1.4 The site is dependent on a new access road from the A31 (Hog’s Back) to the Hospital roundabout at Egerton Road, with a new signalised junction on the A31 at Down Place (just east of the A3 slip road). An independent traffic study commissioned by the Parish Council has shown that this new junction would result in more queuing on the Hog’s Back and on the A3 during the morning peak-hour, and as a result the villages of Puttenham, Compton and Artington will see a surge in traffic numbers as Guildford-bound drivers seek out the fastest route and divert along the B3000, B3100 or Down Lane.

1.5 Levels of nitrous oxide that are consistently well above the EU legal limit have been recorded at the A3 end of the B3000 over the last 2 years (GBC Air Quality Annual Status Report, September 2016. Compton Parish Council is expecting that this section of the B3000 will be made an Air Quality Management Area soon. Any traffic intervention that increases traffic levels through Compton (such as the proposed access road to Blackwell Farm), will make this situation worse and potentially have an impact on the health of residents.

1.6 The development will result in the loss of nationally important countryside - The new access road would cut through the Surrey Hills Area of Outstanding Natural Beauty (AONB), uprooting centuries old trees and scarring the north face of the Hog’s Back. It would also pass through an Area of Great Landscape Value and through, or next to, a belt of ancient woodland. The housing development itself and the proposed extension the research park, would harm the setting to the Surrey Hills AONB (the views into and out of the Hog’s Back ridge). The development site includes high-grade farmland and forms 20% of Compton’s green belt.

1.7 The development will produce more congestion at the Hospital/Tesco roundabout - This will impede access to the Hospital's A&E unit - a problem was identified by the Planning Inspector who presided over the previous Local Plan and who put a cap on traffic increases in the area of 5%. That cap has been exceeded (despite the University’s claim that construction traffic and buses don’t count). Guildford’s underlying traffic modelling is flawed and simply tweaking the Hospital roundabout and/or providing a new rail halt at Park Barn will not mitigate against the traffic generated by 1,800 homes, two schools, and an extended business park.

1.8 The new road proposed would be inadequate for the volume of traffic, and once the development has been built out it wouldn’t be long before new roads were required to serve the new population, which would inevitably pass through Wood Street Village (adding to the congestion in Worplesdon and potentially ruining Wood Street Village Green) and/or through Flexford/Wanborough, potentially ruining the conservation area of Wanborough, with its 13th century church and 14th century barns.

1.9 The development will result in more flooding. The Hog’s Back acts as a soak away for surface rainwater. Once its slopes are concreted over, this water will travel north, adding to existing flooding in Wood Street Village, Fairlands and Whitmore Common (a European protected habitat)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1.1 **I object** to the changed Policy A35 Wisley in respect of the identified mitigation to address the impacts on Ripley High Street and surrounding rural roads comprises two new slip roads at A247 Clandon Road (Burnt Common) and associated traffic management. This will not in any way mitigate the impact on Ripley High Street since traffic will need to pass through Ripley to reach Wisley.

1.2 **My previous objections therefore still stand for** this changed policy concerning the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.

1.3 There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.4 This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.

1.5 Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

1. Green Belt location and absence of “exceptional circumstances”.

2. Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.

3. Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).

5. Absence of adequate traffic data.

6. Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
7. Loss of high-quality agricultural land (55% of the site), in breach of national policy.

8. Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.

10. Cost of infrastructure required to the detriment of alternative more favourable sites.

11. Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.

13. Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.

15. Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.

16. Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).

17. Failure to evaluate the cumulative impact of this and nearby development sites on the area.

1.1 **I object** to the changed policy A42 Clockbarn Nursery to 60 homes.

1.2 It ignores all the hundreds of previous objections made by local people

1.3 The increase to 60 homes in place of 45 homes is 33% more and too much.

1.4 It will worsen access and traffic problems in Tannery Lane and at the A247 junction.

1.5 It will make erosion of Green Belt in our village worse

1.6 It will make surface water flooding, which is already bad, even worse

1.7 It will impact open countryside views from the River Wey Navigation
1.8 The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area.

1.9 The site has very restricted access along Tannery Lane which is narrow and for most of its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical.

1.10 Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic.

1.11 Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

1.12 The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1.1 **I object** to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches

1.2 It ignores all the **thousands of previous objections** made by local people

1.3 There is no proven demand for travelling show people plots in this location

1.4 There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.5 The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

1.6 This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

1.7 The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

1.8 Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport.
Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

1.9 The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

1.10 I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

1.11 I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

1.12 I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

1.13 I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

1.14 I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

1.15 Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

1.16 Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

1.17 With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

1.18 The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

1.19 I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
1.20 Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

1.21 Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

1.22 Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

1.23 I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

1.24 I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

1.25 I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

1.26 It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1.1 I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site

1.2 This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.

1.3 The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sqm at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

1.4 There is in fact no justification for building anymore industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

1.5 There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

1.6 The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

1.7 The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

1.8 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

1.9 The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

1.10 The impact on small surrounding roads will create traffic gridlock.

1.11 It will join up existing villages and defeat the purpose of the Green Belt.

1.12 The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

1.13 The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

1.14 The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

1.15 I object to the potential impact of para 4.4.23a on Burnt Common with its over allocation of industrial zoning is subterfuge for a waste management facility which is a dishonest and underhand approach to planning and proper consultation.

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I object to the change in Policy E1 sustainable employment because they have not addressed many of the 32,000 objections made to the 2016 plan.

1.2 I object to the inclusion of Send Business Centre/Tannery Studios Tannery Lane, Send in relation to proposed inset from the Green Belt because:

- There is highly restricted vehicular access along Tannery Lane in both directions.
- It is effectively an old non-conforming user in an area of outstanding countryside.
- It is adjacent to the beautiful Wey Navigation.
- Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate.

1.3 I object to the change in Policy E1 of proposed designation of Burnt Common as an Industrial Strategic Employment Site.
The impact on small surrounding roads will create traffic gridlock.

The 2017 Employment Land Need Assessment shows a reduction in demand to a low of 3.7 and a high of 4.1 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Burnt Common in the Green Belt.

The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land as shown in the Employment Land Needs Assessment 2017.

It was deleted from the 2014 draft because of all the local objections made previously and there is no logical reason to go back on this decision.

There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have many empty sites and industrial units.

There are patently no exceptional circumstances in terms of demand for employment space to build on this important area of Green Belt which effectively separates existing development in Send and Ripley and prevents urban sprawl.

It will join up existing villages and defeat the purpose of the Green Belt.

1.4 I also object to the potential inclusion at Burnt Common of a waste management facility mentioned at the change to paragraph 4.423a which lacks sufficient detail for proper consultation and is completely inappropriate.

1.5 I object to the ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 which generally is superficial and lacks sufficient detail and analysis between B1a, B1b, B1c, B2 and B8 use classes and that no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of office, research and development, light industrial, general industrial and warehousing and distribution floor space.

1.6 I object to the fact that no reliable analysis has yet been made of data held by GBC in respect of different B classes in terms of planning applications granted or evidence gathered by the economic development function at GBC and no robust assessment of local market demand apart from fairly brief references to freely available market research undertaken by commercial estate agents such as Lambert Smith Hampton covering a much wider area.

1.7 GBC in their role as a Planning Authority appear to fail to appreciate the fundamental rationale of the Use Classes Order as a planning tool in terms of procurement of useful property market research analysis or forward planning.

1.8 What we are left with is a fairly clumsy and poorly informed plan which clusters B classes without any appreciation of widely different employment impact and economic sustainability. E.g. B1 generates at least 5 times as much employment as B8.

1.9 The lack of appreciation by GBC as to the opportunity for widely different uses being generated within B class clusters defeats the whole point of proper planning of employment uses and can significantly endanger previously good planning put forward in the previous 2003 plan. E.g. the creation of a research and development park linked to the University but now has the threat of being downgraded into a general business park (see below).

1.10 Little regard has been given in the plan to the economic reality of falling demand for B2 industrial space which is clustered with other B classes almost randomly throughout the plan.

1.11 The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

1.12 38,357sqm of B1c, B2 or B8 use class is quite sufficient supply for the plan period and does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
1.13 Little regard is still not given to the opportunity of specific B1 b space as an opportunity for research and development which needs to be nurtured and preserved without the detrimental and confused clustering with other B classes both in terms of planning and promotion of a research hub.

1.14 I support the concept of seeking increased investment in our local knowledge-based, high technology economy. This will provide well paid, creative jobs and generate the funding necessary to pay for the infrastructure and environment this sort of industry requires.

1.15 We need to distinguish between wanting to increase the added value of the economy and physical expansion, especially given the scarcity of land in Guildford. Guildford is not the place for large space hungry businesses. So I should target high added value small and medium sized enterprises rather than the headquarters of larger corporations.

1.16 We need to promote the idea of new knowledge transfer in incubator units and small premises for new start up enterprises. They need to be on the wave of innovative new technology as opposed to older established businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
14.1 I object to the changes in relation to Policy E3 maintaining employment capacity which do not take account of my previous objections to this policy.

14.2 I object to the ill-informed policy of resisting change of use from B1a to residential because it flies in the face of positive property market solutions for the regeneration of brownfield land. It is also contrary to current government policy which has recently been reaffirmed and permits a change of use from B1a (offices) to C3 (residential).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

1.1 I object to changes in policy E4 Surrey Research Park which is still earmarked for excessive expansion which is not supported by the findings of the Employment Land Needs Assessment 2017.

1.2 I support the maintenance of research, development and design activities, in any science, including social science, that is complementary to the activities of the University of Surrey at the Surrey Research Park. I object however to the completely unnecessary expansion of the Research Park into a larger Business Park.

1.3 I object to the extension to the Research Park of over 10 hectares will be delivered. This I understand will provide a total capacity of around 35,000 sq m of additional floorspace, of which 30,000 sq m is expected to be delivered in the plan period. This expansion is not effectively supported by evidence for an increase in B1b use class under the Employment Land Needs Assessment 2017.

1.4 I also believe that B1b (should be the primary use class for the Research Park and that applications for B1a should be resisted due to the danger of dilution of the core purpose and reputation of the park. I also object to the inclusion of B1c light industrial uses which is inappropriate and unnecessary.

1.5 Research parks based on the early UK technology transfer exemplars of the Cambridge and Oxford need careful monitoring, nurturing and protection to ensure the integrity and quality of the park is maintained and the park continues to be a destination for innovation and enterprise.

1.6 There is a danger for research parks to be overwhelmed by short sighted development opportunities being taken by park managers provided by standard office activities and administrative functions which in time turn them into standard business parks which can be found anywhere in the country. Their relative low density and attractiveness make them targets for “any other” office user.

1.7 Research parks that lose their way stop being the location of choice for new innovative enterprises.

1.8 The Surrey Research Park in Guildford needs to be focussed on a broad spectrum of scientific research including computer science, bio-chemistry, design, space-science, eco-science, health science, software development, laser technology, media-science, artificial intelligence, robotics and super-manufacturing.

1.9 Monitoring indicators should include new start-ups and new patents created.
1.10 Facilities should be provided whereby new small businesses can secure premises under subsidised licence fee arrangements with no onerous rent or lease commitments

1.11 The Surrey Research Park currently extends to 65,000 sq m. The research park is developed at a plot ratio of 25%. This could be increased to 50% within the same footprint of the existing park without damage to its amenity. The actual current land use for development in the park is in fact only 12.5% because most buildings are 2-storey.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

**Comment ID:** pslp171/705  **Respondent:** 15084897 / Save Send Action Group (Andrew Procter)  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy E7

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

1.1 **I object** to the changes in Policy E7 Guildford Town Centre

1.2 I am of the opinion that policy E7 is still very ill-informed and there is insufficient evidential support to objectively assess the capacity of the existing town centre to accommodate appropriate new development and therefore fails the requirements of Section 161 of the NPPF to assess the real quantitative and qualitative floor space needs.

1.3 Policy E7 is still an aspirational voice from the past and is unlikely to benefit the health of the town centre in the future. There is no reliable evidence provided that the retail core of the Town Centre needs or can be expanded by 41,000 sq m of retail space at North Street because of lack of demand for retail units in the Town Centre particularly large units. This is due to falling demand for retail space in Guildford and town centres throughout the country evidenced by independent research and the reality of empty shops in many high streets (including Guildford) and the accelerating competition from internet shopping.

1.4 The recent Carter Jonas Study Retail Study 2017 update predicts total demand for Guildford Town Centre by 2020 at only 3,313 sq m and only 34,811 sq m by 2036. We have now been waiting some 15 years + for demand to catch up to enable development of North Street where the old consent for some 40,000 sq m of retail had to be renewed because it was getting out of date. Are we now going to have to wait till 2036 only another 19 years for demand to get to the point to enable development of this much prized site which developers have not exactly been falling over themselves to develop. That is also assuming that all retail demand in the Town Centre is wanting just this site.

1.5 However optimistically and quite illogically they protest that “there still remains significant capacity to support new comparison goods floorspace over the plan period”. It’s a bit like saying in town x we have currently 100,000 m of shopping and the UK retail forecast done by Experian shows that we can predict a growth of 10% therefore this means we must have an additional 10,000 sq m in town x. This is unscientific guess work.

1.6 In table 2 Appendix 6 of their report we learn that there is a potential for turnover to reach £856.3m in the town centre by 2020 however actual committed floorspace take up accounts for only £1.3m of this. This is 0.15%. It is hardly surprising that there are no details of take up or real demand evidence given anywhere in the report.

1.7 The Carter Jonas report is based on broad brush retail capacity forecasting derived from work by Experian which is very far from site or location specific and as a retail supply and demand assessment in my view is totally unreliable. The source is not even Guildford specific or even Surrey specific. The authors of the report do not disagree with my cynicism.
with capacity forecasting since they state up front that “It should be noted at the outset that capacity forecasts carried out over a long period of time are inherently less certain and should be treated with caution” and repeated again “at the outset we advise that all capacity forecasts beyond a five year period should be treated with caution. This is because long term trends in the economy, consumer demand and retail property market could have a significant impact on the potential capacity and need for new retail floorspace. For example, as discussed previously, a higher growth in non-store retail sales (i.e. Internet sales) than forecast by Experian would reduce the capacity for new retail floorspace over time.”

1.8 The Carter Jonas report is a vague whitewash report for a pre-conceived and outdated concept of increased retail development in the town centre. “For comparison goods, we have assumed the same estimations for convenience goods expenditure ‘inflow’ (10%) for Guildford Town Centre, again based on the centre’s role as a popular shopping and visitor destination.” Coming to the vague conclusion that Guildford is popular is far from reliable property market research!

1.9 The closest thing I can find to evidence of actual demand in this report is to read “In addition to focusing their attention on larger, dominant centres, many of the multiples and traditional high street retailers are changing their store formats and locational requirements. For example, key anchor retailers such as Boots, Next, Mothercare, TK Maxx, John Lewis and Marks & Spencer are actively seeking larger format units to showcase their full product range and to provide an exciting shopper environment backed by the latest (digital) technology.” But I then I realise this statement applies to any of 100 centres in the UK. I am concerned as to whether the authors of this retail study have actually visited Guildford or know where it is?

1.10 In their 2014/2015 reports Carter Jonas provided a fairly inaccurate picture of retail demand (originally Appendix 6) with the inclusion of retailers who had either gone bust or actually specified demand requirements in centres other than Guildford. This I note has now been deleted presumably because of its inaccuracies which were dealt with in my 2016 objection and has not been updated. We are now left with no demand assessment from either small, medium sized or large retailers. This does not support the view that Guildford is a vibrant retail destination requiring expansion with a large retail development in North Street.

1.11 The reality is that the town centre has enough retail floor space. If more is introduced it will result in the closure of existing shops particularly in locations which are less than 50% of peak Zone A or 100% positions. What Guildford needs is a new focus on speciality high quality comparison shopping supported by a revival of Guildford’s attractive heritage core and a new major visitor attraction supported by restaurants. Guildford needs to become the quality shopping destination for Surrey.

1.12 The existing site in North Street should be replaced with a well-designed ground floor high quality speciality retail mall and frontage of no more than 40 shops extending to 10,000 sq m with the rear and upper floors providing an additional 600 homes. The proportion of the above proposed smaller scheme at North Street will be complementary to and not antagonistic to the Upper High Street, Tungsgate, the Debenhams site and the 100% Zone A positions of the Lower High Street. If the existing policy under E7 is adopted the North Street site will remain empty for another 10 years.

1.13 I also object to the continued failure of this policy to provide much needed substantial residential development in the Town Centre which is still only a modest target of 1,300 homes. Only approximately 10% of the total planned for the Borough. There is still a blind over concentration on retail expansion which fails to take account of market forces and a complete failure to grasp the reality that a residential expansion is required to stimulate retail/leisure demand in the Town Centre which is markedly losing out to nearby centres such as Woking which has a very different approach. See the Town Centre Opportunity in next section.

1.14 I object to the deletion of the vision statement “Guildford town centre has a unique setting and historical character, and is at the centre of one of the most prosperous counties in England. We will protect and build on these assets and insist that all new development will be of the highest design and environmental standards. We will be proactive in building a great town centre which connects to the amenity of the riverside. We will invest in creating high quality public realm. We will put people above traffic and we will promote new high quality retail and business development. To achieve this we will develop innovative funding and delivery bodies. As we embark together towards this exciting future we pledge that we will continue and extend an active dialogue with our residents and other stakeholders.” Guildford Town Centre needs a decent vision. Without a vision the Town Centre is flying blind and it demonstrates the failure of the potential for imaginative Town development in this latest draft plan.
1.15 I support the deletion of paragraph 4.4.86 since many of the sites along the River Wey are capable of full development.

1.16 I object to the deletion of the Allies and Morrison Masterplan as a source document for the plan since although it failed to fully exploit the development potential of the Town Centre it did include many good ideas including more extensive brownfield development extending to 2551 homes including Woodbridge Meadows as a residential development site.

1.17 I do not consider that the modest target of 1,300 homes in the town centre takes account of the need and demand for housing or the opportunities that brownfield sites present for increasing the residential development in the core of the town which will in itself help to sustain the retail core by increased economic impact. What the town centre needs in terms of urban regeneration is much more residential development. As can be seen from the previous section, retail will not work!

1.18 The Town Centre policy needs to maximise the potential for residential development on brownfield and include as an absolute minimum the 2,551 units proposed in by Allies and Morrison for the town centre included in the masterplan 2015 which was originally adopted by GBC. The reality is that the Town Centre and other areas of brownfield in the borough has the capacity for at least 5,000/ 7,500 homes.

1.19 The additional target capacity of 5,000 could easily be provided within the following urban sites which have the capacity for 7,500 homes:

- 2,500 homes detailed in Masterplan 2015 including Woodbridge Meadows which can itself be increased substantially
- 500 homes at North Street
- 1000 homes on current GBC car parks (25 acres) and at the station
- 1000 homes saved in the urban area if 100% of students are accommodated on Surrey University campus (17 ha of car parks)
- 1000 homes at Slyfield on the 40 ha regeneration site
- 1000 windfall infill (50 per annum)
- 500 homes on brownfield sites in villages on sites of max 1ha which do not impact Green Belt

1.20 Yes, we need a new Local Plan for our borough in order to provide a development strategy within which we can accommodate our local housing, economic and environmental needs. But first we must make 100% use of our urban brownfield in the town before we consider building in the Green Belt or countryside.

1.21 Paragraph 80 of the NPPF clearly states that Green Belt serves a key purpose, “to assist in urban regeneration, by encouraging the recycling of derelict land and other urban land”. In order to comply with central planning policy we need a brownfield strategy that states clearly. “We are committed to a brownfield first initiative whereby all applications on previously developed land are given fast track priority and every facility to promote development for residential purposes and employment purposes in order to satisfy the needs of local people. In parallel a zero CIL incentive should be given for all residential development on brownfield land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1.1 I object to all changes in policy H1 Homes for all because they have not addressed many of the 32,000 objections made to the 2016 plan.

1.2 I object to the change by way of deletion of the paragraph on density: “New residential development is required to make the most efficient use of land whilst responding to local character, context and distinctiveness. Residential densities will vary dependent upon the local area context and character and the sustainability of the location. Higher density development will be supported in Guildford town centre.”

1.3 This indicates that GBC have no intention of building at a higher density within the existing urban area which is desperately needed and is in accordance with existing government policy. To have a plan with no density guidelines in the urban area is irresponsible and effectively very bad planning since it fails to exploit the development opportunities that urban areas can afford.

1.4 I support higher density development in the urban area close to transport hubs to facilitate modal shift e.g. 20 minutes’ walk of Guildford railway station. Much of Guildford town could usefully be regenerated with 7 storey blocks (there are currently blocks of this size already in the town) at 50 homes per ha with landscaping and underground parking, as often seen on the Continent and, recently, in London.

1.5 I object to the change in relation to student accommodation: “About 60 per cent of full time Guildford based on the University of Surrey eligible students population (full time equivalent) are expected to be provided with student bedspaces on campus.“

1.6 The University should provide accommodation for 100% of new first year students and more than 60% of existing students. This would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and underused surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back. Surrey University has 17 ha of car parks that could provide all the student accommodation required on stilts with parking beneath.

1.7 I object to the change in relation to Gypsy, Traveller and Travelling Showpeople pitches and plots. Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Overprovision is inappropriate given other constraints.

1.8 I object in particular to the inclusion of 6 Travelling Showpeople pitches at Garlicks Arch where there is no proven need.

1.9 I object to the deletion of the paragraph 4.2.8 on density: “We have a responsibility to use our natural resources, such as land, wisely. Efficient use of land is essential. Housing density describes the number of homes developed within a particular site area. It is usually calculated by the number of dwellings per hectare (dph). Increasing densities can help to reduce the land needed for new homes and make development more sustainable. It can also support more facilities and services. Certain areas can accommodate higher densities provided there is no adverse impact on the character of the area and the infrastructure is able to cope. Planning applications will be assessed on a case-by-case basis having regard to the local context, character of the surrounding local area and the sustainability of the location. This will include consideration of established street patterns, plot sizes, spaces around buildings, and relationship with nearby buildings as well as form, massing, height of existing buildings and structures, and materials.”

1.10 To have a plan with no clear density guidelines is irresponsible and effectively very bad planning since it fails to exploit the development opportunities that urban areas can afford.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
1.1 **I object** to the changes in policy H2 Affordable homes which still do not go far enough to address affordable or social housing need.

1.2 “Affordable” homes, under national definitions, means homes that are sold or rented at 80% of market value. Even if 70% of these are rented as proposed, the level of market prices in the South-East means (even post-Brexit) that these homes will remain well beyond most people’s means and that starter homes will not become available for local people.

1.3 In addition, “the viability clause” means that in practice the policy could be unenforceable. Private financial viability has no place in a public policy and should be removed. It is a get-out-of-jail-free card for developers that will sacrifice countryside for no local benefit.

1.4 This policy’s version of “affordability” is just a smokescreen for pushing through more development generally. Building more homes in Guildford cannot increase real affordability given the overhang of the London market.

1.5 GBC has failed demonstrably to provide any significant social housing. Over the last 2 years a tiny 65 units have been built. GBC may have demonstrated a pre-determined agenda to build large numbers of high priced executive boxes for Londoners in the Green Belt but key workers such as nurses and teachers have been ignored. Opportunities for local not for profit social housing schemes, borrowing from the public sector at low interest rates and using existing GBC land holdings are extensive. But the political persuasion and intent of GBC does not seem to really want to accommodate local people in need. This is a great pity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1.3 This demonstrates GBC’s disregard for local housing need.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** pslp171/709  **Respondent:** 15084897 / Save Send Action Group (Andrew Procter)  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1.1 **I object** to the new Guildford Borough Council Transport Strategy 2017.

1.2 **I object** to ASP 3 new A3/A3100/B2215/A247 Burpham-Burnt common all-movements junction, formed by a new connector road linking between new A3/A3100 Burpham junction (SRN4) and the B2215 London Road, in combination with the new A3 northbound on-slip (SRN9) and the new A3 southbound off-slip (SRN10) under Infrastructure and Delivery.

1.3 If development gets the go ahead for the strategic site at Gosden Hill it would be logical to construct a 4 way A3 interchange at Burpham. It is not feasible to pass the problem down the line to Send which will already be bearing the brunt of traffic generated from a planned 4,000 homes. The A247 link road to Woking already at capacity will become gridlocked.

1.4 **I object** to SRN4 New A3/A3100 Burpham junction with relocated A3 southbound off-slip and new A3 southbound on-slip. This will place an unbearable problem onto the A247 whereby traffic will be passing directly through Send from the A3 and M25 and the proposed new development at Wisley.

1.5 **I object** to SRN9 A3 northbound on-slip at A247 Clandon Road (Burnt Common) and SRN10 A3 southbound off-slip at A247 Clandon Road (Burnt Common). This will place an unbearable problem onto the A247 which is already at capacity.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** pslp171/694 **Respondent:** 15084897 / Save Send Action Group (Andrew Procter) **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
1.1 I object to the changes to Policy P2 because they have not addressed many of the 32,000 objections made to the 2016 plan.

1.2 I object to the new para (1) “The Metropolitan Green Belt will continue to be protected as shown designated on the Policies Map, against inappropriate development. In accordance with national planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated.” The words “as shown designated on the Policies Map” should be deleted. The Policies Map has effectively ignored huge areas of Green Belt protection and the new para (1) is therefore a sham.

1.3 I object to the proposed change that Send Business Park should be inset from the Green Belt due to the fact that:

1.4 It is effectively a non-conforming user in an area of beautiful countryside adjacent to the beautiful Wey Navigation

1.5 It has restricted access along Tannery Lane

1.6 It should not be given the opportunity for further expansion or development

1.7 Policy P2 still completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world.

1.8 Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital.

1.9 It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6% of the Crown jewels in order to build houses.

1.10 I object to the statement in the Draft Local Plan under Green Belt Policy P2 (4.3.13) which claims that Send and a further list of 13 villages are “now inset from the Green Belt”.

1.11 This statement is untrue as GBC is proposing to “inset” these village. No decision has been made by an Inspector, therefore the villages remain in the Green Belt!

1.12 I object to the changed “insetting” of 15 villages (including Ripley) from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages.

1.13 I am deeply disturbed that settlement boundaries are to be hugely extended in many villages (particularly at Send) and that infilling is also proposed outside the settlement boundaries of 11 further villages. This is completely unplanned and unmeasured development outside of the OAN.

1.14 Many Guildford villages are “leggy” in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat.
1.15 Send is a good example of villages that **should not be removed** from the Green Belt. Send provides an important Green Belt buffer between Woking and Guildford. Yes, it is true that Send comprises old ribbon development but this should not mean it can be removed from the Green Belt so that Woking joins up to Guildford. The village and the countryside behind the A247 should all be protected.

1.16 I **object** to three particularly vulnerable areas of high quality amenity land being taken out of the Green Belt at Send which include:

1.17 The land behind the schools including playing fields and woodland.

1.18 The land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision Engineering.

1.19 Land to the left of Cartbridge going up to the old depot on the Wey Navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 I **support** the change to paragraph 4.1.4 “Local Planning Authorities are encouraged to include a policy within their Local Plan that embraces the presumption in favour of sustainable development. Policy S1 meets this requirement and adopts the model wording suggested. When implementing Policy S1, **local circumstances will be taken into account** to respond to different opportunities for achieving sustainable development. In accordance with the NPPF, **the presumption will not automatically apply to policies relating to sites protected** under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), **land designated as Green Belt**, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

1.2 I am of the opinion in terms of clear policy that GBC have made a definitive statement to support the Green Belt. I am however disappointed that they have failed to put this policy into sharp practice in forming this plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( No )
Answer (if comment is on questions 1-7 of the questionnaire): ()

1.1 **I object** to the amended policy S2 the Borough Wide Strategy and the commitment to build 12,426 homes based on the Strategic Housing Market Assessment (SHMA) 2017 prepared by GL Hearn because it has not addressed many of the 32,000 objections made to the 2016 plan.

1.2 The OAN “objectively assessed need” figure of 12,426 is far too high

1.3 I am very surprised and concerned that GBC have adopted the OAN of 12,426 homes as the housing target **without any application of constraints** as required under the National Planning Policy Framework and the National Planning Policy Guidance. The scale of the housing number proposed, inevitably increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

1.4 Other local planning authorities appear to take a more balanced view in their approach to planning. The Woking Core Strategy 2012 applies a constraint of 50%.

1.5 Historically GBC have correctly applied constraints on housing numbers to protect the Green Belt. The Surrey Structure Plan 1994 advocated a general slowing down in the rates of development “because of the environmental constraints which exist in the County, including Green Belt”. This slowing down was reflected in the requirement that Guildford Borough should accommodate a net increase of 3,800 dwellings between 1991 and 2006. This was a lower rate of development than in previous years. It is interesting to note that the Structure Plan at that time expected sufficient land to arise within the urban areas to accommodate this requirement.

1.6 However it would appear that today GBC have effectively ignored the real potential of the urban area to provide for housing. At the same time GBC have adopted a radically different approach to the policy of the Council over the last 20/30 years and are now ignoring government policy in relation to the Green Belt.

1.7 A detailed and comprehensive professional review of the SHMA dated June 2017 by NMSS an independent expert firm dealing with housing and demographics procured by Guildford Residents Association (GRA) has concluded that the OAN figure should be revised down from 560 homes per annum to **400 homes per annum**.

1.8 The 19 page report by NMSS which can be found on the GRA website entitled “Review of GL Hearn’s Guildford Addendum to the West Surrey SHMA”. It was a real community effort. It was paid for by over separate 20 Guildford Residents Associations and Local Parish Councils none of whom were convinced that the SHMA report procured and presented by GBC was accurate or transparent or accessible in a meaningful way. So they clubbed together and collected contributions from many hundreds of Guildford residents to try to find out the truth of the housing need figure presented in the Local Plan.

1.9 The NMSS report includes detailed analysis and financial modelling and was prepared by Neil McDonald who we were lucky to find. He is a niche consultant with the right skills and a national reputation. An independent adviser and commentator on housing demographics. He works with local authorities and others on the estimation of housing need and related issues. He was a civil servant and policy adviser to Ministers for over 30 years, the last 10 advising on housing and planning issues within the Department of Communities and Local Government. His 7 years as a Director at DCLG included a posting as Director, Planning Policy and a period as Chief Executive of the National Housing and Planning Advice Unit.

1.10 The NMSS recent study has found that the latest SHMA update by GL Hearn 2017 over estimates population growth for Guildford.

1.11 The report shows that an indication of the scale of the problem can be obtained directly from the ONS’s own data. Their estimates of births, deaths and population flows into and out of Guildford suggest that the population should have grown by 15,000 between the 2001 and 2011 censuses. The censuses, however, record a population growth of only 7,800. The discrepancy is over 90% of the population change indicated by the censuses.
1.12 The analysis in the NMSS report demonstrates that the errors must be in the population flows in age groups in which there are significant numbers of students. They are almost certainly the result of the under-recording of the numbers of students leaving Guildford each year.

1.13 If the projections are based on under-estimates of the number of students leaving the district each year, they will assume that people will be living in the area who will in fact have left. This means that they will over-estimate the likely growth in Guildford’s population. The ONS’s projections envisage that the population will grow by 21,700 between 2015 and 2034. However, if the estimates of past migration flows are adjusted to make them consistent with the census figures, this could fall to 13,000. As a consequence, the demographically-based estimate of the number of homes needed would be 400 homes a year (2015-34), not 580.

1.14 70% of the sites put forward in the Local Plan are still in the Green Belt which flies in the face of current government planning policy. The National Planning Policy Framework (NPPF), National Planning Policy Guidance and case law make it clear that Green Belt is an absolute constraint on housing supply. Exceptional circumstances need to be shown to adjust boundaries.

1.15 Other constraints under the NPPF include assessments of sustainability, strategic flood risk assessment, physical constraints on land use and infrastructure constraints (this can include road congestion, schools, drains, power supply and medical requirements).

1.16 Constraints should be applied to the Objectively Assessed Housing Need (OAN). However this itself is overstated and should be reduced from 580 per annum to 400.

1.17 I object to the fact that GBC have not used the guidance available to reduce the number of houses they propose.

1.18 GBC has not taken into account the possibility of lowering the required number of houses by adhering to the restraints offered in various papers. Government guidelines, even before the publication of the Paper, quoted below say that if a Council cannot supply sufficient houses without impinging on the Green Belt, then they do not have to build so many houses.

1.19 GBC have gone against the NPPF as they are not adhering to the ruling that Local Plans must plan positively to seek opportunities that meet objectively assessed development needs and be flexible enough to adapt to rapid change unless any adverse impact of doing so would significantly outweigh the benefits or specific policies in the NPPF which suggest that development should be restricted.

1.20 House of Commons Briefing Paper ; Planning for Housing no 03741, 14 June 2017. Guidance on taking account of constraints. “Need alone, is not the only factor to be considered when drawing up a Local Plan”. This includes “land designated as Green Belt” and “SSSIs”.

1.21 “The framework makes clear that once established Green Belt boundaries should only be altered in exceptional circumstances” and “should take into account any constraints such as Green Belt, which indicate that development should be restricted and which may restrain the ability of an authority to meet its need.” (P d055 ref ID.3-045-20141006)

1.22 In view of the comments above it would appear logical to apply CONSTRAINTS in line with government policy to a corrected OAN. of approximately 50% to account for the fact that 89% of the borough is in the permanent Green Belt and development is not supported by adequate major infrastructure. This reduction is in line with the constraints percentage of 50% applied by Woking Borough Council.

1.23 This would result in a more acceptable and practically achievable HOUSING TARGET of 200 homes per annum which over a 20-year period would be 4,000 homes.

1.24 All of these homes could be built in the existing urban brownfield areas of the borough and would in part satisfy the 32,000 objections made by residents to the 2016 draft plan and also relieve the additional problems of inadequate infrastructure

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
I object to the Guildford Borough Council (GBC) Regulation 19 draft plan 2017 because it is not sound and the changes do not take account of my previous objections or indeed the 32,000 other valid objections that are shown on the GBC website and made to the previous 2016 version.

I have focused, as requested, on changes to which I find reason to object but this also includes some deletions which lack acceptable justification.

I request a confirmation by email from GBC that all of the objections to changes made below are put to the Inspector appointed by the Secretary of State to review the GBC Regulation 19 local plan 2017 and that all my previous objections to the 2016 draft plan will be placed before the inspector.

I formally request the opportunity to give evidence in person at the Public Inquiry currently planned for 2018 in relation to my objections in 2016 and 2017.

I request again that once my objections are fully taken into consideration the draft plan is amended accordingly and re-issued before it is submitted to the Inspector.

I am of the opinion that if it is submitted in its current form it will be in risk of being summarily dismissed and put back to the Council for resubmission.

Guildford is a constrained borough by the reality of having 89% of its area zoned as permanent Green Belt and an out of date road network that is already at capacity. I am concerned that GBC have adopted a lower but still grossly inflated OAN of 12,426 homes as a housing target without any application of constraints as required under the National Planning Policy Framework and the National Planning Policy Guidance.

70% of the new development proposed in this plan is in the permanent Green Belt which was coincidentally invented in Guildford under a private Act of Parliament in 1938. It is perhaps ironic that the process of Town and Country planning has become a type of Town v. Country debate.

The population in the borough is split equally between town and country but Guildford town has developed very little over the last 20 years and has not undergone the type of normal urban expansion, redevelopment of previously developed sites and increase in residential densities as nearby towns such as Woking have experienced. It is informative that Woking is currently outperforming Guildford in terms of economic performance.

It is interesting to note that urban densities in Guildford town are no higher than the villages that surround it. Even though the latter are in the main in the Green Belt which is protected from development and the former is in an area where...
there is no presumption against development. I am of the opinion we need a rebalancing between town and country and much more development in Guildford town, particularly residential development.

1.11 In the latest plan only 1,300 homes are going to be built in Guildford town which is some 10% of the total development proposed. It is very disappointing that GBC fail to set higher densities for the urban area and have in this latest draft deleted all reference to “density for development” which is normally an integral part of forward planning and development control.

1.12 GBC still fail to acknowledge that the application of constraints to housing need in respect of the Green Belt is a sensible and practical approach to development within the borough and is not only what they have done in the past in previous plans but is also what its neighbouring local planning authorities have done.

1.13 The current scale of the housing number proposed in this plan, which is based on a flawed SHMA, inevitably increases the onus for the plan to be seen to be sound. A substantially lower number of 4,000 homes, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

1.14 I am concerned that GBC have still failed to grasp the opportunity of following clear government policy to develop in the urban area on previously developed sites. Many of these sites are in their ownership and it would seem a practical and readily achievable alternative which is much more acceptable to local residents.

1.15 In my opinion much of the updated local plan still appears out of date. It is like a voice from the past. Current trends in terms of property development such as the marked decline in town centre shopping centres and the need to create modal shift by developing residential uses close to transport hubs appear to have been overlooked.

1.16 Unsupported assertions that there is real demand for the expansion of retail, industrial or office space lack credibility especially in the absence of significant planned expansion of residential development in the town centre which is universally acknowledged as a key stimulant for urban economic health.

1.17 There would appear to be two worrying examples where GBC are taking the role of “developer/landowner” rather than “independent not for profit public sector planner” in so far that they have a pre-determined agenda for building on the Green Belt rather than acting as careful, professional and responsible planner guardians.

Example 1: Policy A43 Garlicks Arch Burnt Common. The stated, albeit unproven, need by GBC is 400 homes. Normal residential density is 30 homes per ha. Land required would therefore be 13 ha. Land actually proposed to be allocated is 28.9 ha. This is more than double land required in beautiful irreplaceable Green Belt.

Example 2: Burnt Common Policy A 53. The stated, albeit unproven need, is 7,000 sq m B1c, B2 and B8 development. Normal density 50% plot ratio. Land required 1.4 ha. Land allocated 9.26 ha. This is more than six and half times more land than necessary in valuable Green Belt which the planners should be looking after.

1.18 I regret that my conclusion is that this plan is a clear example of bad planning.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp17q/90  Respondent: 15084897 / Save Send Action Group (Andrew Procter)  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Answer (if comment is on questions 1-7 of the questionnaire): (No)

1.1 Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and surface water flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach.

1.2 The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. GBC have failed to apply any reduction which makes the plan undeliverable and unsound.

I believe it would be harmful to the character, quality of life and economy of Guildford not to reduce the housing figure to a number significantly below 12,426 new homes by 2034. I submit it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to develop on the scale currently proposed. I am concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site.

1.3 In view of the extent of physical and policy constraints, the inflated SHMA figure, and the transport evidence indicating that the Plan would lead to congestion, the OAN figure should be 400 homes per annum and the housing target after the application of constraints should be in the range of 200 homes per annum and kept under regular review.

1.4 The extent to which the Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way casts doubt over whether sustainability has been assessed. The report treats various major development sites in Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”, fails to consider options that constrain development or that make greater use of brownfield or previously released greenfield land, focuses on a range of options that involve developing on even more Green Belt around Guildford in order to protect Green Belt around Woking does not consider environmental limits or impact on the next generation in terms of weighing demand for homes for the young alongside the use of all possible last resort greenfield options by one generation.

1.5 Policy in relation to sustainable development has been changed in a way that runs counter to GBC’s previous predetermined agenda for building on the Green Belt.

1.6 Under newly amended para 4.1.4 It is stated that "Local Planning Authorities are encouraged to include a policy within their Local Plan that embraces the presumption in favour of sustainable development. Policy S1 meets this requirement and adopts the model wording suggested. When implementing Policy S1, local circumstances will be taken into account to respond to different opportunities for achieving sustainable development. In accordance with the NPPF, the PRESUMPTION WILL NOT AUTOMATICALLY APPLY to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding. The National Planning Policy Framework requires that objectively assessed needs should be met unless: “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or specific policies in this Framework indicate development should be restricted.”

1.7 Under this amended policy it is clear that the OAN should be constrained.

1.8 The specific amended policy described above is of particular relevance to Guildford including sites protected under the Birds and Habitats Directives, Sites of Special Scientific Interest, Green Belt, Local Green Space, Area of Outstanding Natural Beauty, designated heritage assets and locations at risk of flooding. In this situation, is it appropriate for the Appraisal to rule out not meeting needs in full from a sustainability perspective?
1.9 Notwithstanding that the Sustainability Appraisal should be proportionate, strategic and look at significant matters, the assessment appears deficient and biased in the spectrum of alternatives it considers to the point that it is questionable whether it meets the requirements.

1.10 The plan fails to produce a coherent development strategy for Guildford Town. GBC has deleted its independently commissioned Town Centre Master Plan by the well renowned firm of architects and master planners Allies and Morrison as a source document from the plan even though this master plan was previously well publicised and enthusiastically adopted by the Council.

1.11 Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2020. This is too late!

Answer (if comment is on questions 1-7 of the questionnaire): ()

OBJECTION TO SEND HILL DEVELOPMENT - POLICY A44, 1.9 - LAND WEST OF WINDS RIDGE & SEND HILL - LATE STAGE APPLICATION WITHOUT ANY PRIOR CONSULTATION  

I strongly object to the above proposed planning development by eroding Send's Green Belt status on the above site.

I object to your proposal to allow 40 houses and 2 travellers pitch sites, this being a newly designated site and not included in the regulation 18 draft. Therefore correct procedure has not been carried out by yourselves.

Send Hill is obviously a narrow single track lane, having managed to retain it's peaceful, beautiful countryside, currently enjoyed by all residents and dog walkers from other areas. For this reason it has permanent Green Belt status.

It is totally inappropriate to increase the traffic flow. The junction where it meets Potters Lane is very dangerous and residents have suffered accidents as a result of being unable to see any oncoming traffic. I rely on sound alone when pulling out and have narrowly avoided head on collisions in the past and therefore also make my objection on the grounds of safely.

Send's infrastructure cannot cope with the current population, the problems with doctor's appointments, school places and traffic are consistent. The Council would be well advised to ensure that it provides acceptable standards of living for the current residents before irresponsibly placing further stress on the living conditions of it's current council tax payers.

Please confirm receipt of this letter and advise the Council's statutory requirements regarding proposed planning consultations.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We are writing to object to the proposed development at Garlicks Arch in Burnt Common policy A43. This proposal was added at very late notice after previously being assured by the council leader there would be no significant new changes to the DLP in Send. The use of regulation 19 further adds to the betrayal. This enormous new proposal must require a full consultation under regulation 19. The 2014 proposal for 430 houses was rightly reduced to 185 in April 2016. This late and hasty attempt to push through this plan increases the number to 485! A totally excessive and unneeded number based on inflated projections of population growth by GBC. The proposed light industrial units can easily be accommodated at Slyfield and the proposed 4 way junction to the A3 will cause traffic gridlock, noise and air pollution for local residents. All this without yet mentioning this 100 acre site is GREEN BELT (a word no longer found in the GBCs dictionary). With prime agricultural land, rare enough in Surrey, and ancient 16th century protected woodland within the boundary, this land must be saved. There is a brook running through the middle of the site essential for drainage and the area is prone to flooding already. The site prevents urban sprawl between Ripley and Send vitally important. The villages medical centre already extremely busy and local schools cannot cope with the 25% population growth this plan will bring to our village. We have received emails from relevant ministers and Sir Paul Beresford stating government policy is to protect the Green
Belt and listen to local residents in these matters. Why does GBC neither protect or listen to those it is elected to represent. Conservative councillors ran for election on a protecting the Green Belt, now elected they stab us in the back.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (*)

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Finally we also object to policy A44 West Ridge and Send hill. Again this site is new, not included in the regulation 18 draft and not previously consulted on. This is high quality Green Belt land. The subsoil of the site contains documented land fill waste and is vented, making it totally unsuitable for development. Access is completely insufficient. Please reject these proposals they are unwanted, unnecessary and have zero local support.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As residents of Burnt Common our area has been threatened with irreversible and excessive development on all sides completely destroying what is left of our rural landscape.

I object to policy a42 change at Clockbarn in Tannery Lane because;

there has been a 33% increase in planned new homes from 45 to 60 ignoring hundreds of previous objections and adding to traffic congestion at the a247 junction. Contributing to increased surfaced water flooding which already exists. It will impact on the countryside surrounding the river wey navigation and it is greenbelt land which should not be built on.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

once again, thousands of previous objections have been ignored and again there is no demand for so many houses or travelling show peoples plots at this location. This land is permanent green belt, and no exceptional circumstances exist for development. It is prime agricultural land and contains ancient woodland that has existed since Tudor times. Again, this area is prone to frequent flooding and contaminated by lead shots accumulated over 50 years. Living in Burnt Common Lane, we will be massively effected by this excessive development and planned new junction to the a3, massively increasing traffic in our area. Once again, this is green belt land that should not be built on, this will also join Send and Ripley into one continuous inhabited area, defeating the purpose of the green belt in separating our villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
it was deleted from the 2014 draft because of objections but now has been re-added to the plan. Along with Garlick's arch which previously replaced it. Even worse, the word minimum has been changed to maximum, despite a decline in demand for industrial land. Why plan an industrial development in the middle of the greenbelt, when Slyfield and Guildford still have empty units? The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough, not an excessive allocation of 10 hectares at Send, once again, this is green belt land and should not be built on. The increased traffic caused by this development and the Garlick's arch development and the new a3 junction will choke our village to death with congestion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have been a Send Marsh resident for over 20 years and I am writing to object to the latest change made by Guildford Borough Council concerning the draft local plan for Send, in particular the designation of the Garlicks Arch site.

This objection is on grounds that not only is this site unsuitable for a number of reasons of which I will elaborate throughout the course of this email, but that the manner in which this last minute amendment to the local plan has been executed, which I do not believe has been carried out in a fair and transparent manner; considering the time-frame, the extent of the amendment and finally the lack of consultation with residents, Parish council and the necessary regulatory bodies concerned with proposed development.

Firstly I would like to bring your attention to the application 16/P/00783 on Oldlands Field Yard, a small area of the recently earmarked site for mass development on the Garlick's Arch site, of which there is a proposal for 9, two storey dwellings that was filed almost exactly a month (12th April) prior to this latest last minute amendment to the local draft plan on 11th May. This appears to be too much of a coincidence and exemplifies the seeming lack of transparency and stealth tactics employed by Guildford Borough Council and developers in seeking approval to develop part of the site in question, which would provide a 'foot in the door development' and platform to further develop the wider site and strengthen the case for the inclusion of the Garlick's Arch site within the draft local plan. Furthermore, there is evidence to support this possibly cynical view in the possibly over-comprehensive extent of accompanying reports to the 9 dwelling development, and the transport modelling being undertaken by Surrey County Council and Highways England, which would reveal that GBC have known about the change in site designation for the local plan and benefits afforded by the initial 9 dwelling development for some time. There has however been a lack of publicity and public consultation for both these cases, and the change in site designation in the amendment comes 8 working days prior to the full council meeting - surely unacceptable in view of the above and considering the extent of the change and impact of an additional 300 dwellings on both the villages of Send and Ripley. If not mandatory, surely there is a duty of care to notify the residents of these areas affected for even the site being included provisionally, despite the 6 week allotted public consultation period after the decision reached on 24th May.

The site in question is deemed to be medium sensitivity in terms of Greenbelt yet it is being considered for mass development when there are not only low sensitivity areas available in close proximity but a list of brownfield sites - arguably in more strategic locations with regards to the industrial designation of the site, available for re-use in for example, Slyfield, as per the 'previously developed site' report also published by GBC. In the mass development study and
village expansion survey it evaluates that Ripley is unsuitable - how then can a development site of this scale be promoted in the local plan that will implicate Ripley for the very reasons that deemed it unsuitable? These sites cannot be treated in isolation, and this site at Garlick's Arch straddles both parish council zones and will have wide-ranging implications for the residents and well-being of not only Ripley and Send, but also Clandon.

I object to the housing need assessment - It is forecast that the population of the Guildford borough is actually set to plateau and decrease (and any statistics contrary to this are surely inflated by the false counting of university students who do not reside past their degree period), so surely therefore there is no need to increase the 13,860 houses already proposed for the borough by 300 in this development, and certainly no local need in Send to expand the Village by 25%.

One of the reasons for the preservation of Greenbelt is preventing Urban sprawl and preventing the merging of towns and settlements - the site at Garlick's Arch, once fully developed would represent the single largest development in the area, not only in isolation but also if coupled by the Send Marsh Road/ Linden Way housing estate positioned opposite, only separated by the Portsmouth Road.

The site is not only Greenbelt land but also has 4.6 hectares of permanently protected ancient woodland which requires Forestry commission consultation and approval for any development in close proximity to in the first instance. Has the council considered this or given any thought to the implications the removal or damage to this woodland will have on not only the UK's ancient woodland stock but to the damage to local biodiversity and habitats of wildlife?

The impact of this site on congestion and road traffic is another element which seems to have been overlooked by GBC. Whilst there is assessed benefits by GBC in the 11th May amendment of an additional junction onto the A3, surely this is short-sighted considering the resulting increased congestion on not only the A3 from this but also on the surrounding local roads of which, during traffic gridlocks, will be used by road users to avoid the A3. In addition, as identified by GBC in a congestion and traffic strategy report published in 2014, the Wisley A3/M25 interchange is already a bottle-neck for traffic congestion.

At a micro scale, The Portsmouth Road adjacent to the site and in particular the junction with Send Marsh road of which this new development is within 350 yards of, already experiences a high level of congestion and traffic

If we are to further assess the potential impact of this mass development in terms of education provision, it is already well known and publicised that this area of Surrey is well oversubscribed. The increase in 400 dwellings will not just place further strain on this system but will be untenable considering that during the period 2014/15, not only the schools within catchment area of this site but within a circa 15-20 mile radius, currently experience an average ratio of 2 applicants per place for both primary and secondary education.

These are pertinent points which require careful thought in relation to the sustainability of the Guildford Borough as a place for quality of life offer in the long term, in particular the areas of Ripley and Send. Mass development proposals in unsuitable locations and on unnecessary scales such as this cannot be justified.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A43 change because it ignores all previous objections made. It will cause over development of our village and the number of homes is excessive. It will generate excessive traffic in an already highly congested area. The current infrastructure cannot support that number of new homes. The development area is subject to flooding and is in a zone 2 flood allocation. The area is permanent green belt and no special circumstances exist to ignore this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58 change. It has previously been deleted because of major objections. There is no need to build industrial buildings in the centre of the green belt when Slyfield still has empty sites. The impact on surrounding rural roads will cause excessive traffic congestion. It will defeat the purpose of the green belt in preserving the rural area. There is no proven need for industrial buildings in the Send Ripley area.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the planning application A43 and A43a on two main grounds.

Firstly the amount of traffic: the excess of traffic caused by these developments, on what is already an overworked junction between Sendmarsh Road and the old Portsmouth Road into Ripley, will not only cause long delays for traffic at all times but will endanger to the public trying to cross the road or be picked up on the School run coaches.

Secondly the increase on our overstretched public services in the Send area: as a member of the Send Villages Medical Centre P.P.G I know that the Surgery is now overrun with it’s current Patient base. Send local Schools just can just about cope, so how can you justify extra houses and factory outlets without providing extra facilities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
This entire plan seems ill-thought out as it applies to the local population. It will fundamentally destroy the nature of the environment, community culture, and quality of life of those who currently live there, and those who you believe will move in.

It's clear that no realistic thought has been invested into how practical it is to bring in so many people. There are simply not enough schools, roads, medical facilities, and land. Firstly, building more schools/roads/hospitals is more easily said than done. Secondly, this will take years to complete. For anyone who has lived next to a single house undergoing renovation for a period of 3-6 months, this will pale into insignificance to a 2-5 year project (and that is just the houses). That doesn't reflect the traffic, degradation of roads/services, and increase in crime. Assuming that a supposed increase in resources were also provided, this would be an additional 5-10 year project, which would need funding and complete commitment from the existing community. The prevalence of flooding across the country shows that building on flood planes is unsound, and has knock-on consequences across the board. We already experience flooding here (every few years), but it is likely to be exacerbated as a direct result of this project.

From every so-called consultation I have seen, there is a clear demand from the population to avoid this taking place. We seem to be in a position where no matter how much we object, we are asked again and again until we simply tire of it, or miss out on an opportunity to respond in a timely fashion. This is undemocratic, and a terrible reflection of the contempt being shown to the community and due process.

I understand that there is a need for more residential properties in the UK, but this location is far from ideal, and the cost paid by each resident here far outweighs the benefit achieved by new houses. Success for those moving in, is not having a place to stay, but a viable residential and familial experience. Those being promised houses here, are not going to experience what the village currently does. That community will no longer be. This is a false promise, a false economy and disingenuously being used to drive a financial agenda, not a social one.

The additional fact that green belt land is being used to support this suggests that there are now few boundaries being respected. This doesn't bode well for any organisation that is expected to honour rules and regulations in the future. What hope do we have when we've already stretched the definition of compliance? Destroying large areas of protected land will impact on wild-life, air quality, and psychological health. It also impacts on the council's ability to represent themselves with any sense of credibility. Despite every comment being made, there seems to be a polite nod, but no respecting the opinions and demands offered.

This whole process has little credibility and seems highly indefensible.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/298  Respondent: 15097345 / Rosemary Key  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford.
2. I object to the building on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded.
3. I object to the exaggerated “housing need” figure of 13,860 which is far too high and results in the completely unnecessary development of the Green Belt. The way students, economic need and affordability are calculated inflates the housing need.
4. I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford’s urban brownfield areas much closer to existing transport hubs.
5. I object to the proposed new interchange onto the A3 at Burnt Common because it would be disastrous for Send and the (A247) would be gridlocked all day.
6. I object to the proposed new interchange onto the A3 at Burnt Common because the Transport Evidence is incomplete and unreliable and shows there will be congestion because Send would be used as a cut through to the A3/M25.
7. I object to all the proposed sites in Send because they were not included in the previous consultation in 2014. Unlike the rest of the borough Send has not been properly consulted and all its sites have been changed substantially
8. I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.
9. I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.
10. I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.
11. I object to building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.
12. I object to the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill
waste which is currently vented. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

13. I object to the large proposed development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.

14. I object to the fact that infrastructure requirements have not been properly considered and are inadequate to deal with proposed housing levels. Roads, doctors and schools will be unable to cope.

15. I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.

16. I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan2015 within the plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

A43 - I OBJECT - the proposal to develop the land at Garlick's Arch is NEW and was not included in the Regulation 18 draft and has NOT been consulted on previously. It is Green Belt and should not be built upon, there are no exceptional circumstances. It is an area of great natural beauty and what GBC is proposing is simply outrageous and would involve the destruction of ancient woodland. The proposed industrial development is not required and a new 4 way interchange onto the A3 would be disastrous for Send. The Send road (A247) would be gridlocked all day as it would be a through route to Woking for traffic leaving the M25 and the road infrastructure is insufficient to take this significant increase in volume of traffic.

A44 - I OBJECT - the development of the land west of Winds Ridge and Send Hill is new and was not included in the regulation 18 draft and has not been consulted on previously. Any housing development is inappropriate due to its status as Green Belt land within an area of beautiful country side. I OBJECT to GBC building on Green Belt land and to the removal of Send from the Green Belt. Furthermore, the subsoil of the site contains unsafe landfill waste which is currently vented. The proposal to include 2 Travellers Pitches is inappropriate due to the narrow width single track country road which does not allow sufficient access.

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT. Send should not be removed from the Green Belt. The village provides an important buffer between Woking and Guildford and without the Green Belt status the entire area will be covered in urban sprawl. There are no exceptional circumstances which give GBC the right to do this. In particular the land at Garlick's Arch is covered in ancient woodland and should not be built upon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I object. I do not agree that there is sufficient evidence for the need to build so many additional houses and industrial space in Send and in particular at Burnt Common. The Employment Land Needs Assessment (ELNA) 2015 shows an 80% reduction in employment space required form the ELNA 2013, and therefore the additional industrial space proposed at Burnt Common is not required and there is insufficient evidence to support the need for it. I do not understand why the Council would propose such a new site anyway when Slyfield would be the appropriate site for any further development.

There is insufficient evidence to support the need for the additional housing proposed in Send and the number of foreign students has been wrongly used to inflate the need for additional houses. The proposal also would remove Send from the Green Belt and I OBJECT VERY STRONGLY TO THIS. There is insufficient evidence to clarify how the local infrastructure would cope with such a development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)
I object. Guildford Borough Council have not followed the correct process in relation to the number of houses to be built in Send. Since 2014 GBC has changed every major site in Send proposed for development and now just added a massive new road junction at Burnt Common. These are significant changes and require another full consultation under Regulation 18.

Land at Burnt Common, London Road, Policy A58

I object to this policy because:

It was deleted from the 2014 draft because of all the objections made previously. The fact that it is now included shows a failure of process and a lack of democracy.

It now includes the word "minimum" which is a change from the previous "maximum" in the 2016 plan and there has been a decline in demand for industrial land so this makes no sense at all and opens this site to unlimited development well beyond what is in the local plan.

Building industrial/warehouse in the middle of the Green Belt is outrageous, particularly when there are empty sites and industrial units at Slyfield and Guildford.

The impact on the traffic in Send and Ripley will be considerable and it is already extremely busy. There are many children and cyclists on these roads and their safety will undoubtedly be compromised by the additional heavy traffic.

Green Belt Policy 2 at Paragraph 4.3.15

I object to the proposal to inset Send Business Park from the Green Belt because

Further expansion or development in this location detracts from the openness of the Green Belt

It is an area of outstanding Natural Beauty adjacent to the beautiful Wey Navigation

There is highly restricted vehicular access along Tannery Lane in both directions, it is extremely narrow.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/87  Respondent: 15098145 / Lisa Kenny  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?
I am writing to object to the Draft Local Plan with particular concerns for Send and its surrounding area. I wish my concerns to be seen by the planning inspector and taken into consideration when a decision is being made.

My first concern is that Send is being removed from the Green Belt. This is extremely concerning as one of the original functions of Greenbelt Land was to act as a buffer zone between large urban areas thus preventing urban sprawl. The restrictions on development have always allowed settlements to maintain their own identity and prevent smaller settlements becoming engulfed. This completely goes against one of the aims of the plan which is to ensure sustainability. Sustainability means meeting the needs of the present without compromising the needs of the future. Removal of Greenbelt status could mean no future for the village as it is engulfed or grows so large it's sense of community is lost.

My second concern is that my understanding was that if significant changes were made to a plan, a full consultation was required. Having read the plan I was shocked to see that a new road junction is planned on the edge of the village. This has not been mentioned previously. Linked to this is the plan for 400 new homes at Burnt Common. This will put extreme pressure on local services along with adding to congestion and thus air pollution. In addition, Greenbelt Land will be destroyed which is completely unacceptable and clearly not inline with the 'sustainable' aim of the plan.

It is widely accepted that Brownfield sites are the most appropriate sites for redevelopment as they already have well developed infrastructures and do not require the destruction of the natural environment. With this in mind, you can appreciate how concerning it is that you seem willing to allow development on so many areas of Greenbelt in and around Send. Growth of the village would put additional pressure on the infrastructure and services and at peak times the main Send Road already struggles to cope. What also doesn't seem to have been considered is the addition of impermeable surfaces will cause shorter lag times and impact river levels downstream as well as localised flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

I object to the revised plan for S1,S2,H1,H2,H3,P1,P2,P3,P4,P5,E5 E6, E7,E9,D11,P12,P13,P14 - on the basis that A46 was not proposed or considered as a strategic site in the first consultation - it was safeguarded and was not removed from the GreenBelt. No exceptional circumstances have been demonstrated or approved. It also fails the National Planning Policy Framework - it is a Builder Led building proposal not local Parish Council/residents. We don't need a secondary school, many in the area are currently under-subscribed! - just one example of why it fails NPPF. There has been NO meaningful engagement with local residents.
There is inconsistency on how you are measuring Sustainability versus Sensitivity - Normandy and Flexford are two separate villages, on one hand you treat them on one = Sustainability. On the other, Sensitivity, you treat them as two separate. I object to this approach, it is illogical and unfair.

I object to the claim that A46 will lead to improving services for local residents. this is not fact, all shops and pubs in the village have closed over the years due to lack of trade - NO ONE IN THE VILLAGE USED THEM!

I object to the treat to the Thames Basin Heath Special Protection Area -A46 is only 800 metres away from the TBHSPA so it is within the 400m zone of Protection

There is a risk of flood, no consideration is being to your own Surface Water Management Plan which excluded land north of A46 because of Flood Risk.

I object to the disproportionate scale of the proposed building works in Normandy, it is completely unjustified and will destroy our rural environment. The road network cannot cope today, long delays on the A31 and A3 trying to get into Guildford or onto the major road networks to get to work. Also the detrimental health issues caused by massive development, plus the noise pollution and the continual noise and traffic chaos with Lorries and Construction materials and vehicles

I object to the basis of the plan which is distorted by large student numbers from Guildford University, which disproportionately increases the 'required' number of houses. the University must provide campus housing for the students, not destroy greenbelt land by trying to accommodate students off campus. The SHMA is not justified and should be reviewed.

GBCs local plan is unsustainable and is against the wishes of most local residents. There are many BrownField Sites in the Guildford area that would benefit from development of some type - there is no reason to destroy greenbelt land and affect areas of beauty and nature

Guildford Borough Council have not followed correct I strongly feel the council has totally disregarded resident views. The 2014 proposal for 430 houses went down in April 2016 to 185 and now I see it has gone up again to 485. These huge changes should go to full consultation under Regulation 18, not the shortcut of Regulation 191 This makes a mockery of the whole process.

It is very upsetting for our community that GBC are considering the above, I do hope that consideration will be made to the outstanding beauty of our countryside, our historic links and our wildlife and that our Green Belt protection is upheld.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: SQLP16/605  Respondent: 15098945 / ALISON TURNER  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

Send hill sites - the areas highlighted are landfill sites with methane gas discharge.
The sites are in permanent green belt area.
Southern county searches report E.2978.sn_hcp dated 5 jan 2005 identifies landfill site ref gu/12 with unrestricted waste.
This causes great concern of what it contains.
I am concerned about the water table being disturbed and flooding to my property.
The traveller accommodation assessment purported to have been undertaken in 2012 by Mill Field Services is flawed as this company dissolved in 2011 according to Companies House.
There has been a lack of consideration to the deterioration of our historical villages.
The site is NOT large enough for its proposed use and Send Hill is a single track country road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/50  Respondent: 15099265 / Andrew Crawford  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **Congestion on the trunk roads, A3/M25**
   I object to the development of the strategic sites due to A3 and M25 already being at capacity during peak hours. In the morning it regularly already takes 40 minutes or more to travel the three miles from my home to join the M25. Highways England has no plans to look at improving the A3 before 2020 and even then it is doubtful if those plans will be sufficient. It is therefore not sustainable to identify sites for further development which will worsen the congestion on these motorways and trunk roads.

2. **Congestion on the local village roads and lanes**
   Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. Send Marsh Road is already a rat run with constant traffic using it as a cut through. I object to further development which will cause greater congestion in and around our villages.

3. **Unsuitability of our local roads for heavy vehicles and more traffic**
   Many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
4. Lack of proper infrastructure planning for sites
I object to the lack of planning and implementation of infrastructure. For example at Garlick’s Arch. Without improvements to the infrastructure prior to development, the existing residents’ quality of life will significantly deteriorate in many ways. We already struggle to get doctors appointments and the local schools are already struggling.

5. Lack of Utilities Capacity
Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. I object to the development of Garlick’s Arch on the ground that there is little capacity in these networks.

6. Sites being planned in unsustainable locations
Many of the strategic sites e.g. Wisley Airfield and Garlick’s Arch, are in unsustainable locations. They do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. I object on the grounds that these sites are not sustainable.

7. Parking issues in local villages caused by larger population
Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems. To which I object.

8. Local healthcare facilities will be overwhelmed
Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. I object due to the further stress it will put upon existing health services.

9. Local policing facilities will be overwhelmed
Police services are seeing funding reduced. The development of the likes of Garlick’s Arch and Wisley Airfield will stretch the police services further and I object.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **Unbalanced allocation of development in one area of the Borough**
   Between the M25 and Burpham, a distance of only about 5 miles it is proposed that over 6,500 houses are built. This represents over 40% of the housing proposed in the Local Plan. I object to this area being hit so hard by the allocation of development, which is disproportionate to the rest of the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. Under Policy A43 you are proposing an additional 400 houses and 7,000sqm of industrial/warehousing. I object to this on the following grounds; this site is new and was not included in the Reg 18 draft so has not been consulted on previously (see 1. above), the land is Green Belt and as such is permanently protected by the NPPF which prevents the merging of settlements, the 7,000sqm of industrial space is not required since the latest ELNA shows a reduction of 80% in required employment floor space since the previous draft plan and 485 new house would create additional demand on the local school which has not got the capacity to cope.

1. Under Policy A43 you are proposing a new interchange for the A3. I object to this on the grounds that this would create an unacceptable increase in volume of traffic coming onto the A247 and through Send. It would inevitably result in the junction becoming the chosen route for traffic coming from the south on the M25 wanting to access Woking and the village and roads could not cope with this increased volume.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing to object to certain aspects of the local plan that GBC approved on 24th May. I understand that there is a six
week consultation period and I would be grateful if you could ensure my comments are put forward to the Inspector.

1. The GBC have not followed the correct process following significant changes from the 2014 proposals. I believe
that these require a full consultation under Reg 18 and that by using Reg 19 the whole process is invalidated.

Clockbarn Nursery Tannery Policy A42

I object to the change to Policy A42 because this shows a 1/3 increase in the number of homes and ignores the previous
objections raised by local people. This will worsen traffic problems along Tannery Lane and the junction with the A247.
Further erosion of the Green Belt is unwarranted and this will impact the countryside views from the Wey Navigation
canal/river.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

| Comment ID: | pslp172/1832 | Respondent: 15099489 / Christine Vinten | Agent: |
**Land at Garlick’s Arch, Send Marsh, Policy A43**

I object to the change to Policy A43 because it ignores the thousands of objections made by local people. These changes will cause over development of the village and the number of homes is excessive. It will create a join between Ripley and Send which defeats the purpose of the Green Belt and there are no exceptional circumstances to justify the undermining of this beautiful and permanent Green Belt area which includes woodland dating back to Tudor times. This change will generate excessive traffic blocking up the local roads of Send and Ripley. There is also no proven demand for the Travelling Show people plots proposed for this location.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Land at Burnt Common, London Road Policy A58**

I object to Policy A58 because it was deleted from the 2014 draft reflecting the objections that had previously been made. Also the word ‘minimum’ is a change from the word ‘maximum’ used in the 2016 draft and since that time there has been a decline in demand for industrial land. I do not believe there is a need to build industrial or warehouse development in a green belt area when both Slyfield and Guildford have empty sites. The 2017 Employment Land Need Assessment shows a reduction of demand of 3.9 hectares across the borough which shows the increase of 10 hectares in Send is completely unjustified. This development will have adverse effect on traffic volumes in local roads. The development will join up existing villages thus defeating the purpose of the Green Belt.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Green Belt, Policy 2 at paragraph 4.3.15**

I object to the proposal to inset Send Business Park from the Green Belt because it is an old non-conforming user in an area of outstanding countryside adjacent to the river Wey navigation. The roads are highly restricted for vehicle access on Tannery Lane in both directions. Development here would detract from the openness of the Green Belt and is inappropriate.

Please can you ensure my objections above are submitted as part of the Local Plan Consultation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write with reference to GBC’s draft plan and specifically to Policy numbers A42, A43, A43a and A44.

I object to the proposal to remove Send from the Green belt and would like to draw your attention to the Planning Practise Guidance document which clearly outlines the importance of the existence of Green Belt and even more importantly the protection of this invaluable facility.

Green Belt is there for very good reasons and it is grossly irresponsible for the council to even consider diminishing the protection to the environment, Surrey’s outstanding countryside and wildlife that this historic benefit offers the populace of the county.

I object to the councils proposals to develop the sites proposed in and around Send or he following reasons

The development will severely detrimentally diminish the effect of the Green Belt in which is a vital area of countryside. Send provides the required buffer between Woking and Guildford and to erode that will ultimately help in the destruction of valuable countryside in the immediate vicinity of the Surrey Hills, on of the Country’s areas of outstanding beauty and something that we all should be striving to protect.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

With regards to the development of Garlicks Arch and the destruction of open countryside to facilitate even more housing and industrial premises I object to what is clearly madness on the part of GBC.

Send and Old Woking already are subjected to ever growing levels of traffic and to develop this area along with the provision of a 4 way slip for the A3 will compound this. There is brown site land available in current industrial locations such as Slyfield to satisfy the councils desired development.

I also object to the development of the land in Send Hill. This is the most inappropriate location for extra housing. Send Hill is a narrow residential road most unsuited to extra development. The road is used by local children to walk to school or to the bus stop for the George Abbott School bus. Being a straight road with no pavements extra traffic would put children at risk. The proposed site is vented landfill and as such I would think entirely unsuited to housing development.

Send Hill is home to one or more colonies of bats. Future development would put these protected species at risk.

Development of Send Hill was not in the council’s draft and has not been consulted upon. It should be removed from the Local Plan on this alone.

The residents of Surry are continually bombarded by the council’s cynical and sometimes underhand attempts to undermine the standard of living in this beautiful county. I lived in Knaphill where Farmland was destroyed to build housing at Brookwood farm. At the same time Surry County Council published adverts championing the council’s obligation the protect farm land. We are faced with the same thing now in Send. Green belt land is for a reason and it is time that the council took notice of it and stood to protect it.

1. Under Policy A43 you are proposing an additional 400 houses and 7,000sqm of industrial/warehousing. I object to this on the following grounds; this site is new and was not included in the Reg 18 draft so has not been consulted on previously (see 1. above), the land is Green Belt and as such is permanently protected by the NPPF which prevents the merging of settlements, the 7,000sqm of industrial space is not required since the latest ELNA shows a reduction of 80% in required employment floor space since the previous draft plan and 485 new house would create additional demand on the local school which has not got the capacity to cope.

1. Under Policy A43 you are proposing a new interchange for the A3. I object to this on the grounds that this would create an unacceptable increase in volume of traffic coming onto the A247 and through Send. It would inevitably result in the junction becoming the chosen route for traffic coming from the south on the M25 wanting to access Woking and the village and roads could not cope with this increased volume.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing to object to certain aspects of the local plan that GBC approved on 24th May. I understand that there is a six week consultation period and I would be grateful if you could ensure my comments are put forward to the Inspector.

1. The GBC have not followed the correct process following significant changes from the 2014 proposals. I believe that these require a full consultation under Reg 18 and that by using Reg 19 the whole process is invalidated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Clockbarn Nursery Tannery Policy A42

I object to the change to Policy A42 because this shows a 1/3 increase in the number of homes and ignores the previous objections raised by local people. This will worsen traffic problems along Tannery Lane and the junction with the A247. Further erosion of the Green Belt is unwarranted and this will impact the countryside views from the Wey Navigation canal/river.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Land at Garlick’s Arch, Send Marsh, Policy A43

I object to the change to Policy A43 because its ignores the thousands of objections made by local people. These changes will cause over development of the village and the number of homes is excessive. It will create a join between Ripley and Send which defeats the purpose of the Green Belt and there are no exceptional circumstances to justify the undermining of this beautiful and permanent Green Belt area which includes woodland dating back to Tudor times. This change will generate excessive traffic blocking up the local roads of Send and Ripley. There is also no proven demand for the Travelling Show people plots proposed for this location.
Land at Burnt Common, London Road Policy A58

I object to Policy A58 because it was deleted from the 2014 draft reflecting the objections that had previously been made. Also the word ‘minimum’ is a change from the word ‘maximum’ used in the 2016 draft and since that time there has been a decline in demand for industrial land. I do not believe there is a need to build industrial or warehouse development in a green belt area when both Slyfield and Guildford have empty sites. The 2017 Employment Land Need Assessment shows a reduction of demand of 3.9 hectares across the borough which shows the increase of 10 hectares in Send is completely unjustified. This development will have adverse effect on traffic volumes in local roads. The development will join up existing villages thus defeating the purpose of the Green Belt.

_strongly object_to POLICY A44. 1.9ha LAND WEST OF WINDS RIDGE AND SEND HILL for the reasons listed below.

1. Our children would feel unsafe [Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]
2. At the bottom of Send Hill is a school, with the extra traffic this would become a potential danger zone to the children of the school and the local community.
3. Crime would potentially soar in the village putting extra burden on the already overstretched public services, for instance, the police, hospital/ambulance service and the fire station.
4. We would not feel safe in our own homes anymore.
5. [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]
6. Send Hill has a small road that is restrictive at the best of times and with the additional flow of traffic and the current infrastructure this would put heavy strain on this area
7. [Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it.]
   [Summary of redacted paragraph: proposal has the potential to increase tension between the traveller and non-traveller community, which would result in social, economic and environmental impacts]
8. This site is a land fill site and has unknown waste buried underneath it, digging this up would raise health and safety concerns within the Send community.

Comment ID: PSLPS16/82  Respondent: 15101793 / Julia Goddard  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Object to the 2016 Draft for Building Houses in Garlicks Arch Ripley mainly as I live around that area and it will have a negative impact on traffic going through and getting held up on Burnt Common Lane.

I like to walk my dogs around there. It is lovely to have our green belt and the wildlife needs to feel safe and able to remain there.

I Object to all Erosion of the green belt which would include Clandon building of houses and Send and Burpham, Ripley, Wisley. The negative effect it will have on car pollution and green peace and devastating traffic chaos across the region.

I object to the removal of any villages such as Send, Clandon, Ripley, Wisley. These are my key areas which I feel strongly about and adore the walks around the countryside with my two dogs.

I object to the limited consultation Period of all of this going ahead

I object to the houses being built in Send, Wisley, Ripley, Burpham, Clandon with no or little evidence for the alleged housing need numbers.

I object to the lack of immediate provision for new schools. if we remain the same then there will not be a huge demand on NHS or Schooling needs.

I object to the lack of any immediate provision for doctors surgeries in Send or Ripley area.

I object to Garlicks Arch and the new roundabout system that will be developed to handle all the traffic, the Ripley Bypass already struggles when the M25 gets blocked, so this would be ridiculous and not work.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Object to the 2016 draft for building houses in Wisley, Clandon and Send.

I live just across from Garlicks arch and I go to London from Clandon Station

At this minute in time these areas cant hold so much traffic and it is not sustainable to allow all the opposed housing to go ahead.

The Ramp for the A3 will have dramatic implications.

I object to the Erosion of all Green belt in the areas of Garlick Arch, Wisley, Clandon, and Send

I object to Limited Consultation Period

My daughter will be going to Clandon School and I object to the number of houses being built.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Please note I object to the following:

1. GBC have not followed correct process full consultation is required under Regulation 18.
2. Evidence GBC have failed to provide sound accurate evidence in terms of Employment Land Needs
3. Policy p2 Send should not be removed from Green Belt
4. Policy A43 .30ha Land at Garlick`Arch Burnt Common There is no need for more houses on top of 13860 already proposed
5. Policy A44.1.9 ha Land west of winds ridge and Send Hill . This site is new and was not included in regulation 18 draft and has not been consulted upon previously. This will cause additional dangerous road traffic due to the
very narrow width single track local roads. This area around Potters Lane is already a highly dangerous road accident area and the extra housing etc will only add to this resulting serious road death accidents. Will you be able to live with this as persons making decisions resulting in death.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Insetting the settlement boundary at both the St Bedes School site and the Wey Navigation at Send Road is totally unreasonable. This change would remove both areas from the Green Belt and render it open to permitting even more development in the village.

The land adjacent to Heath Drive is also part of the Wey Navigation Corridor. It is currently home to a great deal of wildlife. Fox, deer, badgers, owls and many other birds are found here on a frequent basis. The pleasant views when cruising on the Navigation will be totally lost if this change takes place.

The land at St Bedes School off of Bush Lane will be prime development land if this is allowed to happen. Again a valuable piece of Green Belt is involved here. A footpath runs through and allows the sight of nature in the wild. Buzzards, Kites, Skylarks and many other species along with deer, foxes etc., can be seen here. The time expired Junior school is currently being rebuilt on a nearby site and the current Junior school plan states it is to be returned to a green field. There is no exceptional reason for this to be changed.

I object strongly that these sites have been included in the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/86  Respondent: 15102209 / Martin Manktelow  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43 This particular site is set partly on farmed land and part in ancient woodland which is used for many country pursuits such as shooting, clay pigeon shooting and dog walking.

The land abuts the East Clandon Stream which floods most winters. The land is bordered on one side by the A3 and this very busy road would not make a good neighbour. The proposal is to place 400 houses on one part of the land and a range of industrial buildings to be placed on the rest. Furthermore, with so many buildings being added the run off the land onto the stream will be aggravated. I understand that the site is built on London Clay. This means that every time there is the potential for the stream to raise, the land floods. In addition the trees that are being removed will also exacerbate the problem. The copse is home to and regular visiting place for deer, foxes, owls, bats rabbits, hares not to mention a carpet of bluebells in spring

The wooded part of this land contains ancient oaks. Many of these oaks are hundreds of years old. The land is bordered on other sides by Kiln Lane and Burnt Common Lane, both are narrow residential lanes and totally unsuitable for large amounts of traffic. Both lanes exit onto the B2215 Portsmouth Road. This road is a feeder road to the A3 and M25 which is heavily congested both night and morning.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/87  Respondent: 15102209 / Martin Manktelow  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43a This policy relates to a four way junction giving North and South bound entrances and exits to the A3. Whilst many local people would welcome easier access to the A3, the local feeder roads are all narrow and already congested. The Clandon Road A247 is again already heavily congested night and morning. When the road reaches the village of West Clandon where it becomes The Street, it narrows down even further. It is totally unsuitable as an access to the A3.

The Northbound access would run over a piece of Manorial land owned by the Manor of Dedswell and Papworth, surely such land should be preserved.

The implications for traffic are dramatic. Every day Portsmouth Road is stacked back from the M25 to the Send traffic lights on the A247 from 8.00am to about 9.15am every day and then the flow is reversed in the evening. As there are no improvement planned for the A247 and other surrounding feeder roads this is an unsuitable change.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A44 Land to the west of Winds ridge and Send Hill

It is proposed to build forty houses and two traveller pitches.

This land is predominantly an infilled sand and gravel pit. It was filled over several years and still has venting points. The land is now partly farmed and grazed. It is a beautiful site which affords distant view from Potters Lane, Send. These lovely views would be totally altered. From the Send Hill side footpath there are distant views of the Surrey Hills. It probably represents backland development.

Send Hill is a very narrow lane and access to a small estate would be unsuitable. The site is not a sensible place for traveller pitches either as the access would be even worse for long vehicles. It is a mile from the village shops and bus stops.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

OBJECTION

My name is [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998].

