery Studios Tannery Lane, Send in relation to proposed inset from the Green Belt because:

1.3 It is effectively an old non-conforming user in an area of outstanding countryside

1.4 It is adjacent to the beautiful Wey Navigation

1.5 There is highly restricted vehicular access along Tannery Lane in both directions

1.6 Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate.

1.7 I object to the change in Policy E1 of proposed designation of Burnt Common as an Industrial Strategic Employment Site.

1.8 It was deleted from the 2014 draft because of all the local objections made previously and there is no logical reason to go back on this decision

1.9 The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land as shown in the Employment Land Needs Assessment 2017
1.10 There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have many empty sites and industrial units.

1.11 The 2017 Employment Land Need Assessment shows a reduction in demand to a low of 3.7 and a high of 4.1 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Burnt Common in the Green Belt.

1.12 There are patently no exceptional circumstances in terms of demand for employment space to build on this important area of Green Belt which effectively separates existing development in Send and Ripley and prevents urban sprawl.

1.13 The impact on small surrounding roads will create traffic gridlock.

1.14 It will join up existing villages and defeat the purpose of the Green Belt.

1.15 I also object to the potential inclusion at Burnt Common of a waste management facility mentioned at the change to paragraph 4.423a which lacks sufficient detail for proper consultation and is completely inappropriate.

1.16 I object to the ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 which generally is superficial and lacks sufficient detail and analysis between B1a, B1b, B1c, B2 and B8 use classes and that no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of office, research and development, light industrial, general industrial and warehousing and distribution floor space.

1.17 I object to the fact that no reliable analysis has yet been made of data held by GBC in respect of different B classes in terms of planning applications granted or evidence gathered by the economic development function at GBC and no robust assessment of local market demand apart from fairly brief references to freely available market research undertaken by commercial estate agents such as Lambert Smith Hampton covering a much wider area.

1.18 GBC in their role as a Planning Authority appear to fail to appreciate the fundamental rationale of the Use Classes Order as a planning tool in terms of procurement of useful property market research analysis or forward planning.

1.19 What we are left with is a fairly clumsy and poorly informed plan which clusters B classes without any appreciation of widely different employment impact and economic sustainability. E.g. B1 generates at least 5 times as much employment as B8.

1.20 The lack of appreciation by GBC as to the opportunity for widely different uses being generated within B class clusters defeats the whole point of proper planning of employment uses and can significantly endanger previously good planning put forward in the previous 2003 plan. E.g. the creation of a research and development park linked to the University but now has the threat of being downgraded into a general business park (see below).

1.21 Little regard has been given in the plan to the economic reality of falling demand for B2 industrial space which is clustered with other B classes almost randomly throughout the plan.

1.22 The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space."

"1.23 38,357sqm of B1c, B2 or B8 use class is quite sufficient supply for the plan period and does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

1.24 Little regard is still not given to the opportunity of specific B1b space as an opportunity for research and development which needs to be nurtured and preserved without the detrimental and confused clustering with other B classes both in terms of planning and promotion of a research hub.
1.25 I support the concept of seeking increased investment in our local knowledge-based, high technology economy. This will provide well paid, creative jobs and generate the funding necessary to pay for the infrastructure and environment this sort of industry requires.

1.26 We need to distinguish between wanting to increase the added value of the economy and physical expansion, especially given the scarcity of land in Guildford. Guildford is not the place for large space hungry businesses. So I should target high added value small and medium sized enterprises rather than the headquarters of larger corporations.

1.27 We need to promote the idea of new knowledge transfer in incubator units and small premises for new start up enterprises. They need to be on the wave of innovative new technology as opposed to older established businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1 POLICY E3 MAINTAINING EMPLOYMENT CAPACITY

1.1 I object to the changes in relation to Policy E3 maintaining employment capacity which do not take account of my previous objections to this policy.

1.2 I object to the ill-informed policy of resisting change of use from B1a to residential because it flies in the face of positive property market solutions for the regeneration of brownfield land. It is also contrary to current government policy which has recently been reaffirmed and permits a change of use from B1a (offices) to C3 (residential).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/1952  Respondent: 10859489 / Jennifer Procter  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1 POLICY E4: SURREY RESEARCH PARK

1.1 I object to changes in policy E4 Surrey Research Park which is still earmarked for excessive expansion which is not supported by the findings of the Employment Land Needs Assessment 2017.

1.2 I support the maintenance of research, development and design activities, in any science, including social science, that is complementary to the activities of the University of Surrey at the Surrey Research Park. I object however to the completely unnecessary expansion of the Research Park into a larger Business Park.

1.3 I object to the extension to the Research Park of over 10 hectares will be delivered. This I understand will provide a total capacity of around 35,000 sq m of additional floorspace, of which 30,000 sq m is expected to be delivered in the plan period. This expansion is not effectively supported by evidence for an increase in B1b use class under the Employment Land Needs Assessment 2017.

1.4 I also believe that B1b (should be the primary use class for the Research Park and that applications for B1a should be resisted due to the danger of dilution of the core purpose and reputation of the park. I also object to the inclusion of B1c light industrial uses which is inappropriate and unnecessary.

1.5 Research parks based on the early UK technology transfer exemplars of the Cambridge and Oxford need careful monitoring, nurturing and protection to ensure the integrity and quality of the park is maintained and the park continues to be a destination for innovation and enterprise.

1.6 There is a danger for research parks to be overwhelmed by short sighted development opportunities being taken by park managers provided by standard office activities and administrative functions which in time turn them into standard business parks which can be found anywhere in the country. Their relative low density and attractiveness make them targets for “any other” office user.

1.7 Research parks that lose their way stop being the location of choice for new innovative enterprises.
1.8 The Surrey Research Park in Guildford needs to be focussed on a broad spectrum of scientific research including computer science, bio-chemistry, design, space-science, eco-science, health science, software development, laser technology, media-science, artificial intelligence, robotics and super-manufacturing

1.9 Monitoring indicators should include new start-ups and new patents created

1.10 Facilities should be provided whereby new small businesses can secure premises under subsidised licence fee arrangements with no onerous rent or lease commitments

1.11 The Surrey Research Park currently extends to 65,000 sq m

1.12 The research park is developed at a plot ratio of 25%. This could be increased to 50% within the same footprint of the existing park without damage to its amenity. The actual current land use for development in the park is in fact only 12.5% because most buildings are 2-storey.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1 POLICY E7 TOWN CENTRE

I object to the changes in Policy E7 Guildford Town Centre

1.2 I am of the opinion that policy E7 is still very ill-informed and there is insufficient evidential support to objectively assess the capacity of the existing town centre to accommodate appropriate new development and therefore fails the requirements of Section 161 of the NPPF to assess the real quantitative and qualitative floor space needs.

1.3 Policy E7 is still an aspirational voice from the past and is unlikely to benefit the health of the town centre in the future. There is no reliable evidence provided that the retail core of the Town Centre needs or can be expanded by 41,000 sq m of retail space at North Street because of lack of demand for retail units in the Town Centre particularly large units. This is due to falling demand for retail space in Guildford and town centres throughout the country evidenced by independent research and the reality of empty shops in many high streets (including Guildford) and the accelerating competition from internet shopping.

1.4 The recent Carter Jonas Study Retail Study 2017 update predicts total demand for Guildford Town Centre by 2020 at only 3,313 sq m and only 34,811 sq m by 2036. We have now been waiting some 15 years + for demand to catch up to enable development of North Street where the old consent for some 40,000 sq m of retail had to be renewed because it was getting out of date. Are we now going to have to wait till 2036 only another 19 years for demand to get to the point to enable development of this much prized site which developers have not exactly been falling over themselves to develop. That is also assuming that all retail demand in the Town Centre is wanting just this site.

1.5 However optimistically and quite illogically they protest that “there still remains significant capacity to support new comparison goods floorspace over the plan period”. It’s a bit like saying in town x we have currently 100,000 m of
shopping and the UK retail forecast done by Experian shows that we can predict a growth of 10% therefore this means we must have an additional 10,000 sq m in town x. This is unscientific guess work.1.6

In table 2 Appendix 6 of their report we learn that there is a potential for turnover to reach £856.3m in the town centre by 2020 however actual committed floorspace take up accounts for only £1.3m of this. This is 0.15%. It is hardly surprising that there are no details of take up or real demand evidence given anywhere in the report.

1.7 The Carter Jonas report is based on broad brush retail capacity forecasting derived from work by Experian which is very far from site or location specific and as a retail supply and demand assessment in my view is totally unreliable. The source is not even Guildford specific or even Surrey specific. The authors of the report do not disagree with my cynicism with capacity forecasting since they state up front that “It should be noted at the outset that capacity forecasts carried out over a long period of time are inherently less certain and should be treated with caution” and repeated again “at the outset we advise that all capacity forecasts beyond a five year period should be treated with caution. This is because long term trends in the economy, consumer demand and retail property market could have a significant impact on the potential capacity and need for new retail floorspace. For example, as discussed previously, a higher growth in non-store retail sales (i.e. Internet sales) than forecast by Experian would reduce the capacity for new retail floorspace over time.”

1.8 The Carter Jonas report is a vague whitewash report for a pre-conceived and outdated concept of increased retail development in the town centre. “For comparison goods, we have assumed the same estimations for convenience goods expenditure ‘inflow’ (10%) for Guildford Town Centre, again based on the centre’s role as a popular shopping and visitor destination.” Coming to the vague conclusion that Guildford is popular is far from reliable property market research!

1.9 The closest thing I can find to evidence of actual demand in this report is to read “In addition to focusing their attention on larger, dominant centres, many of the multiples and traditional high street retailers are changing their store formats and locational requirements. For example, key anchor retailers such as Boots, Next, Mothercare, TK Maxx, John Lewis and Marks & Spencer are actively seeking larger format units to showcase their full product range and to provide an exciting shopper environment backed by the latest (digital) technology.” But I then I realise this statement applies to any of 100 centres in the UK. I am concerned as to whether the authors of this retail study have actually visited Guildford or know where it is?

1.10 In their 2014/2015 reports Carter Jonas provided a fairly inaccurate picture of retail demand (originally Appendix 6) with the inclusion of retailers who had either gone bust or actually specified demand requirements in centres other than Guildford. This I note has now been deleted presumably because of its inaccuracies which were dealt with in my 2016 objection and has not been updated. We are now left with no demand assessment from either small, medium sized or large retailers. This does not support the view that Guildford is a vibrant retail destination requiring expansion with a large retail development in North Street.

1.11 The reality is that the town centre has enough retail floor space. If more is introduced it will result in the closure of existing shops particularly in locations which are less than 50% of peak Zone A or 100% positions. What Guildford needs is a new focus on speciality high quality comparison shopping supported by a revival of Guildford’s attractive heritage core and a new major visitor attraction supported by restaurants. Guildford needs to become the quality shopping destination for Surrey.

1.12 The existing site in North Street should be replaced with a well-designed ground floor high quality speciality retail mall and frontage of no more than 40 shops extending to 10,000 sq m with the rear and upper floors providing an additional 600 homes. The proportion of the above proposed smaller scheme at North Street will be complementary to and not antagonistic to the Upper High Street, Tunsgate, the Debenhams site and the 100% Zone A positions of the Lower High Street. If the existing policy under E7 is adopted the North Street site will remain empty for another 10 years.

1.13 I also object to the continued failure of this policy to provide much needed substantial residential development in the Town Centre which is still only a modest target of 1,300 homes. Only approximately 10% of the total planned for the Borough. There is still a blind over concentration on retail expansion which fails to take account of market forces and a complete failure to grasp the reality that a residential expansion is required to stimulate retail/leisure demand in the Town Centre which is markedly losing out to nearby centres such as Woking which has a very different approach. See the Town Centre Opportunity in next section.
1.14 **I object** to the deletion of the vision statement “Guildford town centre has a unique setting and historical character, and is at the centre of one of the most prosperous counties in England. We will protect and build on these assets and insist that all new development will be of the highest design and environmental standards. We will be proactive in building a great town centre which connects to the amenity of the riverside. We will invest in creating high quality public realm. We will put people above traffic and we will promote new high quality retail and business development. To achieve this we will develop innovative funding and delivery bodies. As we embark together towards this exciting future we pledge that we will continue and extend an active dialogue with our residents and other stakeholders.” Guildford Town Centre needs a decent vision. Without a vision the Town Centre is flying blind and it demonstrates the failure of the potential for imaginative Town development in this latest draft plan.

1.15 I support the deletion of paragraph 4.4.86 since many of the sites along the River Wey are capable of full development.

1.16 **I object** to the deletion of the Allies and Morrison Masterplan as a source document for the plan since although it failed to fully exploit the development potential of the Town Centre it did include many good ideas including more extensive brownfield development extending to 2551 homes including Woodbridge Meadows as a residential development site.

1.17 I do not consider that the modest target of 1,300 homes in the town centre takes account of the need and demand for housing or the opportunities that brownfield sites present for increasing the residential development in the core of the town which will in itself help to sustain the retail core by increased economic impact. What the town centre needs in terms of urban regeneration is much more residential development. As can be seen from the previous section, retail will not work!

1.18 The Town Centre policy needs to maximise the potential for residential development on brownfield and include as an absolute minimum the 2,551 units proposed in by Allies and Morrison for the town centre included in the masterplan 2015 which was originally adopted by GBC. The reality is that the Town Centre and other areas of brownfield in the borough has the capacity for at least 5,000/7,500 homes.

1.19 The additional target capacity of 5,000 could easily be provided within the following urban sites which have the capacity for 7,500 homes:

- 2,500 homes detailed in Masterplan 2015 including Woodbridge Meadows which can itself be increased substantially
- 500 homes at North Street
- 1000 homes on current GBC car parks (25 acres) and at the station
- 1000 homes saved in the urban area if 100% of students are accommodated on Surrey University campus (17 ha of car parks)
- 1000 homes at Slyfield on the 40 ha regeneration site
- 1000 windfall infill (50 per annum)
- 500 homes on brownfield sites in villages on sites of max 1ha which do not impact Green Belt

1.20 Yes, we need a new Local Plan for our borough in order to provide a development strategy within which we can accommodate our local housing, economic and environmental needs. **But first** we must know how many we need to accommodate and make 100% use of our urban brownfield in the town before we consider building in the Green Belt or countryside.

1.21 Paragraph 80 of the NPPF clearly states that Green Belt serves a key purpose, “to assist in urban regeneration, by encouraging the recycling of derelict land and other urban land”. In order to comply with central planning policy we need a brownfield strategy that states clearly. “We are committed to a brownfield first initiative whereby all applications on previously developed land are given fast track priority and every facility to promote development for residential purposes and employment purposes in order to satisfy the needs of local people. In parallel a zero CIL incentive should be given for all residential development on brownfield land.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Comment ID: pslp171/1944  Respondent: 10859489 / Jennifer Procter  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1  POLICY H1 HOMES FOR ALL

1.1  I object to all changes in policy H1 Homes for all because they have not addressed many of the 32,000 objections made to the 2016 plan.

