I am writing to object to the local plan for the Horsleys. My objections are as follows;

485 additional dwellings-How many extra residents will this mean? Another 1,500?

Added to the proposed development of Wisley airfield of another 2100 dwellings and around 8000? It appears this plan is to cram as many people as possible into this area, whilst destroying much of the environment.

If the Horsleys are taken out of the Green Belt, I feel it will lead to extra development in the future. Finally, the present infrastructure will not support this plan. The Medical Centre will be under severe pressure. The schools will be full to overflowing (as they are already). No shops in West Horsley (remaining shop due to close next month) leading to extra pressure on East Horsleys parking for shops and station. The roads. Which are for the most part country lanes, will be horrendous, with traffic. The drainage system will be unable to cope. There will be tremendous impact on the wild life. I do not object to a reasonable number of new affordable homes in the Horsleys, as I realise there is a need for them, but this local plan does not take into account the cost to the environment, or to the taxpayers.

What changes (2016)/ further amendments (2017) do you suggest should be made to the document?

Attached documents:
Having attended my local meetings to review the updated plans for the expansion of the available housing stock in the Horsleys I have some serious reservations.

The housing density per allocated plot in no way reflects the current density per area in West Horsley. How can this be considered a balanced approach? If using the formula for housing expansion that would normally be applied to a town means that the intention is really to turn the Horsleys into a small town then please come clean about the intended outcome.

Some of us that have left towns to find the joys of living in a village community will have to accept the fact we are being driven out to find ourselves another village to live in until the dreaded developers arrive on our doorsteps again in the future.

Mentioning the greenbelt seems of little point either.

Throwing the "lungs of London" away doesn't seem of any concern to anyone with their greedy hands in the housing money pot. Schooling and Doctors places will need expansion. This is very "undefined" as a strategy at present. As for the removal of all of the extra human waste, both bodily and refuse, this seems to be far off in the distance with all of the focus just on "Build, Build, Build". Has anyone done a risk analysis, forecast projection, or even a plan???

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Thatchers Hotel and Horsley Towers:

I am disappointed to see this development proposal. There are very limited places to walk for Drinks and Casual Meals and this will remove a necessary scenic retreat leaving only one Pub.

Heavy Rain last year demonstrated drainage and flooding problems along roads slanting down into the Village. Further remedial action is needed before exacerbating the problem with this elevated site development.

I see no reference to Travellers Pitches in the Village so understand that this original proposal has been withdrawn as not in character with the Village (previous reference to former BT site).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Wisley Airfield:

This large housing development will clearly overwhelm parking at Horsley and Effingham Rail Stations and Village Car Park, swamp narrow local roads and lanes, cause blockages, rat runs and potential accidents.

I am concerned that it will cut off current footbridge access over the A3 to Wisley RHS.

Effingham Junction needs to expand Parking and have Wisley residents directed to join there instead of Horsley, by Bus or otherwise.

I think the Train Service is not sufficiently frequent with enough Coaches to accommodate the large influx proposed. Overcrowding would arise long before other Surrey Stations board towards London. The service into Guildford is less busy than into London (except on evening commuter return from London at Waterloo).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3) Wisley Airfield:

> This large housing development will clearly overwhelm parking at Horsley and Effingham Rail Stations and Village Car Park, swamp narrow local roads and lanes, cause blockages, rat runs and potential accidents.

> I am concerned that it will cut off current footbridge access over the A3 to Wisley RHS.

> Effingham Junction needs to expand Parking and have Wisley residents directed to join there instead of Horsley, by Bus or otherwise.

> I think the Train Service is not sufficiently frequent with enough Coaches to accommodate the large influx proposed. Overcrowding would arise long before other Surrey Stations board towards London. The service into Guildford is less busy than into London (except on evening commuter return from London at Waterloo).

> 4) It is not clear what design of infill housing is proposed. East Horsley has uniquely varied quality housing, and standard block builds would detract from this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Strategic Housing Market Assessment {SHMA) gives a housing need of 693 houses per year {four years ago the figure was around half that). In contrast a report commissioned by Guildford Residents’ Association {GRA) assesses 510 homes needed per year. GBC figures calculations have been withheld from any disclosure . Query on the soundness of figures.

The overall assessment of housing needs in Guildford Borough during the Plan period is some 13,860 houses (Policy S2) with a very large part of that proposed to be in the north sector of the Borough. Query on the higher impact on 'selected' areas of the Borough.
The proposals seem to be whittling away any gaps that currently exist between the recognised parts of the Borough and the outlying villages including current 'Green Belt' land without giving justifiable or exceptional reasons for using 'Green Belt' land as opposed to 'Brownfield' land in the Town Centre or periphery. Query on using 'Green Belt' rather than 'Brownfield' land for developments.

GBC is proposing significantly higher housing needs than are the neighbouring Boroughs of Waverley or Woking without any explanation or justification. Query on why Guildford should take the higher share of developments in the area?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3241  Respondent: 10860865 / John Wright  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Document was made available, without much real publicity, to 'The General Public' who are only allowed an extremely short time to look at the Document; digest the contents; try to understand the contents; compile a list of comments; prepare that list into a letter or email; send such letter or email to GBC before the final date for receipt of any objections.

The Document is presented in a very user unfriendly manner - people cannot readily find what sections are applicable to them; there are often several sections with seemingly unmatched information; very little proper cross referencing; it seems to be presented in a manner with the prime intention of bamboozling any member of 'The General Public' who dares to look at it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1678  Respondent: 10860993 / Peter and Fiona Armitage  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
In general terms I have grave concerns over the sheer scale of the proposed building development which is substantially in excess of all accepted population growth estimates for the Borough. Why so many when you have failed to demonstrate that they are required on this scale? I object to the plan on these grounds alone.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3848  Respondent: 10860993 / Peter and Fiona Armitage  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed number of houses suggested for East Horsley. It seems that you are trying to turn a small rural village into a town. There appears to be no consideration for the infrastructure required. Horsley is already at saturation point with regard to its local school, medical centre and roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1679  Respondent: 10860993 / Peter and Fiona Armitage  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In more specific terms I object strongly to the proposed development of 533 houses on six sites in the Horsleys. East Horsley is an attractive independent rural village and not an extended suburb of the South West area of London. It must remain that way. As before, you are very light on the increased infrastructure that will be needed to accommodate

1) an additional 700 cars on narrow poorly maintained roads, some without pavements
2) an additional 150+ children in local primary schools that are absolutely full already
3) an additional 3000 people for medical care when the local Medical Centre is full already.

Where is the thought through strategy taking into account the interests of the existing residents of the area who you are meant to represent?
You also ignore the adjacent East Horsley Conservation Area when you propose the development at Thatchers Hotel. I object to this and the other development proposals in the Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/3228  Respondent: 10860993 / Peter and Fiona Armitage  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I also object strongly to the proposals to build 2000 houses on the former Wisley Airfield as this is part of an existing designated green belt area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/7206  Respondent: 10860993 / Peter and Fiona Armitage  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the development of Wisley Airfield. The application to build on this site is totally excessive. Again there is no infrastructure to support this development. The village of Ockham would be destroyed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/7093  Respondent: 10860993 / Peter and Fiona Armitage  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
The Surrey Hills are an Area of Outstanding Natural Beauty and you state clearly that you will continue to protect the Metropolitan Green Belt and yet the majority of this excessive development proposed is on green belt. How can you possibly reconcile these two conflicting issues? There is a certain lack of honesty here. I object to the plan on these grounds as well.

Answer (if comment is on questions 1-7 of the questionnaire): ()

You received a substantial level of objections to your previous proposed plan in 2014 and yet this relaunch is fundamentally broadly similar to your previous plan suggesting that little has been learnt from the previous exercise or that GBC is not really listening to the expressed views and wishes of its rates paying residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
In conclusion I know residents are frustrated by having to write in objection on more than one occasion in response to "new" proposals that are not very different to the previous proposals - a sure sign that GBC is either failing to learn from residents or even worse not really listening to their views.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The village's are at full capacity at the moment and the original Infrastructure road's car park,s drainage school,s and medical facilities will not be able to cope with proposed expansion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/13527  Respondent: 10861089 / Philip Homewood  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I strongly object to the GBC local plan on the following point,s There is no good reason to remove the Horsley,s from the Green Belt.
No Green Belt land should be released for development around the Horsley,s or Ockham Wisley Airfield as to do this would lead to a breakdown of this rural area of Surrey in the future.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/2401  Respondent: 10861217 / Lesley Mantell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

policy A42.. My home overlooks the proposed site in Tannery lane and I object strongly to 60 new homes up from 45.
The infastructure ( sewage, schools, doctors ) will not take the additional homes, this is absolute madness and you have totally disregarded any comments I have made.
We already flood in some parts of the village and additional building will make it worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/2448  Respondent: 10861217 / Lesley Mantell  Agent:
I object to Policy A42

Because the original plan of 45 homes in itself is far too many but to now increase to 60 is far beyond the village and the the road and traffic problems it will create to even contemplate.

I fear for the safety of the local children and the hundreds more that will be joining them. The area can be prone to flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I am Objecting because 400 homes and 6 travellers sites is complete overkill and will join Send Marsh and Ripley together.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to Policy A43

I object to Policy A58

I object to Policy A62
Policy A58 will add to Send’s woes by more heavy vehicles blocking and damaging the roads and making it mire unsafe for our children and more importantly their health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2447  Respondent: 10861217 / Lesley Mantell  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58

Because there are sites that are empty at Slyfield and Guildford. I cannot believe that suggestions to use green belt land when brown field sites are up and running.

The amount of heavy traffic using Send as a cut through to and from Woking is diabolical and to add to this nightmare would be a disgrace.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/800  Respondent: 10861217 / Lesley Mantell  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy 2 at paragraph 4.3.17 Green Belt. I object also to inset Send Business Park from the green belt because Tannery lane is narrow and completely unsuitable for lorry access with many near missed collisions with cars, lorries and cyclists for gods sake this is a small village, what is it going to take someone to die !!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/856  Respondent: 10861217 / Lesley Mantell  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2
I object to Policy 2 at paragraph 4.3.15

Because in conjunction with the above policy Tannery Lane and the junction on to Send Rd will become a major accident zone. the lane is far to narrow for large vehicles and the added pressure of more vehicles from the the planned 60 homes on the nursery site at that junction will I feel eventually end with a fatality at some point.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
We do not have the Transport infrastructure to accommodate 1800 extra houses on the Blackwell Farm site. At peak times the area around the University/Hospital/A3 is totally congested and the A31 is often gridlocked for miles towards Farnham. As people try to access other routes towards this area, the main road through Wood Street Village can get totally congested. I strongly object to the development at Blackwell Farm taking place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Respondent:** 10861441 / Peter Read  
**Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I feel that more investigation in finding small scale developments in this village and others in the surrounding area us the use of brown field sites would make unnecessary such a large scale development with all its attendant damage to the rural life and its residents.

* I am led to believe by Surrey Council Traffic simulations, that the roads serving this village are judged to be above their designed capacity.

  Dangerous junctions at Glaziers tt Westwood Lanes with Aldershot Road A323

  Steep, winding road from Wanborough Hill to junct on with Aldershot road which also has a very narrow one-vehicle bridge

  init. This road and others are used heavily during peak times and during A3 tt A31 closures.

  Hump bridge in Glaziers Lane with dangerous blind station entrance.

  90 degree sharp bend at Glaziers Lane and Flexford Lane junction. These are minor lanes, tree-lined in many places with inconsistent footpaths.

  The station has only a half hour service, a very small car parking area, is unmanned and has no disabled access to Guildford trains. The station car parking is already causing long term parkingin the residential roads nearby.

  Medical centre is inadequate for proposed development

If the proposed plan were to be carried out, all or most of these infrastructure points would have to be addressed at considerable cost and upheaval. Even then the character and lfe of the village would be destroyed making it for all intents and purposes a small town.
• I had been assured that the Green Belt status of this site was safe guarded and no Exceptional Circumstance had been

• With more selective planning a school of the proposed size would not be needed here.
• I fear this plan will do permanent damage to the wildlife and green areas that surround us.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I SUPPORT the removal of the site A47 - 50 Homes

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1623  Respondent: 10861441 / Peter Read  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2
I OBJECT to the removal from the Green Belt of homes in Guildford Road, northern end of Glaziers Lane, Flexford, Walden Cottages & Palm House Nurseries traveller site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1854  Respondent: 10861569 / Christine Read  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Response to the Guildford Borough Council Local Plan for Development in Normandy Parish.

I OBJECT to the proposed 146 plan on the following basis.

* the plan is on such a huge scale that it is insensitive to the needs and requirements of this rural area and its residents. Although it is appreciated that more housing is required this plan will totally destroy our neighbourhood.

*insufficient investigation in providing smaller scale developments in this and all other surrounding developed areas and brown field sites.

*the road infrastructure of this area is already stressed at peak times and in its present form it could not support any increase. The level of traffic on our roads has I understand, been judged as above the capacity for which they were designed (see Surrey County traffic simulations).

Dangerous hump bridge and bend in Glaziers Lane

Single Vehicle arch bridge in Westwood Lane

Both of these are minor country lanes not major roads.

Dangerous entrance to station.

Insufficient station car parking

Station inadequate - no disabled access to Guildford platform.

Infrequent train service

Insufficient footpaths on both Glaziers and Westwood Lanes
Difficult exit to and from both Glaziers & Westwood Lanes to Aldershot Road (A323).

Medical centre too small for proposed development

Winding access road from Wanborough Hill which is heavily used as an escape route from A31 & A3 during peak periods and road closures.

ALL the above points need to be improved or rectified prior to building the proposed development. It is understood that no funding has been confirmed for this work.

*large scale building on the existing Green Belt is unacceptable and no 'Exceptional Circumstances' have been demonstrated. It is only the plan to build this huge development that makes a new school necessary in this area. It could be sited where there is an existing requirement and suitable infrastructure.

*Insufficient care, planning and consideration for the protection of wildlife and the unique special green spaces in this area.

*confusing applications to various committees resulting in inadequate consultation of residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

• disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Even if the huge number of houses to be built can be justified, the local community will not benefit. There is no clear requirement for affordable housing - GBC apply an 80% of market value rule to define affordable, which is obviously laughable, while the Local Plan seems to suggest that any developer can simply choose not to build affordable housing.

This means houses are built for investment by wealthy individuals and businesses, failing to deliver any community benefits.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The building of thousands of homes on Green Belt is further destruction of the claim that the plan "protects our most important countryside, landscapes and heritage". The NPPF requires that any development on Green Belt has support of local residents, but GBC are utterly incapable of proving that.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to register my objection to the Guildford Local Plan. While there are positive elements, it includes a number of fundamental flaws to the strategy and implementation of the plan that makes it completely unsound and not fit for purpose. Should it be implemented in its current form, it would constitute a complete dereliction of the duty of Guildford Borough Council (GBC) to the community.

GBC are unable to demonstrate that the Local Plan has any significant popular support. The previous, failed and rejected effort attracted many more complaints than supporting messages, and GBC have made minimal attempt at community engagement. Basic publicity and events have kept it low profile, meaning many people have either not heard of it or don't know much about it. While GBC may claim otherwise, any cursory view on the communications strategy is damning and seems to show a clear attempt to minimise any potential feedback. The fact the documentation is so long, written in complex language and hard to read formatting adds to the difficult in responding.

Further, the plan documentation and process has built on that approach. Incredibly long documents, poor formatting, hard to read font and a difficult response process has been designed it to make it hard to provide constructive feedback. GBC have an established process for ensuring that it is easy to reject negative feedback on planning matters, and the Local Plan is a clear continuation of that.
The stunning lack of strategic planning is painful. At its most basic, any plan of this scale must include essential infrastructure improvements. And yet GBC plan to allow the start of building of thousands of houses at Gosden Hill before the planning for the proposed A3 tunnel...which would start at the same place. With no upgrade in roads (or clearly impossible developments, such as Sustainable Movement Corridor through Burpham), the tunnel becomes essential for the future of Guildford, and to avoid Burpham becoming a car park. Yet the plan hopes to start building, before a decision has been reached on the tunnel. In any commercial enterprise, such a staggering lack of forethought would result in instant rejection. The same criteria should be applied here.

The previous Draft Local Plan was delayed and re-written, yet nothing has changed sufficiently to change that decision.

A number of other local bodies, including the Burpham Community Association, Burpham Neighbourhood Forum and Guildford Residents Association will all submit their objections with significant technical details and research that condemns the plans, so I will not duplicate those efforts.

However, the plan is so transparently flawed in serious ways that are fundamental, meaning it should be rejected.

I OBJECT TO the lack of consideration to the amount of traffic this will create – Ripley already has more than it can cope with being grid locked at rush hours already.

I OBJECT TO the amount of pollution the concentration of traffic in a small area will create.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There is too much development in Wisley (A35) Ripley/Send (A43) and Clandon (A25). The plan is unbalanced with over 5,000 houses proposed between M25 and Burpham, which will merge all the villages and their identities. This is unfair and unreasonable

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/668  Respondent: 10863969 / Joanne Rooke  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to strongly object to the proposed development at the Garlick's Arch site. I object for the following reasons:
- the proposed housing would be on Greenbelt Land
- the potential increase from 400 houses at site A43 Garlicks Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.
- the inclusion of 6 Travelling Showpeople plots with associated storage facilities is entirely inappropriate in a rural environment within the Greenbelt and there is no identified need within the Local Plan documentation. The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan and so is out of scale with the proposed development.

- the potential for a substantial increase in industrial floorspace from 7000 sq m to an unspecified amount at the site A58 Burnt Common does not provide local residents with enough information for a full and proper consultation given the ambiguity and lack of detail within the document.

- the potential for a Waste Management Facility at site A58 Burnt Common as briefly mentioned in policy 4.4.23a does not allow for full and proper consultation.

- the increase in housing numbers from 45 to 60 at Site A42 in Tannery Lane will have a significant impact on the already highly congested local rural road network around and within Ripley.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I hope these objections will be fully considered and in particular the former Wisley Airfield is removed from the Local Plan.

I object to the proposed development at Garlick's Arch because an additional 400 plus homes together with the proposed industrial site would create huge repercussions to the local environment and community. The local roads are already overcrowded, particularly at peak time in the morning and evenings. Additionally, local health care and schooling is unable to accommodate an influx of people on this scale.

I object to the proposed new 4 way on/off ramp to A3 at Burnt Common. I am a regular user of the road through West Clandon and there is already a serious problem with heavy goods vehicles and buses/coaches using the road. The proposed new junctions would create even more commercial traffic accessing the A3. I am particularly concerned about the danger to children and parents delivering and collecting from Clandon School. At times, heavy vehicles can only proceed by mounting the pavement!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

After reading through the Guildford Plan proposals my objections to this are based on the fact that without the protection of the existing green belt area, once the first section of land is built on there will be no protection left for the complete infill of the remaining area. This will turn Horley villages in to an urban zone with the resulting damage to both the natural environment and quality of life for the existing residents. The pressure from the increase in the local population will also have serious knock on effects on the nearby North Downs area which is classified as an area of outstanding natural beauty. One section of this AONB is the Sheepleas which is already suffering from an exponentially increasing number of visitors due to its proximity to the existing village. To turn this area in to what will be essentially a large town will cause huge pressure on the environment leading to a decline in quality of life for all people in the area including the newcomers and the destruction of its many rare and varied species of wildlife.

The effect on the existing roads and infrastructure has not been taken in to proper consideration. The roads in this area are in a disgraceful condition due to lack of investment both from local and national government. In years when there is little rain this area gets very short of water and suffers hosepipe bans and although some of the water is supplied from boreholes in the North Downs supplementing them with abstraction from the local rivers would be difficult without the risk of them drying up completely in drought conditions. This country still has a duty to take into full account all of these problems...
before rushing into a reckless decision to build houses in unsuitable areas such as Horsley and the surrounding villages. The local roads such as the A3 and A246 which are the main roads used by commuters to their places of employment, and schools for their children are already overloaded or become gridlocked in rush hour and this will only become much worse if these proposals go ahead.

Whilst it is acknowledged that the South East of England is a desirable place to reside due to its proximity to the Capital. It is unsustainable in the short term to even consider building huge numbers of houses in this area. Housing and jobs are required in other parts of the country which have high levels of poverty, social deprivation and unemployment. The South East in general is exhausting its supplies of natural resources such as the supply of sustainable drinking water due to over abstraction and adding to this problem would be very unadvisable. The local sewerage works are already close to capacity and the problems arising from untreated effluent entering the rivers during flood conditions would have a serious effect on the ecology of the local rivers and streams. This problem was serious on the river Wey catchment during the late 1970s when it became much polluted with raw untreated sewage. We will be destined to repeat this if we increase the number of houses to the levels proposed in this ill thought out plan. The local council need to reconsider the whole of these proposals as they could cause irreparable harm to the whole area which would be impossible to overcome once the damage is done. It is recognised by the majority of right thinking people that sometimes limited infill is necessary in order to provide a few houses for local residents to stay in the local area if they have family connections, but this proposal will destroy the whole fabric of the local community and destroy the villages in this area forever.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Infrastructure Policy I1, I2 and 13 because they are inadequate to the needs of housing expansion in the Horsleys. The local lanes are narrow and winding, poorly drained and lit with narrow or no pavements. Ockham Road North and South is too narrow for the ever increasing number of enormous trucks using it and has the constraint of the narrow, arched railway bridge that regularly suffers vehicle strikes. The Medical Centre runs to capacity and so do local schools. The station car parks are full every day.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Policy P2 Para 4.3.13 proposes that East Horsley be inset from the Green Belt. I object to this. East Horsley is a rural village with narrow, winding, tree-lined lanes. Houses are mostly detached with large gardens. Its character has been preserved in the Green Belt without preventing new housing being built (149 new homes in the village between 2000 and 2015).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposals in Policy P2 para 4.3.16 to change the settlement boundaries of East and West Horsley. I object to Policy A39 which proposes to remove five hectares of land from the Green Belt by moving the settlement boundary from its natural course along the deep ditch behind the houses on the west side of Ockham Road North to the eastern boundary of Lollesworth Wood.

I object to the settlement boundary being moved to take Kingston Meadows out of the Green Belt. This open space is the chief recreation space for the Horsleys, used daily for sports, walking, training and socialising and regularly for big community events like the recent Queen's Birthday Party. It is integral to the physical and social wellbeing of the area and must stay available to the community.

I object to Infrastructure Policy I2 and 13 because they are inadequate to the needs of housing expansion in the Horsleys. The local lanes are narrow and winding, poorly drained and lit with narrow or no pavements. Ockham Road North and South is too narrow for the ever increasing number of enormous trucks using it and has the constraint of the narrow, arched railway bridge that regularly suffers vehicle strikes. The Medical Centre runs to capacity and so do local schools. The station car parks are full every day.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I believe that the Draft Local Plan is built on an inaccurate assumption of the number of homes required. The SHMA has arrived at the number 693 without the methodology being made transparent. Recent work by Councillor David Reeve and another independent source has found serious fault with the SHMA which throws in doubt the whole draft local plan's calculations. I believe that GBC has gone along with the very large number because it is bent on its own aggressive policy of civic and economic expansion, which is not supported by the majority of the electorate. Therefore, I object to Policy S2.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

My objection is to any building in the village of Send due to the present population and lack of further facilities to cover more residents. I object to Send Hill being built upon due to the fact that the A247 is extremely busy several times a day, as is Potters Lane. Further traffic would have to come through Send from the A25, A3, Burpham, Wisley. Traffic outside the school will cause an accident. The doctors’ surgery will be unable to manage with more patients (bear in mind that the Ripley surgery was closed some years ago). Please register this as an objection.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/21  Respondent: 10864481 / Claire Bright  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
This is an objection to building in the area of the village of Send. We are a village that has grown during the past 3 years to the state where traffic through the village can be unpleasant, the doctors’ surgery is more than busy and the A247 is regarded as a through road from the A3. Potters Lane is no longer a quiet lane due to the amount of traffic passing through taking a short cut from the A3. Tannery Lane is a small road and turning on to the A247 from there is dangerous.

Any further building (on land which I believe is protected) should not be permitted. Green belt land was called that for a reason and must not become brown belt. Send has grown to its capacity and must not be increased.

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. **I OBJECT** to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

---

1. **I OBJECT** to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/779  Respondent: 10865537 / Edwina Fassom  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).
The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.
This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

1. **I OBJECT** to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. **I OBJECT** to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment / “Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

Answer (if comment is on questions 1-7 of the questionnaire): ()

<table>
<thead>
<tr>
<th>1.</th>
<th>I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions. The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated. I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London. Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back. Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.</th>

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

| 1. | POLICY H3 – Rural Exception Homes I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions. |
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
1. I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not adress Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1597  Respondent: 10865537 / Edwina Fassom  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including
Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1598  Respondent: 10865537 / Edwina Fassom  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Borough Wide Strategy (Policy S2)

a. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

b. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

c. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any commonsense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared
with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green. Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4672  Respondent: 10865537 / Edwina Fassom  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding...
is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved in order to improve capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site
will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4673  Respondent: 10865537 / Edwina Fassom  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/3114  Respondent: 10865537 / Edwina Fassom  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Ripley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I strongly object to the above Plan. I live in the beautiful village of Ripley and have done for the past 12 years and I love it. This Plan will destroy the village and really affect my life.

I strongly object to the erosion of the green belt - I chose to live in Ripley because of the Green Belt it is in and the views and country life I enjoy.

I strongly object to the removal of Ripley from Green Belt.

I strongly object to the disproportionate amount of houses in one area of Guildford Borough - It’s a disgrace.

I strongly object to the very short consultation period especially as it’s during the Holiday period. The inclusion of new sites with less than 2 weeks notice is also a disgrace.

I have not seen any evidence for the alleged need for this incredible amount of houses you are proposing.

I strongly object to the lack of any new schools and there is a lack of spaces as it is - very ill thought through….

I strongly object to the lack of any new GP Practices - it’s hard enough as it is to get an appointment at the moment.

I hope you will consider my points objectively and hope that you will make a better informed decision and consider many factors along with quality of life and pollution and nature as well.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
1. I OBJECT to the proposal to build 45 houses at Clockbarn Nursery because of the potential traffic volume in a narrow twisty lane which is already subject to planning permission for 64 apartments at the Tannery and a Marina. The junction with the A247 is already dangerous and the lane cannot take more traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to the proposed building of 400 houses and 7000 square metres of industrial space at Garlick's Arch.

Guildford's housing requirements have been shown to be exaggerated as has the need for industrial space. The latter, if required, should be at Slyfield. The Garlick's Arch site is prone to flooding and includes ancient woodland. Development on such a large scale would be grossly disproportionate and local services and road networks would be unable to sustain it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I OBJECT to the development of 40 houses and two travellers, pitches at Send Hill, because I am concerned that the subsoil on that site contains documented unsafe landfill waste registered at GBC. This site (A44) was originally a sand pit not a quarry and was subsequently marked on Ordnance Survey map 1971 as a "refuse tip". I therefore fear that any disturbance would be a health hazard due to unknown infill materials and would also endanger the nearby nature reserve. There is also an identified risk of flooding to local properties of which mine is one.

Comment ID: PSLPP16/4701  Respondent: 10865889 / Dreda M Todd DBO  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to Send and Ripley villages being removed from the Green Belt. The National Planning Policy Framework required the Green Belt to be permanent. There are no special circumstances to justify abandoning it, in fact this reneges on the election promises of local and central government to protect the Green Belt. If Send and Ripley are removed from the Green Belt there will be nothing to stop Woking and Guildford becoming one sprawling conurbation, destroying for ever this beautiful and essential "lung" outside the M25.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

6.1 OBJECT to the enormous and disproportionate volume of proposed development in this small area of Guildford Borough, which will impact negatively on local roads, services and air quality, reducing the quality of life considerably.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/837  Respondent: 10865889 / Dreda M Todd DBO  Agent:  

1. I OBJECT that GBC have not followed the correct procedure.

Since 2014 GBC has changed every major site in Send proposed for development. The 2014 proposal for 430 houses went down in April 2016 to 185 and has just gone up again to 485. These significant changes require another full consultation under Regulation 18, not the short cut of Regulation 19 which GBC are trying to get away with. This invalidates the whole process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
environment. The alternative area also almost self-contained [ unlike around Normandy where there are no shops or anything! It is a truly rural area].

Also having examined your draft local plan for our area in Normandy and surroundings, the following points need to be addressed:

1- The intended expansion as advanced by your office in a green area such as Normandy and its surroundings will mean the removal of some of the green belt for Guildford and nearby towns and villages and it is neither legal nor acceptable;
2- The subject planning will increase the traffic loads on already congested roads, especially in peak times when to exist Glaziers lane can take up to 5 minutes due to the queues at the T junction with A323;
3- The roads in Normandy are already under strain and will not be able to cope with the new expected traffic load from so many houses;
4- The facilities in Normandy are already minimal for children so increasing the numbers means there will be no facilities available most of the time;
5- The surgery in Normandy is already being shared with another village and is at breaking point as it is not easy to get a doctor's appointment for a few weeks now so what will happen when all these houses are populated;
6- The school will also be unavailable to new children as there are very few places as it stands;
7- The air quality will deteriorate as a result of the increase traffic loads on the village roads;
8- In my opinion there are no exceptional circumstances which the Guildford planning office can use to infringe on the green belt;
9- Our Sewage and Electricity Services are already strained and we suffer from frequent electricity cuts so what will happen when the number of residents increases by such numbers!
10- Glaziers Lane presently is used by heavy goods vehicles and as a rat run to and from the A323 and the Hogs Back, damaging an already heavily used road. So what will happen when the number of cars and heavy vehicles increases as a result of the planned housing expansion?
11- Also please keep in mind, building so many houses on these green fields will subject our area and homes to flooding and we had some flooding last year!
12- The area has no post office, pub, petrol station, police outpost etc. How can you propose to increase the population without considering the effect on the locals who already pay very high local taxes.

Finally please remember this is a residential area with very limited resources to offer newcomers! Your plans will overstretch those few services already available to beyond breaking point.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to object to the proposal under the local plan to remove the Horsleys from the green belt.

This would be totally unsuitable and a dangerous precedent. If it were to be agreed, I can foresee you or your successors in 10 years time being pressured to take further sites out of the green belt and then more still until eventually only a few pockets would be left. Future generations would be faced with the worst urban sprawl that the post-war planners had tried their utmost to prevent.

I also object to any proposal to build hundreds of new houses in east and (particularly) West Horsley. The problem is the infrastructure. The doctors surgery can take few, if any, new patients and the school have barely enough places for the existing children in the area. Any proposal for new houses running into hundreds must include new medical facilities and new or enlarged schools.

There is also the problem from heavier traffic on our narrow, often winding, and already hazard-strewn roads, which serve the villages. In addition, parking will become an increased problem with hundreds of new people in West Horsley coming into East Horsley for shops, station, etc. This will all make life far from ideal for the newcomers and lasting residents alike. Please do not allow developers to proceed with these proposals as they currently stand.

</table>
We have lived in Normandy for 25 years and like the rural rambling nature of the village. We appreciate the rural atmosphere and the green spaces with close proximity to a wonderful town, Guildford. It is a thriving community with many social activities and clubs. Normandy is situated between Guildford, Farnham and Aldershot and building a significant number of houses in Normandy would mean that the 3 towns would begin to merge into one large metropolis (Guildhamshot?!). We did not move here to live in a new town with 1,100 new houses to be built. Surely brown sites should be considered first?

From the ridge of Ash ranges (SSI) looking South there is a fantastic view of the Hogs back (very famous landmark) with Guildford cathedral just visible to the South East. The view is primarily green, mainly trees and fields with very few houses visible. Building 1,100 house between Wyke and Christmas pie would destroy this view and have a detrimental effect on those who get pleasure walking/riding on the ranges.

We think that as a matter of principle, green belt should remain green belt. To us, having been told by councillors that our new policy is to protect the green belt, we have been led into thinking that Normandy is safe from development. However, we are now told that this no longer applies if a Secondary school is built. Where did the need for a Secondary school come from? From what I am told and presumably you can check this out, there is no need for a secondary school in Normandy as existing schools in the surrounding areas, such as Ash Manor, are not full. It seems to us that a Secondary school is only being proposed as a means of building houses - to us this does not seem right.

The traffic around Normandy has increased considerably since we have moved here and the number of traffic accidents seems to have risen significantly. Trying to get out of my drive (on the Pirbright Road) can be difficult at times (we sometimes even question whether traffic lights are appropriate for our drive). With the proposed new houses, the situation will only get worse and in my mind could lead to even more safety issues.

We hope you will not approve building 1,100 houses on Green Belt when there is no justification for it, especially when there are brown sites that are not being considered first.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Re:- Guildford Local Plan 2016

Consultation under Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012

"The borough of Guildford is a very special, beautiful place for all who live and work here. We want to keep it this way for generations to come."

This is your opening statement in the Local Plan 2016 and then you go on to describe your proposal to ruin one of the most special and beautiful places in the borough with proposals which will ensure the character and peace of the area irreversibly destroyed for ever.

With reference to the proposed plans to develop the Horsleys I wish to record my serious objections as follows:-

- The proposed developments are in established ‘Green Belt’ land. The status of ‘Green Belt’ is vitally important to the local communities, is jealously regarded by those who do not have it and should be retained at all costs for the sake of the future of the borough and the environment.
- The proposals pose a detrimental and irreversible threat to the quality of the district and local environment.
- The roads in the adjoining areas of Ripley, Ockham and the Horsleys struggle even now to cope with the demands placed upon them and are quite unsuitable to carry the considerable amount of additional traffic required to construct the developments and service them in use.
- The single track access to so some sites (e.g. site A40) is wholly unsatisfactory and the significant infrastructure changes all around the district required to facilitate the developments are not proposed with consequential damage to the local amenities, undesirable levels of noise, pollution and nuisance.
- Neither too is it proposed to enhance all the other infrastructures necessary to support a significant increase in the local population (e.g. public transport, shopping, schools, medical services and utilities).
- The extent of developments proposed (notably in the Horsleys and surrounding areas) is significantly and disproportionately higher than other areas in the borough; it is also planned for these to be at a very much higher level of density than the locality presently supports which will place an unsustainable burden on the local community.
- The proposals lie near an area of great beauty, and near sites of ‘Interest for Nature Conservation’ and a site of ‘Special Scientific Interest’
- The proposals will detrimentally and irreversibly affect the rural character of the local areas of Wisley, Ripley, Send, Ockham and the Horsleys.
- The damage to the amenity presently enjoyed by visitors and the local community for walking and rambling, cycling, horse riding and general enjoyment of the natural charm of the area will have an adverse effect on the economy of the area.

I trust these matters will be given the most serious consideration before these wholly unpalatable and undesirable proposals go any further and that they are recognised for the considerable social and environmental threat that they pose. I ask that they be rejected as totally unsatisfactory.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to strongly object to the proposal to build residential properties at the Thatchers hotel site, the Ockham Road North
and South sites and Manor Farm /East Lane West Horsley. East and West Horsley are lovely small villages but with limited
infrastructure. Shops Schools medical facilities are already overwhelmed and the road network already sees long queues at
the village junctions with the Guildford/Epsom Road during the morning and evening rush hour. These proposals will
destroy the Horsleys and must be rejected. The recent referendum has shown how dissatisfied people are with the political
elite who have shown no understanding of the anger communities feel when they see their village/town taken away from
them by forcing population growth. Guildford should take heed and take measures to protect its lovely villages.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the latest plan to remove our greenbelt for development. I was going to highlight all my concerns but after seeing the Ripley action groups website their specific points say it all.

I do not understand why councils/government do not look to build more towns well away from existing villages/towns as they did years ago with Milton Keynes. Building within existing villages totally over runs them and there are never amenities put in place to cope with schooling, doctors surgeries and traffic management. If there is an incident on either the A3 or the M25 it becomes totally gridlocked in Send Marsh/Send/Ripley as all the A3 traffic comes off and through Ripley.

I OBJECT STRONGLY

Answer (if comment is on questions 1-7 of the questionnaire): ()

Lack of proper infrastructure planning for sites
I object to the lack of planning and implementation of infrastructure. For example at Garlick’s Arch. Without improvements to the infrastructure prior to development, the existing residents’ quality of life will significantly deteriorate in many ways. How will the local services such as doctors and schools cope?

Lack of Utilities Capacity
Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. I object to the development of Garlick’s Arch on the ground that there is little capacity in these networks.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Congestion on the trunk roads, A3/M25
I object to the development of the strategic sites due to A3 and M25 already being at capacity during peak hours. Highways England has no plans to look at improving the A3 before 2020. It is therefore not sustainable to identify sites for further development which will worsen the congestion on these motorways and trunk roads.

Congestion on the local village roads and lanes
Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. I object to further development which will cause greater congestion in and around our villages.

Unsuitability of our local roads for heavy vehicles and more traffic
Many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
Poor air quality concerns
Further congestion, particularly in built up residential areas will only lead to greater levels of air pollution. I object to further development, which will result a fall in the air quality.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Sites being planned in unsustainable locations
Many of the strategic sites e.g. Wisley Airfield and Garlick’s Arch, are in unsustainable locations. They do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. I object on the grounds that these sites are not sustainable.

Parking issues in local villages caused by larger population
Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems. To which I object.

Attached documents:
I object to the latest plan to remove our greenbelt for development. I was going to highlight all my concerns but after seeing the Ripley action groups website their specific points say it all.

I do not understand why councils/government do not look to build more towns well away from existing villages/towns as they did years ago with Milton Keynes. Building within existing villages totally over runs them and there are never amenities put in place to cope with schooling, doctors surgeries and traffic management. If there is an incident on either the A3 or the M25 it becomes totally gridlocked in Send Marsh/Send/Ripley as all the A3 traffic comes off and through Ripley.

I OBJECT STRONGLY

1. Not protecting the Green Belt
   I object to the proposals to remove Ripley, Send and Clandon from the Greenbelt. There are no special circumstances to do this. Once taken the green belt is lost forever.

2. Disproportionate size of sites in relation to rural locations
   I object to the allocation of land to the strategic sites of Wisley Airfield, Garlicks Arch (Ripley/Send border) and Gosden Hill (Clandon). The proposed development of these sites will have a disproportionate impact on the surrounding local villages. They will have a permanent impact on each of these communities.

3. Unbalanced allocation of development in one area of the Borough
   Between the M25 and Burpham, a distance of only about 5 miles it is proposed that over 6,500 houses are built. This represents over 40% of the housing proposed in the Local Plan. I object to this area being hit so hard by the allocation of development, which is disproportionate to the rest of the Borough.

   I object to the development of the strategic sites due to A3 and M25 already being at capacity during peak hours. Highways England has no plans to look at improving the A3 before 2020. It is therefore not sustainable to identify sites for further development which will worsen the congestion on these motorways and trunk roads.

5. Congestion on the local village roads and lanes
   Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. I object to further development which will cause greater congestion in and around our villages.

6. Unsuitability of our local roads for heavy vehicles and more traffic
   Many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy A42 because
1/The current plans will be an over development of our village, already increased from 45 to 60 homes from the last plan.
2/You are ignoring thousands of previous objections
3/Will cause surface water flooding
4/Will create excessive traffic through the already busy village
5/Takes away the current greenbelt and open countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to Policy A43 because;
There is no proven necessity for travellers sites
Again ignores thousands of previous objections
Has an excessive amount of new homes
Eliminates ancient woodland
Will have a massive impact on the amount of traffic which already is congested on a weekly basis.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy A58 because;
1/Why build industrial/warehouse development on green belt
2/Again it will cause additional traffic including heavy goods wrecking the already pot holed roads.
3/Defeats the purpose of green belt

Being a local home owner I am totally bemused that again the council is not listening to its residents. I have lived in Send Marsh all my life and year on year the area is being reduced to a housing estate, each new proposed house will include a minimum of 2 vehicles equating to at least 920 additional cars on the roads increasing pollution and congestion on roads that cannot currently cope especially during the rush hour.

You need to completely change the current road structure, add additional schooling and surgeries before you contemplate building more houses as required by law.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/3371  Respondent: 10866881 / Mike Pinder  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - East Horsley
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I’m contacting you to state my opposition to the Draft Local Plan.

I live in East Horsley and have done so for 8 years. My address is [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998]

The revised plan appears to have made little consideration to the views I and others expressed against the earlier iteration.

I am particularly concerned about plans for East and West Horsley. To wholesale remove from the greenbelt is utter nonsense. To allow organic growth through individual applications, use of brown-field sites and an application by application based consideration of individual applications on greenbelt would allow the villages and sense of community to remain.

Allowing them to be removed from the greenbelt and thus allowing excessive building will be detrimental to the villages, community and Guildford as a whole. Adequate consideration has to be made of the environment, impact on infrastructure (trains and roads) for these areas and Guildford as a whole in any plans made. That is why it is essential to consider plans on an organic basis, rather than wholesale removal from greenbelt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am an East Horsley resident. I would like to register my objection to the latest version (summer 2017 consultation) of the Local Plan. There has been very little change from the previous version, which I also opposed, with very little being done to address the thousands of sensible concerns made by residents regarding the contents of the previous version. This is not a plan that residents can adopt and support – it is a plan that seems set on building as many homes as possible in places that cannot support the level of development planned.

There has been a reduction in the number of houses for the Horsleys, but I continue to object to the local plan on the grounds of the number of houses being proposed not only in the Horsleys but in other rural villages in the Guildford Borough which don’t have the infrastructure or capacity to absorb so many more houses.

I also object to the plan on the basis that despite requests being made to GBC to reveal the methodology behind the housing calculations, this has been kept secret from residents who are now being asked to blindly approve a plan whose foundations they cannot validate. Two independent studies of the housing numbers suggest that the housing numbers used by Guildford Borough Council in their local plan are significantly higher than they should be.
There has been no explanation as to why GBC has not applied the constraints that they are entitled to do. Residents have asked for a reduction in the housing numbers however GBC continue to push ahead with this flawed plan that does not take the wishes and views of its residents into account. I have to question why the Conservative led Council, whose election manifesto was to protect the Green Belt, is so determined to build so many more houses than they have to and so many more houses than its residents want. Is there a financial benefit to the Council in doing so?

I fully understand that there is a need for more houses in this area and I support building more houses. However, it is important that the following happens before thousands of houses are built unnecessarily on the green belt:

- The housing need calculation needs to be made available and shown to be accurate and appropriate for the area. If it is correct, why are GBC keeping this hidden from their residents? If it is found to be incorrect, the housing numbers need to be revised downwards as appropriate in a transparent manner.
- The housing constraints that GBC are allowed to apply need to be applied, so that GBC can properly demonstrate their commitment to residents to protect the Green Belt, made in the election but now so conveniently forgotten.
- Existing options for housing such as student accommodation & empty properties need to be fully explored before new houses are built on Green Belt land.
- Consideration needs to be given to the types of housing being proposed and built. There is a need for affordable housing the Horsley area; this does not mean 4 bedroom houses costing upwards of £500k.
- There is a need for proper plans to be made in relation to infrastructure. Currently Surrey County Council are cutting back on funding on roads, street cleaning, vegetation cutting, recycling etc. There needs to be assurance that where many houses are being proposed where there is no infrastructure to support this, that this is provided for in advance of the houses being ready, so that the local plan does not have a hugely detrimental effect on the lives of those already living in these communities. Currently there is pressure on facilities such as the local medical centre, local schools such as The Raleigh and local roads without the local plan.

I ask you to take into account the opposition views of so many local residents to this plan and reject this plan outright.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the development at Garlick’s Arch for 400 houses and 7000 sq metres industrial space, firstly because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough. Secondly This GREEN BELT SITE is liable to flooding and it is covered by ancient woodland, providing an invaluable barrier from the noise pollution from the A3 and providing relief from air pollution caused by the huge volume of traffic flowing in this area. It is not needed as there are still brown field sites such as Slyfield which can be used, Figures from Guildford Borough Council on projected housing requirements have been shown to be grossly inflated and I believe they have yet to give details on how these calculations have been formulated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1894  Respondent: 10866945 / Kristine Good  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

I object to a new interchange for the A3 at Burnt Common. This is because the local roads connecting from there through Send to Woking are unable to cope with current traffic flow at peak times, increased traffic will not be able to be accommodated. Send Barns Lane, Send Road, Broadmeads, will be constantly gridlocked as this is frequently illustrated when any form of road works takes place between Burnt Common and Old Woking. This increased volume of traffic will lead to excessive and unreasonable levels of noise and pollution.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44
I object to 40 houses /2 traveller sites at SEND HILL, again because it is a narrow single width road and not suitable for additional traffic. Also because the site has previously been used for land fill making it unsuitable for residential use. In addition a large development here would not be in keeping with its surroundings, currently open countryside.

I request that my objections to the Guildford Borough Local Plan are shown to the Planning Inspector.

I object to Send Village being removed from the GREEN BELT. Send's green belt provides an essential buffer preventing Woking and Guildford becoming one large sprawling conurbation, and the green belt is essential to retaining its village character. More cars, more heavy lorries, more congestion, more industrial building, more houses will put unprecedented strain on our village and change its character and residential village living experience for ever which can never be regained. This disregard of existing green belt is in breach of previous manifesto promises by local and central government and contrary to previous public consultations.

| Comment ID: PSLPP16/4097 | Respondent: 10866945 / Kristine Good | Agent: |
I object to the large proposed development at 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce further congestion on the A3 and surrounding roads including Send.

I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4099  Respondent: 10866945 / Kristine Good  Agent: 

I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to all the proposed sites in Send because they were not included in the previous consultation in 2014. Unlike the rest of the borough, Send has not been properly consulted and all its sites have been changed substantially from the original plans published.

Page 85 of 2167
I object to a new interchange for the A3 at Burnt Common. This is because the local roads connecting from there through Send to Woking are unable to cope with current traffic flow at peak times, increased traffic will not be able to be accommodated. Send Barns Lane, Send Road, Broadmeads, will be constantly gridlocked as this is frequently illustrated when any form of road works takes place between Burnt Common and Old Woking. This increased volume of traffic will lead to excessive and unreasonable levels of noise and pollution.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

10. I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

I object to the proposal to inset Send Business Park from the Green Belt because:

- It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation
- There is highly restricted vehicular access along Tannery Lane in both directions
- Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The increase to 60 homes in place of 45 homes is 33% more and too much
- It ignores all the hundreds of previous objections made by local people
- It will worsen access and traffic problems in Tannery Lane and at the A247 junction
- It will make erosion of the Green Belt in our village worse
- It will make surface water flooding, which is already bad, even worse
- It will impact open countryside views from the River Wey Navigation

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the **thousands of previous objections** made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth 1
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the local roads of Send and Ripley

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Policy A 58 at Burnt Common because:

- **It was deleted from the 2014 draft** because of all the objections made previously.
- The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land.
- There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt.
- The impact on small surrounding roads will create traffic gridlock.
- It will join up existing villages and defeat the purpose of the Green Belt.

Comment ID: PSLPA16/4480  Respondent: 10867169 / Saskia Lawson  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Normandy and Flexford
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This is my objection to the local plan of 2016, and my plea you think very carefully about sights 46 & 47 of Normandy and Flexford.

Thanks for taking the time to read this, I’m sure you have had many objections and responses to the local plan but please do take this into consideration.

My name is Saskia, [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] and I live in Normandy. I’ve lived here for the past 12 years.

In those 12 years I have attended 3 schools, one being Wyke Primary on my road, my secondary school Ash Manor and my college Farnborough Sixth Form.

I have also learnt to drive and set up my own business at home.

In those years I have never once felt isolated and I have never struggled to get in to OR physically get to my school. Travelling here was fine thankfully for buses and kind parents I wasn’t deprived. Ash isn’t really that far you know… I understand your main want for the fields behind my house is for a secondary school (as well as a lot of houses), but I don’t understand why as there is 0 need for this school. Keith Witham has pointed out (what we already knew) and even discovered Kings in Guildford is 57% undersubscribed?! Cmon now. Kings is not far away. Pump some money saved from wasting on the ‘Normandy’ school and sort Kings out, its in a good area, easy to get to and even better its not on the greenbelt. Most of my friends attended that school and there is obviously not enough children in this area to fill up the school. Ash Manor where I studied is also undersubscribed, between those 2 schools you could fit a load of kids. I’m sure over the years these schools will grow AND both head masters have mentioned they are willing to make their schools bigger and create room for more children as the population grows. There is seriously no need to ruin the greenbelt and our fields for an un-needed school! I understand it would feel like a great accomplishment to set up a new school, it would look great for you guys, but seriously come walk through Normandy with me and then think about it. It’s a teeny weeny village with shocking roads and junctions, people speed down the roads and when they aren’t speeding they are sat in traffic from the traffic lights and Ash Station crossing. Add in the new school traffic and traffic from the new homes and well won’t that be a joy.

Can’t explain how often I am nearly hit as I pull out of Westwood Lane, its just not suitable for more cars. Out of most people in this village I am seriously FOR building new houses, I am 23 and still cannot leave home because there’s nowhere to live. But what I care more about is the village I grew up in and the carelessness of the developers. Our village floods regularly, my pet pig who lives in Westwood Lane could tell you how muddy it gets…

I’m pretty sure if you build over that flood plain the water that sits there will shift down onto my where we live, for selfish reasons yes that won’t be pleasant but I live on a main road, unless these cars turns inflatable like Chitty Chitty Bang Bang I don’t think it will work out great.

There is just so many reasons you should not build they completely out weigh everything else. I worry the want and need for this new school will blind everyone, we are all SO aware that we don’t need a school so why aren’t you?

As a young woman I have such little trust in politicians and councillors which is sad, I don’t think you’ll read these emails and I don’t think you care what mess will be left behind when you build these new houses.

This is a tiny village and it cannot take what you propose, please look into using other areas that provide stronger roads and will do less damage to our countryside.

If you read this all thank you. As silly as it sounds - PLEASE don’t do it!

Answer (if comment is on questions 1-7 of the questionnaire): ()

I live in the village of Send and I **strongly object** to the amount of Green Belt being removed from Send/Ripley in the new local plan.

I object to Policy P2 and believe that Send should not be removed from the Green Belt.

I object to the fact that Guildford Borough council have not followed the correct process. They have changed every major site in Send proposed for development since 2014. The new proposal for 485 houses, being such a significant increase (previously 185) requires another full consultation under Regulation 18.

I object to the way in which the Garlick’s Arch development was added to the local plan. This site is new and was not included in the Regulation 18 draft and has NOT been consulted upon previously. The proposed development and a new 4 way interchange onto the A3 to serve this development would be catastrophic for Send and the already congested roads would be gridlocked all day.

I object to the lack of evidence that these high numbers of houses are actually needed.
I object to all the additional houses when the local schools are already overwhelmed with new applicants. The school in Send has no capacity to accommodate additional children.

I object to all the additional houses as the local doctors surgery is already at its full capacity and this will put additional pressure on services. Infrastructure overload has received little attention.

I object to the additional amount of cars that will be on the road in the immediate and surrounding areas, causing further risk to our children as they travel to and from school.

I object to Policy A44. 1.9ha Land West of Winds Ridge and Send Hill. This site designated for 40 homes and 2 traveller pitches is new and has not been consulted upon. Development for housing is inappropriate due to its Green Belt Status and the road is too narrow to provide sufficient access to the site proposed for the traveller pitches.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the building of 45 houses at Clockbarn Nursery because of inadequate access and traffic volume. Tannery Lane is far too narrow and is not able to sustain the level of traffic that this would create. This lane is already very dangerous and will be made much worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The proposed development and a new 4 way interchange onto the A3 to serve this development would be catastrophic for Send and the already congested roads would be gridlocked all day.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists pass through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Witley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4508  Respondent: 10867585 / Hugh Shanks  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m say to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justift the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.
13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.
14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/2940  Respondent: 10867585 / Hugh Shanks  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp17q/570  Respondent: 10867585 / Hugh Shanks  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/106  Respondent: 10867873 / Dave Govey  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send
As a resident of Send Village and living on the busy A247 I can see no sense whatsoever in enlarging the A3 Junction as described in A43.30 and I OBJECT to the council plans which are both short sighted and thoughtless with regard to the local residents.

I OBJECT to the removal of 15 villages, including Ripley and Send, from the green belt. This will lead to wholesale, and often inappropriate developments.

I OBJECT to the fact that GBC have not followed the correct process for Send and Ripley developments. Any significant changes to the 2014 proposals, such as the proposal development of Garlicks Arch, should have required another full consultation, which did not happen. This invalidates the whole process.

I OBJECT to the fact that GBC have failed to provide sound evidence in terms of the Employment Land Needs Assessment which shows that industrial space at Burnt Common IS NO LONGER NEEDED.

I OBJECT to Policy A43.30 the proposed development of Garlicks Arch designated for 400 houses and an industrial estate. This is a new site not included in the Regulation 18 draft and has NOT been consulted on previously. It is not only permanently protected green belt but also a site of ancient woodland with some trees planted in the 16th century.

I OBJECT to policy A43.30 the development of new four way interchange onto the A3 which would mean that narrow Send Road (A247) would be the main route for traffic leaving the M25 and A3. It is already crowded and vulnerable to traffic jams. Further traffic from this development would result in permanent gridlock. It simply would not work.

I OBJECT to policy A44 which would see 40 homes and two travellers' pitches on land west of Winds Ridge and Send Hill. This was again a NEW site NOT included in 18 draft and therefore has NOT been consulted on previously. Once again this is Green Belt land partly containing unsafe landfill. Access is by a narrow lane which could never take the volume of traffic that would ensue from traveller's pitches.

I OBJECT to the fact that the Local Plan takes no account of schools, doctors surgeries and roads that are already operating at full capacity. Another 4000 houses in this area with a conservative estimate of a further 8000 cars would be catastrophic.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
I’m writing to object to the proposed local plan for Send and surrounding areas. I attended a local meeting in June where the proposals were set out. The evidence presented left me with several concerns and the impression that the local plan is ill conceived with no quantifiable need identified to justify the large number of proposed dwellings in the Send area.

The following aspects of the plan do not appear to have been adequately considered or have been dismissed;

- Environmental impact
- Adverse effect on local infrastructure
- Additional traffic
- Appropriateness of high density housing sites in what is essentially a semi-rural community
- The redesignation of Green Belt land for development - Green Belt Policy Guidelines (NPPG 79-83) sets out to protect open space, prevent encroachment into the countryside and stop linear development leading to the joining together of developed communities all of which appear to have been ignored in the Send proposals.

My specific objections are as follows;

I object to the 440 additional houses proposed for the two sites (A43 and A44) which will overload our already busy local and trunk roads and put pressure on the local amenities and services, such as the Three Villages Surgery, where it is nearly impossible to see my own GP the same day.

I object to the proposal to redraw the green belt boundary for Send and, hence, for Send Village to be removed from the Green Belt. The Green Belt was intended to be permanent, as required by the National Planning Policy Framework, and there are no special circumstances to justify abandoning it. Send's Green Belt provides an essential buffer stopping Woking and Guildford becoming one conurbation. Local councillors and central government gave a clear election promise to protect the Green Belt and this reneges on it. Developers will be quick to take advantage and there will be nothing to stop them.

I object to building 400 houses and 7000 sq metres of industrial space at Garlick's Arch, opposite Send Marsh Road (A43). The site floods and is covered by ancient woodland. The industrial space is not needed but if it were it should be at Slyfield. With proper use of brownfield sites this Green Belt site is not needed.

I object to the development of 40 houses and 2 travellers’ pitches at Send Hill (A44). It is an inappropriate location because the narrow width single access country road provides insufficient access. The subsoil of the proposed site contains documented unsafe landfill waste registered at GBC. Any development there would spoil a high amenity area set in beautiful countryside.

I object to a new interchange with the A3 at Burnt Common (A43a) because Send would have to take traffic from the proposed 2000 new houses at Wisley Airfield, 2000 houses at Gosden Hill, Burpham and 1850 at Blackwell Farm. Much of this traffic to and fro the A3, M25, Woking and Guildford would go through Send. Send Road, which is already overloaded, would become gridlocked. Noise and pollution levels, already at excessive levels, would worsen.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
There are several areas I am concerned about, but to pick a few, allowing Green Belt development to pay for transport schemes will simply generate more traffic from more homes, fuelling congestion.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A35 Former Wisley Airfield as being totally inappropriate and unsustainable development of 2000 homes in the Green Belt.

I OBJECT to the disproportionate amount (36%) of all proposed development being in one area of the borough from Wisley to Burpham creating a narrow ribbon effect along the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
We live in Normandy and are writing about the proposed changes to the Local Plan.

Firstly we strongly support the recent removal of sites A46 and A47 from the Local Plan. As we commented during the last consultation last summer, the land is in the Green belt, overlooked by the Hogs Back AONB, and there are no exceptional circumstances to cause it to be removed from the Green Belt. Also the local infrastructure would not have been able to cope with providing the required utilities and roads for the development.

Secondly we need to object to the proposed inset of homes in Guildford road, and the northern end of Glaziers Lane, Normandy, Flexford, Walden cottages and Palm House Nurseries travellers site. If placed outside of the Green Belt, this would set a president for heavy development, which would ruin the openness of the Green Belt.

I object to the removal of Send from the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1895  Respondent: 10868225 / Suzie Maine  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to register my objection to the planned changes to Send and Send Marsh outlined in the revised Draft Local Plan.

The retention of the Green Belt is, I feel, the most vital issue in the Local Plan. It must not be slackened to allow expansion, but kept to protect the character and rural distinctiveness of the countryside and to keep villages as just that, villages and not large sprawling towns.

I object to the proposals to remove Send from the Green Belt, together with site on the Land lest of Winds Ridge and Send Hill (A44). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for Send or the land to be taken from the Green Belt.

Removing the green belt status from Send serves no purpose other than to facilitate the future development of the village and I strongly object to the proposals. It is not acceptable to set in motion through underhand methods the loss of this valuable, heavily used recreational space that the local populace of all age groups currently enjoy.

The loss of significant swathes of greenbelt land will have a very detrimental impact upon the social, leisure and recreational activities that the local population currently use this land for – football, walking, rambling, dog walking, exercise, usage by young people. In particular young people will have less natural open space and green fields within which to exercise and socialise. At a time when childhood obesity is on the rise, allow the insiting of this land and future development will have a detrimental impact on achieving this objective as vital areas for play and exercise will be lost, impacting upon both child and adult health.

Removing the greenbelt status would jeopardise the habitats of numerous species of wildlife. The fields are home to many wildlife species such as bats, badgers, rabbits and many many more, along with wild plants which should all be protected. The council has a duty to protect woodland and the wildlife under the UK BIO Diversity Action Plan.

The NPPF states that new Green Belt boundaries should only be established in exceptional circumstances, for example when planning for larger scale developments such as new settlements or major urban extensions. If proposing a new Green Belt, local planning authorities should:

1. demonstrate why normal planning and development management policies would not be adequate;
2. set out whether any major changes in circumstances have made the adoption of this exceptional measure necessary;
3. show what the consequences of the proposal would be for sustainable development;
4. demonstrate the necessity for the Green Belt and its consistency with local plans for adjoining areas;
5. and show how the Green Belt would meet the other objectives of the framework.
I question whether the removal of the Green Belt in and around Send has been shown to meet any of the above requirements. There is no evidence presented in the Core Strategy to demonstrate that the proposed strategic extension meets the fundamental aim of Green Belt policy.

The NPPF (para 85, bullet point 6) requires LPAs to define boundaries clearly, using physical features that are readily recognisable and likely to be permanent. The removal of the Green Belt does not relate to any physical features on the ground and does not fulfil this criterion. The lack of physical features against which the proposed boundary is drawn highlights the inappropriateness of the proposed Green Belt removal and the lack of justification for its insetting.

Whilst I wholeheartedly object to the green belt removal plans, should their inclusion in the Local Plan be forced through, the Council must clearly demonstrate that the new boundaries take account of the need to promote sustainable patterns of development as required by paragraph 84 of the NPPF. The Council must review the boundaries of those settlements which would be covered by the Green Belt to ensure that sites are identified for development to achieve their long term sustainability and clearly define the reason for the insetting, fully detailing the future usage of the inset land.

Importantly if the Council chooses to continue with the alteration, it is essential when submitting the Core Strategy for examination that it is considered 'sound' in that it is justified with the plan being the most appropriate strategy, when considered against reasonable alternatives, based on proportionate evidence.

Allowing the removal of Send from the Green Belt, and thereby facilitating the future development of the village, will allow the urban sprawl of Guildford and Woking to further encroach on Send. Send is not a suburb of Guildford or Woking and clear separation should be maintained by the retention of the current Green Belt boundary.

The proposed development on Send Hill is within Site of Nature Conservation Interest and is Grade 2 (very good) agricultural land. Access roads leading to the site are already congested, and will be further congested if the proposed A3 entry and exit ramps at Burnt Common are implemented due to the large increase in traffic through the village. This site is not suitable for development.

I urge the council not to consider insetting Send from the Green Belt and set in motion future development of these spaces, but to focus on the numerous unused BROWNFIELD sites that exist throughout the Borough. These would more than meet the current housing demand, once this is properly defined within the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3573  Respondent: 10868513 / Tom Stevenson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The West Surrey Strategic Housing Market Assessment is shot through with holes. In particular it is guilty of double counting. Starting with an annual target of 517 new homes each year based on official government growth figures, you have then added more homes to account for economic growth and for affordable housing, which are already included in the government figures. This is outrageous.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Attached documents:

Comment ID: PSLPA16/3583  Respondent: 10868513 / Tom Stevenson  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a resident of East Horsley I write to object to your target in the Draft Local Plan of at least 533 more houses in East and West Horsley, and to possible developments at the former Wisley Airfield.

Whilst a small amount of infilling in the villages may be acceptable, the sheer numbers under consideration cannot be accommodated without a massive improvement in the local infrastructure (roads and footpaths, parking, public transport, telecoms, flood prevention, schools, medical services, etc.) which would further destroy the character of these rural villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14964  Respondent: 10868513 / Tom Stevenson  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a resident of East Horsley I write to object to your proposal to remove the villages of East and West Horsley from the Green Belt.

If the Borough Council had set out with the intention to destroy the character of East and West Horsley, it could not have chosen a better route than to remove the villages from the Metropolitan Green Belt.

Paragraph 86 of the National Planning Policy Framework states: “If it is necessary to prevent development in a village primarily because of the important contribution which the open character of the village makes to the openness of the Green Belt, the village should be included in the Green Belt. If, however, the character of the village needs to be protected for other reasons, other means should be used, such as conservation area or normal development management policies, and the village should be excluded from the Green Belt.”
The open character of East and West Horsley self-evidently does make an important contribution to the openness of the Green Belt. And therefore these villages must remain in the Green Belt.