Whilst I accept that every village has to grow and evolve, the proposals for Send Village are enormous and far reaching. Until about 10 days before the proposed Local Plan was launched the proposals for Send Village were comparatively low and with a few exceptions could possibly have been supported. However, as stated, 10 days before the approval a site was withdrawn and another, Garlick’s Arch (Policy 43a) was substituted. This adjusted the number of proposed houses from 185 to 485. The manner in which this Plan was inserted at a meeting at Guildford Borough Council which I attended was run in an appalling way. The Councillors who objected were belittled and laughed at by the Lead Councillor and the Mayor.

Answer (if comment is on questions 1-7 of the questionnaire): ()

My question is, "Why does your own planning committee not adhere to the aims of your own plan?" I refer specifically to a previous planning application 10/P/01451 whereby the planning committee agreed that it was important to retain existing employment land and furthermore to maintain distance between employment land and residential areas. Of course local residents thought that this was the right decision. However, later on, planning applications 14/P/01028 and 14/P/01029 called for two detached houses to be built within two metres of an industrial workshop and courtyard area. The planning committee saw fit to pass these applications and thereby go against their previous decision and against numerous points raised in your own local plan: 1/ Loss of existing employment land. 2/ Failure to provide land for new start-up businesses 3/ Your own plan states that it is important to retain land for manufacturing. The land that has been lost in this planning application has never been residential. It has been industrial since the second world war.

So, what is the point of having a local plan if your planning committee follows their own agenda?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am emailing you to say that I strongly object to Policy A43 and A43a.

As a resident in Burntcommon I feel that these would be disastrous to the local area. In addition to destroying a beautiful green belt area it would bring significantly increased traffic volumes to an already stretched local road network.
In my view Policy A43a is absolute insanity and would significantly impact the traffic volume past my house and through the village of Send to an untenable level. If a traffic assessment report has been completed showing the predicted impact on the local road network I would be grateful if you could send it to me.

Please ensure that my comments are seen by the Planning Inspector

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a resident of Send Marsh Green for over 30 years I wish to register my objection to the plan to add 485 new houses and traveller pitches in the Send Ward.

I object to the increase in housing in the area. This will cause a huge increase to local traffic, making travel more congested and stressful. Also schools are already at bursting point locally, you will not to be able to allocate places to all the new children that will be moving in without increasing spending.

Similarly, local GP surgeries will not cope with the population increase – it’s hard enough getting a convenient appointment already…..
I also object to Send being removed from the Green Belt. This means that more developments could (and I am sure would) follow, adding to the problems mentioned above.

For your records, my address is [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998]

Please ensure my comments are seen by the Inspector and send me a personal response.

Comment ID: PSLPS16/3529  Respondent: 15104897 / Terence Waters  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A35 for the following reasons:

1. The sheer size and density of the development is quite out of proportion to the local area. East Horsley has several hundred less houses and occupies an area of around six times as great.

2. The housing in the development will, inevitably, be completely out of character with the surrounding villages. These have been around for hundreds of years and grown organically. New houses have tended to be built singularly or small multiple units and therefore, over time, have fitted in - but a new 2,000-house estate in this setting is, frankly, a ridiculous suggestion.

3. The local roads are unable to cope with the existing traffic. Ockham Road North and South are narrow and windy, with only one pavement in some places which is often just 2-foot wide and which at times vehicles need to mount for large vehicles to pass in the opposite direction. The additional traffic generated by the new development will exacerbate an already intolerably dangerous situation.

4. The transport requirements of residents of the new development can only be met primarily by private cars and the existing train stations of Horsley and Effingham Junction. The junction between the Ripley roundabout and the A3 heading northbound is already crowded with cars during the rush hour - adding more cars with lengthen the delays currently faced. And is it sensible to have a development built so close to the A3 with all the emissions generated currently to which greater delays will only add? The car parks at the two stations are already close to capacity - last winter when I went to Horsley Station at 10.00am there were only six available spaces. Where I live, about a mile from the station, there is a layby next to the side of my property which is used by the customers of the local butcher, Connisbees and I already see cars parked there all day with the owners walking down to the station. If the car park becomes full, so will the layby and then we'll have cars parking on Ockham Road itself creating even more traffic problems.

5. The additional population created by the development is likely to be between 5-6,000 including perhaps 6-800 children of school age. There are not the medical or educational facilities available to cope with this sudden influx.
1. And perhaps most important of all the plan contravenes the Green Belt regulations in that the requirement for the development does not meet the "special circumstances" set out.

For all these reasons I object to Policy A35 and trust the Council will remove the Wisley Airfield site from the local plan.

**Answer (if comment is on questions 1-7 of the questionnaire):** (No)

I object to the new housing estate near burnt common. The traffic through Send and Ripley is dreadful already and more houses with an average of 2 cars per household will make this worse. We will see an increase in pollution in the village, not great when there is a school on the main road in Send.

The proposal to build 2000 homes on the site of Gosden Hill farm is disgraceful. The removal of this green belt land is unacceptable, will put a massive strain on an already overworked infrastructure and remove green open land from future generations. This site alongside the A3 is totally unsuited to housing development. I will fight the planning decision to build on this land and ruin this location to the east of Guildford. This is not a suitable answer to the need for new housing. I urge the planners to reconsider this decision and remove this location from the plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Finally, you cannot expect an area and infrastructure such as the A3 and Junction 10 of the M25 to keep taking traffic from Surrey and the South:

The A3 backs up Northbound at the M25 for miles each morning
The A3 also backs up Northbound approaching Guildford (cathedral hill) in the morning.
The A3 is choked with 2-3 mile gridlocks every evening with return traffic around Guildford Bypass
The A31 is gridlocked trying to join the A3 from close to Farnham (4-5 miles) every morning. The A247 is gridlocked through Send approaching the Burntcommon roundabout every morning. Ripley High Street is gridlocked at both rush hours at the Pyrford Lane junction.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the proposed planning at Garlicks Arch for the building of houses. This is an unspoilt wildlife area with horses, deer, rabbits etc, streams and an allotment area. It would create an enormous amount of traffic, therefore blocking roads and transforming this peaceful village.

Please do not let this go ahead.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to building 400 houses and 7000sq metres of industrial space at Garlicks Arch. The site is ancient woodland with many wild animals, including bats, deer, red kites, badgers, pheasants. The site would not make a clean environment for residents with ever-growing pollution from the already over-used A3. It is covered by electrical pylons and cables. The A3 is already choked most of the day with traffic approaching the M25 and in the evening around the A3 Guildford bypass. The local infrastructure cannot support this and there are other areas that would suit development better with a totally new junction onto the M25 required.

Industrial space should be extended at Slyfield which is already deemed INDUSTRIAL! Brownfield sites should be better utilised.
I object to a new interchange with the A3 at Burntcommon because Send and Ripley would need to take traffic from all new developments in the area, namely any at Wisley, Gosden Hill or Burpham plus traffic from Woking and surrounding areas will further choke and gridlock Send and Ripley.

Again, the site would not make a clean environment for residents with ever-growing pollution from the already over-used A3.

The A3 is already choked most of the day with traffic approaching the M25 and in the evening around the A3 Guildford bypass. The local infrastructure cannot support this and there are other areas that would suit development better with a totally new junction onto the M25 required.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the development of 40 houses and 2 travellers' pitches at Send Hill. Disturbance of the documented 'unsafe' landfill waste within the subsoil (registered at Guildford B C) is an environmental hazard. Again, the area has outstanding beauty and is wholly unsuitable for development.

<tr>
<td><strong>Answer (if comment is on questions 1-7 of the questionnaire): ( )</strong></td>
</tr>
</tbody>
</table>
1. I object the the development of the strategic sites at Wisley Airfield, Garlicks arch and Gosden Hill as the road infrastructure does not have capacity to cope with large developments of the proposed scale. As a daily commuter i see that the A3/M25 junction is congested by 07:00 hours daily and in the evenings the entire M25 is congested between J16 and J10. Both the M25 and the A3 would need significant increase in capacity prior to the inclusion of the proposed strategic sites in any local plan.

2. I object to the inclusion of the Wisley airfield site and Garlicks Arch as strategic sites due to the congestion on local roads at all times of day. For instance it is often hard to pull out of my home onto the main road in Ripley due to a continual flow of traffic, adding more residents to the local area will result in a large increase in the number of accidents, especially as the roads are narrow.

3. I object to the Strategic sites as the road network that currently exists is barley maintained by the council, an increase in the traffic and number of HGVs using the roads will result in further deterioration. Many roads have large potholes on their perimeters meaning it is dangerous for two vehicles to pass in some places. Additionally there are limited cycle lanes and footpaths making it dangerous for pedestrians and cyclists on the roadways in the area.

1. I object to the inclusion of Wisley airfield and Garlicks Arch in the local plan due to them being in unsustainable locations regarding public transport. Neither location has a suitable train station located within realistic walking or cycling distance, this means only bus services and cars are feasible. Due to the large size of the sites its unrealistic to assume everyone will use the bus as it will not have capacity for the 200 homes at peak times unless 50 buses are to arrive in convoys to transport commuters. TO make these sites sustainable you must build a station and a branch line, or an overground tram similar to those used in Wimbledon at the developers cost, this would then also benefit existing local communities.

2. I object the the inclusion of the large strategic sites as insufficient parking will be provided, the village of Ripley already has problems with residents parking on pavements, there is not enough space to support additional vehicles which would be here. Additionally the parking at local stations is insufficient, a multistory car park would need building at each station to accommodate even one of the smaller proposed strategic sites.

3. I object to the local plan based on the strain this will put on Emergency services, a new hospital, fire station and policing facilities would need to be provided for so many new residents.

4. I object to inclusion of the strategic sites as i feel these would be detrimental to the environment in an already polluted area due to its proximity to M25 road network.

5. I object to the proposed strategic sites as i fail to see how these are in any way helpful to the needs of local residents, if you also fail to provide improvements to the transport network, and rail access for the many new commuters who will move to the area there are no benefits to existing residents that you represent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. As a keen runner I object the the inclusion of the Large strategic sites at Wisley airfield and Garlicks Arch due to the inevitable deterioration in air quality that will ensued.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/118  Respondent: 15106689 / Joseph Hine  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Local plan 2016 for the following reasons

1. I object to insetting of the local villages of Ripley, Send and Clandon from the Greenbelt. The purpose of the greenbelt is to prevent urban sprawl, as such removing the villages specifically those located between your identified strategic sites at Wisley airfield and Garlicks Arch would seem to be encouraging an urban sprawl directly damaging the integrity of the greenbelt. As these Strategic sites sandwich Ripley it would seem highly important for Ripley to remain washed over within the greenbelt to provide separation and identity to any proposed new developments and those existing at present.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/119  Respondent: 15106689 / Joseph Hine  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the overbearing size of the proposed developments at your strategic sites of Wisley airfield, Garlicks Arch and Gosden Hill as all of these sites are larger than the villages that are established and are proposed to act as hubs for new residents to use for facilities amenities and transport. I appreciate some development is required but it should be in proportion to surrounding established villages to complement and improve rather than to overshadow and swamp them. The sites proposed would be significantly overdeveloped.

2. I object to your allocation of a large portion of housing development within a small geographical area of the borough, the housing development should be based not only on a few large sites which are easier for developers to profit from but on smaller sites that can be scattered across the borough to distribute pressures on services and facilities evenly, the inclusion of a single large site should mean no other large sites are allowed within close
proximity due to the massive increase of traffic, density of housing and pressure on local infrastructure this will bring.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object to the site at Garlick's Arch being developed on the grounds that this development is simply unsustainable. Living opposite the proposed site I am aware of the lack of local bus services, the lack of a railway station within a thirty minute walk and the lack of local infrastructure in terms of schools, doctors surgeries and shops. The proposed development of an additional 400 houses here will severely impact the lives of us local residents.

- Local police services, which are already seeing funding reduced are stretched now, so I object to the proposed development at Garlick's Arch and Wisley Airfield as it will stretch these resources even further.

I hope that common sense prevails and that all of the objections of local residents who care deeply about our community are listened to.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
- I object to the lack of immediate provision for any new schools. My wife is currently expecting our first child and with a proposed extra 6,500 houses to be built between the M25 and Burpham, our local primary schools will be placed under even more pressure for places. Our children will potentially have to travel long distances to go to school which will affect their quality of life and add more traffic to our already congested roads.

- I object to further development as it will cause further congestion on our roads in and around our villages. The A3 and M25 are already at saturation point when I try and get to work during rush hour, our villages have long queues through them and parking spaces are virtually non-existent in Send and Ripley. Extra homes in the area will put further pressure on our roads and cause even more pollution in our area.

Answer (if comment is on questions 1-7 of the questionnaire): ()
We are writing to object to the proposed development at Garlicks Arch in Burnt Common policy A43. This proposal was added at very late notice after previously being assured by the council leader there would be no significant new changes to the DLP in Send. The use of regulation 19 further adds to the betrayal. This enormous new proposal must require a full consultation under regulation 19. The 2014 proposal for 430 houses was rightly reduced to 185 in April 2016. This late and hasty attempt to push through this plan increases the number to 485! A totally excessive and unneeded number based on inflated projections of population growth by GBC. The proposed light industrial units can easily be accommodated at Slyfield and the proposed 4 way junction to the A3 will cause traffic gridlock, noise and air pollution for local residents. All this without yet mentioning this 100 acre site is GREEN BELT (a word no longer found in the GBC's dictionary). With prime agricultural land, rare enough in Surrey, and ancient 16th century protected woodland within the boundary, this land must be saved. There is a brook running through the middle of the site essential for drainage and the area is prone to flooding already. The site prevents urban sprawl between Ripley and Send vitally important. The villages medical centre already extremely busy and local schools cannot cope with the 25% population growth this plan will bring to our village. We have received emails from relevant ministers and Sir Paul Beresford stating government policy is to protect the Green Belt and listen to local residents in these matters. Why does GBC neither protect or listen to those it is elected to represent. Conservative councillors ran for election on a protecting the Green Belt, now elected they stab us in the back.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Finally we also object to policy A44 West Ridge and Send hill. Again this site is new, not included in the regulation 18 draft and not previously consulted on. This is high quality Green Belt land. The subsoil of the site contains documented land fill waste and is vented, making it totally unsuitable for development. Access is completely insufficient.

Please reject these proposals they are unwanted, unnecessary and have zero local support.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am a Ripley resident and I object to:

- all erosion of the Green Belt
- any “in-setting” of any villages from the Green Belt
- the disproportionate amount of development in one area of the Borough
- the limited consultation period
- the last minute inclusion of new sites with less than 2 weeks’ notice
- the lack of any evidence for the alleged housing need numbers
- the lack of immediate provision for new schools
- the lack of any immediate provision for Doctor’s Surgeries

I am writing to advise that I object to the Final Draft Local Plan for Send Ward:

Clockbarn Nursery, Tannery Lane (Policy A42, page 220)

Land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (Policy A43, page 222)

Land for new north facing slip roads to/from A3 at Send Marsh/Burnt Common (Policy A43a, page 224)

Land west of Winds Ridge and Send Hill (Policy A44, page 226)

My husband and I have lived in Potters Lane, Send in excess of 25 years. My husband having originally grown up in Send, we chose to return to the village to enjoy our retirement. We have many family and friends living close by, including both my daughters and grandchildren, all of whom regularly visit us.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The access road to Send Hill from Potters Lane is a narrow single track road and not suitable for 40 houses and 2 travellers sites. This junction is treacherous with no clear vision if you are coming from Send Hill into Potters Lane. With speeding motorists using Potters Lane as a cut through to and from the A3, any additional traffic will make this junction even more hazardous. Myself and my daughter narrowly missed being involved in an accident today on the bend heading from Potters Lane to the Send Hill turning – a large lorry and a Fiat 500 had been involved in an incident where the Fiat had been damaged by the lorry where the road is very narrow. The previous week I was nearly involved in a head on collision on the same bend with a lorry in the middle of the road as the lorry was too large for the narrow lane, resulting in the lorry leaving tyre skid marks which can be seen on the road. My daughter’s car has been damaged by a passing car coming from Send Hill, where her wing mirror was broken, and I have had the same experience, these are not isolated incidents as Send Hill and Potters lane are too narrow for the traffic using them. The proposed development would not be in keeping with the beautiful and peaceful surroundings of the area including the cemetery and the adjoining properties in Send Hill. I understand that the Send Hill Development was not part of any previous consultations and I am concerned about the impact of this level of development on residents and cemetery users.

Comment ID: PSLPP16/134  Respondent: 15106977 / Y C Smithers  Agent:
I also object to the plans for the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley, land for new north facing slip roads to/from A3 at Send Marsh/Burnt Common and Clockbarn Nursery, Tannery Lane. The infrastructure of Send Village is not able to cope with the existing daily traffic as it is, especially at peak times with commuters and school runs. Most days there is congestion along Send Road. My daughter worked in Ripley for six years and it regularly took her 50 minutes to travel from her house in Westfield to work during peak travel times. This was one of the reasons she chose to move jobs. There are no realistic alternative routes for motorists to take from Send Road and many cars chose to cut through Potters Lane to avoid sitting in traffic, many of which are large lorries who are too big for the road or speeding commuters in cars, which pose daily danger to the residents of Potters Lane, any increase in traffic will only add to the danger.

I would be grateful if you could pass my comments onto the Planning Inspector and confirm safe receipt of this email. I do hope you will take on board my feedback and the feedback of the residents of Send who very much care about the village and its surroundings and who have lived in the village for many years.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Clockbarn Nursery, Tannery Lane, Policy A42

I object to the Policy A42 change at Clockbarn in Tannery Lane because the increase to 60 houses in place of 45 homes is not in keeping with the rural area and Tannery Lane is very narrow and is not sufficiently wide enough to carry the significant increase in traffic. It is already treacherous at points along the lane and it will impact the open countryside views and will unnecessarily erode the Green Belt status of the area. The Marina development has already been given the go ahead and the area cannot cope with more building development.

Land at Garlick’s Arch, Send Marsh, Policy A43

I object to the Policy A43 change at Garlick’s Arch to allow for 400 homes and 6 Travelling Showpeople plots. This proposal will over-develop our village as this number of houses is unduly excessive and will erode the ancient woodland that has existed for hundreds of years. Guildford Borough Council should be protecting this area not developing it. It will join up Ripley and Send villages and will erode the Green Belt further and generate excessive traffic and block the already gridlocked roads. The area is prone to flooding and this proposal will increase the likelihood of further flood damage. There is no demand for Travelling Showpeople plots in this area, and ‘no exceptional circumstances’ exist to destroy the Green Belt status of this location. There are others areas in the Borough available for development. This area is already full to capacity, the Doctors Surgery and schools are struggling to cope with existing volumes as it is.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Burnt Common, London Road, Policy A58

I object to Policy A58 at Burnt Common because it was deleted from the 2014 draft because of previous objections and there is no requirement in the area for a minimum of 7,000 sq m of industrial warehousing. It will impact the small surrounding roads as the traffic will be gridlocked, the Ripley exit off the A3 in both directions is already treacherous with cars speeding through the area to cut through Send and Ripley villages. There is no demand for industrial warehousing in this area when there are warehouses available and empty in Slyfield Green which is purpose built for industrial units. It will only erode the Green Belt further and join up Ripley and Send villages unnecessarily.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposal to inset Send Business Park from the Green Belt because it is in a restricted vehicular access area along Tannery Lane from both directions and further expansion and development is not in keeping and will detract from the openness of the area. The existing infrastructure is not sufficient to cope with any increase in traffic and building development. It will seriously impact the area of outstanding building along the Wey Navigation, which my family and friends have enjoyed for many years.

My wife and I have lived in Send in excess of 24 years. I originally grew up in Send and we chose to return to the village to enjoy our retirement. We have family and friends living close by, including both my daughters and grandchildren, all of whom regularly visit us. The proposals above would considerably change the way of life in the village and surrounding area, along with many others chose to buy in Send because of its village environment and rural setting, away from built up areas. We live in Potters Lane and are impacted every day by commuters speeding through to and from the A3, both my wife and I and are family have had our cars damaged from cars speeding past and not keeping to their lane and clipping our cars.

I appreciate more housing is required but there are a number of brown fill land sites in the Borough on which to build. I strongly object to the Green Belt status being eroded away from Send Village. I do hope you will take my comments on board as our family very much care about Send village and its surrounding area.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to you to object to the changes to the Local Plan, especially the council's proposals to develop the land at Garlick's Arch at Burnt Common on the Send/Ripley borders for housing and industrial warehousing.

To summarise:

- I object to the erosion of the Green Belt in general
- I object to Ripley, Send and Clandon being removed from the Green Belt, this would cause destruction of our rural villages
- I object to the disproportionate amount of development being proposed, these are villages with defined boundaries that would disappear as a consequence of the proposals
- I object to the last minute inclusion of these proposals in the Local Plan with less than 2 weeks’ notice
- I object to the fact that no housing needs analysis has been produced and made available publicly, even affordable housing in these villages would be out of reach for the majority
- I object on the basis the infrastructure cannot accommodate the proposed development, there is no immediate provision for new schools, doctors surgeries etc.

I object, object, object…it’s a disgrace!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Once again I am compelled to write to you to raise objections regarding the local plan. I find it exasperating that I continuously have to raise objections to a local plan which demonstrates an absolute failure of a proper planning process. You have not made any attempt to mitigate and or amend the plan despite the significant volume of objections to the 2016 plan. Indeed Guildford Borough Council has made the situation even worse by combining proposals around Garlick’s Arch and Burnt common and not altering the proposals based on previous objections.

I object to the proposals to build 400 homes and 6 travelling show people plots on the land at Garlick’s Arch, Send Marsh, Policy A43, for the following reasons:

- Thousands of objections have been raised on this previously, this is in complete disregard to all previous objections
- There is no evidence of a demand to house travelling show people in this location,[Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]
- The land is in the Green Belt and no exceptional circumstances exist
- The number of homes is excessive ensuring complete over development of the village. There would be no definition of villages between Ripley & Send defeating the purpose of the Green Belt
- Infrastructure cannot support this. Traffic and pollution levels are already a major problem, schools and medical facilities, as required by law, are already over stretched
- The land is an ancient woodland that existed back in the reign of Elizabeth 1
- The area is subject to frequent flooding and is currently a flood zone 2 allocation, drainage remains substandard
- Due to local shooting facilities, the land is contaminated by lead shot

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposals to provide an allocation for a minimum of 7,000 sq m of industrial or warehousing on the land at Burnt Common, London Road, Policy A58, for the following reasons:

- This was deleted from the 2014 draft based on previous objections, why should it be resurfaced when there is no need to build industrial or warehouse space in the middle of the Green Belt? Guildford and Slyfield have empty sites and industrial units already, the requirement for more space does not exist
- Since the 2016 plan there has been a decline in demand for industrial land (as proven in the point above re: empty units)
- The 2017 employment land need assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares in Send in the Green Belt
- Infrastructure cannot support this. Traffic and pollution levels are already a major problem
- By joining up the villages there would be no definition between Ripley & Send defeating the purpose of the Green Belt
Yet again, having to write to raise objections to an ill-considered plan that has not been amended, despite the volume of previous objections, really demonstrates a lack of competence in this space. It is infuriating to local residents who yet again have to ‘go into battle’ with a local council that clearly is not listening to the community, it’s a complete disservice.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT ESPECIALLY TO 6 POLICIES: A36, A37, A38, A39, A40 & A41:
• Amount of new housing far exceeds local need.
• Housing density excessive when compared with existing development.
• Would transform the Horsleys into a sizable town, something for which no case is made.
• No local support.
• Collective impact of these 6 sites on a small part of the borough not considered. Should not be treated as isolated, separate sites.
• Total amount of new building out of scale with the planned development elsewhere the borough, especially less sensitive urban areas not protected by Green Belt.
• Sites unsustainable. Key infrastructure lacking. No adequate provision is made to increase it – e.g. poor wastewater capacity, lack of schools, absence of traffic management plan, flooding.
• No account taken of additional impact of Wisley Airfield site on Horsleys.
• Extension of settlement boundaries too permissive. Horsleys characterised by streets with development along only one side of the road. Policies allow too many adjacent green fields to be developed by squaring off boundaries and claiming they don’t contribute to Green Belt “openness”.
• Green Belt gap with neighbouring settlements hugely narrowed, especially if Wisley Airfield is built on.
• Will harm compliance with NPPF 81 – e.g. by making cycling (including Prudential cycle races) too dangerous, ruining the rural setting of Waterloo Farm campsite, destroying the ambience of Grange Park Opera’s new “Theatre in the Woods”.
• Policy A40 especially unviable because of high water table and poor drainage, leading to regular winter flooding.
• Safe access and egress at Site A40 unachievable, owing to flooding, high speed limits, poor sight lines, narrow access to existing properties, inadequate pavements for elderly and schoolchildren, increasing use by recreational cyclists etc.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT ALSO TO POLICY A35 (WISLEY AIRFIELD):
• Should not be in the plan for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment Properties.
• Irregularity of including this policy in the plan 24 hours before this planning application was rejected (like extending the time allowed for the developers to present their application).
• Unacceptable Conservative Party links between the developers and the Council.
• No Green Belt “exceptional circumstances” presented.
• Not a brownfield site as stated – only 15% of it.
• Proposed SCC waste site ignored.
• Loss of farming land.
• Too near RHS Wisley and Thames Basin Heath SPA.
• SANG would harm on SPA.
• Will aggravate traffic jams at A3 roundabout and M25 Junction 10.
• Unacceptable increase in air pollution.
• No existing public transport and stations miles away.
• No proper traffic data.
• Housing density far too great.
• Over 2,000 houses will swamp and destroy Ockham conservation area, with impact on listed buildings.
• Access confined to inadequate narrow lanes.
• Water table and surface water flooding not considered either for site itself or for downstream areas on River Mole.
• Major impact on neighbouring villages, especially Horsleys.
• No assessment made of collective impact on area of this and 6 Horsley sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT TO POLICY D3 (HISTORIC ENVIRONMENT):

- Supports overdevelopment: you can’t “enhance” history. Doesn’t ban private interests from trying to make aggressive profits from privatising, commercialising and Disneyfying public historic assets.
- Doesn’t ban development near historic assets.
- Ignores NPPF 126, 131, 132, 133.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8946  Respondent: 15107297 / Ian McQuattie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY D4 (DEVELOPMENT IN URBAN AREAS AND INSET VILLAGES)

- No commitment to expand social housing or accommodation for people who can’t afford so-called affordable homes.
- Not enough new homes in urban areas, despite demand and need for urban regeneration and protection of Green Belt.
- Objectives for inset villages cancelled out by plans for excessive housing growth there.
- Too much emphasis on traditional shops, when a lot of this sector is in terminal decline.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8923  Respondent: 15107297 / Ian McQuattie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT TO POLICY E1 (EMPLOYMENT):

- Poor evidence base.
- Too much encouragement to low added-value employment that’s needed elsewhere in the country.
- Fails to concentrate general business activity in urban areas or business parks that have the infrastructure.
- Fails to differentiate this from appropriate rural business.
- Too much encouragement of warehousing, for which Guildford is too congested.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<tr>
<td>I OBJECT TO POLICY E6 (LEISURE AND VISITOR EXPERIENCE):</td>
</tr>
<tr>
<td>• Danger of over development: success doesn’t depend on building “attractions” which can harm heritage and rural settings. No case made for creating new ones.</td>
</tr>
<tr>
<td>• No policy of opposing reduction in rural hotel capacity.</td>
</tr>
<tr>
<td>• No definition of what added value interventions by Council can make to normal visitor market mechanisms.</td>
</tr>
<tr>
<td>• No policy of supporting Guildford countryside as its prime leisure and visitor asset, whose value rises as London gets bigger and busier.</td>
</tr>
<tr>
<td>• No vision of what the ideal visitor experience of the borough actually is and how to support its various elements.</td>
</tr>
</tbody>
</table>
I OBJECT TO POLICY E7 (TOWN CENTRE):

- No statement in policy wording of value of Guildford’s rural setting and views.
- No consideration of Town Centre Master Plan, GVG proposals or station redevelopment plans.
- Proportion of new housing in town far too small. Development pushed into countryside, ruining the latter and harming urban regeneration.
- No brownfield register.
- Too much big retail, despite online shopping revolution and decline of traditional high streets internationally. Futile to try to turn Guildford into Woking or Kingston.
- No measures to support small, niche retailers in town, e.g. through business rates.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT TO POLICY E8 (DISTRICT CENTRES):

- Too much scope to expand rural retail centres to justify major housing expansion across the countryside, despite lack of demand. Will spoil character of villages while harming Guildford’s role as a retail hub.
- No measures to support existing rural shops and services, e.g. through business rates.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: PSLPP16/8938  Respondent: 15107297 / Ian McQuattie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E9

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY E9 (LOCAL CENTRES):

• No need for retail development “adjacent” to rural centres for same reason as Policy E8.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8909  Respondent: 15107297 / Ian McQuattie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY H1 (HOMES FOR ALL):

• Policy doesn’t set any constraints on building.
• Housing mix based on pre-Brexit growth and demographic assumptions and unreliable SHMA that wasn’t put out to formal public consultation and wasn’t scrutinised by Councillors.
• Fails to compel University of Surrey to use its thousands of planning permissions and existing space, such as car parks, for student accommodation.
• Lets University off the hook of accommodating all its students, so as to free up houses for the most needy in town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8911  Respondent: 15107297 / Ian McQuattie  Agent:
### Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1 OBJECT TO POLICY H2 (AFFORDABLE HOMES):

- Using the official definition of Affordable is a joke. Affordable homes round here are not affordable! Pushing for these homes just means pushing for more development.
- The viability clause lets developers off the hook of providing even these (non-) affordable homes. Too open to manipulation.
- Contradicts government policy to develop less advantaged regions of the UK. People don’t have to live and work in Guildford but should be encouraged to move to cheaper, less congested areas.
- This policy won’t affect market forces or house prices. Guildford is too small and too near London to influence these, however many homes it builds.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8913  Respondent: 15107297 / Ian McQuattie  Agent:

### Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1 OBJECT TO POLICY H3 (RURAL EXCEPTION HOMES):

- It loosens the criteria by allowing “market housing” and development that changes the housing mix. Developers would be able to override NPPF “exceptional circumstances” and other restrictions to build large houses in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8948  Respondent: 15107297 / Ian McQuattie  Agent:

### Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT TO POLICY I1 (INFRASTRUCTURE & DELIVERY)

- Infrastructure considered here as an afterthought, rather than pre-condition of development. Should be a key issue for the rest of the plan.
- Excessive housebuilding in countryside not supported by any funding or provision for infrastructure.
- Heavy focus on building on greenfield sites inefficient and unnecessary: cheap for developers but much more expensive for the public who have to fund the infrastructure.
- Draft CIL scale discourages use of brownfield land first.
- No plan for organic increase in existing traffic congestion, let alone once thousands of houses are built across the countryside. Local roads hardly considered. Green Belt being eroded before road widening/improvement plans certain, encouraging over-development of greenfield sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8950  Respondent: 15107297 / Ian McQuattie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY I2 (SUPPORTING DTP’S ROAD STRATEGY):

- Doesn’t allow for catastrophic increase in traffic resulting from spreading new housing estates across the borough.
- Out of sync with DTP’s strategy: houses to be built and Green Belt destroyed before plans for A3 etc implemented.
- Road plans too optimistic anyway, especially post-Brexit. Probably won’t happen.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8952  Respondent: 15107297 / Ian McQuattie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY I3 (SUSTAINABLE TRANSPORT):

- Just a list of generic measures, not related to real life or the particularities of Guildford.
- Fails to treat sustainability as a constraint. Assumes excessive levels of development proposed in the plan can be supported by sustainable development.
- Unrealistic. Most people can’t or won’t walk or cycle – commuters in a hurry, the elderly, children, people who are unwell or unfit, people carrying heavy shopping or other goods. I.e. most residents!
- Town’s eye view of transport. Ignores scarcity of existing rural public transport and commercial unviability of increasing it. Ignores terrible state of Surrey’s roads, potholes, flooding etc. Ignores extra stress to be created by huge new housing estates in countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8954   Respondent: 15107297 / Ian McQuattie   Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY I4 (GREEN & BLUE INFRASTRUCTURE):

- No teeth. Policy cancelled out by huge developments across the countryside. No mention of opportunity costs of loss of Green Belt services and amenities (e.g. farming).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8915   Respondent: 15107297 / Ian McQuattie   Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT TO POLICY P2 (GREEN BELT):

- No declaration of support for protecting the Guildford Green Belt, contrary to NPPF and government statements.
- No evaluation of value of local Green Belt as a public and private asset: it’s just treated as potential building land with a few inconvenient restrictions.
- Impact of Green Belt development on local agriculture ignored.
- Impact on rural leisure and tourism ignored.
- Impact on flood control ignored.
- Impact on carbon sink and knock-on effects for air pollution and climate change ignored.
- Impact on biodiversity ignored.
- Impact on natural heritage ignored.
- Impact on water catchment ignored.
- Impact on room for public space amenities (parks, cemeteries, waste facilities etc) ignored.
- Impact on rural business (e.g. mineral mining, film making) ignored.
- Impact on natural landmarks and views ignored.
- Harm to public health and wellbeing (physical, psychological) ignored.
- Allows excessive levels of development in breach of views expressed in last consultation and Conservative Party manifesto commitments at the last local elections.
- Has allowed ruling Councillors to argue that there is an acceptable percentage of Green Belt that should be sacrificed to development, when no such rule exists in the NPPF.
- Ignores alternative approaches, such as fair burden-sharing under which settlements would undertake to accommodate new development in proportion to their size.
- Disproportionate amount of development (most of it, in fact) to be in Green Belt. Too few new homes in urban areas where most people (especially the young and less privileged) want to live. This will act against much needed urban regeneration.
- “Insetting” of most villages disproportionate and unjustified in terms of their contribution under the NPPF to the purposes of the Green Belt. Based on flawed Green Belt and Countryside Study. Idea that most Guildford villages do not contribute to “openness” is subjective.
- Major settlement extensions allow indiscriminate housebuilding, as irregularly shaped villages are squared off to enclose green fields.
- Overall harm to Guildford Green Belt unjustified by any objective development need post-Brexit.
- Ignores most of NPPF 17 stipulations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8917  Respondent: 15107297 / Ian McQuattie  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
### I OBJECT TO POLICY P3 (COUNTRYSIDE BEYOND THE GREEN BELT):

- Gives Ash and Tongham more protection than rest of borough, including existing Green Belt. But they don’t contribute to preventing London sprawl.
- Special treatment of ward represented by current Council Leader and his predecessor. Politically biased.
- A minor extension of Green Belt in one place does not justify its major destruction elsewhere (the inset villages).

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

### I OBJECT TO POLICY P4 (FLOOD RISK AND WATER PROTECTION):

- Limits development of urban, brownfield, hardstanding sites, pushing development unnecessarily into the countryside.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

### I OBJECT TO POLICY P5 (THAMES BASIN HEATH S.P.A.):

- Compensation mechanism too feeble to provide protection.
- Cynical encouragement of SANG to justify nearby development in protected areas. Does not extend protection or amount of green space, and can damage them (e.g. dog and cat attacks on wildlife).

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---
I OBJECT TO POLICY S1 (SUSTAINABLE DEVELOPMENT):

- No definition given, no reference to its importance in the NPPF, no guidelines for applying it to planning.
- No statement of how economic, social and environmental impacts should be balanced.
- No mention of Green Belt, Guildford’s greatest legacy by far to Sustainable Development. No commitment to protecting it.
- No reference to most of the NPPF Core Planning Principles.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT TO POLICY S2 (BOROUGH-WIDE STRATEGY):

- Numbers based on growth and demographic data now invalidated by Brexit.
- No justification given for 13,860 housing figure. Figure based on a secret formula used by consultants and never seen by anyone on the Council or by the public. Council has failed to seek its disclosure.
- 13,860 figure confuses the OAN with a housing target. No definite housing target given, leaving too much scope for the Council to make one up. I can’t understand how we’re being consulted when we don’t know how many houses the Council want to build, taking all the contraints into account.
- Figures based on a Housing Market Area that ignores 2 neighbouring districts (Rushmoor and Mole Valley) and is much too small, since most people commute or travel far outside the Area to shop or study. This distorts the figures: no reason why Guildford needs to build nearly twice as many large housing estates as the rest of Surrey put together, or half of all sites over 100 units.
- High numbers involved would transform character of the borough from mainly rural/Green Belt to urban.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am a Send resident and have just returned from holiday and hope I am not too late to object to some of the Local plan on the following grounds:

- I object to the removal of Send from the Green Belt because the village and its countryside provides an essential buffer between Woking and Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the building on the Green Belt at Send at Garlick’s Arch, because it is not justified by special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded.

I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have lived in this village for over 40 years, understand the limitations of the infrastructure and the high cost of putting them right, and strongly object to any further housing development and urbanisation which have no evidence to back up their necessity.

The programme is being driven by remote central interests and ambitions and take no account of any objective approach to planning which should rightfully include consideration of and concentration on existing urban areas and brownfield sites, not open countryside and villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/137  Respondent: 15107777 / Paul Ayers  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I should also like to object about the disproportionate concentration of proposed new development areas in this part of the Borough ie Ripley/Send/Wisley. The infrastructure is clearly not able to support more population and the improvement of the A3 junction at Burnt Common would be grossly insufficient to improve even the current situation let alone an increased level of population and traffic movement.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/136  Respondent: 15107777 / Paul Ayers  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I also object to any reduction of land or village areas which are designated Green Belt. All the proposed areas and particularly Garlick’s Arch are in open countryside and this should never be considered for change of status in peacetime.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12128  Respondent: 15107777 / Paul Ayers  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the exaggerated “housing need” figure of 13,860 which is far too high and results in the completely unnecessary development of the Green Belt. The way students, economic need and affordability are calculated inflates the housing need.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am a resident of Send and am writing to object to various aspects of the recently published Plan – above.

Firstly I object to the extremely limited consultation period and the last minute inclusion of new sites such as Garlick’s Arch.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/513  Respondent: 15107777 / Paul Ayers  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A43 (Garlick’s arch, now 400 homes and 6 traveller plots) changes because:

The land is beautiful, ancient woodland and in a permanent Green Belt area.

There is not a demand for 400 houses in Send, the demand is nearer to Guildford.

This plan over allocates housing in Send as opposed to other villages.

I object to taking land out of the Green Belt, whose purpose is to protect villages, and prevent urban sprawl.

Our village of Send is a small rural village which cannot support 400 extra homes: the infrastructure is inadequate, especially roads which are frequently jammed with traffic.

It is often flooded and is currently flood zone 2.

There is no demand for Travelling Show people plots here.

You have ignored all our previous objections.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58 (Burnt Common, change to a minimum of 7000 sq m industrial land) changes because:

It was deleted from the 2014 draft because of valid objections.

The word maximum in the 2016 plan has been changed to minimum.

Since 2016 there has been a decline in demand for industrial land, not an increase.

There is suitable vacant land for industry in Slyfield.

The impact on local roads will cause traffic gridlock.

It defeats the purpose of the Green Belt.

Comment ID: PSLPS16/111  Respondent: 15107841 / Alex Batlin  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to register my objection i.e. I object - to the Guildford local plan 2016 involving Garlicks Arch. Thanks

Here are my reasons

1. Not protecting the Green Belt
   I object to the proposals to remove Ripley, Send and Clandon from the Greenbelt. There are no special circumstances to do this. Once taken the green belt is lost forever.

2. Disproportionate size of sites in relation to rural locations
   I object to the allocation of land to the strategic sites of Wisley Airfield, Garlicks Arch (Ripley/Send border) and Gosden Hill (Clandon). The proposed development of these sites will have a disproportionate impact on the surrounding local villages. They will have a permanent impact on each of these communities.

3. Unbalanced allocation of development in one area of the Borough
   Between the M25 and Burpham, a distance of only about 5 miles it is proposed that over 6,500 houses are built. This represents over 40% of the housing proposed in the Local Plan. I object to this area being hit so hard by the allocation of development, which is disproportionate to the rest of the Borough.

   I object to the development of the strategic sites due to A3 and M25 already being at capacity during peak hours. Highways England has no plans to look at improving the A3 before 2020. It is therefore not sustainable to identify sites for further development which will worsen the congestion on these motorways and trunk roads.

5. Congestion on the local village roads and lanes
   Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. I object to further development which will cause greater congestion in and around our villages.

6. Unsuitability of our local roads for heavy vehicles and more traffic
   Many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

7. Poor air quality concerns
   Further congestion, particularly in built up residential areas will only lead to greater levels of air pollution. I object to further development, which will result a fall in the air quality.

8. Lack of proper infrastructure planning for sites
   I object to the lack of planning and implementation of infrastructure. For example at Garlick’s Arch. Without improvements to the infrastructure prior to development, the existing residents’ quality of life will significantly deteriorate in many ways. How will the local services such as doctors and schools cope?
9. **Lack of Utilities Capacity**
   Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. I object to the development of Garlick’s Arch on the ground that there is little capacity in these networks.

10. **Sites being planned in unsustainable locations**
    Many of the strategic sites e.g. Wisley Airfield and Garlick’s Arch, are in unsustainable locations. They do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. I object on the grounds that these sites are not sustainable.

11. **Parking issues in local villages caused by larger population**
    Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems. To which I object.

12. **Local healthcare facilities will be overwhelmed**
    Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. I object due to the further stress it will put upon existing health services.

13. **Local policing facilities will be overwhelmed**
    Police services are seeing funding reduced. The development of the likes of Garlick’s Arch and Wisley Airfield will stretch the police services further and I object.

14. **Local social welfare facilities will be overwhelmed**
15. **Local shops/restaurant facilities will be overwhelmed**
16. **No protection of heritage assets**
17. **No protection of the environment**
18. **Overdevelopment of sites**
19. **Not meeting the needs of local communities**
20. **Insufficient affordable housing**
21. **Poor quality of layout and housing design**
22. **Insufficient consideration of SPA, SSI and Conservation Area issues**
23. **Lack of proper cycle lanes on local roads**
24. **Lack of proper pedestrian footpaths on local roads**
25. **Current SHMA figure of 693 p.a. too high**

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Also in the Plan there appears to be a total lack of any sensible evidence for the requirement for the overall housing numbers. Yet another reason to object to the Plan.

If this seemingly ill thought through Local Plan goes ahead there appears to be no provision for new or additional schools places, or provision for Doctors Surgeries, considering the existing ones are already under immense pressure. Another reason to object.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I also object to the disproportionate amount of development in several areas of the Borough, including the Garlick's Arch site at Burnt Common which will add to the already heavy traffic using the local roads and local services.

Finally may I point out that Ripley already has a look of a giant car park during the day, with the High Street looking like a "drive through zone" due to the already huge amount
of traffic using the village to get to the A3/M25, and back.
To build the amount of housing included in the Local Plan will be a complete step in the
wrong direction for the local community and environmentally a disaster.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to strongly object to many issues contained in the unbelievably long
document of about 1800 pages covering the Draft Local Plan.
Firstly I object to the any erosion of the Green Belt and strongly object to any removal
of villages from the Green Belt, including Ripley where I have lived for the last forty years.
There appears to be no sensible reason or logic in this "in-setting" which will just help to
hasten the destruction of our rural environment and village life, and open the flood gates
for more and more building in previously rural areas to further destroy the natural surroundings.

Policy A42/A43/A58

I object to all of the above policies mainly because it is building on Green Belt land - isn't there Green Belt for a reason??

The increase in traffic is already evident through send marsh and ripley on the lead up to the M25 this will only increase. This is a main school route so there will be an increase in accidents within the area.

Pollution will increase. And unnecessarily increase over development. One of the reasons we moved to send marsh from Guildford was because we wanted a quieter less traffic polluted area.

Where is the demand for Travelling Showpeople.

From what I understand from previous objection meetings I have attended this is down to land being "gifted" from a farmer and is clearly being offered a huge sum of money from the council to develop this land - that comes down to greed and nothing more. These developments are not required and as a local resident makes me angry that GBC would even consider some of these plans. Perhaps look at some of the other issues which require more attention and not just developing for the sake of developing!!!

I consider that this plan and consultation process is flawed. The transport infrastructure of Guildford cannot support the number of new homes proposed, and the provision of health services and education facilities are inadequate. Furthermore, the proposed expansion will change the town of Guildford and its outlying regions in such a way that the plan will have a disproportionate impact than if imposed on a larger established urban environment. I consider insufficient attention has been paid to the impact of this plan on the environment, to the well being and views of the residents in the various sites under consideration and the historical organic growth of the region.
I live in Merrow and am particularly concerned about the proposed development on the Gosden Farm site. The Aldi supermarket and recent Burpham housing developments have caused considerable traffic problems already in this area. A large number of houses on the farm will change the nature of the area completely, have a devastating impact on this community and bring with it unresolvable traffic problems.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The other serious issue is the infrastructure associated with the above proposals.

I have lived in Ripley/Send for 14 years and have been affected by the enormous increase in traffic flow on the A3 and the increase in traffic flow through Ripley Village.

Vehicle divert to try and avoid the traffic build up going from Guildford to the M25 junction 10.

With the above proposals there will be many more occasions of "Log Jams".

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Knowing there is a population explosion in the South East why do not local authorities encourage more housing developments to areas more suitable.

Clearly with very considerable increase in "Concrete" developments there are very real environmental concerns and diminishing quality of life resulting.
With the increase in aging population in the South East there will be a lack of doctors surgeries/hospital places and for the very young school places.

Surely you cannot build housing developments without ensuring first the provisions adequate roads, doctors surgeries, hospitals and schools are in place.

It would also seem that the sudden announcement of these developments gives very short notice to local population. Why??

It would be a tragedy if these proposals destroy our villages in this way.

PLEASE DON'T.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
None of these villages has the roads to sustain the construction traffic during the building of these small towns, let alone the increase in traffic once complete. There is also a distinct lack of detail surrounding the provision of schools, doctors and other services required to support the increase in population to these areas.

Please do not pass this Local Plan as it put an even bigger burden on the already overstretched local services in these villages.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Subject: New local development plan comments

Having participated in the consultation of the “Draft Local Plan Strategy and Sites Document” during both 2013 and 2014, I object that the 2016 Proposed Submission Local Plan envisages now envisages previously unconsidered sites whilst dropping others that had some merit.

Notably the “74. Land around Burnt Common warehouse, London Road” with some A3 access is now no longer part of the Local plan, seemingly replaced with the significantly more extensive, new and previously unheralded proposals of “A43 Land at Garlick’s Arch Burnt Common” and “A44 Land West Ridge and Send Hill”. What had previously been envisaged as 315 homes has increased to 485 homes without reference to impact on infrastructure and local resources, and the new proposed A3 junction at Burnt Common likely to exacerbate the traffic problems within Clandon and Send.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3719  Respondent: 15109121 / Larry Bottomley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a resident in Send for over 20 years I have seen it grow.

However this last minute planning really worries me.

Many of the roads in Send are very narrow, especially the one up to Send Hill where many houses and a travellers's site are planned.

I wonder how all the increase in traffic will function.

The school coach and the refuse trucks have difficulty when passing cars any increase i numbers would make things worse.

Also when there is an accident on the A3 all too often now, the traffic is diverted onto Potters Lane then Send Hill or Vicarage Lane. It creates pandemonium.

The rush hour extends for most of the day. The new proposal for the A3 on and off junction at the Burnt Common roundabout would increase the huge lorries coming through Clandon, where they often have to climb the curb to get past cars and also those roads going through Send itself.

Garlic’s arch development would put pressure on the local schools and surgery where even at present it is difficult to be seen.

How is the infrastructure going to be developed to cope?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/114  Respondent: 15109121 / Larry Bottomley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Answer (if comment is on questions 1-7 of the questionnaire): ()

So specifically:

**Policy A43 30 ha land at Garlick’s Arch Burnt Common.**

Building at Garlick’s Arch means that on and off access to the A3 at the Burnt Common roundabout will be required but will also have a significant impact on the already congested local roads. We have massive lorries coming through Clandon, Send has a significant congestion problem at rush hour through to Old Woking and better access at Burnt Common to the A3/M25 will have a very damaging impact on both villages.

The road passing through Send is very congested for long periods during the day and this would only exacerbate the problem. The addition of 400 houses at Garlick’s Arch with no local offices or other places of work, increases those that need to drive to work. The addition of Industrial units will likely mean more large lorries on the narrow and already congested roads.

400 houses will increase pressure on Send First and St Bede’s (already full) and the Villages Medical Centre (where currently getting a timely appointment is challenging).

Without consideration of these resources or an integrated transport plan, I object to Policy A43.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

Comment ID: PSLPS16/115  Respondent: 15109121 / Larry Bottomley  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Policy A44. 1.9 ha Land West Ridge and Send Hill.**

This is a new proposal and certainly if it had been proposed earlier then concerns on building on a previous land fill waste site could have been investigated. There are currently vents in place on this site which may be a health and insurance concern for those that live in houses built on this site.

Do note that Send Hill is a very narrow road especially where it meets Potters Lane, where it is single width and very steep lane leading on to a blind corner. The increase in traffic from an additional 40 houses and 2 travellers’ sites would make this junction busier and therefore more dangerous.

Without consideration of the safety of building on the land fill or the traffic safety on Send Hill, I object to policy A44.

Please feel free to contact me at the e-mail address above if any of this reasoning requires further clarification.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
My continuing over-arching concern is the lack thought on the infrastructure development that will be required to support the implementation of the Local Plan. Increase in provision in Schools, hospitals, medical surgeries, local roads and public transport will all be required and the wholly inadequate provisions throughout the Local Plan will not be sufficient to make these developments sustainable. Individual developments will have an impact on physical and social infrastructure, whilst multiple developments will have an exponentially larger impact.

I have continuously responded to each iteration of the Local Plan with no discernible result other than what appear to be tangential changes. Requiring comments on only the changes in the Local Plan show that all previous comments, concerns and suggestions were futile and makes a mockery of local input in to the development of our environment.

I object to the proposal to *inset Send Business Park from the Green Belt* because it is in an area of outstanding countryside adjacent to the beautiful Wey Navigation and is an inappropriate development in the Green Belt. The site is on narrow country road leading in to Send, a town current gridlocked at rush-hour.

*What changes (2016)/further amendments (2017) do you suggest should be made to the document?*

Attached documents:

---

I object to the *Policy A42 change* at Clockbarn in Tannery Lane because the increase in homes ignores all previous comments, will worsen the chronic traffic problems through Send and associated roads, and makes no provision for increase in supporting social infrastructure in local schools, surgeries, roads or public transport. This development requires an expansion of existing local GPs Practices (none referenced in Section 6, Health and Social Care), an increase in Early, Primary and Secondary Education provision (none referenced in Section 4 Education), and material traffic management measures throughout Ripley, Send and Clandon (other than LRN7 and LRN20 none referenced in Section 1, Transport).
I object to **Policy A 58** at Burnt Common because it ignores all previous comments that caused its withdrawal from the 2014 draft, there is no demonstrable case for the requirement for such a development while sites remain empty at Slyfield, and the change of “maximum” to “minimum” in has no commercial basis. This development will only contribute to the chronic traffic problems in the area. This development requires material traffic management measures through Send and Clandon.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **Congestion on the trunk roads, A3/M25**
   I object to the development of the strategic sites due to A3 and M25 already being at capacity during peak hours. In the morning it regularly already takes 40 minutes or more to travel the three miles from my home to join the M25. Highways England has no plans to look at improving the A3 before 2020 and even then it is doubtful if those plans will be sufficient. It is therefore not sustainable to identify sites for further development which will worsen the congestion on these motorways and trunk roads.

2. **Congestion on the local village roads and lanes**
   Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. Send Marsh Road is already a rat run with constant traffic using it as a cut through. I object to further development which will cause greater congestion in and around our villages.

3. **Unsuitability of our local roads for heavy vehicles and more traffic**
   Many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

4. **Lack of proper infrastructure planning for sites**
   I object to the lack of planning and implementation of infrastructure. For example at Garlick’s Arch. Without improvements to the infrastructure prior to development, the existing residents’ quality of life will significantly deteriorate in many ways. We already struggle to get doctors appointments and the local schools are already struggling.

5. **Lack of Utilities Capacity**
   Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. I object to the development of Garlick’s Arch on the ground that there is little capacity in these networks.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **Sites being planned in unsustainable locations**
   Many of the strategic sites e.g. Wisley Airfield and Garlick’s Arch, are in unsustainable locations. They do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. I object on the grounds that these sites are not sustainable.
2. **Parking issues in local villages caused by larger population**
   Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems. To which I object.

3. **Local healthcare facilities will be overwhelmed**
   Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. I object due to the further stress it will put upon existing health services.

4. **Local policing facilities will be overwhelmed**
   Police services are seeing funding reduced. The development of the likes of Garlick’s Arch and Wisley Airfield will stretch the police services further and I object.

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **Unbalanced allocation of development in one area of the Borough**
   Between the M25 and Burpham, a distance of only about 5 miles it is proposed that over 6,500 houses are built. This represents over 40% of the housing proposed in the Local Plan. I object to this area being hit so hard by the allocation of development, which is disproportionate to the rest of the Borough.

   **Answer (if comment is on questions 1-7 of the questionnaire): ()**

   2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

   10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

   After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.
Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I am against the Local Plan. I feel that in the Historic Environment section especially, the local plans ride roughshod over the hopes, feelings and consideration of all people living in those areas. This could be the ruination of Surrey as we know it.

I refer in particular to 11.31 and 11.32 which deal with development adjacent to and within the conservation areas. The possible development of these areas do not take into account the height of new buildings on the skyline - and the Wisley development in particular where blocks of flats will dominate views as far as the Surrey Hills.

As Junction 10 on the M25 will have to be completely rebuilt, this whole area including RHS Wisley Gardens will be ruined for ever.

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

Please can we crack on with the plans to add 2000 houses at Wisley and the 500 houses in Horsley? Accommodation is desperately needed and you must ignore all these bleats about greenbelt (Horsley is built in the greenbelt thanks to some far sighted people in the 40's and 50's).

It is time for someone to make a decision to get the houses built. The proposed plan is a start but only building 30 new houses per year is simply insufficient.

All the Neighbourhood Plan people in this village seem to be involved only to try and stop any development.

Please approve and get started

Answer (if comment is on questions 1-7 of the questionnaire): ( )

My view is that the plan is too conservative. There is ample room in the Horsley's - where I live - and the surrounding villages for many more houses. GBC must not allow itself to be intimidated by well connected and well funded NIMBIIES.

the fact is that all of the villages have been developed within the green belt - whatever that is - and can be significantly enlarged without any impact on the nature of the area.

Wisley development is desperately needed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

(2) I object to the Wisley Airfield, Garlicks Arch (Ripley/Send border) and Gosden Hill (Clandon) sites being used for housing development as the nearby villages simply cannot support the increase in traffic.

(3) There is already a very high level of traffic congestion in Ripley high St, sometimes gridlocked at rush hour already making access to services and residences in ripley very difficult and stressful. I also object to the vast increase in traffic that would arise on the junction between the M25 and A3.

(4) I object to the additional strain that the Villages Medical Centre, Send will have as a result of the large increase in population in the area. This service is already overstretched and the development will exacerbate the problem.

Answer (if comment is on questions 1-7 of the questionnaire): ()

With regard to the proposal for 400 homes on green belt land at Garlick's Arch near Burnt Common I have the following objections:

(1) The area proposed for housing development is Green Belt land and I strongly object to this area of woodland being lost forever and turned into a housing estate. My family regularly use this area for recreation purposes and do not want to lose this area of natural beauty.
(2) I object to the Wisley Airfield, Garlicks Arch (Ripley/Send border) and Gosden Hill (Clandon) sites being used for housing development as the nearby villages do not have the infrastructure to support the increase in traffic, population. I also object to the disproportionate amount of housing being proposed for these areas as the level of congestion will rise to an unacceptable level in the surrounding roads, lanes and major thoroughfares.

(3) There is already a very high level of traffic congestion in Ripley high St as well as the junction off the A3 into Send village and I object to the increase in traffic that would materialise as a result of the proposed development. I also object to the vast increase in traffic that would arise on the junction between the M25 and A3.

(4) I object to the additional strain that the Villages Medical Centre, Send will have as a result of the large increase in population in the area. This service is already overstretched and the development will exacerbate the problem.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to proposals slipped into the council meeting in a very underhand way!

1. GBC have not followed any sort of correct process in the way they have dealt with local planning in my area. Evidence shows in 2014 a proposal for 430 houses went down after objection to 185 (Although a large number it could have been liveable) but some how has sneaked up to 485. These significant changes require a full consultation under Regulation 18 not the short cut which GBC are trying to sneak in through the back door.

1. The Strategic Housing Market Assessment 2015 results are ‘Elastic’ in there very nature. By using such data as Foreign students to inflate the need for GBC purposes. Remember there are Lies Damm lies and Statistics. The required 13,860 homes in the local plan, in this affluent area would probably house somewhere in the region of 41,580 if they each had 3 people living there. To that end half this number would suffice to deal with the increase in population growth Our area could not deal with that population increase unless there is some major investment we are missing like another school health centre etc.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )
I object to the plan. Send provides a buffer between Woking and Guildford and should not be removed from the green belt. The land west of winds ridge and send hill is a new site and was not included in the regulation 18 and has not been consulted upon previously. Development for housing is inappropriate due to its perminant green belt status and high quality green belt amenity within an area of beautiful countryside which would be spoilt by development. The subsoil of the existing site is also inappropriate for housing and the access road on Send hill is a narrow single width track unsuitable for access and additional volumes of traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: SQLP16/138  Respondent: 15110721 / Stuart Reeves  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

The inclusion of 400 homes and industrial warehousing at Burnt Common in the plan is new and not included in the regulation 18 draft.

I therefore object that a full impact assessment has not taken place.

A new four way interchange onto the A3 would be disastrous for Send. Send would be grid locked all day and the enlarged Send first school would become inaccessible as a local school and dangerous.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/65  Respondent: 15111713 / Niall Malak  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley South

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

My concerns as a resident of West Horsley is the lack of infrastructure and removal from the Green Belt.

We have a shortage of school places, you can't see your GP due to so many people.

I feel this removal from the Green Belt will be a trigger for all the developers to think of the Horsleys as fair game and Change the fabric and feel of the village forever.

Where is the guarantee any of these houses will be for 1st time buyers or even affordable?

I estimate they will be more like millionaire pads with no real improvements for the local population.

Where is the protection for our green spaces and any guarantee the number quoted is fixed for 20 years or more?

I'm not against new homes, provided they are for the benefit of this who need them. I also can't see why the need to take the villages out of the green belt?

There seems to be no guarantees or protection for the villagers and certainly no thought through infrastructure plan.

Therefore, I object to the volume of the plan and the lack of accountability of the so called plan.

Comment ID: PSLPS16/125  Respondent: 15111745 / Aderyn Bird  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A21

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am e-mailing in relation to the allotment site concerned in Policy A21 and would like to express my utmost support for retaining the whole site as allotments.

From my experience, there has been a long waiting list and huge demand for plots on the site as a trend for home-grown food for healthier living increases in popularity. I firmly believe that the fresh air, exercise, and organic produce that comes from owning a plot is highly beneficial in facilitating and maintaining a healthy lifestyle.

I am immensely pleased the Council is in favour of retaining the allotment site as part of the Local Plan and wish to continue to support it.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed development at Garlicks Arch on the Ripley and Send border and Gosden Hill Clandon. This will have an impact on the services to these areas such as Health and Education. The Villages Medical Centre is already stretched and there is a wait for appointments and the local schools will be oversubscribed resulting in local people not being offered a place for their children, this putting a strain on transport.

The added developments will mean an increase in traffic which is already severely contested in peak times. Rose Lane and Newark Lane being worst hit.

Answer (if comment is on questions 1-7 of the questionnaire): ()
3) Other local infrastructures such as Power, Water and Sewage and Healthcare will be severely strained. There appears to be no provision for improvements to the first two, which would in any case cause more disruption to the area, with local roads being excavated to accommodate larger sewers and more power cables. The local area seems to be continually dug up as it is! The local Healthcare, such as the Villages Health Centre in Send, is also currently strained and could not cope with an influx of the residents for the proposed 6500 homes.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to register my objection to the above plans on the following grounds:

1) The communications in the local area are totally inadequate for such large-scale developments. As there is no rail link nearby, this will inevitably mean that local roads will bear the brunt of the large extra influx of residents/workers. The local roads cannot cope currently with the flow of vehicles at rush hours and school runs and the A3 is often near saturation point in the proximity of the M25 Interchange. The situation is bound to become considerably worse with the proposed plans.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/197  Respondent: 15112257 / Richard Winzor  Agent:
4) Other facilities such as local businesses, shops and restaurants could be strained or overwhelmed with many more vehicles chasing already non-existent parking places. Indeed the largest supermarket in the area, Budgen in Ripley village, is actually closing down this week!

In summary, the proposals will place an intolerable strain for existing residents, and those who need to use the local infrastructures, and should therefore not be permitted to go ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the draft Local Plan with its proposed developments in Ripley, Send and Clandon.

As a resident living off the Portsmouth Road I am already blighted with traffic noise and pollution from this road. This proposed change would further exacerbate these problems. Traffic flows through these three villages are already reaching crisis point as the road systems were never planned for these volumes of traffic - especially regarding Ripley and Clandon.

To bring forward a proposal of this size without adequate discussion with local residents is extremely dictatorial and unacceptable. Local amenities such as doctors’ surgeries and schools are already stretched.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Apart from this, the flow of traffic through Ripley and Clandon are already causing extreme problems with large articulated lorries attempting to negotiate the narrow stretches of roads these villages offer.

I have seen many blockages there caused by these lorries unable to pass each other on the narrow bends and even causing accidents. The A3 into Guildford from Clandon already becomes severely blocked too at certain times of the day and one can imagine the extra vehicles from these houses would cause further and more frequent chaos for these poor travellers.

2) **Size and Location of the Proposed Development at Garlick’s Arch**

   We strongly object to the development, which is large for the area, with over 400 houses proposed, which would have a massive impact on the local villages infrastructure as follows:

   a) Traffic / Congestion – Send and Ripley are massively impacted by their location to the A3/M25. it is almost impossible some mornings to get out of the top of our road (we live in Chestnut Close) – trying to turn right onto Portsmouth Road is not only difficult it is also dangerous during rush hour. From 7.30 onwards during morning rush hour there is a queue of
traffic from the junction of Portsmouth Road and Send Marsh Road, going down past Linden Way and all the way back past the Saddlers Arms, often as far as the green. It also queues at Mays Corner / Send Crossroads, up past send First School to the roundabout, and going the other way towards Woking This is the situation on a normal day. If there is an accident on the A3 or the M25 or roadworks or any kind of adverse weather or other problem the situation is ten times worse! (we suggest a traffic survey team would be advised to monitor for themselves). If you build 400 houses and an industrial site, in this area, the congestion it would cause with at least 400 extra cars + on the road would be phenomenal. Further to this the detrimental impact of pollution in this area. And not to mention the impact of these extra cars speeding up and down Send Barns Lane past the school – which already is dangerous as there is no crossing. If you factor in a further 2000 homes still proposed in the local plan at Wisley (despite earlier rejection by Guildford Borough Council), along with proposals for 2200 homes at Clandon/Burpham – these proposals will create further traffic problems and congestion.

b) Infrastructure – There are not enough primary and secondary school places as it is for the residents of Send and Ripley. What proposals are in place for school places for an extra 400 + children at least, not just for the immediate future but the next 5/10 years.? If this proposal is pushed through then schools should be built concurrent to the housing, otherwise there will be serious issues for residents. It is also virtually impossible to get to see a doctor at The Villages Medical Centre – not only can you never get through on the phone, but when you can you not get an appointment. They cannot cope with the volume of residents – much of which is an ageing population – without several hundred extra residents – and their children etc. I agree that there is a chronic shortage of housing in the Borough – especially affordable housing – we appreciate that provision needs to be made for more housing (our children are 17 and 15 and they will never be able to afford a home in this area – that’s if there are even any available!) but you cannot just continue putting up massive housing developments without putting in the infrastructure alongside the housing, to support the residents.

We strongly object to these proposed developments and also to the lack of consideration given to the residents and their concerns, the limited consultation period and the lack of planning for the adverse effects on infrastructure these developments will have on the surrounding area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPP16/211  **Respondent:** 15113281 / Mr and Mrs Richardson  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

WeI write with reference to the proposed development on Green Belt Land of 400 houses and an industrial site at Garlicks Arch – Burnt Common Send Ripley Borders which has been drafted into the Guildford Local Plan 2016. We would like to register my objection to this proposed development for the following reasons:

1) **Erosion of the Green Belt –**

We strongly object to this development as it is proposed on a Green Belt site. Once this area is developed not only will this part of the Green Belt be eroded, but it will set a precedent for future development and erosion of the green belt – not only in Send/Ripley and Clandon villages but on other green belt sites within the Guildford area. The Green Belt should and must be protected, and whilst I appreciate the need for more housing in Guildford, there are plenty of brownfield sites which can be redeveloped. Also, it is alarming that not only is housing proposed on the greenbelt, but also an industrial site – which will have a negative impact on the surrounding environment e.g. pollution, long term damage
to the surrounding countryside and the animals within this area (for example the deer which often use this land for
grazing).

Furthermore, we also object to the proposed removal, through “in-setting”, of several villages from the Green Belt (e.g.
Send, Ripley, Send, Clandon and Wisley to name a few).

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I live in Rose Lane in Ripley and I am very concerned to hear the proposal of building new homes on the site of Garlick
Arch. There are many reasons as to why I object to this, preserving the green belt is vital in the survival of woodland that
has existed for decades and the destruction of this will not only make the area an eye sore but the destruction of wildlife
habit I strongly object to.

Secondly the road leading to and from Ripley is already congested and any additional traffic will add to this congestion
which will make life unbearable for the local residents who like me have lived a village lifestyle for a number of years and I
object to the added noise pollution, general congestion, air pollution and parking issues, traffic jams this will create before,
during and after the homes are built.

The facilities in Ripley itself will not be able to cope with the parking situations that will increase to an already
overcrowded situation to which I also very strongly object too.

The only parking facilities in Ripley are the ones in White Hart Meadows and this is overcrowded each and everyday
posing major issues for the residents and this will only increase as there are very few local shops which won't cope with the
demand hence I object to the housing on Garlick Arch as the area will not cope with the demands.

I believe that Ripley is a village not a new mini town and well not be able to cope with the burden of extra traffic, people
and congestion and pollution. It is an area a beauty and this atmosphere will be destroyed if new homes are built in and
around the surrounding areas of Garlick Arch. I, strongly object to the proposal and the green belt must and should survive
for the reasons I have stated above and for a wide variety more and the proposal should be dismissed.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

2) Size and Location of the Proposed Development at Garlick’s Arch -

We strongly object to the development, which is large for the area, with over 400 houses proposed, which would have a massive impact on the local villages infrastructure as follows:

a) Traffic / Congestion – Send and Ripley are massively impacted by their location to the A3/M25, it is almost impossible some mornings to get out of the top of our road (we live in Chestnut Close) – trying to turn right onto Portsmouth Road is not only difficult it is also dangerous during rush hour. From 7.30 onwards during morning rush hour there is a queue of traffic from the junction of Portsmouth Road and Send Marsh Road, going down past Linden Way and all the way back past the Saddlers Arms, often as far as the green. It also queues at Mays Corner / Send Crossroads, up past send First School to the roundabout, and going the other way towards Woking This is the situation on a normal day. If there is an accident on the A3 or the M25 or roadworks or any kind of adverse weather or other problem the situation is ten times worse! (we suggest a traffic survey team would be advised to monitor for themselves). If you build 400 houses and an industrial site, in this area, the congestion it would cause with at least 400 extra cars + on the road would be phenomenal. Further to this the detrimental impact of pollution in this area. And not to mention the impact of these extra cars speeding up and down Send Barns Lane past the school – which already is dangerous as there is no crossing. If you factor in a further 2000 homes still proposed in the local plan at Wisley (despite earlier rejection by Guildford Borough Council), along with proposals for 2200 homes at Clandon/Burpham – these proposals will create further traffic problems and congestion.

b) Infrastructure – There are not enough primary and secondary school places as it is for the residents of Send and Ripley. What proposals are in place for school paces for an extra 400 + children at least, not just for the immediate future but the next 5/10 years.? If this proposal is pushed through then schools should be built concurrent to the housing, otherwise there will be serious issues for residents. It is also virtually impossible to get to see a doctor at The Villages Medical Centre – not only can you never get through on the phone, but when you can you not get an appointment. They cannot cope with the volume of residents – much of which is an ageing population – without several hundred extra residents – and their children etc. I agree that there is a chronic shortage of housing in the Borough – especially affordable housing – we appreciate that provision needs to be made for more housing (our children are 17 and 15 and they will never be able to afford a home in this area – that’s if there are even any available!) but you cannot just continue putting up massive housing developments without putting in the infrastructure alongside the housing, to support the residents.

We strongly object to these proposed developments and also to the lack of consideration given to the residents and their concerns, the limited consultation period and the lack of planning for the adverse effects on infrastructure these developments will have on the surrounding area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We write with reference to the proposed development on Green Belt Land of 400 houses and an industrial site at Garlicks Arch – Burnt Common Send Ripley Borders which has been drafted into the Guildford Local Plan 2016. We would like to register my objection to this proposed development for the following reasons:

1) **Erosion of the Green Belt**

   We strongly object to this development as it is proposed on a Green Belt site. Once this area is developed not only will this part of the Green Belt be eroded, but it will set a precedent for future development and erosion of the green belt – not only in Send/Ripley and Clandon villages but on other green belt sites within the Guildford area. The Green Belt should and must be protected, and whilst I appreciate the need for more housing in Guildford, there are plenty of brownfield sites which can be redeveloped. Also, it is alarming that not only is housing proposed on the greenbelt, but also an industrial site – which will have a negative impact on the surrounding environment e.g. pollution, long term damage to the surrounding countryside and the animals within this area (for example the deer which often use this land for grazing).

   Furthermore, we also object to the proposed removal, through “in-setting”, of several villages from the Green Belt (eg Send, Ripley, Send, Clandon and Wisley to name a few).

   What changes (2016)/further amendments (2017) do you suggest should be made to the document?

   Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write in reference to the above to register my strongest possible objection to it, on two grounds.

In the first instance the plan is fundamentally undemocratic with respect to something as significant as changes to boundaries. The ability of the local area to influence its own affairs, particularly regards decisions that would affect residents, will be much reduced.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fact that we purchased a house on Burnt Common Lane with views over fields and now the local plan want to remove this view and replace with 400 houses, industrial units and slip roads.

I object to the planned A3 junction changes at Burnt Common due to the negative effect on the surrounding villages which will not be able to handle the additional traffic in an already busy area.
I object to all the additional houses when the local schools are already overwhelmed with new applicants. The school in Send where my children attend is currently being rebuilt, with no further capacity to take additional children and has no desire to do so.

I object to all the additional houses as the local doctors surgery is already at its full capacity and this will put additional pressure the services impacting local services.

I object to the additional amount of cars that will be on the road in the immediate and surrounding areas, causing further risk to our children as they travel to and from school.

I object to the way in which the Garlick’s Arch development was added to the local plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

**Comment ID:** pslp172/1280  **Respondent:** 15114017 / Jo Wright  **Agent:**
I object to the change to Policy A42 at Clockbarn, Tannery Lane as:

1. There are an additional 15 houses, the local roads will not be able to cope with the additional traffic causing congestion and safety issues for local children walking to school and playing.
2. The land is Green Belt
3. It will increase the risk of surface water flooding in the local area, which is already an issue
4. The local infrastructure is not in place for the increase in housing e.g. the medical centre is already at capacity and Send Primary size cannot be increased to accommodate the additional intake.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1279  Respondent: 15114017 / Jo Wright  Agent:

I object to Policy A43 at Garlicks Arch as:

1. The addition of 6 Travelling Showpeople plots – is there really a requirement in the local area?
2. Thousands of objections to proposals and the volume of housing have been made and ignore with the same number of houses being included, of which the infrastructure is not in place and will cause huge safety issues in an area where there are already several near-misses with the junction of Burnt Common Close. It will cause over development of the area and the village.
3. There are no exceptional circumstances for building on this Green Belt land, more so on the ancient woodland
4. Increased risk of flood (currently a flood zone 2 allocation)
5. The land is contaminated by lead shot

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the change to Policy A58, Burnt Common, London Road

1. The area is close to Slyfield, therefore does not require an additional industrial estate.
2. There is a decline in demand for industrial land since the 2016 proposal
3. The impact on small surrounding roads will create traffic gridlock

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/306  Respondent: 15114017 / Jo Wright  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy 2, para 4.3.15 to inset Send Business Park from the Green Belt because: -

1. There is very restricted vehicular access along Tannery Lane in both directions
2. Further development here detracts from the openness of the Green Belt and is inappropriate

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/232  Respondent: 15114145 / Barry Roads  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the lack of provision to improve the current infrastructure which is currently inadequate.
2. I object to the lack of additional parking provisions in the villages – again which are currently inadequate.
3. I object to the 4 way junction to the A3 which will force more traffic through the already overloaded roads, which incidentally are in a very poor state of repair.

1. I object to the Garlick’s Arch development as it does not provide for sufficient Utilities capacity which is currently almost at capacity.
2. I object to the designated 400 houses at Garlick’s Arch as this is in addition to the 13,000 odd already proposed for the Borough.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43

I object to the above Policy change at Garlick’s Arch which is now 400 homes and 6 travelling show people plots.

Why do the previous thousands of objections appear to be ignored by the Council?.

This land is green belt – the Government itself states the following:-

Green Belt serves five purposes:
• to check the unrestricted sprawl of large built-up areas
• to prevent neighbouring towns merging into one another – Send and Ripley will become one if these homes are allowed to be built.
• to assist in safeguarding the countryside from encroachment
• to preserve the setting and special character of historic towns
• to assist in urban regeneration, by encouraging the recycling of derelict and other urban land

So as there are no exceptional circumstances why are these being ignored in respect of Garlick’s Arch that has been around for hundreds of years.

I have lived in Send Marsh for 21 years and in all that time there has never been a proven demand for Travelling show people spaces.

Already at peak times it is very difficult to get out of Send Marsh Road onto the old A3 and these homes will only generate additional traffic – additionally if there is a problem on the main A3 all the traffic filters down through the old A3.

I do not believe that sufficient thought has been given to the infrastructure of the whole area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I live in this part of Surrey precisely because it’s not a London over-spill (like grubby Croydon or Sutton). Reading your Local Plan, 5.3 in the Policy Approach will ensure the permanent destruction of the beauty of this area by building all over not only Ripley, but nearby West Horsley, Send and Effingham. How on earth do you imagine the infrastructure of this area will cope with thousands of new homes?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A34

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to removal of Brownfield site (A34) from the Plan
Site A44 in Broadford Business Park has also been removed. This is another brownfield site that has already been developed. The Council’s claims to “have adopted a ‘brownfield first’ approach” (page 5) but this is clearly not the case, and is contrary to national guidelines.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to removal of Brownfield sites (A4) from the Plan

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2311  Respondent: 15114721 / Leslie Macnair  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states “Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2301  Respondent: 15114721 / Leslie Macnair  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch
The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlick’s Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/2304  Respondent: 15114721 / Leslie Macnair  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/2302  Respondent: 15114721 / Leslie Macnair  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A50

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Plan is self-inconsistent in respect of traveller sites.
A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots ...” Clearly A50 more than covers the total “need” of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/2307  Respondent: 15114721 / Leslie Macnair  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch)

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were:

1. The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, ... (site allocation A25) [ than the Burnt Common site did ]”

2. The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/2310  Respondent: 15114721 / Leslie Macnair  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects:

i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!) , and
ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version says: *Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.*
So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses].” That has now been removed, thereby accepting that needing to make greater than normal profit IS to be an acceptable reason not to deliver affordable homes. This is a shocking sop to the developers.

**Comment ID:** pslp171/752  **Respondent:** 15114721 / Leslie Macnair  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**I object to the lack of proper infrastructure planning for sites (A43 and A42)**

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

**Comment ID:** pslp171/751  **Respondent:** 15114721 / Leslie Macnair  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object removing Send Business Park from the Green Belt (4.3.15).

Send Business Park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for its insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/92  Respondent: 15114753 / Lauren Pott  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object most strongly to the lack of immediate provision for new schools

I object most strongly to the lack of any immediate provision for doctors surgeries

I object most strongly to the lack of proper provision of natural resources such as water (four successive very wet winters have given us a short memory of hosepipe bans) and lack of infrastructure such as hospitals, recreation facilities, roads, waste disposal sites, sewage disposal, power generation, parking in shopping areas etc. Creating additional access to the A3 and/or the M25 is not increasing capacity – it will just add to intolerably congested and polluting roads. Minor roads are congested during rush hour and for much of the day, the approaches to J10, in addition to other parts of the M25 are intolerably congested at many times of the day and night, including weekends and even in the small hours when roadworks are being undertaken.

10) The quality of life and well being of existing residents is getting eroded year on year because there are simply too many people in the country, in the county and in the Borough. We have to say “NO”, enough is enough, we must look after existing residents better.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I wish to OBJECT to the following: The new Conservative Council made a pledge that they would not INVADE THE GREEN BELT and you are planning numerous sites around Guildford and Woking which are currently in the Green Belt for development.

I attended the GBC meeting in May and was horrified at the lack of interest Councillors had to the views and wishes of local residents. Councillors have been elected to protect our interests and those of the community.

I OBJECT Consultation 2014 You have made significant changes to this document in respect of Burnt Common and Garlick’s Arch. These changes require another full consultation and currently the whole process is Invalid.

I OBJECT Garlick’s Arch There is no evidence that these vast areas of land are needed for Industrial Space and the huge housing numbers you are planning. The GBC’s Transport Assessment was not available to councillors and public at the meeting on 24th November. This is overload on houses and factories. This development would be far better placed at Slyfield. The impact on the A247 will be devastating.

I OBJECT to your plan to Remove Send from the Green Belt

This will just result in the village becoming an urban development of Woking. I object to the use of the land behind the School playing fields and the land at Cartbridge being removed from its protection. Send is a village and the residents do not want to live in a new town nestling up to Woking.

I OBJECT TO the development of land opposite Wind Ridge, on Send Hill for homes and Travellers Pitches being designated for 40 homes. This is a Landfill Site and was not included in the original consultation. The access to the narrow road (Send Hill) opposite the cemetery and the location of the village school nearby makes access difficult and dangerous.

| Answer (if comment is on questions 1-7 of the questionnaire): ()  |

The proposed infrastructure makes no mention of a larger Medical Centre - currently you have to wait 2 weeks for an appointment. Where are the schools to accommodate all these children?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to Policy A42 change at Clockbarn in Tannery Lane because:

- the unjustifiable increase in the number of homes is unacceptable
- Tannery Lane is very narrow and not suitable for the inevitable increase in traffic. It leads on to the A.47 which is a single lane A road to Woking and is already very heavily used. The junction will be busy and dangerous.
- there is no justification in the erosion of Green Belt. There are three further invasions of the Green Belt planned in this Plan 2017 - none of them justifiable.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/252  Respondent: 15120129 / Anthony Merryweather  Agent:
I write to object to the proposed development of six sites in East and West Horsley. The proposal to allow the building of an additional 533 properties is completely unsuitable for this area. The area lies in the green belt, and there are also a number of conservation areas within the area, this is completely incompatible with the proposal. I appreciate the government is placing councils under pressure to build more homes, but the type of homes that will no doubt be built - if these developments are allowed to go ahead - will be identikit mini Surrey mansions, completely unsuitable for the sort of starter homes that are actually needed. This is because the developers will need to maximise their profits and starter homes don't do it for them.