1.2  I object to the change by way of deletion of the paragraph on density: “ New residential development is required to make the most efficient use of land whilst responding to local character, context and distinctiveness. Residential densities will vary dependent upon the local area context and character and the sustainability of the location. Higher density development will be supported in Guildford town centre.”

1.3  This indicates that GBC have no intention of building at a higher density within the existing urban area which is desperately needed and is in accordance with existing government policy. To have a plan with no density guidelines in the urban area is irresponsible and effectively very bad planning since it fails to exploit the development opportunities that urban areas can afford.

1.4  I support higher density development in the urban area close to transport hubs to facilitate modal shift e.g. 20 minutes’ walk of Guildford railway station. Much of Guildford town could usefully be regenerated with 7 storey blocks (there are currently blocks of this size already in the town) at 50 homes per ha with landscaping and underground parking, as often seen on the Continent and, recently, in London.

1.5  I object to the change in relation to student accommodation: “About 60 per cent of full time Guildford based on the University of Surrey eligible students population (full time equivalent) are expected to be provided with student bedspaces on campus.”

1.6  The University should provide accommodation for 100% of new first year students and more than 60% of existing students. This would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and underused surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back. Surrey University has 17 ha of car parks that could provide all the student accommodation required on stilts with parking beneath.

1.7  I object to the change in relation to Gypsy, Traveller and Travelling Showpeople pitches and plots. Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Overprovision is inappropriate given other constraints.

1.8  I object in particular to the inclusion of 6 Travelling Showpeople pitches at Garlicks Arch where there is no proven need.

1.9  I object to the deletion of the paragraph 4.2.8 on density: “We have a responsibility to use our natural resources, such as land, wisely. Efficient use of land is essential. Housing density describes the number of homes developed within a particular site area. It is usually calculated by the number of dwellings per hectare (dph). Increasing densities can help to reduce the land needed for new homes and make development more sustainable. It can also support more facilities and services. Certain areas can accommodate higher densities provided there is no adverse impact on the character of the area and the infrastructure is able to cope. Planning applications will be assessed on a case-by-case basis having regard to the
local context, character of the surrounding local area and the sustainability of the location. This will include consideration of established street patterns, plot sizes, spaces around buildings, and relationship with nearby buildings as well as form, massing, height of existing buildings and structures, and materials.”

1.10 To have a plan with no clear density guidelines is irresponsible and effectively very bad planning since it fails to exploit the development opportunities that urban areas can afford.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

### Comment ID: pslp171/1945  Respondent: 10859489 / Jennifer Procter  Agent:

**Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H2**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**POLICY H2 AFFORDABLE HOMES**

1.1 **I object** to the changes in policy H2 Affordable homes which still do not go far enough to address affordable or social housing need.

1.2 “Affordable” homes, under national definitions, means homes that are sold or rented at 80% of market value. Even if 70% of these are rented as proposed, the level of market prices in the South-East means (even post-Brexit) that these homes will remain well beyond most people’s means and that starter homes will not become available for local people.

1.3 In addition, “the viability clause” means that in practice the policy could be unenforceable. Private financial viability has no place in a public policy and should be removed. It is a get-out-of-jail-free card for developers that will sacrifice countryside for no local benefit.

1.4 This policy’s version of “affordability” is just a smokescreen for pushing through more development generally. Building more homes in Guildford cannot increase real affordability given the overhang of the London market.

1.5 GBC has failed demonstrably to provide any significant social housing. Over the last 2 years a tiny 65 units have been built. GBC may have demonstrated a pre-determined agenda to build large numbers of high priced executive boxes for Londoners in the Green Belt but key workers such as nurses and teachers have been ignored. Opportunities for local not for profit social housing schemes, borrowing from the public sector at low interest rates and using existing GBC land holdings are extensive. But the political persuasion and intent of GBC does not seem to really want to accommodate local people in need. This is a great pity. North Downs Housing Ltd set up last February by the council and run by councillors to “tackle the shortage of homes in Guildford and in particular, the shortage of affordable homes and a mixture of other tenures that are ‘affordable to everyone’ “ seems to be missing the point when the stated aim is to let to people with incomes above £30,000 a year. Affordable homes are desperately needed for all those workers who earn less than £30,000 a year and this again begs the question regarding the ambition and direction of GBC when it comes to planning.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

### Comment ID: pslp171/1946  Respondent: 10859489 / Jennifer Procter  Agent:
1 POLICY H3 RURAL EXCEPTION HOMES

1.1 **I object** to the change in policy H3 Rural Exception Homes.

1.2 **I object** to the deletion of para 4.2.51 “To ensure that the housing is secured permanently to meet local affordable housing needs, we will require the affordable housing provider to enter into a planning obligation with cascade provisions. This requires the housing to be allocated to people with a local connection to the parish (through residence, employment or close family), followed by those with a local connection to adjacent parishes within the borough who meet the criteria, and finally those with a connection to the borough of Guildford in accordance with its published scheme Guildford Homechoice (or equivalent scheme).”

1.3 This demonstrates GBC’s disregard for local housing need.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1 POLICY P2 GREEN BELT

1.1 **I object** to the changes to Policy P2 because they have not addressed many of the 32,000 objections made to the 2016 plan.

1.2 **I object** to the new para (1) “The Metropolitan Green Belt will continue to be protected as shown designated on the Policies Map, against inappropriate development. In accordance with national planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated.” The words “as shown designated on the Policies Map” should be deleted. The Policies Map has effectively ignored huge areas of Green Belt protection and the new para (1) is therefore a sham.

1.3 **I object** to the proposed change that **Send Business Park** should be inset from the Green Belt due to the fact that:

1.4 It is effectively a non-conforming user in an area of beautiful countryside adjacent to the beautiful Wey Navigation

1.5 It has restricted access along Tannery Lane

1.6 It should not be given the opportunity for further expansion or development
1.7 Policy P2 still completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world.

1.8 Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital.

1.9 It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6% of the Crown jewels in order to build houses.

1.10 I object to the statement in the Draft Local Plan under Green Belt Policy P2 (4.3.13) which claims that Send and a further list of 13 villages are “now inset from the Green Belt”.

1.11 This statement is untrue as GBC is proposing to “inset” these village. No decision has been made by an Inspector, therefore the villages remain in the Green Belt!

1.12 I object to the changed “insetting” of 15 villages (including Ripley) from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages.

1.13 I am deeply disturbed that settlement boundaries are to be hugely extended in many villages (particularly at Send) and that infilling is also proposed outside the settlement boundaries of 11 further villages. This is completely unplanned and unmeasured development outside of the OAN.

1.14 Many Guildford villages are “leggy” in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat.

1.15 Send is a good example of villages that should not be removed from the Green Belt. Send provides an important Green Belt buffer between Woking and Guildford. Yes, it is true that Send comprises old ribbon development but this should not mean it can be removed from the Green Belt so that Woking joins up to Guildford. The village and the countryside behind the A247 should all be protected.

1.16 I object to three particularly vulnerable areas of high quality amenity land being taken out of the Green Belt at Send which include:

1.17 The land behind the schools including playing fields and woodland.

1.18 The land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision Engineering.

1.19 Land to the left of Cartbridge going up to the old depot on the Wey Navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1.1 I object to the amended policy S2 the Borough Wide Strategy and the commitment to build 12,426 homes based on the Strategic Housing Market Assessment (SHMA) 2017 prepared by GL Hearn because it has not addressed many of the 32,000 objections made to the 2016 plan.

1.2 The OAN “objectively assessed need” figure of 12,426 is far too high

1.3 I am very surprised and concerned that GBC have adopted the OAN of 12,426 homes as the housing target without any application of constraints as required under the National Planning Policy Framework and the National Planning Policy Guidance. The scale of the housing number proposed, inevitably increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

1.4 Other local planning authorities appear to take a more balanced view in their approach to planning. The Woking Core Strategy 2012 applies a constraint of 50%.

1.5 A detailed and comprehensive professional review of the SHMA dated June 2017 by NMSS an independent expert firm dealing with housing and demographics procured by Guildford Residents Association (GRA) has concluded that the OAN figure should be revised down from 560 homes per annum to 400 homes per annum.

1.6 The 19 page report by NMSS which can be found on the GRA website entitled “Review of GL Hearn’s Guildford Addendum to the West Surrey SHMA”. It was a real community effort. It was paid for by over separate 20 Guildford Residents Associations and Local Parish Councils none of whom were convinced that the SHMA report procured and presented by GBC was accurate or transparent or accessible in a meaningful way. So they clubbed together and collected contributions from many hundreds of Guildford residents to try to find out the truth of the housing need figure presented in the Local Plan.

1.7 The NMSS report includes detailed analysis and financial modelling and was prepared by Neil McDonald who we were lucky to find. He is a niche consultant with the right skills and a national reputation. An independent adviser and commentator on housing demographics. He works with local authorities and others on the estimation of housing need and related issues. He was a civil servant and policy adviser to Ministers for over 30 years, the last 10 advising on housing and planning issues within the Department of Communities and Local Government. His 7 years as a Director at DCLG included a posting as Director, Planning Policy and a period as Chief Executive of the National Housing and Planning Advice Unit.

1.8 The NMSS recent study has found that the latest SHMA update by GL Hearn 2017 over estimates population growth for Guildford.
1.9 The report shows that an indication of the scale of the problem can be obtained directly from the ONS’s own data. Their estimates of births, deaths and population flows into and out of Guildford suggest that the population should have grown by 15,000 between the 2001 and 2011 censuses. The censuses, however, record a population growth of only 7,800. The discrepancy is over 90% of the population change indicated by the censuses.

1.10 The analysis in the NMSS report demonstrates that the errors must be in the population flows in age groups in which there are significant numbers of students. They are almost certainly the result of the under-recording of the numbers of students leaving Guildford each year.

1.11 If the projections are based on under-estimates of the number of students leaving the district each year, they will assume that people will be living in the area who will in fact have left. This means that they will over-estimate the likely growth in Guildford’s population. The ONS’s projections envisage that the population will grow by 21,700 between 2015 and 2034. However, if the estimates of past migration flows are adjusted to make them consistent with the census figures, this could fall to 13,000. As a consequence, the demographically-based estimate of the number of homes needed would be 400 homes a year (2015-34), not 580.

1.12 70% of the sites put forward in the Local Plan are still in the Green Belt which flies in the face of current government planning policy. The National Planning Policy Framework (NPPF), National Planning Policy Guidance and case law make it clear that Green Belt is an absolute constraint on housing supply. Exceptional circumstances need to be shown to adjust boundaries.

1.13 Other constraints under the NPPF include assessments of sustainability, strategic flood risk assessment, physical constraints on land use and infrastructure constraints (this can include road congestion, schools, drains, power supply and medical requirements).

1.14 Constraints should be applied to the Objectively Assessed Housing Need (OAN). However this itself is overstated and should be reduced from 580 per annum to 400.

1.15I object to the fact that GBC have not used the guidance available to reduce the number of houses they propose.

1.16 GBC has not taken into account the possibility of lowering the required number of houses by adhering to the restraints offered in various papers. Government guidelines, even before the publication of the Paper, quoted below say that if a Council cannot supply sufficient houses without impinging on the Green Belt, then they do not have to build so many houses.

1.17 GBC have gone against the NPPF as they are not adhering to the ruling that Local Plans must plan positively to seek opportunities that meet objectively assessed development needs and be flexible enough to adapt to rapid change unless any adverse impact of doing so would significantly outweigh the benefits or specific policies in the NPPF which suggest that development should be restricted.

1.18 House of Commons Briefing Paper ; Planning for Housing no 03741, 14 June 2017. Guidance on taking account of constraints. “Need alone, is not the only factor to be considered when drawing up a Local Plan”. This includes “land designated as Green Belt” and “SSSIs”.

1.19“The framework makes clear that once established Green Belt boundaries should only be altered in exceptional circumstances” and “should take into account any constraints such as Green Belt, which indicate that development should be restricted and which may restrain the ability of an authority to meet its need.” (P d055 ref ID.3-045-20141006)

1.20 In view of the comments above it would appear logical to apply CONSTRAINTS in line with government policy to a corrected OAN. of approximately 50% to account for the fact that 89% of the borough is in the permanent Green Belt and development is not supported by adequate major infrastructure. This reduction is in line with the constraints percentage of 50% applied by Woking Borough Council.

1.21 This would result in a more acceptable and practically achievable HOUSING TARGET of 200 homes per annum which over a 20-year period would be 4,000 homes.
1.22 All of these homes could be built in the existing urban brownfield areas of the borough and would in part satisfy the 32,000 objections made by residents to the 2016 draft plan and also relieve the additional problems of inadequate infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1 GENERAL POINTS

1.1 I have focused, as requested, on changes.

1.2 I object to the plan because it does not address local need and the changes do not take account of my own previous objections or the thousands of other valid objections made by residents of Send and other areas to the 2016 version. It appears that GBC is predetermined to release huge tracts of Green Belt land for development and to push through this agenda despite all reasoned opposition. This makes a mockery of public consultation and the notion that local people have a say in what happens with regard to local planning.

1.3 I request a confirmation by email from GBC that all of the objections to changes made below are put to the Inspector appointed by the Secretary of State to review the GBC Regulation 19 local plan 2017 and that all my previous objections to the 2016 draft plan will be placed before the inspector.

1.4 Guildford is a constrained borough by the reality of having 89% of its area zoned as permanent Green Belt and an out of date road network that is already at capacity. I am concerned that GBC have adopted a lower but still grossly inflated OAN of 12,426 homes as a housing target without any application of constraints as required under the National Planning Policy Framework and the National Planning Policy Guidance.

1.5 I object that the GBC decision not to apply constraints. This could mean that GBC is required to take overspill from neighbouring Boroughs that are themselves applying constraints. Send and neighbouring villages are the Green Belt between Woking and Guildford. It is nonsense to suggest that Woking Green Belt will be protected if the proposed developments in Send, and at Gosden Hill go ahead, as they will effectively join up the two towns and do away with the greenbelt separation for both.

1.6 The population in the borough is split equally between town and country but Guildford town has developed very little over the last 20 years and has not undergone the type of normal urban expansion, redevelopment of previously developed sites and increase in residential densities as nearby towns such as Woking have done. It is informative that Woking is currently outperforming Guildford in terms of economic performance.

1.7 It is interesting to note that urban densities in Guildford town are no higher than the villages that surround it. Even though the latter are in the main in the Green Belt which is protected from development and the former is in an area where there is no presumption against development. I am of the opinion we need a rebalancing between town and country and much more development in Guildford town, particularly residential development.
1.8 In the latest plan only 1,300 homes are going to be built in Guildford town which is some 10% of the total development proposed, while in the region of 40% is to be situated on Greenbelt land in the East of the Borough. It is very disappointing that GBC fail to set higher densities for the urban area and have in this latest draft deleted all reference to “density for development”. This is normally an integral part of forward planning and development control.