Furthermore, paragraph 83 of the NPPF states that “once established, Green Belt boundaries should only be altered in exceptional circumstances”. I do not accept that your forecasts of future housing needs in the Borough, which are themselves suspect, constitute “exceptional circumstances”. Indeed, it is apparent that ministerial guidance (for example the written ministerial statement by Brandon Lewis, Parliamentary Under Secretary of State for Communities and Local Government, on 17 February 2014) supports this view.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal mentioned at a local meeting to the £1.5 million set aside proposed to be spent on Send Road over the next 10 years. What does GBC think that it actually spend the money on? The road cannot be widened as there are houses along the whole stretch of the road. At the meeting it was clear that this had not been thought out and the only proposal put forward by the GBC councillor was for traffic lights: with the massive increase of traffic, traffic lights would, at best not really help the situation and at worst would probably only enhance the problem.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to there being no transport document at the time councillors voting to put the proposed local plan out for consultation, nor at the time when the local plan was put out for consultation, not at the time of the meeting in Send (attended by GBC councillors) after the plan has been put out for consultation. Traffic surveys were said at this meeting to be taking place ‘soon’. I object to this being done at this time of year when traffic decreases as there is (1) less school traffic as GCSE and A level pupils are not attending school regularly (2) private school break up at the beginning/middle of July (3) local authority school will have broken up by 21st July (4) we are in a general holiday period when many people are away on holiday regardless of the schools. A traffic survey at this time will not be a true reflection of the general traffic situation. Most of the time it is a nightmare getting through traffic, especially in the rush hours, which can be extensive as people start to travel to work (M25 & A3) at least from 6am and in the evening until at least 7pm. Adding to this is the total standstill on our roads, often for long periods of time when there are accidents on the M25/A3 - these hold ups are most days of the week. A survey done in the summer months will only record what GBC to show – that traffic is not a problem at the moment. A traffic survey needs to be done in October or later over several days when things are really bad

I object to mention of a tunnel going under Guildford being put forward at this meeting as it is more or less a forgone conclusion that it will happen. A tunnel would need excessive funding that would have to come from Highways England. It is no good GBC saying they are going to consult with them: this should have been done BEFORE the proposed local plan was voted on and put forward for consultation. Even if this was agreed, it would take years to build and would cause massive disruption in the area. The Hindhead Tunnel cannot be used as an example as this was first proposed years and years ago and Hindhead was a bottleneck as there was only a single lane carriageway each way – The A3 already has a 3 lane carriageway

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

- I object to the proposed development at Wisley (A35) as it would cause significant traffic flow problems through Send and Ripley and cause further congestion on an already congested A3/M25
- I object to the proposed development at Wisley (A35) as many of the proposals have been rejected by the various authorities including sewage works at Ripley could not cope with the increase, SCC has said in the past that it is not a site where they want a new school, GBC has turned many planning proposals down. We do not know and, seemingly cannot find out who the developers are other than from the Caymen Islands. With central governments crack down on offshore companies buying land etc because of money laundering, if this is then made retrospective and it is found that this is the case with this company from the Caymen Islands, what sort of mess would that leave GBC in? It would seem crazy to go ahead with this development unless the company is prepared to disclose what the investors etc are. There is a need for transparency about this company.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

- I object to site A42a Clockbarn Nursery in Tannery Lane being used for 45 houses as there are real flooding concerns
- I object to site A42a Clockbarn Nursery in Tannery Lane being used for 45 houses as this is a narrow, twisting country lane with inadequate access and Tannery Lane could not cope with the increase of traffic. It junction with Send Road is already a hazard for vehicles trying to join the main road. Planning permission has, unfortunately, already been granted for a marina complex along Tannery Lane which will exacerbate the traffic problem at this dangerous junction and along a narrow, twisting country lane.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Comment ID:** PSLPS16/5765  **Respondent:** 10868609 / Robert Lockie  **Agent:**
I object to site allocation A43, land at Garlick’s Arch, in the local plan being used for housing and industrial use: it is green belt and protected by the NPPF which prevents merger of settlements. There are NO exceptional circumstances

- I object to site allocation A43, land at Garlick’s Arch, in the local plan being used for housing and industrial use as this is a new site and was not included in the Regulation 18 draft and has not been consulted upon previously
- I object to site A43 being used for industrial use as there is no proof that it is needed and if it is needed it should be at Slyfield which is already an industrial location and where there is room to expand and where there are similar businesses. Slyfield has been turned down by GBC planning seemingly in favour of Garlick’s Arch which is a rural location.
- I object to site A43 being used for 7000sq metres of industrial space because land off the A3 slip road at Burnt Common had a proposal for industrial use and where there is already industrial use was, at the last minute, taken out of the proposed local plan.
- I object to site A43 being used for 400 houses/homes and 7000sq metres of industrial space because this land is liable to flooding, in fact the Portsmouth Road floods even with a small amount of rain. The rain drains down from Surrey Hills and the small culvert that is designed to take the flood water and the expensive work that the environment agency did about 10 years ago will not be adequate if all the proposed building is done on land at Garlick’s Arch
- I object to site A43 being used for 400 houses/homes and 7000sq metres of industrial space because this land is covered by ancient woodland and trees from 16th century would be endangered

| Comment ID: PSLPS16/5766 | Respondent: 10868609 / Robert Lockie | Agent: |
| Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44 |

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

- I object to the fact that no real guarantee has will make that the proposed new junction with the A3 would be built BEFORE housing and increased industrial traffic. There is no workable proposal in the draft local plan that this would happen. The wording would give developers ways of building without this being done if planning permission in the proposed local plan was granted – they would have ways of wheedling out of road building. There is no real guarantee to councillors stating at the meeting in Send that ‘if infrastructure does not happen then housing will not happen’.
- I object to the proposed junction new A3 junction at Burnt Common as no funding has been guaranteed for this and the money for this would NOT come from GBC. At the time of the issuing of the draft proposal, significant talks had not taken place with Surrey CC/ Highway England etc so there is no guarantee they would agree to fund this and no guarantee of a time frame for funding.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object because the transport assessment for Send and the surrounding area was not available to councillors for the vote taken on 24th May (the vote to put forward the local plan for consultation) I object to the proposed developments in Send as there is no provision for school place: the merger of Send infant and junior school in Send to the new building which should be ready in December 2016 has no provision for increased numbers of children which the extensive proposed building in Send would require.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object to Send and the surrounding area being taken out of the Green Belt. It was meant to be a permanent requirement and no justifiable reason has been identified as to why this should not be continued. The Green Belt in Send stop stops Woking and Guildford becoming a conurbation.
- I object to Send and the surrounding area being taken out of the Green Belt because local councillors and central government were elected in 2015 on the clear promise of protecting the Green Belt and local councillors, most of them from the Conservative Party, are in clear breach of their election promise and going against what their own party in central government want.
- I object to Send and the surrounding area being taken out of the Green Belt because, regardless of the proposed development in the local plan, taking the area out of Green Belt will give carte blanche for development in future

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the disproportionate amount of development that GBC has proposed for Send and the surrounding area. Apart from the main road through Send, the rest of the village is very rural with single track country lanes, where it is already dangerous as there are virtually no footpaths in Send and traffic can speed along these lanes, particularly when the numerous traffic hold ups occur along the A3 and the village is used as a cut through (this also applies to Ripley)

I object to the fact that at the GBC meeting where the vote was taken to put forward the proposed local plan for consultation, in this enormous document, there were many pages blank where ‘TBA’ was the only thing on the page and councillors were told that these would be sorted out later (or words to that effect). How can councillors, mainly Conservatives, vote for a proposed plan to be put forward when they did not have full facts at their disposal?

• I object to the lack of evidence that Guilford has a need for the housing numbers proposed and that information about how GBC reached this conclusion is not transparent and the even borough councillors have been refused this information. What on earth is going on that it has to be so secret?
• I object that, along the same lines as above the 2015 SHMA assessment should be called into question. The use of numbers of foreign students has been used to add to housing needs and therefore inflates the number of houses needed. If the population is to grow by the amount predicted then only approximately 8000 homes will be needed and not 13860
• I object because, given the above figure of approximately 8000 homes needed 50% of these could be built on brownfield sites
• I object to the lack of sound evidence for expansion given that the ENLA assessment 2015 shows an 80% reduction in employment space from the previous ENLA of 2013: therefore industrial space at Burnt Common would not be needed

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object to the fact that GBC does not seem to have followed correct process in its dealings over the local plan. Since 2014 GBC has changed ever major site in Send proposed for development. In 2014 the proposal was for 430 houses and went down to 185 in April 2016; now it has gone up again to 485: this would need another full consultation under Regulation 18 and not the short cut of Regulation 19 which is what GBC is trying to do. It stabs at total incompetence and this and other anomalies makes me wonder exactly what GBC secret agenda is!
- I object to the fact that GBC has not bothered to challenge central government about the proposed need for housing etc that it has put forward for our area. Local authorities are allowed to apply ‘constraints’ to the number because of factors like Green Belt and infrastructure issues
- I object to the limited consultation period, especially as it has occurred in the summer months when people are away on holiday

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Having lived in the area for 36 years, I feel that these changes to the plan is disproportionate and out of keeping with the historical nature of this area.
2. There is no evidence that 6 Travelling Showpeople plots would enhance the life of the local community.
3. The inclusion of 6 Travelling Showpeople plots is contentious in its application as it would result in the area being overdeveloped.
4. I object to the inclusion of 6 Travelling Showpeople plots in an area which currently enjoys ‘Green Belt’ status.
5. There is no evidence of a need for 6 Travelling Showpeople plots. The clauses relating to the possibility of these plots being used for other development in the event of insufficient interest is indicative of lack of evidence.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the proposed plan affecting the Send and Send Marsh Areas:

Plans A42, A43 and A44: The village of Send and Send march have limited access, and no public transport which can be relied on for travel to employment. Therefore the creation of new homes within these areas will dramatically affect the already congested road network. It is noted that under the plan A43A there are new slip roads for the A3, and this is supported, however this will not by anyway relive the existing problem. The fact is during the rush hour periods and frequently on the weekends the A3 is congested from around the BP services to the M25. All new homes will still be served by the existing North bound slip at Ripley as it will take commuters closer to the M25. In fact it may encourage more of the existing A3 north bound traffic to travel through the over used village roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/714  Respondent: 10868737 / P Molesworth  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the statement under A43 that there is a stated opportunity that this will improve bus frequency and encourage travel to and from the site. It is hard to understand how the development of the number of houses proposed will in fact change the current occasional bus service to sufficiently reliable and frequent but service that can be relied upon for travel to and from employment.

I object under A43 the opportunity to reduce the flood risk. Any development will increase the risk both locally and in the area in general. All surface water drains to the Wey navigation which frequently overflows during periods of high rainfall and development put increased pressure on this.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to A44 the development of the area west of Send Hill Road which is not suitable to take increased traffic, it is not wide enough for two lanes of traffic as is evident by the lack of the middle white line. South of Send Hill is Potters lane which is already over used and is a frequent road with incidents where cars coming of the A3 cut through maintaining the speed they where traveling on the A3 and soon getting to the small number of houses and the blind corner where they meet an oncoming vehicle on a lane wide enough for a single car only. This is made worse in the winter months where the particular area is prone to flooding and the formation of ice frequently.

Further objection under A44 is that this is currently Green Belt and has an existing abundance of plant and wild life, this development will destroy this area with little or no regards to the eco system! The plan states “Green corridors and linkages to habitats outside of the site” where as in fact the plan removes the eco system habitats so hardly a linkage. The green belt beyond the site is predominantly farm land and not natural habitat.

I also object under A44 that requires “Sensitive design at site boundaries that has significant regard to the transition from village to greenfield” this only affects the boundary development whereas as the complete development will not be in
keeping with the existing Village. As I personally have been rejected twice a conversion on my home for this very fact despite general support from the majority of my neighbours.

Under A44 there is a stated evidence of a quarry, but no mention that this was actually more recently used as a land fill, including the disposal of Asbestos! Therefore what precautions are taken into account for this? Development on a previous landfill should be considered very carefully. I understand that the area has been monitored recently and considered safe, however a major development would drastically affect this.

Also the area under A44 one of the few areas locally for dog walking with access both via Send Hill and a foot path to the village, developing this will remove one of the few remaining places people within send can let their dog roam free.

Finally I object to the large scale removal of green belt area which appears to be a back door approach to further development without considering the impacts specifically for the proposed development at the time.

I want to register my strong disagreement to the planned developments around the Send area. In particular:

I object to the planned construction of 400 houses and 7000 square metres of industrial space at Garlick's Arch. This would destroy ancient woodland and completely alter the nature of Send and Ripley villages to become one big strip development. Send Road and Sendmarsh Road, as well as Polesden Lane, are already extremely busy roads with traffic jams and queues on many mornings, particularly during term time. Traffic flows would be hugely increases as a result of such a housing development and the industrial development would increase the flow of large lorries which are already having to mount pavement on Sendmarsh Road to pass one another. There would be danger to pedestrians and from traffic based pollution.

I object to a new interchange with the A3 at Burnt Common. This would send much more traffic which currently bypasses Ripley village through narrow roads, particularly Polesden Lane, which is partially single track and already a nightmare to traverse.

I object to Ripley and Send being removed from the Green Belt. This area of Green Belt prevents the joining up of Guildford and Woking and is against the principles agreed by local councillors and central government to protect the Green Belt. The rash of new development being now discussed would just be the beginning.

Please ensure that my objections are relayed to the relevant Planning Officer, and please also confirm receipt of this communication.

Comment ID: pslp172/1665  Respondent: 10868769 / Don Drew  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Local Plan Policy A58 because there is no need to build on Green Belt land when there is clearly industrial space available in the local area. The road and traffic situation in the area of the proposed development is already congested and the increase in HGV traffic will only cause further problems. I also object to the infilling of areas between villages via the use of Green Belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/3835  Respondent: 10868897 / Paul Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the draft Local Plan for the following reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. The geography of London is unique specifically because of the existence of the Green Belt; if not for the Green Belt London would sprawl uncontrollably like so many other cities in the world.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity. I use Horsley station every day to commute to London and this small station will not cope with passengers from the proposed additional 2,000+ homes in the area.

7. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25.
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO THE 2016 DRAFT LOCAL PLAN

• I object to any erosion of the Green Belt. The Green Belt exists for a reason - to protect the countryside. Once the Green Belt has been lost, it is gone forever
• I object to any ‘in-setting’ (i.e. removal) of any villages from the Green Belt

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object to development in this area when there are clearly no services or infrastructure to support more housing
- I object to development which causes more traffic on already over-loaded roads. The A3 and M25 are frequently at capacity already. Building at Wisley Airfield and at Garlick's Arch will result in far more cars on the roads as there are no railway stations at these locations and rural bus services have been reduced
- I object to development which causes more traffic on small country roads. The narrow country roads around Ripley, Clandon and Wisley are places for walkers, cyclists and horse riders. They are becoming increasingly congested and therefore dangerous for these users
- I object to development which will cause more traffic in small villages such as Wisley, Clandon and Ripley. Parking is already difficult in these places and will only get worse if there is more development
- I object to more development which will reduce people's quality of life in terms of pollution, congestion on roads, difficulty parking and increased density of population

*We all need space; unless we have it we cannot reach that sense of quiet in which whispers of better things come to us gently. Our lives in London are over-crowded, over-excited, over-strained. This is true of all classes; we all want quiet; we all want beauty for the refreshment of our souls. Sometimes we think of it as a luxury, but when God made the world, He made it very beautiful, and meant that we should live amongst its beauties, and that they should speak peace to us in our daily lives.*

*Octavia Hill (National Trust founder)*

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the proposal to inset Send Business Park from the Green Belt because:

- It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation
- There is highly restricted vehicular access along Tannery Lane in both directions
- Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location. For example, it is the furthest from railway stations.
2. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).
3. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).
4. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
5. Increased traffic in the area will make small country lanes even more dangerous to walkers, horse riders and cyclists.
6. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000s more visitors several times a year and the resultant traffic has not been taken into account.
7. There is insufficient employment available onsite so that almost all residents will have to travel to work. This will seriously add to the congestion on local roads.
8. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
9. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).
10. I object to the removal of additional 3.1 ha from the green belt without any justification.
11. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
12. I object to para 21 which “limits” development in flood zone 2 and 3: development should be excluded in flood zone 2 and 3.
13. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
14. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
15. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
16. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Clockbarn Nursery, Tannery Lane, Policy A42 because:

- The increase to 60 homes in place of 45 homes is 33% more and too much especially given all the previous objections
- It will worsen traffic problems in Tannery Lane and at the A247 junction
- The Breen belt should be protected with NO exceptions
- It will make surface water flooding, which is already bad, even worse

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Policy A 58 at Burnt Common because:

- It was deleted from the 2014 draft because of all the objections made previously
- There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt
- The impact on small surrounding roads will create traffic gridlock
- It will join up existing villages and defeat the purpose of the Green Belt

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT strongly to this attack on the use of the Green belt in this New local Plan, which has Just been thrust upon the residents of this area of Send, Send Marsh and Burnt Common.

This New Plan is a real assault on this area which, on the previous Plan, was designated about 45 or so houses placed on it, now we Suddenly told you intend to build 400 Houses plus an Industrial Development On precious Green Belt Land, Outrageous!!

This development Is totally Inappropriate and unnecessary, and will devastate the Village together with Ripley which we have lived in for thirty five years.

The amount of extra traffic that will be generated by the 400 houses Plus the new Interchange will overwhelm us all. At present it is Intolerable at certain times of the day. This will Just add to Total Gridlock, with traffic using this village as a cut through from the A3 to Woking.

The infrasructure within the village is overburdened now, let alone what will happen when this plan is ever adopted. The Roads are full, the schools are Full, and the Health Centre is overflowing especially as it now is responsible for Ripley residents also.

As a council you have a responsibility to look after your residents in rural villages, maintaining a certain Quality of Life for us all

This Plan is really Flawed and I therefore OBJECT to it. please submit this to the Inspector,

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43 Land at Garlick's Arch

Yet again you have ignored the many objections from both Ripley and Send. My main objection is to building on this protected area in the green belt (which is appalling for a Tory council to consider ), in addition to which, it is not suitable anyway with its flooding potential and contaminated ground. Again the road structure around will not cope with the additional cars as it doesn't now. The need for Travellers and Showpeople plots are not at all warranted as you have already allocated some in the Send Hill area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A58

I object to the changed proposal for a minimum 7000 square m of floor space instead of the original 2016 plan for a maximum amount of spaces, thus allowing for further development in the future. This development is quite unnecessary in the middle of a green belt area especially as nearby Slyfield industrial estate is not fully utilised.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Where are the SPECIFIC and realistic plans to deal with the A3? There doesn't seem to be any real concrete plans but only 'aspirational' ones. If you have ever driven on the A3 you will know exactly how often it is traffic logged, frequently dogged with accidents and I have personal experience of sitting in traffic every single journey to collect my child from school. How is creating a new village next to it and building more houses in the neighbouring villages of Horsley, Clandon, Ripley and Send etc going to help ease congestion and reduce carbon emissions in line with national policy? How does this improve the lives of people living in these areas? They are being encircled with concrete.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am emailing to object to the proposed local plan which is open for consultation under Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012 until today.

In the Sustainability Appraisal of the local plan (June 2016) at paragraph 3.1.3 it states that 'The Local Plan seeks alignment with the Council's Corporate Plan 2015-20, which establishes the ambition for Guildford to be a 'town and rural borough that is the most desirable place to live, work and visit in the South East England.' The Corporate Plan goes on to explain that:

'We want Guildford to be a centre for education, healthcare ........ a county town set in a vibrant rural environment which balances the needs of urban and rural communities alike ..........and with infrastructure that will properly cope with our needs.'

I would argue that the rural borough will no longer be rural if the proposed development of housing goes ahead and that the need of those already living in the borough's rural villages won't be balanced because of the erosion of the green belt and the increase in concrete, pollution, congestion on the roads, pressure on our already full schools and GP surgeries, sewage and water supplies. The impact on heritage sites in and around the Horsleys and the impact on our environment which is beautiful and rural will inevitably be negative. The precise details on infrastructure which will 'properly cope with our needs' appear vague amongst the reams of documentation and any infrastructure needs to be funded. How exactly (taking away whatever possible developers have to contribute) will this be funded and indeed actually met?

The plan has to be considered for legal compliance, soundness and duty to co-operate.

The plan is obviously detailed and refers to evidence. The problem with population projection etc as evidence is that it is not hard evidence but just possibilities. A major national referendum regarding leaving the EU has taken place SINCE this plan was published and open for consultation and surely evidence must be sought regarding the need for housing, planning, migration, population movement and growth in light of this major decision? The NPPF requires the development plan to be based on up to date evidence.

With regard to soundness, the plan has to be positively prepared, justified and effective. There is a presumption in favour of sustainable development. I don't believe that the proposals are fully sustainable and not convinced that they are justified. The SA report (referred to above) refers to concerns from Elmbridge regarding the proposed Wisley site ' We query whether this is the right location for this scale of growth. The fundamental aim of the Metropolitan Green Belt is ultimately to prevent the spread of London. This site is located in the very north (east) of the borough where the Green Belt is already fragmented and particularly vulnerable to additional development, a point noted by the Inspector for the examination into our Core Strategy. Further evidence should be provided to indicate why this site has been identified in preference to other sites having regard to the strategic significance of the Green Belt in this location.' (page 23/145) of the SA report.

The proposed site at Wisley for 2,000 homes is already flagged up with issues such as pollution and climate change, already heavy congestion on the A3, biodiversity etc. The SA report also refers to a 'strong commitment to deliver a new GP surgery as part of the scheme ...' And then much more vaguely and worryingly refers to residents who 'would also be with c.3-3.5km of a surgery at East Horsley (understood to have capacity to expand)'

Is a strong commitment enough or does it just mean that it may happen and that more pressure will be actually placed on the East Horsley surgery? Where is the evidence to support the statement that the East Horsley GP surgery has capacity to expand? It would only serve to put more pressure on an infrastructure that doesn't need any more.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I also object to the erosion of the green belt and the proposal to remove the Horsleys from it. The exceptional circumstances required to do so have not been adequately shown. The primary school is full and there is no specific plan to deal with the effect on that. The roads are already in need of constant maintenance from usage, pot holes, problems with flooding causing erosion of the road surface and more housing and increasing the population will not only put excessive pressure on our roads, schools, sewage and water systems but also increase pollution. It will erode the special characteristics of the Lovelace villages and we must protect and respect their proximity to National Trust Properties and land, to West Horsley Place (of historic interest) and to Horsley Towers and maintain the beautiful countryside and biodiversity of the nature living in it.

I also support the views of the Horsley Countryside Preservation Society and I object to the local plan for the reasons stated above. The proposals for 593 houses in the Horsleys, the creation of Wisley Village, development around Ripley, Ockham etc would seriously impact the current residents lives and is an area which should remain protected by the green belt for future generations because of its openess and historical value.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLP16/17186  Respondent: 10869441 / Chris & Louise Dorman  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Planning policies should aim to be sustainable (I would argue that the SA report itself highlights many reasons why the proposed developments cause valid concerns) and that the Council has a duty to cooperate with everyone who is potentially affected by this plan to address all concerns and to put forward a balanced representation of opinions. The video on the website only shows those in favour and therefore is not balanced. There is reference to improving the A3 in the video but no specific mention at all of what is planned and then swiftly moves to the train network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am also objecting to the development of Wisley airfield.

I believe that the developments would create very congested roads. There would be too much pressure on services such as the medical centre. There would not be enough car parking spaces at the station or shops. There would be greater risk of flooding. There would be much higher levels of pollution. There would be a lack of school places in the area. Finally it would be dreadful to destroy our beautiful countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the proposals A42, A43 and A44 for a total of 485 homes and 2 travellers pitches in Send on the following grounds:

1. The increased housing will bring with it at least 1-2 cars per household which will add further traffic to the small village roads particularly at peak times. These roads already struggle to cope with current traffic levels.
2. Like much of Surrey the roads around Send are in a poor state and the increased traffic in the area will only add to their deterioration.
3. The increase in population of Send will impact on services such as the Villages Medical Centre where it is already difficult to arrange appointments with the Doctors.
4. There is no need whatsoever for industrial developments in Send as raised in A43. Send is not and never will be the right location for industrial premises being a rural village.

I also strongly object to the ridiculous proposal (A43a) of a new on/off slip road for the A3 at Burnt Common on a number of grounds:

1. The destruction of Green Belt land this proposal will use; including mature Oak woodland which is important for local wildlife.
2. The fact that the north-bound access will join an already busy section of the A3 particularly during the rush hour, with the potential of an increased risk of accidents as the traffic joins the A3 flow.
3. Access from Send Marsh Road to the B2215 can be difficult enough during peak times as traffic comes off the A3 using the B2215 as a ‘rat run’ to re-join the A3 at Ripley.
4. The A3 corridor is such a busy route already so further development anywhere along its length is a ridiculous proposal.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposals A42, A43 and A44 for a total of 485 homes and 2 travellers pitches in Send on the following grounds:

1. The increased housing will bring with it at least 1-2 cars per household which will add further traffic to the small village roads particularly at peak times. These roads already struggle to cope with current traffic levels.
2. Like much of Surrey the roads around Send are in a poor state and the increased traffic in the area will only add to their deterioration.
3. The increase in population of Send will impact on services such as the Villages Medical Centre where it is already difficult to arrange appointments with the Doctors.
4. There is no need whatsoever for industrial developments in Send as raised in A43. Send is not and never will be the right location for industrial premises being a rural village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to the Guildford Borough Council Proposed Submission Local Plan (June 2016)

I am writing to Guildford Borough Council to object to the Council’s ill-conceived Draft Local Plan in relation to the proposed developments in the village of Send as listed below. I believe that this plan is not in compliance with the regulations with which it is required to comply.

<table>
<thead>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A43 (Land at Garlick’s Arch). The proposal is for up to 7,000 square metres of industrial and other employment space and 400 dwellings. The industrial space is simply not required, since the latest Employment Land Needs Assessment 2015 shows a reduction of 80% in required employment floor space compared with the 2014 Draft Local Plan. New industrial space if required can be accommodated at Slyfield, and it is quite unnecessary to site it at Garlick’s Arch. Furthermore, the additional traffic generated by so much employment space, coupled with the traffic generated by the 400 new dwellings and Policy 43A (new A3 intersection at Burnt Common), would overwhelm the local road network. In particular the A247, through Send to Old Woking, is likely to become completely gridlocked for much of the day, with potential serious consequences in terms of noise and air pollution, physical danger etc. for people whose houses front on Send road, as well as serious inconvenience to other people in the area. It has to be appreciated that Send Road ends at a roundabout in Old Woking where it debouches into narrow winding streets. There is no scope for increasing traffic capacity through these streets, which are already heavily congested at certain times. The proposals for Gosden Hill Farm and Wisley Airfield will only further exacerbate the traffic problem. Furthermore, the additional local population from the 400 new dwellings at Garlick’s Arch cannot be accommodated by the existing infrastructure of schools, medical services etc.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to Policy A44 (Land west of Winds Ridge and Send Hill) on a number of grounds:

(a) Send Hill is a narrow road, particularly at its southern end, with a lot of cars parked on it at various times of the day, and will be put under considerable strain by the traffic generated by the additional homes. In addition, it and the other small local roads, Vicarage lane, Potters Lane and Woodhill, are quite unsuited to large traveller caravans. The site is simply the wrong place for travellers’ pitches. A far more suitable site for travellers’ pitches, with easy access off the A3, is the triangle of land between the A3 and London Road, the B2215, which was included in the 2014 draft of the Local Plan for industrial development and has now been abandoned in favour of Garlick’s Arch.

(b) The development 40 houses on this site is excessive and disproportionate compared with the density of development in the surrounding area.

(c) The site’s history as landfill makes it unsuitable for residential development.

(d) No justification has been put forward for including travellers’ pitches in this site, and there is no logic for it. Elsewhere in the Draft Local Plan, where travellers’ pitches are included in sites designated for ordinary residential development, e.g. at Gosden Hill farm and Wisley Airfield, a guideline of 2 travellers’ pitches per 500 dwellings is adhered to. There is no rationale, in relation to Send Hill/Winds Ridge, for departing from that guideline and including 2 travellers’ pitches in a development of only 40 dwellings.

I am sending this letter by e-mail and post.

1. I object to Policy P2. It is wrong in principle to remove Send from the Green Belt. The Send area provides a rural buffer separating the major urban areas of Guildford and Woking. Removal of Send from the Green Belt risks effectively linking Guildford to Woking through a virtually complete developed strip through Send and thus effectively turning them into a single huge conurbation of the type we already see further west in the Farnborough/Aldershot/Ash area. I object to Policy A25 (Gosden Hill Farm) for this reason: stretching along the A3 from Burpham/Merrow to a point well beyond the end of Potters Lane in Send, it is the first step in this process.

Objections to Draft Local Plan

I wish to object to a number of the policies set out in the Draft Local Plan, as follows:

1. Generally, I object to the process being followed. Since the 2014 consultation, Guildford Borough Council have altered every major site in the Send area proposed for future development, and in particular have included in the latest Draft Plan sites for development which have never been mentioned before, particularly Policies A43, A43a and A44. These changes are of such significance that a full consultation under Regulation 18 is required.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1943  Respondent: 10869921 / Kate Haskins  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

I object to the proposed development at Clockbarn Nursery. Tannery Lane is narrow, with poor access, and the junction with the A247 is already a bottleneck. Another 45 residences will create chaos and is simply inappropriate. The apartments proposed for further down this pretty lane, used by walkers, children on bikes and other cyclists, simply cannot be adequately accessed via the one track lane. Widening this lane will destroy footpaths and farmland. More concrete, less nature. I am pretty sure that’s not what anyone voted for.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I further object to the Garlick’s Arch development. 400 homes and large industrial space will create not only a crowded, unpleasant living environment, but traffic meltdown. Clearly, nobody in the local planning department is local at all, as if they were, they would already be stuck in very high volume traffic on a daily basis, and know that this huge development will bring us all to a standstill. Don’t be fooled that an additional access point to the A3 will ease this, quite the opposite, drivers will simply join the queue in a different place, and queue back onto the local roads too. I therefore also object to the new interchange, that will simply add more queues to the existing ones, not ease any congestion at all.

I have made each of my objections clear, and I hope that those I elected to represent my family and I will listen carefully to the explicit and grave concerns voiced by a whole community. Should this development go ahead regardless, it will be a very sad day for democracy.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

For similar reasons, I also object to the proposed development on Send Hill, a narrow, quiet lane already under strain during school pick up times. Increasing traffic volumes and adding further development will add yet more congestion to another quiet, peaceful residential area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to you to make my strong objections known to the latest planning proposals that will destroy the quality of life for my family and others living in Send and Ripley. Over the last months and even years, I am stunned at the level of development that is being proposed by the very people who are meant to represent the lives and families in their boroughs. I will make my latest objections clear one by one.

Firstly, I object to Send and Ripley being removed from the Green Belt. Whilst I am sure that our villages being in the greenbelt is very tiresome for local planners who otherwise have to stand up to central government, not to mention
developers offering money to build extraordinary levels of housing in our local communities, the green belt’s purpose was intended to be permanent and there is absolutely no justification for abandoning it. Quality of life for those already living in the greenbelt will be destroyed and the levels and density of housing will create the kind of unrest that has been seen time and time again when excessive development is victorious over sensible levels of planning with adequate investment in supporting facilities. I am sure that local councillors don’t need reminding that they are elected to represent their local constituents, of which they are doing a very poor job. Clear election promises have been broken. Have those running the borough lost all sight of their role and purpose?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Clockbarn Nursery, Tannery Lane (Policy A42)
- The number of homes has been increased by 33% on the previous plan, ignoring all concerns raised about traffic and safety issues with the congested A247 junction
- Erosion of the green belt, along with associated declines in quality of life for current residents and visitors to the Wey Navigation

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Burnt Common, London Road (Policy A58)
- This was deleted from the 2014 draft, why is it back again? It would be a pleasant surprise if the deletion of a proposal on the grounds of local objections could be proof that someone somewhere in the planning department is listening to local voices
- A change of wording from “maximum” to “minimum” shows another expansion of the plan. Supply currently outstrips demand for industrial units in current industrial areas such as Slyfield, so there is no justification to destroy green belt land to create more supply.

- The impact on local roads, already over congested, will once again, be negative.

---

I am writing to you to raise my objections to the new draft local plan. I have objected to each draft so far, and I am both disappointed and angered by the fact that my objections, along with the thousands of others, have been ignored. Furthermore, the plan has been added to in terms of the quantity of houses and development in the plan. How can this be justified? Where is any evidence that the community that you are supposedly “consulting with” has in any way been listened to?

I sincerely hope that on this occasion the Guildford Planning Department respond and take into account local objections. I am sure I am not alone in believing that local government should serve its local community and borough as its first priority. There is little evidence in the local plan that this is the case. I sincerely hope that the final local plan shows proper consideration and response to local feedback.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Clockbarn

I object to building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.

Burnt Common / Garlick's Arch

I object to the proposed new interchange onto the A3 at Burnt Common because it would be disastrous for Send and the (A247) would be gridlocked all day.

I object to the proposed new interchange onto the A3 at Burnt Common because the Transport Evidence is incomplete and unreliable and shows there will be congestion because Send would be used as a cut through to the A3/M25.

I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Interchange with the A3 at Burnt Common

I object to a new interchange with the A3 at Burnt Common because Send would then have the traffic from 2000 houses at Wisley Airfield, 2000 houses at Gosden Hill and 1850 at Blackwell Farm.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3542  Respondent: 10869985 / Alan Blackburn  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Firstly I should like to state that I am appalled that after my objection over two years ago (one of 20,000). I should have to repeat the process. I consider the process now to be totally undemocratic and I now have no faith at all in local and national government.

All consideration: of Green Belt; infrastructure issues; insufficient school places; road access.

I live in Orchard Way and access is very difficult one might say almost impossible currently when schools are opening and closing.

The proposed development of houses and travellers site are ludicrous considering the narrowness of Send Hill. The loss of Green Belt is a disgrace especially when it was pledged to maintain it.

I took nearly ten minutes to get from Orchard Way to Send Surgery because of the school run and parked cars which are permanently there.

This would be much worse if the Send Hill developments go ahead.

The infrastructure; Schools, parking access, doctor's surgery and access for fire engines does not figure in the plan.

**Send Hill**

I object to the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

I object to the proposal in the local plan on the grounds that the site is not large enough for the proposed use.

I object to the proposal in the local plan on the grounds that it would cause adverse impact on street parking.

I object to the proposal in the local plan on the grounds that Send Hill is a single track country road and too narrow to provide sufficient access to the site or accommodate the potential new levels of traffic the proposed development would bring.

I object to the proposal in the local plan on the grounds that Send is in green belt. The proposed inset is inappropriate due to its permanent green belt status.

I object to the proposal in the local plan on the grounds that Send Hill is a narrow road result in loss of a turning point for vehicles.

I object to the proposal in the local plan on the grounds that it would impact the nature reserve nearby. The proposed site is a quality green belt amenity area within countryside and would be spoilt by development.

I object to the proposal in the local plan on the grounds that the existing road and parking infrastructure is already inadequate or under pressure and could worsen with the planned development, reducing quality of life.

I object to the proposal in the local plan on the grounds that too many houses are proposed to Send/Send Marsh are and the impact on traffic congestion and local services would be unacceptable.
I object to the proposal in the local plan on the grounds that the proposed number of houses potentially could result in 92 extra cars in Send Hill which is already suffering from congestion particularly at school run time.

I object to the proposal in the local plan on the grounds that this would cause loss of village identity, be detrimental to the community and increased flood risk.

I object to the proposal in the local plan on the grounds that a Wasteland Solutions environmental report on Send Hill dated March 2004 gave evidence of past ponding of water in the excavated area. Further development would disturb water table and increase risk of flooding to my property.

I object to the proposal in the local plan on the grounds that the proposed development site (A44) was used as GBC registered landfill site, not a quarry as listed as reference LLA 2081 in the local plan.

I object to the proposal in the local plan on the grounds that the 1963-8 Ordnance Survey maps of proposed site mark it as “refuse and slag heap”. It is therefore unsuitable for such a development on health reasons.

I object to the proposal in the local plan on the grounds that the 1971 Ordnance Survey maps of proposed site mark it as “refuse tip” prior to when proper licensing/registration was required. The date of the landfill works predates the 1999 EU Landfill Directive regulations. I therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials.

GBC has installed gas monitoring wells on site since July 2000. One well recording methane gas discharge.

I object to the proposal in the local plan on the grounds that a Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies the proposed site as GBC recorded landfill site Ref GU/11/LLC with type of waste not identified. The date of the landfill works predates the 1999 EU Landfill Directive regulations. I therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials.

I object to the proposal in the local plan on the grounds that a Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies proposed site GBC recorded landfill site Ref GU/12 with type of waste identified as “unrestricted”. This causes me concern as to what it does contain and dangers if disturbed.

I object to the proposal in the local plan on the grounds that both the Envirosearch Report RS1100201_1_1 dated 17th February 2004 and historical map data and information from GBC has identified site as landfill and has “areas of potentially contaminative industrial activities”. Development of this site would be a health hazard. The recent news reports of a child dying from seepage of contaminated ground following flooding prove that developing any such sites is a danger to health. The Daily Mail has also recently had an article on how the dangers of living near landfill site raises cancer concerns. The paper referenced a study published by the International Journey of Epidemiology which tracked 242,000 people living near landfill sites in Italy.

I object to the proposal in the local plan on the grounds that both the Envirosearch Report RS1100201_1_1 dated 17th February 2004 identifies “potential risk from landfill gas migrations” which I believe is a health hazard.

I object to the proposal in the local plan on the grounds that both Envirosearch Report RS1100201_1_1 dated 17th February 2004 concludes “potentially contaminative industrial sites identified from analysis” of Ordnance survey maps.

I object to the proposal in the local plan on the grounds that the Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifes proposed site as a local authorised landfill site as licences under Part II of Environmental protection Act 1990. The proposed site is not a quarry as specified in the GBC Local Plan. And is therefore not suitable for the proposed usage.

I object to the proposal in the local plan on the grounds that the Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifes proposed site as potentially contaminative industrial land. With usage of “Heap and unknown constituents”. This causes me concern as to what it does contain and dangers if disturbed.
I object to the proposal in the local plan on the grounds that the Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005 Identifies changes to proposed site could cause potential ground water vulnerability to my property.

I object to the proposal in the local plan on the grounds that the Traveller Accommodation Assessment research, purported to have been undertaken in June-July 2012 by Mill Field Services, cannot be so. The Sittingbourne based market research company was dissolved in January 2011 according the government companies’ site.

</table>
• There is insufficient public transport for the existing population, an increase of circa 7,000 houses with an associated number of cars is completely unrealistic for the local road network to which I object.
• I object to the lack of evidence for the alleged housing need numbers.
• The proposal to construct a large number of houses in a small area is unjustified and disproportionate and I object.
• With more evidence daily of the effects of road traffic on public health I object to the proposed large increase in vehicle numbers.
• I object to the large population increase such developments will bring without provision for more policing.
• Welfare services are currently overstretched, the population increase will make these services impossible to deliver.
• I object to the absence of protection to heritage sites.
• I object to the absence of protection to the environment.
• There has been insufficient consideration of SPA, SSI and Conservation Area issues to which I object.
• Cycling is hugely popular on local roads, there is a lack of proper cycle lanes on local roads. The proposes development and traffic increase with no inclusion of cycle lanes poses a real danger to cyclists to which I object.
• The above is true of footpaths to which I also object.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 5: The examination

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a local resident I object to the 2016 Draft Local Plan for a number of reasons:
• I object to the manner in which this has been introduced verges on being on undemocratic with a short consultation period with only six weeks notice given.
• I further object to the the inclusion of new sites with less than two weeks notice.
• There has been little or no consultation with local residents to which I object

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I wish to inform you that I am deeply concerned about the massive increase in the number of developments planned for The village of West Horsley. The residents have no idea how this figure was achieved and Paul Spooner is unwilling to discuss. We have been informed on numerous occasions that the green belt policy would not be effected and sadly this promise has been ignored. With the present plan proposed we do not have the schools GP surgeries Car parks Transport.

I had to go to London last week and could not find a parking space at the station.

Our roads are in a disgraceful condition some as bad as third world countries. Yet the council have made little attempt to re surface or repair potholes. What will they be like with the use of more traffic. We will be sinking and not driving.

Horsley has severe problems with flooding and this has caused a lot of problems over the years.

I am surprised as property prices are so expensive in Horsley how any affordable houses can be achieved.

Finally no consideration has been given to the residents of Horsley. I feel during construction process which will be on going the noise dust traffic will have a profound effect on peoples quality of life. with an increased respiratory conditions due to pollution etc. We pay a high council tax to leave in this area and we do have a say at what is going on

The draft proposed housing plan is completely unrealistic and not acceptable

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/733  Respondent: 10870177 / Sue Bolton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to make objections to the proposed housing and road developments proposed for the Send area.

1. The erosion of the green belt area when there are brown field areas in the Guildford borough and infilling has not been used.
2. Send is a village and has not the infrastructure for the amount of traffic that uses our roads at present and can not withstand the amount of extra traffic this will generate. I understand that funds have been allocated for Send Road over the next 10 years and with residential properties bordering this road has no capacity for widening and I can only assume that this money will be used to deal with all the potholes and deterioration that will ensue.
3. The proposal for slip roads will certainly increase the traffic as neighbouring areas will be driving through to join the A3.
4. Why has Send and surrounding area been chosen to provide a disproportionate amount of extra housing in the Guildford borough?
5. The present infrastructure is over stretched so how can it cope with all the increased population that these developments in the proposed plan will generate

### Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

I object because there has been no local consultation on the latest plans which are radically different to the ones which were proposed and consulted on in 2014.

I also object because the evidence for the number of houses required has not been published and it appears to have been greatly exaggerated.

I also object because the proposals are for building on greenfield sites rather than the brownfield sites that we know are available.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

### Comment ID: SQLP16/77  Respondent: 10870305 / Rosalyn Vickery  Agent:

### Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object on the grounds that Send should not be removed from the green belt because it provides a needed buffer between Woking and Guildford. The land at Garlick's Arch contains Ancient Woodlands and should thus be permanent green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

### Comment ID: PSLPA16/4095  Respondent: 10870529 / Catharine Rowden  Agent:

### Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I have been reading about the local plans for the Horsleys and Wisley Airfield and have various objections which I hope you will consider:

- I appreciate you have to build new houses but the number in the planning proposal is too vast. It needs to be reduced greatly.
- East and West Horsley needs to remain within the Green Belt for our generation and for our future generations to protect the heritage of the area.
- The impact of the number of houses on our roads, schools, medical services, utilities etc is too great. The current facilities will not be able to cope.
- I know there is a lot of opposition and I don't feel the planners are taking notice and ploughing ahead without considering the huge concerns.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/3545  Respondent: 10870593 / Maureen Blackburn  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Clockbarn

I object to building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.

Burnt Common / Garlick's Arch

I object to the proposed new interchange onto the A3 at Burnt Common because it would be disastrous for Send and the (A247) would be gridlocked all day.

I object to the proposed new interchange onto the A3 at Burnt Common because the Transport Evidence is incomplete and unreliable and shows there will be congestion because Send would be used as a cut through to the A3/M25.

I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.
Interchange with the A3 at Burnt Common

I object to a new interchange with the A3 at Burnt Common because Send would then have the traffic from 2000 houses at Wisley Airfield, 2000 houses at Gosden Hill and 1850 at Blackwell Farm.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3543  Respondent: 10870593 / Maureen Blackburn  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Firstly I should like to state that I am appalled that after my objection over two years ago (one of 20,000). I should have to repeat the process. I consider the process now to be totally undemocratic and I now have no faith at all in local and national government.

All consideration: of Green Belt; infrastructure issues; insufficient school places; road access.

I live in Orchard Way and access is very difficult one might say almost impossible currently when schools are opening and closing.

The proposed development of houses and travellers site are ludicrous considering the narrowness of Send Hill. The loss of Green Belt is a disgrace especially when it was pledged to maintain it.
I took nearly ten minutes to get from Orchard Way to Send Surgery because of the school run and parked cars which are permanently there.

This would be much worse if the Send Hill developments go ahead.

The infrastructure; Schools, parking access, doctor's surgery and access for fire engines does not figure in the plan.

**Send Hill**

I object to the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

I object to the proposal in the local plan on the grounds that the site is not large enough for the proposed use.

I object to the proposal in the local plan on the grounds that it would cause adverse impact on street parking.

I object to the proposal in the local plan on the grounds that Send Hill is a single track country road and too narrow to provide sufficient access to the site or accommodate the potential new levels of traffic the proposed development would bring.

I object to the proposal in the local plan on the grounds that Send is in green belt. The proposed inset is inappropriate due to its permanent green belt status.

I object to the proposal in the local plan on the grounds that Send Hill is a narrow road result in loss of a turning point for vehicles.

I object to the proposal in the local plan on the grounds that it would impact the nature reserve nearby. The proposed site is a quality green belt amenity area within countryside and would be spoilt by development.

I object to the proposal in the local plan on the grounds that the existing road and parking infrastructure is already inadequate or under pressure and could worsen with the planned development, reducing quality of life.

I object to the proposal in the local plan on the grounds that too many houses are proposed to Send/ Send Marsh are and the impact on traffic congestion and local services would be unacceptable.

I object to the proposal in the local plan on the grounds that the proposed number of houses potentially could result in 92 extra cars in Send Hill which is already suffering from congestion particularly at school run time.

I object to the proposal in the local plan on the grounds that this would cause loss of village identity, be detrimental to the community and increased flood risk.

I object to the proposal in the local plan on the grounds that a Wasteland Solutions environmental report on Send Hill dated March 2004 gave evidence of past ponding of water in the excavated area. Further development would disturb water table and increase risk of flooding to my property.

I object to the proposal in the local plan on the grounds that the proposed development site (A44) was used as GBC registered landfill site, not a quarry as listed as reference LLA 2081 in the local plan.

I object to the proposal in the local plan on the grounds that the 1963-8 Ordnance Survey maps of proposed site mark it as “refuse and slag heap”. It is therefore unsuitable for such a development on health reasons.

I object to the proposal in the local plan on the grounds that the 1971 Ordnance Survey maps of proposed site mark it as “refuse tip” prior to when proper licensing/registration was required. The date of the landfill works predates the 1999 EU Landfill Directive regulations. I therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials.
GBC has installed gas monitoring wells on site since July 2000. One well recording methane gas discharge.

I object to the proposal in the local plan on the grounds that a Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies the proposed site as GBC recorded landfill site Ref GU/11/LLC with type of waste not identified. The date of the landfill works predates the 1999 EU Landfill Directive regulations. I therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials.

I object to the proposal in the local plan on the grounds that a Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies proposed site GBC recorded landfill site Ref GU/12 with type of waste identified as “unrestricted”. This causes me concern as to what it does contain and dangers if disturbed.

I object to the proposal in the local plan on the grounds that both the Envirosearch Report RS1100201_1_1 dated 17th February 2004 and historical map data and information from GBC has identified site as landfill and has “areas of potentially contaminative industrial activities”. Development of this site would be a health hazard. The recent news reports of a child dying from seepage of contaminated ground following flooding prove that developing any such sites is a danger to health. The Daily Mail has also recently had an article on how the dangers of living near landfill site raises cancer concerns. The paper referenced a study published by the International Journey of Epidemiology which tracked 242,000 people living near landfill sites in Italy.

I object to the proposal in the local plan on the grounds that both the Envirosearch Report RS1100201_1_1 dated 17th February 2004 identifies “potential risk from landfill gas migrations” which I believe is a health hazard.

I object to the proposal in the local plan on the grounds that both Envirosearch Report RS1100201_1_1 dated 17th February 2004 concludes “potentially contaminative industrial sites identified from analysis” of Ordnance survey maps.

I object to the proposal in the local plan on the grounds that the Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005 Identifies changes to proposed site could cause potential ground water vulnerability to my property.

I object to the proposal in the local plan on the grounds that the Traveller Accommodation Assessment research, purported to have been undertaken in June-July 2012 by Mill Field Services, cannot be so. The Sittingbourne based market research company was dissolved in January 2011 according the government companies’ site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the final draft plans relating to Send and Ripley for the following reasons:

1) I object to the increase in the number of homes being planned which was 185 in April 2016 and has now increased to 485 and this has been done without any consultation.

2) I object to the removal of Send and Ripley from the Green Belt. Send provides a strategic buffer between Guildford and Woking with lots of areas which are used for local recreation.

3) I object to the 400 houses and the 7,000 sq m of industrial and warehousing at Garlick's Arch. This site was not included in the Regulation 18 draft and has not been subject to consultation.

4) I object to the new 4-way interchange onto the A3 at Burnt Common which would have disastrous effect on the traffic in Send and Ripley which is already congested and used as a cut through from Woking to the A3.

5) I object to the new proposal of building of 40 homes and 2 travellers pitches west of Winds Ridge and Send Hill. This is a new proposal and not included in the regulation 18 draft and has not been consulted upon. Development of houses is
inappropriate as the road is very narrow with no pavement or lighting. The land to be used for development was previously used for landfill waste which has to be vented. The area is very popular with dog walkers and is an area of beautiful countryside which would be spoilt by any development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

We are writing to you in order to voice our concerns and objections to the building proposals and changes which will we believe will be damaging our village life and destroy the character of our villages forever.

Our family moved to West Horsley 10 years ago. We moved from a really busy area (Walton-on-Thames) which has grown considerably since we first moved there in 1976, and We have witnessed the change in what was a ‘small town’ into an extremely busy large town, and not all for the better! This now seems to be the ‘future’ for The Horsleys.

- We moved to West Horsley village specifically for the green belt which surrounds us, this is now to be eroded, and you are taking us out of the green belt area! and the reasoning is for ‘exceptional circumstances’ which has not really been made clear.

We cannot believe that this type of development is being considered when in fact you have neglected (for many years) the current state of our roads in the village and I am especially referring to East Lane. We pay considerable council tax rates which have not been reflected in your surfacing and upkeep of the surrounding roads, and yet you:

- Propose an infrastructure for future development of the area which will certainly overload the capacity of the village (you can’t even keep the current roads in good repair so I cannot say I have much faith in the council!) This proposal will overload our villages.
- Many streets flood when we have torrential rain in the area and the drainage is inadequate at best – so with additional housing this will be a major problem.
- What will happen to our parking facilities in the village with all these extra cars (perhaps two per household).
- The GP surgery will be overloaded.
- Your estimated new housing numbers arising from a SHMA do not exactly match up to what appears to an inflated number of new houses needed which has grown considerable from your original plan. I understand that this is 70% higher that the official national estimate for population growth in the Borough. WHY!
- What effect will this have on the services in the villages. West Horsley households is estimated to increase by 35% this appears to be higher than any other single area in the Bourough. WHY!
- The development of 2,000 housing forming a village on the former Wisley Airfield will be enough in itself to overload our Horsleys.
- What will happen to East Horsley Village Centre if it is to be designated a ‘District Centre’ I fear this will make us very vulnerable for even future development. We will no longer be two villages but a small town, as you have also decided to blur the boundaries of the villages.

We do hope that our fears and those of our family and other residents will be taken into consideration before you demolish our villages; our way of life and extend the boundaries of the Settlement areas of Horsley.

<td></td>
</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

I object to the evidence given by the GBC with regard to Send and Ripley, there is no longer a need for more industrial space and the supposed number of houses needed has been greatly exaggerated. In fact the Green belt does not have to be built on at all. there are brownfield sites available, I believe this is being pushed through for purely monetary reasons, not for true need and does not protect the environment. The roads through Send cannot cope as it is, the proposed plan would cause a constant gridlock and would be unmanagable. This new proposal is just that, a new proposal and should be treated as such, and should warrant a full consultation under Regulation 18.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

I object to the evidence given by the GBC with regard to Send and Ripley, I feel that the scale of it is more that the area can cope with. The infrastructure is not in place to be able to cope with such a large development. There is already a lot of traffic through the village and at peak times is constant and very slow moving. The scale of the new plan does not take this into account and the roads would grind to a total stop. There is no proof of the need for the industrial space and the number of new homes has been based on exaggerated figures.

The subsoil of at least one of the proposed sites has documented unsafe landfill waste, which is currently vented. Other sites have permanent Green Belt status and include ancient woodlands and beautiful countryside, some of which stop Guildford and Woking from forming into one!
I object to the lack of infrastructure and forward thinking within the hugely over the top and totally unnecessary loss of Green Belt land in the new proposed plan for Send and Ripley. I already have to wait over month for a regular appointment with my GP and it is hard to get emergency/urgent appointments with a designated doctor. The road to the local school is always a nightmare to navigate and the schools are always fully subscribed. The roads in general are at virtual standstill at peak times and the traffic through the village never ends. How does the new plan take this into account and apart from a massive new road junction what plans are there to make this all work smoothly?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the way the proposed plan for Send and Ripley has been put forward. The new plan is totally different from the previous one and therefore be treated as a totally new plan.... with full consultation under regulation 18.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I strongly OBJECT to the proposal to remove West Horsley and East Horsley villages from the Green Belt and the proposed development of all the new homes in the area.

It will put even greater strain on our already limited facilities and resources such as schools, doctors, railway stations, and local shops together with the limited parking spaces in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
My concerns regarding the plan are as follows:

• Why are you planning to build on the green belt when not all brownfield areas have been utilised and other less contentious areas are available for development? Losing the green belt means this land is lost for ever and opens the door to never ending expansion. Should we prepare for a large retail park is built next on the outskirts of the village?

• The building of such high density houses in the village in quite a concentrated area will destroy what is a quiet and rural village, which has been in existence for hundreds of years. These developments clash in style and density to the existing character of the village and will change the village forever. These developments equates to an increase of approx. 35% in the number of the existing West Horsley households, an increase larger than any other in the Guildford Borough.

• Nowhere in the plan is there any provision for any additional infrastructure. With 533 houses, based on current demographics, will mean a huge leap in demand for public services which cannot cope. These will include:
  ◦ No singular development is large enough to ensure the developers invest in any of the infrastructure of the area.
  ◦ Schools place both Primary and Senior: If 50% have 2 children, where are the 533 additional school places going to be when the schools are already heavily oversubscribed?
  ◦ Transport and parking: If 40% of homes have a commuter to London (212 people), where are they going to park? There is no room at the station car park and here is one bus every two hours! In addition, at peak time the trains are already very busy.
  ◦ Drainage: Although an element of investment has been made to improve drainage in West Horsley the roads still flood. The already fragile drainage just will not cope and we will have road closures for weeks again into the village.
  ◦ Roads: The roads in the village are not build to carry more traffic, a 20% plus increase in traffic will not only lead to significant congestion but damage to the environment. Currently the roads are in poor condition and deteriorating, how will it support the doubling of traffic around the village?
  ◦ Lighting: There are approx. 235 new homes planned for on or just off East Lane, with the increased proportion of children in to the area the roads will be highly unsafe as there is no street lighting and completely inadequate foot paths.
  ◦ Medical: The doctors surgery is already bursting at the seams, if the mix of older people and families, as I would expect, moving to the new homes this is going to going to result in much more than 20% increase in patients.

• The Ockham development with 2000+ homes is almost going to double the number of homes, while there has been limited mention of infrastructure, this has not extended to the impact on road and load public transport network which will be swamped by the additional traffic.

Again it appears that the plan has been made, which is lacking in detail and thought for the current village feel. While these developments may help the housing shortage, it will destroy the villages of East and West Horsley by over developing them and irreversibly changes the character of them forever.

I trust that you will take my views and that of the other local residents into serious consideration when finalising the plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

This local plan is in danger of joining all the villages in to and extension of London suburbs, creating a huge urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9784  Respondent: 10871329 / Lyn Gargan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object that the present infrastructure and is lack of ability to cope with the people who are already resident here and that this has not been addressed. Our doctors, The Villages Medical Centre, is over stretched as it is. The local schooling is not able to accommodate the children who live within a reasonable distance to access their education within their community

I cannot see that this local plan addresses this and that there is perhaps another agenda that us, as local residents are not party to.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I strongly object to the fact that our roads already are fit to bursting at least twice daily, during the rush hours. The A3 is constantly blocked at the turn off to Guildford Town, the two lanes at the Wooden Bridge section are also constantly blocked and can take extended time to complete a simple journey. Having had to attend the Royal Surrey County Hospital for cancer treatment on a regular basis, this stretch of road became a nightmare journey for me, never knowing what time to leave and if I would get there for my appointments.

I object strongly to lack of the Guildford Planning Department and Local Plan developers to understand and take action on the A3 access to the M25 at Wisley, to the most heavily used section of this orbital motorway. How on earth do they propose to add a 25% increase in the homes and the traffic that that will bring to this section alone?

I strongly object to the increase in pollution that will be generated by the increase in traffic using, already crowded roads, to access the new A3 at Burnt Common.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing to object in the strongest terms to the building on green belt land in the area of Send, Ripley, Send Marsh, Burnt Common and the Clandons.

I object strongly to the changes in the Green Belt boundaries, This is not justified.

All the Green Belt sites locally meet the five purposes of Green Belt inclusion.
The Green Belt serves five purposes:

- to check the unrestricted sprawl of large built-up areas;
- to prevent neighbouring towns merging into one another;
- to assist in safeguarding the countryside from encroachment;
- to preserve the setting and special character of historic towns; and
- to assist in urban regeneration, by encouraging the recycling of derelict and other urban land

Answer (if comment is on questions 1-7 of the questionnaire): ()

Green Belt, Policy 2 at paragraph 4.3.15

Taking Send Business Park out of the green belt completely.

The Send Business Park on Tannery Lane has been to all intents and purposes a non-conforming user in an area of natural beauty adjacent to the river Wey navigation. To extend this use will change the very nature and fabric of the area.

The narrow road which allows access to the existing industrial site is already an issue for the community and to extend the site will cause traffic and snarl ups on an already heavily used main road through Send. A road that is used by school children to access their education, both by walking and by buses to schools outside the village. Making an even earlier start for the buses to get the children to school on time through the rush hour traffic.

Another very important consideration to take in to account is the destruction of the openness of this area, due to the Green Belt protection. In my view a wanton dismantling of an important environment that we, as residents and members of this community, treasure.

Please consider very carefully before you irreparably destroy this area for reasons that don’t adhere to the values and lives that we live.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/218  Respondent: 10871329 / Lyn Gargan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object strongly to the Policy A43 changes to Garlick’s Arch for the following reasons:

I wrote previously to make my thoughts known about the proposed plan and at that time thousands of other local people made their objections clear and this seems to have been ignored in the continued development of this plan.

I have not been convinced that there are exceptional circumstances for the Green Belt to be ignored and therefore changing the use to allow more development in the future without having to consult with the communities is not acceptable.

As I said in my opening paragraphs that the plans are unnecessarily excessive in the number of dwellings to be built. Changing the very nature and fabric of our community.

Send and Sendmarsh are on the flood plain, which is allocated as Flood Zone 2.
Zone 2 Medium Probability
Land having between a 1 in 100 and 1 in 1,000 annual probability of river flooding; or land having between a 1 in 200 and 1 in 1,000 annual probability of sea flooding. (Land shown in light blue on the Flood Map)

Taken from: Guidance
Flood risk and coastal change- Department for Communities and Local Government, Planning practice guidance and Planning system, 6 March 2014

The footings and excessive number of houses to be built will inevitably upset the water table and therefore could cause flooding in houses already built. This happens when the water accumulating on flood plain is displaced and has to find the easiest path. This will cause a knock on effect to so many areas, not least damage to existing houses. As has happened in Walton on Thames, West and East Mosley. As our climate changes and there could be more periods of heavy rain this will be a crucial aspect for the planning committee to address. Making sure that existing flood plains are able to do the intended role of holding access water in times of need.

The joining up of Ripley and Send will defeat the key purpose of the Green Belt, to keep green space between the communities for them to maintain their identity as a functioning community and not an amorphous mass of dwellings with no community identity.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Re: the latest changes to the Local Plan 2017 in respect of Garlick's Arch and the Burnt Common sites:

**My background:** We have lived in this house since 1981 and chose to live in this area due to its accessibility to the open countryside, the community and village atmosphere and facilities. We took into consideration the easy access for us to work in London and the environs.

Already this is becoming impossible to do in a decent time frame, as the traffic is excessive on the A3 and M25 between Junctions for the M23 and the M40. Adding so many more households with cars who will need to use these routes will make travel impossible. Taking into account the plans for a Town on Wisley Airfield, the plans for Merrow, this will only be exacerbated.

I am very aware that we need to provide more housing for young people to stay in the area, houses for older people to down size and social housing. This can be done within the area of the village envelope for Send and the village envelope for Ripley. Doing this without overwhelming the facilities and infrastructure already in place.

I object strongly to the Policy A43 changes to Garlick's Arch for the following reasons:

- I wrote previously to make my thoughts known about the proposed plan and at that time thousands of other local people made their objections clear and this seems to have been ignored in the continued development of this plan.
• I have not been convinced that there are exceptional circumstances for the Green Belt to be ignored and therefore changing the use to allow more development in the future without having to consult with the communities is not acceptable.

Answer (if comment is on questions 1-7 of the questionnaire): ()
**Burnt Common Plans London Road Policy A58**

I object to Policy A58 at Burnt Common because:

This had been deleted from the 2014 draft due to the strong objections put forward. But now it is back in the plan and the word minimum instead of maximum has been used. Why has the wording changed?

With empty buildings and sites available on the Slyfield and other industrial areas in Guildford it is not necessary to provide a minimum allocation of 7,000 sq m of industrial or warehousing buildings on this site.

Stated in the 2017 Employment Land Needs Assessment there is evidence of reduced demand to 3.9 hectares for the whole borough and not the need for the larger allocation of over 10 Hectares in the Send Green Belt.

**There is a need to understand why the council is going for the maximum projected use on all counts.**

The impact on the narrow roads and the surrounding access roads will be huge. Industrial vehicles needing to use this for accessing the proposed sites will exacerbate the accidents and fatalities from the exit off the A3 Burnt Common road.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPA16/2807  **Respondent:** 10871425 / Tim Collins  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ( )

I object to the size of size of the development proposed

The need for nearly 14,000 proposed new houses is not supported by evidence based research or scientific study. The figures supplied by the council are flawed in many respects and to this day serious questions are yet to be answered on the validity of the model used to calculate the area’s housing need.

I am especially concerned about the damage that will be caused to small local communities, in particular, West Horsley, East Horsley, Normandy, Ockham, Ripley, Send and Clandon. The number of new houses proposed for these villages is out of all proportion to the existing settlements.

I object to not protecting the Green Belt

The Green Belt concept was put in place to protect the countryside and provide space and enjoyment for all. To infringe on the Green Belt between the borough’s existing settlements will lead to a merging of towns and villages, removing open space and robbing future generations of our beautiful rural areas.

Over 70% of the proposed development is on Green Belt and flies in the face of the principle of the Green Belt. I’m extremely suspicious of the motives of the local council in their pursuit of this ill conceived plan and more so the ‘exceptional circumstances’ justification

I object to the congestion that development will cause to the local village roads and the lack of planned road infrastructure

The A3 and the village roads around Horsley are already congested. Many of the roads in Horsley are narrow, without pavements for pedestrians. To add more vehicles into the mix would have a damaging effect on the character of our rural areas.

I object to the expansion of commercial land in the urban area losing the potential for further housing.

There are sites available in Guildford Town Centre earmarked for further commercial and retail development which could instead support affordable small houses and flats for young buyers, close to the town’s amenities and existing infrastructure. The council have not demonstrated a need for further retail space when increasing numbers of shoppers are buying on line and the need for first time buyer’s properties is much greater.

I object to Brownfield sites not being re-developed for housing
Existing Brownfield sites and unoccupied properties must be developed for housing rather than reducing the size of our Green Belt.

**I object to development without improvements to local infrastructure**

Local facilities eg doctors, schools, transport facilities in Horsley are already stretched. Any development planned must take account of required improvements to local infrastructure. The number of homes currently planned for West and East Horsley is entirely unsustainable.

I would support limited new development in West and East Horsley, WITHIN the existing village boundaries and on existing developed sites like the Ramada Thatcher’s Hotel (Ref A36, ID 2044) and the Bell and Colvill Garage (Ref A37, ID 16) as long as the local infrastructure is improved to cope.

I would NEVER support the building of homes on the Green Belt and I object to the village boundaries being extended to increase the availability of land for housing. However, I would support the building of a new Raleigh School in East Lane (Ref A41, ID 2063) as I believe this need to be exceptional (the current site is not sustainable for the existing population of the village) and there is no other local site previously developed which would be large enough or suitable for a new school.