There is also the additional road traffic increase which is inevitable if you add 533 homes to an area. This in addition to the additional traffic that we are already going to have to suffer due to the Opera In the park development at West Horsley place.

The building of an additional 533 will also provide a precedent for existing homes to extended in line with the sort of mini mansions I describe above.

Small developments I do not object to. But I strongly object to the scale of the proposed sites and the number of homes.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Housing

1.1. The target for new homes outlined in the Local Plan represents a 25% increase in the housing stock of the borough; The Office of National Statistics (“ONS”) projects a population increase (including that for economic growth) of some 15% for Guildford Borough over this same period. Why do we need the 25% increase in homes?

1.2. The infrastructure proposals are inadequate even to meet existing needs let alone the proposed additional developments in the Local Plan.
1.3. Policy S2: is a Borough Wide Strategy (the “SHMA”), which looks at how the annual housing target of 693 homes is made up. It estimates that 517 homes per annum arise from ‘the demographic figure (supported by ONS office national statistics) projections. To this GBC plan has added another 120 homes per annum in order to ‘support extra economic growth’, a further 31 homes per annum to ‘improve affordability’ and 25 homes due to ‘student growth’, all of which totals up to 693 homes per annum target more than in the rejected plan.

1.4. This does not make any sense as we do not need an uplift for extra economic growth. Current growth patterns are included in ONS projection.

1.5. The increase of 25 homes to ease affordability issues will result in only 10 social/affordable houses being built. It would be better if planning permission was only granted for 1, 2, 3 bed properties for a period of 2 - 3 years with a restriction on the percentage of 4 & 5 bed if required. This would help to provide a better mix for both market and affordable homes in all parts of the borough.

1.6. Student accommodation should be provided by the university. The University’s expansion should be in line with what it can deliver in terms of extra student accommodation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/145  Respondent: 15120641 / Elizabeth Wolfe  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Wisley Airfield

3.1. The proposal to include this site in the Local Plan and remove it from the green belt is puzzling as it was the subject of a planning application refusal in recent months.

3.2. The reason given for the refusal was because the site was within the Green Belt. So why do that when GBC had the clear intention of moving the site out of the Green Belt within next few weeks? There were other reasons that were glossed over in the report that are not resolved by GBC recent actions. The impact on infrastructure, which is clear for all to see, only gets a passing mention. For example, the transport report by the developer's consultants has been torn apart following many comments and objections. Missing traffic numbers, grossly understating the impact of the development on trunk roads and local roads. The information provided in the Local Plan implies that if billions are spent on road and transport network improvement the development at Wisley could proceed with improvements funded by developers.

3.3. There appear to be 58 projects included in GBC wish list; statements have been made that for the housing program to move forward, it would require the majority of the programme of work to be delivered. At this point in time only 4 of the 58 projects have received committed funding even one of these is in doubt if Highways England is to be believed.

3.4. No solutions have been arrived at for the problems in the centre of Ripley. After more than 2 years of meetings and discussions involving SCC and the developer's consultants no workable solution has been identified. GBC local plan dismisses this significant problem saying it will be resolved with a "management solution". I would be very interested to hear what that solution could be and I suspect SCC highways would also be interested.
3.5. Both Highways England and SCC Highways issued holding objections in relation to the recent planning application for the Wisley site. This is, apparently, all they can now do as they are unable to refuse an application. If these two key agencies have expressed their grave reservation over the potential development on this site, why do GBC insist in promoting the site?

3.6. Under the latest Housing and Planning Bill, if sites are included in a local plan there is a presumption in favour of an application with matters of detail only to be resolved. Large slices of GBC traffic solutions are based on survey and analysis yet to be done when more detail can be made available. In other words they do not know the full extent of the problem. This information will be the result of a further examination of the issues and with solutions that are not currently apparent. I suppose this is the reason for the vagaries of the budgets. The only beneficiary of such an ill conceived and ill prepared approach will be lawyers representing the future developers when they are asked to pay for or contribute towards any mitigation.

3.7. The budget costings are said to err on the conservative side. Worked out on the back of a fag packet is more the case! How can anybody be expected to take a budget plan seriously when the individual projects have a budget plan estimate in the range of £100m to £250m on a single project. It is no wonder only 4 of the 58 projects have any commitment.

3.8. There are serious environment issues on the Wisley site and the nearby SPA. Pollution levels already exceed EU levels. The proposed SANG provision is immediately adjacent to the SPA a point that was criticized by Wildlife Trust, and Forestry Commission and initially by Natural England. The latter making a reversal of earlier comments following changes in personnel.

3.9. I therefore Object to the Wisley Airfield site being taken out of the Green Belt where it continues to serve the purposes intended by its original inclusion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPP16/255  **Respondent:** 15120641 / Elizabeth Wolfe  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1.7 GBC Affordable Housing Policy H2 is proposing that all development sites (other than those with less than 10 units) will be required to have 40% of their homes offered as affordable housing. This to be on all site irrespective of where they are or where the homes are most needed. Local authorities are able to take payments in lieu from developers, but GBC have rejected this option. Why? This “one size fit all” policy will mean that homes will be built where they are not needed and not enough will be built where they are needed. Developers are therefore able to influence the level and type of affordable homes built. The housing mix in the Local Plan suggests more 1-bed homes should be built than 2-bed. GBC have ignored the figures from their own needs data (where more 2-bed homes are needed) in favour of those produced by their external consultants report. These reports have been influenced not by sound internal data from their housing records but by the vested interests of the development lobby. The only changes that can be made to the number on each site is at the developers discretion and at their request. GBC are unable to promote changes.

1.8. If any affordable social housing is built in a village like East Horsley and on most of the sites in West Horsley they could be lost to the market as there is no rural protection against the right to buy or enfranchise.

Page 2237 of 2855
1.9. Most of the social housing in EH has already been lost as a result of right to buy. GBC should take payment in lieu from developers and build the social affordable home in more urban areas where they are most needed.

1.10. GBC’s new policies will encourage the buy to let investors who will receive a good return on their investment.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.11. POLICY H3: Rural exception homes are required on a small scale and can be retained as affordable and built on the edge of village and have significantly less impact on the Green Belt.

1.12. I therefore object to the proposed housing numbers and policies based on the above points.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/257  Respondent: 15120641 / Elizabeth Wolfe  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Green Belt

2.1. Proposed Submission Local Plan includes the statement “We will continue to protect the Metropolitan Green Belt”. No this is not the case. The housing policies set out in the Proposed Submission Local Plan; indicate that 65% of proposed new developments will take place on land that is currently in the Green Belt.

2.2. Under NPPF regulations GBC and other Local Authorities are permitted, once they have determined their Objectively Assessed housing Need (OAN), to make allowance for factors which may constrain the delivery of new housing. Constraints such as the need to protect the Metropolitan Green Belt, or the restrictions required to protect the Surrey Hills Area of Outstanding Natural Beauty, or land costs etc. Although these designated areas make up a large proportion of the
land area of Guildford Borough, GBC has made no attempt to reduce its housing numbers in order to take account of such constraints. They have instead increased the number, beyond that required for normal growth projections to satisfy their own egotistical view on a path of massive economic growth.

2.3. Currently development is permitted within the settlement boundary, where villages are washed over by the green belt with particular planning regimes being applicable that have proved beneficial in preventing the urbanization of many villages. They are very successful, because of the non urban nature of small scale new development to help to retain the openness of the villages. These villages house, in some cases, a population of 4000 plus people, yet are regarded by residents as small villages. For those who drive through these areas they do not see a mass of urban style developments but trees and hedges, views between homes, views through spaces that don't reveal row upon row of homes but space and openness with trees amongst the homes and a variety of scale and architecture.

2.4. Washing some of the larger villages will result in them becoming their own urban sprawl as a result of disproportionate infilling.

2.5. Changes to settlement boundaries have been made in order to make more land available for the developers under the guise of making the boundaries more defensible. Many straight lines have now been drawn which result in villages developing hard edge profiles with buildings replacing the fragmented softer edge of the original hedgerows, trees and green fields.

2.6. Loss of Green Belt resulting from these boundary realignments can only be justified in exceptional circumstance. None of which have been provided. Moving a boundary from one already defined boundary to another, again can only be done in exceptional circumstance. Housing need has already been turned down as such an exceptional circumstance.

2.7. I object to all these changes being made to the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/269  Respondent: 15122049 / Rebekah Day  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. Disproportionate size of sites in relation to rural locations
I object to the allocation of land to the strategic sites of Wisley Airfield, Garlicks Arch (Ripley/Send border) and Gosden Hill (Clandon). The proposed development of these sites will have a disproportionate impact on the surrounding local villages. They will have a permanent impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/271  Respondent: 15122049 / Rebekah Day  Agent: 

---
1. **Congestion on the trunk roads, A3/M25**  
   I object to the development of the strategic sites due to A3 and M25 already being at capacity during peak hours. Highways England has no plans to look at improving the A3 before 2020. It is therefore not sustainable to identify sites for further development which will worsen the congestion on these motorways and trunk roads.

2. **Congestion on the local village roads and lanes**  
   Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. I object to further development which will cause greater congestion in and around our villages.

3. **Unsuitability of our local roads for heavy vehicles and more traffic**  
   Many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

4. **Poor air quality concerns**  
   Further congestion, particularly in built up residential areas will only lead to greater levels of air pollution. I object to further development, which will result a fall in the air quality.

5. **Lack of proper infrastructure planning for sites**  
   I object to the lack of planning and implementation of infrastructure. For example at Garlick’s Arch. Without improvements to the infrastructure prior to development, the existing residents’ quality of life will significantly deteriorate in many ways. How will the local services such as doctors and schools cope?

6. **Lack of Utilities Capacity**  
   Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. I object to the development of Garlick’s Arch on the ground that there is little capacity in these networks.

7. **Sites being planned in unsustainable locations**  
   Many of the strategic sites e.g. Wisley Airfield and Garlick’s Arch, are in unsustainable locations. They do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. I object on the grounds that these sites are not sustainable.

8. **Parking issues in local villages caused by larger population**  
   Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems. To which I object.

9. **Local healthcare facilities will be overwhelmed**  
   Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. I object due to the further stress it will put upon existing health services.

10. **Local policing facilities will be overwhelmed**  
    Police services are seeing funding reduced. The development of the likes of Garlick’s Arch and Wisley Airfield will stretch the police services further and I object.

11. **Local social welfare facilities will be overwhelmed**

12. **Local shops/restaurant facilities will be overwhelmed**

13. **No protection of heritage assets**

14. **No protection of the environment**

15. **1 Overdevelopment of sites**

16. **Not meeting the needs of local communities**

17. **Insufficient affordable housing**
18. Poor quality of layout and housing design
19. Insufficient consideration of SPA, SSI and Conservation Area issues
20. Lack of proper cycle lanes on local roads
21. Lack of proper pedestrian footpaths on local roads
22. Current SHMA figure of 693 p.a. too high

Personally, I drive down a lot of these roads everyday on my commute to work. They already suffer from huge amounts of congestion and also large vehicles using narrow lanes to the point they almost bully smaller vehicles off the road. Therefore I strongly object to this proposal.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

3. Unbalanced allocation of development in one area of the Borough
Between the M25 and Burpham, a distance of only about 5 miles it is proposed that over 6,500 houses are built. This represents over 40% of the housing proposed in the Local Plan. I object to this area being hit so hard by the allocation of development, which is disproportionate to the rest of the Borough.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to express my very strong objection to the draft proposal for Garlicks Arch in Send Marsh.

As a resident of the Send Marsh area I object to these proposed plans as I feel strongly that the proposed plans are completely disproportional to the size of the Send and Ripley village area and will irreparably damage the character of this small village community.

In addition, this small village does not have the facilities or infrastructure to support such a vast increase in the population. The area is already unable to cope with the traffic in peak travel times and additional housing will create even more pressure on our struggling roads. The roads through Send, Ripley and Clandon are very narrow and bendy and already struggle during rush hour. Parking is a very big concern in the area already with many cars parked out in the road making it difficult for cars to move through the area and for cyclists to use the roads safely. The area is poorly served for public transport, the nearest train station is 50 minute walk and buses are expensive and only operate twice an hour (if you are lucky!).

The local area is not equipped to support an increase in demand for local services such as schools and the doctor's surgery. It is already challenging to obtain an appointment with my GP.

I have lived in this area all of my life and greatly enjoy the small community atmosphere of this area. The proposed plans are excessive and completely disproportionate for this rural community and the damage caused by this proposed plan will irremediably damage the area and its natural beauty. The area proposed for development is an area I regularly walk around and it would be gutting to think this area will no longer be the same.

I hope you take my objection into consideration and I would appreciate receipt of my email so that I know my views have been carefully considered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/102  Respondent: 15122177 / Madeleine Shillaker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Ripley
I object to the council plan for development in the Ripley Green Belt and development on Garlick’s Arch.

My reasons for objection are:

Destroying the Green Belt – the areas of Ripley, Send and Clandon should not be removed from the Green Belt. It will have irreversible effects and defeats the whole point of having a Green Belt! Green Belt should be protected, not moved, de-classified and destroyed.

The proposed development of these sites will cause a significant increase in air pollution and have a detrimental impact on the environment. It will have a disproportionate impact on the surrounding local areas – causing irreversible problems for the local community and those who use the facilities and enjoy the open spaces there today.

Development of Garlick’s Arch will have a huge detrimental impact on traffic in the local area. The roads are not suitable for heavy traffic. Traffic congestion will be severe – these areas already struggle to cope with traffic, it’s a careful balance.

<td>I would like to raise an objection to the proposed quantity of new housing planned for Horsley. I live on Ockham road North and have extreme difficulty trying to get my 2 children to different schools. There is no parking at the Raleigh school and no pavements so the children take their life in their hands dodging cars whilst they have to walk on the road. My elder daughter went to the Howard and her bus picked her up once again on a road with no pavement so the children were standing on the dirt in a dangerous position. The space for parking at the doctors and the village is also inadequate. Where are all these people going to go to school and Doctors etc? There is just no structure in place for this increase in numbers. I do not object to affordable housing in small amounts but not this many.</td>

I object to Policy 43A. A 4 way interchange on to the A3 at Burnt Common. This would increase traffic through Send & Ripley from the A3 to Woking and to the M25 when there are problems on the A3. The villages would be gridlocked with traffic, already heavy at peak times with school runs and rush hour journeys. Lack of infrastructure and forethought.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Introduction

I object to the last minute inclusion of this policy into the local plan. The revised plan submitted to the GBC Executive in April lowered the housing in Send to 185, the Garlick's Arch proposal added in May increased the number to 485 and will cause pressure on the local medical centre and school, neither of which has capacity for such large increases.

I object to the removal of Ripley, Send, Sendmarsh/Burnt Common from the Green Belt. This encroachment by the council has not been rigorously justified as required by the Planning Minister. They provide a buffer between Woking and Guildford and their removal would cause real harm to charming and picturesque villages.

In particular I should like to OBJECT to the Waterloo Farm site (policy A40), given the impact that this will have on Green Lane as a single track road wholly unsuited to the increased volume of traffic that will inevitably result from it being used as a cut through by the residents of the new homes, together with the more general impact on the quiet rural character of the immediate vicinity. I am also concerned by the build-up of traffic on Ockham Rd North that will result from those coming from the A3 queuing to turn right into the site.

I should like to OBJECT to the new local plan for East & West Horsley, published on 6th June 2016 as I feel the plan as a whole is unfairly skewed towards an essentially rural portion of the borough that lacks sufficient infrastructure (particularly roads, medical facilities and primary schools) to support this proposed level of development, particularly when taken in the context of the threat of the Wisley Airfield development which remains an overhang on the area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Housing need and EU referendum

It is stated (quite reasonably) in section 1.16, page 10 of the Local Plan, Strategy and Sites that development must be based upon ‘up-to-date and relevant evidence’.
Because of the EU referendum result this clearly can no longer be the case. Population changes can only occur because of differences between birth and death rates (which is currently close to zero) and/or net migration into the area. Following the EU Referendum there will almost certainly be a significant change to this figure, particularly being located so close to London. So the evidence cannot be based upon up-to-date and relevant information.

In addition the actual calculation has been kept secret from the residents of Guildford so it has been impossible for residents to verify that the data and calculations are correct, even before the latest changes in circumstances. No decision should be allowed before ordinary residents have a chance to scrutinise and challenge the validity of data and assumptions made.

Students

There has been considerable discussion on the availability of student accommodation on University land and that the University is not making the most of what is available. The plan also assumes that 60% of students will be accommodated within campus which implies 40% will not be.

If this accommodation was made available at the University it would solve multiple issues simultaneously and make the Local Plan so much less damaging. Presumably the vast majority of students not living on campus are living within Guildford Town itself and in affordable housing. The releasing of this housing would reduce the number houses needed to be built, the houses released for accommodation would almost certainly be 100% affordable housing and in the locations that are most often required. In addition it will have no or little impact on infrastructure (unlike other developments), in particular transport, and students would be on site in more appropriate accommodation, with the additional benefit of a reduction in travel and transport congestion, which is clearly a truly sustainable approach.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

My Local Village (West Horsley) and Surrounding Area

Above I have focused on Guildford wide issues. Below I will focus on issues very specific to where I live. However when looking at issues in my location it appears that there is very little detail or consideration of problems and issues that the Local Plan could raise. If the plan is approved and the houses built, those issues will then have to be solved. Rather than consider those issues now and come to a sensible solution now we will be faced with a series of disasters for which dramatic solution will have to be found. This is inappropriate and unnecessary.

As it is clear that in my area a number of these exist (surface water flood identified but no solutions identified, 35% increase in housing, but no schooling provided, existing traffic jams not identified, etc) then it is reasonable to assume there are many more of these issues in other areas of the borough which I will not be aware of as they are not local to me.

In addition there are so-called solutions to other problems/issues identified in the plan that are just a few words with no substance behind them whatsoever. I will give some examples below. In several of these cases I have sought further information from the Council and there isn’t any further detail. Saying there will be a traffic management system, or a
SANG is of no use whatsoever if there are no details. It doesn’t have to be comprehensive at this stage, but it has to be more than a few words!

We need to know what the problem is and an outline of the solution as otherwise it could be that an insolvable problem is being created or a problem created that can only be solved by a very damaging solution.

When it comes to the Wisley site the interface with the A3/M25 and the impact on surrounding villages could be catastrophic yet very glib solutions are provided or missed altogether.

The plan gives an impression that the council has been told it will build ‘x’ number of houses, has accepted it and creates a plan to fit the numbers regardless of how damaging or impractical it is.

**Wisley**

Very recently GBC gave 14 reasons for disallowing the planning application for a significant development at Wisley. Some of the reasons given were either insurmountable or insurmountable for all practical purposes. Yet having rejected this development Guildford Borough Council then, within weeks, includes it in their Local Plan.

How is this possible? There is no logic whatsoever in an organisation whole heartedly rejecting a proposal to then include the same proposal immediately in its Local Plan. Something cannot be fundamentally wrong for 14 reasons and yet be perfectly all right simultaneously.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Primary and Secondary School and the order of build

We live a few hundred metres from The Raleigh School. When we moved here in 2011 there was not a place at The Raleigh for our daughter. There was also not place available at any Primary school in the area, which meant (fortunately for us) that The Raleigh then had to take our daughter, plus 2 other children in her year that had moved into the area at the same time. So in 2011, in my daughter’s year, every single primary school was up to full capacity and exceeding their numbers.

As is very well known, a similar issue exists with The Howard of Effingham Secondary School. The school is at full capacity. Similarly George Abbot, our nearest alternative school, is also at full capacity and consequently its catchment area never reaches Horsley.

So where do the children go to school if 533 new houses are built in East Horsley and West Horsley?

When I raised this issue with GBC officers at one of the open days I was told that the new schools at the Wisley site would provide the extra capacity. I challenged that on the basis that it seemed reasonable to assume that the Wisley Development would take some time, in particular with the infrastructure issues and not least the A3 access, and that some or all of the Horsley sites (and sites around other nearby villages) would be completed first. The officers agreed this would be the case.

So again I asked “Where do the children go to school?” I received no answer other than a shrug of the shoulders!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Further future expansion

It is hard not to assume that the increase in housing proposed in West Horsley and East Horsley will then require significant additional ‘facilitating’ development to support it, resulting in yet another ‘exceptional’ need to build in the new Green Belt areas again. Obvious examples are:

Primary school: As mentioned above The Raleigh School will not be able to cope if the proposed residential development goes ahead as proposed and there isn’t room for expansion so a new school will be needed. Where?

Roads: All the roads in West Horsley are in fact lanes containing at most one pavement and therefore unsuitable for a 35% increase in housing. How will this be addressed?

Station car park: In addition to the village car park the Station car park also won’t cope. The station car park is at full capacity so certainly won’t cope with increased numbers. Where will the commuters go?

Doctor’s surgery: Is also close to, if not at, full capacity. How will this be resolved?

Where and how are these issues to be resolved?

It is hard not to come to the conclusion that we will then be into another round of ‘Exceptional’ need to expand again into the Green Belt, which is unacceptable.

**Effingham Common Road**

My daughter goes to Howard of Effingham School by bus. Occasionally, some mornings, I may have to take her in. Effingham Common Road from the school to Effingham Junction, in direction of Wisley, is usually a solid traffic jam for its whole length (over 1 mile) at this time in the morning, although it does move steadily.

As I turn off onto Forest Road (when coming home) I do not know what the road is like once it becomes Old Lane, but presumably the traffic is still very heavy. These are country lanes. Clearly building a village/town of 2000 plus houses between this traffic jam and the A3 will have an enormous impact.

When I raised this issue, specifically with a GBC officer specialising on transport, at the East Horsley open day, he confirmed that they were completely unaware of this issue!

Attached documents:
Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Wildlife corridor

The developments A38, A39, A40 and A41 will have a significant impact on wildlife movement. Open areas are being boxed in between A41 and A39 and the railway line. A38 removes the link between the open areas on one side of it and the open area the other side of East Lane. Currently only one row of houses exists which forms a very limited barrier to wildlife. The development of A38 will make a solid barrier. The same is true for the open countryside either side of A40.

Water pressure

The water pressure in East Lane is demonstrably poor. I also understand that the waste systems are struggling to cope. As the Local Plan is proposing a 35% increase in housing in West Horsley this, surely, is taking these facilities way past their breaking point.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Please find my detailed OBJECTION to the Guildford Borough Proposed Submission Local Plan: Strategy and Sites 2016 below.

I’m going to respond regarding my objection in two parts. Firstly the overall plan and secondly issues that are relevant to my local village, West Horsley, and surrounding area.

Overall Plan

Green Belt

The plan states that ‘National planning policy requires that Green Belt boundaries are only amended in exceptional circumstances’ and ‘We consider that exceptional circumstances exist to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of development’

The development that is needed in the borough is a result of normal growth and should be catered for in the normal way. It is not ‘exceptional’ it is normal. It is not due to a new airport, railway line, etc, etc it is just ‘normal’ evolution of the area.
The purpose of the Green Belt is to provide protection from urban growth. If it can be removed to provide for urban growth, that is a tautology!

The plan also tries to argue that some of these locations should not have been ‘washed over’ by the Green Belt in the first place and as per the wording in the plan ‘other development management policies used to restrict any inappropriate development’ in these places.

However other development management policies are not being used to restrict inappropriate development. That requirement is being completely ignored. If these areas are removed from the Green Belt on the basis of this technicality then they should be protected by those other development management policies. Why aren’t they? Why are villages like West Horsley being immediately faced with an increase of 35%? Clearly the alternative protection as defined in the plan is not being applied as required.

Also the new Settlement / Green Belt Boundaries going around the villages that are now being proposed to be inset are, as to be expected, generally hugging the main settlements. However, every so often, the boundary extends out into open countryside and then back again for no explicable reason. It is of no surprise that where it does this are the proposed development sites. This is a cynical opportunity, when insetting these villages, to include open countryside in them that clearly would have, and should have, been in the Green Belt in the first place. It is blatant opportunism when changing the designation of these villages by including lumps of countryside within their Settlement Boundaries. If the villages were not washed over by the Green Belt originally these areas which are now included in the Village Settlements would have been in the Green Belt and untouchable I will cover one specific example in West Horsley below.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4514  Respondent: 15127777 / Keith Hammond  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Setting of the Green Belt / Settlement Boundaries

If West Horsley is no longer being washed over by the Green Belt then the new boundaries need to be set carefully. I don’t believe I am being cynical when I notice that the new boundary (as one would expect) hugs the settlement closely except in the areas where development is proposed. At these places it goes into open countryside exactly replicating the development plots.

If West Horsley had previously been inset and not washed over by the Green Belt then these boundaries would have been along the edge of the settlement and all these proposed development sites would have still been in the Green Belt and not available for development.

To take the worst example – Site Allocation and Policy A41. It takes great imagination to put the Settlement / Green Belt boundary around this plot and not along the opposite side of East Lane where it clearly should be.

How on earth can anyone think that the Green Belt boundary that runs along East Lane on both sides of this plot should suddenly, for no explicable reason, suddenly bulge out and go around a piece of completely open countryside. Could it have anything to do with a proposal to build 90 houses here?
**Villages Merging**

I notice in the plan that effort is made to ensure villages don’t merge at Ash/Tongham/Ash Green by the addition of new Green Belt. I understand this is something where great effort is being made to avoid coalescence and of course the Green Belt that operated over West Horsley prevented exactly that from happening here. Yet the plans put forward are now apparently encouraging coalescence in West Horsley.

It should be noted that the political/parish boundaries of West Horsley do not represent the physical structure of the village. There are two distinct parts.

There is the original village of West Horsley, including the conservation area, with its own amenities (shop, hall, pubs etc.) and this is entirely surrounded by countryside. The Street goes through the centre of it.

When The Street becomes East Lane (at the junction with Long Reach) this is the start of the rest of West Horsley (where I live). This northern part of West Horsley is actually contiguous with East Horsley and not attached to the more historic part of the village at all. It does not have its own amenities and we tend to use those in East Horsley. This part of West Horsley, around East Lane, is distinct and separate from the original village of West Horsley.

The development proposed on East Lane (Policy A41) is starting that creep of development towards the village part of West Horsley and should not be allowed. The older part of the village of West Horsley should keep its unique identity and not be merged in with East Horsley and the northern part of West Horsley.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Surface Water Flooding**

I am acutely aware of Surface Water Flooding. When we moved into West Horsley in 2011 we were then unaware of any flooding risk, after all where we live in East Lane there are no rivers.

Since moving to East Lane (less than 5 years ago), East Lane has flooded several dozen times during heavy rainfall, through the failure of systems to take surface water away. The road completely fills. Because of the upward slope of the pavement at our house it has not yet gone over the edge into our drive. If it did we would be badly flooded as our drive slopes down to the house by several feet so we could be under many feet of water if this happened. We have come close so many times.

This is a very serious problem in the Horsleys. It is not just our road. We have had a car written off due to local surface water flooding in West Horsley and have had to be rescued by the Fire Brigade. Not a good record for less than 5 years here!

Clearly the additional plots in West Horsley will have a huge impact on this situation and each one has surface water flooding identified as an issue in the plan.
However, to my amazement, when looking at Appendix C under Surface Water Flooding there is not a single proposal for West Horsley. That is mind boggling!

Answer (if comment is on questions 1-7 of the questionnaire): ()

East Horsley village shops and local parking

East Horsley Station Parade village shops provide a vibrant selection of shops. Parking here is very well balanced. It is operating at nearly full capacity much of the time, but usually it is possible to find a parking space. Occasionally you may have to drive around a loop a second time, but even if full someone is usually leaving as you arrive.

533 extra houses in the two Horsley villages will render this in operable. It must be obvious that the addition of only a few extra cars at any one time will tip the parking over the limit and it must be completely obvious to anyone that 533 will introduce more than this at most times of the day.

In addition it is completely naive to think that the 2000 plus new homes at Wisley will all leave the new location via the A3/M25. They will clearly clog up East Horsley and West Horsley (as well as Cobham, Effingham, Ripley, etc, etc)

Answer (if comment is on questions 1-7 of the questionnaire): ()

Previous feedback ignored

The revised Local Plan says it took onboard the submissions made following the previous Draft Local Plan. This is absolute nonsense.
The Draft Local Plan had an unprecedented response which was almost unanimous in rejecting the plan in almost its entirety as being fundamentally flawed. The subsequent amendments made to the plan were miniscule tinkering at the edges. To even suggest such a claim that the submissions made were taken onboard is absurd.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Introduction: The policy A44 refers to new development of green sites which are recovered land fill sites after the closure of Sand Quarries. A major part of this site is currently privately owned by a person who bought it to protect the area from over development in 2002.

The other part is owned by GBC and to date has been left as an open space for the enjoyment of the local community. At the northern end is another piece of land which is owned by a traveller family. There was some consternation some years ago when the travellers set up unauthorized pitches on the land which is covenanted against such use and development. The incomers were evicted with the authority of the council and a deep trench was created to prevent any further incursion. This land is locked in on all sides by public footpaths and there is no vehicular access.

The landfill system won an award and it is well vented and monitored for methane and other pollutants. It is said that before the landfill was capped off, a large quantity of asbestos was dumped on the top level.

The residential setting to the east of these lands provides high quality housing through 57 properties and there is also a cemetery which is in regular use. The road to the junction with Potters Lane is narrow and is often congested at peak hours with traffic to the school at the northern end of Send Hill. The Junction is dangerous as cars and other vehicles.

It is proposed that policy P2 would remove Send from the Green Belt to allow for the scale of development that GBC seeks.

I object in principle to this proposal which threatens to change the life of the village residents through over-development and pressure on local resources in health and education. This is an unjustified imposition on local people who will see no benefit to the wider community but certain profits for the developers.

There is already a pattern of through traffic congestion which will be predictably worsened year on year as there is a high local dependency on private cars for people to access their place of work in the local towns. The impact on vehicular pollution levels need to be evaluated as there is strong evidence that such patterns of congestion at peak times when children are starting the school day creates such an impact on their health and development which must not be ignored.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the disproportionate distribution of houses across Guildford Borough, by far, the North East has taken an unsustainable number, in an area where country lanes are narrow and volume of traffic now using through routes makes roads gridlocked at rush hour.

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners' views, or the costs involved in improving the infrastructure, currently out side their financial capability.

The methodology is also flawed as this plan has been formulated without regard to village Neighbourhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

I object to the 2016 Draft Local Plan as i t has had no regard to schools required, additional medical or hospital facilities which would make a plan sustainable.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

Response to changes in the local plan affecting site A44 -

Land to the West of Winds Ridge.

I live opposite the proposed development site and have done so since 2003. This piece of green belt provides considerable amenity for those seeking refreshment, opportunities to exercise themselves and many dogs during the course of the day. Many runners and walkers, some very elderly currently use Send Hill as a quiet place to exercise during the day in spite of the lack of pedestrian facilities. Send Hill is a narrow country road beyond the cemetery and traffic already builds up in the school rush hours with heavy parking related congestion during those times, especially near the schools at the north end.

Whenever there are traffic flow problems northbound on the A3 people with local knowledge will use Potters Lane and Send Hill as a diversion to bypass the problem. Traffic volumes will increase considerably at those times.

The parish council also note that the users of the cemetery, both for multi-denominational funerals as well as regular visitors will be adversely affected by the inevitable increase in traffic and noise of passing vehicles.

The school bus and HGVs accessing Send Hill via Potters Lane are often seen to have difficulties in negotiating this narrow road especially in attempting to pass each other in opposite directions – which is often hard enough for two or more cars.

There is little scope for improving the infrastructure. There is no public transport available and the road to the village may prove to be unduly hazardous to pedestrian families with young children who may be tempted to buy affordable houses on low incomes while affording one or two family cars to add to the congestion. It is well over 1.5 miles to the shops, such as they are, and the GP health centre and pharmacy are as far again in the opposite direction along Send Barns Lane. There is a public footpath which connects to the recreation area but with cuts in council expenditure the maintenance is wanting and in poor weather the path becomes unsuitable.

The proposal to build 40 affordable houses at A44 suggest an intensity of development in a poorly resourced area which the Parish Council has deemed unsuitable for this level of development on several grounds including the failure of the proposing Council to supply evidence of need objectively. The council is bound to take a view on the impact on the environment as well as aspects of community welfare on a range of issues.

The land which is owned by the council at this point is a former landfill site and it is known that a range of asbestos products have been dumped towards the end of the site’s usage. It seems to me to be unnecessary to add to risk of contamination during any development work and the council has not addressed this issue as far as I know. Dealing with such a risk would increase costs and may render the whole project unaffordable!

**Provision for two Traveller sites.**

This proposal includes the facility to keep large fairground machinery and transport vehicles on the site with the implication that this will become a major feature of the new landscape. We see that other traveller sites are proposed in the local area and it would be interesting to know if the travelling community has been consulted about their preference to have sites close to each other rather than separated in this way.

In historical terms, there is a piece of land in excess of one acre at the north end of A44 which is owned by a Gypsy family who attempted to gain access across the land owned by the Council. They were evicted as the council did not approve of
such use of the land. A large ditch was dug to prevent further intrusion and the wooded area left unused. It is understood that the current owner who lives in W. Sussex does not support this proposed use of land adjacent to hers.

Our view is that such a proposal would bring about such a fundamental change in the environment and bring an unwanted impact on the current settled community simply because of the nature of what is proposed.

In summary – we object to all the provisions proposed in the allocation for A44 and we support the position of the parish council who have determined that such an allocation is un-necessary and that the land identified is unsuitable for such an intensive development because of infrastructural deficiencies, lack of amenity to support such an explosion of population in a small part of the parish. It would also impact on the current usage which so many people enjoy.

</tr>
</tbody>
</table>
As a resident of East Horsley, I am shocked at the idea of changing the Green Belt designated areas around the villages. I hope this is a mistake and will not happen.

We live in one of the most beautiful parts of the UK, one of the most important playgrounds outside the M25 for space, peace, and recreation. It is no mistake that we have many areas of outstanding natural beauty, nor that the Green Belt is there to keep this area distinct and discrete from the M25 and London conurbations.

My views are that the Wisley development is not the best option for the whole Guildford area, in that it destroys that natural break, and creates pressure on existing villages in terms of traffic, infrastructure and capacity. But it also changes the tone of the area hugely. Surely we must be able to continue to find solutions by using a collection of smaller, brownfield and fill-in sites, preferably around the city itself, before we ever start taking whole swathes of practically unspoilt land and converting it to towns. I support the need for housing when intelligently done.

Specifically re the Horsley sites, I am of the view that the sites 36,37,38,39,40,41 represent a reasonable addition to the village, being within the existing green belt and village boundaries.

However, I also don’t want to see the Green Belt boundaries outside these village boundaries changed. We should be totally keeping Green Belt land. We need to protect the village greenbelt boundaries to remain as tight as possible, and continue to find solutions from WITHIN villages, all villages, or at the edge of the towns, or in brownfield /in fill sites within Guildford itself. But please keep the villages small.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I am writing to object to the local plans for the Horsleys. The numbers of houses planned are excessive, and the changes to the green belt are not in the best interests of the village.

The Green Belt is critical to the Area's quality of life, and we urge you not to remove the current protection which for example the Horsleys enjoy. It opens up any chunks of land for possible house building including the land adjoining High Park Avenue. It is not just the Horsleys under threat – but also Ockham/Wisley, Ripley, Send, West Clandon and Effingham, on this side of the Borough.

Surely there are better brown field sites which could satisfy demand. The worst possible solution is to use or change the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/113  Respondent: 15129057 / Yvonne Hamilton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to register my objections to the proposed development plans within the Parish of Send. I request that my comments and objections be seen by the Inspector.

Firstly I strongly object to the underhand way Guildford Borough Council have changed their original plans for development without a full consultation period. The Council have not followed the correct procedure introducing an increase from 185 houses during April 2016 to 485 in May 2016. This substantial increase would put yet more pressure on our local community, the roads, the doctors surgery, the schools.

I object to the proposed plan to build a new junction on the A3 which will have a negative effect on our local roads, it would further increase traffic in the area, and should there be any accidents on the A3, the result would be gridlock through the villages of Send, Ripley and Clandon. We already experience heavy traffic on the local roads, which has a significant impact on the local environment, safety for road users and pedestrians and further deteriorates the condition of our local roads.

I object to the proposed development at Garlick's Arch, this is Green Belt and is still protected. Send should not be removed from the green belt, we are in danger of losing the character of our village. We should be conserving our woodland and green areas not taring them down to build an additional 400 houses and an industrial development which are
not needed. The Employment Lands Needs Assessment 2015 showed a decline in the need for employment floor space. As I drive around Guildford and the surrounding towns and villages I see plenty of empty office space and industrial sites unoccupied, why doesn't Guildford Borough Council direct some energy into working out a way to productively use the empty spaces and sites we already have?

I object to the introduction of the plan for 40 houses and 2 travellers pitches to be built on the land west of Winds Ridge and Send Hill. Yet again this is Green Belt, and would be spoilt by the proposal.

In conclusion I would urge the council to reconsider their plans, we do not have the infrastructure to accommodate all this development and increase in local population, the pressure on our surgery, schools, environment and roads would impact on all our village residents. We are a village and do not wish to become a town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPA16/114  Respondent: 15129121 / Richard Green  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Ripley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the removal of 15 villages, including Ripley and Send, from the green belt. This will lead to wholesale, and often inappropriate developments.

I OBJECT to the fact that GBC have not followed the correct process for Send and Ripley developments. Any significant changes to the 2014 proposals, such as the proposal development of Garlicks Arch, should have required another full consultation, which did not happen. This invalidates the whole process.

I OBJECT to the fact that GBC have failed to provide sound evidence in terms of the Employment Land Needs Assessment which shows that industrial space at Burnt Common IS NO LONGER NEEDED.

I OBJECT to policy A43.30 the proposed development of Garlicks Arch designated for 400 houses and an industrial estate. This is a new site not included in the Regulation 18 draft and has NOT been consulted on previously. It is not only permanently protected green belt but also a site of ancient woodland with some trees planted in the 16th century.

I OBJECT to policy A44 which would see 40 homes and two travellers' pitches on land west of Winds Ridge and Send Hill. This was again a NEW site NOT included in 18 draft and therefore has NOT been consulted on previously. Once again this is Green Belt land partly containing unsafe landfill. Access is by a narrow lane which could never take the volume of traffic that would ensue from traveller's pitches.

I OBJECT to the fact that the Local Plan takes no account of schools, doctors surgeries and roads that are already operating at full capacity. Another 4000 houses in this area with a conservative estimate of a further 8000 cars would be catastrophic.

I do however strongly SUPPORT policy A43.30 - the development of new four way interchange onto the A3. A new interchange is much need already, to reduce traffic flow through the village of Ripley, including huge numbers of HGVs. I would also like to see a southbound entry to the A3 at the A3 junction at Ripley.

I object to the proposed plans for the development of Garlick's Arch and to the proposal to remove Send from the Greenbelt.

I object to the development of Garlick's Arch on the basis that I understand these houses are in addition to the number of houses already proposed for the borough and that they are an unnecessary destruction of Greenbelt land. Also, should this development go ahead there is no infrastructure, Roads, Transport facilities, Medical facilities, Schools etc, to support the additional population these houses would bring. With regard to the Industrial Development there appears to be no justification whatsoever for this as I understand that this replaces the industrial development planned for Slyfield which is obviously a much better site for such development.

Having lived in Ripley for some 14 years I am appalled that Guildford Borough Council could contemplate taking Ripley and the surrounding villages out of the Green Belt.

I object strongly to ALL erosion of the Green Belt. Particularly the removal of villages from it’s protection.

There has not been a suitable length of Consultation time for these proposals, with some New Sites being included with less than two weeks notice.

We do not have the infrastructure to cope with these proposed developments. There are not enough Schools or Medical facilities to say nothing of the impact this will have on our roads. Ripley is suffering enormously already with traffic queues now, how does Guildford Borough Council and the Highways Agency think we will cope if all this proposed development goes ahead?

I further object to the suggestion that we need all this new housing – where is the direct evidence for these requirements. This plan also proposes a disproportionate amount of Development in the area.

Please register my comments and my outright objection to this Draft Local Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to your proposals for an increase in the already worryingly high number of homes to be built in Tannery Lane as this would cause unacceptable levels of traffic in this area. I also feel that the proposed development would have a detrimental effect on the Papercourt Nature Reserve which plays an important part in the conservation of birds, animals and plants.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to your plans to increase the development in the Garlick's Arch area particularly as you have shown nowhere in the plan why you feel this development is necessary. The area falls within Green Belt land and, as such, you need to show exceptional need before allowing development to happen. If your proposals are allowed to go ahead it will mean that Clandon, Ripley and Send simply merge together into one expanse of buildings.

You have established a need over the entire Borough for eight plots or pitches for Travelling Showpeople to include storage facilities along with housing. Again, this not appropriate use of Green Belt land and furthermore why is 75% of this need included in your plans for Ripley? I object strongly to this unfair allocation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to all erosion of the Green Belt.

I object to your plans to destroy the Green Belt. Have we not learnt lessons? Many areas in the UK are susceptible to floods and we have to protect the very little land we have by planting more trees and not destroy them to build houses and roads.

I object to site A43 Garlic Arch.
I object to site A43a the on and off ramp at Clandon - this will increase traffic problems in the villages, not help them! More and more young people get through their driving tests and even where we live, some families have more than one car and they block entrances by parking their cars everywhere. Then over weekends and during holiday periods, we all have visitors and when everyone drives around, leave engines running, this place is no different to a car park nearer town centre. We are unable to open the windows, because of the exhaust fumes.

When, about twenty cars in our cul de sac can cause this much stress, what would it be like if you build more houses and roads everywhere in the areas you have planned to build destroying the precious and much needed Green Belt!!! Very sad. In the long run, this area will be crowded, people will be unhappy, and too much traffic, noise and pollution caused by this, will be a danger to the young children and to the elderly people like me.

I depend on the Send Help group to take me to my doctor or to the hospital. They are helping the elderly folks in this area. I'm very grateful for the organisers of this group, because they are providing a great service to the community. I thought I ought to mention this, because, we have no bus service to get to our medical centre in Send and I depend on them, just like many old people in this area where we live.

I hope you reconsider your plans to build houses. You will regret it when the area floods. Where can the water go? The Green Belt must have protected this area all these years.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
supermarket some miles away (whilst not feeling well) and getting it from there. How are the local roads, local parking provision and doctors surgery supposed to cope with any amount of new houses?? The example above is not a one off. This is a regular thing, access to the shops on Wharf Road is chaos, so much so that we avoid shopping there. How can that be right?

It’s not just the obvious things like getting a doctor’s appointment. The council are great and provide recycling facilities, one such one being in the car park on Ash Hill Road. These facilities are often full to the brim – again I am not criticising the council but I am asking you how a development of “up to 115” houses expects a local community to continue to function when already under such pressure? Let’s not forget the local schools as well, it is not realistic to think they could accept more children.

Traffic – DON’T GET ME STARTED ON TRAFFIC. The local roads during rush hour (which is in fact rush morning and rush afternoon – it is not restricted to an hour) is hideous. The area comes to a standstill. Often the longest part of my commute is getting in and out of Ash (and I don’t need to get through the level crossing). Local roads simply can’t cope with any more traffic. I only travel 12 miles to work but due to local traffic I leave before 7am, far earlier than needed just to compensate.

If any development is to go ahead the local road infrastructure needs review and improvement beforehand, the traffic lights at the junction of the Guildford road and the Pirbright road on the A323 along with the level crossing on the A323 need addressing as these are both severe bottlenecks. Additionally cars currently park along Foreman Road causing a width restriction - this road and the surrounding village roads (e.g Grange road) are unlikely to be able to manage increased traffic, and any increase will severely impact the people who currently reside there.

In an ideal world people would use more public transport HOWEVER, when we used our local railway station (Ash) to travel we paid a fortune for seats, only for there to be standing room only and an uncomfortable, expensive, potentially dangerous journey. It’s hardly encouraging and not a suitable alternative if the services aren’t able to cope either. This is not speculation, this is a real example. We would need more train carriages added to services passing through Ash.

I am not aware of the flooding issues in the area but I am aware that when it rains the water pours off the Ash Ranges, down Brackendene (private road) and towards the area you are referring to. We can literally watch it washing the road away. If our village open space is built on where will the surface water go? With flooding on the increase in places it has not flooded before how will the area (the new development and beyond) be protected? This is a very real concern.

I will leave my comments there, it would have been easy to send you a list of bullet points with the usual traffic, doctors, schools etc. but I wanted to relate the information to real situations. We live here, we experience the actual frustrations on a daily basis. All I can see at the moment is that this proposed development would have a negative impact. Unfortunately we have looked at your website https://www.sites.google.com/site/foremanroadash/home but it lacks proper detail which would help us make more meaningful comments or see a better side. What detail is provided is frustrating E.G. you can’t zoom in on the maps, the key is totally unreadable. Statements like “up to 115” and “Each home will be provided with car parking” are far too vague. How many parking spaces would a property with 5 bedrooms have for example? I would assume no less than 3? If I was being cynical I would say that the website is there to “tick a box” rather than to provide any meaningful content or attract any helpful suggestions!

Please listen to the comments made and offer real, actual solutions to the real, actual problems that exist and will be made worse. Comments such as “There is the future ability to put in place a pedestrian crossing over the railway line, should the Council decide to deliver this facility.” are laughable. What does that actually mean in real terms? ..NOTHING.. This would need to happen.. and before the houses are built. Not years afterwards if at all..

**Introduction:** The policy A44 refers to new development of green sites which are recovered land fill sites after the closure of Sand Quarries. A major part of this site is currently privately owned by a person who bought it to protect the area from overdevelopment in 2002.

The other part is owned by GBC and to date has been left as an open space for the enjoyment of the local community. At the northern end is another piece of land which is owned by a traveller family. There was some consternation some years ago when the travellers set up unauthorized pitches on the land which is covenanted against such use and development. The incomers were evicted with the authority of the council and a deep trench was created to prevent any further incursion. This land is locked in on all sides by public footpaths and there is no vehicular access. Provision of Traveller pitches would compromise the covenant and enable unauthorized development which would be difficult to challenge and expensive on the local purse to resolve.

The landfill system won an award and it is well vented and monitored for methane and other pollutants. It is said that before the landfill was capped off, a large quantity of asbestos was dumped on the top level.

The residential setting to the east of these lands provides high quality housing through 57 properties and there is also a cemetery which is in regular use. The road to the junction with Potters Lane is narrow and is often congested at peak hours with traffic to the school at the northern end of Send Hill. The Junction is dangerous as cars and other vehicles emerge into a short stretch of road that is between two blind bends and there are frequent accidents and near misses.

Traffic at peak times by the school is very congested and there is a high risk to the children who are being dropped or collected at either end of the school day.

**OBJECTIONS**

I OBJECT TO EVERY ASPECT OF THIS PROPOSAL.

In particular, I object to the proposal for the travellers' pitches. The local plans "ambition" is to improve the quality of existing residents and the introduction of a culturally different group to the area has the likelihood of imposing increased noise, nuisance and traffic which would be detrimental to existing residents. [Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]

I object as this is a new proposal and the consultation that is required is a FULL CONSULTATION UNDER REGULATION 18 rather than Regulation 19.

I object as there is a risk to existing residents if the underground asbestos is disturbed while the infrastructure development takes place.

I object as the provision of infrastructure to support 40 homes and two traveller pitches will require a huge disruption to the detriment of existing residents and through traffic. The necessary land clearance and provision of water, sewage, energy and telecoms will create a level of traffic and noise in an area which is noted for its peaceful amenity and rural charm.
I object as the proposal threatens the rural amenity and property values are likely to fall with loss of revenue to the local council and the local economy (eg estate agents) as well as to the Exchequer in relation to stamp duty.

COMMENTS ON OTHER POLICIES IN THE LOCAL PLAN.

Policy P2

It is proposed that policy P2 would remove Send from the Green Belt to allow for the scale of development that GBC seeks.

I object in principle to this proposal which threatens to change the life of the village residents through over-development and pressure on local resources in health and education. This is an unjustified imposition on local people who will see no benefit to the wider community but certain prof its for the developers. There is already a pattern of through traffic congestion which will be predictably worsened year on year as there is a high local dependency on private cars for people to access their place of work in the local towns. The impact on traffic pollution levels need to be evaluated as there is strong evidence that such patterns of congestion at peak times when children are starting the school day creates such an impact on their health and development which must not be ignored.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the disproportionate distribution of houses across Guildford Borough, by far, the North East has taken an unsustainable number, in an area where country lanes are narrow and volume of traffic now using through routes makes roads gridlocked at rush hour.

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners' views, or the costs involved in improving the infrastructure, currently outside their financial capability.

The methodology is also flawed as this plan has been formulated without regard to village Neighbourhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

I object to the 2016 Draft Local Plan as it has had no regard to schools required, additional medical or hospital facilities which would make a plan sustainable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (

Response to changes in the local plan affecting site A44 -

Land to the West of Winds Ridge.

I live opposite the proposed development site and have done so since 2003. This piece of green belt provides considerable amenity for those seeking refreshment, opportunities to exercise themselves and many dogs during the course of the day. Many runners and walkers, some very elderly currently use Send Hill as a quiet place to exercise during the day in spite of the lack of pedestrian facilities. Send Hill is a narrow country road beyond the cemetery and traffic already builds up in the school rush hours with heavy parking related congestion during those times, especially near the schools at the north end.

Whenever there are traffic flow problems northbound on the A3 people with local knowledge will use Potters Lane and Send Hill as a diversion to bypass the problem. Traffic volumes will increase considerably at those times.

The parish council also note that the users of the cemetery, both for multi-denominational funerals as well as regular visitors will be adversely affected by the inevitable increase in traffic and noise of passing vehicles.

The school bus and HGVs accessing Send Hill via Potters Lane are often seen to have difficulties in negotiating this narrow road especially in attempting to pass each other in opposite directions – which is often hard enough for two or more cars.

There is little scope for improving the infrastructure. There is no public transport available and the road to the village may prove to be unduly hazardous to pedestrian families with young children who may be tempted to buy affordable houses on low incomes while affording one or two family cars to add to the congestion. It is well over 1.5 miles to the shops, such as they are, and the GP health centre and pharmacy are as far again in the opposite direction along Send Barns Lane. There is a public footpath which connects to the recreation area but with cuts in council expenditure the maintenance is wanting and in poor weather the path becomes unsuitable.
The proposal to build 40 affordable houses at A44 suggest an intensity of development in a poorly resourced area which the Parish Council has deemed unsuitable for this level of development on several grounds including the failure of the proposing Council to supply evidence of need objectively. The council is bound to take a view on the impact on the environment as well as aspects of community welfare on a range of issues.

The land which is owned by the council at this point is a former landfill site and it is known that a range of asbestos products have been dumped towards the end of the site’s usage. It seems to me to be unnecessary to add to risk of contamination during any development work and the council has not addressed this issue as far as I know. Dealing with such a risk would increase costs and may render the whole project unaffordable!

Provision for two Traveller sites.

This proposal includes the facility to keep large fairground machinery and transport vehicles on the site with the implication that this will become a major feature of the new landscape. We see that other traveller sites are proposed in the local area and it would be interesting to know if the travelling community has been consulted about their preference to have sites close to each other rather than separated in this way.

In historical terms, there is a piece of land in excess of one acre at the north end of A44 which is owned by a Gypsy family who attempted to gain access across the land owned by the Council. They were evicted as the council did not approve of such use of the land. A large ditch was dug to prevent further intrusion and the wooded area left unused. It is understood that the current owner who lives in W. Sussex does not support this proposed use of land adjacent to hers.

Our view is that such a proposal would bring about such a fundamental change in the environment and bring an unwanted impact on the current settled community simply because of the nature of what is proposed.

In summary – we object to all the provisions proposed in the allocation for A44 and we support the position of the parish council who have determined that such an allocation is un-necessary and that the land identified is unsuitable for such an intensive development because of infrastructural deficiencies, lack of amenity to support such an explosion of population in a small part of the parish. It would also impact on the current usage which so many people enjoy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<td></td>
<td></td>
</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to make the following objections to your planning for Garlic Arch.

I OBJECT to the removal of 15 villages, including Ripley and Send, from the green belt. This will lead to wholesale, and often inappropriate developments.

I OBJECT to the fact that GBC have not followed the correct process for Send and Ripley developments. Any significant changes to the 2014 proposals, such as the proposal development of Garlicks Arch, should have required another full consultation, which did not happen. This invalidates the whole process.
I OBJECT to the fact that GBC have failed to provide sound evidence in terms of the Employment Land Needs Assessment which shows that industrial space at Burnt Common IS NO LONGER NEEDED.

I OBJECT to Policy A43.30 the proposed development of Garlicks Arch designated for 400 houses and an industrial estate. This is a new site not included in the Regulation 18 draft and has NOT been consulted on previously. It is not only permanently protected green belt but also a site of ancient woodland with some trees planted in the 16th century.

I OBJECT to policy A43.30 the development of new four way interchange onto the A3 which would mean that narrow Send Road (A247) would be the main route for traffic leaving the M25 and A3. It is already crowded and vulnerable to traffic jams. Further traffic from this development would result in permanent gridlock. It simply would not work.

I OBJECT to policy A44 which would see 40 homes and two travellers' pitches on land west of Winds Ridge and Send Hill. This was again a NEW site NOT included in 18 draft and therefore has NOT been consulted on previously. Once again this is Green Belt land partly containing unsafe landfill. Access is by a narrow lane which could never take the volume of traffic that would ensue from traveller's pitches.

I OBJECT to the fact that the Local Plan takes no account of schools, doctors surgeries and roads that are already operating at full capacity. Another 4000 houses in this area with a conservative estimate of a further 8000 cars would be catastrophic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objection to Last Minute Plans to Develop Garlick's Arch, Burnt Common, Send, Surrey.

I wish to object to the proposal to build on the area of land at Garlick's Arch, Burnt Common.

I am concerned that this will destroy the natural village-atmosphere we currently enjoy in Send and Ripley and believe that this is not the place to concrete over green belt land so necessary to provide a buffer between Woking and Guildford.

Once Guildford Borough Council begins concreting over Green Belt Land, it will destroy Surrey and its natural charm. I am a student who has lived in this borough all my life - I want it to retain its beauty for future generations not just become an overspill for Greater London sprawl.

Besides, I am advised that this proposal has not followed the correct process and a road junction has been added. This needs a full consultation to allow local residents to air their grievances, which will no doubt be considerable.

I believe that new housing should be confined to brownfield sites. Infrastructure in this area is already overloaded.

Am I correct in believing that 13,860 additional houses have already been proposed for this borough? We do not need any more and this site is new and has not been consulted on previously.

I expect Guildford Borough Council to behave in a responsible and indeed legal manner in matters of such importance and not just rush through proposals in the hope that residents will not notice. You can be assured that we will notice and object in the strongest way.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Send being removed from the green belt as it provides a buffer between Woking and Guildford. Particularly vulnerable areas of land are being taken out of the green belt namely; 1. The land behind the school including playing fields and woodland; 2. The land to the right of Cartbridge by the river Wey navigation up to the new boundary fence with Vision Engineering and 3. Land to the left of Cartbridge going up to the old depot on the Wey navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/170  Respondent: 15130625 / Joan Alldis  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the soundness of the evidence provided by GBC because the Employment Land Needs Assessment 2015 (ELNA) shows an 80% reduction in employment space from the previous ELNA carried out by GBC in 2013; meaning the industrial space at Burnt Common is no longer needed. Housing numbers derived from the Strategic Housing Market Assessment 2015 (SHMA) are highly questionable. The number of foreign students has been incorrectly used to inflate the numbers. The required 13,860 homes in the local plan is exaggerated. On the premise that the population grows by some 20,000 in the plan period, there will be a need for 8,000 homes (based upon an average of 2.50 persons per home). Therefore, the green belt does not need to be utilised for the building of homes. 50% of new homes could be built on brownfield sites. GBC’s Transport Assessment was not available to councillors for the vote taken on 24.05.16 as it was not published until 06.06.16. Infrastructure overload has received scant consideration and attention.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)
I object to the Proposed Submission Local Plan Strategy and Sites because GBC has changed every major site in Send proposed for development. The 2014 proposal for 430 houses was reduced in April 2016 to 185 and has just increased to 485. This is a significant change and consequently requires another full consultation under Regulation 18 as opposed to the 'short cut' under Regulation 19. By utilising Regulation 19 GBC is invalidating the entire process.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

I object to Policy A43.30 ha LAND AT GARLICKS ARCH, Burnt Common, designated for 400 houses and 7,000 square metres of industrial development including warehousing. There is no need for any additional houses given the 13,680 already proposed for the borough. This site is new and was not included in the Regulation 18 draft; neither has it been consulted upon previously. It is green belt permanently protected by the NPPF which prevents the merging of settlements. There are no exceptional circumstances. The site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The proposed industrial development of 7,000 square metres is not required since the latest Employment Land Needs Assessment 2015 (ELNA) indicates a reduction of 80% in required employment floor space when compared with the previous draft plan. If it is felt there is a need for 7,000 square metres of industrial space then it should be developed at Slyfield. A new 4-way interchange onto the A3 at Burnt Common to serve this development would be wholly disastrous for Send. Send road (A247) would be gridlocked all day. Send would become the thru route to Woking for traffic leaving the M25 and A3 following the proposed 2,000 houses at Wisley and the 2,000 houses at Burpham. Send cannot take it.

I object to Policy A44.1.9 ha LAND WEST OF WINDS RIDGE AND SEND HILL designated for 40 homes and 2 travellers pitches. This site is new and was not included in regulation 18 draft and has not been previously consulted on. Development for housing is inappropriate due to its permanent green belt status and high quality green belt amenity within an area of outstandingly beautiful countryside which would undoubtedly be spoiled by any development. The subsoil of the existing site contains documented unsafe landfill waste which is currently vented. The proposal to include 2 travellers pitches is inappropriate due to the narrow width single track country road providing inadequate and insufficient access to the site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to all the planning which I have listed below. I have lived in Ripley and Send and grow from the little villages with house and traffic and not for the better.

1) I object that GBC have not followed correct processes
2) I object that GBC have failed to provide sound evidence in terms of the Employment Land Needs Assessment 2015
3) I object policy P2. Send should not be removed from the Green Belt
4) I object to Policy A43, 30 ha of land at Garlick's Arch, Burnt Common, designated 400 houses and 7,000 sqm of industrial and warehousing
5) I object to Policy A44. 1.9 ha land west of winds ridge and Send Hill, designated for 40 homes and Travellers Pitches

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1970  Respondent: 15131425 / Roger Mutton  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wrote to the planning policy consultation on 11th June with objections which I will now re-enforce with more details now made available to me.

I object to the local plan on the grounds that Send is in the Greenbelt and because too many houses are proposed to Send and Send Marsh area it would impact on local services and create additional traffic congestion and consequent drop in air quality and quality of life. There is also evidence of flood risk.

Site A44 - I object to the proposal to build on the landfill site on Send Hill. I now find that Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005 identifies that the proposed site is a local authorised landfill site as licensed under Part II of the Environmental Protection Act 1990. It is not a quarry as specified in the GBC Local Plan.

I object to the proposal on the grounds that Envirosearch Report RS1100201_1_1_1 dated 1yih February 2004 and historical map data and information from GBC, has identified the site as landfill and has "areas of potentially contaminative industrial activities". The widely reported death of the unfortunate child caused by seepage from contaminated ground following flooding is a dire warning not to disturb the site.
I object to the proposal on the grounds that Send Hill is a single track country road quite unsuitable for further development with a cemetery and little space for vehicles to turn and pass each other.

Site A43 - I object to the Garlick Arch and A3 intersection proposals because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

I object to building 45 houses at Clockbarn Nursery because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.

I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A2.47 which are all already at 100% capacity.

I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the proposal change in Tannery Lane on the grounds that firstly it erodes the Green Belt in our village along with some other plans for the area, but just as important the density of housing is too great for the village. So no additional housing should be contemplated anyway. The lane itself is narrow and the junction into the main village road inevitably will increase hold ups and delays, in turn will increase pollution from the resulting extra traffic, which in turn is putting too much pressure on the road through Send, already a main route to Woking.

I object to Policy A43, the change at Garlick's Arch. It ignores all the previous objections, there is no proven demand for travelling showmen's plots in the location.

It is in an area of outstanding historical beauty being in ancient woodlands some 600 year old.

I object most strongly too to the fact it will link Ripley and Send and destroy the green belt between the villages.

Another example of lack of consideration for the openness of the Green Belt.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A58 at Burnt Common because it was deleted from the 2014 draft, also the wording change minimum from the earlier draft of maximum. The 2017 Employment Land needs shows the requirement is dropping in terms of land required. The proposed 10 hectares is vastly more than the 3.9 which is proposed for the whole Borough, this cannot be allowed to go through. Additionally it adds to the increase of vehicular traffic in the surrounding roads and is another added pollution burden which the area should not be asked to bear.

I object to Policy 2 at paragraph 4.3.15 I object to the Send Business Park being removed from the Green Belt, yet another unnecessary diminution of the very precious green land in our village. It again will increase pressure on the junction of Tannery Lane and the main road through the village. A narrow lane with added traffic, what a poor way to treat the environment, adding extra business traffic to the area which is an old non-conforming user in an area of outstanding natural beauty.

| Comment ID: PSLPS16/172  | Respondent: 15131681 / Norman Lavender | Agent: |
I object to the fact that Guildford Borough Council has not provided evidence in terms of the Employment Land Needs Assessment 2015. Also the infrastructure in the village of Send just does not exist to support any of this proposed development.

I object to Send being removed from the green belt. I accept the need for new housing but there is no reason these should be built on green belt land when there are so many brownfield sites available.

I object to the fact that the "final draft" of the Local Plan which has been prepared without the requisite full consultation under Regulation 18. This has changed vastly from the one originally proposed (and objected to) in 2014, increasing the number of proposed houses from 430 to 485, and adding a new road junction which was not mentioned in the earlier Plan.

I object to the proposed new homes on the land west of Winds Ridge and Send Hill. Again, this was not included previously. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented.

I object to the proposal for 400 houses and 7000 sqm of industrial and warehousing at Garlick's Arch, and a new interchange onto the A3 at Burnt Common. This would cause major problems due to the increase in the amount of traffic coming through the village of Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to how there seems to be inappropriate handling in the application process where significant changes have occurred. I OBJECT to the changes in volume of houses without it going to full consultation. Starting at 430, reduced to 185 and increased to 485.

I OBJECT to the change of how land is being used changing from 40 houses to 2 traveller sites not included in the regulation 18 draft and hence NOT consulted on and has insufficient accessibility to site.

I Object to this proposed plan.

The traffic problem in Guildford is huge. The slightest problem on the A3 or any other approach road means the whole town can and does come to a standstill. This is not just about people sitting in their cars going nowhere, it's about the health and wellbeing of those of us, and our children, who already live, work and go to school on the congested roads, breathing the fumes and particulates that are generated by the ever increasing traffic.

It is about our lives. This town cannot take another 20,000 or more cars trying to get into and out of it.

Please stop this nonsense now.

I object to the latest version of the local plan.

Guildford Borough Council intend to build 13860 houses with four developments exceeding 1000 houses. 70 percent of these on Green Belt land.

This proposal is massively out of proportion for Guildford and a much larger plan than any other borough in Surrey.

No constraints apply to this plan (as allowed by the National Planning Policy Framework) to take into account protected wild areas, Green Belt, flood risk or significant infrastructure constraints, all of which apply to Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/918  Respondent: 15131937 / Felicity Howell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to Send Village being removed from the Green Belt. Green Belt was meant to be permanent and there are no overriding circumstances to justify this change. Local Councillors and central Government gave a very clear election promise to protect our Green Belt. Send's Green Belt gives a buffer between Guildford and Woking becoming one large conurbation.

1. I OBJECT to building 400 houses and 7000 square metres of industrial space at Garlick's Arch (opposite Send Marsh Road). This site floods and is covered by ancient woodland. If industrial space is required, it should be located where similar activity currently exists, i.e. Slyfield - NOT ON A GREEN BELT SITE.
1. **I OBJECT to a new interchange with the A3 at Burnt Common.** Send would become gridlocked (although it's nearly that now!) because traffic from the proposed Wisley site of 2000 new houses, 2000 new houses at Gosden Hill, Burpham and 1850 at Blackwell Farm would come through Send! Pollution levels would rocket and be totally unacceptable.

1. **I OBJECT to the development of 40 houses and 2 travellers' pitches at Send Hill.** A very inappropriate site with narrow, single access country road. This site also contains unsafe landfill waste (which is documented and registered at GBC).

1. **I OBJECT to 40 more houses being built at Clockbarn Nursery.** Access to this site is totally inadequate and could not take any more traffic. Tannery Lane is a very narrow and winding road to be able to accommodate more traffic. Planning permission has been given for 64 new apartments at the Tannery and for building a new Marina - both making more traffic.

**WITH ALL OF THE ABOVE, THERE ARE THE PROBLEMS OF LACK OF INFRASTRUCTURE - MORE HOUSES, MORE INDUSTRIAL BUILDINGS, MORE LORRIES, MORE TRAFFIC CONGESTION, MORE PRESSURE ON DOCTORS SURGERIES, MORE PRESSURE ON SCHOOL PLACES, AND MORE POLLUTION.**

Comment ID: PSLPP16/350  Respondent: 15132769 / Nicky Andrews  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposed development will increase additional traffic onto the local roads, which are already busy and suffer from much congestion. I object to further development that will increase traffic in and around our villages. With more traffic, air pollution will increase. I object to further development which will result in poorer air quality, which in turn can effect the environment and local residents health. Many of the strategic sites, eg Wisley Airfield and Garlicks Arch, do not have local railways within easy walking distance, nor do they have a good bus service. Leaving residents with little option but to get in their cars, resulting in yet more traffic, congestion and drop in air quality. I object that these sites are not sustainable.

I object to the proposed development and the pressure it will put on local infrastructure. It is already very difficult already to get a doctors appointment, and local schools are oversubscribed. How will local doctors and schools cope?

I object to further development which will result in poorer air quality, which in turn can effect the environment and local residents health. Many of the strategic sites, eg Wisley Airfield and Garlicks Arch, do not have local railways within easy walking distance, nor do they have a good bus service. Leaving residents with little option but to get in their cars, resulting in yet more traffic, congestion and drop in air quality. I object that these sites are not sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

As a resident of East Horsley I write to express my concerns and to register my objection to the proposed submission Local Plan.

**General Points**

The number of houses planned has risen to 693 houses per year over the next 20 years (compared with 652 per year in the 2014 Draft) and is more than double the 322 houses per year that was approved in the 2003 Local Plan

65% of new houses in the Borough are to be built on land that is currently in the Green Belt.

Section 150 of the Housing and Planning Act 2016 states that a site, once identified in a Local Plan, is assumed to have permission to go ahead in principle, which means normal planning restrictions may be difficult to impose later

Little notice has been taken of the comments received after the last round of consultation.

Of particular concern to me and my family is that a more local level the proposals include:

- At least 148 more houses in East Horsley.
- At least 385 more houses in West Horsley.
- Both villages to be taken out of the Green Belt. The new boundary, (called the in-setting boundary) extends the old settlement boundary and includes some fields and open spaces. This means that if they aren’t already identified in the plan for development that they too, are vulnerable to future development. Eg Kingston Meadows (by East Horsley Village Hall) is included inside the insetting boundary – despite being a valuable green space. Why?
- Similarly Horsley Tennis & cricket club at the end of Pennymead Drive is also inside the insetting boundary. Why?
- 2,068 houses on the former Wisley Airfield (2.1 miles away).
- 400 houses at Burnt Common (3.2 miles away).
- 2,000 houses at Gosden Hill Farm (4.2 miles away).

This amount of development would have a huge negative impact on the local community and amenities – see next section.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3402  Respondent: 15133377 / Joyce Vincente  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars. b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads. c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements. d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them). e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest. f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Specific Issues

Traffic and parking: Assuming that every new house has at least 2 cars, this means potentially 6,000 more cars within a three mile radius of the villages. The impact on local roads will be tremendous. Parking at Horsley & Effingham junction stations (which are already full), at the shops, at the medical centre and at the village hall will all be affected.

Local Road Network: In respect of the proposals for development at Wisley Airfield and for an upgrade the current A3 junction at Burntcommon to a full 4-way junction, SCC traffic modelling anticipates increased use of Guileshall Lane, Hungry Hill Lane and Tithebarns Lane for traffic accessing the A3 at Burntcommon in order to travel to Guildford and beyond. The SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”. It appears that the Plan is proposing a strategic site at Wisley Airfield without even knowing what improvements to the local road infrastructure will be required. If that is the case for Wisley Airfield, then it is almost inevitably true for the proposed developments in East and West Horsley as well.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Schools: Local schools are already at capacity – where will newcomers go to school? No extra places are planned in the Horsleys, and the school places proposed at Wisley Airfield will not planned until many years into the project.

Medical facilities: Similar situation to the schools.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/355  Respondent: 15133377 / Joyce Vincente  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
Loss of Green Belt land: Sadiq Khan, new Mayor of London, has instructed London planners not to approve development on Green Belt Land within the M25. If we continue to build on our countryside it won’t be many decades before we have none left. Creeping development has led to almost continuous housing from Central London to Effingham. Is this to carry on to Guildford and beyond? (1,700 houses are planned for the Guildford.

Conclusions

When my family and I moved to the area we did so because of the village lifestyle, and proximity to the green belt and rural environment.

The local amenities cannot cope with such a large planned expansion and it would completely alter the place that we chose to make our home.

At the heart of the problem is GBC’s desire to pursue a ‘Forced Growth’ policy which results in highly aggressive and unjustified targets being set for housing development in the Borough. These excessive targets – the proposed 25% increase in housing stock in particular – create a tremendous strain on both land and infrastructure in an already over-crowded and over-stretched part of the country.

These targets will also have a material adverse impact on the Metropolitan Green Belt across this area, despite all the political promises made to the contrary.

Accordingly this local resident OBJECTS to the Proposed Submission Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Flooding:** The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area, and local residents are well aware of how much standing water there is in their gardens after rain. Building on such land will only exacerbate the problem. We already know what happens to local roads when it rains – the drains can’t cope.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

Answer (if comment is on questions 1-7 of the questionnaire): ()

Please do sent me conformation that all of these comments together with all my previous are passed to the Inspector.

I reserve my right to appear at the inquiry and present my evidence.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1) It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

2) It is further from railway stations than any other identified strategic site.

3) It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

4) Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

5) Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

6) Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

7) It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.

   o The associated traffic increase from the RHS has not been taken into account.

   o The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account 8)There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.

9) The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station 10). It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11) The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design.”

12) Opportunity (3) should be common to all sites and is not unique to this site. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.

14) I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

15) I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16). I object to the removal of additional 3.1 ha from the green belt without any justification. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

20) I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

21) I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

22) I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

23) I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

24) I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

25) I object to the extension of the plan period by 1 year as it has not been identified as a major change.

26) I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

27) I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

28) I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

29) I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

30) I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

31) I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

32) I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

33) I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
34) I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

35) I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

For the reasons listed above and numerous other reasons, I consider that this plan is unsound and not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I most strongly object to Send being removed from the Green Belt.

I most strongly object to over 400 houses being built as per policy A43. There has been little consideration given to infrastructure to support this inappropriate development.

Policy A44 (1.9 ha of land for 40 homes and travellers pitches). This I most strongly object to! Send village is a green buffer between Woking and Ripley/Guildford to continually keep building using the Green Belt is totally unacceptable and I object most strongly to this sort of development.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The local plan proposals for Send are misleading. The planners propose to take the whole of the existing settlement area of the village, plus an additional 123 acres, out of green belt thereby removing the original presumption against development over this land. This redrawing of the current Send Green Belt boundary (The Green Belt inset) will allow additional development in the village far beyond the 485 houses mentioned in your recent information pack. Conservatively this could more than double to 1,000 houses which will mostly be four bedroom unaffordable homes. We need more affordable houses within Send.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I note that despite receiving 20,000 objections to your local plan in 2014 you managed to put an upbeat video on your website supporting your local Plan. It also expressly states the need for affordable housing. Why then do you only allow the building of expensive three/four bedroom houses in the area? A development of affordable houses, backed by a Housing Association in Send, would amply qualify for your support according to your video. To conclude, we need more affordable housing and not expensive big houses which only benefit the local developers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I write to confirm my total opposition to your local plan for the area surrounding Send, Send Marsh and Burnt Common. The proposed increase in population of approximately 25%, without any significant improvements in the local infrastructure, is totally unacceptable. It is over 30 years since any reasonable improvements were made to the local roads, schools or the hospital. Our one and only surgery is now at maximum capacity.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposed building at Wisley Airfield and Gosden Hill Farm will also add enormously to the flow of traffic through this area, an area that already experiences near grid-lock each rush hour. The A3 between Guildford and Burnt Common must suffer from the greatest number of fatalities of any road in Surrey. The new access/exit to the A3 at Burnt Common will increase capacity onto minor country roads doing little to improve the flow of traffic. The additional junctions will also make the A3 even more dangerous on this terrible stretch of road.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Under the National Planning Policy Framework 2012 the Government stated that “The Government attaches great importance to Green Belt. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.”

Over the last 50 years we have seen the removal of village status from St. Johns, Knaphill, Maybury and others, turning Woking into one massive urban sprawl. We do not want the same thing to happen to Guildford; a beautiful town where one can see countryside from the very heart of the shopping centre. GBC must spend more time reassessing the brownfield sites within the existing area. In addition, your misguided assessment of the need for more shopping and office space in the Town Centre reduces the space available for housing. If there were more homes within the Centre, the area would become more vibrant and a big boost for the local economy.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I'm disappointed to hear of the changes Guildford Boroughs intends to implement to the area which will adversely affect the area.

My wife, kids and I recently bought a house and moved to the area because of it's quiet, small village and beautifully untouched country surrounds. With the new proposal the existing character will be lost among other things.

- The existing services and amenities will not be able to sustain such an increase in residents.
- The existing schools are already oversubscribed, this would strain them even further and at the risk of lower their standards/rating.
- The local GP is already oversubscribed, with appointment waiting times from 1-3 weeks, they will not be able to cope.
- The train service will become more congested and inevitably more expensive.
- There is already not enough car park space at Horsley train station.
- The existing roads are already in disrepair with very poor maintenance and will only get worse.
- The village will not be able to cope with the additional traffic and parking space requirements.

I cannot think of any reason why it would be good for us and any of the other residents of the area to bring this change into effect and allow further development.

For the record I contest the changes and this NEW Local plan.

I object to removal of Brownfield sites (A4) from the Plan

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail, thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a devastating impact on the already highly congested local rural road network around Send and Ripley. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there are no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2017) and in particular to the changes that affect Ripley and Send, which appear to make the Plan even worse than those proposed in 2016..

Please record my objections as follows:

1. I object to the extended development in the Green Belt (Policy P2, Site A43)
I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Travelling Show-people sites in A34 Garlick’s Arch

The allocation of 6 Travelling Show-people plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Show-people plots in A43 Garlick’s Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 as stated in section 4.2.24 of the Plan.

I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1009  Respondent: 15136513 / Ian Mitchell  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A50

The Plan is self-inconsistent in respect of traveller sites.
A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots ...” Clearly A50 more than covers the total "need" of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1012  Respondent: 15136513 / Ian Mitchell  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58
The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

1. The site [A43] location affords greater separation between Send Marsh / Burnt Common and the proposed site allocation at Gosden Hill Farm, … (site allocation A25) than the Burnt Common site did”
2. The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore, GBC are not following their own guidelines and objectives. Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal for a Waste Management Facility in Green Belt (A58)

The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a, and does not allow for full and proper consultation. These facilities are always highly contentious and the Council has a duty of transparency in this regard which it is, at best, neglecting.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects:
i) to hide the number of houses actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!), and
ii) gives an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses]. That has now been removed, thereby accepting that needing to make greater than normal profit is to be an acceptable reason not to deliver affordable homes. This is a disgraceful sop to the developers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object removing Send Business Park from the Green Belt (4.3.15).

Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it's insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners' views, or the costs involved in improving the infrastructure, currently outside their financial capability.

The methodology is also flawed as this plan has been formulated without regard to village Neighborhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

Comment ID: PSLPA16/313  Respondent: 15136641 / Jason Dack  Agent:
As a Ripley resident, I am writing to express my objection to the development proposals outlined in the Draft Local Plan. Below are the objections I wish to make:

1. **Destruction of the Green Belt**
   I object to the proposals to remove (or “inset”) Ripley, Send and Clandon from the Green Belt. It is vital to preserve areas of outstanding natural beauty. Further developments will erode this and destroy the countryside.

2. **Overdevelopment**
   I object to the further housing and industrial developments in and around Ripley. There are a number of reasons for this - impact on local public services and infrastructure (see number 3), congestion (see number 4) and air quality (see number 5).

3. **Overburdened infrastructure including added strain on local healthcare, education and police services**
   I object to the lack of planning regarding infrastructure. For example, Garlicks Arch (Ripley/Send border). Without improvements to the infrastructure prior to any development, the quality of life for current residents will deteriorate significantly and in many ways. Existing doctor’s surgeries and schools are already stretched or at capacity. Services such as the Villages Medical Centre in Send will have their services overwhelmed. Many public services (for example, the police) are suffering from funding cuts or freezes. I object to the proposals due to the further burden it will put upon existing services.

4. **Congestion on the motorways, roads and lanes**
   I object to the development of the strategic sites due to A3 and M25 already being at capacity during peak hours. The developments will worsen the situation on the motorways, roads and lanes. Furthermore, Highways England has no plans to look at improving the A3 for a number of years. My village (Ripley) is already suffering from severe congestion for much of the day. As well as being highly congested, there are numerous incidents of road rage. Many of the country lanes around the villages of Ripley, Send and Clandon are very narrow and wide enough for only one vehicle at a time. Road surfaces in general are in a poor condition and heavy traffic will make them worse. I object to further development as it will mean more traffic, more congestion, more frustration, more noise and more pollution.

5. **Poor air quality**
   I object to detrimental effect these developments will have on air quality. Further heavy traffic, particularly in built up residential areas, will only lead to greater levels of air pollution.