1.9 Very little, if any or the proposed Greenbelt development will provide the affordable accommodation the country and local people so badly need. At 80% of market value on Greenbelt land around London with further reductions in quantity likely when developers play the viability card the stated purpose of the whole exercise will be lost. The SHMA (West Surrey Strategic Housing market Assessment, September 2015, Final Report) pg. 97, section 6.55 highlights “the analysis above indicates a notable need for affordable housing...” and Table 44 states that the proportion of affordable housing need as a % of the total need is 88%. GBC’s plan will not deliver this. Creating ever more unaffordable housing will put greater strain on local essential services and require more of the type of people least likely to afford the housing. (shop workers, nurses etc). This further undermines the sustainability of the plan, and once more highlights GBC’s intent to build more houses in flagrant violation of best planning practice. The current scale of the housing number proposed in this plan, which is based on a flawed SHMA, inevitably increases the onus for the plan to be seen to be sound. A substantially lower number of 4,000 homes, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

1.10 I am concerned that GBC have still failed to grasp the opportunity of following clear government policy to develop in the urban area on previously developed sites. Many of these sites are in their ownership and it would seem a practical and readily achievable alternative which is much more acceptable to local residents.

1.11 In my opinion much of the updated local plan is not up to date in current trends. The well reported and acknowledged decline in town centre shopping centres and the need to create modal shift by developing residential uses close to transport hubs have been largely ignored.

1.12 Assertions that there is real demand for the expansion of retail, industrial or office space lack credibility. Significant planned expansion of residential development in the town centre is universally acknowledged as a key stimulant for urban economic growth and health. Without this the town could suffer further stagnation and serious economic loss.

1.13 There would appear to be two worrying examples where GBC are taking the role of “developer/landowner” rather than “independent not for profit public sector planner” in so far that they have a pre-determined agenda for building on the Green Belt rather than acting as careful, professional and responsible planner guardians. Example 1: Policy A43 Garlicks Arch Burnt Common. The stated, albeit unproven, need by GBC is 400 homes. Normal residential density is 30 homes per ha. Land required would therefore be 13 ha. Land actually proposed to be allocated is 28.9 ha. This is more than double land required in beautiful irreplaceable Green Belt. Example 2: Burnt Common Policy A 53. The stated, albeit unproven need, is 7,000 sq m B1c, B2 and B8 development. Normal density 50% plot ratio. Land required 1.4 ha. Land allocated 9.26 ha. This is more than six and half times more land than necessary in valuable Green Belt which the planners should be looking after.

1.14 I regret that my conclusion is that this plan is fundamentally unsound and a clear example of bad planning.

2 EVIDENCE BASE

2.1 I object to the fact that the evidence base is poor and that there is a lack of sound property market research relating to the local market in Guildford. To rely, as previously, on generic economic capacity forecasts means that many of the submission documents providing key evidence are unsound, unreliable and inconsistent.

2.2 Key parts of the evidence base are flawed or based on withheld assumptions.

2.3 The latest SHMA 2017 still inflates the proposed housing figure due to the following factors:

2.4 An independent review by NMSS of the latest ONS population estimates and projections has found compelling evidence that there are substantial errors in past estimates of student migration flows. It is probable that migration flows out of Guildford, both to other parts of the UK and abroad, have been under-estimated by sizeable amounts.
2.5 Owing to the way in which migration estimates are used to construct population and household projections, the errors in past migration estimates are likely to mean that the latest demographically-based housing need estimates by GL Hearn overstate the number of homes needed by over 25%.

2.6 The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

2.7 38,357 sq m of B1c, B2 or B8 use class is a quite sufficient supply for the plan period and does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

2.8 The ELNA states “that a large proportion of the net additional floorspace and land requirements for both office/R&D and industrial/storage uses could be met through the permissions which have been consented but which have yet to be implemented. However, there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

2.9 “There is the possibility that some pipeline developments may not come forward” is patently a weak argument indeed for the proposed industrial development at Burnt Common in the Green Belt and expansion of the Surrey Research Park into the Green Belt which has unused consents dating back many years and also the substantial latent potential for an increased density of development. The current plot ratio is less than 25%. The reason that the unused consents have not been used up is simple. There is a proven lack of demand.

2.10 Exceptional circumstances clearly do not exist to justify amendments to Green Belt boundaries as part of the Local Plan process. It is quite achievable for realistically prepared and identified development needs to be accommodated in Guildford’s urban areas and villages.

2.11 The Carter Jonas Guildford Retail Study Update 2017 lacks credibility and there is no proven case for expanding comparison retail space which is undermined by failure to implement existing retail consents at the North Street development over the last 10 years. The Guildford Retail Study does not take account of changing retail patterns in relation to the threat of the internet and the “clicks and mortar” conflict. The study also assumes a number of logged retail requirements from companies already in liquidation or with national requirements that exclude Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Infrastructure

I object

The infrastructure schedule makes reference to 'improvements' without saying what they are. It includes a junction at the Guildford end of the A31, and another junction at Tongham. No evidence or traffic modelling data is available to demonstrate whether these 'improvements' will indeed improve anything at all given the additional traffic that will be generated by the new developments included in the plan. The Highways Assessment indicates that, even with these 'improvements', the level of congestion on the A3, A31, the B3000 and A25 will leave these roads over capacity and congested.

Constraints should be applied to the housing need/number as a full application of the overinflated number will have a severe detrimental impact on our road network. Smaller housing estates may be more difficult financially, but they would have less impact on infrastructure and could be considered where infrastructure already exists. The borough has many acres of surface car parking which, if replaced by multi-storey versions, and combined with current Brownfield sites, would free up enough land to build housing where it is wanted and needed and not on valuable Green Belt. There would be no need to build high-rise style development in Guildford town, which we don't support, but we do believe that buildings of 6-10 storeys (with underground parking) would be in keeping in some urban areas (where they don’t impinge on important vistas). [Some existing buildings already reach 5-7 levels in height].

The traffic maps omit the area south of Guildford borough completely and the lack of detail about impact on the B3000, a strategic route, is highly questionable, particularly as there are no solutions in place to deal with the impact. I am particularly concerned that, after the main highways routes of M25, A25, and the A320, the B3000 will incur the greatest increase in flow as this road is already close to capacity, with tailbacks at peak times. The road is no longer fit for purpose and modelling shows that developments planned, and the introduction of a new westerly route through Blackwell Farm, will severely worsen the situation, whether major work takes place on the A3, or not.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Highway Assessment

I OBJECT

The strategic highway assessment requires a great deal more work and hence I OBJECT to the inclusion of this as evidence.

The B3000 runs through Compton, a small village with many listed buildings, most of which are very close to the road. The road already carries in excess of 5 million vehicles a year with average flow rates exceeding most A roads. It is the only settlement area in the borough where pollution levels exceed EU regulations and it is close to capacity now, with tailbacks at peak times, which add to the pollution problem. [see legal section]
The study is highly misleading. It refers to a figure of zero additional traffic from scenario 3, which includes the traffic from the strategic sites, one of which is partly in Compton. The assessment does not make it clear that the modelling is extremely limited and only includes impact on developments within the immediate area. Blackwell Farm is excluded from Area 107 (part of Compton) as false boundaries have been set. I believe that the impact from the strategic sites will be far-reaching and will most certainly impact Compton and beyond. Each village needs to be able to see the impact that development will have.

The Highways Assessment concentrates on peak time traffic only and gives no indication of overall volume increases or traffic type using specific routes outside peak hours. Understanding of the overall increase is important, as there is a bridge on the B3000 between Artington and Compton, which has a width restriction and may also require a weight restriction as it needs replacing within the next 2 years and no funding has been set aside for this. Instead Network Rail, SCC, GBC and Waverley BC continue to battle over responsibility for, and scope of, the project.

It appears that traffic data has been collected at different times of the year and over varying time scales in order to provide averages. This method of data collection can underestimate measurements by at least 30%.

Furthermore, I have been told that the person responsible for ratifying traffic data at Surrey County Council (SCC) has been off sick for over a year and that, whilst the daily data boxes continue to collect data, that data has not been collected or analysed for 2015. The data put forward for Compton's B3000 was based on a 3-week period in January and, as this was not representative, we understand it was removed. That said, the year-on-year data is for different periods and different times, varying from a few weeks in winter to longer periods over many months. I would like a more robust approach to traffic data collation.

The cumulative effect of the additional traffic generated by the developments in the proposed submission Local Plan will be to increase congestion, even with the proposed highway improvement schemes in place. More detailed analysis of the junctions and queuing is required. We question the conclusion that the developments would have a significant impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF. We do not believe that the impact on the B3000 will be acceptable, as it is already operating beyond capacity, and this situation will be made much worse following the mitigation proposed for the A3.

The Highways Assessment is limited to 30 results. Roads have been omitted from the report and it is unclear whether findings for the B3000 (also referred to as The Street B3000) are in fact from the Street or the roundabout from which there is a feeder road to Godalming via Priorsfield Road.

The table comparing scenarios and the impact on traffic is difficult to decipher. Scenario 1 includes current planning permissions plus Waverley's strategic sites. This shows an increase of just 9 vehicles per hour at peak times on the B3000. The next scenario 2 is the same, but includes GBC's strategic sites. Given that there is a strategic site in Compton of 1,800 homes and another of 1,000 at Normandy, the expectation would be for the volume to be not only higher, but considerably higher. The result is however, ZERO. We understand that this is because the impact measured is only from the immediate area and, as Blackwell Farm has been removed from the village for modelling terms, this does not give a realistic result. The omission of the Town Centre Master Plan and its impact on the roads further diminishes the integrity of this Highways Assessment.

Even without the full impact being understood, it is clear from the scale of development on the west of Guildford (1,800 homes at Blackwell Farm, 1,000 homes at Normandy, 1,300 homes at Ash, 3,800 homes in the Aldershot urban area, 1,200 homes at Borden) that the increase in traffic on the B3000 and other main routes would be severe.

The Highways Assessment shows that as a result of the proposals put forward in this draft of the Local Plan the B3000 will suffer the highest increase in flow rates at peak times (after the M25, A320 and A25. It also reveals that traffic flows would increase if the A3 was widened, as the A3 would then attract more traffic via the B3000. Despite this, there are no solutions planned to mitigate the situation and we are therefore strongly objecting to the level of development and in particular strategic development at Blackwell Farm as outlined in the Local Plan.

The proposal to introduce a new route to Guildford town centre from the west via Blackwell Farm has been ill thought out. The volume of traffic that will use this new ‘rat run’ through the new development and the university campus/business park, has been underestimated. There will be problems for traffic wishing to exit the new development in both directions.
during peak hours - traffic is frequently queueing for miles along the A31, and the Tesco roundabout is one of the worst bottlenecks in Guildford. The knock-on effect on the Egerton Road/Gill Avenue junction would impede emergency vehicles getting to and from the hospital.

The 4-way junction on the A31 has no detail at all and the concern is that permission in principle will be given to the site in the hope that these problems are surmountable. If they are insurmountable, which I believe they are, then enormous amounts of Green Belt land within the setting of the Surrey Hills AONB will have been sacrificed for nothing. The 4-way junction, if it goes ahead, is likely to be huge and, due to its elevated position, will cause significant harm to the AONB in terms of landscape and light pollution.

The Highways Assessment has many limitations, not least being the absence of the Town Centre Master Plan, which includes potential road closure and re-routing. Compton is likely to be very much affected by any reduction in road capacity in the town centre and it is important that we are presented with the whole picture.

The Assessment acknowledges that not all impacts of proposed Blackwell Farm development have been modelled and that, due to the emphasis on the A31 and the A3, not all roads were included.

The report concludes that the improvements to the A3 are necessary to maintain adequate flow rates on the strategic network. Further work is needed to determine what impact any widening or junction improvements will have on local roads, and what will be done to mitigate against the increased flows through Compton, particularly given that a section of the B3000 though the Village is anticipated to become an Air Quality Management Area. GBC has resisted requests by members of the PC to have the northern end of The Street made an AQMA, but readings of nitrous oxide in this area are well above EU legal limits.

There is little information about the tunnel but the map indicates that one access / egress point will be in Compton near the A3, although no land has been safeguarded for this purpose. This is likely to have the same impact as the improvements to the A3, i.e. increased traffic (and pollution) through Compton.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Strategic Housing Market Assessment (SHMA)

I Object

The “objectively assessed need” figure of 693 homes a year is too high.

A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the SHMA method should be changed to consider student housing need separately due to the distorting effects of students on the figures.

The current SHMA inflates the proposed housing figure due to:
failure to correct for errors in the historical data for international migration flows,
issues with the way it considers students and affordability, and
flaws in the method for estimating the number of homes needed to support job growth.

It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

Two additional reviews of the SHMA reach similar conclusions, one having been produced by CPRE and the other by Cllr. David Reeve.

The Land Assessment

I object

The exclusion of sites of 5 dwellings or fewer from the list might make administration easier, but the addition of these sites plus windfalls and outstanding (but current) permissions gives rise to a higher number of dwellings than is actually needed. There is therefore no justification for release of all the Green Belt put forward.

The criteria used to include or exclude sites because of this study lack consistency, with many sites excluded as 'unsuitable' with no further explanation offered (many of which were in the urban area of Ash). The assessment lacks objectivity and detail.

Green Belt & Countryside Study

I object

GBC’s Green Belt & Countryside Study does not value appropriately the “fundamental aim” of Metropolitan Green Belt or look strategically at options for developing in major settlement areas beyond the Green Belt. It is pointless for London to apply constraints to protect its Green Belt if areas within it, such as Guildford, choose to ignore this option. It is the same Green Belt and serves the same purposes, all of which are acutely valuable.

The way Green Belt is parcelled up and scored is invalid: serving 2 Green Belt functions well is as legitimate as serving 3 to 5 functions less effectively. The Green Belt sensitivity analysis is not a valid basis for informing decisions. This method also omits purpose one, on the basis that all Green Belt sites encourage regeneration of urban sites. This should not be excluded for it is valid and could even be argued to be particularly valid in areas close to the town. Boundaries used for Blackwell Farm were neither permanent nor defensible.

Proposed removal from the Green Belt of a number of relatively small sites where development of an exceptional nature has taken place, plus adjoining land, has lost sight of the scale at which Green Belt is effective.

Assessment of which villages to take out of the Green Belt does not adequately consider that villages contribute to the openness of the Green Belt, as seen from surrounding AONB.

A key principle of Green Belt is its permanence. The University Consultants stated this 13 years ago when seeking permission to take Manor Farm out of the Green Belt to create Manor Park. They reassured residents that the boundary would not be frequently moved and that Blackwell Farm would be opened up to the public for “informal recreation”. The same Consultant has now repeated this promise in putting forward the University plans to develop on Blackwell Farm, saying that the new boundary would be permanent for at least 25 years!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Maps

The maps have different ratios which can be rather misleading in terms of comparing one with another.