I urge the council to revise the local housing needs and amend the Local Plan so that development of Brownfield sites is undertaken and the Green Belt protected for future generations.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

**Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –**

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposed amount of new housing actually needed in the area has apparently been inflated by using the Strategic Housing Market Assessment (SHMA). This number which is only based on a consultant’s mathematical model and not revealed to the local plan, is then increased even further by Guildford Borough Council to give a highly inflated suggested population increase. This is potentially 70% higher than official estimates for the growth of population within the Borough. The scale would mean an increase in a huge 35% of existing West Horsley households. This is higher than any other single area in the Borough. It is very worrying that the Council are relying on such data without really knowing what the real figure would be. This is very alarming and worrying. We need clarification on this. Much needed housing affordable housing in some areas is much needed and inevitable but to inflate the housing number using dodgy data just should not be considered.

This development has been already refused planning by Guildford Borough Council and must not be allowed. Again the local infrastructure is just not able to cope with the potential of an additional 4,000 cars on local roads. This would have a hugely detrimental impact on to the villages of East and West Horsley, as well as the same problem outlined in item 3 of the overloading of roads, flood risks and added strain on station carparking, doctors surgeries and schools. This area is adjacent to one of the busiest and most accident generating stretches of the A3 as it joins the M25 and more traffic using this section would make matters worse.

I understand that due to a misreading of the type of facilities at the Station Parade, that this small village area could become reclassified as a “District Centre”, which would open it up to inappropriate development in the future. To visit the Station Parade would show that this is a thriving parade of village shops, including independent cafes and businesses, as well as bank, and chemist, and a small Budgens. The Budgens is small enough to be able to trade unrestricted hours on a Sunday. There is a library and family run butchers as well as two cafes, both independent. Any future development on a large scale would mean that the smaller businesses would be pushed out in favour of larger retail conglomerates. The whole nature of the village would be changed and we would lose a valuable and vibrant village centre. I understand that the decision to form a district centre in East Horsley would be made on the basis of a misreading of the nature of the facilities here. There is no room for any development here, and no room for the extra car parking that that would generate. This is a very concerning issue. Our village centre is just that, not a business centre.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The local infrastructure just cannot cope with any more housing or retail development in the area on this scale. There is a severe drainage issue in this area, with standing water already making driving hazardous during wet weather. The various schools in the area generate high levels of traffic, and the route through the villages have become rat runs from the A3 to the A246 and beyond. Try making a right turn out of Ockham Road South onto the A246 during rush hour. It’s a serious accident waiting to happen with cars attempting to use the driveway of the Duke of Wellington pub as a cut through to avoid the mounting queues of waiting cars. The proximity to the petrol station also situated on that junction makes it an extremely dangerous manoeuer. Increased traffic from more housing, and more businesses will be intolerable for the community. The local schools are stretched to bursting point and the doctors’ surgery is also overloaded and there doesn’t seem to be any mention in the local plan of improving these vital services.

Answer (if comment is on questions 1-7 of the questionnaire): ()

This would be a very detrimental leaving both the Horsleys exposed to the spread of urbanization from all sides. The two distinct areas of West and East Horsley would lose their separate identities and merge with each other, and the creeping tide of development would engulf from Effingham, and Bookham, and, if it were to go ahead, the new proposed development of over 2000 houses in Ockham. The green belt must not be removed from the Horsleys and the ‘exceptional circumstances’ that are required to be shown before taking this drastic action have not been demonstrated. The Horsleys lie adjacent to the area of the Sheepleas, a designated Area of Natural Beauty, Site of Special Scientific Interest, and Local Nature Reserve. To allow unchecked development to the south of this beautiful and special place should removal of the green belt be proposed, would be truly sad. The area is well loved by visitors from far and wide, not just from the local area, who come to enjoy the natural beauty of these ancient woodlands, and undisturbed meadows. But the other areas of more ordinary green space, the fields, the hedges, the patches of woodland, the wildlife corridors, are all very special, and deserve our protection. The protection of our fragile environment must be the number one consideration here. Once it’s gone it’s lost forever. Surrey is a under ambush from the creeping tide of urbanisation probably more than any other county in the country and we need to make firm decisions regarding it’s safeguarding NOW.

Answer (if comment is on questions 1-7 of the questionnaire): ()

To extend the boundaries into the village settlement, is just another sneaky way to allow more land to become available for development, and again will increase the size of our two villages to ridiculous proportions, bearing in mind the lack of infrastructure. No sound reasons have been given as to the actual reason for doing this, apart from making it much easier for future development to get through. This needs to be addressed further.

Answer (if comment is on questions 1-7 of the questionnaire): ()

• The building of such high density houses in the village in quite a concentrated area will destroy what is a quiet and rural village, which has been in existence for hundreds of years. These developments clash in style and density to the existing character of the village and will change the village forever. The increase in housing equates to an increase of approx. 35% in existing West Horsley households, an increase larger than any other in the Guildford Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
• Nowhere in the plan is there any provision for any additional infrastructure. With 533 houses, based on current demographics, will mean a huge leap in demand for public services which cannot cope. These will include:
  ◦ No singular development is large enough to ensure the developers invest in any of the infrastructure of the area.
  ◦ Schools place both Primary and Senior: If 50% have 2 children, where are the 533 additional school places going to be when the schools are already heavily oversubscribed?
  ◦ Transport and parking: If 20% of homes have a commuter to London (106 people), where are they going to park? There is no room at the station car park. There is one bus every two hours!
  ◦ Drainage: Although an element of investment has been made to improve drainage in West Horsley the roads still flood. The already fragile drainage just will not cope and we will have road closures for weeks again into the village.
  ◦ Roads: The roads in the village are not build to carry more traffic, a 20% plus increase in traffic will not only lead to significant congestion but damage to the environment.
  ◦ Lighting: There are approx. 235 new homes planned for on or just off East Lane, with the increased proportion of children in to the area the roads will be highly unsafe as there is no street lighting and completely inadequate foot paths.
  ◦ Medical: The doctors surgery is already bursting at the seams, if the mix of older people and families, as I would expect, moving to the new homes this is going to going to result in much more than 20% increase in patients.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Answer (if comment is on questions 1-7 of the questionnaire): ()

• The Ockham development with 2000+ homes is almost going to double the number of homes, while there has been limited mention of infrastructure, this has not extended to the impact on road and load public transport network etc.

No responsible decision can be taken with a view to such unwanted expansion of the village without out addressing satisfactorily the above issues. They are too important to be brushed over and ignored.

I trust that you will take my views and that of the other local residents into serious consideration when finalising the plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

My concerns regarding the plan are as follows:

- Why are you planning to build on the green belt when not all brownfield areas have been utilised and other less contentious areas are available for development? Losing the green belt means this land is lost for ever and opens the door to never ending expansion. How long will it be before a retail park is built on the outskirts of the village?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Local Plan for West and East Horsley

I write yet again to express my grave concerns at the local plan which has been put forward by the Guildford Borough Council. Especially in the proposed removal of East and West Horsley for the Green Belt area and the extension of the boundaries of the settlement areas of the Horsleys.

Overall I understand that there is a need in the borough for new homes and do not oppose development providing it is in keeping, in proportion and does not fundamentally change the character of the area. However the current plan for East and West Horsley is neither in proportion or character to the local area.

Surely it would be much better to focus the development in Guildford which already has good infrastructure and amenities? The brownfield areas of Guildford should be utilised first, where high density building fits and would be desirable. Expanding the boundaries of Guildford, where people have elected to live in a town, would not fundamentally change the character of the area. This could then be supplemented by smaller developments spread out throughout the villages of Guildford Borough, which would not have the detrimental effect that the proposed large developments in Horsley and Ockham would have.

Answer (if comment is on questions 1-7 of the questionnaire): ()

What right do you have to remove Ripley and Send amongst 15 other villages from the green belt when it was put in place to protect them and therefore their inhabitants. The scale of your proposed developments would seem to be completely disproportionate to the area and there will be little chance of halting further over development in the future - completely against the green belt policy. I believe the council is acting in an underhand way and misleading its constituents. The council should be protecting and valuing its 'green environment, not planning to destroy it.

- I object to a document that is over 1800 pages long and not user friendly;
- I object to all erosion of the green belt;
- I object to site A43 Garlicks Arch;
- I object to any "in-setting" of any villages from the green belt;
- I object to the disproportionate amount of development in our area of the Borough;
- I object to the last minute inclusion of new sites;
- I object to the lack of evidence for any alleged housing need numbers;
- I object to the further strain that will be placed on existing health care facilities
- I object to the further strain that will be placed on police services
- I object to the further strain that will be placed on existing roads and country lanes.
- I object to the council's disregard of governments commitment to Green Belt protection
- I object to the number of traveller sites proposed in a small area

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the above planning application on the following grounds:

- the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.
- No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.
- There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
- the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham.
- the threat the Local Plan as drafted poses to the historic rural settlements of Ockham, Hatchford and Downside.
- The plan calls for Ockham, a hamlet of 159 residences to be subsumed into development, on presently open land, with 2,000 dwellings and other urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- Hatchford, south of the M25, has some 60 residences off narrow Ockham Lane that would be greatly affected by the proximity of development.
- the potential harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development.
- The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions.
- Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).
- There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic. Any proposed secondary schooling would add additional congestion.
- The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.
- the issue of air quality not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.
- insufficient consideration being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heath Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Ripley and Send being removed from the Green Belt. This area of Green Belt prevents the joining up of Guildford and Woking and is against the principles agreed by local councillors and central government to protect the Green Belt. The rash of new development being now discussed would just be the beginning.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I write to object to the aspect of the Local Plan relating to Wisley Airfield.

1. This development will lead to the urbanisation of Green Belt land, a precedent that will lead to urban sprawl towards Guildford.

1. Any developments in this area will increase traffic flow in an area that is already often congested with M25 and A3 junction. This congestion spills into local towns such as Cobham compromising the amenity for local residents.

1. Local public resources are saturated. GP's surgeries, schools, police and transport are currently inadequate. Further population would require new resources.

1. Local towns would be overwhelmed with limited access roads, limited parking and would be less accessible for current residents.

1. To support any developments in the area of Wisley, Ripley and Send would require new shops and public amenities. This investment would need further development to justify costs, which would create out of town shopping areas. In turn this could reduce footfall in local towns.

1. Air pollution in this area is often poor being at the junction of M25 and A3. This section of the M25 is the busiest road in Europe.

1. Wildlife is profuse in these areas and any developments would impact them greatly.

1. With no public transport close to this area residents would be reliant on cars or buses. The roads in this area are unsuitable for larger vehicles or increases in volume.
1. Application 15/P/00012 was unanimously rejected by Planning Officers due to concern such the ones I have mentioned.

It is important that local views and expertise is respected and that the democratic process is respected.

Answer (if comment is on questions 1-7 of the questionnaire): ()

A39: Land near Horsley Railway Station, Ockham Road North

Site A39 is on Metropolitan Green Belt land and I do not believe that the Council has made a defensible argument for developing on the Green Belt. As such I object to the development of site A39 on these grounds.

In addition, any site which is developed must have adequate infrastructure to support it. This includes transport, schools and flood defence. This statement is relevant for all proposed developments. In relation specifically to site A39:

- The area around Ockham Road North is already highly prone to flooding, with the road prone to severe flash floods with any heavy rain. The gardens in the vicinity frequently develop large pools of water following heavy rain. Site A39 is acknowledged to be a flood zone and is extremely boggy after heavy rain. With a significant increase in impenetrable ground, due to the roads, driveways, patios and rooves associated with 100 houses, the current problem would become worse and in my view would present a significant risk of more serious flooding causing flood damage to homes downstream of the development. Given the incidences of flood damage across the UK in recent years, it does not seem to me to be at all sensible to build such a large quantity of houses on or close to a known flood zone. Any development of the site should only be considered if the developers were required to invest the sums required to result in an improved drainage system and lower risk of flooding in all affected areas after the development had been completed compared to the current situation.

- While the site is close to the train station the train service is already extremely crowded. With additional users from site A39 and other sites proposed in the Horsley and Ockham area, it is highly likely that the trains to and from Waterloo will be standing room only. The train journey is 50 minutes.

I object therefore to the proposal for Site A39.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In this policy GBC have taken no regard whatsoever of the differences in affordable housing need across the borough. This has significant consequences in East Horsley, which is the area with the lowest demand for affordable housing in the borough. Under Policy H2, 40% of all but the smallest development sites in East Horsley will be required to have affordable housing built upon them, irrespective of whether there is demand for more social housing in that area.

As a result of this defective affordable housing policy, a significant volume of social housing is likely to be built in places where it is not needed and offered to tenants who do not want to live there nor have jobs near that location.

I object to Policy H2 on the basis that it fails the test of sustainability.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There are significant shortcomings in the infrastructure of Guildford Borough as it stands today and the aggressive housing policy as proposed by GBC in this Document will exacerbate this problem.

The local infrastructure is not set up to deal with significant population growth and additional housing. Current examples in East and West Horsley include:

1. **Through roads already very busy at peak times**, have multiple pot holes, and have pavements which are either very narrow, do not exist at all, or are in extremely poor condition. This makes the village unsuitable for high volumes of any kind of traffic, let alone the volume of HGVs now using it. As a mother of 3 young children using the pavements daily to walk to school, it is unfortunately only a matter of time before the deteriorating traffic, road and pavement combination will result in a serious incident.

2. **Drainage system already very prone to overflows**, eg, on Ockham Road North from the railway bridge to the junction with East Lane, every time there is heavy rain, resulting in the road becoming akin to a river. Road repairs last year have done absolutely nothing to alleviate the problem.

3. **Schools already significantly over-subscribed** with local children

4. **Limited bus service.**

5. **Train service to London already very busy.** Additional commuters would make it likely that not everyone getting on at Horsley station at peak time would get a seat, despite the journey being 50 mins into London Waterloo.

There are no proposals in respect of any of the existing problems with roads, pavements, drainage, transport and schools.
It is inevitable that the proposed developments in East Horsley and in West Horsley and Wisley, will put further strain on the existing infrastructure. The failure to address the serious inadequacies of the existing infrastructure to meet the needs of what is there already is a serious omission in GBC’s Document.

Furthermore, and as I also described in my comments about removing East Horsley from the Green Belt, East Horsley is an attractive village for people wishing to relocate from more built up areas, due its village feel. That includes the village school, The Raleigh. Our family, and many of our friends chose to move to Horsley precisely because of the primary school, which manages to retain a village feel, yet is of ample size to provide the facilities required for children from Reception – Year 6. The existing school would not be able to cater for an increase in demand, and unless we wish to remove the current attractiveness of this village school, nor should we consider an increase in the numbers.

I therefore object to the infrastructure proposals contained in GBC’s Document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2: Green Belt

Policy P2 states that: “We will continue to protect the Metropolitan Green Belt.” However, through the housing policies set out in the Document, GBC appears to be in breach of this policy through the housing policies. Approx. 65% of the developments proposed by GBC are to be built on land currently within the Metropolitan Green Belt and there appears to be little attempt to reduce housing delivery in order to take account of this.

Paragraph 4.3.13: Proposal to inset East Horsley from the Green Belt

Policy P2 proposes that East Horsley should be inset from the Green Belt. East Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving the rural character and openness of this village, and this is a key factor in attracting people to relocate to the village, often from the built up areas of South West London. By train, it remains a commutable distance to London, and its rural setting is a key factor in attracting people looking to relocate. Development on the Green Belt would undoubtedly erode the attractiveness and appeal of East Horsley.

The Green Belt has existed for many decades, with good purpose and great success, and I do not believe there is evidence that this situation should be reversed at this time.

I object to the proposal to inset East Horsley from the Green Belt and request that this proposal is removed from the Local Plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2: Planning for the Borough

The policy sets out the objective of adding 13,860 new homes to Guildford Borough over 2013 – 2033 period of the Document. This is 693 new homes per annum and represents a net increase of 25% in the housing stock of the Guildford Borough. This is quite staggering given the Office of National Statistics is projecting a population increase of 15% for Guildford Borough over this same period. For West Horsley, this would represent an increase of 35% on existing households which is greater than any other area within the borough.

I believe development over this period should be commensurate with such growth and urge GBC to ensure new development in any given village is proportional to the Borough’s need (c. 15% over 20 years) and in keeping with the existing environment.

I object to the housing targets set out in Policy S2

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I think that building a road tunnel under the A3 at Guildford is a very good idea. It would materially help traffic flow through the town centre. It would make the A3 much safer as the current junctions are not very safe. Every time there is an accident there the town centre is gridlocked by traffic seeking an alternative route.

It would be so good to have the current A3 acting as a road for local traffic to avoid the town centre. Just widening the existing A3 would not do this.

So much of any successful expansion of Guildford depends on sorting out the traffic and esp the gyratory system. Sorting the A3 is a major step in the right direction

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
We object to Guildford Borough Council’s draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:

- destroy views from the Hog's Back ridge - a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- increase tailbacks on the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford's pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

I write with regards the proposals to remove Send from the Greenbelt protection and the plans for excessive and massively impacting developments in Send and surrounding areas.

Please share with the planning inspector.

I object to the appalling suggestion to remove send from the Greenbelt. There is no good reason for this and if the Greenbelt protection were to be removed this would simply benefit the developers. Why ever would such a crucial protection to our green areas be removed? There is no justification to do so, no need and no wish from the local area. I feel let down by the council that this is even suggested as a solution for them to bypass the protection and over develop long protected areas to achieve a volume of houses not even needed in the area because they cannot make use of brownfield sites as they should.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed development at Garlicks Arch. An area which floods, is covered in lovely old woodland should not be bulldozed to over stress the local infrastructure and put in industrial areas where they should not be. What is the purpose of Sly field industrial estate if not to accommodate industrial needs? This is another dodgy deal being done to benefit a developer with no concern to the Greenbelt or the impact on those who live here.

Page 207 of 2167
I object to this proposal as anyone who lives in Send who uses Tannery Lane knows the small rural lane is utterly unsuitable for further developments to take place, turning into Send Road from Tannery takes an age and is difficult to exit to Send Road. You have already allowed, despite objections which I assume were again just ignored, a marina no one wanted and which we all knew was a precursor to further development requests. Not only have we been ignored but you have this time decided to INCREASE the number of houses for the site by 30 odd%. The impact on traffic, the green belt, amenities and the area itself makes this a completely unacceptable development.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

I object to this and simply don't understand how the protection of green belt in this manner can be allowed. what possible exceptional circumstances cam be shown to make this acceptable? None. The inclusion now of pitches for "travelling show people" is a clear attempt to drive this through roughshod despite the thousands of objections you have received as by suggesting there is a need for travelling show people pitches is cynical use of a minority, by suggesting such a need even exists. You should be ashamed at your blatant attempt to bypass the protection of a lovely area to get your way and build some 400 homes to meet some central government quota which takes NO consideration of impact. This is unacceptable and should not proceed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58
I object to this (previously removed) item being brought back, bigger and more impacting than even before, despite the huge volume of objections which led it to be removed previously. Its been brought back as a minimum of 7000 sq m of warehousing and appears to show utter disregard for the unnecessary damage to the green belt (which I believed was protected but which the GBC seem to feel is just protected in the past to make it available for them to squander now and future generations will simply be deprived of if GBC don't step up and take a better/correct stance and protect it). Why is this even on here? I presume as a concession, of the line of "Lets add something back in which we had a load of objections to before and removed. When these people complain again we will concede and let this unnecessary one go, and they will take the other ridiculous plans getting rubber-stamped better", GBC need to remove this plan once and for all. The 2017 Employment Land Need Assessment shows less of this type of property is needed and Slyfield has land and vacant buildings to accommodate such a need, if one even appears! Stop causing upset and concern for Send and surrounding villages and accept this is not needed, impacts the locals and the environment/green belt and is not even needed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I Object to the proposal to inset Send Business Park from the Green Belt. Its in the greenbelt, clear and simple. Coming up with sneaky ways to circumnavigate protection for the Green belt seems to be GBC's plan to force through development which will cause long lasting devastation to the local villages and all ton meet some quota someone has made up. GBC should be defending us from this short sighted approach, protecting the green belt for us and for future generations and standing up for us. There are son many reasons this should not proceed. I am not sure how many times we can mention that Tannery Lane is a small rural lane with poor access and it simply cannot accommodate more traffic. Send and surrounding villages deal with a lot of traffic and to suggest adding more by finding a way to get this out of the greenbelt (despite the fact its clearly within and surrounded by greenbelt) is unacceptable. Its the thin edge of the wedge and you know it... you start with this and then it simply opens up the option for further development. GBC needs to step up and stop ANY intrusion or impact to the greenbelt.

Please share with the planning inspector.

I truly hope you do listen to the objections, to the locals and the overwhelming concern for the impact to our villages and the green belt. The area cannot take the level of development you are proposing and there is simply not a need either. Stop this and put these plans to death. Do your jobs and protect the local area.

I am extremely disappointed to need to write to you once again on the subject of the ill conceived local plan and its detrimental effects on the village of Send, surrounding villages, residents, infrastructure/amenities and the Green Belt.

I can only assume that the council has no regards for local impact and the protection of the green areas for future generations as GBC have seemingly ignored us and is determined to push on despite the hundreds of previous objections by locals.

That is frankly appalling and this latest "revision" is a clear attempt to side step all those previous objections, restricting us to only make objections to the amendments. I am sure the council is hopeful that by dragging this out they may wear everyone down - or simply proceed anyway after constant reissues by finding sneaky ways to fulfill their objectives.

This is all made the madder when there are brown field/previous use sites like Wisley Airfield which are a far more suitable location for some new housing, if the council is determined to ignore the local impact, at least that's not green belt.

Anyway, here we are again, registering objections to a plan so impacting that surely someone in power is already aware it is senseless damage to the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
What is more unsettling is the revelation that the Council is unwilling to release the evidence base it has used to justify the need for 14,000 new houses in the Borough. Surely if the Council was confident in the accuracy of its proposed housing figure it would have the courage and conviction to release the information. Not to do so simply fuels an understandable suspicion that the 14,000 figure cannot be justified. Furthermore, I understand that the reason given by the Council for not releasing this information is that it is the “intellectual property of a third party and is commercially sensitive”. This is ridiculous. Are we really expected to believe that this third party, GL Hearn I believe, whom the Council has engaged owns the evidence and whatever models have been produced to derive the 14,000 figure? If this is true then whichever Council employee agreed to this has made a monumental procurement “cock-up”.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
As a resident of West Horsley you will not be surprised to learn that I vehemently object to the Plan's proposals for building more than 2500 new homes in this vicinity. It is Green Belt land and should remain so. There is no justification for development on this scale in this area, and there are certainly no "exceptional circumstances" to allow the Council to build on the Green Belt here.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

As a resident of Send Road I must object to the planned junction at Burnt Common/ A3 and taking the surrounding areas out of the green belt is a mistake and a disaster for Send. It's obvious that this is going to increase traffic on an already overcrowded road, there seems to be no plans to deal with the congestion as it is already without adding more danger for pedestrians and cyclists and of course added pollution.

I also must object to the inset of the green belt, what's the point of green belt if it can be removed when it suits. The protection of the green belt just about keeps Send as a village still, which is why most people like to live here in the first place. As a life time resident of Send I feel that these changes are being forced upon us without considering local people's views. Obviously we need more housing but not at the expense of the green belt and inconsiderate plans for the people living on a increasingly busy Send road.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed development in Normandy of approximately 1,100 homes as well as a secondary school and retail space contained in the GBC Local Plan 2016 on the following grounds:-

1. The development is on Green Belt farming land of outstanding beauty and there has been no sound reason put forward why this Green Belt need be used in Normandy. The proposal is developer lead and an easy solution to the GBC's problem of building more houses in the area. There is other scruffy land in the area which would be more suitable for development but has not been put forward as it is not owned by the developer.
2. The proposed secondary school is not required in the area west of Guildford as there are sufficient places now, and in the future, even with development west of Guildford, in the present schools, Ash Manor and King's College.

3. If any development takes place in the Normandy area the road infrastructure will require improvement prior to any new homes being completed otherwise gridlock will occur much more frequently than at present. A priority must be a bridge over the railway at Ash. The rail service to Guildford is also inadequate and a new station will be required at RSH as a priority. Sewage is also of concern as I understand that all the pipes in the Normandy are past their use by date.

4. There is already little 'open space' between Guildford and Aldershot. This development in Normandy would be another 'nail in the coffin' for the open space.

Attached documents:

Comment ID: PSLPS16/2619  Respondent: 10873633 / Monika Brewer  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.
- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
2. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
3. Opportunity (3) should be common to all sites and is not unique to this site

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
weeks’ notice and without consultation. I also object to the failure to include the Town Centre Masterplan, within the new proposed plan.

I object to all development at Garlick’s Arch, as the site is covered in ancient woodland, which dates back at least to the Tudor period. The ancient woodland is of particular conservation sensitivity.

I also object to the development at Garlick’s Arch as it is prone to flooding and is land which provides a “run-off” from the A3. It is also land which is higher than and adjacent to Send Marsh, which, as its name suggests, has also been subject to flooding in the past and could also be adversely affected by the Garlick’s Arch development.

I object to the proposed industrial development at Garlick’s Arch as the latest Employment Land Needs Assessment 2015, shows a reduction of 80% in required employment floor space from the previous draft plan. There is also a 40ha site available at Slyfield, a site outside the Green Belt.

I object to the Clockbarn development, due to inadequate access and to the volume of existing traffic on the A247 through Send, which this traffic will have to feed into. This would be in addition to the 64 houses given planning permission at the Tannery and to the marina development.

I object to the proposed development of 40 houses at Send Hill, due to the further destruction of Green Belt land and the fact that the subsoil of the existing site contains documented unsafe landfill waste, which is currently vented. The proposal to include two travellers pitches is also inappropriate due to the insufficient access to the site.

I object to the destruction of Green Belt land without proper consideration to the irreversible damage to beautiful countryside and ancient woodland, without consideration to the 2015 Town Centre Masterplan, without consideration to a proper consultation period, without consideration to the need for proper infrastructure in radically changing Green Belt villages, without consideration to the need of additional support facilities and without the consideration to the complete destruction to the face of Green Belt villages.

As a resident of Horsley and frequent user of facilities in Ripley and Clandon, I am writing to object to your plans for both villages.

1. Object to any expansion of the Green Belt. The council has repeated said that it will protect the Green Belt. The Green Belt should be considered sacrosanct and be left unaltered for our future generations, thus meeting the original intention of the Green Belt. This creep in reducing the Green Belt is unacceptable.

2. I object to the developments in Horsley, Ripley and Clandon which are proposed without satisfactory consideration to their impact on local facilities and infrastructure. Local roads, schools, medical resources, shops, railway station parking, and parking for shopping cannot support the intended expansion.
3. I object to the Wisley airfield development owing to the pressure that will be caused to local facilities and infrastructure. Local roads, schools, medical resources, shops, railway station parking, and parking for shopping cannot support this intended expansion.

Comment ID: PSLPS16/6571  Respondent: 10874017 / Diane and Tony Cuff  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to the ‘large strategic site’ approach to meet the housing needs where these sites have such an overwhelming visual impact on the local area. (NPPF 11 stated purpose: Conserving and enhancing the natural environment).

Boarding the North Downs AONB, Policy sites A26 and A46 would be very noticeable developments and easily seen both day and night. (Design Policies- Policy D4: Development in urban areas and inset villages).

‘Brown field sites’ and ‘land-banked sites’ must be fully utilised before any erosion of Green Belt is considered. (NPPF stated purpose).

We disagree with the current SHMA document being used as basis for housing needs. University student accommodation appears to distort housing needs. Brexit may influence the university student numbers.

The approach of making small adjustments to the settlement areas of each village and town, throughout the borough, should be strongly considered. Small developments can be absorbed easily within the existing area with very little effect on the environment, visual impact, transportation needs and all the supply services. The addition of small numbers of residents can easily integrate into the community and lead to a stronger more vibrant society.

We object most strongly to the proposed development designated ‘Policy A46 Land to south of Normandy and north of Flexford’. This is a developer led proposal that is totally out of scale to the surroundings.

Normandy and Flexford are small countryside villages. There is not the infrastructure to support the proposed 70% to 100% increase in housing development. Normandy and Flexford should be considered as separate residential areas. Creating such a large block of housing would totally destroy the easy open nature of the villages.

We object to the proposed new secondary school as two of the nearest local schools are under subscribed. A new school with 1500 places away from the main catchment areas would mean the majority of students travelling into Normandy and undoubtedly a large percentage would use the car for convenience. St. Peters and County schools have approved expansions. Expansion to the closest existing schools would be a far more cost effective solution. (NPPF stated purpose). The access roads to/from the proposed development are the C16 Westwood Lane and D60 Glaziers Lane. These roads will not cope with the additional car movements from ‘school runs’ and residents work travel during peak hours. Westwood Lane has a dangerous single lane railway bridge with limited headroom and Glaziers Lane has an angled hump backed bridge. These two roads feed onto A323 Aldershot Road to the north and the A31 Hogs Back to the south. Both these roads are notorious for their queuing at peak times.
It is an unacceptable practice for a developer to use the inclusion of a school as a ‘sweetener’ to justify commercial interests.

The massing of the proposed development does not relate to the existing open nature of Normandy village. (Design Policies- Policy D4: Development in urban areas and inset villages).

We should try to maintain the setting and special character of them. (NPPF stated purpose).

We object that this developer lead proposal gives no consideration to the unrestricted sprawl of large built-up areas. (NPPF stated purpose).

We object to the creation of a development corridor from Guildford to Aldershot (Waverley) boundary along the A323. It would be devastating to nature and the environment. We must prevent neighbouring towns from merging into one another. (NPPF stated purpose)

Normandy should have limited development to secure nature conservation interests and retain the attractive landscape between the urban areas of Guildford and Aldershot. This proposal lies within the zone of protection to the Thames Basin Heath Special Protection Area so consideration must be given to its protection.

We object that this proposal gives no consideration to assist in safeguarding the countryside from encroachment. (NPPF stated purpose).

This site is not just ‘grassland’ as stated. It is using viable class 3 agricultural land that must be maintained and used to help feed the growing national population. As a nation we cannot and must not rely on imported products, they will become unsustainable and unaffordable.

The roads, the electrical, gas, telecommunications and water supply and drainage are constantly under strain to maintain current levels of demand. Breakdown of supply is frequent. With the added hard standing and reduction of natural water soak away flooding will be far worse than present levels.

Health care and emergency services are at full capacity.

The settlement areas of Normandy and Flexford should be as deemed by the existing properties. We object to any major change.

The Core planning principle that planning be genuinely plan-led, empowering local people to shape their surroundings must be considered.

We must not use a convenient cheapskate option today that our children and future generations will pay heavily for and never recover from.

I object to the development of over 2,000 houses at Ockham Village. The impact on the narrow roads in and around our villages would be intolerable. The local train stations at Effingham and Horsley could not cope with any increased demand. I commute daily into London from Horsley, and the car park is already overflowing given current requirements, so I am intrigued to understand how the plan supposes the implicit, major increase in rail users will be accommodated within the existing infrastructure.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

SITES. I object to all policies involving building in the Greenbelt as NO EXCEPTIONAL circumstances have been shown, excessive numbers of houses have been proposed, and the clearly expressed views of residents have been ignored. I especially object to Policies A36, A37, A38, A39 A40, A41. The number of houses far exceeds local needs, and the density is excessive. There is no local support for these. The COLLECTIVE IMPACT of these together with the WISLEY development has NOT been considered. Key infrastructure is lacking. There is no adequate provision made to increase the waste water capacity. There is a lack of schools, and health centres. The doctor’s car park is always full. Most of the local roads are narrow with no pavements or only a single one. Already we are frequently forced to drive onto the pavement when lorries are driving through the village. Cycling is very dangerous and we have many cyclists coming from London at the weekends and during the week practising for the Prudential road race, or just for the pleasure or cycling the Surrey Hills.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
SITE A35 WISLEY. A very, very, very strong objection to this. It was rejected by the council already, I cannot see why it has been included. This is not a brownfield site, it is supposed to be a Surrey County Council waste site. A lot of good farming land will be lost which will have an enormous effect on the local wild life. The extra number of cars the 2000 homes will have on the A3/M25 and local roads will be enormous there are already traffic jams at the A3 Wisley roundabout, and M25 junction 10 roundabout, often made worse when the RHS gardens have a special event on or even in school holidays. In order to give the proposed residents of the new town access to the Southbound A3 the proposal is to make Old Lane from Effingham Junction one way from its cross roads with the Ockham - Cobham road this will allow entry onto the A3, but not exit. Exiting onto the A3 here is slow and can be dangerous as you are faced with two lanes of traffic coming fast from the motorway roundabout, followed immediately by another two lanes of fast moving traffic coming off the westbound lanes of the motorway. If lucky you can get out before the next lot of fast cars arrive. I can see long queues. I also object strongly because many people come off the motorway to get home to Effingham Junction, Horsley and also Bookham. If the road is one way they will have to drive through East Horsley to get where they want to go. I also object to the road closures they want to make. I object to this plan because there is no public transport. Both car parks at Effingham and Horsley stations are already full each day. The flooding that occurs often as you approach the A3 roundabout from Ockham/East Horsley will be worse as water runs off roofs and roads. Where will the sewage go. Who will have to pay for the cost of building a new treatment plant. Last but not least there will be an unacceptable increase in air pollution. These are all my objections to the proposed draft plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to policy D4 (development in urban areas and inset villages) I object because there is no commitment to expand social housing or accommodation for people who cannot afford the so called affordable homes. The objectives for inset villages are cancelled out by plans for excessive growth.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13663  Respondent: 10874273 / Margaret Pearce  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E8

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy E8 (District centres). Too much scope to expand rural district centres is given which will be able to justify major housing expansion across countryside (these) will spoil the character or the Horsley and Ripley villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy P2 (green belt) they seemed to have ignored what the impact of building on Greenbelt land will have on water catchment, air pollution and bio diversity. What will the effect of the cars from 2000 new houses on the proposed Wisley development do to the already high air pollution levels along the A3/M25, Ockham, Horsley area. The loss of so much Metropolitan Greenbelt will not help the air pollution of London. Providing some bit of greenbelt on the other side of Guildford even further away from London will not help, neither will people want to travel there. The only people who it helps are the Ex., and Present leaders of the council who come from Ash, the new proposed Greenbelt.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? (), is Sound? (), is Legally Compliant? ()

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site Policy A35. The council have already rejected building planning for the Wisley site on fourteen reasons, one of which is because it is in the Green belt. I cannot see how they can now include it on their new revised local plan. I object to the inclusion of building on the Wisley site. Policy D1. I object to the inadequate provision of infrastructure investment as I have stated before. I shudder to think of the increased traffic queues in both directions along the A3 and M25 junction, and on the great increase in air pollution which is already high in this area. I also object to the fact that they want to close some of our local lanes and make others one way. Finally I repeat again that I strongly object to the latest draft of the Guildford Borough Council local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? (), is Sound? (), is Legally Compliant? ()

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2 I object strongly to the insetting of both Horsleys from the Green Belt. A large percentage of new housing is proposed to be built in the greenbelt and this land is mainly in the North-East of the borough which is closest to London. This greenbelt land was meant to help keep the air clean and fresh and prevent encroachment of the metropolitan area. I object to the proposed new change to the settlement boundaries to the South (part Policy P2).

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford Borough Council’s plan to allow up to 5,000 houses in the beautiful Green Belt of Ripley, Ockham, West Clandon and Send appears to us to be ill conceived. We cannot understand why the Council would suggest these developments. When we wrote to G.B.C. regarding the proposed Wisley Airfield development we pointed out that utter chaos on the local roads would inevitably ensue if that development went ahead. Only people without knowledge of the area would suggest building hundreds of houses to add to the already over-burdened roads.

As lifelong Conservative supporters we are utterly bemused by the actions of Guildford Borough Council. Admittedly the country needs more housing but why impinge on the Green Belt to achieve this goal? Surely it would be more sensible to extend existing built-up areas and estates where there are already shops and schools and where the roads can be extended without causing excessive congestion. Why ruin an attractive village such as Ripley because of ill-thought-out plans? Woking traffic should not have to go through Ripley from the A3, and how does the Council think the extra traffic they are proposing to incur is possibly going to cope?

Surely Guildford Borough Council must look further afield and make sure the Green Belt remains green.

I object to the final draft plans relating to Send and Ripley for the following reasons:

1) I object to the increase in the number of homes being planned which has increased from 185 in April 2016 to 485 and this has been done without any consultation under Regulation 18.

2) I object to the removal of Send and Ripley from the Green Belt. Send provides a strategic buffer between Guildford and Woking with lots of areas which are used for local recreation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing in support of Policy A21. (Westborough Allotments)

My husband is co-owner of one of the allotments and I wanted to get in touch to stress how important this allotment is to my family and the local community.

This allotment provides fresh fruit and vegetables for my family which not only saves us money but ensures we have a healthy diet. There is actually so much produce that grows that we also hand this out to neighbours, friends and people at church so they can also enjoy.

I also want you to be aware of how much enjoyment this allotment brings our family, especially my dad (the other co-owner). He visits it daily, often early in the morning and benefits enormously from the quiet, sanctuary and peace that the allotment brings him. He has a very busy job, works long hours and is constantly in demand. The allotment is his place he can escape to and just enjoy being in the fresh air and enjoying his gardening. It is wonderful that it is so close to home too. He also enjoys taking the grandchildren to visit the allotment and teaching them about how things grow. They love to visit and help to pick and eat the produce.

It would be a tragedy if this allotment space was taken away. Having been there since WW1 it has an historical place in our local community and should be protected as a rare area of green space. There is a real sense of community amongst those who have an allotment and that should be respected. I know there is also a have a self help group WASHA which runs educational groups for local school children and novice gardeners.

Allotments are so important for the green space of a city and should be protected at all costs so future generations can enjoy them as much as past generations. Therefore I also support Policy I4.

I also want to add that the vehicle access to the Westborough allotments is also crucial. It is so important to be able to access this area and park. Not only to be able to bring equipment and take produce home easily but also that people often visit early in the morning when they might not feel as safe walking out and about.

I urge you to take serious consideration to the points made and protect these allotments for the good of our community, health, green space and future generations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing again to register my continued and very strong objection to your plans for housing development in the Horsleys in response to the Proposed submission local plan: strategies and sites June 2016. As a long standing resident of West Horsley, I continue to be appalled by your plans for our village and the surrounding countryside. My objections are:

- Housing Numbers - our village infrastructure cannot meet the proposed additional number of dwellings. Our drains, our water supply and our roads cannot cope with the proposed number of new homes. Building this number of homes will lead to significantly increased flood risk - we already suffer from this issue now. In addition, more cars, means more pollution, and more queuing for local amenities.

- Negative impact on services. Our local schools are already full so local people would have to send their children outside the area to go to school. That is unacceptable. Our medical centre is full, one has to wait for an appointment if you are ill. Building more homes in the village will make this worse. That is unacceptable and ill thought through.

- Green Belt - This proposal would fundamentally change the character of the village. My understanding of The National Planning Policy Framework is that it requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is not an exceptional circumstance in law. So the Green Belt boundaries should not be changed. To remove most of the Horsleys (and other villages in the Borough) from the Green Belt would change the nature of this area of countryside forever and would eventually merge historic and separate villages. This is outrageous and unacceptable.

Brownfield Sites - there is considerable land available in Guildford which could be used for housing (e.g. Surrey University, vacant commercial sites, derelict land. This should all be used up before any consideration is given to destroying the character of our village(s).

In summary, you have got this wrong. The NPPF requires that any new residential developments respect the character and density of housing in the area and should be limited by the availability of local infrastructure and facilities. For the reasons I have given above, you are not complying with the policy framework. I continue to object to the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the removal of the Former Wisley Airfield from the Green Belt

I object to the impact that such a development will have on the environmental and ecological value of the site.

I object to the continued inclusion of a site where the planning application has already been unanimously rejected by GBC's Planning Committee.

I trust that these objections will be fully considered and that the Former Wisley Airfield, (Three Farms Meadows), Allocation is removed from the Local Plan with immediate effect.

### Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Once again I object to the above plans for many reasons, too numerous to list.

The major objections I have are:

1. The proximity to the A3 and M25 that are heavily congested even now.

   The narrow lanes around Hatchford, Downside, Ockham and Cobham will have to cope with even more traffic in addition to the heavy use by cyclists and horse riders. Walkers, already restricted, will have little chance to enjoy their local area. Any problems with traffic flow on the above road and motorway away results in streams of vehicles diverting onto the local lanes.

2. I object to the higher level of air pollution that will result from the addition of the houses and flats and their associated vehicles.

   Pollution levels are way above European recommendation already and a worry for people living in this area.

3. Local facilities such as schools, doctors' surgeries, shops, railway stations and their car parks are already over subscribed.

4. I object to the use of the Green Belt and the subsequent threat to wildlife.

5. The proximity to RHS Wisley where visitor numbers have increased dramatically over the last few years and will continue to do so as Wisley expands its facilities and events.

   To sum up, I believe this plan is unsuitable for the location and not fit for purpose.

I object to the proposals for the Wisley airfield site (site A35) - totally disproportionate in size to the surrounding settlements and too dense relative to surrounding areas. There is a real risk of "them and us" emerging given the strength of local feeling against this development. I think it could cause real unrest in the area and potential discord between new and old residents.

I object to the Garlick's Arch proposal (site A43) for the same reasons.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Site A57 for traveller pitchers in Rose lane is part of an ongoing planning issue where planning authority has been repeatedly abused and ignored. For this reason, amongst others, it should be rejected: accepting this proposal simply sends out the message that ignoring Guildford Borough planning authority earns you no penalties and eventually gets you what you want!

---

I object to policy I1
- infrastructure not been thought through at all, evidenced by the fact that at a meeting some time ago, when I queried how the Borough were consulting with the Highways Agency, the representative said they hadn't done so yet...this should not be consultation it should be arm-in-arm working. We are talking about some areas which RELY totally on the road network.

- given there will not be real affordable homes, assume two car households for dwellings where you can expect a couple/family to life

- infrastructure needs to take into account problems on local roads, as well as major trunk routes. Both have a huge effect on people's daily lives.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am also far from convinced that the transport infrastructure has been properly thought through.

I object to the part under sites which include any building on the greenbelt.

- Residents' views not being taken into account, there is huge strength of feeling here. Where are these exceptional circumstances for greenbelt building?

I object to the proposals for the Wisley airfield site (site A35) - totally disproportionate in size to the surrounding settlements and too dense relative to surrounding areas. There is a real risk of "them and us" emerging given the strength of local feeling against this development. I think it could cause real unrest in the area and potential discord between new and old residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Whilst I am sure a great deal of energy has gone into designing the online questionnaire and related events, when you stand back from it, this consultation is exclusive. The very fact that you have to write in with your comments referencing "which section, page, policy or map" you are referring to makes it very difficult for many people to comply with and therefore contribute their views. I am used to wading through papers, but to be honest I was a bit overwhelmed when I sat down to this late one evening last week.

If you stand around the village high streets and schools, you will sense and hear a great deal of fear, confusion and helplessness about large developments adjacent to small villages, in particular from those not "into" all of this. You may not receive their written views. I hope local politicians are aware of this.

Comment ID: PSLPA16/2878  Respondent: 10876225 / Charlotte Hawkins  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a resident of Send my objections refer to the planned developments in the immediate area. Of particular concern is Garlick's Arch, Clockbarn Nursery & Winds Ridge developments.

- I OBJECT to any area being removed from the Green Belt. The Green Belt was intended to offer permanent protection from development. There are no special circumstances to justify abandoning it. The Government is breaking a manifesto pledge to protect the Green Belt.

- I OBJECT to the removal of Send in particular from the Green Belt. This means land which would previously have been unlikely to receive planning approval would now be at risk of development. It therefore paves the way for much greater development in the future in an area of countryside that should be protected.

- I OBJECT to the fact that removing areas like Send from the Green Belt will urbanise huge sections of the Borough - from Woking through to Guildford.

- I OBJECT to the fact there has been a failure by Guildford Borough Council to research and utilise available Brownfield sites before considering development on the Green Belt.

- I OBJECT to a disproportionate development in one area of the Borough.

- I OBJECT to a huge proportion of new homes in a small area
- I OBJECT to the fact that such a considerable development is being placed in an area with insufficient public transport provision nearby to encourage people to avoid using cars. Brownfield areas in Guildford near transport hubs should instead be developed.

- I OBJECT to the lack of consideration given to the increased traffic on already busy areas - eg in the centre of Ripley, and also by Tannery Lane in Send.

- I OBJECT to erosion, or development directly adjacent to, areas of protected or ancient woodland.

- I OBJECT to the lack of immediate provision for new schools or sufficient extra school places in an area that is already under pressure for places.

- I OBJECT to the lack of immediate provision for the increased pressure there will be on Doctors surgeries where there is already a significant wait for appointments.

I request my comments are shown to the Planning Inspector who will make the decision on this. Please confirm receipt of this email. If you need any further explanation or expansion of any of the comments please contact me.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Wisley Airfield, so called during the war, was to be put back to farm land, it is therefore not to be used for housing. If this does take place, the whole area will suffer from over crowding, the roads, high pollution levels, schools, doctors surgeries, etc. also it is a high area, very windy and not suitable for housing. We cannot cope with more traffic. The Guildford bye-pass is always at a stand still around 4.0 p.m. backing up all around. The M25 is impossible to get on to and then sometimes at a stand still as well. Trains are so full sometimes impossible to get on. How can we possibly expect to accommodate more people when we do not possess the infrastructure.

I agree we do need more housing, but this should be where they can lay new railways and roads to London and around, away from the already congested SE, or Brown field site within towns and cities.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the amount of planning for new builds in the Ockham, Ripley and Horsley area.

Ripley has already built many new properties from flats, to larger houses and this should be included in the quotes. However, 400 new at Burnt Common and more in Send will mean Ripley Village becoming nearly a town. In filling between villages was to be prevented by the Green Belt, we should not be altering laws.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPA16/2770  Respondent: 10876449 / Michael Powell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object most strongly to Send Village being removed from the Green Belt. The requirement by th National Planning Policy Framework was for this to be permanent. Local Councillors and central government are reneging on a clear promise to protect the Green Belt and there are no special circumstances to justify abandoning it. There will be nothing to prevent developers taking advantage.

2. I object to building 45 houses at Clockbarn Nursery. Tannery lane is far too narrow to take more traffic, the existing junction with Send Road is already a danger and it is adding to the planning permission already given for 64 apartments and a Marina.

3. I object to the building of 400 houses and 7000 sq. m. of industrial space at Garlick's Arch. The site floods and there is no need for more industrial space.

4. I object to the development of 40 houses and 2 travellers pitches at Send Hill. Again the road is too narrow for additional traffic with no pathway for most of it's length. The subsoil contains unsafe landfill waste already registered with GBC.

5. I object to a new interchange with the A3 at Burnt Common. Send would then take traffic from the proposed 2000 new houses at Wisley and 2000 at Burpham. Send Road already is overloaded with heavy traffic which completely ignores current speed restrictions making the use of the narrow footpaths extremely dangerous. A survey od Send at morning and evening rush hour would evidence this.

<td></td>
</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO SEND VILLAGE BEING REMOVED FROM THE GREEN BELT. Local councillors and central government gave a pre-election promise that they would protect the Green Belt, they have reneged on that promise and they know that they would not have been elected if they had told the truth, as the majority of Guildford residents want the Green Belt preserved. The Green Belt was intended to be permanent, as required by the National Planning Policy Framework, and their are no special circumstances to justify abandoning it. The Green Belt is there to prevent villages from merging into each other, to prevent over-development and to keep the rural aspect of the environment. The villagers of Send do not want their village to become an over populated urban sprawl.

I OBJECT to building 45 houses at Clockbarn Nursery because of the sheer volume of traffic that will be created, Tannery Lane is narrow and winding and access in inadequate. Not only that but the junction with Send Road is already hazardous. Planning permission has already been granted for 64 apartments and a Marina, which means even more traffic will be generated.

I OBJECT to building 400 house and 7000 sq metres of Industrial space at Garlics Arch, opposite Send Marsh Road. This area contains Ancient Woodland which should be protected as it is irreplaceable. Brown Field sites should be used for the houses and Industrial buildings should be built at Slyfield. GBC have grossly exaggerated the housing requirements, and refused to explain where they got their numbers from.

I OBJECT to development of 40 houses and 2 travellers pitches at Send Hill, This lane is very thin with inappropriate access. The land is a former landfill site, and contains unsafe waste, which is well documented. This is also an exceptionally beautiful part of Send Village which would be spoilt.

I OBJECT TO the A3 interchange as this would cause excessive traffic to come through Send, which is already overloaded with heavy traffic at all times of day, not only rush hour, this would cause terrible traffic jams and gridlock, and vehicle fumes and noise would be detrimental to the health of the villagers.
I OBJECT to the proposal to inset Send Business Park from the Green Belt because:

- It is effectively an old non-confirming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation.
- There is highly restricted vehicular access along Tannery Lane in both directions.
- Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I strongly object to Guildford Borough Councils draft Local Plan proposal to build 1800 houses, an industrial park and a highway on the slopes of the Hogs Back at Blackwell Farm.

I have lived in Wood Street Village all my life, from 1945, and have chosen to stay here, as have my three married children and their families, because it IS a true village - in the sense that it is separated from the suburbs of Guildford by beautiful common land and therefore retains its own identity. Building at Blackwell farm and surrounding areas will only create a 'joining up' of the present gap.

The Hogs Back ridge is known for its wonderful views of surrounding countryside and is an designated Area of Outstanding Beauty - this would be destroyed along with many acres of scenic farmland and ancient woodland.
I remember when Blackwell Farm WAS a farm in the true sense, owned by Mr Brock and wish that it had never been sold to the University, who seem to have a complete disregard for anything other than their own needs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6777  Respondent: 10876705 / Olive Edwards  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A15

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A15 - land at Guildford Cathedral

This site was designated Protected Open Space in 2003 for good reason and I would say that it is even more important now to keep this area as a green space as every town needs to have several open spaces, particularly in light of current Government housing policy and the excessive degree of development in Guildford since that time.

A change of status would impact on the local community in terms of its local character, particularly for roads such as
Ridgemount and Arlesford Road which currently have a semi rural feel to them as they are bounded by the ancient historic tithe hedge which forms part of the currently designated open space, as well as the visual quality of the site. The setting it provides for the Cathedral and the views of the Cathedral throughout Guildford as a whole ("a jewel in an emerald sea") will be irreparably damaged. I would therefore question the rationale for this change which seems to be based purely on the Cathedral's proposal to develop the site. It is evident that this site is not appropriate for building as due to its nature and history of problems relating to subsidence and drainage, extensive piling would be required to accommodate any development with consequent repercussions on neighbouring houses in roads such as Ridgemount, Arlesford Road, Benbrick Road, Stag Hill, Scholars Walk etc. Furthermore the rainwater run-off from the site has caused drainage and minor flooding issues, particularly affecting Ridgemount, which would be exacerbated by further development. It would seem that the reason for change of status is political rather than based on the suitability of the site for housing, which it is plainly not.

There is a well-documented major traffic problem in this area already which is only going to be made worse by the current proposals for development of Guildford Park Car Park and Guildford Station. The addition of 100 houses on the Cathedral hill site will add in excess of 100 vehicles to this already problematic scenario as well as having wider implications for the immediate infrastructure of the neighbourhood.

In view of the vote to leave the European Union the housing need for Guildford is likely to change in the near future and alteration of the current status of the site in question may well turn out to be a hasty decision to be later repented at leisure.

In summary I object to the change in status of this site to C3 housing on the grounds that it is inappropriate for development due its nature and any development would have a negative impact on the surrounding community both in terms of impact on the setting of the cathedral and the local infrastructure. I sincerely hope that you will take these points into consideration during your deliberations on the status of the Cathedral hill site.

I am writing as a result of the changes that you are proposing to make to the Proposed Submission Local Plan: Strategy and Sites (2017) regarding the Guildford Town Centre Site Allocation A15 Land at Guildford Cathedral, Alresford Road, Guildford listed on page 142 and detailed on pages 176 and 177.

The proposed new wording in point 6 is open to too many interpretations and can be used to justify particular decisions rather than giving specific direction. The use of the word "unacceptable" lends itself to subjective rather than objective conclusions. The ancient tithe hedge running along Ridgemount and Alresford Road should be protected at all costs as should all the trees with tree preservation orders on them, as well as other significant trees and hedgerows. The proposed new wording puts these at some consideration risk.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
My wife and I have lived in West Horsley for a combined 35 years and we wish to provide you with our comments on the Local Plan.

Overall, while we accept that more houses need to be built in the Guildford Borough, we believe very strongly that the Proposals are way beyond what is reasonable and will place an enormous strain on the existing infrastructure in East and West Horsley.

For example, to highlight just a few EXISTING INFRASTRUCTURE CHALLENGES:

- It is already impossible on occasions to find a parking place at Horsley Station and Effingham Station on a work day. There is no public transport available as an alternative to get to the Stations.
- Driving along the B2039 between the A246 and the centre of East Horsley village is already often very difficult with the large number of wide vehicles and part of the road is only wide enough for one vehicle, requiring lorries frequently having to drive along the pavement. The pavement is itself narrow in parts and we know of pedestrians who have been hit by passing vehicles.
- The Horsley Medical Practice is already at over-capacity.
- Car parking within East Horsley is already at capacity and there appear to be no alternative sites for car parking allocated or available.

GENERAL COMMENTS

- We agree with the response from East Horsley Parish Council – EHPC Response to GBC Local Plan – which has already been sent to you.
- We believe it is wrong to remove the villages from the Green Belt. We moved to Horsley and brought up our family here in order to live in a Green Belt area. If that is removed, we will never get it back either for existing residents or future generations.
- It is wrong to enlarge the village boundaries.
- It is completely wrong to plan for up to 533 new houses in the Horsleys.
- The proposed development of Wisley with 2,068 houses has been long debated. We object to the proposed development there as it would generate an enormous amount of traffic in the Horsley area and create even more pressure on the existing infrastructure. Again, beautiful countryside will be lost to development.
- It is wrong that 65% of new houses in the Borough will be built in the Green Belt – the Council must find more appropriate sites.
- If this Local Plan is approved, the Horsleys will become just another area of concrete and buildings in a continual stretch of development from London and to the south west beyond the M25. This will result in more pollution and lower quality of life for existing and future residents.

We look forward to hearing in due course that the proposed Local Plan has been thrown out – as the vast majority of residents in the Horsleys wish to happen.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

All of the above would impact Send's infrastructure significantly. This infrastructure is already fully maximised. We are already experiencing traffic congestion daily through Send and surrounding areas. Schools would be impacted, schools that have limited places already. The Villages Medical Centre is already extremely busy with about 2 weeks notice needed to book appointments with GPs.

Any additional housing on this scale will increase road congestion, the impact on schools and the surrounding medical facilities. All social care facilities would be impacted.

This proposal would increase pollution and noise which is already substantial from the A3. Reduce our country side and influence and impact its inhabitants significantly. We are trying to teach everyone, including our children, to preserve the environment, help reduce pollution and not to increase the impact on our greenbelt. This housing proposal would have the opposite effect.

I am a resident near the Burnt Common roundabout and drive through Burnt Common several time a day. It is congested, busy, any additional traffic would make the situation much worse and impact our village negatively. Garlick's Arch and the woodland surroundings serve as a buffer to the A3, removal would bring the A3 into the village, there is no benefit from this for local residents. We do not want more traffic, noise, pollution. We live in a village because we want to be surrounded by countryside. Countryside that has been there for hundreds of years and should be enjoyed by many generations to come.

I object in the strongest possible way to the above policies, the additional housing proposed in Burnt Common, Garlick's Arch, Send Hill and Winds Ridge and the removal of Send from greenbelt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object in the strongest possible way to the Policy A42 change at Clockbarn in Tannery Lane because:

- The change represents an increase of 33% in homes and this is excessive for the area
- It ignores the hundreds of objections made by locals previously
- Further increase in housing development will impact the traffic problems in the area. Traffic on the A247 junction is already an issue.
- Further increase in housing development will impact the Green belt.
- Further increase in housing development will change the character of our village for the worse.
- Further increase in housing development will impact the views from the River Wey Navigation.
- Further increase in housing development will impact the local school. More places will be required in a school that has little capacity.
- Further increase in housing development will impact local health care. The Villages Medical Centre is already maximised and can’t deal with more demand.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object in the strongest possible way to Policy A43 change at Garlick’s Arch because:

- It ignores the thousands of previous objections from the local population.
- There is no proven demand for Travelling Showpeople plots in this location.
- This area is a beautiful Green Belt area with many mature trees from hundreds of years ago. No exceptional circumstances exist.
- An area where wildlife and plants can grow preserving our heritage.
- It is land between the A3 and the village and protects the local residents from noise and pollution from the A3.
- Green Belt is part of our village setting, it is what makes our village a village. Send residents live in a village as this is the setting Send offers: living close to protected Green Belt and not in a town.
- 400 homes and 6 Travelling showpeople plots will impact the village character of Send. Woking and Guildford are nearby to offer town amenities if required. The proposed 400 homes and 6 Travelling Showpeople plots are an excessive increase to Send / Ripley and this will result in overpopulation with more traffic impacting local roads and village.
- The area around London Road / Roundabout at Shell Garage / Portsmouth Road / A247, already has high levels of traffic in all directions, not just at peak times in the morning / evening but throughout the day / night.
- This area is particularly congested between 7:15 - 9:00 AM and 16:30 - 18:30 mainly by passing through traffic, impacting the local area. These roads serve as an alternative to the A3 leading to this congestion. Often the traffic is standing still during these hours.
- The proposed 400 homes and 6 Travelling Showpeople plots will impact traffic on these roads. These roads / junctions are unable to cope with more traffic. This will require more funding to rectify and impact locals with ongoing road works.
- The proposed 400 homes and 6 Travelling Showpeople plots will impact the local schools - the local Send school has just been extended and does not have sufficient capacity for more. This will require more local funding.
- The proposed 400 homes and 6 Travelling Showpeople plots will impact healthcare. The Villages Medical Centre does not have sufficient capacity at present, let alone for a substantial increase in residents. This will require more local funding.
- The proposed 400 homes and 6 Travelling Showpeople plots will impact local air quality, water resources, ground pollution. Wildlife and flora are impacted. As the land is so near the A3 health for residents could be affected by asthma etc.
- The proposed 400 homes and 6 Travelling Showpeople plots will impact the flooding situation in the area. The area is already suffering from flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** pslp172/1848  **Respondent:** 10876833 / J. C. ROBSON  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**I object in the strongest possible way to Policy A58 change at Burnt Common because:**

- It was deleted from the 2014 draft due to multiple previous objections.
- The work minimum is a change from the previous maximum in the 2016 plan. Since then there has been a decline in the demand for industrial land.
- Slyfield/Guildford has vacant sites to accommodate industrial / warehouse demand.
The 2017 Employment Land Need Assessment shows a reduction in demand so no need to develop Burnt Common site.

The proposed industrial / warehouse development will impact the Green Belt of the villages Send / Ripley. It will change the character of the villages and not preserve the heritage and Green Belt of this area.

The proposed industrial / warehouse development will impact local traffic. The roads around the Shell garage roundabout are already severely congested and this development will impact this even further. The U-turn on London Road near the proposed site is already dangerous, accidents have occurred as the traffic coming from the A3 onto the London Road is travelling at minimum 50 mph. The proposed industrial / warehouse development will increase traffic on this junction.

The proposed industrial / warehouse development will impact noise in the area. Noise is already an issue being so close to the A3 and the London Road / A 247 itself are noisy with traffic. Lorries parked on the London Road are already contributing to this noise day & night.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object in the strongest possible way to the Policy 2 at paragraph 4.3.15 change

I object to the proposal to inset Send Business Park from the Green Belt because

- It is non-confirming user in an area of outstanding countryside directly next to the beautiful Wey Navigation.
- There is vehicular restriction along Tannery Lane in both directions
- Further development will impact the Green Belt and the openness of the area
- Further development will impact the character / heritage of the village
- Further development will lead to increased traffic in the area, an area that is already severely congested
- Further development will impact flora and fauna in the Green Belt
- Further development will increase noise levels in the local area

Comment ID: PSLP16/4226  Respondent: 10876897 / Norman and Morag Evans  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule
Lack of infrastructure and traffic implications - I OBJECT

The addition of nearly 14,000 extra homes and 25,000 to 30,000 people has very serious implications for infrastructure and traffic, which the Plan hardly addresses and for which there is little funding (if any) - schools, medical centres, drainage, sewerage and so on, but particularly roads. The impact of Brexit is yet to be fully felt, but will almost certainly limit public funding even further and developers will be reluctant to commit to new developments in an uncertain market.

If the Plan is implemented, it will lead to an increase of around 25,000 to 30,000 vehicles, plus extra traffic generated by developments in other boroughs and by normal traffic growth. The borough’s roads are already overcrowded at particular times and many are in a state of poor repair. Moreover, away from the main arteries, the back roads are often little more than lanes - narrow and with no pavements. For them to safely accommodate all the extra traffic, there would need to be many road changes and adjustments, requiring more road furniture, pedestrian crossings, traffic controls and so on, all having a detrimental impact on the character and nature of our environment, aside from costing a huge amount.

The borough’s main artery, the A3, suffers considerable congestion now, particularly on the southern approach to the town’s turn-off, southwards at the hospital exit, and northwards at the junction with the M25, where pollution levels often exceed permitted levels. The Plan proposes more access to and from the A3 with a four-way junction at Burnt Common and further access at the Wisley junction (see item 6) to accommodate traffic from proposed new developments. These will only increase the number of vehicles using the road, adding excessive traffic levels, increased congestion and pollution.

(There has been talk of building an A3 tunnel under Guildford, but this is a pipedream with no realistic prospect of ever being built, especially because of the huge cost, for which there is no planned funding.)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1)  

1. Before going into detail, I would like to preface my comments with some general observations about the whole process. It is widely recognised that the country’s economy is out of balance and that too much business activity and supporting population is concentrated in London and the South East. It seems perverse, then, to exacerbate the problem by creating excessive development in the South East, putting further pressure on the region.

2. There are other factors and constraints that need to be considered, especially the impact of Brexit on population figures and infrastructure funding, and the possibility of a third Heathrow runway, which would result in an enormous increase in traffic in the area. In addition, the Royal Horticultural Society is planning a major re-
development of its headquarters at Wisley which will result in more visitors and traffic, putting further pressure on the A3 and nearby intersections. An increase of 25-30,000+ in the local population would cause intolerable strain on the Royal Surrey County Hospital, itself already under pressure.

3. The borough of Guildford is not an ‘island’. Development within the borough has impacts on surrounding boroughs and areas in terms of traffic, housing demand, infrastructure and so on. The reverse also applies. The piecemeal approach of the Local Plan process means there is no strategic planning, covering a much wider area, including London.

Taking just one example, the A3 serves a number of boroughs throughout its length and any development planned along its route by other boroughs will have a major impact on Guildford borough. To this extent, the entire process is flawed.

2) Housing Assessment - I OBJECT

The Housing Minister Brandon Lewis has been quoted as saying: ‘Picking housing numbers out of thin air and imposing them on local communities builds nothing but resentment’. It is a pity GBC failed to hear him.

The Local Plan is formulated on an SHMA which has been based on a methodology unknown and unscrutinised, even by the Council. It is complete folly, therefore, to produce a ‘plan’ on such a basis. Moreover, it has been produced by an outside company which is part of a major property and development business, thereby negating its objectivity.