6. **Parking**
   I object to the new developments because parking is already a huge problem in Ripley. My partner and I do not even have a parking space. I can only imagine how much worse the situation will get with a larger population.

7. **Disproportionate size of sites**
   I object to the allocation of land to the strategic sites of Wisley Airfield, Garlicks Arch (Ripley/Send border) and Gosden Hill (Clandon). The proposed development of these sites will have a disproportionate impact on the surrounding local villages. They will have a permanent detrimental impact on each of these communities.

8. **Unbalanced allocation of development in one area of the Borough**
   Between the M25 and Burpham (a distance of only approx 5 miles) it is proposed that over 6,500 houses are built. This represents over 40% of the housing proposed in the Local Plan. I object to this area being hit so hard by the allocation of development, which is disproportionate to the rest of the Borough.
9. Capacity of utilities
I object to the undoubted added burden on many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. I object to the development of Garlick’s Arch on the ground that there is little capacity in these networks.

10. Sites being planned in unsustainable locations
I object to the location of these developments because many of the strategic sites e.g. Wisley Airfield and Garlick’s Arch, are in unsustainable locations. They do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. I object on the grounds that these sites are not sustainable.

11. Lack of proper pedestrian footpaths on local roads
I object to these developments as footpaths in Ripley are already narrow and in some places non-existent. A further substantial increase in the local population will make navigating these footpaths more hazardous.

12. Heritage
I object to the effect these developments will have on the area’s heritage. There are a number of heritage sites in the region and no account is being taken on the impact of these points of historic interest.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to raising the annual number of houses built per year. With no rational reason given, one must assume these are developers' numbers for financial gain and not for social need.

I object to the disproportionate distribution of houses across Guildford Borough, by far, the North East has taken an unsustainable number, in an area where country lanes are narrow and volume of traffic now using through routes makes roads gridlocked at rush hour.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

There are a number of heritage sites in the region and no account is being taken on the impact of these points of historic interest.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
6. The area around Site A42 in Tannery Lane, Send is highly congested and the increase from 45 houses to 60 will make the situation even worse. There are no proposals to improve the local narrow lanes and roads and this increase will impede the flow of traffic, especially during peak hours. Additional junctions will not help.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

This is a response to the updated Local Plan. I would like to strongly object to the new proposals which are even worse than before.

1. Over 40% of all the proposed development is now in the North East of the Borough which is too much for this small rural area. This will destroy the substantial parts of the precious Green Belt and will be extremely disruptive for residents. Furthermore, it will apply unsustainable pressure on roads, schools and GP surgeries.
2. Developments at Site A43 Garlick’s Arch will destroy substantial parts of the countryside. No need has been identified for this development. It is absolutely vital that the Green Belt is preserved – once it has gone, it will be gone forever. It will also encourage more building on green space throughout the country. Future generations will suffer for this loss.
3. Six additional Traveller plots have been added to the proposals for Garlick’s Arch (Section 4.2.22 of the plan). This is unbalanced and unfair. These plots and accompanying storage facilities are completely unsuitable for the rural area. Why do 75% of these plots have to be in Ripley?
4. The possibility of an additional 400 houses at the Site A43 Garlick’s Arch is extremely damaging for villages of Ripley, Send and Clandon and will lead to a further increase of the local population, bringing even more traffic to the area which means even poorer air quality and congestion.

5. **At Site A58 Burnt Common**, there is a potential for a substantial yet unspecified increase in industrial floorspace from 7000sq m which is already a substantial amount. There is very little information on this in the document. This will adversely effect the unique rural character of the area and probably involve a substantial number of heavy goods vehicles using the lanes and roads. The local lanes are unsuitable for heavy vehicles and the increase in pollution will be intolerable.

7. There is a brief mention of a Waste Management Facility at **Site A58 Burnt Common**. We need more information on this and proper consultation.

NATS has reviewed the Local Plan. While we acknowledge that reference to our DVOR/DME installations is made on page 206, our preference would be to include a statement as follows:

- The airfield site hosts aeronautical navigation beacon, known as the Ockham DVOR/DME. This is an integral part of the UK aeronautical infrastructure and serves a number of major airports in the South East. When considering planning application(s), engagement with the operator (NATS En Route PLC) should be sought as early as practicable in order to ensure that any impact may be assessed and so that any relevant conditions and obligations to planning permission(s) can be attached.

in the table on page 205 ‘POLICY A35: Land at former Wisley airfield, Ockham’ under the REQUIREMENTS entry.

This is to highlight the importance of the aeronautical infrastructure and to ensure engagement with NATS is as early as possible should the current plans for the area be subject to alteration in any way.

Thanks and regards

Sacha Rossi

Policy A43. 30 ha of land at Garlick’s Arch, Burnt Common, designated for 400 houses and 7,000 sq m of industrial and warehousing.

I object because:

- the site was not included in the regulation 18 draft and the site has not been consulted on previously;
- it is currently Green Belt and building on the site will undermine Send’s village status;
- a new 4 way interchange onto the A3 would make Send a through route for traffic leaving the A3 and M25 for Woking, overloading the road through Send village;
- proposed improvements to the A247 through Send would not alleviate the congestion situation because the bottleneck is at the Old Woking roundabout – there is simply no road capacity leading to the A247 from Woking to allow traffic to flow – there are already long queues and delays during peak times;
- the need for additional industrial development has not been demonstrated.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the Final Draft Local Plan and wish my comments to be seen by the Inspector.

Policy A44. 1.9 ha Land West of Winds Ridge and Send Hill designated for 40 homes and two Travellers Pitches

I object because:

- the site was not included in the regulation 18 draft and the site has not been consulted on previously;
- development for housing is inappropriate on this land which has Green Belt status. The land is currently used by myself and others for walking in a natural green environment;
- access to the site is limited due to the width of Send Hill road, single track from the proposed site entrance to its junction with Potters Lane and narrow throughout its length, with no pavement for pedestrians for most of its length;
- the number of (2) travellers pitches is out of proportion to the number of houses proposed (40)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Road Network  The present roads in the area are already suffering from heavy traffic. The proposed housing
developments will considerably increase the problem - especially if the Wisley development goes ahead. It appears that
little attention has been directed at the management of traffic in this area. How will the road system be able to deal with
the problem?

Parking  If one assumes that every new house proposed has at least two cars, this will mean that the villages will have to
cope with 6000 more cars.  Think of the impact on local traffic and the need for car parking areas.

Facilities  Local schools are already full - where will all the extra children be taught? The present medical facilities are at
full capacity, and we know the great pressure there is at the moment on GPs.  How is this problem to be addressed?

Transport  How will the stations at Horsley and Effingham cope with a passenger load which now results in packed trains
at commuting times?

This is a summary of my main concerns over The Plan.  In essence, I, and my neighbours consider that the problems being
presented have not been given the serious attention that they really deserve and there appears to be an unstoppable force
behind it all!

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

Comment ID: PSLPP16/387  Respondent: 15137057 / Ian Phillipson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I consider that the proposals in the plan will result in the eventual loss of the Green Belt to a housing sprawl with suburban
London creeping further and further south.  Once the Green Belt has been used for urban
development, it is lost forever for future generations.

Attached documents:

---

Comment ID: PSLPP16/389  Respondent: 15137057 / Ian Phillipson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Flooding  At the moment the area has a real problem with flooding - not just in winter but all the year round. The drainage systems in the villages already cannot cope with heavy rain - building more properties will only exacerbate the problem

I object to Guildford Borough Council's draft local plan to build 1800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will destroy views from the Hog's Back ridge, remove 72 hectares of scenic farmland and additional ancient woodland from the green belt, increase tailbacks on the A31 and traffic congestion, result in rat-running through local roads and add to Guildford's pollution.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the disproportionate amount of development in one area of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/397  Respondent: 15137697 / Phil Goodman  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Please accept this email as recognition of my firm objection to the Draft Local Plan. My primary objection is the proposed removal of Send, Ripley and Clandon fro the Green Belt. Changing this status will have a reversible detrimental effect to these areas.

As a local resident, I have been on the receiving end of planning refusal from Guildford Borough Council on the grounds of green belt. Whilst this restricted what I want to do to my home, I understood that GBC were following a plan to protect the green belt, and I admired this.

The complete turnaround by GBC is hugely disappointing.

I feel the whole process has been managed appallingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
As a resident of Tannery Lane, I particularly object to the proposal to inset Send Business Park from the Green Belt. Tannery Lane and the surrounding roads are already under pressure from disproportionately high traffic. Further expansion or development will hugely detract further from the green belt and current feeling of relative rural peace.

I and my family, neighbours and local residents will continue to pursue our objections for as long as it takes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I am unable to understand the rationale for the plans at Ripley/Send and Clandon.

I particularly object to:

- Erosions of the green belt
- In-setting
- High development in a single borough
- Limited consultation
- Last minute inclusions of expanded sites
- Lack of evidence for housing need
- The lack of provision of schools in the plan
- The lack of other services (e.g., GPs) in the plan
- The lack of any thought on roads and traffic access

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? (  )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The impact on the community would be huge and the already stretched infrastructure such as doctors surgeries and schools would drown under the proposed plan.

Please confirm receipt of my objection.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/405  Respondent: 15137825 / Lianne Sherlock  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? (  )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am a resident of Ripley [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] and I am deeply concerned about the proposal to build over 14,000 new homes many of which at Garlicks Arch, Wisley and Gosden Hill.

This will have a devastating impact on the community and the effective erosion of the Green Belt is simply scandalous.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Following the publication of the New Local Plan I would like to make the following comments:

The total number of houses proposed for East and West Horsley is totally disproportionate to the size of the existing villages. Unless new provisions are made before any houses are built the local schools and medical centre will be unable to cope with the vast increase in residents.

I object to the limited consultation period, you are not listening to the people that have to live and breathe it daily, our voice does not count.

I object to the last minute inclusion of new sites with less than 2 weeks’ notice, so someone could go on holiday and come back to find this!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Of particular concern to me and my family is that a more local level the proposals include:

- At least 148 more houses in East Horsley.
- At least 385 more houses in West Horsley.
- Both villages to be taken out of the Green Belt. The new boundary, (called the in-setting boundary) extends the old settlement boundary and includes some fields and open spaces. This means that if they aren’t already...
identified in the plan for development that they too, are vulnerable to future development. E.g Kingston Meadows (by East Horsley Village Hall) is included inside the insetting boundary – despite being a valuable green space. Why?

Similarly Horsley Tennis & cricket club at the end of Pennymead Drive is also inside the insetting boundary. Why?

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them). The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCl).

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPII) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Traffic and parking: Assuming that every new house has at least 2 cars, this means potentially 6,000 more cars within a three mile radius of the villages. The impact on local roads will be tremendous. Parking at Horsley & Effingham junction stations (which are already full), at the shops, at the medical centre and at the village hall will all be affected.

Local Road Network: In respect of the proposals for development at Wisley Airfield and for an upgrade the current A3 junction at Burntcommon to a full 4-way junction, SCC traffic modelling anticipates increased use of Guileshall Lane, Hungry Hill Lane and Tithebarns Lane for traffic accessing the A3 at Burntcommon in order to travel to Guildford and beyond. The SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”. It appears that the Plan is proposing a strategic site at Wisley Airfield without even knowing what improvements to the local road infrastructure will be required. If that is the case for Wisley Airfield, then it is almost inevitably true for the proposed developments in East and West Horsley as well.

Pollution: The large increase in volume of traffic will cause an increase in nitrogen dioxide and particulates in the environment – already a cause for concern in several areas in the Borough.

I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

**Loss of Green Belt land:** Sadiq Khan, new Mayor of London, has instructed London planners not to approve development on Green Belt Land within the M25. If we continue to build on our countryside it won’t be many decades before we have none left. Creeping development has led to almost continuous housing from Central London to Effingham. Is this to carry on to Guildford and beyond? (1,700 houses are planned for the Guildford.

These targets will also have a material adverse impact on the Metropolitan Green Belt across this area, despite all the political promises made to the contrary.

Accordingly this local resident OBJECTS to the Proposed Submission Local Plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Flooding: The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area, and local residents are well aware of how much standing water there is in their gardens after rain. Building on such land will only exacerbate the problem. We already know what happens to local roads when it rains – the drains can’t cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

Answer (if comment is on questions 1-7 of the questionnaire): ()

The number of houses planned has risen to 693 houses per year over the next 20 years (compared with 652 per year in the 2014 Draft) and is more than double the 322 houses per year that was approved in the 2003 Local Plan.

65% of new houses in the Borough are to be built on land that is currently in the Green Belt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

When my family and I moved to the area we did so because of the village life style, and proximity to the green belt and rural environment. The local amenities cannot cope with such a large planned expansion and it would completely alter the place that we chose to make our home. At the heart of the problem is GBC’s desire to pursue a ‘Forced Growth’ policy which results in highly aggressive and unjustified targets being set for housing development in the Borough. These excessive targets – the proposed 25% increase in housing stock in particular – create a tremendous strain on both land and infrastructure in an already over-crowded and over-stretched part of the country.

belt I object to disproportionate amount if development in one area if the borough

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to Send Village being removed from the Green Belt. The recent decision to grant permission to rebuild the Vision Engineering factory on Green Belt land was acceptable, because the new factory is on land adjoining the old factory and which was already owned by the factory owners. These were exceptional circumstances and should not be seen as creating a precedent. One small exception should not, in my view, invalidate the whole concept of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPS16/7294  Respondent: 15138433 / Sylvia Pyne  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to building 45 houses at Clockbarn Nursery (Policy A42) because Tannery Lane is too narrow, and is inadequate for more vehicles. I myself was once nearly in collision with another car there, even though both vehicles were observing the speed limit. The other vehicle came round a sharp bend at speed, swerved to avoid my car (which by then was stationary) and damaged a wheel against the kerb.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7295  Respondent: 15138433 / Sylvia Pyne  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A43, The Garlick’s Arch development. The 400 houses proposed would increase the existing population disproportionately to the existing population, and overwhelm the Villages Medical Centre and local schools. St. Bede’s School, Send is being rebuilt on the basis of existing pupil numbers, and the proposed expansion of population would very quickly make it inadequate. New housing developments attract predominantly young families with school age children.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7297  Respondent: 15138433 / Sylvia Pyne  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the new interchange with the A3 at Burnt Common because this would attract a considerable increase of traffic on the A247 at Send Road and Send Barns Lane. In recent years there have been many road works on, or leading to, this road and the result has been complete gridlock.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7296  Respondent: 15138433 / Sylvia Pyne  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A44 at Winds Ridge and Send Hill. The history of using this site for landfill waste makes it unsuitable for housing, and again Send Hill is too narrow a road to accept significant extra traffic. In particular – and again I speak from experience, having lived in Send for over 30 years – the junction of Send Hill with Potters Lane is very dangerous. Send Hill is very narrow and twisty at that point and has a steep gradient. On many occasions I have met vehicles coming in the other direction and one of us has had to reverse to allow the other to pass. Turning right from Send Hill into Potters Lane is particularly hazardous as both roads have no speed limit and cars tend to drive fast along Potters Lane even when approaching the poorly signposted concealed junction. Travellers’ vehicles turning into or out of Send Hill at that junction would exacerbate the danger, and if any such vehicle were of great length, safely manouevring it would be problematic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/423  Respondent: 15138433 / Sylvia Pyne  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This will make the A247 almost impossible to use safely for crossing and the pollution will be increased dramatically. We seem to be selected because we are at the north end of the borough and other parts will not be affected by the fumes, or inconvenienced by the extra traffic which will come through the village to get to and from Woking.

I object to Send being taken out of the Green Belt. This will increase the potential for even more new housing than the existing proposals and and the rebuilt school will not have enough capacity for all the children who will move into, or will be born in the village. (policy P2 page 48)

I object to a new junction for the A3 being built at Send. (policy A43a page 223) Again this will increase traffic which
wants to go to London coming through the village.

I feel that the other parts of Guildford should take up a larger part of the new development, which as the plans stand will swamp our village.

I wish my comments to be seen by the inspector.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/422  Respondent: 15138433 / Sylvia Pyne  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In response to the new plans for Send, I wish to object to the fact that the plans that include Send and the surrounding area will have approximately half of the new buildings proposed for the whole of Guildford Borough. (policy S2 page 26)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/424  Respondent: 15138433 / Sylvia Pyne  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the 2,000 houses proposed for Wisley (policy A35 pages 124 and 203) and the 2,000 houses for Burpham. (policy 25 pages 124 and 225) Again they will be coming through Send Road (A247) and the roads adjoining will be gridlocked. We are a small village and the reason people move here is for the open aspect, which is also part of the "lungs for London". The pollution will make life very difficult for asthmatics like me who live on the main road.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A43 change at Garlick's Arch because the number of homes is excessive and the addition of 8 travelling/show people pitches is unnecessary. Send Marsh is currently a flood zone and the addition of these houses is very worrying. It will generate much more traffic which at peak times blocks traffic in Send and Ripley. I object strongly to any more intrusion on the Green Belt in this beautiful area.

I object to Policy A58 at Burnt Common because there is no need to build warehouses in the middle of the Green Belt when there are many empty sites for this purpose at Slyfield and Guildford. This would also create more traffic on already congested roads.
I object to any more.

Just emailing my protest at all the houses you want to build in send marsh and the surrounding areas, not only is this area already over populated and trying to get from home to work in rush hour is manic as it is, and you want to add more congestion and add the the problems, it's crazy! We also have a hard enough time trying to get an appointment at the doctors surgery so adding more people to this area will be making matters worse than what they already are, same goes with the schools, this is an increasing problem, I'm sure I do not need to say any more, we pay a premium to live in a village and what you are proposing to do is going to turn our lovely villages into a town, and myself like many others bought our houses away from the hustle and bustle of busy towns, I see this is not a government proposal and only a Guildford borough council one, I strongly disagree with what you are wanting to do, it would make many people viewing your plans very angry and see GBC as being greedy and just thinking of the profits many more houses would bring in. This is a protest from my household not only myself and that's 5 people.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The GBC plan to build over 14,000 new homes under the revised draft local plan such as Garlicks’ Arch, Wisley and Gosden Hill.

It is bad enough getting out of Send Marsh Road onto Portsmouth Road in rush hour times and this area CANNOT cope with additional housing and traffic. Soon there will be a fatal collision as the roads cannot cope with this extra traffic.

The extra road traffic will also affect the M25 around junction 10 and the A3 south bound to Guildford. Both of which can be very congested. It's not just the amount of vehicles, but the extra noise and air pollution they will emit.

We purchased Bramble way in Send Marsh specifically because it was in a green belt environment. We do not want this green belt taking away and becoming a suburb of Guildford/Woking which it will become with no green space in between and a mass of housing and traffic.

Therefore I want to formally confirm that:

I OBJECT TO any/all erosion of the green belt
I OBJECT to any 'in-setting' of any villages from the green belt
I OBJECT to the planned development in one area of the borough which cannot sustain this
I OBJECT TO the limited consultation period and last minute inclusion of new sits with less than 2 weeks notice - THIS IS UNACCEPTABLE
I OBJECT to the lack of provision for new schools and doctors which are already under strain with the population increase
I OBJECT to the lack of any evidence for the alleged housing numbers.

We do not wish to live in a large town hence we moved to a village in the green belt.

There are sufficient brown sites available and Woking and Guildford are already inundated with tower blocks of new flats.

We strongly object to the way Guildford B.Council is attempting to reduce green belt and built houses and incur congestion where it is not appropriate.

</table>
I object, the developments that are proposed for A44 will have a significant negative impact on the surrounding areas and in particular the road network in the area. The additional housing and in particular the travellers sites will generate significant additional traffic and parking based on the fact that most private homes now have between 1 and 3 cars / vans and the travellers sites also have a high concentration of caravans, trades vehicles and other trade related paraphernalia that is both unsightly and a danger to the environment.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object, GBC have not followed the correct process. Since 2014 GBC has changed every major site in Send the proposed for development and now just added a massive new Road junction. The 2014 proposal for 430 houses went down in April 2016 to 285 And has just gone up again to 485. These significant changes required another full consultation and regulation 18, not the short cuts of regulation 19 which GBC are trying to get away with.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I object. The areas surrounding the A44 development will be negatively impacted by the developments that are proposed. This is a new proposal and was not included in Regulation 18 and has not been consulted on. The subsoil has been proven to contain documented unsafe landfill and should not be disturbed.

Attached documents:

Comment ID: SQLP16/193  Respondent: 15140289 / Francis Pearse  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object. In particular the A44 proposal is detrimental to the local area, it wasn't consulted on and was added to the Local Plan a long way down the process. The sites being proposed for the travelers is known to have dangerous landfill and these need to be left undisturbed.

The increase in traffic on Send Hill Road, Potters Lane in particular will increase the likely hood of pedestrian danger and damage to the surrounding areas including personal property.

Modern housing and in particular traveller sites attract a higher proportion of vehicles and in particular trades related vehicles, vans, lorises, tipper trucks and trade related materials. This site is not conducive to this type of occupation.

These locations are very special villages with a strong village atmosphere with many events and activities encouraging the villages to thrive as they do today. The fact they are in the green belt make them and keep them special. The planned increase in housing will encroach and destroy these small quintessential English villages which help retain British heritage.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a current resident in the local Ripley area I specifically object to the villages of Ripley, Send and Clandon being removed from the green belt. These locations are very special villages with a strong village atmosphere with many events and activities encouraging the villages to thrive as they do today. The fact they are in the green belt make them and keep them special. The planned increase in housing will encroach and destroy these small quintessential English villages which help retain British heritage.

We are already struggling to provide good quality education to our children locally and the increase in housing will only add to this pressure, not to mention the burden on local infrastructure.

This consultation has not been fair, with a limited consultation period and last minute changes with the inclusion of new sites.

Please reconsider your plans.

I can see no proper provision for new schools, where will children be educated? All local schools are operating at or very close to capacity.

No provision for increased Doctor’s surgeries, waiting lists are long enough and these proposals will completely overwhelm any semblance of an efficient GP service. This will put peoples lives and general wellbeing at risk.

No provision for extra Policing in the area and, having retired from Surrey Police less than a month ago, I can assure you there is no plan to increase Police numbers to cover the proposed increase in the local population. Like every Force in the
country Surrey Police are massively overstretched and suffering from recent government cuts to the Policing bill which will continue for the life of this parliament. This will put peoples safety at risk.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The local road network is already over capacity and the increase in traffic will gridlock Ripley village and surrounding areas especially during rush hours. Simply put, our roads were not designed for the amount of traffic now on our roads let alone what your plan proposes.

I suffer with a respiratory disorder made worse by heavy traffic pollution, your proposed plan and the increase in traffic will severely affect my breathing.

Ripley already has a massive shortage of parking for vehicles, the proposed plan will make the situation far worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/450  Respondent: 15140705 / Simon Moxon  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object in the strongest possible terms your 2016 Local Draft Plan, especially the removal of Ripley and surrounding areas from the green belt which will be the absolute death of our village.

The main reasons from my objection are, but not limited to, the following:

1. Your consultation period has been minimal and not allowed enough time for people to fully take in the massive changes proposed.
2. The consultation document is nearly 2000 pages and is not designed for the layman to read and understand, probably deliberately.
3. There needs to be special circumstances to remove an area from the green belt and I do not believe your proposals satisfy/meet those circumstances.

4. I can see no proper provision for new schools, where will children be educated? All local schools are operating at or very close to capacity.

5. No provision for increased Doctor’s surgeries, waiting lists are long enough and these proposals will completely overwhelm any semblance of an efficient GP service. This will put peoples lives and general wellbeing at risk.

6. No provision for extra Policing in the area and, having retired from Surrey Police less than a month ago, I can assure you there is no plan to increase Police numbers to cover the proposed increase in the local population. Like every Force in the country Surrey Police are massively overstretched and suffering from recent government cuts to the Policing bill which will continue for the life of this parliament. This will put peoples safety at risk.

7. The disproportionate size of development sites in relation to the rural locations, in particular the Garlicks Arch proposal in Ripley. A development of this size will have a permanent and detrimental affect on our community for all the reasons listed above.

8. The local road network is already over capacity and the increase in traffic will gridlock Ripley village and surrounding areas especially during rush hours. Simply put, our roads were not designed for the amount of traffic now on our roads let alone what your plan proposes.

9. I suffer with a respiratory disorder made worse by heavy traffic pollution, your proposed plan and the increase in traffic will severely affect my breathing.

10. Ripley already has a massive shortage of parking for vehicles, the proposed plan will make the situation far worse.

I say no to the entire plan.

I am writing to lodge my objection to the Draft Local Plan.

I recognise that more housing is needed but the plans for the Lovelace Ward are entirely impractical - as recently evidenced by the unanimous rejection of the plans by Guildford Borough Council planners.

The reasons for my objection are many but are dominated by concerns over traffic in this area. Already, at all times of the day, the roads are at maximum capacity. A short time spent at both the A3/M25 junction and Ripley High Street would immediately prove the point.

The principal grounds for my objection are:

1. DAILY TRAFFIC CHAOS would inevitably ensue on roads that are already overloaded and frequently subject to long queues and traffic jams. Indeed, Junction 10 of the M25 features frequently on national traffic reports.
2. OVERLOADING OF PUBLIC TRANSPORT, SCHOOLS, HEALTH SERVICES and PUBLIC SERVICES, all of which are already at maximum capacity and subject to lengthy waiting times.
3. AIR POLLUTION from thousands more cars. Why consider creating the same problems with which London is currently having to contend?

If there is any concern at all in the council for the quality of life of residents and our environment, this plan will be rejected forthwith.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I have some fundamental concerns regarding the 2016 draft local plan. Specifically, I am concerned by:

- The lack of any evidence for the alleged housing needs
- The disregard for infrastructure needs to support these proposals, including overloaded schools, doctors surgeries, hospital capacity, roads and public transport
- The erosion of the green belt

<td>I am writing with reference to the New Local Plan 2016. It would unthinkable to allow these developments to happen. The roads around Horsley cannot cope with the influx of new homes in the villages. Schools are already oversubscribed and this would put added pressure on them. The village cannot withstand another 533 homes being built. It is just not possible. The infrastructure is just not there.</td>

Reference: Object to Draft Local Plan

I am writing to raise my objections to the Local Plan to build new houses in the Lovelace Ward. The plan if it goes ahead is flawed for the following reasons:

1) The increase in local traffic and making worse the current problems of congestion on the A3
2) Closing off roads and changing two way to one way routes forcing local traffic onto the A3
3) Increased demand on local schools and surgery places where there is currently over subscription
4) Local roads are already under maintained with pot holes and the increase in local traffic will make matters worse
5) Concern to the increase in air pollution
6) Lovelace Ward is a Green Belt area and should be respected and valued

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/484  Respondent: 15141761 / Louise Jelly Agent:

<tr>
<td>The plans you are proposing would have devastating consequences for the local traffic. The stretch of A3 from M25 past Guildford is extremely busy both ways not only in the rush hours anymore. The traffic congestion starts well before 8am and continue pretty much all day. Suggesting that this stretch of A3 can take any more traffic resulting from building over 6500 houses is frankly insane.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Please have consideration for the local traffic connecting to A3 and the residents of the area using the local roads. We will end up in a situation where we cannot pull out of our drives to join the traffic on the main road through Send because it will be just solid queues both ways.

And adding another junction to A3 at Garlick's Arch is going to make traffic worse for both local roads and A3. I strongly object against adding another junction to A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/495  Respondent: 15142977 / Paulina Adair  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the local development plans for the areas around Send, Ripley and Clandon.

We have only recently moved to the area and we chose Send especially for its relative peaceful location and natural beauty. The development plans you are proposing would change the area to the extent we will not want to stay living here.

I object to the proposal of removing the villages (Send, Ripley, Clandon) from the green belt. I understand this can only be done in the special circumstances which is not the case here. Please consider other areas which are not in the green belt and therefore better suited for the housing or the commercial development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/497  Respondent: 15142977 / Paulina Adair  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Another fact I would like to raise is regarding the unbalanced allocation of development in one area of the Borough. The proposed 6500 houses to be built between M25 and Burpham represent more than 40% of the housing in the Local Borough. I object to one area being hit so hard, and the impact it will have on the local residents.

I really hope that the common sense will prevail at the end and the local development plans will be adjusted considering not only the impact on the residents of the area, the local traffic, but also preserving the natural environment.
Please make my comments available to the Inspector.

Apparently there are irregularities in how the local plans were changed. The significant changes such as building 485 houses in Send instead of previously agreed number of 185 require another full consultation under Regulation 18 and not the shortcut of Regulation 19, the approach taken by GBC.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the Policy A42 proposing to build 60 new homes instead of 45 home in Tannery Lane. We, the residents of Send, have objected to previously 45 houses. To increase the number to 60 houses would make the situation even worse with the traffic problems and the further erosion of the Green Belt. When reading the proposal, it makes me think that the planners have never visited the area around the Tannery Lane.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A43 proposing to build 400 homes and 6 travelling show -people plots at Garlick’s Arch. There is no evidence that the travelling show-people plots in this area are needed. And is there solid evidence that 400 new houses are needed in this area? I have read different articles in the press suggesting that the estimates for the new housing in the area are overestimated especially now when Britain is entering the Brexit negotiations.

Have the planners considered the fact that this land is subject to frequent flooding and it currently a flood zone 2 allocation? Also, I thought that only in the “exceptional circumstances” the permanent Green Belt area can be built on. What constitutes “exceptional circumstances” in this case?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3433  Respondent: 15142977 / Paulina Adair  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the policy A58 proposing a minimum of 7,000 sq m if industrial or warehousing land. This proposal was deleted from the 2014 draft because of the number of objections. How can this be added again in 2017? There is no need to build commercial development on Green Belt especially when Slyfield and Guildford have empty sites and industrial units. The evidence shows a reduction in demand for industrial land (2017 Employment Land Need Assessment).

I am writing to express my concern and opposition at the prospect of you building more properties on the area surrounding the Hog's Back.

Guildford itself is already unable to cope with the amount of traffic it already suffers. Building a further 1800 homes, with, presumably, an average of 2 cars per household, this will only make matters considerably worse. I drive across the Hog's Back every day and it is unbearable as it is.

I am writing because I strongly object to the proposed new Local Plan. My reasons are:

The housing need figure is based on a methodology which has not been disclosed to the public – or indeed councillors. How can a plan progress or be agreed without anybody being in a position to assess such a fundamental component as the housing need? In my view it makes meaningful consultation impossible. A new assessment should be commissioned using a methodology that is transparent and capable of challenge if necessary.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The removal of East and West Horsley from the Green Belt and the proposition that 533 new houses be built in these crowded villages is excessive and unreasonable. The infrastructure and amenities are insufficient to support anything other than modest infill housing consistent with the existing status of these villages in the Green Belt. Roads are already busy and car parking facilities at the village shops and station would be overwhelmed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The proposals to remove significant areas of land from the Green Belt are wrong. The whole point of the Green Belt is to preserve open land, the boundaries should not be amended without very good reason and a potentially flawed housing need calculation is certainly not a good enough reason. I also note that the policy on which the Conservative party councillors were elected was that the Green Belt would be protected. To abandon this pledge would be undemocratic and dishonest.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I OBJECT to the lack of immediate provision for new schools.
2. I OBJECT to the lack of any immediate provision for Doctors Surgeries.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the number of houses proposed, the infrastructure limits cannot be ignored.
The scale of the home building project proposed is my biggest concern. The current infrastructure is already stretched with schools at full capacity, medical facilities are much the same with appointments impossible to get, the impact on the local road network which will have unthinkably high levels of traffic and a severe lack of parking. Everyday life will be impacted and even the usually pleasant commuting to London will be a misery with nowhere to park and fuller trains. These problems will only be enhanced by the proposed developments and they cannot be ignored.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have studied the proposed Local Plan which Guildford Borough Council has now published for public opinion and my comments are set out in this email.

I object to the lack of protection shown for the Green Belt. I understood the local plan stated it would protect the Green Belt, this submission proves the opposite. 65% of developments will be made on land that is currently Green Belt. Green Belt should be appreciated, it's not just a view or a place to picnic, an escape from City life or even farmland, it's a big part of English heritage and East/West Horsley's identity. Further ramifications will be pollution from loss of green belt and added traffic and flooding from building on an area that is partially a level 3 flood risk already.

My wife and I moved back from London after university to start our family here and we believe it's important that this area of outstanding beauty is cherished or the future generations will not see the Green Belt benefits in the decades to come.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing as a very concerned resident of Send, to object to the proposed developments at Garlick's Arch, Burnt common and land on Winds Ridge Send Hill.

I strongly object to the removal of Send from the Green Belt, something that I thought the government had put on their manifesto to protect. As this is mainly a Conservative council I thought this is something that you would be looking to uphold. It seems I, like many other voters have been misled!

The Green Belt was established to limit this type of over development, and to remove it would merge Woking into Guildford. Once a field has been built upon it will never return to its original state, it will be lost forever!

I work as a Driving Instructor and use the roads daily. In the last five years my job has become increasingly difficult, just trying to get between pupils and to teach them safely. On average the A246 which runs through our village is completely blocked both morning and night at least twice a week. This can be due to a road repair in old Woking, a broken down lorry or more regularly now, a crash on either the A3 or M25 leading to vehicles exiting these roads in favour of the local roads.

The A247 has houses both sides for most of it with limited parking, so cars are parked on the road, reducing it to single lane status in many places. The junction with Broadmead roundabout leads in to small roads, already carrying far more cars than
they were ever designed to do. This road also has dense terrace housing with no parking other than on the road. Have you ever tried driving down this road in the evening or when the A3 is blocked? It is simply gridlocked. The air pollution from the stationary cars and lorries is awful!

The proposed development at Garlick's Arch and the new on off slip roads from the A3 will turn our village into a solid roadblock at peak times, the road simply cannot carry the increase in traffic the development will bring!

I believe this site was a late addition to the plan and was put through under Regulation 19, and has not been previously consulted upon! This land is covered with ancient woodland and protected by the NPPF. Surely this is one of the sites the Green Belt was set up to protect, and is protected by this government! The scale of housing and industrial development is beyond belief!

The other sites on Send Hill and Winds Ridge are on single track rural roads, again not consulted upon, some of which is landfill with vents visible above the ground. These are country roads, quite and peaceful places and not suitable for the kind of development that is being proposed!

I appreciate that Send needs to play it's part in filling the need for housing, but this is a clear case of overdevelopment! Get this wrong and village life and all it brings will be lost forever, in the name of wealth and greed!

Please pass my comments on to the Planning Inspector.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the changes to Policy A42 at Clockbarn in Tannery lane. The houses have now increased from 45 to 60, that's a 33% rise. GBC have totally ignored the hundreds of objections to this site. Tannery lane is a small country lane, it suffers from surface water flooding, it has no footpaths nor street lighting and is single track in its entire length! The road is a country lane! You drive along it with extreme care, as speeding motorists using it as a cut through while using a sat nav, forcing you into the hedges and up the banks. Tannery lane joins the A247 at a dangerous crossroads, where you have to edge out in hope you don't hit a speeding car on the busy main road! The newly painted double yellow lines prove worthless as cars still park on them making the sight lines dangerous!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the changes in policy A43 Garlick's Arch because yet again GBC has ignored the thousands of previous objections to this beautiful Green belt for which no ”exceptional circumstances ” exist !! The sight has ancient woodland dating back to Elizabeth 1st, it is currently a level 2 flood zone. To build on it would effectively join Ripley and Send and surely this defeats the entire purpose of the Green Belt. The proposed 400 houses and 6 plots for traveling show people and the massive traffic increase will cause total gridlock to our already over used, under funded infrastructure!!

We also have no where near enough school places for the current village, nor sufficient facilities to cover such an increase in the population at the Doctors surgery.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the changes to policy A58 at Burnt common because GBC have changed this from a maximum of 7000 sq m of industrial space to a Minimum of 7000 sq m of industrial space, did you think we would not notice this?

There is simply no need to build in the middle of the Green belt when Slyfield & Guildford still have empty sites. In fact the latest research shows a reduction in the demand for industrial space. Yet again there were thousands of objections logged last time, and the proposal was dropped, so why is GBC reinstating it?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the number of houses proposed, the infrastructure is already limited.

The amount of houses proposed in the building programme is far too many for the current and proposed infrastructure. Medical facilities and schools are at full capacity, the local road network will suffer even higher levels of traffic and there will not be sufficient parking. People will struggle to find a space at the station and even if they do, trains into London and other transport will become over crowded.

My husband and I chose to raise a family in a peaceful and green environment, this proposed plan contradicts everything good about East and West Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I reviewed the proposed Local Plan which Guildford Borough Council published and my objections are stated in this email.

I object to the lack of protection shown for the Green Belt.

The local plan stated it would protect the green belt and this isn't reflected in the proposal with 65% of developments made on current Green Belt land.

The loss of green belt and added traffic will cause pollution. Building on an area that is partially a level 3 flood risk will increase the likelihood of increased flooding which the drains cannot manage.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/518  Respondent: 15143809 / Cathy Leblanc  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the number of homes proposed.
Quite simply there are too many houses proposed in this plan. We haven't got the infrastructure in place nor will the proposed infrastructure adequately satisfy the number of people the added homes will bring. With an average of 2-3 cars per family that could be 6,000 extra cars on the road, the local road network couldn't cope with the high levels of traffic and the current insufficient parking means finding a space at the doctors, shops or train station would be impossible. The transport overcrowding would make local and London commuting uncomfortable. The medical facilities and schools are at full capacity and these extra homes would only create a larger problem for everyone, the proposal doesn't enrich the community in any way.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/519  Respondent: 15143809 / Cathy Leblanc  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the loss of Green Belt. Not only will the added cars create more pollution but the loss of green belt land will only accelerate this problem. This land is important for our wider environment which reduces the effect of heat generated by cities. The land is a flooding area and in the past the drains haven't coped with heavy rainfall, building on that area will only further the problem. Building 65% of developments on Green Belt land is a direct contradiction to the local plan statements to protect the Green Belt and this proposal further highlights the little notice it's taken from previous comments in this community.

People who live here, live here because it is a protected Green Belt area of outstanding beauty. The negatives of this proposal outweigh the positives, this plan severely tampers with the identity of East and West Horsley.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I Object to the Garlicks Arch planned development.

My concern is the impact of such a large development would have on the community, which is already well stretched.

The A3 link roads entry and exit at Burnt Common won't ease the problem through Ripley village as the flow on A3 is often at a crawl at rush hour therefore cars now come of the A3 slip road to Burnt Common and Send and then rejoin the cue at Wisley for the M25, likewise people who live in Send etc will still join the A3 through Ripley because they know there is often a problem in the morning rush hour when traffic gets built up from the M25 back towards Burpham, and quite often its a build up on the South Bound carriageway especially in late afternoon tailing back from Guildford.

So the development at Garlick Arch will only bring more congestion on our roads, and extra pressure on schools medical centre etc.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A43a - I object to the proposed A3 junction for reasons of additional traffic congestion, damage to existing roads and reduced air quality and increased pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A44 - I object to the proposed development for housing and travellers pitches in Send Hill for the following reasons.

This is again a newly identified site and was not included in the Regulation 18 draft; it has not previously been consulted on and is therefore inappropriate to include it in this consultation.

Send Hill is a quiet residential road surrounded by countryside. There is insufficient access to the proposed site, it is inappropriate for the proposed purposes and not in keeping with the area. Indeed other private local planning applications have been turned down for this reason. The subsoil of the site contains documented unsafe landfill waste which is currently vented. The road is narrow, single track in places, with no footpaths and as the road is straight it is already used as a rat run for some vehicles to cut through to the A3.

The road is used by the George Abbott school bus and many school children walk along Send Hill to meet the bus at the junction with the A247. Additionally younger children walk with families to attend the primary school currently in Bush Lane at the end of Send Hill. Even when the school moves to its new site the children will still be walking along Send Hill to attend it. Increased housing and the resulting traffic will place these children at added risk. Indeed rather than building more homes Send Hill should be subjected to traffic calming measures to protect the children who walk to school and other residents.

Send Hill is home to a number of bats who require protection from development and there are native bluebells in the woodland which also need to be protected.

To conclude my objection to the plan I would like to mention the local services such as health centres and schools which are already under a huge burden.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the large number of houses proposed in the plan on all of the sites. The increased population will undoubtedly place extra traffic onto roads which already struggle to cope with the current population. The A247 through Send is a small road in a bad state of repair due to traffic loading. During certain periods of the day the traffic queues back for more than a mile and as soon as any maintenance or service works are undertaken the road becomes realistically impassable during peak periods. The village of Old Woking provides a bottle neck for traffic heading toward Woking and Maybury and increasing population in Send and beyond will only exacerbate the situation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I am writing with reference to the final draft local plan and would like to raise my objections.

With reference to the policies P2, A42, A43, A43a and A44 I object for the following reasons.

Policy P2 - Send is a small village community on the edge of Woking and it provides a buffer between the town and the open countryside. To remove Send from the Greenbelt is a short-sighted act of lunacy. Greenbelt is designed to provide protection from urban sprawl and to erode it in this way is irresponsible and indeed there were repeated specific election promises to protect it.

We are all custodians of our countryside and it needs protecting from reckless planners for future generations.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am sadly having to write again to you as I don’t think that you have read my last letter. I was under the impression that I lived in a democracy and that the local councillors were elected by the people who live in a borough to serve them. They were in part elected on the basis of promises made to the electorate which as we all know, at least as far as planning is concerned, they have ridden roughshod over or completely ignored.

Tens of thousands of objections have been placed before you last year regarding the local plan and you not listened at all. Even allowing for the fact that further housing is necessary over the coming years it would appear that the area north of Guildford especially Send has been disproportionately targeted. At this point in time I understand that you will only allow objections to the changes you have made in the latest draft. With reference to the policies A42, A43 and A58.

I object to the proposal to inset Send Business Park from the Green Belt. This will allow future sprawling development over which we will have no control. We are all custodians of our countryside and we need to protect it for future generations. To allow this to happen will create the opportunity for future expansion or development at this location without consultation.

The housing demand number in the Local Plan has dropped by 39 houses per annum from 2018 to 2034, and despite this, Send’s contribution has been increased without any justification. Major sites in Send and Ripley have been changed 3 times; first we had Burnt Common, then Garlick’s Arch and now we have both. Guildford Borough Council appear to have a predetermined agenda to build on the Green Belt and without any constraints to take into account the lack of infrastructure such as roads, schools and medical facilities as required by law.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the change in policy which has increased the number of houses to 60 (33% more) from the previously proposed 45 houses at Clockbarn Nursery. This area is subject to surface water flooding which this will exacerbate and will bring even more traffic onto the A247 Send Road. This will either create a bottleneck at the junction of the A247 and Tannery Lane or feed it through narrow and single track rural roads towards Newark Lane.

This policy change will increase the erosion of the Green Belt in our village and will impact upon open countryside views around the precious River Wey navigation.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43 – I see that the proposed employment space at Garlick’s Arch has now been move to Burnt Common under Policy A58 and I will comment on that later. I object to the proposed 8 travelling show people plots on this site in addition to the 400 homes because there is no proven demand for them in this location and the lorries that will go along with these people will cause further congestion and pollution on the local roads.

The Local Plan H1 policy states that “Gypsy, Traveller or Travelling Show people accommodation should be provided on development sites of 500 homes or more whilst there remains an identified need”. Send has been disproportionately allocated 2 traveller pitches as well as 8 travelling show people plots identified as needed in the borough until 2034. The developments of over 1500 houses at Gosden Hill and Wisley are only allocated 8 pitches apiece during the same period. In addition the proposed location of these sites do not conform with the Guildford Borough Council’s own traveller policy in terms of the identified needs of this ethnicity of people; e.g. distance from schools, shops, transport and the need to join a community of people.

This land is ancient woodland allocated as Green Belt to avoid Ripley and Send being joined up. It is also subject to frequent flooding and has a flood zone 2 allocation.

Attached documents:

Comment ID: pslp172/3294  Respondent: 15143937 / Helen Strudwick  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
I object to the proposed employment space at Burnt Common (formerly planned for Garlick’s Arch) as the increase in HGV traffic, should this go ahead, will cause more congestion and damage to the roads in and around Send. This was deleted from the 2014 draft due to the number of objections but following the smoke and mirrors move to the Garlick’s Arch site in 2016, it has now appeared back in its original location but with the maximum 7,000 square meterage now as the minimum – absolutely ludicrous. Since the 2016 plan there has been a decline in demand for industrial land and there is no need to create this from Green Belt land when Slyfield still has empty sites and industrial units. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares of industrial land for the whole of the borough yet the language of this policy A58 opens this site, of in excess of 9 hectares, to unlimited development well beyond what is in the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/8034  Respondent: 15144065 / Margaret Heard  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object again in reference to policy P2, in particular to the land at Garlicks arch (A43) being removed from the green belt, as 'The Plan' states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:
• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding
• It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

I object to development in areas which are at risk of flooding (Policy P4), as the Plan does not take properly address the flood risk as required by National Planning Policy. The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

I object to the proposed Infrastructure Schedule. The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)
There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

I object to the lack of proper infrastructure planning for sites (Policy II). The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)
North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. E.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Further to this I object to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2) The A3 / M25 junction are already dangerous due to excess traffic and need to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the time frame of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/530  Respondent: 15144065 / Margaret Heard  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I wish to lodge my strong objection to the Draft local plan.

The Councils disregard for the Protection of the Green Belt is of great concern.

The proposed removal of the villages from the green belt, will potentially allow disproportionate housing developments to be built.

As a Surrey resident for 35 years, I feel that the threat to Surrey and the villages surrounding Guildford has never been greater, do not destroy our heritage, and that of future generations by allowing the destruction of Surreys Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the removal of Ripley, Send and Clandon from the green belt. These areas have no reason to be removed from the green belt, other than to facilitate the unreasonable developments planned. Likewise the proposed (A35) Wisley airfield and (A43) Garlicks arch sites should not be removed from the green belt. These areas should remain protected from the ridiculous submitted 'local plan' policy P2.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to proposed development in the local plan policy S1 as it is 'not sustainable'! The impact on local communities and to the infrastructure of these areas will be unbearable. The roads and local services are already in a terrible state of function and repair, so nearly 14,000 new homes planned for the Ripley, Send and Clandon areas alongside (A35) Wisley airfield and (A43) Garlick arch sites will not be at all sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The already overcrowded roads, will potentially see thousands of additional cars and commercial vehicles flood into the villages, where the lanes were never designed to accommodate them.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

This brings with it the problem of pollution, which is a particular problem for the young and elderly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the fact that GBC have failed to provide sound evidence in terms of the Employment Land Needs Assessment which shows that industrial space at Burnt Common IS NO LONGER NEEDED.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to policy A43.30 the development of new four way interchange onto the A3 which would mean that narrow Send Road (A247) would be the main route for traffic leaving the M25 and A3. It is already crowded and vulnerable to traffic jams. Further traffic from this development would result in permanent gridlock. It simply would not work.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to policy A44 which would see 40 homes and two travellers' pitches on land west of Winds Ridge and Send Hill. This was again a NEW site NOT included in 18 draft and therefore has NOT been consulted on previously. Once again this is Green Belt land partly containing unsafe landfill. Access is by a narrow lane which could never take the volume of traffic that would ensue from traveller's pitches.

I OBJECT to the fact that GBC have not followed the correct process for Send and Ripley developments. Any significant changes to the 2014 proposals, such as the proposal development of Garlicks Arch, should have required another full consultation, which did not happen. This invalidates the whole process.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners' views, or the costs involved in improving the infrastructure, currently outside their financial capability.

The methodology is also flawed as this plan has been formulated without regard to village Neighborhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Consideration for local communities
By allowing these ridiculous developments in totally unsuitable locations, such as Wisley Airfield and Garlick’s Arch, we are in danger of destroying local communities that have existed for years. The villages around these strategic sites are not suitable for turning into towns – for reasons stated above, the infrastructure and local amenities will not cope with a larger population. The needs of the local communities MUST come first. Once the Green Belt land is gone, it is gone forever so when will this end? The South East is being turned into a concrete jungle by ruthless property developers and it simply has to stop. I bought a house in a village as I wanted to be in a community surrounded by green fields, not to have views of housing developments and the implications that a larger population will bring. For this reason, and all reasons stated above, I STRONGLY OBJECT to the development proposed in the Local Plan.

I live in hope that common sense will prevail.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Lack of proper infrastructure
As with all large housing developments, no thought is ever given to the current infrastructure. Schools and doctors surgeries, to give just 2 important examples, are already at breaking point so how will building the amount of houses proposed in the Local Plan alleviate this? Put simply, it won’t. Much more thought has to be given to the local existing residents and impact on their quality of life. For these reasons, I STRONGLY OBJECT to the development proposed in the Local Plan.

Impact on utilities
The villages that surround these strategic sites are already close to capacity in terms of the electrical network and sewers so building a development such as Garlick’s Arch will have a catastrophic effect on these essential utilities. For this reason, I STRONGLY OBJECT to the development proposed in the Local Plan.

Lack of public transport
The sites at Wisley Airfield and Garlick’s Arch are in totally unsustainable locations as they are not close to railway stations. Our bus timetable between Woking and Guildford is being reduced even further this year so that in turn means residents are going to be more reliant on their cars. For this reason, I STRONGLY OBJECT to the development proposed in the Local Plan.

Impact on local policing services
With funding being cut to police services, how will building large developments, such as Garlick’s Arch and Wisley Airfield help? Put simply, it won’t. For this reason, I STRONGLY OBJECT to the development proposed in the Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Insufficient pedestrian footpaths/cycle lanes on local roads

With increased congestion which will be caused by building large sites, such as Wisley Airfield or Garlick’s Arch, this will have major ramifications for existing residents. Our footpaths are insufficient now so increasing the amount of vehicles on the roads will increase the danger to pedestrians. There are many cyclists who like to use the local roads, for which we don’t have cycle lanes. Is it worth risking human life to build such unsuitable developments? For this reason, I STRONGLY OBJECT to the development proposed in the Local Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Implications on traffic

Building as many houses as proposed will have a catastrophic effect on the A3 and local roads. The road I live on is already ridiculously busy and due to the bottleneck at the end of the road, I see a lot of aggressive driving. How will these roads cope with any more traffic? Will building more houses help with the aggressiveness? I think not. For example, the site at Wisley Airfield proposed over 2,000 houses which could mean (at the very least) an extra 4,000 cars on the road. Given Highways England has no plans to improve the A3 in the immediate future, how on earth will the surrounding villages be able to cope? For this reason, I STRONGLY OBJECT to the development proposed in the Local Plan.

1. Congestion on the local village roads

Following on from #4, the villages are already at capacity from the sheer amount of traffic we currently experience. The parking situation on the high street and surrounding roads is not sustainable. The house that I share with my partner has neither a driveway nor allocated space so we are reliant on being able to park on the road outside our house. More traffic on our roads from these proposed developments leading to a larger population would be disastrous. I STRONGLY OBJECT to further development which will do nothing to help with the current congestion or parking issues we currently face.

1. Unsuitability of our local roads for heavy vehicles and more traffic

The surrounding villages around these strategic sites by their very definition have a lot of country lanes which are very narrow and often allow for only 1 car to pass at a time. On the road I live, I often see heavy goods vehicles and other unsuitable vehicles, such as coaches, pass by which are totally unsuitable for this road. The local roads are not in an optimal condition either which would only get worse with more traffic. For these reasons, I STRONGLY OBJECT to the development proposed in the Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Impact on environment
   Destroying the Green Belt and beautiful greenery/woodlands in these historic villages around the strategic sites will have a catastrophic effect on wildlife and the environment. This is completely UNACCEPTABLE and there appears to be no consideration for issues these developments will cause the conservation areas or Special Protection Areas. For this reason, I STRONGLY OBJECT to the development proposed in the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/547  Respondent: 15144545 / Stacey Maxwell  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
I have the following objections to removing Ripley, Send and Clandon from the Green Belt:

1. **Green Belt**
   I STRONGLY OBJECT to the proposal to remove Ripley, Send and Clandon from the Green Belt. These are historic villages and there is no sound reason to do this. I bought a house in Ripley as it’s a lovely village and it’s utterly heartbreaking to see that planning departments are even contemplating removing these villages from the Green Belt. If this decision moves forward, the Green Belt will be gone forever.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **Disproportionate size of proposed development to size of villages**

I STRONGLY OBJECT to the size of the proposed developments (e.g. Wisley Airfield, Garlicks Arch on the Ripley/Send border, Gosden Hill in Clandon). These developments are totally disproportionate to the rural villages and will have a catastrophic impact on the local communities. I moved to Ripley for the very reason it’s a small village, I have no desire to see it turned into a big town.

1. **Unbalanced allocation of development in one area of the Borough**

According to the statistics, in the 5 miles between the M25 and Burpham, there is a proposal to build over 6,500 houses. This equates to over 40% of the housing proposed in the Local Plan, which is disproportionate to the rest of the Borough. This is totally unacceptable and I STRONGLY OBJECT to this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to raising the annual number of houses built per year. With no rational reason given, one must assume these are developers' numbers for financial gain and not for social need.

I object to the disproportionate distribution of houses across Guildford Borough, by far, the North East has taken an unsustainable number, in an area where country lanes are narrow and volume of traffic now using through routes makes roads gridlocked at rush hour.
### Comment ID: pslp173/139  Respondent: 15144545 / Stacey Maxwell  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Ripley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. Ripley and the surrounding villages are already above the legal limit of pollution so even by contemplating these proposed and increased developments at Site A43 Garlicks Arch and Site A35 Former Wisley Airfield, to name a couple, **Guildford Borough Council is contemplating breaking the law.** This is totally unacceptable. Green spaces are actually needed to counteract the effects of pollution.

2. Ripley, Send and Clandon are rural, distinct villages. The proposal to increase the houses at Garlicks Arch to a minimum of 400 houses will ruin both the rural nature of these villages and will turn us into 1 big town. People buy properties in villages because they want the sense of community that comes with village life. If we wanted to live in a town, we’d have bought a house in one!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The inclusion of 6 plots for travelling showpeople to the A43 Garlicks Arch site is frankly ludicrous in a rural environment within the Greenbelt. Our roads can’t cope with the size of the vehicles and storage facilities they will come equipped with. Why does Ripley have to have 75% of these plots? This is totally unacceptable and completely unbalanced.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. With regards to the A58 Burnt Common Site, the potential for a substantial increase in industrial floorspace from 7000 sq m to an unspecified amount is completely unacceptable. There has not been sufficient information provided to local residents and therefore takes away our rights for a proper and thorough consultation. This is underhanded. How on earth can this be acceptable, in a rural environment, to increase the amount of heavy goods vehicles that will be using our surrounding roads?

2. With regards to the A58 Burnt Common Site, there has been a brief mention of a Waste Management Facility (which has been conveniently made less prominent in policy 4.4.23a) – this must go through a formal and proper consultation. Again, this is underhanded by Guildford Borough Council.

Attached documents:

---

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to object to the Local Plan 2016-06-18 and would like my comments to be seen by the Inspector. It would appear that far from looking after the Rate payers interests Guildford Borough Council would override our interests and previous comments and objections.

I object to the way the council have changed the plans for Send after the original plan was put forward.

I object also to the various villages being removed from the Green Belt, in particular Send Village policy P2

I object to the massive development of Garlicks Arch Burnt Common, this is another development just slipped in without the necessary consultation. The local roads in this area are already blocked during the morning and afternoon rush hour periods as they were not built to cope with this volume of traffic already using them. Apart from a major junction at Burnt Common, there does not appear to be any further plans for improvement to the roads in this area. The A3 is already grid locked to both North and South daily.

I object because no one seems to have considered how much water and sewage will be used and generated by the properties proposed for this whole area including Ripley, Send, Wisley and Clandon. Just how are these new households and businesses to be served? What about Policing, Fire and Ambulance services on top of which the Dr surgery is already struggling as is The Royal Surrey Hospital. In summery I strongly object to the 2016 Draft Plan.

I object to any invasion of The Green Belt.

I object to any in setting of any villages from the Green Belt.

I object to the massive amount of development in this one area of the Borough.

I object to the incredible limited consultation period.

I object to the last minute inclusion of new sites with less than two weeks notice.

I object to the total lack of any evidence for the alleged housing need numbers.

I object to the lack of immediate provision for new schools.

I object to the lack of creditable provision for Dr's surgeries.

I object to the proposal to build 40 homes and 2 travellers pitches on the land West of Winds Ridge and Send Hill. This site is new and was not included in the regulation 18 Draft and has not been consulted upon previously. Development for housing is inappropriate due to its narrow entrance, Green Belt status, and high quality Green belt amenity within an area of beautiful countryside which would be ruined by development. The sub soil of this existing site contains documented unsafe land fill which is currently vented and should never be disturbed as nature has sealed the site it must be left undisturbed. The proposal to include two travellers' sites is inappropriate due to the existing narrow single track lane which provides insufficient access to the site or even access to Potters Lane. In fact residents at this point are woken up in the early
hours by delivery lorries which get stuck due to wrong instructions from sat navs having to reverse back up Send Hill with warning sirens and flashing lights. There is also a school at the bottom of the hill with the attendant traffic when mothers deliver and collect their children. Policy 44-1.9na.

It is disgraceful that in spite of all the promises you made at election time, you now seem to totally disregard our views and seem intent on breaking down our village communities and destroying the community spirit.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We already see significant traffic through Ripley, Send and Clandon. During the development stage this would increase significantly and remain at much higher levels than currently experienced once completed. The proposal of Garlick’s Arch in particular would create huge increases in additional congestion.

I do not feel the development meets any needs of the local communities and only see any development of these areas as a negative move and therefore object to the proposals.

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a resident of Normandy for approx. 25 years we chose to live in a village, Overthose years we have observed traffic increase enormously, Our road system just about copes the ref ore to increase the number of houses by 1100 which is your proposal doubles the size of Normandy which the current road & sewage system could not cope with. Normandy elevates from South to North at quite a steep gradient causing flooding to occur regularly on the North boundary at times closing Glaziers lane for fear of stalling in deep water, sewage has been a major problem for several properties in there gardens. To propose such an enormous development is totally unacceptable & will deprive future generation of any green belt to walk in & breath air not po luted by vehicles There fore I am lodging a strong objection

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the policy change A58 at Burnt Common London Road because -

1. The word 'maximum' is a change from "minimum" and industrial development is unsuitable.
2. Heavy vehicular traffic from such a site would create further congestion and pollution.

It is particularly disturbing that there has been little or no effort on the part of the Council to ameliorate the very legitimate concerns of local people. These concerns therefore are as relevant to the latest draft Local Plan as the earlier version of the document.

Regarding the above plan proposed by Guildford Borough Council (GBC)

I have several points that I wish to raise and a number of objections that I wish to be logged.

- Objection 1 (Policy 52). GBC in the 2014 consultation declared that their intention was to build 652 houses/year (between 2013-2033). Now in their most recent plan they are aiming to build 693 houses per annum. This increased number would severely impact on our already congested roads, on GP surgeries, hospitals, schools and shows complete disdain regarding preservation of Green Belt land.

- Objection 2 (Policy P2). This policy involves the creation of new boundaries to inset the villages of Send and Send Marsh/Burnt Common. Thus removing their Green Belt status Can GBC really act with impunity when their proposal breaks this government's promise to "Protect the Green Belt"? Its removal would result in urban sprawl and gridlock. The Green Belt is also there for the purpose of access to clean air and to provide a safe habitat for wildlife.

- Objection 3 (Policy A43). The proposal, referred to as Garlick's Arch to build 400 homes and 7,000 sq.m space for additional light industry and warehousing. This would lead to a 41% increase in population in the area. The proposal is that these houses are to be built on the agricultural land based just outside the Send Marsh/Burnt Common village boundary. Again, if this goes ahead it will result in filling our roads with more cars and HGVs. The arterial A3 autoroute and the surrounding roads are already operating at full capacity. Putting more vehicles on the road will result in intolerable levels of noise and unacceptable levels of pollution from nitrogen dioxide and other harmful pollutants.

- Objection 4 (Policy A43a). The addition of two more slip-roads to and from the A3 and the A247 (Oandon Road) again will result in total congestion. Send Road leading to Woking has resident's cars parked on either side of the road leaving a very narrow space for cars and vans to pass one another and in most instances one has to give way to oncoming traffic. This is also the case with Clandon Road which is narrow and winding and already operating at full capacity. These roads are dangerous to pedestrians crossing, cyclists, and for residents exiting from side roads. I can only assume GBC did not seek the advice of a road traffic consultant or they would not have arrived at such a ludicrous plan.

- Objection 5 (Policy A25). If the proposed 2,000 housing development goes ahead at Gosden Hill it will result in high visibility urban sprawl obliterating the rural nature of the area and have a massive negative affect on the A3 and local roads. Good regeneration planning requires ingenuity, empathy and the ability to adopt a holistic approach that
satisfies the need for new housing and small business development whilst taking into account the needs of the resident population, the existing infrastructure and the need to preserve as much of the Green Belt as possible. These key features are missing from the GBC proposal ...

Garlick's Arch policy.

I object to the building of 400 homes and 6 Travelling Show People plots

• How would the occupancy of these plots and the flow of equipment to and from the plots be monitored

• HGVs would be required to move large equipment thus contributing to the existing traffic problems

• Building on this land would result in over development with no demarcation between villages thus defeating the purpose of the Green Belt.

• This area is subject to flooding with flood zone 2 status

• It is contaminated by lead shot arising from shooting clubs, accumulated over many years

• It contains beautiful ancient woodland, the destruction of which would be a tragedy for for the area and wild life

• The existence of high voltage pylons across this land has been ignored. These will provide a serious Health and Safety risk to occupants of the Traveler sites when they move equipment. This is Green Belt land and should remain so.

New Policy A58: I object to GBC’s proposal to build 400 houses and 7,000 sq.m. employment space (light industrial/storage, warehousing) on virgin Green Belt around Send! Send Marsh/Burnt Common

- This construction would remove vast areas of Green Belt open space
- The policy seeks to increase the area of land to be extracted from the Green Belt by a minimum of 7,000 sq.m of employment floorspace. The word minimum used leaves the door open for future development
- There would be a very severe and adverse environmental impact not only on the two villages, but throughout the whole surrounding area, overdeveloping the local rural communities and creating major traffic problems.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy
I object to the number of homes (12,426) to be delivered by GBC over a 20 year period

- The infrastructure is not in place to support this number of homes.
- It would put unimaginable pressure on road capacity, schools, doctors' surgeries, hospitals and police. This proposal would mean an increase in population of 41% which is total unacceptable as the existing local road systems are already unsafe and not fit for purpose
- Cycling along the narrow and winding roads or walking on the pavements is already hazardous. I do wonder is any councillor has tried walking or riding along the present roads. To widen the roads in the designated areas would mean knocking down existing homes.

Instead of spreading the load to cause minimum disruption, It would appear that GBC seems to be biased against this area as it has decided to dump -40% of its plan in one spot putting great strain on the existing facilities and residents. We are at the extreme end of the Borough and from our standpoint the councilors have decided on a solution that disrupts the minimum of its voters, overpowers and annoys its existing residents. By disregarding the numerous objections sent to GBC it is demonstrating the bullying tactics of government representatives. If this is how democracy works it stinks.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to register my opposition to the local plan re: the Horsleys.

The boundaries of our villages will be greatly enlarged. The village areas inside these boundaries will be removed from the Green Belt. The Horsleys are likely to have more than 533 new houses - we do not have the facilities or infrastructure to support this growth. Our local schools, roads and doctors are already at breaking point!

Answer (if comment is on questions 1-7 of the questionnaire): ()

New policy A58 - Industrial space on land around Burnt Common, London Road. This new policy seeks to increase the area of Green Belt land to be sacrificed for additional light industry and warehousing. GBC states a minimum of 7,000 sq. m of employment floor space. The use of the word minimum rather than maximum is duly noted as it leaves the door open for further future development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2 - The number of homes that GBC has to deliver over a nineteen years is 654 per year. This will increase the population by ~40%. The infrastructure cannot support this increase. The increased number would severely impact on our already congested roads, on GP surgeries, hospitals, schools and encroach considerably on Green Belt land.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am very concerned about the proposed changes to the A3 Junction at Burnt common. I travel along those roads on a daily basis and the proposed changes to this junction or the provision of a new large junction will simply overload the already busy roads and local services. I am concerned that these changes will lead to traffic cutting through Send and Old Woking to reach Woking centre. I object to the proposed new A3 Junction layout for those reasons.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I understand that a large redevelopment around the village of Send and the alteration of the existing Green Belt arrangements at Send and Burnt Common are being proposed in the Local Draft Plan.

I wish to strongly object to the changes to the Green Belt that would remove areas around the village of Send from the designation of ‘Green Belt’. The whole idea of having a green belt is to permanently protect rural areas from development and to prevent towns and cities expanding into agricultural land and areas of natural beauty. There is a real danger that this leads to the joining together several villages to form a sprawling area that in turn joins to Guildford or Woking ( or both ).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I also wish to object to the redevelopment of existing farmland at Garlick’s Arch to provide large numbers of housing and industrial units into an area where it is not required nor will it be necessary for many years to come. There are ample sites within the boundary of Woking that can provide these opportunities and I believe that brownfield sites should be used before developing more fields.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to these proposals because I cannot believe that sufficient weight has been given to recent historical flooding in these areas resulting in ingress to properties.

We are told by experts to expect climate change to bring more extreme episodes of weather and yet you are proposing to concrete over large tracts of useful Green Belt allowing more water to be delivered more swiftly to streams and rivers, with resulting overflows and flooding.

I object to these proposals because I believe Government Policy is that 'proven need' is required to take land out of the Green Belt. I do not believe that this 'proven need' has been achieved, and these proposals constitute over development on a grand scale.

I object to these proposals because I do not believe sufficient consideration has been given to resulting traffic flows and consequential pollution of the atmosphere with gridlocked heavy goods vehicles, apart from the general chaos at busy times.

Please note that I wish my comments to be seen by the Inspector.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the policy changes A43 at Garlicks Arch, Send Marsh because -
1. The allocation of Travellers/Showpeople sites is already excessive and out of all proportion even with reference to Local Plan Hi.
2. There are no "exceptional" circumstances for this important green belt to be developed and it is an important contribution to the control of flooding in the area which has sometimes been widespread in recent years.
3. Excessive traffic will result in increasing congestion, pollution and potential health risks to the local area and its residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

</tr>
</tbody>
</table>

I OBJECT to the policy change A58 at Burnt Common London Road because -
1. The word 'maximum' is a change from "minimum" and industrial development is unsuitable.
2. Heavy vehicular traffic from such a site would create further congestion and pollution.

EXECUTIVE SUMMARY

This Planning Statement forms part of representations into the Guildford Borough Submission Local Plan: Strategy and Sites Consultation June 2016. The submission is made on behalf of the Earl of Onslow and the Trustees of the Clandon Estate.

The representations seek the allocation of land known as Onslow Park, south of the Epsom Road, Guildford for a sustainable housing led, mixed use development in order to help meet the needs of the Borough for new homes, jobs, community facilities and recreation space within the early part of the Local Plan period up to 2013-2033.
The most exciting element of this proposal is that should a resident choose to, they can go from school, through work and into retirement without ever having to use or own a car. The pedestrian, cycle, bus and train links take the resident to the greatest Capital City in the world the historic and picturesque town of Guildford whilst being able to play sport and walk in the countryside of the North Downs and AONB...and here is why.

**Vision**

The form of the development proposed is that of a sustainable urban extension on the eastern edge of Guildford, adjoining Merrow and follows the principles of a garden village.

In so doing, the proposals aim to provide a clear vision for a balanced, integrated and successful community with a long term commitment its development and maintenance and with a strong sense of its identity and place that is firmly rooted in the history of Guildford.

The key principles on which this vision are based include:

- Providing a community that is firmly based on the built, natural and cultural heritage of the Borough as a foundation for design and community development;
- A long term commitment by the Earl of Onslow and Trustees of the Clandon Estate to the management and maintenance of Onslow Park, the facilities and environment in conjunction with the community;
- Returning value to the community by investing in the infrastructure that supports the development including parkland, sports and recreation, education and housing and in the future management of Onslow Park;
- Involving the community and wider stakeholders in the planning, design and development of the site and the ongoing management of the community park and other shared spaces;
- A high quality of inclusive housing design, for people of all abilities, based on modern, low carbon construction standards, reflecting the use of local styles and materials but adopting designs appropriate to the site and its identity.
- Each of the homes will have access to its own amenity space and shared public open space as part of the community park and other facilities;
- A village community comprised of a series of walkable neighborhoods based around a traditional village green and cricket pitch, with parkland radiating from the centre to connect the existing town and new community with the surrounding countryside;
- An enhanced environment that adds to nature conservation habitats within and around the site and respects its setting, providing a variety of meadows and nature conservation areas, community parkland, sports, recreation and healthy living spaces;
- A community well connected to Guildford and part of the wider community within Guildford, well served and with new connections on foot or cycle and by a variety of modes of public transport. The proposals minimize the need to travel and optimize opportunities for connections and integration with the surrounding area.

The proposals are for a balanced, mixed use community comprising:

A mix of Housing: The masterplan provides for up to 1000 new homes, including family homes, starter homes, discounted private rented and affordable housing, retirement housing and assisted living.

A neighbourhood square: A flexible and attractive social space as a focus for activity, gathering, and holding community events, framed by the local centre and opening out onto the main recreational space.

Village centre: A village centre with potential new medical centre and pharmacy, a small convenience store and café with small scale offices above suitable for small business and start-up space.

An education campus: The provision of land for a new education campus on a 9ha site, providing a new 5 form entry secondary school and 2 form entry primary school for the east of Guildford. Based on the standards used by Surrey County Council and their requirements for the area, this aims to serve the wider community within Guildford and provide a through education opportunity with full supporting facilities and strong cycle and pedestrian links to other primary schools in the area, including the new primary school planned for the Gosden Hill development.
Employment opportunities: As part of a balanced community that provides employment, homes and services, the masterplan includes employment space in the form of a range of small scale offices within the local centre and separate office buildings, with a hotel and supporting services.

Sports and recreation: The proposals include a range of new leisure and sports facilities to serve the Guildford area. These include:

- A new Tennis Academy based around Merrow Tennis Club, with an academy building clay courts, indoor courts and an additional outdoor court.
- A new Cricket clubhouse and cricket pitch at the heart of the open space and the community hub,
- Football and sports pitches shared with the new education campus
- A new park totalling over 24ha
- New informal sports and recreation facilities including recreational routes with seating areas and a ‘trim trail’ with outdoor gym equipment, children’s play-space, Suitable Alternative Natural Greenspace (SANGs), wild areas and recreational routes to the Surrey Hills AONB
- New nature conservation areas to enhance the range of habitats and species within the site
- New woodland and hedgerow planting based around the existing features within the site, to enhance the long term landscape setting.

Sustainable transport

The site is sustainably located and accessible from within the urban area, with good access by foot, cycle and bus to the town centre and other destinations. The proposals seek to enhance this further in a number of ways.

New connections to existing footpaths and links to the centre of Merrow, with pedestrian and cycle routes throughout the development and an enhanced footpath and cycle link to the proposed Merrow Station.

The enlargement of the current Park and Ride facility, increasing the current capacity of the facility and adding the potential for cycle hire facilities to diversify the options for onward travel.

Connections to rights of way linking to the Downs and Newlands Corner to enhance access to recreational routes and the countryside from Guildford.

Sustainable Development

Government policy requires planning decision to pursue the most sustainable options for growth in order to meet the needs of the community in the most sustainable manner, that reduces the need to travel, maximises the use of alternative means of transport and maximises access to the benefits of growth to the optimum number of people.

Onslow Park forms part of the most sustainable spatial development strategy for Guildford. The site was identified in the Council’s Countryside and Green Belt Study, forming part of the evidence base for the Local Plan, as one of the preferred options for Green Belt release.

The site constitutes a well contained land parcel which is strongly defensible on all boundaries, meaning the site’s controlled release would not encourage urban sprawl. In this way, the allocation of the site at Onslow Park would not jeopardise the wider purposes or functionality of the Green Belt.

The benefits that can be delivered for the Borough through the sustainable spatial strategy proposed as part of Onslow Park cannot be matched in less sustainable locations away from the town that do not provide benefits to the existing community or help support investment in enhanced services and infrastructure within the town.

It is also one of the most sustainable locations for growth, well related to the principal town within the Borough and accessible to the majority of the Borough’s population and core services and facilities. It is readily accessible by foot, cycle and public transport and contains one the towns existing park and ride facilities, which is proposed to be doubled in size as part of these proposals.
The site is also well related to the proposed new station at Guildford East (Merrow) and the present station at West Clandon.

Onslow Park compliments the proposed allocation of land at Gosden Hill and Blackwell Farm and where relevant and necessary, would help support the infrastructure required to serve the needs of the town.

The Site has been previously inaccurately assessed in the Green Belt and Countryside Study which although it recommended the possible removal of the site from the Green Belt and its allocation as a sustainable urban extension, also failed to appreciate (inter alia) that the proposed development area of Onslow Park falls entirely outside the AONB, has no significant impact the setting of historic towns and in addition, presented an inaccurate measurement of distances to the local facilities. We consider that if these assumptions or errors had not been made, then Onslow Park is likely to have been identified as a preferred, sustainable location for growth.

Onslow Park would deliver sustainable development through:

Economy: the provision of significant scale of new mixed use development within the early years of the Plan, supporting economic activity, with housing, employment space, a hotel and additional facilities supporting the growth and development of the economic base of Guildford.

Environment: the enhancement of the landscape and natural habitats within and around the site, the adoption of low carbon, sustainable construction, the development of high quality homes zones and healthy living spaces that combine, sport, recreation and natural areas within and surrounding the community.

Social Infrastructure: the provision of a wide range of social infrastructure in the form of affordable and private rented homes as well as starter homes, recreational facilities, enhanced access to the countryside and North Downs, schools, a sporting hub with tennis, cricket, football and multi-use pitches, enhanced park and ride, medical and other facilities delivered hand in hand with the development of housing as part of a sustainable community that enhances facilities for the existing population.

Delivery

Housing and the supporting community and environmental infrastructure proposed at Onslow Park can be delivered in tandem within the first part of the Local Plan period, when the need for housing is greatest.

The site is not subject to major infrastructure or other constraints that would delay or prevent an early contribution to supply. The land is available and is not subject to any overriding constraints. Off-site transport improvements can be delivered in conjunction with the development proposed.

Housing supply within the proposed Local Plan is below the level required for the first 15 years of the Plan, due to the time needed in bringing several of the strategic sites forward. Hence there is a need, in order to meet the housing needs of the community, to increase supply early in the Plan period. This is precisely when Onslow Park can make a significant contribution, helping meet the required housing numbers in the early years of the plan.

1.0 INTRODUCTION

This document forms a written Planning Submission to the Guildford Borough Proposed Submission Local Plan: Strategy and Sites consultation July 2016. It has been prepared by WYG on behalf of The Earl of Onslow and The Trustees of The Clandon Estate. It outlines their vision for the creation of Onslow Park, a proposed ‘garden village’ adjoining the urban area of Guildford and forming a sustainable urban extension east of Merrow.

The Onslow family have had a long, extensive and positive association with Guildford, both as custodians of Clandon Park and other land within the Borough and as part of the local community and history of the town. The land for Stoke Park, Guildford Cathedral and Onslow Village, now a thriving conservation area in the heart of Guildford, were all legacies of the Onslow Estate and are now key assets in the history and fabric of the town.

Reflecting his long term commitment to the community and to Guildford, these proposals, by the Earl of Onslow, are a response to the current Local Plan debate over the best way to accommodate the housing, employment, community and the
other needs of the town and the Borough’s residents. They represent one option, we believe the most sustainable option,
which might be considered for the development of Guildford.

The purpose of this document is to outline these proposals and to provide both context and evidence that justify the
proposals and demonstrate the sustainable nature of the proposals and how they accord with the fundamental principles of
the Proposed Submission Local Plan (the Local Plan) and the National Planning Policy Framework (NPPF). The
representations are, by necessity, expressed as an objection to the Submission Local Plan and the omission of the Onslow
Park site.

The representations are accompanied by:

‘A Vision for Onslow Park’ produced in April 2016 which provides some of the background to the design and
masterplanning of the proposed development;

A Preliminary Landscape Visual Appraisal which considers the potential for Landscape and Visual impacts as a result of
the proposed development;

A set of Zone of Theoretical Visibility sector graphics, which show where development of nine metres high across the
proposed Onslow Park would be visible from a height of two metres within the surrounding area (before any landscaping
mitigation is considered for the site) (importantly the proposed development would hardly be visible from the conservation
area);

‘Onslow Park Transport Feasibility Report’ July 2016 which considers the transport issues arising from the proposed
development and shows how this accords with the transport policies proposed in the Local Plan.

This Submission provides evidence over the:

• the nature of the representations and development proposed;
• the deliverability of the development and its ability to contribute to supply in the first 5 years of the Local Plan;
• suitability of the site for the development proposed; and
• justification that demonstrates why the site should be allocated within the Local Plan in order to meet the
requirement to achieve sustainable development.

This submission also considers the need for housing and employment by reviewing the evidence base on which the DLP
has been produced.

Finally, comments are made on some of the wider strategy based policies and the impact that these may have on
deliverability in providing for the needs identified by the Council.

2.0 REPRESENTATIONS

The approach taken in the Submission Local Plan is generally supported, our comments set out within this section relate to
those areas of the Local Plan where it is considered that its strategy or policies could be improved and do not currently meet
the needs of the Borough, enhance the lives of the community or deliver development that is sustainable.

The basis of these representations is essentially that:

• The spatial strategy of the Local Plan should state clearly that Guildford is the primary town within the Borough
and is the most sustainable location for growth both within and adjoining the urban area;
• It offers the best opportunity to for development to support the vitality of the town and provides good access to
its existing range of goods and services, employment, community and cultural uses for the new housing
proposed in the Plan;
• It also maximizes the benefit for the existing community arising from additional investment in housing,
employment, recreation, transport infrastructure and new community facilities by locating these where they
benefit the most people;
• This is also the location where the opportunities to minimize the need to travel are greatest and where
opportunities to access modes of transport other than the car are maximized;
• While brownfield opportunities are to be maximized, there is also a need to consider sustainable urban extensions as the next most sustainable option for meeting the identified housing, employment and other needs;
• This option is preferable in both policy and practical terms, to less sustainable locations that are remote from the urban area and are by definition, more restricted in terms of access to the full range of goods, services and transport options than Guildford itself provides.
• The location of development, integrating the urban area with the countryside in the form of a sustainable garden village, helps provide the most appropriate basis for a new sense of community and a sense of place that respects and enhances its environment.