The map for Compton suggests that the dotted pink line is the boundary line for the village when in fact this is just the village settlement area. The wider village includes Priorsfield Road and The Avenue and Down Lane and parts of New Pond Road and the Hog's Back and Blackwell Farm, all of which are missing. Common land should ideally be marked up. Blackwell Farm is currently shown on a map called 'Guildford Urban' which of course does not exist and hence this could be misleading.

Answer (if comment is on questions 1-7 of the questionnaire): ()

GREEN BELT SITES

I object to ALL Green Belt sites allocated for development in the local plan

I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses.” This ignores the tens of thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. This amounts to a war of attrition by the Council in conjunction with developers, since many busy residents are tired of repeating the same comments as it appears to be a waste of time and effort. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014.13

All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Question 6: The content of the plan

I object to the inclusion of Blackwell Farm in this Local Plan, for the following reasons:

1. The southern slopes of the Hog’s back are AONB and views in and out of that area should be protected and this is not possible if the development goes ahead.
2. Blackwell Farm has recently been assessed by an independent expert as being of AONB quality and we anticipate that it will be included within the Surrey Hills AONB as part of the forthcoming boundary review.
3. The South Downs is National Park and there has been a call for the North Downs to be considered in the same light. This would make Blackwell Farm a great asset to Guildford and a tourist attraction (particularly as it is home to one of the few Model Farms in the South East) and would fit in well with the rural ventures such as Greyfriars Vineyard, Mane Chance horse sanctuary and Watts Gallery, all of which are in close proximity.
4. Blackwell Farm is very effective in fulfilling the functions of Green Belt.
5. Blackwell Farm land which has been categorised as the best and most versatile (Grades 2 and 3a) and there is strong demand for local food production.
6. More people objected to the inclusion of this strategic site than to any other strategic site, its inclusion is not supported.
7. The 4-way access to the site on the A31 (Hog’s Back) is highly unlikely to be viable, and would harm to the AONB for miles (due to the need for lighting and its elevated position). The suggestion that rat running could be deterred through the use of automatic number plate is unrealistic. What about visitors and deliveries and changes of vehicle? Likewise, a barrier would cause chaos and possibly increase the volume of traffic wishing to use the A31. If no restrictions were put into place, the route will become a rat run, then there is nothing from stopping traffic on the A31 from using it if it is indicated as the shortest route. If the A3 were congested traffic could also come off at the Compton roundabout and take this route via Down Lane, which would add to congestion in this busy village and would negatively impact the tranquil lane, which is the home of Watts Gallery and Chapel.
8. Maps, tables and results from assessments such as traffic impact all refer to the Blackwell Farm site as in “Guildford urban area” and refer to non-existent boundaries as if they are current. There is nothing urban about this area of countryside as the independent landscape assessment reveals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY A26 BLACKWELL FARM

I object to policy A26 Blackwell Farm

There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

Blackwell Farm is located entirely within the green belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Blackwell Farm performs all five functions of green belt, and fulfils purposes 1, 3 and 5 very strongly.

Purpose 1 - “checking the unrestricted sprawl of large built-up areas”. There is huge pressure to develop on the western edge of Guildford; the University of Surrey has stated publicly that its key objective is to develop the whole of its landholdings, stretching west to Flexford Farm. This, combined with the indefensible boundary being proposed (a hedgerow rather than the existing belt of ancient woodland), will put more of the green belt and the Surrey Hills Area of Outstanding Natural Beauty (AONB) at risk of future development.

Purpose 3 “assists in safeguarding the countryside from encroachment” - the proposed movement of the green belt boundary on the west of Guildford to allow for development of the University in 2004 resulted in the encroachment on countryside and the loss of working farmland (including some Grade 2) at Manor Farm. The proposed future change in the boundary would result in further encroachment and the loss of farmland including further Grade 2. The proposed road development with access road from the A31 would also effectively cut off farm access to the south of the development area leading to further urban influence on this countryside. The University’s stated key objective is to develop land, which includes Chalkpit and Wildfield farms leading to the risk of further boundary change and further encroachment in future years.

Purpose 5 - “assists in urban regeneration by encouraging the recycling of derelict and other urban land”

Whilst all green belt assists towards this purpose, the ownership of this land by the University of Surrey with its extensive landholdings within the urban boundary (including land it leases to the Hospital and Holiday Inn, the Surrey Research Park, Hazel Farm as well as two large campuses) means that the location of Blackwell Farm within the green belt plays an even greater and direct role in encouraging the more efficient usage of urban land.

Stopping development on Blackwell Farm would result in the University of Surrey investing in, and regenerating, land in its ownership and delivering its commitments following the 2003 boundary review (including 270 homes for key workers, 3,125 student residences and releasing further accommodation at Hazel Farm). The University has 17 hectares of surface car parking that could be built over with offices and flats. This is a more sustainable option than building over open farmland (largely grade 2 and 3a) within the green belt.

The Blackwell Farm development would result in harm to the Surrey Hills Area of Outstanding Natural Beauty (AONB), harm to an Area of Great Landscape Value (AGLV), and harm to the setting to the AONB. (Blackwell Farm forms the views into and out of the Hogs Back ridge). The NPPF is clear that AONBs should be afforded the highest level of protection in relation to landscape and scenic beauty. All development proposals within and adjacent to the AONB must conserve or enhance its special qualities. The NPPF also makes it clear that applications for major development in the AONB will be refused unless exceptional circumstances are demonstrated and the development is proven to be in the public’s interest. Guildford Borough Council has not shown that the proposed housing development or the extension of the Research Park, or the proposed link road from the A31 to Gill Avenue, is in the wider public interest. Indeed, the increased traffic through the already congested Egerton Road/Gill Avenue junction, which would result from the development, would impede emergency vehicles travelling to the Hospital and this would be very much against public interest. GBC’s Policy P1 states that, “The Surrey Hills Area of Outstanding Natural Beauty (AONB) will be conserved and enhanced to maximise its special landscape qualities and protect it from inappropriate development. All proposals will be considered against whether they conserve and/or enhance the setting and views of the AONB.” I question how the proposal to carve a new two-lane carriageway through the AONB fits this policy, or meets para 115 of the NPPF? Finally, nearly the whole site has been identified as a “candidate area” for AONB status in the Landscape Evaluation Study commissioned by Compton, Worplesdon and Wanborough parish councils. Therefore, the entire site should be treated as though it is within the AONB during this local planning process.
The access to the proposed Blackwell Farm site will put additional peak hour pressure on two of Guildford’s worst congestion “hot spots”: the A31 (Hog’s Back) and the Tesco Roundabout on Gill Avenue.

GBC’s proposal to create a new major route into Guildford from the west at, or close to, the Down Place private driveway, and to make this the main access to the planned Blackwell Farm development, does not appear to have been thought through. There are queues stretching back from the Farnham Road Bridge as far as the Down Place driveway entrance most weekday mornings and any traffic generated by the new development would not be able to clear the junction. In order to accommodate the volume of traffic using the new junction (generated by residents of the new housing estate, employees at the Surrey Research Park, Hospital and University, and visitors to the new school/supermarket), there would almost certainly need to be a roundabout (rather than the proposed traffic-light controlled junction) and GBC has ruled out a roundabout on grounds of landscape impact and traffic.

The secondary access to the site at Gill Avenue also presents problems, and as GBC states in its Transport Assessment (14.9.5), changes planned for the Tesco roundabout will not mitigate against the increased level of traffic through the junction as a result of the Blackwell Farm development, and this in turn will impact on the Egerton Road/Gill Avenue junction, which serves the Royal Surrey County Hospital. I question whether it is responsible to allow a development that would impede emergency access to an A&E department and a major incident unit.

The traffic impact resulting from the development of Blackwell Farm on the strategic road network would not appear to be properly assessed but it would be alleviated in part (but not completely) by widening the A3. However, timing and funding for this work is unclear so there would be many years of traffic chaos before any widening took place (if indeed it does). More significantly, the widening of the A3 would create noise and environmental impact on the neighbouring residential areas of Onslow Village and Beechcroft Drive and a six-lane highway would cause greater severance between Guildford and Blackwell Farm and areas to the west.

The NPPF states in Section 6 para 47 that local authorities should “identify a supply of specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15”. In a footnote to this, it further adds, “To be considered developable, sites should be in a suitable location for housing development and there should be a reasonable prospect that the site is available and could be viably developed at the point envisaged.” I consider that the proposed access arrangements to Blackwell Farm are wholly inadequate for a development of this scale and thus the site cannot be “viably developed”.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A55

I object to the removal of land from Greenbelt for the provision of two traveler pitches on Puttenham Heath Road to ‘enable delivery’. The area warrants Green belt status and should remain in Green Belt. Removal is a big step towards the eventual development of permanent accommodation, which would result in loss of the two pitches.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY D1 MAKING BETTER PLACES

I object to Policy D1 Making better places I object to the absence of any reference to vernacular or historic design guidelines, even in Conservation Areas. Most of the borough, especially the rural areas, has vernacular design guidelines that are available to give suggestions as to appropriate design. These should have mandatory planning force. The monitoring of this policy is inappropriate. Why should this policy result in a reduction of the number of appeals for poor design? Should it not result in better-designed buildings?

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY D2 SUSTAINABLE DESIGN

I object to Policy D2 Sustainable design, construction and energy

Sustainability should be an overarching ambition, conditioning the whole local plan and running through it, as claimed in the NPPF, “like a golden thread”. It should be set out clearly in Policy S1, not buried away as a minor detail in Policy D2.

This policy amounts to “greenwashing”, expounding aspirational environmental targets while ignoring the plan to build dormitory towns across the Green Belt that are environmentally and socially unsustainable. These settlements will bring vastly increased car use and will lead to unacceptable traffic congestion, overstretched social infrastructure, and more greenhouse gas emissions, noise and light pollution. This policy should not be just about saving energy but about preserving the borough’s stock of natural capital, especially the countryside, from attempts to rig the housing market.
This policy’s emphasis on Combined Cooling Heating and Power and communal heating networks is difficult to understand, since no such networks are available locally.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY D3 HISTORIC ENVIRONMENT

I object to policy D3 Historic Environment

This policy clashes with the strongly pro-development agenda of the rest of the plan and fails to address the contradiction. History is unamenable to improvement, so the policy should commit the Council firmly to protecting and preserving our heritage assets from development. Instead, the specific policy pledge to “support development” that might “enhance” heritage assets leaves wide scope for abuse in the form of destructive commercialisation and financial leveraging of relevant sites.

This policy is based on the false premise that Guildford’s heritage is inherently in decay. This is a developer’s charter – a short step away from the idea that the historic environment needs to pay its way to be preserved. The Council’s reviews of Guildford Museum and the Electric Theatre support this interpretation. Whatever the “reasoned justification”, the actual policy wording in the blue box leaves too many loopholes.

Development close to historical assets is harmful and should be expressly prohibited. This policy fails to meet the requirements of NPPF paragraphs 126 and 131-133.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY D4 DEVELOPMENT IN URBAN AREAS

I object to policy D4 Development in urban areas and inset villages

This policy that does not address the opportunity for building in the urban area

The plan envisages that 40% of homes built will be “affordable”, but this does not provide any accommodation for low-paid workers, for example, those on the minimum wage, who cannot afford to buy so-called “affordable” homes or pay an “affordable” rent. There is a need for some expansion in social housing, especially in urban areas, where there is a greater concentration of low-paid workers such as those employed in the retail, warehousing and distribution sectors (all of which this plan aspires to expand).

The number of homes planned in the urban area is much too low. There is a glaring need for regeneration in many urban areas, particularly Guildford Town Centre but this is ignored in favour of building homes on green-field sites instead.

This will not address urban housing needs. It is also unsustainable, since building outside the town does disproportionate harm to road traffic, air quality and overstretched infrastructure.

The plan envisages a large expansion of the retail sector, but this is hard to justify because the sector is in rapid and continuous decline.

THE BROWNFIELD OPPORTUNITY

Yes, we need a new Local Plan for our borough in order to provide a development strategy within which we can accommodate our local housing, economic and environmental needs. But first we must make good use of our urban brownfield before we consider building in the Green Belt or countryside.

Paragraph 80 of the NPPF clearly states that Green Belt serves a key purpose, “to assist in urban regeneration, by encouraging the recycling of derelict land and other urban land”. In order to comply with central planning policy we need a brownfield strategy that states clearly. “We are committed to a brownfield first initiative whereby all applications on previously developed land are given fast track priority and every facility to promote development for residential purposes and employment purposes in order to satisfy the needs of local people. In parallel a low CIL incentive should be given for all residential development on brownfield land.

In response to the detailed objections received in the Regulation 18 process of the 2014 Local Plan and also in accordance with government policy a Guildford brownfield land register should be urgently compiled showing address, ownership, occupier, current use and detailed planning brief

Perhaps someone could be appointed at GBC with a clear briefing to deliver brownfield targets of housing and employment space

GBC needs to accelerate the residential redevelopment at Woodbridge Meadows, Walnut Tree Close and the Station within the next 5 years

GBC needs to examine the residential development opportunity of the 25.7 acres of car parks in GBC ownership

I do not consider that the target of 1,172 homes in the town centre takes account of the need and demand for housing or the opportunities that brownfield sites present for increasing the residential development in the core of the town which will in itself help to sustain the retail core by increased economic impact.

The Town Centre policy needs to maximise the potential for residential development on brownfield and include as an absolute minimum the 2,551 units proposed in by Allies and Morrison for the town centre included in the masterplan 2015 which has recently been adopted by GBC. The reality is that the Town Centre has the capacity for significantly more homes. See details on GGG website - Guildford Greenbelt Group

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
POLICY E1 SUSTAINABLE EMPLOYMENT

I object to policy E1 sustainable employment

I note that there is a significant reduction of between 71% and 79% in the previous job target and resultant 79% reduction in employment space in response to the many objections lodged in 2014 against an unsubstantiated agenda for economic expansion in the last draft and based on new findings by Aecom in the latest ELNA 2015.

I have concern as to the ill-informed clustering of all B classes in terms of the clarity of market evidence required to inform effective planning and a failure to provide a clear understanding of business needs required under Section 160 of the NPPF.

I also note the dramatic reduction in assessed demand by two Employment Land Needs Assessment Reports carried out under the same terms of reference within a period of 2 years which calls into question the general reliability of the process of collection and interpretation of data in the overall forward planning process by GBC. I am concerned however that the research undertaken by Aecom is generally superficial and lacks sufficient detail and analysis between B1a, B1b, B1c, B2 and B8 use classes and that no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of office, research and development, light industrial, general industrial and warehousing and distribution floor space.