The figure of 693 homes per year is substantially higher than the 2014 assessment and more than double that of the 2003 plan. Further doubt about the accuracy of the figure arises because of the Council’s previous actions in relation to the South East Plan. GBC made a successful legal challenge against the then Government’s proposal for 422 homes per year but now vigorously promotes 693 homes per year. At the time of the legal challenge victory, a senior Councillor said: ‘Our successful challenge means that local concerns have now been heard and taken into account when planning the future of our borough. …It is reassuring that the South East Plan housing targets which many felt would have prejudiced the character of the borough no longer apply.’ Why is the Council not hearing the local concerns now and why is it not fearful of a massive change in the character of the borough with such a high SHMA?

Furthermore, the SHMA is increased by GBC to give a population increase almost 70% higher than official ONS estimates for population growth in the borough. This, for example, results in an increase of 35% in existing West Horsley households. At present, there are 2,808 homes in both East and West Horsley: if the Plan is accepted as it is, there will be AN EXTRA 5,000 homes within five miles, including 600 in the Horsleys. Overall, the Plan proposes more than 8,000 new homes in the Green Belt but only about 1,100 in the Guildford urban area.

It is generally recognised that there is a chronic shortage of social housing and of one or two bedroomed properties for sale or rent in the borough. Moreover, there is a need for homes, particularly bungalows, for elderly people wanting to downsize and stay in the area. There appears to be nothing in the Plan to address these issues, except the aspiration for 40% affordable homes in the larger developments. With the current level of house prices in the borough, it is doubtful that many would-be buyers would be able to afford an ‘affordable’ property or an ‘affordable’ rent. Also, developers are renowned for using their ‘get-out card’ to avoid building ‘affordable’ homes. There appears to be a serious mismatch between the housing need and where and how it could be met. Rather, the Plan simply gives a green light to developers to build all over the Green Belt and to plan for future ‘easy’ growth.

The unjustified and inflated housing figure will cause unacceptable pressure on local infrastructure and result in a complete change in the character of the borough. The Council appears to be ‘going for growth’ for growth’s sake, ignoring its own past views as well as those of current residents. Overall, its Plan would ‘urbanise’ the borough, extending the sprawl of London and its suburbs to Guildford and beyond. To minimise the need for huge infrastructure developments, most housing growth should be accommodated within Guildford itself, leaving the borough’s villages to grow organically.

In its desire for ‘forced growth’, GBC has utterly failed to consider the constraints to development and the SHMA figure, such as the Green Belt and need for infrastructure, which if employed would result in a much more realistic and sustainable scale of development and one in keeping with the borough’s character.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The University of Surrey - I OBJECT

Every university has a basic duty to provide as much accommodation for its students as possible. Surrey University already has planning permission for a thousand or more housing units for student accommodation and has other land in its campus which could be used to house its students. If the University implemented its permission and built further accommodation, it would release thousands of housing units in the town for ordinary residents. Its proposal for building on Blackwell Farm is opportunistic and profit-seeking, destroying Green Belt land on Hog’s Back, a well-known scenic attraction. A recent independent survey has concluded that the Blackwell Farm site should be included in the AONB: I agree.

Answer (if comment is on questions 1-7 of the questionnaire): ()

‘New town’ at the former Wisley airfield - I OBJECT

The former Wisley airfield is entirely unsuitable for use as a new ‘town’. The site was requisitioned by the Government for wartime purposes with a promise that it would be returned to agricultural use in due course - that promise should now be honoured. The land is Metropolitan Green Belt land except for about 15% consisting of the old concrete runway and apron.

A planning application for temporary use of the site for filming was rejected in 2014 and later refused on appeal, the Inspector stating that the development would be detrimental to the Green Belt and would likely cause harm to local environmentally sensitive sites. A much more substantial planning application for a small town of some 2,100 homes, medical centre, schools and supermarket was last year submitted by the owner, Wisley Property Investments, but was recommended for refusal by the Council officers and then rejected unanimously by a special meeting of the Planning
Committee, who totally agreed with the 14 main reasons for refusal by the officers. I will not list all the reasons here because the Inspector will have access to the Council’s files, but my objections include:

- loss of Green Belt
- loss of good quality agricultural land
- danger to nearby environmentally protected sites
- totally unacceptable traffic problems, including dangerously high pollution
- no infrastructure and no transport links (except A3)
- overdevelopment and unacceptable housing density
- five-storey buildings, totally out of keeping with the Surrey countryside
- detrimental impact on Surrey skyline and increase in light pollution.

I will emphasise the traffic problems this development would cause. Some 4,000 cars would be added to the area’s roads, causing more congestion on the A3 into Guildford and at the junction with the M25 (J10), where pollution levels often exceed permitted levels already and are too high to allow schools to be built on the site. The proposed new A3 junction at Wisley would have to accommodate a large increase in traffic from all directions, while Ripley and East Horsley would be seriously affected.

The fact that the scheme involves local road closures and one-way streets is a clear demonstration of how impractical the scheme is.

The Council’s comprehensive rejection of this scheme renders any large-scale development of the site out of consideration: it is not practical, viable or sustainable. Indeed, the Council’s Leader and Lead Councillor for Planning said the scheme failed the Council’s sustainability test ‘dismally’. Why, then, has the Council not removed the site from the Local Plan which would be logical in light of its fundamental unsuitability? I merely point out that Wisley Property Investments has links to the Conservative Party, including its ‘front man’ who happens to be the lead councillor for planning for the Conservative-controlled Vale of the White Horse District Council in Oxfordshire.

The site should continue to be used for agricultural purposes, while the runway and apron could be used for a solar farm or for hydroponic horticulture (no need to remove the eight-foot deep concrete at great expense).

Answer (if comment is on questions 1-7 of the questionnaire): ()
East Horsley ‘District Centre’ - I OBJECT

The Plan proposes to designate Station Parade, East Horsley, as a ‘district centre’ which would make it vulnerable to future urban development. This is an impractical proposal since there is nowhere for any development to be built without the destruction of existing homes and premises. I also object to the inclusion of Kingston Field as a site for possible development. This is a very important local space and a valuable community asset which should remain untouched.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Destruction of the Green Belt - I OBJECT

The ruling party on GBC has acted dishonestly and dishonourably over the Green Belt. Having promoted its protection at every election for decades and made the same pledge last year, it now claims it has ‘listened’ to the people of Guildford, yet produces a plan barely different from the 2014 version but which includes widespread development - TWO-THIRDS of which is on Green Belt land. This is contrary to their own policies, those of central Government and those of the NPPF. The Council even has the gall to include in its Plan the sentence: ‘We will continue to protect the Green Belt’!

The new Plan also includes removing about 15 villages in the borough from the Green Belt and changing the Green Belt boundaries. There is no justification for this except to facilitate future development. Removing Green Belt status from villages will leave them vulnerable to excessive development and result in the merging of villages causing an ‘urban’ sprawl, exactly the outcome the Green Belt was designed to protect.

At the last General Election, the Tories’ manifesto promised to protect the Green Belt and to retain the rules governing it. These state that development can only be allowed on Green Belt land in exceptional circumstances and that housing need does not count as sufficient reason. They also say that Green Belt boundaries cannot be changed or moved, again except in exceptional circumstances. GBC have not given a single reason why there are special circumstances for sacrificing so much Green Belt land. Why do they think that the rules do not apply to GBC, especially when only a few years ago they made a legal challenge to protect the borough’s Green Belt?

The Plan’s totally unacceptable assault on the Green Belt will, in effect, destroy the concept of protection throughout the borough and beyond. It must be resisted if we are to retain the sort of countryside that the British know and love - and want retained.

Answer (if comment is on questions 1-7 of the questionnaire): ()

IN CONCLUSION

The 2016 Plan is completely unacceptable. The Council has totally ignored the comments and suggestions of residents and proceeded with an outrageous assault on the Green Belt for which they have absolutely no mandate - in fact, the very opposite. The housing target is excessive and needs to be seriously reviewed, especially in light of Brexit, and a new plan needs to emerge based on actual housing needs with the right kind of accommodation in the right places, and a plan that requires the least amount of infrastructure developments. If the current Plan proceeds, it will lead to massively increased traffic congestion and pollution levels, require a huge amount of public expenditure, and destroy the character and beauty of an attractive and much-loved area.

Above all, we need a Plan that supports local needs and not the balance sheets of developers.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Guildford Borough Council’s Local Plan on the grounds that it represents serious overdevelopment, is based on inaccurate, unscrutinised housing figures, and means a massive, unacceptable destruction of Green Belt land. It would also require a huge amount of infrastructure and attract thousands of extra vehicles, placing undue pressure on local road networks, as well as causing extra pollution.

Furthermore, it would completely change the character of the borough, harm the environment and seriously damage the quality of life for residents. As our local MP has said, the Plan is ‘not fit for purpose’.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. One of the most unacceptable elements of the Local Plan is the continued proposal for a new ‘town’ on Three Farms Meadows, the former Wisley airfield site. The real question is: why do the Conservatives still press for this totally unsustainable development, when it has been comprehensively shown that it is impractical, will cause massive problems without solving any, and will overwhelm local roads and villages.

   a) The vast majority of the site is Green Belt land and good quality agricultural land at that. The planning application for a new ‘town’ was thrown out by the Council’s professional planners who cited 14 compelling reasons for refusal, a decision upheld by the Planning Committee whose elected councillors voted unanimously against it.

   b) In a report for the Council, consultants AECOM considered the sustainability of the larger proposed sites for development in the Plan and concluded that the Wisley site was the least sustainable, awarding it eight red flags. Yet in arriving at the 2017 Plan, the Council removes a site near Normandy and Flexford, rather than the Wisley one, even though it scored better for sustainability.

   c) The Wisley site has a questionable history involving Conservatives and their supporters and backers. It was bought by Wharfland Investments who wanted to build a green recycling centre there. Its directors included a former Conservative cabinet minister, a property developer and a Conservative lead councillor for planning for an authority in Oxfordshire. Around 2012 when Guildford decided to earmark the site for possible development, Wharfland went into liquidation and the Wisley site was sold to Wisley Property Investments, a company registered in the Cayman Islands tax haven. A coincidence? Because of the secrecy surrounding tax havens, it is not possible to identify the company’s directors, but for the past few years the Oxfordshire councillor has been acting as the front-man for Wisley Property Investments. It is also believed that the development is being supported by a hedge fund manager with possible links to the Conservative party. A public inquiry into the refusal of planning permission is due to be held in September, after which it will be called in by the Communities Secretary, a Conservative, of course.

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. The contentious Strategic Housing Market Assessment (SHMA) has been slightly reduced but still remains excessively high without proper justification. The Council has consistently refused to reveal the methodology used by consultants with links to the Government and an involvement in planning, so it is impossible to see how the figure has been arrived at or to question the methodology. This is not only secretive but also antidemocratic. Since the people of Guildford are ultimately paying for the report, it is a scandal that they have been denied the right to scrutinise it.

   a) Even taking account of Brexit, the consultants have chosen the highest estimate for population increase, representing a 22% rise in housing stock while the ONS predicts only a 10.4% increase. Brexit and other related uncertainties make any forecasts highly unreliable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan has huge deficiencies in infrastructure provision and investment, particularly in transport. The proposed provision of more than 12,000 homes will put undue pressure on already crowded roads, schools and medical facilities. How can a relatively small, northern part of Surrey absorb some 40,000 new inhabitants without causing chaos and ruining the character of the neighbourhoods? Add in the thousands and thousands of extra inhabitants in all the other northern Surrey boroughs, as proposed in other Local Plans, and the whole area will be completely swamped, overdeveloped and snarled with traffic, making it just an extension of urbanised Greater London. It is irrational to look at one borough as if it were an island and ask it to design a Plan for what it sees as its needs without considering the impact of demands and pressures from all surrounding areas and vice versa. Consider in full the impacts, for example, on the A3 and M25. That is why the entire Local Plan exercise is so fundamentally flawed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1803  Respondent: 10876897 / Norman and Morag Evans  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
2. One of the most glaring errors in the Plan is the total disregard for planning constraints, in particular the Green Belt. This is a matter of major concern to Guildford residents, as shown in the responses to the earlier versions of the Plan.

a) Guildford Conservatives have acted shamefully and undemocratically, deliberately lying to the Guildford electorate in order to retain power and proceed with their development-led Plan. In the 2015 local elections, they produced campaign material making vows and pledges to ‘save the Green Belt’, yet as soon as they were returned, they produced the then new version of the Local Plan which envisaged nearly two-thirds of all proposed development on Green Belt land. It is utterly disgraceful. Even now, after a consultation which saw the Council again lambasted for its proposed destruction of the Green Belt, this latest version proposes development of nearly 60% of new housing on Green Belt land.

b) Earlier this year, the Communities Secretary described Green Belt land as ‘sacrosanct’. The then housing minister also used the phrase and added in a television interview: ‘There is no need to build on large tracts of Green Belt land’. Why is it, then, that Guildford Conservatives have turned a deaf ear? And why is it that trust in the Conservatives is at an all-time low?

c) There is no justification for removing the Horsleys and other villages from the Green Belt. The Horsleys, in particular, represent a Green Belt line of defence against further outward development outside the M25. If these and the other development proposals are allowed, there will be almost continuous development from outer London all the way to Guildford, Woking and even beyond. The removal of the Horsleys from the Green Belt will increase development, destroy openness and result in the loss of character and diversity. Moreover, the proposed Green Belt boundary changes in East Horsley will result in similar losses, while increasing the settlement area by an unacceptable 37%.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford Council’s 2017 Local Plan is little different from the previous versions, showing again that the Council does not listen to the people it is supposed to represent and arrogantly pursues a damaging trajectory for unjustified overdevelopment of a beautiful borough.

We strongly object because the Plan is based on unknown and unscrutinised methodologies, involves widespread destruction of the Green Belt, makes no provision for planning constraints, is woefully short of infrastructure provision and investment, and will ultimately destroy the character and beauty of the borough.

I object – traffic will join narrow road, single vehicle width at one point, and then add to traffic with cars parked on roadside at junction with A247.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object – 

1) This is land is Green Belt - designed to prevent sprawl and the merging of settlements. No ‘exceptional circumstances’ have been claimed – indeed there has been little time to address this or the other issues below. This site was not in the 2014 Section 18 original draft Local Plan, nor in the revised Section 19 Local Plan in April 2016, and appeared just thirteen days before the Council met to recommend consultation – a poor way to make significant decisions.

2) The development is too large – the proposal for 400 homes plus light industrial facilities represent an increase of about a quarter the size of Send village. People living there will use the Send schools and the Send-based Villages Medical Centre which serves Send and Ripley. These are currently working at capacity. 400 homes at Garlick’s Arch would provide too many patients and pupils for present arrangements, and not enough to make feasible the building of a new school or new medical facilities.

3) Congestion - The proposed new links to the A3 would mean a large increase in traffic through Send and at the Burnt Common Roundabout; these road are already jammed at times. It is claimed that it is not permitted to link the Garlick’s Arch site directly to the A3, so traffic to and from the site would use the narrow Burnt Common Lane, the Portsmouth Road, Burnt Common Roundabout and the A247 Clandon Road before accessing the new links, hugely adding to local traffic. Even if the direct link to the A3 could be made, MANY vehicles from Garlick’s Arch traffic would be bound to use the A247 through Send to Woking, going through Burnt Common Roundabout.

The A247 and Burnt Common Roundabout are already gridlocked at busy times; any further traffic would cause significant delays for longer periods, and consequently higher levels of traffic pollution ( diesel particulates, carbon monoxide and oxides of nitrogen ).

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**Policy S2 - Borough wide strategy**

**I object** – The calculation that 13,860 homes are required is based on a calculation made by a sub-contractor who will not share the basis of the calculation, citing commercial confidentiality. Wrong in principle – government should be open and transparent; important data should be open to give public confidence that it is accurate, based on sound assumptions, and free of commercial bias.

**SHMA Accuracy doubtful** - In Dec 2014, the House of Commons and Local Gov. C’tee was critical of the accuracy of SHMA processes, noting (section 69) that repeat calculations of an area could yield different results.

The method of calculating the population of a town with many foreign students also distorts the population total.

**ELNA** - The Employment Land Needs Assessment 2015 indicates that Guildford does not need a large increase in employment space, which suggests that such housing as is needed could largely be built on Brownfield sites.

### Comment ID: pslp172/2573  Respondent:  10876993 / Michael Hurdle  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**A42 Clockbarn Nursery, Tannery Lane, Send**

**I OBJECT** to the proposed increase to 60 homes. This would add traffic not only to the A247, but also within Tannery Lane, which is narrow and without pavements, and has a poor narrow junction with the A247.

**A 58 Land at Burnt Common, London Road, Send**

**I OBJECT** to the change for a **minimum** of 7 000 square metres of light industrial, general industrial and storage & distribution (previously a **maximum** of 7 000 square metres, transferred from Garlick’s Arch)
This land is zoned permanent green belt. The Employment Land Needs Assessment (ELNA) 2017 shows a reduction in demand from 2016 in the Borough of Guildford. Industrial processes (B2) and wholesale warehousing and distribution (B8) are not regarded as suitable for the green belt. Slyfield and Guildford have unused industrial space.

The land being sought at Burnt Common could hold around seven times this minimum. This vague, open-ended proposal is inappropriate in a Local Plan.

Developments in this area rely on road networks which are already over-stretched; the A3, the B2215 from Ripley to Burnt Common, and the A247 from Clandon through Send towards Woking, which all suffer frequent congestion. The new proposals make this worse.

A25 Gosden Hill Farm, Merrow Lane

I OBJECT to the new proposal for an employment area to the north to deliver an HQ building of 7 000 square metres. This will add more traffic to the A3 and A247 which are already highly stressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

To remove the three policy aspects listed above.

Attached documents:

---

Policy P2, Green Belt

I OBJECT to the statement 4.3.15 which states that 14 villages are ‘now inset from the Green Belt’ – factually untrue, as no decision has been made. These villages are at present actually in the Green Belt.

I OBJECT to the proposal to remove Send Business Park from the green belt. Tannery Lane is narrow – single track in places – in both directions. The lane lacks pavements. There is already planning permission for a marina and it will be dangerous to stress the road further.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Rectify the inaccuracy of the text.

Withdraw the proposal to remove Send Business Park from the Green Belt.

**Comment ID:** PSLPP16/18480  **Respondent:** 10877025 / Maureen Stephens  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object to development in areas at risk of flooding (Policy P4).

The Environment Agency classifies the site at Garlicks Arch (A43) as being in a higher risk than the Council's own assessment. The plan does not take adequate account of the flood risk as required by National Planning Policy, especially as this area has flooded many times in recent years.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
I object to the local plan as the development proposed is not sustainable (Policy S1)

The volume of proposed housing will damage local communities especially Ripley, Send and Clandon and is not sustainable due to lack of infrastructure. There are no rail stations near the proposed developments and no plans to improve the local roads. What about primary schools, doctors and dentists? Where are the thousands of extra cars going to go with no possibility of significant improvements to local roads?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

5) In my view implemention of these proposals would ruin for ever the essential characteristics of the Horsleys by converting them into an urban dormitory for commuters to work elsewhere

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3) The magnitude of the proposed increase in the Horsleys housing would create unacceptable density in the area with irreversible environmental destruction and a major impact on thre local infrastructure.

4) Without major investment to expand our medical, educational, parking and drainage facilities these villages risk being overwhelmed by the influx of vehicles and people. Our local roads are already over used and dangerous in places.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the development of a 2000 house village at Ockham (Wisley Airfield)
The impact of such a large development so close to the Horsley villages would be catastrophic.
The local infrastructure is already overloaded. Local schools are full, medical facilities are at breaking point.
Drainage is a huge problem in the Horsleys as the drains are inadequate and further building will only lead to more flooding. This is particularly relevant to the site behind Ockham Road North.
Roads and car parks are overloaded. I am particularly concerned about parking at Horsley and Effingham Stations which is already at full capacity.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to the removal of Effingham Village from the Green Belt.

We object to the removal of the surrounding villages of East Horsley, West Horsley, Ripley and Send from the Green Belt.

We firmly believe that the Green Belt needs to be protected. There may be parts of the Green Belt where it may be appropriate for the Parish Councils to consider developing, but this should be the exception rather than the general rule. Removing in toto all these villages from the Green Belt means a loss of habitat for wildlife, loss of wildlife corridors, and the loss of trees whose leaves absorb pollution. We already contend with major roads such as the A3, the M25 and an increasing amount of heavy and light vehicular traffic on our roads, so it is vital that our ‘green lungs’ are protected.

The Parish Councils are best placed to decide where small housing developments are appropriate and any total loss of Green Belt status could open the doors to wholesale, unwanted and unsustainable development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/3241  Respondent: 10877249 / Ann Hamilton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The failure of GBC to provide sound evidence in terms of the Employment Land Needs Assessment 2015 (ELNA) which shows an 80% reduction in employment space from the previous ELNA carried out by GBC in 2013. This means that industrial space at Burnt Common is no longer needed. Housing numbers from the Strategic Housing Market Assessment 2015 (SHMA) are highly questionable. The number of foreign students has been wrongly used to inflate the need. The required 13,860 houses in the Local Plan is exaggerated. If the population is to grow by some 20,000 in the Plan period, 8,000 homes would be needed based on an average of 2.5 persons per home. The Green Belt does not need to be built over and half of new homes could be built on brownfield sites. It appears that GBC’s Transport Assessment was not even available to councillors for the vote taken on 24th May and this was only published on 6th June with infrastructure overload receiving scant attention.

Comment ID: PSLPS16/6378  Respondent: 10877249 / Ann Hamilton  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The designation of land wet of Winds Ridge and Send Hill for 40 homes and 2 Travellers’ Pitches. This site is NEW and was NOT included in the regulation 18 draft and has NOT been consulted upon previously. This is a permanent Green Belt site within an area of beautiful countryside which would be spoiled by development. Also, the subsoil contains documented unsafe land fill waste which is currently vented. Bearing in mind the lack of public transport in the area it is safe to assume that the number of cars will greatly increase - the narrow width single track country lane providing access to the site makes it totally inadequate for settlements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13337  Respondent: 10877249 / Ann Hamilton  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

None of these proposals are in the best interests of Send and its residents and any change to its Green Belt status would greatly diminish the character and identity of the village. In addition, the general strain on the infrastructure of the village in terms of roads, schooling and medical services would be overwhelming. Already in Send, traffic is heavy at certain times of day, schools over-subscribed and The Villages Medical Centre struggles to provide timely appointments for the residents currently registered.

I trust these objections are received and noted in accordance with procedure and look forward to news arising from the reassessment which will surely be necessary once the full extent of the resistance of local residents to the Local Plan proposals is known to GBC.

The failure of Guildford Borough Council (GBC) to follow due and correct process. Since 2014, GBC has changed the plans for every major site in Send proposed for development and now seeks to add a massive new road junction. The 2014 proposal for 430 houses reduced to 185 in April 2016 and now shoots up to 485. These significant changes require full consultation under Regulation 18, not the Regulation 10 short cut which GBC seek to get away with. This action appears to invalidate the whole process.

Answer (if comment is on questions 1-7 of the questionnaire): ()

- The small parade of shops near the Bell & Colville garage only has a tiny amount of parking spaces. This area is frequently very congested with lorries making deliveries and/or cars parked there. The road around here is VERY narrow and this causes much congestion for traffic to/from the A246. There is also no room for the road to be widened along this stretch. The roads will NOT be able to cope with substantially increased traffic.

- Parking at the shops in East Horsley for the shops and Public Library is already difficult currently. How is the village going to accommodate the extra people and cars from the proposed substantial increased housing?

Until you come up with a fully considered plan for the infrastructure to serve the proposed increased population, what you propose is just totally unsustainable and everything WILL come to a grinding halt and NOTHING will function. Will you take personal responsibility for this then?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/3700  Respondent: 10877313 / Millie Lipscombe  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **Roads Must BE Widened**

Lorries, buses and cars are now much wider than they used to be about 20 years ago. The roads were adequate then but they are NOT wide enough now!!! We are also sharing the roads with cyclists who are consistently now cycling 2 or 3 abreast. As there is full encouragement for people to cycle, then there must be proper provision for cycle/pedestrian pathways/lanes. On a recent occasion, there was a group of cyclists cycling three abreast and there were 15 of them cycling...
as a group altogether. It meant that it was impossible to overtake such a group of cyclists safely. Many motorists are now overtaking cyclists on a bend without being able to see if the road is actually clear! On one occasion, I was unfortunate enough to experience a Police car overtaking a single cyclist on a bend and if I had not braked in time, I would have been in an accident with a Police car!

1. Full Bus Services Must Be Put Into Place

Horsley railway station car park is nearly full up every day now. Where are the parking spaces for the increased number of people living in the additional housing in Wisley, Ockham, and East & West Horsley going to be located? On the other hand, if a bus service is to be provided, this must run frequently, say every 10/15 mins during very peak times and every 20 mins during very early mornings and late evenings for this to work.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

ADDITIONAL Points

We now have Brexit! We do not need to have a continued frenetic pace for provision of housing.

There needs to be a properly fully considered plan which includes full provision for the necessary infrastructure to be in place at the same time, if not before additional housing is approved. It is not only untenable what is currently proposed, it is also highly irresponsible! It is akin to Tony Blair taking us into a war with Iraq before putting plans into place for what happens AFTER the war. Can we sue Guildford Borough Council or all the individual councillors then? The issues that I can immediately think of, but not limited to, are as follows:

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
• We are currently experiencing problems with flooding roads, much drainage problems and sewage overflow arising as a result. With the proposed increased building, this will exacerbate the flooding, drainage and sewage problems even more.

• The schools, medical facilities, shops and parking are already operating at full capacity. How do you propose the place will function with your proposed addition of over 600 houses in the next five years? It is just simply not sustainable.

• Horsley railway station car park is full most of the time on weekdays – where are commuters going to park? In this connection, you need to take into account the proposed increased number of people living in Ockham and the Horsleys as well. It is no point increasing the housing in the area if people cannot get to work in an efficient manner.

• The roads in the area have considerable difficulty accommodating the Repton local bus service because the roads are narrow and there is no room to widen the roads either. Traffic constantly comes to a halt to allow the Repton bus to get through. This is particularly bad when the school rush hour is also on at the same time.

• East Horsley Medical Centre is already operating at full capacity. We have to wait days and sometimes even a fortnight to get an appointment to see a doctor. The car park for the surgery is frequently operating at full capacity during full surgery hours.

There is inadequate state primary and secondary school places to accommodate children resulting in many children having to travel distances. This adds significantly to the traffic problems in the area during the school rush hour.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford Local Plan: Normandy/Flexford Strategic Site-Policy A46

I have lived in Normandy for 45 years and I strongly object to the proposed development on the above Green Field site. I fully accept that more houses are needed throughout the borough but I am horrified at the massive development proposed for this site which will completely destroy our rural environment.

We are advised that a 7FE secondary school is needed in the west of the Borough and that the provision of such a school would constitute "exceptional circumstances" that are required to remove the land from the Green Belt. This site is Grade 3 arable and pastoral land with important flora and fauna and is only 1 km away from the Thames Basin Heaths and a large development could have a detrimental effect on the TBHSPA. The site was stated by Councillor Spooner at our Parish Council Meeting in February to have "red Sensitivity".

School

Is the school actually needed? I know that Keith Witham our Surrey County Councillor has carried out detailed research and I understand that Surrey Education Department have unfilled secondary places in the west of the borough in the medium term to cater for over 700 children and other schools are willing to expand. The Council has no doubt been provided with all the details of Keith Witham's research. If these figures are correct why should children have to travel to Normandy by train, bus or car when they have schools near to them?

In my opinion the school is not required and following Councillor Bilbe's amendment to the draft Local Plan at the Planning Meeting on 24th May the strategic site in Normandy should be excluded in its entirety. This view is strongly felt by many residents as you are no doubt aware. However if our views are ignored will you also consider the following points:

Roads/Traffic Chaos

This development would link up to roads classified as C16 (Westwood Lane and Wanborough Hill) and D60 (Glaziers Lane-unclassified road). I live opposite a small nursery school with cars parked outside in Glaziers Lane when the children are dropped off and collected by their parents and this will be increasingly dangerous initially with contractors' vehicles going up and down to the site. Because of my age I no longer drive but I am aware from my carers who have to come each day and neighbours that the local roads grind to a halt at peak times and increased traffic from the houses proposed and a huge secondary school with daily drop off and pick-ups would make the situation untenable. Westwood Lane with a low railway bridge and one way traffic would not be viable for big lorries etc during the building stages which would force heavy traffic from A31 and A323 onto Glaziers Lane which has a narrow railway bridge over the railway line and in addition large vehicles coming off A323 have to come across both lanes as they turn into Glaziers Lane which creates a dangerous situation for vehicles going onto or crossing the A323. I recall too that in recent years Glaziers lane has had problems with subsidence on the corner coming off the A323. Would it not be at enormous risk with the heavy increase of traffic especially contractors vehicles etc?

Flood Risk/Sewage

Normandy/Flexford has a very high water table with rain water draining down from the Hogs Back and from the Ash Ranges and flooding in wet periods is a frequent occurrence throughout the village so with a vastly increased population the sewer system and drainage are a major concern. You will see that I live at 116 Glaziers Lane, backing onto the proposed site and my neighbours and I suffer from significant amounts of laying water particularly in wintertime. From my own experience I lost a large tree last winter as its roots were completely waterlogged. With the extensive building proposed the problems will undoubtedly increase with a risk of subsidence.
Conclusion

If the development, as proposed, went ahead it would double the size of the village and would further increase the risk of flooding. There is no way the existing infrastructure could support if with regard to roads(without 2 new railway bridges and traffic lights to get onto or across the A323), drainage, sewage, worries with an overhead electricity supply and the very high water table. All vast problems.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We object to Guildford Borough Council’s draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog’s Back at Blackwell Farm, which will:

• Destroy views from the Hog’s Back ridge – a nationally designated Area of Outstanding Natural Beauty
• Remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
• Increase tailbacks on the A31 and traffic congestion
• Result in rat-running through local roads
• Add to Guildford’s pollution

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

• disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/4157  Respondent: 10877665 / Audrey Ivatts Audrey Ivatts  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the lack of provision for new schools and health care facilities in the Send and Ripley area.

I object to the lack of infrastructure improvements to help deal with the large increase in road vehicles caused by having so many more people living and working in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1) I object to the proposed developments at Clockbarn Nursery, Garlick’s Arch and Send Hill for a number of reasons:
2) The substantial loss of Green Belt land which will result if these developments take place
2) The large increase in road congestion, noise and pollution
3) The loss of the semi-rural nature of Send and Ripley
4) The lack of adequate provision for schools and health care facilities
5) The lack of infrastructure improvements to help deal with the large increase in road vehicles caused by having so many more people living and working in the area

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

As a resident of Horsley for many years, I am now extremely worried about your plans to nearly double the size of our village. My worries are as follows:

1. The proposal to remove the Horsleys from the Green Belt is a disaster. The Green Belt was designed to benefit not only the villages surrounding it but also the city of Once this land has been built on we can never go back, no matter what the consequences of this foolish decision. Only in the very exceptional circumstances when all other solutions have been exhausted should we even contemplate diminishing the Green Belt.

2. The local infrastructure as it stands can barely deal with current demands from the existing population. Our schools are full and many parents are having to send their children out of the village to be educated which also increases the already heavy traffic on our narrow roads. With regard to our roads, they are narrow, in poor condition and in many places do not have the luxury of pavements alongside them. With further increased traffic pressure this is going to make it even more dangerous for any parents and children who choose to walk to and from school rather than sit in the queues of traffic. With extra houses come extra cars that need to park as well as travel on the roads. In Horsley parking is extremely limited especially for the commuters who use the railway station. Even if most of the new residents wish to travel by train, how are we going to extend the car parking facilities? More residents will only increase the need for extra parking for people to attend the village hall, the doctors surgery and the local shops (the few that we have). Road side parking is not an option and the local car park is very small.

3. The local development at Wisley airfield if it goes ahead will certainly impact on our village as the residents from this development will surely wish to use Horsley Station which again doubles or even trebles the traffic problems in Horsley.

4. I doubt that we really need such a large increase in the number of houses in this We certainly don't need more 4 and 5 bedroom houses for current needs but you are trying to lure the people from London here to line the developer's pockets. If any houses need to be built, we need serious numbers of 1, 2 and 3 bedroom properties, some of high end spec to attract a number of elderly residents who currently are living in very large houses and would like to downsize to more compact but never the less extremely nice houses. We also need small houses for the younger people to enable them to live in the area in which they have been brought up in a property that they can afford.

5. In Horsley we have one medical centre to cope with all the needs of the residents of the village How are they going to cope with a large increase of patient numbers? Also all the extra developments in surrounding villages are going to mean that our local hospital The Royal Surrey is going to face huge problems in the not too distant future.

6. Surely you should be looking at developing any Brownfield sites within the Guildford area before invading the Green Belt!!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/7573  Respondent: 10877921 / Susan Prentice  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I write to object to the aspect of the Local Plan relating to Wisley Airfield.

1. This development will lead to the urbanisation of Green Belt land, a precedent that will lead to urban sprawl towards Guildford.

1. Any developments in this area will increase traffic flow in an area that is already often congested with M25 and A3 junction. This congestion spills into local towns such as Cobham compromising the amenity for local residents.

1. Local public resources are saturated. GP's surgeries, schools, police and transport are currently inadequate. Further population would require new resources.

1. Local towns would be overwhelmed with limited access roads, limited parking and would be less accessible for current residents.

1. To support any developments in the area of Wisley, Ripley and Send would require new shops and public amenities. This investment would need further development to justify costs, which would create out of town shopping areas. In turn this could reduce footfall in local towns.

1. Air pollution in this area is often poor being at the junction of M25 and A3. This section of the M25 is the busiest road in Europe.

1. Wildlife is profuse in these areas and any developments would impact them greatly.

1. With no public transport close to this area residents would be reliant on cars or buses. The roads in this area are unsuitable for larger vehicles or increases in volume.

1. Application 15/P/00012 was unanimously rejected by Planning Officers due to concerns such as the ones I have mentioned.

It is important that local views and expertise is respected and that the democratic process is respected.

I wish to register my strong objection to the local plan, which will have a severely detrimental impact on our
neighbourhood. I object in particular to -

1. The density of proposed additional housing in East and West Horsley. To add 593 houses to already overcrowded
schools, medical facilities and the railway will have a major negative impact on the daily life of local residents.

2. The proposal to remove the Horsleys is outrageous. No "exceptional circumstances" have been demonstrated. The
Council has a duty to protect the Green Belt for future generations.

3. No sound reasons have been given for the proposed extension of the settlement areas of the Horsleys.

4. The development of the Wisley airfield site in Ockham would have an absolutely massive impact on the area, entirely
changing the environment for existing residents and blighting daily life for all concerned. Public facilities are already
overloaded. The heaviest impact would fall on the most vulnerable, especially the elderly.

The local plan would, in short, destroy the village community and turn the area into yet another bleak commuting
dormitory.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. New north and south bound slip-roads to and from the A3 to the A 247 Clandon Road

Where the traffic is already causing problems and any problem on the A3 and the Guildford area creates total gridlock. This
scheme would encourage more traffic to use the Send and Clandon roads to access the A3 and these roads are already at
their full capacity.

There is no scope for widening roads in this area. The proposed housing would add another 1,000 cars and other is heavy
traffic. This junction will not case the traffic problem in and around Guildford but drastically add to it. G.B.C. have inserted
this late scheme to aid development at Gosden Hill Farm and the former Wisley airport. This will be the beginning of major
urban sprawl development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. Send Hill proposal for 40 homes and 2 traveller sites

Send Hill IS II very narrow road and would not support movements of caravans. This land has also been used for landfill previously and is therefore unsuitable for development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8366  Respondent: 10878081 / Linda June Turner  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The number of houses that the Plan intends to deliver over the 20 year period

This has increased from 652 to 693 and should have taken into account the constraints which should have been put in place by the high proportion of the borough's designated Green Belt and the overall infrastructure of roads, schools, hospitals, doctors, etc.

   1. The new boundaries proposed for insetting the villages of Send and Send Marsh/Burnt Common from the Green Belt.

The boundaries should be more closely drawn to the villages to prevent urban sprawl and to prevent the losing their identities. The land within these proposed boundaries would encourage further over-development and expansion of the villages. Rural identities would be lost forever.

I am writing to say that the following points as I am concerned that the local plan will destroy our villages. As a resident in Ripley I am very concerned about the extra traffic that will use the already very congested roads, the lack of schools for our children as we already lack that and the fact that our village will no longer feel like a nice small community which is the reason we moved here.

I object to the lack of evidence for the alleged housing need numbers.

I object to the lack of provision for new schools.

I object to the lack of provision for doctors surgeries.

I do strongly support The Ripley Action group and hope we succeed in our cause to ensure our villages and green belts are protected from over building and development.

Comment ID: PSLPS16/2309  Respondent: 10878433 / John Townsend  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the exaggerated "housing need" figure of 13,860 which is far too high and results & in the completely unnecessary development of the Green Belt. The way students, economic need and affordability are calculated inflates the housing need.

I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford's urban brownfield areas much closer to existing transport hubs.

I object to the proposed new interchange onto the A3 at Burnt Common because it would be disastrous for Send and the (A247) would be gridlocked all day.

I object to the proposed new interchange onto the A3 at Burnt Common because the Transport Evidence is incomplete and unreliable and shows there will be congestion because Send would be used as a cut through to the A3/M25.

I object to all the proposed sites in Send because they were not included in the previous consultation in 2014. Unlike the rest of the borough Send has not been properly consulted and all its sites have been changed substantially.

I object to the development at Garlick's Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks' notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

I object to the development at Garlick's Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

I object to building 45 houses at Clockbarn because of inadequate access and traffic volume.
Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.

I object to the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.
I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the proposed new interchange onto the A3 at Burnt Common because it would be disastrous for Send and the (A247) would be gridlocked all day.

I object to the proposed new interchange onto the A3 at Burnt Common because the Transport Evidence is incomplete and unreliable and shows there will be congestion because Send would be used as a cut through to the A3/M25.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the fact that infrastructure requirements have not been properly considered and are inadequate to deal with proposed housing levels. Roads, doctors and schools will be unable to cope.

I object to the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

I object to the fact that infrastructure requirements have not been properly considered and are inadequate to deal with proposed housing levels. Roads, doctors and schools will be unable to cope.

I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.

I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan. Young people want to live in towns close to work and transport - build in Guildford!

**Comment ID:** PSLPA16/1081  **Respondent:** 10878465 / George Kalorkoti  **Agent:**
At its Annual General Meeting on 21 June 2016 Manor Close East Horsley Residents Association (MCRA) gave careful consideration to the Proposed Submission Local Plan that Guildford Borough Council (GBC) has now published for public consultation, including in particular the proposal to remove Fangate Manor from the Green Belt and include it within the Settlement Boundary. Individual residents will, if they feel it appropriate, submit their comments to GBC on the draft local plan. I am writing on behalf of MCRA to address specifically the proposals relating to Green Belt and to Fangate Manor:

1. **We OBJECT** to the proposal to inset East Horsley from the Green Belt. The proposal to inset East Horsley from the Green Belt will be detrimental to the rural character of the village and should be dropped. The specific changes proposed are not justified under the National Planning Policy Framework rules.

2. We strongly oppose and **OBJECT** to the proposal to remove Fangate Manor from the Green Belt and include it within the Settlement Boundary. There are no exceptional Planning circumstances to justify removing Fangate Manor from the Green Belt, and changing the Settlement Boundary does not in any way enhance the defensible nature of the Settlement Boundary. It merely involves moving the boundary from one hedgerow to another, but leads to the loss of Green Belt and agricultural land.

3. There is an **ERROR** in the Land Availability Assessment dated February 2016, and we ask that GBC corrects this. There is a plan on page 299 that appears to show access to Fangate Manor from Manor Close. Manor Close is a private road, and access will not be granted. MCRA will oppose any change to the character of this very quiet road. The road and the verges are narrow and are not suited to any growth in traffic.

8. **OBJECT** to the additional strain that would be placed on local infrastructure as a result of the proposals in the plan and to the lack of any proposals in the draft plan to address current shortcomings let alone the excess load that would result if the draft plan is adopted as propos Local infrastructure is already overstretched, and examples include:

- The roads through East Horsley are narrow and cannot cope with large vehicles that travel over them.
- Car parking is limited and insufficient.
- Pavements are in poor condition and narrow.
- There is poor drainage that results in surface water flooding.
- School places are not always sufficient to meet current need. This is true for both primary and secondary school places. For example, the Raleigh School is at capacity, and the proposal for an additional 593 houses would require some 150 further primary school places for which there is no proposal in the draft plan.
- The Medical Centre is already at capacity, and the draft plan’s proposal is not to expand it until years 5-15 of the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

</tr>
</tbody>
</table>
I OBJECT to the housing need assessment. The over provision of housing in the LP by 30% is outside government policy and places significant pressure on the borough. In addition the inability to recognise the constraints of the large area of green belt in the borough has lost an opportunity to reduce the housing need for real and legitimate reasons. Consequently wholly unsuitable sites have been identified including Garlick's Arch in Send.

The lack of any opportunity to scrutinise the assumptions of the housing need assessment was also unfortunate and poor government.

At the May meeting of your Cabinet authority was given to the Lead Officer to add minor changes to the LP before it hit your Council meeting. Consequently Garlick's Arch and the commercial site plus the new junction was added. This was not a minor change and I would suggest your council acted wrongly in considering the matter at Council.

I OBJECT to Garlick's Arch development. The huge increase in houses in our village will have a devastating affect on our roads and community facilities. With respect to roads your plan does not provide any information on the traffic implications in the area. Our roads are overflowing at certain times of the day, we have very few buses and no sustainable routes for cycling and more are they propose in your plan.

Garlick's has been badly thought through with developers interests being placed in advance of your residents shame on you all!!

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

A 43a The proposed Northbound and Southbound slip roads

I strongly object to the proposed northbound and southbound slip roads on the A3 as our roads are already congested for much of the day. The amount of lorries and other commercial traffic that already thunders through our village on the A247 is bad enough now. There are problems with speeding, pollution and no safe crossing points The proposed sliproads would increase this tenfold. The road is bordered on both sides by housing, businesses, side roads, a recreation ground and the primary school. Why are the children and adults of Send less important than in other parts of the Guildford area?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/7011  Respondent: 10878561 / Amy Dowsett  Agent:

A 44 Land west of Winds Ridge and Send Hill

As a resident of Send Hill I strongly object to any further development on the hill. The road is not wide and in some places only one car can pass at a time, this is also the case along the wider areas if there are parked vehicles on the road (Send Hill being a residential road).

There are no pavements and pedestrians have to walk along the road. Many villagers use Send Hill in order to visit St Mary's Church and the cemetery which has recently been extended, as well as dog walkers and cyclists, ramblers and, of course, residents.

The land is filled with mature native trees, wildflowers and attendant wildlife. Part of it is an old tip which has methane gas meters across it. It is directly behind existing housing and faces Send Hill, a former quarry which was landscaped when it closed down.

There is a huge amount of wildlife on this area including rare species. Before the land was "landscaped" you could find sand lizards and there were hundreds of Sand Martin nests in the sand wall below the original footpath. These were completely destroyed by bulldozers.

There are still grass snakes, slow worms, and a neighbour has seen adders. More importantly, I have seen two smooth snakes in this vicinity.

There are bats, owls, woodpeckers, red kites, buzzards, sparrowhawks, kestrels, stonechats, redwings, cuckoos, and numerous other bird species.
Badgers, foxes, deer, rabbits, hares, stoats and other mammals reside, feed or traverse the hill. Building on this site will destroy yet more of our natural world.

The road is narrow by the proposed site and access for extra vehicles, lorries, caravans etc., would be difficult to say the least. The extra traffic would put pedestrians and cyclists at severe risk.

Send Hill has a restriction on having caravans, mobile homes and any structures placed upon it.

The location of Send Cemetery on the hill is a peaceful and beautiful site with spectacular sunset views, fields and trees. It is a tranquil place for thought and remembrance and should not be ruined by housing, noise, traffic and traveller sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I wish to object to the various plans put forward in the Local Plan relating to the village of Send.

Send is a village within the green belt and I strongly object to it's removal, whether in it's entirety or in pieces, from the green belt. There are enough brown field sites within the Borough that could and should be used for building without having to steal our precious green belt and destroy our village forever.

I strongly object to the building of a vast amount of houses and industrial units in Send as it will increase the population by at least 25% without there being the infrastructure to support this type of increase. During the past 25 years, there has been a lot of housing built within the village and the local amenities are already stretched. Our roads are at a standstill during rush-hours, and combined with roadside parking and the narrow width of many of the roads, the extra traffic created by the local plan will make living in our village unbearable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Thank you for the opportunity to comment on the Local Plan.

I am very disappointed that the points that I raised on the July 2014 draft plan have not been addressed.

Whilst I understand the need for more houses the scale of increase is totally out of proportion to the size of West Horsley village. West Horsley has around 1,100 houses - the plan to increase this by 35%, and within the 5 year plan will destroy the village and change it into another urban sprawl.

More houses are needed in the urban areas where people work not in the country which results in additional commuting which will only worsen the pressure on all the infrastructure services and particularly the roads. The plan does not address these issues and it is crucial that it does.

My main concern is with regard to the roads and parking. At peak times they are currently inadequate and will become totally congested with the likelihood of a further 800+ cars in the village associated with the planned new housing. Car parking is already very difficult and there is very little scope for further parking or road improvements. The station car park is also inadequate and often at capacity. The paths are already narrow and very dangerous in places, particularly along the main Ockham road and East Lane.

Some additional housing is needed but this is not more of the large four/five bedroomed houses that have been built over the past few years. There needs to be more smaller housing for first-time buyers and for those 'downsizing' such as the housing of Weston Lea, and this needs to be with easy access to the local shops and services.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Proposed Submission Local Plan

I have reviewed the Proposed Submission Local Plan published by Guildford Borough Council (GBC) for public consultation- and am dismayed by some important aspects of its content.

In particular:

1. I do not agree with the scale of the proposed house building programme. The target shown represents a 25% increase in the Borough housing stock. However, the Office of National Statistics projects merely a 15% population increase for Guildford Borough over the same period.

Therefore I object to the Borough housing targets set out.

1. The Local Plan incorporates the statement "We will continue to protect the Metropolitan Green Belt". However, GBC would seem to be in breach of this aim through the housing policies it has set out in the Local Plan, in which 65% of the developments will be made on land that is currently Green This includes the proposal to inset East Horsley from the Green Belt; propose boundary changes and the proposal to remove Wisley Airfield from the Green Belt.

Consequently, I object to the proposed intrusions into the Green Belt, which will have a material adverse impact on the area.

1. The infrastructure proposals appear inadequate to meet existing and current needs, let alone those of the area after the additional proposed developments in the local Pl

Therefore, I object to the proposed infrastructure proposals.

5. Consequently, in summary, I object to the Proposed Submission Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
+ The Plan continues to propose " insetting " East Horsley " from the Green Belt.

+ Changes in settlement boundaries mean the East Horsley settlement area will increase by 37% and include most roads south of the A246.

+ Development of 100 homes is still proposed near Horsley station.

+ Development of some 2000 homes is still proposed on the former Wesley airfield.

+ Around 57% of all new housing in the Local Plan is on land which is currently Green Belt.

+ while the ONS forecasts population growth for Guildford at 10.4% over the period of the Plan, GBC proposes to increase housing stock by 22%.

+ Consequently, I strongly object to the excessively high housing targets being set, the failure to recognise the various constraints to this development and the large-scale destruction of the Green Belt land.

1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

0 The "objectively assessed need" figure of 693 homes a year is too high. A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.

0 The current SHMA inflates the proposed housing figure due to failure to correct for errors in the historical data for international migration flows, issues with the way it considers students and affordability and flaws in the method for estimating the number of homes needed to support job growth. It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.
Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 where the traffic is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham's sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England's requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an "aspiration" in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like East and West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/ further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5554  Respondent: 10878977 / Lisbet Hjort Jensen  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (BB).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site.

There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced by a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy 03).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site (Policy I4).

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick's Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (BS) at Garlick's Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick's Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPP16/11008  Respondent: 10878977 / Lisbet Hjort Jensen  Agent: 

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floor space at Garlick's Arch - Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and BS) floor space will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floor space to be located at Garlick's Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the loss of rural employment (Policy E5)

Policy ES supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY EG6- The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor "attractions" and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/"Disneyfication". Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many "leisure and visitor attractions" already. The case for creating more is not made and no examples are given. Instead, the plan's explicit priorities should be:

1. To protect the borough's prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford's river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An "English town break" (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently bypass Guildford to go to Bath, Oxford or Cambridge instead.
4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1. I OBJECT (POLICY H1- Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan peri. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinized or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provide for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council's timidity is a case of "regulatory capture" by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog's Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3 - Rural Exception Homes

I OBJECT. This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the "mix" this can include "market" housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/11015  Respondent: 10878977 / Lisbet Hjort Jensen  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.
The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents' in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick's Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11017  Respondent: 10878977 / Lisbet Hjort Jensen  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2
I OBJECT due to the congestion that development will cause to the trunk roads, A 3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a 'special circumstance' and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding.
Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on the existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly consi It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the "West Surrey" tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, "West Surrey" is much too small. Half of Guildford borough's residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside "West Surrey". Puzzlingly, the adjacent district of Rushmoore, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make "West Surrey" reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour's "need". Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey's 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick's Arch (Ripley/Send border) (A43) and Gosden Hill (dandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<tbody>
<tr>
<td>1.</td>
<td>I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.</td>
</tr>
<tr>
<td>2.</td>
<td>There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.</td>
</tr>
<tr>
<td>3.</td>
<td>Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,</td>
</tr>
<tr>
<td>4.</td>
<td>The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity</td>
</tr>
<tr>
<td>5.</td>
<td>The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.</td>
</tr>
<tr>
<td>6.</td>
<td>The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.</td>
</tr>
<tr>
<td>7.</td>
<td>I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).</td>
</tr>
<tr>
<td>8.</td>
<td>The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.</td>
</tr>
<tr>
<td>9.</td>
<td>A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.</td>

<tr>
<td>4.</td>
<td>There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.</td>
</tr>
</tbody>
</table>
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the Green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.
18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.
13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.
14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )
I object for the following reasons:

1. **We should not allow building on green belt land.** We should protect this land because:
   1. It provides the area with valued natural beauty and rural character
   2. It provides a needed break up to urban sprawl – important given the high areas of pollution in the area
   3. It provides natural habitats for local wildlife that should be valued and taken care of

1. **The plan will magnify and worsen current shortfalls in existing infrastructure.** The allocation of housing to Ockham, Ripley, Horsley and Effingham and the 2,000 new homes at the former Wisley Airfield is hugely disproportionate and will adversely impact of the communities of the borough of Elmbridge. For example, the large number of new inhabitants of the proposed new housing will:
   1. Take traffic congestion beyond breaking point. Elmbridge roads, particularly at key intersections such as the Painshill junction, are already very overcrowded, particularly at rush hour. It is unthinkable to make this problem worse however a deterioration of the situation is inevitable since residents of the new planned housing will produce an estimated 4,000+ cars and will have to pass through these areas to commute or to shop/socialise.
   2. Take parking problems beyond breaking point. This is because residents of the proposed new development will be relying on existing car parking provisions at Elmbridge shops and rail link services. The car parks at the two nearest stations are already at capacity at peak times, and there is no overflow area to cater for the huge numbers of potential additional residents. It is also true that a simple trip to the local shops (which the 2,000 residents of the Wisley airfield would be looking to use) can already involve long queues to park e.g. at Waitrose, since at peak times spaces simply run out. 4,000+ cars-worth of new local shoppers will make this intolerably worse.
   3. Taking public transport problems beyond breaking point. Local train services are already hugely overcrowded. I commute daily from Cobham and can confirm that in spite of recent improvements, rush hour services are still commonly full/standing-room only. The idea of a large volume of new commuters joining these services is crazy. There is genuinely no space. The planning department is either naïve or willfully negligent to recommend that residents at Wisley could drive to Cobham station– this will be terrible for roads, parking and the train itself, all of which are at capacity already!
   4. Take local services beyond breaking point. We do not have adequate local services, e.g. doctors surgeries, to cater for the large increase in population density. It is already impossible to get an appointment on the day unless you queue outside the surgery for 30 minutes before it even opens and are willing to wait for in excess of an hour.

1. **The plan will create an unacceptable level of pollution.** The level of pollution in the area is already in excess of legal limits. This level of pollution puts the health of local residents at risk and it would be madness to build a school in the midst of such high pollution. I am a liability underwriter by trade and would point out that in future, the planning department would very possibly be found negligent for wilfully ignoring pollution guidance and expressly allowing this problem to be worsened. Should local residents and particularly new schoolchildren develop pollution-based illnesses, it would not be unreasonable to expect local planners/developers to answer to why they ignored all reasonable pollution guidelines and exposed injured parties to foreseeable health risk. This is GBC’s responsibility and you are liable for the wellbeing of the communities you represent and/or impact with your decisions.

Overall, the project will damage the area. It will damage the quality of life of its residents. Local infrastructure cannot support the increase in population density.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

A a resident of Send/Ripley I wihs to make the following points:

I object to all erosion of the Green Belt.
I object to any "in-setting" of ANY villages from the Green Belt.
I object to the the amount of development in one area of the borough.
I object to the lack of immediate provision for new schools.
I object to the limited consultation period.
I object to the last minute inclusion of new sites with less than 2 weeks notice.
I strongly object to the lack of any evidence for the alleged housing need numbers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3026  Respondent: 10879457 / Louisa Scott  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the building of 45 houses at Clockburn nursery because of inadequate access and traffic volume. This road is far too narrow to take on more traffic with the junction with Send Road being hazardous when trying to pull out into the main road. there is already a development going ahead including 64 apartments and a marina which will increase congestion in this road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/3023  Respondent: 10879457 / Louisa Scott  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to plan A43 the inclusion of the 30 hectares of Garlick's Arch in this Plan A43. This site is new and was not included in the Regulation 18 Draft, and has not been consulted on previously. It forms part of the Green Belt and is permanently protected by the NPPF, which is there to prevent the merging of settlements. It also contains around 5 hectares of ancient woodland, some of which dates back to the 16th century the plan includes the building of 400 houses and nearly 2 acres of industrial buildings and warehousing. The ENLA of 2015 shows an 80% reduction in employment space over that of 2013, therefore industrial space at Burntcommon is no longer required. Quite apart from losing Green Belt land, the extra traffic generated by an estate of this size, which will consist of about 800 cars and many HGV's, will put an unbearable pressure on all the roads around the Burntcommon roundabout (A247/B2215), especially at rush hour times. As well as the roads being unable to cope with such huge population growth, neither will the local schools or the Villages Medical Centre.

Comment ID: PSLPS16/3024  Respondent:  10879457 / Louisa Scott  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to plan A43A a new northbound slip road to the A3 from Clandon Road and a new southbound off slip from the A3 to A247. The proposal to create extra entry and exit slip roads from the A3, London bound, off the A247 Clandon Road will add grossly to the congestion that is already a big problem at the roundabout and surrounding roads in Send at rush hour.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

• disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Comment ID: PSLPA16/3258  Respondent: 10879873 / Alison Allen  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. The developments would mean that the green belt boundaries have to be changed which is contrary to Policy P2: Green Belt and the Countryside which states that the green belt will be protected against “inappropriate development”.

2. The density of the proposed developments is out of character with the rest of the villages and the number of proposed homes would swamp and forever alter the character of the existing villages. The rural character of the village will be lost with the influx of traffic of the car using population.

3. The lanes of West Horsley are small, some narrow, they twist and bend with limited sight lines, and are too small for HGV traffic or other large vehicles which would be much better sticking to the A roads. Any development will swamp the village with heavy lorries during the development phase, breaking up the surfaces of roads which are already in very poor condition, and once the development is over the roads will be swamped with the consequential traffic from the multiple vehicles that every household now owns. At peak hours long traffic queues already develop at every main junction, and with even more traffic this could lead to near complete congestion. The local lanes are at times extremely hazardous for cycling with a number of drivers paying little or no attention to speed limits or where and when it is safe to overtake any cyclist or other slower vehicle and as a committed utility cyclist this is already a huge concern. Further traffic volumes will pose a real problem to the many cyclists who use the local roads. Cycling needs to continue to be safe throughout the local area. Considering pedestrians many parts of the village have narrow pavements and in several places none at all. In Long Reach there are intermittent or no pavements with pedestrians having to walk along the sides of the country lane. The greater volumes of traffic will be a considerable problem for these pedestrians.

4. The Raleigh school in West Horsley has insufficient room for children from the Horsleys at all levels, with children from outside the immediate area compounding the difficulties. More homes in Horsley will make matters even worse. The site for the Raleigh school is extremely cramped and the school is currently feeling forced to search for an alternative site. With any greatly increased population in the village the relocated school is likely to end up oversubscribed once more. Any new homes will just make a bad situation even worse.

5. The current provision of Medical and dental facilities are seriously stretched - they are insufficient for the existing communities. It is extremely problematic to get a Doctor’s appointment when most needed and almost impossible to get on a list for a National Health Service Dentist. Additional homes would put extra stress on the existing facilities.

6. West Horsley has just one shop; the other was closed and converted into flats. No provision has been made for additional shops and services alongside the new homes in the local plan. The shops at Station Parade, East Horsley are mainly visited by car by the local residents and people from the surrounding countryside. The parking at these shops is limited, in addition some people consider it perfectly alright to park on the double yellow lines outside the supermarket causing blockages and impeding junctions - the traffic situation at peak times is already unsuitable, parking for the shops and services in East Horsley could not cope with the influx of new homes/residents.

7. Although it is possible to walk along the Ockham Road along the pavement to visit the shops this is not a the rural experience expected of Horsley but one of a walk along a busy road of vehicles passing close and at times faster than they should. This road is insufficiently wide for two larger vehicles to pass and often wing mirrors of these vehicles overhang the pavement very close to pedestrians. I am aware of one pedestrian who was hospitalised as a result of being struck by a wing mirror whilst on one of these pavements and one of my children has been struck by a car wing mirror whilst walking along the pavement on the Ockham road. The greater increase in volumes of traffic generated by the proposed development and afterwards with the increase in vehicles heading for the village will make it even less likely that people will be safe on these pavements.

8. The waste water facilities would be unable to cope with any additional homes – it can’t cope with the number of homes that are already in the village, overflowing in Ockham Road North, Green lane area.

9. Some of the proposed sites have inadequate surface water drainage as it is – the land gets flooded. Building on such land is just asking for the houses to be flooded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no provision for Garlicks arch so the Plan takes no account of the infrastructure needed for this site. It is therefore not fit for purpose.

Please take these objections into consideration and the Plan is amended.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

3. I object to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy P1)

I have been a resident in Ripley since 2010 and the weight of traffic has dramatically increased. I am a cyclist so notice this first hand.

At a time of reduced bus services through Ripley and no train stations nearby the cars from the extra houses will clog the already busy roads as the local transport facilities are already inadequate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Proposed Submission Local Plan June 2016

I object most strongly to the Guildford Borough Proposed Submission Local Plan (June 2016)

I list below the main reasons for my objection

1. I object to the not protecting the Green Belt (Policy P2)

I strongly object to removing the villages of Ripley, Clandon and Send from the Green Belt.

In addition the sites of Wisley Airfield and Garlicks Arch must not be removed as their development would wreck the local area creating an urban rather than a green environment. As required by the National Planning Policy there are no exceptional circumstances for the above sites being removed from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

2. I object to the Local Plan as the proposed development is not sustainable (Policy S1)

The 13,860 extra houses is not sustainable, my village of Ripley and local villages of Send and Clandon will be damaged, we don’t need these extra houses in our local area. The plan lacks any infrastructure improvements for Garlicks Arch. This development must surely be more suited to an urban area with transport already on hand.

Answer (if comment is on questions 1-7 of the questionnaire): ( )
To whom it may concern,

I am writing to object to the current plan for the development of Keens Lane.

Having moved to Tanglely Lane 3 years ago with the purpose of living in peace and quiet with no street lights and little traffic I am very upset that this development has been proposed on green belt land which I assumed would be safe from development!

My first issue is we applied for planning permission for an extension which was initially turned down because of the impact on the green belt, I would like someone to explain how an extra metre on the side of my house was turned down but it is now ok to ruin a large greenbelt site for 140 houses opposite my house?

Secondly we regularly see Deer using this area passing from Whitmoor common, I’d like to understand what impact this will have on the local wildlife and what provisions have been put into place for them? We also have lots of Bats which I know are in the old stable buildings on this site, what will happen to them?

Finally the traffic on the Aldershot road as well the Worplesdon Road towards the town centre is already heavily congested in the mornings, adding additional traffic from here will make mornings harder for us all!!!

I hope these comments and objections are listened to?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Anyone with an ounce of sense would realise that Tannery lane is a narrow bendy road joining Send Road at a dangerous junction with two schools within a 500 meter radius. The traffic in Send, at peak hours, is heavily congested and additional traffic emerging from Tannery Lane will only make matters worse. The congestion is the result of bottlenecks at both the Burnt Common and Old Woking roundabouts. The traffic in Send has already been exacerbated by the recent planning permission for 64 apartments and a marina further down Tannery Lane. A ridiculous idea!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to building 45 houses at Clockbarn Nursery. The traffic in Send is already heavily congested and further traffic emerging from Tannery Lane will only make this worse. Traffic improvements at the junction will not help, as the congestion is the result of bottlenecks at both the Burnt Common and Old Woking roundabouts. Planning permission has already been granted for 64 apartments and a marina further down Tannery Lane which will impact future traffic so to consider further development cannot be justified. Tannery Lane is a narrow and bendy road joining Send Road at a very difficult and potentially dangerous junction.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to a new interchange with the A3 at Burnt Common. My previous points already highlight the fact that Send Road is heavily congested especially at peak times Noise and pollution levels, already extremely high, would become much worse! By creating a new interchange at Burnt Common this will choke Send Road and the Village with additional traffic to and from Woking. This route through Send is likely to become a rat run to Woking from the A3 & M25 and in addition would have to contend with additional traffic from the proposed 2000 houses at Wisley, 2000 houses at Gosden Hill and 1850 houses at Blackwell farm.

I trust you will consider the above comments and those of all the other residents in Send and the surrounding villages who feel strongly about the proposals and wish to preserve their communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Yet another ridiculous idea! As with the Clockbarn proposal, the effect of the additional traffic on the already congested Send Road will be significant and unacceptable. Send Hill is also a narrow residential lane and will be badly affected by the additional traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the development of 40 houses and 2 travellers’ pitches at Send Hill. Send Hill is a narrow width residential lane and will be badly affected by the additional traffic. As with the Clockbarn proposal, the impact of the additional traffic on the already congested Send Road will be significant and unacceptable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

government gave a clear election promise to protect the Green Belt. The current proposals renege on those promises. There are no special circumstances to justify Send losing its Green Belt status; it acts as a buffer to separate Guildford from Woking and therefore it is essential that its Green Belt status be retained.

1. The Green Belt is not something that can be taken away by unrealistic Government targets; greedy property developers or a spineless Borough Council who prefers to develop in the areas that they believe will give them the least resistance.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: PSLPS16/7430  Respondent: 10880609 / S. Groves  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42
I OBJECT to the building of 45 houses at Clockbarn Nursery because of the inadequate access and increased traffic volume. Tannery Lane is far too narrow and winding, with limited passing places and visibility, to take any further traffic loads. The junction with Send Road is already over-crowded and hazardous both when turning in to Tannery Lane, or exiting on to Send Road. Planning permission has already been granted for 64 apartments at the Tannery and for building the Marina, both of which will already create additional burdens on the tiny lane and its traffic load and further development will only exacerbate this situation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the building of 7000sq metres of industrial space and 400 houses at Garlick’s Arch opposite Send Marsh Road. The site floods regularly and is covered by ancient woodland, up to 500 years old, which is home to a variety of wildlife. The industrial space is not required and the additional heavy loads of commercial traffic will need to pass through Ripley village in order to gain access to the A3 and M25. There is already provision for commercial space at Slyfield industrial estate and this should be fully developed before additional sites within Green Belt locations are used. With regards to the 400 houses at Garlick’s arch, the currently existing brownfield sites within Guildford and its surrounding areas should be fully utilised before any housing is agreed within Green Field sites. Guildford has refused to share the methodology behind calculating the upcoming housing requirements and therefore no weight should be given to the use of these calculations when planning additional housing capacity.