These representations therefore, propose the allocation of land at Onslow Park, south of the Epsom Road, Guildford to form a new garden village forming a sustainable urban extension adjoining the east of Merrow. This would provide for a new allocation policy, A58:

<table>
<thead>

</tr>
<tr>
<td>Green links to the adjoining North Downs and countryside</td>
</tr>
<tr>
<td>Where necessary to mitigate the impact of the development a proportionate contribution to off site transport infrastructure.</td>
</tr>
<tr>
<td>Maintenance of a green buffer on the Epsom Road A25 boundary and sensitive design to ensure maintenance of the transition from urban to greenfield.</td>
</tr>
</tbody>
</table>

The site is identified in Figure 1 and the overall masterplan of the development proposed is set out in the accompanying Onslow Park Vision document. The proposed development is explained in further detail in the remainder of this statement.

The site is currently occupied by Clandon Golf, the Merrow Park and Ride facility and Merrow Cricket Club. The land was extensively remodelled to form the golf course in recent years and there is permission for a new club house complex. The golf club is one of many in the area and would not limit such opportunities if it were to become Onslow Park.

The site is surrounded by extensive woodland to the east and south and the urban edge to the west, thus limiting longer range views and providing a strong sense of visual enclosure.

A good vehicular access is provided via the existing roundabout on the northern boundary of the site, on the A25.

### Garden Village

The proposed garden village comprises approximately 59 hectares of land, around half of which is proposed as parkland, public open space, sports and recreation facilities, allotments and nature conservation areas and meadows. The proposals are based upon a number of core principles:

- Providing a strong and clear vision that helps to shape a clear sense of place and community
- A long term commitment by the Earl of Onslow and Trustees of the Clandon Estate to the management and maintenance of Onslow Park, the facilities and environment
- Returning value to the community by investing in the infrastructure that supports the development including parkland, sports and recreation, education and housing and in the future management of Onslow Park;
- Involving the community and wider stakeholders in the planning, design and development of the site and the ongoing management of the community park and other shared spaces;
- A high quality of inclusive housing design, to modern, low carbon standards with a strong sense of place, reflecting the use of local styles and materials but adopting designs appropriate to the site and its identity. Each of
the homes will have access to its own amenity space and shared public open space as part of the community park and other common facilities;

• A village community comprised of a series of walkable neighbourhoods based around a traditional village green and cricket pitch, with parkland radiating from the centre to connect the existing town and new community with the surrounding countryside;

• An enhanced environment that adds to the nature conservation habitats within the site and respects its setting, providing a variety of meadows and nature conservation areas, community parkland, sports, recreation and healthy living spaces;

• A community well connected to Guildford and well served on foot or cycle and by a variety of modes of public transport. It minimizes the need to travel and optimizes the opportunities for connections and integration with the surrounding area.

The essence of the proposals is a wish to create a real sense of place, of pride and a sense of belonging that enhances the lives of the existing and proposed community by providing a range and quality of homes and open spaces, community and sporting facilities and employment opportunities that benefits current and future residents alike.

Housing

The proposed housing would include approximately 1000 high quality new homes with a vibrant mix to meet the needs of a balanced community. This would include:

• A mix of 1, 2, 3 and 4 bed family homes
• A mix of private and affordable housing with affordable homes contributing over 40% of the total, including starter homes
• A significant proportion of private rented sector housing (PRS) including the potential for discounted market rent
• Retirement housing and care village providing on site care and progressive support to suit individual circumstances
• A proportion of self-build plots
• 4 serviced travelers’ pitches

One of the aims of the proposed garden village is to provide a high proportion of privately rented homes, some of which will be offered at discounted market rents of around 70-80% of market values. This will help provide good quality homes and an alternative market tenure that is of particular value in supporting a vibrant and mobile workforce, essential in supporting the needs of the economy.

The masterplan provides an illustrative layout which demonstrates the high quality of environment proposed which presents a series of home zones each with its own character and which together form part of a cohesive garden village.

Community Tennis Academy

The tennis academy is proposed in conjunction with Merrow Lawn Tennis Club (MLTC) who wish to create a new Guildford Community Tennis Academy. The aim would be to provide a community tennis academy comprising outdoor and indoor courts, a clubhouse to provide café offer to tennis players and local residents with changing room facilities.

It would provide a performance tennis academy, adjacent to the existing tennis club facilities for aspiring local players, supported by existing world class coaches. The academy would be linked to MLTC, with the aim of being endorsed by Lawn Tennis Association and managed on a commercial basis. The academy would provide a professional tennis centre standard of operation, with community access and links with local schools and community groups and with scholarships for talented athletes.

The design would be sensitive to its setting as part of the sporting and community hub within the overall development and in keeping with the environment. There would be a combination of indoor and outdoor courts to allow extended playing time throughout the year. Guildford has no dedicated indoor tennis courts currently and hence this is a direct response to an unmet need for tennis in the Guildford area.

Access would be gained via the main site access and community centre adjacent to the park and ride.
Cricket

The Cricket facilities would include a replacement to the existing cricket pitch that is of an enhanced size and built to a standard suitable for competition level to match Merrow Cricket Club’s aspirations and support their fixtures in both the Surrey County and Fullers Leagues as well as providing for training and colts sides. The club have a thriving membership and active youth and community association. The proposed facilities would benefit from a new clubhouse with changing and kitchen/refreshment facilities and supported by external nets facilities for coaching and practice.

The cricket facilities would be at the heart of the community park, open space and informal parkland that stretches throughout the development proposed. It would be a key link in the sporting hub that encourages sporting excellence and maximum participation in the community. It links the tennis academy to the west with the village centre, open space and sports pitches and educational campus to the east. It would provide a focus for community activity and would be accessed from the main site access at the park and ride and with additional parking adjacent to the village centre.

Community Park and Public Open Space

The masterplan proposes a total of approximately 24 hectares of green space, comprising a mix of formal and informal recreation, sporting and nature conservation areas. The proposed facilities include:

- A community park which encompasses the site and runs through its heart, providing a high quality setting for the village, softening and screening the relationship with the existing eastern edge of Merrow and providing a pivotal connection within the development and linking with the adjoining countryside;
- Formal sports provision in the community tennis academy, the cricket pitch and village green, formal football and sports pitches, school playing fields, allotments, sports and recreation trail, footpaths, cycleways and bridleways;
- Informal nature conservation including wildflower meadow, retention and management of the existing the Site of Nature Conservation Importance, new hedgerow and woodland planting;
- Children’s play space based on encouraging interaction with the natural environment.

The proposed facilities meet or exceed the relevant standards for residential development and are a fundamental part of creating the sense of place that underpins the garden village vision.

Employment and Hotel

The proposals for Onslow Park include a new business hub, as part of a sustainable mixed use development, based around a series of office buildings on the eastern side of the village centre. This links the park and ride with the proposed education campus and helps to cement the connection between enterprise and learning. Approximately 2,100sqm of modern office space is proposed in a series of office buildings, suitable for flexible, high quality business space, including accommodation suitable for starter and incubator units.

The proposed Education Campus comprises both a primary school with early years provision and a secondary school, that meets the needs of the development and the wider area.

It is acknowledged that there is a secondary school site now proposed within the Gosden Hill allocation. The proposed secondary school at Onslow Park is an alternative site for the proposed school and one that is less constrained. The aim of locating the school within Onslow Park is to provide a clear connection with the sporting hub that is formed by the combination of formal sports pitches, the cricket and tennis academy, which together provide unrivalled facilities for both the school, local clubs and the community. The integration of sporting and educational aspirations is part of the key successful sports and a healthy environment for education.

Alongside the proposed office space, it is proposed to locate a hotel to support the business and wider needs of the area. This includes meeting and conference space and will help support the wider visitor and tourism strategy for the Borough.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

OAN Update

The evidence base has an identified OAN of 693 dwellings per annum following the conclusions of the West Surrey Strategic Housing Market Assessment (SHMA) produced in September 2015 by GL Hearn. This assessment was carried out as part of the Housing Market Area (HMA) known as West Surrey which included Waverley and Woking in addition to Guildford.

The most recent population projections produced by Office of National Statistics (ONS) shows that by 2037, the population of Surrey is expected to increase by over 200,000. This increase is anticipated to be greater than shown by the 2012 population figures. The 2012 figures informed the SHMA which in turn has provided the basis around which the housing requirement for the new Local Plan is formed. It can be expected that a large proportion of this increase will be in the West Surrey HMA due to its proximity to London, strong rail connections and reputation as being part of the commuter belt and a desirable place to live.

It may be necessary therefore, to consider whether the SHMA should be revised upwards taking into account the increases based on the 2014 projections and whether the housing requirements in the Local Plan should also be revised upwards. It would suggest that the identification of other sites for development should be considered as part of this process, in conjunction with the consideration of the suitability and sustainability of the sites proposed.

5 Year Housing Land Supply

Paragraph 47 of the NPPF states that there is a requirement for Local Planning Authorities (LPA) to:

“Identify and update annually a supply of specific deliverable sites sufficient to provide five years’ worth of housing against their housing requirements with an additional buffer of 5%...where there has been a record of persistent under-delivery of housing, LPA's should increase the buffer to 20%”.

It has been established that Guildford cannot demonstrate a five year supply of deliverable housing land with the benefit of planning permission. Current Council estimates are at best a 2.5 years supply. It has not been able to do so for a number of years and hence the buffer adopted should equate to 20%.

It is therefore clear that without significantly more available land, Guildford cannot expect to be able to show a five year supply in the short term, nor on the basis of the trajectory for the period up to 2022/23.

Green Belt
It is acknowledged that the Local Plan is looking to make difficult decisions regarding the allocation of future development based on a balanced judgment of the need to meet OAN whilst also preserving and protecting the Borough’s natural environment, including the Green Belt.

The evidence base produced by the Council clearly indicates that there is limited capacity in the urban areas of the Borough to meet objectively assessed need (economic or social). Therefore, the Green Belt and ‘Countryside Beyond the Green Belt’ requires review and some release in order to provide capacity to accommodate future growth if the unacceptable effects of a continued failure to meeting housing employment needs are to be minimised. Continued failure to address the issue removes the ability of many to afford or have access to good quality housing, imposes social costs, prices younger people out of the area in particular and has negative consequences for growth and the economy and vitality of the area.

Broadly the Council has sought to evenly distribute development (economic, social and housing) throughout the northern, eastern and western parts of the Borough rather than adopting a sustainable spatial strategy.

It is clear from both the Local Plan and the evidence base that accompanies it, that the Council acknowledge that new sites, including those in Green Belt and Countryside locations, are required in order to adequately plan to meet need. We concur with this view.

Green Belt and Countryside allocations have been made, in part, on the basis of assessments made in the Green Belt and Countryside Study (GBCS). This study sought to review all areas of the Green Belt and Countryside in the Borough and assessed them against the five purposes of the Green Belt and their overall sustainability credentials.

We are generally supportive of the approach taken in this regard, but believe there are some inaccuracies and errors in the methodology applied, which have resulted in some sites being inaccurately assessed and / or over looked, including Onslow Park.

In terms of environmental considerations it is considered that the extent of Green Belt land within the Borough is clearly a constraint to meeting its development requirements and that if the Borough is to plan successfully for a sustainable future, elements of the Green Belt will need to be reviewed and released.

It is also relevant that the majority of the Borough is located within the Green Belt and that other designations, such as AONB, SSSI, SPA and SAC heathland further constrain its ability to meet the needs of the population. These are together part of the high quality environment that is essential in the character and quality of the Borough.

The Green Belt was designated following Acts of Parliament in 1939 and 1944 and at that time there was no ability to predict how the population would grow. Therefore, whilst the principles of the Green Belt should clearly be upheld and its extent defined, in order to plan properly for the long term, the review of Green Belt boundaries is something that is required from time to time in order to meet the needs of the area.

Realism is required that in this case, population growth has surpassed expectations and that the Country, Counties and Borough’s need to provide satisfactory levels of housing and employment opportunities for its population. ‘No change’ is not a viable option and would lead to increasingly serious socio-economic problems for the area.

The proposed releases of land from the Green Belt also need to be placed in context. Approximately 89% (24,000ha) of the Borough is currently Green Belt, and the majority of this can be retained as such. Only a relatively small amount of land release is required to meet objectively assessed need and this should not be viewed as a weakness; rather it should be viewed as an opportunity to address a long standing issue in the Borough enabling a future whereby the most valued / important environmental strengths and green infrastructure of the Borough are protected, whilst also facilitating sustainable development that meets the social, environmental and economic needs of its population in areas which are not so valued / important.

The review of Green Belt and the provision of sufficient land for development in the Plan period, enhances the level of protection afforded to the rest of the Borough including both Green Belt and Countryside Beyond the Green Belt. This will also enable the creation of a better balanced environment that recognizes the quality of the countryside whilst also providing for the Borough’s growing population.
The Green Belt review that is signaled in this Local Plan represents a significant opportunity for the Borough which should be embraced. The need to positively plan for Guildford’s future, to help meet its needs and maintain a sustainable and balanced community within a high quality environment is what the Local Plan is about.

The Green Belt and Countryside Study, (GBCS), February 2013 (Updated) is an evidence based document that has sought to provide a borough-wide assessment of the Green Belt and Countryside, assessing various sites and locations against the purposes of the Green Belt, which in turn enabled potential areas suitable for development to be identified.

4.56 The NPPF itself states that “when reviewing Green Belt boundaries we should take account of the need to promote sustainable patterns of development”. As such one of the components of the original study was to consider the most sustainable patterns of development, hence concentrating on the area around Guildford.

4.57 Volume 1 of the Green Belt and Countryside Study identified the site of Onslow Park as parcel E1. It was considered as being capable of release without compromising the purposes of the Green Belt. It commented in its summary at para 1.16:

“Land parcels C1, C2 and E1 provide opportunities to accommodate appropriate development without significantly compromising the purposes of the Green Belt. PDAs have been identified to the east of Burpham and Merrow, enclosed by the A3, Frithy’s Wood and residential properties on Merrow Lane (C2); contained by Cotts Wood, the railway line and Merrow Common (C1); and continuous with residential properties following Abbot’s Way and Trodd’s Lane near Merrow Downs, within the newly constructed golf course (E1). The PDAs are generally enclosed by woodland and hedgerow treecover, rising topography, principal highways and railway infrastructure. Land parcels C1 and C2 are located directly to the west of Frithy’s and Cott’s Wood Site of Nature Conservation Importance (SNCI). Land parcel C1 is located to the north of Registered Common Land at Merrow Common and to the north west of Clandon Park Registered Park and Gardens. Land parcel E1 is partly located within the Surrey Hills AONB, directly to the north of Merrow Downs Registered Common Land, and to the south of Clandon Park Registered Park and Gardens. Any development within Land parcel E1 would therefore need to carefully consider the landscape and visual effects on the Surrey Hills AONB, and development within this designation should only be brought forward if no other suitable areas outside the AONB can be developed.”

4.58 Although it referenced the AONB as the main constraint in relation to parcel E1 it should be noted that this originally defined parcel boundary extends significantly beyond the area of Onslow Park, which excludes all of the land within the AONB and occupies only that open ground outside the AONB occupied by the recently man made landform of the golf course.

4.59 Hence there is no basis for its exclusion and if it had been assessed on that basis, it would have been identified in a similar manner, alongside Gosden Hill as a sustainable location for growth. The Study commented that these parcels made the least contribution to Green Belt purposes:

“For clarification, the above 20 land parcels were identified for the sustainability assessment within Stage 3 due to them contributing least to the purposes of the Green Belt (scoring 0-2 points) within Stage 2.

4.60 The Study in Volume II concluded:

“Guildford (East): Land Parcel E1, Land at Epsom Road. Land parcel E1 located within the newly constructed golf course and near the Park and Ride on the Epsom Road to the east of Merrow (Guildford, East) provides opportunities for development (1013 residential dwellings) without significantly compromising the purposes of the Green Belt (Score 1). The land parcel would appear continuous with residential properties following Abbot’s Way and Trodd’s Lane near Merrow Downs. The land parcel is partly located within the Surrey Hills AONB and to the north of the AGLV, Merrow Downs Registered Common Land and an SNCI. Clandon Park Registered Park and Gardens is located to the north of the land parcel. Moderate treecover to the east and south contains the land parcel, whilst much of the area remains unconstrained in environmental capacity terms. The Green Belt boundary could be realigned to exclude the newly constructed golf course area bordered by treecover on Merrow Downs and the A25. Land parcel E1 scored 5.57 and was ranked 19th according to current sustainability credentials.”

4.61 The parcel was recommended for release and the proposed new green belt boundary was identified in the Study illustration reproduced below: <see attachments>
However, notwithstanding this, the sustainability appraisal significantly understated the sustainability of the site. This is due to the fact that the appraisal (see para 7.18 of Volume II) measured distances from the centre of the parcel to the relevant facility being considered. These are identified on the plans in Volume IV and it can be seen that parcel E1 was significantly bigger than identified above and extends further south. In the case of parcel E1, the distance was effectively measured from a point significantly further south of the centre of the currently proposed site (or the site identified above) and outside its southern boundary. Hence the actual score is significantly better than predicted for the enlarged parcel considered. An example of this is shown below: <see attachments>

The resulting spatial rationale for the proposed potential releases from the Green Belt were summarised within the Study in Volume 1 (App II) and extract is shown below from the updated Addendum to Volume II App 8 (the revised Potential Development Areas), which clearly shows the rationale for the proposed site E1, Onslow Park, as a sustainable urban extension on a key route into Guildford, well located on the east of the town, complimenting Gosden Hill (C1 and C2) and Blackwell Farm (H1 and H2).

**Employment Land Assessment**

At the current time, one of the most significant weaknesses of the Borough is that housing supply is not meeting the local economy’s needs or demand for people (staff) and that a significant amount of the Borough’s population out commute to work. Recruitment within the Borough suffers as a result.

In addition to this there is a lack of suitable commercial land and the Borough’s existing employment stock is not meeting the needs of local business. This is identified within the evidence base for the Plan.

Therefore, key to improving employment opportunities is ensuring that the correct mix and supply of employment accommodation is available in the Borough to meet with needs. This would help to reduce out commuting, improve sustainability and if balanced with an adequate supply of housing will ensure that the local economy remains strong and becomes more self-sufficient.

The Employment Land Assessment (ELA) undertaken by the Council sought to assess how much employment land is likely to be needed within the Borough in the Plan period. It concludes that there is not enough employment land to meet future growth needs, a conclusion which we agree with. We would question however, the amount of employment land that is required to meet need, which we consider to be underestimated.

The ELA estimates that the Local Plan should look to provide an additional 10.5-20ha of ‘B’ use class floorspace to meet objectively assessed need. It then goes on to state that currently the Borough has the potential to deliver 7.4ha from existing urban and settlement locations, which is not enough to meet need. To put this in context 20ha of land would only equate to 1.27ha per annum over the plan period.

In this regard the conclusions of the Local Business Survey are helpful as this states that more than 50% of the firms which responded to this survey expected their floor space requirements to increase over the next 10 years, with 66% stating that they would not be able to expand at their current location.

We also feel that the ELA has artificially reduced the requirement for additional employment floorspace. This is odd considering that there has been no notable commercial development since 2008, yet industries within the Borough are growing. For example Allianz Insurance has grown from 700 to over 1,100 employees in the last few years and it is clear that other companies would like to grow if floor space allowed (based on the findings of the Local Business Survey highlighted above). This artificial reduction is compounded by the assumption that working from home will increase, which is likely to be the case, yet demand for B1(a) accommodation remains a constant and supply is diminishing with the loss of offices to residential use, and homeworking for B2, B8 and B1(c) industries is not practical. Therefore, this conclusion seems rather unrealistic.

There is also an assumption in the document that unimplemented permissions will create the additional land required for development, as will existing vacant accommodation. However, this is overly simplistic and a dangerous strategy to rely on. Some of the vacant accommodation will be lost to other uses, and indeed may be more suitable to other uses, and the amount of vacant accommodation in the Borough is not a constant. Such a policy does not therefore allow for growth and also does not take into consideration that some of the vacant, outworn accommodation is simply no longer desirable for
commercial purposes and therefore is better placed for redevelopment to other uses, some of which will be under permitted development rights. There is also limited ability for existing employment areas in the Borough to intensify. The majority of the Borough’s stock comprises of developed estates with little or no expansion capacity.

It is important that the Local Plan and the allocations within it are based on a progressive evidence base that seeks to encourage new business as well as supporting existing ones.

It is also relevant to highlight that the allocations in the 2003 Local Plan were insufficient and did not meet need. This document allocated 21.7ha of land for employment purposes. However, the 20ha recommended in the Assessment is essentially the same as this insufficient allocation;

therefore it would seem that the Council were at risk of repeating past mistakes in under-allocating for employment need. 20ha also breaks down to a mere 0.8ha of land a year (over the 25 year period considered in the Assessment) which equates to a very small level of commercial floor space. This is clearly not enough to meet with need.

It is clear on the basis of the very real need identified for commercial development that there is a need to identify suitable sites outside of the main urban areas and settlement boundaries, which the Local Plan seeks to do. It is important that this is integrated within largescale new housing developments as sustainable growth across the Borough and balanced communities based on mixed use principles. It is also essential that an adequate amount of land is allocated, as too little land will stagnate the Borough’s economic growth and development is needed to attract growth and jobs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

6.0 CONCLUSIONS

This document forms a written Planning Submission, prepared on behalf of The Trustees of the Clandon Estate in relation to the Draft Local Plan: Strategy and Sites (herein referred to as “the DLP”).

The submission proposes the allocation of land known as ‘Onslow Park’ lying to the south of the A25, Epsom Road, Guildford for a sustainable urban extension. The proposed allocation would result in a mixed use, residential led development that would provide a mix of housing, education campus (including primary and secondary school), employment (B1a office), medical centre, small convenience store, recreation and community facilities, traveller pitches, public open space and landscaping. In order to facilitate the allocation, it is also proposed that the site is excluded from the Green Belt.

The initial masterplan, which illustrates the key principles underpinning the vision and how the proposed garden village might look, is set out in the accompanying ‘Onslow Park Vision’ document.
Whilst we may all question the need for development within the area, the Lord Onslow and the Trustees of the Clandon Estate recognize that the needs of the community need to be met and that any policies and proposals included within the Plan should contribute positively to sustainable development.

This means meeting the needs of the environment, the economy and the community and must provide enhanced access to a range of homes, community facilities, jobs and open spaces to as many people as possible.

Hence we consider that the major part of the development the Borough needs should be well related to the urban area of Guildford as its primary town and which provides the widest range of facilities for the people of the Borough.

Only by locating new development and new facilities within or on the edge of the main centre of population can development be truly sustainable. Here, it can maximize access to the homes, jobs and community facilities proposed and enhance the lives of as many people as possible. It is the only way to provide real choice in modes of transport, maximizing access to walking, cycling and modes of transport other than the car, including park and ride and good quality rail services.

The proposals for the allocation of Onslow Park recognize the potential for a sustainable new community to be formed as an extension to the town that benefits the adjoining community.

The proposals would provide for new recreational and open space facilities, including a new cricket pavilion and pitch, a new secondary school, healthcare provision, employment, community facilities and a balanced mix of housing, including family housing, retirement accommodation and affordable and starter homes.

All would be set within a landscaped community that provides pedestrian and cycle access to the downs at Newlands Corner and to the countryside beyond.

It is considered that the land at Onslow Park should be identified in the Local Plan for the following reasons:

- The site is in a sustainable location and recognizes the role of Guildford as the principal town within the Borough, with good access to public transport and a wide range of cultural, social, retail, leisure and other facilities and services
- The allocation would be compatible with a sustainable spatial strategy channeling growth to the principal town in the Borough to support its growth and achieve sustainable patterns of development that reduce the need to travel;
- The proposed uses would complement and be compatible with adjacent land uses, enhancing access to recreational, educational and other facilities for the existing and proposed community
- The proposed development would work with and support other nearby development that is proposed for inclusion in the Local Plan
- The proposed development would also support the key infrastructure that supports the growth of Guildford and its economic prosperity, including new pedestrian and cycle facilities, the proposed Merrow railway station, schools and other facilities
- The development proposed includes a mix of uses that together support a sustainable new community and help support existing community facilities within the area, providing new housing, employment, public open space, community facilities and a high quality, landscaped environment
- The provision of new employment space and a potential new hotel, supports the economy of the Borough and helps balance the needs of the community, local tourism and local business
- The proposals enhance recreation and provide new recreational routes (pedestrian, cycle and horse) linking Merrow and the North Downs
- The site is contained and forms a natural urban extension that is well defined and presents a strong urban edge, which will ensure that their development will not harm the purpose or openness of the wider Green Belt
- The developable area of the site as identified within the illustrative masterplan is not constrained by any other sensitive planning designations
- The site is not subject to significant infrastructure or environmental constraint and is deliverable within the first period of the plan, providing between 150-200 homes each year and being complete within between 5 and 7 years
- The proposals maintain a landscaped buffer with existing housing, so protecting the amenities of the adjoining properties and providing enhanced recreational routes, through new footpaths and open space
- Enhances nature conservation through new meadow, woodland planting and associated habitats and protects existing designated sites. Part of the site is within the Special Protection Area and appropriate SANG delivery would be discussed with the Council and could include on or off site delivery or any necessary payments to assist existing identified projects.
- Provides for low carbon, sustainable living, tackling the effects of climate change.
- The site is not subject to access, flood risk, nature conservation or other overriding constraints.

The proposals are therefore commended to the Borough Council as part of the assessment of the Submission Local Plan.

**Sustainability Appraisal**

Given the failings in the assessment of the land forming part of these representations in the Sustainability Appraisal that accompanied the Green Belt and Countryside Study, we would question the sustainability appraisal that accompanies the Plan. This has not adequately considered the most sustainable spatial strategy for the Borough in line with the NPPF which would focus growth on sustainable locations within and urban extensions around Guildford first.

It is essential for the sustainability appraisal to be recast using a hierarchy approach to the definition of settlements and the resulting sustainability of sites identified and ranked according to accessibility to goods and services and to the main centres of population. This should also take account of the need to tackle the effects of climate changes and minimise the need to travel, while maximising the opportunities for people to use walking, cycling and means of transport other than the car.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**3.0 DELIVERY AND SUITABILITY**

**Overview**

The development of Onslow Park is possible within the early part of the Local Plan period, ensuring a meaningful contribution to supply within the initial years of the required housing trajectory, when starts on site projected within the Plan are lower than they might otherwise be and are below the level required to meet OAN.

The relationship of supply with the housing trajectory is considered further in the next section.

The potential for the early delivery of the proposed development is important also for the social and economic infrastructure proposed. Early delivery of Onslow Park within the plan period would result in improved access to open space, recreational facilities, healthcare facilities and employment opportunities for existing local residents.

**Availability**
This submission confirms the availability of the land. The landowners, the Trustees of The Clandon Estate, for the Earl of Onslow, and the existing golf course operator are in agreement that the land is available and would be developed as proposed, should the site be identified in the Local Plan process.

There are no other owners or occupiers of the land. Both parties are committed to delivering the site and substantially commencing development within the first five year period of the DLP.

Lord Onslow and the Trustees also propose a continuing, long term involvement in the management of Onslow Park. It is proposed that all common parts, including community spaces and a substantial part of the housing stock proposed, would be retained by the Estate and managed for future generations. The aim in large part, is to help create a sense of place and belonging for the community with a commitment to the long term management and quality of the environment, infrastructure and facilities.

**Construction**

It is proposed that the development would commence within the first 5 year period of the Local Plan and would be likely to contribute up to 200 homes each year over a 5 year period. It should be noted that this corresponds to the period of least supply within the Local Plan trajectory, which is below OAN for the first noted that this corresponds to the period of least supply within the Local Plan trajectory, which is below OAN5 years of the Plan from the date of likely adoption.

As many of the homes will be either affordable homes or private rented stock, the development can proceed at a faster rate than may often be considered if constructed through more traditional methods which are dependent on the rate of market sale.

It is also proposed to adopt a contractor led approach to the delivery of such housing, using modern methods of site fabrication which facilitates a quicker delivery on site.

The provision of a proportion of serviced self-build plots offers a further delivery route for part of the supply.

**Sustainable Design and Construction**

The ability to use off site construction techniques also means that the sustainability of the design and performance of the homes and buildings provided will meet the highest specification and result in sustainable, low carbon living that reduces energy and resource demands, delivers low fuel bills and running costs for residents and a low carbon footprint, tackling the effects of climate change.

**Infrastructure**

The site is not dependent on significant up front infrastructure requirements that would prevent or slow housing delivery.

A suitable vehicular access exists from the existing park and ride and golf course junction onto the A25 Epsom Road and this would be utilized as the principal site access. A secondary access and egress is proposed to supplement this also onto the A25. This submission is supported by a Transport Feasibility Study 2016 that sets out the proposed accessibility and transport implications of the development proposed, in conjunction with the development options identified in the Submission Local Plan and Infrastructure Delivery Plan.

While some localized off-site improvements are required as a result of existing projected growth on the highway network, these are already identified in the IDP as part of the Local Plan proposals and would be supported, where necessary by additional contributions from the development of Onslow Park under both CIL and s106 obligations.

The site is well located as an extension of the existing urban area to access a full range of goods and services and benefits from easy walking, cycling and bus services. Aside from minor, localized improvements to facilitate enhanced connections between the site and the surrounding footpath and cycle network, there are not wider requirements that would add to the commitments in the Local Plan.
The expansion of the park and ride within the site to double its capacity significantly enhances the ability of the site to remove existing car journeys entering Guildford from the A25 to the east and offsets a significant proportion of vehicle movements.

The provision of additional and enhanced community facilities as part of the garden village proposals increases the level and quality of services available to the existing community within Guildford in an accessible and inclusive manner. This includes the sports hub, the primary and secondary schools, community facilities and community parkland, all within easy reach of the existing urban area, and extending to the Downs beyond.

4.0 JUSTIFICATION

In general the overall approach identified within the Local Plan is supported, that in order to meet the needs of the Borough and its residents, a range of housing, employment and other facilities are required over the period of the Plan and that these must be provided for in line with those needs in order to maintain and provide for a prosperous, vibrant and growing economy with access to high quality housing and a full range of services for all members of the community. At the same time, this must be balanced with the maintenance and enhancement of the built and natural environment of the Borough.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy D1: Making better places

5.10 We agree that high quality design should be sought in all new developments. We are supportive of the good design principles outlined in the policy outlining that all developments will:

- promote and reinforce local distinctiveness to create a sense of place. Innovative architecture will be encouraged and supported in the appropriate context;
- be expected to have regard to and perform well against Building for Life criteria;
- be expected to use art and materials of a nature appropriate to their setting;
- take account of the context in which they are sited.

5.11 We also agree that in schemes of 20 or more dwellings or 0.5 hectares or more developments should make provision for a mix of uses, and the facilities and services needed by the new community. We agree that this should include places for communities to meet and interact, such as play and recreation and other public spaces.

5.12 We agree that new development should be designed to facilitate and promote walking and cycling by providing a high quality environment for pedestrians, convenient and safe routes through the development and to nearby areas for cyclists and that where possible, residential development should allow short walking distances to amenities.

5.13 We are in agreement that priority to non-car based modes of transport should be given, and we wish to emphasise that park and ride facilities make an important contribution to non-car modes of transport into Guildford centre. This is the case for both neighbouring residents who can walk/cycle to the facilities, as well as those from further afield who drive and
park, who would otherwise drive into the centre of Guildford. Park and Ride facilities provide an important and significant reduction in automobile traffic, congestion, fumes and pollution in Guildford and thus enhance the environmental quality of Guildford town centre.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E1 Sustainable Employment

We are largely supportive of this policy which seeks to allocate land for employment floor space across the Borough, but this is not enough and reference needs to be made to early delivery due to the backlog of economic need, owing to lack of allocations/releases in recent years. A greater choice and diversity of sites is required, including those in mixed use major allocations such as that proposed at Onslow Park, which can provide a new business hub as part of a sustainable new community as part of an urban extension on a key transport route into Guildford.

Policy H1 Homes For All

Generally, we support the flexible approach that this policy seeks to adopt, particularly with regard to housing mix and density which allow for greater consideration to be given to the characteristics and location of an application site. These aspects of this policy will help to ensure that new development complements existing built and natural environments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Policy H2 Affordable Homes

It is acknowledged that affordable housing in the Borough is much needed and this is supported, however an important issue when considering affordability is that housing should be provided to meet with need (the objectively assessed need) which does not solely focus on affordable housing and should be open to the consideration of arrange of tenures, consistent with Government policy. Local authorities need to ensure that sufficient market housing is provided as this will mean that more people can own their own home and house prices in general will be lowered. If affordable housing thresholds are set too high it will preclude valuable sites from coming forward, which will perpetuate the issue of a lack of housing in the Borough, thus continuing to drive prices high on the basis that supply does not meet demand or need.

The characteristics of Guildford also need to be considered. It is a Borough where 85% of the dwelling stock is owner occupied; therefore whilst there is an affordable housing need this needs to be balanced with its population’s desire to own their own home and to work with the provision of private rented, discounted private rented and other models of housing delivery.

The policy should not require the provision of land for affordable homes at nil value. This is an inappropriate and unnecessary intervention in the market and will affect viability and hence delivery of homes. The key policy requirement is the provision of an increased level of housing to meet OAN and to meet the requirements of affordable homes, starter homes and private rented stock. There are a variety of models available for the supply of housing, including discounted market rent and affordable rents and for starter homes and other initiatives.

We do not believe that specialist housing should contribute towards affordable housing provision. Such accommodation (care homes / students halls etc) tend to be provided by specialist providers who would not be attracted to the Borough if they were required to provide onerous affordable housing contributions yet they make a very important contribution to the diversity of housing stock in the Borough and help ensure that all local needs are met.

We do however support that affordable housing provision is subject to viability. Though, by artificially and unnecessarily lowering the thresholds of provision to levels that realistically will not be achievable the Council are developing a policy which means that viability will be a standard practice for all development; whereas it should only apply in some cases.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy 11 ‘Infrastructure and Delivery’

5.19 It is acknowledged and accepted that development should provide for the infrastructure requirements that arise from it. Priority should be given to those sites that can support the provision of infrastructure in key urban locations, where they benefit most people.

5.20 It is of significant concern that the development of the housing needed and the related employment and other facilities is in effect held back in terms of the housing trajectory, by the rate at which infrastructure can be delivered. We are also concerned that this may not be effective given the size of the funding gap that has been identified in the background to the Local Plan and will in effect, prevent delivery of the Local Plan’s housing and other commitments.

5.21 While the size of the funding gap is a concern and may undermine the effectiveness and soundness of the Local Plan, it is also the case that the reliance on CIL for part of this, detaches delivery of infrastructure from the delivery of housing. In effect, housing would be consented under the terms of CIL and a resultant payment made, without there being a commitment to the timing and delivery of the related infrastructure. While there is a clear intention and link, no guarantee exists and it is not considered possible to delay permission or condition this on the actions of a third party providing the relevant infrastructure. This is an issue for the plan to resolve.

5.22 Ultimately, sites should be identified that focus the support for and investment in essential infrastructure within and around the urban area of Guildford. This maximises the potential that the infrastructure will come forward, will benefit the most people within the Borough and any funding gaps are minimised.

5.23 Contributions should clearly only be sought where they are (i) necessary to make a development acceptable in planning terms; (ii) directly related to the development; and (iii) fairly and reasonably related in scale and kind to the development proposed. In this respect they have to be compliant with the CIL regulations.

5.24 Consideration also needs to be had to the viability of providing for infrastructure, which needs to be weighed against the very real need for housing and employment in the Borough. To this end any future policy documents in relation to infrastructure should have full consideration of paragraph 173 of the NPPF which states that that sites and the scale of development identified in a plan should not be subject to such a scale of obligations and policy burdens where their ability to be developed viably is threatened. This also relates to affordable housing requirements sought from allocations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy I3: Sustainable transport for new developments

5.25 We agree that new developments should provide the best sustainable travel options possible, and we consider that this is necessary for both sustainable development and prosperity. Development in unsustainable locations should be avoided and where unavoidable, should be required to provide for the essential infrastructure requirements needed to support the development.

5.26 The location of development is key in this regard and the commitment noted earlier in these representations, should be towards a sustainable spatial strategy that focuses development and growth to Guildford as the key town within the Borough and the location that maximises the benefit arising from investment in services and infrastructure and optimises the use of pedestrian, cycle and public transport modes.

5.27 We support the fact the policy outlines Park and Ride facilities as a form of sustainable travel, and that new development should secure appropriate improvements to public and community transport, including infrastructure and park and ride requirements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/18698  Respondent: 15145377 / WYG (S Fidgett)  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P1: Surrey Hills Area of Outstanding Natural Beauty (AONB)

5.14 We are supportive of the policy that the designation of AONB does not preclude specific types of development and that proposals will be assessed on their individual merits. We have concern over the continued reliance on the AGLV given that policy has moved towards landscape characterisation and assessment rather than local level designations. The AGLV in particular should not prevent development that is otherwise sustainable and in the interests of the Local Plan. In particular the land at Onslow Park should be removed from the AGLV since it was remodelled as part of the golf course redevelopment in recent years and is isolated from other parts of the designation with clear boundaries to the AONB.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Spatial Strategy and Sustainable Development

We agree with the strategy that directs development to those sites that are within and adjoin Guildford as the principal settlement within the Borough and which is clearly the most sustainable location for development. The proposed allocations of Gosden Hill (A25) and Blackwell Farm (A26) are recognized in principle as sustainable locations for growth, being well related to the main urban population and all of the services, infrastructure and facilities that Guildford provides and subject to consideration of detailed issues relating to each of these proposed areas. While we offer no view on the details of these allocations, the principle of sustainable urban extensions is clearly established in the rationale for these sites.

This strategy helps support a wide range of services and facilities within the town, including comprehensive healthcare, social services, education, retail and leisure, employment and public transport. In focusing development in the principal town, the maximum benefit is derived, providing access within easy reach of the major part of the Borough’s population.

4.4.1 However, this strategy is not clearly or expressly stated in the rationale within the Local Plan and the strategy is not properly considered further in relation to the other opportunities to achieve similar sustainable urban extensions, such as Onslow Park.

4.4.2 Were this to be identified alongside these two proposed allocations, it would be entirely complimentary and consistent with their identification. Indeed it would add a further element to the sustainable spatial strategy, in supporting the funding of infrastructure necessary to support the wider aims of the Guildford urban area, which less sustainable, disconnected locations would not.

The Spatial Vision of the proposed Local Plan is set out on page 19 and commits as its starting point to meet the identified growth needs of the Borough. This is supported.

However, neither this Spatial Vision, nor the subsequent Core Themes, appear to contain any overarching spatial strategy that recognizes the role of Guildford as the principal town within the Borough and prioritizes this as the most sustainable location for growth. The only real reference is in retail terms.

As such the Spatial Vision and resulting allocations are inconsistent with national planning policy and are neither sound, effective nor properly justified.

Paragraph 6 of the NPPF comments on the role of the planning system:

“The purpose of the planning system is to contribute to the achievement of sustainable development. The policies in paragraphs 18 to 219, taken as a whole, constitute the Government’s view of what sustainable development in England means in practice for the planning system.”

Paragraph 17 of the NPPF sets out 12 core principles of the plan making process. This includes the principle to:

“actively manage patterns of growth to make the fullest possible use of public transport, walking and cycling, and focus significant development in locations which are or can be made sustainable”

We are concerned that this has not been fully considered or reflected in the spatial strategy of the Local Plan. As such, neither is it reflected in the proposed allocations made within the Submission Local Plan. This is a clear omission.

Paragraph 30 of the NPPF further elaborates on this, commenting:

“Encouragement should be given to solutions which support reductions in greenhouse gas emissions and reduce congestion. In preparing Local Plans, local planning authorities should therefore support a pattern of development which, where reasonable to do so, facilitates the use of sustainable modes of transport.”

This is clearly relevant to the spatial strategy of the Local Plan, which should seek to accommodate growth in and around those locations that are most sustainable and reduce the need to travel and optimize the use of pedestrian, cycle and public transport.
transport. This essentially requires a settlement hierarchy and as a matter of principle, the identification of growth in accordance with these sustainability aims.

This is further reinforced in paragraph 34 and 35 of the NPPF:

“34. Plans and decisions should ensure developments that generate significant movement are located where the need to travel will be minimised and the use of sustainable transport modes can be maximised. However this needs to take account of policies set out elsewhere in this Framework, particularly in rural areas.

35. Plans should protect and exploit opportunities for the use of sustainable transport modes for the movement of goods or people. Therefore, developments should be located and designed where practical to

- accommodate the efficient delivery of goods and supplies;
- give priority to pedestrian and cycle movements, and have access to high quality public transport facilities;
- create safe and secure layouts which minimise conflicts between traffic and cyclists or pedestrians, avoiding street clutter and where appropriate establishing home zones;
- incorporate facilities for charging plug-in and other ultra-low emission vehicles; and
- consider the needs of people with disabilities by all modes of transport.

The Local Plan should encourage development in and adjoining the Urban Area of Guildford first. It may also be relevant to consider the next settlements in the hierarchy at Ash and Tongham and then the higher order villages. This should be according to a hierarchy that places Guildford at the top, as the highest order centre, the most sustainable centre and the preferred location for sustainable growth.

This was reflected in the initial stages of the Countryside and Green Belt Study which commented:

“It was originally considered that land parcels adjoining the urban areas of Guildford, Ash and Tongham may be more sustainable in terms of potential development (refer to Volume I, Section 6).”

Notwithstanding this view, the parameters of this study were though later refined by the Council to reflect their wish to consider villages and new settlement proposals (Wisley) also.

Paragraph 4.1.6 adopts a partial if somewhat unclear step in this direction, prioritizing previously developed land in Guildford town centre, urban areas, inset villages and Green Belt villages. It confuses however, the use of previously developed land (a policy that is also supported) with a sustainable spatial strategy, which is about access to housing, goods and services, reducing the need to travel and tackling the effects of climate change. No justification is given for the approach.

The paragraph and hence the Plan’s strategy appears to be at odds with the policies of the NPPF in having no consistent regard for sustainability and the spatial strategy this requires.

Indeed paragraph 4.1.8 incorrectly suggests these are all sustainable locations. What they are in essence, is simply locations that are within existing settlements but which have no regard for the relative sustainability as defined by Government or to other locations on the edge of Guildford that may be more sustainable.

Paragraph 4.1.8 therefore, fails to deal adequately or at all with sustainability or spatial prioritization in the release of land in the locations identified. It has no regard to the accessibility of the location or the degree to which there are real and genuine choices in the mode of travel and true accessibility to a wide range of goods and services. This would place urban extensions to Guildford and the other main lower order settlements above other remote locations away from established settlements and around villages. This is also at odds with the clear thrust of the NPPF.

It should therefore, be made clear that the most sustainable locations for growth are in and adjoining the urban area of Guildford. Onslow Park should, as such, be identified as a sustainable location for growth and identified as an allocation as part of a sustainable spatial strategy, in accordance with national policy.

Policy S2 Borough Wide Strategy and Housing Trajectory
Policy S2 commits to the provision of new homes and employment space within the Borough over the Plan period. The level of growth identified seeks to meet objectively assessed need (OAN) and hence meet the needs of the community for homes and jobs. This is supported.

The Submission Local Plan makes provision for the delivery of 13,860 new homes over the plan period (2013-2033). This equates to 693 dwellings per annum which matches the identified housing need through the SHMA based on 2012 projections. The draft Local Plan ties the proposed trajectory however, to the delivery of strategic sites, the rate of which is limited by infrastructure provision:

“The delivery of new homes is expected to increase over the plan period, reflective of timescales associated with delivery of strategic sites”.

However, as a result the trajectory identified within the policy (shown below) provides for a deficient level of housing within the initial 5 years of the Local Plan period post adoption an up to 2022/23, compounding the cumulative shortfall to date. The trajectory is well below the level required to meet OAN of 693 homes each year up until that point, based on the SHMA.

This shows that there is proposed to be an increasing level of delivery over time as the plan progresses through the plan period. On this basis, to ensure the minimum housing requirements of 693 dwellings per annum are to be delivered, the Plan seeks to counter a shortfall in the first 6 years of the Plan period with an increased trajectory in the final 5 years of the Plan period.

As the net completions table also shows, the first two years of the plan period 2013/14 and 2014/15 have delivered significantly fewer than 693 dwellings per annum. The previous interim housing figure of 322 dwellings per annum agreed on May 2012 did not take account of up to date assessments of housing need and therefore was not NPPF compliant. Reliance on this figure has meant that the Borough has under-delivered even at this level on housing needs over the past five years:

<table>
<thead>
<tr>
<th>Year</th>
<th>Completions (net)</th>
</tr>
</thead>
<tbody>
<tr>
<td>2010/11</td>
<td>190</td>
</tr>
<tr>
<td>2011/12</td>
<td>262</td>

<td>234</td>
</tr>
<tr>
<td>2013/14</td>
<td>137</td>
</tr>
<tr>
<td>2014/15</td>
<td>242</td>
</tr>
</tbody>
</table>

Within the Plan period in the last 2 known years 2013-15 this has resulted in a shortfall well below the 693 required each year, being little more than around 6 months supply in the last 2 years, with no identified strategy or basis to catch up until
the final 5 year period to 2033. This is considered simply too late and it must be recognized that this continues the negative impacts of inadequate access to good quality homes to a degree that is simply not justified.

Important to the consideration of the robustness of the Local Plan is the requirement within the NPPF to plan positively to meet the objectively assessed needs of the area and to achieve sustainable development. There is now a positive approach to growth as stated within paragraphs 17 and 28 of the NPPF.

It is important to recognize that the housing needs identified within the Borough represent the needs of the community, if there is to be sufficient housing to meet the needs of the population, including starter homes, family housing, retirement and including specialist forms of housing and affordable homes. If these needs are not met then the community and parts of the community in particular, are denied access to good quality housing at a price they can afford, which in turn gives rise to unacceptable social and economic impacts for the Borough.

As the housing completions above show, Guildford has not only been under-delivering against the real need but there has also been consistent under-delivery against the interim housing target and no planned increase above the level needed until close to 2033.

The most recently produced Annual Monitoring Report (AMR), published in October 2015 for the period 2014/2015 showed that net completions of dwellings in the borough for this period was 242 and that the majority of homes completed in this period are on sites of under 20 homes. As the AMR advises:

“the number of new homes completed this year (2014/15) is still lower than required to meet our objectively assessed need…contributes to a growing deficit of new homes”.

The recommendation within the AMR following this states that:

“housing provision is currently restricted by the lack of available and deliverable development land in the borough….delivery rate is only likely to increase when larger areas of land are suitable and available for development”.

As such, there is a clear need for an immediate increase in the level of supply being achieved.

This required increase in supply should focus on available sites that are not unduly constrained in terms of their ability to come forward for development and that are located within the most sustainable locations. The main reason given for the failure to increase supply to the required level in the early years is the inability to deal with the infrastructure requirements that have been identified to accompany growth. The plan essentially adopts a supply approach predicated on the prior or contemporaneous delivery of supporting infrastructure.

This further supports the clear and pressing need for the identification of Onslow Park, given its ability to contribute immediately to the supply of homes in the most sustainable location and in accordance with a clear and sustainable spatial strategy.

Policy S2 ‘Borough Wide Strategy’

As detailed in Section 2 of our Statement we do not believe that the correct housing target has been adopted, and have serious concerns that the Local Plan does not provide for the Borough’s objectively assessed need in terms of the correct housing trajectory, meaning the Plan is deficient in supply for the major part of the Plan period. It is clear from the draft SHMA that the minimum housing number that should be adopted is 693dpa, though in reality a higher figure would make a real difference to meeting affordable housing need. It is also of concern that no specific need has been identified as being met for specialist forms of housing, such as retirement housing.

We do not agree with the development allocations in Table 1 – ‘Delivery between 2015 and 2031’. We believe that a new garden village and Sustainable Urban Extension to Guildford at Onslow Park should be included, in line with this submission. This would deliver approximately 1000 new market and affordable homes and would make a significant contribution to housing supply in the first part of the Plan period, recognizing the shortfall noted above.

Attached documents:
OBJECTIONS TO THE LOCAL PLAN

With reference Policy A44 (Land west of Winds Ridge and Send Hill) in the Guildford Borough Proposed Submission Local Plan: strategy and sites June 2016

I object to the inclusion of this site because it is NEW and was not included in the regulation 18 draft and has NOT been consulted upon previously.

I object because its development for housing is inappropriate owing to its permanent Green Belt status. The Green Belt was originally proposed in 1935 to ensure space between villages and not turn into an urban sprawl. No one has the right to take this away from us - once its gone its gone for ever which will have a huge impact for our future generations.

I object on Health and Safety grounds since the subsoil of the existing landfill site contains documented unsafe landfill waste which is currently vented and monitored. Any disturbance of this waste for housing development gives rise to environmental risks (methane gas, asbestos etc). When purchasing our home in 2010 our Environmental Survey reported issues with regards to the landfill site - we experienced lengthy delays whilst consulting with Guildford Borough Council over this matter.

I object to the siting of the development because the narrow width single track country road (with no pavement) provides insufficient access, particularly with the expected increase in traffic. The road already gets blocked due to the school at the end of the road twice a day.

I object to the adverse impact on the tranquillity of the recently enlarged cemetery.

I object to the loss of wildlife habitat as the site is home to many species of bird, reptile and insect.

I object to the adverse impact on the character of the village as a desirable, pleasant place to live. The proposal to build over 400 houses will have a huge impact on the local schools, doctors and transport.

I wish my objections to be brought to the attention of the Government's Planning Inspector.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object because Green Belt land does not need to be built over. Half of the new homes could be built on brownfield sites.

I object to the changes to Policy A42 at Clockbarn in Tannery Lane because: -

The increase of 33% in the number of homes is too great.
The previous objections by local people have been ignored.
Traffic problems in Tannery Lane will be considerably worsened.
The erosion of the Green Belt will be unacceptably increased.
Flooding risk, already bad, will become worse.
There will be a negative impact on the countryside views from the River Wey Navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the changes to Policy A43 at Garlick’s Arch because: -

The previous objections by local people have been ignored.
It is beautiful Green Belt and no “exceptional circumstances” exist.
It will join up Ripley and Send and defeat the key purpose of the Green Belt
The lane is contaminated with lead shot.
It will generate excessive traffic blocking up the local roads of Send and Ripley.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Send Hill is obviously a narrow single track lane, having managed to retain it's peaceful, beautiful countryside, currently enjoyed by all residents and dog walkers from other areas. For this reason it has permanent Green Belt status.

It is totally inappropriate to increase the traffic flow. The junction where it meets Potters Lane is very dangerous and residents have suffered accidents as a result of being unable to see any oncoming traffic. I rely on sound alone when pulling out and have narrowly avoided head on collisions in the past and therefore also make my objection on the grounds of safely.

Send's infrastructure cannot cope with the current population, the problems with doctor's appointments, school places and traffic are consistent. The Council would be well advised to ensure that it provides acceptable standards of living for the current residents before irresponsibly placing further stress on the living conditions of it's current council tax payers.

Please confirm receipt of this letter and advise the Council's statutory requirements regarding proposed planning consultations.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **Inadequate consideration given to Infrastructure Delivery.** I reaffirm my objections to the revised plan for the Former Wisley Airfield/Three Farms Meadow site at Ockham. Despite having been previously unanimously rejected by Guildford Borough Council planners, it has not only been included, but enlarged on the new draft plan. Inadequate consideration is being given to supporting services, including schools, medical centres, public transport including rail capacity and railway station parking, which are already overloading. Housing growth needs to be organic and sustainable in the context of other resources; this development is not. The viability of the proposal also relies upon the Road Investment Strategy by the UK Highways Agency to develop the A3/M25 interchange. These have not been finalised, and do not consider the additional burden created by the Wisley Airfield, Garlick’s Arch and Gosden Hill developments which are explicitly designed to empty their traffic burden onto that interchange. Four thousand or more extra cars using this intersection every morning and evening will cause chaos. The natural consequence of this overloading will be the overspill onto trunk roads and minor lanes, which not only are not designed for such heavy use. There will be increased risk to vulnerable road users such as pedestrians, riders and cyclists on crowded routes with no footway and few cycle tracks.

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **Lack of protection for the Green Belt and the Historic Environment.** I object to the plan Ripley to be taken out of the Green Belt and designated as a “District Centre”. Further, the boundary for the Primary Shopping Area is to be contiguous with the the boundary of Ripley itself, opening the door to commercial development outside of the High Street. This this is being done without any prior consultation and without following proper procedure, which is unacceptable. It does not consider the current paucity of parking, yet proposes to add to the burden. It also increases the traffic burden on the interchange with Newark lane and Rose Lane in the village centre, identified choke points. It also threatens to change the nature of Ripley as an Historic Environment whose important presence on the Portsmouth Road has resulted in a significant number of Listed properties on the High Street and wider. It would be more suitable to designate Ripley as a rural Local Centre and to protect its heritage nature. I also understand that the previous plan for the Burnt Common site which was allocated for light industrial, general industrial and warehousing and 100 houses has been replaced with a new proposal, Garlick's Arch. This includes increased light and general industrial units and 400 houses, as well as a new 4 way on/off junction for the A3 to support Gosden Hill and Wisley Airfield as well as developments in the East of the borough. The site that is earmarked for this development has permanent green belt protection. There is no proven need for additional housing or industrial development in this area and contributes to an entirely disproportionate building burden on this area. The open character of Ockham with its Commons and RHS Wisley, Ripley with its historic Village Green and the Wey navigations, and Send Marsh, all make important contributions to the Green Belt and should be included rather than being inset. I strongly disagree that exceptional circumstances exist to justify the amendment of the Green Belt boundaries in this area against national planning policy. On the contrary, the development of the sites at Garlicks Arch and Gosden Hill Farm, combined with proposed limited infilling in West Clandon would result in the coalescence of urban sprawl from Guildford all the way to the M25.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I live in Ripley and I strongly object to many parts of the new draft local plan for Guildford Borough.

1. **The draft plan places a massively disproportionate and unfair development burden on the portions of the Borough closest to London.** The plan indicates 693 new homes are required per year, and 13,860 new homes by 2033. Yet the Former Wisley Airfield/Three Farms Meadow site at Ockham alone is planned to have 2,200 properties. The Garlick’s Arch proposal adds another 400 houses. The Gosden Hill Farm plan for West Clandon adds another 2,200 houses. Together, these projects represent over 33% of the requirement for the entire borough for the next 16 years, and this does not even include the smaller developments. This is entirely disproportionate, particularly to the Lovelace Ward. The Upshott Lane project adds another 400 houses, in the Borough of Woking but only minutes away from the developments above. It does not appear coincidental that the portions of these Boroughs closest to London are scheduled for overdevelopment to the benefit of areas further away. The draft plan explicitly states that GBC intend to build more new homes than is in the Policy, merely to provide ‘flexibility’. This is unacceptable and unnecessary.

I object most strongly lo the planning of 1100 houses in Normandy between Westwood Lane and Flexford - you are creating a town within a village on Green Belt land with no thought to the situation of:

1 Traffic on the Guildford Road and up to the Hogs Back via a one way access to the railway bridge in Westwood lane

2 Doubling the population of the village.

3 We already have a very large Village Hall - so why yet another one.

4 Gypsy facilities - we already have more than our quota in Normandy- this should not go ahead.

5 A secondary school - other secondary schools in the area are under subscribed so not required.

Most important GREEN BELT was created to maintain the countryside - why negate it?

Is it a sop to get planning permission?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the 2016 draft local plan.
Specifically:-
I object to the in-setting of Ripley, Send, Clandon and Wisley from the Green Belt.
I object to any erosion of the Green Belt in Surrey.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Inadequate consideration given to Infrastructure Delivery. I reaffirm my objections to the revised plan for the Former Wisley Airfield/Three Farms Meadow site at Ockham. Despite having been previously unanimously rejected by Guildford Borough Council planners, it has not only been included, but enlarged on the new draft plan. Inadequate consideration is being given to supporting services, including schools, medical centres, public transport including rail capacity and railway station parking, which are already overloading. Housing growth needs to be organic and sustainable in the context of other resources; this development is not. The viability of the proposal also relies upon the Road Investment Strategy by the UK Highways Agency to develop the A3/M25 interchange. These have not been finalised, and do not consider the additional burden created by the Wisley Airfield, Garlick’s Arch and Gosden Hill developments which are explicitly designed to empty their traffic burden onto that interchange. Four thousand or more extra cars using this intersection every morning and evening will cause chaos. The natural consequence of this overloading will be the overspill onto trunk roads and minor lanes, which not only are not designed for such heavy use. There will be increased risk to vulnerable road users such as pedestrians, riders and cyclists on crowded routes with no footway and few cycle tracks.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

5. Impact on Wildlife  the site of the proposed Garlick's Arch is on ancient woodland, there are Badgers Foxes and all manner of other wildlife that will be displaced from their habitat. We need to protect the wildlife in these woods and these ancient trees from destruction.

Please take into consideration my strong objection on the above grounds to the alteration of the draft plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

1. Lack of protection for the Green Belt and the Historic Environment. I object to the plan for Ripley to be taken out of the Green Belt and designated as a “District Centre”. Further, the boundary for the Primary Shopping Area is to be contiguous with the boundary of Ripley itself, opening the door to commercial development outside of the High Street. This this is being done without any prior consultation and without following proper procedure, which is unacceptable. It does not consider the current paucity of parking, yet proposes to add to the burden. It also increases the traffic burden on the interchange with Newark lane and Rose Lane in the village centre, identified choke points. It also threatens to change the nature of Ripley as an Historic Environment whose important presence on the Portsmouth Road has resulted in a significant number of Listed properties on the High Street and wider. It would be more suitable to designate Ripley as a rural Local Centre and to protect its heritage nature. I also understand that the previous plan for the Burnt Common site which was allocated for light industrial, general industrial and warehousing and 100 houses has been replaced with a new proposal, Garlick's Arch. This includes increased light and general industrial units and 400 houses, as well as a new 4 way on/off junction for the A3 to support Gosden Hill and Wisley Airfield as well as developments in the East of the borough. The site that is earmarked for this development has permanent green belt protection. There is no proven need for additional housing or industrial development in this area and contributes to an entirely disproportionate building burden on this area. The open character of Ockham with its Commons and RHS Wisley, Ripley with its historic Village Green and the Wey navigations, and Send Marsh, all make important contributions to the Green Belt and should be included rather than being inset. I strongly disagree that exceptional circumstances exist to justify the amendment of the Green Belt boundaries in this area against national planning policy. On the contrary, the development of the sites at Garlicks Arch and Gosden Hill Farm, combined with proposed limited infilling in West Clandon would result in the coalescence of urban sprawl from Guildford all the way to the M25.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I live in Ripley and I strongly object to many parts of the new draft local plan for Guildford Borough which I believe will adversely affect the Village where I live and the other surrounding Villages.

1. The draft plan places a massively disproportionate and unfair development burden on the portions of the Borough closest to London. The plan indicates 693 new homes are required per year, and 13,860 new homes by 2033. Yet the Former Wisley Airfield/Three Farms Meadow site at Ockham alone is planned to have 2,200 properties. The Garlick’s Arch proposal adds another 400 houses. The Gosden Hill Farm plan for West Clandon adds another 2,200 houses. Together, these projects represent over 33% of the requirement for the entire borough for the next 16 years, and this does not even include the smaller developments. This is entirely disproportionate, particularly to the Lovelace Ward. The Upshott Lane project adds another 400 houses, in the Borough of Woking but only minutes away from the developments above. It does not appear coincidental that the portions of these Boroughs closest to London are scheduled for overdevelopment to the benefit of areas further away. The draft plan explicitly states that GBC intend to build more new homes than is in the Policy, merely to provide ‘flexibility’. This is unacceptable and unnecessary.

I already have grave concerns over the air pollution in this area and its impact upon both the rare habitats of the Ockham and Wisley Commons as well as vulnerable local residents including children and the elderly. This would only be increased by the additional and disproportionate development proposed for this corner of the Borough.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We keep hearing that your Borough Council is listening to the residents of Send and Ripley. But in spite of the enormous response to the last Local Plan, now even more houses and developments are being planned encroaching on the Green Belt which the Conservative pledged to save. Now we have new proposals to build a 4 way junction at Garlick’s Arch. I object most strongly to the last minute proposal with no prior warning. Our villages would become totally overwhelmed and snarled up with yet more traffic.

I also object most strongly to the other last minute plan to build 40 new homes with 2 travellers sites at Send Hill. This is a totally unsuitable area on what was once a landfill site with vents in the ground. Send Hill is a small country lane with no pavements and lived in by elderly people.

Our village has not the roads or the facilities or schools or doctors surgeries to withstand the new Local Plan which was not included in the regulation 18 draft and has not been consulted upon previously.

The site in Green Belt which is permanently protected by the NPPF.

Please this time listen to the residents of Send. Surely after the last meeting at the Lancaster Hall which was full to capacity our concerns must be obvious.

I'm in my 70's, so I have to use the doctors surgery in Normandy. At present I have to wait 3-5 days for an appointment. What will happen when upwards of 3,000 people move to the area?

My next door neighbour is a school teacher as is my daughter and they both tell me their schools do not have enough children in them and worry they could lose their jobs, or worse still close down. A school in this housing estate would be very foolish knowing there are vacancies in all parts of Guildford and a total waste of money.

I believe those that have drawn-up the Local Plan have not taken into account the demographics of the proposed land in Normandy and have chosen for what ever reason to over-look roads, flooding and the basic infrastructure of this area.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I have a little car but never use it between 7am-10am in the morning and 4pm-7pm in the evening because the A323 is jammed solid. With 2-cars per household and the proposed houses to be built in Ash, Tongham and Aldershot this equates to thousands of more cars using the A323. I think traffic lights or a roundabout will have to be built at the end of Westward Lane and Glaziers Lane because one would never be able to get onto the main Guildford to Aldershot Road. A road bridge at Ash station would be a good idea.

In regard to the Local Plan for Normandy, I would like to draw your attention to a few things here in our village.

I walk my dog Lucy over the fields where the proposed 1,150-houses, school and shops might be built. The fields are under water for 8-months of the years. The farmer that looks after these field has dug-out a ditch 9ft deep and 100yds long in an attempt to drain his fields but it hasn't worked. If all these house were to be built the water run-off would flood the sewage system in Glaziers Lane. The houses all ready have problems with flood water backing up into their toilets, so you see more rain water would perpetuate this problem even more. This awful situation is a genuine concern to me.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I'm sorry to say the new GBC plan is no better than the last, in fact worse. I know we need more houses in E/W Horsley, but 533 are too many.

This number will:

a) put pressure on local schools, roads, doctors and hospitals

b) [text unreadable] at East Horsley of Effingham Junction, for people who need to travel by train to work
b) the villages must not be taken out of the Green Belt, this is too precious to lose. I hope the council will look at the plan again, and take these considerations into account.

I was horrified to read when I was in Ripley yesterday that there is a plan afoot to create a massive amount of new homes in the Guildford Borough. Although we do not live in the Borough, we frequently visit Ripley, Send and Clandon and so appreciate these lovely ancient villages. As a family we are all too aware that new homes have to be built to accommodate an ever increasing population BUT there must be other sites that would not ruin our beloved villages. Once they are gone, they will never return and it is villages like these that make our country special.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A35 – Land at Former Wisley Airfield, Ockham

In regards to the proposed new settlement at Wisley (Policy A35) it is acknowledged that there are two amendments to the site’s boundary. In regard to the first amendment it is understood that additional land is being added that was previously not considered available for allocation / development. Whilst there is no objection to the land being added per se, it is queried whether the identified capacity of the site should be amended to reflect the additional land now included. Should the potential capacity of the site change consideration should also be given to an additional impact on infrastructure requirements that would need to be included within the Local Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy ID1 – Infrastructure and delivery

Clarification is sort as to the interaction of points 3, 4 and 4 of this Policy. Points 3 and 5 relate specifically to planning applications with Point 3 stating that if the provision of infrastructure necessary to support new development cannot be secured, planning permission will be refused. However, this appears to be contradicted in Point 5 where it is suggested that regard will be had to the delivery and timing of delivery of the key infrastructure but does not necessarily constitute a refusal. The difference appears to be reference to ‘key infrastructure’. However, given the significance of the timely delivery of key infrastructure this point is considered to be even more pertinent.

It is also considered that the Policy would read better if the planning application and Local Plan elements were more clearly distinguished.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**Guildford borough Proposed Submission Local Plan: strategy and sites (June 2017)**

Thank you for consulting Elmbridge Borough Council on Guildford Borough’s Proposed Submission Local Plan.

As you know, we are keen to work with you and other authorities within our respective areas to ensure the effectiveness of Local Plans including, ensuring that the best and most suitable sites are brought forward for development and that other cross-boundary and strategic planning matters are continuously addressed.

Given the focused nature of this latest consultation, this response is made at an officer level. As requested comments made in response to the previous Regulation 19 Consultation (June 2016) have not been repeated unless, they extend to any amendments now being proposed.

**Policy S2 – Planning or the Borough – our spatial development strategy**

It is acknowledged that the Proposed Submission Local Plan seeks to meet a revised housing need of at least 12,426 new homes between the amended period of 2015 and 2034. This is on the basis of the evidence contained within the West Surrey SHMA Guildford Addendum Report 2017. The number of new homes to be provided represents a decrease of 1,434 homes from that set out within the previous Proposed Submission Plan for which Guildford Borough Council proposed to meet.

It is understood that the land previously identified to accommodate the higher housing number has been revisited (Land Availability Assessment (LAA) and 2017 addendum). Notwithstanding the comments made in the document, it is considered that as this land was once identified as being available and developable it should be reconsidered and the potential for it to assist in meeting the unmet need across the housing market areas revisited.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** PSLPA16/1342  **Respondent:** 15147841 / N Golbengian  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**I object to the proposed Infrastructure Schedule (Appendix C)**

There is no schedule for Garlicks Arch (A43); the plan takes no account of the infrastructure required for this site and therefore it is not fit for purpose.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
I object to the figure of 693 houses per annum in the borough being too high (Appendix D)

GBC has not published any details as how this figure was arrived at, and has not applied any of the applicable constraints to it. This lack of transparency is not acceptable in a public consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Ripley I object to remove Ripley and send from green belt I object the allocation of land wisely air field , Garlicks arch , gosden hill , it will have terrible impact to local village I object to unbalanced allocation of development I object to development of any further trunk roads I object to further development of roads which adds to congestion already present in our roads I object to have more traffic trying to squeeze in our narrow roads I object to poor air quality follows more traffic I object to the lack of planing and implementation of infrastructure I object to the development of Garlicks arch for lack of utilities capacity in Ripley and send Parking issues in the villages is already serious I object to the planning due to further stress it will put on the health services I object to the planning due to stretching policing services Stress on local welfare There will be lack of protection of the environment

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
** I object to the inclusion of the land at Garlicks Arch, Send Marsh/Burnt Common and Ripley (A43).

Garlick's Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the Draft Local Plan Infrastructure schedule does not provide for this site at all.

** What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

** I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

This is disastrous as the increased volume of traffic would impact the local communities. The increased traffic from London (M25) to Woking would go through Burnt Common, Send and Old Woking, which currently cannot cope with the existing traffic. This is unsustainable.

** What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

** I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

This is disastrous as the increased volume of traffic would impact the local communities. The increased traffic from London (M25) to Woking would go through Burnt Common, Send and Old Woking, which currently cannot cope with the existing traffic. This is unsustainable.

** What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
** I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

Damage will be caused to the ancient woodland of oak trees at Garlicks Arch site (A43) proposal, and the loss of green space and amenity

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/5329  Respondent: 15147841 / N Golbengian  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

** I object to the employment strategy and impact on Garlicks Arch (A43) (Policies E2 and E5)

The development will result in the loss of existing local successful businesses, which have been employing local people over many decades, and are therefore sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/5330  Respondent: 15147841 / N Golbengian  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

** I object to the lack of proper infrastructure planning for sites (Policy I1)

The current and existing services are over-stretched now, so where are the infrastructure improvements to support the enormous proposed developments, including medical, public transport, schools?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/5331  Respondent: 15147841 / N Golbengian  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2
** I object to the congestion that development will cause to the trunk roads A3/M25 (Policy12)

Both the A3 and M25 need improvements before any developments commence. This is clearly not going to happen in the timescales of the plan, so the proposed developments at Wisley Airfield (A35), Garlicks Arch (A43) and Gosden Hill (A25) should NOT take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

** I object to poor air quality concerns (Policy 13)

The increased congestion that will arise from the massive proposed developments will in turn lead to increased air pollution which will have damaging effect on local residents and their health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, in addition to Wisley Airfield (site A35) and Garlicks Arch (site A43)

There are no exceptional circumstances (as required by the National Planning Policy) for these villages and sites being removed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

** I object to development in areas at risk of flooding (Policy P4)

The Environment Agency classifies the site at Garlicks Arch (A43) as being in a higher risk than the Council's own assessment. The plan does not take adequate account of the flood risk as required by National Planning Policy, especially as this area has flooded many times in recent years

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the 2016 draft local plan for the following reasons:

** I object to the local plan as the development proposed is not sustainable (Policy S1)

The volume of proposed housing will damage local communities especially Ripley, Send and Clandon and is not sustainable due to lack of infrastructure. There are no rail stations near the proposed developments and no plans to improve the local roads. What about primary schools, doctors and dentists? Where are the thousands of extra cars going to go with no possibility of significant improvements to local roads?
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

** I object to the Borough Wide Strategy (Policy S2)

There is too much development in Wisley (A35) Ripley/Send (A43) and Clandon (A25). The plan is unbalanced with over 5,000 houses proposed between M25 and Burpham, which will merge all the villages and their identities. This is unfair and unreasonable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the proposed development at Garlick’s Arch in Burnt Common. There is no need to additional houses in the borough on top of those already proposed. This site is new and has not been previously consulted on. The proposed new 4-way interchange onto the A3 at Burnt Common would be disastrous for Send. The road through send (A247) would be completely gridlocked during rush hours and would result in far too much fast moving traffic cutting through the village. It is already dangerous for children getting to school with the volume of fast moving traffic that don’t slow down by the school having left the A3. We cannot afford more traffic moving through the village and endangering our children.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have the following comments:

- I object to Send being removed the GreenBelt. Send is a small village that cannot take any more housing, the infrastructure & road systems are barely suitable for the current number of people and definitely cannot support more housing. I particularly object to the land between the 2 schools, including their playfields being taken out of the greenbelt.

We object to Guildford Borough Council's draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:
- destroy views from the Hog's Back ridge - a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green belt increase tail back son the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford's pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In addition I object to Policy A43 Garlick’s Arch, as the proposal to build at least 400 homes and industrial facilities will not only put impossible pressure on the existing road network, but other infrastructure such as schools and medical facilities will be insufficient to support this development. The Villages Medical Centre in Send is already at capacity and there is no secondary school proposed for Ripley and Send which even now causes problems for many children who are unable to get in to the already oversubscribed closest secondary school George Abbot in Burpham.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In particular I object to the following proposed sites:
Policy A43 Garlick’s Arch;
Policy A25 Gosden Hill Farm Merrow;
Policy A35 Wisley
The combined effect of these substantial proposed developments within close proximity will place an unsustainable burden on the infrastructure of the areas affected. The surrounding roads are already extremely busy and in particular the resulting increase in traffic on the A3 and M25 will be disastrous. The A3 is already at a near standstill on the approach to the M25 during the morning peak time and this will become substantially worse by the construction of upwards of four and a half thousand houses, plus commercial/industrial units on these three sites combined.

I object to the proposal to create a four way junction on the A3 at Burnt Common (Policy 43A) by extending north and south access as this will increase traffic enormously on the A247 which is already at full capacity through Send at peak times and experiences huge traffic jams when even minor road works are required along its length. The proposal will also increase the volume of traffic on the A247 through West Clandon which is totally unsuitable for any significant volume of HGV traffic due to a very narrow stretch within the village where two large vehicles are unable to pass each other.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I also object to the proposal to remove Ripley, Wisley, Clandon, Send and other villages from the Green Belt as this will open up these villages to even more excessive development and will destroy much of the existing open landscape and countryside, potentially creating a continuous urban development from the M25 down to the A31 Hogs Back.

Please submit these comments and objections to the Planning Inspector for consideration as part of the Local Plan examination.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the 2016 Draft Local Plan on the grounds that:

- the proposed development is disproportionate to the capacity of the area affected to accommodate it
- amounts to an excessive development within one area of the Borough and
- is contrary to the Borough’s stated objective of ‘balancing the needs of residents with protecting the borough’s most important countryside, landscape and heritage’.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the 2017 Draft Local Plan on the grounds that:

- With regard to development proposals for the Send area, despite thousands of objections to the 2016 Draft Local Plan, these objections have been largely ignored by Guildford Borough Council. Instead of mitigating the effect of their original proposals, the Council have now proposed additional development in Policy Areas A42, A43 and A58.
- The proposed development within the Send area comprises 40% of the entire proposed development in the Draft Local Plan. How can this be acceptable when our area represents only 11% of the Borough? This amounts to a massive overdevelopment of one area, all on Green Belt land and with a disproportionately negative impact in an area where the infrastructure is already struggling to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The 2017 Draft Local Plan now proposes an increase in the development envisaged in the 2016 Draft Local Plan. 60 homes are now planned in place of the 45 homes originally proposed—an increase of one third. This completely ignores previous objections to the traffic problems which will be caused by this development on a site which is served by very narrow roads and the increase in the number of homes now proposed can only make matters worse. It will also increase the impact of surface water flooding which is already a problem in this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Far from reducing the number of homes proposed for this site, the Council have again ignored substantial objections made regarding the impact of this site and have also added a proposal for 6 Travelling Showpeople plots. This despite there being no proven demand for this number of plots in this location. The proposals for this site are excessive, represent a substantial erosion of the Green Belt, and will generate huge amounts of traffic which the road system in Send and Ripley is completely unfit to cope with.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Again, despite numerous previous objections, the Council have now allocated this site for a minimum of 7,000 sq m of industrial space, instead of the previous maximum of 7,000 sq m, thereby creating the opportunity for unlimited development on this site in the future. These proposals are an unnecessary and inappropriate development within the Green Belt and will only increase the existing traffic gridlock in this area.

It is particularly disappointing that Guildford Borough Council have made so little attempt to address the genuine concerns of the Send community and that the proposals in the current draft Local Plan if implemented would actually have an even worse impact on the community than the 2016 proposals.

I am writing to strongly object to the “new” local plan. As far as I can tell, there is nothing ‘new’ regarding this plan so far as West Horsley and the Wisley Airfield development proposals are concerned.

It has been my long-held belief that GBC have continuously targeted West Horsley as a key development site – and we have done well to resist such continuous development attacks on our village and the surrounding area. Yet again, GBC want to remove West Horsley formally from the Green belt; develop over 500 new homes and support a ‘new town’ build on the Wisley Airfield – less than 2 miles from the West Horsley boundary.

This area cannot sustain such large-scale development. Its infrastructure is still Victorian in it capability. Plumbing; pipes; road width; flood defences all point to a bygone time of the 1920’s. Two lorries on Ockham Road North travelling in opposite directions cause havoc. They simply cannot pass without mounting pavements and crashing continuously into the railway bridge, which happens approx. 3 times a year.

Schools cannot cope with existing demand, neither can the 1 Doctors surgery.

The railway station and parking and pick-up/drop-off routines will be interesting with, possibly, the addition of 1,000 extra cars and 2000 commuters.

The road quality in the area now mirrors Beirut on a bad day back in troubled times.

The absolutely baffling thing to me is the fact GBC are clearly taking a well-trodden path and a ‘line of least resistance’ in regurgitating these well-worn proposals. The lack of imaginative research to accommodate the genuine housing need on existing brown-field sites in the wider area is startling in its incapability; willingness and desire to plan effectively within the Borough. The political manoeuvrings to eliminate any real powerful say of the elected Guildford Greenbelt Group from
any Committee of meaning and the exclusion of this elected Group of Councillors from any real debate shows a complete
disrespect to us, the Public you are supposed to serve.

The scale of your development proposals in the Horsley area and Wisley beggars belief and demonstrates a level of disdain
of previous very public objections.

You should hang your heads in shame GBC.

Your Local Plan from a Horsley and Wisley perspective is a complete disaster. Over 500 proposed new homes and 2,000 in
a new town build within 2 miles is a recipe for disaster for the area. An area you have clearly wanted out of the Green Belt
for the last 24 years we have lived here.

Your previous deceit; arrogance and utter disdain of the wishes of the people who live in this area over that time borders on
a campaign of ruthless arrogance. A vote of ‘no confidence’ in you; the Local Plan and the architects of such nonsense is
long overdue.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

b) Proposed creation of new north & southbound slip roads to and from the A3 to the A247 Clandon Road (Policy A43A)
at Burnt Common. This is totally unacceptable and will destroy the village, surrounding area and quality of life.

c) Infrastructure – There are not enough primary and secondary school places as it is for the residents of Send and Ripley.
What proposals are in place for school paces for an extra 400 + children at least, not just for the immediate future but the
next 5/10/15 years? If this proposal is pushed through then new schools will need to be built concurrent to the proposed
housing, otherwise there will be serious issues for residents. It is also virtually impossible to get to see a doctor at The
Villages Medical Centre – not only can you never get through on the phone, but when you can you not get an appointment.
They cannot cope with the volume of residents without hundreds or potentially thousands of additional residents – and their
children etc.

I strongly object to these proposed developments and also to the lack of consideration given to the residents and their
concerns, the limited consultation period and the lack of planning for the adverse effects on infrastructure these
developments will have on the surrounding area. Please take on board the fears and concerns of your local residents, these
proposals will kill our village and the wider area. If these proposals are followed through there is no hope for this area or
our county as a whole, little by little the green belt will be destroyed and we will eventually become a suburb of London
with no country side, no wildlife and no way of ever getting back what we have lost.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2) Size and Location of the Proposed Development at Garlick’s Arch -

I strongly object to the development, which is large for the area, with over 400 houses proposed, which would have a massive impact on the local villages infrastructure as follows:

1. a) Traffic / Congestion – Send and Ripley are massively impacted by their location to the A3/M25. It is almost impossible some mornings to get out of the top of our road (we live in Chestnut Close) – trying to turn right onto Portsmouth Road is not only difficult it is also dangerous during rush hour. From 7.30 onwards during morning rush hour there is a queue of traffic from the junction of Portsmouth Road and Send Marsh Road, going down past Linden Way and all the way back past the Saddlers Arms, often as far as the green. It also queues at Mays Corner / Send Crossroads, up past send First School to the roundabout, and going the other way towards Woking. This is the situation on a normal day. If there is an accident on the A3 or the M25 or roadworks or any kind of adverse weather or other problem the situation is ten times worse! (we suggest a traffic survey team would be advised to monitor for themselves). If you build 400 houses and an industrial site, in this area, the congestion it would cause with at least 400 extra cars on the road would be phenomenal. Further to this the detrimental impact of pollution in this area. And not to mention the impact of these extra cars speeding up and down Send Barns Lane past the school – which already is dangerous as there is no crossing. If you factor in a further 2000 homes still proposed in the local plan at Wisley (despite earlier rejection by Guildford Borough Council), along with proposals for 2200 homes at Clandon/Burpham – these proposals will create MASSIVE further traffic problems and congestion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I write with reference to the proposed development on Green Belt Land of 400 houses and an industrial site at Garlicks Arch – Burnt Common Send Ripley Borders which has been drafted into the Guildford Local Plan 2016. I would like to register my objection to this proposed development for the following reasons:

1) Erosion of the Green Belt –

I strongly object to proposed wholesale destruction of the Green Belt, which is in clear contravention of the central governments stated commitment for “Green Belt Protection”. Once this area is developed not only will this part of the...
Green Belt be eroded, but it will set a precedent for future development and erosion of the green belt – not only in Send/Ripley and Clandon villages but on other green belt sites within Guildford & surrounding areas. The Green Belt should and must be protected, and whilst I appreciate the need for more housing in Guildford, there are plenty of brownfield sites which can be redeveloped. Also, it is alarming that not only is housing proposed on the greenbelt, but also an industrial site – which will have a huge & negative impact on the surrounding environment e.g. pollution, long term damage to the surrounding countryside and the flora/fauna within this area, not to mention the negative effect on communities currently living in these areas.