No proper analysis has been made of data held by GBC in respect of different B classes in terms of planning applications granted or evidence gathered by the economic development function at GBC and no robust assessment of local market demand apart from fairly brief references to freely available market research undertaken by commercial estate agents such as Lambert Smith Hampton covering a much wider area.

GBC appear to fail to appreciate the fundamental rationale of the Use Classes Order as a planning tool in terms of useful property market research or forward planning.

What we are left with is a fairly clumsy and poorly informed plan which clusters B classes without any appreciation of widely different employment impact and economic sustainability. E.g. B1 generates at least 5 times as much employment as B8.

The lack of appreciation as to the opportunity for widely different uses being generated within B class clusters defeats the whole point of proper planning of employment uses and can significantly endanger previously good planning put forward in the previous 2003 plan. E.g. the creation of a research and development park linked to the University but now has the threat of being downgraded into a general business park (see below).
Little regard has been given in the plan to the economic reality of falling demand for B2 industrial space which is clustered with other B classes almost randomly throughout the plan.

Little regard is given to the opportunity of B1 b space as an opportunity for research and development which needs to be nurtured and preserved without the detrimental and confused clustering with other B classes both in terms of planning and promotion of a research hub.

I note that the past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 derived from VoA analysis and that the calculated annual floor space demand is 0.7% over the plan period up to 2033.

I support the concept of seeking increased investment in our local knowledge-based, high technology economy. This will provide well paid, creative jobs and generate the funding necessary to pay for the infrastructure and environment this sort of industry requires.

We need to distinguish between wanting to increase the added value of the economy and physical expansion, especially given the scarcity of land in Guildford. Guildford is not the place for large space hungry businesses. So I should target high added value small and medium sized enterprises rather than the headquarters of larger corporations.

**POLICY E2: LOCATION OF EMPLOYMENT FLOORSPACE**

I object to policy E2 location for new employment floor space

I object to the policy of expanding the Research Park onto Blackwell Farm and I do not believe there are exceptional circumstances to justify incursion into this permanent and high quality area of Green Bel.

The Surrey Research Park currently extends to 65,000 sq m. There is already granted consent to expand to a further 9,000 sq m (14%)

The past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 based on ELNA 2015 derived from VoA analysis

The ELNA 2015 calculated annual floor space demand is 0.7%.

The data point for our analysis is today in 2016 so we have 17 years to go to the end of the plan period. The necessary growth in floor space over the plan period is therefore 17 years x 0.7% = 11.9%.

There is currently 14% expansion space already available.

The proposal by GBC to expand the 65,000 sq m by 9,000 sq m (existing allocation) with an additional 35,000 sq m amounts to an increase of 67% of the Research Park which is not required.
The Research Park is currently developed at a density of 25% plot ratio. The majority of existing buildings are 2 stories giving a developed floor space plot ratio of 12.5%.

The existing Research Park has the opportunity to markedly increase its density without infringing any Green Belt land nearby. Any density increase would be cost effective for the use of all existing infrastructure and would also have the potential to match the existing densities of existing academic buildings on the university campus which are three to four times higher.

Together with the existing expansion of 14% through existing consents and the opportunity to increase its density the Research Park has ample capacity to expand to embrace new demand for B1b uses linked to the university.

A preferred location for increased B1a and B1b space would be in the Town Centre close to housing and a convenient transport hub

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E3 MAINTAINING EMPLOYMENT CAPACITY

I object to Policy E3 maintaining employment capacity

I object to the ill-informed policy of resisting change of use from B1a to residential because it flies in the face of positive property market solutions for the regeneration of brownfield land. It is also contrary to current government policy which has recently been reaffirmed and permits a change of use from B1a (offices) to C3 (residential).

I believe that the existing government policy which has recently been made permanent of allowing change of use from B1a to C3 is sound

Many office buildings reaching an age of more than 30/50 years become redundant in terms of energy compliance making them illegal to occupy for employment purposes and the cost of refurbishment makes them redundant and uneconomic

The reality of market demand is that the gross development value of refurbished residential space is in excess of the gross development value of refurbished old office space in many locations (this gross development value assessment is supported by the analysis by property consultants GVA in the supporting evidence within the Allies and Morrison Masterplan for Guildford dated 2015)

To resist change from B1a to C3 is contrary to the concept of brownfield first for residential development schemes. To resist change from B1a to C3 in Strategic or Significant Employment Sites is contrary to the concept of integrated mixed use communities whereby the journey to work is minimised.

London has led the way with significant residential schemes being created from redundant office stock. A good example is the South Bank in London adjacent to Waterloo Station where in 2005 the Shell Centre has been converted into flats.
Another early example is the 2000 scheme at Metro Central Heights at Elephant and Castle where the old Alexander Fleming House was converted to 435 flats by St George. GBC needs to adopt more modern trends and policies.

</table>

The existing Research Park has acres of surface car parking, which provides it with the opportunity to markedly increase its density without infringing any Green Belt land nearby.

I object to Policy E4 (expansion of the Surrey Research Park into the Blackwell Farm) The existing Research Park has been built at a very low density (25% plot ratio), which is very low for an urban extension. The majority of existing buildings are 2 storeys giving a developed floor space plot ratio of only 12.5%.

The existing Research Park has acres of surface car parking, which provides it with the opportunity to markedly increase its density without infringing any Green Belt land nearby. Any density increase would be cost effective for the use of all existing infrastructure and would also have the potential to match the existing density of the neighbouring academic buildings on the university campus at Manor Park, which is five times higher.

Together with the existing expansion of 14% through existing consents and the opportunity to increase its density, the Research Park has ample capacity to expand to embrace new demand for B1b uses linked to the university, without utilising additional land.

POLICY E4: SURREY RESEARCH PARK

I object to policy E4 Surrey research Park.

I support the maintenance of research, development and design activities, in any science, including social science, that is complementary to the activities of the University of Surrey at the Surrey Research Park. I object however to the completely unnecessary expansion of the Research Park into a larger Business Park. I believe that the planning policy going forward for the Surrey Research Park should be to maintain and enhance the integrity of its research base allowing for the economic value add to the local economy of knowledge and technology transfer from the University.

I believe that B1b (should be the primary use class for the Research Park and that applications for B1a should be resisted due to the danger of dilution of the core purpose and reputation of the park. I object to the inclusion of B1c uses which is inappropriate and unnecessary.

Research parks based on the early UK technology transfer exemplars of the Cambridge and Oxford need careful monitoring, nurturing and protection to ensure the integrity and quality of the park is maintained and the park continues to be a destination for innovation and enterprise.

There is a danger for research parks to be overwhelmed by short sighted development opportunities being taken by park managers provided by standard office activities and administrative functions which in time turn them into standard business parks which can be found anywhere in the country. Their relative low density and attractiveness make them targets for “any other” office user.

Research parks that lose their way stop being the location of choice for new innovative enterprises.

I hope the Surrey Research Park in Guildford remains focussed on a broad spectrum of scientific research including computer science, bio-chemistry, design, space-science, eco-science, health science, software development, laser technology, media-science, artificial intelligence, robotics and super-manufacturing.

Monitoring indicators should include new start-ups and new patents created.

Facilities should be provided whereby new small businesses can secure premises under subsidised licence fee arrangements with no onerous rent or lease commitments.

I support the idea of a variety of sizes of unit including some small units (between 15 – 80 sq m) bearing in mind one workstation is 10 sq m.

Consideration should be given to the concept of shared “enterprise hubs” where individuals can take pay as you go workstations in shared spaces similar to touch down business centres similar to the “enterprise village” concept.

I object to the policy of any new extension of the research park more than the existing 14% already provided for within the park or within the footprint of the park.

The Surrey Research Park currently extends to 65,000 sq m.

There is already granted consent to expand to a further 9,000 sq m (14%) This space has been available for 10 years and is still to find a taker.

The past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 based on ELNA 2015 derived from VoA analysis.

The ELNA 2015 calculated annual floor space demand is 0.7%.

The data point for our analysis is today in 2016 so we have 17 years to go to the end of the plan period.

The necessary growth in floor space over the plan period is therefore 17 years x 0.7 = 12% which is less than the current expansion space of 14%.
The research park is developed at a plot ratio of 25%. This could be increased to 50% within the same footprint of the existing park without damage to its amenity. The actual current land use for development in the park is in fact only 12.5% because most buildings are 2-storey.

POLICY E5 RURAL ECONOMY

I object to policy E5 Rural Economy

In my opinion this policy should only apply to small-scale development in rural areas which means development of less than 100 sq m (gross) which is in keeping with and the permanence and amenity of the green belt.

Use of rural areas for town centre uses without applying the sequential approach is against the principles of localism that require local people to be consulted and heeded, not ignored. Villages need protecting in terms of both design and scale and character.

Previous commitments to improved high-speed broadband and mobile phone coverage have now been diluted, despite general support. This disregards the responses from the 2014 public consultation.

The consultation process was not well publicized; many Parish Councils had no idea of this. The emphasis on voluntary efforts and greater community efforts is far removed from reality for this 'solution' was presented for almost every aspect of rural life from managing crime to looking after elderly to education and more besides. Villages by nature are usually small and the percentage of the population who are able to do voluntary work is smaller still. The solution is therefore unworkable. The results of the consultation were not publicized but were instead collated and summarized and bore no resemblance to the submissions I had sight of.

Answer (if comment is on questions 1-7 of the questionnaire): ( )
POLICY E6 LEISURE AND VISITOR EXPERIENCE

I object to policy E6 the leisure and visitor experience. I believe that the importance of a visitor attraction hub could be much better articulated. Guildford has great potential to become a “must see” destination for tourists and visitors. Surrounded by the natural beauty of the Surrey Hills, it is already distinguished as an historic county town. The historic part of the town should be exploited to the full creating a real sense of vibrancy and atmosphere. This should be linked to the attractions of the Museum, the Castle, the Wey and the historic High Street including its views of the Hogs Back.

The economic impact would create big advantages for both the leisure and the niche speciality retail sectors in the town. Given the local and wider catchment of the town Guildford should strive for high quality definition making it a great centre for people to live in and visit.

Guildford the historic “Gateway to the Surrey Hills” has far more potential than Guildford just any other stereotypical centre found anywhere around London. Re-branding walks, such as a new “Pilgrims Trail” similar to the Patriots trail in Boston USA with marked yellow footsteps leading from the station to the River and up through the historic heart of the town.

There is a need to make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

There is a need to help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to RHS Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently bypass Guildford to go to Bath, Oxford or Cambridge instead.

THE TOWN CENTRE OPPORTUNITY

I do not consider that the target of 1,172 homes in the town centre takes account of the need and demand for housing or the opportunities that brownfield sites present for increasing the residential development in the core of the town which will in itself help to sustain the retail core by increased economic impact. What the town centre needs in terms of urban regeneration and to attain a thriving night time economy is more residential development.

The Town Centre policy needs to maximise the potential for residential development on brownfield and include as an absolute minimum the 2,551 units proposed in by Allies and Morrison for the town centre included in the masterplan 2015. The reality is that the Town Centre and other areas of brownfield in the borough has the capacity to provide significantly more than this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY H1 HOMES FOR ALL

I object to policy H1 Homes for all.

Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set any rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development but not high-rise development (ie over 10 floors) in the urban area close to transport hubs to facilitate modal shift e.g. 20 minutes’ walk of Guildford railway station.

Student accommodation should provide for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and underused surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back. Surrey University has 17 ha of car parks that could provide all the student accommodation required above it, with parking beneath.

Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Overprovision is inappropriate given other constraints.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H2 AFFORDABLE HOMES

I object to policy H2 Affordable homes.

“Affordable” homes, under national definitions, means homes that are sold or rented at 80% of market value. Even if 70% of these are rented as proposed, the level of market prices in the South-East means (even post-Brexit) that these homes will remain well beyond most people’s means and that starter homes will not become available for local people.

In addition, the viability clause (4.2.40) means that in practice the policy could be unenforceable. Private financial viability has no place in a public policy and should be removed. It is a get-out-of-jail-free card for developers that will sacrifice countryside for no local benefit.

I question the assumptions that seem to underlie this policy: that people have a right (rather than a legitimate aspiration) to own a home; that they should be encouraged to live locally in enormous debt (contradicting the Government’s policy of encouraging labour mobility and development in poorer regions, where homes are cheaper); that increasing local house-building will reduce overcrowding and congestion (rather than simply suck more people into the borough); and that it will
stem the rise in house prices (even though 13,860 new homes will be a drop in the ocean, given that prices are determined by an infinite demand-pull from London, whose population is increasing by 100,000 a year, and by the currently low cost of capital for overseas and other buyers). The weak mechanisms proposed in the plan might influence the market in a more remote part of the UK, but not here.

This policy’s version of “affordability” is just a smokescreen for pushing through more development generally. Building more homes in Guildford cannot increase real affordability given the overhang of the London market.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICY H3 RURAL EXCEPTION HOMES

I object to policy H3 Rural Exception Homes

This is a type of Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix”, this can include “market” housing – i.e. normal commercial development which in Guildford usually means expensive executive homes. This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY II INFRASTRUCTURE AND DELIVERY

I object to policy I1 Infrastructure and delivery

Most of the borough’s infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. Yet this plan’s commitment to building housing estates across the Guildford countryside will mean either major infrastructure investment that no-one is prepared to pay for or else a catastrophic and simultaneous collapse in transport, educational, medical, energy, water and communications services.

The plan targets greenfield sites – requiring heavy infrastructure investment – in order to generate CIL income necessary to meet an infrastructure shortfall that is already serious. The current draft CIL scale also encourages development on greenfield sites rather than brownfield and will reduce or negate developer’s obligation to sell a percentage of homes at 20% below market value.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing infrastructure needs in this area is inadequate, identifying only the tip of an iceberg of existing congestion. Compton Village is already close to tipping point, yet it will see a significant increase in traffic volume, will be completely congested and yet no plans exist to mitigate the problem.

The schemes referred to in this policy barely solve existing congestion and are inadequate when development takes place. The full impact on local road networks has not been fully considered. Some proposed development locations would require highway schemes that involve demolishing property and road-widening in residential areas to solve the resultant congestion. The A3 improvements are not guaranteed to take place but they are being used to justify removing large areas from the Green Belt before detailed traffic assessments have taken place. These detailed investigations are being deferred until the planning application stage and will be left to developers to prepare. If a site then proves to be unsustainable its Green Belt protection will have been lost for no reason and unsuitable development will take place by a more insidious process. Compton Village will actually incur increased traffic flow as a consequence of A3 widening according to the study, yet as was pointed out above, no solutions are in place to improve the situation.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritising greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly.

This plan, however, assumes infrastructure will follow on the heels of housebuilding. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognising this as a key issue, the plan makes too many assumptions, not least being the verbal promise that development will not take place without infrastructure preceding it. It is not clear how this will happen and is not in the Plan, as it should be, if it is achievable.