I further OBJECT to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

I further OBJECT to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to a new interchange with the A3 at Burnt Common. Send would need to accommodate the traffic for the proposed 2000 new houses at Wisley Airfield, 2000 new houses at Gosden Hill, Burpham as well as the 1850 proposed new houses at Blackwell Farm. Much of the traffic between these sites, the A3 and M25 would need to pass through the already congested roads in Send and Send Marsh, which are already overloaded with existing local traffic. Noise and pollution levels within Send and Send Marsh are already at excessive levels and the proposed interchange would only worsen this situation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the fact that infrastructure requirements have not been properly considered at any point in this proposed Local Plan, and are inadequate to deal with proposed increase in housing levels. Roads, public transport, availability at doctor’s surgery and places within schools will be unable to cope with the increase in housing and population.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Send Village being removed from the Green Belt. The Green Belt was intended to be permanent, as required by the National Planning Policy Framework, and there are no special circumstances to justify abandoning it. Send’s Green Belt provides an essential buffer stopping Woking and Guildford becoming one large conurbation. Local councillors and central government gave a clear election promise to protect the Green Belt and this plan reneges upon that election promise. Developers will be quick to take advantage of the removal of Send from the Green Belt and then there will be nothing to stop further development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.

I OBJECT to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to what seems to be disproportionate disguise of development in my area of the borough. I also do not believe existing brown fields sites are being considered properly.

I object to very limited period of consultation. We are being treated with contempt in this.

I object to the decidedly last minute inclusion of new sites with than two weeks notice. This is not proper.

GBC has a clear need to take care of the interests of the residents not just of today but also future generations. The Surrey that I know and love and have lived in for nearly 40 years will be destroyed by there ill thought out plans. I urged it to face up to the fact that it has got it badly wrong.

Can GBC really claim to represent residents?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object to the Draft Local 2016 Plan specifically to the removal of Send, Ripley and Clandon from Green Belt status as housing development should NOT constitute “very special circumstances”.

The Government stated, in a letter by Housing and Planning Minister Brandon Lewis, that “demand for housing alone will not change Green Belt boundaries”. The National Planning Practice Guidance states that “unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances justifying inappropriate development on a site within the Green Belt”.

I also object to the building on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill because I do not believe it is justified by any “special circumstances” and the fact that Green Belt is meant to be permanent and not continually eroded. Most people live here because it is a Green Belt area because they love this very special amenity. In addition to this, people have probably paid a premium to live here - again because it is such a beautiful place to live.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send
I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford’s urban brownfield areas much closer to existing transport hubs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3492  Respondent: 10881217 / Ben Stevens  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

I am writing to object to the Draft Local 2016 Plan and in particular, I wish to object very strongly to the removal of Send from the Green Belt. This green countryside between Woking and Guildford is the reason that it is such a pleasant and attractive place to live and work even though the roads are often very congested.

I object to the building on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill. I cannot see how this could be justified by any “special circumstances” and I would like to add that Green Belt is meant to be permanent and not continually eroded.

I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan.

The “housing need” figure of 13,860 is far too high and results in the completely unnecessary development of our Green Belt. The way students, economic need and affordability are calculated inflates the housing need. Students are only part time residents in Guildford needing one bedroom in shared housing units and they will not be wanting to live in houses in the villages.

I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford’s urban brownfield areas much closer to existing transport hubs.

I also object to the proposed new interchange onto the A3 at Burnt Common because it would be disastrous for Send and the (A247) would be gridlocked all day.

I object to all the proposed sites in Send because they were not included in the previous consultation in 2014. Unlike the rest of the borough Send has not been properly consulted and all its sites have been changed substantially.
I object to building 45 houses at Clockharn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.

I object to the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

I object to the vast development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.

I object to the fact that infrastructure requirements have not been properly considered and are inadequate to deal with proposed housing levels. Roads, doctors and schools will be unable to cope.

I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.

I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

I believe that these housing developments and the proposed changes would change the nature of this beautiful area forever – an area I have loved growing up in and one I would eventually love to invest in myself when I am able to buy a property. Our villages are being asked to accept a disproportionally high number of Guildford’s housing needs and I do not feel that this need is evenly shared throughout the Borough.

I believe that a few years ago when I was at school in Burpham, a local 10 minute journey would frequently be disrupted by traffic on the Send Road, the A3 and also the slip road into Burpham. Even though we would leave extra time for rush hour traffic, the smallest of incidents would mean this journey time could creep up to three or four times as long. The local bus companies will confirm this as students on the buses were let off detentions as it became such a common complaint. The only time that traffic does improve is during holiday periods and the Summer months when fewer students are in school because of exam study leave. This means that demands on the roads are not as high but of course this is only for a short time during the year.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A42 change at Clockbarn in Tannery Lane. The plan to build sixty homes instead of the 45 originally suggested is ridiculous. This is a 33% increase instead of a reduction of 33% which would suit that particular site. Sixty houses are far too many. It would ensure that current traffic problems in Tannery Lane are worsened and also a large building development there will add extra surface water will add to the flooding issue which exist on that site.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy 2 at paragraph 4.3.15. I do not think Send Business Park should be inset from greenbelt land. It is in a beautiful quiet rural lane in an area of outstanding natural beauty which is why we all have chosen to live and work here. There is highly restricted vehicular access along Tannery Lane in both directions and as it is. This is, and should remain an area of outstanding beautiful countryside adjacent to the Wey Navigation.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am a West Horsley resident and I am extremely concerned about the proposals. We moved here for the community life and the open spaces. Increasing the housing to such a density will remove so much of our green spaces and erode the village community that is so precious to so many. What of those who visit for the walks and cycling and to holiday here? This is not a case of "not in my back yard". Of course more housing (including affordable housing and smaller units for the young and those who wish to downsize within the village) is required but the number of dwellings proposed will completely alter the character of West Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Roads:

The roads in West Horsley would struggle to cope with the increase in traffic. For example, The Street is the only entry into West Horsley from the A246. It is narrow in places and it would not be possible to widen it and it can be very difficult to pass large vehicles such as lorries, tractors, buses and school buses, which frequently use this road.

Pedestrian traffic does not fair any better. In most cases it would not be possible to widen pavements. The increased traffic levels would be hazardous for pedestrians. Traffic will increase considerably as a result of the proposed housing estates. Most houses have 2 cars and some have 3. Journey times on local roads will increase considerably. No detail on roads and transport infrastructure in West Horsley has been found in any of the Local Plan documents.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The scale of potential development in West Horsley is excessive and is not supported by the Guildford Borough Economic Strategy 2013 - 2031. West Horsley is remote from the existing centres of employment and the new Economic Development Site proposals which are focussed on the opposite side of the Borough.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The expansion of West Horsley village is unsustainable. There is only one small shop, no post office and a sparse week day only bus service through the village which would not be sufficient to serve the high volumes of housing being proposed. The development of nearly 400 homes (an increase of 35% on the current number of dwellings) on the 4 proposed sites are at a far higher density than currently exist. No sound reasons have been given for the proposed changes to the settlement boundaries, which appear to be aimed solely at increasing the land available for additional development.

Public Transport: Horsley rail station is a very busy station. The car park is usually full on week days; unless it is expanded it will not support such a large increase in vehicles. There would also be increased traffic to & from the station to drop off & pick up travellers including school children going to Guildford and Leatherhead. At an exhibition about the proposed development of Wisley airfield I was told that there were no plans to increase the car park capacity at Horsley station.

Schools: What is the estimated increase in the number of school places? Any provision for additional places must be in place before any houses are built. Surrey County Council has a statutory duty to ensure appropriate school commissioning and provision. The Raleigh school serves both East and West Horsley and is full every year plus a waiting list. Will the new Howard of Effingham School have greater capacity? If yes, will it meet the needs of the increased population West Horsley? If no, then this needs to be urgently addressed. What consultation has there been between Guildford Borough Council and Surrey County Council?

Local facilities: (Shops, health services, playgrounds, library, community buildings and spaces) There is one local store in West Horsley and parking for 4-5 vehicles. The shopping area at East Horsley is vibrant, thriving and well used. However, parking can be difficult with the car park often close to capacity. This would only be exacerbated by an increase in traffic and I believe would ultimately put people off shopping there. If people cannot park they will take their custom elsewhere meaning a huge loss of custom to the local businesses.

I am not against all development and I agree that more housing, especially smaller properties and affordable housing is needed but it MUST be in keeping with the locale and not at the cost of the current landscape and community. And the infrastructure needs to be in place before any housing is built.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The sites proposed in West Horsley are currently within established Green Belt. The policy on protection for the Green Belt is contained in section 9 of the National Planning Policy Framework, which sets out the fundamental aim of Green Belt policy. Policy on development in Metropolitan Green Belt is set out in paragraphs 79 - 92 of the NPPF. Inappropriate development is, by definition, harmful to Green Belt and the NPPF states that it "should not be approved except in very special circumstances". Local planning authorities are advised to "regard the construction of new buildings as inappropriate in Green Belt".

The Framework also states that a Green Belt review should only happen in "exceptional circumstances". This concept is further elaborated as being "for example when planning for larger scale development such as new settlements or major urban extensions". The Green Belt in Surrey is established with detailed boundaries, therefore "exceptional circumstances" must be demonstrated to necessitate the change to its boundaries. No exceptional circumstances or other justification have
been made for the proposed new Green Belt boundaries. There are identified brownfield sites in the borough which have not been seriously considered in the borough plan.

Policy P2 of the Guildford Plan states that Guildford Borough Council "will continue to protect Metropolitan Green Belt against inappropriate development." I am totally opposed to the removal of West Horsley from the Green Belt by insetting and the extension of boundaries and believe that the proposed development is wholly inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Drainage, sewers etc.:

A number of areas in West Horsley are subject to frequent flooding; for example The Street near the railway bridge is very susceptible to flooding and on occasions last winter even the school buses could not get through. East Lane is subject to flooding where it abuts site A41. With the removal of the open field to soak up rain fall, this will only run-off onto East Lane causing more serious flooding on the road surface.

This risk will increase if the vast amount of building proposed goes ahead and natural drainage is concreted over. No detail on waste water infrastructure in West Horsley has been found in any of the Local Plan documents.

Thames Water have commented that the current waste water network in this area is unlikely to be able to support the demand anticipated from this development. Drainage infrastructure is likely to be required to ensure sufficient capacity is brought forward ahead of the development. The Draft Guildford Borough Infrastructure Delivery Plan 2016 also identifies a significant Surface Water Flooding hotspot in and around West Horsley. Without the preparation of a drainage strategy to determine the exact impact on the infrastructure and the significance of the infrastructure to support the development, the deliverability of the proposed housing development is unclear.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing in connection with the proposed plans to build extensively on green belt land in the area. I strongly object to these plans. The green belt should be sacrosanct in maintaining the balance between urban landscape and countryside.

Any change in the status of the green belt will result in changing forever the landscape of England. Although appreciative of the need for additional, affordable housing it is unlikely that homes built in the Surrey area will be within the reach of young people.

The infrastructure does not appear to have been considered in these plans, but are clearly necessary for transport links to working areas or schools and shops for families.

Additionally the council has not made the case, satisfactorily, to change the status of the green belt. If this should be done it will forever change the area of Surrey; what a legacy to leave our children and future generations?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the proposed plan for massively increasing the number of houses & industrial spaces on GREEN BELT LAND.

I object to changing designated Green Belt into designated Future Development land.

I would also like to state my disgust at the total contempt shown towards the people living in the area, by the council, who have clearly and demonstrably ignored all the concerns raised over past plans by proposing plans that will be far more damaging to the area.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM)

I am writing to object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous years.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road infrastructure. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
  3. The increased availability of this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion to the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted limits. Additional traffic will exacerbate...
this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
  - I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Officers, who cited the same grave concerns highlighted in this letter.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I would like these objections to be fully considered and for the Wisley Airfield (Three Farms Meadows), Allocation A35, to be removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2883   Respondent: 10882113 / Amanda Stevens   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object in the strongest terms to the removal of Send, Ripley and Clandon from the Green Belt.

It was my understanding that the Government stated, in a letter by Housing and Planning Minister Brandon Lewis, that “demand for housing alone will not change Green Belt boundaries”. Indeed National Planning Practice Guidance states that “unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the ‘very special circumstances justifying inappropriate development on a site within the Green Belt’.

Therefore, I was absolutely horrified to learn of your intention to “inset” or rather REMOVE Ripley, Send and Clandon from Green Belt status in order to circumnavigate this difficulty and I strongly object. It is apparent that you have no respect for the National Planning Practice Guidance and you appear to have little respect for the general members public who live, work and pay their council tax in this area. I reach this conclusion because it seems you are prepared to ride roughshod over any commitments by Government to preserve the Green Belt for future generations.

As an ordinary member of the public, I had absolutely NO idea that you had classified different areas of Green Belt into areas of sensitivity i.e. those you would be prepared to lose from the Green Belt and those areas you wouldn’t. I feel absolutely furious as well as utterly betrayed because I do not feel this has EVER been made clear to the general public.
Many of us have chosen specifically to live in and invest in houses here because we adore living in this area surrounded by beautiful countryside and I am one hundred percent certain we have paid a premium for doing so.

I can see that the reason that you wish to remove the land around these villages from green belt status is for expediency. I can see how it would be an easy solution for you but once removed, you will have changed the character of our villages for ever thereby having a dramatic affect on their desirability as places to live and work. It is a decision that will never be able to be reversed.

I object to the 400 house development that has been planned at Garlick’s Arch and I object to the 7,000 sq meter industrial site. I feel that the impact of such an enormous development in Send is completely disproportionate and will cause absolute chaos at the Burnt Common/Shell roundabout which is already often congested in the mornings and evenings as people vie for access to and from the A3. In addition to this of course it will only add to the current congestion on the A3 which for anyone who lives here is a daily battle.

I also object to the high number of 45 houses being built at Clockbarn because I understand that planning permission has already been granted for 65 houses at the Tannery which means there will be a further 110 houses inSend with all the extra traffic that will bring down Tannery Lane which is narrow and winding - not to mention all the additional traffic congestion along Send Road.

I object to the 40 houses being built at Send Hill. I understand that the subsoil of the existing site contains asbestos which could give rise to all sorts of health problems for those living there and nearby if this is disturbed.

I strongly object to the way that student housing is included in the calculation of housing needs for permanent residents. To use this fluctuating population which drops for up to six months of every year (4 months over the Summer and 2 more at Christmas and Easter) as a reason would have a dramatic effect on our Green Belt and yet we all know NO students will want to live out in the surrounding villages.

I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3. This will ENSURE gridlock on the A3 for everyone at ALL times of the day rather than between the hours of 7.30 am to 9.30 am and again in the afternoon from 2.30 (yes, it often starts that early!) to 6.30pm - often later. This will mean that because the A3 will be at a standstill - so too will all the surrounding roads as people seek to find alternative routes.

I also object to the failure of GBC to identify sufficient brownfield sites within the urban area which should first be targeted for development which would enable residents to use the railway networks to and from work.

Please confirm receipt of my objections.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Policy 2 at paragraph 4.3.15. I do not think Send Business Park should be inset from greenbelt land. It is in a beautiful quiet rural lane in an area of outstanding natural beauty which is why we all have chosen to live and work here. There is highly restricted vehicular access along Tannery Lane in both directions and as it is, we have articulated lorries travelling up and down this lovely country lane.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

All,

I am writing to object to the inclusion of Green Belt land in the local plan.

I believe there are enough suitable alternatives.

I note several councillors campaigned for election with a manifesto that included preservation of the green belt. I expect my elected representatives to fight against any use of the green belt.

In particular I object to the inclusion of Three Farms Meadow in the Local Plan. Only a few weeks prior to the local plan being published the proposed development was unanimously rejected on numerous counts. These difficulties will not be overcome in the short or medium term, and I believe the council should not invest further time or money trying to fix this inappropriate development.

Para 80 NPPF purposes of Green Belt

Para 80 of the NPPF states that Green Belt serves (inter alia) “to check the unrestricted sprawl of large built-up areas”; and ‘to prevent neighbouring towns merging into one another’. However in the subjective opinion of the GBCS TFM does not to check the unrestricted sprawl of large built-up areas – when taken out of the Metropolitan and strategic context. The Probit in Planning Code of Conduct enjoins Councillors to be ‘objective’ and to ‘uphold the law’. It is objectively the case that TFM does ‘check unrestricted sprawl of large built-up areas and does ‘prevent neighbouring towns merging into one another’. The fact that those large built-up areas and neighbouring towns are in the adjacent boroughs of Elmbridge, Woking and Mole Valley should not exclude them from consideration by Guildford Borough Council.

The plan below illustrates how TFM does serve to separate neighbouring towns and check the sprawl of large built-up areas: (see pdf attachment)

(For the avoidance of doubt the distances cited are taken from Google maps and are ‘as the crow flies’ not the actual distances by road.)

TFM fulfils ALL of the purposes of the Green Belt. It did when it was first put into the Green Belt and circumstances have not changed since:

1. to check the unrestricted sprawl of large built-up areas;
TFM prevents north-south sprawl from London suburbs down to Guildford and east-west sprawl from Woking to Leatherhead. Specifically it stands between the suburbs of Leatherhead (Fetcham and Bookham) and the suburbs of Woking.

1. to prevent neighbouring towns merging into one another;

TFM prevents 12 neighbouring towns and villages across 4 boroughs merging.

1. to assist in safeguarding the countryside from encroachment;

The site is at the centre of a connected natural landscape.

1. to preserve the setting and special character of historic towns; and

Three Farms Meadows sits at the heart of Ockham Village in the parish of Ockham. Ockham has 3 conservation areas and 31 listed buildings and is arranged in 9 historic settlements.

1. to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

70ha out of 114ha is good quality agricultural land in active cultivation – as it has been for centuries. It includes at least 45.4ha of Best and Most Versatile agricultural land. Building on this does not assist urban regeneration.

The GBCS appears to run the argument that if a plot of land is not the very last plot to stand between two towns then that particular plot does not serve the purpose of separating the towns. That is a bogus and illogical argument. Taken to an absurdity it would imply that only the last blade of grass between two towns served to separate them.

One of the justifications for removing the site from the Metropolitan Green Belt that has been cited is the analysis carried out in the Green Belt and Countryside Study. This compares different sites on the basis of the ‘purposes’ of the Green Belt set out in the NPPF. Those particular criteria are neither the only relevant criteria nor necessarily the best. The purposes set out in the NPPF are necessarily abstract – because it is necessary that they can be applied to every Green Belt in the country. The NPPF description of the purposes of the Green Belt was not intended to be an exclusive list. It was not intended to imply that purposes not on that particular list were wholly irrelevant and could be safely wholly disregarded.

**Overriding purpose of the Metropolitan Green Belt in serving London**

Every Green Belt is unique and has an overriding purpose over and above these five abstract criteria – namely to protect the particular city or metropolis for which the particular Green Belt was set up. Since TFM was put into the Green Belt to protect Metropolitan London it is also highly relevant how it fulfils that particular overriding purpose.

The GBCS does not ask the question, how does TFM serve London – the metropolis for which the Metropolitan Green Belt exists and the reason why TFM was originally put into the Green Belt. It should. It is in fact the primary and the concrete purpose of this Green Belt. TFM in fact performs an essential purpose within the Metropolitan Green Belt – standing in a strategic position between London and Guildford and between Woking and Leatherhead as this plan shows:- (see pdf attachment)

The economic geography of London and its satellite towns has depended on commuting for some two hundred years and especially since the invention of the train and the car. The system works because London is separated from its satellite towns by green space. This allows fast transit times between the two. If the green space is filled in then the efficiency of the entire system will rapidly deteriorate as congestion clogs the free and efficient movement of people and goods. The signs of such congestion are already much in evidence on the A3 and on the M25 which carry many thousands of vehicles every hour.

Apart from the purposes set out in the NPPF, TFM also fulfils many other important, material and relevant purposes which the GBCS has not considered. Among these are its Environmental and its Heritage purposes. As it is immediately adjacent to a Special Protection Area and a Site of Special Scientific Interest and as it is itself an SNCI, it serves to protect those
nature reserves and forms an essential and integral part of a connected living landscape—connecting the nature reserves to other ancient woodland and serving as an important wildlife corridor. And TFM is also at the very centre of the parish of Ockham. Ockham has never been a nuclear village with one defined centre. It is a collection of nine hamlets and the centre of those hamlets is TFM— which is why Ockham Parish Council has submitted an application for TFM to be made an Asset of Community Value. This youtube video describes a little of Ockham’s history: https://youtu.be/VVnUUDSxKJk

Before removing TFM from the Green Belt the law requires that ‘exceptional circumstances’ are shown. Residents of Ockham have yet to be shown any rational exceptional circumstances.

Is the proposed new Green Belt in Ash qualitatively equivalent in terms of checking sprawl and preventing towns merging? How is it strategic to the Metropolis of London? What are the exceptional circumstances required by law to justify creating new Green Belt in Ash? New Green Belt in Ash is not a substitute for the unique qualities of the Green Belt in Ockham, which should be preserved and protected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: Picture attachments Colin Bowes.docx (281 KB)

Comment ID: pslp172/3288   Respondent: 10882465 / Colin Bowes  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

TFM Allocation A35 has already been unanimously rejected by the planning authorities on numerous counts. It is a waste of resources—paid for by the electorate via council tax—to maintain this site in the local plan. I am profoundly concerned that the council has failed to remove this site from the local plan even though it received thousands of objection from local residents and statutory consultees.

Assumptions and claims made in the plan regarding Allocation A35 are unsound. Regarding traffic increases, the site is adjacent to the most consistently congested stretches of strategic road network in the county and close to one the most congested junction in the country (J10). I had to use this junction for years on my commute to work, and it is frequently at a standstill during rush hours, accidents, diversions or roadworks. To suggest using bus services is disingenuous. The buses either travel the already congested main roads, or travel on unsuitable minor roads—thus reducing the likelihood of pedestrians or cyclists wanting to use these same minor roads. Furthermore, it is next door to Wisley RHS Gardens where following recent upgrades and extensions visitor numbers will increase by 500,000/annum and this associated traffic increase from the RHS has not been taken into account. I object to the transport evidence base which is unreliable. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights and timings. The inclusion of A35 will not contribute to the 5-year housing projection due to this and other constraints notably sewerage capacity.

This is Green Belt Land, and Green Belt is there for a reason. Many councillors and national politicians have made election promises to protect our Green Belt. The removal of an additional 3.1 ha from the green belt without any justification is just not morally right. The increased area of the TFM site now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area. The
increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB. I object to paragraph 22 as this does not reflect the impact of the buildings on the surrounding area.

9. I object to the inclusion of Three Farm Meadows (Policy 35) due to the proposed removal of the site from the Green Belt when no exceptional, very special or special circumstances exist. In particular, I object to the unsustainable nature of the site, the poor air quality and noise pollution levels that will result, the infrastructure deficit that will result and the impact on views to and from the Surrey Hills.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

15. I object to the building of 45 houses at Clockbarn Nursery, Tannery Lane (Policy A42) on the grounds of inadequate access to and from the site. The roads surrounding the site are already hazardous, narrow and windy. Tannery Lane has already had planning permission granted for 64 houses and a marina and the location will not be able to cope with any more traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: PSLPS16/784  Respondent: 10882785 / Stephen Fleming  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4. I object to the inclusion of land at Garlick's Arch, Burnt Common and the proposed 400 houses and 7000 sq m of industrial warehousing on that site (Policy 43). Policy A43 and A43A were included at the last minute. They were not in the Regulation 18 draft and had not been consulted upon prior to the inclusion 2016 Local Plan.

5. I object to the impact of Policy A43 on ancient woodland on that site, on noise pollution and air pollution levels. The site is also prone to flooding.

6. I object to the impact of Policy A43 and A43A on local infrastructure. Congestion levels on A247 are already increasing at an alarming rate and will be further exacerbated by the development of Garlick's Arch as the residents will have to rely on the use of private cars.

7. I object to the unsustainable nature of the site at Garlick's Arch (Policy 43).

8. I object to the inclusion of policy A43 of 7000sq m of industrial warehousing as the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft. Slyfield Industrial Estate still has spare capacity and could accommodate any additional warehousing need if required.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Following the approval of the revised Local Plan by the full council of Guildford Borough Council on 24th May, I would like to make it clear that I object to the provisions set out in the Local Plan as they threaten to destroy the established nature and identity of our villages by building on Green Belt land and will add considerably to the already unacceptable levels of traffic on the A3, A247 and M25 and many other roads in the borough.

In particular, I object on the following basis.

1. I object to the creation of a new 4 way interchange onto the A3 on the A247 (Policy A43A) as this would add to the ever increasing levels of traffic on the A247, A3 and through Send and Clandon. Send would become a through route to and from the A3 and will become gridlocked all day.

2. I object to the impact that Policy A43A will have on the air quality for those living in the surrounding areas and for future generations.

3. I object to the impact on residents that the resulting noise pollution of Policy A43A will have.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

11. I object to the inclusion of land west of Wind Ridge and Send Hill designated for 40 homes and 2 Travellers' Pitches (Policy A44). The site was not included in the Regulation 18 draft and has not been consulted upon prior to the inclusion in the 2016 Local Plan.

12. I object to the impact of Policy A44 on an area of beautiful Green Belt countryside.

13. I object to the impact of Policy A44 as the subsoil of the existing site contains documented unsafe land fill waste which is currently vented.

14. I object to the impact of Policy A44, which includes 2 Travellers' Pitches, on the local infrastructure. The narrow width single track country road provides insufficient access for the pitches.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
17. I object to the impact of further congestion on local village roads and lanes.

18. I object to the impact of excessive development on the A3 and M25 on air quality. The air quality in many parts of the borough is greater than EU permitted levels and will damage the health of residents and future residents.

19. I object to the fact that 70% of the proposed 13,860 houses are designated on Green Belt land along the A3. This will result in gridlock on the A3, the A247 and the surrounding roads which are already at capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

29. I object to the impact that additional residents will have on local roads, health services, education spaces and policing needs.

30. I object to the failure of Guildford Borough Council to include the Town Centre Masterplan 2015 in the Local Plan and to find sufficient brownfield sites for development prior to considering sites within the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/18200  Respondent: 10883201 / Danny McHugh  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment “Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B and B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.
4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )
I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university’s ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford’s relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions. The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being ‘closely related’. In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure
will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy II requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have
considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 and M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public
consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of ‘About Guildford’ (published by the Council) on page 5 states that ‘... the Plan rejects any schemes that would have a detrimental impact on the Green Belt.’ This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. 
There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt and Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Comment ID: PSLPP16/18199  Respondent: 10883201 / Danny McHugh  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

<table>
<thead>
<tr>
<th>I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.</td>
</tr>
<tr>
<td>The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.</td>
</tr>
<tr>
<td>Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.</td>
</tr>
<tr>
<td>The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.</td>
</tr>
<tr>
<td>This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.</td>
</tr>
<tr>
<td>The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.</td>
</tr>
<tr>
<td>The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.</td>
</tr>
<tr>
<td>The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsustainable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.</td>
</tr>
<tr>
<td>The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.</td>
</tr>
</tbody>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”.

Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guilford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

398
The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon and Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.
The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

C.i. Policy 25 Gosden Hill – My Objections

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

C.ii. Policy A43 Garlick’s Arch – My Objections

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon.
The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Answer (if comment is on questions 1-7 of the questionnaire): ()

G. Duty to Cooperate – My Objections

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to cooperate with the wishes of its own electorate.

Despite the thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Ripley should not be removed from the green belt. It provides a necessary buffer from the urban sprawl of London. It is important villages separate boundaries are maintained to preserve the village’ way of life’ in this area of Surrey. The attraction of this area of Surrey is its green areas around small villages with individual identities. Please don't sacrifice this for a few extra homes.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to object to the inclusion of various sites suggested for housing and limited infrastructure, within your most recent local plan, but in particular to the inclusion of the former Wisley airfield. On almost the same day as the Council planners rejected unanimously the inclusion of this area, it is still included in your latest plan. Why? It must be painfully obvious to the entire Council that there is no possibility of sufficient infrastructure to accommodate development of this site, either now or at any time in the foreseeable future. The roads within reach of this site are incapable of supporting any additional traffic, including both the A3 and M25.
It must surely also be obvious that there are already insufficient primary or secondary school places available nor the means to transport pupils along narrow country lanes to any existing school which might be built elsewhere. The only two railway stations within normal reach have absolutely no spare parking facilities and nobody in their right mind would attempt to walk or cycle to either station along such dangerous country lanes.

It beggars belief that you are proposing to more than double the size of Ockham, Wisley and Ripley combined with your latest proposals for this area and I object in the strongest possible terms.

**Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings**

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

1. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

1. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

1. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

1. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

1. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

<td>4.3.13</td>
<td>Policy P2 proposes that East Horsley be inset from the green belt. East Horsley is set in a rural location and its green belt status has preserved that rural character. Between 2000 and 2015 incremental development of brownfield and infilling sites has seen 149 new homes built in the village, so sensible development is welcomed within the “washed over” status of East Horsley. 36% of East Horsley is woodland which, together with its low density housing and large gardens, give those open spaces that are vital to the character of the greenbelt. Why would GBC wish to destroy this character?</td>

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The infrastructure required to support proposed housing development in the villages to the north of the borough – Ockham, and the Horsleys, Ripley, Send, simply does not exist, and as such cannot possibly be created by cynical developers to such a huge scale. Roads, schools, railway network, drainage, parking, surgeries etc. etc. are already under huge pressure, as well you know. Moreover you have received many reports to confirm these inadequacies.11
7. Your Planning Committee has already rejected proposed development at Wisley, (Three Farms Meadows) - where is the logic/integrity in continuing to include it in the Proposed Local Plan?

Comment ID: pslp17q/410  Respondent: 10883905 / Anita Marshall  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)
I wish to object to the Local Plan which I consider to be unsound and not fit for purpose.

1. I object to the proposed extended developments within the Green Belt – there are no “exceptional circumstances” which could possibly justify the potential development of such a large area of protected land to the NE of the borough.
2. I object to housing numbers, which also appear to be unsound. Again, you have ignored Green Belt constraints.
3. I object to the lack of consideration given to infrastructure, especially in the case of the former Wisley Airfield, which is close to already congested highways. Your Highways Report is unsound. Services are already creaking and many oversubscribed.

I fully support the objections submitted by WAAG, and Ockham and Ripley Parish Councils which are too numerous for me to include, nevertheless I wish my objections and those of the above organisations to be fully taken into consideration and that you amend the Plan accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is more than enough brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban expansion from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and is in fact more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and
many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars. Routes to the closet railway stations are not navigable by foot as there are no pavements and the unitl roads make cycling dangerous.
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for numerous reasons including:

It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

It is further from railway stations than any other identified strategic site.

It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).

Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).

Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.

- The associated traffic increase from the RHS has not been taken into account.
- The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.

There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.

The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”

Opportunity (3) should be common to all sites and is not unique to this site.

I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area.

I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).

I object to the removal of additional 3.1 ha from the green belt without any justification.
I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

I object to the extension of the plan period by 1 year as it has not been identified as a major change.

I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Affordable housing:

It is a shame that the areas deemed as sites for affordable housing will mostly, due to the prices of houses around the areas, be out of reach for many of the skilled workers you are trying to attract. The houses are also not all easily and cheaply accessible to the main Guildford area, leaving people more reliant on cars and increasing the traffic into and out of the main towns.

The average key worker is on a salary of approx £26000 year, on a salary of this most homes in this area are out of reach. Even looking at schemes to help people buy property, to get a mortgage on this salary would be difficult.

If you are trying to attract workers to meet the lack of unqualified care staff in this area, to enable the higher than normal number of older persons within Surrey to be cared for in their own homes or care establishments, then the cost of the homes will have to be affordable to this level of salary too, approx £17,000. Something that will be difficult to achieve within the areas highlighted.

Affordable housing should be open to all, and because of the presumed cache of living in the green and pleasant area of Surrey, with the benefit of closeness to London, I am afraid that this will not happen. Leaving the current residents and workers of Guildford to again lose out to people who primarily benefit London.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I believe that this has gone through consultation already and been rejected.

It still does not address the many issues highlighted in the previous consultation, nor does it make any reference to the fact that it was refused.

I still have concerns about the increase in traffic, the benefits to the local community and the actual ability of the planners to guarantee homes that will be affordable to the local population and not just to London commuters.

If you are planning to take the local villages out of the green belt due to the lack of green space around them, then this, and the other planned developments around this area, will help with this plan.

if you keep planning on building on the green areas and not considering the environmental factors then of course how can we consider them to be part of a 'green belt'.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4691  Respondent: 10884545 / Sarah O'Hagan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4694  Respondent: 10884545 / Sarah O'Hagan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to
build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

15. 1. I object to the potential impact of para 4.4.23a on Burnt Common with its over allocation of industrial zoning is subterfuge for a waste management facility which is a dishonest and underhand approach to planning and proper consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the former Wisley Airfield now known as Three Farms Meadows.

Allocation A35 for the phased development of a new settlement of up to 2100 dwellings.

I object to the draft local plan for the following reasons:-
I object to the threat the local plan poses to the historic rural village and the blight on properties there.

I object to the detrimental impact on transport, local roads and road safety.

I object to the fact that insufficient consideration has been giving to the environmental and ecological value of the site.

I object to the continued inclusion of the site now known as Three Farms Meadow where the planning application has already been unanimously rejected by Guildford planning committee.

My response to the local plan submission with regard to the A35 site

I object to this development because it will add a further three thousand vehicles to local roads causing more pollution, noise and congestion. The impact on quality of life will be very serious indeed.

I object to the highly inconsistent green belt and countryside study, it is misleading.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed provision of 2000 houses plus travellers sites and Car Park at Gosden Hill Farm (Burpham-West Clandon) and to 2000 houses being built at Wisley in the plan (Wisley application has already been turned down, but remains in the Plan) Both of these schemes together will produce thousands of more cars on already congested roads. These schemes, will both especially effect BURPHAM, which is already grid locked daily. This will also increase pollution.

These additional 4000 houses will overstretch doctors surgeries, hospitals, schools and the whole infrastructure of Guildford.

I object to the proposed use of Brownfield sites for the use of business and shops. Brownfield sites should be used for housing. (Affordable housing preferably)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have written before about the various proposals issued so far for the local development plan, especially concerning the East and West Horsley area where I live.

My views have not changed.

Whilst I understand the need for modest and appropriate development, I do OBJECT to:

• The overall extent of the currently proposed development (500+ houses in the 2 villages) and the impact on us of 2000 houses on Wisley Airfield.
• The fact the current infrastructure (roads and other services) cannot cope now with the loads placed upon it, and no clear plans to enhance these in the future
• The loss of green belt land around the villages. These village boundaries should NOT be extended.

I have worked extensively in recent years for the local community (including running the Horsley Community Bus), and have gained a strong sense of the preferred way forward for this area, which is NOT the way implied by the present proposals.

Please TAKE STEPS to keep this as a RURAL area before it is too late

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have previously written on two or more occasions regarding the various drafts of the Guildford Local Plan, specifically how it affects East and West Horsley, my home villages. On studying the latest Plan, I FIND I MUST WRITE YET AGAIN.

It does appear no notice has been taken of so many reasonable and logical complaints that have been sent to you in the last 2 years.

I have been lucky to live in East Horsley for over 30 years, and have served the villages for 15 years driving and managing the Horsleys Community Bus. I mention this as this has been a great way to get a feeling for what residents need and want and think. The people concerned cover all works of life, many of them more needing local support. In essence we live in a large village area, almost a small town, but which retains its village character but the efforts and hard work of so many residents, mainly on a voluntary basis. We care about our village, and want its character to remain. There is no evidence the amount of new housing is needed in the area, and well exceed the nationally imposed target levels.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/495  Respondent: 10884993 / Dave Fassom  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour onto the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

Comment ID: PSLPS16/496  Respondent: 10884993 / Dave Fassom  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **I OBJECT** to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/1101  Respondent: 10884993 / Dave Fassom  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1102  Respondent: 10884993 / Dave Fassom  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1110  Respondent: 10884993 / Dave Fassom  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that
order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

<td></td>
</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1104  Respondent: 10884993 / Dave Fassom  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.
I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

1. I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I OBJECT to the Borough Wide Strategy (Policy S2)

2. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

3. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

4. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any commonsense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4711  Respondent: 10884993 / Dave Fassom  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
We would like to make the following comments on the new Guildford local plan.

We object to the proposal to remove the Horsleys from the green belt.

The local infrastructure such as local schools and medical facilities are already over stretched. Roads and car parks are overloaded especially the Ockham road south. We see no reasons for the extension of the boundaries of the settlement area of the Horsleys.

We object to the proposal to build over 2000 houses at the former Wisley Airfield as its less than 2 miles away from the village.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to building 45 houses at Clockbarn because of inadequate access and increased traffic volume this would create. Tannery Lane is a narrow lane that couldn’t sustain more traffic. Plus the junction with Send Road is already very hazardous for vehicles trying to turn onto the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too.

I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am a resident of East Horsley and wrote in detail with my objections to the 2014 Local Plan. My concerns remain considerable and are summarised below:

The "exceptional circumstances" which need to be demonstrated before removal from the Green Belt have not in fact been demonstrated. Similarly the extension of the defined settlement boundaries have not been justified but appears to be an attempt to by-pass planning control for future unspecified additional development.

The existing roads ( in particular the very narrow stretch of the Ockham Road North between Pennymead and the junction with the A246 by the Duke of Wellington pub) are already dangerously overused by the current volume of cars and large lorries (often from the construction trade) and an increase of a projected 6000 cars (based on 2 cars per household if permission is granted for all the proposed new developments) will inevitably lead to an increase in accidents and deterioration of already dilapidated and constricted roads, which cannot physically be widened to make them safer. It has become increasingly difficult to park in the village, either in marked bays or even the car parks, and this lack of parking will be exacerbated by the disproportionate increase in new housing.

The current infrastructure is already at breaking point in East and West Horsley - the village state and private schools are over subscribed and it is already very difficult to see a GP promptly at the village medical practice. The increase in pollution from the extra houses and car emissions will increase asthma symptoms and other allergies also leading to an increased use of and strain on the Medical Centre and its staff. An increase of 35% in the number of West Horsley households will place a further strain on the inadequate drainage and will worsen the already significant flooding that occurs regularly on East Lane and beyond the Barley Mow pub.

The increase in housing, demolition of existing long standing landmark sites in the Horsleys and removal of the green belt status is fundamentally changing the nature of a rural Surrey village, that current residents have chosen to live in: the Chown houses and Lovelace historic buildings will be detracted from and, in time demolished no doubt to make way for lucrative new developments. Horsley Towers will lose its setting as houses are built adjacent to it and Thatchers hotel is demolished, leaving the historic Chown frontage looking out of place surrounded by modern houses. The disproportionate number of houses is changing a village into a suburb of Guildford and, without the fields and green spaces for which it is
renowned, it will soon morph into urban sprawl and the treasures of the National Trust at Hatchlands and Clandon Park will be mere islands in a suburban landscape which few outside the area will wish to visit.

There is a much stronger economic, infrastructure and social case for building houses on such a vast scale on the University side of Guildford, which is in need of redevelopment, no green space will be sacrificed and where existing transport links are strong and appropriate already.

I sincerely hope the views of local, long-standing residents of the Horsleys will be given due consideration and that further consultation locally will take place before the character of the village is corrupted in perpetuity.

| - The “objectively assessed need” figure of 693 homes a year is too high.  
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.  
- The current SHMA inflates the proposed housing figure due to  
  - failure to correct for errors in the historical data for international migration flows, | |
The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough as being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough. It is over double the previous figure of 322 used in previous plans. The SHMA report methodology is, I believe, inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve: it provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land, all requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery and schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour onto the A3 which is already stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day, and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could do virtually whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.
Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime, given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and roads like the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill with which health and safety issues are associated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3146  Respondent: 10889985 / Ruth Macdonald  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to make the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments with sustainable transport. With ever reducing bus services in the area and no railway station within reasonable walking distance, it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)
It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The addition of north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site which, incidentally, includes over 80 ancient oak trees.

Answer (if comment is on questions 1-7 of the questionnaire): ()

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is, in the scheme of industrial development, relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.
Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four already existing successful rural businesses which have been in existence for over 30 years plus a further two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm and absolutely not where such things should happen at all.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers in East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in the town and there would be no need to build on the Hog’s Back.

Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow, only being wide enough for one vehicle at a time. The main “pinch point” on The Street in West Clandon is a case in point: lorries travelling in opposite directions cannot pass each other and, when faced with a lorry, even cars need to mount the pavement to get past. In addition, the road surfaces are in a poor condition.

I OBJECT most vigorously to the development proposed in the local plan which will result in more traffic using these narrow roads leading to further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever more popular pastime, particularly at weekends, with hundreds of cyclists passing through the local villages on their way to the Surrey Hills. With no proper cycle lanes on the narrow roads surrounding the
villages, and with greater vehicle traffic being generated from these developments, there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk of injury of the public. In the case of West Clandon, The Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements as mentioned above.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to, capacity such as the electrical network and sewers. Without plans to improve these services there should be no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send, will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services even further and is unsustainable.

There is no provision made for what will be the necessary increase in capacity of the Royal Surrey Hospital, Guildford. Where is this assessed and how will it be remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/6851  Respondent: 10889985 / Ruth Macdonald  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Page 456 of 2167
There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6853  Respondent: 10889985 / Ruth Macdonald  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough, will lead to considerable further congestion despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution which will have a detrimental effect on local residents and their health and can result in early death.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with the sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires that there be an exceptional circumstance for the Green Belt boundaries to be altered, as for any development on the Green Belt. There are no exceptional circumstances for these villages as mere housing need does not constitute a ‘special circumstance’ for encroachment on the Green Belt. Once taken, the Green Belt is lost forever.

There is a real danger that the loss of this Green Belt would result in urban sprawl and the neighbouring villages merging together. The significant development proposed for these villages will result in the character of these villages being completely lost and the surrounding countryside encroached upon. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, especially for the villages between Guildford and the M25, including Ripley, Send and West Clandon. Not only will the services in these villages be unable to cope with the level of development proposed, the proposed developments themselves do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are constantly being reduced. Residents will have no option but to rely on their cars. These sites are totally unsuitable due to being unable to access sustainable transport. Furthermore, the Infrastructure Plan shows no plans to improve the infrastructure for Garlick's Arch. Residents will have to rely on their cars for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical and sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from significant congestion. Further vehicle movements will only result in ever more acute congestion and increased pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/6841 Respondent: 10889985 / Ruth Macdonald Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Borough Wide Strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall Housing Figure, which would be more reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

1. The Housing Number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.
2. The Housing Number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West. All of these lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes
from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial and so, therefore, are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites of over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation of Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

C.i. Policy 25 Gosden Hill – My Objections

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in
conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.

7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).

8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

C.ii. Policy A43 Garlick’s Arch – My Objections

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion and are our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

C.iii. Policy A58 Burnt Common – My Objections

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potentially newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

15. I object to the potential impact of para 4.4.23a on Burnt Common with its over allocation of industrial zoning is subterfuge for a waste management facility which is a dishonest and underhand approach to planning and proper consultation.

Answer (if comment is on questions 1-7 of the questionnaire): ()

E. Policy S1 Presumption in favour of Sustainable Development– My Objections

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

G. Duty to Cooperate – My Objections

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to cooperate with the wishes of its own electorate.

Despite the thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

APPENDIX C

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

APPENDIX D

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
• Failure to correct for errors in the historical data for international migration flows,
• Issues with the way it considers students and affordability and
• Flaws in the method for estimating the number of homes needed to support job growth.

- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3305  Respondent: 10890177 / Cheryl Burnside  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix F: Policies overview map

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

SITES - POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints
should have been applied. Secondly I believe the Council did not properly consider constraints and that their
decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt
sites should not be included in the plan unless “exceptional circumstances” for development are proven in
relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term
considerations such as perceived housing need, as case law has established. There needs to be a specific
balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very
special circumstances which are argued in favour of development at that particular site. There is no evidence this
has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it
cannot be met without building on Green Belt then there is no need for any further consideration and any
congruent Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**POLICY A25 - Gosden Hill Farm**

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford.
Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development
proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too
narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching
Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from
Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the
Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of
West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too
narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
• Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015
• 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  Surrey Fire and Rescue deployed.

2016
• 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
• 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
• 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.
The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.
It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.
I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**POLICY D3**

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY D3

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY D4

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13493  Respondent: 10890177 / Cheryl Burnside  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY E1

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13495  Respondent: 10890177 / Cheryl Burnside  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E2

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.
There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY E5**

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPP16/13525  **Respondent:** 10890177 / Cheryl Burnside  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY E6**

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For
example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.
4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13517  Respondent: 10890177 / Cheryl Burnside  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E7

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable
residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

</tbody>
</table>

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**POLICY H1**

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.
It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13515  Respondent: 10890177 / Cheryl Burnside  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H2

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of £360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13523  Respondent: 10890177 / Cheryl Burnside  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H3

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICY II

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy II)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy II. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and...
unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

**POLICY I3**

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.
This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/13491  Respondent: 10890177 / Cheryl Burnside  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P4

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual
probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the
flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-
commissioned to accurately reflect the actual flooding risks of each site.

Comment ID: PSLPP16/13486  Respondent: 10890177 / Cheryl Burnside  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S1

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running
through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework.
Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying
sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the
area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy
does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be
taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate
developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach
of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government
policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of
sustainable development in practice and is one of the most important factors affecting sustainable development in the area
covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the
Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least
one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank
rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development
bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of
sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF
paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National
Planning Policy.
The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. The same is true of Guildford itself with all approach roads grid-locked at certain times of day. The cost to business of congestion is huge with the adverse consequences impacting residents through health damaging air quality and road accidents. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result. No one is asking for a 40% increase in retail in Guildford, expect maybe Retailers, yet that will exacerbate the adverse effect of more traffic coming to Guildford. Car parking charges must be increased in line with cities like Cambridge if GBC is serious about reducing congestion. A tunnel under the A3 will be hugely expensive and the money would be better spent improving rail travel between Portsmouth and London and the rail and bus links to adjacent locations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**POLICY S2**

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”.

---
Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints.
It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brownfield sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID:  SQLP16/1592  Respondent:  10890177 /  Cheryl Burnside  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  SQLP16/1594  Respondent:  10890177 /  Cheryl Burnside  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford’s circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and
foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented counselors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.
The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

**Comment ID:** pslp173/147  **Respondent:** 10890177 / Cheryl Burnside  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

---

**Comment ID:** pslp173/146  **Respondent:** 10890177 / Cheryl Burnside  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any rationale.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy I1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the lack of proper infrastructure planning for sites (Policy I1)

The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to development in areas which are at risk of flooding (Policy P4)

The Plan does not take adequate account of flood risk as required by National Planning Policy.

The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I strongly believe that the Horsley’s should remain in the green belt as it has thus been designated for many years past.

Surely there should not be any plan for such a complete and radical wrecking of the whole village environment which will leave a catastrophic effect in many ways on people’s lives and affect children’s appreciation of their surroundings and also have its effect on the whole Surrey landscape and on natural habitats of wild creatures and would involve the destruction of valuable and massive trees so necessary for health and wellbeing of all live beings.

It appears that this plan will have a big effect on the whole area overloading the already stretched in all aspects – transport, good roads, medical facilities, drainage etc. as mentioned. Reduction of housing numbers, A 2000 house village at Ockham’s Wisley Airfield seems just wrong on a site from where so many men gave up their lives for the battle of Britain for a green and pleasant land to remain, it would be better if just a very few houses could be built there, with a small but significant public memorial to those who made a supreme sacrifice in WW2.

This is what people need to have.

1. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy II)

There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that.

The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous and unsustainable traffic.

The proposed amount of new housing actually needed in the area has apparently been inflated by using the Strategic Housing Market Assessment (SHMA). This number which is only based on a consultant’s mathematical model and not revealed to the local plan, is then increased even further by Guildford Borough Council to give a highly inflated suggested population increase. This is potentially 70% higher than official estimates for the growth of population within the Borough. The scale would mean an increase in a huge 35% of existing West Horsley households. This is higher than any other single area in the Borough.

This development has been already refused planning by Guildford Borough Council and must not be allowed. Again the local infrastructure is just not able to cope with the potential of an additional 4,000 cars on local roads. This would have a hugely detrimental impact on to the villages of East and West Horsley, as well as the same problem outlined in item 3 of the overloading of roads, flood risks and added strain on station carparking, doctors surgeries and schools. This area is adjacent to one of the busiest and most accident generating stretches of the A3 as it joins the M25 and more traffic using this section would make matters worse.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I understand that due to a misreading of the type of facilities at the Station Parade, that this small village area could become reclassified as a ‘District Centre”, which would open it up to inappropriate development in the future. To visit the Station Parade would show that this is a thriving parade of village shops, including independent cafes and businesses, as well as bank, and chemist, and a small Budgens. The Budgens is small enough to be able to trade unrestricted hours on a Sunday. There is a library and family run butchers as well as two cafes, both independent. Any future development on a large scale would mean that the smaller businesses would be pushed out in favour of larger retail conglomerates. The whole nature of the village would be changed and we would lose a valuable and vibrant village centre. I understand that the decision to form a district centre in East Horsley would be made on the basis of a misreading of the nature of the facilities here. There is no room for any development here, and no room for the extra car parking that that would generate. This is a very concerning issue.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. Infrastructure in Overload

The local infrastructure just cannot cope with any more housing or retail development in the area on this scale. There is a severe drainage issue in this area, with standing water already making driving hazardous during wet weather. The various schools in the area generate high levels of traffic, and the route through the villages have become rat runs from the A3 to the A246 and beyond. Try making a right turn out of Ockham Road South onto the A246 during rush hour. It’s a serious accident waiting to happen with cars attempting to use the driveway of the Duke of Wellington pub as a cut through to avoid the mounting queues of waiting cars. The proximity to the petrol station also situated on that junction makes it an extremely dangerous manoeuvre. Increased traffic from more housing, and more businesses will be intolerable for the...
community. The local schools are stretched to bursting point and the doctors’ surgery is also overloaded and there doesn’t seem to be any mention in the local plan of improving these vital services.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This would be very detrimental leaving both the Horsleys exposed to the spread of urbanization from all sides. The two distinct areas of West and East Horsley would lose their separate identities and merge with each other, and the creeping tide of development would engulf from Effingham, and Bookham, and, if it were to go ahead, the new proposed development of over 2000 houses in Ockham. The green belt must not be removed from the Horsleys and the ‘exceptional circumstances’ that are required to be shown before taking this drastic action have not been demonstrated. The Horsleys lie adjacent to the area of the Sheepleas, a designated Area of Natural Beauty, Site of Special Scientific Interest, and Local Nature Reserve. To allow unchecked development to the south of this beautiful and special place should removal of the green belt be proposed, would be truly sad. The area is well loved by visitors from far and wide, not just from the local area, who come to enjoy the natural beauty of these ancient woodlands, and undisturbed meadows. But the other areas of more ordinary green space, the fields, the hedges, the patches of woodland, the wildlife corridors, are all very special, and deserve just as much protection.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Extension of the boundaries of the settlement areas of the Horsleys

This is just another to increase more areas into the village settlement, in the hope that more land will become available for development, and again will increase the size of our two villages to ridiculous proportions, bearing in mind the lack of infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The primary thought regarding development must be that this area is our only remaining one close to London where urban dwellers can come to enjoy a day in the country. This area in the last few years has already become grossly overpopulated with the result that is my opinion.

No more countryside in the Guildford area should be built on at all.

I live in Shere which I have seen double in size in the last half century

It is up to you to keep what remains of our unique landscape for the future generations.

**Comment ID:** pslp172/2378  **Respondent:** 10892513 / C.R. Sewter  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A43 change at Garlick’s Arch because:

- The LOCAL PLAN H1 states "Gypsy, Traveller or Travelling Showpeople accommodation should be provided on development sites of 500 homes or more whilst there remain an identified need" Send has disproportionately been allocated 2 traveller pitches as well as all 8 travelling showpeople plots identified as being needed in the borough until 2034. The developments of over 1500 houses at Gosden Hill and Wisley are only allocated 8 pitches a piece during the same period
- The area floods regularly and is in FLOOD Zone 2.
- All the THOUSANDS of previous objections by local people have been ignored
- There is NO PROVEN DEMAND for Travelling showpeople plots in this location.
- It is beautiful, permanent Green Belt and "no exceptional circumstances” exist.
- This overdevelopment will cause traffic problems on local roads.

Abide by the already agreed Policy A43 pages 144 Land at Garlick’s Arch, Send Marsh. The proposed changes to the agreed Policy are not legally compliant, neither are they sound and not do they comply with the Duty To co-operate

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Policy A58 pages 257-8 at Burnt Common Warehouse, London Road because:

- It was deleted from the 2014 draft because of all the objections made previously.
- The word "minimum" is changed from the previous "maximum" in the 2016 plan and since that time there has been a decline in demand for industrial land.
- There is no need to build industrial or warehouse development in the middle of the GREEN BELT when Slyfield and Guildford still have EMPTY sites and industrial units.
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land FOR THE WHOLE BOROUGH not a massive allocation of 10 HECTURES IN THE GREEN BELT.
- The impact of extra traffic that would be generated would cause gridlock on the local roads.

ABIDE BY THE ALREADY AGREED POLICY A58 DECISION THAT IT SHOULD BE THROW OUT.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The housing demand in the Local Plan H1 has dropped by 39 houses per annum from 2018 to 2034. Despite this Send's contribution has been increased with no justification.

The Local Plan H1 Policy states that Gypsy, traveller and Travelling showpeople accommodation should be provided on development sites of 5000 homes or more, whilst there remains an indentified need. "The Send allocation is 2 traveller pitches and 8 showpeople plots. The developments at Gosden Hill and Wisley of over 1500 houses have been allocated just 8 pitches a piece during the same period.

Answer (if comment is on questions 1-7 of the questionnaire): ()
There is an overwhelming sense of incredulity and a feeling of getting no co-operation in particular with regard to your re-submission of Policy A43 Land at Garlicks's Arch, Send Marsh/Burnt Common/Ripley, namely his Policy was rejected be around 30,000 - a third of the people from Send. It was apparently throw out. Now it has been not only resubmitted, but amended unrealistically heavily. "Duty to co-operate" does not equate with this.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car a proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCl).

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) -
where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of
consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPII) planning
application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning
Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also
been raised by a broad number of authoritative sources across the UK, including Highways England, Thames
Water, NATS and the Environment Agency.
• I would point out that the number of new homes has been based on pre-Brexit projections for economic and
population growth, including migration which now needs to be revised downwards, possibly quite seriously.
• Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs
and organic growth. The plan's commitment to build housing across the Guildford countryside will
mean either major infrastructure investment, which no one will believe will happen and for which there are no
funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication
services.
• Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in
absolute terms and disproportionate relative to the rest of the. It will destroy the rural character of these
communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows),
Allocation A35, is removed from the Local Plan with immediate effect.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Environmental Impact of Proposed Housing in Horsley: Flood Risk

Building the large numbers of houses proposed in the Draft Local Plan will significantly increase the risk of flooding.
I strongly object to the proposal in the Draft Local Plan for housing development in Area 72, adjacent to Horsley station.
This housing would be located in a floodplain. Housing on this site will adversely affect local drainage patterns, having a
knock-on effect further down the drainage basin. Increase in the volume of run-off due to paving over of arable land,
coupled with higher incidence of flash-flooding caused by Global warming, will result in a greater frequency of abnormal
fluvial discharge, beyond the capacity of the existing drainage system. This will increase the likelihood of homes in the
vicinity being flooded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Impact of Additional Residential Housing and Population Increase on Local Facilities

I strongly disagree with the premise in the Draft Local Plan that Okham and the Horsleys are a suitable location for a large number of additional new houses. The housing numbers proposed for Guildford Borough are for 13040 homes over 15 years from 2016 to 2031. This number is too high. The number is based on a Strategic Housing Market Assessment (SHMA), which the council required to be amended by the Head of Planning. This amendment has not taken place and therefore the number of new builds proposed in the Draft Local Plan has no basis. I object to Guildford Council proposing a Draft Local Plan on the basis of flawed evidence.

As an inhabitant of West Horsley I know at first hand the existing population pressure on local facilities. The primary school in our neighbourhood (The Raleigh) is oversubscribed, in common with the local secondary school, the Howard of Effingham. Indeed, in spite of being a Horsley resident, I was not able to secure a place for my daughter in either school. The local medical centre is also filled to capacity. Residents of adjacent villages e.g., Ripley, East and West Glandon also use the centre. As a consequence, new residents to the village are known to register with alternative practices e.g., Bookham. In conclusion, the village services that currently exist in the Horsleys are already filled to capacity and do not have the facilities to accommodate the large number of new residents which would result from the increase in residential housing proposed in the Local Plan.

Impact of Increased Residential Population on Transport

An increase in the number of residents would result in a heavy increase in both construction related traffic and subsequent traffic arising from an increase in local population.

Most residents of the Horsleys work outside the villages. They either commute into London or Guildford by train, or travel by road to places of work and education. There are very few indigenous employment opportunities in the Horsleys. Essentially they are commuter dormitories. The residents of proposed additional housing are unlikely to be employed in the immediate vicinity of the Horsleys. They will therefore join existing commuters travelling either by road or rail. Horsley station car park is already filled to capacity, and there is no option to extend the car parking facilities for the station. The land is not available for expansion. Likewise, at Effingham Junction, there is little land to spare for additional parking facilities. I would conclude, therefore, there is limited potential for additional commuters to park at the local stations and commute by train. I might add, that Horsley station already serves as a rail hub for adjacent villages (e.g., Shere and Ripley), resulting in heavy road usage at peak commuting time. The housing development proposed in the Local Plan will increase the traffic volume through the village, resulting in additional air and noise pollution.

Key road links to the Horsleys focus on the A246, from Leatherhead to Guildford, and additional rural (narrow and winding) roads linking the villages to Ripley, Cobham and the A3/M25. The A246 currently carries a very high volume of commuter traffic at peak periods creating bottle necks and traffic congestion at both the Givons Grove roundabout on the Leatherhead bypass, and the Merrow roundabout on the outskirts of Guildford. The A3 likewise carries a heavy flow of traffic both into Guildford and north to the M25 at peak hours, with stationary traffic a frequent occurrence. The construction of additional housing in a rural area, which by its location and nature, requires inhabitants to travel predominantly by car, will exacerbate an already congested road network. This will clearly have safety implications, as more congested narrow, rural roads will result in a greater frequency of road traffic accidents and undeniably loss of life. It will also increase traffic congestion in local employment hotspots such as Guildford, and Leatherhead.

It makes much more sense to redevelop brownfield sites in Guildford and Woking to accommodate additional housing needs. This would have the advantage of providing new residents with the option of using the existing public transport network, or walking or cycling to work or school. They would also have a full range of urban facilities on their doorstep.
In conclusion, I strongly object to the new housing proposals outlined in the Draft Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): (

I would like to register objections to Guildford Borough Council Proposed Local Plan (June 2016) and inclusion in the plan of proposed multiple development sites in the Horsleys:

Urbanisation of the Green Belt

I strongly object to removal of the land areas in the vicinity of the Horsleys from the Green Belt. The Green Belt prevents urban sprawl and retains important wildlife corridors in proximity to the highly urbanized areas of outer London. It helps maintain clean air quality and provides recreational areas for urban dwellers from both Greater London and adjacent conurbations.

There are five legal reasons for protection of land assigned as Green Belt:

1. To check the unrestricted sprawl of large built up areas
2. To prevent neighbouring towns merging into one another
3. To assist in safeguarding the countryside from encroachment
4. To preserve the setting and special character of historic towns
5. To assist in urban regeneration by encouraging the recycling of derelict and other urban land

The provision of the Green Belt in the vicinity of the Horsleys meets the criteria listed above. The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is not an exceptional circumstance in law. In addition the existence of the Green Belt as an Area of Outstanding Natural Beauty (AONB) is a reason for not meeting objectively assessed housing need (i.e., such protected land is a legal constraint against any such development). The Draft Local Plan has not demonstrated exceptional circumstances requiring additional housing.

Removal of Villages from the Green Belt

I strongly disagree with and object to the assumption made in the Draft Local Plan that it is reasonable to remove villages such as West and East Horsley from the Green Belt. It seems remarkable that a single act of Parliament by the current Government can undo the good work for the provision of the Green Belt and protection of rural England laid out in the Town and Country Planning Act of 1947. The rationale behind the need to protect rural areas in close proximity to ever growing metropolitan areas is more relevant today than ever, in light of the projected growth in UK population.

I object to the method of defining settlement hierarchy as described in the Draft Local Plan. In particular, I take exception to the "classification" of East Horsley as a "Semi-Urban village" and question the basis for this classification. Horsley lacks most of the infrastructure and community facilities taken for granted in an urban area. The key charm and attraction of Horsley is essentially its rural character.
To accrete large numbers of new houses to the Horsley - Okham area would change the character of these ancient villages permanently, resulting in a detrimental impact on the environmental and village character.

In summary, I strongly object to the proposal in the Draft Local Plan to take the following villages out of the Green Belt: East Horsley and West Horsley (North), Effingham, Ripley, Shere and West Horsley (South).

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object in the strongest possible terms to the draft plan in its present form and urge you to reject it and herewith are my reasons.

I am 35 years of age and was born in Send where I have lived most of my life apart from a couple of years when I worked and lived in London. Coming back to Send in 2012 was not something I had originally planned but I was delighted to find that, although the local area had absorbed some new housing development, it had nevertheless retained its appeal as a village environment. If the existing local plan were to be implemented, this will be lost for ever more and Send, Send Marsh, Ripley and Burnt Common will become just another sprawling Goldsworth Park, featureless, without character and totally unattractive.

What we need are imaginatively planned areas of residential regeneration for mid high rise development in the centre of Guildford. Conversion of property above current retail buildings would provide much needed residential accommodation and rejuvenate the high street. Come on you planners! Let's have some new, exciting ideas for the younger generation living in the area, not more of the same-old, same-old!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing in reference to the proposed changes to the green belt in the Guildford Local Plan.

I strongly object to the building of 400 houses and 7000 sq. metres of industrial space at Garlicks Arch, this area to prone to flooding and is home to ancient woodland, woodlands that helps minimise noise from the A3. The Environment Agency has the area at higher risk of flooding then the council!

I strongly object to the building of 45 houses at Clockbarn Nursery, Tannery Lane does not provide sufficient or safe access to support this development. At places the lane is the width of a car with limited visibility to see other cars and road users coming towards you.

I strongly object to a new interchange with the A3 at Burnt Common, diverting large amounts of traffic from the A3 and M25 through Ripley and Send with the resulting impact of increased air and noise pollution.

I strongly object to not protecting the green belt, I object to removing Send, Ripley and Clandon from the green belt together with the sites at Wisley Airfield and Garlicks Arch and the resulting urban sprawl. There are no exceptional circumstances to remove these sites and villages from the green belt, as required by the national planning policy.