Furthermore, I also object to the proposed removal, through “in-setting”, of several villages from the Green Belt (eg Send, Ripley, Send, Clandon and Wisley to name a few).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I was born in Guildford and view with horror the plans proposed to build so many extra houses. The congestion at present brings traffic to a standstill. I can't imagine what it would be like with so many extra houses and cars. The hospitals, schools, doctors, and surgeries would be pushed to the limit. I hope these problems can be sorted and we can continue to have a pleasant town to live in for the future. JUDY NETTO.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have viewed your plans for future development of Guildford with horror and beseech you to realise the damage that will occur to our lovely city environment should the expansion plan go ahead. The amenity of so much beautiful countryside surrounding Guildford would vanish, traffic would be much worse than it is at present, local services would be totally overloaded, i.e., doctors, hospital, surgeries, etc. Please, please reconsider.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have particularly strong objections to the Bell and Colvill proposed site - to fit 40 houses in such a small space seems impossible and will have a real impact on the surrounding area, traffic etc. We live at [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998], almost opposite the garage and are wholly opposed to this development. I am also concerned about the deflationary impact on house prices.

I am writing to formally object to the local plan published on 6th June for the following reasons:

- We do not have the infrastructure to support the new developments e.g. medical centres, dentists, schools etc. - there are already insufficient places at the Raleigh school to service the Horsleys - adding up to another 533 houses will create real problems.

- Any increase in housing would result in insufficient parking at Horsley station which would be a daily inconvenience for a number of existing residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing you because of the New Local Plan involving the village I live, East Horsley.

We, my husband, son and I, moved here only recently for work in London City. We chose this area because it was located at the base of the Surrey Hills, an area of outstanding beauty. Only after we moved here we learned about the plans involving the building of new houses and the plan to change the status of the village we live in.

We believe building new houses should involve the improvement of the infrastructure. Only last week, with Green Dene closed and after a night of heavy rainfall, travel times plummeted. However, building and improving infrastructure would have a great impact on nature and the experience of nature. Changing the green belt status to a 'village' status, would shift the focus from persevering nature to urbanization, a shift undesirable.

Does the demand for houses justify the building of new houses? We noticed that there are a lot of houses for sale or to let in the area.

We may be passers by, as my surname may bear witness to, but we thought this of too much importance not to let our voice be heard.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/216  Respondent: 15150913 / Peter Hamilton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base
1. The failure of GBC to provide sound evidence in terms of the Employment Land Needs Assessment 2015 (ELNA) which shows an 80% reduction in employment space from the previous ELNA carried out by GBC in 2013. This means that industrial space at Burnt Common is no longer needed. Housing numbers from the Strategic Housing Market Assessment 2015 (SHMA) are highly questionable. The number of foreign students has been wrongly used to inflate the need. The required 13,860 homes in the Local Plan is exaggerated. If the population is to grow by some 20,000 in the Plan period, 8,000 homes would be needed based on an average of 2.5 persons per home. The Green Belt does not need to be built over and half of new homes could be built on brownfield sites. It appears that GBC’s Transport Assessment was not even available to councillors for the vote taken on 24th May and this was only published on 6th June with infrastructure overload receiving scant attention.

None of these proposals are in the best interests of Send and its residents and any change to its Green Belt status would greatly diminish the character and identity of the village. In addition, the general strain on the infrastructure of the village in terms of roads, schooling and medical services would be overwhelming. Already in Send, traffic is heavy at certain times of day, schools over-subscribed and The Villages Medical Centre struggles to provide timely appointments for the residents currently registered.

I trust these objections are received and noted in accordance with procedure and look forward to news arising from the reassessment which will surely be necessary once the full extent of the resistance of local residents to the Local Plan proposals is known to GBC.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/215  Respondent: 15150913 / Peter Hamilton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I refer to the revised Local plan approved by the full council at the extraordinary meeting of 24th May.

Please take due and formal note that I OBJECT to all of the following:

1. The number of homes that the Plan intends to deliver.
2. The enclosure of protected Green Belt within the proposed new village boundaries (for which there will be a presumption for development in the future).
3. The Garlick’s Arch (Policy A43) proposal to build 400 houses and 7,000 square metres of light / general industrial / storage distribution space on the Green Belt.
4. The creation of new north and southbound slip roads to and from the A3 to the A247 Clandon Road (Policy A43A) at Burnt Common. This would be disastrous for Send as it would create gridlock on Send Road (A247) in the core hours of the day. Send would become the through route to Woking for traffic leaving the M25 and A3 as
well as for vehicles coming from proposed housing developments in Wisley and Burpham (2,000 houses in each case).

5. The wholesale destruction of the Green Belt in this area (including the planned development of 2,000 homes at Gosden Hill Farm, Merrow – Policy A25) in clear contravention of the central government’s stated commitment to Green Belt protection.

6. The designation of land wet of Winds Ridge and Send Hill for 40 homes and 2 Travellers’ Pitches. This site is NEW and was NOT included in the regulation 18 draft and has NOT been consulted upon previously. This is a permanent Green Belt site within an area of beautiful countryside which would be spoiled by development. Also, the subsoil contains documented unsafe land fill waste which is currently vented. The narrow width single track country lane providing access to the site is totally inadequate for and inappropriate to usage by Traveller settlements.

7. The removal of Send from the Green Belt.

8. The failure of Guildford Borough Council (GBC) to follow due and correct process. Since 2014, GBC has changed the plans for every major site in Send proposed for development and now seeks to add a massive new road junction. The 2014 proposal for 430 houses reduced to 185 in April 2016 and now shoots up to 485. These significant changes require full consultation under Regulation 18, not the Regulation 10 short cut which GBC seek to get away with. This action appears to invalidate the whole process.

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Housing

1.1. The target for new homes outlined in the Local Plan represents a 25% increase in the housing stock of the borough; The Office of National Statistics ("ONS") projects a population increase (including that for economic growth) of some 15% for Guildford Borough over this same period. Why do we need the 25% increase in homes?.

1.2. The infrastructure proposals are inadequate even to meet existing needs let alone the proposed additional developments in the Local Plan.

1.3. Policy S2: is a Borough Wide Strategy (the “SHMA”), which looks at how the annual housing target of 693 homes is made up. It estimates that 517 homes per annum arise from ‘the demographic figure (supported by ONS office national statistics) projections. To this GBC plan has added another 120 homes per annum in order to ‘support extraeconomic growth’, a further 31 homes per annum to ‘improve affordability’ and 25 homes due to ‘student growth’, all of which totals up to 693 homes per annum target more than in the rejected plan.

1.4. This does not make any sense as we do not need an uplift for extra economic growth. Current growth patterns are included in ONS projection.

1.5. The increase of 25 homes to ease affordability issues will result in only 10 social/affordable houses being built. It would be better if planning permission was only granted for 1, 2, 3 bed properties for a period of 2 - 3 years with a restriction on the percentage of 4 & 5 bed if required. This would help to provide a better mix for both market and affordable homes in all parts of the borough.

1.6. Student accommodation should be provided by the university. The University’s expansion should be in line with what it can deliver in terms of extra student accommodation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/210  Respondent: 15151009 / G Stonehouse  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **Wisley Airfield**

3.1. The proposal to include this site in the Local Plan and remove it from the green belt is puzzling as it was the subject of a planning application refusal in recent months.

3.2. The reason given for the refusal was because the site was within the Green Belt. So why do that when GBC had the clear intention of moving the site out of the Green Belt within next few weeks? There were other reasons that were glossed over in the report that are not resolved by GBC recent actions. The impact on infrastructure, which is clear for all to see, only gets a passing mention. For example, the transport report by the developer's consultants has been torn apart following many comments and objections. Missing traffic numbers, grossly understating the impact of the development on trunk roads and local roads. The information provided in the Local Plan implies that if billions are spent on road and transport network improvement the development at Wisley could proceed with improvements funded by developers.

3.3. There appear to be 58 projects included in GBC wish list; statements have been made that for the housing program to move forward, it would require the majority of the programme of work to be delivered. At this point in time only 4 of the 58 projects have received committed funding even one of these is in doubt if Highways England is to be believed.

3.4. No solutions have been arrived at for the problems in the centre of Ripley. After more than 2 years of meetings and discussions involving SCC and the developer's consultants no workable solution has been identified. GBC local plan dismisses this significant problem saying it will be resolved with a "management solution". I would be very interested to hear what that solution could be and I suspect SCC highways would also be interested.

3.5. Both Highways England and SCC Highways issued holding objections in relation to the recent planning application for the Wisley site. This is, apparently, all they can now do as they are unable to refuse an application. If these two key agencies have expressed their grave reservation over the potential development on this site, why do GBC insist in promoting the site?

3.6. Under the latest Housing and Planning Bill, if sites are included in a local plan there is a presumption in favour of an application with matters of detail only to be resolved. Large slices of GBC traffic solutions are based on survey and analysis yet to be done when more detail can be made available. In other words they do not know the full extent of the problem. This information will be the result of a further examination of the issues and with solutions that are not currently apparent. I suppose this is the reason for the vagaries of the budgets. The only beneficiary of such an ill conceived and ill prepared approach will be lawyers representing the future developers when they are asked to pay for or contribute towards any mitigation.

3.7. The budget costings are said to err on the conservative side. Worked out on the back of a fag packet is more the case! How can anybody be expected to take a budget plan seriously when the individual projects have a budget plan estimate in the range of £100m to £250m on a single project. It is no wonder only 4 of the 58 projects have any commitment.

3.8. There are serious environment issues on the Wisley site and the nearby SPA. Pollution levels already exceed EU levels. The proposed SANG provision is immediately adjacent to the SPA a point that was criticized by Wildlife Trust, and Forestry Commission and initially by Natural England. The latter making a reversal of earlier comments following changes in personnel.

3.9. I therefore Object to the Wisley Airfield site being taken out of the Green Belt where it continues to serve the purposes intended by its original inclusion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Comment ID:** PSLPP16/667  **Respondent:** 15151009 / G Stonehouse **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.7. GBC Affordable Housing Policy H2 is proposing that all development sites (other than those with less than 10 units) will be required to have 40% of their homes offered as affordable housing. This to be on all site irrespective of where they are or where the homes are most needed. Local authorities are able to take payments in lieu from developers, but GBC have rejected this option. Why? This “one size fit all” policy will mean that homes will be built where they are not needed and not enough will be built where they are needed. Developers are therefore able to influence the level and type of affordable homes built. The housing mix in the Local Plan suggests more 1-bed homes should be built than 2-bed. GBC have ignored the figures from their own needs data (where more 2-bed homes are needed) in favour of those produced by their external consultants report. These reports have been influenced not by sound internal data from their housing records but by the vested interests of the development lobby. The only changes that can be made to the number on each site is at the developers discretion and at their request. GBC are unable to promote changes.

1.8. If any affordable social housing is built in a village like East Horsley and on most of the sites in West Horsley they could be lost to the market as there is no rural protection against the right to buy or enfranchise.

1.9. Most of the social housing in EH has already been lost as a result of right to buy, GBC should take payment in lieu from developers and build the social affordable home in more urban areas where they are most needed.

1.10. GBC’s new policies will encourage the buy to let investors who will receive a good return on their investment.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.11. POLICY H3: Rural exception homes are required on a small scale and can be retained as affordable and built on the edge of village and have significantly less impact on the Green Belt.

1.12. I therefore object to the proposed housing numbers and policies based on the above points.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/669  Respondent: 15151009 / G Stonehouse  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Green Belt

2.1. Proposed Submission Local Plan includes the statement “We will continue to protect the Metropolitan Green Belt”. No this is not the case. The housing policies set out in the Proposed Submission Local Plan; indicate that 65% of proposed new developments will take place on land that is currently in the Green Belt.

2.2. Under NPPF regulations GBC and other Local Authorities are permitted, once they have determined their Objectively Assessed housing Need (OAN), to make allowance for factors which may constrain the delivery of new housing. Constraints such as the need to protect the Metropolitan Green Belt, or the restrictions required to protect the Surrey Hills Area of Outstanding Natural Beauty, or land costs etc. Although these designated areas make up a large proportion of the land area of Guildford Borough, GBC has made no attempt to reduce its housing numbers in order to take account of such constraints. They have instead increased the number, beyond that required for normal growth projections to satisfy their own egotistical view on a path of massive economic growth.

2.3. Currently development is permitted within the settlement boundary, where villages are washed over by the green belt with particular planning regimes being applicable that have proved beneficial in preventing the urbanization of many villages. They are very successful, because of the non urban nature of small scale new development to help to retain the openness of the villages. These villages house, in some cases, a population of 4000 plus people, yet are regarded by residents as small villages. For those who drive through these areas they do not see a mass of urban style developments but trees and hedges, views between homes, views through spaces that don’t reveal row upon row of homes but space and openness with trees amongst the homes and a variety of scale and architecture.

2.4. Washing some of the larger villages will result in them becoming their own urban sprawl as a result of disproportionate infilling.

2.5. Changes to settlement boundaries have been made in order to make more land available for the developers under the guise of making the boundaries more defensible. Many straight lines have now been drawn which result in villages developing hard edge profiles with buildings replacing the fragmented softer edge of the original hedgerows, trees and green fields.

2.6. Loss of Green Belt resulting from these boundary realignments can only be justified in exceptional circumstance. None of which have been provided. Moving a boundary from one already defined boundary to another, again can only be done in exceptional circumstance. Housing need has already been turned down as such an exceptional circumstance.

2.7. I object to all these changes being made to the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to:
1) New houses in the Green Belt.
2) Increase in settlement area of East Horsley by 37%
3) New housing at East Horsley station and at the Wisley airfield
4) Insetting of East Horsley from the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send Marsh/ Burnt Common

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1) I object to the junction with the A3 at Burnt Common not being built until several years after the housing development. The transport infrastructure should be fixed before development starts.

2) I object to the totally inadequate budget for road improvements. Noise and air pollution is already bad. I believe there are new forms of Tarmac that reduce road noise.

3) I object to the poor transport plan. There is already gridlock frequently through Ripley, Send and Clandon.

4) I object to the erosion of the Green Belt.

5) I object to the disproportionate amount of development in one area of the Borough.

6) I object to the last minute inclusion of new sites with less than 2 weeks notice.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object most strongly to the Horsley villages being taken out of the Green Belt. Many promises have been made to preserve the Green Belt and it should be. It is a rural area and the character of the villages should be maintained.

The Horsley villages have already, during the last few years, had considerable infilling and large areas of new houses built resulting in considerable congestion on the narrow roads, particularly at peak times. It is already almost impossible to park to shop in the village, and the overflow car park is constantly full.

The station car park is also nearly full now, and with the additional houses planned commuters would not be able to park there.

The filter roads off the A3 already have huge tailbacks at peak times.

The proposed number of houses to be built would mean a huge strain on the infrastructure, and cause a different way of life for the residents who do not want this. The further possibility of development at Wisley airfield is a complete horror as it would ruin the areas of outstanding natural beauty all around it.

Please reconsider the Local Plan.

I would like to record my objection to the planned local development A44.19ha

I live locally in [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] and my mother in law lives on Send Hill, I moved locally so I can look after my mother in law as she gets older - we moved to Send a few years ago as it is surrounded by a lot of greenbelt which is perfect for walks and running.

We purchased both properties after carefully selecting the area as village life is important, we did not expect a mass of houses to be built right behind my mother’s property and certainly do not approve of 'Travellors' being GIFTED land - we have both worked hard and paid a LOT in taxes over many years, [Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it] I feel by allowing this plan to proceed you will place undue stress, fear which would be detrimental to my mother’s health.

There is plenty of land far more suitable near the 'Eubanks' auction house between the A3 and the slip road from the A3 towards Send.

Surely you can see the proposed plot A44 is not suitable or fair and therefore I strongly OBJECT to this.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Thank you for your time in reading this email in respect of the GBC draft local plan including the Normandy development proposals which include Site Allocation A46.

We attended the local meeting last Wednesday night in Normandy Village Hall to discuss the plan, which was very informative and helpful. Having considered the plan for Site Allocation A46, and the points discussed at the meeting, we have strong objections to the plan for Site Allocation A46, and as a starting point would make the observation that it just seems an extraordinarily complex and problematic plan to implement given all the environmental, transportation and other logistical issues that will need to be addressed to significantly increase the volume of people and traffic in Normandy.

We appreciate that houses are required and need to be built somewhere, but they need to be built somewhere appropriate, and from our perspective there are four obvious and fundamental issues concerning Normandy that need to be dealt with as a starting point, namely:
that surrounding schools are significantly under-subscribed so why is a new school required;
how are the already inadequate and busy roads going to cater for the increased volume of cars;
how is the impact on the protected and fragile local eco-systems going to be satisfactorily managed; and
how are the flooding issues that affect Normandy going to be sorted out.

Everyone will have their own personal issues and opinions in respect of all of the above and more, but we will just deal with the two issues that from our perspective just make the plans a non-starter regardless of anything else. This is not to say that we do not agree with and support other objections, but traffic and flooding are what we see on a daily basis.

Traffic

I work in Guildford and aim to leave at 7.30am every day and the absolute cut-off time for leaving is 7.45am. If I leave after that point then I will struggle to be at work for 8.30am. We are talking about a distance of 5 miles! The junction where I get on to the A323 is from Hunts Hill Road with Glaziers Lane directly opposite. By 7.45am there is a never ending stream of traffic going past that makes even turning left difficult. You have to take your chances and get out when you can, but at the same time you have the poor people trying to turn right from Glaziers Lane directly opposite, they just get stuck there, and sometimes you both pull out at the same time. It is dangerous and there is too much traffic already at this one junction.

My wife goes down to Petersfield so ideally she would cross the A323 from Hunts Hill Road to Glaziers Lane. She goes a bit later at about 8.15am and has given up trying to make that crossing, it is very dangerous, you wait for ages and when there is a gap in the traffic it is very unclear who has priority. She therefore goes in the opposite direction down Hunts Hill Road to Pirbright Road where she turns left and left again so that she can come to the end of School Lane and turn left and then right, all of which isn't very satisfactory.

Another question is how are the children at the big new school going to get to and from it? Given the traffic and lack of pavements they will not be able to cycle so presumably the majority will need to be driven increasing further the volume of traffic at the prime commuter times.

So, in a nutshell, there is already too much traffic. There have been big developments already around Ash that have flooded the roads with traffic with more proposed, and whilst the bullet point summary in the A46 schedule to the plan acknowledges the issue there are no proposals as to how this could be achieved, and we simply don't see what could be put in place from an infrastructure perspective to address the significant additional traffic volume that would result from the proposed developments in Normandy. It was mentioned in the meeting on Wednesday that the developer has set aside £3m to deal with the upgrading of the road infrastructure. Obviously this wouldn't go very far and simply highlights how little consideration has been given to this issue.

Flooding

The overnight rain on Wednesday night caused flooding all over Normandy, there was static water and large puddles on every road, it is dangerous and a real issue. This is the case every time there is a significant amount of rain, be it during the Summer or the Winter. It is difficult to see how the development could not affect the stream running through the designated area, so where will this water go? In my experience unless works are specifically being done to address flooding issues, big developments just exacerbate the problem because there is less land for the water to drain into and it deprives the locality of the natural water courses so the water will need to find a new course. Flooding is a known and very noticeable issue in Normandy and again it is difficult to see how the proposed development would not make the situation even worse, not only for the areas immediately surrounding the development but further afield too where we live and the main roads that are already prone to flooding. Whilst mention is made of the existing flooding issues in the bullet point summary in the A46 schedule to the plan, again there are no details of how this problem will be, or could be, addressed.

Moving away from the specific planning considerations we moved into Normandy itself fairly recently, but have lived in the general area most of our lives and it seems extraordinary that Normandy should be singled out as the obvious place for a development of this sort. It is one of the few villages that still has a genuine village feel with a community of residents who have lived there all their lives. Very different from other local areas such as Worplesdon where we have recently moved from which is mostly inhabited by people who have recently moved out of London down to Surrey, keep
themselves to themselves, and generally just view the village as a useful commuter base for London. This is why we moved here!

The saddest conversation we heard was at the Normandy May Fair. Two retired ladies who had lived in Normandy all their lives were discussing the proposals and were clearly just shocked and saddened by the whole proposal. If the development goes ahead it will deeply affect their whole way of life, as it will for hundreds of other people, and they just felt frustrated and utterly powerless. The Normandy May Fair includes May pole dancing, stalls selling bric-a-brac and a dog show that every dog in the village seemed to be involved in. It is difficult to see how such a quaint and relaxed village gathering, along with the many other social community events throughout the year, would survive in the same form following the imposition of up to 3,000 new people. It is our view that it would be completely inexcusable to impose over 1,000 new homes on a rural village in the greenbelt.

Obviously nobody wants a development in their back yard, and it is understandable that any people potentially affected by a development will react swiftly and with a huge element of self-interest. However we believe that Normandy is unique in being a genuine village community, and a close community that has been together for many generations. The reaction of a lot of the long term residents we have heard talk about it is one of bewilderment and sadness rather than anger and blatant self-interest, because they know what could be destroyed in terms of community and village spirit in addition to the worrying impact on the countryside and wildlife in the local and surrounding areas.

We understand that the decision rests in your hands so we would also ask that in addition to the more technical and legal arguments that will be thrown your way that you also just pause to consider the unique spirit of Normandy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp173/218  Respondent: 15154209 / Lo (Chris Lenton)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix II: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We were very pleased to see that the Normandy development proposals listed as Site Allocations A46 and A47 have been removed from the Plan, so thank you for that. It was impossible to see how these could be adequately serviced by the existing infrastructure. Just the increased road traffic and flooding issues alone resulting from the finished project would have made life a misery for everyone affected by it.

We are however concerned about a couple of points in the new plan as follows:

- **Removal from Green Belt of homes in Guildford Road, Glaziers lane, Flexford, etc and the new traveller site** – this seems like a prelude to making the building of new homes on these areas easier in the future. My daughter and I regularly cycle and run around these areas and we are very concerned about any attempt to any shrinking of the green belt.
- **10,000 new homes within 10 mile radius of Normandy** – whilst we are obviously glad that the direct impact of developing over a 1,000 homes in Normandy has been removed, the indirect effect on traffic increases, etc will need to be properly catered for in the form of improvements in road infrastructure. For example the level crossing in Ash already causes significant delays but if the traffic levels are increased considerably then this...
could become completely unmanageable, with the backlog only partially being cleared in between trains. Are there any plans to cater for this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Wisley airfield being considered a brown field site. It is 95% green farm land, with a single strip of tarmac. Converting this beautiful area into a massive housing estate will result in a loss of natural habit for many British animals including wild deer.

1. I object to the size and scale of Wisley airfield development. It will create a massive disproportionate pressure on existing country and trunk roads. The Transport Plan does not properly satisfy the existing gridlock in Guildford and surrounding areas, let alone counter the proposed increase in traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/317  Respondent: 15154241 / Brendan Laing  Agent:
1. I object to the proposed development at Garlic's Arch. This is ancient woodland and farmland. There is no proportion to the scale development compared to the existing number of homes in Send Marsh, Burnt Common, and Ripley.

1. I also object to the proposed development at Garlic's Arch because it will create increased traffic issues, pressure on local doctors, and schooling. There is no local secondary school without rush hour bus or train journeys.

1. Last year I wrote to Guildford council for a kerb to be installed outside my house. The response that this is normal for villages in the countryside. I object to the basis on which the proposed plan is diverting from existing principles and proposing 400 homes within 2 minutes walk from my house!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the building of new A3 slip roads on the Burnt Common junction. These ramps will not only provide access for an unnecessary new site, but will create alternative routes for congested M25 traffic. The proposed traffic plan includes a mere £1.5m to improve the traffic lights in Send, the village is already at standstill during rush hour due to the Old woking mini-roundabout.

1. I also object to the building of new A3 slip roads on the Burnt Common junction as this will increase traffic and damage air quality and congestion around the burnt common roundabout. The roundabout often is congested at peak times. It can take over 20 minutes to get to Clandon station from Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I object to the borough wide strategy. We should not be increasing our dependency of cars to move around by building greenbelt housing, and therefore we should be building housing near existing railway stations, or other green transport such as bikes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2616  Respondent: 15154241 / Brendan Laing  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43: Garlicks Arch

The site is allocated for approximately 400 homes (C3), including some self-build and custom house building plots, and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8)6 Travelling Showpeople plots (sui generis).

Policy H3: Rural exception homes

(1) Small affordable housing developments, including pitches for travellers, will be permitted to meet identified local affordable housing needs provided that:

(a) the site adjoins or is closely related to, and in safe and easy reasonable walking distance of a defined or a non-defined rural settlement, and

(b) the number, size and tenure of homes would be appropriate to meet, or to contribute to meeting, the identified local affordable housing needs of the local community

Policy A43a: Land for new north facing slip roads to/from A3 at Send Marsh/Burnt Common

>> I agree with the removal of industrial usage (A43) on greenbelt as per National Planning Policy, but object to the inclusion of Travelling Showpeople plots.

I continue to object to the inappropriate use of ancient GreenBelt land for 400 new houses (A43). This is not sufficient justification (H3) or exceptional circumstances. This is reckless destruction of green belt.

The argument in Policy H3 that it is ok to use green belt land for affordable housing if it is reasonable asking distance to a rural settlement is also not valid. Send is a good 60min walk, and Ripley 45min. This is unreasonable.

Furthermore the local Train station at Clandon is 60min walk. Furthermore the number and size of have no bearing on the needs of the local community! We have no need in Send, Ripley or Clandon for 400 new homes.

I continue to object to the need for a new slip road, especially since it has increased in size to 4.5ha and has no stated purpose or value. It will only lead to further congestion in and around our villages which are gridlocked daily.

I wish these objections to be fully taken into consideration and that the Updated Plan be amended accordingly.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1763  Respondent: 15154401 / Joan Grist  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog’s Back at Blackwell Farm, which will:

- Destroy views from the Hog’s Back ridge – a nationally designated Area of Outstanding Natural Beauty
- Remove 72 hectares of scenic farmland and additional woodland from the green belt
- Increase tailbacks on the A31 and traffic congestion
- Result in rat running through local roads
- Add to Guildford’s pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/320  Respondent: 15154465 / Glen Harrington  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to register my objection to the above plan. Development for housing is inappropriate due to its permanent Green Belt status. The sub soil of the site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is inappropriate due to the narrow width single track country road providing insufficient access to the site.

I therefore object to this proposal. Please ensure my comments are seen by the inspector.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object because:

- the site was not included in the regulation 18 draft and the site has not been consulted on previously;

- it is currently Green Belt and building on the site will undermine Send’s village status;

- a new 4 way interchange onto the A3 would make Send a through route for traffic leaving the A3 and M25 for Woking, overloading the road through Send village. The A3 is a main artery through the borough but only works if the traffic is able to travel smoothly and is not interrupted by frequent junctions where traffic joining or leaving impede the flow causing a detrimental effect on the highway.

- proposed improvements to the A247 through Send would not alleviate the congestion situation because the bottleneck is at the Old Woking roundabout – there is simply no road capacity leading to the A247 from Woking to allow traffic to flow – there are already long queues and delays during peak times;

- the need for additional industrial development has not been demonstrated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object because:

- the site was not included in the regulation 18 draft and the site has not been consulted on previously;

- development for housing is inappropriate on this land which has Green Belt status. This land is currently used daily by myself and others for walking in a natural green environment and which would be spoilt by any development. The subsoil of this land contains documented unsafe landfill waste which is currently vented and is not suited to the proposed development;

- access to the site is poor and limited due to the width of Send Hill road, single track from the proposed site entrance to its junction with Potters Lane and narrow throughout its length, with no pavement for pedestrians for most of its length;

- the number of travellers pitches (2) is out of proportion to the number of houses proposed (40);

- Send Cemetery, the peaceful and well maintained lawn cemetery is on Send Hill, close to the proposed site access. The cemetery has over a thousand people laid to rest here and this proposed development would have a detrimental effect to the quiet, reflective and respectful expectations of cemetery users;

- The Villages Health Centre and Send First School are already at capacity level and the village infrastructure is not able to sustain this additional proposed development;

- Send Hill is a quiet and narrow road. Development for housing is inappropriate due to its permanent Green Belt status and high quality Green Belt amenity within an area of beautiful countryside which would be spoilt by any development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/695  Respondent: 15154593 / Linda Davis  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Send being removed from the Green Belt. The land proposed for removal from the Green Belt provides a buffer between Guildford and Woking. Without this buffer the village of Send will lose its village identity and merge with the conurbations of Guildford and Woking. GBC refer to the Green Belt as one of the borough’s biggest assets so this proposal is not designed to protect and enhance this area at all. Removal of Send and neighbouring villages from the Green belt opens up possibilities for further developments off the A3 which would be detrimental to and destroy this beautiful countryside. Guildford would lose its identity and become a sprawling area extending all the way northwards to the M25 junction.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Process

I object because Guildford Borough Council has not followed the correct process in including the above proposals in the Draft Plan. These are significant changes requiring consultation under Regulation 18, not the Regulation 19 process.

Evidence

I object because:

- Guildford Borough Council’s Transport Assessment was not available to councillors for the vote taken on 24 May on the Draft Plan. Insufficient attention has been given to Infrastructure overload;

- Guildford Borough Council have not demonstrated the need to build on Green Belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object very strongly to the original Guildford Borough Proposed Submission Local Plan and the Updated Local Plan.

Cllr Paul Spooner, Leader of the Council, says: "We reviewed the comments from last year's consultation and made a number of significant changes to the plan and proposed sites, as well as updating the supporting evidence and policies. We remain committed to fundamental principles, such as our ‘brownfield first’ policy of proposing sites with past development, and some of the changes increase the number of homes in the town centre with reduced or removed housing sites in rural areas and greenbelt."

The above statement from Cllr Spooner is not reflected in the changes to the Updated Local Plan! Quite the contrary... the continued use of green belt land without sufficient exceptional reason is reckless and an abuse of our country's heritage.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary
school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.
- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**Site A25 / Gosden Hill**

1. I object to this proposal. I am again concerned about the scale of this development and the pressure it would put on local services (education & health). I also question the impact this number of additional people will place on A3 congestion (North & Southbound).

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

### Comment ID: PSLPS16/341  Respondent: 15155393 / Heidi Powell  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**I’d like my comments below to be taken into consideration for the GBC local plan:**

**Site A35 / Wisley Airfield**

1. I object to this proposal. I objected to this site in 2014 and my views are unchanged. This is a significant development which is not appropriate for the area. It is a greenbelt site and should be kept as such. I find the plan to build 2000 houses is unacceptable and completely at odds with surrounding land use.
2. In addition such a huge volume of housing will add to the already significant access issues to the M25 / J10 and A3. It would also create unacceptable traffic congestion / “rat runs” on the surrounding minor roads.
3. I am very concerned about how local services from education to healthcare could cope with such a large additional population in the area. I question whether this has been properly taken into account and incorporated into the GBC plan.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**Site A43 / Garlick’s Arch**

1. I object to this proposal. In isolation I would welcome the provision of a 4 way access to the A3 at Burnt Common as part of this development. However I feel very uncomfortable about the plan for this development alongside sites A35 & A25. This would create a band of housing development totalling 4400 properties in a ribbon running from M25 / J10 to Guildford on land that is greenbelt.

2. I am particularly worried about the traffic management around the Burnt Common area. This is already a busy junction with the Portsmouth Road and with potentially additional traffic from Woking, Clandon as well as those travelling north & south on the A3. I fear this would become a major bottleneck.

Please will you take my comments into consideration.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

With reference to the above plan I strongly object for the following reasons:

- I object to all erosion of the green belt
- I object any "inserting" and removal of any villages from the green belt
- I object to the disproportionate amount of development in one area of the borough
- I object to the limited consultation period
- I object to the last minute inclusion of new sites with less than 2 weeks notice
• I object to the lack of evidence of any alleged housing number needs
• I object to the lack of immediate provision for new schools
• I object to the lack of any immediate provision for doctors surgery

Cc'd Sir Paul Beresford as our MP requesting that he consider and invoke the conservative election mandate to "SAVE THE GREEN BELT"

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPA16/238   Respondent:  15155617 / David Vallath-Patel   Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPS16/346   Respondent:  15155617 / David Vallath-Patel   Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/347  Respondent: 15155617 / David Vallath-Patel  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

1. I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I object to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

1. I object to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/740  Respondent: 15155617 / David Vallath-Patel  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/741  Respondent: 15155617 / David Vallath-Patel  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **I object to the loss of rural employment (Policy E5)**

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

---

1. **I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)**

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **I object to the lack of proper infrastructure planning for sites (Policy I1)**

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)**

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
1. **I object to poor air quality concerns (Policy P3)**

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

1. **I object to not protecting the Green Belt (Policy P2)**

I object to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.
Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1. **I object to the Local Plan as the development proposed will not be sustainable (Policy S1)**

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over development, particularly for the villages between Guildford and the M25, including Ripley, Send and Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35) and Garlick’s Arch (A43) are in unsustainable locations. They do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. **I object to the Borough Wide Strategy (Policy S2)**

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of
the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the
borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a
disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of
these communities.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Plans A25, A42, A43, A43a, A44

I object to all the above plans as they are an unconstitutional attack on the local Green Belt & based on unsubstantiated
housing needs

I also object on the grounds that they are a disproportionate development in our area of the borough.

They do not take into consideration the lack of schools & medical facilities but above all they will have a devastating effect
on the A247. Plans already agreed – ie the Send Marina, & the additional houses on the Vision Engineering plot will be
more than enough to bring this road to rush hour standstill & the Tannery Lane crossroads, already difficult for large
commercial vehicles will become an even more hazardous accident spot. Plan A42, the Clockbarn Nursery development will be especially detrimental at that spot.

The short section of the A247 between the Burnt Common roundabout & the new north & south A3 slip roads will have to absorb all this new local traffic but it will also attract those who currently go through Ripley.

A traffic survey of current levels would surely confirm that there are certain times of the day when we can take several minutes to gain access to the road.

**I most strongly object** to the inevitable increase in air pollution & noise, it is sad to think that we would have to endure even higher levels of both when in our gardens, any further increase will be a threat to health & too much to bear.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I would like to object to planned building of 700 homes per year, the area of Send does not have sufficient infrastructure to support this type of expansion. There are insufficient schools, road and transport system. Will destroy the village and its uniqueness, turn the whole are into a massive Conurbation.

The process which this has been proposed contravenes not only planning commitment and guidance as laid down by the government for green belt, but also has ignored due process.

I object to further development for the following reasons. With advent of the UK exit from the EU, the prediction for the requirement for housing and development of commercial units will need to be revised downwards. As the 3 million EU citizens currently in the UK, will be affected by this current event, and their ability to stay in this country will also be affected. So your estimates for further development of housing are wildly exaggerated and need to be revised downwards.

In addition to the potential down grade in the economy due to Brexit, your estimation for commercial and housing development is wildly exaggerated and unnecessary. Given you have allowed development of send marina; I really don’t understand how you can commit to further commercial developments. So therefore this development is folly this area does not need.

In particular, I want to object to all the following points:

I object to Garlicks Arch development of green belt land which contravenes government guide lines and that due process was not followed in the introduction of this development into this plan, and did not follow this process. Its inclusion in this plan was included at the last stage and did not follow process. So for that reason should be excluded.

I object to the council changing the enclosure of green belt land round the Ripley and Send villages, changing of village boundaries to allow for future development.
I object to the wholesale destruction of green belt land in this area (including development of 2000 homes at Gosden hill farm, Merrow, and also Send and Ripley), which contravenes directly the government stated commitment to preservation to green belt land.

I object to the creation of new north and South Bounds slips ways from the A3 to the A247 clandon Road (policy A243) at Burnt common, as in light of the wholly unnecessary due to planned expansion which unlikely be needed within the 10 years.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A 43. 30 ha Land at Garlick's Arch, Burnt Common, designated for 400 houses and 7,000 sq m of industrial and warehousing. There is no need for any more houses on top of the 13,860 already proposed for the borough. This site is NEW and was not included in the Regulation 18 draft which has NOT been consulted upon previously. It is Green Belt permanently protected by the NPPF which prevents the merging of settlements. There are no exceptional circumstances. The site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The proposed industrial development of 7,000 sq m is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield. A new 4-way interchange onto the A3 at Burnt Common to serve this development would be disastrous for Send. Send Road (A247) would be gridlocked all day. Send would be the through route to Woking for traffic leaving the M25 and A3, the proposed 2,000 houses at Wisley and the 2,000 houses at Burpham. Send cannot take it.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A44. 1.9 ha land west of Winds Ridge and Send Hill designated for 40 homes and 2 Travellers Pitches. This site is new and was not included in the regulation 18 draft and have not been consulted upon previously. Development for housing is inappropriate due to its permanent Green Belt status and high quality Green Belt amenity within an area of beautiful countryside which would be spoilt by any development. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 travellers pitches is inappropriate due to the narrow width track country had providing insufficient access to the site.

Answer (if comment is on questions 1-7 of the questionnaire): (No)

Guildford Borough Council have failed to provide sound evidence in terms of the Employment Land Needs Assessment 2015 (ELNA) which shows an 80% reduction in employment space from the previous ELNA carried out by Guildford Borough Council in 2013. This means that industrial space at Burnt Common is no longer needed. Housing numbers from the Strategic Housing Market Assessment 2015 (SHMA) are highly questionable. The number of foreign students has been wrongly used to inflate the need. The required 13,860 houses in the local plan is exaggerated. If the population is to grow by some 20,000 in the plan we actually need 8,000 homes (based on an average of 2.5 persons per home). The Green Belt does not need to be built over. 50% of new homes needed could be built on brownfield sites. GBC's Transport Assessment
was not even available to councillors for the vote taken on 24 May, being published on 6 June. Infrastructure overload has received scant attention.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I object.

I don't believe that all the areas planned for building in Ripley & Send are suitable and not enough consideration has been given to the impact on access, transport, weight of traffic, crime and schools.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to this.

GBC have not followed the correct process. Since 2014 GBC has changed every major site in Send proposed for development and now just added a massive new road junction. The 2014 proposal for 430 houses went down in April 2016 and has just gone up again to 485. These significant changes require another full consultation under Regulation 18, not the short cut of Regulation 19 which GBC are trying to get away with. This invalidates the whole process.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I appreciate that you and your colleagues have a terribly difficult job accommodating everybody's needs but I am deeply saddened by the amount of building that has gone on during my lifetime in the Guildford area. As a society we tend to all be in agreement at our outrage in the destruction of the world's rainforests but seem to be ignoring the destruction of our own countryside. Please, please consider reducing the amount of building before our homeland is destroyed.

Sorry to spoil your Monday morning. I'm sure you're a lovely person but feel the need to speak out about something I feel so passionately about.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We have the following comments (objections) to the revised GBC Local Plan.

1. We note that East Horsley has not been restored to the Green Belt area. This in our view is a retrograde step bearing in mind national and local undertakings in the past to preserve the Green Belt. We also find it staggering that over 50% of proposed new housing would be in land that is presently Green Belt.

1. The number of new homes proposed in the revised plan seems excessive in the light of current informed opinion on population increase.

I strongly disagree with encroaching on green belt land by extending the borders of our village.

The green belt is a policy for controlling urban growth and to assist in safeguarding the countryside from encroachment. (National Planning Policy Framework (NPPF) March 2012).

Should you ignore this, I along with other residents would consider legal action.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance

The site is not appropriate because:

• The site has Ancient woodland and is a wildlife habitat. Any ancient woodland should be protected for future generations.
• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding
• There are no plans to improve local schools, medical or utilities to cope.

I wish these objections to be fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

There is too much traffic in our villages already (ever tried driving from Pyrford into Ripley and onto Portsmouth road without scratching up your car?) and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that.

The rural roads in this area are narrow, in poor condition and have no footpaths.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/769  Respondent: 15157505 / Linda Leunissen  Agent:
1. I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy. The green belt is what makes these villages attractive to live in in the first place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/768  Respondent: 15157505 / Linda Leunissen  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

1. I object to the Local Plan as the development proposed is not sustainable (Policy S1)

The number of new houses proposed is not sustainable – it will damage local communities by over-development, especially Ripley, Send and Clandon. These villages are popular due to their old world, small village charm, which will be completely undone by your proposed development.

Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. Local roads will not be able to deal with these number of cars. The development should be in urban areas where there is sustainable transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/247  Respondent: 15157601 / Barbara Walker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.
The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

**1. I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)**

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

1. I object to the lack of proper infrastructure planning for sites (Policy I1)

The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.
There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to poor air quality concerns (Policy I3)

The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/776  Respondent: 15157601 / Barbara Walker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to development in areas which are at risk of flooding (Policy P4)

The Plan does not take adequate account of flood risk as required by National Planning Policy.

The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the Local Plan as the development proposed is not sustainable (Policy S1)

13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially Ripley, Send and Clandon. The local communities don’t need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Plan has nothing to improve the infrastructure for Garlick’s Arch.

The development should be in urban areas where there is sustainable transport.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

1. I object to the Borough Wide Strategy (Policy S2)

GBC’s proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey.

The Plan is unbalanced across the borough; there’s too much development in the north east of the borough (Wisley [A35], Ripley/Send [A43] and Clandon [A25]). 36% of all the Plan’s new housing is proposed in this area, which has only 11% of the existing housing.

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages.

Answer (if comment is on questions 1-7 of the questionnaire): ( )
1. I object to Wisley airfield being considered a brown field site. It is 95% green farm land, with a single strip of tarmac. Converting this beautiful area into a massive housing estate will result in a loss of natural habit for many British animals including wild deer.

1. I object to the size and scale of Wisley airfield development. It will create a massive disproportionate pressure on existing country and trunk roads. The Transport Plan does not properly satisfy the existing gridlock in Guildford and surrounding areas, let alone counter the proposed increase in traffic.

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the building of new A3 slip roads on the Burnt Common junction. These ramps will not only provide access for an unnecessary new site, but will create alternative routes for congested M25 traffic. The proposed traffic plan includes a mere £1.5m to improve the traffic lights in Send, the village is already at standstill during rush hour due to the Old woking mini-roundabout.

1. I also object to the building of new A3 slip roads on the Burnt Common junction as this will increase traffic and damage air quality and congestion around the burnt common roundabout. The roundabout often is congested at peak times. It can take over 20 minutes to get to Clandon station from Ripley.

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016). And these are my reasons:

1. I object to the number of houses needed. After the EU referendum I do not believe the proposed housing numbers are still valid. I would like to see a revision to these numbers for the Guildford Borough.

1. I object to the irreversible damage building new homes on woodland and farmland will create. A combination of brown field sites (burnt common) and small infill sites (Anderton's Farm) are available but have not been considered by the plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

General

I am only commenting on those aspects of the plan that affect Send.

I understand the requirement to build more housing but I am not convinced of the need to provide more industrial and business space in our area and I object in particular to the additional industrial and business space at places such as Garlick’s Arch. What’s wrong with the existing industrial areas?

I object to the fact that the plans don’t seem to really tackle the infrastructure problems caused, such as local road capacity, local public transport, school places, doctors, dentists, hospital, local shopping and other amenities. The plans make reference to a number of projects but there seems to be no attempt to tie the various relevant parts of the plan together.

I object to the fact that significant changes have been made to the plan at a late stage without the required consultation period.

You state “Developers of allocated sites are encouraged to progress housing proposals as soon as possible”. I object to that since it is not a good thing if solutions to the associated infrastructure problems are not progressed at the same time.

I also object to the fact that Send has been inset from the Green Belt. That only encourages encroachment on the Green Belt, as witnessed by a number of the schemes. In addition Send forms part of the Green buffer area between Woking and Guildford, and this must be preserved.

I object to having nearly half the growth in housing for Guildford Borough in Send and the immediate surrounding area. Surely if such a large quantity is required then it should be spread around the Borough more evenly.

Site 43A – Slip roads at junction of A247 and A3 at Burnt Common

This seems to be a good thing – it will undoubtedly ease the traffic in Ripley and I don’t understand why it was not built when the Ripley by-pass was built. I know the reason given, but my view has always been that these additional slip roads were necessary. I personally doubt that, on its own, it will significantly change the amount of traffic in the surrounding area, but this needs to be carefully monitored.

Site 42A – Clockbarn Nursery

I object to this because it is on a narrow road, Tannery Lane, and the junction of Tannery Lane with the A247 in the middle of Send Village is already an awkward and dangerous junction. There needs to be a serious review of the traffic situation.
I also object to this development since no consideration seems to have been given to the fact that 45 extra houses will impact the Doctor and Schools in the village.

I also object on the grounds that this is an extension of the village into Green Belt land along a road that is mainly rural.

**Site 44A – Land west of Send Hill**

I object to the underhand and cynical way that this proposal was slipped into this version of the Local Plan at the ‘last minute’ without any prior consultation period.

I object to this proposal because it is on a narrow road, Send Hill, that already takes quite a lot of traffic. In particular Send Hill down to Potters Lane is already a narrow and dangerous stretch of road with a dangerous junction where it meets Potter Lane.

I also object to this development since no consideration seems to have been given to the fact 40 extra houses and 2 Traveller Pitches will impact the Doctor and Schools in the village. There will also be an impact on visitors to the nearby cemetery.

I also object on the grounds that this is an extension of the village onto Green Belt land, between two well used footpaths, and is on an area often used for recreational activities and dog exercising.

I worry about how the Traveller Pitches will be incorporated onto such a small site – it needs to be done well to not spoil the environment for others. I would also have thought that two sites is actually too small a number – don’t travellers tend to travel in groups? Wouldn’t it therefore be better to incorporate a bigger group on to a larger site. I feel that there is a danger that these two pitches could become overcrowded and spoil things for everyone. I object to the fact that proper consideration of this appears not to have happened.

I also remember this site being used as landfill only about 30 years ago and it still has ventilation pipes in it. Is the site really suitable for a housing development? Has that been investigated properly?

This site is shown as smaller than the total potentially available area which leads me to suppose that once some houses have been built it could easily be extended with even more houses, thus further eroding the Green Belt area. This is another cynical attempt to hide a potential extra encroachment on Green Belt land at a later date.

I trust that you will consider the above points and modify the plan accordingly.

**Comment ID:** PSLPA16/251  **Respondent:** 15158561 / Graham Lloyd  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
I strongly object to the proposed housing developments planned for West Horsley.

The village of West Horsley already struggles with peak time traffic, local school places, village parking, station parking, doctors availability etc etc. The planned addition of 1,111 homes in our small village will increase the population by approximately 4000 people, adding at least 2000 additional cars to our local environment. This will adversely change/ruin the appearance and character of our village forever.

I also believe that ignoring the green belt will be at our peril. We need to protect our green areas or lose our air quality for the whole of the South East of England. There are so many brown field sites that should be considered first before riding rough shod over the green belt policy.

Personally, I moved to Surrey from London due to price pressure. This is something that people have to accept, we can't keep building just to allow our children to live in the area they were raised. This housing won't help matters in that respect. As soon as they are built, they will reflect Surrey house prices, making them unaffordable to young people. The North - South divide is set to widen with this type of housing policy. The Country is in danger of tipping up with the Weight of housing and population in the SE compared to other parts of the country.

The proposed developments are far too large to 'fit in' and would destroy our village way of life. Can these developments be spread more evenly around the county of Surrey, in smaller scale, consequently reducing impact on Surrey citizens?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am a resident of the village of Normandy with concerns of the proposed to development in your local plan.

I live in Normandy with my husband & my 2 sons aged 4 & 1. My 4 year old son currently attends the local preschool & will attend Wyke the village school in September. My husband & I both work at Heathrow airport so regularly use the local motorways.

I believe the proposed development of the greenbelt land will have an extremely negative effect on our village. We live on Westwood lane which at peak times of the day is a very busy 'rat run' used by people driving from other areas to the hogs back. People drive at shocking speeds down our lane & the addition of extra houses & a secondary school will only make this worse. I do not think the roads in Normandy are designed for such a volume of traffic.

When I walk my son to preschool I do not feel safe due to the speed people drive & can imagine it will become such that residents cannot walk to school due to the volume of fast moving cars. It will simply be too dangerous for young children.

As well as this there will be building traffic for years to come while this development is taking place. This will become a totally different village to bring up our children in. My husband & I regularly drive to Heathrow airport at peak times & the traffic is absolutely horrendous as soon as we get to the top of Wanborough Hill. How will the hogs back & A3 cope with this extra volume of traffic?
This development will have a negative impact on wildlife due to building on greenbelt land as well as spoiling the look of the beautiful countryside.

There is not enough infrastructure in our village to cope with the extra residents. The primary school is not big enough, nor is the doctors & there are no shops or other facilities here.

As far as I am aware there is no need for an extra secondary school as there are enough spaces at other local schools. Families who move to Normandy do so knowing there is no secondary school in the village & that our children will most likely attend Ash Manor. So the proposed secondary school is not planned to serve existing residents but merely to serve the new estate.

If this development goes ahead it will be devastating for the residents of Normandy & we very much hope there is a better alternative than building in our protected greenbelt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Yesterday morning I cycled out from Ripley on my bicycle enjoying the beautiful green countryside that has been preserved for us by previous generations.

In my opinion it is exceptionally sad that the removal of the green belt status has been proposed.

Removal of the green belt and the subsequent urbanisation of our villages and countryside is a one way decision. Once destroyed he countryside is gone forever.

In principal I am not against the development of new homes but it feels like the removal of the green belt and the disproportionate amount of proposed development is being made without any consideration of the infrastructure in our local area.

This week it took me an hour to drive from Ripley into Guildford, it took my wife an hour to drive from Weybridge to Cobham, parents cannot get their children into local schools, it can take 2 weeks to see your GP and the Royal Surrey hospital is at breaking point. Rush hour trains from Guildford and Woking to London are amongst the most overcrowded in the United Kingdom. Is the solution to this really to build the proposed quantity of new homes?

Specifically

1. I OBJECT TO ALL EROSION OF THE GREEN BELT

2. I OBJECT TO ALL "IN SETTING" OF ANY VILLAGES FROM THE GREEN BELT

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/17366  Respondent: 15159873 / Martin Smith  Agent: Vail Williams LLP (Jane Terry)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
The spatial vision of the draft Local Plan seeks to maintain the extent and function of the Green Belt in order to protect the character of the Borough. However, paragraph 4.3.16 recognises that there are exceptional circumstances to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of development. Paragraph 4.3.17 notes that land has been removed from the Green Belt in order to enable development around selected villages. In accordance with the conclusions of the Green Belt and Countryside Study Volume IV Insetting of Villages, Normandy and Flexford have become inset from the Green Belt (paragraph 4.3.13). These changes to the Plan are supported.

Nevertheless, the strategic development proposed at Normandy/Flexford does not go far enough. In relation to Normandy, Volume IV of the Green Belt Study: Insetting concludes that the village be inset within the Green Belt. This conclusion was based on a number of factors including:

- The high and medium density and distribution of residential development located on A323 Guildford Road, Anchor Close and Walden Close;
- The intermittent visual connections between the village and the wider Green Belt with the exception of Normandy Community Centre playing fields; and
- The presence of recognisable and defensible boundaries including the A323 Guildford Road, woodland at Normandy Common, Anchor Copse, hedgerows to the north of playing fields at Normandy Community Centre, and surrounding Glazier’s Lane, Mariner’s Close, Wyke Churchyard and Walden Cottages.

Similarly, the Study concluded that Flexford to the south of the railway line should also be inset based on:

- The difference in open character to the north and south of the railway line, with high density development and enclosure more evident to south of the railway line in comparison to the north;
- The high density residential development located on Christmas Pie Avenue, Orchard Way, Cull’s Road, Flexford Road and Westwood Lane to the south of the railway line; and
- The presence of recognisable and defensible boundaries to the south of the railway line including tree belts to the east of The Paddocks, Crossways and Flexford Road, the hedgerows and newly planted woodland to the south of Flexford Road, and fence lines, hedgerows and tree belts to the west of Westwood Lane. A significant amount of existing development already lies to the west of Westwood Lane and will relate to the proposed strategic development allocation.

These conclusions were based on a very limited perceived extent of the village area and by no means included all existing development which clearly does form part of each wider village as it is on the ground. For instance a significant amount of built form exists to the west of Westwood Lane and at Wyke. The summary conclusions against each of these villages also makes reference to their relationship with the proposed strategic development allocation (Policy A46) which will further emphasise their physical and functional integration.

Consequently it is considered that land to the west of Westwood Lane albeit assessed within a different Land parcel, clearly relates to the SDA and should be included within it and / or the insetting of Normandy and Flexford.

To reinforce this, it is considered that the land in question does not contribute to any of the five purposes of a Green Belt:

- To check the unrestricted sprawl of large built-up areas. The Plan seeks to deliver development for the needs of the Borough for the next 20 years. Accordingly it has the ability to contain further growth to the areas identified within the Plan. There is no need for a subsequent layer of restriction imposed by Green Belt designation;
- To prevent neighbouring towns merging into one another. There is a significant separation between Normandy/ Flexford and development of and significance at Ash to the west and the level of development envisaged to the west of Westwood Lane would not in anyway merge the two areas.
• To assist in safeguarding the countryside from encroachment. As above, there is no necessity for further safeguards in this area;
• To preserve the setting and special character of historic towns. No special character has been identified at Normandy or Flexford which would be impacted by additional development to the west of Westwood Lane; and
• To assist in urban regeneration, by encouraging the recycling of derelict and other urban land. That there is insufficient derelict and other urban land available to meet the needs of the Borough is recognised through the draft Plan through the relaxation of Green Belt boundaries in locations such as Normandy/Flexford.
• The area is generally unconstrained and, being adjacent to the proposed strategic development area, will contribute to the planned comprehensive and integrated development in a sustainable way.

In conclusion it is considered appropriate for land to the west of Westwood Lane to be incorporated within the inset area around the SDA at Normandy / Flexford.

Further changes should be made to the Green Belt designation in the vicinity of Policy A46 with the incorporation of land to the west of Westwood Lane between the railway line to the south and the A323 Guildford Road to the north. The extent of this area is indicated on the attached plan.

In order that sufficient land is made available at the proposed Potential Development Area at Normandy / Flexford to ensure a sustainable and inclusive community and to ensure that sufficient land is made available to deliver objectively assessed housing needs across the Borough.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2 states that the Plan is based on national planning policy with recognition of environmental constraints and the availability and viability of land for development. The preference for growth is in the most sustainable locations making the best use of previously developed land (including in the Green Belt if necessary).

The general principle set out within Policy S2 is supported. The use of areas least impacted by environmental constraints is also supported, as is the use of Green Belt land where necessary to deliver sustainable development to meet the required growth needs of the Borough.

However, the Plan does not go far enough in exploiting the sustainable locations of the Borough. The Green Belt Study is a key part of the evidence base which has influence the identification of potential development areas. We consider much of the Green Belt Study to be unjustified and as such the Plan is not effective.

Much of the housing development identified through the Plan is to be delivered through strategic sites. Whilst it is recognised that a significant amount of development within the Plan period will need to come forward through such sites, these are notoriously difficult to deliver in a timely way and are often subject to delays due to reasons of land assembly and the provision of the up front infrastructure required. As such, and in order to maintain and deliver a robust supply of housing land, a significant number of smaller sites which are unconstrained by environmental, ownership or infrastructure, and which can therefore be brought forward quickly and easily in the early years of the Plan should be allocated.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

For the Plan to comply with the test of soundness it must be:

- Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development;
- Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;
- Effective – the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities; and
- Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.

We do not consider the Plan will be effective in delivering the required housing growth in line with the needs of the Borough. This is because:

- There is over reliance of a few very large strategic sites;
- Effective joint working has not been demonstrated with neighbouring authorities on cross boundary strategic priorities including the need for Guildford to deliver additional housing where those authorities are more heavily constrained;

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

These representations are made in respect 13.5ha / 33.4A of land to the west of Westwood Lane, Flexford (Plan Attached). The Site currently comprises a series of fields currently used for ‘horsiculture’. The land sits between residential properties to the north and the railway line to the south. The site’s character is indistinguishable from land on the opposite side of Westwood Lane to the east. The field parcels are of irregular shapes and sizes and feature mature trees at the boundaries. Consequently, the site is well contained physically and visually on all sides such that there are no long-distance views afforded beyond.

Vehicular access can be gained directly from Westwood Lane into the site whilst there are two footpaths running east-west from Westwood Lane. These links offer an opportunity to connect the proposed Strategic Development Area to the wider footpath network and countryside beyond. Enhancements of this existing footpath network offering recreational opportunities would be possible as part of any development proposals.

The site offers an ideal opportunity for the siting of low density development, specialist housing, retirement housing, or housing for elderly people such as a care home or extra care facility. Such low density development would act as a transitional development between the higher density core of the Strategic Development Area and the countryside beyond. Existing landscape features including the mature boundary trees would be retained to provide the new development with a ‘parkland’ setting. Such development would contribute to the requirements of Policy H1 Homes for All and the housing mix set out in the Strategic Housing Market Assessment.

The site abuts the strategic development site to be allocated to the south of Normandy and north of Flexford (Policy A46). As such it benefits from the provision of infrastructure and improvements to the local highway network already identified within the Infrastructure Delivery Plan including projects LRN17, 18, 19, EG6, WS4, WCT5, PED1 and SED3. Consequently additional development in the vicinity can contribute to and benefit from these infrastructure improvements.

In my opinion it is exceptionally sad that the removal of the green belt status has been proposed.

Removal of the green belt and the subsequent urbanisation of our villages and countryside is a one way decision. Once destroyed the countryside is gone forever.

In principal I am not against the development of new homes but it feels like the removal of the green belt and the disproportionate amount of proposed development is being made without any consideration of the infrastructure in our local area.

This week it took my husband an hour to drive from Ripley into Guildford, it took me an hour to drive from Weybridge to Cobham, parents cannot get their children into local schools, it can take 2 weeks to see your GP and the Royal Surrey hospital is at breaking point. Rush hour trains from Guildford and Woking to London are amongst the most overcrowded in the United Kingdom. Is the solution to this really to build the proposed quantity of new homes?

Specifically

1. I OBJECT TO ALL EROSION OF THE GREEN BELT

2. I OBJECT TO ALL "IN SETTING" OF ANY VILLAGES FROM THE GREEN BELT

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I would like to object to the above plan.

I object to:-

1. The number of homes being proposed
2. The enclosure of protected green belt land within the proposed new village boundaries
3. The Garlick’s Arch proposal to build 400 new houses and 7000sq.mt. of light/general industrial/storage distribution space on the green belt
4. The creation of new north and southbound slip roads to and from the A3 to the A247 Clandon road at Burnt common
5. The wholesale destruction of the green belt in this area(including the planned development of 2000 houses at Gosden Hill Farm, Merrow in clear contravention of the governments stated commitment for green belt protection.
6. There being no provision to provide schools in an area already desperately short of this facility
7. No provision for improved road networks which are notoriously bad in the area.
8. No provision for improved and sufficient medical resources in the area.
9. No consideration for and improvement to the infra structure including the provision of sufficient water and other supplies
10. The destruction of villages which have existed for hundreds of years
11. Further development in the South East especially in an area already over populated
12. The council proposing these plans without a clear mandate from the electorate.

I Object to the 2016 Local Draft Plan

I wish to record my strong objections to the Draft local Plan which is out for public consultation currently.

I live in West Horsley and I am aged 13. My family moved to this area because we did not wish to live in an urban location (like Guildford itself) - we like the countryside with its open, green spaces.

We have learned at school about the Green Belt which I think should be protected from erosion by possible future disproportionate development- I don't think that you have even done a full survey to get proper evidence of the local housing need.

Please note that I object, very strongly, to the following:

lack of evidence of the housing need in the borough;

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
It is already hard to get a GP appointment, to get your child a place at the school locally, to travel around the area because of so much traffic, so why make things worse within these local villages? The roads are already too dangerous for me to cycle on because there are so many cars, without adding to these by building lots of smaller developments all over the place - why not concentrate on the bigger brownfield sites?

Please ensure that my comments are available for the Independent Inspector.

I object to West Horsley, and all the other local villages, being removed from the Green Belt - this is being done just so that you can then allow increased development which is not wanted by local people. There are lots of other areas (like the old Wisley Airfield) which could be developed upon and which have good links to the bigger roads which could and should be used first.

Removal of villages from the Green Belt allowing increased development into the future;

The proposed erosion of the Green Belt in any way, shape or form;

The really short time frame for consultation of the Draft Local Plan;

The council ignoring the many suitable brownfield sites within the borough which could be used for future development;

I write with great concern in respect of the huge proposed Taylor Wimpey 'housing estate' on the fields between Glaziers Lane & Westwood Lane.

I've lived in the village for just over 20 years and seen many changes which I believe everyone has embraced. However I have grave concerns over many matters that would occur if the 1100 houses, secondary school and shops were built.

- Currently I travel to Guildford on the A31, and I can see from my house that from 7am – 9.30am there are extremely long delays, with at least one accident per week on the A31 or A3. A journey of 15 minutes on a Saturday can take between 45minutes to 1 1/2 hours in the week. With approximately another say 700 vehicles on this road, the journey would be horrendous.

- The Aldershot/Guildford road really does not have the capacity to take anymore traffic as this is also solid with commuters.

- Two real concerns are the 'One Way Railway Bridge' in Westwood Lane, which is extremely dangerous as it is (with the residents of Beech Lane unable to see anything travelling up Westwood Lane to the Hogs Back), and the very small Bridge at Wanborough Station (which has a left hand kink as you cross the bridge), there are numerous near misses with traffic overtaking either side of the bridge, which slow drivers, horses, cyclists or motorbikes are using the road, and large lorries appearing at the brow of the hill.

- The Village would turn into a Building Site for at least 10 years with huge amount of large lorries using Glaziers Lane, as they are unable to go through the bridge at Westwood Lane.

- The area that has been chosen is beautiful, we use the footpath 'The Avenue' regularly for our dog walks. There are much less attractive areas which would be more suitable to site a housing development.

- The majority of the locals moved to Normandy so they could enjoy the rolling countryside, peaceful environment, and a village life. If we wanted to live in a large urbanised area we would have looked at a different location. Sad many people feel they would need to up sticks and move due to a large building company wanting our lovely green belt.

- Why would we need a new school, when Kings College and Ash Manor are under subscribed? Just because Cllr Spooner says that a Secondary School 'TRUMPS' planning! Is this really fair?

- How will our small village roads cope with this? A St Peter's bus travels up Culls Road every morning, does a loop round Christmas Pie and travels back down Glaziers Lane. During the Winter when several neighbours had some building works going on, and some residents leave their vehicles in the road which they are entitled to do. The Bus just drove all over the grass verges, and left huge ruts in them!! We like to keep our properties looking nice and just one bus caused this destruction, for months. The road is not wide enough to cope with a double decker bus, and I can only see more of this happening with extra traffic in the village.

- Another concern is the parking for the station, currently people park in Culls Road, and the Paddocks due to double yellows round at the Station and £2 a day charge. This will only increase, people like to park as near to the Station as possible!

We would like to stay a village, not ASHWYKEFLEXFORD&NORMANDY merged..

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

<table>
<thead>
<tr>
<th><strong>Reference A26</strong></th>
</tr>
</thead>
</table>
| Currently, during rush hour in the morning, there are lengthy tail backs on the A3 heading north, the A31 towards the A3 interchange, the A3 interchange with Egerton Road and the Research Park/Royal Surrey/Sports Park complex. The amount of current traffic issues in this area already results in major delays for motorists. A decision to build the number of new houses proposed at Blackwell Farm, with A3 access via Down Place or Egerton Road, would significantly add to traffic congestion in the whole area, only adding further to delays on the A3, the A31 and access to the Research Park area. During the evening rush hour, traffic on the A3 currently often tails back to Burpham and there is significant congestion on the northern edges of the town with traffic seeking to join the A3.

It is essential that considered and significant new road infrastructure is in place prior to construction of any new housing at Blackwell Farm. Infrastructure needs to be capable of handling what is likely to be over 3-4,000 additional cars, plus delivery vans and lorries, buses, taxis etc. Merely adapting the Down Place and Egerton Road interchanges will not ease current A3 or A31 traffic, nor facilitate the extra traffic from this development.

From the proposals as presented, insufficient consideration has been given to road network improvements around the suggested Blackwell Farm development (whether or not the 'tunnel' ever sees the light of day) - both Surrey County Council and National Government should be involved in creating an infrastructure plan that will reduce congestion in the event these proposals go ahead, not increase it.

<table>
<thead>
<tr>
<th><strong>Reference A46</strong></th>
</tr>
</thead>
</table>
| The proposal to develop 1100 new homes with no genuine improvements to the road infrastructure needs to be reconsidered. The A323 already carries a high level of traffic during rush hours heading both East and West. Westwood Lane and Glaziers Lane are relatively narrow roads that currently have lengthy traffic queues during rush hours, especially at the A323 junction. The B3000 through Wanborough is a narrow country road with major traffic congestion currently at the junction with the A31 during both rush hours. In the morning on Wanborough Hill and towards the A3 junction, in the evening on Puttenham Hill and on the A31 slip road.

1100 new houses in the Normandy/Flexford area will only add to this congestion, especially if a new school is built with the additional traffic that would entail.

Much more consideration needs to be given to developing a workable road infrastructure that will ease congestion rather than adding to it and this needs to be in place prior to any additional housing development.

I have read through the Guildford plans and although you state that in all cases you have taken infrastructure into account I cannot see how justification can be made for:

1) the amount of proposed housing in Walnut Tree Close adding to the already congested and narrow road. I do not believe that all of the proposed new residents will rely solely on public transport (although this would be an ideal scenario), as in general most adults own a car. Walnut Tree Close is already an extremely difficult road to traverse and is highly used due to access for the railway station, the Post Office and Businesses based there. The question is: How do you propose to improve the infrastructure and access to the amenities in Walnut Tree Close with the additional housing?

2) I could not see any mention of additional schools for the proposed new residents. Surely this is an oversight?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

• disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object strongly to any 'plan' to build on the green belt. I ask you the question. What makes Guildford a reasonably pleasant place to live? Answer, in my opinion is the green belt. Once that goes there is nothing left, and a total reduction in quality of life with all the associated problems that come with such high density housing, schools, hospitals, pollution etc. In my opinion this is environmental vandalism straight out the top drawer.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

How do you justify this environmental vandalism? High density nasty cheap to build houses at outrageously inflated sale prices on a green belt area with little consideration for the decrepit infrastructure, pot holed roads, schools, hospitals etc and above all the local residents! This sure is going to improve the lot of the people who live round here. Maybe your long term plan is to join up with Aldershot and Farnham and create one ghastly concrete jungle. Oh yes, silly me, its to meet government targets.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I would like to object strongly to the proposed development at Send and Ripley, particularly the A44 site, and for my comments to be seen by the planning inspector.

It appears a previous proposal was rejected and now Guildford BC have decided to ignore this decision and are now looking to push another proposal through, this time with increased house numbers along with gypsy camps and an industrial development built on greenbelt.

As a resident of Worsfold Close, (off Potters Lane) I know how dangerous it is currently, trying to turn on to Potters Lane particularly during the morning and evening rush hours, there is often ill feeling between motorists and I have had several near misses. Towards the end of Potters Lane, as you get near to the A3, the road is mostly single lane and I have seen and been involved with a number of near misses, building more houses, gypsy camps and industrial units will increase traffic and the chances of accidents and possibly fatalities.

Guildford BC obviously see Send as a backwater, out of site and mind, where they can fulfil their quota’s without upsetting the residents living in the expensive part of the borough.

There is really only one way to get from Send/Ripley to Woking, that's over the river Wey at Old Woking, again in rush hour periods and school start and ends, the traffic can back up from Old Woking all the way back to Send village, again this can only get worse.

I also object strongly to Guildford BC’s unbelievable and disgraceful proposal removing Send Village from the Green Belt. This is why many people have decided to make their home here, nearby there are important areas for wildlife, home to many protected species. I understand there needs to be some development, but this should be spread around the Guildford borough and they may need to upset some of their more valued residents, instead of putting so much pressure on the Send/ Ripley greenbelt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing in response to the new Local Plan for Guildford.

I **strongly object** to these extensive plans for development, particularly with regard to the 1,100 houses and seven form entry secondary school proposed for site A46, in Normandy.

My husband and I moved to Normandy just under two and a half years ago, following my retirement. We were delighted to find this area, described by the estate agents as semi-rural, where we could escape the hectic lives we have lead in London and enjoy the countryside, whilst retaining good links to all necessary amenities. We have been even more delighted since moving here to find a strong village community, with a focus of activities centred around the village hall. We enjoy the variety of wildlife that visits our garden and the fact that we can go on local countryside walks.
However, it is not purely for selfish reasons that I object to the local plan. The following are reasons why I think the proposed development in Normandy should not go ahead:

1. The need for a new secondary school has not been proven. I understand that neighbouring schools are currently grossly undersubscribed and that both Ash Manor and King's College are happy to expand, should the future need arise. This would be a far less costly solution.

1. Local roads could not possibly cope with the increased volume of traffic. Both Glaziers Lane and Westwood Lane are in fact 'lanes' and not built for a large volume of traffic. Westwood Lane contains a railway bridge, where the road is only wide enough for one car and the height is restricted (e.g. a double-decker bus would not be able to pass under the bridge). We live on Guildford Road (A323). During both morning and evening rush hours, there are high volumes of traffic, in both directions, making it extremely difficult to leave our drive, or cross the road on foot. At times the traffic can become stationary in either direction. This problem is increased whenever there is a problem on the A31, A3 or A331. This is an incredibly frequent occurrence! There have been a number of accidents on the road between the Fairlands roundabout and Ash, within the last two years. These include more than one fatality and at least one involving a primary school pupil, walking to school.

1. The A46 site is on greenbelt land, a concept which Surrey County Council was instrumental in creating as a means of preventing urban sprawl from linking up towns. In this case Guildford and Aldershot. In addition, this land is not safeguarded.

1. This area is home to a wide variety of wildlife, including many protected species: hedgehogs, newts, bats, dormice, snakes to mention a few. Their natural habitats would inevitably be destroyed by this level of development. Additionally it would lead to light pollution that would be seen from the Surrey Hills Area of Outstanding Natural Beauty.

1. Many parts of the village are already subject to flooding. This development can only exacerbate the problem. There are also areas where the sewers are unable to cope and have overflowed onto residents' gardens.

1. No consideration has been given to the health care of an increased number of residents. It is already extremely difficult to get an appointment at the local surgeries.

1. The area includes a number of Grade 2 listed houses. Surely increased traffic volumes will undermine the strength of their foundations.

To summarise: I consider that if this plan for development in Normandy goes ahead, along with extensive developments also planned for Ash, Tongham and Ash Green, it will be an utter tragedy for generations to come. Once our countryside and wildlife have been destroyed, there is no way back.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Westwood Lane contains a railway bridge, where the road is only wide enough for one car and the height is restricted (e.g. a double-decker bus would not be able to pass under the bridge). We live on Guildford Road (A323). During both morning and evening rush hours, there are high volumes of traffic, in both directions, making it extremely difficult to leave our drive, or cross the road on foot. At times the traffic can become stationary in either direction. This problem is increased whenever there is a problem on the A31, A3 or A331. This is an incredibly frequent occurrence! There have been a number of accidents on the road between the Fairlands roundabout and Ash, within the last two years. These include more than one fatality and at least one involving a primary school pupil, walking to school.

1. The A46 site is on greenbelt land, a concept which Surrey County Council was instrumental in creating as a means of preventing urban sprawl from linking up in this case Guildford and Aldershot. In addition, this land is not safeguarded.

1. This area is home to a wide variety of wildlife, including many protected species: hedgehogs, newts, bats, dormice, snakes to mention a few. Their natural habitats would inevitably be destroyed by this level of Additionally it would lead to light pollution that would be seen from the Surrey Hills Area of Outstanding Natural Beauty.

1. Many parts of the village are already subject to flood. This development can only exacerbate the problem. There are also areas where the sewers are unable to cope and have overflowed onto residents’ gardens.

1. No consideration has been given to the health care of an increased number of. It is already extremely difficult to get an appointment at the local surgeries.

1. The area includes a number of Grade 2 listed houses. Surely increased traffic volumes will undermine the strength of their foundations.

To summarise: consider that if this plan for development in Normandy goes ahead, along with extensive developments also planned for Ash, Tongham and Ash Green, it will be an utter tragedy for generations to come. Once our countryside and wildlife have been destroyed, there is no way back.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to OBJECT to the proposed development at Blackwell Farm.

I object because it is an area of outstanding beauty. It will cause too much traffic in the area. It will impact on the local service such as doctors etc and infrastructure. This will cause pollution problems and noise pollution. It is an area that will impact heavily on the local wildlife. It will also affect ancient woodland and destroy a Greenbelt area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I should like to object to the Guildford draft local plan for the following reasons:

Lack of protection for Green Belt.

Removing green belt from 15 villages including Ripley and Send. It will be an urban sprawl.

So many buildings - taking away the green belt - will increase the risk of flooding in the area

Ripley has already had plenty of homes built - disproportionate housing development. National guidelines state it must be proportional to its locality.

Infrastructure cannot cope. Now there are not enough school places, doctors appointments take 2-3 weeks, public transport is being cut.

Traffic concerns on A3 and M25 which are at capacity now. Most weeks, there is a problem on the roads, our village and local roads see increased traffic. Making the local road less safe for pedestrians and cyclists.

Air pollution from thousand of extra cars, affecting children and the elderly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am a tenant at the Aldershot Road allotments. I fully support this site being retained if not extended for allotment use.

My reasons are, I had a breakdown in 2014 and have suffered cognitive disfunction and memory problems as a result. My allotment has been an absolute godsend for my mental health recovery and thus my physical health. I cannot extol the virtues of this community activity enough. Not only being outside but producing crops and meeting all sorts of people from all walks of life and ages with one common aim and hobby, that of growing our own produce to benefit our health.

Aldershot Road allotment site is a sanctuary for myself but many other allotment users. The site is very friendly and allotment holders help each other out and provide both physical assistance but also advice to newcomers. The social aspect of this is enormous for those of us on the site. We have many elderly tenants who clearly thrive on not only the physical aspect of maintaining their allotments but also in being able to converse with individuals and share a common love of gardening. This is enormously beneficial to physical and mental welfare and thus keeping people out of the NHS system.

Adjoining the allotment land to the north between our site and St Josephs school I believe has been ear marked for development for housing. I think such sites are essential for brown field development and the new occupants will benefit from having the allotments beside them.

However, I am deeply concerned about the vehicular access and egress from the allotment sites both during and after construction. My reasons for concern are that with so many elderly tenants I fear that if they were not able to either use the parking spaces provided or gain vehicular access to their plots they will cease holding their plots. This will be detrimental to their physical and mental welfare and detrimental to us as a gardening community as their knowledge will be lost, which they so readily impart to young allotment holders. We also have a significant number of young mothers with toddlers in prams who work their plots. The removal of vehicular access to the site would also put them off from holding allotments.

This also will be detrimental to health and the ongoing education of their children about where food comes from etc. In this day and age where we are all acutely aware of the lack of knowledge amongst children about how food is grown and where it comes from etc, this education is crucial, as can be demonstrated by the St Josephs plot. Families working plots together is a joy to behold as the bonds within the families are enriched from this organic process. My biggest concern however about the retention of vehicular access from the bottom of the site is for emergency vehicles. The site needs to enable swift access and egress to such vehicles as with an ageing community on the allotments I have no doubt that we will need this facility at some point.

In any plan for the redevelopment of the old “Puttocks” site, please can there be retained vehicular access and parking for allotment holders to enable this thriving community to continue and keep our elderly tenants active both mentally and physically thus saving the public purse money from not being in the NHS system.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

With regard to your recent plan dated 6th June 2016, I would like to voice my strongest disapproval.

We hold a position just off 2 major thoroughfares (A3 and M25), with a good balance of small local shops to serve the small community, and I and neighbours strongly believe that there are not enough amenities nor infrastructure to cope with the surge in proposed development, as well as the surge in construction traffic considering that will more than likely not be using those 2 major roads; hence we will be trapped in a traffic nightmare for the length of construction!.

In view of the latest Brexit Vote, in which our migrant population should be reduced, and a likelihood of a dip in National and Local GDP, I cannot see for a need to build so many new houses, firstly without a massive burden on indigenous Horsley Villagers, from a Financial perspective, and lastly from a necessity point of view.

I urge you and the Guildford Borough Council to reconsider.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the 2016 Draft Local Plan by Guildford Borough Council (GBC) for the following reasons:

**Erosion of the Green Belt**

I object to the proposal to remove (“in-set”) Ripley, Send and Clandon from the Green Belt.

No one in this county, let alone this nation voted for destroying the Green Belt. We already live in one of the most overcrowded parts of the country. Roads are congested, schools are full to capacity and hospital waiting times are a joke. Just to drive out of our village in the morning can take up to 15 minutes to cover a few hundred meters. This is stressful and will only get far worse with more houses.

We are filled with despair at loosing what we have worked all our life so hard for. We have worked hard to ensure our family live in “England’s green and pleasant land” (something that was even shown as a virtue of our nation in the Olympic opening ceremony), away from the suburban sprawl. All this is in jeopardy with this plan.

By building more and more houses, this will not only further congest an already congested road network, but the overcrowding will create further pressure on schools, hospitals, and other services, all of which will require more people to be employed, which will probably result in a further round of house building and so on. What is GBC doing to consider the wellbeing of their constituents? Was not happiness and wellbeing also on our Prime Minister’s agenda?
High volumes of traffic and congestion have negative effects. These include road collisions, the severance of communities, the costs of delays and the unreliability of journey times to people and businesses. Environmental impacts include traffic noise, air pollution and amenity issues. At a global scale, vehicle emissions contribute to climate change. Some parts of the major roads in Surrey operate significantly beyond their capacity, resulting in traffic congestion, and forcing drivers down rural / country lanes to avoid main roads, leading to further congestion and road accidents.