The highways network is under stress at peak times in many parts of the borough. Queuing is the daily experience of drivers going to and from work. The local plan recognises the problems in para 2.14. Much of the road network is single-carriageway, and junctions act as constraints.

The key evidence on future traffic conditions is provided in the Strategic Highway Assessment Report (SHAR) which summarises the results of the tests carried out by Surrey County Council at the request of GBC. Five scenarios were examined using SCC’s strategic traffic model.

Scenario 1 contains all developments and planning permissions from 2009 to date. As such it corresponds to today’s circumstances, and describes the current unsatisfactory traffic conditions in peak periods.

Scenario 5 represents the position at the end of the plan period, including all development and highways schemes in the local plan

The results of the analysis show that there will be widespread congestion in the morning peak hour across the network. The key strategic routes, the A3 through Guildford NE bound, and the M25 between Junctions 10 and 11, are shown to be at or over capacity. The summary network statistics presented in the SHAR, while useful, require some interpretation because
the analysis of vehicle-hours is derived from link speeds only, and does not reflect junction delays and queues. The tables that show the ratio of flow to capacity and level of service are especially helpful to gaining an understanding of the conditions on the network in the forecast. Where the forecast traffic volume is above or close to capacity, flow becomes unstable and there is congestion. The SHA results provide evidence that, in 2031, congestion will be worse than it is today on much of the network.

It is the case that the traffic modelling does not take into account the potential for increased use of other modes, but the trip rates used for developments already have built in the typical level of use of other modes, and services will be required to meet that need. It is also the case that the model does not allow for park and ride, which would improve matters in the town centre, as discussed below.

In order to gain an insight into conditions across the network, it is necessary to combine information from several tables in the SHAR. Table 4.5 shows that the M25 and A3 will be at capacity in Scenario 5. The other roads that will have poor levels of service include those in Table 4.5 but also those in 4.12 (except the A3) and those in Tables 4.3 and 4.4 with levels of service E and F that will not be given some relief by improvement of the A3 in Scenario 5. Paras 4.10.3, 4 and 5 point out that there will be increased congestion. Given that the starting point is unsatisfactory, there can be no expectation that the schemes in the Infrastructure Development Plan will provide an overall improvement. There will be some local benefits, such as the Ash rail bridge for example, but in general conditions will be as bad and in many places, such as Compton Village, worse. So the statement in the SHAR para 4.2.5 that ‘the combined mitigation as reflected in Scenario5..indicates that at the strategic level it accommodates the additional PSLP demand’ needs qualifying – ‘at the cost of a lot of queuing’ and makes no mention of the impact this will have on pollution, which is already a known problem at the A3 end of Compton.

The cumulative effect of the additional traffic generated by the developments in the local plan will be to increase congestion, even with the proposed highway schemes in place. More detailed analysis of the junctions and queuing is required. So we question the conclusion that the developments would have “an acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF”.

Appendix 3 of the Transport Topic Paper shows the phasing of housing development and transport infrastructure. The major scheme being considered for the A3 between the A31 and the A320 is scheduled for delivery in the period 2023/24 to 2027/28. The strategic developments at Blackwell Farm and Gosden Hill Farm are shown as being phased in from 2021/22 onwards. The Garlick’s Arch development is shown as starting in 2019/20. Therefore, there will be a period in which the existing A3 has to cope with the additional demand arising from those developments before extra capacity is provided.

The following comments regarding the strategic sites are taken from the SHAR:

Blackwell Farm – there will be congestion at the A31 junction, and the problems at the Tesco junction, and the Egerton road/Gill Avenue junction (para 4.9.5). Traffic is likely to access the Surrey research park and the RSCH through the development (para 4.7.3)

Gosden Hill Farm – there will be an increase in traffic through Burpham. There will be pressure on the A3100/B2234 roundabout (paras 4.7.6, 4.7.7 and 4.7.8).

Wisley – traffic will increase on minor roads to gain access to the A3 (N and S bound) and other routes (para 4.7.11). The development will add more traffic to the A3. The Burnt Common slips help alleviate the traffic through Ripley according to the model, but queuing on the A3 could mean this does not happen (para 4.7.14)

Normandy/Flexford – the report has little to say about the impact of this large development. The increase in flow on Westwood Lane is noted (para 4.5.7). Tables 4.10 and 4.11 show junction delay reducing at the Westwood Land, B3000 junction, but an increasing at the Puttenham Hill/Millbrook junction.

Ash – development in Ash is not specifically addressed, but there are major increases in traffic on a number of roads. The new rail bridge will bring relief (but traffic will move to the next junction).

Slyfield – there are no remark relating to SARP, and as there are no additional trips shown in and out of the Slyfield residential zone in Tables 3.3 and 3.4, it is possible that this development has been omitted. There is a significant increase in trips to and from the Slyfield industrial zone, which will impact on the A320 and Clay Lane.
Town Centre – the report has very little to say about the town centre. It is evident that the model is forecasting severe congestion on the approaches to the town centre, such as the A281, the A31 Farnham Road, and Woodbridge Road for example. No mitigation measures are planned. And in the Transport Strategy, GBC states that the intention is to adopt Allies & Morrison’s Scenario 2 which would have the effect of significantly reducing the capacity of the town centre road system. The implications have not been examined, but traffic using the A281 from Waverley, for example, would be affected.

The B3000 will be severely affected by development schemes and will not benefit from road improvements. It is essential that the impact of all change to road networks are looked at in conjunction with one another for any survey to be meaningful. The local plan does not state an objective for congestion. The two strategic objectives that are included for infrastructure refer to supporting sustainable development and delivering a balanced system. However, in para 2.15 there is an aspiration expressed about opportunities ‘to improve the performance of the road networks through transport infrastructure and service improvements’, which taken with the previous paragraph includes reducing congestion. The evidence so far shows that this will not happen. The mitigation proposed is not sufficient to overcome the problems that will be caused by the level of growth in the local plan. Congestion will worsen. The network will lack resilience and be vulnerable to disruption due to incidents. Minor roads will have to cope with a lot more traffic, for which they are unsuitable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY I2 DEPARTMENT FOR TRANSPORT

I object to policy i2 Supporting the Department of Transport’s “Road Investment Strategy”

This policy is too vague and unrealistically optimistic. Decisions by Highways England on improving the strategic road network (the M25 and A3) are still years off. The Council have suggested a very expensive tunnel under Guildford, but there is no evidence to show that this is a realistic option. Even if Highways England accepted this (which is highly unlikely in the post-Brexit public spending climate) it would not be built until the end of the plan period at the earliest. Other, less expensive A3 improvements, and changes to the Junction 10/Heathrow stretch of the M25, will also take years to agree and complete.

The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is foolhardy. Surrey is the most congested county in England, with 683 people per square kilometre, compared with an English average of 413. This policy will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone). This is a major development constraint that should have been applied to the OAN to constrain the housing target.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY I3 SUSTAINABLE TRANSPORT

I object to policy I3 Sustainable transport for new developments. This is another aspirational policy, not grounded in the practical realities of daily life. It consists of a standard, box-ticking list of local government measures unrelated to the specifics of the plan. Like infrastructure, transport appears to be an afterthought; the policy fails in its essential job of guiding planning decisions, since it assumes development of any kind can be supported by sustainable transport.

The sustainability of the dormitory settlements which the Council want built across the countryside depends on a general “modal shift” from private car use to walking, cycling and public transport. This is unrealistic. The proposed sites are often miles away from the nearest railway station. Bus services even in the largest villages are almost non-existent – just one bus to and from Guildford each day in the Horsleys and none at weekends. Since bus services depend on profitability, they cannot be expanded and the Council are not proposing to subsidise new ones. Rural buses are too slow anyway for busy people. Most rural roads in the borough are narrow, winding, hilly, potholed, muddy and unlit. Many flood badly and have no footpaths.

The desired modal shift would require a comprehensive co-ordination of bus and train timetables with services every few minutes, seven days a week, to stops within walking distance of every home in the borough. This kind of integrated public transport system has been achieved in Switzerland, for instance, but only at huge public cost and thanks to a political consensus supporting state ownership of trains, buses and the post office, which delivers rural passengers as well as mail. There is absolutely no chance of this in the UK.

The vast majority of the borough’s residents are not, in practice, able to cycle. This includes children, the elderly, commuters who have to look smart, the infirm, the unfit and people carrying goods or shopping of any kind. Dependence on walking and cycling discriminates against these groups, which include some of the most vulnerable members of the community. It is socially unjust. One in two working people in Guildford commute for up to 3 hours a day. They will not leave their cars for even part of their journey if it means longer travel times.

Park-and-rides are a welcome part of the transport mix but are too slow for commuters and others on a tight schedule. For an adult couple going shopping it is still cheaper to park in town.

I like the idea of water buses but have concerns over the reality. The Wey is narrow and, with a river speed limit of 4mph, boats are too slow for anything but recreation. Except on the tideway, not even the Thames has such services.

The addition of two new stations appears attractive but will slow down train journeys, which are already slower than at any time since the 1930s. Knock-on effects on localities where the new stations are built have not been worked out or presented. Ie. Cost of housing will increase.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY P1 AONB**

I object to policy P1 Surrey Hills Area of Outstanding National Beauty

This policy weakens existing protection when it should strengthen it. It is dependent on the Surrey Hills Management Plan. The latter welcomes housing development. Even major (undefined) development in the AONB would be permitted if exceptional (undefined) circumstances could be demonstrated.

Much of my concern stems from the loose wording of the Policy, which in some places renders the policy ineffective, for example:“All proposals will be considered against whether they…”

“All development proposals within and adjacent to the AONB will be expected to conserve or enhance its special qualities”

Terms such as “considered” and “expected” are not strong enough in prohibiting development proposals that do not conserve and enhance the AONB, and it is likely that developers will be able to use this loose wording to their advantage. Of particular concern is the paragraph 3, which begins:

“Whilst the AONB designation does not preclude specific types of development in the Surrey Hills and proposals will be assessed on their individual merits…”

This whole opening clause is unnecessary and almost invites development proposals. I believe that it should be deleted, and the sentence should therefore begin: “There is a presumption against major development in the AONB in accordance with NPPF.”

In addition to the weakness of the language, I am also concerned that the AONB criteria listed in the policy are not the most important ones in determining whether a planning application should be approved. Aside from the one outlined in the first bullet point (which relates to the AONB setting) none of these criteria is concerned with the key characteristics of AONB, ie landscape character, scenic beauty, important views, tranquility etc. Whether or not a development supports the rural economy or provides public access are of far less national importance than preserving the quality of the landscape itself.

I believe that the AONB Policy in the Draft Plan 2014 provided greater protection to the AONB, and would like to see the following sentences reinserted:

“The national significance the AONB will be afforded the highest level of protection and only proposals which can be sensitively amalgamated into the area and which complement and enhance the character of the AONB will be considered”

“Proposals within the AGLV which would have a negative impact upon views into and out of the AONB and which do not respect the setting, will not be acceptable”

In accordance with the most up to date Minerals and Waste Plan, safeguarding of applicable land within the AONB and/or AGLV may be necessary and deemed appropriate

Finally, I would like to see a clause which gives protection to the candidate areas for AONB status in the forthcoming Surrey Hills AONB Boundary Review. This should include Blackwell Farm which was recently reviewed by an Independent consultant and deemed worthy of inclusion as a candidate. I consider that all land that has been assessed as meeting the latest Natural England criteria for AONBs should be subject to the same level of protection as an AONB, not just land that has been designated AGLV.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The need to apply constraints

Ministerial guidance in relation to building on the Green Belt is clear:

1. “the single issue of unmet need - is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development in the Green Belt” - Nick Boles to Sir Paul Beresford MP 7th February 2014.

2. “we were always very clear that we would maintain key protections for the countryside, and, in particular, for the Green Belt. The Framework makes it clear that a Green Belt boundary may be altered only in exceptional circumstances and reiterates the importance and permanence of the Green Belt” – Nick Boles to Sir Michael Pitt, Planning Inspectorate 3rd March 2014.

3. “Planning Guidance, updated in March 2014, also states that unmet housing need is unlikely to outweigh the harm to the Green Belt to constitute the very special circumstances justifying inappropriate development within the Green Belt” – Nick Boles to Sir Paul Beresford MP 18th June 2014

70% of the sites put forward in the Local Plan are in the Green Belt which flies in the face of current government planning policy. The National Planning Policy Framework (NPPF), National Planning Policy Guidance and case law make it clear that Green Belt is an absolute constraint on housing supply. Exceptional circumstances need to be shown to adjust boundaries.

Other constraints under the NPPF include assessments of sustainability, strategic flood risk assessment, physical constraints on land use and infrastructure constraints (this can include road congestion, schools, drains, power supply and medical requirements).

Constraints should be applied to the Objectively Assessed Housing Need (OAN). However this itself is overstated and should be reduced from 693 per annum to 500.

In view of the comments above it would appear logical to apply CONSTRAINTS in line with government policy to a corrected OAN. of approximately 50% to account for the fact that 89% of the borough is in the permanent Green Belt and development is not supported by adequate major infrastructure. This reduction is in line with the constraints percentage of 50% applied by Woking Borough Council.

This would result in a more acceptable and practically achievable HOUSING TARGET of 250 homes per annum which over a 20-year period would be 5,000 homes. All of these homes could be built in the existing urban brownfield areas of the
borough and would in part satisfy the 20,000 objections made by residents to the 2014 draft plan and also relieve the additional problems of inadequate infrastructure.

It would also mean that there is currently 8.5 years supply of housing (2131/250) which is made up of existing permissions granted (1,518) and completions made (613) during 2013/2015. (Monitoring Report by GBC 2015)

The Brexit vote may have strengthened government policy further. Theresa May, the new prime minister, announced on 11 July that she is personally committed to protecting the Green Belt once she takes office.

Whilst I have many significant objections to the GBC Local Plan I applaud the policy statement by GBC in their Monitoring Report, “We will continue to monitor the use of previously developed land, and continue to identify as many opportunities as possible for redevelopment of previously developed land.” I believe it will be to the benefit of all residents if GBC can apply themselves vigorously to this endeavour in order to protect the Green Belt.

**POLICY P2 GREEN BELT**

I object to Policy P2 green belt

This policy states, “the general extent of the Green Belt has been retained.” This is a misleading statement.

The policy wording is weak in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. Once gone it is gone forever. It is not the Council’s to give away.

Policy P2 completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world.
Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

1. Agricultural production
2. Rural leisure and tourism amenities
3. Water catchment
4. Flood control
5. Biodiversity
6. Natural heritage
7. A carbon sink for air pollution
8. Room for public facilities such as parks and burial grounds
9. Profitable film locations (e.g. Shere)
10. Future economic potential such as mineral extraction (even fracking)
11. Natural beauty, landmarks, open space, rural views and sight lines
12. Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF)

As a matter of law and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations.