Can my comments please be shown to the planning inspector and can I have confirmation that my letter has been received.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Whilst I understand that new housing has to be built I am very disappointed with the proposals in the draft local plan as it appears you have taken little notice of the comments you received after the last consultation.

I object to both East and West Horsley being taken out of the green belt. The green belt has served this country well since its inception and your disregard of the green belt is shocking. How can you justify a figure of 65% of new houses in the borough being built on land that is currently in the green belt? If we continue to build on the countryside there will be none left in a few decades. What a legacy to leave for the next generation! Valuable green spaces will be vulnerable to development if your proposal is passed.

I object to the large number houses being proposed for the sites in the Horsley's and on the strategic sites in the neighbourhood eg land at former Wisley airfield, land at Garlick's Arch and Gosden Hill Farm.
Local road network - the network is already struggling to cope and you now propose such a massive increase in housing without seemingly giving the impact of so many houses and the consequent increase in traffic in the area any serious consideration. Therefore you do not appear to know what improvements to the local road infrastructure will be required in order to accommodate such future increase in traffic.

Traffic and parking and transport - as stated in the previous paragraph the impact on local roads will be tremendous. Has any thought been given to the increased parking need which will be created by the proposed quantity of housing? The local station car parks are already full. Commuters face a situation where they have no where to park and the trains being more packed than they are already at peak times.

Schools and Medical facilities - local schools are already at capacity. Has any thought been given to where all these new children will go for their schooling? No extra places are planned in the Horsley's and any new places on the Wisley site will not be available for many years into the project. The same question has to be asked about medical facilities - where are the new home owners going to go to see a doctor or dentist?

Flooding - why has a site (site behind Ockham Road North) been chosen which is partially a level 3 flood risk when it is known what happens after prolonged rain. Generally everyone knows that the drainage system in this area cannot cope - please come and see the local roads after heavy rain.

Pollution - the great increase in traffic volume which will result from the proposed new housing will cause an increase in nitrogen dioxide and particulates in the environment. This is already a serious concern for certain areas in the borough. How can you allow such a situation to get worse?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/3095  Respondent: 10894337 / Elizabeth Pearce  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT and am appalled at the Council once more wanting to pass an application that is on GREEN BELT land.

My objections are as follows

I OBJECT to the 40 houses planned west of Winds Ridge & Send Hill & the Traveller Site, for several reasons

I OBJECT as the land is in Green Belt & the proposed inset is not appropriate due to it’s permanent green belt status.

Ironically a planning application right next to this area APP/Y3615/W/16/3144141 Send Hill Farm, Potters Lane has already been declined on the basis that it would cause harm to the openness of the Green Belt, yet here we have the Council wanting to build so many more houses on huge areas of the Green Belt in the area!

I OBJECT as the road is already too narrow to take existing traffic and it has poor vehicular visability on exiting at the Potters Lane junction, increasing housing and therefore traffic in this area, by an estimated 90+ cars will make this situation far worse and dangerous.
I OBJECT as there is no room for long vehicles, particularly in relation to caravans and additional lorries associated with Traveller sites and the access road is not big enough for increased traffic.

I OBJECT as some of this land is also farmed and grazed and there is a nearby nature reserve and any substantial building work will be detrimental to the area.

The schools in the area are already at full capacity & there are no funds or plan to increase the schools for additional pupil numbers.

The Doctors Surgery is already fully stretched & has no capacity for a substantial increase in patient numbers.

I OBJECT also to the housing being sited on land known to have been an unregulated Tip for many years – as identified by Southern County Searches (Sitescope Ltd) report E.2978,SN-HP dated 5/1/2005 - which if disturbed could release seriously toxic materials and give rise to uninsurable liabilities which would seriously impact GBCs budget for clean up costs. This land is still subject to gas monitoring and does not recommend itself to family housing!

It is detrimental to the health of Send residents, as has already happened in Chertsey which has sadly led to illness & death. We do NOT want a repeat of this for the residents of Send.

I believe if GBC go ahead & build on this land, knowing these potential dangers, then that in itself is a very negligent of the council.

Also I OBJECT as the Traveller Accommodation Assessment research, carried out in June/July 2012 by Millfield Services, cannot be so as the Sittingbourne based market research company was dissolved in 2011.

I also OBJECT as there seems to be a conflict of interest with Hilda Brazil who is part of the liason group for the Traveller Community with Surrey CC and who is playing an active part in this Local Plan.

The land outlined for the 2 Traveller Sites is adjacent to private land owned by Linda Brazil.

If the traveller sites are built, this will open up this piece of land for further traveller Sites.

This is a Trojan Horse, pushed forward by an interested party.

I OBJECT to building 400 houses and 7000 of industrial space at Garlicks Arch.

Guildfords Housing Requirements seem to be rather vague and ill defined and very likely over exaggerated.

The Local Plan seems to be without adequate corroborative information as to how the Housing Requirement assessment numbers were reached, nor does it provide the arithmetic to substantiate how such numbers were arrived at.

When this issue was raised by others, they were, according to Council Meeting Minutes advised that such opportunity was long gone....and such questions were out of time. Such tactics are questionable and not transparent.

This inability to provide the public with credible data gives rise to a very strong probability of a successful challenge to the Local Plan as it seems to fails even the most basic "test of transparency" required at law. This failure gives rise to the risk of Appeal involving high court cost which will likely wipe out GBC Legal Dept budget to the detriment of ratepayers.

I also OBJECT to this proposal on the grounds of the impact of the increased traffic on the area. Already the are is gridlocked in the morning & evening rush hour & the new plans will create even more of a cut through to Woking.

The local roads going through Send & Ripley will not be able to cope & there is no room to widen the roadways.

It will add to congestion.

There is also no evidence to show that new Industrial Units are needed, there are already several empty ones in the area!
I also OBJECT due to the environmental impact and pollution to the area. This proposal does not take such an environmental impact into sufficient consideration.

I also OBJECT to the new interchange on the A3 at Burnt Common as this would mean even more traffic through Send with traffic from the proposed 5000+ new houses in the area.

The surrounding roads will not be able to cope. The infrastructure even if put in place first is impractical, as some of the roads are not able to be widened and just by putting in phasing traffic lights, as suggested at the local meeting by members pf the GCC will not be sufficient.

I also OBJECT as with this number of houses, the local hospitals for the area will not be able to cope at all with the increased demand, it will be a really dangerous situation.

I also OBJECT to the Insetting of the green belt land behind Heath Drive, Send Rd & the vicinity of St Bedes Junior School as this will mean that even more future developments will be proposed, causing further strain on the villages infrastructure.

I also OBJECT to removing Send lakes from the SNCI Designation.

At present a dedicated team tend to the lakes & it is an asset dearly loved & used by the villagers, as well as being a magnet for wildlife. This could be put at risk, meaning the lakes are not so well tended & the risk of flooding would be higher.

I am left to believe that this application to build on huge amounts of Greenbelt Land has been put forward solely as a sweetener to the Developers who are donating land to allow for the proposed 4 way junction on the A3.

I am disgusted that the Council are backing these schemes and not taking into account the harmful impact on the surrounding areas & population and the volume of housing is wholly disproportionate.

The increase in housing, which has been subject to a very serious challenge from the GRA, is still excessively high and seems in no way to map onto infrastructure proposals. This figure must be looked at in a much more holistic way than appears to be have been done at present.

Re: Objection to Send Village being removed from the Green Belt.

I want to strongly object to Send Village being removed from the Green Belt, the Village of "Send" was always considered to be a permanent non negotiable Green Belt Zone and that should remain and be honoured.

1) I object to the development in Send Hill as this area is a Pumped Sewerage System which already is overloaded and at full capacity, besides the fact the land is totally unsuitable land as it is contaminated with previous landfill.

2) Clockbarn Nursery is unsuitable to develop as its safety route onto the main road will be hazardous; especially opposite a recreation ground with children playing.

3) I object to any development at "Garlick's Arch " as historically its an ancient woodland site; rare these days, and subject to flooding which under current predictions will flood more frequently in the future with obvious consequences.

4) I object also to the changes at the A3 Roadway Burnt Common Interchange as the increase traffic attracted from other local developments would have a direct effect in traffic congestion in and through the village of Send.

We all need to take a sensible view that these proposals need to be stopped forthwith otherwise the consequences will have a life long damaging effect, we want Send Village to stay within the GREEN BELT.

Would you please ensure you acknowledge receipt of this email, thank you.

Thank you for your honest and serious consideration to our objections... we live here and need to look after the future of our village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
result in the borough’s permanent resident population increasing at 4.5 times the rate of population increase during the period 2001 to 2011. This population growth, by definition, is excessive and unsustainable for a gap town with many environmental, physical and infrastructure constraints.

Over 70% of the proposed housing is planned for land currently in the Green Belt. Housing need is not a reason in law for protected green belt land being used. It is perverse for so much housing to be planned for the green belt. Clearly, the green belt has not been used as a constraint as clearly set out in Government advice, planning policy guidance, the NPPF, case law, election manifestos and Ministerial letters to MPs.

For the West Horsley this is reflected in a 35% increase in the number of houses within 3-5 years of a plan being adopted.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the expansion of commercial land in the urban area losing the potential for further housing. Policy E7: Guildford Town Centre

There is no reliable evidence provided that the retail core of the Town Centre can support expansion of 45,000 sq m of additional retail space at North Street.

Online retail is set to account for 21.5% of total retail sales by 2018 from 12.7% in 2013, the highest online retail share in the world according to the Centre for Retail Research. March 2016, online sales rose 12.3%, and it was the third consecutive month in which more than 20% of all non-food shopping took place online, (British Retail Consortium and accounting firm KPMG) With such a high retailers will need just 70 high street stores to create a national presence compared to 250 in the mid 2000’s. An expansion on such a scale is negligent when the Council claims to be in such desperate need for housing.

Retail is a declining industry and should not be invested in by the Borough at the expense of housing in the most sustainable urban location, near employment and transport hubs.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy II)

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages. There is too much traffic in our villages already and this plan will cause more congestion in West Horsley, East Horsley, Normandy, Ockham, Ripley, Send and Clandon, with no plan to improve that. The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses in such a small area means dangerous and unsustainable traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/15503  Respondent: 10894817 / Stephanie Woodford  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

DRAINS, WATER SUPPLY, FLOOD RISK, CONGESTION

Our drains, our water supply, our medical facilities and our roads cannot cope with the proposed number of new homes. Building this number of homes will lead to flood risk here and downstream (along the Wey and Thames). The planned development on Green Belt is therefore unsustainable.

In conclusion, I must ask you to revise the housing number, and to amend the Local Plan to utilise brownfield land rather than green field sites.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Under the current economic climate post Brexit, it is unlikely any additional funding will be made available for new capital projects. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to poor air quality concerns (Policy I3)

The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health. It has been shown that Wisley already has NOX levels above the EU legal limits and by law a school cannot be located in this area as a result.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to not protecting the Green Belt (Policy P2)

Our Green Belt is precious. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding; it is the city’s playground. It is for us to conserve and protect it. There are 5 legal purposes for Green Belt, and it meets them all:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns
- To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

This policy is flawed and should have been amended. In the last consultation just six individuals, out of the c. 7,000 of those who took part in the consultation, supported the policy. Another 20 comments of support were from organisations such as: the University of Surrey, local councils (including Guildford), consultants (e.g. Savills) or landowners. But of the 1,371 who commented on the green belt policy 1,332 (97%) were against.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

NO EXCEPTIONAL CIRCUMSTANCES

The local plan proposes nearly 9000 new homes to be built on Green Belt land (compared with ~ 50,000 current homes in Guildford, so approx. equal to 18% of the existing homes in the borough) – a huge proportion. The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is NOT an exceptional circumstance in law. No exceptional circumstances have been disclosed. So the Green Belt boundaries should NOT be changed through the plan making process.

### Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

---

I object to the Local Plan as the development proposed is not sustainable (Policy S1)

13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially West Horsley, East Horsley, Normandy, Ockham, Ripley, Send and Clandon. The local communities don’t need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car.

The development should be in urban areas where there is sustainable transport. West Horsley for example will see the number of housing increased by 35% within 3-5 years of the plan being adopted. The number and density of housing is not in keeping with the local area and is therefore against policies within the NPPF.

BROWNFIELD AVAILABLE

There is brownfield land available in the town centre which is being earmarked for commercial development rather than for housing. This is enough to meet our real needs for affordable local homes. There are enough vacant commercial sites for business need and we have enough retail capacity already, so urban brownfield/derelict land should be used for housing

Comment ID: PSLPA16/2849  **Respondent:** 10894881 / Wendy & Grahama Enderby  **Agent:**

**Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**
I object to Send being removed from the Green Belt. As lifelong residents of Send, having grown up here, married here, bought property here and raised our children here who in turn have grown up here, married here, bought property here and raised our grandchildren here, we are utterly dismayed at the proposals outlined in the Local Plan which is destined to destroy our village and community forever.

I object to the building of 45 houses at Clockbarn Nursery. - Tannery Lane is far too small to accommodate the volume of traffic which will be generated by the proposed 64 apartments at the Tannery and the Marina let alone another large development which will then set a precedent for future development off what is essentially a narrow country lane. The junction with Send Road is already extremely hazardous and the extra volume of traffic will make it even more dangerous.

I object to the building of 450 houses and 7000 sq metres of industrial space at Garlicks Arch. The ancient woodland should be protected and a flood site is hardly suitable for housing. The industrial units would be out of place in our village. They would be unwelcome and unnecessary especially with a large brown field site already available at Slyfield. The development would place an unrealistic burden on our already overstretched local amenities. I object to the development of 40 houses and 2 travellers' pitches at Send Hill. The destruction of this beautiful area and devastating impact on wildlife would be a tragedy. The site is surrounded by effectively single track roads unable to sustain any more traffic. I object to a new interchange with the A3 at Burnt Common. Send Road, Portsmouth Road and A3 are gridlocked now during peak times. An interchange would encourage even more traffic from the Woking and surrounding area through Send never mind from the proposed 2000 houses at Wisley Airfield, 2000 houses at Burpham, 1850 at Blackwell Farm and the proposed developments at Garlicks Arch, Tannery Lane and Send Hill, all of which we have already objected to. The scale of proposed developments of some 6400 houses plus commercial space has to be a hugely disproportionate plan for this area. Removing Send from the Green Belt leaves the prospect of other mega developments being approved which is completely unacceptable and receives our strongest objection. In 2014 our MP stressed that the Government is not requiring Guildford Borough Council to reassess it's Green Belt and that Guildford Borough Council alone has made the choice to consider this option. A letter from Nick Boles MP to Sir Paul Beresford MP makes it clear that 'exceptional circumstances are required for any changes to Green Belt boundaries unmet housing need is not such a circumstance'. Why is Guildford Borough Council ignoring this advice?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

When this issue was raised by others, they were, according to Council Meeting Minutes advised that ...such opportunity was long gone....and such questions were out of time. Such tactics are questionable and not transparent.

Additionally, I object to the use of out of date forecasts of housing requirements.
This inability to provide the public with credible data gives rise to a very strong probability of a successful challenge to the Local Plan as it seems to fails even the most basic "test of transparency" required at law. This failure gives rise to the risk of Appeal involving high court cost which will likely wipe out GBC Legal Dept budget to the detriment of ratepayers.

I further OBJECT to GBC taking incalculable risks entering into long term commitments and complex contractual financial undertakings with Developers & Builders who are already suffering reduced demand and associated financial uncertainty of demand/ price slump potential with the economic impact of the United Kingdom on leaving the European Union not likely to be fully known for up to 5/10 years.

There is also no evidence to show that new Industrial Units are needed, there are already several empty ones in the area!

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to building 400 houses and 7000 of industrial space at Garlicks Arch.

Guildfords Housing Requirements seem to be rather vague and ill defined and very likely over exaggerated.

The Local Plan seems to be without adequate corroborative information as to how the Housing Requirement assessment numbers were reached, nor does it provide the arithmetic to substantiate how such numbers were arrived at.

The GBC Scrutiny Committee seem to have failed to properly evaluate the methodology employed, question or challenge the Paper paid for by the GBC to support their own view! Such failings do not seem to have been questioned by GBC Leaders when making their own assessment either by oversight or conveniently to suit their position.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the 40 houses planned west of Winds Ridge & Send Hill & the Traveller Site, for several reasons

It is already too narrow to take existing traffic and has poor vehicular visibility on exiting at the Potters Lane offset junction.

There is no room for long vehicles and the access road is not big enough for increased traffic.

The land in question is on the greenbelt & outside the current settlement boundary.

Ironically a planning application right next to this area APP/Y3615/W/16/3144141 Send Hill Farm, Potters Lane has already been declined on the basis that it would cause harm to the openness of the Green Belt, yet here we have the Council wanting to build so many more houses on huge areas of the Green Belt in the area!

Some of this land is also farmed and grazed and any substantial building work will be detrimental to the area.

I further object to the "Trojan" effect of locating two travellers pitches at the Send Hill site. This would give access to, and encourage occupation by unlicensed travellers on Gypsy own land immediately adjoining the proposed site. Siting of pitches in this location has been recommended to GBC via Surrey County Councillor Hilda Brazil who is a relative of this land owner which seems inappropriate and constitutes a Trojan application which will further perpetuate unnecessary and massive difficulties of enforcement for GBC and potential issues for adjoining householders in Send Hill.

I further object to the fact that Travellers requirements in the area have been similarly over assessed and are based on out of date Assessments.

The schools in the area are already at full capacity & there are no funds or plan to increase the schools for additional pupil numbers.

The Doctors Surgery is already fully stretched & has no capacity for a substantial increase in patient numbers.
I OBJECT also to the housing being sited on land known to have been an unregulated Tip for many years which if disturbed could release seriously toxic materials and give rise to uninsurable liabilities which would seriously impact GBCs budget for clean up costs. This land is still subject to gas monitoring and does not recommend itself to family housing!

It is detrimental to the health of Send residents, as has already happened in Chertsey which has sadly led to illness & death. We do NOT want a repeat of this for the residents of Send.

I also OBJECT to this proposal on the grounds of the impact of the increased traffic on the area. Already the area is gridlocked in the morning & evening rush hour & the new plans will create even more of a cut through to Woking.

The local roads going through Send & Ripley will not be able to cope & there is no room to widen the roadways.

It will add to congestion.

I also OBJECT due to the environmental impact and pollution to the area. This proposal does not take such an environmental impact into sufficient consideration.

I am writing to object to the above planning application

I OBJECT and am appalled at the Council once more wanting to pass an application that is on GREEN BELT land and failing to adopt sensible and realistic proposals which meet local and national guidelines and priorities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

I object to the exaggerated “housing need” figure of 13,860 which is far too high and results in the completely unnecessary development of the Green Belt. The way students, economic need and affordability are calculated inflates the housing need. If students were housed properly by the university on site this would release approximately 2,000 homes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the Green Belt status being removed from Send, Send Marsh, Ripley and the Clandons. The effect will be that we will become part of the urban sprawl of Woking. The Green Belt is meant to be permanent and not continually eroded.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

• I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough. It was a very late inclusion into the 2016 plan. No prior consultation was held with the residents of Send Marsh. This will increase the village by 25% and is not needed.
• I object that no explanation or planning has been given to the impact on the infrastructure i.e. roads, schools, dentists, doctors, congestion, and pollution.
• I object that the building will be on a site that regularly floods. Will this push the problem further down into the village? I live in Greyfriars Road. If this development causes my house to flood I will sue the Council for any damage incurred plus the devaluation of the property.
• I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available and where developers are anxious to create this type of building.
• I object that 4 businesses employing a number of people will be forced off the land against their will.
• I object that ancient woodland dating back to the 16th century will be removed. How can you even contemplate cutting these down!

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

• I object to the proposal to build a 4 way interchange onto the A3 at Burnt Common in order to facilitate this development and other nearby developments. This would be disastrous for the local area. Commuters would be drawn to this area and further congest an area that is already badly congested with traffic. It will mean that the narrow Send Road (A247) will be gridlocked all day as would most surrounding roads. Send will be the through route to Woking for traffic leaving the M25 at Junction 10, and the new development of 2,000 houses at Wisley and also the new development of 2,000 houses at Burpham.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

• I object to the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• I object to the removal of the attractive open country side which is part of the permanent Green Belt which is protected under the National Planning Policy Framework. It also represents unrestricted sprawl and goes against the purposes of the Green Belt which include the prevention of merging of towns and settlements.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to all proposals to build on the Green Belt at Send, Ripley, Send Marsh, Clandon and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford’s urban brownfield areas much closer to existing transport hubs. None of these areas have a decent bus service and therefore new homes will rely upon cars for transport adding to existing congestion.

I object to building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough. It was a very late inclusion into the 2016 plan. No prior consultation was held with the residents of Send Marsh. This will increase the village by 25% and is not needed.

I object that no explanation or planning has been given to the impact on the infrastructure i.e.roads, schools, dentists, doctors, congestion, and pollution.

I object that the building will be on a site that regularly floods. Will this push the problem further down into the village? I live in Greyfriars Road. If this development causes my house to flood I will sue the Council for any damage incurred plus the devaluation of the property.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space.
from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available and where developers are anxious to create this type of building.

I object that 4 businesses employing a number of people will be forced off the land against their will.

I object that ancient woodland dating back to the 16th century will be removed. How can you even contemplate cutting these down!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to submit my response to the GBC Local Plan 2016.

I have lived in our house in Glaziers lane Normandy since May 1970 and have very much enjoyed the surroundings here and now have many friends with neighbours and their families here.

I am now very concerned that everything will now change when 1,100 houses are built in Normandy and Flexford causing much more traffic, and noise. Glaziers lane is already a dangerous racing track despite the 30 mile pm notices which are very much ignored.

The current surroundings are beautiful and very enjoyable, the green countryside should not be spoilt. Please don't let that happen.

To be clear I strongly object to the proposals to develop the land shown as Site A46 in the draft Local Plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I strongly object to the release of Site A46 from the Green Belt. I base my objection on the following :-

1. I consider that the Borough is already overcrowded and that the massive development proposals in the whole of the Plan will greatly detract from the future enjoyment of living in the Borough.

1. I object in general to the release of large areas for development, particularly away from the main urban area of Guildford, because of the huge undesirable change in the character of those areas it will cause, and the difficulty of integrating so many new people in a short time.

1. I object to new large areas for development being proposed which have little or no

1. I object in particular to the massive development proposed in site A46 (Normandy/Flexford) and A29 (Ash/Tongham) because these areas are already overcrowded in terms of movement, especially in the centres of Glaziers Lane, Normandy, Ash Street, and Ash Wharf.

1. I object to, what will in effect be, the creation of two villages with two centres if the massive proposals for A46 go ahead.

Regarding the overcrowding of the Borough as a whole, it is plain to see that in terms of travel we have reached a point where during the extended peak times there is undesirable congestion at a huge number of locations. In many of these there is little that can be done in the short or medium term to alleviate this. Major schemes such as the A3 improvement through Guildford will take decades to come to fruition and yet they are needed now even without the massive new development proposed across the Borough.

Regarding the release of large areas, I think it is unreasonable to impose such significant and dramatic changes on local people in rural areas which would take place over such a short time. Established communities have a character of their own and in my view it is unreasonable to impose change that would make the locality unrecognisable.

Regarding the history of development proposals I think it is unreasonable to suddenly come up with a proposal to virtually double the size of a village such as Normandy where development of this magnitude has really never been contemplated before. At least those people living in the vicinity of areas such as Wisley Airfield and Gosden Hill Farm have been aware of the likelihood of such massive change for decades. Uncertainty about the future has been taken on board by people living there for a long time. This is not the case in respect of sites A46 and A29. These would create undesirable uncertainty for the majority of people living there.

Regarding the specific sites A46 and A29 it is my view that the imposition of such a massive amount of new development will have a serious detrimental effect on those areas. The roads in Normandy, Guildford Road/Glaziers Lane/Westwood Lane, are very heavily used not only by private cars but also goods and heavy goods vehicles. The road system is unsuitable for any further increase of traffic. The railway bridge at Wanborough Station is narrow and has an awkward skew. I see little chance of this being improved during the life of the Plan. The railway bridge in Westwood Lane is narrow, low and skewed and cannot be used by heavy good vehicles, putting and unreasonable strain on alternative routes such as Glaziers Lane. Again, I see little chance of improvement there in the life of the Plan.

The roads in Ash Street and Ash Wharf are already heavily overcrowded and the imposition of much increased traffic there seems to me to be totally unreasonable and very plain to see.

Regarding the creation of two villages, if the massive development of A46 goes ahead there will inevitably be, one would hope, shops and community facilities included in the proposals. This will, in my view, detract from the on-going success of the current village centre which is developing around the new village hall and the Manor Fruit Farm site. I accept that some form of development in Normandy will be inevitable, but I feel strongly that this should be by way of a limited number of small in-fill sites which would come on in a gradual manner so that new families can be absorbed into the existing character of the village.

In conclusion, to be clear, my personal main objection to the Plan would be the release of Site A46.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to Send Village being removed from the Green Belt
As I understand the Green Belt was always intended to be kept as such to provide a division between Villages, towns etc.
I object to the building of 45 houses at Clockbarn Nursery.
Tannery Lane has as exceptionally narrow and winding road, in places only room for one car and if you meet a lorry there is no room for maneuver.
Also a very hazardous junction coming from Tannery lane to join the Send Road, the sight vision is dreadful with parked cars either side of the junction onto the main road.
I object to the building of 400 houses and an Industrial space at Garlick’s
This site in particular is covered with woodland and pasture and certainly never intended for building purposes.
The site floods dreadfully, water coming off the A 3 into the stream which then floods the fields.
We have photographic proof of this as it is Cobham Sporting Gun Club site and has been for the best part of 30 years and floods often.
The Industrial proposal should be sited at Slyfield which would be ideal to extend and keep in one place.
I object to the development of 40 houses and 2 pitches on Send Hill called the Paddocks
Again access to this site is very narrow especially from the Cemetery down to Potters Lane where that junction is often a cause for concern the way the traffic speeds along Potters Lane and again an inappropriate place for houses and travelers site.
I object to a new interchange with the A3 at Burnt Common very strongly.
The traffic now if there is a problem on the M25 or A3 is horrendous through the villages of Ripley, Send Marsh and Send and we become grid locked with traffic finding alternative routes out of the congestion.
The roads are not capable of taking on all the extra volume of large lorries which is what would happen.
We had to have an Air Ambulance land on Send Marsh Green last week for an accident and part of our road was closed diverting bus and large vehicles around the Green causing havoc, we cannot support all this extra traffic, its spoiling our lovely English Villages here in Surrey.

Lets not ruin our lovely countryside when there are a lot of Brown Sites to consider first ...WE DONT WANT TO BE JOINED TO GUILDFORD, WOKING etc.

What consideration has been taken for Drs, Schools, Colleges, Transport Leisure etc.?

All these things require a car, bus, train, coach which again add to the volume of traffic at rush hours

Comment ID:  PSLPP16/7107  Respondent:  10896065 / Georgia Bean  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Disproportioned number of new houses for local facilities: I strongly object to the number of new houses proposed within the Horsleys and surrounding villages namely Ripley, Send and Clandon. Within the Horsleys, the schools, doctors and train stations are struggling to cope with the current demand. My family commute to London from Horsley and the trains and car parking are almost at maximum capacity. Assuming that every new house has at least two cars, this means potentially 6000 more cars within a three mile radius of the villages. The impact on the local roads will be tremendous. Parking at Horsley & Effingham junction stations (which are already full), at the shops, at the medical centre and at the village hall will be affected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Pollution: I strongly object to the new draft plan proposing additional 2000 homes at Wisley, 2000 at Gosden Hill Farm, nearly 600 in The Horsleys and 400 at Garlicks Arch as it will have a great impact on the local road network which at peak times is already struggling. The large increase in volume of traffic will cause an increase in nitrogen dioxide and particulates in the environment - already a cause for concern in several areas in the borough. Additional noise and air pollution will be inevitable with this increase in traffic and it will have a significant impact on our environment.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to advise of my objections to the new Guildford Borough local Development plan recently published.

Loss of Green Belt Land: I strongly object to the expansion of the Horsley village boundaries and its subsequent removal including Ripley, Send and Clandon from the Green Belt. The new mayor of London has instructed London planners NOT to approve development on Green Belt Land within the M25. If we continue to build on our countryside it won’t be too long before we have none left. There is insufficient details and/or evidence within the local plan to support why this action is necessary and therefore I strongly object. Our British countryside needs to be preserved along with our wonderful animal, bird and plant life which will be inevitably affected by the erosion of the Green Belt Land.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Flooding: I strongly object to the new draft plan in respect of flooding. The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area and as local residents we are well aware of how much standing water there is in our gardens after rainfall. In fact, my dad's car was “written off” due to water damage at the A3 roundabout at Ripley in 2013 due to flooding. Building on such land will only exacerbate the problem. Our drains can’t cope now causing chaos on our local roads during heavy rainfall.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have given the proposed Local Plan a great deal of consideration and I strongly object to the Local Plan as presently drafted on the following grounds:

The proposed housing numbers have no basis in the real world and seem to have just been plucked at random out of thin air. This completely undermines the basis of the whole Plan and makes it an entirely invalid exercise. Until this is rectified the whole Plan is worthless.
The final major flaw in the Local Plan is of course that it was created on the basis that we were in the EU and whilst I voted to stay we are now in a post Brexit world and everything is likely to change. The Local Plan must clearly now be revised to reflect the fundamental changes that will result from this exit from the EU.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

With regard to the proposed development of the former Wisley Airfield as I have stated before this appears to be being treated by Guildford Borough Council as though it was the development of a brownfield site. It is not. The clue is in the name, Airfield. It is or at least should be a field in the Green Belt if the agreement with the original owners to remove the runway when it closed had been enforced as it properly should have been. This is therefore just a proposal to build on a large area of the Green Belt with no exceptional circumstances involved and should be rejected on that basis. Notwithstanding that it is a completely inappropriate development of the land concerned both as to scale and nature and would put completely unacceptable pressure on local facilities e.g. roads, sewage, water etc

Answer (if comment is on questions 1-7 of the questionnaire): ()

To suggest that the central small shopping area in East Horsley is a "District Centre" is just ridiculous. Perhaps whoever wrote this part of the Local Plan should try visiting the area and should also check the definition of a "District Centre" before making such a suggestion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.

I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford.

I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because this is a precious open space to be kept as a legacy for future generations.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to strongly object to the final draft local plan and my reasons are as follows.

There is little reliable evidence or justification for such a massive development in Send's Green Belt. The scale of the development proposed for Send and Ripley is excessive, unnecessary and destructive to our community and Green Belt. There is no justification for the additional houses nor the proposed industrial development of 7,000 sq.m. at Garlick's Arch. Even with the proposed interchange on to the A3 at Burnt Common the whole area will be gridlocked. At the present time any problem at the M25/A3 interchange Send and Ripley becomes gridlocked. The whole Plan is a disaster waiting to happen. It goes against the principles of community planning and is no more than a green light to developers, backed by Guildford Borough Council, to carve up rural Surrey.
The well established policies of the Green Belt is to protect open spaces, prevent encroachment into the countryside and stopping linear development leading to the joining together of developed communities have been ignored in the proposals for Send. This plan will produce a huge overload on local and main roads.

Additional points I wish to add are as follows:

There is no requirement for the scale of development proposed. Surrey already has the largest population per square mile in the UK and should not increase.

This plan does not take flooding into account and we all know that this is a problem for the area and residents in particular.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

8. I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan's proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Page 547 of 2167
6. I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for its removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick's Arch.

The site is not appropriate because:

- There is no sustainable transport
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

7. I object to the damage to the historic environment as a result of the scale of the proposed development (Policy 03)

The Garlick's Arch (A43) proposal would double the built area in the locality, and would irrevocably damage the character of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

9. I object to the Borough Wide Strategy (Policy S2)

GBC's proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey.

The Plan is unbalanced across the borough; there's too much development in the north east of the borough (Wisley [A35], Ripley/Send [A43] and Clandon [A25]). 36% of all the Plan's new housing is proposed in this area, which has only 11% of the existing housing.

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages.

10. I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick's Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

12. I object to the employment strategy and impact at Garlick's Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick's Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed.

That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick's Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

13. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), should not take place.

14. I object to the lack of proper infrastructure planning for sites (Policy I1)
The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick's Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough

I wish these objections to be fully taken into consideration and that the plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic. E.g. all traffic from London/M25 to Waking would go through Burnt Common, Send and Old Waking. This is not sustainable as this cannot be improved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1326  Respondent: 10897217 / Warren Hogben  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

5. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy 11)

There is way too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that.
The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous and unsustainable traffic.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** PSLPP16/1324  **Respondent:** 10897217 / Warren Hogben  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick's Arch (A43).

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPP16/1325  **Respondent:** 10897217 / Warren Hogben  **Agent:**
2. **I object to development in areas which are at risk of flooding (Policy P4)**

The Plan does not take adequate account of flood risk as required by National Planning Policy.

The site at Garlick's Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council's own assessment. This area has flooded many times in recent years and therefore the Council's assessment is not good enough to be included in the plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removal of Send and surrounding villages from the Green Belt which separates them from Guildford and Woking. One of the reasons for the formation of the Green Belt was to provide a 'lung' for London; now, with the increasing concern regarding the poor air quality and pollution in London, it is counterproductive to remove areas from the Green Belt and build on them, thus creating more pollution.

I object to the building of 400 houses and 7000 sq metres of industrial development at Garlick's Arch opposite the junction of Send Marsh Road and Portsmouth Road. This construction will create a great deal of additional traffic on the A247, and the local infrastructure will not support it. Traffic will be greatly increased in Send Marsh Road, which is a winding residential road. There has been no consultation on this proposal.

I object to the proposed new interchange onto the A3 at Burnt Common. The J247 will be used as a cut through from Woking to the A3 and M25, by heavy commercial vehicles as well as cars, and at Send is mainly a residential road. There has been no consultation on this proposal.

I object to the building of 45 houses at Clockbarn. The junction of Tannery Lane with Send Road is already dangerous and these extra houses, together with the 64 houses and Marina at the Tannery will bring Send to a standstill.

There have been repeated election promises to protect and preserve the Green Belt. These are not being honoured by Guildford Borough Council, which seems determined to destroy the amenities of a country area and, in doing so, its political credibility.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Clockbarn Nursery, Tannery Lane - Policy A42 I object to Policy A42 change which increases the number of homes to 60 from 45 for the following reasons:-

Traffic problems at the junction with the A247 (Send Road) will be made even more difficult.

Tannery Lane is a narrow country road with poor visibility and in many places is single track with few passing places.

Any increase in population in Send will cause additional strain on services, especially medical.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Land at Garlicks Arch, Send Marsh - Policy A43 I object to the proposal for 400 homes and 6 travelling showpeople plots for the following reasons:-

The excessive increase in traffic generated will cause frequent blockages of local roads.

The huge increase in population will overwhelm medical and other services. At the present time there is often a 10 day wait for an appointment to see a doctor at the local surgery.

It will join up Ripley and Send and defeat the purpose of the Green Belt, causing even more pollution than exists at present with its proximity to the A3 dual carriageway.

There are no exceptional circumstances to remove this land's Green Belt designation

There is no proven need for travelling showpeople plots in this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Land at Burnt Common, London Road - Policy A58 I object to this proposal for a new allocation of a minimum of 7000 sq m of industrial or warehousing for the following reasons:

There is no demand for additional industrial and warehouse development in here are still vacant units at Slyfield and Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The recent Employment Land Need Assessment shows a reduction in demand of 3.9 hectares for industrial land for the whole borough, so the allocation of 10 hectares at Send, in the Green Belt, is not required in the countryside.

The word 'maximum' in the 2016 plan has been changed to 'minimum', which could permit unlimited industrial development in the Green Belt.

Industrial development in this area will create a great deal of additional car and heavy vehicle traffic and cause frequent gridlocks on the local roads.

Green Belt Policy 2 at paragraph 4.3.15

I object to the proposal to inset Send Business Park, Tannery Lane, from the Green Belt for the following reasons:-

It is adjacent to the Wey Navigation and would appreciably reduce the enjoyment of walkers and boat users along the river.

Tannery Lane is a narrow country road with poor visibility, restricted access at both ends and in many places is a single track with few passing places.

I object to land in Send being removed from the Green Belt. This is my first and foremost objection. GBC Councillors were elected on the back of promises they made to protect the Green Belt and they should not now renege on their election promises.

It is government policy to protect the Green Belt and there are no proven exceptional circumstances in Send which allow it to be used for housing, industrial warehousing or slip road construction to and from the A3. Housing numbers destined for Send are grossly exaggerated and not proven. Brownfield sites could be found for new housing and for industrial use and road building.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A42 Clock Barn Nursery, Tannery Lane where 45 houses are proposed. Permission has already been granted for 63 apartments at the Tannery site and the 45 proposed at Clock Barn would bring so much additional traffic on Tannery Lane which, as a narrow and winding lane with restricted width in many places, is simply not fit for this increased burden. The junction with Send Road and Tannery Lane is already dangerous enough without extra traffic. This is agricultural land and is also the habitat of bats and flooding is also a concern. It should not be included in the Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A43 and A43a Land at Garlick's Arch where 400 new houses have been proposed as well as industrial buildings and slip roads to and from the A3. This site is new and has been added to the Local Plan at the very last minute and was not included in the Regulation 18 draft. This land is ancient woodland and should be preserved. These houses and the proposed industrial buildings would link up the villages of Ripley and Send and generate a huge amount of traffic on roads which are already heavily congested. The A247 through Send is at a standstill during the morning and evening rush hours and there is a bottleneck at Old Woking onto roads which cannot be widened or improved. Other traffic going
through Ripley or Clandon would also be on roads which are narrow and already congested. Councillors must know that the A3 is also often at a standstill during peak hours so why would they want to force more traffic onto these roads?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A44 Land West of Winds Ridge and Send Hill designated for 40 houses and 2 Travellers Pitches. It is a new site, inserted in the plan at the last minute and not previously consulted on under Regulation 18. Again Send Hill is a narrow road which cannot take more traffic. It is on Green Belt land which should not be regarded as suitable for building.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I currently live in Ripley, but also have previously lived in Send, so know both villages well.

I am extremely concerned, in particular about the proposals to significantly change the Green Belt boundaries around both Send & Ripley.

Whilst, acknowledging some relatively minor changes to the Green belt may be deemed necessary, the current proposals are excessive & in my opinion totally unjustified.

The purpose of redrawing the Green Belt boundaries is presumably to allow further development. However, the changes including the proposed “inset” will potentially lead to a very significant increase in development in the future.

This is totally inappropriate for both Send & Ripley village areas.

My comments on such a proposed Draft Local Plan include the following:-

• The existing infrastructure could not cope with the additional pressures from such proposed extensive developments. For example, the existing traffic on the roads through both Send & Ripley & the congestion at peak periods is already significant.
• The roads are already fairly narrow & increase in traffic flow will cause all sorts of problems, including increased danger to pedestrians & cyclists.
• One long-standing concern for both residents of Send & Ripley is the traffic through the villages that seeks to connect to/from the A3/M25. This has been a potential issue for many years. The proposal to significantly add further local development as proposed will only dramatically increase the traffic flow & this would be intolerable & unacceptable.

There appears to be no significant infrastructure Improvements proposed that would be required to mitigate against such an increase in local development.

• In addition to the traffic problem, there are many other issues relating to infrastructure that would be of concern. These include the increased risk of flooding, lack of places in local schools, pressure on local medical facilities & health care etc. In addition, pressure on parking, particularly near local shops or schools is already a major issue of concern, additional development will only make the situation far worse.
• There seems to be a lack of credible, independent & valid evidence to support the proposals in the local plan. It would appear that there is little evidence to support the need for such large increase just in our immediate area.
• The proposals put a disproportionate amount of proposed new development in our area of the Borough.
• The proposed changes to the Green Belt, as outlined in the draft Local Plan will significant harm & be of detriment to the local areas. It will allow significant development, which the Green Belt was designed to generally prevent. It should be remembered that the Green Belt was designed to prevent urban sprawl by keeping land between settlements of villages open & undeveloped & to prevent linear development leading to the joining together of adjacent communities.
• Under Green Belt policy, there is a general presumption against development unless in exceptional circumstances. Guildford Borough Council do not appear from the evidence provided, to have demonstrated any exceptional circumstances that would justify the significant potential development that is proposed on current Green Belt Land.
• Surrey is apparently the most densely populated County in England, yet the Draft local plan is expected to accept a disproportionate amount of development, compared to other parts of the country. This point must be acknowledged.
• The loss of existing significant Green Belt open areas will be detrimental & spoil the existing countryside, which is one of the reasons why many residents decided to live here in the first place.
• Overall, the proposals will have a negative & harmful impact on both Send & Ripley villages.
• I also understand that only a very limited time has been given with regards to consultation and that some sites have been included at the last minute. This would seem particularly unfair to the residents of the Borough.

In conclusion, I object to the significant proposed changes to the Green Belt particularly in both Send & Ripley areas. The two villages are adjacent & significant development proposal in one will affect the other, as they have common interest & concerns & share facilities such as medical, schools and also some roads/traffic. This proposal is excessive to the extreme and I wish to register that I feel the revised Local Plan is still unacceptable.

*Answer (if comment is on questions 1-7 of the questionnaire): (*)

**LOCAL HOUSING NEED**

There does not seem to be any substantial evidence within the local plan for the alleged housing need in our immediate area. Whilst some increase may be justified, I object to the assumption that the area close to where we live is appropriate and that there is a clear and urgent demand for the scale of development that is proposed.

**PROPOSED WISLEY DEVELOPMENT**

It is noted that GBC previously rejected the proposals . I too also objected to what was proposed at the time. One of the main concerns I had was the access & the assumption that the existing country lanes & roads could cope with the amount of traffic generated by the new development. Clearly they could not and this was a major flaw in the proposal.
However, I personally feel that if an adequate primary access could be designed directly off the A3, which would need access to both North & South bound A3 carriage ways, then this may assist. It is appreciate that this would involve a significant civil engineering project and significant cost, but that would need to be borne by the proposed developers of the site. If it could be established that there was clear evidence of a local need for housing in that location, then such additional costs can be taken to account by the Developers. Obviously there would be other planning considerations to also take into account. One potential advantage of a Development at Wisely would presumably be that the necessary infrastructure could be planned for and form part of the development proposals. For example, a school, doctors surgery and perhaps even some local shops could be included and allowed for. This would help reduce the impact on the surrounding areas and also reduce traffic movement. In terms of potential impact on surrounding areas, a housing development at Wisely might be more desirable than trying to expand existing villages like Send or Ripley.

Answer (if comment is on questions 1-7 of the questionnaire): ()

LOCAL INFRASTRUCTURE

It would appear that little consideration has been given to such a potentially high level of new development with respect to the impact on local schools, roads, local medical facilities etc. All such services are already stretched. A significant proportion of our local village roads are fairly narrow and traffic builds up regularly. There are problems with the limited choice of local schools and getting an appointment with the doctor at a local clinic is not always easy. So just on this aspect alone, I object to the extent of the potential development in our immediate area.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
GREEN BELT GENERALLY

I am concerned by the extent of the proposed erosion of the Green Belt and object to the current proposals. I understood that one of the purposes of the Green Belt is to maintain adequate separation between villages and settlements etc. and to prevent a sprawl of development over time that effectively joins such areas together, with little or no separation. When examining the proposed local plan, the conclusion is that the proposed erosion of the green belt, particularly along the A3 corridor, between the M25 and Guildford would result in an unacceptable situation. The character of Send & Ripley would be lost and the proposed development at Gosden Hill would almost merge with the proposed expanded areas of Send/ Ripley Villages. For this reason, I strongly object to the current proposals.

IN-SETTING

I object to the extent of the proposed in-setting where significant areas to Send, Clandon/Burpham and Ripley are to be removed from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

DISPROPORTIONATE DEVELOPMENT

There would seem to be a disproportionate amount of development proposed in our area of the Borough. The proposals seem to concentrate on a relatively small area & will have a very significant impact on the villages of Send & Ripley in particular. I object to this disproportionate concentration of development in our local area.

LIMITED CONSULTATION PERIOD

I understand that there has been a very limited consultation period and that new sites were only added to the proposed revised Draft local Plan at the last minute. This would seem unfair and I object to residents being treated this way.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
**DEVELOPMENT GENERALLY**

I am not totally against new development. However the amount of proposed development to our local area is inappropriate and I do not believe it is justified. I object to the removal of such significant areas from the Green Belt. If the proposal were scaled down, then I would be more likely not to object so strongly.

I object to the underhand way in which GBC pushed through the Garlick’s Arch proposal for an additional 400 houses, warehousing, and 7,000 sq.m of industrial space. It was a matter of hours between the proposal in the morning on 24th May and being pushed through to the council meeting and into the draft plan the same day, with no time for consultation or transport assessment. This requires full consultation.

I object to the plan for 400 houses and 7,000 sq.m. of industrial and warehousing space at Garlick’s Arch. There is no need for any more houses on top of the 13,860 already proposed for the borough. I object that the industrial and warehousing site has been moved from Slyfield where it had been on a previous plan. Slyfield is where it should be and not in a residential area and it is questionable as to whether it is needed at all.

I object that ancient woodland at Garlick’s Arch will be endangered, some trees dating to the 16th century.

I object to Policy A58 at Burnt Common because -
- It was deleted from the 2014 draft because of all the previous objections
- It is a residential area and not suitable for industrial development. There are empty sites and industrial units in Guildford and Slyfield. Slyfield is where it should be sited and not in green belt
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green belt
- The roads in this area are unsuitable for the traffic this development will generate.

I object to the proposal to inset Send Business Park from the green belt because - There is highly restricted vehicular access along Tannery Lane in both directions - have you even been to see Tannery Lane see also Policy A42 above All these developments are int he green belt. Ripley is the first real village from London on the A3 and GBC seems intent on the destruction of these villages and the local countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy 35 Development at Wisley Airfield. This has already been turned down by planning officers for all sorts of reasons including lack of infrastructure, lack of roads, destruction of Green Belt etc, so why has it reappeared in the Local Plan? The ground is beautiful open country covered with wild flowers and providing habitat for many wildlife species. The houses planned will generate so much traffic on our country roads and the A3 and M25, already very overstretched. The village of Ockham would be overrun with polluting traffic. Why are the Councillors so determined to spoil our surrounding countryside?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy 42a Clockbarn Nursery Tannery Lane - 45 houses. Tannery Lane is a country lane with no pavements and is very twisting with many blind corners and restricted widths with no room for passing cars let alone the many bigger lorries and vans which serve the Tannery industrial site. 63 new apartments have already been granted planning permission at the Tannery, and together with the 45 houses at Clockbarn would generate a huge increase of traffic in the lane, which is also liable to flooding. The junction at Send Road is already dangerous with difficult sight lines.

Clockbarn is agricultural land which is now overgrown but is a habitat for deer, foxes, rabbits, bats and many birds. We do not want to see this wildlife disappear from our countryside.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A43/43a Garlick's Arch, 400 houses, industrial buildings and a two way interchange off the A3. This has been slipped into the Plan at the last moment and such development would effectively join up Send and Ripley. The Greenbelt was designed to provide green spaces between villages which would be destroyed. The development of this site would also generate so much traffic which would cause more pollution through Send and Ripley and bring the already crowded roads to a standstill during peak hours. The slip roads from the A3 would bring even more traffic through the
villages, much of which would end up in Old Woking, which is already a bottleneck through narrow roads which cannot be widened.

Guildford Borough Council’s Proposed Submission Local Plan: strategy and sites

It is particularly disturbing that despite numerous pledges to the contrary from the Guildford Borough Council that the final draft Local Plan has been changed so fundamentally introducing many new sites and a staggering proposal to remove the village of Send entirely from the Green Belt without any proper consultation.

Let me start by objecting to the removal of the village of Send from the Green Belt which is a draconian proposal that has only appeared in the latest plan. The country side between Woking and Guildford offers amenities to the community that would be lost forever if the area was taken out of the Green Belt. There is no justification for this as there are numerous brownfield sites in the Borough that can be developed before resorting to this.

I object in general to all of the proposed development sites in Send as they were not included previously in the 2014 consultation and it seems to be a case of the Council making it up as they go along and hence it has bungled significant developments into Send where the housing proposals in particular far exceed the housing needs of the community. I object to the fact that these proposals have not been properly consulted on and all sited have changed substantially from the previous Local Plan as has the number of houses now being proposed to be built.

I object in particular to the fact that the only area for proposed new housing removed from the previous draft proposal is that behind [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]. This smacks as more than a touch of “NIMBY”ism. Even though he is not a member of the (Conservative) Guildford council, I find it extremely hard to believe that this change to the plan is not related to the fact that he is a member of the Cabinet.

I object to the proposed site off Send Hill to develop 40 houses and make space available for 2 Travellers pitches. Send Hill’s road network is totally inadequate for the existing residential needs in that it is a narrow width single track road and is incapable of coping with any heavy construction traffic let alone an increase to residential traffic. There is also no justification for this development as 40 new houses would totally swamp the existing residential area and change the community forever. I also object to this site as a location for the development of 2 traveller pitches as the access to this site will be totally inadequate and they are totally out of character with the surrounding community. In addition, previously there have already been crime issues reported relating to travellers who have passed through the area and still continue to pitch their caravans on the B2215.

I also object to the fact that if the development of the Send Hill site were to go ahead then it would introduce an element of danger to the school children who use Send Hill to go to school every day. Send Hill is a totally inadequate road network to accommodate heavy construction traffic and this increased congestion caused would be significant and dangerous. The traffic situation during school drop off and pick up times is already a concern in the area. The proposed new housing, with additional vehicles, would make this even worse.

I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. This proposed development is not justified by any special circumstances and the fact that the Green Belt is meant to be permanent and not continually eroded. The fact that the site is also prone to flooding makes it an inappropriate site for development.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. This development should not be located here but moved to the Slyfield Industrial Estate where there is sufficient space for the additional 7,000 sq m of industrial space on its already zoned site. I object to this new proposed development being placed so close to residential communities.
I object to the proposed new interchange onto the A3 at Burnt Common as it would cause significant congestion into the local road network, in particular the A247, which struggles to cope with existing traffic loads. There is already significant congestion on the road network during peak travel hours in both the morning and afternoon and this new junction onto the A3 would increase this congestion throughout the remainder of the day. I also object to the fact that the air quality would dramatically deteriorate in the surrounding residential areas of Send village from this significant increase in traffic levels.

I object to the Plan as it is ill considered and not properly consulted upon with the changes from the previous plan being so material to the village of Send. I also object to the fact that local schools and doctors surgery in Send, which are struggling to cope with existing demand from residents, will be totally overburdened and unable to cope with the additional demand that would arise from this proposed increased housing. I also object to the fact that the infrastructure requirements have not properly considered and will be totally inadequate to deal with the new proposed housing and industrial developments in the village of Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

It is particularly disturbing that despite numerous pledges to the contrary from the Guildford Borough Council that the final draft Local Plan has been changed so fundamentally introducing many new sites and a staggering proposal to remove the village of Send entirely from the Green Belt without any proper consultation.

Let me start by objecting to the removal of the village of Send from the Green Belt which is a draconian proposal that has only appeared in the latest plan. The countryside between Woking and Guildford offers amenities to the community that would be lost forever if the area was taken out of the Green Belt. There is no justification for this as there are numerous brownfield sites in the Borough that can be developed before resorting to this.

I object in general to all of the proposed development sites in Send as they were not included previously in the 2014 consultation and it seems to be a case of the Council making it up as they go along and hence it has bungled significant developments into Send where the housing proposals in particular far exceed the housing needs of the community. I object to the fact that these proposals have not been properly consulted on and all sited have changed substantially from the previous Local Plan as has the number of houses now being proposed to be built.

I object to the proposed site off Send Hill to develop 40 houses and make space available for 2 Travellers pitches. Send Hill’s road network is totally inadequate for the existing residential needs in that it is a narrow width single track road and is incapable of coping with any heavy construction traffic let alone an increase to residential traffic. There is also no justification for this development as 40 new houses would totally swamp the existing residential area and change the community forever. I also object to this site as a location for the development of 2 traveller pitches as the access to this site will be totally inadequate and they are totally out of character with the surrounding community.

I also object to the fact that if the development of the Send Hill site were to go ahead then it would introduce an element of danger to the school children who use Send Hill to go to school everyday. Send Hill is a totally inadequate road network to accommodate heavy construction traffic and this increased congestion caused would be significant and dangerous.
I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. This proposed development is not justified by any special circumstances and the fact that the Green Belt is meant to be permanent and not continually eroded. The fact that the site is also prone to flooding makes it an inappropriate site for development.

I object to the proposed new interchange onto the A3 at Burnt Common as it would cause significant congestion into the local road network, in particular the A247, which struggles to cope with existing traffic loads. There is already significant congestion on the road network during peak travel hours in both the morning and afternoon and this new junction onto the A3 would increase this congestion throughout the remainder of the day. I also object to the fact that the air quality would dramatically deteriorate in the surrounding residential areas of Send village from this significant increase in traffic levels.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. This development should not be located here but moved to the Slyfield Industrial Estate where there is sufficient space for the additional 7,000 sq m of industrial space on its already zoned site. I object to this new proposed development being placed so close to residential communities.

I object to the Plan as it is ill considered and not properly consulted upon with the changes from the previous plan being so material to the village of Send. I also object to the fact that local schools and doctors surgery in Send, which are struggling to cope with existing demand from residents, will be totally overburdened and unable to cope with the additional demand that would arise from this proposed increased housing. I also object to the fact that the infrastructure requirements have not properly considered and will be totally inadequate to deal with the new proposed housing and industrial developments in the village of Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/3405  Respondent: 10898625 / James Hampton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the disproportionate distribution of houses across Guildford Borough, by far, the North East has taken an unsustainable number, in an area where country lanes are narrow and volume of traffic now using through routes makes roads gridlocked at rush hour.

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners' views, or the costs involved in improving the infrastructure, currently out side their financial capability.

The methodology is also flawed as this plan has been formulated without regard to village Neighbourhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/1358  Respondent: 10898721 / J Hawkins  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to site A25 Gosden Hill Farm as an overdevelopment in the Green Belt. Again this is contrary to the stated aim in the Plan of trying to keep the Green Belt incursions to a minimum. It would be further insidious erosion of the Green Belt and reducing the area of land available to absorb rainfall while also increasing traffic problems as the area of the A3 there is a busy stretch of road at present.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to site A43a the on and off ramp at Burnt Common/Clandon, this will increase the traffic problems in the villages not help them. The current status is that the roads are busy for large periods of the day, not just at peak hours and with many narrow roads and surfaces constantly in need of repair due to the current heavy traffic and extremes of weather. There are far more vans and lorries using these roads in recent years. This development would only exacerbate the current problems by hastening the need for road repairs, reducing the available surface area to absorb heavy rainfall causing flooding as well as reducing the village character of the area – this despite the stated aim of retaining our special heritage and landscape.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I feel that the current infrastructure and services will not support the proposed scale of development. The Plan states a proposal to increase the number of cycle-lanes whilst people are forced to drive due to insufficient bus services to the outlying villages leading to an increase in the number of cars using the roads, although the Park 'n Rides do help to reduce the traffic into Guildford town centre. I have lived in Surrey for forty years and seen the insidious erosion of the Green Belt. Future development must take increased flood risks seriously and ensure that infrastructure and services are put in place before/alongside developments not afterwards. Smaller, more affordable houses should be built in preference to larger houses, especially on in-fill sites. This would dilute the strain on local areas while truly respecting the villages, Green Belt, landscapes and heritage sites that make the area a desirable location to live in.

I OBJECT in general that priority is not on using brownfield sites, despite this being the stated aim in the Plan, but the insidious eating into the Green Belt and thus increasing the risk of flooding again despite your statement that flooding defences will be put in place. There is an increased risk of flooding now and in the future with change in patterns of rainfall. If fewer large expensive homes were built instead of smaller, more affordable housing less land would be required and more people could be housed per acre.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

To remove Send Business Park from the Green Belt implies it will become further developed. The local roads are unable to cope with increased traffic and will deteriorate even faster. It is foolish to plan future development on the flood plain. Areas will be cut off by flooding because the entire area is low-lying and there would be no alternative routes. It is sometimes difficult to find a route at present when there is flooding; it would be worsened by further development. The local lanes and roads are unsuitable for heavy traffic. These plans will not improve our quality of life, nor would the extra pollution which would result from the increase in traffic.

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

It will cause worse flooding in the Tannery Lane area. If the Marina is built there it will exacerbate traffic in an area of narrow, poorly surfaced lanes. It will be eroding the Green Belt and will impact on the Wey Navigation.
The original plan for 45 homes was excessive and to increase it by a third is ludicrous. The increase in population will strain existing resources and infrastructure.

The increase in traffic will worsen an already heavily used road system in both directions, towards Send, Ripley and Clandon and also towards Old Woking a busy junction already.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

It is still a designated flood zone.

It will mean further loss of Green Belt and by linking Send/Clandon and Ripley almost to Burpham negates the key purpose of the Green Belt.

It will destroy ancient woodland which will increase the risk of flooding.

The excess traffic is unsustainable and will cause extra wear on already poor roads.

The area cannot sustain the increase in population and cars which would result in overloading the infrastructure.

There are gypsy sites close by and no demand for sites for Travelling Showpeople in this location.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The change in wording to minimum from maximum implies plans for even more industrial development.

There is no need for industrial development on this scale, nor in the Green Belt. There are other more suitable sites such as Slyfield which are not being used to capacity. It would seem that demand is diminishing not increasing.

Again, the increased traffic would make life for the existing residential population intolerable. The roads barely cope with the current level of traffic and are frequently gridlocked by road works, road closures for repairs such as the bridges being and other traffic problems in the vicinity including the frequent problems on the M25.

**Comment ID:** PSLPA16/3659  **Respondent:** 10899137 / Justina Buswell  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. I Object to Send Village being removed from the Green Belt. This is designed to separate villages such as Send from towns such as Woking and Guildford, preventing urban sprawl and being the ‘lungs’ of cities. Local councillors and central government gave reassurance in the election that Green Belt would be protected and this is contrary to those promises.

2. I Object to building 45 houses at Clockbarn Nurseries. This is totally inappropriate use of this land. There is inadequate access, Tannery Lane is a small country lane and should remain as such. This area can already be hazardous, especially for vehicles trying to join Send Road, and this volume of traffic is already destined to increase the building of 64 apartments at The Tannery and the Marina on the canal. This lane will not be able to take any more traffic and should not be increased in size to accommodate any extra vehicles.

3. I Object to building 400 houses and 7000 sq metres of industrial space at Garlick’s Arch, opposite Send Marsh Road. This site is covered in ancient woodland, which should be preserved. The site is prone to extensive flooding. The industrial space, if required, should be sited at Slyfield and the extra housing is surplus to Guildford’s housing requirement.

4. I Object to the development of 40 houses and travellers’ pitches at Send Hill. Again this is sited on a single track country lane, in a village location with insufficient access. This area was used for landfill and would be unfit for development due to the nature of the landfill.

5. I Object to a new interchange with the A3 at Burnt Common. Send and Ripley already become gridlocked when there is an accident on the A3 or M25, which is a frequent occurrence. If the proposed plans for 2000 houses at Wisley Airfield, 2000 houses in Burpham and 1850 at Blackwell Farm go ahead: Send would have to somehow accommodate this traffic. Noise from the A3/M25 is already excessive, as is air pollution and any increase in traffic would have a hugely detrimental effect on the local population.

I object to policy A42 change at Clockbarn in Tannery Lane where there has been an increase from 45 homes to 60. This change takes no account of hundreds of previous objections made by local residents. The increase in numbers of homes will have a seriously detrimental effect on the traffic in the area, particularly as Tannery Lane is a small country road and should remain as such. This development is a significant erosion of the Green Belt in our area and is totally out of keeping with the rural nature and views across the River Wey Navigation.

I object to policy A43 change at Garlick’s Arch for the following reasons: Again this change totally disregards the thousands of previous objections. It is a beautiful area of Green Belt with very valuable and beautiful ancient woodland – something which is totally irreplaceable. It is a massive development for a village of this size causing Ripley and Send to join up, something which Green Belt land is designed to prevent. Again – another development in this area will massively increase the congestion on surrounding roads, something which is already a particular problem in our area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I object to policy A58 at Burnt Common, London Road - which was deleted from the 2014 draft plan because of objections made previously. It is totally unnecessary and inappropriate to build industrial units on Green Belt land in a village of this size. There are already suitable and available sites within Slyfield and Guildford. Again any increased movements of industrial vehicles on the surrounding roads will lead to total gridlock.

Comment ID: pslp171/1733  Respondent: 10899137 / Justina Buswell  Agent:
Green Belt Policy 2, at paragraph 4.3.15; I object to the proposal to inset Send Business Park from the Green Belt for the following reasons:

It is a non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation.

Tannery Lane, as previously mentioned, is a small country lane which should remain as such and is totally unsuited to increased traffic volume.

Any additional expansion or development in this position will have a significantly detrimental effect on the Green Belt land in this location.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object to Policy P2. the removal of Send from the Green Belt, this I believe to be against Government policy. Since the suggestion that Send be removed from the Green Belt Aldertons Farm has been neglected the hedges have not been cut, the fences are falling down. and the fields have not been cut probably hoping for planning permission.

I object to policy A 43 Land at Galick’s arch Burnt Common as this is not required, also the woodland on this site as most of it is ancient woodland and planning permission should not be granted, also this land floods each winter and could cause flooding in Send Marsh, and possibly the A3,
I feel that Guildford Borough Council have not followed the correct process the number of houses has changed from 430 in 2014 and went down to 185 in 2016 and has now go up to 485 these significant changes require another full consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/821  Respondent: 10899233 / Frederick Hookins  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Send and Ripley being removed from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5527  Respondent: 10899233 / Frederick Hookins  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A25 Gosden Hill as being totally a inappropriate and unsustainable development of 2000 homes in the Green Belt which will cause coalescence and urban sprawl from Burpham to West Clandon

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5491  Respondent: 10899233 / Frederick Hookins  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT to Policy A35 Former Wisley Airfield as being totally inappropriate and unsustainable development of 2000 homes in the Green Belt.

I OBJECT to the disproportionate amount (36%) of all proposed development being in one area of the borough from Wisley to Burpham creating a narrow ribbon effect along the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/1349  Respondent: 10899233 / Frederick Hookins  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the building of 45 houses at Clockbarn Nursery as Tannery Lane is very narrow and cannot take any more traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/1351  Respondent: 10899233 / Frederick Hookins  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the building of 400 houses and 7000 sq metres of industrial space at Garlicks Arch. This site is covered by ancient woodland the industrial space is not needed, also the site floods in the winter and converting it over will cause flooding in either Send Marsh or the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<td>I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.</td>

Answer (if comment is on questions 1-7 of the questionnaire): ()

Housing at Gosden Hill

I fail to understand how the SHMA has given a housing need higher than the estimate only four years ago. I believe the assumptions to be over estimated particularly now in the uncertain position of coming out of Europe an hence the reduction in migrant and London displaced population. These needs complete reconsideration.
Traffic generated by the Gosden Hill development.

There is only a suggestion of a 2 way new A3 southbound off and on intersection at Burpham, for the main access for the vehicles in the development as well as the park and ride, I estimated at over 3,000 cars will have to enter Burpham, use the A3100 (Clay Lane) to re-join the A3 northbound. This is already a heavily used road and since the building of Aldi the traffic has become worse, often queuing from the round about on Clay Lane back to the round about by Stoke Park. This cannot be sensible despite I'm sure relying on computer models- we all know they can be wrong and rely on a human building them and making assumptions in the first place. Assumptions can be adjusted to achieve the desired outcome.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Utilities - Burpham

The current utilities, in particular the sewage system, electricity supply and water are already at capacity for the existing residents. I don't believe the size and operation of the sewers in particular have been taken into account. There would be a requirement for significant upgrade, not considered here nor the impact of how such massive sewers would get beneath the A3 and back to the sewage plant on Slyfield

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to Guildford Borough Council's Local Plan June 2016 as I believe its is unsound an far too aspirational.