Disproportionate size of sites in relation to rural locations

I object to the allocation of land to the strategic sites of Garlicks Arch (Ripley/Send border), Gosden Hill (Clandon) and Wisley Airfield. The proposed development of these sites will have a disproportionate impact on the surrounding local villages. They will have a permanent and negative impact on each of these communities.

Unbalanced allocation of development in one area of the Borough

Between the M25 and Burpham, a distance of only about 5 miles it is proposed that over 6,500 houses are built. This represents over 40% of the housing proposed in the Local Plan. I object to this area being hit so hard by the allocation of development, which is disproportionate to the rest of the Borough.

I Object to the site A45 The Talbot

This is an unreasonable overdevelopment in a conservation area. Ripley has already been impacted by at least 7 new housing developments in the past 3 years, without any improvements in roads, bus services, schools are medical centres.

I Object to the site A57 The Paddocks

Planning application 09/P/01554 for site A57 was refused permission by GBC, and the appeal was rejected by the High Court in April 2013. Although the site’s continued occupation has been judged completely illegal, no enforcement action has yet been taken by GBC. GBC should take immediate action on the enforcement notices against illegal occupation. The Council should attach high priority to its planning enforcement role and should not stand idle by where there are flagrant breaches of planning rules, particularly on a prominent site like this in a Green Belt / Conservation area.

I Object to the site A43 Garlick’s Arch

Garlick’s Arch is a 100 acre site of Green Belt and ancient woodland which should be protected.

Congestion on the A3 and M25 trunk roads

I object to the development of the strategic sites due to the A3 and M25 already being at capacity during peak hours. Highways England has no plans to look at improving the A3 before 2020. It is therefore not sustainable to identify sites for further development which will worsen the congestion on these motorways and trunk roads.

Congestion on the local village roads and lanes

Our villages are already suffering from severe congestion for much of the day. For example the Newark Lane and Rose Lane junction in the center of Ripley, which at peak hours, is regularly gridlocked due to the volume of traffic, made worse when Ripley High Street (B2215) is used as a detour/slip road when the A3 is jammed. I object to further development which will cause even greater congestion in and around our villages.

Unsuitability of our local roads for heavy vehicles and more traffic

Many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. For example, part of Newark Lane which was resurfaced for the 2014 Olympics cycle route and has been used subsequently for other cycling events, has had to have regular “fixes” to crumbling road surfaces and recurring potholes due to traffic volumes far in excess of the road surface quality used. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
Poor air quality concerns

Further congestion, particularly in built up residential areas will only lead to greater levels of air pollution. I object to further development, which will result a fall in the air quality.

Sites being planned in unsustainable locations

Many of the strategic sites e.g. Wisley Airfield and Garlick’s Arch, are in unsustainable locations. They do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. I object on the grounds that these sites are not sustainable.

Parking issues in local villages caused by larger population

Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems, to which I object.

Local healthcare facilities will be overwhelmed

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. I object to the further stress it will put upon existing overstretched health services.

Local schooling facilities will be overwhelmed

Without proper planning and a commitment to fund new schooling, existing schools will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. I object to the further stress it will put upon existing overstretched schools.

No protection of the environment and heritage assets

I object to the lack of protection of the environment and heritage assets.

I object to the lack of any evidence for the alleged housing need numbers

Nowhere in the Plan document can I find an explanation for why new houses need to be built other than the obvious that there are too many people. GBC should not punish local residents for the errors of central government in controlling immigration. Its residents will applaud GBC for standing up to central government.

I object to the limited consultation period

The Council, having sneaked this proposal in at the last minute without any consultation whatsoever with the community, has only allotted six weeks to register objections to a document over 1,800 pages, this is half the usual time.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the 2017 Revised Local Plan by Guildford Borough Council (GBC) for the following reasons:

1. Housing at Site A43 Garlicks Arch would be on Greenbelt Land.
2. The potential increase from 400 houses at site A43 Garlicks Arch is extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.
3. The inclusion of 6 Travelling Showpeople plots with associated storage facilities is entirely inappropriate in a rural environment within the Greenbelt and there is no identified need within the Local Plan documentation.
4. The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan and so is out of scale with the proposed development.
5. The potential for a substantial increase in industrial floorspace from 7,000 sqm to an unspecified amount at the site A58 Burnt Common does not provide local residents with enough information for a full and proper consultation given the ambiguity and lack of detail within the document.
6. The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, tucked away in policy 4.4.23a and does not allow for full and proper consultation.
7. The increase in housing numbers from 45 to 60 at Site A42 in Tannery Lane will have a significant impact on the already highly congested local rural road network around and within Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPA16/286  Respondent: 15167041 / Andrew Radcliffe  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I have the following concerns.

1. There is significant concern in the community that flooding could become more likely as a result of the proposed development. I would find it unacceptable for any proposed development to increase flood risk to existing properties. I would expect the council to place an onus on the developer to fund all additional works to mitigate the effect of the development and ensure an improvement in the water handling capacity of the local land and water management infrastructure.
2. Having attended the community meetings about the proposed development I have seen no clear evidence to suggest that the village of Normandy is in need of a secondary school. I have been provided with evidence to suggest that there is already excess capacity for schooling places within the borough of Guildford and therefore the premise to build a new school on the suggested site is purely a proposal of convenience to enable development on this piece of green belt land. This is quite wrong and should not be allowed.
3. No other consideration or proposal has been provided as an alternative to build on alternate brownfield sites within the borough of Guildford. I would like to know if the borough council has decided not to follow this course of action due to a lack of resource within the planning department to manage the corresponding increase
in the number of developments that an exercise such as a brownfield site development plan could create. In my mind tearing up greenbelt due to a lack of resource within the local authority is nothing short of a morally criminal act.

4. I am registered visually impaired and use a guide dog as my mobility aid. I am dependent on my hearing to make a safety choice when crossing the road. The roads in the village are already so busy that I find crossing the road a complex, frightening and protracted experience. The additional traffic created by an additional 1100 homes is likely in my view to make crossing the road from Walden cottages at Westwood Lane and Guildford Road at Westwood Lane and Glaziers Lane impossibly dangerous without the provision of pelican or toucan crossings. The proposed increase traffic at Wanborough station is also likely to make crossing the wide road entrance to the station impossibly dangerous. Please investigate and inform me if the Equality Act 2010 places an obligation on the planning authority to ensure that any proposed development does not substantially disadvantage a disabled person such as myself or other persons within my community. The impact of not being able to cross the road independently would increase my dependence on my carer, it would reduce my ability to seek employment and engage in society

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPA16/287  **Respondent:** 15172545 / Lucy Maxwell  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I have the following objections to removing Ripley, Send and Clandon from the Green Belt:

1. **Green Belt**
   - I STRONGLY OBJECT to the proposal to remove Ripley, Send and Clandon from the Green Belt. These are historic villages and there is no sound reason to do this. If this decision moves forward, the Green Belt will be gone forever and the character of the area will be destroyed.

2. **Disproportionate size of proposed development to size of villages**
   - I STRONGLY OBJECT to the size of the proposed developments (e.g. Wisley Airfield, Garlicks Arch on the Ripley/Send border, Gosden Hill in Clandon). These developments are totally disproportionate to the rural villages and will have a catastrophic impact on the local communities.

3. **Unbalanced allocation of development in one area of the Borough**
   - According to the statistics, in the 5 miles between the M25 and Burpham, there is a proposal to build over 6,500 houses. This equates to over 40% of the housing proposed in the Local Plan, which is disproportionate to the rest of the Borough. This is totally unacceptable and I STRONGLY OBJECT to this.

4. **Implications on traffic**
   - Building as many houses as proposed will have a catastrophic effect on the A3 and local roads, many of which are already ridiculously busy and ill-suited to the volume of traffic. How can these roads cope with any more? The site at Wisley Airfield proposed over 2,000 houses which could mean (at the very least) an extra 4,000 cars on the road. Given Highways England has no plans to improve the A3 in the immediate future, how on earth will the surrounding villages be able to cope? For this reason, I STRONGLY OBJECT to the development proposed in the Local Plan.

5. **Congestion on the local village roads**
   - Following on from #4, the villages are already at capacity from the sheer amount of traffic we currently
experience. The parking situation on the high street and surrounding roads is not sustainable. More traffic on our roads from these proposed developments leading to a larger population would be disastrous. I STRONGLY OBJECT to further development which will do nothing to help with the current congestion or parking issues we currently face.

6. **Unsuitability of our local roads for heavy vehicles and more traffic**
   The surrounding villages around these strategic sites have a lot of country lanes which are very narrow and often allow for only 1 car to pass at a time. The local roads are not in an optimal condition either which would only get worse with more traffic. For these reasons, I STRONGLY OBJECT to the development proposed in the Local Plan.

7. **Impact on air and noise pollution**
   Increased traffic on the road will simply mean more pollution, both air and noise. For this reason, I STRONGLY OBJECT to the development proposed in the Local Plan.

8. **Lack of proper infrastructure**
   As with all large housing developments, no thought is ever given to the current infrastructure. Schools and doctors' surgeries, to give just 2 important examples, are already at breaking point so how will building the amount of houses proposed in the Local Plan alleviate this? Much more thought has to be given to the local existing residents and impact on their quality of life. For these reasons, I STRONGLY OBJECT to the development proposed in the Local Plan.

9. **Impact on utilities**
   The villages that surround these strategic sites are already close to capacity in terms of the electrical network and sewers so building a development such as Garlick’s Arch will have a catastrophic effect on these essential utilities. For this reason, I STRONGLY OBJECT to the development proposed in the Local Plan.

10. **Lack of public transport**
    The sites at Wisley Airfield and Garlick’s Arch are in totally unsustainable locations as they are not close to railway stations. The bus timetable between Woking and Guildford is being reduced even further this year so that in turn means residents are going to be more reliant on their cars. For this reason, I STRONGLY OBJECT to the development proposed in the Local Plan.

11. **Impact on local policing services**
    With funding being cut to police services, how will building large developments, such as Garlick’s Arch and Wisley Airfield help? For this reason, I STRONGLY OBJECT to the development proposed in the Local Plan.

12. **Impact on the environment**
    Destroying the Green Belt and beautiful greenery/woodlands in these historic villages around the strategic sites will have a catastrophic effect on wildlife and nature. This is completely UNACCEPTABLE and there appears to be no consideration for issues these developments will cause the conservation areas or Special Protection Areas. For this reason, I STRONGLY OBJECT to the development proposed in the Local Plan.

13. **No protection of heritage assets**
    I STRONGLY OBJECT to the development proposed in the Local Plan as I don’t believe there has been any consideration for the protection of our heritage assets.

14. **Insufficient pedestrian footpaths/cycle lanes on local roads**
    With increased congestion which will be caused by building large sites, such as Wisley Airfield or Garlick’s Arch, this will have major ramifications for existing residents. Our footpaths are insufficient now so increasing the amount of vehicles on the roads will increase the danger to pedestrians. There are many cyclists who like to use the local roads, for which we don’t have cycle lanes. Is it worth risking human life to build such unsuitable developments? For this reason, I STRONGLY OBJECT to the development proposed in the Local Plan.

15. **Consideration for local communities**
    By allowing these ridiculous developments in totally unsuitable locations, such as Wisley Airfield and Garlick’s Arch, we are in danger of destroying local communities that have existed for years. The villages around these strategic sites are not suitable for turning into towns – for reasons stated above, the infrastructure and local amenities will not cope with a larger population. The needs of the local communities MUST come first. Once the Green Belt land is gone, it is gone forever. The South East is being paved over by greedy property developers who have no knowledge of the local areas. For this reason, and all reasons stated above, I STRONGLY OBJECT to the development proposed in the Local Plan.

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

As it is clear that no improvements to the A3 or M25 would be possible before 2020, no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15540  Respondent: 15172641 / Michael Heard  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to poor air quality concerns (Policy I3)

The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on the health of local residents especially the young and elderly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to lodge my strong objection to the Draft local plans.

The Councils disregard for the Protection of the Green Belt is of great concern to me.

The proposed removal of the villages from the green belt,

will potentially allow disproportionate housing developments to be built.
These large developments bring with them a huge demand on already stretched local resources, overloading schools, health services and transport systems.

The already overcrowded roads, will potentially see thousands of additional cars and commercial vehicles flood into the villages, where the lanes were never designed to accommodate them.

This brings with it the problem of pollution, which is a particular problem for the young and elderly.

I have regularly been dismayed to discover that these developments with the promise of 'affordable housing' are far from 'affordable'
with very little chance of young families, or local people being able to afford them.

As a Surrey resident for 33 years, I feel that the threat to Surrey and the villages surrounding Guildford has never been greater,
do not destroy our heritage, and that of future generations by allowing the destruction of Surreys Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object most strongly to the proposal to remove Ripley Send and Clandon from the Green Belt.

There are Brownfield sites that could be utilised, ie at Burnt Common, before considering Green Belt development at Garlicks Arch and Wisley Airfield.

I object to the Borough Wide Strategy (Policy S2)

GBC’s proposal for 13,860 new houses differs from all the other Borough Councils in Surrey.

The Plan is unbalanced across the borough; 36% of all the Plan’s new housing is proposed in the Ripley Send Clandon area,

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages, this mass urbanisation of Surrey villages is deplorable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposal in the local plan on the grounds that the Southern County Searches (Sitescope Ltd) report E.29*78.SN_HCP dated 5th January 2005-identifies proposed site GBC recorded landfill site ref GU/12 with a type of waste identified as 'unrestricted'. This causes me concern as to what it does contain and dangers if disturbed.

I object to the proposal in the local plan on the grounds that the Traveller Accommodation Assessment research, purported to have been undertaken in June-July 2012 by Mill Field services, cannot be so. The Sittingbourne based market research company was dissolved in January 2011 according to the government companies site.

I am raising objections to the Local Plan. It's far to much building with the infrastructure we have at the moment. I agree that we could do with some more houses, flats and bungalows for the disabled, but these should be council owned for the average working man. About 200 per village should do it. More cars means traffic pollution and I suffer badly from air pollution.

POLICY A42

Clockbarn in Tannery Lane because 33% increase in the number of houses on that land is too much. Where are all the children going to go to school? You've pulled down the school and placed the children in a eyesore of a school. The playground is so small the children can't run around without banging into someone.

It ignores all the previous complaints against the plans.

Tannery Lane is way to narrow to cope with the flow of traffic in that area.

POLICY A43

Land at Garlicks Arch, Send Marsh

Do we in Send really need 400 homes? They won't be affordable to the young of the area which means my youngsters will be pushed out. As far as I know the travelling showman live in the Dorking area not Send. Any residents in these houses you plan on building won't like the big diesel vehicles and generators travelling in and out. Now we know diesel is a dangerous polluter why put them in an area with houses.

Answer (if comment is on questions 1-7 of the questionnaire): ()

GUILDFORD PROPOSED LOCAL PLAN 6/6/2016
FIELDS BEHIND SHALFORD VILLAGE HALL

Although a resident of Dunsfold but a member of Shalford LTC I wish to make known my objections to the current version of the local plan which removes the fields behind the Village Hall and Tennis Club from the Green Belt and puts them in the Shalford settlement boundary.

Although these fields have been classified as “open spaces” there is no confirmation to say that this would give them the same degree of protection as the Green Belt from housing development.

Any Construction on these fields which is 25ft above the village hall would tower over the tennis courts and bowling green and totally destroy the Green aspect of the village.

The considerable traffic from a development would have to exit on Chinthurst lane not only adding to the traffic chaos and pollution but increasing the potential for an accident.

By implementing a small adjustment back to the 2003 boundary GBC could protect these fields and ensure they remain open spaces.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )  

Answer (if comment is on questions 1-7 of the questionnaire): ()

This section of the document is not sound because it fails to address serious concerns about pressure on road infrastructure. Traffic congestion in the immediate vicinity (Westwood Lane, A31, Puttenham Heath Rd, Aldershot Rd etc.) has been increasing month by month. If each proposed household within this section were to own just one car, the impact of 1,000+ cars on local roads would be entirely unsustainable, whether they were used for the daily commute to work, for ferrying children, for shopping or for pleasure. The congestion referred to above occurs at all times and is not restricted to the normal rush hours. Non-residents coming into the area (visitors, teachers and parents of children at the proposed school etc.) will place further pressure on local infrastructure.
The area referred to in this section of the document is prone to flooding and has been under water within the past 24 months. It is difficult to see how this propensity to flooding can be resolved in a way that will prevent risk of flooding either to the proposed houses or those in the surrounding area.

The development proposed in this section of the draft plan would alter significantly the nature of the immediate surrounding area, providing a densely populated settlement outside the boundaries ofGuildford town in what is still largely a rural area. Combined with plans for other sections of this document (A47: land to the east of the Paddocks plus new traveller and show people's sites in Normandy) and planning applications already under consideration e.g. proposals for some 80 houses at Wyke, this major development proposal would change entirely the nature of this area rich in wildlife, natural woodland and vegetation.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

8) I object to the Infrastructure Schedule (Appendix C)
   The Plan takes no account of the infrastructure needed for the Garlick's Arch site.
   e.g. utilities, sewerage and local services.

9) I object to the lack of provision for increasing the size of the local Medical Centre.
   The Villages Medical Centre is already full.

10) I object to the lack of provision of additional School places.
    The local schools are being enlarged to take account of the projected figures for the current population of Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPA16/359  Respondent: 15174145 / Kathleen Mylet  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base
I object very strongly to Guildford Borough Council's Local Plan dated June 2016.

Below are detailed my objections to policies within the Plan.

1. I object to removing Send, Ripley and Clandon from the Green Belt. (P2)
   There are no unusual circumstances for these villages being removed.

2. I object to the plan to build 400 houses and 7000 square metres of light industrial units at Garlick's Arch, Sendmarsh, Ripley. (A43)
   Garlick's Arch is protected from development as Green Belt.
   Also, it is an Ancient Woodland with trees going back to the 16th Century and is full of wildlife.

3. I object to the creation of a 4-Way Junction with the A3 at Burntcommon. (A43a)
   This would be a disaster for Clandon, Sendmarsh and Send, leading to Gridlock in these villages.

4. I object to building in areas where there is a risk of flooding. (P4)
   The land at Garlick's Arch has been classified by the Environment Agency as being at risk of flooding.
   The field at Oldlands farm is often under water.

5. I object to the disproportionate amount of development in one area of the Borough. (S1)

6. I object to the last minute inclusion of new sites with less than two weeks notice.

7. I object to the poor quality of air concerns. (P13)
   Noise and air pollution is already bad.
   With the additional houses being built and resultant extra traffic likely to cause extremely poor air quality to residents in properties adjoining Portsmouth Road.

8. I object to the Infrastructure Schedule (Appendix C)
   The Plan takes no account of the infrastructure needed for the Garlick's Arch site.
   e.g. utilities, sewerage and local services.

9. I object to the lack of provision for increasing the size of the local Medical Centre.
   The Villages Medical Centre is already full.

10. I object to the lack of provision of additional School places.
    The local schools are being enlarged to take account of the projected figures for the current population of Send.

11. I object to our Villages being turned into Towns.
    We bought our properties because they were in a village and we liked the Village atmosphere.
12. I object to the lack of any evidence of the alleged housing need numbers. (S2)
13. I object to the erosion of the Green Belt.
14. I object to the limited Consultation Period.
15. I object to the fact that Guildford Borough Council has not followed the Correct Process in their dealings with the Public in putting forward the Guildford Local Plan 2016.

Comment ID: PSLPP16/889  Respondent: 15176097 / W J Wortt  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have recently been reminded that included in the local plan is the proposal to build an additional 14000 homes within the borough.

I have several objections to this: -

1/ None whatsoever should ever be built on land designated as Greenbelt. This will ruin the existing beauty of the borough.

2/ The additional housing is not what the existing residents want, it will lead to overcrowding and the existing infrastructure cannot cope. It would be far better to let people live in plentiful existing housing which is available in other parts of Britain.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/292  Respondent: 15176129 / Harry Strudwick  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing with reference to the final draft local plan and would like to raise my objections.

With reference to the policies P2, A42, A43, A43a and A44 I object for the following reasons.

Policy P2 - Send is a small village community on the edge of Woking and it provides a buffer between the town and the open countryside. To remove Send from the Greenbelt is a short-sighted act of lunacy. Greenbelt is designed to provide...
protection from urban sprawl and to erode it in this way is irresponsible and indeed there were repeated specific election promises to protect it.

We are all custodians of our countryside and it needs protecting from reckless planners for future generations.

I object to the large number of houses proposed in the plan on all of the sites. The increased population will undoubtedly place extra traffic onto roads which already struggle to cope with the current population. The A247 through Send is a small road in a bad state of repair due to traffic loading. During certain periods of the day the traffic queues back for more than a mile and as soon as any maintenance or service works are undertaken the road becomes realistically impassable during peak periods. The village of Old Woking provides a bottle neck for traffic heading toward Woking and Maybury and increasing population in Send and beyond will only exacerbate the situation. Moreover, I am a young adult who drives and has been a victim of a road traffic collision (RTC) on the roads in Send, in their current state, due to the reckless driving of others. Therefore, not only will an increase in congestion occur, it may also result in an increase in RTCs.

Policy A42 – I object to the building of 45 houses at Clockbarn Nursery. Apart from this area being subject to potential surface water flooding this will just bring more traffic onto the A247 Send Road or feed it through narrow and single track rural roads towards Newark Lane.

Policy A43 - I object to the proposed employment space at Garlick’s Arch for the same reasons as above. The increase in HGV traffic, should this go ahead, will cause more congestion and damage to the roads in and around Send. I also object to the proposed 400 houses. This is a new site that has not previously been consulted upon; it was not included in the Regulation 18 draft. There is no need for these additional houses on top of the thousands already proposed for the borough.

Policy A43a - I object to the proposed A3 junction for reasons of additional traffic congestion, damage to existing roads and reduced air quality and increased pollution.

Policy A44 - I object to the proposed development for housing and travellers pitches in Send Hill for the following reasons. This is again a newly identified site and was not included in the Regulation 18 draft; it has not previously been consulted on and is therefore inappropriate to include it in this consultation.

Send Hill is a quiet residential road surrounded by countryside. There is insufficient access to the proposed site, it is inappropriate for the proposed purposes and not in keeping with the area. Indeed other private local planning applications have been turned down for this reason. The subsoil of the site contains documented unsafe landfill waste which is currently vented. The road is narrow, single track in places, with no footpaths and as the road is straight it is already used as a rat run for some vehicles to cut through to the A3. In addition to this, the dumping of rubbish on these narrow back roads, which seems to be deemed appropriate by some, is disrespectful, despicable and out right dangerous. On a walk the other day, my family and I came across such an incident on a blind corner (please see the photo evidence below), on which new residents and travellers and indeed the older population of this area, may drive quickly around presuming it is safe and yet again be the cause of more RTCs and potentially life threatening incidents.

(see photo in attached PDF)

The road is used by the George Abbott school bus and many school children walk along Send Hill to meet the bus at the junction with the A247. Additionally younger children walk with families to attend the primary school currently in Bush Lane at the end of Send Hill. Even when the school moves to its new site the children will still be walking along Send Hill to attend it. Increased housing and the resulting traffic will place these children at added risk. Indeed rather than building more homes Send Hill should be subjected to traffic calming measures to protect the children who walk to school and other residents.

Send Hill is home to a number of bats who require protection from development and there are native bluebells in the woodland which also need to be protected.

To conclude my objection to the plan I would like to mention the local services such as health centres and schools which are already under a huge burden.

I would like my comments to be seen by the Inspector please

I object to the local plan as it pertains to the village of Send as it threatens to seriously and adversely affect the village where I have lived for over 25 years.

I understand the need for more housing, but I believe there is still scope to build on 'brownfield' sites, and particularly within Guildford where they are most needed. Some extra housing in Send would be acceptable, but the sheer number of houses (485) proposed in this small village is not feasible without seriously undermining the character of the village and overwhelming the current infrastructure. In particular the road through Send is already congested during rush hours, and this would become a major bottle-neck. The proposed enhancement of the junction with the A3 also threatens to increase traffic levels through the village. We would also need more facilities both for schooling and medical support which do not appear to have been adequately considered in the current plans. I also object to Send being removed from the green belt. This is an open invitation for further in-building which would further aggravate the situation, and appears to be totally unnecessary to fulfil the identified objectives. Further, the housing proposed both in Send and all along the A3 threatens to undermine the rural nature of the area in which we live. The green belt is there for a purpose to give in this case a barrier of green between Woking and Guildford. I attended the meeting in June in Send and as horrified by the plans for more houses both here in Send and at Merrow - Policy A25 and I object to these proposals.

This area is in danger of being spolit for future generations.

I look forward to your reponses to these objections.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/8296  Respondent: 15176769 / C McCleery  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A39

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the settlement boundary being moved from behind the houses on the west side of Kingston Meadows being out of the Green Belt.

Kingston Meadows are very well used by many people of all ages. It is in the centre of the village for all people to have easy access and will be needed more when Horsley expands to meet housing needs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/899  Respondent: 15176769 / C McCleery  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4
Local and national celebrations are held there e.g. Queen's Birthday, village days or more. It provides sports facilities - cricket, football, tennis, kiddies playground and gymnastic equipment and a cycling track. Many people use this place to walk their dogs. All this makes Kingston Meadows a very important social asset and is important to village life.

This should be preserved and kept in the Green Belt to keep it safe for the future.

I wish to register my OBJECTION to the new Local Plan and in particular its effect on the Green Belt which the conservatives vowed to protect in their election manifesto.

In particular:

1. I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford and is the whole purpose of the Green belt.
2. I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.
3. I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford’s urban brownfield areas much closer to existing transport hubs.
4. I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.
5. I object to the large proposed development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.
6. I object to the building on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded.

<tr>
<td>I object to Policy A42 primarily because it is an erosion of the green belt and will spoil open countryside along the Wey Navigational. In addition the access road i.e. Tannery lane is a narrow country lane with passing places for oncoming traffic. 60 houses with an average of 2 cars per house will put an unrealistic strain on the road. Also the junction of tannery lane at either end is wholly unsuitable to this amount of traffic and will cause traffic issues.</td>

<tr>
<td>I object to Policy A43 for various reasons. The tens of thousands of objections already made are simply ignored by GBC. The number of homes is excessive. The junction of the B368 Send Marsh Road and B2215 Portsmouth Road is already extremely difficult to exit particularly when turning right and the c1000 additional cars in Garlick’s Arch will make this whole area a traffic nightmare. Also the whole area of Garlick’s Arch floods every Winter and there is much documented photo evidence of this as there is a clay shooting club who use the area and they regularly shoot over what is essentially a lake. It has a flood zone 2 allocation. There is NO proven demand for travelling showpeople plots in this location.</td>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A58 because this enormous industrial development is simply not needed. Slyfield estate has empty units and also space to extend into and they want to do it so there will be no objections!! I object to the underhand wording in the plan of changing from a “maximum” 7,000 sq ft to a “minimum” of 7,000 sq ft. This development will also cause traffic chaos in the area. Most mornings when the A3 backs up at the M25 junction people come off at the Send slip onto the B2215 (past this proposed development) and follow it through Ripley trying to cut out some of the traffic queue. This backs up the Portsmouth road causing further issue at the junction with Send Marsh Road and at the roundabout with the A247. A huge industrial park with the associated articulated lorries etc will only exacerbate the problem and make the traffic untenable. In addition if you then create an on/off ramp to the A3 on the A247 then this junction will become the main route into Woking for traffic coming from the South on the M25 and it will result in traffic gridlock. This has not been thought through.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The potential increased development would lead to even more traffic using Horsley and Ockham Road North in particular as a cut through to the A3. We have already had numerous incidents with lorries and vans striking pedestrians, striking the railway bridge and driving way above the speed limit. The parish council have complained numerous times but Guildford Council have done NOTHING to address these concerns and therefore the proposed development will make matters even worse.

Although Guildford Borough Council state there will be increased investment in infrastructure we currently see very little of this in East & West Horsley. Roads are at a dangerous level of disrepair which is damaging vehicles which increases the risks of accidents. Drainage is poor particularly on Ockham Road Road where drains regularly flood.

Comment ID: PSLPP16/1532  Respondent: 15177537 / Elizabeth Guest Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
In addition to poor roads and drainage the current infrastructure in East & West Horsley does not support the plan. Although the Council mentioned a new primary and secondary school and even if these were built our roads, rail and public transport wouldn't be able to support the impact causing gridlock throughout the village. Our medical centre in East Horsley is severely under pressure as it is and therefore further extensions would be required however this would only follow in 5-10 year time after massive development has taken place showing a complete lack of support to the community.

Although Guildford Borough Council states they will protect the Metropolitan Green Belt which I fully support they then go on to show through analysis in the Appendix that c65% of the development proposed in the Proposed Submission Local Plan are to be built on land currently within the Metropolitan Green Belt. This would lead to the devastation of our beautiful and historic village one being East & West Horsley where over 500 house are proposed on the Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

---

My concerns relate to the scale of housing proposed and the percentage of which will be in Green Belt. Although Guildford Borough Council have stated they will protect Green Belt they then go on to contradict this whereby stating in the appendix (policy p2) that c65% of the proposed housing will be in the Green Belt. This will lead to ribbon development and our beautiful and historic villages and rural areas will be destroyed. In addition to this I do not see how the infrastructure of our villages can support such development and Guildford Borough Council have provided little comfort on how they will improve rail and road infrastructure in addition to providing other services to support such mass development.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

I object to the lack of detailed consideration given to consequences of the effect on the flood meadows next to Clay Lane. By building close it will cause immediate water run-off to the meadows and the flood risk is increased dramatically. The meadows already flood during summer months and in winter the water floods across Clay Lane causing traffic build up. If large vehicles require direct access the Slyfield Industrial Estate then additional and closer on and off roads must be provided to the A3 without disturbing the already congested local roads.

Comment ID: PSLPA16/320  Respondent: 15178305 / Nancy Shafee  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to register my objection to the current plan to overdevelop the villages of East and West Horsley endangering their status as villages and trying to turn them into small towns.

Primarily my objections are as follows:

Infrastructure

The roads in the Horsleys are coping with considerably more traffic than they were designed for.

In particular East Road/The Street running through West Horsley between the A246 and Ockham Road is frequently congested with cars queuing back along the road at both ends, worse at busy times of the day.

Ockham Road from The Drift intersection up to the station is particularly busy with business and school traffic.

These roads are now too busy to be safe for young cyclists who should be able to cycle to school in a so-called village.

Ripley Lane and The Drift are in poor repair as are stretches of East Road/The Street and further heavy traffic will be detrimental.

The junction with the A3 at the Wisley roundabout is already dangerous with cars queuing back to the roundabout at busy periods and drivers taking unacceptable risks to get into the middle and outside lanes of the northbound A3 to avoid the queues up to the junction with the M25.

There are few buses through the villages. Each new house is likely to have at least one, and probably two cars.

Has anyone thought of the impact all this extra traffic will have on air quality or doesn’t our health count?

There appears to be no evidence to support consideration for additional parking in the villages, at the station, shopping paraes or the village halls for all these additional residents.

Drainage and surface water

Housing plans recently have run into difficulties with the disposal of surface water. Additional foundations can only encourage further surface water to gather. On roads this often causes drivers to swerve into the oncoming traffic to avoid stretches of deeper water. Furthermore surface water on the roads is not safe for cyclists, nor pleasant for pedestrians.

Has anyone thought of the stress so much additional housing will cause to the waste water systems?

Education & Healthcare

When we arrived in West Horsley 20 years ago we couldn’t get our children into the village school. A recent telephone call to the secretary of The Raleigh confirmed it is still the case that local children frequently have to travel many miles to school. I find there are no plans to increase provision for schooling within the Horsleys. How are new families to be accommodated without causing further traffic upheaval?
We already have to be ‘ill by appointment’. It has been impossible to get an appointment with one’s chosen doctor within one week, and often much longer. In the holiday months one can wait considerably longer to see one’s chosen GP and often the wait for a physio referral is upwards of six weeks.

East and West Horsley are VILLAGES, among the last remaining examples near London. They are not dormitory offshoots of Cobham and Guildford which is what they will become if these plans are allowed to go through.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/321  Respondent: 15178369 / Geoffrey Wilkinson  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object to the proposal to create a four way junction on the A3 at Burnt Common (Policy 43A) by extending north and south access as this will increase traffic enormously on the A247 which is already at full capacity through Send at peak times and experiences huge traffic jams when even minor road works are required along its length. This new junction would result in Send being used as a cut through to the A3/M25. The proposal will also increase the volume of traffic on the A247 through West Clandon which is totally unsuitable for any significant volume of HGV traffic due to a very narrow stretch within the village where two large vehicles are unable to pass each other.

- I object to Policy A43 Garlick’s Arch as this substantial development was included in the Draft Local Plan at the last minute with less than two weeks’ notice and with insufficient consultation.

- I object to Policy A43 Garlick’s Arch, as the proposal to build at least 400 homes and industrial facilities will not only put impossible pressure on the existing road network, but other infrastructure such as schools and medical facilities will be insufficient to support this development. The Villages Medical Centre in Send is already at capacity and there is no secondary school proposed for Ripley and Send which even now causes problems for many children who are unable to get in to the already oversubscribed closest secondary school George Abbot in Burpham.

- I object to the large proposed development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Ripley and Send.

- I object to the removal of Send and Ripley from the Green Belt because the villages and their countryside provide a necessary buffer between Woking and Guildford.

- I object to all proposals to build on the Green Belt in Send, Ripley and elsewhere in the borough because all future required development can be accommodated in Guildford’s urban brownfield areas much closer to existing transport hubs.

- I object to the proposal to remove Ripley, Send, Wisley, Clandon and other villages from the Green Belt as this will open up these villages to even more excessive development and will destroy much of the existing open
landscape and countryside, potentially creating a continuous urban development from the M25 down to the A31 Hogs Back.

- **I object** to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.

- **I object** to the complete failure of Guildford Borough Council to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I object to the 2016 Draft Local Plan on the grounds that:

- infrastructure requirements have not been properly considered and are inadequate to deal with proposed housing levels. Roads, doctors and schools will be unable to cope.
- the proposed development is disproportionate to the capacity of the area affected to accommodate it.
- amounts to an excessive development within one area of the Borough and is contrary to the Borough’s stated objective of ‘balancing the needs of residents with protecting the borough’s most important countryside, landscape and heritage’.

In particular, I object to the following proposed sites and developments:

- Policy A43 Garlick’s Arch plus Clockbarn Nurseries and Send Hill; they are not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded.
- Policy A35 Wisley; it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads.
- Policy A25 Gosden Hill Farm Merrow; infrastructure requirements have not been properly considered and are inadequate to deal with proposed housing levels.
- Policy 43A - the proposed new interchange onto the A3 at Burnt Common.

The combined effect of these substantial proposed developments within close proximity will place an unsustainable burden on the infrastructure of the areas affected. The surrounding roads are already extremely busy and in particular the resulting increase in traffic on the A3 and M25 will be disastrous. The A3 is already at a near standstill on the approach to the M25 during the morning peak time and this will become substantially worse by the construction of upwards of four and a half thousand houses, plus commercial/industrial units on these three sites combined. In addition, this will particularly result in the village of Send being gridlocked all day.

<td>The 2017 Draft Local Plan now proposes an increase in the development envisaged in the 2016 Draft Local Plan. 60 homes are now planned in place of the 45 homes originally proposed– an increase of one third. This completely ignores previous objections to the traffic problems which will be caused by this development on a site which is served by very narrow roads and the increase in the number of homes now proposed can only make matters worse. It will also increase the impact of surface water flooding which is already a problem in this area.</td>

Again, despite numerous previous objections, the Council have now allocated this site for a **minimum** of 7,000 sq. m of industrial space, instead of the previous **maximum** of 7,000 sq. m, thereby creating the opportunity for unlimited development on this site in the future. These proposals are an unnecessary and inappropriate development within the Green Belt and will only increase the existing traffic gridlock in this area.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

9.) I object to the lack of consideration of infrastructure improvement. It does not make any sense to have a plan that effectively merges all villages along the A3 from Wisley to Blackwell Farm. In order to make it sound, very significant infrastructure improvements would need to be made, including, but not restricted to, completely rebuilding the A3/M25 intersection to make it freer flowing and an additional lane to be added to the M25 in either direction. The A3 through Guildford would need to become 3 lanes too, and the junction with the A31 Hog’s Back significant altered / improved.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
4.) I object to the provision of sound evidence. The reduction in ELNA of 80% since the 2013 survey means that the need for industrial space at Burntcommon is no longer present.

7.) I object to the situation being labelled as “exceptional”. There is nothing exceptional about the current situation, and if anything, the Brexit vote should put all development on hold until its impact can be fully assessed. The demand for housing may fall if there is a resulting reversal in immigration trends, and foreign student choosing to come to the UK, for example.

8.) I further object (following on) to the plans being based on insufficient evidence of future housing needs. Again, with reference to the huge potential of the Brexit decision.

GBC Local Area Plan

I have tried to use the only process but it is too difficult to navigate and I have therefore set out my further objections in this correspondence:-

1. I object to the process. The correct process has not been followed: Regulation 18 should have been followed bearing in mind the significant changes that have been made to the plans, more widely, and specifically at Burntcommon, (Garlick’s Arch policy A43), and at land west of Winds Ridge and Send Hill (A44). My understanding is that this invalidates the whole process.

2. I object to the limited consultation period. The impact of the proposal on the locality is so high that further consultation is necessary.

3. I object to only 2 weeks’ notice being given for the inclusion of new sites in the plan.

Policy A42

a. A 33% increase in the number of homes when there were so many objections to the original 45 makes no sense whatsoever. The process is illogical and appears to be designed to bulldoze plans through which is undemocratic.

b. It will worsen access and traffic problems at the junction of Tannery Lane and A247 junction. Vehicular access to Tannery Lane is extremely limited.

c. It will worsen water flooding which is already bad.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43

a. Once again, the process is illogical. Thousands of previous objections have been ignored. This makes no sense.

b. It will join up the villages of Ripley and Send, and defy the whole purpose of the greenbelt.

c. The local road infrastructure in Send and Ripley is not able to handle the resulting increase in traffic volumes.

d. This ancient woodland has been there for many hundreds of years. It fails “exceptional circumstances” criteria for developing the greenbelt.

e. Demand for housing figures have decreased since the last plan, yet despite this, the houses allocated to Send has gone up. Again this makes no sense.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1652  Respondent: 15180193 / Paul Bedworth  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy A58

a. It was deleted from the 2014 draft due to the number of objections made: why is it back? Another example of a process that does not follow – logically or make sense for democracy.

b. Where is the proven demand for warehousing? If it is there, why are other local units lying empty, for example in Slyfield? I understand that the 2017 Employment Land Need Assessment concludes that there is a REDUCTIUON in demand in industrial land for the borough (3.9 hectares) so why is a proposal to increase by 10 hectares at Burntcommon even being considered? Once again the process seems completely illogical, not “joined up” or at worse, broken.

c. Why would you sacrifice green belt when there is brown field sites available?

d. It will create gridlock on the surrounding roads.

e. It will destroy the character of the local area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPA16/346   Respondent:  15180833 / Mark Humphriss   Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford and should be retained.
- I object to the building on the Green Belt at Send Hill because it is not justified and the Green Belt is meant to be permanent and not continually eroded.
- I object to all proposals to build on the Green Belt at Send because all the development that is really needed can be accommodated in easily in Guildford’s urban Brownfield areas which are much closer to existing transport hubs.
- I object to all the proposed sites in Send because they were not included in the previous consultation in 2014. This is a significant addition to the plan and has not been properly consulted on.
- I object to the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt.
- The subsoil of the existing site contains documented unsafe land fill waste which is currently vented.
- The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.
- I object to the fact that infrastructure requirements have not been properly considered and are inadequate to deal with proposed housing levels. Roads, doctors and schools will be unable to cope.
- I object to the proposal in the local plan on the grounds that the site is not large enough for the proposed use.
- I object to the proposal in the local plan on the grounds that it would cause adverse impact on street parking.
- I object to the proposal in the local plan on the grounds that Send Hill is a single track country road and too narrow to provide sufficient access to the site or accommodate the potential new levels of traffic the proposed development would bring.
• I object to the proposal in the local plan on the grounds that Send is in green belt. The proposed inset is inappropriate due to its permanent green belt status.

• I object to the proposal in the local plan on the grounds that Send Hill is a narrow road result in loss of a turning point for vehicles.

• I object to the proposal in the local plan on the grounds that it would impact the nature reserve nearby. The proposed site is a quality green belt amenity area within countryside and would be spoilt by development.

• I object to the proposal in the local plan on the grounds that the existing road and parking infrastructure is already inadequate or under pressure and could worsen with the planned development, reducing quality of life.

• I object to the proposal in the local plan on the grounds that too many houses are proposed to Send/ Send Marsh are and the impact on traffic congestion and local services would be unacceptable.

• I object to the proposal in the local plan on the grounds that the proposed number of houses potentially could result in 92 extra cars in Send Hill which is already suffering from congestion particularly at school run time.

• I object to the proposal in the local plan on the grounds that the proposed number of houses is disproportionate to the allocated area.

• I object to the proposal in the local plan on the grounds that this would cause loss of village identity, be detrimental to the community and increased flood risk.

• I object to the proposal in the local plan to provide 2 travellers pitches on the grounds that the proposal is contrary to Planning Policy for Traveller Sites (PPTS). In that the proportion of pitches per houses being built is disproportionate. The policy states that the proportion of traveller’s pitches should not exceed 2 per 500 homes. The proposal exceeds those recommendations.

• I object to the proposal in the local plan to provide 2 travellers pitches on the grounds that this proposal has not been previously consulted on.

• I object to the proposal in the local plan on the grounds that a Wasteland Solutions environmental report on Send Hill dated March 2004 gave evidence of past ponding of water in the excavated area. Further development would disturb water table and increase risk of flooding to my property.

• I object to the proposal in the local plan on the grounds that the proposed development site (A44) was used as GBC registered landfill site, not a quarry as listed as reference LLA 2081 in the local plan.

• I object to the proposal in the local plan on the grounds that the 1963-8 Ordnance Survey maps of proposed site mark it as “refuse and slag heap”. It is therefore unsuitable for such a development on health reasons.

• I object to the proposal in the local plan on the grounds that the 1971 Ordnance Survey maps of proposed site mark it as “refuse tip” prior to when proper licensing/registration was required. The date of the landfill works predates the 1999 EU Landfill Directive regulations. I therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials.

• GBC has installed gas monitoring wells on site since July 2000. One well recording methane gas discharge.

• I object to the proposal in the local plan on the grounds that a Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies the proposed site as GBC recorded landfill site Ref GU/11/ LLC with type of waste not identified. The date of the landfill works predates the 1999 EU Landfill Directive regulations. I therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials.

• I object to the proposal in the local plan on the grounds that a Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies proposed site GBC recorded landfill site Ref GU/12 with type of waste identified as “unrestricted”. This causes me concern as to what it does contain and dangers if disturbed.

• I object to the proposal in the local plan on the grounds that both the Envirosearch Report RS1100201_1_1 dated 17th February 2004 and historical map data and information from GBC has identified site as landfill and has “areas of potentially contaminative industrial activities”. Development of this site would be a health hazard. The recent news reports of a child dying from seepage of contaminated ground following flooding prove that developing any such sites is a danger to health. The Daily Mail has also recently had an article on how the dangers of living near landfill site raises cancer concerns. The paper referenced a study published by the International Journey of Epidemiology which tracked 242,000 people living near landfill sites in Italy.

• I object to the proposal in the local plan on the grounds that both the Envirosearch Report RS1100201_1_1 dated 17th February 2004 identifies “potential risk from landfill gas migrations” which I believe is a health hazard.

• I object to the proposal in the local plan on the grounds that both Envirosearch Report RS1100201_1_1 dated 17th February 2004 concludes “potentially contaminative industrial sites identified from analysis” of Ordnance survey maps.

• I object to the proposal in the local plan on the grounds that the Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies proposed site as a local authorised landfill site as licences
under Part II of Environmental protection Act 1990. The proposed site is not a quarry as specified in the GBC Local Plan. And is therefore not suitable for the proposed usage.

- I object to the proposal in the local plan on the grounds that the Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies proposed site as potentially contaminative industrial land. With usage of “Heap and unknown constituents”. This causes me concern as to what it does contain and dangers if disturbed
- I object to the proposal in the local plan on the grounds that the Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005 Identifies changes to proposed site could cause potential ground water vulnerability to my property.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6554  Respondent: 15180833 / Mark Humphriss  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object to the local plan site with specific reference to the above policy for the following reasons:

I object to policy A44 in Send Hill on the basis that: There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

I object to policy A44 in Send Hill on the basis that: The proposed development is not sustainable because of poor infrastructure. Send Hill is a single track country road and too narrow to provide sufficient access to the site for travellers or accommodate the potential new levels of traffic the proposed development would bring.

I object to policy A44 in Send Hill on the basis that: A Wasteland Solutions environmental report on Send Hill dated March 2004 gave evidence of past ponding of water in the excavated area. Further development would disturb the water table and increase risk of flooding to surrounding properties.

I object to policy A44 in Send Hill on the basis that: The site was used as a GBC registered landfill site and shown on the 1963-8 Ordnance Survey maps as “refuse and slag heap”. It is therefore unsuitable for such a development on health reasons.

I object to policy A44 in Send Hill on the basis that: On the 1971 Ordnance Survey the site is shown as a “refuse tip” prior to when proper licensing/registration was required. The date of the landfill works predates the 1999 EU Landfill Directive regulations. I therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials.

I object to policy A44 in Send Hill on the basis that: GBC has installed gas monitoring wells on site since July 2000. One well has documented recording of methane gas discharge.

I object to policy A44 in Send Hill on the basis that: A Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005- Identifies the proposed site as GBC recorded landfill site Ref GU/11/LLC with type of waste not identified. The date of the landfill works predates the 1999 EU Landfill Directive regulations. I therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials.

I object to policy A44 in Send Hill on the basis that: A Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005-Identifies proposed site GBC recorded landfill site Ref GU/12 with type of waste identified as “unrestricted”. This causes concern as to what it does contain and the dangers if disturbed.

I object to policy A44 in Send Hill on the basis that: An Envirosearch Report RS1100201_1_1 dated 17th February 2004 and historical map data and information from GBC has identified the site as landfill and has "areas of potentially
contaminative industrial activities” and “potential risk from landfill gas migrations”. Development of this site would be a health hazard.

I object to policy A44 in Send Hill on the basis that: The site is unsuitable for a traveller site as it is away from the Village centre and approximately one mile from the shops and the nearest bus stops.

I object to policy A44 in Send Hill on the basis that: The road Send Hill at the entrance to this site is 2.3 metres wide, very narrow and additionally unsuitable for long vehicles and on the opposite side of this narrow road is the multi-denominational Send Cemetery.

I object to policy A44 in Send Hill on the basis that: Existing road and parking infrastructure is already inadequate or under pressure and would worsen with the planned development, reducing quality of life.

I object to policy A44 in Send Hill on the basis that: Existing health infrastructure is already inadequate or under pressure and would worsen with the planned development.

I object to policy A44 in Send Hill on the basis that: This area has been extensively used for sand and gravel extraction and has since been filled with refuse and is therefore unlikely to be suitable for building. The lane is designated SSSI and monitored by The Surrey Wildlife Trust. The roads serving this area are extremely narrow lanes without footpaths and people attempting to walk from here to the Send village shops would be at risk.

I object to policy A44 in Send Hill on the basis that: The drainage and sewerage systems in this area of the village of Send are ancient and frequently cause problems as documented by Thames Water Plc. More housing and road users being added would simply increase the problems further.

I object to policy A44 in Send Hill on the basis that: All proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford’s urban Brownfield areas much closer to existing transport hubs.

I object to all the proposed sites in Send because they were not included in the previous consultation in 2014. Unlike the rest of the borough Send has not been properly consulted and all its sites have been changed substantially.

I object to building 40 houses at Send Hill because of inadequate access and traffic volume. Send Hill is far too narrow to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road.

I object to policy A44 in Send Hill on the basis that: The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

I object to policy A44 in Send Hill on the basis that: The government’s most recent policy for traveller sites was published in August 2015 and sets out the best approaches for planning for traveller sites. Since the Borough’s current Traveller Accommodation Assessment was published significantly before the 2015 guidance, it should be considered out of date. The dated nature of the 2012 assessment is recognised in the June 2016 Sustainability Appraisal, which states on page 94 that the Council have decided to over-allocate traveller sites in light of the dated evidence base.

I object to policy A44 in Send Hill on the basis that: This site is allocated for 40 homes and 2 traveller pitches. Send Hill is a very narrow road; two cars have difficulty passing one another in places. An additional 40 homes would significantly increase the chances of two cars meeting, resulting in congestion and access issues with little scope to widen the road.

I object to policy A44 in Send Hill on the basis that: Send Hill does not have any pavements for the majority of its length and would be difficult to walk along, especially for those with push chairs or mobility problems.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I believe that the proposal is not sound because it does not comply with Local Policy H1 in that it has allocated Gypsy, Traveller or Traveling Show-people accommodation disproportionality to the size of the site

I object to policy A44 in Send Hill on the basis that: The proposed development is not sustainable because of poor infrastructure. Send Hill is a single track country road and too narrow to provide sufficient access to the site for travellers or accommodate the potential new levels of traffic the proposed development would bring.

I object to policy A44 in Send Hill on the basis that: The road Send Hill at the entrance to this site and the approach from Potters Lane is very narrow. Any alternation to improve visibility as acknowledged in the revised GBC Local Plan is not practical due physical limitations at the junction of Send Hill and Potter Lane. Without this alternation the approach road is unsuitable for the increased traffic including long vehicles that will result from developing this site.

I object to policy A44 as building further houses at Send Hill would exasaspatate the problem of inadequate access due to increased traffic volume. Send Hill is far too narrow to take any more traffic. The junction with Potters Lane is already very hazardous for vehicles emerging into Potters Lane. Any alternation to improve visibility as acknowledged in the GBC Local Plan is not practical due physical limitations at the junction of Send Hill and Potter Lane.

I object to policy A44 in Send Hill on the basis that: On the 1971 Ordnance Survey the site is shown as a “refuse tip” prior to when proper licensing/registration was required. The date of the landfill works predates the 1999 EU Landfill Directive regulations. It is acknowledged in the revised GBC Local Plan that contamination is a concern. It must therefore be recognised that there is a danger that any disturbance would be health hazard due to the unknown materials to both existing and future residents of the site.

I object to policy A44 as it is in direct conflict to Local Plan policy H1. This policy states that “Gypsy, Traveller or Traveling Show-people accommodation should be provided on development sites of 500 homes or more whilst there remain an identified need”. Site A44 has only be allocated 40 houses and so has therefore been disproportionately allocated 2 pitches.

I object to policy A44 as it is in direct conflict to Local Plan policy H1. This policy states that “Gypsy, Traveller or Traveling Show-people accommodation should be provided on development sites of 500 homes or more whilst there remain an identified need”. The GBC Traveller Accommodation Assessment does not justify an identified need.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I fully agree with Policy E7. Particularly the need to open up the river front and to improve access for cyclists and pedestrians across the town centre while reducing congestion

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy 4.2.26 should be amended to require planning permission for any conversion of a house into a HMO. The current limit of 6 is not sufficient as there are many examples in Guildford's Victorian streets of HMOs being occupied by more people than they are built for. In order to fulfill the stated intention of monitoring and controlling the distribution of HMOs in the borough, the planning office should require seeing all such projects for approval. Guildford has a large stock of old Victorian properties which are already prone to conversion into HMOs. Evidence from this development during the last 20-30 years show that the converted properties often are not maintained by the landlord and thus - apart from causing undesirable changes in the local communities - it also leads to derelict homes out of character with the remaining characterful Victorian family homes. In addition, the conversion of family homes into HMOs Will naturally mostly occur in the town centre, where it puts undue pressure on the councils stated need to find new family homes. It would seem much more sensible and efficient to discourage conversion of existing family homes and thus enable new developments to focus on smaller units which are easier to fit into the townscape.

Do you consider this section of the document; complies with the Duty to Cooperate? (Yes), is Sound? (Yes), is Legally Compliant? (Yes)

Answer (if comment is on questions 1-7 of the questionnaire): ()

I fully agree that the historic development in the green belt need to be recognised and that while maintaining the intent of the green belt, already developed areas and urban areas can be excluded in order to enable growth in development. New development can and should be planned in such a way as to not hinder access to the open country site, but the villages now designated as inset areas must be open for new development in order to take the pressure off Guildford Town Centre.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document: complies with the Duty to Cooperate? (Yes), is Sound? (No), is Legally Compliant? (Yes)

Answer (if comment is on questions 1-7 of the questionnaire): ()

It is understood that the main expansion of new homes should be in vicinity to the Guildford urban area whilst the surrounding villages take their fair share of new homes which may be relatively smaller. However when it comes to the town centre itself, I do not believe there is capacity to expand the number of homes to the extent planned. Guildford town centre already has an overweight of smaller homes and the only way such new expansion could be feasibly done is to provide more single occupancy homes rather than the family homes the borough needs. In addition, with traffic already very congested, it does not appear sound to expand the number of homes so dramatically in the town centre but again, the surrounding areas would better cope with the demand.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

No. I object as GBC have not followed due process as increasing the number of homes to 485, from 185 in Apr 16 requires full consultation under Rule 18, not the shortcut GBC have taken under Regulation 19.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object because GBC has failed to provide sound evidence in terms of Employment Land Needs which shows an 80% reduction in employment space from the previous ELNA carried out. 50% of new houses could be built on brownfield sites instead of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the plan overall as I do not believe GBC have followed due process for this number of homes and there is not enough investment in the surrounding infrastructure to support the additional 485 homes. A new road system is not enough... shops, schools & other amenities such as the Doctor's surgery will all be over subscribed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

 Attached documents:
I am writing to strongly object to the above Policies/Planning Proposals.

Guildford Borough Council have been proposing various developments for housing and gypsy sites in Send for a number of years, and despite continued local rejection of these plans continue to try and impose them on us.

We are also concerned with the proposed addition of two travellers sites within the village.

I request the Planning Inspector to reject all the planning proposals for Send as the whole village strongly objects to any further development.

Get the message, we do not want any more development in our village, we will not accept any more development in our village and will fight any attempt to build in any area of Send with all means at our disposal.

This will ruin the rural environment of Send. The current infrastructure of Send cannot cope now with the existing population, any increase will have serious adverse effects upon the community.

The proposal of a new 4 way interchange onto the A3 at Burnt Common is ridiculous. part from ruining the environment I green belt the extra traffic and in particular pollution will have a huge impact on Send.

All traffic from the M25 wishing to travel to Woking will be routed through Send, this cannot and will not be accepted.
Send is a small village and our main road A247 cannot cope now. There will be total grid lock! As a resident of over 40 years I have seen Send deteriorate, Potters Lane has become a nightmare early in the morning and evening with the lane being used as a "Rat Run" for commuters to and from Woking/Guildford, its time that the A3 end of Potters Lane was closed and the Woodhill link to the old A3 made exit only.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Once again Guildford Borough Council are ignoring green belt regulations for Send.

The Conservative Party at the last election promised voters to protect Green Belt land. The current Government and GBC are not fulfilling their promises.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposal for 430 houses in 2014 was reduced in April 2016 to 185. Now GBC have increased the number of houses once again to 485 plus an industrial site and gipsy encampment. These changes require full consultation under Regulation 18. GBC are now trying to short cut the consultation via Regulation 19. This action completely invalidates any consultation with residents of Send.

Any new homes should be built on brown field sites outside of the village, not on green belt.

Clockbarn Nursery, Tannery Lane, Policy A42
I object to Policy A42 as the number of homes planned has been increased from 45 to 60 homes. This is an increase of 33% and ignores all previous objections from the residents of Send. Tannery Lane is a single track narrow lane which already has traffic and access problems, to add potentially another 120 cars to this road will only increase the chance of road rage and the possibility of a nasty incident. The Policy will erode more Green Belt. As Guildford Borough Council is a Conservative Constituency who promised not to build on Green Belt - this is totally unacceptable, remember it is the Send residents who helped put you into power and can easily remove you. There is continual flooding in this area and building homes on this land will add to run off and cause additional flooding and distress to householders. The countryside around Send and the rural feel of the area will be lost, this is part of the attraction of Send, residents will not allow this to be ruined.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Garlick's Arch, Send Marsh, Policy A43
I strongly object to Policy A43 change at Garlick's Arch as it ignores all previous objections of the local people. There is no proven need for plots for "Travelling Showpeople" in this area. [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature] This is not wanted in Send or Ripley, Policy 43 should be abandoned forthwith. This area is a permanent Green Belt site and there are absolutely no "exceptional circumstances" for this Policy. The Policy Plan will cause over development of Send and Ripley the number of homes is excessive. Once again 400 homes will amount to another six to eight hundred cars on the local roads. The local roads are already at grid lock at peak periods, as stated earlier the chance of road rage and the possibility of a nasty incident will increase. The ancient woodland of this area has existed since the 15th Century and the reign of Elizabeth 1, what gives you the right to destroy it?? The area is has a flood zone 2 allocation, is this to be ignored as well as the Conservative promise of not building on Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Land at Burnt Common, London Road, Policy A58
I object to Policy A58 at Burnt Common. This plan was deleted from the 2014 draft due to the volume of objections, why has it been reinstated ??? The word “minimum” has been changed from the previous “maximum” in the 2016 plan. Since then there has been a decline in demand for industrial land. There is no need to build industrial or warehousing on Green Belt. This should be built on Brown field sites, not in a rural setting. Slyfield and the surrounding industrial estates still have empty industrial units so why build more. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole of the Borough so again why build 10 hectares at Send on Green Belt.

What incentives are being given to GBC / Councillors to push this through ??? The increase of traffic from this Policy Plan will cause major traffic congestion in an area which is already suffering.

Green Belt - Policy 2 at para2raph 4.3.15
The proposal that Send Business Park be taken out of the Green Belt goes against everything that has been refused for this site in the past. It would be far better to allow the existing building to be converted into luxury apartments, that would easily sell in this area of outstanding natural beauty adjacent to the Wey Navigation. It would eliminate the need for heavy lorries to use Tannery Lane that has restricted vehicular access. There is no need for development of the old Tannery building, it is hardly a Business Park and should not be used for industrial purposes. The addition of 460 homes in the village with potential to increase the population by 1,150 (assuming 2 people per house and 50% with one child) will put unbelievable pressure on local services, especially doctor's surgeries, schools and the police let alone local hospitals. These plans, policies and proposals are going to ruin the life of the residents, who decided to live in Send and Ripley for its rural areas and quiet way of life. This is now being threatened and the people of Send and Ripley will not stand for it..............

Stop this NOW - ENOUGH IS ENOUGH!!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the congestion that development will cause to the local villages, roads and the lack of road infrastructure (Policy L1). Our villages are already suffering from severe congestion for much of the day, for example the junction in the centre of Ripley. Many of the country lanes around the villages of Ripley, Send and Clandon are narrow.

With no proper pedestrian footpaths and no proper cycle lanes on the narrow roads, development will result in the road becoming ever more dangerous.

I object due to the congestion that developments will cause to the roads A3/M25 and the air quality. Environmental impact on amenity and health to the local residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposals to remove the villages Ripley, Send and Clandon from the Green Belt. Together with sites of Wisley (A35) and Garlick's Arch (A43). National planning policy requires there to be an exceptional circumstances for the Green Belt boundaries to be altered. There are no exceptional circumstances for the villages and the land to be taken from the Green Belt.

I object to development in areas which are at risk of flooding (Policy P4).

The site at Garlick's Arch is identified on the Environment agency map on [text unreadable] a flood zone 3. Knowing the area well I know that this site often floods.

Objection to Guildford Borough Council Proposed submission Local Plan June 2016.

I object to the Local Plan as the development proposed will not be sustainable.

The development of 1,300 homes during the [text unreadable] period. It will have a permanently detrimental impact on existing local communities by over development, particularly villages between Guildford and the M25, including Ripley, Send and Clandon.

I object to the Borough [text unreadable] Strategy (Policy S2).

It is clear that it is not a [text unreadable] with disproportionate development in the north east of the borough resulting from the allocation Wisley airfield (A35) Garlick Arch on Ripley and Send border (A43) and Gosden Hill (A25) as major residential sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SCNI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
homes at the Thatcher’s Hotel site, so potentially 100 new cars entering this dangerous part of the Epsom Road, I would be very worried. There should be larger lanes, and perhaps some traffic calming measures for those travelling 60 mph on it.

And the local schools? Will they be expanded and given more funding for the increase in children expected to move in the new homes? The Howard of Effingham is no longer as strong as it used to be - larger class sizes, a reputation (and indeed children of friends) for drugs around, and small roads surrounding it are a concern.

Shopping - we have a horrible Budgens in East Horsley which is not suitable for the area - where are they all going to shop? The road to Cobham is again filled with residents, speed watch concerns and a 2 lane dangerous drive.

Parking at the train station - is almost at capacity with the current number of residents. the new ticket machine on the platform is GREATLY appreciated, but parking will need to be looked at if more residents will be using it.

I don’t mind growing, but I feel that the investment in the roads, schools and resources need to match the number of residents - and it doesn’t at the moment. I would be very concerned for road safety and for the childrens’ education if there were any more residents. I hope investment in the areas is completed before new homes can be built in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write with reference to the above submission plan.

I would be grateful if you could kindly confirm that all of these comments together with all my previous comments will be passed to the Inspector. I reserve my right to appear at the inquiry.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

It is further from railway stations than any other identified strategic site.

It is adjacent to the most congested stretch of strategic road network in the county and close to the most congested junction in the country (J10).

Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe, putting my family and others in danger.

It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. RHS Wisley traffic already cause frequent congestion by traffic on local roads – there is already vulnerability and this will get worse.

1. The associated traffic increase from the RHS has not been taken into account.
2. The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account

There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis – again, more danger and potential fatalities.

The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station

It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area.

I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB and destroy the far reaching countyside views for future generations. Surely there is a responsibility to maintain this?

I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objections from local residents and statutory consultees – Why bother to consult if you then ignore the overwhelming popular view?.

I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

I object to the extension of the plan period by 1 year as it has not been identified as a major change

I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as
green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal
challenge.

I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage
caused by nitrogen deposition and high pollution levels.

I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the
figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring
examples of why the plan is not sound.

It is my belief bearing in mind the reasons listed above from a not exhaustive list that this plan is unsound and not fit for
purpose.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Surrey wants to preserve as much of the Green Belt as possible. The nearer to London, the greater the pressures and the more important it is to resist them.

The Plan provides for undue development in Send and neighbouring villages. We are all NIMBYs of course, but there has already been considerable development in Send, recently and at present.

On the grounds of Green Belt, traffic and infrastructure...

I object to policy A42 Clock barn Nursery, Tannery Lane
I object to policy A43 land at Garlick Arch, Burntcommon
I object to policy A44 land West of Winds Ridge

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the increased green belt erosions which are contra-indicated by the Council's official stance.

Contrary to the first four points of the Council's own "significant updates" review (page 03 of About Guildford) and in spite of all the objections to the '16 Plan itself, Send's position has been worsened by the latest changes. Send's green belt status has been completely ignored. We challenge the statement that only 1.5% of greenfield land in the green belt is proposed for use in the Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Please note that I object, very strongly, to the following:

- Lack of evidence of the housing need in the borough;
- Removal of villages from the Green Belt allowing increased development into the future;
- The proposed erosion of the Green Belt in any way, shape or form; The really short time frame for consultation of the Draft Local Plan;
- The council ignoring the many suitable brownfield sites within the borough which could be used for future development;
- The lack of proposed new infrastructure and facilities to cope with the needs of those already living in these areas, without increasing the demand by intensifying the housing;
- I object to the lack of immediate provision for new schools, GP surgeries etc. locally;
I object to the potential six main development sites contained in the Draft Local Plan which are located in and around the Horsleys.

It is already hard to get see a doctor, to get a school place, or to travel around the area because of so much traffic, so why make things any worse within our uniquely beautiful villages? The roads are already too dangerous for me to cycle on because there are so many cars, without adding to these by building lots of smaller developments all over the place - why not concentrate on the bigger brownfield sites?

Please ensure that my comments are available for the Independent Inspector.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I Object to the 2016 Local Draft Plan

I wish to record my strong objections to the Draft Local Plan which is out for public consultation currently.

I live in West Horsley and I am aged 16. My family moved to this area because we did not wish to live in an urban location (like Guildford itself) - we like the countryside with its open, green spaces. These are special places, with lots of amazing wildlife and interesting species. Areas like these must be protected for future generations.

We have learned at school about the Green Belt which I think should be protected from erosion by possible future disproportionate development - how can you identify new development sites and produce a whole plan without having a solid set of evidence as to what the future housing need actually is? No one has ever asked me whether I wish to buy a house within the villages surrounding Guildford when I am older.

I object to West Horsley, and all the other local villages, being removed from the Green Belt - this is being done just so that you can then allow increased development which is not wanted by local people. There are lots of other areas (like the old Wisley Airfield) which could be developed upon and which have good links to the bigger roads which could and should be used first.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/436  Respondent: 15185185 / Jeff Gill  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. How can land be identified as Green Belt ie: protected and then ‘unprotected’ like this – it is a mockery of the whole concept of protection!

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is simply too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars. Commuters going to Effingham station are NOT going to cycle or walk!
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads. These are small lanes which don’t have the capacity to take this sort of traffic.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   4. The increase in traffic will create a danger to those who do cycle (and pedestrians walking to the woods with their dogs), due to the absence of any cycling paths and the lack of pedestrian footpaths (as there is no space to provide them).
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity. Where are all these extra commuters going to park? This will lead to further development of common land which is again ‘protected’.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, which is already in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation. I am asthmatic as is my father.

9) I object to the fact the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I simply fail to see how the local planning committee can be even reconsidering this application with so many people objecting. It certainly appears to me that the opinions of the locals are not being listened to at all. Rumours abound concerning the investment company whose registered office is in the Cayman Islands and one has to wonder given recent exposes concerning companies from that region whether everything is actually as it should be……

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3696  Respondent: 15185185 / Jeff Gill  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I believe this is now the third or even fourth time I seem to be writing to object to this planning submission. I am at a lost to understand why this is repeatedly being put forward with such minor changes as to be not worth reconsidering and this is despite being rejected by thousands of local residents. This is being planned at the detriment of the local community.

I object to this submission plan AGAIN due to the poor quality and lack of transparency in the evidence to support this case - and you will note my objections below.

Please confirm that all of these comments together with all my previous comments are passed to the Inspector.

In summary I again object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   ◦ The associated traffic increase from the RHS has not been taken into account.
   ◦ The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
12. Opportunity (3) should be common to all sites and is not unique to this site
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
16. I object to the removal of additional 3.1 ha from the green belt without any justification
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.

26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above, yet again, this plan is unsound and not fit for purpose. I object to this plan

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Do you consider this section of the document; complies with the Duty to Cooperate? ( ) , is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016).

I object on these grounds...

• I object to the Local Plan as the proposed development is not sustainable (Policy S1)

13,860 new houses proposed is not sustainable – it will have a huge negative impact on local communities by over development, especially Ripley, Clandon and Send. The local communities do not need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and extremely inadequate bus services, so almost every adult will have to have a car. The Plan does not benefit the infrastructure for Garlick’s Arch.

The development would be best served in urban areas where there is sustainable transport.

• I object to not protecting the Green Belt (Policy P2) I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

1. I object due to the massive congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1) I am due to purchase and complete on a c.1854 cottage in Newark Lane and extremely concerned by the potential increase in traffic on this tiny narrow lane into Ripley village.

There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that.

The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous and unsustainable traffic.

• I object to development in areas which are at risk of flooding (Policy P4) The Plan does not take adequate account of flood risk as required by National Planning Policy.
The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. The area has flooded frequently in recent years and so the Council’s assessment is not good enough to be included in the plan.

- I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a) North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but this addition will attract a huge amount of ‘through’ traffic. For example all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved.
- I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43) Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is inappropriate because:

1. There is no sustainable transport infrastructure.
2. The site is liable to frequent flooding • The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.

- I object to the Borough Wide Strategy (Policy S2) GBC’s proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey.

The Plan is unbalanced across the borough; there is too much development in the north east of the borough (Wisley [A35], Ripley/Send [A43] and Clandon [A25]). 36% of all the Plan’s new housing is proposed in this area, which has only 11% of the existing housing.

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages.

- I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3) The Garlick’s Arch (A43) proposal would double the built area in the locality, and would irreversibly damage the character of the Ancient woodland on the site, which includes over 80 ancient oak trees.
- I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D) The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

- I object to poor air quality concerns (Policy I3) The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health.
- I object to the proposed Infrastructure Schedule (Appendix C) The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. Therefore it is not fit for purpose.
- I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5) There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

- I object to the lack of proper infrastructure planning for sites (Policy I1) The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which
has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

- I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2) The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

I am very concerned by these proposals, as I am soon to complete on my purchase of a property in Newark Lane, Ripley. I was so looking forward to my move to this idyllic area and whilst I don't wish to reconsider, it is a matter of grave concern.

I wish these objections to be fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to this development due to its compounding impact on road safety, traffic and congestion and the threat to this protected green belt area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Answer (if comment is on questions 1-7 of the questionnaire): ()
Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016), for the following reasons:

1. I object to the Local Plan as the development proposed is not sustainable (Policy S1)

   The proposal is for too many properties leading to over development, whilst there appears to be nothing to improve the infrastructure & services.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLP16/968  Respondent:  15185537 / Peter Mills  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings
I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.
Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I am writing to object to the local plan.

Despite the possible need for more houses to be built in this area, I believe that there are many disadvantages of this plan that far outweigh the benefits.

One of the main reasons I, along with many others, object to this plan, is that the increased number of houses will lead to higher levels of congestion. Even though more roads are being built congestion will still rise. This puts the safety of the children at local schools at higher risk. This backs up my argument as to why I object to the local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

A further reason as to why I object is due to the destruction of green belt land. Even if it is in your plans to assign new green belt land, I am sure that in the future this land will also be built on, therefore, it is vitally important to protect the green belt land we have at the moment. I object to the land at Garlick's Arch having 400 houses built on it as it is Green Belt permanently protected by the NPPF which prevents the merging of settlements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Finally I object to the process GBC have taken to try and implement their ideas. The changes made to cut the houses from 185 to 485 have not had another full consultation, which invalidates the process.

Having stated these points, I believe that it is vitally important that the local plan does not take place, and is re-thought out.

Thank-you for taking the time to read this, and I would like this to be passed on to the Inspector.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Firstly, I object to Policy A42 for the change at Clockburn Nursery. The reasons for this statement include:
It will create a third more than the previous amount of homes here. This is an unacceptable increase.
Tannery Lane is narrow and not designed for lots of cars and this increase in homes will cause a lot of traffic issues. It will become more dangerous for people trying to be fit and healthy, lots of people walk and cycle along here and as a nation trying to encourage exercise and fitness in an age of obesity and health related problems this should be considered not only here but in the rest of the surrounding area where roads are already congested and cycling hazardous. Building into the Greenbelt will impact the local countryside- something that distinguishes this area from that of areas nearer to London and in effect our area will become part of outer London.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Firstly, I object to Policy A43 for the change at Clockburn Nursery. The reasons for this statement include:
It will create a third more than the previous amount of homes here. This is an unacceptable increase.
Tannery Lane is narrow and not designed for lots of cars and this increase in homes will cause a lot of traffic issues. It will become more dangerous for people trying to be fit and healthy, lots of people walk and cycle along here and as a nation trying to encourage exercise and fitness in an age of obesity and health related problems this should be considered not only here but in the rest of the surrounding area where roads are already congested and cycling hazardous. Building into the Greenbelt will impact the local countryside- something that distinguishes this area from that of areas nearer to London and in effect our area will become part of outer London.
Secondly, I object to policy A43 for the change at Garlicks arch for the following reasons.
One: There is no proven demand for travelling show people plots in this area.
Two: It will join Ripley up with Send, defeating the purpose of greenbelt, loosing any sense of the traditional villages.
Three: It is subject to frequent flooding - this land needs to be there to prevent issues flooding other houses downstream of the river.
Four: It will create excessive traffic. Over the last 20 years the traffic has increased dramatically. If it continues to increase the whole area will become a permanently gridlocked.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3331  Respondent: 15185857 / Matthew Monk  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Thirdly, I object to policy A58 of a minimum of 7,000 sq m of industrial warehousing because of the change from ‘maximum’ in the previous plan to ‘minimum’ in the current plan despite a decline in the demand. This is proven by empty sights in Slyfield and Guildford which should all be filled first. The 2017 Employment Land need assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough so why has Send been earmarked a huge over allocation of 10 hectares at Send in green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1615  Respondent: 15185857 / Matthew Monk  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Fourthly, I object to Policy 2 of the proposal to inset Send Business Park from the greenbelt because it there is limited vehicular access and development of this location detracts from the openness of the Greenbelt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/975  Respondent: 15185889 / Alan Leiper  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the draft Local Plan for the following key reasons. I object to the lack of protection for Green Belt, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. I object to disproportionate housing development in our area, over-loading schools, health services and public transport including stations.

I object because of the huge increase in traffic on narrow rural roads, trunk roads & lanes which already suffer severe congestion, to say nothing of the danger this will cause to local cyclists and pedestrians. I object because of the air pollution from thousands of extra cars affecting children & elderly people. I object to the continued inclusion of FWA/TFM where the planning application was unanimously rejected by GBC's Planning Committee. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site in relation to SPA, SSSI & SNCI. I trust that my objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35 is removed from the Local Plan with immediate effect.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to object to the local plan.

Despite the possible need for more houses to be built in this area, I believe that there are many disadvantages of this plan that far outweigh the benefits.

One of the main reasons I, along with many others, object to this plan, is that the increased number of houses will lead to higher levels of congestion. Even though more roads are being built congestion will still rise. This puts the safety of the children at local schools at higher risk. This backs up my argument as to why I object to the local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

A further reason as to why I object is due to the destruction of green belt land. Even if it is in your plans to assign new green belt land, I am sure that in the future this land will also be built on, therefore, it is vitally important to protect the green belt land we have at the moment. I object to the land at Garlick's Arch having 400 houses built on it as it is Green Belt permanently protected by the NPPF which prevents the merging of settlements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Finally I object to the process GBC have taken to try and implement their ideas. The changes made to cut the houses from 185 to 485 have not had another full consultation, which invalidates the process.

Having stated these points, I believe that it is vitally important that the local plan does not take place, and is re-thought out.

Thank-you for taking the time to read this, and I would like this to be passed on to the Inspector.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Firstly, I object to Policy A42 for the change at Clockburn Nursery. The reasons for this statement include: It will create a third more than the previous amount of homes here. This is an unacceptable increase and will upset many local people. Tannery Lane is narrow and not designed for lots of cars and this increase in homes will cause a lot of traffic issues and will become more dangerous for people trying to be fit and healthy and cycle- something as a nation we are trying to encourage. Building into the Greenbelt will impact the local countryside- something that distinguishes this area from that of areas nearer to London and in effect our area will become part of outer London.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Secondly I object to policy A43 for the change at Garlicks arch for the following reasons. One: There is no proven demand for travelling show people plots in this area. [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]

Two: It will join Ripley up with Send, defeating the purpose of greenbelt, loosing any sense of the traditional villages.

Three- It is subject to frequent flooding- this land needs to be there to prevent issues flooding other houses downstream of the river.

Four- It will create excessive traffic. Over the last 20 years the traffic has increased dramatically. If it continues to increase the whole area will become a permanent traffic jam.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Thirdly, I object to policy A58 of a minimum of 7,000 sq m of industrial warehousing because of the change from ‘maximum’ in the previous plan to ‘minimum’ in the current plan despite a decline in the demand. This is proven by empty sights in Slyfield and Guildford which should all be filled first.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Fourthly, I object to Policy 2 of the proposal to inset Send Business Park from the greenbelt because it there is limited vehicular access and development of this location detracts from the openness of the Greenbelt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing with reference to the final draft local plan for the Send and Ripley area and I would like to raise my objections with these quite frankly outrageous propositions.

With reference to the policies P2, A42, A43, A43a and A44 I object for the following reasons.

Policy P2 - Send is a small village community on the edge of Woking and it provides a buffer between the town and the open countryside. To remove Send from the Greenbelt is a short-sighted act of lunacy. Greenbelt is designed to provide protection from urban sprawl and to erode it in this way is irresponsible and indeed there were repeated specific election promises to protect it. We are all custodians of our countryside and it needs protecting from reckless planners for future generations.

I object to the large number of houses proposed in the plan on all of the sites. The increased population will undoubtedly place extra traffic onto roads which already struggle to cope with the current population. The A247 through Send is a small road in a bad state of repair due to traffic loading. During certain periods of the day the traffic queues back for more than a mile and as soon as any maintenance or service works are undertaken the road becomes realistically impassable during peak periods. The village of Old Woking provides a bottle neck for traffic heading toward Woking and Maybury and increasing population in Send and beyond will only exacerbate the situation.

Policy A42 – I object to the building of 45 houses at Clockbarn Nursery. Apart from this area being subject to potential surface water flooding this will just bring more traffic onto the A247 Send Road or feed it through narrow and single track rural roads towards Newark Lane.

Policy A43 - I object to the proposed employment space at Garlick’s Arch for the same reasons as above. The increase in HGV traffic, should this go ahead, will cause more congestion and damage to the roads in and around Send. I also object to the proposed 400 houses. This is a new site that has not previously been consulted upon; it was not included in the Regulation 18 draft. There is no need for these additional houses on top of the thousands already proposed for the borough.

Policy A43a - I object to the proposed A3 junction for reasons of additional traffic congestion, damage to existing roads and reduced air quality and increased pollution.

Policy A44 - I object to the proposed development for housing and travellers pitches in Send Hill for the following reasons.

This is again a newly identified site and was not included in the Regulation 18 draft; it has not previously been consulted on and is therefore inappropriate to include it in this consultation.

Send Hill is a quiet residential road surrounded by countryside. There is insufficient access to the proposed site, it is inappropriate for the proposed purposes and not in keeping with the area. Indeed other private local planning applications have been turned down for this reason. The subsoil of the site contains documented unsafe landfill waste which is currently vented. The road is narrow, single track in places, with no footpaths and as the road is straight it is already used as a rat run for some vehicles to cut through to and from the A3 potters lane junction.