It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold.

I object to the “insetting” of 14 villages from the Green Belt. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat.

I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors.

To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead.

I object to the removal of over 400 hectares of Green Belt land in and around Blackwell Farm to facilitate further development of Surrey Research Park and for 1800 homes. Over 60 hectares were removed from Green Belt 12 years ago for the same developer (Surrey University) who has yet to fulfill their planning obligations. This valuable land has been squandered with over 17 acres of surface car parking and as one of the key features of Green belt is its 'permanence' this second request for yet more Green Belt land to be released in such a short space of time, with all the outstanding issues that remain makes this all the more objectionable.

Furthermore I object on grounds of the impact this development will have in terms of congestion on our highways, these issues have been highlighted under 'infrastructure'.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P3 COUNTRYSIDE

I object to policy P3 Countryside (i.e. beyond the Green Belt)

This is more protective – as a policy – than the proposals for the AONB and the Green Belt, so is anomalous. I am not in favour of building on this area, since urban, brownfield areas are sufficient to meet all reasonable housing targets. There is no need to build on any green fields if brownfield, previously developed land is used efficiently (without garden-grabbing).

This policy refers to the countryside near Ash and Tongham (see paragraph 4.3.28). This area does not justify stronger policy protection than any other part of the borough. The fact that the current and previous Council Leaders represent it should not give it preferential status: “we will seek to limit any development in the countryside unless it can be demonstrated that it is necessary in that location”. Green Belt and AONB areas should by definition have higher levels of protection than non-Green Belt areas.

It should also be noted that Ash and Tongham lie beyond Guildford far away from London and therefore make no contribution to controlling Metropolitan urban sprawl, that is presumably why Ash and Tongham are not in the Green Belt already. This policy, however, attaches higher priority to preventing the “coalescence between the Ash and Tongham urban area and Aldershot” than it does to the primary purpose of the Metropolitan Green Belt, which is to stop London sprawl. I agree to the prevention of coalescence but this should apply to all villages including East and West Horsley and Flexford and Normandy.

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY P4 FLOOD RISK

I object to policy P4 Flood risk and water source protection zones

Urban development on existing hardstanding would not create additional flood risk, especially where there is scope for improved flood resistance measures to be included in the design. Sites such as Woodbridge Meadows Industrial Estate and the Arriva bus depot, on the River Wey bank, are potential high-value brownfield sites that would not be available for housing if this policy is implemented. It is not the footprint of existing buildings that should limit future development, but the extent of existing hardstanding. Tarmac and concrete do not act as functional floodplain, and some land with hard standing close to the river, within the town centre and within easy walking distance of the railway station, provides an excellent opportunity for real urban regeneration that could protect the surrounding countryside.

I strongly believe that this policy should not be used as a convenient excuse not to build on the extensive area of brownfield sites between the station and Ladymead. Any new development in this area could easily be built on stilts with flood resistant ground floor parking in areas that are identified as high flood risk. This area has been built over successfully over the last 50 years. We do not need to stop now.

I do not support building directly on (as opposed to over) flood plain as the land is effectively a soak away, but intelligent architecture has been dealing with this problem for many decades in other parts of the UK and the globe.

POLICY P5 SPAs

I object to policy P5 Thames Basin Heath Special Protection Areas

This policy is not robust enough. The mitigation (cash compensation) offered for development in the special protection area is so small as to be meaningless.

SANG (Suitable Alternative Natural Greenspace) is not beneficial since the sites identified or targeted are already green space. This is just using agricultural or wooded land as recreation land in order to justify building on other green spaces nearby. There is no actual increase in open space or environmental protection; instead, it is a ploy designed to permit building on otherwise protected areas. SANG – in part used to prevent dogs and cats attacking nesting birds – must also ensure that it is not using land which is adjacent to the Special Protection Areas.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Policies**

**POLICY S1 SUSTAINABLE DEVELOPMENT**

I object to policy S1 as stated and the presumption in favour of sustainable development. The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” Policy S1 ought to set a clear framework. No definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The promise “to secure development that secures the economic, social and environmental conditions in the area” omits to recognise that economic growth, social justice and environmental protection often conflict. It does not say how each element is to be weighted or conflicts resolved. As a practical guide to the tough choices Councillors will face, it is without value. Under this policy, any development will qualify as “sustainable”, thereby failing to apply the NPPF’s most important guideline.

The most gaping hole in Policy S1 is the Green Belt. As an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity, the Green Belt is a living example of sustainable development in practice. It is the envy of the world. Policy S1 should commit to uphold Green Belt boundaries and protections, setting at least one clear boundary to planning decisions. The plan’s contempt for Green Belt constraints is amply demonstrated in later policies.

The commitment to approve planning applications “wherever possible” and “without delay” reveals this draft plan’s pro-development bias. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.3.

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Spatial Hierarchy

The spatial hierarchy, which outlines Guildford's preferred strategy, does not match up with the proposed plan. The hierarchy places Brownfield sites (including those on Green Belt) as a priority, but the Plan has 66% of development on Greenbelt and only 34% on Brownfield. The hierarchy lists Guildford town and urban areas as a priority followed by inset villages and identified Green Belt villages. A relatively small percentage of housing is allocated for Guildford town (the most sustainable location) and Green Belt areas, such as Blackwell Farm, with high sensitivity have been classified as within the 'Guildford urban area' when they are in fact in the open countryside. We are told that only 1.6% of the 89% Green Belt has been earmarked for removal and that the 6% removed via insetting doesn't count as these villages are already developed. If this is the case, why list them in 4.1.16 of policy s2 - Spatial Strategy?

4.18 The preferred options cannot accommodate all that Guildford 'needs'. This is untrue. Two specialist consultants have independently critiqued the OAN and both question the level of uplift and the use of ONS data without full correction for changes and anomalies. They refer to 'double accounting' as the uplift is introduced at several stages and the assumptions that result in the final OAN are not explained. See comments on Strategic Housing Market Assessment (SHMA).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S2 PLANNING FOR THE BOROUGH

I object to policy S2 the Borough Wide Strategy and the commitment to build 13,860 homes based on the Strategic Housing Market Assessment (SHMA) 2015 prepared by GL Hearn.

The OAN “objectively assessed need” figure in the SHMA of 693 homes a year is far too high.

I am very surprised and concerned that GBC have adopted the OAN of 13,860 homes as the housing target without any application of constraints as required under the National Planning Policy Framework and the National Planning Policy Guidance. The scale of the housing number proposed, inevitably increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

Other local planning authorities appear to take a more balanced view in their approach to planning. The Woking Core Strategy 2012 applies a constraint of 50% from the 594 new homes identified in their own SHMA. “It should be noted that local evidence (Strategic Housing Market Assessment - SHMA) highlights a need for an additional 499 new affordable homes every year in the Borough and a total of 594 new homes every year when taking into account demand. Given the level of environmental constraints present in the Borough, it is considered that the provision of an average of 292 dwellings per annum represents a reasonable level of housing growth for Woking and is deliverable.”

Historically GBC have correctly applied constraints on housing numbers to protect the Green Belt. The Surrey Structure Plan 1994 advocated a general slowing down in the rates of development “because of the environmental constraints which exist in the County, including Green Belt”. This slowing down was reflected in the requirement that Guildford Borough...
should accommodate a net increase of 3,800 dwellings between 1991 and 2006. This was a lower rate of development than
in previous years. It is interesting to note that the Structure Plan at that time expected sufficient land to arise within the
urban areas to accommodate this requirement.

However it would appear that today GBC have effectively ignored the real potential of the urban area to provide for
housing. At the same time GBC have adopted a radically different approach to the policy of the Council over the last 20/30
years and are now ignoring government policy in relation to the Green Belt. A detailed and comprehensive professional
review of the SHMA dated June 2016 by NMSS an independent expert firm dealing with housing and demographics
procured by Guildford Residents Association (GRA) has concluded that the OAN figure should be revised down from 693
homes per annum to 510 homes per annum.

The 41 page report by NMSS which can be found on the GRA website entitled “A Review of the West Surrey SHMA as it
relates to the Objectively Assessed Housing Needs of Guildford”. It was a real community effort. It was paid for by over
separate 20 Guildford Residents Associations and Local Parish Councils none of whom were convinced that the SHMA
report procured and presented by GBC was accurate or transparent or accessible in a meaningful way. So they clubbed
together and collected contributions from many hundreds of Guildford residents to try to find out the truth of the housing
need figure presented in the Local Plan.

The NMSS report includes detailed analysis and financial modelling and was prepared by Neil McDonald. He is an
independent adviser and commentator on housing demographics. He works with local authorities and others on the
estimation of housing need and related issues. He was a civil servant and policy adviser to Ministers for over 30 years, the
last 10 advising on housing and planning issues within the Department of Communities and Local Government. His 7 years
as a Director at DCLG included a posting as Director, Planning Policy and a period as Chief Executive of the National
Housing and Planning Advice Unit.

NMSS found that the SHMA used in the Local Plan incorrectly adds extra homes to its basic demographic projection to
allow for improving affordability of housing, increased student numbers and economic growth. The report found that none
of these additions were justified based on the evidence presented within the SHMA. The report concluded amongst other
matters that:

· The affordability of housing in Guildford is no worse than in other Surrey districts and boosting supply beyond the
demographic OAN would not result in a noticeable improvement in affordability but simply in more people moving to the
area.

· There are reasons for believing that the SHMA’s estimate of the number of homes needed for students may be too high
and that an adequate provision for students is already included in the demographic OAN. The report advises that the
Council should commission a separate student housing need figure for Guildford given the distorting effect of students on
our overall OAN. It envisages that, once this exercise is undertaken, improved accuracy means the overall OAN would be
likely to reduce still further.

· The SHMA seeks to estimate the number of homes needed to support employment growth using employment rate
assumptions that are inconsistent with the employment forecasts. This produces misleading results. An analysis of the
Cambridge Econometrics and Oxford Economics forecasts using employment or economic activity rate assumptions
consistent with the forecasts suggests that in neither case is there a need to provide more housing than suggested by the
demographic analysis. Indeed, in both cases a smaller population growth (and hence fewer homes) could support the jobs
growth that is forecast.

A further independent report was procured in 2016 by the Campaign for the Protection of Rural England CPRE from
Richard Bate of Green Balance, an independent consultancy with expertise in demographic and housing matters to carry
out a review of the GL Hearn SHMA

The report by Green Balance runs to 37 pages and its findings are that the OAN for homes in Guildford should be reduced
from 693 per annum to 481 because:

1. the vacancy rate figures should be taken from local government annual records rather than from the 2011 Census. This
would reduce vacancy rates to 2.9% in Guildford.
2. there should be no increase for affordability above basic demographic change.

3. there should be no increase for Student housing and it was considered unrealistic that the University should be allowed to exert such substantial pressure on the domestic housing market.

4. the use of employment-led forecasts should be abandoned using purely household projections instead which are more reliable as a form of prediction.

Two completely independent expert reports are surprisingly consistent in their findings. In broad terms a figure of approximately 500 homes per annum would appear to be a correct estimate of OAN for Guildford. However, this is before constraints are applied to arrive at an acceptable housing target.

The SHMA is based on pre-Brexit projections for economic and population growth, including migration. These now need to be revised downwards.

It is unacceptable that demographic and economic model assumptions have been withheld by GBC and cannot be checked making the process unaccountable.

The figure of 13,860 new homes is unsubstantiated. It has not been scrutinised by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by commercial sub-contractor used in preparing the SHMA.

Both the National Planning Policy Framework and National Planning Policy Guidance provide a clear policy direction that the overall housing target should be reduced by a variety of constraints to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors. I have corrected this omission below. Infrastructure policies should be planned at the same time as Local Plans but in this case they have effectively been left out and are not sufficiently developed.

The Framework also makes clear that, once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan.

Unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development on a site within the Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )
The borough has many acres of surface car parking which, if replaced by multi-storey versions, and combined with current Brownfield sites, would free up enough land to build housing where it is wanted and needed and not on valuable Green Belt. There would be no need to build high-rise style development in Guildford town, which we don't support, but we do believe that buildings of 6-10 storeys (with underground parking) would be in keeping in some urban areas (where they don’t impinge on important vistas). [Some existing buildings already reach 5-7 levels in height].

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Question 2: Legal compliance

The Plan preparation process has had inadequate regard for national policy, which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

The report states that there are no pollution issues in Guildford. This is not true. The A3 end of the B3000 exceeds Eu regulations and this should be flagged in the 2015/16 air quality report which the Council has yet to publish.

I object

The 2015/2016 air quality management report has not yet been published and this will/should include an area at the A3 end of Compton, which exceeds the recommended max NO2 reading. One year results for NOx are 48.728 with high's of 68 using National bias adjustment.

Cllr Furniss indicated that the location of the test tubes may have made them invalid, but measurements show that they were positioned correctly and monitored for over a year by GBC environment officers, who have now added additional monitoring devices (See Annex 2 – Correspondence between Cllr Curtis and Cllr Furniss). This area qualifies as an air quality management area (AQMA) and it is disingenuous to omit this from the report or to use an old report on the basis that the 2015 report is not yet published, as the problem is known and recognised by the environment department within GBC.

The traffic survey shows increases in overall flow at the B3000 monitoring point, of values between 5.6% and 16.5%. This would severely impact flow, which is not in line with National Policy as further congestion would exacerbate the current air quality issues as the A3 end of the Street.

I do not believe that a regulation 19 consultation is appropriate. Whilst few changes have been made, additional sites have been included without opportunity for regulation 18-consultation input.
The video used and paid for by GBC and taxpayers is biased towards development, and hence raises questions over the validity and legality of such marketing campaigns. All the individuals featured in the video, with the exception of one nurse have previously spoken in the Council Chamber in favour of house building/building on Blackwell Farm; and there is not a single voice representing protection of the Countryside or outstanding landscapes.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Question 3: Soundness

I object

The plan is not so much positively prepared as avariciously prepared. I do not consider that it is reasonable to take on unmet need from neighbouring authorities, which have given greater protection to their Green Belt if it means our own is compromised on the scale being put forward.

I believe that constraints should be applied to the housing target, which we understand equates to the objectively assessed need (OAN) as no reasonable constraints have been applied. The constraints that could and should be applied are Greenbelt and considerable infrastructure issues. The solutions suggested to accommodate the inordinate levels of growth are both inadequate and costly and the net result will be serious debt for many years if not generations.

It was recommended by landscape consultant Alison Farmer Associates that the area known, as Blackwell Farm should be considered in the AONB boundary review, yet it was omitted in Surrey CC’s landscape evaluation. This meant the Parish Councils of Worplesdon, Compton and Wanborough had to fund an independent review to ascertain whether the area was a contender for AONB classification. The survey was carried out by in May 2016 by Land Management Services Ltd, which concluded that most of the 265 hectare farm was of a landscape and scenic quality that merited inclusion within Natural England’s revised Surrey Hills AONB boundary.