I believe the order and timing of the proposals around housing, transport and infrastructure are incorrect.

Transport A3
Transport should be the first decision to be taken. This should first be about the A3, how the volume of traffic southbound at the Burpham turnoff can be handled as well as elevating the traffic jams on the A3 through Guildford. The proposed tunnel entrance would sit on the Gosden Hill site. By allowing housing to be built on this site before the decision on the A3 would remove this key tunnel entrance site for relieving the traffic through the whole of Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8619  Respondent: 10900257 / Mark Norman  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

London Road Burpham

The designation of the London Road as a sustainable movement corridor to have a dedicated bus lane and cycle lane is not appropriate. I suggest that you come and look at the road at rush hour, it crawls along and with increased development the traffic will only get worse. Even if it were flowing the road width is constrained, how 4 lanes could be incorporated is beyond belief.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Over development in one area

How can it be conceived as acceptable that 2000 homes be built in Burpham which grows a village by nearly double. Just because its easy to find land on the edge of the town doesn't make it the right choice if the infrastructure isn't in place or the order of decision making on housing precludes solving the problem of the A3 for the whole of Guildford.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the lack of immediate provision for new schools.

I strongly object to the lack of any immediate provision for Doctors Surgeries.

I strongly object to the lack of any immediate provision for a new hospital. The Royal Surrey hospital already serves a vast length of the A3 road as the next hospital going south is Portsmouth. The Royal Surrey hospital and other major hospitals situated in the county of Surrey are already stretched to the ultimate limits.

I strongly object to the lack of any immediate provision for new roads to link local and neighbouring towns. The existing roads are already grid locked not only at peak times but now throughout the day with the slightest incident that brings chaos to the local roads. Junction 10 of the M25 the main hub for Heathrow and Gatwick airports is now regularly at a standstill throughout the day. The proposed 2016 Draft Local Plan would result in many thousands more vehicles (ie cars and commercial vehicles) attempting to get on the M25 at junction 10 and also using the local roads that link towns.

I strongly object to the lack of any immediate provision for new transport links. With grid locked roads new railway tracks will have to be laid. The London underground system will now need to expand into the Guildford Borough especially with a link to the airports also local towns and neighbouring borough towns as all of the current road structure will become impossible to use.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I strongly object to the final draft local plan and I want my comments below to be seen by the Inspector.

I object to the way that Guildford Borough Council has altered their original plans for the developments in Send and in doing so, by using regulation 19 they are attempting to shortcut the process. Having not followed the correct procedure, this must NOT be allowed.

I object to Send and Ripley being removed from the Green Belt. If this is allowed to happen, it will set a precedent and the majority of Surrey could lose its status. Election promises were to protect the Green Belt!!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Garlick's Arch being built on as it is a site which is covered in ancient woodland and should be preserved as such. Once our history is destroyed, it will be gone forever and there will be no going back.' The local road infrastructure for Send and Ripley is not suitable if the Garlick's Arch proposal for industrial and housing developments are allowed to go ahead.

The local roads are totally unsuitable for HGV's and any large increase in general traffic.

<td>I object to the proposal for land in Send Hill to be used for 40 houses and 2 travellers pitches. Again this is new proposal which has not been previously consulted upon. This area has permanent Green Belt status and the beautiful area would be spoilt by any development. The existing site is currently vented as it has unsafe landfill waste and should not be used. The 2 travellers pitches are also inappropriate because the narrow single track lane would provide insufficient access to the site with their large vehicles, especially the access from the bend on Potters Lane which is extremely dangerous!</td>

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to increases in traffic as the air quality will be compromised and will have a bad effect on residents who already have breathing problems and it may actually increase the amount of people suffering in the future. I also object to this because the local doctor's surgery may not be able to cope with a large influx of new patients from new housing developments - on occasions it is difficult to get an appointment for several days.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There is not the need for such a large amount of housing as GBC has suggested. I realise that there is a need for housing but not to the detriment of losing Green Belt, congested roads, over-subscribed schools and doctors. The South East of England is already highly populated and there are other areas of England which would be more suitable to have larger housing developments.

In my opinion, these developments should NOT be approved and NOT be allowed to go ahead.

I strongly object to the lack of immediate provision for new schools.

I strongly object to the lack of any immediate provision for Doctors Surgeries.

I strongly object to the lack of any immediate provision for a new hospital. The Royal Surrey hospital already serves a vast length of the A3 road as the next hospital going south is Portsmouth. The Royal Surrey hospital and other major hospitals situated in the county of Surrey are already stretched to the ultimate limits.

I strongly object to the lack of any immediate provision for new roads to link local and neighbouring towns. The existing roads are already grid locked not only at peak times but now throughout the day with the slightest incident that brings chaos to the local roads.

Junction 10 of the M25 the main hub for Heathrow and Gatwick airports is now regularly at a standstill throughout the day. The proposed 2016 Draft Local Plan would result in many thousands more vehicles (ie cars and commercial vehicles) attempting to get on the M25 at junction 10 and also using the local roads that link towns.

I strongly object to the lack of any immediate provision for new transport links. With grid locked roads new railway tracks will have to be laid. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Again, it appears that no thought has gone into the infrastructure required for this excessive number of properties. The villages of Send and Ripley are already heavily congested during peak times with pollution from excessive traffic and yet you appear to intend to increase this by a massive amount. Schools are already heavily oversubscribed and doctor surgeries require you to know you’re going to be ill before booking an appointments as they’re so busy.

I see no intention for providing better footpath or cycle lanes or anything else to improve existing road systems.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object (yet again) to the local plan. I see no improvement since the last local plan and in fact it appears things have got even worse!

The development is ridiculous in the extreme, it will destroy the village communities of Ripley, Send and Clandon. We neither have the infrastructure to support this level of development or (frankly) the need. I strongly disagree with the seeming disregard for the green belt which will ultimately connect everything creating an urban sprawl.

Yet again I note that there are no exceptional circumstance to the destruction of the greenbelt save making some building firms very rich, why not instead look to develop/redevelop brownfield sites before looking to destroy the countyside.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Correct title of Policy A28 to say Ash Green, and not Ash.

* Policies A27, A28 and A29 collectively increase Ash Green village by 50%. Opportunity exists under Policy A28 to provide a village/community hall and recreational area which would provide Ash Green with much needed community and social space.

Opportunities (1) Should read: "To create a centre for the village by including a village hall with associated recreational space providing much needed facilities for the Ash Green community. A mix of homes (C3) and accommodation for older people (C2) could be appropriate for this site."

* Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Correct title of Policy A28 to say Ash Green, and not Ash.

Opportunities (1) Should read: "To create a centre for the village by including a village hall with associated recreational space providing much needed facilities for the Ash Green community. A mix of homes (C3) and accommodation for older people (C2) could be appropriate for this site."

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should include the provision of a green buffer that maintains a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help
soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

a) The Street in Tongham
b) A331/A323 intersection
c) A31 /White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy P3 - Countryside

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road
- 4.3.29 Amend: "Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough’s second largest urban area. Given its relative sustainability, Countryside to the south and east of the urban area within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development."
- 4.3.30 Amend: "We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green."
- Policy P3 Amend: (1) (c) should be amended to read "does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

4.3.29 Amend: "Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough’s second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. I strongly object the building of 45 houses opposite my property at Clockbarn Nurseries for the same reasons that I have argued against development on that plot previously: Tannery Lane is too narrow to withstand extra traffic; the junction between Tannery Lane and Send a Road is already very hazardous and with the planned marina and additional buildings the road is already at capacity. Scant regard has been given to previous objections and, quite frankly, enough is enough.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The ridiculously large numbers of houses proposed to be built in the borough particularly in the Horsleys where my family live. I understand that this huge number of houses has been arrived at from a Strategic Housing Market Assessment (SHMA) developed by a consultant’s mathematical model which has not been revealed in the plan nor to Guildford Borough Council (GBC). The proposed number of houses has then been further increased by GBC, the effect of which has been to give a population increase which is almost 70% higher than the official national estimates for population growth in the Borough. The effect of this is to increase the population of West Horsley by circa 35%. It is both unfair and unreasonable to increase the population of an area so drastically - it will change the face of the Horsleys forever.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. Infrastructure already at breaking point. No regard has been given to the infrastructure which is already inadequate to meet the current level of population in the Horsleys, never mind an increased population. The schools are oversubscribed, parking in the village is a nightmare, the Medical Centre is over stretched with big waiting times to get doctors’ appointments, the trains are overcrowded and the roads around the Horsleys are gridlocked at peak times now. The quality of life for those currently living in the Horsleys and for those who move to the new houses proposed will drastically deteriorate if these new housing proposals go ahead.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

1. The extensive developments proposed in other areas of the borough eg in Burpham (2000 houses & mixed use developments), Burnt Common, Gosden Hill Farm and Garlicks Arch to name a few. If all these developments are implemented, the character of the area will be changed forever. It will no longer be semi-rural but will become increasingly urbanised and will begin to resemble a concrete jungle. The majority of the people who live here have moved here because they do not want to live in an urban conglomeration. If this mass housing expansion goes ahead, the wishes of the majority of the existing local population will have been ignored so much for democracy! It is also completely scandalous that the proposed development at Garlicks Arch was “sneaked in” at the last minute. Please respect the wishes of the local people. We all understand that some limited housing development is needed but not these huge numbers proposed and this development should be undertaken on brownfield sites of which there are still plenty in Guildford and Woking.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I particularly object to the underhand way in which those seeking to implement the new Guildford Local Plan have gone about things. They have not informed the local population that their objections a year ago would not count. I have only heard through social media that it was necessary for me to write in again and object. Once again so much for democracy! We are supposed to live in a democratic country but the underhand way in which the people responsible for developing the new Guildford Local Plan have gone about things is an absolute disgrace and flies in the face of democracy. I suspect many of the local population are not even aware that their objections last time do not count and of the need to write in and object again – Guildford Borough Council should hang it’s head in shame!

I sincerely hope that my objections will be taken into consideration with regard to the new Guildford Local Plan and that my faith in democracy will to some extent be restored but sadly, I doubt that the local population’s wishes with regard to the area they live in will be respected.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the figure of 693 new homes per annum being used as a basis for planning. As I understand, no evidence has been made available to substantiate this or if it has, it has not been made public at the time of launch of the Draft Local Plan. This is unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Site A43 – I object to the proposal of potentially 400 Homes and 7000 sq m of industrial and warehousing use. I object on 3 grounds as follows:-

The number of 400 is completely out of proportion to the Send area existing population

The infrastructure is already inadequate as detailed for Site A43a.

The site includes a large area of ancient woodland which cannot be replaced.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Site A43a - I object to the proposed new northbound slip roads. The volume of traffic at present using the A247 is already excessive both morning and evening with extensive traffic queues in both direction on the A247 creating significant pollution and the use of rat runs attempting to avoid the queues. New slip roads can only increase this as traffic attempts to join and leave the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the removal of large areas of villages from the Green Belt. I moved to this area because the area was protected by the Green Belt from excessive development. The villages are vital to the health of Guildford as a borough maintaining the rural feel of the borough. Green Belt status should not be removed from any area without full examination of alternative sites to meet the exceptional need of the development. Removing the status removes the requirement to carry out this examination. The character of the villages within Guild for Borough boundary do make a significant contribution to the openness of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and
many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  - The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  - The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  - The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  - The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  - The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  - The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Re: Guildford Local Plan concerning the Horsleys

As a lifelong resident of the Horsleys I should like to raise my comments on the Local Plan.

Development of plots near St Martin's Close, East Horsley; and Thatcher's Hotel

The proposal to build houses on these brownfield sites offers a good opportunity for development. However, the plan does not make clear the plans for infrastructure and amenities that increased housing presents.

1. Parking and traffic

It is proposed that two sites near StMartin's Close will each contain 15 houses and the third 10 houses. The document gives no information as to the size of proposed houses to be built on the site but from the density of the proposed houses it would appear that they are to be terraced. The 10 current houses and 4 maisonettes on StMartin's Close are also terrace/semi detached and do not have driveways. Therefore all traffic from the current houses and maisonettes park on the road. Basing this on an average of at least 1.5 cars per household for the borough of Guildford and accounting for the fact that each house has a garage this still means that there are upwards of 7 cars parked on the road already. There is a small car park behind the houses but this is predominantly used by people working in the parade of shops at Bishopsmead and the postmen/post vans. People parking on StMartin's Close include visitors to the sheltered housing, members of bowling club, staff and visitors to Limegrove Residential Home, and users of the StMartin's church. This means that demand for parking is high and often all available parking is taken. If the new houses are not to include sufficient parking further demand will be put on StMartin's Close and its current residents. The plan also does not make clear where the access road to the new houses would be located. St Martin's Close, with cars parked, becomes a single laned road along which cars pass in both directions. Increased traffic flow to the new houses would make passage along this road more difficult. Is it proposed that access to the new houses would be from the main road? If access to the new development is from the existing roads in the Close, or the access road to the garages, I would object most strongly to the proposed development.

The proposed development of Thatcher's hotel will also increase the number of cars using the A246 and roads though the village. The junction onto the A246 from the village is already highly congested at peak times, with traffic waiting considerable amounts of time to join the A246/turn into Ockham Road South. If such a development does take place how will this junction be improved?

1. Drainage

Is the current drainage system able to accommodate waste water from an additional houses? Also, will there be a reduction of land into which rainwater can drain? The current Local Plan does not include flood information from the previous few years where the village was adversely affected by the amount of rain that we had. This meant that access out of the village became difficult as the access road to the A3 was flooded from about Christmas until March/April. This meant that East Horsley encountered increased traffic using the A246 to exit the Horsleys.

3.Schooling

Increased housing will mean increased numbers of children. The local school, The Raleigh, is the only state school in the Horsleys, is already over-subscribed and does not have the space to expand further. New classrooms had to be added in 2012/2013 to accommodate the current children being educated. Northcote and Nightingale Crescents, on which the school is located, are small village roads meaning that parking is very problematic with daily traffic jams and difficulty for local residents trying to leave or return to their houses. Traffic starts arriving at the school from 7.30am for the breakfast club and continues until past 6pm for the after school club.
Children from the Raleigh school then attend the Howard of Effingham Secondary School. This school is also over-subscribed and historically (in 2007) pupils from the Raleigh School were sent to other secondary schools in the Surrey area, many much further away and taking hours to access by public transport (Therfield at Leatherhead, the 5th nearest SCC secondary school to East being 11.8km away; ranked 51 out of 86 in Surrey for GCSE passes; Bishop David Brown at Sheerwater, the 9th nearest school at a distance of 12.5km; ranked 83 out of 86 in Surrey for GCSE passes; and Christ's College and Guildford, the 13th nearest school at a distance of 13/8km; ranked 84 out of 86 in Surrey for GCSE passes).

Although this led to children at the Raleigh being assured of a place at the Howard of Effingham Secondary School further increasing the demand for places from Horsley children may mean that such a scenario happens again.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Development of greenbelt land in the Horsleys (plots: Waterloo Farm, Manor Farm, East lane, Bell and Colville, Ockham Road North

1. Is the information on which the housing projects been made sound?

Population forecast form the ONS- recent data from the ONS (SNPP 2012) suggest that migration into the borough is much lower than the figures used when the Local Plan was compiled. In addition international migration accounts for between a half and two thirds of Guildford's population growth and it is this international migration that is now being discouraged by central government further reducing the need for such a large number of houses to be built. Therefore, proposed building should be adjusted likewise. Before development is allowed to encroach on greenbelt areas existing brownfield sites must be used and then an assessment as to the need for more houses made.

1. How will the proposed increase in houses affect the character of the Horsleys?

NPPF paragraph 158 states that "Each local planning authority should ensure that the Local Plan is based on adequate, up-to-date and relevant evidence about the economic, social and environmental characteristics and prospects of the area.” How have the Horsleys been defined as a Rural District Centre? The draft Local Plan states that Station Parade has a large supermarket. Surely Budgens cannot be described as a large supermarket, being classified under the Sunday Trading Act 1994 as a small shop or convenience store? The classification of the Horsley as Rural District Centre is flawed and as such must be amended and the impact of this classification on the local plan corrected.

In addition, the local plan proposes to increase the number of houses in the Horsleys by nearly 35%+. How can such an increase in the number of houses preserve the character of the area? Such an increase will result in the villages no longer being villages.

1. Has sufficient provision been made for infrastructure and amenities?

• parking
• roads
• schools
• public transport
• medical facilities
• drainage

The local plan needs to consider the parts of a development needed in addition to houses. If a village or town were being built from scratch houses would form just a small proportion of the overall development. Other areas to be considered would include drainage, roads, schools, medical facilities, shops, parking. In my comments on the use of StMartin's Close site for development I have touched upon current demands on schools, drainage, parking-all of which will be further negatively impacted by allowing development of the greenbelt areas of the Horsleys.

Development of the greenbelt areas and the potential influx of people into the village will also place further demand on public transport. Horsley station is already very busy with trains being very full. The Horsley bus service is sporadic and often not at times or bus stops that are convenient or needed.

Greater numbers of people will also place demand on the local Medical Centre where booking an appointment that is not required as an emergency can be difficult.

More people will also mean more cars. The Horsleys are villages with roads that are typical of a village-being winding and narrow. These roads are already suffering from increased traffic flow and delivery lorries, becoming pot holed and of a poor standard. The roads are also used by other people. The Horsley are popular with cyclists, especially following their inclusion in the Olympic cycle route. On many of the roads visibility, due to the winding and narrow nature of the roads, is poor meaning that overtaking cyclists is often risky and dangerous. Further road users would make the roads more congested and dangerous. Many of the village roads have no pavements meaning that pedestrians have to walk along the narrow winding roads. More cars will deter pedestrians further adding to the number of cars on the road.

**Guildford Borough Council’s use of terminology**

How much control will GBC have over future development as the plan uses language where developers are "expected and should follow" what GBC say? This language is non directive. Surely developers must and should be required to comply with GBC directives on the houses built.

In conclusion, although there is a need for increased provision of housing in the borough I feel that the data on which the local plan has been based is flawed, meaning the conclusions based on these figures not sound. In addition, the plan has made no consideration as to retaining the character of the villages or infrastructure and amenities that a large development would need.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Having checked, I fail to see how the allocations for Gypsy Traveller sites would deliver 43 (minimum) pitches to meet need as stated at para 4.2.22 for the period 2012-2017. Perhaps this could be made clearer. I apologise if I have failed to understand how this has been calculated but as I see it Cobbetts Close is existing with 17 pitches. Policy only proposes 3 additional pitches on this site. This table for A48-57 implies 34 additional Gypsy Traveller pitches (NOT INCLUDING a51 FOR SHOWMEN) plus 3 at Cobbetts close ie 37 new pitches (assuming all others are new and not existing with no permanent consents). I am unclear how the identified need for 43 pitches will be met 2012-2017?

I am unclear where the required 5 year supply for sites will be come from as most of these site allocations appear to address an immediate (historic need) rather than address the need for 2017 onwards for when the plan is adopted.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Strongly support but query why occupation should be restricted on a personal basis if land is removed from the Green Belt.

The existing need for pitches would be equally met if occupation was restricted to any Gypsy Traveller

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: PSLPS16/143  Respondent: 10903073 / HEINE PLANNING (ALISON HEINE)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A57

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

Strongly support based on recent appeal decision
The family are well integrated into the local community
The site does not harm the setting of the conservation area
Highly sustainable site which could easily be removed from the Green Belt without compromising the boundary
Query however why LPA think there is a need to retain a personal condition if site is removed from the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I support the policy with a few reservations
It is acknowledged that much work has gone into preparing this policy.
I support the inclusion of Gypsy- Traveller (GT) policy as part of Homes for All with fair and equal treatment as part of
general housing need.
I support the inclusion of site allocations for GTs
I support the recognition of need to provide choice of sites by size and tenure

I support the need to remove land from the Green Belt to meet need. I fail to see how else need can be met in this Borough. A similar approach was agreed as part of the Solihull EIP/Local Plan.

I support the inclusion of sites as part of housing allocations but do not like reference to ‘whilst there remains an identified need’. It is far from clear how policy will be relied on to deliver and when. It is not clear as to phasing and when permissions will be granted. I worry developers will seek to argue the need no longer exists. I worry sites will not come forward quickly enough to meet immediate need and need post 2017. Greater clarity would be welcome. The minimum figure of 500 homes is a high threshold. There would appear to be few sites where provision will be made. I wonder whether the threshold needs to be lowered to 250 or 300 to provide gt choice and certainty sites will be delivered.

4.2.21- I am unclear where the suggested limit of 9 pitches/plots or less comes from. That seems a bit prescriptive. Gov policy (not longer saved) suggested 15 pitches or less was an ideal limit. Two site allocations are for sites with more than 9 plots/ pitches. I think this is a matter best left to site specific issues. This should not be used to thwart applications for larger sites where appropriate.

4.2.22- GTAA 2012 is dated. Need should be expressed as a minimum figure not a ceiling limit. Need for 43 pitches should make clear it is for period 2012-2017 and for 30 pitches post 2017.

It is not accepted that the immediate need to 2017 is met. The site at Cobbetts Close is existing with 17 pitches. It is proposed to extend this to 20 pitches adding 3 not 20 pitches. By my calculations policy as submitted will deliver only 37 new pitches 2012-2017 if the plan is adopted, not 43 (ie 3 at Cobbetts and 34 on 8 other sites not including A50 for showmen). (note: I apologise if I am referring to old data but can not risk going back and checking policy again as last time I did this I lost all my comments as there seems to be no mechanism to save comments). For this reason I fail to see how policy is sound and legally compliant. It does not appear to deliver enough sites to meet identified need in accordance with PPTS/ NPPF. If I am wrong then no issue is taken with soundness and compliance.

4.2.23 There is a pressing and urgent need for more transit provision. The GTAA is not the obvious mechanism to assess this. Post Sept 2015 and change to PPTS GT definition all lpas should include provision for GTs or they will not be able to travel for work. Government policy now requires GTs to travel in order to be settled. All councils should make provision for Transit sites if GTs are to be able to comply with the new definition. Provision of transit sites must be a priority.

4.2.24- support allocations as part of larger housing schemes but unclear how this will be delivered.

I do not see why sites removed from the Green Belt should be restricted by personal conditions.

I strongly support allocations A52 and A57 and would want to be informed if there is any intention to delete or remove them from the submitted plan. Both sites are occupied by families I have assisted with applications and appeals and have genuine need to be settled in this area. If this were to happen by way of any modification I would want to exercise the right to attend the EIP on behalf of the occupiers of these two sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the proposals being put forward in the latest draft local plan. Since the last Draft Local Plan of 2014 the GBC has managed to change every major site in Send. Originally in 2014 the plan proposed for 430 houses to be built in Send. In April 2016 this went down to 185 but now has just gone up to 485, 7000sq m of industrial warehousing and a massive new road junction at Burnt Common onto the A3!

I understand that GBC cannot make these significant changes without going through another full consultation under Regulation 18 and not as you are trying to do and short cut the system. Does this not invalidate the whole process?

I also understand that the GBC’s transport assessment was not available to councillors when the vote was taken in May this year. Obviously it wasn’t an important enough issue for you before the vote was taken!? 

1. I object to Send Village being removed from the Green Belt. With the proposed development of 2000 homes at Gosden Hill Farm, Merrow -Policy A25 there will be wholesale destruction of the Green Belt in this area. Which is in clear contravention of the central government's stated commitment to the protection of the Green Belt. Send acts as an essential buffer between Woking and Guildford and stops it becoming one large conurbation. NPPG83 states that the Green Belt should only be altered in ‘exceptional circumstances'. There are no exceptional circumstances in Send.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A42-Clockburn Nursery, Tannery Lane, Send.

As a regular walker along this lane I wish to point out how dangerous the junction onto the A247 is. There is limited vision when turning either right or left due to resident's parked cars along Send Road. Tannery Lane itself is narrow and at times there is only room for one vehicle at a time at the junction to Send Road due to residents cars parked outside their houses. The lane itself becomes a single track lane and is far too narrow for it to take any more traffic along it. There is already planning permission granted for 64 apartments at The Tannery and for building a Marina. With the added addition of the proposed 45 houses this stretch of road would become very hazardous and dangerous.

<td>1. I object to Policy A43- A3 Interchange at Send Marsh/Hurnt Common. The A247 is already a highly congested road during the peak times with the extra traffic from 400 new homes and warehousing the area will be permanently gridlocked! Added to this the proposed 2000 homes at Gosden Hill and 2000 houses at Wisley Airfield most of the traffic to and fro to the A3, M25. Woking, and Guildford would go through Send. As the A247 is already overloaded noise and pollution levels already at excessive levels would worsen. The A247 cannot be improved due to the nature of this residential road and narrow bridges crossing the Wey and Arun canal and the River Wey. Added to this most of the roads, which join onto the A247, are residential single-track lanes. So where is all the extra traffic supposed to go?</td>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy a -Land west of Winds Ridge and Send Hill, Send.

The proposal to build 40 houses and two travellers' pitches here is new and was not included in the Regulation 18 draft and has not been consulted on previously. The development is inappropriate due to its permanent Green Belt Status and also the site contains documented unsafe landfill waste, which is currently vented. It is also an inappropriate location due to the fact it is a narrow width single access country lane particularly at its junction with Potters Lane. It has a narrow access onto the bend with very limited vision for turning either right or left and is extremely dangerous. Potters Lane itself is narrow and again this lane in places is single track.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In summary; The local infrastructure in Send... Our schools are already oversubscribed; our doctor's surgery is extremely busy (it can take up to 3 weeks to see your preferred doctor), limited local shops. There is very limited public transport; our roads are already heavily congested, pollution levels are increasing.

Whilst I appreciate there is a need for housing within the borough. Send village has had a number of new houses built recently; currently 23 homes are being built at the old Vision Engineering site, Send Road.

If the population within the borough is to grow by around 20,000 within the plan period we will not need the proposed 13,000 odd houses proposed by GBC in the Local Plan. If you work on the basis of 2.4 persons per home around 8000 houses would be needed. Could not a large percentage of these houses be built on brownfield sites? Perhaps it is because GBC/Developers don’t like brownfield sites, as it is easier/cheaper to build on the Green Belt. No industrial waste to clear away!

I personally feel that the excessive amount of new housing and warehousing, which has been proposed for our village is untenable. I ask that my comments are shown to the Planning Inspector and receive confirmation of receipt of my letter.

I am not sure where the GBC is going with this plan but I find it completely unacceptable and strongly object to the proposals as it stands. Whilst I understand there is a need for future housing within the villages the proposed numbers is excessive and I object to the unfair imbalance of the Plan. With the removal and reduction in other parts of the borough the Plan has become even more biased against the North East of the borough. It would seem that because of our villages proximity to the M25 and A3 of the proposed 11350 homes in the Plan, 40.6% are within 3 miles of Send Marsh, most of which are on the Green Belt. This is grossly unfair on an already overcrowded part of the borough.

In the the original draft plan 45 homes were on the plan now it has increased to 60! The road junction with Tannery Lane and the A247 is very narrow the visibility for turning out of this junction is restricted by parked vehicles along the main road and the lane itself by residents and shoppers.

Tannery Lane itself by its name is only passable as a single-track lane with passing places; it will not be able to sustain the increased traffic arising from the extra homes suggested. I regularly walk this route and have seen first hand the problems of vehicles trying to turn out of the lane onto the main road. It would seem you have completely ignored the views of all the local objectors in this matter.

You have managed to completely ignore all the previous objections to this development and have increased the houses from 400 to 600 and added 6 traveling show people plots.

The excessive amount of traffic that will be generated from this site will cause immense congestion on already congested roads and lanes in Send and Ripley. Please note whenever there is a problem on the A3, Send and Ripley become gridlocked add in 600 extra homes and we wont be going anywhere!

Our schools are already oversubscribed we only have one doctors surgery which is already under pressure to support the local villages of Ripley, Send and W Clandon.

The site is within the Green Belt along with an ancient woodland and no exceptional circumstances exist. If this development is allowed to go ahead it will join up Ripley and Send defeating the key purpose of the Green Belt.

Why is there a need for 6 traveling show people plots? There is no proven demand for such sites in this location.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

There is now a new allocation for a minimum of 7000 sq.m of industrial or warehousing:- This was deleted from the original plan but has now found its way back in and the wording has changed to a **minimum** from the previous wording to **maximum**. We already have industrial units in Tannery Lane, which stand empty.

The office block on the A247 in the village couldn’t be let and was refurbished into flats and now sold. Slyfield and Guildford have many empty industrial units and empty sites available. I cannot see why it is necessary to build a large industrial site in a village location in a Green Belt area.

When the 2017 Employment Land Need Assessment shows a reduction in demand for the whole borough. Yet you plan a huge allocation in Send in the Green Belt. Why?

</table>

As a resident of West Horsley I have taken great interest in the proposed developments outlined in the Guildford Submission Local Plan. After careful consideration I wish to make the following objections.

Firstly, the roads in the surrounding area are, at present, not fit for purpose. They require an enormous amount of investment to even bring them up to a reasonable condition for the present traffic but the amount of people and vehicles which the plan would bring to the area would result in further deterioration and in places, particularly during rush hours, complete gridlock. The prime example of this is the junction at the end of East Lane, Ockham Road and the Drift.

Secondly, the area A39 is to be built on land which allows houses at present in the area, to be free of standing water during inclement weather. Whilst I am hopeful that future planners would be aware of that, will it be taken into account? Experience tells me not to assume! The proposed development would be affected badly without doubt.

Lastly, I have grandchildren who also live in the area and attend local schools. Knowing the state of the system at present, where will the "new" schools for the "new" pupils be built because schools locally are up to capacity, or are the planners intending to use other schools not within the district to take the overflow? The resultant traffic from the movement of these children will add to the problem hugely.

The doctors surgery will be overwhelmed, the local shops unsupported as there will be no parking and I could go on. The general lack of common sense and thought about the people of the area is staggering. I hope some good sense will prevail and the plan will be completely revised.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing in protest to the Local Plan as this relates to the villages of Send and Send Marsh because it seems to take no account of the wishes of local residents, many of whom, including my family, will be adversely affected. Here are just some of the issues:

- Rush hour traffic is already at a standstill throughout Send, Send Marsh and Burnt Common and an extra 490 plus homes will add massively to this problem.
- Building on the green belt was supposed to be a last resort rather than something taken for granted - 90% of residents were against this in previous local polls.
- Schools are already struggling to find places, and the Villages medical centre appointments are already at capacity.
- Air pollution will become a serious problem affecting the health of all local residents, especially young children.
- Why does there have to be so many houses in such a small area when many other villages are getting off with almost no additional development.
- Our green belt environment is home to many different species of wildlife, all of them under threat if this housing goes ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy 2 at paragraph 4.3.15 to inset Send business park from green belt because its inappropriate development in an area with very poor access, the most narrow and restrictive road in the area and if you see the impact a single box van causes from either direction never mind a juggernaut then you will realise the futility of this application, its an area of outstanding natural beauty, and is also an old non conforming user in an area it should never have been developed in.

Finally, I cannot believe I voted for you. Your lack of support for locals makes your positions on the local council untenable. Please resign your position, as come the next election I will be voting for any one but you guys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A42 Clockbarn nursery tannery lane because the increase to 60 homes as even 45 homes would bring far too much traffic to a road that is nearly impossible to exit on to the main road. Assuming 2 cars per home, this would bring 120 cars which would bring grid lock to central Send.

This increase completely ignores all previous objections.

The locality is already subject to local flooding - which will be made worse, which the developers will get away with, the local council will ignore and the local residents have to put up with yet again.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposals to build on Green Belt in the Guildford Borough Council area.
I OBJECT to the scale of building on the Green Belt in the Send, Send Marsh and Burnt Common area.
I OBJECT to the lack of evidence to support such large scale building.
I OBJECT to Guildford Council's belief that it is "progress" to convert all our Green Belt to concrete and tarmac just to satisfy some badly researched need for extra housing and industry.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the manner in which Guildford Borough Council has presented this latest plan. I consider the plan is misleading and contradictory to other documents presented by Guildford B.C. especially the Summer edition of "About Guildford" where statements are made and then immediately contradicted.

For example:-

You state that the number of development sites has been reduced. YET you added more sites at short notice, Garlick’s Arch and Winds Ridge/ Send Hill AND ENLARGED the Send inset area, thereby allowing and encouraging larger developments.

You state that there will be NO development along the A3 between Junction 10, M25 to the Hogs Back. YET YOU PROPOSE (including Wisley Airfield) some 6800 dwellings.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the removal of 89 ha of Green Belt at Gosden Hill Farm. This valuable farmland is desperately needed to help reduce the need for imported fresh foodstuffs. Despite the suggested road improvements the development proposal will, without doubt, have a detrimental effect on the existing areas of Burpham and Merrow. The "Allocation" box in Policy statement A25 clearly shows, without any doubt, how Guildford Borough Council supports the environmental Armageddon of this *part* of the Borough. Adding together all the proposed uses, it is absolutely obvious that the Burpham area will be a place to avoid. Congestion caused by housing, schools, shopping, general employment, Park and Ride and other proposals will add to the traffic nightmare current on the A3.

To put it simply, wasn't the A3 improved to REMOVE traffic from peripheral villages?

Perhaps you have forgotten!

Finally, perhaps you will be able to explain to the Public Inquiry Inspector why Guildford Borough Council is encouraging developers to progress housing proposals as soon as possible. Could it be that Guildford Borough Council is attempting a series of "fait accompli" in advance of any Inspector's decision?

Please ensure this letter of Objection is presented to the Public Inquiry Inspector.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the destruction of Green Belt at Burnt Common in order to create a further junction for the A3. This proposal will massively increase the traffic along the A247 through both West Clandon and Send. The A247 was never designed to attract large volumes of traffic and is incapable of improvement without substantial compulsory purchase of land and property. I BELIEVE THAT THE LAND HAS BEEN OFFERED BY THE OWNERS OF THE GARLICK ARCH LAND AS A MEANS OF PERSUADING GUILDFORD COUNCIL TO GRANT PERMISSION FOR THE 400 HOUSES AND INDUSTRIAL DEVELOPMENT. You will be feeding the already seized up A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the housing proposal at Send Hill/Winds Ridge. The Plan acknowledges former quarry workings but makes no mention of the land being contaminated by landfill. Neither does it refer to the venting of the land to dispel underground gases.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the destruction of ANY part of the Green Belt when a sustainable requirement has not been proven AND NONE HAS.

I OBJECT to the removal of some 128 ha of Green Belt in the areas of Send, Send Marsh, Burnt Common and Gosden Hill Farm and its conversion to concrete and tarmac.

I OBJECT to the insetting of the Send area which removes some 39 ha from the Green Belt. By this action Guildford B.C. is promoting and encouraging residential and industrial development in an area where perceived need has NOT been proven.

I OBJECT to Guildford Council's double standards when in "About Guildford" you state the Plan rejects any schemes that would have a detrimental effect on the Green Belt. You do not appear to understand your own evidence and publicity.

I object to the disproportionate distribution of houses across Guildford Borough, by far, the North East has taken an unsustainable number, in an area where country lanes are narrow and volume of traffic now using through routes makes roads gridlocked at rush hour.
I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners’ views, or the costs involved in improving the infrastructure, currently out side their financial capability.
The methodology is also flawed as this plan has been formulated without regard to village Neighbourhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Also, I strongly oppose the GBC plans to propose a major housing building programme in both East/West Horsley and on the old Ripley Airfield. I find the whole scheme totally abhorrent. My reasons are as follows:-

1 The local infrastructure is already overloaded and up to its limits. The schools are full. The medical services at Horsley Medical Centre are stretched to capacity and the drainage on the roads cannot cope. As it is; the roads flood with heavy rain.

2 The local railway stations will not be able to cope with approx an extra 1500 persons. The rush hour trains are already full and there will be insufficient car parking space. There certainly is no adequate bus service in the area.

3 The proposals to build what amounts to another Surrey village on Ripley Airfield is ridiculous. 2100 new houses means at least 4000 cars.

1. I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

1. I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough; this is more than double the figure of 322 used in previous plans. The way students, so-called “economic need” (already questionable and now more questionable than ever post-Brexit) and affordability are calculated inflates the housing need.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.
But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is unacceptable for consultation on the Plan.

**Comment ID:** PSLPS16/4265  **Respondent:** 10906145 / Joe Gervasio  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **I object to Gosden Hill development (A25)**

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF.

This Green Belt site prevents the sprawl of Guildford town, and together with other Green Belt sites in the plan, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight an historic village.

The development would generate in the region of 4,000 vehicles which will naturally use the A3 which is already stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and also through Send and Ripley which are also severely constrained.

The remaining agricultural land between Gosden Hill and West Clandon would be so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon, Send, Ripley and Wisley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to building 45 houses at Clockbarn, Send.

I object to this because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more vehicle movements.

I wish these objections to be fully and individually taken into consideration. Please acknowledge receipt and confirm that they will be placed before the Planning Inspectorate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4263  Respondent: 10906145 / Joe Gervasio  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

I object to the development at Garlick’s Arch. It was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the Borough. Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use previously developed land, but in this draft GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch, which is part of the permanent Green Belt.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding.
- The site has a particular conservation sensitivity since it is covered in ancient woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
- It is a wildlife habitat, but no wildlife report for the site is in the Local Plan.
- There are no plans to improve local schools, medical or utilities to cope.

Moreover, this site was included at the last minute with no section 18 consultation with the local community.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4266  Respondent: 10906145 / Joe Gervasio  Agent:
1. I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). It is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space (which is highly doubtful) it should be at Slyfield where there is a 40ha site available.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4264  Respondent: 10906145 / Joe Gervasio  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

1. I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition would draw in a huge amount of ‘through’ traffic. E.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This would result in the A247 (Send Road) being gridlocked most of the time.

This is not sustainable as this road cannot be improved, and the fact that there is no concrete proposal in the Local Plan to do so is further evidence of this.

Furthermore, I object to this proposed new interchange onto the A3 at Burnt Common because the Transport Evidence is incomplete and unreliable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the development of 40 houses at Send Hill

This is a high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9146  Respondent: 10906145 / Joe Gervasio  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

1. I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

As any view of the area from the air will tell you, the Garlick’s Arch (A43) proposal would double the built area in the locality, and would irrevocably damage the character of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

This area is an attractive area and forms part of one of the Borough’s most valuable assets – open green space. It should not be destroyed because a property developer is prepared to “gift” some land for a slip road.

The council often complains that a significant proportion of the Borough is Green Belt. But this is a Good Thing! We should be grateful for it, appreciative of it, and protective towards it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9141  Respondent: 10906145 / Joe Gervasio  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that.

The rural roads in this area are narrow, in poor condition and have no footpaths. The scale of the proposed developments in this area means dangerous and unsustainable traffic levels. Many of the roads in this area are in poor condition and the proposed increase in traffic will lead to more danger for all road users, many of whom have no choice but to use these roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the lack of proper infrastructure planning for sites (Policy I1)

The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9149  Respondent: 10906145 / Joe Gervasio  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2
1. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

The A3 and M25 are already severely congested, and would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the Plan because of concerns about poor air quality (Policy I3)

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly close to the A3, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016).

I object on these grounds:-

1. **I object to not protecting the Green Belt (Policy P2)**

I object to removing Ripley Send and Horsley from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl.

These villages and their countryside provides a necessary buffer between Woking and Guildford. The Green Belt is not some irritating bit of officialdom to worked around by planners. It is for the prevention of merging of towns and settlements which would otherwise create unrestricted sprawl. If these villages were removed from the Green Belt in time there would be continuous development between Woking and Guildford.

70% of the sites put forward in the Local Plan are in the Green Belt which flies in the face of current government planning policy. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. **I object to development in areas which are at risk of flooding (Policy P4)**

The Plan does not take adequate account of flood risk as required by National Planning Policy.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river (meaning that it has a 1 in 100 or greater chance of flooding each year – this is the highest risk category). Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 (meaning having between a 1% and 0.1% annual probability of river flooding); that is, one tenth of the probability assessed by the Environment Agency!

This site often floods during the winter months and has flooded as recently as this summer 2016. Clearly the Council’s SFRA is not fit for purpose and so invalidates the local plan for such sites.

</tbody>
</table>
13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially Ripley, Send and Clandon. The local communities don’t need these houses and there is no prospect of adequate infrastructure for them. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Local Plan has nothing to improve the infrastructure for Garlick’s Arch.

The development should be in urban areas where there is sustainable transport, and the genuine need can be met in on brownfield sites close to transport hubs.

<td>1. I object to the Borough Wide Strategy (Policy S2)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
GBC’s proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey.

The Plan is unbalanced across the borough; there’s too much development in the north east of the borough (Wisley [site A35], Ripley/Send [site A43] and Gosden Hill/Clandon [site A25]). 36% of all the Plan’s new housing is proposed in these three wards, which have only 11% of the existing housing – this is disproportionate by over 300%

Over 5000 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

I object removing Send Business Park from the Green Belt (4.3.15).

Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to removal of Brownfield sites (A4) from the Plan

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states “Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/842  Respondent: 10906145 / Joe Gervasio  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects,

1. i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!), and
2. ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch
The potential of an increase from 400 houses at site A43 Garlicks Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

**The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch**

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

1. a) *The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, ... (site allocation A25) [ than the Burnt Common site did ]”*
2. b) *The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”*

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

There lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object to removal of Brownfield site (A34) from the Plan

Site A44 in Broadford Business Park has also been removed. This is another brownfield site that has already been developed. The Council’s claims to “have adopted a ‘brownfield first’ approach” (page 5) but this is clearly not the case, and is contrary to national guidelines.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
The Plan is self-inconsistent in respect of traveller sites.

A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots ...” Clearly A50 more than covers the total “need” of 8, page 40, 4.2.22. and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that

“Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version says:

“Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses]. That section has now been removed, thereby accepting that needing to make greater than normal profit is to be an acceptable reason not to deliver affordable homes. This is a shocking sop to the developers.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Under this policy, areas within 500 meters of a "public transport interchange" play a key role.

Proposals for new office and research and development floorspace are to be directed to firstly Guildford town centre and then to areas within 500 meters of a public transport interchange ("PTI").

East Horsley has two railway stations, Horsley Station and Effingham Junction Station, but currently the draft Local Plan only proposes that Horsley Station should have PTI status.
The explanation given at 4.4.17 for Effingham Junction Station ("EJS") not enjoying this status is that either it is located within the Green Belt, or it is within an AONB or it is isolated away from the village or centre. It is not clear which of these applies to this particular station, but we believe strongly that none apply and that there is a strong case for EJS deserving PTI status in the same way as Horsley Station.

We will deal firstly with the three alternative reasons given for EJS not supposedly qualifying as a PTI.

Firstly there is the Green Belt aspect. This is not logical since if location within the Green Belt were determinative, this would mean that Horsley Station would also fail to gain PTI status.

Also the draft Local Plan proposes elsewhere at Policy P2 that the whole of East Horsley, including both Horsley Station and EJS, should be inset from the Green Belt. It will be seen elsewhere in these comments that EHPC objects strongly to this proposal, but the point remains that if location within the Green Belt were a valid reason for not being given PTI status, the Local Plan itself makes it clear that under Policy P2 this will not apply in the case of both Horsley Station and EJS.

Secondly EJS is not located in an AONB. EJS is within the envelope of the village settlement and will remain as such under the draft Local Plan.

Thirdly EJS is not "isolated" or "away from the village centre."

Effingham Junction (the area immediately south and west of EJS, served by respectively Forest Road south of the railway bridge and Old Lane) may not have the extensive shopping parades enjoyed by East Horsley's two other centres (Station Parade and Bishopsmead Parade) but it is a thriving community with a significant population and also a significant number of active and successful employment floorspaces and sites.

These include in Forest Road a general store (Forest Road General Store), a car sales and car repair business (PJB Car Sales/The Body Shop), a dental health centre and chiropractic clinic (Mortiboys) and on Horsley Road, Cedar Garden Centre, Royce Turf and Irrigation and at the Newmarsh Farm site, a number of businesses including Richmonds Horse Transport, Braye Hydraulic Repairs and TTS Surfacing Ltd.

It is therefore vital that the Local Plan's economy policies affecting the area protect these spaces and sites and create conditions for their sustainable growth and hence job creation.

Since all or most of these businesses are located within 500 meters of EJS, Policy E2 would be an invaluable driver for such growth which could play a major role in ensuring that Effingham Junction maintained and enhanced its position as East Horsley's "third centre" for homes and jobs. On the other hand, to exclude EJS from PTI status could very well stifle its sustainable development and condemn it to a future as a dormitory "backwater" of East Horsley.

It is also counter-intuitive in the extreme to refuse EJS "PTI" status. This is for the simple reason that EJS is clearly a "public transport interchange" as that term would be normally understood. This is for the following reasons:

1. as the name "Effingham Junction" indicates, EJS is at an important junction and The railway line from Guildford splits here into two lines which take different routes into London, so many London-bound passengers will change trains here;
2. EJS serves not only the Effingham Junction area, but also the many residents of Effingham and Little Bookham for whom EJS is far closer than Bookham Station;
3. EJS also serves the many residents of Cobham area for whom EJS is far closer than Cobham and Stoke d'Abernon station EJS also serves the residents of Ockham and Ripley;
4. EJS also serves the considerable numbers who visit local leisure activity sites, including three paintball sites and two clay pigeon shooting sites, for whom EJS is the only viable public transport hub; and
5. EJS will be the nearest railway station to the land at the former Wisley Airfield site which is proposed for the building of 2000 homes under Policy A35 of the draft Local Plan and if, despite the objections of many including East Horsley Parish Council, this proceeds, then significant numbers of residents will be taking one form of travel to EJS and then interchanging onto the railway.

EHPC accordingly OBJECTS to Policy E2 insofar as it fails to confer "public transport interchange" status on Effingham Junction Station.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We support the general principle that developers should be required to contribute part of their development profit towards the cost of social housing in the borough. However, this ‘one-size-fits-all’ policy is seriously flawed and likely to prove highly inefficient, if not unworkable, in the longer term.

In this policy GBC have taken no regard whatsoever of the differences in affordable housing need across the borough. This has significant consequences in East Horsley, which is the area with the lowest demand for affordable housing in the borough. Moreover, East Horsley is not classified as a ‘rural area’ under the 1997 Housing Order and therefore is not exempt from the new ‘right to acquire or enfranchise’ entitlement – a factor which is likely to see affordable houses in the parish being bought up as soon as possible and thereafter lost to the affordable sector.

Under Policy H2, 40% of all but the smallest development sites in East Horsley will be required to have affordable housing built upon them, irrespective of whether there is actually demand for more social housing in that area. Moreover, the affordable housing targets proposed in the Proposed Submission Local Plan indicate that the biggest component of affordable housing (40%) should be built as 1-bed dwellings despite the fact that GBC’s own studies show that the strongest affordable demand in the borough is actually for larger 3-bed dwellings.

As a result of this flawed affordable housing policy, a significant volume of social housing is likely to be built in places where it is not needed and offered to tenants who do not want to live there nor have jobs near that location.

Policy H2 thereby fails the test of sustainability and should be radically revised. If not, the outcome will be serious inefficiency in the provision of social housing in the borough in an area such as East Horsley this is likely to be manifested in a rapid buying-up of properties for quick re-sale at a generous profit, at which point these homes also become lost to the affordable sector.

EHPC accordingly OBJECTS to Policy H2.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Surrey Hills AONB is one of the great treasures of Guildford Borough and we believe that protecting this area should be given the highest priority.

We therefore support Policy P1.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Local Plan Policy P2 states that: *We will continue to protect the Metropolitan Green Belt.* We fully and un-equivocally support this policy.

Unfortunately, despite such brave words, GBC appears to be in breach of this policy itself through the housing policies that it has set out in the Local Plan. The analysis included in the Appendix shows that around 65% of the developments proposed in the Proposed Submission Local Plan are to be built on land currently within the Metropolitan Green Belt. We consider this outcome to be outrageous.

Under NPPF rules, GBC is permitted to make allowance for factors which may constrain the delivery of new housing, such as the need to protect the Metropolitan Green Belt or the restrictions required to protect the Surrey Hills Area of Outstanding Natural Beauty (‘AONB’) which is offered protection under the NPPF comparable to that of a national park. Although these areas make up a large proportion of the land area of Guildford Borough, GBC makes no attempt to reduce its housing delivery in order to take account of such constraints. We find this approach inexplicable.

There are also a number of further issues relating to the detailed implementation of this policy which are set out further below:

**a) Paragraph 4.3.13: Proposal to inset East Horsley from the Green Belt**

Policy P2 proposes that East Horsley should be inset from the Green Belt, instead of being ‘washed over’ as it is today. Currently development is permitted within the settlement boundary, although this area is still considered to be Green Belt with a particular planning regime being applicable.

East Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving that character. Moreover, being ‘washed over’ by the Green Belt has not been a serious constraint on development within the village. For example, GBC’s planning records indicate that no less than 149 net new homes were added to the village housing stock through in-filling and brownfield developments between 2000 and 2015.

GBC attributes the need to inset East Horsley to NPPF requirements, arguing that the test for remaining ‘washed over’ is that the village should make an important contribution to the openness of the Green Belt. This East Horsley clearly does. No less than 36% of East Horsley is composed of woodlands, whilst inside the settlement area there is an average housing density of just 8.1 dwellings per hectare (‘dph’). Woodlands and large residential gardens make a vital contribution towards bio-diversity, provide wildlife corridors, and furnish those open spaces which are vital to the character of the greenbelt. It is one thing for a planner to study a map and see a settlement area filled with housing, but it is quite another actually to come to a rural village like East Horsley and see how the Green Belt has preserved the rural character and openness of this village.

Today East Horsley is a picturesque and flourishing rural community, which has and continues to experience steady incremental growth as a result of being ‘washed over’ by the Green Belt. As the saying goes: “If it ain’t broke, don’t fix it”. This applies to East Horsley in the matter of insetting.

EHPC therefore OBJECTS to the proposal to inset East Horsley from the Green Belt and requests that this proposal be dropped from the Local Plan.

**b) Paragraph 4.3.16 and Proposals Map: Settlement Boundary changes in East Horsley**

GBC are proposing to make a number of changes to the settlement boundaries of East Horsley and so expand the settlement area, as set out in the Proposals Map, with the justifications seemingly provided in the Green Belt & Countryside Study prepared by the consultants, Pegasus.

We object to two specific boundary changes, which have been proposed, as follows:

1. There is a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Ockham Road North up to the eastern boundary of Lollesworth This proposal removes over 5 hectares of agricultural fields from the Green Belt. The present boundary line is clearly defined by a deep and well-maintained drainage ditch which is classified by the Environment Agency as a ‘main river line’ and therefore
represents a highly defensible Green Belt boundary.

Moving this boundary west to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. We do not believe this proposal can be considered as an exceptional circumstance. Clearly the only justification for this change is to bring a large agricultural field within the settlement area in order to provide more housing land. However, under NPPF rules this is not a sufficient justification for changing a Green Belt boundary. As such, we believe it is an invalid proposal.

EHPC accordingly OBJECTS to this proposed boundary change.

2. There is also a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Kingston Avenue up to a tree line running along the Parish Boundary at the western edge of Kingston The result is to take all of Kingston Meadows out of the Green Belt.

Kingston Meadows is the main public recreational space of East Horsley, comprising various sports facilities and playing fields. The present settlement boundary is clearly defined by a deep and well-maintained drainage ditch running along its eastern side. It therefore represents a very defensible Green Belt boundary. Moving this boundary westwards to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. We do not believe that this can be considered as an exceptional circumstance. As such we believe this is an invalid proposal.

EHPC accordingly OBJECTS to this proposed boundary change.

In the Green Belt & Countryside Study and its accompanying Topic Paper, GBC justifies the need to make changes in settlement boundaries in order to meet unfulfilled housing need in the Borough. However, Green Belt rules make it clear that unfulfilled housing need is not normally considered to be ‘an exceptional circumstance’. If it were the entire Green Belt would already be covered in tarmac.

The NPPF is clear that every movement in settlement boundaries must be justified by ‘exceptional circumstances’. GBC have offered only a generic justification in their Topic Paper of meeting unfulfilled housing need, but a case by case justification has not been provided. As such, we believe the settlement boundary changes referred to above (and many others) are invalid without such detailed justification.

c) Paragraph 4.3.17: Proposal to remove Wisley Airfield from the Green Belt

EHPC OBJECTS to the proposal to remove Wisley Airfield from the Green Belt. The only justification for this proposed change is unfulfilled housing need which is not considered an exceptional circumstance. The proposed Wisley development is discussed further below in the Site Allocation section.

d) POLICY P2: Limited In-filling

A new planning designation has been introduced called ‘the identified boundary of the village’. For East Horsley this covers a number of roads south of the A246. It is a sizeable area, covering 45 hectares, the equivalent of 23% of the present Settlement Area of the village. Within this area, Policy P2 sets out proposals that would allow ‘limited in-filling’ within this boundary.

We find it hard to reconcile the opening statement of Policy P2 that “We will continue to protect the Metropolitan Green Belt” with this sizeable reduction in effective Green Belt status. In our opinion, this policy represents a de facto extension of the Settlement Boundary and a substantial reduction in the operational effectiveness of the Green Belt, whose effectiveness is significantly weakened where this new planning designation applies.

EHPC accordingly OBJECTS to the proposal to designate roads south of the A246 as being within the ‘identified boundary of the village’ and to allow limited infilling within this area.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This policy sets out the objective of adding 13,860 new homes to Guildford Borough over the 2013-2033 period of the Proposed Submission Local Plan, equating to an annual build of 693 new homes per annum.

EHPC has serious concerns about the enormous scale of this building programme, which represents a net increase of 25% in the housing stock of Guildford Borough, a remarkable rate of increase for a borough in the English Home Counties. It is even more remarkable when the official statisticians at the Office of National Statistics (“ONS”) are projecting a population increase of some 15% for Guildford Borough over this same period.

Some explanation for this mismatch may partly be found in the conclusion of the West Surrey Strategic Housing Market Assessment, (“SHMA”), which looks at how the annual housing target of 693 homes is comprised. It estimates that 517
homes per annum arise from ‘the demographic starting point’ – effectively what the official statisticians at the ONS and the Department of Communities and Local Government (“DCLG”) are predicting Guildford will require based upon their population and household forecasts. To this is added in the SHMA another 120 homes per annum in order to ‘support economic growth’, a further 31 homes per annum to ‘improve affordability’ and 25 homes due to ‘student growth’, all of which totals up to 693 homes per annum target.

EHPC finds this analysis perplexing. Economic growth is already factored into the statistics produced by ONS and DCLG, so what GBC are proposing actually comes on top of the official household growth forecasts for the borough. Moreover, the GBC Affordable Housing Policy H2 is proposing that all development sites (other than the very smallest) will be required to have 40% of their homes offered as affordable housing, so why another 31 homes per annum is needed as affordable housing on top of this 40% ratio is quite incomprehensible.

Furthermore, DCLG research has concluded that there is on average a 97% correlation between population growth and household formation. Therefore, if GBC’s target of a 25% increase in housing stock were actually realised, the outcome will be that Guildford Borough would see its population rise by around 25% over this period. This means that the resultant population growth for Guildford Borough would be at a level 67% higher than the official forecasts.

One of EHPC’s particular concerns in reviewing the Proposed Submission Local Plan is that the impression is conveyed upon the reader that GBC’s housing targets are effectively needed to fulfil NPPF requirements or because of central government policy – in other words that GBC has no real choice but to put forward these projections, unpalatable though they might be. However, the reality is very different. GBC has voluntarily chosen to pursue a policy of aggressive civic and economic expansion – one might perhaps term it a policy of ‘Forced Growth’ – which underpins all of the housing policies in the Local Plan. In short, the difference between the official statisticians’ forecasts and GBC’s target of a 25% increase in housing stock is entirely down to a political choice made by GBC.

Of course, there is nothing fundamentally wrong in GBC adopting a Forced Growth policy for the Borough – not so long as that policy is made clearly and explicitly and is fully supported by a majority of its electorate. However, EHPC doubts whether this is actually the case. It is certainly not a vision that is shared by EHPC, which unequivocally rejects GBC’s Forced Growth policy.

EHPC accordingly OBJECTS to the borough housing targets set out in Policy S2.

I OBJECT to Policy A35 Former Wisley Airfield as being totally inappropriate and unsustainable development of 2000 homes in the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the disproportionate amount (36%) of all proposed development being in one area of the borough from Wisley to Burpham creating a narrow ribbon effect along the A3

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3397  Respondent: 10910433 / Linda Willis  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I appreciate the massive amount of work this is entailing over many years but I have several objections:

1. I object to a 2000 house village at Wisley Airfield. This will cause traffic congestion for the whole area in particular Ockham, Ripley, East and West Horsley, Send, Effingham and further afield. This will cause Utter chaos on the A3 at the M25 intersection, Ockham and Ripley roundabouts and all villages between Cobham, Dorking, Merrow, Woking. There would be extra pollution at Jnctn 10 which is already at a risky level. There would be so many extra people and children that the Horsleys and surrounding villages would be unable to sustain without enlarged shopping areas, more schools and medical facilities. Not to mention trains and parking. This would make us an urban area and we are supposed to be in Green Belt’ which was never supposed to be withdrawn, otherwise it joins us on to London via Kingston and Esher in an urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/7490  Respondent: 10910433 / Linda Willis  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to all the pockets of green breathing space being infilled in East and West Horsley, and surrounding villages. This would completely spoil the feel and look of the village. There must be some brownfield sites in larger towns like Guildford and Woking? Why does everybody have to be accommodated in the South East. Are Sheerness and the Isle of Sheppey and the Isle of Grain overloaded like we are in danger of being? Maybe some new towns with agriculture and light industry could be encouraged there. Or further north using up some of their green spaces.D1

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The fields off Keens Lane, in the Guildford Borough Council Draft Local Plan for the development of a care home plus 140 homes should be removed for the following reasons:

1. The area is Green Belt which must be protected because once you have built on the land it will be lost forever.
   1. It is a migration route for deer and they follow a path back and forward across the fields on a daily basis.
   3. Keens Lane is too narrow to support the extra traffic, it can be dangerous to drive down as it is.

1. The roads going into Guildford from this end of town are too narrow to support a bus lane and cannot support the extra traffic that the new homes would bring.
   3. These new homes would be too close to Whitmoor Common which is a Site of Special Scientific Interest,

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The fields by Keens Lane/Tangley Lane/Gravetts Lane in the Guildford Borough Council Draft Local Plan for the development of an OAP home plus 140 homes should be removed from the development plan because.

1. The area is Green Belt and must be kept for future generations.

1. We see deer move across these fields every day and they need their habitat route to be kept safe.

1. Bats live in the field to the left of our house.

   4. Keens Lane cannot support the extra cars, it is dangerous already.

1. The Aldershot Road is very dangerous already and has too many serious accidents as it is.

1. Traffic in Guildford is already a nightmare and cannot support the extra cars that will come with extra houses.

   7. Whitmoor Common is a Site of Special Scientific Interest, and needs to be protected along with the other common land around Worplesdon.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the Settlement Boundary, which has been imposed on East Clandon without any consultation. This imposition provides no protection to further development outside of the settlement boundary (Policy P2 para 4.3.25) and is deemed by me as being unnecessary in an already tightly developed ancient and rural conservation village with high archaeological merit. This proposal needs to be removed as it will endanger the openness of the Green Belt, the views in and out of the AONB (protection of the AONB Policy P1) and the character of our village.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy D4: I object to the insetting of villages (meaning in fact, removal of villages from Green Belt protections) and the fact that they will suffer from higher density development and the resulting increase in traffic, increased use of infrastructure which is already under pressure. I object in particular to the insetting of West Clandon, Send and the Horsleys. This will have a detrimental impact on Green Belt openness and the views in and out of the AONB in direct contravention of Policy P1 and P2.

Policy P2 – Green Belt: I object to this significant erosion of the Green Belt with the proposals for large towns being developed on Green Belt land thereby removing the openness of the Green Belt. I note in particular the huge developments proposed for the North East quadrant of the borough which will adversely affect our amenity, but also unfairly targets our tranquil rural villages because we can provide ‘dormitory’ facilities for commuters to London. The developments directly affecting our villages are the proposals for Wisley Airfield, Gosden Hill Farm, various farms and tracts in the Horsleys and Garlicks Arch at Send.

Further, on the erosion of Green Belt and I object that Policy P2 is not met where it states that Green Belt should be protected. I object to the disproportionate use of Green Belt land for housing – some 65% of the housing proposed is on Green Belt and with little consideration being given to redevelopment of brown field sites.

I object that GBC are contravening the NPPF framework stipulation in paragraph 87 with the proposed developments at Gosden Hill Farm, Ripley, East and West Horsley and Garlicks Arch, Send. Paragraph 87 states “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.” and GBC have not proven any special circumstance for developing on these Green Belt areas.

**I object** to building on the Green Belt because the essential characteristic of Green Belt is its openness and permanence (National Planning Policy Framework paragraph 79).

**I object** to all other strategic sites in the Local Plan, Blackwell Farm, 3 Farms Meadows, Garlick’s Arch, West Horsley and Hog’s Back. All are out of proportion to the surrounding area and none qualify for the exceptional circumstances required to take them out of the Green Belt.

**I object** to Policy S1 not offering sustainable development as regards roads and rail infrastructure which currently does not cope with demand, congestion on the A3 in particular, but also other A roads in the area such as the A247, the A246 and then there is the already overcrowded and slow train system for those currently living in the borough and needing to commute to London. No pre-emptive planning has been made to alleviate these real problems which will be much exacerbated by any large increases in housing.

I specifically want you to note the winding, narrow and dangerous route via the A247 through West Clandon which then drives people to use a short-cut the even narrower rural road, the Ripley Road, through East Clandon to and from the A3. This will be much exacerbated with the large increase in housing twinned with large increase in cars and travel.

Continuing with Policy S1 (Presumption in favour of Sustainable Development) **I object** that this is not being met and that GBC are contravening this when it is clear that no fixed plans are available to improve the provision of shops, medical facilities, schools in our immediate area (besides roads and rail already mentioned) to service us. If the GBC were serious about improving the infrastructure and sustainability of our communities, they would have secured plans and funding to ensure these facilities are available and not just at the behest and hoped-for goodwill from the developers. Further, how will developers be held accountable to their promises to build infrastructure. Stories are legion of developers reneging on commitments as the ‘money runs out’ even though vast profits will be made from turning agricultural and Green Belt land into highly valuable housing land.

In response to the Consultation, I **object** to the 2016 Draft Local Plan as a whole and in particular I object to the specific issues (listed below). I believe that this deeply flawed Local Plan will have a direct and detrimental effect on the amenity currently enjoyed by the residents of East Clandon and to the even greater detriment to our neighbouring villages of West Clandon, Ripley, West and East Horsley. It erodes the openness of the Green Belt and endangers the beauty and views in and out of the Surrey Hills AONB.

My specific points are:

I **object** to Policy S2 for the proposed provision of the very high overall housing numbers of 13,800 new homes (690 new dwellings being built every year for 20 years) and I **object** on two grounds; these housing numbers have been imposed on the borough with no real consultation being undertaken with the residents of East Clandon and the borough as a whole. Secondly, the housing numbers are based on a high-growth economic development plan which in itself has had no consultation with us and this combined with estimated demand from London residents will turn Guildford into a dormitory town for London.