The road is used by the George Abbott school bus and many school children walk along Send Hill to meet the bus at the junction with the A247. Additionally younger children walk with families to attend the primary school currently in Bush Lane at the end of Send Hill. Even when the school moves to its new site the children will still be walking along Send Hill to attend it. Increased housing and the resulting traffic will place these children at added risk. Indeed rather than building more homes Send Hill should be subjected to traffic calming measures to protect the children who walk to school and other residents.

Send Hill is also home to a number of bats who require protection from development and there are native bluebells in the woodland which also need to be protected.
In additional, this is an unsuitable position for travellers pitches, there are a number of elderly residents who are quite frankly terrified of what this area could become. Although it is stated that the areas will be maintained and managed, realistically that will not happen. This will only lead to increased pollution of our countryside, a potential increase in local crime, and it is not a suitable area to place.

To conclude my objection to the plan I would like to mention the local services such as health centres and schools which are already under a huge burden.

**Answer (if comment is on questions 1-7 of the questionnaire):** ( )

I am sadly having to write again to you as I don’t think that you have read my last letter. I was under the impression that I lived in a democracy and that the local councillors were elected by the people who live in a borough to serve them. They were in part elected on the basis of promises made to the electorate which as we all know, at least as far as planning is concerned, they have ridden roughshod over or completely ignored.

Tens of thousands of objections have been placed before you last year regarding the local plan and you not listened at all. Even allowing for the fact that further housing is necessary over the coming years it would appear that the area north of Guildford especially Send has been disproportionately targeted. At this point in time I understand that you will only allow objections to the changes you have made in the latest draft. With reference to the policies A42, A43 and A58.

I object to the proposal to inset Send Business Park from the Green Belt. This will allow future sprawling development over which we will have no control. We are all custodians of our countryside and we need to protect it for future generations. To allow this to happen will create the opportunity for future expansion or development at this location without consultation.

The housing demand number in the Local Plan has dropped by 39 houses per annum from 2018 to 2034, and despite this, Send’s contribution has been increased without any justification. Major sites in Send and Ripley have been changed 3 times; first we had Burnt Common, then Garlick’s Arch and now we have both. Guildford Borough Council appear to have a predetermined agenda to build on the Green Belt and without any constraints to take into account the lack of infrastructure such as roads, schools and medical facilities as required by law.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the change in policy which has increased the number of houses to 60 (33% more) from the previously proposed 45 houses at Clockbarn Nursery. This area is subject to surface water flooding which this will exacerbate and will bring even more traffic onto the A247 Send Road. This will either create a bottleneck at the junction of the A247 and Tannery Lane or feed it through narrow and single track rural roads towards Newark Lane.

This policy change will increase the erosion of the Green Belt in our village and will impact upon open countryside views around the precious River Wey navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43 – I see that the proposed employment space at Garlick’s Arch has now been move to Burnt Common under Policy A58 and I will comment on that later. I object to the proposed 8 travelling show people plots on this site in addition to the 400 homes because there is no proven demand for them in this location and the lorries that will go along with these people will cause further congestion and pollution on the local roads.

The Local Plan H1 policy states that “Gypsy, Traveller or Travelling Show people accommodation should be provided on development sites of 500 homes or more whilst there remains an identified need”. Send has been disproportionately allocated 2 traveller pitches as well as all 8 travelling show people plots identified as needed in the borough until 2034. The developments of over 1500 houses at Gosden Hill and Wisley are only allocated 8 pitches apiece during the same period. In addition the proposed location of these sites do not conform with the Guildford Borough Council’s own traveller policy in terms of the identified needs of this ethnicity of people; e.g. distance from schools, shops, transport and the need to join a community of people.

This land is ancient woodland allocated as Green Belt to avoid Ripley and Send being joined up. It is also subject to frequent flooding and has a flood zone 2 allocation.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed employment space at Burnt Common (formerly planned for Garlick’s Arch) as the increase in HGV traffic, should this go ahead, will cause more congestion and damage to the roads in and around Send. This was deleted from the 2014 draft due to the number of objections but following the smoke and mirrors move to the Garlick’s Arch site in 2016, it has now appeared back in its original location but with the maximum 7,000 square meterage now as the minimum – absolutely ludicrous. Since the 2016 plan there has been a decline in demand for industrial land and there is no need to create this from Green Belt land when Slyfield still has empty sites and industrial units. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares of industrial land for the whole of the borough yet the language of this policy A58 opens this site, of in excess of 9 hectares, to unlimited development well beyond what is in the Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I'm writing to you with reference to the proposed building of many houses on our GreenBelt land.

I want to strongly object to ALL erosion of our GreenBelt and the building of anything on green field sites. Our county and country are being ravaged by development.

I object to site A43 Garlicks Arch

I object to site A45 The Talbot - it's a conservation area!

I object to site A57

I object to the last minute inclusion of new sites with little notice.

New schools? New medical facilities? Where is the provision for these?

Our GreenBelt is a precious recourse and should not be abused.

Proposed change from 2000 to min 1700 homes is still too many homes for Burpam and Merrow to handle. Traffic conditions in the area are at grid lock levels now and I cannot see the proposed changes to road infrastructure will do anything to alleviate the daily traffic chaos in and around Burpham/Merrow. Surely the planners must be able to see the impact that the amount of cars that 1700 homes would produce. Please reconsider the number of homes at Gosden Hill and let common sense prevail.

I refer to the draft Local Plan and specifically the part relating to what you call Garlick's Arch, Burnt Common.

This is designated for 400 houses and industrial and warehousing. I object to the proposal. I currently use the land for clay pigeon shooting.

I believe this site is a new proposed site for building and has not been the subject of previous consultation. It is Green Belt and there are no exceptional circumstances allowing for any building on it. There is an area of ancient woodland.

A new 4-way interchange onto the A3 at Burnt Common would be disastrous for Send and would open Send as a through route for traffic leaving the M25 and A3 for Woking.

I am bombarded with flyers asking me to register my objection to the local plan. Whenever I go out I am assailed by posters telling me to object to the local plan. Nowhere do I see any mention of housing problems, particularly those faced by young people. My grandchildren have no hope of getting on to the housing ladder and it is no answer to tell them to move to cheaper parts of the country. They work here, friends and family are here. I feel that the objectors are entirely misconceived and primarily driven by their own narrow interests. Instead of blanket objections they should be wholeheartedly supporting plans to build more houses and putting their energies into ensuring that the main thrust is on
affordable houses with adequate support for the infrastructure, particularly in such areas as schools and medical facilities. For example Send has one medical practice with one full time and four part time doctors and can barely cope with the existing population. I have many friends who share my view. They don't get up and shout at public meetings. It is a sad reflection that one fears that to express publicly views contrary to those of the objectors would result in much unpleasantness that might even verge on physical violence. So the fact that supporters of the plan keep their heads down should not be taken to mean that everyone is opposed to the public plan. I would add that the proposed Garlick's Arch industrial development is obviously more sensible than a similar development at Slyfield. So if there is a need for such a development it should be Garlick's Arch. I would be obliged if these views could be seen by the Planning Inspector.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt.

The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself is too spread out to anticipate a reduced reliance on private cars

1. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

1. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

1. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the lack of space to provide for them)

1. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

1. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I have recently heard about the amendment to the local plan and the impact that this will have on Shalford village, and would like to state my objection.

I believe this amendment will significantly and irreversibly alter Shalford village to the detriment of this area - the character of the village will be completely lost.

The services cannot cope with additional housing. The local roads already suffer from severe congestion at key times of the day.

I believe there is no valid reason to wreck the village of Shalford in this manner.

I object to this proposed development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

[Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] I am writing to object at the proposed changes to the Local Plan by Guildford Borough Council (GBC) to the fields behind the Shalford village hall.

The fields you are planning to develop contribute to the open character of the Shalford village and provide a rural backdrop - I believe that GBC should support the expressed views of over 700 local residents who signed the petition objecting to this development and retain this land within the Green Belt and keep them outside the village settlement boundary.

Due to their height, these fields contribute to the openness of the Green Belt and any development would tower over the village community facilities and surrounding areas - with very large developments already planned both sides of the village is it really worth spoiling the heart of Shalford by building on this virgin, totally undeveloped site?

I have already seen first hand in station road that previous developments haven't taken the impact of more cars on the small road infrastructure in Shalford - both parking on pavements and making roads more busy and dangerous. As there are so many families with young children in the area my main concern is that access to this land is via Chinthurst Lane, which is already heavily congested, and is a key route for families to access walks in Chinthurst Hill and alone the old railway line to Bramley, which will then become more dangerous int he future.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/451  Respondent: 15188641 / Janet Banfield  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

It is with dismay that I read that Normandy is included in the draft plan for the building of 1100 houses and a secondary school.

Normandy is a small village, of some 1300 houses. This proposal will double the size of a delightful village, bringing with it horrendous traffic problems. Both Glaziers Lane (D60) and Westwood Lane (C16) are narrow, minor roads: one has a one-lane chicane under a railway bridge, the other a blind bend crossing over the railway: dangerous layouts already, but deadly with at least double the increased number of vehicle movements.

**I OBJECT TO THIS PROPOSAL ON THE GROUNDS OF INADEQUATE ROAD INFRASTRUCTURE TO ACCOMMODATE VASTLY INCREASED TRAFFIC MOVEMENTS**

A school designed to accommodate 1500 students can only increase vehicle movements. The argument that students would travel by train is unrealistic. Most students are transported by parents, by car, to all schools for reasons of cost, convenience and time. The logical place to build a school must be on the Blackwell Farm development, with its 1800 houses already planned by the university and I believe, approved. I gather that local schools, Ash Manor and Kings College are not fully subscribed, so it would seem that plans for a new school are a bait to the council by the developer, in exchange for allowing them to build 1100 houses.

**I OBJECT TO THIS DEVELOPMENT IN NORMANDY BECAUSE NO CASE HAS BEEN PUT FORWARD TO JUSTIFY THE NEED FOR MORE SCHOOL PLACES, BUT APPEARS TO BE DEVELOPER LED. ESSENTIALLY, THE COUNCIL IS BEING BRIBED TO ALLOW HOUSE BUILDING WITH THE OFFER OF A NEW SCHOOL.**

This village has already given up 32 acres of land, Manor Fruit Farm, to the detrimental impact on wildlife. Reduced numbers of gold-crests, linnets, owls and the destruction of the nightingale population are the result. 1100 houses and a school will destroy what wildlife remains: the foxes, the deer, the hedgehogs, the Badgers.

**I OBJECT TO THE DEVELOPMENT PROPOSALS BECAUSE THIS VILLAGE HAS ALREADY LOST VALUABLE HABITATS FOR WILDLIFE AND BUILDING ON THIS SCALE WILL DESTROY, TOTALLY OBLITERATE, NATIVE SPECIES.**
No mention has been made of any initiatives planned to deal with flooding which is already an issue within the village. The scale of the development will exacerbate an already intolerable situation.

GBC cannot, or will not provide information regarding the calculation for proposed population growth for Guildford. Surrey University has skewed housing needs within the borough by not building sufficient 'on campus' student accommodation, resulting in several thousand houses being unavailable for the housing market. The university has a moral responsibility to provide accommodation for its students.

GBC has inexplicably REMOVED some development sites included in former draft plans and omitted to INCLUDE other sites OFFERED for development. (Land in Clandon, offered, I believe, by Lord Onslow is not included).

I OBJECT TO THE DRAFT PLAN DRAWN UP BY GUILDFORD BOROUGH COUNCIL FOR THE FOLLOWING REASONS:
- The plan for Normandy development is disproportionate.
- Destruction of the rural environment is unacceptable.
- Poor road infrastructure cannot accommodate massively increased vehicle movements.
- Land adjacent to A46 already has major flooding issues.
- Normandy is indeed a sensitive site, and should be protected, for the benefit of all.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the proposal to change the settlement boundary.

This is a relatively small area of land which is integral to the open, look and feel of the village and any change to this would materially impact the village.

In addition the only access is from Chinthurst hill which is a hugely busy road already and can’t manage the current volume of traffic. The road is often used by children on their bicycles and walking and would be a dangerous change to its use.

Please reject the proposal..

<td>- Business and small commercial premises are not being given the protection they require in this plan. Despite a pledge for ‘protection of commercial premises’ and ‘provision for small business units’ (E2) by GBC and the assurances of policies E3 &amp; E5, small businesses are already finding it difficult to locate suitable spaces. GBC have already indicated its lack of consideration of these important contributors by allowing change of use of commercial units on Ranmore &amp; West Horsley to housing or other than light industry. I support the general aims of policy E1 whilst being concerned about the location of the new spaces and the transport links to them. Perhaps a better use of some the land earmarked for housing would be to provide the help for these SMEs.</td>

Affordable housing is indeed required in our area but it needs to be in the appropriate location – where people work & want to live. There also needs to be good protection so that the properties are not taken out of the ‘affordable’ stock by investors. I did not see any such protections in the plan.

- The doctors surgery, schooling and local facilities in the Horsleys are already struggling to cope with the current population and it is not clear how much new infrastructure is proposed despite the large number of houses suggested. Whilst I understand that the provision of these facilities may not be the responsibility of GBC, it is unacceptable not to include consideration of them in the plan.

Policy I3 does not face reality. Developments outside the immediate village areas (eg that proposed for West Horsley) are not close enough to railway lines to encourage the use of public transport and will inevitably increase the number of cars on the local (overcrowded) roads. It is naive to suggest otherwise.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1018  Respondent: 15189377 / Anne Butler  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

• I do not believe GBC have put forward a convincing case for the removal of the Horsleys from the Green Belt. This can happened only under ‘exceptional circumstances’ and the desire to build more houses does not constitute an exceptional circumstance. The proposal to remove these ‘open character’ villages from the Green Belt is at odds with the stated aim of GBC to ‘protect the Metropolitan Green Belt’.
• The planned move of the village boundaries has not been sufficiently justified by GBC in this local plan and appears to have the sole aim of allowing house building.

Comment ID: PSLPS16/460  Respondent: 15192097 / Angelina Gray  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed
houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heath Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heath SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object strongly to the ill-conceived plans for East and West Horsley, effectively making them into small towns.

**Infrastructure**

East Road/The Street and Ockham Road around the station and shops are busy all the time, backing up repeatedly during rush hours and school runs making them unsafe for cyclists, especially children. Few children are now able to cycle to school.

A considerable number of roads in the villages are ill-repaired and can only suffer further with increased traffic. We don't have many buses through the villages so each new house is likely to have at least one car, probably two.

The junction with the A3 at the Wisley roundabout is already stretched and backs up much of the day, but particularly between 6am and 9.30am.

Parking by the shops and village halls in both villages, and by the surgery and the station are already over-subscribed at most times of day.

**Drainage**

Recently built houses in West Horsley have had trouble the disposal of surface water. This will get increasingly bad as more and more foundations are dug. It is also possible that the existing drainage systems will not cope.

**Services**

The Raleigh School is still over subscribed, as it has been for twenty years. Are plans in place to increase local schooling? I think not. Nearby secondary schools are also over-subscribed leading to long journeys for 11+ children and additional traffic.

It is difficult to get an appointment with a preferred GP.

East and West Horsley are in danger of being turned into off-shoots of Cobham and Guildford. There are all too few villages left on the outskirts of London. We should be saving those we have left.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the sufficient evidence for the alleged housing need numbers.

<td>I object most strongly to the above proposal, even though, I do have a lot of sympathy for the decisions that you are having to advise on. It must be very tempting when a large developer says, let me build 1100 houses and I will build you a large secondary school.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
However, if he said I want to build 1100 houses in the middle of a village of 1300 houses, in the green belt on a site which had not previously been considered then it probably would have been a non-starter. So let us see this proposal for what it is, a bribe.

That is bad enough but the developer is offering you something that is not required since the two secondary schools closest to Normandy, namely Kings College and Ash Manor are currently undersubscribed. A point that was very well made by Surrey Councillor Keith Witham.

Now if we look at the site we find it is bounded by a C road (Westwood Lane) and a D road (Glaziers Lane). Not only that but the C road has a dangerous single lane and bend under a railway bridge which has already seen one fatality to my knowledge. The D road also interacts with the railway via a humpback bridge on a bend.

But that is only part of the problem. Both Glaziers Lane and Westwood Lane meet the Aldershot Road via dangerous junctions and there has also been one fatality at the Glaziers Lane junction in recent memory.

The other spurious argument is that Wanborough Station will somehow be used by the children to get to the school. Not a chance. They will arrive by car, if for no other reason than cost or convenience.

I could talk about flood/sewage concerns and environmental considerations but there will be many others who are far better qualified to talk about these topics. Suffice it to say, even this Philistine ex-oil man noticed the impact on wildlife that the development of the 20 acre site to accommodate the Therapy garden, Village Hall, Bowls Club, Archery Club and Doctors’ Surgery has had. What chance the remaining wildlife with another 1100 house and a large school.

*What changes (2016)/further amendments (2017) do you suggest should be made to the document?*

**Attached documents:**

**Comment ID:** PSLPS16/470  **Respondent:** 15192449 / John O'Reilly  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings**

My name is [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] and my address is [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] I strongly object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor
stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I object to the inclusion of this site within the local plan. Development of this site will be used to justify future development plans in the area that will have a significant impact on the semi-rural location that the plans specifies; while careful design can mitigate the immediate impact, I believe that it would have significant impact on the area in the longer-term. Access to the site will be via Tannery Lane that will experience a greater volume of traffic in the near future following the approval of plans for 64 apartments at the tannery and building of the Marina and any further development at Clockbarn nursery would further exacerbate this.

I object to the plans outlined for Site A43. This site is new to the overall plans and was not included in the Regulation 18 draft proposal and so it has not previously had any level of consultation. The removal of this land from the Green Belt requires exceptional circumstances and I do not see that the case has been made for this; in the long-term, developments such as this one may be detrimental to the overall goal of preventing urban sprawl and the merging of settlements such as Guildford and Woking. The provision of housing on this scale at this location would also have a significant impact on the schools in the local area; for example, Send infant school is currently being rebuilt but there is no plan for any increase in capacity. I understand that the site contains an ancient woodland and so the development would endanger trees from C16 and so there are conservation issues with the selection of this site.

I also object to the plans for the industrial development; the 2015 Employment Land Needs Assessment indicated a reduction of 80% in the requirements for employment floor space while this proposal is a repeat of that contained in a
previous draft local plan that used an older evidence base. If there is a need for further development of industrial space, there should be consideration given to an expansion of Slyfield as this seems to be a very appropriate site for such.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed development of the new 4-way interchange with the A3 at Burnt Common. While the provision of appropriate transport infrastructure and services is one of the most pressing issues facing Guildford borough, I am concerned that the combination of this junction and the proposed traffic calming measures in Ripley (as per the strategic highway assessment report) would serve to funnel a significant increased volume of traffic along the A247. This could be further exacerbated by the proposed developments of Wisley airfield, Blackwell Farm and Gosden Hill that are included in the local plan and it is hard to determine whether the highway assessment report made any attempt to model the impact of these developments. The new A3 junction would also encourage the use of the A247 as a ratrun whenever there are problems on the M25 that people would like to avoid, which would be very detrimental to the character of the local area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/616  Respondent: 15192481 / Thomas Collins  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of this site for development in the local plan. This site is a new proposal that was not included in the Regulation 18 draft and has not been consulted on previously. This is a beautiful area of countryside that would be harmed by development and it fully justifies its current Green Belt designation. The subsoil in this area contains documented unsafe landfill waste which is currently vented, further calling into question its suitability for development. The roads in this area are occasionally narrow single track country roads and so access to this site would be restricted, calling into question the logic of providing 2 Travellers pitches here.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the policy to remove the village of Send from the Green Belt. The Green Belt designation of the village of Send provides a key buffer zone between Woking and Guildford that should prevent them from merging in the future and I do not see the 'exceptional circumstances' referenced in 4.3.16. The Government notes that there are 5 main purposes to Green Belt land and I contend that the Green Belt designation of Send is important for maintaining the first 3 of these (listed below).

- to check the unrestricted sprawl of large built-up areas;
- to prevent neighbouring towns merging into one another;
- to assist in safeguarding the countryside from encroachment;
- to preserve the setting and special character of historic towns; and
- to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

In particular, areas of land proposed for removal from the Green Belt include areas behind the school consisting of playing fields and woodland, which are important to the character of the local community and the quality of its schooling, as well as land around the Wey navigation near Carbridge that should not be encroached upon. I only recently moved to the area and I was attracted by the easy access to the countryside that living in Send would afford me and I believe that this proposal will threaten that, making Send a less appealing village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to policy A42 change as the increased number of homes proposed for the Clockbarn nursery site fails to account for the previous objections to the original 45 houses proposed for this site. I am concerned that it will have a significant negative impact upon traffic along tannery lane and, in particular, the junction between tannery lane and the A247. I am also concerned that this development is will negatively impact upon the Wey Navigation, as it will impede what are currently open countryside views protected by the Greenbelt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Attached documents:

Comment ID: pslp172/1392  Respondent: 15192481 / Thomas Collins  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed changes to policy A43 as it takes no account of the many objections to this development made in the response to the 2016 draft Local Plan. I have seen no evidence of demand for plots for travelling showpeople at this site and I also do not see that there are any ‘exceptional circumstances’ that would justify development on the Green Belt at this location. The total number of homes proposed is very high considering the overall size of Send village without any planned increase in infrastructure necessary for such a development. It also seems likely to join Send and Ripley, thereby directly going against one of the key purposes of the Green Belt. I am also concerned about the impact of this number of homes upon the local traffic system.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1393  Respondent: 15192481 / Thomas Collins  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A58 as this policy was deleted from the previous draft plan of 2014 due to the number of objections received and its inclusion now seems like a cynical attempt to ignore past concerns with the plans. I especially object to the change from ‘maximum’ in the 2016 Local Plan to ‘minimum’ as this will lead to the development of far more industrial capacity than is supported by the 2017 Land Need Assessment survey that indicated that the whole Borough needs under 4 hectares of industrial land and this proposal is for at least 10 hectares of development at Send, when there is also underutilised industrial units in Slyfield and Guildford that should be the primary site for development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

[Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998]

I strongly object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the adoption of the New Local Plan relating to the following sites and object to each one on the grounds set out below:

1) Site A25 Gosden Hill Farm - this site along with Site A35 and Send, Burnt Common and Ripley village sites A42, A43 and A44 account for almost 50% of the new homes planned by Guildford Borough Council. The transport and community infrastructure are currently and as proposed completely inadequate to support the proposed development.

2) Site A35 Land at former Wisley Airfield - this site along with Site A25 and Send, Burnt Common and Ripley Village sites A42, A43 and A44 account for almost 50% of the new homes planned by Guildford Borough Council. The transport and community infrastructure are currently and as proposed completely inadequate to support the proposed development.

3) Site A42 Clockbarn Nursery - This site along with Sites A23 and A35 and Send, Burnt Common and Ripley Village sites A43 and A44 account for almost 50% of the new homes planned by Guildford Borough Council. The transport and community infrastructure are currently and as proposed inadequate to support the proposed development.

4) Site A43 Land at Garlicks Arch - This site along with Sites A23 and A35 and Send, Burnt Common and Ripley Village sites A42 and A44 account for almost 50% of the new homes planned by Guildford Borough Council. The transport and community infrastructure are currently and as proposed inadequate to support the proposed development.

5) Site A43A Land at Burnt Common- This site is to provide new access onto the A3. Currently both Send Road and the centre of Ripley are already congested with Local traffic. the provision of a new slip road to the A3 will divert Woking to London traffic, which currently goes via Ripley Village centre, to now move to Send and provide additional congestion to that currently experienced and that which is proposed by the imposition of Sites A25, A35, A42, A43 and A44.
6 Site A44 Land at Winds Ridge, Send Hill - This site is proposing to introduce further housing onto a Lane that already is inadequate for current traffic and add more traffic to exit from Send Hill onto Potters Lane which is a blind junction and already has been responsible for a considerable number of serious accidents.

In particular I object to the proposed blanket destruction of the Green Belt in an area affecting Burpham, Send, Burnt Common, Send Marsh and Ripley which is totally in contravention of the Government's commitment for the Green Belt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I grew up in West Horsley and visit every week with my parents who live there. I use the shops, hairdressers and restaurants on a regular basis. It is very clear to me that the proposals in the Guildford Plan are not thought through properly and totally unsustainable.

I am opposed to removing the village from the green belt. The Council do not appear to be adhering to its own policies in considering removal from green belt. It is vital to protect the balance of houses and green space for the sake of the inhabitants and the future sustainability of the area.
The proposal to build high volumes of housing would destroy the village due to the volume of people and transport and this would impact on air pollution, health and wellbeing of residents. The village layout and infrastructure cannot sustain such high volumes of housing. It would change a pleasant area into a stressful, busy thoroughfare squashed densely into a small area; placing a strain on sewerage, parking, shops and access to Doctors and schools.

I am writing to object to the proposed location of a Crematorium at Area A23 on Salt Box Road.

My house at [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] is located on high ground at a distance of some half mile from the proposed site of the Crematorium.

My house, due to its elevated location, already suffers at infrequent intervals from air pollution from burning plastics, otherwise known as dioxins. I am currently attempting to establish the source of these. The most recent such occurrence was over the night of 16/17th June 2016.

In the meantime my objection to the crematorium is that Crematoria exhaust smells of burning flesh and there is potential for such smell to linger in the atmosphere at the elevated position of my property.

As a general rule I would have thought that the location of Crematoria should be between population centres and not on the edge of a large population density.

I live in Shere Road West Horsley. I have lived here for over 50 years.
I am sending you a list of some of the very strong objections to your housing proposals for West Horsley.
I came to live in a village, not a town.
Once you have taken away the Green Belt it will have gone for good.
Where do the extra children go to School?
What about Doctors surgeries? They are already too busy.
The roads are in a terrible state as it is. Double the traffic and a cyclist is going to get killed by riding into one of the many potholes.
There is not enough car parking facility now. Where are all the extra cars going to park?
Why do you want to spoil beautiful countryside?

Subject: Proposed Submission Local Plan Consultation (June 2016)

I write on behalf of our client in relation to "Guildford Borough Proposed Submission Local Plan: Strategy and Sites," published for consultation on 51h June 2016. Our client is the landowner of "Land at Hornhatch Farm, Chilworth."

Background

The site known as "Land at Hornhatch Farm, Chilworth" was proposed for removal from the Green Belt and allocation as a potential development site in the "Draft Guildford Borough Local Plan: Strategy and Sites" (July 2014) (site allocation no.68]. This was following consideration of the contribution of the site to the main purposes of the Green Belt; its location adjoining an inset settlement; the need for defensible boundaries; and deliverability considerations.

This potential development site has since been removed in the "Guildford Borough Proposed Submission Local Plan" (June 2016) ["the proposed submission local plan"]

Case for Retention in Forthcoming Local Plan

Our client objects to the removal of former site allocation 68 from the proposed submission local plan for the reasons set out below.

Need for Housing

Guildford Borough is currently not meeting its housing requirements. The 2014-15 Annual Monitoring Report sets out on page 9 that Guildford had a 1.4-year supply of housing. It further states on page 11:

"We are not currently able to demonstrate a five year supply of deliverable housing land without amendments to Green Belt boundaries and use of countryside land (against objectively assessed housing need of 693 homes a year)."

This is again acknowledged in paragraph 4 of the decision letter for appeal reference APP/Y3615/W/15/3132375, which states:

"The Council indicate that it cannot demonstrate a five year supply of housing land."

West Surrey Strategic Housing Market Assessment (2015) identifies that there is a need for a mix of house sizes across the housing market area as identified in Table 8.

In respect of the strategy put forward in the proposed submission local plan to deliver housing, the Council are placing undue reliance on Policy A35 : "Land at former Wisley airfield, Ockham." This site is proposed for allocation for the delivery of 2,000 homes. This one site is proposed to contribute up to 14% of the housing required over the plan period.

Our client considers that significant uncertainties exist in respect of the delivery of the Wisley airfield site and that this strategy is therefore unsound.

In addition, a planning application for the site proposed in Policy A7:"Land and buildings at Guildford railway station, Guildford" (planning application reference: 14/P/02168) was refused on 30th June 2016. This potential allocation includes redevelopment for approximately 350 homes. Our client considers that uncertainty exists over the delivery of this and other potential previously-developed sites thereby meaning the proposed number of homes to be delivered in the plan as set out in Policy S2 is unlikely to be met.

Further consideration should therefore be given to the delivery of smaller, sustainable sites, such as "Land at Hornhatch Farm."
Lack of Justification for Removal of Site

"Land at Hornhatch Farm" was included as a potential development site in the "Draft Guildford Borough Local Plan: Strategy and Sites" (July 2014). The reasons given for its omission from the proposed submission local plan are:

"Our spatial strategy and site allocations have been considered through the Sustainability Appraisal and this site no longer accords with the proposed spatial strategy in the Local Plan. The site was identified in the Green Belt and Countryside Study but is located within high sensitivity Green Belt."

Our client considers that the justification for the site's exclusion is based on subjective qualitative methodology used to assess the Green Belt, which has only been published for consultation at a late stage in the plan-making process. The forthcoming plan has therefore not been prepared in the light of a robust evidence base.

Sustainability

Allocation of "Land at Hornhatch Farm" would form a sustainable extension to Chilworth. The site was previously assessed in the 2014 "Draft Guildford Borough Local Plan: Strategy and Sites" as suitable for residential development within one to five years. The site is located in Environment Agency Flood Zone 1 (low risk of fluvial flooding) and is within 5 to 7km of the Thames Basin Heaths Special Protection Area (SPA) and therefore is beyond the zone of influence of this SPA.

Green Belt Considerations

Paragraph 89 of the National Planning Policy Framework (NPPF) states that local planning authorities with Green Belts in their area should establish Green Belt boundaries in their Local Plans which set the framework for Green Belt and settlement policy. It also sets out that authorities should consider Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period.

Our client considers that there is a clear case for removal of the site from the Green Belt and its retention as a site allocation for residential development. The site would have clearly defined boundaries as required by paragraph 85 of the NPPF. Our client notes that additions to the Green Belt are proposed to be made elsewhere in Guildford Borough. This approach is supported.

Deliverability

The site is within single ownership, is available now and development would be achievable in the short to medium term.

Conclusions

Land known as "Land at Hornhatch Farm" should be retained as an allocation for residential development in the Guildford Borough Submission Local Plan: Strategy and Sites.

Guildford Borough is not currently meeting housing delivery requirements and the strategy put forward in Policy S2 is unsound due to an overreliance on particular site allocations, such as Policy A35: "Land at former Wisley airfield, Ockham."
A lack of justification has been provided for the removal of "Land at Hornhatch Farm" from the spatial strategy and there has been a lack of proper consultation on the "Green Belt Sensitivity Map."

Allocation of the site for residential use would have the benefit of bringing forward a deliverable sustainable extension to Chilworth that would contribute to providing much-need housing in Guildford Borough.

I trust that this letter is clear but please do not hesitate to contact me if you have any questions or queries.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Our client is the landowner of “Land at Hornhatch Farm, Chilworth.”

Our client notes that the proposed housing target has been reduced in the latest consultation document and considers that there is a need for delivery of housing sites within the first five years of the plan period. Smaller sites around villages would contribute to this early delivery without compromising the overall spatial strategy proposed.

Paragraph 6.6.15 of the Sustainability Appraisal Update notes that there is a pressure to allocate sites that are able to deliver in the first five years and that smaller sites at villages tend to be relatively easy to deliver. Our client agrees that smaller sites would be relatively easy to deliver, in particular, “Land at Hornhatch Farm.”

Our client notes that paragraph 6.6.16 of the Sustainability Appraisal Update then states:

“In the light of this factor, there is a need to consider the option of allocating additional village sites. The following sites comes into contention…”

Site I- Hornhatch Farm, Chilworth (80 homes)... see further text in Box 6.10.”

Our client further notes that Box 6.10 ranks Hornhatch Farm higher than previously, as two other sites in Shalford Ward have been ruled out (one is constrained by access and the other is in the AONB). This ranking ahead of the two other sites in Shalford Ward is considered to be appropriate.

Our client has considered the growth options set out in the Sustainability Appraisal Update and notes that Hornhatch Farm is included in options 2, 5, 6 and 8. Our client considers that option 2, which includes Hornhatch Farm, would be a more
appropriate strategy for the Borough which would contribute to meeting housing need in a more appropriate way, whilst
taking into account the environmental and other constraints within the Borough.

Allocation of “Land at Hornhatch Farm” would form a sustainable extension to Chilworth. The site was previously
assessed in the 2014 “Draft Guildford Borough Local Plan: Strategy and Sites” as suitable for residential development
within one to five years. The site is located in Environment Agency Flood Zone 1 (low risk of fluvial flooding) and is
within 5 to 7km of the Thames Basin Heaths Special Protection Area (SPA) and therefore is beyond the zone of influence
of this SPA. The site is within single ownership, is available now and development would be achievable in first five years
of the plan period. It would thus contribute to much needed early delivery of housing.

Our client considers that smaller sites around villages would contribute to early delivery of housing in the plan period
without compromising the overall spatial strategy proposed.

Land known as “Land at Hornhatch Farm” has been ranked more favourably in the Sustainability Appraisal of the
Guildford Local Plan Update 2017 and our client agrees with this ranking ahead of two other sites within the Shalford
Ward.

Growth option 2 in the Sustainability Appraisal Update would represent a more appropriate strategy for the Borough and
allocation of the site for residential use would have the benefit of bringing forward a deliverable sustainable extension to
Chilworth that would contribute to providing much needed housing in Guildford Borough within the first five years of the
plan period.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to moving the green belt boundary to exclude the fields behind Shalford Village Hall. These fields should stay
protected as green belt and not for future development.

As a resident of Kings Road, the elevation of land by the village hall is the highest in the local area and any housing
development built on it will tower over the village community and spoil the natural beauty of the area. It is well known that
the vast majority of local residents are also against this.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object therefore to the number of developments planned in such a relatively small area, the infrastructure in around Send and Ripley, can only just about cope at present! An appointment at our local Doctors surgery can mean a wait of well over a week, the local schools are stretched to find places for the local children and then there's the traffic! The roads in the morning are jam packed queues common place and the roadways themselves damaged through volume of traffic and lack of maintenance, so how on earth are we going to accommodate another several hundred homes!

I object to the council viewing our villages as the answer to the housing needs of the area. The transport links from Send and Ripley are poor to say the least. The buses run once an hour, so without a car to get to a railway station, or towns such as Woking or Guildford would be very difficult. So how are all these new home owners going to get to work as with the increased traffic no one would get anywhere there'd be total gridlock!

I object to the lack of foresight given to the infrastructure required to accommodate all these additional families, where would the children go to school? How would you ever get a Doctors appointment? The roads would be permanently blocked and therefore become damaged, local shops could not provide for the demand, and as I mentioned earlier there is a very limited bus service.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3
I am writing to object most strongly to the proposed local plan. We have lived in Send Marsh since 1975. My husband had to commute to London for work, but we wanted to live in an area beyond the suburbs of the city, which had some open space. The proposed construction of hundreds of houses in and around Send Ripley Merrow and the Clandons, will create a density of housing and therefore increased traffic and pressure on local services that will mean we become a suburban area too!

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to 'bullet' point my main concerns:

I object to the erosion of the Green belt, the villages of Ripley Wisley Clandons and Send, are apparently earmarked to lose their Green Belt status, this is outrageous. Property in this area commands high prices, this is because of the location. Residents accepted the inflated price in return for being able to live in a pleasant semi-rural location, with the knowledge that as there was green belt land in the area it would not change too drastically or become over developed!

Comment ID: pslp173/190  Respondent: 15195969 / Carrie Wheeler  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send Marsh/ Burnt Common

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am a resident of Send Marsh and have been for the last 40 years. As you can imagine I have seen some changes over that time, which I have accepted and adapted to, as they were well thought out and managed to maintain the character of the villages of Ripley and Send, BUT the draft plan devised for this area in the last 18 months is the destruction of the character community and picturesque landscape of our loved villages.

I object to the increased number of houses planned at Clockbarn nurseries from 45 to 60. This is an increase of 33% and objections were made on the original development! An increase will just further hit the already struggling infra-structure, clogged roads with too much traffic, road surfaces getting damaged, increased risk of accidents and health hazards from fumes, from the volume of cars.

Our green belt will become less and less, countryside views will be a thing of the past and there will be an increased risk of flooding as the area is allocated as flood zone 2. More houses will inevitably upset the already tested water table putting our homes at risk!

I object to the increased number of houses to be built at Garlick's Arch, also giving provisions for 6 travelling show people plots -Why? As far as I am aware there is absolutely no need for making allowance for that many plots, the circus does not come to town in Ripley and Send regularly so why are these areas necessary?

Why is it thought a good move to build on our preserved green belt land and have no distinction between the 2 villages? They will simply morph into one and all the individual character of the villages will be destroyed, the area will become one large waterlogged traffic jam!

It should also be noted that the area is contaminated with lead shot, accumulated over 50 years, which would be a hazard for building on.

I object to the new allocation of a Minimum of 7,000 sq m. Given to industrial and warehousing space. On the original plan this figure was given as the Maximum allocation of space. The call for these sites, seems rather excessive as areas such as Slyfield in Guildford have empty sites and the 2017 Employment Land need assessment showed that there has been a reduction in demand to 3.9 hectares for industrial land, our allocation is equivalent of 10 hectares of land and on GREEN BELT land!

With the traffic already on breaking point if all the housing plans go ahead, the addition of Lorries, and delivery trucks etc. Will just cause total gridlock So all in all I object most strongly to all the new proposals, stating many of the reasons in my letter. I completely understand that additional houses are required in the area, but Ripley and Send are already struggling Surely if we had wanted to live in a town, we wouldn't have come to live here! We pay a lot of money to live...
here, in property prices council tax, and maintaining the charm and beauty of the area, please respect our views, we are a united front in our upset at these ruinous plans and I beg you please to listen to our concerns and appreciate that these proposals are far too excessive and will bring nothing but problems upset and bad feeling.

---

Comment ID: PSLPA16/368  Respondent: 15196065 / Peter Collett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to focus on various aspects of the proposed local plan. I have lived here for 59 years.

I am particularly concerned about the following:-

(a) Very many of the inhabitants of the Horsleys bought property here because it is in the Green Belt; I want the Green Belt to be preserved for future generations.

(b) without knowing the precise statistics it is likely some 20% to 25% of the current population in the Horsleys are older than 60. Most of us live in houses with many bedrooms and I feel would like to downsize without moving outside the Horsleys if there was a greater availability of smaller houses or bungalows: if therefore new houses are to be built most of them in my opinion should have no than three bedrooms.

(c) it is not clear to me what provisions are being made for increases in services such as doctors' surgeries, school places, parking sites etc and who will bear the cost of developing such infrastructural needs: it strikes me all the focus in the new local plan is on the sites for new houses

(d) I am totally against the development of a satellite town at Wisley which would have a huge impact on the Horsleys because of its proximity.

I would be grateful if all the above considerations are taken into account.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 6: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I had a look at a copy of the above in the East Horsley library - a somewhat formidable document.

What I could not find was any reference to the necessary infrastructural plans (additional school places, extra medical facilities, car parking, etc) if 295 new dwellings are going to be built by 2024. I am also concerned about the type of additional houses and the provision of more care and nursing homes for the increasing numbers of frail and elderly.

I would hope the Council can block now the building of monster houses in place of bungalows or two/three bedroom houses.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The housing numbers proposed are for nearly 14,000 homes over 15 years from 2016 to 2031. This number is too high. The model used to calculate the number has not been seen or the assumptions tested by the council or any of its officers. It has been, on numerous occasions shown to be flawed by various 3rd parties. This housing target will result in the borough’s permanent resident population increasing at **4.5 times the rate of population increase during the period 2001 to 2011**. This population growth, by definition, is excessive and unsustainable for a gap town with many environmental, physical and infrastructure constraints.

Over 70% of the proposed housing is planned for land currently in the Green Belt. Housing need is not a reason in law for protected green belt land being used. It is perversely for so much housing to be planned for the green belt. Clearly, the green belt has not been used as a constraint as clearly set out in Government advice, planning policy guidance, the NPPF, case law, election manifestos and Ministerial letters to MPs.

For the West Horsley this is reflected in a 35% increase in the number of houses within 3-5 years of a plan being adopted.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the expansion of commercial land in the urban area losing the potential for further housing. Policy E7: Guildford Town Centre

There is no reliable evidence provided that the retail core of the Town Centre can support expansion of 45,000 sq m of additional retail space at North Street.

Online retail is set to account for 21.5% of total retail sales by 2018 from 12.7% in 2013, the highest online retail share in the world according to the Centre for Retail Research. March 2016, online sales rose 12.3%, and it was the third consecutive month in which more than 20% of all non-food shopping took place online, (British Retail Consortium and accounting firm KPMG) With such a high retailers will need just 70 high street stores to create a national presence compared to 250 in the mid 2000’s. An expansion on such a scale is negligent when the Council claims to be in such desperate need for housing.

Retail is a declining industry and should not be invested in by the Borough at the expense of housing in the most sustainable urban location, near employment and transport hubs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1118  Respondent: 15196097 / Mark Groves and Katie Hamilton  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages. There is too much traffic in our villages already and this plan will cause more congestion in West Horsley, East Horsley, Normandy, Ockham, Ripley, Send and Clandon, with no plan to improve that. The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses in such a small area means dangerous and unsustainable traffic.

1. I object to not protecting the Green Belt (Policy P2)

Our Green Belt is precious. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding; it is the city’s playground. It is for us to conserve and protect it. There are 5 legal purposes for Green Belt, and it meets them all:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns
- To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

This policy is flawed and should have been amended. In the last consultation just six individuals, out of the c. 7,000 of those who took part in the consultation, supported the policy. Another 20 comments of support were from organisations such as: the University of Surrey, local councils (including Guildford), consultants (e.g. Savills) or landowners. But of the 1,371 who commented on the green belt policy 1,332 (97%) were against.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/1116  Respondent: 15196097 / Mark Groves and Katie Hamilton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the Local Plan as the development proposed is not sustainable (Policy S1)

13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially West Horsley, East Horsley, Normandy, Ockham, Ripley, Send and Clandon. The local communities don’t need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car.

The development should be in urban areas where there is sustainable transport. West Horsley for example will see the number of housing increased by 35% within 3-5 years of the plan being adopted. The number and density of housing is not in keeping with the local area and is therefore against policies within the NPPF.

Comment ID: PSLPP16/1122  Respondent: 15196097 / Mark Groves and Katie Hamilton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. NO EXCEPTIONAL CIRCUMSTANCES

The local plan proposes nearly 9000 new homes to be built on Green Belt land (compared with ~ 50000 current homes in Guildford, so approx. equal to 18% of the existing homes in the borough) – a huge proportion. The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is NOT an exceptional circumstance in law. No exceptional circumstances have been disclosed. So the Green Belt boundaries should NOT be changed through the plan making process.

1. BROWNFIELD AVAILABLE

There is brownfield land available in the town centre which is being earmarked for commercial development rather than for housing. This is enough to meet our real needs for affordable local homes. There are enough vacant commercial sites to cope with genuine business need, and we have enough retail capacity already, so urban brownfield/derelict land should be used for housing.

1. DRAINS, WATER SUPPLY, FLOOD RISK, CONGESTION

Our drains, our water supply, our medical facilities and our roads cannot cope with the proposed number of new homes. Building this number of homes will lead to flood risk here and downstream (along the Wey and Thames). The planned development on Green Belt is therefore unsustainable.

In conclusion, I must ask you to revise the housing number, and to amend the Local Plan to utilise brownfield land rather than green field sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/370  Respondent: 15196161 / Michael Corlett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Please note my following objections to the local plan:

1. I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford and is a very beautiful area. The Government advice is clear that housing needs alone are not adequate grounds for building on the Green Belt.

2. Send. I object to the significant changes from 185 houses in April 2016 to the presents 485 which will require a full consultation under Regulation 18, not the short cut of Regulation 19. These were not included in the previous consultation in 2014. These sites have been substantially changed and have not been properly consulted.

I object to the complete failure of GBC to identify existing brownfield sites within the urban area which could be developed before the open countryside and Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

Policy A43: I object to the land at Garlick's Arch designated for 400 houses. This site was not in the Regulation 18 draft and has not been consulted upon. The industrial development is not required since the latest Employment Land Needs Assessment 2015 shows a reduction of 80% in required floor space from the previous draft plan. There is a 40ha site available at Slyfield. The additional traffic resulting from such a development would increase the traffic on Send Road and the Portsmouth Road at Ripley which are already gridlocked at peak times as is the A3.

5. Policy A43a. I object to the proposed new interchange onto the A3 at Send Marsh/Burnt Common. This would add to the gridlock on the A3 at peak times which is already a major problem, and it would become a major access point to the A3 from Woking East Surrey and the approach roads and infrastructure are totally insufficient.

4. Policy A44. I object to the proposed development on the land west of Winds Ridge and Send Hill. This site is Green Belt and is also unsuitable because the subsoil is unsafe as it is an old land fill site and is currently vented because of noxious gases. It is also unsuitable because of the narrow lane and very dangerous blind corner with the junction of Potters Lane and quite unsuitable for Travellers Pitches with their lorries and caravans. The additional traffic generated would be impossible on an already narrow roads which gets very congested with school traffic and parking, particularly during the morning and evening rush hours.

Policy 2 Green Belt at paragraph 4.3.15

I object to the proposal to take Send Business Park out of the Green Belt. It is an old site on the banks of the River Way with very limited access via Tannery Lane and further development of this site would present innumerable problems. The land floods and the increased traffic created on this narrow lane which is single track for much of it with few passing places, would prove impossible. It is the Governments policy that Green Belt lands should be preserved as such.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A58 Land at Burnt Common, Send.

I object, in that this had previously been deleted from the 2014 Draft owing to the objections raised and there is no demand for industrial land in the middle of Green Belt when there are still empty sites at Slyfield. Once again the traffic generated would cause gridlock on already very congested roads. The 2017 Employment Land Need Assessment show a reduction in demand for the whole borough to 3.9 hectares and to over allocate 10 hectares to Send is entirely disproportionate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the careless destruction of the Green Belt. The greenbelt was created to protect from urban sprawl, protect the countryside and provide space for recreation outside of big cities… As a local resident/as a regular visitor/I work in Ripley… I object to the reduction of these green spaces. 13,860 new houses is not sustainable and will damage local communities by overdevelopment – the plans proposed growth based on the SHMA report are more than double the figures used in previous plans. The Guildford local plan proposes an unsustainable increase in population, which will not be sustainable on the current or proposed road networks… As a regular commuter through these villages, I am all too aware of the problems that increased traffic will cause… increased commute… /I work in Ripley…/school run…the A3 and M25 already suffer from congestion…]

I object to the local plan on the grounds that it will destroy several landscapes of beauty for current residents and visitors as well as future generations. Decreased enjoyment of the area, views, fresh air…

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposed changes to move the Green Belt Boundary. The fields adjacent the village hall are an important feature of the village. Any development on those fields would have a negative impact, including increasing traffic flow on already over-stressed roads at peak hours.

I object most strongly to any building on the GREEN BELT.

I object to any villages that are currently in the GREEN BELT being removed from it, such as the Horsleys, Ripley, Send, Clandons. There can be no justification for it as there are plenty of BROWNFIELD sights still available to accommodate the suggested requirement for some 693 homes per year for the next 20 years.

I object to the possibility of Guildford being increased by some 25 per cent due to the foregoing predictions which are unfounded.

I object most vigorously to any Brownfield sights being used for further factories, offices, warehouses and shops that would not include very substantial affordable housing in their planning footprints.

I object very strongly to any change in current settlement areas.

I object strenuously to any diminution of the current GREENBELT (National Planning Policy Framework Para 79).

I object to any widening of the village boundaries to encroach upon the current Greenbelt.

I object to the scale of new building throughout the Guildford borough which can not be reasonably substantiated and appears completely unfounded and a figment of some distant planners imagination.

I object most strongly and specifically to the proposed building on Gosden Hill Farm which is in the GREENBELT and designed to keep West Clandon from being absorbed into the Guildford sprawl.

I object again most vociferously to any development of Garlick’s Arch with a view to creating a spur off the A3 going Southbound or Northbound as the surrounding infrastructure would be totally unable to handle any increase in vehicular traffic. Our already overcrowded village roads would not be able to cope with any increased traffic and would cause a highly increased possibility of injury or death to the local population as sidewalks are virtually non existent or indeed too narrow to accommodate the current village populations.

I object most strongly to any change being made to Newlands Corner, an area of Outstanding Natural Beauty that is FREE to everybody to enjoy and must remain so.

It is a fact that Surrey County Council has no funds available to repair many of the roads in and around West Clandon -
specifically the junction of the A247 and A246 at the South end of West Clandon, and it would appear the Highways Authority have no interest.

The GREENBELT is sacrosanct and must be fully and totally protected at all times for future generations.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a VITAL role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Answer (if comment is on questions 1-7 of the questionnaire): ()

It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

It is further from railway stations than any other identified strategic site.

It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe, putting my family and others in danger.

It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. RHS Wisley traffic already cause frequent congestion by traffic on local roads – there is already vulnerability and this will get worse.

1. The associated traffic increase from the RHS has not been taken into account.
2. The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account

There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis – again, more danger and potential fatalities.

The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station

It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area.

I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB and destroy the far reaching countyside views for future generations. Surely there is a responsibility to maintain this?

object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objections from local residents and statutory consultees – Why bother to consult if you then ignore the overwhelming popular view?.

I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

I object to the extension of the plan period by 1 year as it has not been identified as a major change

I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

It is my belief bearing in mind the reasons listed above from a not exhaustive list that this plan is unsound and not fit for purpose.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

- Lack of essential infrastructure. Where are the schools going to be built to accommodate the instant growth in the population? Our schools in and around Burpham are already stretched to breaking point, with most of them having taken extra form intake for the past few years. Burpham Primary is a prime example. There was obviously no thought given to the extra traffic a further form intake would cause across the board. What was a lovely village primary school is now an impersonal business venture that over the past 4 years has gained 120+ students, and will gain virtually 100 more over the coming years. Boxgrove has also increased in size as well as
other primary schools. Where will the children go when the move up to senior school? Bus routes have also been adjusted/reduced making parents drive their children to school thus creating more traffic.

- Also, where are the new doctors? Increasing new housing by 693 pa, which incidentally is double that of the 322 put forward in the 2012 plan is not sustainable. Why has this number doubled and where will the influx of people come from that this extra 371 houses per annum suggests is necessary?

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

- Disproportionate level of development in a single area - why is it necessary to build a new village at Gosden Hill (2000 houses) that will not have the appropriate infrastructure to support it. 1800 at Blackwell Farm, 2000 at Wisley, 500 at Garlick,s Arch and more importantly 1000 at Slyfield which could well turn into 1700 is not appropriate. Slyfield is also dubious as a site because of what is buried beneath the land, and the risk of flooding.

  - Consultation period - this is very limited and it would appear that the council are rushing things through without proper thought. Making a decision on the plan before the tunnel under Guildford has been properly assessed/ agreed seems ludicrous. There will be a creation of so much traffic before a solution has been agreed to deal with the said traffic.

For the above reasons and more, I object to the Guildford Plan. The level of housing being suggested is double what was originally mooted and I feel is not appropriate for Burpham and the surrounding areas.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
We strongly object to the revised local plan on the basis that the housing numbers required appear to have been calculated out of thin air. There is no transparency in the way the new numbers have been calculated and therefore these should not be used to over populate an already overpopulated borough.

The plan for Gosden Farm has been based on building on green belt land. The local plan does not address the need for housing without building on green belt land which I assumed was not acceptable. The additional traffic through Burpham that this will cause is also not acceptable. The building of the supermarket Aldi with access only via Burpham Lane already causes gridlock and not just at peak times. Introducing a minimum of 1700 cars driving through Burpham if this development gets the go ahead is not acceptable. The air pollution of this additional traffic will not be acceptable.

Pushing more traffic through Burpham is not an acceptable alternative as there is insufficient room on the London Road as it stands now. Adding additional housing into an already overpopulated area will mean that Burpham will disappear into an urban sprawl that will undoubtedly please Guildford Borough Council as they have already let several developments spring up where one house has been changed into three houses, already adding more traffic to the overburdened roads.

For the above reasons I strongly object to the local plan that appears to have been made on dubious calculations without thought to local residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the 2016 draft local plan due to:

Brexit and the expected reduction of demand for property, and the lack of evidence for alleged housing need numbers.

Loss of Green belt

Lack of specific details of essential infrastructure requirements, given the current very high levels of congestion already evident on the A3 and surrounding roads. (The A3 is stationary twice a day every day past Guildford, the town is regularly grid locked)

No decision on an A3 tunnel.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Local Plan as the development proposed is not sustainable (Policy S1) the new houses proposed is not sustainable – it will damage local communities by over development, especially Ripley, Send and Clandon. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Plan has nothing to improve the infrastructure for Garlick’s Arch. We are losing too much of our countryside and rural areas - please keep some of the UK as it should be.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We are writing with reference to the 2016 draft local plan and wish to notify you of our objection to this.

Before any local housing developments in the proposed areas - Blackwell farm, Wisley, Slyfield, Send, Garlick’s Arch - essential road infrastructure must take place, which includes building the A3 tunnel.

Before the building of Aldi in Burpham we could travel along New Inn Lane with some traffic congestion but ever since its construction (in order for us to get to Orchard Road) there is on average a 30 min plus queue all the way along that road during peak hours. This is because at the roundabout, there is a constant stream of traffic from the right (usually the A3 or from Jacobs Well) and as you have to give priority to the right, this lane of traffic hardly ever moves, particularly if you want to turn right to Sainsburys or if you live along any of the side streets on London Road like we do. This is not effective or productive when you have two small children in the back of a car. We now have to resort to going along Merrow Lane as that is the only other access road and start queueing up with the A3 slip road traffic.

We have lived in Guildford for more than 10 years and although the housing developments continue there has been little investment in expanding the road infrastructure. We did feedback to the previous local plan and none of the proposals to alleviate congestion such as the roundabout in Merrow at the top of Park Lane were implemented, i.e. make the roundabout a small hump which can be driven over as those coming from Clandon that want to turn right cannot do so because of those coming from Burpham who want to turn right and then clog up the roundabout.

It is the only town in the UK that has a hideous system of one way access points to and from the A3 which forces many people to travel past Ladymead just to join the A3 southbound.

The proposed local housing developments will add 6000+ homes without much change to infrastructure. Already it takes more than 30 mins to travel anywhere around Guildford. Do you really want Guildford to be renowned for its stupid road infrastructure? We will become the laughing stock of the south.

The plan also shows a disproportionate level of housing development in these areas, coupled with a limited consultation period, lack of any detail on essential infrastructure and lack of evidence for alleged housing numbers which has more than doubled from the previous figure in 2012.

A positive decision on the A3 tunnel needs to be taken before Gosden Hill and the other areas can be earmarked for development.

We urge you to consult in an appropriate period and to think of the hellish lives of residents and future generations should you implement this plan without the required road infrastructure.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Wisley Airfield

3.1. The proposal to include this site in the Local Plan and remove it from the green belt is puzzling as it was the subject of a planning application refusal in recent months.

3.2. The reason given for the refusal was because the site was within the Green Belt. So why do that when GBC had the clear intention of moving the site out of the Green Belt within next few weeks? There were other reasons that were glossed over in the report that are not resolved by GBC recent actions. The impact on infrastructure, which is clear for all to see, only gets a passing mention. For example, the transport report by the developer's consultants has been torn apart following many comments and objections. Missing traffic numbers, grossly understating the impact of the development on trunk roads and local roads. The information provided in the Local Plan implies that if billions are spent on road and transport network improvement the development at Wisley could proceed with improvements funded by developers.

3.3. There appear to be 58 projects included in GBC wish list; statements have been made that for the housing program to move forward, it would require the majority of the programme of work to be delivered. At this point in time only 4 of the 58 projects have received committed funding even one of these is in doubt if Highways England is to be believed.

3.4. No solutions have been arrived at for the problems in the centre of Ripley. After more than 2 years of meetings and discussions involving SCC and the developer's consultants no workable solution has been identified. GBC local plan dismisses this significant problem saying it will be resolved with a "management solution". I would be very interested to hear what that solution could be and I suspect SCC highways would also be interested.

3.5. Both Highways England and SCC Highways issued holding objections in relation to the recent planning application for the Wisley site. This is, apparently, all they can now do as they are unable to refuse an application. If these two key agencies have expressed their grave reservation over the potential development on this site, why do GBC insist in promoting the site?

3.6. Under the latest Housing and Planning Bill, if sites are included in a local plan there is a presumption in favour of an application with matters of detail only to be resolved. Large slices of GBC traffic solutions are based on survey and analysis yet to be done when more detail can be made available. In other words they do not know the full extent of the problem. This information will be the result of a further examination of the issues and with solutions that are not currently apparent. I suppose this is the reason for the vagaries of the budgets. The only beneficiary of such an ill conceived and ill prepared approach will be lawyers representing the future developers when they are asked to pay for or contribute towards any mitigation.

3.7. The budget costings are said to err on the conservative side. Worked out on the back of a fag packet is more the case! How can anybody be expected to take a budget plan seriously when the individual projects have a budget plan estimate in the range of £100m to £250m on a single project. It is no wonder only 4 of the 58 projects have any commitment.

3.8. There are serious environment issues on the Wisley site and the nearby SPA. Pollution levels already exceed EU levels. The proposed SANG provision is immediately adjacent to the SPA a point that was criticized by Wildlife Trust, and Forestry Commission and initially by Natural England. The latter making a reversal of earlier comments following changes in personnel.

3.9. I therefore Object to the Wisley Airfield site being taken out of the Green Belt where it continues to serve the purposes intended by its original inclusion.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Ref Proposed Submission Local Plan

I would like to raise the following objections to the above Plan:-

1. **Housing**

1.1. The target for new homes outlined in the Local Plan represents a 25% increase in the housing stock of the borough; The Office of National Statistics (“ONS”) projects a population increase (including that for economic growth) of some 15% for Guildford Borough over this same period. Why do we need the 25% increase in homes?.

1.2. The infrastructure proposals are inadequate even to meet existing needs let alone the proposed additional developments in the Local Plan.

1.3. Policy S2: is a Borough Wide Strategy (the “SHMA”), which looks at how the annual housing target of 693 homes is made up. It estimates that 517 homes per annum arise from ‘the demographic figure (supported by ONS office national statistics) projections. To this GBC plan has added another 120 homes per annum in order to ‘support extra economic growth’, a further 31 homes per annum to ‘improve affordability’ and 25 homes due to ‘student growth’, all of which totals up to 693 homes per annum target more than in the rejected plan.

1.4. This does not make any sense as we do not need an uplift for extra economic growth. Current growth patterns are included in ONS projection.

1.5. The increase of 25 homes to ease affordability issues will result in only 10 social/ affordable houses being built. It would be better if planning permission was only granted for 1, 2, 3 bed properties for a period of 2 - 3 years with a restriction on the percentage of 4 & 5 bed if required. This would help to provide a better mix for both market and affordable homes in all parts of the borough.

1.6. Student accommodation should be provided by the university. The University’s expansion should be in line with what it can deliver in terms of extra student accommodation.

1.7. GBC Affordable Housing Policy H2 is proposing that all development sites (other than those with less than 10 units) will be required to have 40% of their homes offered as affordable housing. This to be on all site irrespective of where they are or where the homes are most needed. Local authorities are able to take payments in lieu from developers, but GBC have rejected this option. Why? This “one size fit all” policy will mean that homes will be built where they are not needed and not enough will be built where they are needed. Developers are therefore able to influence the level and type of affordable homes built. The housing mix in the Local Plan suggests more 1-bed homes should be built than 2-bed. GBC have ignored the figures from their own needs data (where more 2-bed homes are needed) in favour of those produced by
their external consultants report. These reports have been influenced not by sound internal data from their housing records but by the vested interests of the development lobby. The only changes that can be made to the number on each site is at the developers discretion and at their request. GBC are unable to promote changes.

1.8. If any affordable social housing is built in a village like East Horsley and on most of the sites in West Horsley they could be lost to the market as there is no rural protection against the right to buy or enfranchise.

1.9. Most of the social housing in EH has already been lost as a result of right to buy. GBC should take payment in lieu from developers and build the social affordable home in more urban areas where they are most needed.

1.10. GBC’s new policies will encourage the buy to let investors who will receive a good return on their investment.

1.11. POLICY H3: Rural exception homes are required on a small scale and can be retained as affordable and built on the edge of village and have significantly less impact on the Green Belt.

1.12. I therefore object to the proposed housing numbers and policies based on the above points.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1164 Respondent: 15197249 / Deborah Harris Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Green Belt

2.1. Proposed Submission Local Plan includes the statement “We will continue to protect the Metropolitan Green Belt”. No this is not the case. The housing policies set out in the Proposed Submission Local Plan; indicate that 65% of proposed new developments will take place on land that is currently in the Green Belt.

2.2. Under NPPF regulations GBC and other Local Authorities are permitted, once they have determined their Objectively Assessed housing Need (OAN), to make allowance for factors which may constrain the delivery of new housing. Constraints such as the need to protect the Metropolitan Green Belt, or the restrictions required to protect the Surrey Hills Area of Outstanding Natural Beauty, or land costs etc. Although these designated areas make up a large proportion of the land area of Guildford Borough, GBC has made no attempt to reduce its housing numbers in order to take account of such constraints. They have instead increased the number, beyond that required for normal growth projections to satisfy their own egotistical view on a path of massive economic growth.

2.3. Currently development is permitted within the settlement boundary, where villages are washed over by the green belt with particular planning regimes being applicable that have proved beneficial in preventing the urbanization of many villages. They are very successful, because of the non urban nature of small scale new development to help to retain the openness of the villages. These villages house, in some cases, a population of 4000 plus people, yet are regarded by residents as small villages. For those who drive through these areas they do not see a mass of urban style developments but trees and hedges, views between homes, views through spaces that don't reveal row upon row of homes but space and openness with trees amongst the homes and a variety of scale and architecture.
2.4. Washing some of the larger villages will result in them becoming their own urban sprawl as a result of disproportionate infilling.

2.5. Changes to settlement boundaries have been made in order to make more land available for the developers under the guise of making the boundaries more defensible. Many straight lines have now been drawn which result in villages developing hard edge profiles with buildings replacing the fragmented softer edge of the original hedgerows, trees and green fields.

2.6. Loss of Green Belt resulting from these boundary realignments can only be justified in exceptional circumstance. None of which have been provided. Moving a boundary from one already defined boundary to another, again can only be done in exceptional circumstance. Housing need has already been turned down as such an exceptional circumstance.

2.7. I object to all these changes being made to the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I write to you with serious concerns over the draft plans for the plans to expand the housing in the Ripley/Wisley/Clandon area.

My family & I are residents of Ripley. I understand the need for additional housing in the area but have serious objections to the current plans put forward among our local villages. The **OBJECTIONS** I have are:

1) **The plans for the manner in which to alleviate the additional traffic in the area**: already the roads through Ripley become un-usable at certain times of day and the noise, pollution and lack of traffic control is unacceptable. The new plans will most certainly not alleviate the issue but make it many times worse. The plans for the new on/off ramp at Clandon will only serve to increase the traffic as opposed reduce it as well.

2) **The erosion of the green belt.**

3) **The lack of provision for infrastructure, such as schooling & doctors surgeries.**

4) **The removal of our villages from the green belt.**

5) **The disproportionate amount of development in one area**: ours are some of the most popular villages in the region and the reduction in their charm & beauty will be terminal for the future of them.

6) **The lack of consultation period.**

Please feel free to contact me should you wish to discuss in greater detail the issues that I have. There needs to be serious discussion with villagers on the current plans and greater consultation & effort to find more appropriate sites for new housing which could be built with suitable infrastructure in place.

I object to the final draft plans relating to Send and Ripley for the following reasons:

1) I object to the increase in the number of homes being planned which was 185 in April 2016 and has now increased to 485 and this has been done without any consultation.

2) I object to the removal of Send and Ripley from the Green Belt. Send provides a strategic buffer between Guildford and Woking with lots of areas which are used for local recreation.

3) I object to the 400 houses and the 7,000 sq m of industrial and warehousing at Garlick's Arch. This site was not included in the Regulation 18 draft and has not been subject to consultation.

4) I object to the new 4-way interchange onto the A3 at Burnt Common which would have disastrous effect on the traffic in Send and Ripley which is already congested and used as a cut through from Woking to the A3.
5) I object to the new proposal of building of 40 homes and 2 travellers pitches west of Winds Ridge and Send Hill. This is a new proposal and not included in the regulation 18 draft and has not been consulted upon. Development of houses is inappropriate as the road is very narrow with no pavement or lighting. The land to be used for development was previously used for landfill waste which has to be vented. The area is very popular and is an area of beautiful countryside which would be spoilt by any development.

As a resident at the above address for 29 years, I wish to make a strong objection to “The Guildford Borough Council’s Proposed Submission Local Plan: strategy and sites” and, in particular, to the proposals for Policies A36, A37, A38, A39, A40 and A41.

Firstly, I object to the proposed Plan on principle because:

Policy P2: Green Belt and the Countryside/Policy P1: Surrey Hills AONB. No “exceptional circumstances” have been demonstrated for removing West Horsley from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries. The Green Belt & Countryside Study is flawed and the Key Evidence document “Guildford Borough Economic Strategy 2013-2031” makes no case for locating 385 new homes in West Horsley.

Policies S1 Presumption in favour of Sustainable Development, S2 Borough Wide Strategy, H1 Homes for all and H2 Affordable Homes. The addition of 385 new homes for West Horsley across four sites represents an increase of 35 % on the existing number of houses which is unsustainable (only one small shop, no post office and very limited bus service) and is totally unproven and inappropriate (The West Horsley Parish Council and Surrey Community Action Housing Survey: May 2014 only identified a need for about 20 affordable homes for local people).

Secondly, I object because insufficient provision has been made to improve the following essential infrastructure:

1. The Raleigh School has been full for many years and places at the Howard of Effingham School are limited with long commutes for children forced to attend other secondary schools. Relocating and building ever larger local schools does not necessarily enrich the children’s educational experience during their formative years.

1. The Horsley Medical Centre is always very busy with delays before seeing a doctor. The alternative of attending the A&E Department of the Royal Surrey County Hospital only aggravates the problems of an over-stretched NHS.

1. The Street and East Lane are already congested with early morning road traffic due to on-street parking, a single lane chicane and numerous school buses. Ockham Road North and the A246 are similarly busy. There is thus the serious risk of injury to school children and cyclists from increased traffic at a time when drivers can be tempted to rush to their early morning destinations.
1. Car parking at Horsley Railway Station on weekdays is normally full of early morning commuters to London. This makes it very difficult/impossible for people to travel by train anywhere later in the day causing problems of increased road traffic and is in conflict with the Government’s policy to reduce carbon dioxide emissions.

1. Flooding on The Street, East Lane and Ripley Lane is already a problem after heavy rainfall. There are also known sewage overflow problems in the Ockham Road North/Green Lane area. The loss of natural drainage with land use change and additional household waste water will aggravate these problems.

This letter is a plea that Guildford Borough Council withdraw the proposed Plan, scale down the scope/content and seek alternative sites and solutions to the provision of large numbers of additional homes in West Horsley and surrounding villages. The Government’s advice is clear – the housing need alone is not adequate grounds for building on the green belt and any major new development must take account of any need to upgrade the necessary infrastructure. The GBC should reconsider and revise the Plan before proceeding any further.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/520  Respondent: 15197697 / Ed Jamieson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a VITAL role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Answer (if comment is on questions 1-7 of the questionnaire): ()

To the Planning Policy (Local Plan Consultation)

I am writing to object to the Draft Local Plan for Wisley Airfield, Gosden Hill Farm and Garlicks Arch.

There will be chaos in the area with the proposed new traffic and new sliproads onto Burnt Common roundabout. The A3/ M25 is already a very traffic spot and getting gradually worse putting a strain on the adjoining roads. We already have an influx of cyclists and heavy traffic.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Having moved to West Horsley 38 years ago to escape the urban sprawl of suburbia, the exact same thing seems to be about to happen in the Horsleys if the new local plan is implemented. There are already problems with parking at East Horsley medical centre, Horsley railway station and the local shops.

The roads adjoining the Raleigh school get choked up twice a day with school traffic already. With the inevitable increase in traffic that 533 new houses will bring, this is another situation that can only get worse.

The amount of heavy goods traffic using Ockham Road South and Ockham Road North as a short cut between the A246 and the A3 at Wisley has increased quite significantly and there are sections of Ockham Road South that are too narrow for this kind of traffic. There is also a problem on this road with the surface water not draining away efficiently, resulting in any pedestrians who are trying to get to Horsley station, the medical centre and the local shops having to run the gauntlet of being splashed and soaked by the passing traffic.

It would appear that the existing drainage infrastructure is not capable of dealing with the current surface and waste water problem. This situation will not be improved by concreting over large areas of green belt land and replacing it with high density housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to register my protest at the proposed new housing development in East Horsley.

I strongly feel that this development will overstretch the local infrastructure leading to further strain on already congested local resources.

The added traffic, pressure on schooling and regrading of the rural environment would be severe.

This project is unwise and ill thought out.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the plan to build 14K houses across the borough of Guildford.

The town cannot cope with another 30-60K+ people coming to live in this area.

Already, the town is congested and schools, doctors surgeries etc are already struggling to cope for demand for their services.

We moved to the Borough recently and we enjoy Guildford the way it is - please do not ruin the town by making it unbearable to live in for the residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Another reason why we moved to Guildford was for the access to the beautiful Green Belt countryside. We would be absolutely devastated if the beautiful countryside was used to build new housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPA16/401  Respondent: 15198337 / Jack Tallick  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/402  Respondent: 15198337 / Jack Tallick  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.

But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for its removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

North facing ramps to the A3 at Burnt Common would be a disaster for local communities, which do need to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. E.g. all traffic from London/M25 to Woking would go through Burnt Common, Send and Old Woking. This is not sustainable as this cannot be improved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/1183  Respondent: 15198337 / Jack Tallick  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

The Garlick’s Arch (A43) proposal would double the built area in the locality, and would irrevocably damage the character of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/1185  Respondent: 15198337 / Jack Tallick  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that.

The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous and unsustainable traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the lack of proper infrastructure planning for sites (Policy I1)

The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
### Comment ID: PSLPP16/1187  Respondent: 15198337 / Jack Tallick  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

### Comment ID: PSLPP16/1184  Respondent: 15198337 / Jack Tallick  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. I object to poor air quality concerns (Policy I3)

The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

### Comment ID: PSLPP16/1179  Respondent: 15198337 / Jack Tallick  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

---

Page 2839 of 2855
I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to development in areas which are at risk of flooding (Policy P4)

The Plan does not take adequate account of flood risk as required by National Planning Policy.

The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the Local Plan as the development proposed is **not sustainable** (Policy S1)

13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially Ripley, Send and Clandon. The local communities don’t need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Plan has nothing to improve the infrastructure for Garlick’s Arch.

The development should be in urban areas where there is sustainable transport.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

---

1. I object to the Borough Wide Strategy (Policy S2)

GBC’s proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey.

The Plan is unbalanced across the borough; there’s too much development in the north east of the borough (Wisley [A35], Ripley/Send [A43] and Clandon [A25]). 36% of all the Plan’s new housing is proposed in this area, which has only 11% of the existing housing.

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages.

Answer (if comment is on questions 1-7 of the questionnaire): ()

7) Policy A44. 1.9. ha land west of Winds Ridge and Send Hill designated for 4- homes and 2 travellers pitches. This has not been consulted upon. The subsoil contains documented unsafe landfill waste and the site is inappropriate due to the narrow country road, with insufficient access to the site.

I strongly OBJECT to all of these plans and feel it goes completely against honouring your repeated election promises to protect the green belt!

I would like all my comments to be seen by the inspector.

Please do the right thing and save Send and Ripley's hugely important Green Belt. I feel it is important to honour promises made and that this development Plan will cause a loss of trust by all residents. It will disrupt the idealistic village environment currently enjoyed and destroy the desirability to live in such an incredible area.

Do not destroy the identity of our village.

Act in the interests of the current residents.

I object to policy 2 at paragraph 4.3.15 to inset Send business park from green belt because its inappropriate development in an area with very poor access, the most narrow and restrictive road in the area and it you see the impact a single box van causes from either direction never mind a juggernaut then you will realise the futility of this application, its an area of outstanding natural beauty, and is also an old non conforming user in an area it should never have been developed in.

Finally, I cannot believe I voted for you. Your lack of support for locals makes your positions on the local council untenable. Please resign your position, as come the next election I will be voting for any one but you guys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to policy A42 Clockbarn nursery tannery lane because the increase to 60 homes as even 45 homes would bring far too much traffic to a road that is nearly impossible to exit on to the main road. Assuming 2 cars per home, this would bring 120 cars which would bring grid lock to central Send.

This increase completely ignores all previous objections.

The locality is already subject to local flooding - which will be made worse, which the developers will get away with, the local council will ignore and the local residents have to put up with yet again.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to policy A43 Garlicks Arch Send Marsh because this increase completely ignores all previous objections, the traffic is already terrible up to the shell roundabout at to the junction opposite garlicks arch at send march road, it will gridlock traffic all through send and back to old woking. [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]. Green belt should always be protected, this is a travesty that our children and grandchildren will blame you all for, Ripley and send will no longer be villages but a town we might as well rename as RIPSENDOFFLY which if approver is what you have done, who would want to buy a home on land with polluted land (lead shot) lets see you and the developer cover that one up to purchasers, ancient wood land and frequent flooding which will be made much worse.

We object to Guildford Borough Council's draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:
- destroy views from the Hog's Back ridge - a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green belt increase tail backs on the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford's pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a lifelong bird enthusiast and nature lover, member of the RSPB and member of the Guildford Group of the RSPB since 2001, the aspects of moving to Guildford that have brought me the most pleasure are the proximity to areas of natural beauty and the abundance of wildlife.

On regular walks across the fields around Blackwell Farm earmarked for development in Site A26 we have watched large flocks of migrating redwing and fieldfare, heard owls, cuckoos, and skylarks in abundance, and often glimpsed linnets, yellowhammers and families of deer, disappearing in and out of the cornfield. In summer, the incessant skylark song accompanied by glimpses of deer amongst the golden corn and rape fields is truly spectacular -- and at times we have also been amazed at the abundance of butterflies.

As skylarks and yellowhammers are both on the endangered (red list) species, and places for them to breed safely are becoming increasingly rare, to rob the wildlife of yet another zone of perfect habitat, as well as outstanding natural beauty, seems at the very least short-sighted and lacking in environmental wisdom. The proposed use would have a devastating impact on the Area of Outstanding Natural Beauty (AONB) from an aesthetic and environmental perspective. There are a number of endangered (red list) species which inhabit the Hogs Back including skylarks, little owls, yellow hammers and curlews.

Having recently (2012) conducted a survey for the BTO to assess the current population of nightingales breeding in the area around Broadstreet/Backside Common and bordering the proposed development site, it was immensely disappointing to find that where for many years they had been sighted and heard, nightingales were not in evidence that summer. To remove a further section of the vital wildlife corridor linking Whitmoor Common SPA, SSSI, Chitty’s Common, Rydes Hill Common, Littlefield Common (SNCI), Broad Street and Backside commons (SNCI) to the Hogs Back AONB, would only exacerbate the increasing problem of urbanisation destroying habitats vital to retaining the diversity of species in our area.

It was encouraging however on a late evening walk last night (17 July 2016) to hear spectacularly beautiful and haunting song from a song thrush, in a thicket immediately adjoining the development site. We have recorded it, should it be of interest to the panel. Will these increasingly uncommon birds still be wishing to inhabit an area taken over by building contractors, diggers and machinery? Once lost from our area, will they then return when so much of their habitat has been destroyed?
I cannot emphasise strongly enough my opposition to this development on environmental and aesthetic grounds. The Hogs Back AONB has taken millenia to be formed, vegetated and inhabited by the current wildlife population. Would this current Borough Council wish to be remembered for destroying a section of this beautiful area and the wide-reaching views that have been so precious to countless generations of Guildfordians and those travelling through our county?

Please will you once again reconsider this development – it cannot be in the best interest of our town and its future inhabitants.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Having looked at the parts of the current draft of the local plan mentioned above, I am writing to support the stated aim of sustainability, and also to support any attempt to maintain diversity of environment within the borough.

1. I see the proposed plan includes the development of much of the riverside through Guildford, a good thing I am sure. However, it must be remembered that biodiversity usually works when rough and/or wild areas are kept, and it may become too organised for much flora and fauna to flourish. The Aldershot Road allotments are quite rough, especially at the top, but also there are many plots which are very diverse, worked as organically as possible, and therefore they need to be protected as in the proposed plan, which is all good. But you do need to address the question of how to promote biodiversity amongst all the proposed new building etc. in places like Woodbridge Meadows. I went past the local cemetery today and although it currently looks as if it needs a bit of tidying up, in fact it is probably a really good thing for the biological infrastructure. Plus, the edges were looking really good, a strip of un-tailored meadow planting by the look of it – excellent. So, actively protect the allotment fields please.

2. May I also point out however, that as an allotment virgin (first season!) we have had to bring a lot of stuff to the allotment to start to get it working. The ground is solid heavy clay and we have added lots and lots of bagged compost just to start it moving after a few years of lying fallow, unworked and largely waterlogged. It is still a major task. We have had to bring in nets and posts against pigeons, roof etc to repair the little old shed, an old plastic water butt from our tiny garden at home, and in the autumn we are looking to ship manure and grit to further help break up the soil. In years to come perhaps the compost we will make on site might be enough and it will look after itself more. This is by way of illustration of the fact that for all this we need the car, and if we are not going to clutter up the surrounding streets we need more than a mere six spaces for parking just outside the bottom of the field. Therefore any development of the brown field site between the allotment field and St Joseph’s Primary School needs to preserve and increase the spaces available for allotmenteers. Lack of parking will kill off the allotments in the end so this needs addressing if the council is to fulfil its statutory duties vis a vis allotments.

3. Please include the word ‘allotments’ in the definition of green infrastructure in Policy I4. para 4.6.31, else they will get ignored and eventually ridden roughshod over. If anything we need more of them not fewer. They are beneficial for getting people out of doors, caring for a patch of land to make it productive, and generally beginning to connect with what nature we have left round here. They learn new skills and make new friends. It is already known that a bit of exercise promotes not just physical health but also mental and emotional health, doctors are even prescribing exercise for this purpose. The production of food which is good for one is a great antidote to buying processed food with too much sugar, salt and fat in it. It indirectly promotes cooking as a skill which most of us need to learn or re-learn. Think how many boxes it ticks!

4. Plus the Aldershot Road allotments has school allotments on it for educational purposes, and I understand is a historic site, having had allotments on it since before WW1.

I am glad to be able to have a patch there.