It raises serious question about the soundness of the evidence base when Surrey CC says that it only has to account for evidence submitted and not for that omitted? The area within the proposed development site at Blackwell Farm should now be considered by Surrey Hills as part of the AONB boundary review and land to the west should remain undeveloped, as it is important to the setting of the AONB.

The plan is not justified. Residents groups have suggested other strategies but these have not been tested or considered against the current trajectory, which has remained largely unchanged since day one.

Many aspects of the Plan were strongly objected to in 2014 and not only have these points been ignored, they have in fact been embellished or made worse. I refer to the points that GBC referred to in their own summary, which stated that most people objected to the scale of development and the harm to the Green Belt. At that time there were 4 strategic sites and now there are 5. At that time approx 50% of development was in Green Belt and now it is 66% with only 34% on previously developed sites. 58% of development is on just 5 sites.
A more realistic appraisal of the town centre with more multi-storey car park development and less retail would make way for a greater percentage of housing in the town centre, which is after all the most sustainable and sought after area. Additionally, greater pressure must be placed on the University to house more students at Manor Park in order to free up affordable rented accommodation in the town for key workers.

There is a conflict of interest when the developer (University) drags its feet over the provision of promised student accommodation (thereby putting pressure on the housing market) whilst at the same time seeking permission to build 1,800 new homes to help Guildford’s need? The University is at least five years behind with programme of building student residences and staff housing. It is widely agreed among residents groups that the University must fulfil all of its current building plans and substantially increase the proportion of students on campus. If the University built the outstanding units, the housing need would reduce substantially yet much of this is omitted from the outstanding permissions list?

GBC has approached development without applying constraints that are applicable such as Green Belt and infrastructure. It is wholly inappropriate to build a Plan without constraints when there is widespread opposition to this approach. Furthermore, there are serious doubts over the validity of the objectively assessed housing need. Housing need underpins the entire plan, and we are being asked to accept the figure of 693 on trust. Without an understanding of the methodology behind the OAN, the public cannot 'buy into' this figure, especially as it has been illustrated by two reputable professionals that there have been errors such as ‘double accounting’, which has resulted in uplift. Both consultants have concluded that a more accurate figure would be around 500 new homes pa and the most recent one, which was done in pre Brexit - June 2016 acknowledges that due to the high number of International students here in Guildford a student SHMA would better inform this plan. Both consultants feel that the current SHMA is flawed and that the OAN of 693 is too high. These reviews will be submitted by CPRE and the GRA and we support the findings of both.

Putting 58% of development on 5 sites, which are within the Green Belt, or largely within the Green Belt, is not consistent with national policy. The definition of ‘exceptional’ is forming an exception or rare instance; unusual; extraordinary. What possible exceptional circumstances can justify 3 sites of approx 2,000 each and two of 1000 each, on Greenbelt. This makes a mockery of the term ‘exceptional’?

The plan has a maximum number and a hefty buffer. It has underestimated windfalls and overestimated need. It is likely therefore that if one of the major sites fails to come through, the Plan could still succeed in terms of numbers, but would fail in terms of impact on infrastructure and reliance on aspirational, but distant 'yet to be discussed' schemes such as railway stations, making the plan undeliverable. If more people are not given the opportunity to live in Guildford town, the night time economy cannot grow and if the gamble to use 40% of the land for retail fails, shops will close and we will have created a leafy green ghost town, whilst the villages outside the town will have changed beyond all recognition as the impact of urban sprawl takes its toll.

The plan puts many eggs into 5 baskets with 58% of all development on just 5 sites. If these are not deliverable, the plan will fail. This strategy has been roundly criticised by Inspectors in other parts of the country.

Taking on such a high OAN without scrutinising it and then taking land out of Green Belt to fulfil it, and using developer funding to secure infrastructure (which reduces significantly the proportion of affordable housing delivered) is destructive and risky.

It is inconceivable that 5 sites between 1,100 and 2,000+ each can be built on Green Belt land without affecting the purposes of the Green Belt.

AONB should be given the highest protection. Despite being put forward for AONB review Blackwell Farm was omitted and an independent consultant had to be commissioned by local parish councils. The findings showed that the area met Natural England’s latest criteria for AONB and should not therefore be developed but should instead be properly recognised.

The proposal at Blackwell Farm has been reduced from 2100 to 1800 to take account the impact on future AONB or for views in and out of the existing and future AONB from public areas as determined by planning policy. It is feared that if this site were approved and if access could be made possible without causing serious problems to the surrounding road network, that the AONB in this location would undoubtedly be destroyed.
GBC argues that it is necessary to remove more than 1.6% of its 89% Green Belt and to remove more than 6% of its Green Belt from villages (by way of insetting) in order to meet its need, yet at the same time the Council advocates making an additional area Green Belt? The area of land being put forward for inclusion within the Green belt is on the same ridge as two areas of Green Belt it wishes to remove (Normandy & Blackwell Farm). This approach lacks consistency.

Cllrs Paul Spooner and Matt Furniss have stated clearly that there will be no development without supporting infrastructure and that the infrastructure must come before, or alongside, development. It is difficult to see how this will materialise as developers’ CIL contributions (which will fund infrastructure) are paid from profits made from the development. This statement appears to be unenforceable and could offer false reassurance to residents who may support the Plan on this basis.

Developers are being asked to fund large amounts of infrastructure. They will offset this against any agreement for affordable housing and it is highly possible that affordable housing will not be built or that only a small proportion will be built. This was one of the key drivers and is factored into the housing need, yet may not be delivered. Where is the general analysis to see what level of affordable housing might actually be delivered given the level of infrastructure needed to implement this level of development on new sites?

The omission of the Town Centre Master Plan (on the basis that this has different timescales) invalidates two key components of the Plan - the Infrastructure and Highways assessments. The suggested road closures in the town centre and the resulting re-routing of traffic should be factored into the highways assessment, but they are currently omitted. The consequences of this could render the whole Plan undeliverable and I don't believe the Plan can be approved without factoring in the Town Centre Master Plan.

GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA), which CPRE and GRA consider unsound. The methodology for the uplift and assumptions made have not been made available and thus the openness and transparency required for public understanding as outlined in the NPPF has not been adhered to.

I understand that Highways England will not start to consider its intentions as regards the A3 in the vicinity of Guildford until 2018. It is difficult to see how plans can be approved without the inclusion of this information.

Network Rail has not made available for the public consultation any plans for a new railway station at Merrow, nor have we been told where the station car park would be situated nor how the railway bridge between Merrow and Burpham would be re-constructed to take the additional traffic. Likewise, there are no detailed plans for the railway station at Park Barn and Network Rail has not confirmed the status of either. These schemes must have a sounder footing to be included in the Plan if they are to be used to justify large developments nearby.

The access to, and from, Blackwell Farm (via the A31) has not been thought through. There proposed new route will likely be used as a rat run to the A3/Guildford, but this will put pressure on a congestion hot spot, and result in increased traffic at the Compton turn-off and Down Lane (home to Watts Gallery). It is also recognised that congestion at the Tesco roundabout will be made worse and this area is already subject to considerable problems. Additional traffic via the business park from Blackwell Farm will add to congestion at the Egerton roundabout and impede access for emergency services to the hospital.

The proposal at Blackwell Farm has been reduced from 2100 to 1800 to take account of the AONB, but this does not account for views in and out of the AONB from public areas.

The greenbelt sensitivity study is not objective. The reference to Blackwell Farm as 'South West Guildford Urban' is totally misleading as it is unadulterated countryside that fulfills all the purposes of Green Belt. I consider this Study, which was the subject of much criticism in the last plan, to be flawed, yet it remains in this Plan. Why?

The damage caused to the Green Belt by the addition of Blackwell Farm would outweigh benefits gained from development, as there is ample space and lapsed planning permission on the existing Manor Park land for development for student accommodation, which would free up affordable rented accommodation in the town.

The proposal for Garlic Arch was added to the draft Local Plan without any consultation under Regulation 18.
No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Guildford citizens.

No land has been safeguarded for a tunnel, which would show a real intent.

This consultation included ‘significant changes’ according to GBC, although most residents would strongly dispute this. Some key reports were added and 6 weeks was not long enough to properly digest the information and impart this to residents. Many additional questions had to be asked and many points required clarification, which essentially meant adequate information, was not made available until two thirds of the way through the consultation.

The level of objection at the 2014 consultation was considerable - these objections have NOT been dealt with, but have been carried through to a regulation 19 consultation, undeterred. This is not in the spirit of Localism or the NPPF.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

**Question 4: Duty to cooperate**

Cooperation is a two-way street. Guildford objected to Waverley's plans for Dunsfold on the grounds of increased traffic and in the same submission referred to positive consideration of unfulfilled OAN. Guildford also refers to its duty to consider Woking's unfulfilled housing. Guildford does not have land to spare to assist Waverley or Woking without taking vast amounts of land out of Green/belt, which is protected by the NPPF. Greed is not 'an exceptional circumstance' and if both Woking and Waverley (and indeed London as it is the Metropolitan Green Belt) prefer to protect their Green Belt then the question must be asked as to why Guildford is happy to relinquish its Green Belt land, especially in the face of strong public opposition.

Many also question the choice of just Woking and Waverley as partners in the SHMA as there are considerable links with Aldershot and Farnborough in Rushmoor, which have very different needs and their inclusion could have provided a better balance.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Question 7: Any other comments?

Comment - Localism

The Plan is supposed to be informed by residents and by parish councils and residents' groups and their input used to formulate the Local Plan, not for it simply to be presented to them and objections and subsequent input ignored. Despite a great deal of effort from these groups and many like-minded responses, the Plan has not taken their concerns on board. The Plan has barely changed since day one and residents feel their views have been ignored and that the consultations have not been genuine. To add insult to injury, some of the key points raised have actually been exacerbated or made worse, such as the scale of development and harm to the Green Belt and issues over infrastructure.

The NPPF is open to interpretation, but it is our belief that GBC has chosen to interpret it in a way that lacks objectivity in an effort to appease developers in order to avoid costly court cases at a later stage. GBC has cited cases where development has been granted in an effort to justify this pro-development stance but has failed to balance this against the many sites where development has been refused.

To gain true public reaction, material presented has to be factual and unbiased and written without jargon and acronyms. This has not been the case. A degree of 'double speak' has led to absurdities such as 'affordable housing' which is over £300,000 i.e. ten times the average salary; 'safeguarding' which does not mean protection of land as most people would think, but rather potential future development and 'insetting' which means removal? It is recognised that these terms are not locally derived but all the same they are confusing for most of us.

Some Councillors have shown a lack of knowledge about environmental matters. Cllr. Gunning - webcast 24th May section 7 - 3:39

'About ancient woodlands, of course they are very attractive things, but they are ancient and trees don't last forever, so can we be practical about ancient woodlands and consider their value or their life, I should say, their life'
May 11th - Cllr Ellwood announced that he couldn't understand what all the fuss was about pollution as his Mother had lived (presumably unaffected by it) under the flight path at Heathrow?

Whilst people have been encouraged to take part in consultation, objectors have been subjected to name calling and public humiliation. There are too many examples to list and so I am listing the most recent. http://www.guildford-dragon.com/2016/07/10/letter-not-surprised-mr-patons-comparison/#comment-157440

The Local Plan has divided communities and highlighted weaknesses and alliances, which have resulted in a breakdown of trust between residents and those whose job it is to implement the Plan.

The Plan has been roundly criticized and objected to and yet it is presented to us once again. Many feel the consultations to date have been worthless and feel they have already made their points, which were ignored and will not therefore be making them again as they fail to see the point?

It simply is not possible to address infrastructure shortfalls by building in the hope that developers contributions will cover the costs as the level of development needed negates any benefits gained and in many cases, the situation is made worse.

Central government funding is needed to address current problems so that funding from development can be used to implement additional infrastructure needed to make new sites viable without damaging their surroundings. It must be accepted that geography and lack of previous investment leaves some areas with less opportunity to do this than others.

I object to the number of homes that the Plan intends to deliver as this will be unacceptable as our local schools are already over subscribed, it is already extremely difficult to get a doctors appointment now without any extra people coming to our village!

I object to the proposal in the local plan on the grounds that Send Hill is a single track country road and too narrow to provide sufficient access to the site or accommodate the potential new levels of traffic the proposed development would bring.

I object to the proposal in the local plan on the grounds that the existing road and parking infrastructure is already inadequate and would certainly be made worse with the planned development. The number of heavy lorries using Potters Lane is already a grave danger to the residents but nothing has been done to alleviate this problem and now the planners want to make the situation much worse by their proposals.

I object to the proposal in the local plan on the grounds that it would have serious and unwanted impact on the nature reserve nearby. The proposed site is a quality green belt amenity area within countryside and would be spoilt by development.

I object to Policy A42 change at Clockbarn in Tannery Lane because:

- The increase to 60 homes is totally unacceptable, especially as I felt 45 was too many
- It ignores all the previous objections raised by the local people
- It will seriously worsen access and already unacceptable traffic problems in Tannery Lane and at the A247 junction
- It will make erosion of the Green Belt in our village worse
- It will make surface water flooding a much more serious threat than it already is
- It will impact countryside views from the River Way Navigation and will greatly affect the wildlife

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
At the proposed site of Garlick's Arch, I object to Policy A43 for the following reasons:

- It ignores all the thousands of previous objections made by local people.
- There is no proven demand for Travelling Showpeople in this location, which would seriously affect the value of properties.
- It is beautiful permanent Green Belt and "no exceptional circumstances" exist.
- It will cause serious implications to the village and the number of proposed homes is excessive as our schools are already stretched to their capacity.
- It is exquisite ancient woodland that existed at the time of Elizabeth 1 so should always be preserved.
- It will join up Ripley and Send and defeat the key purpose of Green Belt.
- It is already subject to frequent flooding and is currently a flood zone 2 allocation.
- It is contaminated by lead shot accumulated over more than fifty years.
- It will generate excessive traffic that will block up the local roads of Send and Ripley which are already at an unacceptable level.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy A58 at Burnt Common because:-

It was deleted from the 2014 draft because of all the objections made previously

The word "minimum" is a change from the previous "maximum" in the 2016 plan and since then there has been a decline in demand for industrial land

There is definitely no need to build industrial or warehouse development in the middle of the Green Belt when both Slyfield and Guildford still have empty sites and industrial units

the 2017 Employment Land Need Assessment clearly shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt

The impact on small surrounding roads will create a serious and unacceptable traffic gridlock

It will join up existing villages and defeat the purpose of the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Green Belt, Policy 2 at paragraph 4.3.15.

I object to the proposal to inset Send Business Park from the Green Belt because:

It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation

There is highly restricted vehicular access along Tannery Lane in both directions

Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate and definitely unacceptable

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