Further, I **object** to the fact that no real economic or housing demand factors have been provided by the borough planners to substantiate the very high housing target of 13,800 new dwellings over the next 20 years. This is in direct contravention of the NPPF’s requirement for the planning authority to provide meaningful consultation.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 5: The examination

---

I object to the fact that GBC have not met the requirements of the NPPF Paragraph 155 which imposes an explicit obligation to have early and meaningful consultation. This has not been met in a number of areas by GBC. We have not had a meaningful consultation on imposing a settlement boundary on East Clandon, on the absence of meaningful economic and population growth figures for Guildford showing various scenarios with high, medium and low growth scenarios being offered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan. Why are the council failing to publish this report?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Ripley

...
I object to the Proposed Local Plan as the impact on village life will be disastrous and irreversible.

I object to the Proposed Local Plan because these major developments would have a severely detrimental affect on the life of the people who live and work in this area. The problems caused by increased traffic, both domestic and commercial, would cause major problems on local roads. The proposed four way on/off ramp on the A3 would not alleviate traffic, but simply enable developers to go ahead with their plans and, in the process create vastly more traffic. The proposed building of 2000 homes at Wisley, another 2000 at Gosden Hill, 400 at Garlick's arch would bring the total of building in this area to 4000 with the additional traffic created by the proposed industrial untis. The traffic implications are horrendous. The whole plan is simply ill-conceived.

I object to the Proposed Local Plan because the roads in the area affected by these plans are, in many cases narrow, single track and without pavements. I live in such a lane and my neighbour was, on one occasion, told by a passing police.

I object to the Proposed Local Plan because there is not the infrastructure to support building on this scale in such a small area. The local schools and doctors' surgeries would find it impossible to cope with the influx of people.

I object to the Proposed Local Plan because the pollution from such development would be detrimental to the health and well being of the communities of Send and Ripley. Asthma is already very common amongst young children with pollution levels being already higher than advised.

I object to the Proposed Local Plan as it necessitate taking much of the land around the villages out of greenbelt when the circumstances are not 'exceptional' as is required by law. The reasons for this appear simple – green belt is more cheaply acquired, but once taken out of green belt it suddenly becomes much more valuable. It may be cynical, but it appears that there are certain individuals, possibly with off shore accounts, who are likely to make a lot of money out of this unscrupulous deal. They are not the people who elected you – we are and, therefore you should represent our wishes, not theirs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5235  Respondent: 10910753 / Heather Thompson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object specifically, to the inclusion of the former Wisley airfield. If this proposal is adopted, and the plans put forward by the Cayman Islands based company go ahead, Guildford Borough Councillors will be responsible for the destruction of village life in this part of Surrey, in direct conflict with the promises that were made to the people who elected them as their representatives. The volume of traffic, pollution and the loss of important habitat will all be the blight that is created. The fact that this corner of the borough, on green belt land, should be sacrificed so that questionable housing targets should be met is a betrayal. Should the plans for this site, along with Garlick's Arch go ahead, there will be 2,500 new houses in the area.

I object because I was one of many who attended the council meeting on 8th April 2016 in which the Planning Committee unanimously rejected the application put forward by Wisley Property Investments Ltd. It seems astonishing, therefore, that after serious concerns have been raised by a broad number of, sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency, this site is still considered to be suitable for inclusion in the Local Plan.

I object because the proposed building on this site would result in this part of Surrey becoming part of the urban sprawl from London. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to building on the scale proposed for this site as the impact on our road systems will be catastrophic. Many of the roads in the area are narrow, some only single lane. In addition to this, there are no pavements. The prospect of having an additional 4,000 cars using these roads each day is not to be countenanced.

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation and prove detrimental to the health of local residents.

I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

I object to the draft Local Plan because when certain councillors put forward their objections at the council meeting on 24th May 2016 they were told by the leader of the council, Councillor Spooner, that if the site was not accepted for inclusion in the plan it would mean that they would be responsible for other villages having to bear the brunt of such development. I fail to see the legitimacy of this argument. It also appeared that councillors were being warned to accept this draft plan or the villages they represented would be back in the frame. Is this the premise upon which the plan should be built?
I object to the draft Local Plan because considering this from an entirely cynical point of view, it may appear that the vast sums of money that would be involved should this plan ahead, have tipped the scales of justice. Certainly, those behind WPI have no real interest in the needs of people in the borough and have seen the profits to be made when purchasing green belt land cheaply and then attempting to have its status overturned so that they can sell that land, with outline planning permission, at a vast profit. I doubt that these people live in the area and, by their actions, show they have no love of the area, unlike those of us who live here. The voters of this borough elected its council representatives on the promise that they would protect the green belt. If they adopt this proposal, they will have reneged on this promise and, in doing so, failed their electorate.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect in order to save the countryside for the generations which follow.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/5990  Respondent: 10910753 / Heather Thompson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. E.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved. Ripley High Street and Send Road are already very busy roads which are, at times dangerous to cross. If the Local Plan is adopted in its present form, the potential increase in traffic will also be accompanied by an unacceptable rise in air pollution. This is already excessive in this area with pollution from the A3 and M25.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Proposed Local Plan because Send Road is already a highly congested and crossing from one side to the other is hazardous. I know this first hand as my mother lived on one side of the road and was too nervous to cross to the other side to use the local shop. Similarly, some years age her elderly neighbour was knocked down and killed on this same stretch of road. Send is a small village, not a major conurbation. The traffic through Ripley would, similarly, destroy the village, if the proposed 2,500 houses and industrial units suddenly be incorporated in to the village.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<td>I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy. These sites have been targeted by developers who ho have no interest in the area. They are simply looking to make massive profits by buying green belt land at for a modest sum and selling it for a massive profit once its green belt status has been withdraw. Is this why the existing brownfield site at Burnt Common has been shelved and Garlick's Arch has been substituted at the last minute? The Plan should develop the this existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).</td>

The Plan does not take adequate account of flood risk as required by National Planning Policy. The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially Ripley, Send and Clandon. The local communities don’t need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Plan has nothing to improve the infrastructure for Garlick’s Arch.

The development should be in urban areas where there is sustainable transport.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

GBC’s proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey.

The Plan is unbalanced across the borough; there’s too much development in the north east of the borough (Wisley [A35], Ripley/Send [A43] and Clandon [A25]). 36% of all the Plan’s new housing is proposed in this area, which has only 11% of the existing housing. It seems that these villages are to be sacrificed so that the council can fulfil its questionable target.

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages. This sort of development is in direct contradiction to government policy.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
I object to removal of Brownfield site (A34) from the Plan
Site A44 in Broadford Business Park has also been removed. This is another brownfield site that has already been developed. The Council’s claims to “have adopted a ‘brownfield first’ approach” (page 5) but this is clearly not the case, and is contrary to national guidelines.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Once again, I find that I must object to the Guildford Borough Councils inclusion of Three Farms Meadows in the 2017 Local Plan. As someone who attended the council meeting in which all proposed plans to develop this site were unanimously rejected for very good reasons, I find it hard to understand how it can still be included in this draft. As a resident of Ripley I know that if this development goes ahead, the very nature of this corner of the borough will be destroyed. I will render it nothing more than a suburb of London. The council seems to have no qualms about destroying the green belt which, by it's very nature, is designed to ensure that the urban sprawl is not allowed to simply go unchecked. This, along with other planned developments in Send and Clandon will result in the end of village life here. The villages will simply merge into a new town.

I have attended meetings and seen projected plans for the development of this area and believe that there is a cynical use of green belt land which can be bought cheaply but, once planning has been granted, can then be sold on for a premium. There are those who seek only to make a large profit. The real needs and wishes of the communities involved are simply ignored. Green belt is being exploited in preference to genuine brown field sites for this reason. Those who stand to make vast amounts from this site are registered in the Cayman Islands. They are not paying UK tax and have no interest in
improving the lives of those of us who live in the borough.

My reasons for objecting to Policy A35, Three Farms Meadows, in the draft 2017 Local Plan are as follows:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congestion junction in the country (J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   ○ The associated traffic increase from the RHS has not been taken into account.
   ○ The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
12. Opportunity (3) should be common to all sites and is not unique to this site
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
16. I object to the removal of additional 3.1 ha from the green belt without any justification
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a Regulation 19 consultation when the changes are major.
23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
25. I object to the extension of the plan period by 1 year as it has not been identified as a major change
26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

It is for these reasons, therefore, that I believe that this plan is not fit for purpose and I now await Guildford Borough Council's response to my objections.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Once again, I find that I must object to the Guildford Borough Council's inclusion of Three Farms Meadows in the 2017 Local Plan. As someone who attended the council meeting in which all proposed plans to develop this site were unanimously rejected for very good reasons, I find it hard to understand how it can still be included in this draft. As a resident of Ripley I know that if this site remains in the plan and is developed in the way that has been suggested by the owners of the land, the very nature of this corner of the borough will be destroyed. I will render it nothing more than a suburb of London. The council seems to have no qualms about destroying the green belt which, by it's very nature, is designed to ensure that the urban sprawl is not allowed to simply go unchecked. This, along with other planned developments in Send and Clandon will result in the end of village life here. The villages will simply merge into a new town.

I have seen projected plans for the development of this area and believe that there is a cynical use of green belt land which can be bought cheaply but, once planning has been granted, can then be sold on for a premium. There are those who seek only to make a large profit. The real needs and wishes of the communities involved are simply ignored. Green belt is being exploited in preference to genuine brown field sites for this reason. Those who stand to make vast amounts from this site are registered in the Cayman Islands. They are not paying UK tax and have no interest in improving the lives of those of us who live in the borough. This seems to be happening on a national scale and is a disgrace.

My reasons for objecting to Policy A35, Three Farms Meadows, in the draft 2017 Local Plan are as follows:
I object to the inclusion of this site in the 2017 Local Plan because it will be adjacent to the most congested stretch of roads in the country, junction 10 of the M25. In addition to this, the neighbouring roads, many of which are little more than country lanes, which already carry a high volume of traffic, will be negatively impacted. Living in a narrow lane, which is already a rat run, I know only too well of the impact development here would have. When the increased traffic that is projected due to increased visitor numbers to RHS Wisley is added to this the result can only cause misery for those living here.

I object to the inclusion of this site in the 2017 Local Plan because alongside the very significant increase in traffic movements, there will be a very significant increase in air pollution. The quality of our air as a result of the heavy traffic on the M25 and A3 already fails to meet statutory limits. The increase in asthma, particularly amongst children in the area, is disturbing. As a child brought up here, I can attest that when I was a child asthma was unusual, not the norm as it has almost become today.

I object to the inclusion of this site in the 2017 Local Plan because the access to the train network from this site is highly problematic. The roads surrounding the development are little more than country lanes and the suggested solution, that commuters could walk or cycle to the nearest railway station, is ridiculous. To suggest a bus service to Horsley again is not viable. The prospect of walkers, cyclists and buses using these narrow roads is completely unrealistic.

I object to the inclusion of this site in the 2017 Local Plan because the increase in area is on the south of the site and faces the Surrey Hills ANOB. The projected building on this area, in places several storeys high, would be a true blot on the landscape of this protected area. The removal of a further 3.1 hectares of green belt land is totally unjustified and unnecessary.

I object to the inclusion of this site in the 2017 Local Plan because one of the major issues is the provision for dealing with the large amount of sewage that such a site will generate. This will prohibit the plan from contributing to the five year housing projection.

I object to the inclusion of this site in the 2017 Local Plan because the housing number and the fact that the council has not used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA.

I object to the inclusion of policy S2 in the 2017 Local Plan because it states that the figures in the Annual Housing Target Table add up to 12,426, when, in fact, they add up to 9,810. There seems no account taken of the missing 2,616. This anomaly suggests that the figures are not to be trusted.

I object to the inclusion of this site in the 2017 Local Plan because the council has failed totally to take into account all of the objections raised by those they purport to represent. This is to disregard the fact that they are our democratically elected representatives and have a responsibility to act upon the wishes of the electorate. The promise by those on the council when elected was to protect the green belt. This promise is being flagrantly broken.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
**I object to removal of Brownfield sites (A4) from the Plan**

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

**I object to the increase in housing proposed in Tannery Lane (site A42)**

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states “Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

---

**I object to the extended development in the Green Belt (Policy P2, Site A43)**

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

**I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch**

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this
development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch
The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch
GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were
a) The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, … (site allocation A25) [ than the Burnt Common site did ]”
b) The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”
Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2441  Respondent: 10910753 / Heather Thompson  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A46
I object to the unfair imbalance of the Plan across the borough.
With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2440  Respondent: 10910753 / Heather Thompson  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A50

The Plan is self-inconsistent in respect of traveller sites.
A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots …” Clearly A50 more than covers the total “need” of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the proposal for a Waste Management Facility in Green Belt (A58)
The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object the change in policy on affordable homes (Policy 4.2.23)
The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.
The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses]. That has now been removed, thereby accepting that needing to make greater than normal profit IS to be an acceptable reason not to deliver affordable homes. This is a shocking sop to the developers.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the lack of proper infrastructure planning for sites (A43 and A42).
The Foreword to the plan by Paul Spooner includes on page 5:
"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

The most distressing element of this plan is that such a large proportion of the overall proposed development is being targeted on this small part of the borough. It is simply disproportionate and there is little understanding being shown by those elected to represent our views. I trust, therefore, that these objections will be given your full attention and that the Plan is amended accordingly.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object removing Send Business Park from the Green Belt (4.3.15).
Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Key Evidence document ‘Guildford Borough Economic Strategy 2013-2031’ makes no case for locating large numbers of homes in West and East Horsley or neighbouring villages. Proposed new economic development site proposals are on the opposite side of the Borough to West Horsley: Presumption in favour of Sustainable Development (Policy S1), Borough Wide Strategy (Policy S2), Homes for all & Affordable Homes (Policies H1, H2).

Answer (if comment is on questions 1-7 of the questionnaire): ()

People using East Horsley’s shops and its Public Library in 2016 experience more and more difficulty in parking their cars at most times of the day. The proposed large increase in population of West and East Horsley will make parking and movement into and through the village considerably more difficult and time consuming.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposed expansion of West Horsley village is unsustainable. With only one small shop, no post office, a very limited weekdays only bus service through the village, it is clearly unsustainable for the proposed high volumes of new housing development. The development of 385 homes on the four proposed sites are at much higher densities than currently exist in the village settlement and will be totally out of character with the existing mix of different housing styles and layout of the village. The homes building proposals are unsustainable in terms of schooling, drainage, roads capacity, shops, parking in East Horsley (shops and station) and public transport.

The need for so many houses to be built in West Horsley over the first 5 years of the Plan period 2018 to 2033 is totally unproven. The West Horsley Parish Council and Surrey Community Action Housing Survey: May 2014, identified a limited need for some 20 affordable homes for local people who want to remain in the village, i.e. for young people and for elderly people who wish downsize to a smaller home.
There is a continuing lack of state primary school places in the village. The Raleigh School which serves both East and West Horsley is full every year and this has been the situation for many years. Secondary school places are also limited in number at the Howard of Effingham School and other secondary schools involve greater travel times and further distances. Glenesk and Cranmore private schools are well supported by many families living in Guildford and other villages up to 14 miles away. Each of these private schools during term time, receives high volumes of traffic going to and from the schools at the beginning and end of the school day, on Ockham Road North and the A246, respectively, already causing congestion.

Kingston Avenue Medical Centre, serving all of East and West Horsley and areas beyond, is always extremely busy and residents experience difficulty in making appointments. The planned population increase (in excess of Government ONS forecasts) for the Borough will require a major extension of the Royal Surrey Hospital to cope.

Whilst Horsley station has frequent trains to London and Guildford 7 days a week, the station car park is normally full on weekdays. An increase in village population will increase pressure on station parking and traffic movements to and from Horsley station to drop off and collect travellers to London and school children going to Guildford and Leatherhead.

The increased level of traffic from the proposed new housing estates will be considerable. Most households in rural areas as a necessity have 2 cars, many having 3. Journey times on local roads will increase significantly.

There are known sewage overflow problems in the Ockham Road North/Green Lane area. Thames Water has advised Guildford Borough that the area’s wastewater network is unlikely to be able to support the demand anticipated from all the proposed developments. The foul drainage system from West Horsley to the treatment works north of Ripley, will need to be upgraded to cope. Thames Water advise ‘a 2 to 3 years lead-in period’ to install the necessary waste water network and treatment capacity after planning permission for a development is granted.

It is for these reasons that I strongly object to the GBC Local Plan.

**Comment ID:** PSLPP16/17854  **Respondent:** 10910785 / Clare Curtis  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

The first line of Policy P2 states, ‘We will continue to protect the Metropolitan Green Belt against inappropriate development.’ I am totally opposed to the village's removal from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries. No exceptional circumstances or other justification is made for the new Green Belt boundaries that will result from the proposed insetting of the two parts of the village from the Metropolitan Green Belt. I believe the Green Belt & Countryside Study is flawed. West Horsley's defined Settlement Area boundaries (ref 2003 Local Plan) DO NOT need to be extended. West Horsley Parish is one of a rich and varied mix of well-established low housing density settlements with a considerable number of historic buildings. Positioned on the north side of the North Downs, partly in the Surrey Hills an area of outstanding natural beauty, it attracts a considerable number of recreational visitors (walkers and cyclists) through the seasons each year.

I object to this 'strategic site' proposal as I believe it would completely destroy our community. It will be an increase of 175% in the population of Normandy over the plan period. It will cause untold misery on our already full to capacity roads. This is a green belt site that is red sensitivity. Removing its green belt status and building 1,100 homes cannot be justified when these fields are within 3 kilometres of the Thames Basin Heaths special protection area. There need to be exceptional circumstances proven to remove land's green belt status. An up to 8 form entry secondary school is neither needed or 'exceptional circumstances'. The local plan states that 'Secondary educational need will be re-assessed at planning application stage' but if the houses have been built and there is no need found for a secondary school it will already be too late, the green belt will have been removed and the fields tarmacked and concreted over. Where will all the water that pours onto the Hogs back and Ash ranges go then, with no fields to soak it up? Glaziers Lane floods regularly as does Wanborough station without the addition of all that is proposed. There is no need for a secondary school as the two closest schools are undersubscribed and the building of houses cannot be used as a reason for a new school because the school is being used as an enabler for the building of the houses on green belt.

There is an inconsistency in putting Normandy and Flexford together when assessing sustainability yet regarding them as separate when assessing sensitivity. It means that the fields between the two settlements that contribute so much to the openness of the green belt, can be ignored.

The two lanes that border the site are at present brought to a standstill if there is a problem on the A31 or A3. The extra traffic that will be generated by an extra 1,100 homes and a secondary school will impact on every resident’s lives, causing chaos on the roads.

A Showmans site is proposed, and I would like to know how it is envisaged to move the large equipment that will be stored on a Showmans site, when there is a low bridge on Westwood Lane and a small humpbacked bridge on Glaziers Lane, just past where pedestrians walking north have to cross from one side of the lane to the other with no view of oncoming traffic.

This is a developer led proposal that Normandy residents have not had an opportunity to comment on until this late stage because this site did not appear in the 2014 version of the Draft Local Plan, so we were unable to make our needs and views known.

The impact this proposal will have on wildlife is enormous. The Skylarks, Barn owls, Little owls, Cuckoos and other birds will lose their habitat. The Glow worms, Adders, Grass snakes and Slow worms will also. The light pollution from a development of this size will impact on our night skies, and the pets associated with these homes will also have a detrimental effect on the wildlife. All this so close to the Thames Basin Heaths Special Protection Area. A SANG is a public relations exercise and in no way makes up for what Normandy is losing.

Economic growth may not be the goal of Normandy residents, their goal may be to live in a rural environment within the Green belt.

I object to the proposed A46 Normandy Flexford strategic site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A47

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to policy A47. This land should not be built on. It floods over about half of it for nearly six months of the year. This maybe why it's designated as an SNCI and a Water Vole Alert Area. Buffer strips along the edge of the stream are hardly going to mitigate the impact of building 50 homes on this site. There is also a public footpath which will need to be maintained therefore causing more disruption to the wildlife.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I still object to the proposals for site A26 Blackwell Farm as a whole despite the small reduction in house numbers. This site should never be developed. It is an integral part of the beauty and special landscape around the Hogs Back. There has already been too much encroachment onto this area, and any further development should take place within the parts already built up. There is plenty of scope for the University to make greater use of the land already occupied eg building above and below car parks etc. The land is actively farmed and is also extremely well used by local families and individuals for walking, running, cycling, horse riding, bird watching, observing flora and fauna, etc, and elimination of this lovely open space will send more people to the Thames Basin Special Protection Area. The infrastructure changes that would be required for a development of this scale, in particular the roads and junctions, would add further destruction to the AONB, AGLV and Green Belt. I also specifically object to the new proposal for a huge secondary school on this site. The evidence collected and submitted last summer showed that that there is absolutely no need for an additional secondary school in the area. The neighbouring secondary schools are currently under-subscribed.

Comment ID: pslp171/1968  Respondent: 10911201 / Claire Walker  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I welcome the clearer wording regarding timing, phasing and application of planning conditions and obligations. It is imperative that no developments should be approved without clear, acceptable and funded plans in place to provide adequate and effective infrastructure of all types and that even where approval has been given, development must follow provision of infrastructure and not proceed without such infrastructure.

There is concern about the inability of current infrastructure to meet current and future needs. The policy recognises that the “Infrastructure provider” will maintain infrastructure in most cases, and developers can only offer a contribution via Community Infrastructure Levy. Until the current infrastructure can meet existing needs adequately, further development should be very targeted to meet only absolute essentials.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1966  Respondent: 10911201 / Claire Walker  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I still object to Policy P2 as redrafted since it still does not address a very large proportion of the thousands of objections made to the previous version. I particularly object to the reference in paragraph 1 to the Policies Map: the words “as shown designated on the Policies Map” must be deleted if this paragraph is to be of any use at all. I object to the proposals that the settlements of Normandy, Flexford and Walden Cottages, and the traveller sites to the rear of Palm House Nurseries (A49) and Whittles Drive (A50), should be inset from the Green Belt. These are all areas and sites contributing to the openness of the Green Belt and also contributing to the views to and from the Hogs Back AONB. I also object to the insetting of other villages from the Green Belt and “infilling” of others and wholesale extension of settlement boundaries across the Borough. Such changes ignore the importance of a permanent Green Belt preventing urban sprawl and providing a “green lung” which should be protected, with any individual changes being subjected to rigorous scrutiny and being dependent on clear demonstration of exceptional circumstances justifying any over-riding of the Green Belt provisions. I would also point out that para 4.3.13 is incorrect and misleading in saying that a long list of villages are now inset from the Green Belt – this simply refers to GBC’s proposal last summer, to which there have been huge objections from residents and which we hope will be rejected through the Local Plan process.

Exceptional circumstances must be demonstrated in order to develop Greenbelt yet despite the weight of public opinion against weakening of this policy, 70% of new housing development will be in the countryside, of which, 58% will be in Greenbelt. By definition, this is not an exception and no attempt is made to demonstrate exceptional circumstances, in line with the requirements of the NPPF. Insetting villages is of concern since restrictions within the settlement boundary raises concerns over loss of character. The Rural Economic Strategy covered in 4.51a, promoting affordable homes everywhere in the countryside including the AONB as a main aim, is a mechanism for promoting overdevelopment in our countryside. It has not been subject to full public consultation and is based on data, which is not up-to-date.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. The inclusion of 2100 homes on this site would present an unbearable strain on the existing infrastructure and completely alter the nature of the surrounding villages.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans. I doubt that any of these homes will be truly affordable to local residents and will lead to a further influx from surrounding areas and thus not meet the requirements of the local population.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars. At present cyclists are already endangered by the number and speed of cars passing through the area and this will do nothing to improve the situation.
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads which are already congested. At present the roads are in a terrible state with numerous pot holes and the council seems to do little to maintain them.
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3
junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity. In addition the council seems to show no support for measures to reduce traffic on the roads such as the provision of school buses which were once in place but have now been terminated.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
4. Local roads are at capacity particularly when the A3 is not free-flowing (accidents, diversions, roadworks etc).
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded A3 and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000 per annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. It remains unclear when/if the Ockham DVOR/DME beacon will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
10. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
11. I object to the fact that the increased area, being on the south of the site facing the North Down AONB will adversely impact the views from the AONB.
12. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
13. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
14. I object to para 22 as this does not reflect the impact of the buildings on the surrounding rural area.
15. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objections from local residents and statutory consultees.
16. I object to the Proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
17. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
18. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
19. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
20. I object to the transport evidence base which has been criticised for using out of date modelling software and is therefore unreliable.
21. I object to the housing number which I believe is unsound.

I consider for the reasons listed above and other reasons, that this plan is unsound and not fit for purpose.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**
I continue to object to the inclusion of Policy A35, Three Farms Meadows, in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site in this plan because of the constraints on the site and the physical location.
2. It is too far from railway stations.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one of the most congested junctions in the country (J10)
4. Local roads are at capacity particularly when the A3 is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded A3 and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000 per annum.
   ◦ The associated traffic increase from the RHS has not been taken into account.
   ◦ The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. It remains unclear when/if the Ockham DVOR/DME beacon will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
10. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
11. I object to the fact that the increased area, being on the south of the site facing the North Down AONB will adversely impact the views from the AONB.
12. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
13. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
14. I object to para 22 as this does not reflect the impact of the buildings on the surrounding rural area.
15. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objections from local residents and statutory consultees.
16. I object to the Proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A Regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
17. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
18. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
19. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
20. I object to the transport evidence base which has been criticised for using out of date modelling software and is therefore unreliable.
21. I object to the housing number which I believe is unsound.

I consider for the reasons listed above and other reasons, that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the latest SHMA report, which says that 693 homes a year are required by the borough, this is more than double the 322 figure used in previous plans.

The Council will not publish the SHMA report, this figure cannot therefore be verified. This lack of transparency is not right for consultation on the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is in the Green Belt. There are no special circumstances for its removal from the Green. The Government itself state clearly that housing need is not an exceptional circumstance.

The Plan clearly states that the preference for building new houses is on previously developed land, yet the GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43) - there is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that. The rural roads in this area are narrow, in poor condition and have no footpaths. The Plan will make the roads dangerous and accidents will become common place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object to the lack of proper infrastructure planning for sites (Policy I1)

The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity. There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

9. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

With the proposed building of 5000 homes in the local area the 14,000 throughout the Guildford area the A3 and M25 would have to be improved before any development can be even considered.

Highways England has no plans to even start considering improving the A3 before 2020.

Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not even be contemplated.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

7. I object to development in areas which are at risk of flooding (Policy P4)

The Plan does not take adequate account of flood risk as required by National Planning Policy.

The site at Garlick’s Arch (A43) is classified by the Environment Agency as a Zone3 flood risk which is higher risk than the Council’s own assessment!!
This area has flooded many times in recent years and in fact in the recent heavy rain in June the land stream over flow and the land flooded for 3 days, (photographic evidence available) therefore the Council’s assessment is inadequate and should not to be included in the plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable. I set out below my objection to specific policies and matters within the Plan.

1. I object to the Local Plan as the development proposed is not sustainable (Policy S1)

The development of nearly 14,000 new houses proposed in the plan is unsustainable; it will create a detrimental impact by over developing the local communities, especially Ripley, Send and West Clandon. Wisley Airfield (A35) and Garlick’s Arch (A43) and Gosden Hill have no railway stations within easy walking distance and inadequate bus services, leaving no alternative for the 5000 new residence to travel by car. The Plan has nothing to improve the infrastructure for Garlick’s Arch.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Local Plan as the development proposed is not sustainable (Policy S1)

The 13,860 proposed houses are not sustainable and will damage the villages of Clandon, Send & Ripley by over development. The houses are not necessary or needed in local communities. Wisley Airfield (A35) and Garlick's Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Plan has not made the necessary improvements to infrastructure for Garlick's Arch - thus the local roads will become even more congested & will not be fit for purpose - this is not a sustainable option for modern development. The development should be in urban areas where there is sustainable transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated...
between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of
the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the
borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a
disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of
these communities.

**I object to the Borough Wide Strategy (Policy S2)**

GBC’s proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the
other Borough Councils in Surrey.

The Plan is unbalanced across the borough; there’s too much development in the north east of the borough (Wisley [A35],
Ripley/Send [A43] and Clandon [A25]). 36% of all the Plan’s new housing is proposed in this area, which has only 11%
of the existing housing.

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging
urbanisation of identities the villages.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Objection to Guildford Borough Council Proposed Submission Local Plan

Although I live in Surbiton I drive every week to visit friends in the Borough

I OBJECT to the draft Submission Local Plan for the following reasons:

- I object to the proposal to take so much land out of the Green Belt; new housing should be put on the brownfield land in the urban areas of the
- I object to the proposed number of houses; it seems too
- I object to the proposal to remove the Former Wisley Airfield from the Green Belt; it separates Ripley from
- I object to the urban 2,000 house development being placed in the historic rural village of 159 homes in
- I object to more development which would have an impact on transport, local roads and road The narrow rural roads in Ockham and the surrounding area cannot cope with the extra traffic, which would increase the already severe congestion on the A3.
- I object to the continued inclusion of this site A35 where a recent planning application has already been unanimously rejected by the Planning

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Please confirm that all of these comments together with all my previous comments are passed to the Inspector.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including the following:

1. I object to the disregard for the impact on the Thames Basin Heaths SPA, particularly the damage caused by nitrogen deposition and high pollution levels.
2. I object to the inclusion of Site A35 as it will not contribute to the 5-year housing projection due to many constraints including the provision of a new sewerage facility.
3. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
4. The changes to the plan can only be made if the previous plan was ‘unsound’ and the changes should explain how they will make the plan sound. I object to the absence of proper procedure, leaving an unsound plan not capable of being accepted.
5. I object to the fact that the council has failed to remove this site from the local plan despite receiving over 50,000 objections from local residents and statutory consultees.
6. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
7. I object to the removal of additional 3.1 ha to be removed from the green belt without any justification
8. I object to the fact that the increased area, being on the south of the site facing the North Down AONB will increase the negative impact of the views from the AONB.
9. Opportunity (3) should be common to all sites and is not unique to this site
10. It remains unclear when and if the Ockham DVOR/DME beacon will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

11. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.

12. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

13. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

14. It is further from railway stations than any other identified strategic site

15. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The Plan has not taken into account the associated daily traffic increase to and from the RHS as well as for the regular events at the RHS which attract 1000’s more visitors several times a year.

16. It is the least sustainable strategic site identified in this version and in previous versions of the plan because of the constraints on the site and the physical location.

17. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station

18. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

19. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

20. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station

21. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate despite talking of “good urban design”

22. I object to the increased area of the site as this now abuts and overlooks the Ockham Conservation Area.

23. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

24. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact

25. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

26. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

27. I object to the Council wasting tax payers and residents’ time and money not following due process and in particular ignoring previous representations.

28. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

29. I object to the Housing number which is unsound and open to legal challenge.

30. I object to Policy S2 where it states: “4.1.9a The figures set out in the Annual Housing Target table sum to a total of 12,426 homes.” Yet the figures in the table add up to 9,810. The difference of over 20% demonstrates the lack of understanding of the housing requirements of the Borough. It is also an example of why the Plan is not sound.

For the reasons listed above and numerous other reasons I consider that the plan is unsound and not fit for purpose.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** PSLPS16/4240  **Respondent:** 10911617 / Peter P. Earle  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Objections to Guildford Borough Council (GBC) Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM)

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brown field land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths, the lack of pedestrian footpaths and the space to provide either, together with the pitiful state of the existing highways, which are currently dangerous for cyclists
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and demand for car parking at each station is already at capacity.
- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
• I object to the fact that air quality concerns have not been taken seriously. Air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2341  Respondent: 10911617 / Peter P. Earle  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for a number of reasons including:

1. This is the least sustainable site identified in both the current and previous versions of the Local Plan because of the site constraints and location.
2. This site is further from railway stations than any other identified strategic site.
3. The site is adjacent to the most congested stretch of strategic road network (SRN) in the county and close to one of the most congested junction in the country (M25 -J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (in peak times and also due to accidents, diversions, roadworks etc)
5. Suggested public transport initiatives including bus services to and from Guildford will exacerbate the already over crowded road network leading to unreliability and delay, which in turn will make local residents choose individual modes of transport resulting in further congestion.
6. Public transport bus services to Horsley will reduce the safety of the local road network as lanes are narrow and this will increase danger to cyclists and walkers which should be encouraged as eco friendly alternatives. The area is greatly used by cyclists at all times throughout the year who seek to follow the 2012 Olympic cycle route and train for the annual Ride London –Surrey 100 cycle event. The current plan will add to traffic flows and endanger cyclists and walkers lives.
7. The proposed site is adjacent to the Royal Horticultural Society gardens, which is one of the most visited destinations in the south-east of the country. I understand that expansion plans the RHS have will significantly increase the number of visitors to Wisley. From reading the plan, the resultant traffic increase from the RHS has not been considered. Furthermore, there are regular events at the RHS which attract 1,000’s of additional visitors and again the impact of this increase in traffic does not appear to have been taken into consideration.

8. Once completed, there will be minimal employment opportunities on the developed site as a result of which, the majority of new residents will travel to work. The majority of these are likely to use motor cars (probably with only a driver) and this will add significant volumes of traffic to the already over crowded local narrow lanes.

9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”.

12. Opportunity (3) should be common to all sites and is not unique to this site.

13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.

14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).

16. I object to the removal of additional 3.1 ha from the green belt without any justification.

17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.

26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.
35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

Please note that I reserve my right to attend the inquiry and personally present evidence.

As a further over arching comment on local and government policy, I do not understand why more emphasis is not being given to long term investment in developing other parts of the UK. It is evident that the South East and the London conurbation in particular is over crowded. The answer is not to destroy the green belt but to encourage a shift in population to other areas which have been neglected by successive governments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford Borough Council Proposed Submission Local Plan: Letter of Objection

Although I live outside the borough I keep my horse at stables in the borough and regularly drive to the borough to ride my horse out over the Bridleways on the Former Wisley Airfield and local areas.

I write to OBJECT to the draft Submission Local Plan and the inclusion in the Plan as a potential site for development of the Former Wisley Airfield for the following reasons:

• I object to a plan with 70% of new housing in the Green There is ample brownfield land in the urban areas of the Borough. The Green Belt should be preserved for future generations as was reflected in election promises to preserve the Green Belt.
• I object to the housing number of 693 houses per year which is far too It is the result of hidden calculations and has not been justified.
• I object to the proposal to remove the Former Wisley Airfield (FWA) and neighbouring land from the Green There are no exceptional circumstances to warrant removing the land from the Green Belt
• I object to this urban 2,068 house development being placed in the historic rural village of 100 or so homes in
• I object to the impact on transport, local roads and road The proposed development would result in around 4,000 additional cars on the roads. This will increase the danger from traffic to horse riders, cyclists and pedestrians on the narrow rural roads in Ockham and the surrounding area. It will increase in the already very bad congestion on the A3 and M25.
• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, particularly the Thames Basin Heath Special Protection Area (SPA) and the Sites of Special Scientific Interest (SSSI) and Special Nature Conservation Interest (SNCI). I enjoy on the airfield the song of the skylarks, which are an endangered species, and which will be threatened by the development
• I object to the threatened loss of high quality farmland, currently covered by the fast growing maize crop.
Please remove the Former Wisley Airfield, site A35, from the Submission Local Plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the inclusion of policy A43 of 7000sq m of industrial warehousing as the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft. Slyfield Industrial Estate still has spare capacity and could accommodate any additional warehousing need if required.

2. I object to the number of 693 new houses proposed in the Local Plan for each year. The numbers calculated in accordance with the SHMA do not reflect true local need and have been inflated by the way students, economic need and affordability have been calculated.

Comment ID: PSLPS16/6685  Respondent: 10912513 / Sarah Green  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the inclusion of land at Garlick’s Arch, Burnt Common and the proposed 400 houses and 7000 sq m of industrial warehousing on that site (Policy 43). Policy A43 and A43A were included at the last minute. They were not in the Regulation 18 draft and had not been consulted upon prior to the inclusion 2016 Local Plan
2. I object to the unsustainable nature of the site at Garlick’s Arch (Policy 43).
3. I object to the impact of Policy A43 on ancient woodland on that site, on noise pollution and air pollution levels. The site is also prone to flooding.
4. I object to the impact of Policy A43 and A43A on local infrastructure. Congestion levels on A247 are already increasing at an alarming rate and will be further exacerbated by the development of Garlick’s Arch as the residents will have to rely on the use of private cars.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7200  Respondent: 10912513 / Sarah Green  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of land at Garlick’s Arch, Burnt Common and the proposed 400 houses and 7000 sq m of industrial warehousing on that site (Policy 43). Policy A43 and A43A were included at the last minute. They were not in the Regulation 18 draft and had not been consulted upon prior to the inclusion 2016 Local Plan.

1. I object to the unsustainable nature of the site at Garlick’s Arch (Policy 43). I object to the impact on residents that the resulting noise pollution of Policy A43A will have.
I object to the impact of Policy A43 on ancient woodland on that site, on noise pollution and air pollution levels. The site is also prone to flooding.

I object to the inclusion of policy A43 of 7000sq m of industrial warehousing as the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft. Slyfield Industrial Estate still has spare capacity and could accommodate any additional warehousing need if required.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6684  Respondent: 10912513 / Sarah Green  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the creation of a new 4 way interchange onto the A3 on the A247 (Policy A43A) as this would add to the ever increasing levels of traffic on the A247, A3 and through Send and Clandon. Send would become a through route to and from the A3 and will become gridlocked all day.
2. I object to the impact that Policy A43A will have on the air quality for those living in the surrounding areas and for future generations.
3. I object to the impact on residents that the resulting noise pollution of Policy A43A will have.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to changes relating to policy A43 Garlick’s Arch because:

- Again you have ignored the thousands of previous objections.
- There are no “exceptional circumstances” required to develop on this Green belt.
- It will generate excessive traffic along the Clandon Road with associated noise and light pollution. This will be made even worse if the adjoining Policy A58 is implemented.
- It would appear that there is no demand for Travelling Showpeople plots.

I object to changes relating to Policy A58 Burnt Common because
- This Policy was deleted from the 2014 Plan following previous objections.
- Additionally I see the Plan now references ‘Minimum’ rather than the original ‘Maximum’ referring to the 7,000 sq feet of industrial or warehousing. If the original proposal was deleted again I see no reason why the changed plan actually increases the proposed level of development.
- The impact on the Clandon Road and adjoining roads will create huge traffic issues, and noise and light pollution issues.
- There is no need to develop on this section of Green Belt land when other local sites including Slyfield and Guildford have empty existing sites and ‘brown field’ sites amiable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a resident of Clandon Road, Burnt Common, I find it incredible that GBC have failed to listen to the residents of Send and Burnt Common who previously in force have objected to the proposed Local Plan. Instead, it seems to have made further changes that result in more development rather than less, failing in the duty of GBC to listen to residents.

It seems that you are simply ‘testing’ the patience of residents by repeatedly making further changes without realising that your proposals are completely unacceptable. It is unjust that you are focussing a disproportionate level of development in and around the Burnt Common and Send compared with our areas of the Borough.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Dear Sirs

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and a further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M2S/A3 junction, is in excess of EU-permitted levels. Additional traffic will
exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY A36: Hotel, Guildford Road

Policy A36 proposes to re-develop the current Thatcher’s Hotel for housing. EHPC is concerned about the loss of this long-standing village hotel and significant employer. However, assuming that the employment loss can be justified, (which is a condition of Policy A36), and that full consideration of the safety implications of the development being sited on a dangerous corner of the A245, then a housing development at this location, providing it is done in a manner that is in keeping with its prominent landmark position at the entrance to the village, is acceptable.

The site is also close to the East Horsley Conservation Area and housing designs and site configuration must reflect the sensitivity of this setting. My principal concern is over the number of houses proposed for this site - approximately 48 dwellings. This number gives an implied gross housing density of 37 dwellings per hectare, which is exceptionally high for this location. The average housing density across the East Horsley Settlement Area is 8.1 dwellings per hectare and the highest density found in any of the roads around this location is 13 dwellings per hectare. Development at this location would only be acceptable if it has a significantly lower housing density.

POLICY A39: Land behind Ockham Road North, near Horsley railway station

Policy A39 proposes a housing development of some 100 dwellings on a 5.7 acre green-field Green Belt site behind the houses on the western side of Ockham Road North. Access is to be secured by demolishing the first two houses next to the railway bridge. As mentioned in an earlier comment, I consider that the proposed western movement of the settlement boundary needed to bring this site within the settlement area is unjustified and contrary to NPPF rules. If this boundary movement is invalid, as I believe, then this site remains a part of the Metropolitan Green Belt. As such and with no ‘very special circumstances’ to justify housing development upon it, I object to Policy A39.

POLICIES A37, A38, A40 & A41, located in West Horsley

The LAA identifies six sites in West Horsley for potential development, the four largest having allocation policies within the Proposed Submission Local Plan. The total housing number arising from these six sites is 405 homes in total. For a village which had 1,124 dwellings at the 2011 Census, this represents a proportional increase of 36% over the plan period, an enormously high proportion by any standards. The four policy sites are all located within the Green Belt. One is a partly brownfield development but the other three sites are all open fields used for agriculture and all lie within the current Green Belt at the edge of the Settlement Area. The reasons presented by the consultants, Pegasus, in the Green Belt & Countryside Study to justify these settlement boundary movements appear to be highly questionable and in no way to meet the requirements of the NPPF that such boundary movements are only to be made in ‘exceptional circumstances’. These movements clearly represent a deliberate pushing back of settlement boundaries in order to provide more greenfield sites for housing development. As such, I consider these proposed movements in settlement boundaries to be invalid. These proposals are also contrary to the principles of the Metropolitan Green belt. West Horsley represents one of the first ‘lines of defence’ against London urban encroachment outside of the M25 circle. Yet these policies will eliminate a significant part of this defence as they seek to expand the boundaries of this village and fill-in every bit of green space within this rural setting. It is also totally contrary to the opening statement of Local Plan Policy P2 that “We will continue to protect the Metropolitan Green Belt” It seems that in West and East Horsley at least the draft Local Plan is doing exactly the opposite. Given the scale of the development proposed in West Horsley, the inevitable destruction of its village character and the impact on infrastructure across West and East Horsley, I object to the site allocation policies A37, A38, A40 and A41.

POLICY A35: Land at former Wisley Airfield Policy

A35 proposes approximately 2,000 homes to be built on the site of the former Wisley Airfield. This will lead to the creation of the largest settlement in Guildford Borough outside of Guildford town. In effect it is proposing to create a New Town in the heart of the Surrey Green Belt. I have major concerns about this proposed development and have objected against prior planning applications at this location. I consider this proposed development to be a severe contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability which will have a major adverse impact on infrastructure across a widespread area, including East Horsley. Above all it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country. I strongly OBJECT to Policy A35.

I endorse the detailed submission of East Horsley Parish Council outlining their arguments against this policy, which has been supplied to GBC in a separate letter.

It is illogical that Effingham Junction Station should be denied the status of Public Transport Interchange.

Effingham Junction Station (EJS) is within the envelope of the village settlement and will remain as such under the draft Local Plan. It is not "isolated" or "away from the village centre." Effingham Junction (the area immediately south and west of EJS, served by respectively Forest Road south of the railway bridge and Old Lane) is a thriving community with a significant population and also a significant number of active and successful employment floorspaces and sites. These include in Forest Road a general store (Forest Road General Store), a car sales and car repair business (PJB Car Sales/The Body Shop), a dental health centre and chiropractic clinic (Mortiboys) and on Horsley Road, Cedar Garden Centre, Royce Turf and Irrigation and at the Newmarsh Farm site, a number of businesses including Richmonds Horse Transport, Braye Hydraulic Repairs and TTS Surfacing Ltd. It is therefore vital that the Local Plan's economy policies affecting the area protect these spaces and sites and create conditions for their sustainable growth and hence job creation. Since all or most of these businesses are located within 500 meters of EJS, Policy E2 would be an invaluable driver for such growth which could play a major role in ensuring that Effingham Junction maintained and enhanced its position as East Horsley's "third centre" for homes and jobs. On the other hand, to exclude EJS from PTI status could very well stifle its sustainable development and condemn it to a future as a dormitory "backwater" of East Horsley. It is also counter-intuitive in the extreme to refuse EJS "PTI" status. This is for the simple reason that EJS is clearly a "public transport interchange" as that term would be normally understood. This is for the following reasons:
1. as the name "Effingham Junction" indicates, EJS is at an important junction and interchange. The railway line from Guildford splits here into two lines which take different routes into London, so many London-bound passengers will change trains here;
2. EJS serves not only the Effingham Junction area, but also the many residents of Effingham and Little Bookham for whom EJS is far closer than Bookham Station;
3. EJS also serves the many residents of the Cobham area for whom EJS is far closer than Cobham and Stoke d'Abernon station EJS also serves the residents of Ockham and Ripley;
4. EJS also serves the considerable numbers who visit local leisure activity sites, including three paintball sites and two clay pigeon shooting sites, for whom EJS is the only viable public transport hub; and
5. EJS will be the nearest railway station to the land at the former Wisley Airfield site which is proposed for the building of 2000 homes under Policy A35 of the draft Local Plan and if, despite the objections of many including East Horsley Parish Council, this proceeds, then significant numbers of residents will be taking one form of travel to EJS and then interchanging onto the railway.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The detailed infrastructure proposals for Guildford Borough give cause for concern. There are serious deficiencies and shortcomings in the infrastructure of Guildford Borough as it is today and the aggressive housing policy as proposed by GBC in the Proposed Submission Local Plan will exacerbate this problem.

I would make the following comments specifically about infrastructure in East Horsley today:

• Roads across the parish are in poor condition with many potholes. Many roads are unable to sustain their current levels of traffic, particularly the increasing levels of HGV traffic;

• The principal through roads traversing East Horsley are narrow and winding, have a series of pinch points, have sections without any pavements and are generally unlit. As a senior SCC councillor remarked at a recent public meeting in the village hall: “East Horsley has lanes, not roads.” East Horsley’s ‘lanes’ are totally unsuitable for high volumes of traffic, in particular for the volume of HGV’s now using them;

• Many of the drains are blocked or otherwise in poor condition giving rise to frequent surface water flooding when it rains;

• The pavements are in poor condition. As well as being narrow, they are often uneven and/or cracked making it difficult, for example, for people with pushchairs or prams or in wheelchairs;

• There are insufficient school spaces for the number of local children needing them, with the result that children are often allocated to schools a significant distance away such as Dorking or Woking; and

• The Medical Centre in East Horsley is already at capacity in terms of its number of patients.
It is recognised that, as stated in the Proposed Submission Local Plan, the maintenance of adequate infrastructure and its expansion to meet growing needs is the responsibility of the relevant infrastructure provider. This is often not GBC itself but rather, for example, Surrey County Council or utility companies.

In respect of East Horsley, there are only two specific proposals in Appendix C:

**LRN 25 - East Horsley and West Horsley traffic management and environmental improvement scheme.** It is not clear what is proposed here, and its timing and funding have to be considered uncertain. It is stated that funding will, at least in part, come from developer contribution. However, it is not at all clear what development is likely to give rise to such a contribution, but it certainly implies that funding could only come if there were a development; and

**HSC 5 - Expansion of East Horsley Medical Centre to provide additional capacity and services for future population in years 5 – 15 of the plan.**

There are no proposals in respect of all the existing problems with for example roads, pavements, drainage, and schools. Furthermore, it is inevitable that the proposed developments in East Horsley itself and nearby, particularly in West Horsley and the proposals for Wisley, will put further strain on the existing infrastructure. There are no proposals at all to cater for this.

Although an expansion of the Medical centre is proposed in the Infrastructure Schedule, this is not until years 5 – 15 of the Plan. Given that it is already at capacity, this needs to be done earlier.

Local primary schooling is also a very pertinent issue. There are 11 housing development sites identified in the LAA for East and West Horsley, which taken together would result in the building of 593 new houses in the two parishes that are today served by a single primary school - The Raleigh, in West Horsley. Planning guidance suggest that this number of new homes will require the provision of around 150 additional primary school places to accommodate such an increase in population. Today there is no spare capacity at The Raleigh, yet no proposals are made in the Proposed Submission Local Plan to provide for any more schooling in the Horsleys.

The failure to address the inadequacies of the existing infrastructure to meet the needs of what is there already is a serious deficiency in the Proposed Submission Local Plan. I therefore object to the infrastructure proposals on these grounds, and to the proposals for infrastructure in that they do not meet the stated objective of providing infrastructure to support the proposed developments.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
East Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving that character. Moreover, being ‘washed over’ by the Green Belt has not been a serious constraint on development within the village. For example, GBC’s planning records indicate that no less than 149 net new homes were added to the village housing stock through in-filling and brownfield developments between 2000 and 2015. GBC attributes the need to inset East Horsley to NPPF requirements, arguing that the test for remaining ‘washed over’ is that the village should make an important contribution to the openness of the Green Belt. It is clear that East Horsley clearly does make an important contribution to the openness of the Green Belt. No less than 36% of East Horsley is composed of woodlands, whilst inside the settlement area there is an average housing density of just 8.1 dwellings per hectare (‘dph’). Woodlands and large residential gardens make a vital contribution towards biodiversity, provide wildlife corridors, and furnish those open spaces which are vital to the character of the greenbelt. It is one thing for a planner to study a map and see a settlement area filled with housing, but it is quite another actually to come to a rural village like East Horsley and see how the Green Belt has preserved the rural character and openness of this village.

Today East Horsley is a picturesque and flourishing rural community, which has and continues to experience steady incremental growth as a result of being ‘washed over’ by the Green Belt. As the saying goes: “If it ain’t broke, don’t fix it”. This applies to East Horsley in the matter of insetting, I therefore OBJECT to the proposal to inset East Horsley from the Green Belt and request that this proposal be dropped from the Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Paragraph 4.3.16 and Proposals Map: Settlement Boundary changes in East Horsley

GBC are proposing to make a number of changes to the settlement boundaries of East Horsley and so expand the settlement area, as set out in the Proposals Map, with the justifications seemingly provided in the Green Belt & Countryside Study prepared by the consultants, Pegasus.

I object to two specific boundary changes, which have been proposed, as follows:

i) There is a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Ockham Road North up to the eastern boundary of Lollesworth Wood. This proposal removes over 5 hectares of agricultural fields from the Green Belt. The present boundary line is clearly defined by a deep and well-maintained drainage ditch which is classified by the Environment Agency as a ‘main river line’ and therefore represents a highly defensible Green Belt boundary. Moving this boundary west to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. I do not believe this proposal can be considered as an exceptional circumstance. Clearly the only justification for this change is to bring a large agricultural field within the settlement area in order to provide more housing land. However, under NPPF rules this is not a sufficient justification for changing a Green Belt boundary. As such, I believe it is an invalid proposal. I OBJECT to this proposed boundary change.
ii) There is also a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Kingston Avenue up to a tree line running along the Parish Boundary at the western edge of Kingston Meadows. The result is to take all of Kingston Meadows out of the Green Belt. Kingston Meadows is the main public recreational space of East Horsley, comprising various sports facilities and playing fields. The present settlement boundary is clearly defined by a deep and well-maintained drainage ditch running along its eastern side. It therefore represents a very defensible Green Belt boundary. Moving this boundary westwards to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. I do not believe that this can be considered as an exceptional circumstance. As such I believe this is an invalid proposal. I object to this proposed boundary change.

In the Green Belt & Countryside Study and its accompanying Topic Paper, GBC justifies the need to make changes in settlement boundaries in order to meet unfulfilled housing need in the Borough. However, Green Belt rules make it clear that unfulfilled housing need is not normally considered to be ‘an exceptional circumstance’. If it were the entire Green Belt would already be covered in tarmac. The NPPF is clear that every movement in settlement boundaries must be justified by ‘exceptional circumstances’. GBC have offered only a generic justification in their Topic Paper of meeting unfulfilled housing need, but a case by case justification has not been provided. As such, I believe the settlement boundary changes referred to above (and many others) are invalid without such detailed justification.

Paragraph 4.3.17: Proposal to remove Wisley Airfield from the Green Belt

I object to the proposal to remove Wisley Airfield from the Green Belt. The only justification for this proposed change is unfulfilled housing need which is not considered an exceptional circumstance.

POLICY P2: Limited In-filling

A new planning designation has been introduced called ‘the identified boundary of the village’. For East Horsley this covers a number of roads south of the A246. It is a sizeable area, covering 45 hectares, the equivalent of 23% of the present Settlement Area of the village. Within this area, Policy P2 sets out proposals that would allow ‘limited in-filling’ within this boundary.

It is hard to reconcile the opening statement of Policy P2 that “We will continue to protect the Metropolitan Green Belt” with this sizeable reduction in effective Green Belt status. In my opinion, this policy represents a de facto extension of the Settlement Boundary and a substantial reduction in the operational effectiveness of the Green Belt, whose effectiveness is significantly weakened where this new planning designation applies. I object to the proposal to designate roads south of the A246 as being within the ‘identified boundary of the village’ and to allow limited infilling within this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The planned provision of 13860 new homes is in excess of the 10395 homes published in the Annual Housing Target table by 33%. This discrepancy is not explained in the documentation, represents an unjustified over-provision and is not sound.

From the SA report "Guildford Borough has not been formally asked by either of the two other authorities within the HMA to meet unmet needs arising from within their areas". Without evidence of co-ordination with other regions, it is difficult to see how this document complies with the Duty to Cooperate. Inflating Guildford Borough's OAN to meet an assumed unmet housing need in Woking and Waverley may be noble, but is unjustified without formal cooperation.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.

I object to the development of 40 houses at Send Hill as this high quality Green Belt amenity within an area of beautiful countryside would be spoilt for ever. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

Comment ID: PSLPP16/3985  Respondent: 10913377 / Isabelle Stevens  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Objections to Draft Local Plan

I wish to object to the Draft Local 2016 Plan to remove the Green Belt villages of Send, Ripley and Clandon from Green Belt status as I believe this is being done for pure expediency.

In a letter by Housing and Planning Minister Brandon Lewis, the Government stated that “demand for housing alone will not change Green Belt boundaries”. Furthermore, National Planning Practice Guidance states that “unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the ‘very special circumstances justifying inappropriate development on a site within the Green Belt”.

I object as I cannot see that the building of houses and an industrial site on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill is justified by “any special circumstances”. Green Belt is supposed to be permanent and not continually eroded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford’s urban brownfield areas much closer to existing transport hubs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/3984  Respondent: 10913377 / Isabelle Stevens  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The “housing need” figure of 13,860 is far too high and results in the completely unnecessary development of the Green Belt. The way students, economic need and affordability are calculated inflates the housing need. Students are only part time residents in Guildford needing one bedroom in shared housing units and I do not believe that they would want to live in houses in the surrounding villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3991  Respondent: 10913377 / Isabelle Stevens  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.

I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

I object because these housing developments and the proposed changes would change the nature of this beautiful area forever devaluing it for my generation and beyond. I believe that our villages are being dumped on in that we are being asked to accept a staggeringly high number of Guildford’s housing needs. Lastly, I do not feel that this need is evenly shared throughout the Borough.

Having studied the "Draft Guildford Borough Local Plan – Strategy and Sites, June 2016” I write to you in objection to a number of the policies, herein stated below.

**Policy H1: Homes For All, Policy H2: Affordable Homes**

I object to the above policy. The proposed development of 531 homes over Green Belt sites in West Horsley is out of proportion with the current number of houses in the village. This is also completely out of character with the village with regards to style and layout, and is unsustainable on existing services and amenities. The village is served by one local convenience store, a part time newsagents, and one small MOT garage.

There is a very limited bus service, which runs through the village, and Horsley Station is already a busy commuter station hitting capacity for car and bike parking. The only school in the village, The Raleigh, is already oversubscribed and additional population would mean existing residents would be further stretched for places meaning traveling to other villages/towns for schools.
In addition, the West Horsley Parish Council 2014 Housing Survey indicated a requirement for merely 20 affordable houses for the young or elderly wishing to enter the housing ladder or simply down size. This contradicts the proposed 531 houses for the village.

**P2: Green Belt and the countryside**

I object to the proposal to remove West Horsley from the Green Belt. There appears to be no justification for insetting these Areas from the Green Belt so I object to West Horsley's Defined Settlement Area boundaries being extended. According to the National Planning Policy Framework, in order to build on Green Belt sites, there must be "exceptional circumstances". There are none stated for this particular case.

Building into the Green Belt area will change the character of West Horsley village. Land and green space will be lost, create damaging environmental changes, all of which increase the risk of West Horsley morphing into another busy, densely populated, concrete, suburban town. Building into the Green Belt area will change the environment with adverse, damaging and permanent affect and will have impact on the Surrey Hills AONB, which attracts a great number of visitors each year.

**Policy D4: Development in urban areas and inset villages**

I object to new developments in inset village, due to the fact the volume of proposed houses will not compliment nor respect the existing grain and pattern of the areas. The layout and scale will be completely disproportionate to the existing scale of the village. It will also have an overwhelming negative impact on the amenities and residents of the existing buildings.

**Policy A37: Land at and to the rear of Bell and Colvill, Epsom Road, West Horsley**

40 homes is unsustainable and unbalanced for this delicate and attractive environment in West Horsley village.

**Infrastructure and delivery**

The increased population would bring with it increased village traffic, higher requirements for public transport, and oversubscription for the local school which already runs to maximum capacity.

The volume of traffic through the village will be damaging on the noise levels and air quality, add increased risk and dangers on the roads, and will further add to the damage on the tarmac the residents already experience on East Lane. Both drivers, cyclists and pedestrians safety will be compromised. The children’s nursery Footprints on Longreach and the primary school on Northcote Road will be highly impacted with the increased volume of traffic with the proposed sites around East Lane. Plus, journey times would increase with the increased traffic on these narrow village roads.

The existing facilities already feel the pressure of the village population: the medical centre in East Horsley struggles to make appointments for the local residents; the drainage infrastructure already has a capacity issues, with overflow problems in the Ockham Road North/ Green Lane area; and the rail station runs to capacity with a daily full car park.

Thank you for considering my appeal and objections and I look forward to the response in the near future.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Green Belt

We object strongly to virtually any development within the Green Belt. Those who conceived the idea and implemented the necessary laws to create Green Belt around our major cities and towns in 1955 showed foresight and determination that Society, Politicians and vested interests today would be unable and unwilling to commit to. The whole concept of Green Belt land is 'genius' which much of the rest of the world envies us for. It represents only 13% of land in England but its immeasurable benefits have been cherished by all who live and work in its proximity and can only continue to be such an asset if its future is guaranteed for generations to come.

Green Belt is Green Belt and should not be considered as an asset other than as Green Belt, it is irreplaceable. The laws that protect the Green Belt may well allow for 'Exceptional Cases' but these should be considered in extremis, land taken out of the Green Belt should be replaced elsewhere and in no circumstances should it be sacrificed 'to build houses'

Answer (if comment is on questions 1-7 of the questionnaire): ()

Adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Directs more office space to an extended business park (Policy E4), which will increase peak time congestion, particularly around the hospital and A&E which would only add to the current serious congestion of traffic in the area of the A3 and A31 and will affect existing residential areas. Currently in the morning peak traffic period there is severe congestion. This hospital is a Major Incident hospital and fast access must be maintained at all times.

I object to Blackwell Farm being included in this Plan as a development site (Policy A26 & Paragraph 4.1.9) which:-

Disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England's forthcoming boundary review (para. 4.3.8)

Ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development (2.1.4a)

In 2015 the National Farmers' Union expressed alarm that our ability to produce our own food and be self-sufficient had dripped from 80% in 1980 to 62%. This will drop to 53% by 2040. As world population grows there is no way that we should be building on good quality farm land. Especially commercial property. A recipe for disaster. Again you must listen to us.

Thatchers Hotel site - too overcrowded for the area. More suitable for no more than three times the density of local council/right-to-buy as in adjacent Wellington Cottages. Also, road access, at school and work transit times needs to be thoroughly assessed.

St. Martins area, where I believe there is suggestion of traveller pitch/s, is a most unsuitable area due to adjacent sheltered housing and an elderly care home as well as the local bowling green. Also this road is almost the only car parking for the church (St. Martin's) opposite.

Ockham Road North - this on first impressions looks quite suitable, but not for such density. The main problem is the egress onto Ockham Road North adjacent to the railway arch. Visibility would be very constrained.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:
1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25.
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

1. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

2. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

3. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

4. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee.

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

parking). Any new infrastructure proposed will not sustain the increase in traffic, let alone the pollution caused and lack of flood management in an area with thousands of already-unmanaged underground springs.

There are already huge traffic challenges in the Horsley villages. This would be heavily compounded by development of the Bell & Colvill site on the A246, East Lane, West Horsley, Thatchers Hotel site, and Ockham Road North. The last of these is in the centre of the lower village, which can hardly cope with too much traffic, a lack of parking and overcrowded public transportation.

The increase of up to 35% of new houses proposed for West Horsley is excessive for a rural area which has great historic significance. The impact on roads, schools, medical facilities, public transport and the environment would be devastating to the general area and detrimental to all residents.

In the long term, with development as has been proposed, the Horsleys and surrounding areas will become places to be avoided at all costs due to gridlock, flooding, pollution and lack of services. Ockham Road already suffers with oversized lorries using it as a means of getting to the A3, which makes it dangerous for other drivers and any pedestrian that dares to walk along the narrow footpath beside it. Bicycles easily block this narrow road, which is also used by drivers going well over the speed limit. Too much is being sacrificed to meet government objectives, which should be urgently reviewed and amended after the Brexit vote.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

The extensive nature of this document, the jargon and complexity that acts as a barrier to most members of the public is unexcusable. We are not all lawyers or public servants who work with this kind of document as part of our employment. There is also the time required to respond in full, and adequate time has not been allowed for this to take place before the VERY SHORT deadline. Few have the spare time or head space to tackle a document such as this, and it should have been offered in a more inclusive way, so the public would have multiple options to respond matched with their abilities. The future of our borough will effect all of us, and especially our quality of life, yet there are many who will not be able to cope with the language, complexity and overcomplication of this consultation. Not all of us have a PhD!

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
I strongly object to the inclusion in the Local Plan of the former Wisley Airfield site, A35, also known as Three Farms Meadows. I live in Cobham, outside the Guildford area, but close to Wisley and directly affected by what happens there. My reasons for objecting are as follows:

- The site is in the Metropolitan Green Belt and the proposed new town would severely affect the openness of the area and the views to and from the Surrey Hills AONB. There are no very special circumstances justifying this development. There are Brownfield and Urban sites still available in the Guildford area and these should be used.
- Development of the site would destroy this beautiful, quiet rural area and decimate the wildlife. It would overwhelm the hamlet of Ockham and the other little villages close to the site. It would create a ‘foreign body’ in the beautiful Surrey countryside. The intended density of dwellings and the four and five-storey buildings would be completely out of character with the area.
- There would be an unacceptable increase in light, noise, and air pollution plus an effect on the water table and flooding in the locality.
- The new population centre would place impossible strains on health services, schooling, public transport, and other facilities and infrastructure in and around the locality.
- There would be a dramatic impact on roads and traffic. As a resident of Cobham I am particularly concerned with the adverse impact the extra vehicles would have on junctions on the A3 and M25 and on the traffic jams we get in Cobham.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to building 400 houses and 7000 sq metres of industrial space at Garlick's Arch, opposite Send Marsh Road - The site is beautiful open fields and ancient woodland. It is a crime that Green Field sites such as this are proposed to be built on when Brown Field sites are not even being considered.
